(d) A district which has been determined by the commissioner to be out of compliance with the requirements of this section may, within 20 days of the commissioner's determination, request a waiver by the state Board of Education of the imposition by the commissioner of any reduction in state aid payments under (b) or (c) of this section. The request must be submitted to the Legislative Budget and Audit Committee and must be in writing and include an analysis of the reasons and causes for the district's inability to comply with the requirements of this section. The Legislative Budget and Audit Committee shall review the district's request and forward it, along with the committee's recommendations on it, to the state Board of Education which shall either grant or deny the waiver.

(e) The commissioner shall submit an annual report on actions taken by him or the state Board of Education under this section to the Legislative Budget and Audit Committee by April 15 of each year.
(am Sec. 15 ch 26 SLA 1980)

Sec. 14.17.082. Fund Balance changes in school operating fund. (a) Each district having at least 400 instructional units under AS 14.17.031(a) may accumulate a fund balance in the school operating fund of seven percent of its expenditures. Each district having less than 400 instructional units may accumulate a fund balance of 10 percent of its expenditures.

(b) The commissioner shall review the annual audit of each district to ascertain changes in the year-end operating fund balance of the districts, and notify districts and the state Board of Education, through a written report, of any fund balance accumulation greater than that permitted under (a) of this section.

(c) The state Board of Education shall review the reports submitted to it under (b) of this section and submit a report making recommendations with respect to the legislative treatment of the fund balances of those districts to the Legislative Budget and Audit Committee by April 15 of each year.
(am Sec. 15 ch 26 SLA 1980)

Sec. 14.17.090. Estimated average daily membership. Each district shall prepare an estimate of its average daily membership for the fiscal year. In making this estimate, the district shall consider its average daily membership in preceding years, the pattern of growth or decline in preceding years, and other pertinent information available to the district. The result of this estimate is the estimated average daily membership. (Sec. 2.02 ch 164 SLA 1962)

Sec. 14.17.100—14.17.120. Repealed. (Sec 2 ch 238 SLA 1970)

Sec. 14.17.130. Repealed. (Sec. 11 ch 95 SLA 1969)

Sec. 14.17.140. Determination of full and true value by Department of Community and Regional Affairs. (a) To determine the equalized percentage to be applied to basic need under sec. 21 of this chapter, and the matching ratio for required local effort under sec. 71 of this chapter, the Department of Community and Regional Affairs, in consultation with the assessor for each district, shall determine the full value of the taxable real and personal property in each district. Exemptions granted under ch. 129, SLA 1957, known as the Alaska Industrial Incentive Act (AS 43.25), shall be honored. If there is no local assessor or current local assessment for a district, then the Department of Community and Regional Affairs shall make the determination of full value from information available. In making the determination, the Department of Community and Regional Affairs shall be guided by AS 29.53.060. The determination of full value shall be made before October 1 and sent by certified mail, return receipt requested, before that date to the president of the school board in each district. Duplicate copies shall be sent to the commissioner. The governing body of the borough or city which is the district may obtain judicial review of the determination by filing a motion in the superior court of the judicial district in which the district is located within 30 days after receipt of the determination. The superior court may modify the determination of the Department of Community and Regional Affairs only upon a finding of abuse of discretion or upon a finding that there is no substantial evidence to support the determination.

(b) Motor vehicles subject to the motor vehicle registration tax under AS 28.10.255 shall be treated as taxable property for purposes of (a) of this section. (Sec. 2.07 ch 164 SLA 1962; am Sec. 2 ch 95 SLA 1969; am Sec. 6 ch 238 SLA 1970; am Sec. 9 ch 200 SLA 1972; am Sec. 1 ch 218 SLA 1976; am Sec. 2 ch 256 SLA 1976)

(c) To determine the debt-to-valuation ratio to be applied to the determination of state aid for school construction under AS 43.18.105 — 43.18.135, the Department of Community and Regional Affairs, in consultation with the responsible financial officer of each municipality which is a school district, shall annually determine the debt of the municipality and report the determination to the mayor of the municipality and the commissioner of the Department of Education. The determination shall be made by October 1 of each year and shall report the outstanding debt as of July 1 each year. (am Sec. 14 ch 147 SLA 1978)

Sec. 14.17.150. Duty of commissioner to examine and tabulate computations. (a) The commissioner shall examine the preliminary reports submitted by each district to determine that they are correctly computed. If the allotments are incorrectly computed, the commissioner shall either (1) obtain a correct computation from the district, or (2) make a correct computation based on information available to him, and give notice of the corrected computation to the district. The commissioner shall review supplemental program applications and notify the district whether its supplemental program is approved for inclusion in its foundation program computations.

(b) The commissioner shall reduce these computations to a report in tabular form or another form helpful in examining the computations of the districts and shall transmit the report to the governor. The commissioner shall maintain additional copies of this report in his office as a matter of public record. This report shall be entitled "Public School Foundation Program Computations." (Sec. 2.08 ch 164 SLA 1962; am Sec. 7 ch 238 SLA 1970)

Article 3. Procedure for Payment of Public School Foundation Funds to Districts

Section
160. Allocation of funds on preliminary computations
170. Payment under adjusted computations
180. Payment under final computations
190. Restrictions governing receipt and expenditure of money from public school foundation account

Sec. 14.17.160. Allocation of funds on preliminary computation. The commissioner shall determine the state aid for each school district on the basis of the pre-fiscal year computations. Beginning July 15 of the fiscal year and on the 15th of each month, for seven successive months, one-twelfth of each district's state aid shall be distributed. (Sec. 3.01 ch 164 SLA 1962; am Sec. 3 ch 95 SLA 1969; am Sec. 8 ch 238 SLA 1970)

Sec. 14.17.170. Payment under adjusted computations. Each district shall make a report at the end of the first nine weeks of school, which contains a new estimate of its average daily membership for the fiscal year and other information which will aid the commissioner in making a more accurate determination of each district's state aid. This new estimate and information of average daily membership shall be the basis for the computation and distribution of each district's state aid for the balance of the fiscal year. The commissioner shall, on the basis of this new estimate and information, make a recomputation of each district's state aid. Before December 2, the commissioner shall notify each district of changes made in its state aid. The commissioner shall also determine whether the money in the public school foundation account is sufficient to meet each district's state aid for the fiscal year, and, if the money is not sufficient, he shall immediately inform the governor of the amount of additional appropriation he estimates will be necessary to carry out the public school foundation program for the rest of the fiscal year. Beginning February 15 and on the 15th of each subsequent month, one-fifth of the recomputed balance of each district's state aid shall be distributed. However, one-half of the June payment shall be withheld pending a final determination of the district's state aid.

(Sec. 3.02 ch 164 SLA 1962; am Sec. 1 ch 169 SLA 1968; am Sec. 4 ch 95 SLA 1969; am Sec. 9 ch 238 SLA 1970; am Sec. 1 ch 135 SLA 1975, effective July 1, 1975)

Sec. 14.17.180. Payment under final computation. Before June 16 each district shall transmit to the commissioner a final computation of the district's state aid. The commissioner shall process each district's computation in the manner provided by AS 14.17.150(a). However, in no event may the entitlement of a school district to state aid under AS 14.17.021 be less than that computed under this section for the preceding year, except as otherwise provided in AS 14.17.031, or under AS 14.17.170, whichever is greater. Additional state aid shall be obligated by the commissioner before June 30. If the district received more state aid money than it was entitled to under this chapter, it shall immediately, after notice from the commissioner of the overpayment, remit the amount of overpayment to the commissioner to be returned to the public school foundation account.

(Sec. 3.03 ch 164 SLA 1962; am Sec. 5 ch 95 SLA 1969; am Sec. 10 ch 238 SLA 1970; am Sec. 2 ch 135 SLA 1975, effective July 1, 1975; am Sec. 16 ch 26 SLA 1980)

Sec. 14.17.190. Restrictions governing receipt and expenditure of money from public school foundation account. (a) The public school foundation money distributed to a district during a year shall be received, held, and expended by the district subject to the provisions of law and regulations promulgated by the department.

(b) Each district shall maintain financial records of the receipt and disbursement of public school foundation money and money acquired from local effort. The records must be in the form required by the commissioner and are subject to audit by the commissioner or the board at any time. (am Sec. 6 ch 95 SLA 1969)

Article 4. General Provisions.

Section		Section	
200.	Regulations	220.	Purpose
205.	State aid to districts operating approved school food service programs	225.	Construction and implementation of chapter
210.	State aid to newly established district schools	230.	Repealed
215.	Repealed.	240.	Repealed
		250.	Definitions

Sec. 14.17.200. Regulations. The department shall promulgate regulations to implement this chapter. (Sec. 4.01 ch 164 SLA 1962; am Sec. 6 ch 98 SLA 1966)

Sec. 14.17.205. State aid to districts operating approved school food service programs. A school district that qualifies for and provides free and reduced-price lunches to students who qualify under the Federal Nutrition Act shall receive state aid in an amount for each free or reduced-price meal equal to the federal allowances multiplied by the school district's area differential in sec. 51 of this chapter. (am Sec 11 ch 90 SLA 1977)

Sec. 14.17.210. State aid to newly established district schools. (a) A regional educational attendance area school which becomes a city or borough district school is considered a regional educational attendance area school for purposes of financial support until the expiration of a complete fiscal year after the date on which the school becomes a city or borough district school. This subsection does not prevent a local government from spending money to contribute to the financial support of a regional educational attendance area school which becomes a city or borough district school.

(b) For each subsequent fiscal year, the state shall disburse to the city or borough school district only the money to which the district is entitled under the public school foundation program.

(c) [deleted]

(Sec. 5.02 ch 164 SLA 1962; am Sec. 25 ch 53 SLA 1973; am Sec. 13 ch 124 SLA 1975)

Sec. 14.17.215. Repealed. (am Sec. 20 ch 26 SLA 1980)

Sec. 14.17.220. Purpose. It is the intention of the legislature, in enacting this public school foundation program, to assure an adequate level of educational opportunities for those in attendance in the public schools of the state. This chapter shall not be interpreted as preventing a public school district from providing educational services and facilities beyond those assured by the foundation program. (Sec. 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of secs. 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under secs. 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) (Repealed Sec. 1 ch 79 SLA 1971)

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of sec. 215 of this chapter may be appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under sec. 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon sec. 215 of this chapter.

(e) (Sec. 8 ch 95 SLA 1969; am Sec. 1 ch 79 SLA 1971; Repealed Sec. 1 ch 79 SLA 1971)

(f) Funds necessary to carry out the provisions of sec. 205 of this chapter may be appropriated annually to the Department of Education. If amounts appropriated are insufficient to meet the allocations authorized under sec. 205 of this chapter, such funds as are available shall be distributed pro rata among eligible districts. (am Sec 12 ch 90 SLA 1977)

Sec. 14.17.230. Repealed. (Sec. 2 ch 71 SLA 1972)

Sec. 14.17.240. Repealed. (Sec. 2 ch 71 SLA 1972)

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district or regional educational attendance area. (am Sec. 17 ch 26 SLA 1980)

(4) "elementary school" means a school consisting of grades one through eight, kindergarten through eight, or an appropriate combination of grades within this range;

(5) "fiscal year" means the year beginning July 1 and ending June 30 for which allotments and entitlements are computed or distributed;

(6) "pre-fiscal year" means the year immediately before the fiscal year;

(7) Repealed. (Sec. 3 ch 238 SLA 1970)

(8) "public school foundation account" means the account created by section 10 of this chapter for use in financing education in public elementary and secondary schools;

(9) "secondary school" means a school of grades seven through twelve, or an appropriate combination of grades within that range; when grades seven, eight, nine, or ten are organized separately as a middle or junior high school, or grades ten through twelve are organized separately as a senior high school, each school is considered a separate secondary school for the purposes of this chapter if

(A) the school is conducted in a separate school plant facility;

(B) the school is accredited by the Northwest Accrediting Association;

(C) the school, if a middle or junior high school, includes a minimum ADM of 10 students in any combination of grades seven, eight or nine, if the school was in operation before July 1, 1980; or

(D) the school, if a middle or junior high school, includes a minimum ADM of 20 students in any combination of grades seven, eight or nine, if the school first began operation on or after July 1, 1980;

(Repealed and reenacted Sec. 18 ch 26 SLA 1980)

(10) Repealed. (Sec. 3 ch 238 SLA 1970)

(11) "taxable real and personal property" means all real and personal property taxable under the laws of the state, but does not include household goods and personal effects;

(12) Repealed. (Sec. 3 ch 238 SLA 1970)

(13), (14), (15), and (16) Repealed. (Sec. 2 ch 40 SLA 1971)

(17) "ADM full-time equivalent" means the quotient of the aggregate periods of pupil membership per day in specified classes, divided by the number of class periods in the school day;

(18) "instructional unit" means the aggregate of all direct and indirect services necessary to provide a standard level of instruction for a group of pupils;

(A) "direct services" include, but are not limited to supplying teacher services, textbooks, reference materials, pupil and teacher supplies, as well as utilities and custodial services;

(B) "indirect services" are those auxiliary or supporting functions that complement direct services and include, but are not limited to administration, transportation, food, attendance and activities;

(C) "instructional unit" does not include items of community service, capital outlay or debt service.

(Sec. 4.02 ch 164 SLA 1962; am Sec. 7, 8 ch 98 SLA 1966; am Sec. 3 ch 153 SLA 1966; am Sec. 18 ch 69 SLA 1970; am Sec. 3 & 11 ch 238 SLA 1970; sections repealed Sec. 2 ch 40 SLA 1971; am Sec. 14 ch 124 SLA 1975)

(19) "weighted ADM" means the number of students in average daily membership in an educational program, adjusted to reflect the level of service required by them in that program as determined by the department. (am Sec. 8 ch 115 SLA 1978)

MEMORANDUM

To: All House Members

From: Mae Tischer, Co-Chairperson, House HESS MT

RE: CS for HB 73, Supplemental Appropriations to D.O.E.

The new fiscal note of CS HB 73 reduces the amount of the original bill by approximately 11.4 million dollars. The attached documents are for your reference.

A brief history of the legislation shows that D.O.E. presented a fiscal note of 33.9 million with the original HB 73 requesting a supplemental in the amount of 33.7 million. Comparing D.O.E.'s fiscal note and breakdown with the 22.3 million requested in CSHB 73:

1. Last session, there was a deliberate shortfall from the requested full funding entitlement which totaled 14.4 million. The intent of this deliberate action taken by the Finance Committee and the Department was to send an urgent message to all school districts, asking them, as in all other state operated categories, to take necessary steps in cutting back costs due to a drastic reduction in State revenues.

2. As predicted, a 38.5% decrease in State revenues occured from Dec. 81 to Dec. 82. Comparing revenues for the first six months of the current fiscal year with the revenues of the first six months of the previous year, the impact on the State has been a decrease of 21.17% thus far.

3. Consequently, the underfunding of last year's request was necessary. CS HB 73 protects the integrity of the '82 legislation.

4. The major validation for the supplemental request is to cover unforeseen costs, such as those earmarked specifically for enrollment increases.

5. Once again, the HESS Committee did not intend to provide additional funds for school district reorganization, as in the 1.8 million dollar category for new junior high schools (attachment B) or to enhance program expansion as in the special education program increases of 2.5 million dollars (attachment E and E-1).

6. These two categories were excluded from the CS for HB 73 because the revised figures produced by the school districts as mandated in AS 14.17.170 by November 1982 showed expanded adjustments and increases.

7. In review, the formula funding levels on which the school district budgets are based can be increased or decreased by various categories. For example, in the case of the 1.8 million category, a secondary (junior high) student allotment is higher than an elementary student allotment, thereby enhancing a district's revenue picture.

8. In regards to the newly created junior high levels cited in attachment B, there is little justification for the revised figures as no new secondary education buildings have been constructed to justify the new junior high levels requested in the FY 83 supplemental.

9. There is great concern over the deletion of special education in the appropriation and its impact on across the board cuts. There is no cause for concern. As testified to by a D.O.E. fiscal analyst, funding will continue at 96% of the full entitlement formula with th 22 million dollar supplemental, as has been the case since the beginning of FY 83, continuing the 4% decrease mandated by last year's Legislature and Finance Committee.

10. As with secondary students, special education students receive a greater allotment than general students. Revisions in this area can also increase a school district's revenue picture and entitlement. Attachment E-1 shows that revised figures impacted special education by 12 units.

11. An average cost of educating a child in the REAA areas (transferred from the BIA) is $65,000. Therefore, 2.5 million is included in the BIA transfer request of 7.9 million dollars.

In responding to the school districts of our respective areas, these concerns can be laid to rest with the help of this explanation. It is certainly not the intent of the committee to force school districts to lay-off teachers or deny our children their rights to public education, nor will this be necessary under present funding formulas. For our childrens' future, we must be fiscally responsible immediately, and not pass the burden of cumulative debt to future generations.

This CS is an attempt to do just that, fill an immediate need based on increased enrollments and separate category and reorganization increases on their own merits.

It is the intent of the House HESS Committee to provide for, with this supplemental appropriation, only those unanticipated contingencies occassioned by unanticipated enrollment increases, the BIA transfer of schools to Alaska school districts and unforseen complications of the legislative mandate to scale oown education spending because of reduced state revenues.

It is not the intent of the HESS Committee to provide additional funds to enhance program expansion, school district reorganizing and other programs or procedures designed primarily to enhance the school district revenue picture.

Requested by House HESS Date 1/25/83

MEMORANDUM State of Alaska

TO: Ron Lehr, Director
Division of Budget & Management
Office of the Governor

DATE: December 20, 1982

FILE NO:

TELEPHONE NO: 465-2875

FROM: Marshall L. Lind
Commissioner
Department of Education

SUBJECT: Request for Restoration of Budget Request

The Department of Education requests consideration be given by the Governor to support full funding of the $406,185.1 FY 83 departmental budget request for Financial Support BRU by restoring the $14,431.8 reduction appearing in the final FY 83 budget. Distribution by component of the restored appropriation is as follows:

Component	Amount
Student ADM Support	$7,779.1
Special Education Adjustment	2,650.8
Vocational Ed. Adjustment	1,297.6
Correspondence Study - DOE	96.0
Correspondence Study - Local	299.8
Bilingual Program Adjustment	604.7
Supplemental Equalization Aid	1,703.7
TOTAL	$14,431.8

$14,431.8 x 50% = 7,215.9

Memo

DATE

TO All House Members

FROM M.T. Co-Chair. House H&S.

RE CS for HB 73, Supplemental Approp to DOE

→In an attempt to explain ~~the~~ the new fiscal note of CS HB 73 which reduced the amt. of the original bill by approp 11.4 million dollar, the attached documents for reference are being circulated. ~~and discussed as follows:~~

→ ~~The original~~ A brief history of the legislation shows that D.O.E. presented a fiscal note of 33.9 million with the original HB 73 requesting a supp in the amt of 33.7 million. ~~In comparing~~ the ~~new~~ D.O.E. fiscal note & breakdown with the 22.3 mill requested in CSHB 73; the following explanations by catagory ~~were~~ were derived when comparing)

~~First of all~~, last session there was a deliberate shortfall from the full funding entitlement ~~requested~~ which totaled 14.4 mill. This deliberate shortfall action was intended to send ~~sent by the~~ ~~Governor as well as the Senate Committee~~ for consideration taken by the Senate Committee & the Dept. and an urgent message to all school districts, asking them, as in all other state operated catagories, to take the necessary steps in cutting back costs due to a drastic reduction in State Revenues. As predicted, ~~to expect~~, a 38.5% decrease in state revenues ~~in comparing Dec 82 totals w/ Dec 81 totals occured by~~ ~~Dec of 82~~ from Dec 81 to Dec of 82. ~~For the first~~ ~~6 months of the current fiscal year~~ In comparing revenues

for the 1st 6 months of the current fiscal year with the revenues of the 1st 6 months of the previous year, the state has been ~~impacted by~~ a decrease of 21.17% ~~from last~~ directly. Consequently, the shortfall of last years request was a necessary step.

The major thrust and validation for the supplemental request must be to cover unforseen costs, such as those earmarked specifically for enrollment increases. Once again, it was not the intent of the HESS Committee to provide any additional funds for school district reorganization ~~to enhance program expansion~~ as in the case of the 1.8 mill dollar catagory for new junior high schools (attachment B) or to enhance program expansion as in the spec. educ. program increase of 2.5 mill (attachment E & E-1).

These two ~~compound~~ catagories were excluded from the CS for HB 73 because the revised figures ~~provided~~ which were produced by the school districts as mandated in AS 14.17.170 by Nov of 82, showed ~~unprecedented~~ expanded adjustments and increases. In ~~explanation~~ review, the formula funding levels for which the school districts budgets are based, can be increased ~~by those two~~ proposed by various catagories. As in the case of the 1.8 million, a secondary (Junior/Sr) student allotment is higher than an elementary ~~ratio~~ student allotment ~~thereby~~ ~~making it~~ thereby enhancing a districts revenue picture.

In the case of the newly created junior high levels cited in Attachment B, there could be little justification for the revised figures as there have been no new secondary education bldgs constructed to justify the new junior high levels requested in the FY83 supplemental.

In the area of special education there has been much concern over its allocation and impact on cost cuts. This is not the case. As testified to by a DOE fiscal analyst, with the 22 mill dollar supplemental, funds will be certain at 96% of the full entitlement formula; continuing the 4% decrease mandated by last years finance committee and Legislature. As in the manner described above, spec educ. students receive more of an allotment than general students. Revisions in this area can also increase a school districts revenue picture & entitlement. Attachment E-1 shows that revised figures imported special educ by 12 units. An average cost of educating a child in the REAA areas (transfered from the BIA) is $65,500. Therefore 2.5 million is included in the BIA Transfer request of 7.9 million.

In responding to the school districts & our respective areas, hopefully some of these concerns can be laid to rest with the help of this explanation. It was certainly not the intent of the committee

force school districts [redacted] into massive lay-offs of teachers or deny our school children their right to public education. For our children's future, we must be fiscally ~~responsible~~ responsible immediately, and not pass on the burden of ~~debt~~ cumulative debt to future generations. This CS is an attempt to do just that; fill an immediate need based on increased enrollments and seperate catagory increases and reorganizations on their own merits.

February 1, 1983

MEMORANDUM

To: All House Members

From: Mae Tischer, Co-Chairman, House HESS

RE: CS for HB 73, Supplemental Appropriations to D.O.E.

In an attempt to explain the new fiscal note of CS HB 73 which reduced the amount of the original bill by approximately 11.4 million dollars, the attached documents are being circulated for reference.

A brief history of the legislation shows that D.O.E. presented a fiscal note of 33.9 million with the original HB 73 requesting a supplemental in the amount of 33.7 million. The following explanations by category were derived when comparing D.O.E.'s fiscal note and breakdown with the 22.3 million requested in CS HB 73:

Last session, there was a deliberate shortfall from the requested full funding entitlement which totaled 14.4 million. The intent of this deliberate action taken by the Finance Committee and the Department was to send an urgent message to all school districts, asking them, as in all other state opeated categories, to take necessary steps in cutting back costs due to a drastic reduction in State revenues. As predicted, a 38.5% decrease in State revenues occured from Dec. 81 to Dec. 82. Comparing revenues for the first six months of the current fiscal year with the revenues of the first six mnonths of the previous year, the impact on the State has been a decrease of 21.17% thus far. Consequently, the underfunding last year's request was necessary.

The major validation for the supplemental request is to cover

unforeseen costs, such as those earmarked specifically for enrollment increases. Once again, the HESS Committee did not intend to provide additional funds for school district reorganization, as in the 1.8 million dollar category for new junior high schools (attachment B) or to enhance program expansion as in the special education program increases of 2.5 million dollars (attachment E & E-1).

These two categories were excluded from the CS for HB 73 because the revised figures produced by the school districts as mandated in AS 14.17.170 by November 1982 showed expanded adjustments and increases. In review, the formula funding levels on which the school district budgets are based can be increased or decreased by various categories. For example, in the case of the 1.8 million category, a secondary (junior high) student allotment is higher than an elementary student allotment, thereby enhancing a district's revenue picture.

In regards to the newly created junior high levels cited in attachment B, there is little justification for the revised figures as no new secondary education buildings have been constructed to justify the new junior high levels requested in the FY 83 supplemental.

There is great concern over the deletion of special education in the appropriation and its impact on across the board cuts. There is no cause for concern. AS testified to by a D.O.E. fiscal analyst, funding will continue at 96% of the full entitlement formula with the 22 million dollar supplemental; continuing the 4% decrease mandated by last year's Legislature and Finance Committee. As with secondary students, special education students receive a greater allotment than general students. Revisions in this are can also increase a school district's revenue picture and entitlement. Attachment E-1 shows

that revised figures impacted special education by 12 units. An average cost of educating a child in the REAA areas (transferred from the BIA) is $65,000. Therefore, 2.5 million is included in the BIA transfer request of 7.9 million dollars.

In responding to the school districts of our respective areas, hopefully some of these concerns can be laid to rest with the help of this explanation. It was certainly not the intent of the committee to force school districts to lay-off teachers or deny our school children their rights to public education. For our children's future, we must be fiscally responsible immediately, and not pass on the burden of cumulative debt to future generations. This CS is an attempt to do just that, fill an immediate need based on increased enrollments and separate category and reorganization increases on their own merits.

Sent copy to Milo also.

RE: optional funding of supplemental appropriation monies in HB 73 (33.6 million)

In contacting another attorney for another opinion regarding the supplemental mentioned above: the following options appear to be appropriate as different methods of funding the shortfalls:

1). Under the title of the bill before the committee today (HB 73) there would be a problem in earmarking the funds to specific districts who prove shortfalls. Any money that is appropriate to the foundation fund must be pro-rated (paid to to all districts accross the board).

If the committee chooses to simply cut the amount requested and still pro-rate the funds, the existing title of the bill is sufficient to do this and a committee substitute would suffice.

2). If the committee wishes to catagorize funds and supplementally appropriate to specific districts, a new bill, introduced by the HESS Committee should be re-written with funds being designated to individual districts for specific purposes.

Mr. Bob Greene was correct in stating that funds must be provided for on a pro-rata basis only if the foundation fund is the account earmarked for the appropriation, consequently, there is a way of writing the legislation to get around that across-the-board mechanism.

7 am mtg w/ Tuskin Fritz Palmer

1) Seperate school districts budgets.

2) BIA ~~Rep~~ to mtg.

3) legal services - gues to atty re HB 73
new programs ? 6.7 mill enrollment increases -

Revised 1/24/83

Analysis of FY-83 Foundation Supplemental

FY-83 Request (estimate)	406,089.5
FY-83 Appropriation	391,753.3
FY-83 Shortfall	(14,431.8)

FY-83 Revised Reports Increases by Categories:

1. Enrollment Increases (estimate)	6,407.7
2. New Secondary Programs	(1,808.4)
3. BIA School Transfers	7,901.6
4. New Tanana City School District	855.4
5. Special Education Program Increases	(2,558.5)
Total Increases	19,531.6
Add Original Shortfall	14,431.8
Total Shortfall	33,964.4*

Out of seven Department supplemental requests transmitted to the Governor, the State Board of Education has prioritized the $19,531.6 request first, and the $14,431.8 portion of this supplemental sixth.

*For the record, a January 7, 1983, hearing officer's recommended decision on the way the Department calculates supplemental equalization aid under AS 14.17.023 has resulted in an additional shortfall of of $1,106.2. We have been advised by the Attorney General to accept the hearing officer's recommended decision.

It is the intent of the House HESS Committee to provide for, with this supplemental appropriation, only those unanticipated contingencies occassioned by unanticipated enrollment increases, the BIA transfer of schools to Alaska school districts and unforseen complications of the legislative mandate to scale down education spending because of reduced state revenues.

It is not the intent of the HESS Committee to provide additional funds to enhance program expansion, school district reorganizing and other programs or procedures designed primarily to enhance the school district revenue picture.

MEMORANDUM

To: All House Members

From: Mae Tischer, Co-Chairperson, House HESS MT

RE: CS for HB 73, Supplemental Appropriations to D.O.E.

The new fiscal note of CS HB 73 reduces the amount of the original bill by approximately 11.4 million dollars. The attached documents are for your reference.

A brief history of the legislation shows that D.O.E. presented a fiscal note of 33.9 million with the original HB 73 requesting a supplemental in the amount of 33.7 million. Comparing D.O.E.'s fiscal note and breakdown with the 22.3 million requested in CSHB 73:

1. Last session, there was a deliberate shortfall from the requested full funding entitlement which totaled 14.4 million. The intent of this deliberate action taken by the Finance Committee and the Department was to send an urgent message to all school districts, asking them, as in all other state operated categories, to take necessary steps in cutting back costs due to a drastic reduction in State revenues.

2. As predicted, a 38.5% decrease in State revenues occured from Dec. 81 to Dec. 82. Comparing revenues for the first six months of the current fiscal year with the revenues of the first six months of the previous year, the impact on the State has been a decrease of 21.17% thus far.

3. Consequently, the underfunding of last year's request was necessary. CS HB 73 protects the integrity of the '82 legislation.

4. The major validation for the supplemental request is to cover unforeseen costs, such as those earmarked specifically for enrollment increases.

5. Once again, the HESS Committee did not intend to provide additional funds for school district reorganization, as in the 1.8 million dollar category for new junior high schools (attachment B) or to enhance program expansion as in the special education program increases of 2.5 million dollars (attachment E and E-1).

6. These two categories were excluded from the CS for HB 73 because the revised figures produced by the school districts as mandated in AS 14.17.170 by November 1982 showed expanded adjustments and increases.

7. In review, the formula funding levels on which the school district budgets are based can be increased or decreased by various categories. For example, in the case of the 1.8 million category, a secondary (junior high) student allotment is higher than an elementary student allotment, thereby enhancing a district's revenue picture.

8. In regards to the newly created junior high levels cited in attachment B, there is little justification for the revised figures as no new secondary education buildings have been constructed to justify the new junior high levels requested in the FY 83 supplemental.

9. There is great concern over the deletion of special education in the appropriation and its impact on across the board cuts. There is no cause for concern. As testified to by a D.O.E. fiscal analyst, funding will continue at 96% of the full entitlement formula with th 22 million dollar supplemental, as has been the case since the beginning of FY 83, continuing the 4% decrease mandated by last year's Legislature and Finance Committee.

10. As with secondary students, special education students receive a greater allotment than general students. Revisions in this area can also increase a school district's revenue picture and entitlement. Attachment E-1 shows that revised figures impacted special education by 12 units.

11. An average cost of educating a child in the REAA areas (transferred from the BIA) is $65,000. Therefore, 2.5 million is included in the BIA transfer request of 7.9 million dollars.

In responding to the school districts of our respective areas, these concerns can be laid to rest with the help of this explanation. It is certainly not the intent of the committee to force school districts to lay-off teachers or deny our children their rights to public education, nor will this be necessary under present funding formulas. For our childrens' future, we must be fiscally responsible immediately, and not pass the burden of cumulative debt to future generations.

This CS is an attempt to do just that, fill an immediate need based on increased enrollments and separate category and reorganization increases on their own merits.

Title An Act...Supplemental Appropriation to the Dept. of Education

Requested by House HESS Date 1/25/83

II. FISCAL DETAIL

Agency Affected Education

Program Category Affected Elementary & Secondary

BRU, Program, or Subprogram(s) Affected Foundation Support Districts

MEMORANDUM State of Alaska

TO: Ron Lehr, Director
Division of Budget & Management
Office of the Governor

DATE: December 20, 1982

FILE NO:

TELEPHONE NO: 465-2875

FROM: Marshall L. Lind
Commissioner
Department of Education

SUBJECT: Request for Restoration of Budget Request

The Department of Education requests consideration be given by the Governor to support full funding of the $406,185.1 FY 83 departmental budget request for Financial Support BRU by restoring the $14,431.8 reduction appearing in the final FY 83 budget. Distribution by component of the restored appropriation is as follows:

Component	Amount
Student ADM Support	$7,779.1
Special Education Adjustment	2,650.8
Vocational Ed. Adjustment	1,297.6
Correspondence Study - DOE	96.6
Correspondence Study - Local	299.8
Bilingual Program Adjustment	604.7
Supplemental Equalization Aid	1,703.2
TOTAL	$14,431.8

$14,431.8 x 50% = 7,215.9

MEMORANDUM

To: All House Members

From: Mae Tischer, Co-Chairperson, House HESS MT

RE: CS for HB 73, Supplemental Appropriations to D.O.E.

The new fiscal note of CS HB 73 reduces the amount of the original bill by approximately 11.4 million dollars. The attached documents are for your reference.

A brief history of the legislation shows that D.O.E. presented a fiscal note of 33.9 million with the original HB 73 requesting a supplemental in the amount of 33.7 million. Comparing D.O.E.'s fiscal note and breakdown with the 22.3 million requested in CSHB 73:

1. Last session, there was a deliberate shortfall from the requested full funding entitlement which totaled 14.4 million. The intent of this deliberate action taken by the Finance Committee and the Department was to send an urgent message to all school districts, asking them, as in all other state operated categories, to take necessary steps in cutting back costs due to a drastic reduction in State revenues.

2. As predicted, a 38.5% decrease in State revenues occured from Dec. 81 to Dec. 82. Comparing revenues for the first six months of the current fiscal year with the revenues of the first six months of the previous year, the impact on the State has been a decrease of 21.17% thus far.

3. Consequently, the underfunding of last year's request was necessary. CS HB 73 protects the integrity of the '82 legislation.

4. The major validation for the supplemental request is to cover unforeseen costs, such as those earmarked specifically for enrollment increases.

5. Once again, the HESS Committee did not intend to provide additional funds for school district reorganization, as in the 1.8 million dollar category for new junior high schools (attachment B) or to enhance program expansion as in the special education program increases of 2.5 million dollars (attachment E and E-1).

6. These two categories were excluded from the CS for HB 73 because the revised figures produced by the school districts as mandated in AS 14.17.170 by November 1982 showed expanded adjustments and increases.

7. In review, the formula funding levels on which the school district budgets are based can be increased or decreased by various categories. For example, in the case of the 1.8 million category, a secondary (junior high) student allotment is higher than an elementary student allotment, thereby enhancing a district's revenue picture.

8. In regards to the newly created junior high levels cited in attachment B, there is little justification for the revised figures as no new secondary education buildings have been constructed to justify the new junior high levels requested in the FY 83 supplemental.

9. There is great concern over the de'etion of special education in the appropriation and its impact on across the board cuts. There is no cause for concern. As testified to by a D.O.E. fiscal analyst, funding will continue at 96% of the full entitlement formula with th 22 million dollar supplemental, as has been the case since the beginning of FY 83, continuing the 4% decrease mandated by last year's Legislature and Finance Committee.

10. As with secondary students, special education students receive a greater allotment than general students. Revisions in this area can also increase a school district's revenue picture and entitlement. Attachment E-1 shows that revised figures impacted special education by 12 units.

11. An average cost of educating a child in the REAA areas (transferred from the BIA) is $65,000. Therefore, 2.5 million is included in the BIA transfer request of 7.9 million dollars.

In responding to the school districts of our respective areas, these concerns can be laid to rest with the help of this explanation. It is certainly not the intent of the committee to force school districts to lay-off teachers or deny our children their rights to public education, nor will this be necessary under present funding formulas. For our childrens' future, we must be fiscally responsible immediately, and not pass the burden of cumulative debt to future generations.

This CS is an attempt to do just that, fill an immediate need based on increased enrollments and separate category and reorganization increases on their own merits.

FY-83 Request (estimate) ✓	406,089.5
FY-83 Appropriation	391,753.3
FY-83 Shortfall	14,431.5 ~~(14,336.2)~~

FY-83 Revised Reports Increases by Categories:

1. Enrollment Increases (estimate)	6,407.7
2. New Secondary Programs	1,808.4
3. BIA School Transfers	7,901.6
4. New Tanana City School District	855.4
5. Special Education Program Increases	2,558.5
Total Increases	19,531.6
Add Original Shortfall	14,431.5 ~~14,336.2~~
Total Shortfall	~~33,867.8*~~ 33,964.1

Out of seven Department supplemental requests transmitted to the Governor, the State Board of Education has priorititized the $19,531.6 request first, and the $14,336.2 portion of this supplemental sixth.

*For the record, a January 7, 1983, hearing officer's recommended decision on the way the Department calculates supplemental equalization aid under AS 14.17.023 has resulted in an additional shortfall of of $1,106.2. We have been advised by the Attorney General to accept the hearing officer's recommended decision.

Ernestine Griffin

MOTION CARRIED 7-0.

The audioconference was scheduled for Monday, January 10, 1983, at 6:30 p.m. Anchorage time, and the Board directed the department to advise the members of the Screening Committee regarding the time and place in their individual communities to enable members of the State Board to seek further information regarding the selection process.

Don Gray moved and Sue Hull seconded the motion to list the Commissioner Selection Process as an action item for the next regular meeting.

MOTION CARRIED UNANIMOUSLY.

83-89 REVIEW OF FOUNDATION PROGRAM SUPPLEMENTAL REQUEST

Commissioner Lind addressed the Board regarding the Supplemental Request for Foundation Support for FY-83 to cover the shortfall resulting from the decision of the Legislature to not func full entitlement for the school districts, and asked Steve Hole to explain 83-89.1, Debt Retirement Supplemental Request for pre December 31, 1981, Indebtedness; 83-89.2, post December 31, 1981, Indebtedness; and 83-89.3, Miscellaneous FY-83 Supplemental Appropriation Requests.

The Board recessed for lunch at 12:05 p.m. and returned at 1:35 p.m. with the exception of Mr. Kito, who was delayed and arrived at 1:45 p.m.

President Griffin called for continuance of the explanation and discussion of the foundation program, and the Board listed the items in order of priority.

Sue Hull moved and Don Gray seconded the motion to list the supplemental requests by priority as follows:

(1) Foundation support in the sum of $19,314.9;

(2) Prior year claims in the amount of $7.0;

(3) Health insurance costs in the amount of $253.7;

(4) School Activities Association for student travel in the amount of $300.0;

(5) Debt retirement in the amounts of $5,522.0 and $7,577.7

(6) 4% Foundation support in the sum of $14,431.8;

(7) Capital project fund balance transfer of $253.6.

Roll call vote was taken:

83-88 COMMISSIONER SELECTION PROCESS

Diane LeResche explained the operation of the audioconference equipment to the Board in preparation for its conference with members of the Commissioner Selection Screening Committee on Monday, January 10, 1983.

83-90 REVIEW OF EDUCATION FINANCE STUDY

Laraine Glenn, Project Director for the Finance Study, reviewed the process for the study used thus far in the school finance study. This study was put on hold by request of Governor Sheffield pending the appointment of a new State Board of Education.

Dr. Van Slyke explained that policy issues will need to be addressed that will impact school finance, and suggested some options available to the Board. He stated that it is important for the Board to consider the composition of the policy group and the department would have some additional recommendations at a subsequent meeting.

Following discussion by the Board, it was suggested that the department develop internally an alternative plan that could replace the current study.

Don Gray moved and Sue Hull seconded the motion to place the Finance Study on the agenda as an action item at the next meeting.

MOTION CARRIED UNANIMOUSLY.

MEMORANDUM State of Alaska

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-69.1

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Debt Retirement Supplemental Request for pre December 31, 1981 Indebtedness

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all claims for reimbursement under AS 43.18.100 (school construction debt retirement payments).

ISSUE

The department requested $44,103.3 for FY 83 debt retirement reimbursement claims under AS 43.18.100(a)(1)-(3), the two year lag reimbursement program. The legislature appropriated 36,203.3, assuming that that amount, in conjunction with the $7,000.0 appropriated in the Cigarette Tax category, would comprise a total sufficient to meet all claims. Actual claims for reimbursement for FY 83 total $43,781.0, and since the Cigarette Tax appropriation must be separate from the debt retirement appropriation, the debt retirement appropriation is $7,577.7 short.

BACKGROUND AND/OR PERTINENT INFORMATION

Because Cigarette Tax revenues are dedicated for school rehabilitation and renovation projects, there is a tendency to confuse them with school construction debt service payments reimbursement. However, debt retirement reimbursement is made on the basis of claims for payment, and Cigarette Tax revenues are disbursed on an entitlement basis, e.g., not every city and borough district has bonds eligible for debt retirement reimbursement, but all city and borough districts are entitled to receive Cigarette Tax payments. Therefore, the two appropriations must be distributed separately. Because of this distinction, only the actual appropriation for debt retirement could be used to pay the claims for reimbursement leaving a shortfall of 7,577.7 in that account.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with this request.

MEMORANDUM State of Alaska

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89.2

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Debt Retirement Supplemental Request for post December 31, 1981 Indebtedness

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all claims for reimbursement under AS 43.18.100(a)(4), (current year reimbursement of school construction debt retirement payments).

ISSUE

Last year the legislature enacted legislation, (Chapter 92, SLA 1982), which provided for reimbursement to municipalities for school construction debt retirement payments in the same year in which they are made, rather than two years after they are made. The appropriation, based on the Alaska Municipal League estimate of FY 83 claims under this new program, was $13,466.4. Actual claims total $18,988.4, leaving the account $5,522.0 short.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with this request.

MEMORANDUM State of Alaska

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89.3

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: Miscellaneous FY 83 Supplemental Appropriation Requests

ABSTRACT

The department is requesting various supplemental appropriations, in addition to those covered by separate attached memos, totaling $814.3.

ISSUE

1. Every year claims for payment are submitted after the close of the fiscal year, and after all fund balances have been lapsed to the general fund. To pay those claims, a supplemental appropriation must be secured because current year appropriations cannot be used to pay for prior year obligations. This year that total of prior year claims is $7.0.

2. Health insurance costs for employees in the department were raised effective July 1, 1982, after the FY 83 budget had been signed. The cost associated with the increase is $253.7, which was not appropriated for this year.

3. One of the school districts has a capital project fund balance of $253.6 left over from an appropriation for roof repairs. The district would like to use the balance to purchase a building it is presently renting, but legislative concurrence is required.

4. For the past two years, either by special or supplemental appropriations, the Alaska School Activities Association has received $300.0 for student travel to state championships at various locations throughout the state. That amount was not included in the FY 83 appropriation, and we are, therefore, requesting it in the form of a supplemental.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with these requests.

STATE OF ALASKA
DEPARTMENT OF EDUCATION
OFFICE OF THE COMMISSIONER

BILL SHEFFIELD, GOVERNOR

POUCH F
STATE OFFICE BUILDING
JUNEAU, ALASKA 99811
PHONE:

Ron Lehr, Director
Division of Budget & Management
Office of the Governor
Pouch AM
Juneau, Alaska 99811

Dear Mr. Lehr:

The Department of Education requests a $19,314.9 FY 83 general fund supplemental appropriation for Financial Support ERU. This supplemental will be used to fund Foundation Program requirements that exceed the FY 83 continuation level funding requested by the department.

FY 83 Foundation Program Requirements	$425,500.0
FY 83 Department Budget Request	406,185.1
This Supplemental Request	$ 19,314.9

Distribution by component of this supplemental appropriation is as follows:

Component	Amount
Student ADM Support	17,196.5
Special Education Adjustment	4,044.0
Vocational Ed. Adjustment	(2,609.4)
Correspondence Study - DOE	(143.7)
Correspondence Study - Local	830.3
Bilingual Program Adjustment	382.4
Supplemental Equalization Aid	(325.2)
TOTAL	19,314.9

Sincerely,

Marshall L. Lind
Commissioner

MEMORANDUM State of Alaska

File HESS

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Foundation Support

3892 - Steve Lewis

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all school district foundation entitlements.

ISSUE

The legislature appropriated $391,753.3 for FY 83 foundation support; recent final review of district entitlements indicate the total amount needed to fully fund the foundation program will be approximately $425,500.0, leaving a projected shortfall of $33,746.7. Much of the shortfall is a result of the legislature's decision to make the rescission through the budget process rather than through substantive legislation reducing the instructional unit value. In other words, if the legislature had reduced the Instructional Unit value by 3.6%, then the entitlements would be lower. As it is, however, the entitlements are in excess of the money appropriated to pay them.

BACKGROUND AND/OR PERTINENT INFORMATION

The last legislature appropriated funds for foundation support in an amount less than our request. The intent behind the reduction was 1) to appropriate less than the law required, and 2) for the department to request a supplemental appropriation to cover the BIA school transfer impact and new program and new school costs, so that districts would not be required to absorb those demands as well. When the 33 million dollar difference between the appropriation and entitlements is analyzed, it can be explained as follows:

1.	Deliberate underappropriation: Our request minus appropriation	=	14,431.8
2.	BIA Transfer Schools (estimated)	=	7,300.0
3.	Enrollment Increases (estimated)	=	6,700.0
4.	New programs, organizational changes, corrections to the initial report upon which our FY 83 request was based.	=	5,314.9
	TOTAL	=	33,746.7

We have notified the Governor's office of the scope of the shortfall, and requested him to introduce a supplemental appropriation for $19,314.9, and further, to consider a supplemental appropriation for the $14,431.8 the legislature chose not to appropriate.

School Foundation
Formula Fund

Then the 95% fund will continue until Feb 15, 1984.

By Feb 15 of 1985 the legislature must enact a new funding formula for school districts in Alaska.

PROPOSED LANGUAGE FOR A LETTER OF INTENT FOR CH HB 73 (FINANCE)

IT IS THE INTENT OF THE HOUSE FINANCE COMMITTEE THAT IN ADDITION TO THE $ _____ APPROPRIATED IN CS HB 73 (FINANCE) IN GENERAL FUNDS FOR PAYMENTS TO SCHOOL DISTRICTS UNDER THE PUBLIC SCHOOL FOUNDATION PROGRAM (AS 14.17), THAT $ 7,901,600 BE ALLOCATED FROM THE FEDERAL BUDGET IMPACT FUND ESTABLISHED IN CHAPTER 125, SLA 1982, TO COVER THE COST OF TRANSFER OF ALASKAN BIA DAY SCHOOLS FROM THE FEDERAL GOVERNMENT TO THE STATE GOVERNMENT. BOTH AMOUNTS SHALL BE FOR PAYMENTS TO SCHOOL DISTRICTS UNDER THE PUBLIC SCHOOL FOUNDATION PROGRAM (AS 14.17).

It is the intent of the House Finance Committee that in addition to the $17,640,700 appropriated in CSHB 73 (Finance) in general funds for payments to school districts under the public school fundation program (AS 14.17), that $7,901,600 be allocated from the Federal Budget Impact Fund established in Chapter 127, SLA 1982, to cover the cost of transfer of Alaskan B.I.A. day schools from the federal government to the state government. Both amounts shall be for payments to school districts under the public school foundation program (AS 14.17).

Respectfully submitted,

Albert P. Adams, Chairman
House Finance Committee

Kenai Peninsula Borough School District

Classified Association

AFT Local No. 3255C
P.O. Box 1221
Homer, AK 99603

January 2,1983

State Representative Milo Fritz
P.O. Box 158
Anchor Point, AK 99556

Dear Representative Fritz,

The members of our bargaining group are requesting your active support for the necessary Supplemental Appropriation of State Funding for Education. We believe we are addressing the FUTURE of our State!

The impact of the overwhelming enrollment increases, coupled with the turnover of 17 BIA schools to our local districts, has now created a heavy financial burden to our school district,as well as many other school districts in our State for this school year.

The status of the economic picture for the KPBSD, without the necessary appropriations, looks bleak!

Shortfall (already reduced from the original budget)	$ 1,072,796
Dollars normally acquired as the result of 82-83 ADM increase	$ 779,382
Subtotal	$ 1,852,178
Additional revenue lost if BIA school supplemental is not approved by the legislature	$ 1,183,747
Total Deficit	$ 3,035,925

Your timely implementation of these necessary funds early in the 1983 legislative session is imperative. The Kenai Peninsula Borough School District Classified Association genuinely feels it is our State legislature's moral obligation to establish this need as a high priority.

If you need any assistance for this pertinent financial endeavor, the members of our bargaining unit would be honored to assist. You can reach me at 235-8186(work) or 235-8846(home).

Most sincerely,

Gail M. Gibson

NOTES TO DECISIONS

Legislative decides what types of education are to be publicly supported. — In Alaska the power of deciding what types of education are to be publicly supported, either under the School Foundation Act or by tax exemption, is vested with the legislature. McKee v. Evans, Sup. Ct. Op. No. 740 (File No. 1382), 490 P.2d 1226 (1971).

Sec. 14.17.020. State aid.

Repealed by § 1 ch 238 SLA 1970.

Editor's notes. — The repealed section derived from § 1.03. ch. 164, SLA 1962.

Sec. 14.17.021. Basic state aid. (a) The amount of basic state aid for which each district is eligible is calculated by multiplying the instructional unit allotment of the district as established under AS 14.17.051 by the number of allowable instructional units in the district as established under AS 14.17.041.

(b) If permitted under § 5(d)(2) of P.L. 81-874, as amended, (20 U.S.C. 240(d)) and the regulations adopted under it (45 C.F.R. 115.60 — 115.66), the amount of basic state aid to a district may be reduced by up to 80 percent of the entitlement of the district to federal financial assistance under P.L. 81-874, as amended, (20 U.S.C. 236 — 244), for the prior fiscal year. (§ 4 ch 238 SLA 1970; am §§ 1, 2 ch 81 SLA 1975; am §§ 1, 2 ch 173 SLA 1976; am §§ 2, 3 ch 90 SLA 1977; am §§ 3, 4 ch 26 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the section.

NOTES TO DECISIONS

That the legislature has seen fit to delegate certain educational functions to local boards in order that Alaska schools might be adapted to meet the varying conditions of different localities does not diminish constitutionally mandated state control over education under Alaska Const., art. VII, § 1. Macauley v. Hildebrand, Sup. Ct. Op. No. 741 (File No. 1550), 491 P.2d 120 (1971).

Sec. 14.17.022. Funds for centralized correspondence study. Funds for providing centralized correspondence study programs for students not enrolled in an approved school district correspondence study program shall include an appropriation from the public school foundation account in an amount calculated by multiplying the base instructional unit by the total number of instructional units as determined by applying the number of correspondence students to AS 14.17.041(a). (§ 3 ch 190 SLA 1975)

Sec. 14.17.023. Supplemental equalization aid. (a) In addition to basic state aid under AS 14.17.021, each district is entitled to supplemental equalization aid, as determined in (b), (c) and (d) of this section.

(b) The amount of supplemental equalization aid for a district is calculated by mutiplying the ADM of the district as reported for the prior fiscal year under AS 14.17.180 by the amount per ADM calculated in (c) of this section. This amount shall be reduced by the amount of the average local tax contributions per pupil in average daily membership for school operating costs in that district in the prior fiscal year or in the fiscal year ending June 30, 1979, whichever is higher.

(c) The amount per ADM of supplemental equalization aid is calculated as the amount equal to the average local tax contributions per pupil in average daily membership for school operating costs in the city and borough school districts in the prior fiscal year.

(d) The amount of supplemental equalization aid for each district determined in (b) of this section shall be adjusted by the district's instructional unit allotment established in AS 14.17.051. (§ 5 ch 26 SLA 1980)

Sec. 14.17.030. Required local effort.

Repealed by § 11 ch 95 SLA 1969.

Editor's notes. — The repealed section derived from § 1.07, ch. 164, SLA 1962, as amended by § 1, ch. 70, SLA 1963.

Sec. 14.17.031. Instructional units. (a) The total number of instructional units within each school district is the sum of

(1) the number of units for elementary schools and the number of units for secondary schools as determined from AS 14.17.041(a), (b), (c), or (d);

(2) the number of units for vocational education determined from AS 14.17.041(e) as approved by the department;

(3) the number of units from special education determined from AS 14.17.041(f) as approved by the department;

(4) if the district has five or more correspondence pupils enrolled in an approved district correspondence study program, the number of units for correspondence pupils determined by applying the number of correspondence pupils to AS 14.17.041(a); and

(5) the number of units for bilingual education determined from AS 14.17.041(g) as approved by the department.

(b) A school district shall compute separately the number of allowable instructional units for each of its elementary and secondary schools except as provided in (c) of this section.

Sec. 14.17.075. Supplemental allocation.

Repealed by § 1 ch 238 SLA 1970.

Editor's notes. — The repealed section derived from § 2, ch. 125, SLA 1968, and § 2, ch. 95, SLA 1969.

Article 2. Preparation of Public School Foundation Budget.

Section

80 Computation by district
81 Minimum expenditure for instruction
82 Fund balance changes in school operating fund
90 Estimated average daily membership
100 — 130. [Repealed]
140. Determination of full and true value by Department of Community and Regional Affairs
150. Duty of commissioner to examine and tabulate computations

---

Collateral references. — 68 Am. Jur. 2d Schools, §§ 51-108.
78 C.J.S. Schools and School Districts, §§ 83, 90; 79 C.J.S. Schools and School Districts, §§ 325-331.

Sec. 14.17.080. Computation by district. By October 30 of the pre-fiscal year each district shall submit to the commissioner a preliminary report of computations for the following fiscal year of the district's basic need as defined in AS 14.17.021; the amount which it expects to match under the provisions of AS 14.17.071; and the amount for supplemental programs which has been approved for funding consideration by the commissioner. Each district shall make the computations in the manner prescribed by AS 14.17.080 — 14.17.150. The computations are the basis for requesting legislative appropriations and for making preliminary payments under the public school foundation program. (§ 2.01 ch 164 SLA 1962; am § 5 ch 238 SLA 1970)

Revisor's notes. — As a result of the amendments in Chapter 26, SLA 1980, "basic need" is no longer defined in AS 14.17.021. Rather, that section defines "basic state aid." AS 14.17.071 mentioned in this section was repealed by SLA 1980, ch. 26, § 21.

Sec. 14.17.081. Minimum expenditure for instruction. (a) Each district shall budget for and spend a minimum of 55 percent of its school operating expenditures in each fiscal year on the instructional component of the district budget.

(b) The commissioner shall reject a district budget which does not comply with (a) of this section and, unless a waiver has been granted by the board under (d) of this section, shall withhold payments of state aid from that district, beginning with the payment for the second full

month after rejection and continuing until the school board of the district revises the district budget to comply with (a) of this section.

(c) The commissioner shall review the annual audit of each district for compliance with the expenditure requirements of (a) of this section. If the commissioner determines that a district does not meet those requirements, the commissioner shall advise the district of the determination and calculate the percentage of deficiency in required expenditure and deduct that percentage from state aid paid to the district for the current fiscal year, beginning with the payment for the second full month after the determination, unless a waiver has been granted by the board under (d) of this section.

(d) A district which has been determined by the commissioner to be out of compliance with the requirements of this section may, within 20 days of the commissioner's determination, request a waiver by the board of the imposition by the commissioner of any reduction in state aid payments under (b) or (c) of this section. The request must be submitted to the Legislative Budget and Audit Committee and must be in writing and include an analysis of the reasons and causes for the district's inability to comply with the requirements of this section. The Legislative Budget and Audit Committee shall review the district's request and forward it, along with the committee's recommendations on it, to the board which shall either grant or deny the waiver.

(e) The commissioner shall submit an annual report on actions taken by the commissioner or the board under this section to the Legislative Budget and Audit Committee by April 15 of each year. (§ 15 ch 26 SLA 1980)

Revisor's notes. — Throughout the section, the word, "board" was substituted for "state board of education" by the revisor of statutes under the authority of AS 01.05.031 and to conform to AS 14.60.010.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, ch. 58, SLA 1982.

Sec. 14.17.082. Fund balance changes in school operating fund. (a) Each district having at least 400 instructional units under AS 14.17.031(a) may accumulate a fund balance in the school operating fund of seven percent of its expenditures. Each district having less than 400 instructional units may accumulate a fund balance of 10 percent of its expenditures.

(b) The commissioner shall review the annual audit of each district to ascertain changes in the year-end operating fund balance of the districts, and notify districts and the board, through a written report, of any fund balance accumulation greater than that permitted under (a) of this section.

(c) The board shall review the reports submitted to it under (b) of this section and submit a report making recommendations with respect to the legislative treatment of the fund balances of those districts to the

Legislative Budget and Audit Comm
(§ 15 ch 26 SLA 1980)

Article 3. Procedure for Payment of Public School Foundation Funds to Districts.

Section

160. Allocation of funds on preliminary computations
170. Payment under adjusted computations
180. Payment under final computation
190. Restrictions governing receipt and expenditure of money from public school foundation account

---

Collateral references. — 79 C.J.S. Schools and School Districts, §§ 423-427.

Right of school district to maintain action based on misapportionment of school money. 105 ALR 1273.

Determination of school attendance, enrollment, or pupil population for purpose of apportionment of funds. 80 ALR2d 953.

Sec. 14.17.160. Allocation of funds on preliminary computations. The commissioner shall determine the state aid for each school district on the basis of the pre-fiscal year computations. Beginning July 15 of the fiscal year and on the 15th day of each month, for seven successive months, one-twelfth of each district's state aid shall be distributed. (§ 3.01 ch 164 SLA 1962; am § 3 ch 95 SLA 1969; am § 8 ch 238 SLA 1970)

Sec. 14.17.170. Payment under adjusted computations. Each district shall make a report at the end of the first nine weeks of school, which contains a new estimate of its average daily membership for the fiscal year and other information which will aid the commissioner in making a more accurate determination of each district's state aid. This new estimate and information of average daily membership shall be the basis for the computation and distribution of each district's state aid for the balance of the fiscal year. The commissioner shall, on the basis of this new estimate and information, make a recomputation of each district's state aid. Before December 2, the commissioner shall notify each district of changes made in its state aid. The commissioner shall also determine whether the money in the public school foundation account is sufficient to meet each district's state aid for the fiscal year, and, if the money is not sufficient, the commissioner shall immediately inform the governor of the amount of additional appropriation the commissioner estimates will be necessary to carry out the public school foundation program for the rest of the fiscal year. Beginning February 15 and on the 15th of each subsequent month, one-fifth of the

recomputed balance of each district's state aid shall be distributed. However, one-half of the June payment shall be withheld pending a final determination of the district's state aid. (§ 3.02 ch 164 SLA 1962; am § 1 ch 169 SLA 1968; am § 4 ch 95 SLA 1969; am § 9 ch 238 SLA 1970; am § 1 ch 135 SLA 1975)

Editor's notes. — In the fifth sentence, the words "the commissioner" were substituted for "he" by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58 SLA 1982.

Sec. 14.17.180. Payment under final computation. Before June 16 each district shall transmit to the commissioner a final computation of the district's state aid. The commissioner shall process each district's computation in the manner provided by AS 14.17.150(a). However, in no event may the entitlement of a school district to state aid under AS 14.17.021 be less than that computed under this section for the preceding year, except as otherwise provided in AS 14.17.031, or under AS 14.17.170, whichever is greater. Additional state aid shall be obligated by the commissioner before June 30. If the district received more state aid money than it was entitled to under this chapter, it shall immediately, after notice from the commissioner of the overpayment, remit the amount of overpayment to the commissioner to be returned to the public school foundation account. (§ 3.03 ch 164 SLA 1962; am § 5 ch 95 SLA 1969; am § 10 ch 238 SLA 1970; am § 2 ch 135 SLA 1975; am § 16 ch 26 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote the third sentence.

Sec. 14.17.190. Restrictions governing receipt and expenditure of money from public school foundation account. (a) The public school foundation money distributed to a district during a year shall be received, held, and expended by the district subject to the provisions of law and regulations promulgated by the department.

(b) Each district shall maintain financial records of the receipt and disbursement of public school foundation money and money acquired from local effort. The records must be in the form required by the commissioner and are subject to audit by the commissioner or the board at any time. (§ 3.04 ch 164 SLA 1962; am § 5 ch 98 SLA 1966; am § 6 ch 95 SLA 1969)

Revisor's notes. — The reference in subsection (b) to "local effort" is apparently obsolete in light of the repeal of AS 14.17.030 and AS 14.17.071.

BILL SHEFFIELD, GOVERNOR

POUCH S
JUNEAU, ALASKA 99811
PHONE: (907) 465-2300

ary 26, 1983

I am enclosing a copy of a monthly report prepared by the Alaska Department of Revenue concerning tax collections and interest income.

The statement entitled "Cumulative Summary of Revenue Collected July 1, 1982, through December 31, 1982" discloses gross receipts, refunds, net receipts, estimated total year collections, and percent of estimate realized. It covers receipts of all taxes and licenses administered by the Department of Revenue and interest income accounted for on a cash basis. It does not cover all items of state revenue.

The estimated total year collections have been adjusted to coincide with FY 1983 revenue estimates appearing in the publication entitled "Revenue Sources FY 1982 - 1985 - January 1983".

The net collections of taxes and license fees, exclusive of interest income, collected by the Department of Revenue for December, 1982, was $174,892,278.03. This is a decrease of 38.45 percent as compared to $284,124,783.39 collected in December, 1981.

For the first six months of the current fiscal year, total collections of net taxes and license fees, exclusive of interest income, amounted to $951,597,051.53, compared to $1,207,183,497.34 collected during the first six months of the previous year, a decrease of 21.17 percent.

Sincerely,

Joseph K. Donohue

Joseph K. Donohue
Deputy Commissioner, Taxation

Revised 1/24/83

Analysis of FY-83 Foundation Supplemental

FY-83 Request (estimate)	406,089.5
FY-83 Appropriation	391,753.3
FY-83 Shortfall	(14,431.8)

FY-83 Revised Reports Increases by Categories:

1. Enrollment Increases (estimate)	6,407.7
2. New Secondary Programs	1,808.4
3. BIA School Transfers	7,901.6
4. New Tanana City School District	855.4
5. Special Education Program Increases	2,558.5
Total Increases	19,531.6
Add Original Shortfall	14,431.8
Total Shortfall	33,964.4*

Out of seven Department supplemental requests transmitted to the Governor, the State Board of Education has prioritized the $19,531.6 request first, and the $14,431.8 portion of this supplemental sixth.

*For the record, a January 7, 1983, hearing officer's recommended decision on the way the Department calculates supplemental equalization aid under AS 14.17.023 has resulted in an additional shortfall of of $1,106.2. We have been advised by the Attorney General to accept the hearing officer's recommended decision.

COMMITTEE FOR ESSENTIAL EDUCATION FUNDING (CEEF)
LOCAL IMPACT OF REVENUE SHORTFALL (1982-1983)

	FINANCIAL		IMPACT OF SHORTFALL				
			Number of staff that were not hired or cutback during the school year.			How many students in your district would be affected by the reduction or delay of these programs?	
School District	Total Budget	Total Shortfall	Staff Certif.	Staff Classif.	Comments	No.	Comments
Adak	$5,591,923	$323,147	0	0	If supplemental fails: cut 2 certif. cut 3 classif., cut spec.ed.& voc.ed. and capital outlay, travel and student activity program.	150	Offset 150 spec.ed., voc.ed. and enrichment.
Anchorage	$166,389,832	$11,200,000	28.5	22.5	The staff reduction has adversely affected the instructional program offerings and class sizes. It has also reduced the custodial and maintenance programs in the school buildings. Included in the more than 100 reductions were the ff: the elem. general music program was eliminated; school activities were significantly reduced; needed replacement equipment was not purchased; and 23 sched. major maintenance projects were eliminated.	39,325	Reductions were necessary on a districtwide basis and therefore included a broad spectrum of programs and services directly related to the instruction of every student in the District.
Annette Island (Metlakatla)	$2,546,542	$194,786	2		$113,610 of budget for FY83 put on hold. Teaching supplies equipment, travel, support services, and activity funds have either been cut or put on hold. Remainder of shortfall would have to be taken from FY82 carryover which in FY84 would seriously cut programs.	338	Considering current budgeting our FY84 programs are in serious jeopardy. We will have less than 2% carryover if the shortfall is not corrected.
Chatham	$2,113,998	$81,504	0	0	We have continued as is - largely based on the fact that we anticipate additional funding and we have had a fund balance to bail us out.	0	
Copper River REAA #17	$4,763,539	$603,063	1	2	The lack of a viable working capital reserve will also seriously impact interest income that is counted as local revenue.	569	The "real" impact will be in FY84 since we had a much needed area differential increase last year that we accrued and are spending this year to minimize the negative impacts of these shortfalls.
Delta/Greely	$6,100,057	$319,142	2	1	One reading teacher and one elem. teacher were not hired as planned in the preliminary budget.	All	Our first cutback would be in the area of custodial service and then in clerical service. Lunch programs might go also!
Dillingham	$3,900,000	$275,000	0	0	None.	0	None.
Fairbanks	$55,434,070	$2,934,167	8	13	On June 22, the Fairbanks North Star Borough S.D. cut 1.5 million from its approved operating budget. Cuts included: reduction of secretarial help at Central Office, 2] elimination of 2 admin. positions (director of program, planning & evaluation and internal auditor), reduction of temporary salaries, secondary gifted/talented program reduction (2), reduction in boiler operators, elimination of a bus-aide program (10), and the elimination of various reserve accounts. In addition to those cuts all necessary personnel have not been hired as a result of increased enrollment and consequently classrooms are more crowded than usual (5). These steps were taken in order to absorb the impact of the initial 4% reduction in foundation funding and to control ongoing costs in view of further potential reductions.		Impact of the shortfall is not readily definable. 12,000 district students are going to be affected to some degree or other. To address the problem, a freeze has been placed on the purchase of new equipment and the implementation of budgeted maintenance projects which do not affect health and life-safety of district students and personnel. Contingency plans are being developed and the Board of Education will meet in a work session on Tuesday, Jan. 25, to consider specific plans to cover the approximately $1.7-M problem which exists as a result of the foundation reduction.

COMMITTEE FOR ESSENTIAL EDUCATION FUNDING (CEEF)

LOCAL IMPACT OF REVENUE SHORTFALL (1982-1983)

	FINANCIAL		IMPACT OF SHORTFALL				
			Number of staff that were not hired or cutback during the school year.			How many students in your district would be affected by the reduction or delay of these programs?	
School District	Total Budget	Total Shortfall	Staff Certif.	Classif.	Comments	No.	Comments
Galena	$1,675,177	$152,513	0	0	There were no programs reduced because of the shortfall either before the start of school nor during school. However, if there is not a supplemental bill passed for the 33.7-M, we will have to reduce current year spending. The deadline for this decision will be January 28, 1983. No programs delayed until 1983-84 school year. We will have to cut back both certif. and classif. for 1983-84. Since we will have to use other district funds for the remainder of the current year, if supplemental funding is not forthcoming.	57	Since we have a 3-yr teacher agreement and there are 2 yrs to go if the shortfall and forward funding are not handled all 140 of our students will be affected by the Board's inability to provide a quality education opportunity to its students.
Haines	(See attached)		.5	0	We had an October resignation. We did not fill the vacancy and will not until we see the financial picture.	-	None.
Iditarod Area	$5,055,018	$454,922	1	0	One top admin. position has been left vacant. Several teacher aices would have been terminated but we were able to pick them up under a new Title VII grant.	All (327)	Reduced itinerant teacher travel. Reduction or elimination of educ. field trips. Reduction in after school student and community use of school facilities.
Juneau	$19,725,688	$1,263,312	10	6	None	4400	All are affected one way or another.
Kenai Penin.	$36,079,553	$2,407,151	0	0	Programs reduced prior to start of school as a result of reduced foundation funding $954,697. Further cuts required if supplemental is not forthcoming $715,533 (including 33.5 teacher aides).	7,000	All are affected including communities as a whole. We have attempted to make our reductions in areas that would least affect the basic education of the student. However, the magnitude of the reduction has forced us to make some reductions affecting the basics.
Ketchikan	$11,846,667	$915,222	1	7	We have not revised the budget to fully reflect the shortfall. We are considering much more staff reduction.	2476	All students are affected.
Lake & Penn	$5,609,989	$537,890 (based on 10%)		8	Voc. ed. reduced prior to start of year. Programs reduced during school year: Voc. ed, purch, cont. svs of spc st fld exper & st act fund.	All (360 ADM)	None.
Mat-Su *revised as of 11/30/82.	$27,455,691*	$1,707,424	18.5	7.5	(See attached)	2,800 of 5,600.	Probably at least 1/2 of our students were/are being adversely affected in one way or another.
Nenana	$2,137,630	$398,725	0	0		0	We are using our reserves to carry through this year. Next year will be the problem, unless we receive more money.
North Slope	$23,500,000	$1,200,000	10	10-25 total support positions.	Curr. center - Maintenance	1,250	Indirectly
Northwest Arctic	$15,115,258	$1,116,838	0	0	Shortfall antic during budget prep. Spec. ed., voc. ed. & bilingual moved up to offset shortfall.	None	No adverse this year - but could next year.
Pelican City	$632,673	$60,000	0	0	This is very difficult to do as we only hire 1 custodian & 1 bookkeeper/ secretary. We do not plan to cut contracted teachers, but will cut 1.5 positions next year if this continues.	55	We have cut back on library purchases, student travel (ie. educ. field trips and athletic), teaching supplies & bldg. maint.
Pribilof	$2,400,000	5% or whatever % becomes.	1	1	None.	165	All students

COMMITTEE FOR ESSENTIAL EDUCATION FUNDING (CEEF)

LOCAL IMPACT OF REVENUE SHORTFALL (1982-1983)

	FINANCIAL		IMPACT OF SHORTFALL				
			Number of staff that were not hired or cutback during the school year.			How many students in your district would be affected by the reduction or delay of these programs?	
School District	Total Budget	Total Shortfall	Staff Certif.	Staff Classif.	Comments	No.	Comments
Railbelt	$3,786,770	$257,397	0	0	No program reduced prior to start of this year, nor during year. No program delayed. Basically we will be able to use all of our carryover monies to do so.	-	None this year, however, all will be affected.
Southeast Isl.	$4,623,020	$154,225	2	4.5(FTE)	The negative effects of the shortfall (actual & potential) have included the ff: 1. Little or less than anticipated improvement in programs or curric. areas we consider to be below standard for a district such as this one, including devel. of school libraries, improv. of our voc. ed. and computer educ. programs, & ability to provide necessary inservice programs to our teachers. In Maintenance/Operations we have been forced to postpone some basic improvements to our bldgs. and shelve plans to replace some teacher housing badly in need of same. If the shortfall is much greater than the 4%, we would not only lose our ability to provide and maintain teacher housing in logging communities as well as to prevent high teacher turnover), but would also lose our ability to move state-owned sch bldgs when a logging camp moves (as we do once or twice per year at great cost). The above represent some examples, as there would be prog/staff cuts in other areas in the event of a 5-10% shortfall.		All students in the district would be affected by further cuts.
Southwest Region					On the short-term basis, the Southwest Region School Board has approved postponement of physical plant improvement projects, curtailed preventative maintenance, and eliminated scheduled improvement in teacher housing.		
Valdez	$8,100,000	$361,002			Reprioritizing of programs. If a supplemental appropriation is not forthcoming in FY 83 our effective schooling program will be delayed for 2 years.	-	None
Wrangell	$2,637,777	$85,000			At this time no programs or staff have been reduced. However, if supplemental is not available then programs such as activities, classroom aides, art etc. will be reduced or deleted.	350 approx.	No comment.
Yukon Flats	$4,559,682	$182,387	3	1	Did not hire 1 f t - voc ed no P.E. & counselor position 1 non-cert village counselor. Cut back std act & staff travel. Freeze bal yr all purchases except emergency.	All 331 125 HS incl.	High scl w/lack of counselors.
Yukon Koyukuk	$8,576,637	$834,745	5*	4.5 FTE	Anticipating a 4% reduction, the above positions were cut prior to the start of school. If reduction is 11%, additional positions or hours will have to be cut.	556	11% of the total district budget has been placed on hold as of this point. This essentially placed a stop to the following areas: 1. supplies, 2. equipment, 3. textbooks, 4. student activities, 5. student travel, 6. staff inservice, 7. staff travel. Basically we are heating heating and meeting emergency repairs, teaching classes and paying employees.

Debt Svce 82.7% (not 90%)

PERTINENT FACTS:

5% new cuts = $28 million

There is a revenue shortfall in the State Public School Foundation Program. Based upon the District's full entitlement for the projected 1982-83 enrollment the full shortfall was first estimated to be up to $13,000,000 but now appears to be approximately $11,700,000.

$29.6 to $50.2 (?)

3.42 th
4.27 mill

this was the 4% notified by D.26.

At the time the budget was developed the shortfall was thought to be about $5,225,000. At that time it was considered appropriate to provide the expected level of services without seriously impacting local taxes by using almost all of the fund balance, and eliminating most of the reserve incorporated into the original state and other revenue projections. The first revenue reduction of $5,225,000 was therefore provided for in the Adopted Version of the 1982-83 budget.

Held this trend

Because of a student enrollment in excess of that originally planned, the School Board on September 20, 1982 approved a reallocation of up to $1,782,000 from several accounts, including the general music program, to provide for the necessary teachers.

On November 22, 1982, the Board received for discussion purposes further reductions which at that time totaled $4,379,879 to cover an anticipated shortfall from State revenues. The Board also requested an additional million dollars be located to ensure an appropriate fund balance.

MEMORANDUM State of Alaska

File HESS

TO Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Foundation Support

3892 - Steve Lenz

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all school district foundation entitlements.

ISSUE

The legislature appropriated $391,753.3 for FY 83 foundation support; recent final review of district entitlements indicate the total amount needed to fully fund the foundation program will be approximately $425,500.0, leaving a projected shortfall of $33,746.7. Much of the shortfall is a result of the legislature's decision to make the rescission through the budget process rather than through substantive legislation reducing the instructional unit value. In other words, if the legislature had reduced the Instructional Unit value by 3.6%, then the entitlements would be lower. As it is, however, the entitlements are in excess of the money appropriated to pay them.

BACKGROUND AND/OR PERTINENT INFORMATION

The last legislature appropriated funds for foundation support in an amount less than our request. The intent behind the reduction was 1) to appropriate less than the law required, and 2) for the department to request a supplemental appropriation to cover the BIA school transfer impact and new program and new school costs, so that districts would not be required to absorb those demands as well. When the 33 million dollar difference between the appropriation and entitlements is analyzed, it can be explained as follows:

1.	Deliberate underappropriation: Our request minus appropriation	=	14,431.8
2.	BIA Transfer Schools (estimated)	=	7,300.0
3.	Enrollment Increases (estimated)	=	6,700.0
4.	New programs, organizational changes, corrections to the initial report upon which our FY 83 request was based.	=	5,314.9
	TOTAL	=	33,746.7

We have notified the Governor's office of the scope of the shortfall, and requested him to introduce a supplemental appropriation for $19,314.9, and further, to consider a supplemental appropriation for the $14,431.8 the legislature chose not to appropriate.

State of Alaska
Proposal for Buckner Building - Whittier, Alaska

FIRST OPTION: The State will purchase the Buckner Building at $7,500,000.00 eminent domain.

SECOND OPTION: Olympic, Inc. will remodel the building and rent it to the State at $1.50 per square foot. The State will have the option to purchase the building at appraisal after five (5) years. This will require a letter of intent from the State to lease the building for twenty (20) years, with the option to buy after five (5) years.

THIRD OPTION: The State will purchase the building and Olympic, Inc. will remodel it for a maximum of $25,000,000.00 to accommodate a minimum of 1,000 people, including all facilities.

Re: Restoration of the Buckner Bldg. Wittier, AK

Gentlemen:

This letter is in reference to your request to review the plans as well as the above named facility located in Whittier Alaska.

According to our conversation, it may be your intent to completely refurbish the 274,000 S.F. Buckner Building and to change this building into a correctional facility. In order to to so, it appears that an entire new heating and ventilating plant plus electrical system will be necessary. Our cost review includes a sixteen bed hospital, six lane bowling alley, and complete commercial food preparation and dining facility.

The exterior needs total restoration with new windows and a new roof system. Also, in this review we have included exterior security fencing and security at all exterior openings and windows.

This is a brief overview as to the possible requirements to change the Buckner Building into a correctional facility.

Our best estimate would indicate that the complete change can be accomplished for approximately $18,700,000.00.

We thank you for this opportunity to work with you on this project.

If you have any additional questions please feel free to contact us.

Very truly yours,

INTERSTATE COMPANY, INC.

ATTENTION: Mr. Pete Zamarello

REFERENCE: Buckner Building - Whittier, AK

SUBJECT: Preliminary Project Review - Cost Estimate

Gentlemen:

At your request, per the commisson given us, we have made a complete review, on a preliminary basis, of the above reference structure.

Our commission, as we understand it, is to provide you with cost figures in two parts, as follow:

1. Remodeling and conversion of the exsisting building, to be used as a correctional facility.

2. A remodeling of the exsisting facility, including new ventilation and heating systems and electrical systems. In addition, new elevators, new roofing, new flooring, new ceiling systems and a number of new partitions. Additionally,, per your instructions, we have included costs for restoration of the building exterior, as well as, additions for a six lane bowling alley and bakery, a sixteen bed hospital and a new dining area/kitchen facility.

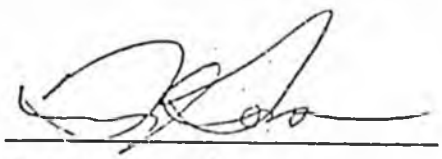
Our review anticipates that any and all work which would be done would meet exsisting state and local codes.

The figures we have arrived at, are based upon the preliminary sketches, pictures and numerous meetings with your company.

Due to the fact that we did not have definitive, exact drawings from which to work, our price must be considered preliminary and in this regard, we are providing you a cost range for each item. Our estimates are as follows:

1. For remodel and conversion to a correctional facility, our cost estimate range is $23,725,000 to $25,100,000.

2. For remodeling and additions as noted above, our cost estimate range is $18,650,000 to $19,800,000.



If we can be of further assistance or should you wish a more exact cost estimate after development of drawings, we would be pleased to provide them for you.

Attached is our billing, which we forward with this report, for payment.

Thank you for using our services.

Very truly yours,

Re: Restoration of the Buckner Bldg. Wittier, AK

Gentlemen:

This letter is in reference to your request to review the plans as well as the above named facility located in Whittier Alaska.

According to our conversation, it may be your intent to completely refurbish the 274,000 S.F. Buckner Building and to change this building into a correctional facility. In order to to so, it appears that an entire new heating and ventilating plant plus electrical system will be necessary. Our cost review includes a sixteen bed hospital, six lane bowling alley, and complete commercial food preparation and dining facility.

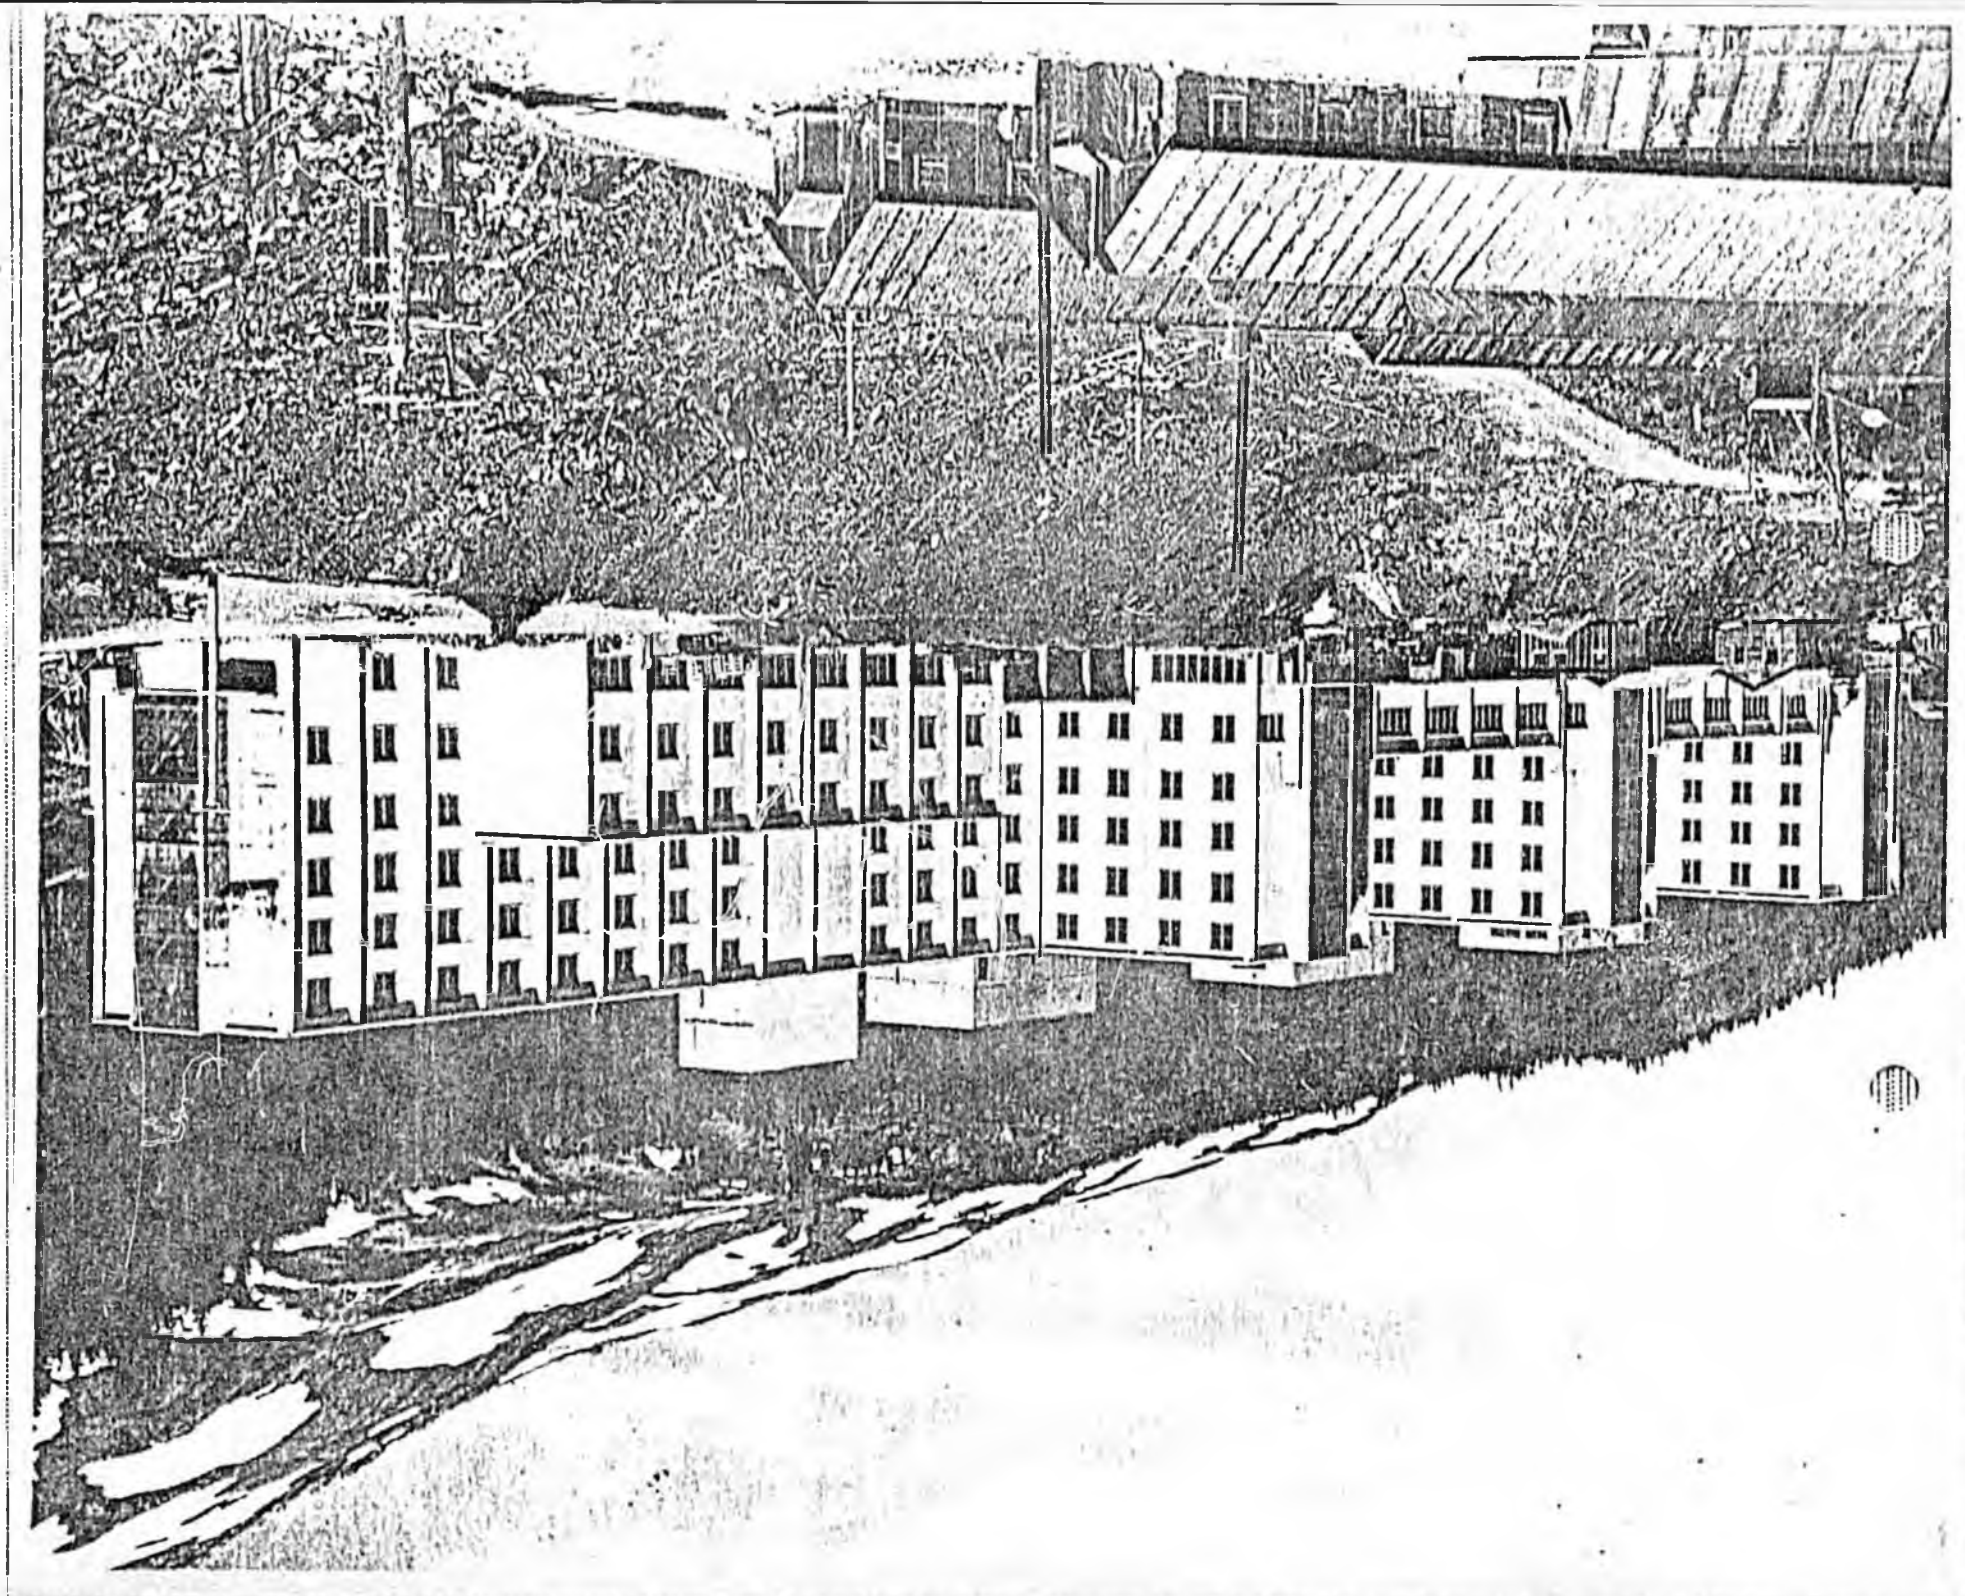
The exterior needs total restoration with new windows and a new roof system. Also, in this review we have included exterior security fencing and security at all exterior openings and windows.

This is a brief overview as to the possible requirements to change the Buckner Building into a correctional facility.

Our best estimate would indicate that the complete change can be accomplished for approximately $18,700,000.00.

We thank you for this opportunity to work with you on this project.

If you have any additional questions please feel free to contact us.



Very truly yours,

INTERSTATE COMPANY, INC.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 88

"An Act making special appropriations to the Department of Health and Social Services for the acquisition, improvement, and operation of certain property for use as correctional facilities; and providing for an effective date."

Description of Property

Camp Isabel is located on state leased land at Mile Post 197 off the Richardson Highway, approximately 269 miles from Anchorage and 167 miles from Fairbanks. The camp is composed of 64 metalsided modular buildings. There are 33 barracks, 16 warehouses, four office structures, an 11,000 square foot kitchen, two recreational buildings, a laundry, first aid station and various other ancillary buildings and equipment. Camp capacity was 1,500 persons. The camp was built in the early 1970's and closed in the late 1970's. All buildings are listed in good to poor condition. They consist mainly of plywood and light gauge metal modular buildings which would be difficult and costly to make secure. Buildings would probably have to be removed to provide space for Uniform Building Code. The camp is very large and its configuration does not lend itself to partial use. If it could be used in part, the labyrinth of empty buildings would pose a security and fire risk.

The Buchner Building in Whittier is located on private land 59 miles from Anchorage. There is no direct road access to Whittier, and limited service by the Alaska Railroad from Portage. Chronic high winds make flying marginal much of the time. The building is a 273,000 square foot concrete and masonry structure built shortly after World War II to house 2,500 military personnel. It was abandoned in 1965. In 1977, the concrete shell was rated in excellent condition. All other features, including internal partitions, finishes, plumbing, mechanical and electrical equipment and systems were rated for replacement. A 1982 estimate by DOT/PF says $42,152,000 would be needed to make the building functional and a total of $62,394,000 would be required to make it suitable for correctional use. These figures do not include acquisition of the property, which may or may not be available. Because of the concrete-bearing wall construction of the Buchner Building, it would be difficult and costly to recess the many plumbing, electrical and ventilation systems unique to prison construction. In order to establish a high security facility on the Whittier site, it would be necessary to tear down the existing facility and start over, or construct a new facility within the existing shell. Either option would be extremely costly and would far exceed $7 million identified as the acquisition and improvement cost. Over the past several years the Whittier site has been evaluated by administrators of the Division of Corrections, DOT/PF and the CCC/HOK architectural firm in Anchorage. Results consistently indicated the facility would not be suitable for housing either sentenced or unsentenced prisoners. With its capacity for 2,500 persons, the Buchner Building is far too large by national standards. Paragraph 4149 of the American Correctional Standards states that a facility's design should accommodate no more than 500. We believe this to be a sound recommendation from an operational

POSITION PAPER/Department of Health & Social Services

standpoint. Last year a telegram from the city manager of Whittier (copy attached) expressed strong objection to selection of Whittier as a location for a correctional facility.

Cost effectiveness is an important consideration in both Camp Isabel and Whittier. The higher costs of an inaccessible location affect not only construction costs, but operational costs throughout the life of its use.

Departmental Consideration

The Department of Health and Social Services does not support House Bill No. 88 because it would not meet needs for prisoner housing in Alaska.

Neither Camp Isabel nor the Buchner Building at Whittier complies with essential correctional standards as noted in paragraph 4147 of the American Correctional Standards. (Copy attached)

The following are deficiencies shared by both sites:

- Fire/Life Safety. All inmates must be assured adequate protection from fire and life-threatening situations, both within the buildings and supported by emergency service operations. Both facilities will require significant life safety systems to meet minimum code requirements. Emergency service operations are most efficiently and effectively provided by local community public service departments. Whittier has a small volunteer fire department, but the nearest major fire fighting equipment and personnel are in Anchorage, with no current road access. Closest volunteer fire departments to Camp Isabel are at Glennallen, 82 miles away, and Delta Junction, 70 miles.

- Outside Support. Both sites fail to meet correctional standards noted in paragraph 4147 of the American Correctional Standards. In event of an internal disturbance, staff from nearby institutions, State Troopers and the National Guard must be readily available to help restore perimeter security and insure safety of all persons inside the institutions as well as those outside. An inaccessible location makes this impossible. Closest trooper detachment to Whittier is in Anchorage. There is one trooper in Girdwood. Major trooper detachment for Camp Isabel is in Anchorage, with six troopers in Glennallen. There are three troopers in Delta Junction from the Fairbanks detachment.

- Medical and Dental Care. This is normally provided on contact by physicians, dentists and medical specialists within a community. Camp Isabel is 82 miles from the nearest physician at Glennallen which also has a six-bed hospital, and 158 miles from medical help in Fairbanks. Whittier has no resident health professionals and no supply of medication (see attached resolution). Lack of access to community hospitals is in violation of paragraph 4257 (attached) of the American Correctional Standards. Providing full-time medical professionals on the prison staff is prohibitively expensive and they are nearly impossible to recruit.

- Staffing/Housing. Recruiting, training and retaining correctional staff is costly and difficult under the best of circumstances. Due to the virtual non-existence of adequate private housing in conjunction with the

isolated surroundings, a high turnover of employees would be anticipated. The State may have to provide staff housing at further expense.

- Legal Access. Inmates frequently have interaction with the court system, and they have the right to legal counsel. Transporting prisoners from an inaccessible location to court and counsel would be both costly and time consuming. Inmates at Whittier would have to travel to Anchorage; from Camp Isabel they would go to Fairbanks.

- Community Ties. Regardless of the offense of length of sentence, nearly every prisoner will eventually return to the community. It is unrealistic to believe a person can live in isolation, without community ties, then suddenly be returned and make a successful adjustment. Opportunities for restitution and work release, which could lessen the tax burden, would be limited to non-existent in an inaccessible location.

- Family Ties. Imprisonment strains the family under any circumstances. Lack of opportunity for visits increases the likelihood the family unit will be destroyed and limits opportunities for the offender to successfully reenter the community.

- Programming. The statewide chaplaincy program coordinates services in prisons and arranges individual religious services in any denomination, calling on clergy in the community. The educational programs draw on University staff in nearby communities. Counseling dealing with sex offenses, family abuse, alcohol and drug abuse and other psychological and emotional programs all draw upon various programs existing within a community. Few if any of these programs could be offered in isolated settings such as Camp Isabel or Whittier. Rehabilitation efforts offer the best hope for protection of society against repeat offenders, since virtually all inmates will eventually be released.

In Alaska, the courts and regulatory bodies are getting more and more involved in setting limits on institution capacity, fire/life safety codes, and imposing correctional standards. There is court action pending against institutions in all regions of the state. Although existing regional institutions are being renovated and expanded, they will not meet the security needs or space requirements for housing long-term offenders. The most recent projected security classification of prisoners indicate that 450 close to maximum security beds for sentenced prisoners will be needed by 1985.

In closing, the Department wishes to re-emphasize the need for a new high security institution for sentenced offenders. Existing facilities, due to their operation, configuration, and limited space are unsatisfactory for housing long-term offenders. The facilities described in House Bill No. 88 do not meet standards for prison construction. Consequently, they could not

POSITION PAPER/Department of Health & Social Services

be used to house high security sentenced prisoners without presenting a constant danger to society, staff, and other prisoners and would also commit the State to huge ongoing operating costs.

IV. ANALYSIS

A. Assumptions

1. The acquisition costs identified in the bill are correct ($4,000,000 for Camp Isabel and $7,000,000 for the Buchner Building, Whittier).

2. Some funding may be available from the $4,000,000 appropriation to improve the facilities at Camp Isabel. The amount still available may not be sufficient to rehabilitate the facilities for correctional use.

3. The Department of Transportation/Public Facilities estimated in 1982 that an additional $62,394,000 would be required to rehabilitate the Buchner Building to be suitable as a correctional facility. It is assumed this figure is still valid.

4. No funding would be available for the operation of either Camp Isabel or the Buchner Building from the $.1,000,000 appropriation.

5. A new source of electrical power will probably be needed in Whittier to accommodate a correctional facility.

B. Program Summary

It is impossible to estimate the operational costs without knowing the number of inmates which could be housed at each facility and the number of correctional officers required to staff the facilities (this requirement varies with facility design).

C. Economic Impact

There will be a significant impact on the State budget if these two facilities are opened as correctional centers. However, in this period of growth of the inmate population, staff and costs related to inmate care will be experienced without respect to a particular facility.

D. Impact on Local Governments

Any impact on local governments are assumed to be beneficial because of the increased stable salary base and limited local purchase practices of correctional centers.

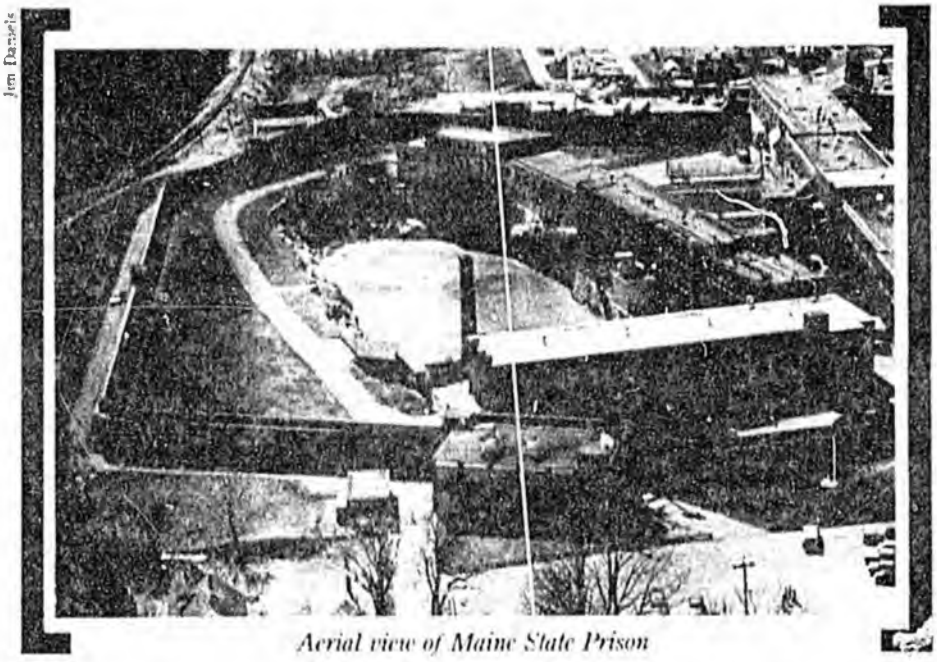
Entrepreneurship threatened to rehabilitate Maine's prisoners—but the authorities couldn't handle it.

By Jeffrey Shedd

By 5:00 A.M., April 16, 1980, trained snipers lined the perimeter walls of Maine State Prison, home for 365 inmates. Nearby, at the local headquarters of the Maine state police, approximately 150 riot-prepared police and national guardsmen awaited the order to move. So complete had been the secrecy surrounding the upcoming maneuver that only hours before had they been informed of their mission: a "lockdown" of the prison, with all inmates confined to their cells 24 hours a day and an extensive search and seizure operation carried out.

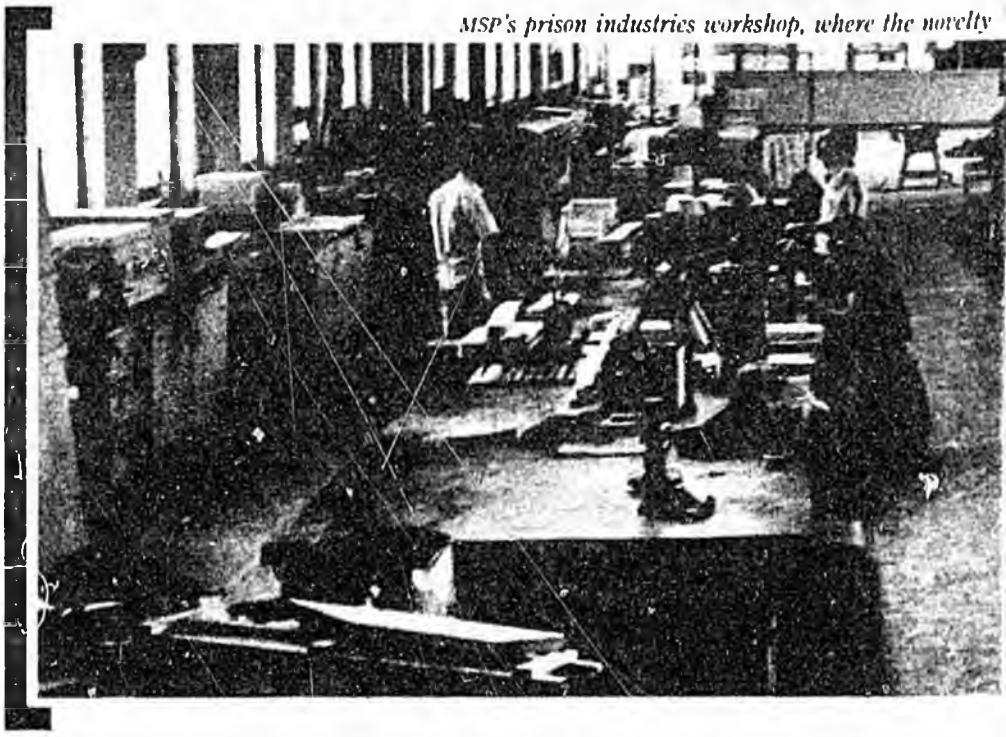


Outside the prison, a tense director of the Bureau of Corrections, Donald Allen, coordinated affairs via walkie-talkie. Shortly before the lockdown began, Allen persuaded a local television crew, who had somehow gotten wind of the impending move, to leave off their camera lights near the prison. Such lights, Allen warned, could alert the inmates behind the walls and cost lives.

At 6:00 A.M. the troops began their move, crossing first through the administrative area before fanning out through the rest of the prison. The 10-week lockdown of Maine State Prison had begun.

And what was the dramatic lockdown designed to accomplish? The end of a riot? The freeing of hostages?

No, the answer to that question is far less dramatic and far more fascinating.



Jim Daniels

Aerial view of Maine State Prison

The lockdown of Maine State Prison, planned and prepared for months, was designed to impose state control over a market economy operating behind prison bars, controlled by the inmates, and centered around the production and sale to the public of wooden crafts and novelties. When the riot troops moved into the prison, what they found was not a life-threatening situation—all the prisoners had been locked in their cells overnight, and most were just waking up when the invading army arrived—but prisoner-made novelties, stacks and stacks of them, some finished and some unfinished, piled into every bit of spare space in the prison; in the cells, in the industrial shops, in the recreation room, in the laundry, everywhere.

All told, the lockdown and changes wrought during the period destroyed entrepreneurial inmates' thriving businesses, some of which may have been netting their bosses in excess of $30,000 a year; threw hundreds of inmates out of work; imposed idleness on a large portion of Maine State prison's inmate population; and cost Maine's taxpayers at least $700,000. Worse than any of its other accomplishments, however, the lockdown represented a triumph of mainstream, paternalistic, costly bureaucratic correctional thinking and a failure of imagination on the part of Maine's correctional and political establishment. It wasn't called that, but Maine State Prison had a rehabilitation program that was *working*. And it could have pointed the way to a far better arrangement of who pays for crime in our society. But Maine officials were unable to see the situation as an exciting, if imperfect, glimpse of what today's troubled prisons could be.

MSP's prison industries workshop, where the novelty

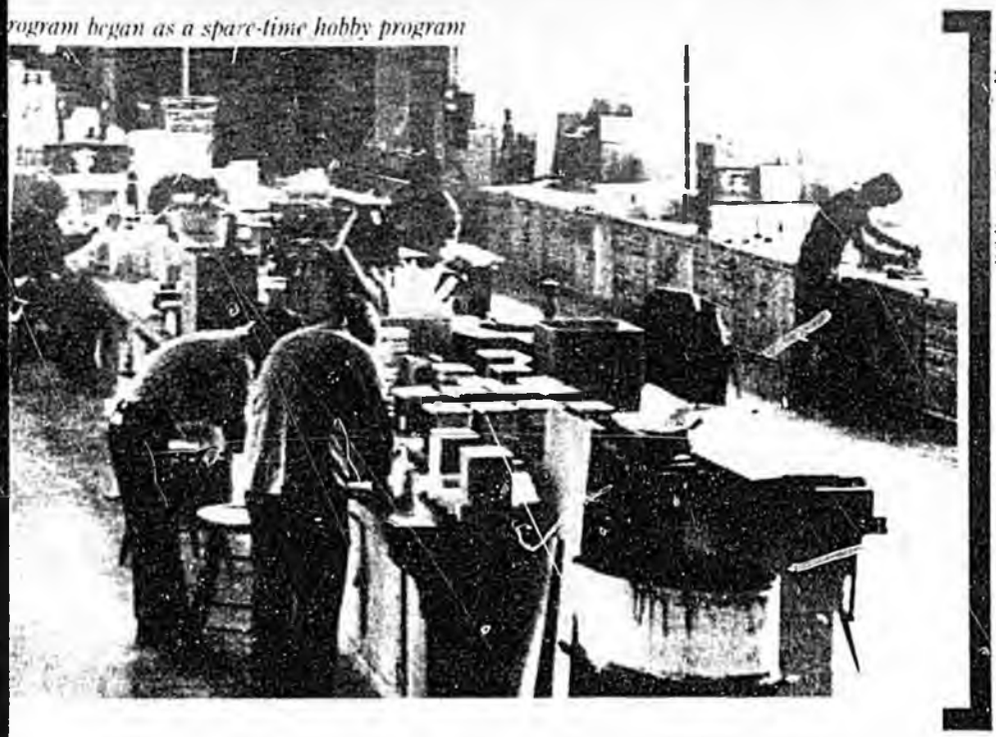
There are not nearly enough jobs in the traditional state-run industries to keep more than a tiny fraction of the inmates busy.

THE PRISON PICTURE

There are approximately 320,000 convicted criminals behind bars in the United States. Over half of them reside in maximum-security prisons that are enormously expensive to build, maintain, and operate.

The total correctional bill footed by taxpayers in 1978, the latest year for which data are available, was $5.5 billion. With a climbing prison population and inflation, it is likely that that figure now exceeds $7.5 billion annually. Indications from a study of the New York State correctional system in 1978 are that about 50 percent of prison budgets are spent on security; 15 percent on food, medical care, and recreation for inmates; and 10 percent on services—education, psychological counseling, libraries, etc. (In the New York program, another 6 percent of the prison budget went to subsidize the state's prison industry.)

And the returns for all these tax dollars? Increasing violence behind bars, a failure of the rehabilitative ideal, and a prison population in which repeat offenders continue to outnumber first-timers by almost three-to-one.



Despite all the money spent to keep America's prisoners behind bars and to "rehabilitate" them while they're there, life in prison is far from the country club existence occasionally painted by critics. True, many prisoners now have their own televisions, stereos, or radios in their cells. On the other hand, today's prisoners are locked into those cells a greater number of hours per day than was true just a few years ago. Overcrowding in prisons is a well-documented problem, though it may well take more than its share of the blame for the troubles that plague our prisons.

Anyone who reflects on the situation must recognize that a bigger problem is this: that prisoners are regularly denied virtually every outlet for constructive expression of their identities, energies, and creativity. Visitation rights are severely circumscribed. Recreational and athletic facilities are limited. In most prisons there are not nearly enough jobs in the traditional state-run industries to keep more than a tiny fraction of the inmates busy. Moreover, there is almost no incentive to participate in those industries, because wages are either nonexistent or absolutely nominal—seldom topping $1 per hour.

When combined with the general character of many inmates, idleness caused by the lack of constructive outlets makes prison a fearsome, and oftentimes violent, place. The incidence of violent deaths behind prison walls has climbed to about one per thousand per year. Stories of homosexual abuse are unfortunately commonplace. In recent years the level of violence in prisons has been exacerbated by gang warfare among inmates, particularly in the larger urban state prisons. Less well known but possibly more important on a day-to-day basis is the fact that lower levels of violence, particularly beatings and nonfatal stabbings, occur sufficiently frequently to create a pervasive atmosphere of suspicion, tension, danger, and unease in most prisons. It is widely acknowledged that much lower-level violence goes unreported.

Violence is an outlet for some prisoners; drugs, for others—and they are available, even if not readily or

rogram began as a spare-time hobby program

Bill Pierce/Courtesy Time Magazine

cheaply so, behind the walls. Black-market operations exist in virtually every American prison to supply the common but illicit wants of prisoners, drugs and weapons included.

This bleak picture of America's prisons should hardly startle anyone. What is disconcerting is the way prison officials attempt to deal with their charges.

While correctional experts seek clues in criminals' past lives and in socio-economic conditions on the outside as a basis for rehabilitation, they ignore the single biggest positive change that could be made in prisoners' lives on the inside: allowing inmates to put their lives to constructive use. Meanwhile, prison officials must establish some sense of order and peacefulness behind the walls. There is little doubt that prison security staffs are undermanned and unable to solve problems by applying traditional, limited police methods. The result: with pressure to achieve both rehabilitation and security, prisons are almost universally run on a system of (usually) benevolent despotism that combines aspects of the welfare state and the Gulag Archipelago, with prison experts shrinking from any untraditional alternatives. This, I was to discover, is what the lockdown at Maine State Prison was all about.

ENTERPRISING CHANGES

Maine State Prison (MSP) is a red-brick fortress located in Thomaston, Maine—a town of 2,000-3,000—along Interstate Route 1. Originally built in the late 19th century, MSP is Maine's only maximum-security prison. Less than a mile beyond its easternmost wall is the shimmering Atlantic Ocean, an appropriate symbol of the freedom of which those behind the wall have been legitimately deprived.

MSP's crafts and novelties program dates back almost 40 years. At that time, prison administrators, seeking to encourage inmate participation in the zero-paying state-run prison industries (chiefly license-plate and furniture manufacturing) offered inmates who worked in those industries the opportunity to use state-owned machinery in their spare time to produce hobby and craft items. Many prisons have a hobby and craft program, but MSP's novelty program went beyond those in other prisons in two important respects.

First—unlike their counterparts elsewhere, who are hampered by restrictive laws—MSP inmates have easy access to an excellent market for their goods. Inmates can sell their products at a prison-owned store located about 60 yards up the road from MSP on Maine's heavily traveled summer tourist route. Crafts sales to tourists are an important part of the region's economy, and many tourists seem not to mind paying the premium prices charged at the prison store. After all, how many people can say their living rooms are decorated with lamps, wooden ships, or anchors built by conmen, armed robbers, or murderers? Tour buses frequently make it a point to stop at the prison store.

Second, MSP inmates may hire one another to perform work, allowing for specialization. Until the lockdown, there was a legitimate, transferable currency with which inmates could pay one another for finished work: canteen coupons, which could either be spent at the prison canteen or banked in the prison's business office. In most prisons, on the other hand, an inmate may sell only those goods that are entirely self-produced, and there is no legalized currency (though prisoners inevitably create their own currencies—often cigarettes).

Until the last half of the '70s, the craft and novelty program remained a constant but minor feature of MSP life, providing spending money for many inmates but little more. Prison administrators limited both inmate earnings and productivity. In the early '70s, a single inmate could take in no more than $4,500 annual gross revenue through the sale of a maximum of four designs of crafts or novelties.

With the appointment of Richard Oliver as MSP warden in 1976 (Oliver later resigned rather than carry out the lockdown), the novelty program was transformed. Oliver appointed a Novelty Committee, dominated by inmates, to oversee the program. By the time of the lockdown, it had evolved into a group of inmates elected by MSP's "residents." To protect individual novelty makers, the committee awarded "patents" that gave the designers of novelty patterns the exclusive right to produce items according to those designs. The committee also collected a five percent surcharge on the price of all novelty items sold. The proceeds went into an Inmate Benefit Fund that was used to purchase goods or services not provided by the prison administration, including, among others, recreational and athletic equipment and a huge TV antenna to serve all the inmates, and new equipment for novelty production.

More important than the Novelty Committee, however, under Oliver the caps on inmates' economic activities were significantly raised in an effort to reduce idleness at the prison and to create a constructive outlet for their energy. From $5,000 and 5 patterns in 1976, the caps increased to $10,000 and 10 patterns in 1977 and again to $15,000 and 15 patterns in 1978.

With Oliver's changes, crafts and novelties production at Maine State Prison took off. In the year prior to the lockdown, $550,000 worth of inmate-produced items were sold through the prison store. Nearly two-thirds of all MSP inmates were participating in the novelty program as employers, employees, or occasionally both. With abundant work and income opportunities, there had developed inside the prison a miniature economy.

THE NOVELTY KINGS

There were people who excelled as entrepreneurs. A group of five or six of the largest novelty operators came to be known as the "novelty kings." To a man, they had arrived at MSP without business experience. The novelty program tapped their latent talents.

Probably the most successful, and certainly the most flamboyant, of the novelty kings was Aaron M. "Jack the Griz" Harrelson (so named because while in college he wrestled a circus grizzly bear to earn tuition money). Convicted of aggravated assault in 1975, Harrelson turned to the novelty business in 1977 in order to, in his words, "give the inmates something to do."

Harrelson proved himself a quick study in the business. He bought up patents on patterns from inmates leaving prison and, along with his talented stepson and fellow inmate, André Beaudoin, invented new patterns. A number of these were put in the name of other inmates (in exchange for a share of the profits) in order to avoid the official limits on novelty production. To make items under his many patterns, Harrelson hired a work force that numbered (estimating conservatively) between 30 and 50 inmates at the time of the lockdown.

Harrelson soon diversified his business. One of his operations, a TV rental business, was discovered at the time of the lockdown, when state officials confiscated over 100 Harrelson-owned television sets from cells all over the prison.

Another of his endeavors was management of the prison canteen, originally a state-run money-loser. Harrelson turned the operation around and by the time of the lockdown, Maine's taxpayers were no longer subsidizing inmate purchases of candy, cigarettes, and razor blades. It was from the canteen, too, that Harrelson ran another of his businesses: money lending.

The P. T. Barnum of Maine State Prison, Harrelson's finest hour came when, following prison administrators' announcement that they intended to tax novelty sales in order to subsidize the unprofitable prison-run industries, he offered to buy out the state operations and state-owned equipment, to employ inmates to produce prison-industry goods on a profit-sharing basis (at the time, inmates working in these industries were paid nothing for their work), and even to pay the salaries of the shop's supervisory staff! Although prison administrators

Jeffrey Sheld

"Novelty King" Harrelson, who now runs a wholesale novelty business on the outside

didn't doubt Harrelson's ability to keep his promise—one called him the "most brilliant businessman I've ever seen"—they rejected his offer.

Shortly after the lockdown, Jack Harrelson was transferred to a federal penitentiary in Indiana, where he served out the remaining months of his sentence. Currently, he operates a lucrative wholesale novelty business several miles from MSP. His factory is a small, two-story house in Waldoboro, Maine, stocked from floor to ceiling with woodworking equipment and novelties in every stage of completion. He hires former inmates to perform most of the work. In a true ironic touch, one of the directors of his business is a former prison guard—making him, he says, an "equal opportunity employer." Harrelson's business is accredited by Maine's Better Business Bureau.

The one subject about which Harrelson is reticent to speak is the amount of money he earned from his several businesses. Published estimates ranged between $30,000 and $100,000. Harrelson himself told me, "Only me and God knows what I made," but, he quickly added, "I made more than the governor and the warden put together."

Another of the novelty kings was a convicted murderer who arrived at MSP in 1975 with $20 in his pocket and no useful skills. The $20, says Richard Freeman, he quickly blew on junk food and cigarettes. Broke, he began rolling cigarettes for other inmates to earn spending money. The business gained Freeman a reputation for honesty.

When Warden Oliver made the changes that catalyzed the novelty program, Freeman's reputation paid off. Another inmate already heavily engaged in producing novelties had more ideas for patterns than he could legitimately produce under prison rules. He turned to Freeman, who agreed to apply for rights to the other inmate's patterns under his own name; in return, Freeman would receive a share of the profits on the novelties' sales. Through this and similar deals, he gained both experience in the business and capital for later investment.

In 1978 the former spendthrift began his own business. Like other novelty kings, he bought up patents belonging to inmates about to be released from the prison. He hired a work force—numbering at least 30 at the time of the lockdown—that he paid on a piece-work basis to maximize productivity.

Unlike Harrelson, Freeman was a behind-the-scenes operator, a fact that may have kept him from being transferred to a federal prison after the authorities made their move against MSP's enterprises. Since the lockdown, Freeman has refused to participate in the restructured novelty program.

Like Harrelson, Freeman will not disclose how much he made in his novelties business. He does admit that he did well enough to hire a well-respected attorney to file suit against prison administrators, charging them with property losses suffered as a result of the lockdown. Moreover, he put aside enough to pay for a college education when he is finally released from prison.

Bill Powers, Correctors Magazine

MSP inmates at work on novelties, which foun

ECONOMIC OPPORTUNITIES

Other novelty makers ran smaller operations. Among them was André Beaudoin, who, in addition to contributing to Harrelson's efforts, owned several patterns of his own. Described by other inmates as the best craftsman behind MSP's bars, Beaudoin emphasized quality rather than quantity. He eschewed the assembly-line techniques of the novelty kings, choosing instead to hold an individual inmate responsible for building a novelty item from beginning to end. That way, Beaudoin told me, a worker takes greater pride in his work and produces a better-quality product.

Beaudoin spoke to me animatedly about the technical details of craftwork—about the best woods and lacquers to use for particular jobs, for example. But he has curtailed his operations since the lockdown, he said, because of low-grade materials, overregulation, and red tape under the restructured novelty program.

The range of employee participation in the novelty program is illustrated by two cases:

- Thomas Mitchell, recently released from MSP after serving time for an assault conviction, worked for Jack Harrelson behind bars. Mitchell was one of the hardest workers among inmate employees; he took in, he says, around $200 per week prior to the lockdown. Currently, Mitchell works in Harrelson's free-world novelty business.
- John Roberts (not his real name), convicted of armed robbery, was one of the more sporadic inmate employees. He worked, he says, so that he could buy the drugs that "helped the time go by." Nevertheless, he earned nearly $4,000 the year prior to the lockdown.

As the novelty program flourished, other entrepreneurial talents were tapped. There arose inmate barbers who charged other inmates for style cuts. For the right price, an inmate could get his personal clothing laundered. For many of the prisoners, it was no doubt the first time they'd seen that individuals can profit by providing a good or service desired by others.

Nearly two-thirds of MSP inmates were participating in the novelty program as employers, employees, or both.

The novelty program was quite a success from the inmates' point of view. Every one of those I interviewed, from sporadic employees to novelty kings, agreed that the vast majority of inmates benefited greatly from the program. Some, it is true, were the targets of retaliatory action by the larger novelty operators, who, having gained considerable influence among the inmates, acted to counteract theft, the breaking of agreements between employers and employees, and general thuggism. Inmates who minded their own business, however, and refrained from violating the rights of others could freely take advantage of the economic opportunities created by the novelty program, earn wages determined by a competitive labor market, and escape the regimen of enforced idleness that characterizes most American prisons. Perhaps most important of all, they had control over and were permitted to take responsibility for an important aspect of their lives.

It was a unique program with unique results. It went a significant step further than any other prisoner work program in the history of U.S prisons.

a ready market among Maine's tourists

PRISONERS' WORK HISTORY

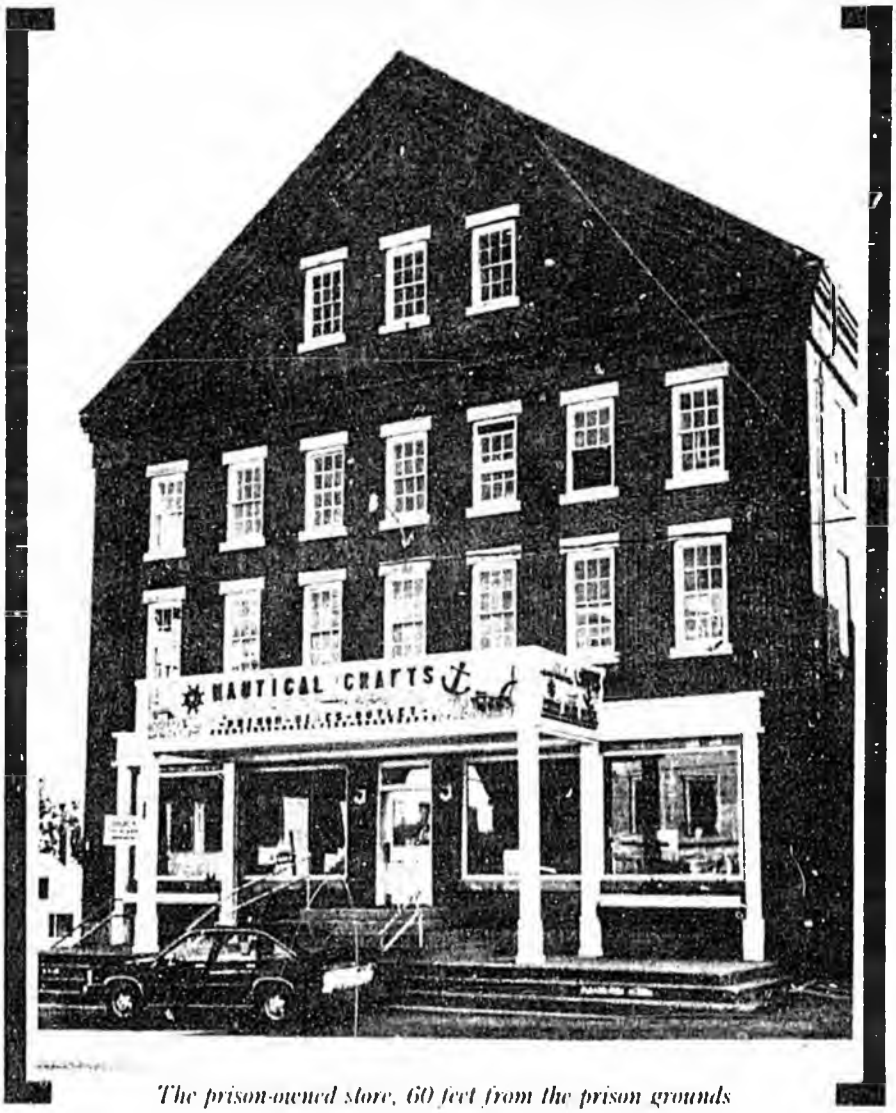
Since at least the time Robert Stroud—the famous Birdman of Alcatraz—built his first canary cage while confined in prison, it has been generally understood that work can be a creative outlet and pastime for prison inmates. (Indeed, had Stroud been confined at Maine State Prison in the late 1970s, my guess is that he would have been a major inmate entrepreneur.) Stroud and others like him, however, have for years labored under the burden of stifling rules and anti-competitive laws.

It wasn't always thus. Inmate labor once played a central role in the American correctional scene. Prisons were originally intended to be self-supporting, and, as a 1940 Department of Justice report noted, "the success or failure of many wardens depended on their ability to meet this test, and many of them met it successfully, even though they may have failed in all else."

The early self-supporting prison, however, succeeded not by granting economic liberty to prisoners but by making slaves of them. The unfair competition created by the exploitation of prisoner labor generated political opposition from unions and businesses. As early as 1801, New York passed legislation restricting the use of convict labor and the goods that it could be used to produce. Similar restrictive laws became increasingly common following the Civil War.

Not until the Great Depression, however, was the blanket of restrictive laws limiting the market for prisoner labor completed. Nearly every state now has laws or even constitutional provisions controlling the sale and marketing of all but a few types of prisoner-made items. A common arrangement is to permit such goods to be sold only to state agencies.

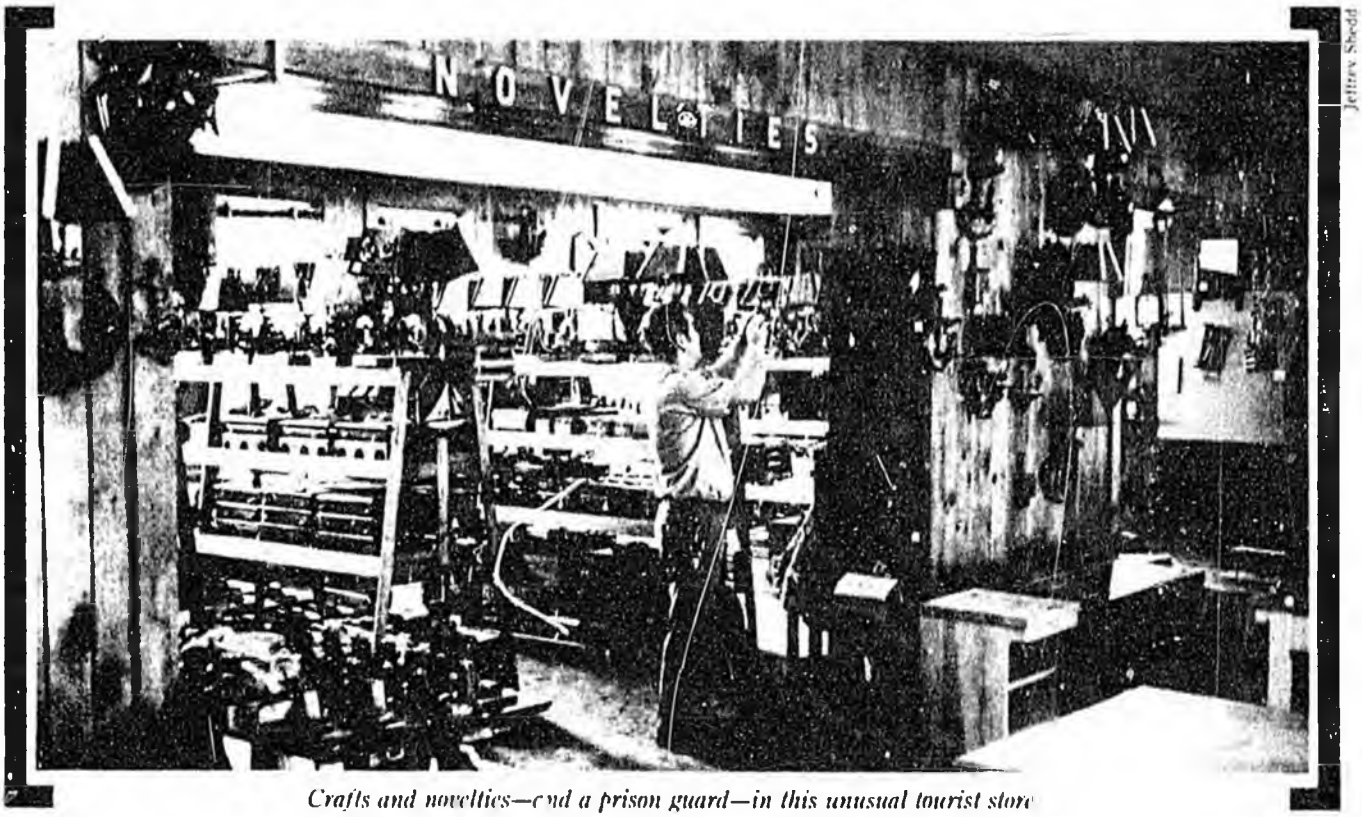
The federal government has restrictive laws of its own. The most significant of these complements the state laws by prohibiting interstate commerce in prisoner-made articles where the recipient state has local laws against commerce in those same goods. Other federal laws prevent private industries from using prisoner labor to fulfill government contracts and require careful labeling of prisoner-made items as such.



The effect of all these statutes was virtually to wipe out the market for prisoner labor and for prisoner-made goods. Even if such a market existed, it would be difficult to satisfy it; prison regulations typically permit prisoners to sell only those goods that they themselves have

produced in their entirety.

An interesting demonstration of the untapped productivity of convict labor occurred during World War II, when many of the federal restrictions on the sale and transport of prisoner-made goods were lifted by executive order in order to get prison industries to help the war effort. Statistics available for the period 1942-43 show that state prison industries produced nearly $10 million worth of war matériel—mostly clothing—during that year. Not coincidentally, it is reported that prison morale rose significantly during the war years. But when the war ended the restrictions on prisoner-made goods were reinstated.



As a result of the anticompetitive laws and regulations, in virtually every prison the only work opportunities are in the traditional prison industries—the making of license plates being, of course, the classic example—and in prison maintenance and custodial work. In almost every case these positions are low-paying, and in spite of that the industries involved are almost everywhere money-losers. Few prisons have sufficient facilities to permit more than a small fraction of their inmates to participate.

A program that emerged during the '60s and '70s and expanded work opportunities for some prisoners is work release. Most states now have such a program, whereby minimum-security prisoners are permitted to work outside the walls of the prison part-time for private enterprises at market wages and

Jeffrey Shedd

Jeffrey Shedd

Crafts and novelties—and a prison guard—in this unusual tourist store

under competitive business conditions. Importantly, work release participants are usually required to pay out of the wages they earn the costs of transportation to and from prison, room and board expenses, and taxes. By most accounts, work release programs are successes, but they are clearly inappropriate for most inmates.

A promising experiment to improve job opportunities and the incentives to work inside prison is Free Venture, until recently funded by the federal Law Enforcement Assistance Administration. Free Venture programs seek to upgrade state-run prison industries. Occasionally, the state-run industry will, under Free Venture, act as a contractor or subcontractor for a private business.

The impetus behind Free Venture came from a study commissioned by the LEAA and published in 1978. The study examined typical prison industry programs and found they suffered from, among other things, low wages and productivity, short work days, overstaffing of shops, high overhead, poor financial controls and record-keeping, failure to teach useful skills, limited marketing efforts, and a lack of managerial capability. The solution? New prison industries designed to emulate the outside world of work—"not busy work, but productive labor with outside-world efficiency, outside-world wages, and outside-world relevance."

Free Venture's practical achievements have been promising. LEAA helped to fund pilot projects in seven states. Prisoners chosen to participate in the program work in print shops, furniture shops, computer programming businesses, and farm machinery production businesses, among others. Wages are higher than in traditional prison industries, topping out at about $4 per hour, but not as high as originally hoped.

Initial results suggest that many prisoners in Free Venture programs develop positive attitudes toward work and that participation often aids a prisoner's reintegration into society upon release. Most importantly, Free Venture programs channel inmate energies into constructive outlets. Moreover, prisoners who are adequately rewarded often turn out to be unusually productive workers.

Free Venture is not without problems, however. First, the industries are rarely self-supporting, and some require heavy taxpayer subsidization. Reagan administration cutbacks in LEAA funding call into question the continued viability of Free Venture.

Second, some significant innovative features of the program as originally proposed have been dropped. These include requirements that participating prisoners turn over a portion of their earnings to help pay for the cost of their imprisonment—otherwise borne by taxpayers—and to provide some form of restitution to their victims. Both deductions were originally proposed to force the prisoner to absorb a greater portion of the social costs of his or her crime. After all, there is no reason to punish taxpayers any more than necessary for criminality. Both pay-back schemes have, however, been dropped in the face of prisoner complaints and administrative inconvenience.

Finally, Free Venture, despite its promise, can usually offer jobs for only a tiny fraction of the total inmate population. The problem of idleness is thus reduced, but not significantly.

Free Venture has demonstrated the potential productivity of prison inmates and the benefits of tapping it. If the Maine State Prison novelty program under Warden Oliver is any indication, the way to release that productivity without the tremendous cost to taxpayers is to encourage not just prisoner *work* but prisoner *entrepreneurship*. But the fate of the MSP program also indicates the hurdles that such an innovation faces.

WHY THE LOCKDOWN?

Why, despite the tremendous success of the novelty program in channeling inmates' energies into constructive activities, was the prison locked down? Donald Allen, director of Maine's Bureau of Corrections, admitted to me that for every example of problems with the situation at MSP there were undoubtedly numerous examples of benefits. So why did he personally, with the approval of the governor, plan, order, and coordinate the lockdown?

Lockdowns at prisons are not uncommon. Relatively frequently, prisoners will be locked in their cells while prison guards comb through the cells searching for and seizing contraband, usually weapons and drugs. Occasionally, lockdowns are used to foil rumored or suspected riots.

What was extraordinary about the lockdown of Maine State Prison was not the painstaking searches of the cells—which resulted in 50 dump-truck loads of inmates' personal property being carted away, inventoried, and stored. Nor was it the fact that three inmates were transferred to federal penitentiaries in connection with the lockdown. Though one can quibble with the choice of those relocated, such transfers often occur in conjunction with lockdowns.

Rather, what was extraordinary about the lockdown was its duration—10 weeks—and the complete about-face in prison policies during that period. Warden Richard Oliver had resigned in protest. Donald Allen took his position on an interim basis. A classification committee was set up, and each and every prisoner was reviewed so that his security risk could be assessed and his living situation and privileges designed accordingly. Lock-up time increased from about 10 hours per day prior to the lockdown to an average of about 17 now.

The biggest changes, though, were made in the prison's economy. Permitted levels of novelty activity were cut almost in half; from a high of $15,000 in 1980, the cap on an individual's gross income was slashed to $8,000. More important than this change (since inmates had always before found their ways around the caps), state control over intra-inmate economic activity became much tighter. Prison canteen coupons were declared nontransferable; thus, the only legitimate form of currency in the prison—individual prisoners' accounts in the prison's business office—rested under state control.

Moreover, to add red tape to inefficiency, inmates who wish to hire other inmates to perform novelty work must now sign a staff-approved contract with the intended employee. Staff must approve wage levels and determine that the intended employer has sufficient funds to pay the promised wages *even before work on any novelties has begun*! Thus, employers cannot promise to pay inmates out of expected profits from sale of the novelties. Too risky, say the authorities; the employee may never get paid. Better, they implicitly say, that he remain unemployed.

The conclusion is unavoidable that, at best, MSP's novelty program is now viewed as it originally was—a way to provide inmates a little spending money and to relieve a little of the idleness at the prison. The "preferred" means to reduce idleness at MSP is by provision of traditional rehabilitative services: since the lockdown, Maine's taxpayers have funded improvements in MSP's library and a significant increase in nonsecurity personnel, including social workers and psychologists.

At worst, prison administrators are out to destroy the novelty program. Though they deny the charge, their actions speak louder. Particularly significant is the fact that, for the first time, MSP's state-run prison industries pay for work per-

formed. (Of course, the industries still lose money; the taxpayers fund the losses). Although the cap on inmate earnings in the prison industry program is lower than in the novelty program—$5,000 compared to $8,000—the returns are more certain. Clearly, administrators are seeking to encourage greater participation in the traditional prison industries. The only possible loser from such a policy is the novelty program, particularly since inmates must now choose between participation in novelties and industries; they may no longer do both.

Whether the aim is to undercut the program's unique success or to completely destroy it the question remains: Why the lockdown and attendant changes at Maine State Prison? One possible explanation is political. In the view of inmates and former inmates with whom I spoke—Jack Harrelson most vociferously—the lockdown was a ploy to get more money from the state for the Bureau of Corrections and to have the bureau elevated to cabinet-level rank.

On the face of it, there is some evidence to back up the inmates' belief. For several years prior to 1980, Maine's legislature had repeatedly turned down requests from the Corrections Bureau for budget increases. Following the lockdown, and enormous accompanying publicity, budget increases were finally approved. Moreover, in September 1981 the Bureau of Corrections finally made it to the big time by being elevated to cabinet level. According to a newspaper account, a switch by a key legislator, Barbara Gill (R), who had earlier voted against such a move, was prompted by the lockdown.

In fact, however, there's not enough evidence to back the political motivation theory. It's no doubt true that, after the fact, Maine's correctional administrators took excellent political and bureaucratic advantage of the lockdown. But an afternoon spent with Donald Allen and other staff members at what was then the Bureau of Corrections convinced me that the reasons for the lockdown lie elsewhere: a failure of imagination. The situation at Maine State Prison before the lockdown simply did not fit within the traditional American model of corrections in which Maine's prison administrators are trained. It frightened them.

Some inmates think the lockdown was a ploy to get more money from the state for the Bureau of Corrections.

CORRECTIONAL ORTHODOXY

In the early days of the prisons—which were first used widely as the principal means of criminal punishment in both England and America shortly after the American Revolution—brute force was the predominant mode of dealing with inmates. Shackles, irons, whippings, torture—all these were used and even accepted. And in some more "progressive" prisons, such as the Cherry Hill Penitentiary in Philadelphia, near total isolation (intended to allow the convict time to reflect upon the evils of his past ways) solved many security problems.

Brute force is, however, as former *Fortune* editor and author of *Criminal Justice, Criminal Violence* Charles Silberman puts it, a grossly inefficient way to maintain order. And prison administrators did develop more sophisticated techniques.

Patronage provided part of the answer. Prison officials promoted some inmates above the rest by giving them special jobs within the administration. Essentially, the system was based on the ancient notion of divide and conquer. The favored inmates, who by the fact of their promotion gained a stake in maintaining the status quo, exerted influence over other inmates to keep the peace.

In some instances, this proved a highly effective means of control. In others, it amounted to an official sanction of violence by the favored few against the unfavored masses. Under the so-called trustee form of this approach, prisoners called trustees actually became responsible for guarding other prisoners; in some instances the trustees were armed. Stories abound of trustee inmates coaxing others to attempt to escape, shooting those inmates sucker enough to make the attempt, and then claiming additional favor from prison officials for their heroics. As a result of exposure of these and less dramatic abuses of the divide-and-conquer system, it is rarely used nowadays.

Shortly after the Civil War, there emerged another order within prisons, based on the premise that behind prison walls everything is a privilege. Good behavior is then rewarded by the grant of privileges; bad behavior discouraged by the revocation of previously granted privileges.

Until very recently—since the beginning of the '70s—prison administrators

Maine State Police moving in on MSP to impose control over its miniature

had virtually unchecked power to dish out privileges, including work opportunities, furlough, decreased cell time, increased recreational time, and "good time" (which brings forward an inmate's release date). The parole system, whereby parole boards were established to grant early release to well-behaved criminals, was a particularly effective means of controlling inmate behavior.

This benevolent despotism behind bars was justified on rehabilitative grounds; essentially, the view was that inmates were being "trained" to behave well. In fact, of course, the system taught no such thing: prisoners behaved only so long as they were rewarded for doing so. Once on the outside, these ex-cons, no longer institutionally rewarded for good behavior, often returned to their former criminal paths.

To many prison administrators, though, the fact that the system was a rehabilitative sham was irrelevant; it served the purpose of maintaining a semblance of order. When combined with more overt security practices—lock-ups, searches, seizures, isolation, etc.—the reward system guaranteed that prison would remain a despotic place despite the benevolent ideology.

In the 1970s, three developments coincided to reduce the power of administrators to deal with prisoners by traditional means. First, the courts began to involve themselves in problems behind the walls recognizing certain legal rights of prisoners. Though the scope of recognized rights has been comparatively modest, the change in attitude has been drastic; no longer are prison officials looked upon as courts of last resort for prisoners, and no longer can they look upon themselves as such. Second, the national trend toward determinate sentencing—and concomitantly, in some cases, eliminating or limiting the powers of parole boards—has reduced the effectiveness of traditional order-maintaining devices. In Maine and several other states, the parole system has been undergoing a gradual phase-out since the mid-1970s. Third, new arrivals in prison are not only younger but, it is widely acknowledged, more prone to violence and nihilistic. Combined with racial animosity and overcrowding, this factor has resulted in a greater problem with violence behind the walls.

Jim Harris

market economy

The response of prison administrators, guards, guard unions, academic penologists, and occasionally the courts to increasing levels of tension and danger in the prisons has been mixed. One reaction has been to decrease inmate freedom and step up the extent of intrusion into prisoners' lives. Lock-up time has increased in many prisons over the past few years. Another example: more and more, electronic surveillance is used to keep closer tabs on even the minutiae of inmate activity. The other response has been to provide improved living environments for and more services to prisoners. The theory is that such improvements will eliminate the causes of violence and vandalism inside prisons and contribute to prisoners' rehabilitation.

The American Correctional Association—a private, influential, prison-accrediting group—regularly adjusts its prison standards upward. In capsule, ACA standards represent the prevailing view of correctional experts regarding the conditions that must exist at a prison in order for it to be minimally satisfactory. For example, ACA standards require prison cells to be of certain minimum dimensions, require a minimum level of access to psychological counseling for inmates, require food to be of a certain quality and temperature, etc., etc. ACA standards do not, significantly, allow for inmates hiring one another to perform work or, obviously, paying wages for such work; indeed, virtually all inmate economic activity outside the context of state-run prison industries is unrecognized by the ACA.

The ACA prescription for maintaining order within prison and attempting rehabilitation is essentially a modernized—and, unfortunately, more expensive—version of the benevolent despotism that has prevailed for years. If prisoners are legitimately imprisoned in the first place, it is because they are responsible for their actions. Yet the accepted mode of dealing with prisoners, reflected in the ACA standards, is to pay great attention to the "causes" of criminality on the outside and violence on the inside, while denying inmates any opportunity to assume responsibility for their own lives.

A MISSED OPPORTUNITY

In 1979 Maine's Corrections Bureau dedicated itself to achieving compliance with the standards of the American Correctional Association. The same year it applied for and received a grant from the federal Law Enforcement Assistance Administration to begin compliance measures. (Incidentally, the LEAA had subsidized the ACA standards-creating process in the first place.)

As a first step toward ACA compliance, the Bureau of Corrections commissioned a team from the Philadelphia-based American Institute for Criminal Justice (which, by the way, administers the Free Venture program for the LEAA) to study the conditions at Maine State Prison. It is hardly surprising that the team's report on conditions at the prison was overwhelmingly negative. "The prison was the worst I've ever seen," says George Sexton, the study team's leader.

According to the team's summary of the situation:

Current operations at the Maine State Prison violate nearly every accepted principle of prudent correctional management as practiced in this country today. The overriding reason for this is the fact that the staff do not control the prison. On the contrary, the prison is virtually controlled and operated at the whim of the inmates. The inmate economy generated by the novelty program dominates the entire social structure and operation of the prison. It is this economy which has enabled a few powerful inmates to exploit (through fear and intimidation) the labor of a larger, less powerful group of inmates. This same inmate economy has created and fostered an atmosphere in which the potential for staff corruption is too great to be ignored. The general conditions under which both staff and inmates are living and working at the Maine State Prison are so unsafe as to constitute a serious danger to the safety, health, and life of both groups.

It is true enough that the flourishing economy inside MSP shaped the social

structure. At the top were the so-called novelty kings. Next came the lesser entrepreneurs, from inmate barbers and launderers to the smaller novelty operators. Beneath these entrepreneurs in terms of power and usually of economic well-being were the novelty employees, ranging from the sporadic worker who wished nothing more than to earn enough to keep himself supplied with the amenities of prison life to the more enterprising inmate who worked virtually all his spare time in the novelty program. Finally, on the lowest rung of MSP's social ladder there were two groups: the drug pushers and the strong-armers. (Another group, made up mostly of old-timers, chose not to get involved in the novelty program and remained effectively outside the prison's social structure.)

Yet in every prison there are powerful inmates and weak inmates. In most of them, the social differentiation is farther underground than it was at MSP before the lockdown, but there is little evidence that the more powerful inmates exploited all the rest through fear and intimidation.

The inmate workers I spoke to said that employees chose to work; no one forced them to do so. Usually, they worked on the basis of oral agreements with their bosses. Occasionally arguments—and, infrequently, minor violence—would ensue when an employee failed to perform promised work or when employers couldn't or wouldn't pay for work performed. By and large, however, work proceeded peacefully. According to James McCamant, prison industry supervisor, "We rarely had any problems in terms of fights or disturbances."

Since wages were not set by administrative fiat, as they are in most other prison work programs, the novelty operators paid wages dictated by the amount and quality of work and the availability of inmate labor. Some novelty employees at MSP earned as much as $50 a day, compared to the $0-$10 typical in traditional prison industries. Certainly the orthodox correctional model, consisting of low-paying or non-paying state-run industries and closed markets for prisoner-made products, much more clearly exploits the labor of inmates.

In one area, however, the more powerful inmates did use fear and intimidation. According to Donald Allen, who took over at the prison with the lockdown and went on to become commissioner of the newly formed Corrections Department, a state of near war existed between the thugs and drug pushers on the one hand—the "young turks," as he calls them—and the "novelty kings" and their henchmen on the other.

Certainly the novelty kings recognized the young Turks for what they were: threats to the economic status quo. Nothing would more surely lead prison administrators to cut back on the newly won freedoms of inmates than would an escalation of drug pushing and violence and theft behind bars. So the novelty kings sometimes turned vigilante—usually, as far as I could determine, with the tacit approval of substantial portions of the remainder of the inmate population.

Now vigilantism is vigilantism, whether inside or outside a prison. Yet the fact is that the intimidation and violence involved was aimed at maintaining order within the prison. It was not the mindless violence that plagues so many prisons, where violence is engaged in because prisoners are denied other, constructive avenues of self-expression.

Moreover, although prison administrators claim the level of violence has fallen since the lockdown, they are understandably unable to document their claims. It is a simple fact of prison life that most attacks and beatings behind bars go unreported. To a man, the inmates with whom I spoke at the prison denied, however, that the lockdown led to reduced levels of violence; one said that what violence there was at MSP has simply gone farther underground.

In spite of the power of some inmates to impose some sort of order within the prison, the staff, contrary to the experts' report, *remained in control* of the prison. The prison watch towers were manned by staff, not inmates; prisoners were locked in their cells every night; they regularly appeared for head counts; they were not free to walk out the prison's front door.

Did the income flowing throughout MSP's internal economy pose the danger of staff corruption? If so, it hardly seems just to punish the inmates for that potential. That's not how police departments deal with this omnipresent problem.

Nor was the drastic lockdown warranted by safety problems discovered at the prison by the team of experts. Fire and disease hazards there were; cracking down on the placement of flammable materials and on the maintenance of food preparation areas would seem to have been an adequate response.

In the final analysis, Maine State Prison was locked down because it didn't fit into the correctional experts' picture of prison life. There is simply no place in ACA standards for inmates roaming around more or less freely within a prison or for prisoner-made products to be stacked haphazardly throughout it. Even more telling, there is no place for ambitious and talented individuals finding a way around bureaucratic restrictions on their activities, for prison workers' wages being determined other than by administrative fiat, for some inmates benefiting from others' desires for haircuts, laundry services, loans, or anything else. In short, the MSP lockdown occurred, not because authorities did not have control over the prison, but because they did not have control over the *economic lives* of the inmates.

Had the authorities responsible for MSP's lockdown realized that they were sitting on a potential gold mine, would they have carried it out with such dispatch? Had they seen the possibilities for making their prison into a showcase, might they have thumbed their noses at the tradition-bound experts and done all in their power to improve the freed-up novelty program instead of scaling it back?

When Chief Justice Warren E. Burger made a news-breaking speech in December 1981 calling for converting the nation's prisons into "factories with fences," MSP's administrators could have stepped forward with a real-world demonstration of the potential productivity of America's 320,000 prisoners under a program with real-world economic incentives. They could have pointed out the importance of a ready market for prisoner-made goods, thus backing up Burger's injunction to federal and state lawmakers to abolish all the existing restrictions on the production and sale of prisoner-made items. And they could have offered living proof of his claim that a program for prison production offers "a better chance to release from prison a person able to secure gainful employment."

What they could not have done, of course, is nodded their heads in agreement with Burger's promise that his proposal could take soaring prison costs "off the backs of the American taxpayers." For Maine's correctional authorities never tapped the financial bonanza that lay before them. While MSP's inmates reaped the benefits of their economic liberty, they never had to pay, nor even contribute toward, the costs of their crimes. Had their miniature economy included that eminently justifiable feature, perhaps it would have been more palatable to the bureaucrats, and on that day in April 1980, no riot troops would have gathered outside the prison walls to put a lock on a unique experience with business behind bars. ☐

Jeffrey Shedd is a law student at Boston University. This article is a project of the Reason Foundation Investigative Journalism Fund.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 88

"An Act making special appropriations to the Department of Health and Social Services for the acquisition, improvement, and operation of certain property for use as correctional facilities; and providing for an effective date."

Description of Property

Camp Isabel is located on state leased land at Mile Post 197 off the Richardson Highway, approximately 269 miles from Anchorage and 67 miles from Fairbanks. The camp is composed of 64 metalsided modular buildings. There are 33 barracks, 16 warehouses, four office structures, an 11,000 square foot kitchen, two recreational buildings, a laundry, first aid station and various other ancillary buildings and equipment. Camp capacity was 1,500 persons. The camp was built in the early 1970's and closed in the late 1970's. All buildings are listed in good to poor condition. They consist mainly of plywood and light gauge metal modular buildings which would be difficult and costly to make secure. Buildings would probably have to be removed to provide space for Uniform Building Code. The camp is very large and its configuration does not lend itself to partial use. If it could be used in part, the labyrinth of empty buildings would pose a security and fire risk.

The Buchner Building in Whittier is located on private land 59 miles from Anchorage. There is no direct road access to Whittier, and limited service by the Alaska Railroad from Portage. Chronic high winds make flying marginal much of the time. The building is a 273,000 square foot concrete and masonry structure built shortly after World War II to house 2,500 military personnel. It was abandoned in 1965. In 1977, the concrete shell was rated in excellent condition. All other features, including internal partitions, finishes, plumbing, mechanical and electrical equipment and systems were rated for replacement. A 1982 estimate by DOT/PF says $42,155,000 would be needed to make the building functional and a total of $62,394,000 would be required to make it suitable for correctional use. These figures do not include acquisition of the property, which may or may not be available. Because of the concrete-bearing wall construction of the Buchner Building, it would be difficult and costly to recess the many plumbing, electrical and ventilation systems unique to prison construction. In order to establish a high security facility on the Whittier site, it would be necessary to tear down the existing facility and start over, or construct a new facility within the existing shell. Either option would be extremely costly and would far exceed $7 million identified as the acquisition and improvement cost. Over the past several years the Whittier site has been evaluated by administrators of the Division of Corrections, DOT/PF and the CCC/HOK architectural firm in Anchorage. Results consistently indicated the facility would not be suitable for housing either sentenced or unsentenced prisoners. With its capacity for 2,500 persons, the Buchner Building is far too large by national standards. Paragraph 4149 of the American Correctional Standards states that a facility's design should accommodate no more than 500. We believe this to be a sound recommendation from an operational

standpoint. Last year a telegram from the city manager of Whittier (copy attached) expressed strong objection to selection of Whittier as a location for a correctional facility.

Cost effectiveness is an important consideration in both Camp Isabel and Whittier. The higher costs of an inaccessible location affect not only construction costs, but operational costs throughout the life of its use.

Departmental Consideration

The Department of Health and Social Services does not support House Bill No. 88 because it would not meet needs for prisoner housing in Alaska.

Neither Camp Isabel nor the Buchner Building at Whittier complies with essential correctional standards as noted in paragraph 4147 of the American Correctional Standards. (Copy attached)

The following are deficiencies shared by both sites:

- Fire/Life Safety. All inmates must be assured adequate protection from fire and life-threatening situations, both within the buildings and supported by emergency service operations. Both facilities will require significant life safety systems to meet minimum code requirements. Emergency service operations are most efficiently and effectively provided by local community public service departments. Whittier has a small volunteer fire department, but the nearest major fire fighting equipment and personnel are in Anchorage, with no current road access. Closest volunteer fire departments to Camp Isabel are at Glennallen, 82 miles away, and Delta Junction, 70 miles.

- Outside Support. Both sites fail to meet correctional standards noted in paragraph 4147 of the American Correctional Standards. In event of an internal disturbance, staff from nearby institutions, State Troopers and the National Guard must be readily available to help restore perimeter security and insure safety of all persons inside the institutions as well as those outside. An inaccessible location makes this impossible. Closest trooper detachment to Whittier is in Anchorage. There is one trooper in Girdwood. Major trooper detachment for Camp Isabel is in Anchorage, with six troopers in Glennallen. There are three troopers in Delta Junction from the Fairbanks detachment.

- Medical and Dental Care. This is normally provided on contact by physicians, dentists and medical specialists within a community. Camp Isabel is 82 miles from the nearest physician at Glennallen which also has a six-bed hospital, and 158 miles from medical help in Fairbanks. Whittier has no resident health professionals and no supply of medication (see attached resolution). Lack of access to community hospitals is in violation of paragraph 4257 (attached) of the American Correctional Standards. Providing full-time medical professionals on the prison staff is prohibitively expensive and they are nearly impossible to recruit.

- Staffing/Housing. Recruiting, training and retaining correctional staff is costly and difficult under the best of circumstances. Due to the virtual non-existence of adequate private housing in conjunction with the

isolated surroundings, a high turnover of employees would be anticipated. The State may have to provide staff housing at further expense.

- Legal Access. Inmates frequently have interaction with the court system, and they have the right to legal counsel. Transporting prisoners from an inaccessible location to court and counsel would be both costly and time consuming. Inmates at Whittier would have to travel to Anchorage; from Camp Isabel they would go to Fairbanks.

- Community Ties. Regardless of the offense of length of sentence, nearly every prisoner will eventually return to the community. It is unrealistic to believe a person can live in isolation, without community ties, then suddenly be returned and make a successful adjustment. Opportunities for restitution and work release, which could lessen the tax burden, would be limited to non-existent in an inaccessible location.

- Family Ties. Imprisonment strains the family under any circumstances. Lack of opportunity for visits increases the likelihood the family unit will be destroyed and limits opportunities for the offender to successfully reenter the community.

- Programming. The statewide chaplaincy program coordinates services in prisons and arranges individual religious services in any denomination, calling on clergy in the community. The educational programs draw on University staff in nearby communities. Counseling dealing with sex offenses, family abuse, alcohol and drug abuse and other psychological and emotional programs all draw upon various programs existing within a community. Few if any of these programs could be offered in isolated settings such as Camp Isabel or Whittier. Rehabilitation efforts offer the best hope for protection of society against repeat offenders, since virtually all inmates will eventually be released.

In Alaska, the courts and regulatory bodies are getting more and more involved in setting limits on institution capacity, fire/life safety codes, and imposing correctional standards. There is court action pending against institutions in all regions of the state. Although existing regional institutions are being renovated and expanded, they will not meet the security needs or space requirements for housing long-term offenders. The most recent projected security classification of prisoners indicate that 450 close to maximum security beds for sentenced prisoners will be needed by 1985.

In closing, the Department wishes to re-emphasize the need for a new high security institution for sentenced offenders. Existing facilities, due to their operation, configuration, and limited space are unsatisfactory for housing long-term offenders. The facilities described in House Bill No. 88 do not meet standards for prison construction. Consequently, they could not

POSITION PAPER/Department of Health & Social Services

be used to house high security sentenced prisoners without presenting a constant danger to society, staff, and other prisoners and would also commit the State to huge ongoing operating costs.

IV. ANALYSIS

A. Assumptions

1. The acquisition costs identified in the bill are correct ($4,000,000 for Camp Isabel and $7,000,000 for the Buchrer Building, Whittier).

2. Some funding may be available from the $4,000,000 appropriation to improve the facilities at Camp Isabel. The amount still available may not be sufficient to rehabilitate the facilities for correctional use.

3. The Department of Transportation/Public Facilities estimated in 1982 that an additional $62,394,000 would be required to rehabilitate the Buchner Building to be suitable as a correctional facility. It is assumed this figure is still valid.

4. No funding would be available for the operation of either Camp Isabel or the Buchner Building from the $11,000,000 appropriation.

5. A new source of electrical power will probably be needed in Whittier to accommodate a correctional facility.

B. Program Summary

It is impossible to estimate the operational costs without knowing the number of inmates which could be housed at each facility and the number of correctional officers required to staff the facilities (this requirement varies with facility design).

C. Economic Impact

There will be a significant impact on the State budget if these two facilities are opened as correctional centers. However, in this period of growth of the inmate population, staff and costs related to inmate care will be experienced without respect to a particular facility.

D. Impact on Local Governments

Any impact on local governments are assumed to be beneficial because of the incareased stable salary base and limited local purchase practices of correctional centers.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 797

"An Act making special appropriations to the Department of Health and Social Services for the acquisition, improvement, and operation of certain property for use as correctional facilities; and providing for an effective date."

Description of Property

Camp Isabel is located on state leased land at Mile Post 197 off the Richardson Highway, approximately 269 miles from Anchorage and 167 miles from Fairbanks. The camp is composed of 64 metalsided modular buildings. There are 33 barracks, 16 warehouses, four office structures, an 11,000 square foot kitchen, two recreational buildings, a laundry, first aid station and various other ancillary buildings and equipment. Camp capacity was 1,500 persons. The camp was built in the early 1970's and closed in the late 1970's. All buildings are listed in good to poor condition. They consist mainly of plywood and light gauge metal modular buildings which would be difficult and costly to make secure. Buildings would probably have to be removed to provide space for construction of a high security institution built to comply with the 1979 Uniform Building Code. The camp is very large and its configuration does not lend itself to partial use. If it could be used in part, the labyrinth of empty buildings would pose a security and fire risk.

The Buchner Building in Whittier is located on private land 59 miles from Anchorage. There is no direct road access to Whittier, and limited service by the Alaska Railroad from Portage. Chronic high winds make flying marginal most of the time. It is a 273,000 square foot concrete and masonry structure built shortly after World War II to house 2,500 military personnel. It was abandoned in 1965. In 1977, the concrete shell was rated in excellent condition. All other features, including internal partitions, finishes, plumbing, mechanical and electrical equipment and systems were rated for replacement. A 1982 estimate by DOT/PF says $42,155,000 would be needed to make the building functional and a total of $62,394,000 would be required to make it suitable for correctional use. These figures do not include acquisition of the property, which may or may not be available. Because of the concrete-bearing wall construction of the Buchner Building, it would be difficult and costly to recess the many plumbing, electrical and ventilation systems unique to prison construction. In order to establish a high security facility on the Whittier site, it would be necessary to tear down the existing facility and start over, or construct a new facility within the existing shell. Either option would be extremely costly and far exceed $7 million. Over the past several years the Whittier site has been evaluated by administrators of the Division of Corrections, DOT/PF and the CCC/HOK architectural firm in Anchorage. Results consistently indicated the facility would not be suitable for housing either sentenced or unsentenced prisoners. With its capacity for 2,500 persons, the Buchner Building is far too large by national standards. Paragraph 4149 of the American Correctional Standards states that a facility's design should accommodate no more than 500. A telegram from the city manager of Whittier (copy attached) expresses strong objection to selection of Whittier as a location for a correctional facility. Cost effectiveness is an important consideration in both Camp Isabel and Whittier. The higher costs of an inaccessible location affect not only construction costs, but operational costs throughout the life of its use.

POSITION PAPER/Department of Health & Social Services

Departmental Consideration

The Department of Health and Social Services does not support House Bill No. 797 because it would not meet needs for prisoner housing in Alaska.

Neither Camp Isabel nor the Buchner Building at Whittier complies with essential correctional standards as noted in paragraph 4147 of the American Correctional Standards. (Copy attached)

The following are deficiencies shared by both sites:

- Fire/Life Safety. All inmates must be assured adequate protection from fire and life-threatening situations, both within the buildings and supported by emergency service operations. Both facilities will require significant life safety systems to meet minimum code requirements. Emergency service operations are most efficiently and effectively provided by local community public service departments. Whittier has a small volunteer fire department, but the nearest major fire fighting equipment and personnel are in Anchorage, with no current road access. Closest volunteer fire departments to Camp Isabel are at Glennallen, 82 miles away, and Delta Junction, 70 miles.

- Outside Support. Both sites fail to meet correctional standards noted in paragraph 4147 of the American Correctional Standards. In event of an internal disturbance, staff from nearby institutions, State Troopers and the National Guard must be readily available to help restore perimeter security and insure safety of all persons inside the institutions as well as those outside. An inaccessible location makes this impossible. Closest trooper detachment to Whittier is in Anchorage. There is one trooper in Girdwood. Major trooper detachment for Camp Isabel is in Fairbanks, with seven troopers in Glennallen and three troopers in Delta Junction.

- Medical and Dental Care. This is normally provided on contract by physicians, dentists and medical specialists within a community. Camp Isabel is 82 miles from the nearest physician at Glennallen which also has a six-bed hospital, and 158 miles from medical help in Fairbanks. Whittier has no resident health professionals and no supply of medication. (See attached resolution) Lack of access to community hospitals is in violation of paragraph 4257 (attached) of the American Correctional Standards. Providing full-time medical professionals on the prison staff is prohibitively expensive and they are nearly impossible to recruit.

- Staffing. Recruiting, training and retaining correctional staff is costly and difficult under the best of circumstances. High turnover is disruptive and very cost ineffective. Few employees may be willing to live in isolated surroundings for more than a short time. Because of the hardship imposed on families, we do not expect much success in recruiting and retaining a staff for Isabel Pass or Whittier. We may have to provide staff housing at further expense.

- Legal Access. Inmates frequently have interaction with the court system, and they have the right to legal counsel. Transporting prisoners from an inaccessible location to court and counsel would be both costly and dangerous. Inmates at Whittier would have to travel to Anchorage; from Camp Isabel they would go to Fairbanks.

POSITION PAPER/Department of Health & Social Services

- Community Ties. Regardless of the offense or length of sentence, nearly every prisoner will eventually return to the community. It is unrealistic to believe a person can live in isolation, without community ties, then suddenly be returned and make a successful adjustment. Opportunities for restitution and work release, which could lessen the tax burden, would be limited to non-existant in an inaccessible location.

- Family Ties. Imprisonment strains the family under any circumstances. Lack of opportunity for visits increases the likelihood the family unit will be destroyed and limits opportunities for the offender to successfully reenter the community. This can also lead to more families on welfare.

- Programming. The statewide chaplaincy program coordinates services in prisons and arranges individual religious services in any demonination, calling on clergy in the community. The University Within Walls program draws on University staff in nearby communities. Counseling dealing with sex offenses, family abuse, alcohol and drug abuse and other psychological and emotional programs all draw upon various programs existing within a community. Few if any of these programs could be offered in isolated settings such as Camp Isabel or Whittier. Rehabilitation efforts offer the best hope for protection of society against repeat offenders, since virtually all inmates will eventually be released.

In Alaska, the courts and regulatory bodies are getting more and more involved in setting limits on institution capacity, fire/life safety codes, and imposing correctional standards. There is court action pending against institutions in all regions of the state. Although existing regional institutions are being renovated and expanded, they will not meet the security needs or space requirements for housing long-term offenders. The projected security classification of prisoners indicate that 330 close to maximum security beds for sentenced prisoners are needed by 1985.

In closing, the Department wishes to re-emphasize the need for a new high security institution for sentenced offenders. Existing facilities, due to their operation, configuration, and limited space are unsatisfactory for housing longterm offenders. The facilities described in House Bill No. 797 do not meet standards for prison construction. Consequently, they could not be used to house high security sentenced prisoners without presenting a constant danger to society, staff, and other prisoners.

REGARDING: HOUSE BILL 797

DEAR REP. CATO:

THE CITY OF WHITTIER, ALASKA, STANDS VEHEMENTLY OPPOSED TO A STATE CORRECTIONAL FACILITY BEING LOCATED IN WHITTIER.

1. THE PEOPLE OF THE CITY OF WHITTIER HAVE NEVER BEEN CONSULTED CONCERNING THEIR WISHES EGARDING LOCATING A PRISON IN THE CITY OF WHITTIER. IT IS INAPPROPRIATE THAT A HOUSE BILL BE INTRODUCED ABSENT PRIOR SOLICITATION OF GUIDANCE, INTEREST OR OPPOSITION FROM THE PERSONS EFFECTED SO MATERIALLY AND SO SUBSTANTIALLY BY THE LEGISLATION. A PRISON IN WHITTIER WOULD COMPLETELY ALTER AND UNDERMINE IF NOT FULLY DETERMINE THE CHARACTER AND CONCEPT OF THE COMMUNITY OF WHITTIER.

2. THE PEOPLE OF THE CITY OF WHITTIER ARE ADAMANTLY OPPOSED TO THE LOCATION OF PRISON FACILITIES IN WHITTIER. A PRISON DOES NOT FIT IN WITH THE ETHOS, CHARACTER, CONCEPT OR PLAN DEVELOPMENT ENVISIONED FOR THE CITY OF WHITTIER. WHITTIER ENVISIONS ITSELF AS A COMMUNITY RESURRECTED FROM MILITARY ABANDONMENT, AS AN UP AND COMING COMMERCIAL PORT, AS A RAIL COMMERCE CENTER, AS A CITY HOUSING MILITARY FACILITY OPERATION, AS A COMMUNITY FOR CHILDREN, AS A COMMUNITY FOR RETIRING ALASKANS, AS A PLACE FOR FOCUS UPON FISHERIES ACTIVITIES, AND AS A GATEWAY FOR TOURISM AND OTHER RECREATION FROM ANCHORAGE AND OTHER PLACES IN ALASKA. PEOPLE IN WHITTIER DID NOT MOVE TO WHITTIER TO LIVE IN A PRISON COMMUNITY, AND THEY HAVE THE RIGHT NOT TO HAVE A PRISON RAMMED DOWN THEIR THROATS BY THE STATE AS IT HAS NOT BEEN ABLE TO FIND

A PRISON IN WHITTIER WOULD NOT BE COMPATIBLE WITH THE ABOVE GOALS TAKEN AS A WHOLE AND COULD VIRTUALLY RUIN THE COMMUNITY AS A RECREATIONAL CENTER AND GATEWAY TO THE MAGNIFICENT PRINCE WILLIAM SOUND RECREATIONAL AREA.

3. MAKING A PRISON OUT OF THE BUCKNER BUILDING IN WHITTIER WOULD NOT BE THE HIGHEST AND BEST USE OF THE REGION AND PROPERTY IN QUESTION. THE FACILITY HAS BEEN DERELICT FOR A NUMBER OF YEARS AND WAS NOT DESIGNED AS A PRISON. MOLDING THE BUILDING INTO A PRISON FACILITY COULD RESULT IN CUTTING THE CITY OF WHITTIER IN HALF AND IN MAKING THE GREAT PART OF THE CITY N ARMED CAMP. THE SPECIAL AND UNIQUE CHARACTER OF WHITTIER, THE HARSH WEATHER, THE RUGGED LANDSCAPE AND THE SHADED SUNLIGHT IN WINTER WOULD MAKE THE ISOLATION IN PRISON LIFE MORE PSYCHOLOGICALLY BURDENSOME ON BOTH THE TOWN AND PRISON POPULATION.

4. THE CITY OF WHITTIER POSSESS RIGHTS UNDER ITS CONTRACT OF SALE OF THE BUCKNER BUILDING TO C.B.S. REAL ESTATE IN 1977. AMONG THE MATERIAL CONDITIONS OF THE SALE WAS A REQUIREMENT THAT THE BUILDING BE COMPLETED IN LATE 1982. THIS REQUIREMENT DOES NOT APPEAR AS IF IT WILL BE MET, AND THE CITY OF WHITTIER NOTIFIED THAT STATE OF ALASKA HEREIN THAT IT RESERVES ALL RIGHTS UNDER ITS CONTRACT FOR THE SALE OF THE BUILDING TO C.B.S. REAL ESTATE, INCORPORATED.

IT IS IRONIC THAT WHITTIER WOULD HAVE BEEN WILLING IN 1976 OR 1977 TO ALLOW THE STATE OF ALASKA TO ACQUIRE THE BUILDING FOR A NOMINAL PRICE (ABOUT DLRS200,000) FOR A SUITABLE PURPOSE, AND THAT NOW THE STATE PROPOSES TO PURCHASE THE BUILDING FOR MILLIONS FROM THE PRIVATE INTERESTS WHO CONDITIONALLY BOUGHT THE BUILDING AT THE NOMINAL PRICE.

OTHER DEVELOPMENTS WILL BE REPORTED THROUGH OUR STATE REPRESENTATIVE SENATOR J KERTTULA AND REPRESENTATIVE BETTE CATO, BUT THOUGHTFUL CONSIDERATION AND ASSISTANCE IS REQUESTED FROM ALL OF YOU WHO RECEIVE THIS MESSAGE.

THANK YOU FOR YOUR TIME AND CONSIDERATION. SINCERELY

3/8/83

IV. ANALYSIS

A. Assumptions

1. The acquisition cost identified in the bill is correct.

2. The Department of Transportation/Public Facilities estimated in 1982 that an additional $62,394,000 would be required to rehabilitate the Buchner Building to be suitable as a correctional facility. It is assumed the present owner would remodel to Corrections' specifications to stay within the $27,000,000 appropriation. It is alleged that the present owner has stated that he would do the required remodeling and sell the structure for $27,000,000 to the State.

3. A new source of electrical power will probably be needed in Whittier to accommodate a correctional facility.

B. Program Summary

It is impossible to estimate the operational costs without knowing the number of inmates which could be housed at each facility and the number of correctional officers required to staff the facilities (this requirement varies with facility design).

C. Economic Impact

There will be a significant impact on the State budget if this proposed facility is opened as a correctional center. However, in this period of growth of the inmate population, staff and costs related to inmate care will be experienced without respect to any particular facility.

D. Impact on Local Governments

Any impact on local governments are assumed to be beneficial because of the increased salary base and local purchase practices of correctional centers.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 88

"An Act making special appropriations to the Department of Health and Social Services for the acquisition, improvement, of the Buchner Building in Whittier as a correctional facility; and providing for an effective date.

Description of Property

The Buchner Building in Whittier is located on private land 59 miles from Anchorage. There is no direct road access to Whittier, and limited service by the Alaska Railroad from Portage. Chronic high winds make flying marginal much of the time. The building is a 273,000 square foot concrete and masonry structure built shortly after World War II to house 2,500 military personnel. It was abandoned in 1965. In 1977, the concrete shell was rated in excellent condition. All other features, including internal partitions, finishes, plumbing, mechanical and electrical equipment and systems were rated for replacement. A 1982 estimate by DOT/PF says $42,155,000 would be needed to make the building functional and a total of $62,394,000 would be required to make it suitable for correctional use. These figures do not include acquisition of the property, which may or may not be available. Because of the concrete-bearing wall construction of the Buchner Building, it would be difficult and costly to recess the many plumbing, electrical and ventilation systems unique to prison construction. In order to establish a high security facility on the Whittier site, it would be necessary to tear down the existing facility and start over, or construct a new facility within the existing shell. Either option would be extremely costly and would far exceed $7 million identified as the acquisition and improvement cost. Over the past several years the Whittier site has been evaluated by administrators of the Division of Corrections, DOT/PF and the CCC/HOK architectural firm in Anchorage. Results consistently indicated the facility would not be suitable for housing either sentenced or unsentenced prisoners. With its capacity for 2,500 persons, the Buchner Building is far too large by national standards. Paragraph 4149 of the American Correctional Standards states that a facility's design should accommodate no more than 500. We believe this to be a sound recommendation from an operational standpoint. Last year a telegram from the city manager of Whittier (copy attached) expressed strong objection to selection of Whittier as a location for a correctional facility.

Cost effectiveness is an important consideration. The higher costs of an inaccessible location affect not only construction costs, but operational costs throughout the life of its use.

Departmental Consideration

The Department of Health and Social Services does not support House Bill No. 88 because it would not meet needs for prisoner housing in Alaska.

The Buchner Building at Whittier does not comply with essential correctional standards as noted in paragraph 4147 of the American Correctional Standards. (Copy attached)

POSITION PAPER/Department of Health & Social Services

The following are deficiencies of the site:

- Fire/Life Safety. All inmates must be assured adequate protection from fire and life-threatening situations, both within the buildings and supported by emergency service operations. The facility will require significant life safety systems to meet minimum code requirements. Emergency service operations are most efficiently and effectively provided by local community public service departments. Whittier has a small volunteer fire department, but the nearest major fire fighting equipment and personnel are in Anchorage, with no current road access.

- Outside Support. The site fails to meet correctional standards noted in paragraph 4147 of the American Correctional Standards. In event of an internal disturbance, staff from nearby institutions, State Troopers and the National Guard must be readily available to help restore perimeter security and insure safety of all persons inside the institutions as well as those outside. An inaccessible location makes this impossible. Closest trooper detachment to Whittier is in Anchorage and there is one trooper in Girdwood.

- Medical and Dental Care. This is normally provided on contact by physicians, dentists and medical specialists within a community. Whittier has no resident health professionals and no supply of medication (see attached resolution). Lack of access to community hospitals is in violation of paragraph 4257 (attached) of the American Correctional Standards. Providing full-time medical professionals on the prison staff is prohibitively expensive and they are nearly impossible to recruit.

- Staffing/Housing. Recruiting, training and retaining correctional staff is costly and difficult under the best of circumstances. Due to the virtual non-existence of adequate private housing in conjunction with the isolated surroundings, a high turnover of employees would be anticipated. The State may have to provide staff housing at further expense.

- Legal Access. Inmates frequently have interaction with the court system, and they have the right to legal counsel. Transporting prisoners from an inaccessible location to court and counsel would be both costly and time consuming; inmates at Whittier would have to travel to Anchorage.

- Community Ties. Regardless of the offense of length of sentence, nearly every prisoner will eventually return to the community. It is unrealistic to believe a person can live in isolation, without community ties, then suddenly be returned and make a successful adjustment. Opportunities for restitution and work release, which could lessen the tax burden, would be limited to non-existent in an inaccessible location.

- Family Ties. Imprisonment strains the family under any circumstances. Lack of opportunity for visits increases the likelihood the family unit will be destroyed and limits opportunities for the offender to successfully reenter the community.

- Programming. The statewide chaplaincy program coordinates services in prisons and arranges individual religious services in any denomination, calling on clergy in the community. The educational programs draw on University staff in nearby communities. Counseling dealing with sex

offenses, family abuse, alcohol and drug abuse and other psychological and emotional programs all draw upon various programs existing within a community. Few if any of these programs could be offered in isolated setting such as Whittier. Rehabilitation efforts offer the best hope for protection of society against repeat offenders, since virtually all inmates will eventually be released.

In Alaska, the courts and regulatory bodies are getting more and more involved in setting limits on institution capacity, fire/life safety codes, and imposing correctional standards. There is court action pending against institutions in all regions of the state. Although existing regional institutions are being renovated and expanded, they will not meet the security needs or space requirements for housing long-term offenders. The most recent projected security classification of prisoners indicate that 450 close to maximum security beds for sentenced prisoners will be needed by 1985.

In closing, the Department wishes to re-emphasize the need for a new high security institution for sentenced offenders. Existing facilities, due to their operation, configuration, and limited space are unsatisfactory for housing long-term offenders. The facility referred to in SS for House Bill No. 88 does not meet standards for prison construction. Consequently, it could not be used to house high security sentenced prisoners without presenting a constant danger to society, staff, and other prisoners and would also commit the State to huge ongoing operating costs.

GEORGE E. WEISS, CITY MANAGER

ON BEHALF OF THE MAYOR, CITY COUNCIL AND THE

DISCUSSION: Sensory deprivation should be reduced by providing variety in terms of space, surface textures and colors. Natural lighting should be available from a source within 20 feet of the room or cell. The bed should be off the floor with a clean, covered mattress and blankets provided as needed. Adequate shower facilities should be provided so that each inmate can bathe daily.

4144 Where used, dormitories house no more than 50 inmates each, and have:

- At least 10 cubic feet of fresh or purified and recirculated air per minute for each person occupying the dormitory;
- Access to hot and cold running water;
- Adequate toilet and shower facilities;
- Locker for each individual;
- Lighting of at least 20 footcandles;
- A minimum floor area of 60 square feet per inmate and a clear floor-to-ceiling height of eight feet;
- Noise levels low enough so as not to interfere with normal human activities;
- No double or triple bunking; and
- Clear observation/supervision lines of sight for staff. (Important)

DISCUSSION: Where dormitory housing cannot be avoided, the number of inmates per dormitory should be kept low. Living conditions may be enhanced by placing partitions between beds or by increasing the space between beds as much as possible. Chairs and desks should be provided for reading and writing.

4145 Staff offices are located so that they are readily accessible to inmates and there is a minimum of physical barriers separating inmates from staff. (Essential)

DISCUSSION: Isolation of staff members reduces their effectiveness as professional personnel by discouraging interpersonal relationships.

4146 The institution has a written plan for preventive maintenance of the physical plant that it reviews and updates annually. (Essential)

DISCUSSION: A specific plan for preventive maintenance, implemented by qualified staff or professionals, is necessary for safe and efficient operation. Regular care and inspection of equipment is essential.

New Plants Only

4147 The facility is located within 50 miles of a civilian population center that can provide services to support correctional goals. (Essential)

DISCUSSION: Proximity to a civilian population center provides community services to support correctional goals, such as social services, schools, hospitals, colleges and universities, and employment opportunities. It also allows for recruitment of personnel having racial and ethnic origins similar to those of inmates. Proximity to a civilian population center also allows the institution to procure maintenance services more efficiently and at less cost.

4148 New prison planning precludes the use of dormitories as part of the mainline population housing. (Essential)

FOR TODAY

March 28, 1983
Mae, Milo:

Since we're hearing from a contractor and owner of the Buchner Building, I have attached a position paper from last year's DHSS on the building. This was provided to me as backup by the sponsor of SSHB 88, Rep. Bettisorth. However, there isn't much to back up the bill. The position paper lists several major problems with the facility and the location and strongly opposes the purchase or use of the building for a prison.

There is a memo from the City Manager of Whittier, George Weiss, that suggests that the owners of the Buchner facility bought it for $200,000. SSHB 88 appropriates 27 million dollars, but there is no breakdown as to how much is for the facility and how much is for the improvements.

It seems to me that the approach to the correctional facility is just backwards. Instead of talking to the property owner and a contractor who may have a significant financial interest in the project, shouldn't the Division of Corrections first identify a site, develop a plan, call for bids nd award bids based on the best price? How can a contractor or land owner propose to build a facility for any amount without looking at the plans and without knowing what will be expected? Don't forget too, that the statutes require bidding and award to the lowest bid.

I'll have more on this for the hearing next Tuesday. State offices are all closed today.

Dave

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 797

"An Act making special appropriations to the Department of Health and Social Services for the acquisition, improvement, and operation of certain property for use as correctional facilities; and providing for an effective date."

Description of Property

Camp Isabel is located on state leased land at Mile Post 197 off the Richardson Highway, approximately 269 miles from Anchorage and 167 miles from Fairbanks. The camp is composed of 64 metalsided modular buildings. There are 33 barracks, 16 warehouses, four office structures, an 11,000 square foot kitchen, two recreational buildings, a laundry, first aid station and various other ancillary buildings and equipment. Camp capacity was 1,500 persons. The camp was built in the early 1970's and closed in the late 1970's. All buildings are listed in good to poor condition. They consist mainly of plywood and light gauge metal modular buildings which would be difficult and costly to make secure. Buildings would probably have to be removed to provide space for construction of a high security institution built to comply with the 1979 Uniform Building Code. The camp is very large and its configuration does not lend itself to partial use. If it could be used in part, the labyrinth of empty buildings would pose a security and fire risk.

The Buchner Building in Whittier is located on private land 59 miles from Anchorage. There is no direct road access to Whittier, and limited service by the Alaska Railroad from Portage. Chronic high winds make flying marginal most of the time. It is a 273,000 square foot concrete and masonry structure built shortly after World War II to house 2,500 military personnel. It was abandoned in 1965. In 1977, the concrete shell was rated in excellent condition. All other features, including internal partitions, finishes, plumbing, mechanical and electrical equipment and systems were rated for replacement. A 1982 estimate by DOT/PF says $42,155,000 would be needed to make the building functional and a total of $62,394,000 would be required to make it suitable for correctional use. These figures do not include acquisition of the property, which may or may not be available. Because of the concrete-bearing wall construction of the Buchner Building, it would be difficult and costly to recess the many plumbing, electrical and ventilation systems unique to prison construction. In order to establish a high security facility on the Whittier site, it would be necessary to tear down the existing facility and start over, or construct a new facility within the existing shell. Either option would be extremely costly and far exceed $7 million. Over the past several years the Whittier site has been evaluated by administrators of the Division of Corrections, DOT/PF and the CCC/HOK architectural firm in Anchorage. Results consistently indicated the facility would not be suitable for housing either sentenced or unsentenced prisoners. With its capacity for 2,500 persons, the Buchner Building is far too large by national standards. Paragraph 4149 of the American Correctional Standards states that a facility's design should accommodate no more than 500. A telegram from the city manager of Whittier (copy attached) expresses strong objection to selection of Whittier as a location for a correctional facility. Cost effectiveness is an important consideration in both Camp Isabel and Whittier. The higher costs of an inaccessible location affect not only construction costs, but operational costs throughout the life of its use.

POSITION PAPER/Department of Health & Social Services

Departmental Consideration

The Department of Health and Social Services does not support House Bill No. 797 because it would not meet needs for prisoner housing in Alaska.

Neither Camp Isabel nor the Buchner Building at Whittier complies with essential correctional standards as noted in paragraph 4147 of the American Correctional Standards. (Copy attached)

The following are deficiencies shared by both sites:

- Fire/Life Safety. All inmates must be assured adequate protection from fire and life-threatening situations, both within the buildings and supported by emergency service operations. Both facilities will require significant life safety systems to meet minimum code requirements. Emergency service operations are most efficiently and effectively provided by local community public service departments. Whittier has a small volunteer fire department, but the nearest major fire fighting equipment and personnel are in Anchorage, with no current road access. Closest volunteer fire departments to Camp Isabel are at Glennallen, 82 miles away, and Delta Junction, 70 miles.

- Outside Support. Both sites fail to meet correctional standards noted in paragraph 4147 of the American Correctional Standards. In event of an internal disturbance, staff from nearby institutions, State Troopers and the National Guard must be readily available to help restore perimeter security and insure safety of all persons inside the institutions as well as those outside. An inaccessible location makes this impossible. Closest trooper detachment to Whittier is in Anchorage. There is one trooper in Girdwood. Major trooper detachment for Camp Isabel is in Fairbanks, with seven troopers in Glennallen and three troopers in Delta Junction.

- Medical and Dental Care. This is normally provided on contract by physicians, dentists and medical specialists within a community. Camp Isabel is 82 miles from the nearest physician at Glennallen which also has a six-bed hospital, and 158 miles from medical help in Fairbanks. Whittier has no resident health professionals and no supply of medication. (See attached resolution) Lack of access to community hospitals is in violation of paragraph 4257 (attached) of the American Correctional Standards. Providing full-time medical professionals on the prison staff is prohibitively expensive and they are nearly impossible to recruit.

- Staffing. Recruiting, training and retaining correctional staff is costly and difficult under the best of circumstances. High turnover is disruptive and very cost ineffective. Few employees may be willing to live in isolated surroundings for more than a short time. Because of the hardship imposed on families, we do not expect much success in recruiting and retaining a staff for Isabel Pass or Whittier. We may have to provide staff housing at further expense.

- Legal Access. Inmates frequently have interaction with the court system, and they have the right to legal counsel. Transporting prisoners from an inaccessible location to court and counsel would be both costly and dangerous. Inmates at Whittier would have to travel to Anchorage; from Camp Isabel they would go to Fairbanks.

POSITION PAPER/Department of Health & Social Services

- Community Ties. Regardless of the offense or length of sentence, nearly every prisoner will eventually return to the community. It is unrealistic to believe a person can live in isolation, without community ties, then suddenly be returned and make a successful adjustment. Opportunities for restitution and work release, which could lessen the tax burden, would be limited to non-existant in an inaccessible location.

- Family Ties. Imprisonment strains the family under any circumstances. Lack of opportunity for visits increases the likelihood the family unit will be destroyed and limits opportunities for the offender to successfully reenter the community. This can also lead to more families on welfare.

- Programming. The statewide chaplaincy program coordinates services in prisons and arranges individual religious services in any demonination, calling on clergy in the community. The University Within Walls program draws on University staff in nearby communities. Counseling dealing with sex offenses, family abuse, alcohol and drug abuse and other psychological and emotional programs all draw upon various programs existing within a community. Few if any of these programs could be offered in isolated settings such as Camp Isabel or Whittier. Rehabilitation efforts offer the best hope for protection of society against repeat offenders, since virtually all inmates will eventually be released.

In Alaska, the courts and regulatory bodies are getting more and more involved in setting limits on institution capacity, fire/life safety codes, and imposing correctional standards. There is court action pending against institutions in all regions of the state. Although existing regional institutions are being renovated and expanded, they will not meet the security needs or space requirements for housing long-term offenders. The projected security classification of prisoners indicate that 330 close to maximum security beds for sentenced prisoners are needed by 1985.

In closing, the Department wishes to re-emphasize the need for a new high security institution for sentenced offenders. Existing facilities, due to their operation, configuration, and limited space are unsatisfactory for housing longterm offenders. The facilities described in House Bill No. 797 do not meet standards for prison construction. Consequently, they could not be used to house high security sentenced prisoners without presenting a constant danger to society, staff, and other prisoners.

REGARDING: HOUSE BILL 797

DEAR REP. CATO:

THE CITY OF WHITTIER, ALASKA, STANDS VEHEMENTLY OPPOSED TO A STATE CORRECTIONAL FACILITY BEING LOCATED IN WHITTIER.

1. THE PEOPLE OF THE CITY OF WHITTIER HAVE NEVER BEEN CONSULTED CONCERNING THEIR WISHES EGARDING LOCATING A PRISON IN THE CITY OF WHITTIER. IT IS INAPPROPRIATE THAT A HOUSE BILL BE INTRODUCED ABSENT PRIOR SOLICITATION OF GUIDANCE, INTEREST OR OPPOSITION FROM THE PERSONS EFFECTED SO MATERIALLY AND SO SUBSTANTIALLY BY THE LEGISLATION. A PRISON IN WHITTIER WOULD COMPLETELY ALTER AND UNDERMINE IF NOT FULLY DETERMINE THE CHARACTER AND CONCEPT OF THE COMMUNITY OF WHITTIER.

2. THE PEOPLE OF THE CITY OF WHITTIER ARE ADAMANTLY OPPOSED TO THE LOCATION OF PRISON FACILITIES IN WHITTIER. A PRISON DOES NOT FIT IN WITH THE ETHOS, CHARACTER, CONCEPT OR PLAN DEVELOPMENT ENVISIONED FOR THE CITY OF WHITTIER. WHITTIER ENVISIONS ITSELF AS A COMMUNITY RESURRECTED FROM MILITARY ABANDONMENT, AS AN UP AND COMING COMMERCIAL PORT, AS A RAIL COMMERCE CENTER, AS

A CITY HOUSING MILITARY FACILITY OPERATION, AS A COMMUNITY FOR CHILDREN, AS A COMMUNITY FOR RETIRING ALASKANS, AS A PLACE FOR FOCUS UPON FISHERIES ACTIVITIES, AND AS A GATEWAY FOR TOURISM AND OTHER RECREATION FROM ANCHORAGE AND OTHER PLACES IN ALASKA. PEOPLE IN WHITTIER DID NOT MOVE TO WHITTIER TO LIVE IN A PRISON COMMUNITY, AND THEY HAVE THE RIGHT NOT TO HAVE A PRISON RAMMED DOWN THEIR THROATS BY THE STATE AS IT HAS NOT BEEN ABLE TO FIND

FOR THE STATE WOULD BE TO START A NEW COMMUNITY AS A PRISON IN SOME ISOLATED AREA OF THE INTERIOR OR ON SOME UNHABITATED ISLAND. A PRISON IN WHITTIER WOULD NOT BE COMPATIBLE WITH THE ABOVE GOALS TAKEN AS A WHOLE AND COULD VIRTUALLY RUIN THE COMMUNITY AS A RECREATIONAL CENTER AND GATEWAY TO THE MAGNIFICENT PRINCE WILLIAM SOUND RECREATIONAL AREA.

3. MAKING A PRISON OUT OF THE BUCKNER BUILDING IN WHITTIER WOULD NOT BE THE HIGHEST AND BEST USE OF THE REGION AND PROPERTY IN QUESTION. THE FACILITY HAS BEEN DERELICT FOR A NUMBER OF YEARS AND WAS NOT DESIGNED AS A PRISON. MOLDING THE BUILDING INTO A PRISON FACILITY COULD RESULT IN CUTTING THE CITY OF WHITTIER IN HALF AND IN MAKING THE GREAT PART OF THE CITY N ARMED CAMP. THE SPECIAL AND UNIQUE CHARACTER OF WHITTIER, THE HARSH WEATHER, THE RUGGED LANDSCAPE AND THE SHADED SUNLIGHT IN WINTER WOULD MAKE THE ISOLATION IN PRISON LIFE MORE PSYCHOLOGICALLY BURDENSOME ON BOTH THE TOWN AND PRISON POPULATION.

4. THE CITY OF WHITTIER POSSESS RIGHTS UNDER ITS CONTRACT OF SALE OF THE BUCKNER BUILDING TO C.B.S. REAL ESTATE IN 1977. AMONG THE MATERIAL CONDITIONS OF THE SALE WAS A REQUIREMENT THAT THE BUILDING BE COMPLETED IN LATE 1982. THIS REQUIREMENT DOES NOT APPEAR AS IF IT WILL BE MET, AND THE CITY OF WHITTIER NOTIFIED THAT STATE OF ALASKA HEREIN THAT IT RESERVES ALL RIGHTS UNDER ITS CONTRACT FOR THE SALE OF THE BUILDING TO C.B.S. REAL ESTATE, INCORPORATED.

IT IS IRONIC THAT WHITTIER WOULD HAVE BEEN WILLING IN 1976 OR 1977 TO ALLOW THE STATE OF ALASKA TO ACQUIRE THE BUILDING FOR A NOMINAL PRICE (ABOUT DLRS200,000) FOR A SUITABLE PURPOSE, AND THAT NOW THE STATE PROPOSES TO PURCHASE THE BUILDING FOR MILLIONS FROM THE PRIVATE INTERESTS WHO CONDITIONALLY BOUGHT THE BUILDING AT THE NOMINAL PRICE.

OTHER DEVELOPMENTS WILL BE REPORTED THROUGH OUR STATE REPRESENTATIVE SENATOR J KERTTULA AND REPRESENTATIVE BETTE CATO, BUT THOUGHTFUL CONSIDERATION AND ASSISTANCE IS REQUESTED FROM ALL OF YOU WHO RECEIVE THIS MESSAGE.

THANK YOU FOR YOUR TIME AND CONSIDERATION. SINCERELY

GEORGE E. WEISS, CITY MANAGER

ON BEHALF OF THE MAYOR, CITY COUNCIL AND THE

PEOPLE OF THE CITY OF WHITTIER

THE CITY OF WHITTIER

26 January 1982

Dr. Helen Beirne

Juneau, Alaska 99811

Re: The Absence Of Health Care In Whittier

Dear Dr. Beirne:

I am writing to you to express the concern of the permanent residents of Whittier regarding the absence of health care in the City of Whittier.

Whittier has no direct road access and only limited service by the Alaska Railroad. Flying is marginal most of the time, [even in summer because of chronic high winds], and delays are encountered in obtaining rail track use clearances for the rail equipped ambulance.

Whittier does not have a physician at any time.

When a medical emergency occurs, the patient must be transported to Anchorage. Under the most ideal conditions, this is a two hour trip. Several hours would be a more reasonable expectation. There are no health professionals in Whittier presently authorized to administer emergency medication to ease pain amnd suffering. In fact, Whittier is without any supply of medications whatsoever.

A minor illness such as an earache, sore throat, etc. has to be treated in Anchorage at high personal expense to the individual. If the illness occurs on a day other than a day when the passenger trains are scheduled, treatment can be

delayed up to three days; otherwise the only recourse is travel by the rail ambulance.

Whittier's goal is to establish a clinic where a professional physician extender can give primary health care in Whittier. (See copy of Resolution 01-21-82 attached.)

Mr. Denny DeGross, from South Central Health & Planning Development, Inc., shall be meeting with the people of Whittier on 28 January 1982. Mr. DeGross will be in Whittier for two days to meet and talk with people and to assess and evaluate needs and problems and to assist in organizing.

This letter is Whittier's outreach to you seeking your advice, suggestions and referrals to state programs including assistance in procuring state loans and grants.

Whittier's problems may be unique, but surely some of the parameters of our problems must have been experienced to greater and lesser degrees in other areas within Alaska.

Sincerely,

George E. Weiss, Whittier City Manager

enc: Copy of Resolution 01-21-82

cc: Whittier City Council

CITY OF WHITTIER

Resolution No. 01-21-82

A RESOLUTION SUPPORTING THE ESTABLISHMENT OF A FACILITY AND THE PROVISION OF A PROFESSIONAL PHYSICIAN EXTENDER SO AS TO PROVIDE PRIMARY HEALTH CARE IN WHITTIER.

WHEREAS, the City of Whittier holds first and foremost the health and well being of its citizens; and

WHEREAS, the presently exists a genuine need for primary health care in Whittier, which is not presently being provided by any agency; such care includes, without limitation, the diagnosis and treatment of physical injuries and illness which c dinarily would not require hospitalization, psychological intervention, and follow-up treatment for chronic and other conditions;

NOW THEREFORE BE IT RESOLVED that the City of Whittier supports the following:

1. That a feasibility study be undertaking by an appropriate health provider or health planning agency of the State of Alaska to determine the extent of primary care health needs in Whittier and to investigate ways and means of funding such needs.

2. The placement of a physician extender in Whittier for purposes of providing primary health care.

3. And the establishment of a clinical health care facility in Whittier.

SO RESOLVED this 21st day of January 1982.

Cecil Triplett
Mayor

REFERENCE: Buckner Building - Whittier, AK

SUBJECT: Preliminary Project Review - Cost Estimate

Gentlemen:

At your request, per the commisson given us, we have made a complete review, on a preliminary basis, of the above reference structure.

Our commission, as we understand it, is to provide you with cost figures in two parts, as follow:

1. Remodeling and conversion of the exsisting building, to be used as a correctional facility.

2. A remodeling of the exsisting facility, including new ventilation and heating systems and electrical systems. In addition, new elevators, new roofing, new flooring, new ceiling systems and a number of new partitions. Additionally,, per your instructions, we have included costs for restoration of the building exterior, as well as, additions for a six lane bowling alley and bakery, a sixteen bed hospital and a new dining area/kitchen facility.

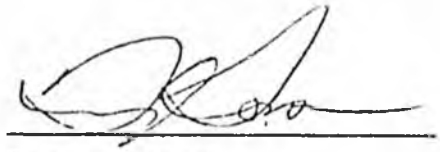
Our review anticipates that any and all work which would be done would meet existing state and local codes.

The figures we have arrived at, are based upon the preliminary sketches, pictures and numerous meetings with your company.

Due to the fact that we did not have definitive, exact drawings from which to work, our price must be considered preliminary and in this regard, we are providing you a cost range for each item. Our estimates are as follows:

1. For remodel and conversion to a correctional facility, our cost estimate range is $23,725,000 to $25,100,000.

2. For remodeling and additions as noted above, our cost estimate range is $18,650,000 to $19,800,000.



If we can be of further assistance or should you wish a more exact cost estimate after development of drawings, we would be pleased to provide them for you.

Attached is our billing, which we forward with this report, for payment.

Thank you for using our services.

Very truly yours,

Attention: Mr. Zamarello

Reference: 276,000 S.F. Buckner Building in Whittier, AK.
February 10, 1983 review

Dear Sir:

In response to your request for an estimate regarding the above referenced building, we offer the following.

To meet all existing state and local codes, remodeling should include: new partitions, ceiling system, floors, new heating and ventilation systems, electrical system, new elevators and a new roof. Also in this survey is a new commercial dining room and kitchen, a sixteen bed hospital, six lane bowling alley, a complete bakery and complete restoration of the exterior. It is our opinion that the above can be accomplished for a cost of approximately $13,800,000.00.

To convert the building to a correctional facility the above stated amount will have to be increased by a minimum of 25%.

If you need additional information or if you are interested in a design proposal, please do not hesitate to call us.

We thank you for this opportunity to submit this proposal and are looking forward to working with you on this project.

Very sincerely yours,

Georg Janssen

Re: Restoration of the Buckner Bldg. Wittier, AK

Gentlemen:

This letter is in reference to your request to review the plans as well as the above named facility located in Whittier Alaska.

According to our conversation, it may be your intent to completely refurbish the 274,000 S.F. Buckner Building and to change this building into a correctional facility. In order to to so, it appears that an entire new heating and ventilating plant plus electrical system will be necessary. Our cost review includes a sixteen bed hospital, six lane bowling alley, and complete commercial food preparation and dining facility.

The exterior needs total restoration with new windows and a new roof system. Also, in this review we have included exterior security fencing and security at all exterior openings and windows.

This is a brief overview as to the possible requirements to change the Buckner Building into a correctional facility.

Our best estimate would indicate that the complete change can be accomplished for approximately $18,700,000.00.

We thank you for this opportunity to work with you on this project.

If you have any additional questions please feel free to contact us.

Buchner Building, Whittier Alaska

Dear Representatives,

My name is George Janssen and I am the President and Owner of the J.B. Warrack Company, Inc. We are a locally owned and operated construction company with a long record of completed projects within the State of Alaska as well as in the Anchorage Area. A list of projects performed by the Firm is hereby attached.

The purpose of this letter is to urge that a yes vote be given to Housebill 88, whereby the Buchner Building located in Whittier Alaska be rehabilitated and be rebuilt into a correctional facility. We were asked by Mr. Pete Zamarello (present owner) of this property to review and evaluate the cost to rebuild this facility. After careful review we feel that the building can be rebuilt into a correctional facility for a cost of approximately $18-$20 million dollars.

I feel that utilization of this facility can and will save the State and the tax payer at least $20-$25 million dollars.

We thank you for this opportunity to have our comments presented.

Sincerely,

George Janssen
President, J.B. Warrack Company, Inc.

ESTABLISHED 1917

EXPERIENCE

J.B. Warrack Company has been in the General Contracting business constructing buildings continuously throughout the State of Alaska since 1917. We have extensive building experience in all types of buildings: schools, heavy industrial railroad shops, commercial shopping centers, government and institutional building, high rise hotel and apartment buildings and hospitals. We live with the varied logistical and weather restraints encountered throughout this state on a day to day basis. We have bid and successfully completed two small projects on the North Slope.

Our technical staff is well qualified to handle any type of construction as can be perceived by a review of our listing or projects we have already completed.

Our administrative personnel have extensive experience processing the normal construction records, payroll, subcontracts, purchasing, change orders as well as scheduling reports and graphs for progress updates.

In summary, our record of continuous successful operation of our building construction company pre-eminently qualifies J.B. Warrack Company, Inc., to bid and construct any project in the future.

Pouch V, Mail Stop 3100
Juneau, Alaska 99811

RECEIVED
3-14-83

March 10, 1983

Dear Representative Bettisworth,

DOT - X3900

In responee to Mr. John C. Bates, Deputy Commissioner's letter dated March 2, 1983. Please find enclosed a proposal from J.B. Warrack Company, Inc., and Interstate Company, Inc., which are two of the largest and most respectable contracting companies in Alaska. They each have completed several large projects a year in Alaska. The prices they gave us will be negotiated down some what, with the Interstate Company being the highest, but still only $18,700,000.00.

Olympic, Inc. has completed several re-modeling projects, and we have, ourselves, excellant experience in estimating a job. In order to bring the building to code compliences, we will need to upgrade the electrical, install sprinklers throughout the whole building, corridors, etc., install handicap accessories to the elevators and restrooms. When we finish the building will pass any inspection and meet any standards. The structure is in excellant condition, and our estimate includes all the costs as in paragraph 1 of Mr. Bates letter.

In answer to paragraph 2, the building is served with public water and sewerage, the electric is through Chugach Electric. In addition in our estimate, we include the cost of an emergency generator to take care of the whole building in case of a power failure, and a smaller one in the remote possibility the first should fail.

Regarding the number of bedspaces referred to in paragraph 3. The building will be able to hold a minimum of 1,000 beds, plus dining rooms, a 16 bed Hospital, Dental facilities, Theater, etc. (The Army used this building to house 2,500 people with all the facilities).

Sincerely,

Pete Zamarello
President

February 10, 1983 review

Dear Sir:

In response to your request for an estimate regarding the above referenced building, we offer the following.

To meet all existing state and local codes, remodeling should include: new partitions, ceiling system, floors, new heating and ventilation systems, electrical system, new elevators and a new roof. Also in this survey is a new commercial dining room and kitchen, a sixteen bed hospital, six lane bowling alley, a complete bakery and complete restoration of the exterior. It is our opinion that the above can be accomplished for a cost of approximately $13,800,000.00.

To convert the building to a correctional facility the above stated amount will have to be increased by a minimum of 25%.

If you need additional information or if you are interested in a design proposal, please do not hesitate to call us.

We thank you for this opportunity to submit this proposal and are looking forward to working with you on this project.

Very sincerely yours,

Georg Janssen

Re: Restoration of the Buckner Bldg. Wittier, AK

Gentlemen:

This letter is in reference to your request to review the plans as well as the above named facility located in Whittier Alaska.

According to our conversation, it may be your intent to completely refurbish the 274,000 S.F. Buckner Building and to change this building into a correctional facility. In order to to so, it appears that an entire new heating and ventilating plant plus electrical system will be necessary. Our cost review includes a sixteen bed hospital, six lane bowling alley, and complete commercial food preparation and dining facility.

The exterior needs total restoration with new windows and a new roof system. Also, in this review we have included exterior security fencing and security at all exterior openings and windows.

This is a brief overview as to the possible requirements to change the Buckner Building into a correctional facility.

Our best estimate would indicate that the complete change can be accomplished for approximately $18,700,000.00.

We thank you for this opportunity to work with you on this project.

If you have any additional questions please feel free to contact us.

Very truly yours,

INTERSTATE COMPANY, INC.

SUBJECT: Preliminary Project Review - Cost Estimate

Gentlemen:

At your request, per the commisson given us, we have made a complete review, on a preliminary basis, of the above reference structure.

Our commission, as we understand it, is to provide you with cost figures in two parts, as follow:

1. Remodeling and conversion of the exsisting building, to be used as a correctional facility.

2. A remodeling of the exsisting facility, including new ventilation and heating systems and electrical systems. In addition, new elevators, new roofing, new flooring, new ceiling systems and a number of new partitions. Additionally,, per your instructions, we have included costs for restoration of the building exterior, as well as, additions for a six lane bowling alley and bakery, a sixteen bed hospital and a new dining area/kitchen facility.

Our review anticipates that any and all work which would be done would meet exsisting state and local codes.

The figures we have arrived at, are based upon the preliminary sketches, pictures and numerous meetings with your company.

Due to the fact that we did not have definitive, exact drawings from which to work, our price must be considered preliminary and in this regard, we are providing you a cost range for each item. Our estimates are as follows:

1. For remodel and conversion to a correctional facility, our cost estimate range is $23,725,000 to $25,100,000.

2. For remodeling and additions as noted above, our cost estimate range is $18,650,000 to $19,800,000.

If we can be of further assistance or should you wish a more exact cost estimate after development of drawings, we would be pleased to provide them for you.

Attached is our billing, which we forward with this report, for payment.

Thank you for using our services.

Very truly yours,

ESTABLISHED 1917

March 28, 1983
Mae, Milo:

Since we're hearing from a contractor and owner of the Buchner Building, I have attached a position paper from last year's DHSS on the building. This was provided to me as backup by the sponsor of SSHB 88, Rep. Bettisorth. However, there isn't much to back up the bill. The position paper lists several major problems with the facility and the location and strongly opposes the purchase or use of the building for a prison.

There is a memo from the City Manager of Whittier, George Weiss, that suggests that the owners of the Buchner facility bought it for $200,000. SSHB 88 appropriates 27 million dollars, but there is no breakdown as to how much is for the facility and how much is for the improvements.

It seems to me that the approach to the correctional facility is just backwards. Instead of talking to the property owner and a contractor who may have a significant financial interest in the project, shouldn't the Division of Corrections first identify a site, develop a plan, call for bids and award bids based on the best price? How can a contractor or land owner propose to build a facility for any amount without looking at the plans and without knowing what will be expected? Don't forget too, that the statutes require bidding and award to the lowest bid.

I'll have more on this for the hearing next Tuesday. State offices are all closed today.

Dave

9:05 a.m.

SFC-82 #33, Side 1 (573-end)
SFC-82 #33, Side 2 (000-411)

CALL TO ORDER

Co-chairman Ed Dankworth convened the meeting at approximately 9:05 a.m.

PRESENT

All committee members were present with the exception of Senators Ellison and Ferguson. Also attending were Senators Kerttula and Silman; Allen Kornhoen, Deputy Commissioner of Health & Social Services; Steve Cole, representing the Dept. of Education; John Bates, Deputy Commissioner of Dept. of Transportation; Ginny Chitwood, representing the Alaska Municipal League; Lee Sharp, Attorney for the City and Borough of Juneau; Bill Miles, representing the Anchorage School District; Fiscal Analyst Alison Elgee; and administrative assistant to Senate Finance Judy Johnston.

SB 274

Co-chairman Dankworth opened hearing for SB 274 (Finance) am (ACT RELATING TO SCHOOL CONSTRUCTION AND TRANSFERRING THE ADMINISTRATION OF THE SCHOOL CONSTRUCTION GRANT PROGRAM FROM THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES TO THE DEPARTMENT OF EDUCATION) as brought on for discussion.

Senator Stimson directed committee attention to a proposed SCS for SB 274 (Finance) (AN ACT RELATING TO SCHOOL CONSTRUCTION AND TRANSFERRING THE ADMINISTRATION OF SCHOOL OR EDUCATION-RELATED FACILITY CONSTRUCTION FROM THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES TO THE DEPARTMENT OF EDUCATION). Responding to questions from Co-chairman Dankworth concerning Section 3, Senator Stimson stated that the intention is to allow municipal, city or borough school districts, access to the Governor's capital budget. At present the only schools able to come to the legislature through the budgeting process are REAA's. This bill would develop a process whereby all school districts have access to the capital budget. The section is permissive in that a school district does not have to use this budgetary process, yet it is available should the district decide to take this route. Small school districts incapable of bonding need a process which allows them access to this budget.

Senator Stimson acknowledged that the Anchorage School District "has concerns" regarding the legislation. He added that he had attempted to address those concerns in the proposed SCS. He concluded, however, that the legislation could not be "stretched"

much further without doing disservice to other districts statewide.

John Cates and Steve Hole jointly appeared before committee. Mr. Hole advised that at this time the only access to the Governor's capital budget is through Chapter 8 of Title 14 which speaks specifically to REAA's. There is no statutory provision for municipalities to gain accesss to this budget for public school construction other than through Section 7 (the debt retirement section) of the proposed SCS. Any municipality, however, through its legislator can get into a capital budget. Districts cannot, however, get into the capital budget the Governor submits to the legislature.

Co-chairman Dankworth raised questions concerning priority ranking provisions contained on page 2 of the proposed bill. Mr. Hole responded that the ranking process gives the Department of Education a list of education construction projects based on critical need. When funding resources are limited, the most critical needs can be met first. Co-chairman Dankworth asked if the process would create a master statewide list of school construction needs. Mr. Hole responded that to the extent that school districts choose to submit requests under the bill a master list would be compiled. He added, however, that some REAA's and municipalities might not submit requests. As an example, Senator Sturgulewski stated that Anchorage, which just offered $70 million in bonds, would not need to be involved in a priority listing unless it chose to do so since it enjoys local autonomy in its bonding capability. Should Anchorage choose to become involved in the priority listing and seek state funding, it can do so. She attested to the fact that priority lists are viewed as guidelines and the political process generally takes over when projects are actually funded. There is nothing mandatory about the list. Senator Kertula advised that in his experience, political control goes to the urban areas. At that stage, priority lists never include rural areas. In effect, the list works against rural needs. Senator Sturgulewski states that the Anchorage School Board is concerned that the list would have the opposite effect. Senator Stimson advised that ranking will be accomplished based strictly on educational criteria. Co-chairman Dankworth expressed concern that the priority list might encroach upon legislative authority to appropriate school funding. Mr. Hole responded that at the present time the Governor could prepare a priority listing. The Department feels extremely comfortable with the list since it gives the Department "clear legislative policy direction . . . ." He acknowledged that the larger municipalities (Anchorage, Fairbanks, Mat-su) can take care of themselves. Actual need for the list is evidenced through the inability of Nenana, Kake, Klawock, Hoonah, Galena--small communities--to gain access to the list for rural areas. Once the list is submitted to the legislature, the legislature does as it chooses. The list simply provides clear executive recommendations based on educational criteria.

Senator Stimson requested that Messrs. Bates and Hole address transfer provisions of the bill. John Bates stated that at present the Dept. of Transportation handles REAA construction grants. Mr. Bates added that last year's funding for this function was RSA'd to the Dept. of Education. DOT now wishes to formalize the process by transferring the grant process to DOE in order that REAA's will not have to deal with both departments. This transfer relates to the granting process only. The four REAA's still requesting the state to build projects for them would continue to work with DOT for construction of their projects.

Senator Kerttula asked Senator Sackett if he (Sackett) was satisfied that REAA's are better cared for under the proposed bill. Senator Sackett responded, "Yes."

Directing committee attention to Page 1, Line 12 of the proposed draft, Senator Stimson advised that Senator Ferguson had requested the date be changed from July 1, 1978 to July 1, 1982. Mr. Bates advised that DOT has no problem with the date change. Senator Stimson moved to make the change. Senator Gilman advised that the prior date relates to the time when DOE began regulating payments on a square foot per student basis. Some school districts built facilities which are not eligible for repayment. If the date is changed to 1982, any school built after July 1, 1978, which does not meet department approval, would be "grandfathered in" and repaid. Mr. Hole advised that no loophole is created by the date change since Department regulations remain in effect under either date. Regulations affecting entitlement at the time of construction remain in effect. Senator Stimson stated that the request for the date change came from Senator Ferguson at the request of one of his constituents. Co-chairman Dankworth suggested that in Senator Ferguson's absence the change not be made, and Senator Ferguson given the latitude of offering such an amendment on the Senate floor.

Senator Stimson moved for adoption of the following technical amendments:

Page 3, Line 3, delete "ordinance" and insert "resolution."

Page 4, Line 2, delete "three" and insert "two."

No objection to the foregoing amendments having been raised, they were adopted.

Referring to Section 3, Senator Kerttula asked if local districts (from their own resources) must contribute toward school construction projects. Do they definitely have to pay their 10% raised from local tax levies? Senator Stimson advised of his understanding that such a requirement is not absolutely clear in the proposed bill. Steve Hole advised of his understanding that there is nothing in the proposed bill or Title 43 to guarantee that what is contributed by the municipality comes from a local tax. Co-chairman Dankworth suggested adding language requiring

that no more than 30% of the project could be constructed with state funds. Senator Gilman attested to difficulties involved in tracing the source of municipal moneys. Steve Cole advised that the Department's concern is not who pays the 10% but rather limitation on "Taj Mahal" construction. Department regulations stipulate that the state will pay a portion of construction costs based on the number of students and the square footage needed to provide for them. A school district could build a 100,000 square foot school, but if the student population only entitled the district to 20,000 square feet, the state would only participate up to and authorize reimbursement for 20,000 square feet.

Senator Gilman noted that the bonding capacity of individual municipalities also limits the size of school construction. The more school bonds sold, the less available for sewer and water and other needs. This serves as an internal limitation on oversized construction.

Senator Sturgulewski suggested that the committee not attempt to address the foregoing in the current session. The legislature has discussed revenue sharing and municipal assistance. One of the intents in the municipal assistance program is to use state money to reduce local taxes. Local taxes included debt service.

Bill Miles, representing the Anchorage School Board, next appeared before committee. He stated that Anchorage has concerns regarding the proposed statewide master list. Nothing currently prohibits the administration from creating such a list should it choose to do so. The proposed SCS adds another layer of bureaucracy with which districts must comply. Additionally, creation of a statewide list based on standardized criteria, reduces the legislature's ability to fund projects not on the list. A future governor may be heavy handed and use the list to cut legislative projects. Anchorage finds itself in a "Catch-22" position. If the district requests a particular project be put on the list, more than likely, because of evaluation criteria, it will appear very low on the list. If the district does not request that the project be put on the list, when negotiations begin concerning school projects to be funded, the district will be left out because it's not listed.

Mr. Miles suggested that Commissioner Lind's proposed study of operational expenses of school districts be expanded to include methods of capital appropriation.

Sinny Caitwood, representing the Alaska Municipal League, next appeared before committee, advising that while the Municipal League did not request provisions relating to a master list, it does not object to such language. Municipal school districts other than Anchorage do not view the list as a threat. Larger school districts which have bonding capacity are willing to put up their 10% share and comply with procedures in Section 8, whereby the district bonds and is then reimbursed by the state. Smaller school districts which do not have bonding capacity would have another opportunity to obtain funding under the proposed

legislation. Mrs. Chitwood advised that she had spoken with "some people from Anchorage" and determined that the position represented by Mr. Miles is not unanimous.

Senator Stimson directed committee attention to the fiscal note for SB346(c)4 dated April 1, 1982. Senator Gilman stated that although the fiscal note was prepared before the municipalities actually sold their bonds and represents Department estimates of bond payments, actual sale costs to this date result in essentially the same figures as listed on the note. Total costs will not be known until all bonds have closed (approximately July 15). Although there may be need for adjustment or proration over the first year, Senator Gilman recommended the committee adopt the Department fiscal note. Senator Sturgulewski moved for adoption of the April 1, 1982, fiscal note.

Senator Stimson moved for passage of the proposed SCS for CSHB 278 (finance) with individual recommendations and the April 1, 1982, fiscal note. Upon a show of hands, the bill passed from committee-all members present signing do pass.

ADJOURNMENT

There being no further matters to come before committee at this time, Co-Chairman Ellsworth announced that the committee would convene at 2:00 p.m. to consider HB 148 (the Senate Budget). The meeting was adjourned at approximately 12:20 p.m.

SB346 #3(c) Side 1 (557-end)
SB346 #3(c) Side 2 (000-411)

SENATE FINANCE COMMITTEE
April 6, 1982
8:35 a.m.

(Recorder malfunction, no recording for this meeting.)

CALL TO ORDER

Co-chairman Don Bennett convened the meeting at approximately 8:35 a.m.

PRESENT

All committee members were present. Also attending were Steve Hole from the Department of Education; Vern Roberts, Finance Director for the Matanuska-Susitna Borough; Lee Sharp, Attorney for the City and borough of Juneau; Ginny Chitwood representing the Alaska Municipal League; Ron Lind, Deputy Commissioner of the Department of Transportation, Administration; John Bates, Deputy Commissioner of the Department of Transportation, Planning & Programming; Bob Cooksey, Representing NEA/Alaska, Inc.; Fiscal Analysts Elmer Lindstrom and Alison Elgee; administrative assistants to Senate Finance Judy Johnston and David Rogers, and representatives from the press.

SB 772

Co-chairman Bennett moved that SB 772 (ACT MAKING A SPECIAL APPROPRIATION TO THE DEPARTMENT OF NATURAL RESOURCES FOR CONSTRUCTION OF A PLANT QUARANTINE STATION AT THE PLANT MATERIALS CENTER (AS 03.22) OPERATED IN COOPERATION WITH THE INSTITUTE OF AGRICULTURAL SCIENCES) be brought on for discussion. He directed committee attention to backup material provided by Senator Kerttula.

Senator Ferguson moved that a zero fiscal note be attached to the bill. No objection to the new fiscal note having been voiced, it was approved for attachment.

Co-chairman Dankworth moved that SB 772 pass from committee with individual recommendations. No objection having been raised, SB 772 passed from Senate Finance--all members present signing do pass with the exception of Senators Dankworth and Stimson who signed no recommendation.

HB 279

Co-chairman Bennett moved that CSHB 279(Fin)am (AN ACT RELATING TO SCHOOL CONSTRUCTION AND TRANSFERRING THE ADMINISTRATION OF THE SCHOOL CONSTRUCTION GRANT PROGRAM FROM THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES TO THE DEPARTMENT OF EDUCATION) be brought on for discussion.

Senator Stimson directed committee attention to a proposed SCS for HB 279 (Finance) (ACT RELATING TO SCHOOL CONSTRUCTION AND

TRANSFERRING THE ADMINISTRATION OF SCHOOL OR EDUCATION-RELATED FACILITY CONSTRUCTION FROM THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES TO THE DEPARTMENT OF EDUCATION), a Sectional Analysis of the committee substitute, and a new fiscal note dated April 1, 1982. He advised that the proposed substitute would accomplish three things:

1. Transfer responsibility for administration of school construction grants from DOT to DOE.

2. Provide mechanism whereby all REAA and municipal school district project may be included in the governor's capital budget.

3. Increase the percentage of reimbursement to municipalities for school construction to 90% and reduce the two-year lag on payment of reimbursement.

Vern Roberts, Finance Director for the Matanuska-Susitna Borough, next appeared before committee, speaking in support of the proposed Committee Substitute. He advised of current problems at the municipal level due to the "saw tooth" pattern of fluctuating tax collection and the two year lag on state reimbursement for school construction costs. He advised that an increase in the percentage of reimbursement is not so important as elimination of the two-year delay in reimbursement.

Ginny Chitwood, representing the Alaska Municipal League next appeared before committee, stating that the legislation would have minimal fiscal impact to the state since it basically represents a shift of reimbursement payments from one year to another. The state currently reimburses 80% of school construction costs two years after the money was expended. The subject legislation would raise reimbursement to 90% and provide for current year repayment.

Mrs. Chitwood advised that the proposed committee substitute provides adequate protection against "Builders of Taj Mahals" since approval by DOE is required prior to reimbursement to a municipality.

Mrs. Chitwood concluded her remarks by advising that current-year reimbursement to municipalities would eliminate the "bulge" now plaguing tax levies.

Lee Sharp, Attorney for the City and Borough of Juneau, next appeared before committee. He stated that of all legislation under consideration during the current session, none is more significant and important to municipalities than the proposed committee substitute. He advised that given the problems surrounding the issuance of bonds, and the saw tooth mill rate, in approximately two and a half years the City and Borough of Juneau will require a 6.5 mill tax increase in order to service its school bonds. Moving reimbursement for school construction

costs to current year status will assist in providing stability to tax levies.

Steve Hole, representing the Department of Education, next appeared before committee, advising that Section 1 through 7 and 9 were included in the Governor's bill. He next gave a brief section-by-section analysis of the proposed substitute:

> Section 1 and 2 describe responsibilities of the Department of Education with respect to review of construction plans, determination and approval of eligibility for state aid, and administration of construction grants.
>
> Section 3 includes city and borough school districts in the hierarchy of school construction projects in the Governor's budget. It also provides for DOE to administer grants currently handled by DOT.
>
> Section 4 contains cleanup language for Chapter 9.
>
> Sections 5, 6, and 7 are amendments to DOT's statutes which reflect the shift in administrative responsibilities from DOT to DOE.
>
> Section 8 is the only section having financial impact since it raises the reimbursement percentage from 80 to 90% and eliminates the two year lag in reimbursements.
>
> Section 9 amends Title 43, limiting uses to which debt retirement appropriations can be made.
>
> Section 10 repeals AS 14.28.151 and 43.18.100(b)(2) relating to REAA school construction projects.

Responding to concerns expressed by Senator Dankworth that removing control of design and construction of school projects from DOT might lead to cost overruns due to lack of local expertise, Mr. Hole advised that the bill provides for certification that local individuals are qualified to perform the work. In audition, the work must conform to state requirements, or construction funds will not be released. Following construction, an audit is performed to ensure that funds were spent for the purposes intended.

Referring to $13 million in cost overruns on the Lower Kuskokwim School, Co-chairman Dankworth asked if the state is financially liable for such costs. Mr. Hole responded that since REAA's have no ability to generate revenue, cost overruns "come back to the state." This situation will not change under the proposed legislation. Municipalities, however, represent a different situation--one to which Mr. Hole did not wish to speak.

Responding to a question from Senator Ferguson concerning construction management contracts and costs, Mr. Hole directed committee attention to Page 3, Line 24 of the committee

substitute, advising that that section limits (in terms of the size of the school construction project) the amount that can be spent for management. Senator Ferguson attested to the importance of such a provision, since management contracts have previously gone to individuals with "no construction ability."

Responding to questions from Senator Sackett comparing sections of the House version of the bill with the proposed committee substitute, Mr. Hole advised that concern was expressed that the House version gave DOE too much control over municipalities, and that the Department might preempt municipal ability to construct schools, interfere with approval of plans and placement in the Governor's capital budget, and the issuance of grants.

Section 2 limits Department involvement to REAA's and relates to grant administration rather than construction oversight. John Bates, Deputy Commissioner of the Department of Transportation appeared before committee advising that approximately 4 REAA's currently construct projects through DOT while remaining REAA's construct their own. Mr. Hole advised that responsibility for administering construction grants is being transferred to DOE rather than being placed back in DOT.

Senator Sackett again raised questions concerning the difference between House and Senate committee substitute language, advising that House language appears to transfer construction responsibilities from DOT to DOE. Mr. Hole responded that the intent was to limit DOE involvement to grant administration rather than the "actual nail pounding construction"--that remains with DOT. Mr. Bates concurred, advising that the intent was to transfer administrative not construction authority.

Senator Sackett advised that he had no problem transferring it all to DOE. He next raised question concerning the two fiscal notes in the file, asking what had caused the increase from the earlier note of $3.1 to the recent note of $13.4. Mr. Hole explained that the recent note is based on current entitlements under Title 43. Since the bill would eliminate the two year lag in reimbursement costs, the Department sought information on proposed bond sales for school construction from the Alaska Municipal League. The earlier fiscal note does not take into account FY 82 bond sales, assumes elimination of the Cigarette Tax offset, and does not take into account elimination of the two year lag in reimbursement. Mr. Hole added that the earlier (January) fiscal note represents a "guess" at the financial impact of the bill while the later (April) note is based on firmer figures.

Co-chairman Dankworth raised questions concerning design and construction of state schools in terms of what types of construction state grants would and would not cover. Mr. Hole responded that the same formula is applied to both REAA and municipal schools. Chapter 31 of DOE regulations determines eligibility. When asked if the regulations favor one type of school over another, Mr. Hole responded that determination of

entitlement is "as uniform as it can be." The Department does not treat schools of like size differently in rural areas than it does in municipalities.

Directing committee attention to Page 7, Section 9, Mr. Hole read a sampling of construction items which are not reimbursable under state grants. While residential construction, hockey rinks, and Olympic-sized pools would not be eligible for state aid, schools can construct a reasonable-sized pool for teaching water safety.

Co-chairman Dankworth requested that he be furnished a copy of the formula used for determining eligibility. Mr. Hole responded that he would do so, emphasizing that the Department uses the same formula for municipalities and REAA's alike. The only difference between the two entities is that municipalities can go elsewhere for funding, while REAA's must rely on the state.

Senator Stimson asked that Mr. Hole speak to provisions allowing municipalities access to the Governor's capital budget. Mr. Hole advised that under present language contained in Title 14, only REAA school construction is eligible for inclusion. The proposed committee substitute would allow any school district, municipality or REAA to submit a request for school construction to the Department. The Department would then prioritize the list, and transmit the requests to the Governor along with the priority list. The Governor would decide which projects should be funded in the capital budget, and the legislature could add or subtract as it deems necessary. For the first time, however, the legislature would have before it a list of all school projects that have been requested. The above process would especially accommodate school districts which do not have "the horsepower" to lobby the legislature for a special appropriation for school funding (e.g. Hoonah, Klukwan).

When asked by Senator Dankworth if there is currently anything which prevents the Governor from including a new school for Anchorage in his budget, Mr. Hole responded, "No, but this would establish a process for him to do so. Right now there is only a process for REAA's."

John Bates advised that DOT has been working with DOE since 1977 or 1978 on REAA grant programs. The process in the past has required REAA's to switch back and forth between the two departments in the course of obtaining plan approval, eligibility determination, and grant distribution. School construction must be on state property and in accordance with state statutes. Over the past five years increasing numbers of REAA's have asked "to do their own buildings" (DOT only constructs one or two REAA schools per year). In order to make the grant process more efficient, administration of grants is being transferred to DOE.

When asked by Senator Stimson if there is a method to "tighten up grant programs" in order to deal with REAA cost overruns, Mr. Bates responded that, aside from the state, there is no one else to whom REAA's can turn when cost overruns occur. Grants can be

safeguarded by disbursing only certain amounts at progressive stages of construction. Most claims, however, result in supplemental appropriations through the legislature. DOT makes sure plans are as good as possible and attempts to see that, administratively, construction programs do not "get into trouble." Further oversight by the Department would require additional staff. Mr. Bates advised that aside from one REAA currently involved in litigation, overruns have not been "that much out of line" given the difficulties and expenses of rural construction.

When asked about Department costs in providing oversight, Mr. Bates responded that at present the Department takes 3%. One percent is given to DOE and the other two percent provides for administration of the project.

Co-chairman Bennett advised that SCS for CSHB 279 (Finance) would be returned to committee files for further discussion at a later time.

ADJOURNMENT

There being no further matters to come before committee at this time, the meeting was adjourned at approximately 9:35 a.m.

Recorder malfunction, no tape for this meeting.

Chapter 92

AN ACT

Relating to school construction and transferring the administration of school or education-related facility construction from the Department of Transportation and Public Facilities to the Department of Education; and providing for an effective date.

---

* Section 1. AS 14.07.020(11) is amended to read:

(11) review plans for construction of [AND] new public elementary and secondary schools and for additions to and major rehabilitation of existing public elementary and secondary schools and, in accordance with regulations adopted by the department, determine and approve the extent of eligibility for state aid of a school construction project begun after July 1, 1978; for the purposes of this paragraph, "plans" include [A "PLAN" INCLUDES] educational specifications, schematic designs, and final contract documents;

* Sec. 2. AS 14.07.020 is amended by adding a new paragraph to read:

(13) administer the grants awarded under AS 14.07.190.

* Sec. 3. AS 14.07 is amended by adding new sections to read:

ARTICLE 3. CONSTRUCTION, REHABILITATION, AND IMPROVEMENT OF SCHOOLS AND EDUCATION-RELATED FACILITIES.

Sec. 14.07.180. RECOMMENDATIONS AND EVALUATIONS OF PROJECTS. (a) The assembly or council of a municipality that is a school district or a regional school board may submit a request to the department for a school or education-related facility construction, rehabilitation, or

improvement project together with a report evaluating the condition of school or education-related facilities in the municipality or regional educational attendance area and a determination of the need for the project.

(b) With regard to projects requested under (a) of this section the department shall

(1) rank each project in the order of priority that serves the best interests of the state;

(2) prepare an estimate of the amount of money needed to finance each project approved by the department and recommend to the governor appropriations for projects to be included in the budget submitted to the legislature;

(3) provide the governor with a copy of the report of the assembly, council, or regional school board that requested each project approved by the department;

(4) provide to the legislature within the first 10 days of each regular session a summary of the projects requested by each assembly, council, or regional school board.

(c) In establishing priorities among requested projects the department shall evaluate at least the following factors:

(1) priorities assigned by the assembly, council, or school board to the projects requested;

(2) emergency requirements;

(3) the number of students without classroom space;

(4) new local elementary or secondary programs;

(5) existing regional, community, and school facilities and the condition of the facilities;

(6) the economic and social stability of the municipality or region.

(d) The provisions of this section do not affect a municipality's eligibility for reimbursement under AS 43.18.100.

Sec. 14.07.190. ASSUMPTION OF RESPONSIBILITIES. (a) The assembly or council of a municipality that is a school district or a regional school board may, by resolution or majority vote of the body, assume the responsibilities relating to the planning, design, and construction of a school or an education-related facility located within the boundaries or operating area of the municipality or regional educational attendance area. After receipt of a request by an assembly or council under this subsection, the department shall provide for the assumption of the responsibilities requested. After receipt of a request by a regional school board under this subsection, the department may provide for the assumption of the responsibilities requested.

(b) If a municipality that is a school district or a regional educational attendance area assumes the responsibilities under this section, the department shall grant to the municipality or regional educational attendance area money appropriated for the school or education-related facility. The department may transfer the appropriations to a special construction account in the state treasury. Under the fiscal control of the department, a municipality or regional educational attendance area that assumes responsibilities for the project as provided in this section may draw on the account for costs of the project.

(c) The construction management costs of a project assumed under this section may not exceed four percent of the amount of appropriations for the facility if the amount of appropriations is $500,000 or less. The construction management costs of a project assumed under this section may not exceed three percent of the amount of appropriations for the facility if the amount of appropriations is over $500,000 but less than $5,000,000. The construction management costs of a project assumed

under this section may not exceed two percent of the amount of appropriations for the facility if the amount of appropriations is $5,000,0[illegible] or more. For purposes of this subsection "construction management" means management of the project's schedule, quality, and budget during any phase of the planning, design, and construction of the facility by a private contractor engaged by the municipality or regional educational attendance area.

(d) The commissioner shall adopt necessary regulations implementing this section, and setting out the requirements for agreements between the department and a municipality or regional educational attendance area relating to the assumption by the municipality or regional educational attendance area of responsibilities for the planning, design, and construction of a project.

* Sec. 4. AS 14.08.101(7) is repealed and reenacted to read:

(7) recommend to the department projects for construction, rehabilitation, and improvement of schools and education-related facilities as specified in AS 14.07.180(a), and plan, design, and construct the project when the responsibility for it is assumed under AS 14.07.190;

* Sec. 5. AS 35.15.080(a) is amended to read:

(a) A municipality [OR, IF THE PUBLIC WORK IS AN EDUCATIONAL FACILITY, A REGIONAL EDUCATIONAL ATTENDANCE AREA ESTABLISHED UNDER AS 14.08] may, by resolution of its governing body, request the assumption of all or part of the department's responsibilities relating to the planning, design, and construction of a public works project of the state that [WHICH] is to be located within the boundaries [OR OPERATING AREA] of the municipality [OR REGIONAL EDUCATIONAL ATTENDANCE AREA] and that [WHICH] would otherwise be constructed in the manner provided in AS 35.15.010. After receipt of the request, the department

[(1) SHALL PROVIDE FOR THE ASSUMPTION BY THE MUNICIPALITY OR REGIONAL EDUCATIONAL ATTENDANCE AREA OF ALL OF THE DEPARTMENT'S RESPONSIBILITIES RELATING TO THE PLANNING, DESIGN AND CONSTRUCTION OF AN EDUCATIONAL FACILITY;

(2)] may provide by agreement for transfer to and assumption by the municipality of the department's responsibilities relating to the [PLANNING, DESIGN, AND CONSTRUCTION OF A PUBLIC WORKS] project, unless the commissioner determines that assumption of responsibilities by the municipality is not practicable or not in the best interests of the state.

* Sec. 6. AS 35.15.080(c) is amended to read:

(c) A municipality may request joint assumption of responsibilities with the department relating to the planning, design, and construction of a public works project. [A REGIONAL EDUCATIONAL ATTENDANCE AREA MAY REQUEST JOINT ASSUMPTION OF RESPONSIBILITIES WITH THE DEPARTMENT RELATING TO THE PLANNING, DESIGN AND CONSTRUCTION OF AN EDUCATIONAL FACILITY.] Two or more municipalities [OR REGIONAL EDUCATIONAL ATTENDANCE AREAS] may by [MUTUAL] agreement provide for cooperative assumption of responsibilities relating to the planning, design, and construction of a public works project. If two or more municipalities [OR REGIONAL EDUCATIONAL ATTENDANCE AREAS] request assumption of responsibilities for a project and meet the standard of practicability set out in [it] [(a)(2)] of this section, the commissioner shall determine which municipality [OR REGIONAL EDUCATIONAL ATTENDANCE AREA] is best able to direct planning, design, and construction of the project and enter into an agreement with that municipality [OR REGIONAL EDUCATIONAL ATTENDANCE AREA,] or provide for joint or cooperative administration, as the parties may agree or the commissioner may determine. Decisions of the commissioner under this subsection are final.

* Sec. 7. AS 35.15.090 is amended to read:

Sec. 35.15.090. USE OF APPROPRIATED FUNDS. Upon [ASSUMPTION BY A MUNICIPALITY OR REGIONAL EDUCATIONAL ATTENDANCE AREA OF THE DEPARTMENT'S RESPONSIBILITIES UNDER AS 35.15.080(a)(1), OR UPON] execution of an agreement under AS 35.15.080(a) [AS 35.15.080(a)(2)], state funds appropriated for a public works project which is the subject of the [ASSUMPTION OR THE] agreement shall be transferred to a special account in the state treasury. A municipality [OR REGIONAL EDUCATIONAL ATTENDANCE AREA] administering the project under the [ASSUMPTION OR] agreement may draw on the account for costs of the project, under fiscal control of the department. If an agreement provides for joint or cooperative administration of the project, payment of costs shall be made to the party incurring the costs.

* Sec. 8. AS 43.18.100(a) is amended to read:

(a) During each fiscal year, the state shall allocate to a municipality that [AN ORGANIZED BOROUGH OR A CITY WHICH] is a school district, the following sums:

(1) payments made by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction;

(2) 90 [80] percent of

(A) payments made by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1977 and before July 1, 1978 to pay costs of school construction;

(B) cash payments made after June 30, 1976 and before July 1, 1978 by the municipality [BOROUGH OR CITY] during the

fiscal year two years earlier to pay costs of school construction;

(3) 90 [80] percent of

(A) payments made by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1978 and before January 1, 1982 to pay costs of school construction projects approved under AS 14.07.020(11);

(B) cash payments made after June 30, 1978 and before July 1, 1982 by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(11);

(4) subject to (h) and (i) of this section 90 percent of

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after December 31, 1981 to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1982 by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11).

* Sec. 9. AS 43.18.100 is amended by adding new subsections to read:

(h) An allocation under (a)(4) of this section for school construction begun after July 1, 1982, shall be reduced by the amount of money used for the construction of residential space, hockey rinks, planetariums, saunas, and other facilities for single purpose sporting or recrea

CHAIRMAN

H 60

February 24, 1983

House Health, Education and
Social Services Committee
Room 112, Capitol Building
Pouch V
Juneau, AK 99811

attn: Mr. Dave Palmer

Although I earnestly wish to testify in person on HB91, I am unable to postpone a trip on March 4th and, therefore, am submitting the following testimony in favor of the bill:

I am both a family and professional genealogist (Alaskan Records Research, Business License number BL000201); hold a BLA with history emphasis from the University of Alaska, Juneau; am a full-time student in the Master of Arts in Teaching program at Alaska Pacific University; am employed half-time at the UAJ library; tutor history, english, geography, and logic at UAJ; am Alumni Representative on the UAJ Assembly; have published a family history and am currently working (in my spare time) on an historical novel.

With this variety of efforts underway, you can understand why I have little time to spend writing back and forth to prospective clients to obtain the written permissions required before I can access vital statistics data as my client's personal representative.

As it stands now, individuals can obtain vital statistics on their own ancestors but professionals or those working on far distant lateral relatives may not easily do so. A business must be cost-effective. Repeated correspondence is not (unless I raised my fees to cover it, which would price me out of the market). Thus, I simply refer many inquiries to the office of Vital Statistics and so lose the fees I could obtain for doing the research myself.

Passage of this bill will help all who are searching for long-lost relatives who "went up north to the goldrush and were never heard of again."

Being the first of my family to reside in Alaska, I have no family interest in opening Alaska's records. However, I would personally like to see my state on a par with the rest of the country. After tracing several thousand of my own ancestors, lateral, and collateral relatives through most of the northern states and Ontario, and collecting hundreds of official documents dated from 1738 to 1978, I have never been refused a record because of access restrictions except hospital patient records. I feel that this bill is a step in the right direction but could go further. People researching in Alaska should meet with no more roadblocks than I have experienced in other states. I would like to see the time limits of 100 and 50 years reduced to about 30 years, if the purpose is genealogical research. The most persuasive argument against opening birth records is the problem of illegitimacy. Besides the fact that it no longer carries the stigma it once did, a professional genealogist couldn't care less what the records say, all he or she is interested in

is locating them for the client. The client or individual researcher is a member of the illegitimate child's family and thus has a personal interest in keeping the fact of illegitimacy within the family.

I feel a person's right to know about their own heritage outweighs any "right to privacy" of their ancestors and this includes a person's right to hire a researcher if unable or unwilling to travel to Juneau to do their own research. Therefore, I highly recommend passage of this bill, preferably with an amendment allowing disclosure to genealogists of those vital records not made public by AS 18.50.310(f).

Sincerely

Kit Stewart

MEMORANDUM

TO: HOUSE MAJORITY CAUCUS

FROM: REP. RAMONA L. BARNES
HOUSE MAJORITY LEADER

DATE: April 19, 1983

RE: CS HB 91 (Judiciary); "An Act relating to disclosure of vital statistics records and information; and providing for an effective date."

Current law permits vital statistics to become public only under very limited circumstances. This bill would allow vital statistics to be used for historical research or genealogy after specific time limitations which are designed to protect the persons involved while making information available for those purposes.

Time limitations are as follows: When 100 years have elapsed after the date of birth, or 50 years have elapsed after the date of death, marriage, or divorce, dissolution of marriage, or annullment, the records of these matters become public.

HB 91

BILL HB0091
PAGE 00069
DATE 01/20/83
CHAMBER HOUSE
TEXT HOUSE BILL NO. 91 by Bettisworth, entitled:
"An Act relating to disclosure of vital statistics records and information; and providing for an effective date."
was read the first time and referred to the Health, Education & Social Services and Judiciary Committees.

BILL HB0091
PAGE 00418
DATE 03/07/83
CHAMBER HOUSE
TEXT The Health, Education & Social Services Committee has had HOUSE BILL NO. 91 (relating to disclosure of vital statistics records and information; effective date) under consideration, recommends it do pass, and attaches a zero fiscal note. Concurring: Fritz (Co-Chairman), Goll, Koponen, Cato and Davis.
HB 91 was referred to the Judiciary Committee.

BILL HB0091
PAGE 00857
DATE 04/14/83
CHAMBER HOUSE
TEXT The Judiciary Committee has had HOUSE BILL NO. 91 (relating to disclosure of vital statistics records and information; effective date) under consideration, recommends it be replaced with COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 91 (Judiciary) (same title), and reports it back as follows: Bussell (Chairman), Liska and Hayes recommend do pass; Wendte and Clocksin have no recommendation. A zero fiscal note was attached.
HB 91 was referred to the Rules Committee for placement on the calendar.

Vital Statistics (disclosure of records)

HOUSE BILL NO. 91, by Bettisworth. Adds new section to AS 18.50.310 (Vital Statistics Act. Disclosure of Records) that would allow disclosure of certain records: "When 100 years have elapsed after the date of death, marriage, or divorce, disso lution of marriage, or annulment, the records of these events in the custody of the state registrar become public records subject to the provisions of AS 09.25.110 - 09.25.125." (AS 09.25.110 - 125, Evidence. Inspection and copies of public records; Inspection and copying of public records; Copies of public records for veterans; Enforcement: Injunctive relief.). Provides Act takes effect immediately.

HOUSE BILL NO. 91, (see pages 57;299). Reported back to the House April 14 by Judiciary recommending it be replaced with a Judiciary substitute and that it do pass. Concurring: Bussell, Chairman, Liska and Hayes. Not concurring: Wendte and Clocksin had no recommendation. To Rules.

The Judiciary substitute adds two new sections. Provides the Bureau may permit the use of data contained in vital statistics records for research purposes ". . . other than genealogical or historical research." Would not allow for information in vital statistics records indicating that a birth occurred out of wedlock to be disclosed as provided by regulations (currently allowed).

HB 91

"Vital statistics" refers to records of birth, death, fetal death, marriage, divorce, adoption and related data. With specific exceptions, vital statistics are not available for inspection.

The language of HB 91, taken from the 'Model State Vital Statistics Act' published by the Public Health Service, opens records to the public: birth records - 100 years after date of birth; and marriage, death, divorce, dissolution of marriage or annulment records - after 50 years.

Passage of HB 91 will make public approximately 33,000 of the 675,000 records held by the State Registrar of Vital Statistics. The bill addresses the concerns of geneological researchers. A zero fiscal note is attached to the bill. Committee of next referral is the Judiciary Committee.

Dave Palmer

POSITION PAPER/Department of Health & Social Service

POSITION PAPER

HOUSE BILL 91

"An Act relating to disclosure of vital statistics records"

The amendment to AS 18.50.310 to add a new subsection under (f) is similar to a provision in the Model State Vital Statistics Act which is endorsed by the Council of State Governments.

By making public, birth records after 100 years, and death, marriage, and divorce records after 50 years, it will satisfy the need expressed by many who desire to research their "roots". Because of the model law, many states have enacted this provision, with success, because, those vital records relating to the living and next of kin, are still primarily protected.

Passage of H. B. 91 would make public about 33,000 of the 675,000 records in the custody of the State Registrar of Vital Statistics.

It is acknowledged that care must be exercised in providing a place for the public review of these records, while assuring the continued safekeeping of the documents. The existing staff can monitor the record review.

The Department of Health and Social Services recommends passage of House Bill Number 91.

Model State Vital Statistics Act (1977 Revision)

The Model State Vital Statistics Act is a document designed to be used by state registrars of vital statistics and state legislators when considering revision of the vital statistics laws. The main objectives of the 1977 revision of the model act are (1) to incorporate current social customs and practices and current technology into the policies and procedures of the vital statistics system in the states, (2) to promote the uniformity of these policies and procedures to the end that all vital records will be readily acceptable in all places as prima facie evidence of the facts therein recorded, (3) to enhance the level of comparability of vital statistics data among the states, and (4) to minimize duplication within the vital statistics system and thereby achieve maximum administrative economy.

The historical philosophy of the vital statistics systems in the United States is that vital events be registered only in the state in which they occur. This concept is maintained in this revision of the model act. The jurisdiction of the state registrar extends only to boundaries of his state, and standards for registration may be set and enforced only for those events occurring within those boundaries. This is a very important concept in maintaining the validity of vital records in their use for legal purposes. If it is to be respected, the appropriate procedures for recording birth and death information for United States citizens born or dying in foreign countries and certification of birth information for aliens adopted by United States citizens must continue to be the responsibility of those federal agencies which retain jurisdiction over recording these events.

While this revision of the model act does not constitute an abrupt departure from earlier acts, there are several modifications that should be noted. The most significant change relates to the establishment of a centralized system for the collection, processing, registration, and certification of vital records in each state, whereby all vital events are reported directly to the State Office of Vital Statistics. However, the model act contains authorization for local offices to perform those functions the state registrar may direct, including the receipt and processing of vital records and the issuance of certified copies, when such offices can be shown to be an aid to efficient and effective operation of the system. The model act further provides for the options of allowing such local offices to work with records only for their designated geographic area or to be given access to the entire state file and allowing them to issue certified copies without regard to where the event occurred within the state. The important concept, however, is that these offices are part of the State Office of Vital Statistics and are under the direct control of the state registrar.

The recommendation for a change from a locally oriented vital statistics system to a centralized system is based on several considerations: (1) a centralized system produces more timely registration of the records, thereby improving the timeliness of all operations, including publication of statistical data as well as fulfillment of citizens' needs for vital records services; (2) it decreases duplication and cost since many activities presently performed at local vital records offices are repeated at the state office; (3) it reduces the opportunity for fraudulent use of certified copies because amendments to the records will be easier to control and certified copies will

...cords of each [divorce, dissolution of marriage, or annulment] decree granted during the preceding calendar month.

[(c) [Provision for a recording fee may be added here if desired.]]

Section 22. [*Amendment of Vital Records.*]

(a) A certificate or report registered under this act may be amended only in accordance with this act and regulations adopted by the state agency to protect the integrity and accuracy of vital records.

(b) A certificate or report that is amended under this section shall be marked "Amended," except as otherwise provided in this section. The date of amendment and a summary description of the evidence submitted in support of the amendment shall be endorsed on or made a part of the record. The state agency shall prescribe by regulation the conditions under which additions or minor corrections may be made to certificates or records within one year after the date of the event without the certificate or record being marked "Amended."

(c) Upon written request of both parents and receipt of a sworn acknowledgment of paternity signed by both parents of a child born out of wedlock, the state registrar shall amend the certificate of birth to show such paternity if paternity is not already shown on the certificate of birth. Such certificate shall not be marked "Amended."

(d) Upon receipt of a certified copy of an order of [court of competent jurisdiction] changing the name of a person born in this state and upon request of such person or his or her parents, guardian, or legal representative, the state registrar shall amend the certificate of birth to show the new name.

(e) Upon receipt of a certified copy of an order of [court of competent jurisdiction] indicating the sex of an individual born in this state has been changed by surgical procedure and that such individual's name has been changed, the certificate of birth of such individual shall be amended [as prescribed in Regulation 10.8(a)(5)] to reflect such changes.

(f) When an applicant does not submit the minimum documentation required in the regulations for amending a vital record or when the state registrar has reasonable cause to question the validity or adequacy of the applicant's sworn statements or the documentary evidence, and if the deficiencies are not corrected, the state registrar shall not amend the vital record and shall advise the applicant of the reason for this action and shall further advise the applicant of the right of appeal to [court of competent jurisdiction].

(g) When a certificate or report is amended under this section, the state registrar shall report the amendment to any other custodians of the vital record and their record shall be amended accordingly.

Section 23. [*Reproduction of Vital Records.*] To preserve vital records, the state registrar is authorized to prepare typewritten, photographic, electronic, or other reproductions of certificates or reports in the [Office of Vital Statistics]. Such reproductions when certified by the state registrar shall be accepted as the original records. The documents from which permanent reproductions have been made and verified may be disposed of as provided by regulation.

Section 24. [*Disclosure of Information from Vital Records.*]

(a) To protect the integrity of vital records, to ensure their proper use, and to ensure the efficient and proper administration of the system of vital statistics, it shall be unlawful for any person to permit inspection of, or to disclose information contained in vital records, or copy or issue a copy of all or part of any such record except as authorized by this act and by regulation or by order of [court of competent jurisdiction]. Regulations adopted under this section shall provide for adequate standards of security and confidentiality of vital records.

(b) The state agency may authorize by regulation the disclosure of information contained in vital records for research purposes.

(c) Appeals from decisions of custodians of vital records, as designated under authority of Section 6(b), who refuse to disclose information, or to permit inspection or copying of records as prescribed by this section and regulations issued hereunder, shall be made to the state registrar whose decisions shall be binding upon such custodians.

(d) When 100 years have elapsed after the date of birth, or 50 years have elapsed after the date of death, marriage, or [divorce, dissolution of marriage, or annulment], the records of these events in the custody of the state registrar shall become public records and information shall be made available in accordance with regulations which shall provide for the continued safekeeping of the records.

Section 25. [*Copies or Data from the System of Vital Statistics.*] In accordance with Section 24 and the regulations adopted pursuant thereto:

(1) The state registrar [and other custodian(s) of vital records authorized by the state registrar to issue certified copies] shall upon receipt of a written application issue a certified copy of a vital record in his or her custody or a part thereof to any applicant having a direct and tangible interest in the vital record. Each copy issued shall show the date of registration and copies issued from records marked "Delayed" or "Amended" shall be similarly marked and show the effective date. The documentary evidence used to establish a delayed certificate shall be shown on all copies issued. All forms and procedures used in the issuance of certified copies of vital records in the state shall be provided or approved by the state registrar.

(2) A certified copy of a vital record or any part thereof, issued in accordance with Section 25(1), shall be considered for all purposes the same as the original and shall be prima facie evidence of the facts stated

March 18, 1983

STATEMENT OF FISCAL IMPACT
HB 95

ASSUMPTIONS

1. Rental Space in Anchorage is approximately $2.50/square foot per month including all utilities, electricity and janitorial services.

2. Lease escalation costs will increase ten percent annually.

3. Moving expenses for ACC will be approximately $40,000.

4. Continuancy costs for the move period will be approximately $10,000.

5. Cost to remove existing, condemned buildings which this rental space would replace, cap utilities and restore area on ACC campus - $100,000.

6. No costs are included for additional equipment required. (Some administrative functions must remain on campus to be available to students.)

PROGRAM SUMMARY

The following costs would be associated with the move to additional lease space for ACC administrative headquarters and faculty office space.

	Estimated FY84 Cost
Lease Space of 32,000 square feet	$ 960,000
Moving Costs	40,000
Continuancy Costs	10,000
Removal of existing buildings	100,000
	$ 1,110,000

Note - All expenditures are considered contractual in nature.

March 18, 1983

STATEMENT OF FISCAL IMPACT
HB95

AGENCY COMMENTS

The FY84 capital budget request for the University of Alaska submitted by the Board of Regents includes $10.6 million for a classroom/administration building for Anchorage Community College as priority #12 of 19 priorities submitted. This appropriation is favored to meet ACC's classroom/administration building need rather than moving ACC administrative staff and faculty offices to off-campus leased space for the following reasons:

1. As part of the educational process, students need substantial interaction with faculty. Moving faculty offices off-campus would isolate the faculty from students during non-class hours and inhibit the educational process.

2. Moving faculty offices off-campus would require commuting time to and from campus for faculty. Depending on the lease location, travel time to and from classes could be extreme and would reduce faculty efficiency.

3. Students require access to several of the functions provided by the administrative staff and these functions must remain on the campus. Moving the administrative headquarters off-campus would increase the administrative costs by requiring coordination, supervision and commuting between staff located on campus and off-campus.

4. Lease expenses for administrative and faculty office space for seven years equate to the cost of a new facility of approximately the same number of square feet. In addition, a facility constructed on-campus would be expected to last 50 years.

5. Having ACC provide one square foot of space to UAA for each two square feet of newly leased space is unnecessary as UAA will have a 52,000 square foot classroom and administration building completed this summer. UAA also has another $25.3 million building included in the FY84 capital request.

6. In the face of declining oil revenues, continuing funding to cover ACC's need for an "administrative headquarters and faculty office building" through the operating budget in subsequent fiscal years, even if provided in FY84, is not assured, and most probably, if provided, would tend to cause comparable reductions in needed operating funds for ACC. Given the state's revenue picture, the university feels it would be unwise to make a commitment of this nature.

House of Representatives

February 22, 1983

TO: House Health, Education & Social Services Committee

FROM: Representative John Lindauer JHL.

RE: House Bill #95: "An Act relating to office space for the Anchorage Community College; and providing for an effective date."

The intent of HB 95 is to provide a separate distinct administrative headquarters and faculty office building for Anchorage Community College.

Anchorage Community Collete is a growing school. They currently occupy several "temporary" (trailer type) office buildings.

The appropriation of $1,000,000 would provide an additional 41,666.66 square feet of space (computed at $2.00 per square foot per month for prime office space). With a long term lease or lease/purchase agreement, further capital funding for ACC administrative headquarters and faculty office space will be unnecessary.

Section 2 also provides for ACC to release space back for UAA thus easing UAA's space demands. It specifies that ACC will give up one foot of office space to UAA for each two feet it is able to lease.

From: Sen. JOHN SACKETT JCS

Subject: CSSB-96, appropriation for hepatitis B inoculations

I would appreciate your scheduling CSSB-96, before the House HESS Committee for action as soon as possible. Expeditious handling of this measure is important to the Department of Health so they will be able to stay on schedule with the detection and inoculation program.

Please feel free to call upon myself, or my assistant, Max Gifford, if you need additional information.

Thank you for your consideration.

JCS/mg

OSAP PAPER/Department of Health and Social Services

POSITION PAPER

SENATE BILL NO. 96

"An Act making a special appropriation to the Department of Health and Social Services for innoculations for hepatitis B; and providing for an effective date."

Sponsor: Sackett

This bill appropriates $250,000 SGF to the Department of Health and Social Services for innoculations for hepatitis B and provides for an immediate effective date.

Background

A. The Disease

Hepatitis B is a disease caused by a virus. Disease severity can range from inapparent infection to a fulminating process leading quickly to death. There is currently no specific treatment against the virus.

Once infected, individuals may become chronic carriers of the virus, i.e., continue to be infected and to be able to spread infection to others. Moreover, chronic carriers of hepatitis B virus (HBV) are subject to complications including primary liver cancer with a nearly 100% mortality rate unless detected early or polyarteritis nodosa, a serious inflammatory disease of arteries with a 30% mortality rate. It is estimated that 20-25% of chronic HBV carriers will develop chronic active hepatitis with cirrhosis.

B. Prevalence

Both the rates of infection and the rates of chronic HBV carriers are known to be very high in certain Native groups in Alaska, particularly the Yupik-speaking groups in the Bethel area. In some villages which have been surveyed, the infection rate has been found to be as high as 73.1%.

Less is known about prevalence in other Native groups but there are reasons to suggest that rates are probably higher than among non-natives.

Other groups at high risk of HBV infection include: health and hospital care providers; hemodialysis patients; recipients of blood products, laboratory workers; dentists and allied dentist personnel; homosexuals; illicit users of injected drugs; staff and residents in institutions for the mentally retarded; sexual and household contacts of HBV carriers; newborn infants whose mothers are HBV carriers; and immigrants from geographic areas with a high incidence of HBV such as Southeast Asian refugees.

C. Vaccine

In November, 1981 a vaccine against hepatitis B was licensed for use in individuals 3 months of age or older. Vaccine is administered to high risk groups in three doses over a six month period. The vaccine is estimated to be 80-95% effective in protecting susceptible individuals. Duration of protection, and consequently the need for booster doses, is not known.

The vaccine is expensive (current cost is $95.55 for sufficient vaccine for the three-dose course for one individual). Because of the high vaccine cost and because the vaccine is of no value to individuals already infected, pre-vaccination blood testing of potential recipients is recommended. Cost of blood testing is estimated at $10-15 per test. To these costs must be added cost of vaccine distribution and administration plus data processing.

D. Existing programs

In the current fiscal year, DHSS undertook screening and vaccination of high risk groups in state institutions including Harborview Developmental Center, The Alaska Psychiatric Institute and State Correctional Centers.

The Alaska Native Health Service (ANHS) in cooperation with the federal Center for Disease Control has undertaken a vaccination program in the Bethel area villages where prevalence studies have been conducted. They have also used federal fiscal year-end monies ($500,000 for FFY 1982) to purchase additional vaccine.

Proposed program

The proposed activities during FY 83 involve close correlation with the Alaska Native Health Service hepatitis B program. Emphasis will be placed on screening of the highest risk population who will not be reached by the ANHS. Susceptibles will receive vaccine.

Position

The Department is strongly supportive of funding in FY 83 which would permit intensification of the program in the current fiscal year. However, the Governor's Office is submitting a delete-add supplemental for $250.0 utilizing funds already appropriated for Permanent Fund Hold Harmless. Thus, costs of HBV program activities in FY 83 could be absorbed without additional appropriation.

JUNEAU, ALASKA 99811
TELEPHONE 465-3753

March 4, 1983

The Honorable Ted Stevens
United States Senate
147 Russel Office Building
Washington, D.C. 20510

Dear Senator Stevens:

As you are aware Alaska faces a very serious problem because of the increasing numbers of people who either have or are susceptible to hepatitis. The State Department of Health and Social Services in conjunction with the Alaska Native Health Service has outlined a detection, surveillance and control program which will be administered by the State over the next four-five years. The program includes inoculation for those determined to have a high risk of contracting the disease. By 1987 the State Department of Health expects to have the problem under control and will continue monitoring the population as part of their regular programming.

The joint venture will cost an estimated $5.75 million over the life of the program. The State anticipates providing $2.75 million in funds and the Alaska Native Health Service will request federal funds of $2 million through FY84 and FY85, in addition to $500,000 which has already been received through ANHS, and another $500,000 of FY82 year-end ANHS funds which were used to purchase vaccine for the inoculation program.

This letter is to call your attention to the fact it appears only $500,000 has been proposed in the federal FY84 budget. (See attachment). It is important every effort be made to secure the full $1 million in funds to augment state funding so the detection and inoculation program may continue on schedule.

Funding of $250,000 from the state is in the process of being authorized by the State Legislature and the Governor for FY83, and an additional $500,000 is expected to be approved for FY84. State health officials note it is vitally important that the program be kept on schedule so the "chain of infection" will be broken reducing the high-risk factor that faces so many Alaskans, particularly Native Alaskans.

Your help in securing the needed funds from the federal government for the coming fiscal year would be greatly appreciated. Please feel free to contact me, or my assistant, Max Gifford, if more information is needed. We can be reached in Juneau at: 465-3753.

Thank you very much for your attention to this important matter.

Very Sincerely,

JOHN C. SACKETT
State Senator

Office of the Governor

Dear Gene:

Attached is a copy of the proposed committee substitute for SB 96, reducing the Permanent Fund hold-harmless appropriation by $250,000 and reappropriating those funds to the Department of Health and Social Services to fund the hepatitis B inoculations program.

Senator Sackett, the original sponsor of the legislation, would very much appreciate a letter from you or the appropriate spokesperson in the Governor's office acknowledging that this approach for funding the inoculation program meets with the Governor's approval.

Use of the committee substitute for SB 96, as opposed to introducing new legislation, should expedite the bill through the legislative process so that it can be transmitted to the Governor quickly.

Although no date for hearing the substitute in committee has been set your participation at the hearing would be appreciated.

Thanks for your help. Please call me if you have any questions.

Sincerely,

Max Gifford
Administrative Aide

Juneau, AK 99811

Dear Senator Sackett:

The proposed approach for funding the hepatitis B inoculations program contained in CSSB 96 should expedite approval of the funding for this important program. Accordingly, we will delete this item from the FY 83 appropriations transfer bill the Administration is preparing.

The identification of the funding sources for appropriation bills is a vital element in our State government's demonstration of fiscal responsibility. Thank you for your help.

Sincerely,

Bill Sheffield

SUBJECT: Establishment of a Department of Corrections (SCS CSHB 103 (Judiciary))

TO:

FROM: Linn H. Asper
Legislative Counsel

You have asked for a comparison between CSHB 103 (Judiciary), passed by the House and SCS CSHB 103 (Judiciary), passed by the Senate. The two versions of the bill contain similar provisions except that the Senate version deletes all references to the transfer of juvenile corrections functions to the proposed Department of Corrections. Therefore, under the Senate version the jurisdiction of the Department of Corrections would extend only to the adult corrections functions.

The specific differences between the two versions of the bill are as follows:

Section 1 is identical in each version except that the Senate version, on line 17, page 1, adds the term "adult" to make that section apply only to adult corrections.

Sections 2 - 33 are identical in the two versions.

Section 34 of the Senate version adds the word "adult" to make the section apply only to adult correctional institutions.

Section 35 is identical in the two versions.

Sections 36 - 64 in the House version, dealing with the transfer of the juvenile corrections function to the Department of Corrections, have been deleted in the Senate version.

Section 65 in the House version is identical to Sec. 36 in the Senate version.

Section 66 in the House version corresponds to Sec. 37 in the Senate version, but the Senate version retains certain juvenile jurisdiction in the Department of Health and Social Services while the House version transfers that jurisdiction to the Department of Corrections.

Sections 67 - 70 in the House version are identical to Secs. 38 - 41 of the Senate version.

Section 71 of the House version, stating provisions for the transfer of the juvenile corrections function to the Department of Corrections, has been deleted in the Senate version.

Sections 72 and 73 in the House version, establishing different effective dates for adult and juvenile corrections provisions have been merged into an immediate effective date in the Senate version.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

CS FOR HOUSE BILL NO. 103
PAGE 1

"An Act establishing a Department of Corrections and transferring certain functions of the Department of Health and Social Services to the Department of Corrections; and providing for an effective date."

The Committee substitute for House Bill No. 103 would accomplish the creation of the Department of Corrections which would include those functions pertaining to the administration of State programs dealing with State prisons and prisoners, probation and parole, extraditions and detainers and would also include State programs dealing with accused and adjudicated delinquent minors.

Departmentalization of the Adult Corrections System is an essential step in dealing with the current crisis and more longstanding problems.

The Governor and the Department of Health and Social Services support the creation of a Department of Corrections which would contain those functions dealing with adults accused or adjudged guilty of criminal offenses. The administration and the Department of Health and Social Services oppose the inclusion within such a Department of those functions pertaining to accused or adjudicated delinquent minors.

The Adult Corrections System within the State of Alaska is presently in an acknowledged crisis circumstance. It is beset with problems stemming from dramatic growth in prisoner population and forced capital expansion. In attempting to deal with an array of problems it is limited by outdated management structure it has long since outgrown.

Departmentalization of Corrections will ensure an increased focus on the problems besetting the correctional system and allow for altered management structure to deal with those problems. In addition, removal of the correctional system from the Department of Health and Social Services will decrease the drain on other vital human services programs.

Increased focus on correctional issues resulting from Departmentalization would enable the needs and problems of corrections to be routinely presented to the Governor and the Legislature. The alteration in management structure would allow for additional administrative support, the development of a more comprehensive corrections plan and in general a more effective administration of corrections programs. The ultimate result would be an increase in the effectiveness of the criminal justice system as a whole.

Juvenile delinquents differ significantly from adult criminals and should not be a part of an Adult Corrections Department.

The Administration opposes the inclusion of those functions dealing with accused and adjudicated delinquent minors for a variety of reasons.

There is a very real difference between adult and juvenile offenders which is verified by national research and Alaskan data and reflected in the philosophical approaches of adult corrections and juvenile services programs. National research shows that juvenile crime is less serious than adult crimes in three ways. First, juveniles commit primarily property crimes - thefts. Second, juveniles are far less successful at such crimes than are adults and thefts committed by juveniles result in less financial loss. Last, but most importantly, juveniles commit far fewer crimes of violence than do adults, they use weapons less frequently and guns rarely, and cause less frequent and less serious injuries to victims than do adults. National research also indicates that a very small group of juveniles is responsible for a large number of the serious, particularly violent, crimes committed by juveniles. This group and the publicity given to their offenses is largely responsible for an erroneous public perception that juvenile crime is widespread and serious. It is not. Studies conclude that efforts should be made to identify those few exceptional juveniles who commit violent crimes and deal with them selectively in different ways than other juveniles are treated. (This is a policy supported by the Governor and embodied in legislation proposed by both the legislature - HB 109 - and the executive.)

Alaskan statistics verify that National trends hold true here also. Of 6,128 juveniles arrested in 1981 only 60 were arrested for serious, violent crimes (unclassified or Class A felony's). However, 33% or 2,047 juvenile arrests were for essentially non-criminal or status offenses (alcohol consumption, curfew, or runaway.) The vast majority of the 4,081 criminal arrests of juveniles during 1981, 42% or 1,749 were for theft offenses. Of all juveniles arrested during 1981 only 648 committed offenses serious enough to require formal adjudication by the court and only 95 of these were ordered by the Court to be placed in secure youth services institutions.

Adult Corrections deals with the end result of the crime problem. Youth Services controls the problem and focuses on the cause.

It is clear that juvenile crime and delinquents differ significantly from adult crime and criminals. This is reflected in the differing philosophies and approaches of adult corrections and youth services. Adult corrections efforts are directed at controlling the problems resulting from individual and societal failure. Juvenile services are directed at eliminating the causes of the problems and preventing the failures. The approach of adult corrections in dealing with offenders has increasingly been focused on incarceration as a result of legislation establishing a stricter determinate sentencing scheme, dramatic increases in prisoner population, and forced capital expansion. Rehabilitation has been a secondary consideration. In dealing with juveniles youth serving agencies are attempting to resolve problems of families and youth to prevent or reduce individual failure and

delinquency, and ultimately prevent the development of adult criminals. This approach focuses equally on protecting the public and rehabilitating the individual. Services are designed to both control and supervise the individual and strengthen the juvenile and the family. The approach is comprehensive and aim is to achieve prevention, intervention, control and rehabilitation.

National research is showing increasingly that the primary cause of delinquency is the failure of families. As a result of this research there is an increasing understanding of the direct link between abuse and neglect of children and the development of juvenile delinquency, and even adult crime. Alaska is at the forefront of national thought in recognizing these important links and designing services to deal with the causes of delinquency in a comprehensive, coordinated way to prevent the development of adult criminals. Services for abused, neglected and delinquent children are presently organized in one agency which can more effectively address the causes rather than simply attempting to patch up the results of delinquency.

A comprehensive approach to youth and family problems is more effective and more cost efficient.

The placement of services for delinquent youths as well as services for those youths who are abused or neglected within a single comprehensive youth and family serving agency resulted from the recognition within Alaska of several important facts: 1) that there are real differences between adult offenders and juvenile delinquents, and 2) that a link exists between family breakdown, abuse and neglect of children, and juvenile delinquency. However, equally important was several years of study within the executive branch and a legislative audit report each of which concluded that combining all services for youth and families within one agency would result in more cost effective provision of services.

The benefits resulting from the present organization include:

1. increased focus and attention to juveniles and juvenile problems,

2. better coordination of services and reduced duplication of effort,

3. improved coordination in the development and implementation of policies and procedures affecting services for youth,

4. improved and more cost effective training for social workers and juvenile corrections personnel focusing specifically on juvenile services without unnecessary attention to adult issues,

5. more efficient administration and comprehensive planning efforts for all youth services,

6. more effective utilization of resources, and

7. a comprehensive approach to the development of additional resources.

Of particular importance is the management by a single agency of the residential child care system - foster home, group home, and larger private treatment facilities - which includes recruitment, licensing, payment and assessment of effectiveness. Single agency administration of this system is of acute importance given the complexity of the issues relating to its operation, the level of fiscal resources required for the purchase of these services ($16.4 million FY 84), and the fact that a study of method of operation and possible alternatives to the present system of determining costs of these services has been authorized by the legislature and is in progress.

A comprehensive approach is particularly important to rural Alaska.

The comprehensive approach to providing all youth and family services from within one agency has proven particularly beneficial in rural Alaska where traditionally services have been more expensive and less cost effective in terms of simple numbers. The comprehensive approach of the existing service structure allows a greater variety and higher levels of services to be provided in rural areas without significantly greater costs. The more effective utilization of resources in rural areas made possible by a comprehensive approach to Youth Services also allows greater effort to be expended to provide culturally relevant/sensitive services to Native Alaskans.

Transfer of Youth Services would disrupt the comprehensive approach to youth and family problems. Inclusion of services to delinquent youth within a Department of Corrections focusing on adult criminals and adult correctional programs would violently disrupt the comprehensive approach to youth and families. This disruption would inevitably result in a return to the previous duplication and lack of coordination, and would result in a greater expense, which were among the reasons services to delinquents were originally removed from the Division of Corrections. Disruption of the comprehensive approach of youth services would prove particularly detrimental to rural Alaska where the Division of Family and Youth Services is the primary social service resource and the benefits resulting from the increased coordination within a single agency is most apparent.

Creation of a Department of Corrections is vital but youth services must not be included.

Although the Department and the Governor view the creation of a Department of Corrections as an essential step in resolving the present crisis in the adult correctional system, inclusion within such a Department of services for accused and adjudicated delinquent youth is adamantly opposed. Such an inclusion would be a regressive "step backward" in terms of philosophy and what has been demonstrated about the causes, nature and extent of juvenile delinquency. It would also be an important "step backward" in a fiscal sense because it would result in less efficient and less effective services and undoubtedly greater expenses in a time of decreasing resources.

The problems besetting the adult corrections system require the full attention of top administrators. Their time and efforts must not be diverted to other matters as would necessarily occur if youth services were included in a Department of Corrections. Under such a structure neither adult corrections problems nor youth services receive adequate attention or resources.

HB 103, ESTABLISHING A DEPARTMENT OF CORRECTIONS

The proposal to change the division of corrections within the Department of Health and Social Services to departmental status is one that is supported by the Governor's office, correctional professionals, and the House HESS committee.

Elimination of the correctional crisis in this state is of primary concern to me, and I know that members of the Judiciary committee are keenly aware of the problems facing the correctional system. The overcrowding, the mismanagement, the poor conditions and lack of alternatives to incarceration, are all challenges that face us in the current legislative session. You have heard the briefing on the Cleary case and know that the problems are real and that cooperation between all branches of government will be necessary.

With proper administration, budgeting, and organization, the problems can be solved. Proper management is the beginning. The new Department of Corrections and a responsive management team will be the first step. By creating a Department, a commissioner and executive staff can be appointed who answer directly to the commissioner. The existing division of corrections has been plagued with inconsistent management within the division and within the Department of Health and Social Services. The division has placed a disproportionate load on several Department of Health and Social Services programs, and the goal of the division of corrections is not necessarily consistent with the

goals of the Department of Health and Social Services,which are oriented toward public health, public assistance, mental health, and family and youth services.

The proposal to create a new department, as presented to the HESS committee, it to retain 9 existing positions and transfer them to the new department. One existing position in corrections will be retained and ten new positions will be created. Mr. Endell and his staff can speak better to the fiscal and administrative makeup of the department, so I will leave that to him.

The issue of juvenile corrections was discussed by the committee. The consensus of the committee was that juvenile corrections should be included within the new department, but the transition should occur after the new department is established and has been able to correct some of the immediate problems at hand.

The lack of specific information regarding the department of corrections has been frustrating for those of us who must evaluate the proposal. However, in this instance, considering the scope of the problem and the urgency of the problem, I am willing to give the Governor the benefit of the doubt and trust his office to implement an effective corrections program.

HB 103, ESTABLISHING A DEPARTMENT OF CORRECTIONS

SUMMARY OF HOUSE BILL 107

RIGHT TO NATURAL DEATH

Purpose: Recognizes the fundamental right of adults in Alaska to control the decision to have artifical life - sustaining procedures withheld or withdrawn in the case of a terminal condition.

Declaration Form: An adult may sign a written statement expressing his or her desire that artificial means should not be used to prolong the dying process.

Revocation: Explains how a person can revoke the written declaration.

Physician's Responsibility: An attending physician must certify that the patient's condition is terminal in order for the patient to qualify under the statute.

Immunity: A physician, health facility, or licensed professional acting under the direction of a physician is immune from any liability if they act in accordance with the provision of the bill.

Penalties: Penalizes persons who conceal or falsify a declaration of another, and submits a physician to civil liability for failure to comply with the declaration of his or her patient.

The Honorable Don Clocksin
Alaska House of Representatives
State Capitol
Pouch V
Juneau, AK 99811

Dear Representative Clocksin:

The Alaska State Hospital Association is pleased to offer our support for HB 107, An Act Relating to the Right for a Natural Death. This is a responsible approach to resolving a critical, ethical and legal medical problem.

A question does come to mind as to what would happen to a physician and/or a health facility when care is withheld pursuant to a "valid" declaration, but subsequent to death a discovery is made that a revocation existed.

We look forward to working with you on this measure.

Sincerely,

Dennis L. DeWitt
President

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

HOUSE BILL NO. 107

"An Act relating to the right to a natural death."

The right of a competent individual to decide whether life-sustaining procedures should be used in the face of a terminal illness or injury has received increasing attention in recent years as medical technology has expanded and individual cases have received media attention.

This Bill provides a process through which competent individuals can participate in decisions regarding their care when afflicted with a terminal condition. "Terminal condition" is restricted to situations in which two physicians determine that death will occur whether or not life-sustaining procedures are used. These procedures would only apply when a competent individual makes a positive decision to forego life-sustaining intervention and not in circumstances such as occurred in the much publicized Quinlan case.

The Bill appears to address the interests of the declarant, the health care providers and the heirs of the dying person. The Department of Health and Social Services supports the intent of this Bill. It is assumed the Department of Law is also reviewing it for adequacy of legal safeguards for participants as well as the penalty provisions.

STATE LEGISLATURE

MEMORANDUM

To the committee:

The following position paper was prepared by the office of the Executive Director of the Older Alaskans Commission (OAC) for review and approval by the commission. The commission will consider the legislation at their meeting on February 17, 1983.

Rep. Don Clocksin

Position Paper

OLDER ALASKANS COMMISSION

HB 107 "Right to a Natural Death" February 15, 1983

We recommend that the OAC support the passage of HB 107 "An act relating to the right of a natural death".

With two insignificant word changes HB 107 is the same as HB 855 introduced by Rep. Clocksin and Rogers in the 12th legislature second session, February 16, 1982. The first change is found on page 3 line 29 under section 18.12.020. "Become" in the old bill is now "is" ("...the revocation IS effective on communication..." rather than ..."the revocation becomes effective...). The second change is found on page 5 line 29 under section 18.12.050. In the old bill the penalty for falsifying or forging a declaration which directly causes life sustaining procedures to be withheld or withdrawn and death to be hastened "commits the crime of murder in the first degree." In HB 107 the penalty is the same except that it reads "death to be hastened violates AS 11.41.100". The sentence for conviction of murder in the first degree is "at least 20 years and not more than 99 years" (AS 12.55.125).

The concept in HB 855 was supported for passage by the 1981 Alaska White House Conference on Aging, March 15, 1981. The delegates to the White House Conference on Aging supported passage of HB 855 in a meeting of February 24, 1982 and reported that action to the Older Alaskans Commission February 25, 1982 and asked for OAC support . There appears to be no

action taken by the OAC in meetings on that date or later on April 28 or 29, 1982 or June 2, 3, or 4, 1982.

The most significant discussion on the merits of HB 107 will center on the exact definition of "life sustaining procedures" and "the performance of medical procedure considered necessary to provide for the comfort of a qualified patient."

The nursing profession considers intravenous fluids and feeding as providing "comfort of a qualified patient." To withhold iv fluids and feeding in the view of the nursing profession is to promote dehydration and starvation.

The problem is that to provide fluids and feeding prolongs life, in some cases for years, when there is absolutely no hope for recovering and death is inevitable. Presently a comatose patient at Nakoya health center in Anchorage who has brain damage and was expected by doctors to die soon after admission has been sustained by fluids and food administered intravenously for over three years. The intravenous feeding and food might be considered to provide comfort but they thwart the intention of the right to a natural death. Furthermore, the question of a comatose person being comfortable or not from starvation or dehydration is moot if he has no feeling. The degree of comfort or discomfort from the process of withholding fluids and food is subject to the administration of other pain killers. It would appear that when a patient is unable to take fluids and food orally and there is no hope of recovery, administering them intravenously is a life sustaining procedure and thwarts the intention of a

right to a natural death. We recommend that section 18.12.120 definitions on page 7 be changed to add under section 3 "life sustaining procedures" subsection (a)...means a medical procedure or intervention(, INCLUDING INTRAVENOUS FEEDINGS AND FLUIDS,) ....

Impact on agencies: If this bill were authorized and passed it might result in less expense to the tax payers of Alaska for whom this bill would provide some relief at the point of not having to sustain a number of people in a comatose condition that is otherwise hopeless. That is the greatest impact.

A similar impact on nursing homes would reduce the population in nursing homes where people are now being sustained. If they had their will they might not themselves wish to be so.

March 14, 1983

TO: Members of the House HESS Committee - Alaska Legislature

Subject: H.B. 107, "An Act relating to the right to a natural death"

INTRODUCTION:

House Bill No. 107, an act relating to the right to a natural death, is "living will" legislation similar to so-called "death with dignity" and "natural death acts" proposed in many State Legislatures across the country. We are opposed to legislation of this kind.

We do not argue with the stated goals of the bill. We recognize the basic right of the patient to refuse the use of devices to prolong life when death is imminent. We also believe it is healthy for people to think about their death and to prepare for it.

Our opposition to this kind of legislation stems from the manner in which it attempts to achieve its goals. We are opposed to the concept of the living will because of the havoc it will cause in the physician-patient relationship and other potential harm that legislation of this kind may bring with it.

OBJECTIONS:

In general, the following summarizes our thoughts about this bill:

1. Living will legislation is unnecessary; patients already have those rights that this bill seeks to convey to the patient.

2. Superimposing a "legalism" into the decision surrounding the natural death process will hinder and interfere with good medical practice rather than help it.

3. This bill, if passed, will undercut the presently recognized rights of the majority who will not sign a living will.

4. The bill promotes uninformed consent to a future decision, the circumstances and details of which are unknown at the time of the decision.

5. The bill involves a dangerous precedent in implying that the physician has rights over the patient and that the State confers those rights.

ALTERNATIVE LEGISLATION

What does this legislation seek to do? Presumeably it is the desire of the supporters of this kind of legislation to protect the rights of either the patient or the physician or both. While we do not accept the need for this bill its goals could be accomplished without also jeopardizing the rights of non-signing patients and physicians.

We suggest a direct approach. Pass a law acknowledging the fundamental rights of the patient to make decisions affecting their care and restate the principle that extra-ordinary life sustaining measures may be withdrawn by the attending physician when done in his best judgement under the usual and customary standards of medicine following approval of the patient and/or family.

This approach would avoid the difficulty of definitions. There would be no requirement for signing a directive affirming one's rights and consequently no injury to those who do not sign and there would be no pitfalls and potential for serious abuse that exists in living will legislation.

CONCLUSION

We have chosen not to comment on specific provisions of H.B. 107. We believe this bill, in any form which gives legal status to a written directive, is not in the best interest of society. We urge you to preserve the rights of all patients by rejecting the concept of the living will.

Sidney Heidersdorf

Sidney Heidersdorf
ALASKANS FOR LIFE, INC.

I fear the power of choice over life or death at human hands. I see no human being whom I could ever trust with such a power – not myself or any other.

Pearl S. Buck, Nobel Laureate

A society is measured by the way it treats its young, its old, and its helpless. We recognize that the emphasis today is on "quality of life", but we must not let our concern for quality overpower our concern for LIFE itself.

We must safeguard the valuable tool we now have to determine each and every case individually — not by legislation but by HUMAN RIGHTS. Now that medical technology has advanced to the point where we no longer have a uniform "definition of death" to rely on, we must rely on human rights for our ethics — for we can no more justify prolonging the dying process by the application of abusive technology when there is no possible hope of recovery than we can justify burying the "doubtfully dead".

OUR CHALLENGE IS CLEAR.

We must:

- take a more realistic and accepting approach to aging, disability, dying, and death.
- re-evaluate hospitals and institutions and restructure them, if necessary, to meet their vital and difficult tasks. Much CAN be done to meet the needs of the disabled and dying. One such successful program is the HOSPICE concept, which offers loving, compassionate and skilled care for the dying.
- build caring and concerned communities which will preserve and defend human life, rights and dignity.
- become better informed on today's life issues so that we might help others understand them.

THE QUESTION IS: ARE WE GOING TO SAY, "I'M SORRY YOUR LIFE IS DIFFICULT. I WILL KILL YOU," OR ARE WE WILLING TO SAY, "I'M SORRY YOUR LIFE IS DIFFICULT. WHAT CAN I DO TO MAKE IT BETTER"?

Revised 6/77

eu·tha·na·sia \ˌyü-thə-'nā-zhē(-)ə\ *n* [Gk, easy death, fr. *eu-* + *thanatos* death — more at THAN] : the act or practice of killing individuals (as persons or domestic animals) that are hopelessly sick or injured for reasons of mercy — **eu·tha·na·sic** \-zik, -sik\ *adj*

EUTHANASIA

You've heard this word on TV. You've seen it in the newspapers. What does it mean to you? Does it mean that to **everyone**?

The **real** meaning of the word EUTHANASIA is muddled, because it conjures up images of everything from the senseless slaughter of millions in Nazi Germany, to mercy killings, to "pulling the plug" on old Uncle Charlie when there is no more hope of recovery.

Usually we hear about euthanasia in terms of positive/active euthanasia (**forcing** a person to die), or negative/passive euthanasia ("doing nothing," **allowing** death to come naturally). But as medical science rapidly changes, these distinctions become engulfed in a "rhetorical smokescreen", and it becomes increasingly important for us to "clear the air" so that we might fully understand this LIFE and DEATH issue that **may well affect us**.

Today, the word euthanasia has been stretched to include three quite different concepts:

- Death with Dignity
- Mercy Killing
- Death Selection

1 **DEATH WITH DIGNITY,** in the truest sense, means **allowing a terminally ill patient to die naturally,** without the mechanized desperation that often turns death into an inhumane ordeal (e.g. not using, or discontinuing, **extraordinary** means when a person has irrevocably entered the process of dying — in some instances called "pulling the plug").

EACH OF US HAS THE RIGHT TO EXPECT AND TO DEMAND TO DIE WITH DIGNITY, JUST AS WE HAVE THE RIGHT TO EXPECT AND TO DEMAND TO LIVE WITH DIGNITY.

This is not to say that we should neglect the dying person. The dying person, like any human being, is entitled to medical care that is reasonable and prudent under the circumstances involved, allowing him to *live with dignity* until the moment of death.

No church or medical group disapproves of Death with Dignity; no legislation is necessary to clarify this. What *is* necessary is education and support for dying persons and their families.

We must continue to CARE, even when there is no hope for CURE.

2 **MERCY KILLING** is positive, direct euthanasia, either voluntary or involuntary. As opposed to Death with Dignity, which permits the dying to die naturally, Mercy Killing employs **active means to cause death,** or at least to speed up death (such as a lethal injection).

Mercy Killing also includes the **abandonment or withdrawal of *ordinary* medical care** — those medical and surgical procedures commonly used to relieve sufferings and problems due to injuries and/or illnesses, based on the *individual* patient, the *individual* circumstances, and the available medical technology. (An example of this second type of Mercy Killing would be the denial of necessary surgery to a child who is retarded, when, if needed by a "normal" person, the identical care would not be questioned.)

WE MUST MAINTAIN A CLEAR DISTINCTION BETWEEN "LET HIM DIE" and "KILL HIM OFF".

3 **DEATH SELECTION** (involuntary or even mandatory euthanasia) involves the killing of persons who are "no longer considered socially useful" or who are judged to be a "burden" on society. This type of euthanasia, more aptly called MANAGERIAL EUTHANASIA, is rooted in a hard-core utilitarianism which sees no value beyond social utility, and balances life solely on a cost/benefit scale. Death Selection — the "sleeper" in this debate — poses a real threat to many groups in our society, especially the aged, the severely handicapped, and the retarded.

THE INTENT IS WHAT WE MUST KEEP UPPERMOST IN OUR MINDS:

- Are we merely allowing nature to take its course when there is no more hope, while making the patient as comfortable as possible? (Death with Dignity)
- Or, is the intention to HELP THE INDIVIDUAL TO DIE, either by **direct killing** or by **doing nothing, when help and support is possible,** even though circumstances might be difficult? (Mercy Killing)
- Or, is the intention to DESTROY A HUMAN INDIVIDUAL OR GROUPS OF HUMAN INDIVIDUALS **because they are unwanted, imperfect, or inconvenient?** (Death Selection)

Each of us should be concerned about euthanasia because **pro-euthanasia societies are alive *and* growing,** both in numbers and in influence. Among the most active are the Euthanasia Society of America (recently renamed the Society for the Right to Die, Inc., because the word "euthanasia" hurt lobbying efforts), the Euthanasia Educational Council, and the American Humanist Society.

Another organization, the Good Death Fellowship, wrote in its quarterly publication "Euthanasia News" (Vol. 1, No. 1) that the fellowship "is designed, in essence, to help people to achieve a good death". The same issue states: "Several major industries are poised and ready to make available not merely "another pill" but a wide and colorful range of products and methods to meet the needs of those who have lived their lives and are about ready for a good death."

The philosophies of these organizations have spread widely — into the classrooms, into public policy, and into the legislatures.

Over three-fourths of our states have introduced and/or passed euthanasia or death-related bills — ranging from "Death with Dignity and "Natural Death Acts" to registration allowing for direct killing.

- The 1975 Montana bill HB256 would allow a doctor to **administer euthanasia,** or to instruct a nurse to do so, or to provide lethal drugs to the family. Any individual over 18 could sign a statement, revocable only once, to qualify for medicated death.
- The 1975 Wisconsin Assembly Bill 1207 proposed that anyone over the age of seven could make an oral or written death request, and that anyone over the age of fourteen could carry out those wishes without fear of prosecution.
- In Florida, "Death with Dignity" legislation has been introduced every session since 1968. The 1973 bill (HB407) would have allowed a competent person to sign a paper instructing doctors to let him die if he becomes terminally ill or injured. Relatives of an "incompetent" person could prescribe death providin two physicians agreed. But for an irreversibly ill patient with no relatives, the simple signatures of three physicians approved by a judge are all that is needed to sign the death contract. Former Representative Sackett suggested that the the state of Florida could save five billion dollars in the next half century if 90% of the state's severely retarded and mentally ill were allowed to die. (The National Association for Retarded Citizens vigorously opposed HB407.)

Keeping in mind that Death with Dignity, as defined earlier, is acceptable to most people, euthanasia bills must be questioned for their underlying purpose. Are they paving the way for future legislation for Mercy Killing or Death Selection?

- In Maryland, when state Senator Julian L. Lapides introduced his 1974 euthanasia bill to the legislature, he was asked whether the bill would provide a wide-open door for Mercy Killing in the future. He replied, "Well, not a wide-open door, but maybe it opens it a crack."

> *Only "viable" human beings who have the "capability of meaningful life" may, but need not, be protected by the state.*
>
> United States Supreme Court
> Decision on Abortion, January 22, 1973
> (Roe vs Wade page 48)

LIFE IS A CONTINUUM. At one end of the spectrum, life is being destroyed before birth. And now, **legalized euthanasia is a genuine possibility.** AND WHY NOT?

A society that accepts the right to kill infants in the womb because they might be unwanted, imperfect, or merely inconvenient, should have no difficulty in accepting the right to kill other human beings who might be *judged* unwanted, imperfect, or merely inconvenient.

Several influential leaders of the pro-abortion and pro-euthanasia movements have suggested that next logical step. The following statements reflect their pro-death philosophy:

- Nobel Laureate Dr. James D. Watson, who cracked the genetic code, said that abortion is permissible when a child is determined to be defective in utero, but . . . "most defects are not discovered until birth. If a child were not declared alive until three days after birth, then all parents could be allowed the choice . . . the doctor could allow the child to die if the parents so chose and save a lot of misery and suffering". (AMA Prism. May 1973)
- Abortion advocate Dr. Glanville Williams, in his book **The Sanctity Of Life And The Criminal Law,** asks for "humanitarian infanticide" and "euthanasia for handicapped children".
- Dr. Robert H. Williams, professor of endocrinology, wrote that "planning to prevent overpopulation of the earth must also include euthanasia, either negative or positive". (Northwest Medicine, July 1970) He also suggests killing "potential suicides" and "hopelessly criminal individuals" as well as the terminally ill in discomfort or pain. (Seattle Times, March 7, 1973)
- Dr. Joseph Fletcher, professor of medical ethics, wrote that there must be quality control in the terminating of life as in its initiating. "What has taken place in birth control is equally imperative in death control." ("Ethics and Euthanasia", **To Live and To Die: When, Why, and How,** ed Robert H. Williams)

WHO IS TO SET THIS PRICE TAG ON HUMAN LIFE? WHAT IS TO PREVENT THE NEXT AUTHORITY FROM CHANGING THAT PRICE TAG?

FACT SHEET

FROM: Cherie Shelley, Executive Director
Alaska Public Employees Association (APEA)

TO: Representatives Milo Fritz and Mae Tischer
Co-Chairpersons, HESS House Committee

SUBJECT: House Bill No. 108

DATE: February 4, 1983

APEA position concerning HB 108

APEA favors the passage of HB 108.

Employees groups referred to in HB 108

Classified - are those employees who meet state requirements and can be fired only for "just cause".

Exempt - are those employees in the state political hierarchy and can be fired without "just cause".

Physicians affected by HB 108

Physicians in "Exempt" group - are those physicians employed by the Division of Mental Health and Developmental Disabilities, Department of Health and Social Services. This group is comprised of psychiatrists and one medical physician, working mainly out of API in Anchorage. They have been and still are in the "Exempt" group.

Physicians in "Classified" group - are five medical physicians, Department of Health and Social Services, (not psychiatrists) working throughout the state. There are two Public Health Medical Specialists, a Medical Specialist, Child Development Services, a Regional Medical Officer and a Regional Health Officer in Fairbanks who is a veterinarian. They have been and still are in the "Classified" group.

Salary Schedule for "Exempt" group - the one medical physician is in range 27. The psychiatrists are in ranges 28 and 29. The Director is a range 30. Their salary is based on the F step plus five percent.

Salary Schedule for "Classified" group - the five medical physicians are in ranges 26 and 27.

Note" "Exempt" group wages are higher than "Classified" group.

Legislation background

Last year SB 193, sponsored on behalf of the Blue Ribbon Commission of which I am a member, proposed the following as part of an effort to clarify the State Personnel Rules: "(15) Licensed physicians, as defined in AS 47.30.340(9), employed by the division of mental health and developmental disabilities, Department of Health and Social Services..."

SB 193 was amended by the Senate State Affairs Committee. The portion amended was AS 39.25.110, which lists the membership of the exempt service to include: "(13) all licensed physicians as defined in AS 47.30.340(9) employed by the state...."

The amendment was merely a means to shorten the language content. AS 47.30 is entitled "Mentally Ill and Insane Persons". AS 47.30.340(9) referred to physicians (psychiatrists) working for Division of Mental Health. Therefore it was redundant to state "employed by the division of mental health and development disabilities, Department of Health and Social Services..." However, AS 47.30.340(9), when read out of context with AS 47.30, entitled "Mentally Ill and Insane Persons" with articles dealing with the mental health program - could be interpreted to mean all physicians working for the state and not just the psychiatrists.

HB 108

HB 108 corrects the unintentional implication of the amendment language change. The intent of the legislation was not to move all physicians from the "Classified" to the "Exempt" group. The intent was to leave those physicians (medical) in the "Classified" group and to leave those physicians (psychatrists) in the "Exempt" group.

Reason for APEA's involvement

Physicians that could be affected if this legislation does not pass are the medical doctors (not psychiatrists), employed by the Division of Public Health. As APEA members, they have contacted the Association to voice their concern about the amendment last session of the State Personnel Act (SB 193). APEA has spoken with three of the five physicians. They wish to remain in the "Classified" employee group. It is our understanding that the physicians (psychiatrists) in the "Exempt" employee group wish to remain there as set forth in the legislation.

Passage of Bill

Would satisfy physicians (medical and psychiatrists) now working for the state - would not cost the state anything as salary schedules would remain the same - and would appear to be the most practical and expedient method of correcting an inadvertent language error in the amendment.

MEMORANDUM

January 25, 1983

TO: House Health, Education & Social Services Committee

FROM: Teresa B. Cramer Teresa B Cramer
Administrative Assistant

SUBJECT: HB 108, Licensed Physicians in the Department of Health and Social Services

An unintended change created by an amendment to the State Personnel Act last session has caused some question in the Department of Health and Social Services. Prior to the amendment, licensed physicians employed by the Division of Mental Health and Developmental Disabilities were placed in the exempt service. Other physicians working for the department were members of the classified service. This system worked well. The exception for those working in the mental health field was necessary in order to attract and pay qualified staff.

The amendment placed all licensed physicians, as defined in AS 47.30.340(9), employed by the state into the exempt service. Title 47.30 addresses mentally ill and insane persons but the definition section defined "licensed physician" in general terms. The department brought to the commission's attention an unforeseen situation. There were two employees in the Division of Public Health serving as Regional Health Officers. One was a medical doctor and the other a licensed veterinarian. Under the amended version of the State Personnel Act, the doctor could be placed in the exempt service and the veterinarian would remain in the classified service. Both have the same duties, though in different locations.

The commission recommends that legislation be adopted to return all medical doctors except those employed by the Division of Mental Health and Developmental Disabilities to the classified service.

Bill Analysis

The bill amends the section of the State Personnel Act which lists membership in the exempt service to place only those physicians employed by the Division of Mental Health and Developmental Disabilities in the exempt service.

BILL SHEFFIELD, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES
OFFICE OF THE COMMISSIONER

POUCH H 01
JUNEAU, ALASKA 99811
PHONE: 465-3030

December 14, 1982

The Honorable Bill Ray, Chairman
Blue Ribbon Commission on the State Personnel Act
Pouch YG, Mail Station 3123

Attention: Terry Cramer, Adminstrative Assistant

Subject: Licensed Physicians - Department of Health & Social Services

Dear Senator Ray:

Subsequent to the December 7 meeting of the Blue Ribbon Commission, and at its direction, the Department of Health & Social Services considered the circumstances surrounding the statutory language relating to licensed physicians employed by the state. The original purpose for the inclusion of licensed physicians in the exempt service under AS 39.25.0110 (19) was to provide for recruitment and retention of qualified and competent staff within the Division of Mental Health & Developmental Disabilities. That situation has worked well since that time.

The amendments to that statute as adopted under HCS CSSB 193 in 1982 eliminated that particular distinction. As presently written, that statute could be interpreted to include licensed physicians in the Division of Public Health. That action is not adjudged to be in the best interests of the state and those employees. It should be noted that in 1981, AS 47.30.340 was repealed in its entirety and AS 47.30.915 was added. That section again defined "licensed physician" in the legislative reference to mental health programs.

It is therefore respectfully requested that the language in AS 39.25.110 (13) be amended to read as follows: "licensed physicians, as defined in AS 47.30.915 (11), employed by the Division of Mental Health & Developmental Disabilities, Department of Health & Social Services.

Thank you for your consideration of this matter.

Sincerely,

Allen K. Korhonen
Acting Commissioner

06-F38LH

HB 108

House bill 108 changes the current statute back to the original wording of the statute in 1980. AS 39.25.110 (19), in October, 1980, included as exempt employees the licensed physicians employed by the division of health and developmental disabilities, Department of Health and Social Services.

The October, 1982 revision of the statute changed the wording to include all licensed physicians employed by the state as exempt employees.

The language of HB 108 returns licensed physicians to the classified service, except for those working within the division of health and developmental disabilities, of the DHSS.

This affects psychiatrists,primarily, but also includes other specialists within the Alaska Psychiatric Institute. the justification for placing psychiatrists in the exempt category is that they demand salaries in excess of the established salary range for the classified service. Rather than change the salary range, the proposal is to revert to the previous exempt status. Those people categorized as exempt serve at the pleasure of the governor, and are not subject to the personnel rules.

HB 108

Summary:

OCTOBER 1980 STATUTE 39.25.110 (19) included as EXEMPT employees licensed physicians employed by the division of mental health and developmental disabilities, Department of Health and Social Services

October 1982, 39.25.110 (13) included <u>All</u> physicians employed by the STATE as exempt.

HB 108 RETURNS to EXEMPT SERVICE only physicians within the division of mental health and developmental disability, Dept of H&SS.

AFFECTS psychiatrists, primarily but also other specialists within ALASKA Psychiatric Institute

Also, by deleting reference to <u>All</u> physicians, RETURNS other physicians to classified service.

Justification for placing psychiatrists in EXEMPT category is that they demand a SALARY IN EXCESS of the RANGE ESTABLISHED for classified service. Rather than change the SALARY RANGE, the proposal is to REVERT to

previous legislation. Also- those working under exempt status serve at the pleasure of governor.

1/25

PURPOSE: to (PLACE psych INTO SERVICE) EXEMPT ~~psychiatrists~~ from CLASSIFIED SERVICE to allow PAYMENT IN EXCESS of PAY SCALE SINCE going RATE is higher THAN pay scale allows -

QUESTION: Why not adjust PAY SCALE?
AT PLEASURE of GOVERNOR

AFFECTS ONLY PHYSICIANS - NOT OTHER EMPLOYEES

ARE THERE OTHER PHYSICIANS IN CLASSIFIED SERVICE within DHSS? ALL CLASSI EXEMPT NOW!
Why HAVE them ~~EXEMPT~~ CLASSIFIED AND MENTAL HEALTH EXEMPT

ARE there other PSYCHIATRISTS in DHSS NOT IN MENTAL Health? DIRECTOR ALASKA PSYCHIATRIC INSTITUTE
- ALREADY EXEMPT - STAFF? No.

CONSIDERS NECESSARY;

(4) "HEALTH FACILITY"

(A) MEANS A FACILITY THAT IS LICENSED, WHEN REQUIRED, BY THE STATE UNDER AS 18.20.010 - 18.20.130 AND THAT IS OWNED OR OPERATED OR BOTH BY A MUNICIPALITY OR BY A NONPROFIT CORPORATION OR OTHER NONPROFIT SPONSOR;

(B) INCLUDES A PUBLIC HEALTH CENTER, MATERNITY HOME, COMMUNITY MENTAL HEALTH CENTER, FACILITY FOR THE MENTALLY OR PHYSICALLY HANDICAPPED, NURSING HOME, OR CONVALESCENT CENTER.

(C) EXCLUDES A FACILITY OPERATED OR WHOLLY SUPPORTED BY THE STATE OR THE FEDERAL GOVERNMENT.

HISTORY (SEC. 4 CH 155 SLA 1980; AM SEC. 5 CH 103 SLA 1981)

R0601 * END OF DOCUMENTS IN LIST - ENTER RETURN OR ANOTHER COMMAND.

1. Senator Josephson (Senate HESS Committee) ~~will~~ may recommend approval of SB 85 which will repeal the CON law (note lines 16 and 17 on the attached bill where brackets indicate deletion from the bill).

   Senate Josephson will do this providing we also ask for repeal of Alaska Statute 29.90.010 through 030. This statute provides for the State's participation on Certificate of Need approved projects and it is referred to as construction revenue sharing funds. We are in agreement with the repeal of this statute.

Note: In lieu of the construction revenue sharing funds, we are asking for passage of HB (House Bill) 112 -- which is outlined in # 2.

2. HB 112 "An Act relating to the maintenance and improvement of health facilities" is a bill that must be passed for both bills to work.

   What makes this bill special is that any facility wanting state funding consideration will have to present their project to the MEDICAL CARE ADVISORY COMMITTEE (see definition of committee on page 1 of HB 112) for approval.

   The committee, using criteria and guidelines as outlined in the bill, will prioritize those projects seeking funding and make their recommendations to the Commissioner of Health & Social Services.

   The Commissioner will, in turn and after department review, pass on his recommendations to the Governor for inclusion in the Governor's budget.

3. In addition, we understand that some legislators are also concerned about the potential increase in operating revenue sharing funds as outlined in Alaska Statute 29.89. 030.

   The Alaska State Hospital Association is in favor of recommending to the legislature that a maximum CAP of $250,000 per year be the maximum amount given to any facility.

   This item is not directly related to items 1 and 2, but is a concern of some members of the legislative body.

BILL SHEFFIELD, GOVERNOR

ALASKA COMMISSION ON POSTSECONDARY EDUCATION

POUCH FP
JUNEAU, ALASKA 99811
PHONE: (907) 465-2854

M E M O R A N D U M

TO: The Honorable Barbara Lacher
Alaska State Representative

FROM: Kerry Romesburg, Executive Director
Alaska Commission On Postsecondary Education

DATE: January 19, 1983

As you requested, I am forwarding the latest estimates on the Alaska Student Loan Program for 1982-83. The Legislature originally appropriated $59 million for 1982-83 loans, and as of January 14, 1983, we reached our account maximum (which was actually $65 million - allowing for $6 million in loan refunds and cancelled awards). Loans were made to 13,556 Alaskans.

We estimate that about 1,400 more persons may wish to apply for a loan (largely for vocational or summer programs) between now and June 30. The average loan requested will be around $2,500, so that makes us $3.5 million short of full-funding. With refund rates at present, $3 million would probably be sufficient to actually fund all applicants.

Students wishing to attend school beginning after June 30 need to apply on our 1983-84 applications, and their awards will be dependent upon legislative action taken this session.

House of Representatives

M E M O R A N D U M

TO: Rep. Mae Tischer, Chairman
House HESS Committee

FROM: Rep. Barbara Lacher

DATE: February 3, 1983

SUBJECT: Hearing on HB113, "a supplemental appropriation for the scholarship revolving loan fund"

I would like to postpone the hearing on HB113 until at least next Friday, February 11th. The reason is that we are in the process of determining how much money will be needed to fully fund the spring and summer terms; the amount needed will be lower than initially requested because of AS 14.43.120(c) which requires that a student "must continue to be enrolled as a full time student in good standing..." (emphasis added) to maintain a loan. The Commission has defined a "full time student in good standing" by regulation to mean that a student must carry at least 12 credit hours per term and maintain at least a 2.0 cumulative grade point average. To date, we can bring into the system approximately $1 million in funds from students whose G.P.A. fell below the minimum or who were not enrolled as full time students as required by statute and regulation. Because final determination of student's "full time/good standing" has not yet been made at the University of Alaska-Fairbanks, the exact dollar amount that will be brought back into the system -- and therefore not requested in the supplemental -- cannot yet be determined. The final, firm numbers will be available by next Friday. I would hope we could delay hearing on this bill until we can determine the actual dollar amount that will be needed to fund the spring and summer terms.

I certainly appreciate your consideration and patience in postponing the hearing scheduled for this Friday. I'm sure you'll agree that the best interests of the state will be served by delaying action on the bill until the final need for state funds is determined.

Thank you.

February 1, 1983

SUBJECT: Members of the State Board of Education

TO: Senator Paul Fischer

FROM: Billy G. Berrier
Director
Division of Legal Services

You have furnished us a copy of an opinion issued by the Department of Law, dated April 10, 1980, which holds that membership on a local school board is incompatible with membership on the State Board of Education.

You have asked whether in our opinion, the same reasoning would apply to teachers.

In my opinion the conclusion reached by the Attorney General is correct and the same reasoning would apply to teachers.

BGB:ljb

MEMORANDUM State of Alaska

TO: Vicki A. Clayman
Special Assistant to the Governor

DATE: April 10, 1980

FILE NO: J-66-568-80

TELEPHONE NO: 465-3666

FROM: AVRUM M. GROSS
ATTORNEY GENERAL

By:
Rodger W. Pegues
Assistant Attorney General

SUBJECT: Holding of incompatible offices by members of Board of Education

You have asked whether members of the state Board of Education may also be members of local school boards. You have also asked whether a conflict exists where a member of the state board is the spouse of the lobbyist for the state association of school administrators.

The rule is that, as a matter of law, dual membership on the state and local boards creates an impermissible conflict of interest but spousal relations must be treated on a case-by-case basis.

The members of the state board are state officials who, collectively, constitute the head of the Department of Education. AS 14.07.075. The department exercises general supervision over the public schools. AS 14.07.020(1). It enters into contractual agreements with local districts. AS 14.07.030(10). It withholds money from districts which do not comply with the state school laws and regulations. AS 14.07.070. The department has the final authority over local school consolidation. AS 14.08.101(b). It controls school bus contracts. AS 14.09.010. In sum, the state board occupies a supervisory position with respect to the local boards, and it would be improper for a member's impartiality to be influenced by dual membership on a local board.

The principles of law related to holding incompatible offices have been articulated as follows:

> Public policy demands that an officeholder discharge his duties with undivided loyalty. The doctrine of incompatibility is intended to assure performance of that quality. Its applicability does not turn upon the integrity of the person concerned or his individual capacity to achieve impartiality, for inquiries of that kind would be too subtle to be rewarding. The doctrine applies inexorably

> if the offices come within it, no matter how worthy the officer's purpose or extraordinary his talent.

3 McQuillin, MUNICIPAL CORPORATIONS § 12.67 at 295-296 (1973) (citation omitted).

> [I]ncompatibility . . . is not simply a physical impossibility to discharge the duties of the two offices at the same time, it is an inconsistency in the functions of the two offices, as where . . . a contrariety and antagonism would result in an attempt by one person to discharge faithfully and impartially the duties of both. The two offices are said to be incompatible when the holder cannot in every instance discharge the duties of each. Incompatibility arises, therefore, from the nature of the duties of the offices . . . where the nature and duties of the two offices are such as to render it improper from considerations of public policy for one person to retain both. The true test is whether the two offices are incompatible in their nature, in the rights, duties, or obligations connected with or flowing from them.
>
> * * *
>
> Neither is it pertinent to say that the conflict in duties may never arise, it is enough that it may, in the regular operation of the statutory plan. Nor is it an answer to say that if a conflict should arise, the incumbent may omit to perform one of the incompatible roles. The doctrine was designed to avoid the necessity for that choice.

Id., at 297 (citations omitted).

In Anderson v. City of Parsons, 496 P.2d 1333, 1336 (Kan. 1972), the court articulated the rule to be:

> [A] public officer owes an undivided duty to the public whom he serves and is not permitted to place himself in a position that will subject him to conflicting duties . . . .

A member of the state Board of Education places himself in just such a position if he is also an officer of a local district. His duty as the former is to the state at large; */ his duty as the latter is to his district. It makes no difference that the person involved is capable of conscientiously wearing both hats. The public is entitled not only to the actuality of undivided loyalty but also its appearance. People v. Rhodes, 524 P.2d 363 (Cal. 1974); 67 C.J.S. Officers § 27 (1978); cf., Begich v. Jefferson, 441 P.2d 27 (Alaska 1968).

Accordingly, we must conclude that a person may not serve on both the state board and a local board.

Whether the spouse of a lobbyist for an association of school officials may serve on the state board presents a different question. There is no holding of incompatible offices by the member here. Rather, the situation is that each spouse is holding an office which could not be held by the same person. As a matter of law, the existence of the spousal relationship does not, in most instances, disqualify one from offices. **/ A judge's spouse may be an attorney; but the judge could not in ordinary circumstances sit on a case in which the spouse was an attorney of record. In the situation you describe, it seems that the spouses' activities are not so inextricably and continuously interconnected that the appearance of a conflict of interest would be inescapable. If this is so, then the board member is not necessarily disqualified.

Under the legal principles enunciated above, the public is entitled not only to the actuality of the member's undivided loyalty but also its appearance. Accordingly, the board member must be particularly sensitive to any appearance of impropriety and should not hesitate to abstain from participating in matters where there might be a conflict of interest.

RWP/pjg

---

*/ Members of the state board are selected on a geographic basis so that all areas of the state are represented. That a member is selected from an area makes him no less responsible to the public as a whole.

**/ Of course, the fact of being married or unmarried can have no bearing legally on one's qualifications for a position. AS 18.80.220.

Rep. Tricker

Re: Confirmation Hearings Scheduled for Monday, 2-14-82
Resume's attached

The attachments are resume's regarding the Governor's appointments to the State Board of Education. This meeting has been scheduled for joint conference with the Senate HESS Committee on Monday, February 14, 1982 in the Senate Finance room.

The only resume' unavailable at this time is that of Mr. Barney Gottstein. Mr. Gottstein is also out of the state presently and will not be able to attend the confirmation hearings scheduled for Monday. The Board of Education is meeting in Jundau on the 14th and 15th of next week; consequently the other appointees will be in attendance at the joint hearing.

SULTANT:

University of Alaska Biomedical Satellite Communications Program
University of Alaska BIA School Board Training Program

LOYMENT HISTORY:

June 1977 to Present

President, Sam Kito, Jr. & Associates. I have provided services as a consultant/lobbyist to corporations and organizations providing expertise in cultural, social and economic development in the rural areas of the State. I have served as a consultant to the following companies: ALASCOM, Inc., Alaska 100 Insurance, Inc., Morrison-Knudsen Company, Inc., Doyon, Ltd., Goldbelt, Inc., Alaska Federation of Natives, Arctic Slope Regional Corporation, Alaska 1984, Cook Inlet Region, Inc., Sealaska, Inc.

June 16, 1975 to June, 1977:

President, Alaska Federation of Natives, Inc., Anchorage, Alaska. My duties were overall administrative responsibility for all employees of AFN, Inc. I had under my direction all departments of AFN, Inc., which included Land Claims, Human Resources, Technical Assistance, Alaska Student Higher Education Services, Health Careers, Bush Justice, Accounting and the Office of Minority Business Enterprises.

March 1973 to June 15, 1975

Executive Vice President of Doyon, Ltd.; Fairbanks, Alaska. My duties were overall administrative responsibility for all employees of Doyon, Limited. Under my direction were the departments of Land, Community Services, Finance, Legal, Administrative and Economic Development.

PLOYMENT HISTORY: (cont.)

February 1972 to March 1973

Executive Director of the Tanana Chiefs Conference, Fairbanks, Alaska. My duties were overall administrative responsibility for all employees in all programs contracted by the Tanana Chiefs Conference. There were 30 full-time employees under my direction. During this period, Doyon, Limited, contracted all implementation functions of the Alaska Native Claims Settlement Act to the Tanana Chiefs Conference.

June 1971 to February 1972

Executive Director of the Fairbanks Native Association, Fairbanks, Alaska. My duties were overall administrative responsibility for all programs administered by the FNA. These included a $193,000 Monel Urban Indian Center Grant, a $284,000 BIA general assistance contract, and a contract for the Boarding Home Program. I was responsible for implementing the programs as outlined by the Model Urban Indian Center grant. There were 18 full-time employees and 6 part-time employees under my direction.

August 1967 to June 1971

Operations Controller for RCA Service Company, Gilmore Creek, Fairbanks. Duties were the overall administative and technical responsibility for group activities. This included delegating work assignments, supervising activities and providing technical assistance when required. Technicians under my direction operated and maintained unique ground equipment for Nimbus weather satellites.

May 1966 to August 1967

Leader Test and Validation Activity, RCA Service Company, Kennedy Space Center Communications Project, Merritt Island, Florida. My duties were the overall administative and technical responsibility for group activities. This included delegating work assignments supervising activities, and providing technical assistance when required. Technicians under my direction were responsible for the operation and maintenance of all voice, data, and A2A video wide band circuits and equipment at the Kennedy Space Center.

August 1962 to May 1966

RCA Service Company, Anchorage, Alaska--White Alice Project. My duties were the operation and maintenance of REL-39 Tropospheric Scatter Transmitters and Receivers and associated carrier equipment and systems.

Prior to my employment in the White Alice Project, I attended school.

Was responsible for arranging regular in-service staff orientation and training programs for the continual proficiency and efficiency in providing the ultimate services, services to the elderly. Maintained liaison and communications with Mauneluk Association, Offices of the State of Alaska, Bureau of Indian Affairs, Indian Health Services, Public Health Services and related organizations to help develope resources and programs for the Elderly including Public relations, Recruitment, consumer education, training, technical assistance and appropriate reporting and accountability of the Center's operation. Performed other duties as they arise.

R E S U M E

Name: Mary J. Schaeffer
Age: 52 (Born at Kotzebue 6-7-40)
Marital Status: Married 12-25-59; we have nine children (five own and four foster)

Education:
Completed High School: 4 years Mt. Edgecumbe High School, Sitka, Ak.

Language Skills:
Speaks fluent English and Eskimo (Inupiak)

Cultural Background:
I was raised in the Village of Noatak until I was 11 years of age. The main language spoken was the Eskimo language. It was not until we moved to Kotzebue that the English language was mandatory. Our means of trasportation was dogsled in the winter months and boats in the summer. We lived in tents from April until last August gathering food for the winter months.

Employment History:

1. Maunaluk Association: promoted as Vice-President for Management and Planning, December, 1976 provides leadership, guidance and coordination in the planning, development, operation and evaluation of the delivery of services in the areas of Health, Education, Manpower and Planning; develops and demonstrates new methods and techniques for community participation in and management of their health programs; provides consultation and technical assistance in the evaluation, design, and implementation of health management and corporations delivery system; and coordinates health development activities within the Northwestern region directed to the improvement of the health of the people.

2. Hired as an "ONAP" Program Director to initiate efforts of increase the amount of self-determination afforded to the natives of Northwest Alaska with the passage of the Indian Self-Determination Act (P.L. 93-638). Maintain close contact with Bureau of Indian Affairs personnel in Juneau and Nome; act in liason role and close communciation with eleven (11) village Tribal Governing Bodies within the Region; attend Contract Managers Committee meetings within the State of Alaska as a representative of the NANA Region; travel to villages attending Tribal Governing Body Meetings in order to facilitate an exchange of information and ideas on program contracting; hold regional workshops with representatives from each Tribal Governing bodies within the region; help develop contract proposals that reflect self-determination for the design and operation of Bureau of Indian Affairs programs that impact the NANA Region.

Bureau of Indian Affairs (Juneau, Alaska)

Was employed as an Employment Assistance Specialist: opened up a Sub-Agency office in Kotzebue; assisted in the development and carrying out of the program which included Adult Vocational Training; Direct employment and Pipeline hire of Natives within the NANA Region. Travelled to eleven (11) villages within the region and had contact with the village governing bodies.

Bureau of Indian Affairs (Kotzebue, Alaska)

Hired as an Administrative Assistant at the Kotzebue Community School and was reponsible for the upkeep and submitting time and attendance for 107 employees; prepared all personnel action forms; GTR's; maintained records of all requisition for the school operation.

Bureau of Indian Affairs (Nome, Alaska)

Was hired as an Employment Assistance Aide. I interviewed, Screened and counseled Adult Vocational Training and Direct Employment Clients interested in securing training or employment. Contracted and made all necessary travel and medical arrangements; compiled all monthly and yearly reports and acted as an Employment Assistance officer in the absence of the officer making decisions based on my knowledge.

Bureau of Indian Affairs (Anchorage, Alaska)

Was hired as a clerk (IMF) in the Realty Branch. Typed documents on Native allotments; townsite lots; homestead, and maintained files on reports; record books on Native allotments, also made decisions in the absence of the Realty Officer based on my knowledge.

Bureau of Indian Affairs (Nome, Alaska)

Was hired as a clerk (IMF) and worked in the clerical field maintaining files on Tribal Operations; Realty and Civil Services records; typed necessary correspondence and helped with draft resolutions for the governing bodies within the Bering Straits and NANA Region.

Public Health Service (Kotzebue, Alaska)

Was hired as a Dental Assistant in Kotzebue on temporary basis. Worked closely the dentist, chairside assisting, patients preparatory work; sterilizing instruments; daily reports and giving as many children as we can flouride treatments.

Voluntary Work:

Helped at the elders workshop sponsored by NANA Region Corporation gathering Eskimo history to preserve our cultural heritage. Helped translate in the Eskimo Language workshop conducted by the NANA Retional Corporation, in village hearings on important issues such as the Caribou Disaster; Alaska Land Claims implementation, Etc.

Civic Organizations:

Secretary, newly organized Regional School Board created under Senate Bill 35.

REPORT ADDRESS AND TELEPHONE CHANGES PROMPTLY

AS 39.05.100 requires that a person appointed to a board or commission be a registered voter before the last general election.

Are you a registered voter? ☒ YES ☐ NO

Voter Registration Number (Optional) —

Social Security Number (Optional) 529-80-8187

Have you ever been convicted of a misdemeanor within the past five years or a felony within the past ten years? ☐ YES ☒ NO

If "YES", explain the circumstances on a separate sheet of paper and attach it to this application. A conviction is not necessarily grounds for disqualification. The number of convictions, nature, recency and relationship to the board position applied for will be evaluated and a determination will be made after a review of all relevant facts.

A policy in the Governor's Office pertaining to boards and commissions is that a member attend at least 75% of the meetings. Are there any circumstances in either your professional or personal life which would prevent you from participating at the required authorized meetings? ☐ YES ☒ NO

If "YES", explain on a separate sheet of paper and attach to this application.

This position may require that the member travel to either urban or rural (or both) areas. Are there any circumstances which would prevent you from participating?

No

CONFLICTS OF INTEREST: Certain Boards and Commissions require full disclosure of personal financial data under AS 39.50.010. If required for the Board or Commission for which you are applying, are you willing to do so? ☒ YES ☐ NO

Could you or any member of your family be affected financially be decisions to be made by the Board or Commission for which you have applied?

☐ YES ☒ NO If "YES", explain

The Office of the Governor will not discriminate against an applicant for a Board or Commission based on Sex, Age, National Origin, Marital Status, Pregnancy, Handicap, Religion or Parenthood.

COMMENTARY AND SECTIONAL ANALYSIS FOR THE PROPOSED CS FOR HOUSE BILL 117 (HEALTH, EDUCATION AND SOCIAL SERVICES); A BILL RELATING TO SEXUAL ABUSE OF A MINOR

Section 1. AS 11.41.430, Sexual Abuse of a Minor In the First Degree.

This section creates a new classification of offense, Sexual Abuse of a Minor in the First Degree. The section prohibits sexual penetration with a person who is under the age of 13 and at least three years younger than the actor. It also prohibits sexual penetration with a person under 18 who is entrusted to the actor's care by authority of law or because the person is his son or daughter, including illegitimate or adopted children and stepchildren.

Basically, this provision covers conduct which is currently classified as Sexual Assault in the First Degree, but the language here adds the requirement of a three year age difference between the actor and the victim. This requirement is added to ensure that a child who engages in sexual play with another child of the same age level could not be charged with a felony. (Such behavior may in some circumstances be cause for parental concern, but it is not considered appropriate or useful to classify it as a crime.) Forcible sexual penetration of any person, including a child, would continue to be punishable as Sexual Assault in the First Degree (AS 11.41.410), an unclassified felony.

The language in this section addresses a problem which has arisen under the present sexual assault laws by deleting the requirement that the actor be 16 years of age or older. The provisions of the law are thus made applicable to juvenile offenders. This is important; studies of adult sexual offenders indicate that many convicted offenders began to commit sexual assaults in their early teen years. Early identification and treatment of juvenile sexual offenders may ultimately decrease the number of adult offenders.

Sexual Abuse of a Minor in the First Degree is a class A felony offense. It carries a maximum sentence of up to 20 years in prison, and a presumptive term of five years upon conviction for a first offense.

Section 2. AS 11.41.435, Sexual Abuse of a Minor in the Second Degree.

This section creates a new classification of crime, Sexual Abuse of a Minor in the Second Degree. It includes the offenses found in the current Sexual Abuse of a Minor statute (AS 11.41.440), with the addition of the requirement that the

actor be at least three years older than the victim. This language exempts teenagers who have consensual sexual relations with other teens near their own age (a 17-year-old boy and his 15-year-old girlfriend, for example) from prosecution. As in Section 1, above, the amendment deletes the requirement that the actor be 16 years of age or older, thus making the statute applicable to juvenile offenders who assault children much younger than themselves--the babysitter/toddler situation, for example.

Paragraph 3 creates a new offense to address an omission in the current law. Under current law sexual contact by a parent or guardian with his own child is prohibited only if the child is under 13 (a class C felony) or under 16 (a class A misdemeanor). Since fondling of a child's genitals or breasts by a parent is a serious violation of the trust and authority relationships within a family, and is often the precursor of a more serious assault, this provision raises to the age of 17 those children who are protected under the law. This conduct is a class B felony offense, punishable by up to ten years in prison.

Section 3. AS 11.41.440, Sexual Abuse of a Minor in the Third Degree.

This section creates a new classification of offense entitled Sexual Abuse of a Minor in the Third Degree. Basically, this is the current Contributing to the Delinquency of a Minor statute raised from its present classification as an A misdemeanor to a class C felony offense. Class C felonies are punishable by up to five years in prison.

Staff Report
House bills 117,127,128
January 27, 1983

HB 117:

11.41.440

Under current statute, sexual abuse of a minor under 16 years of age is a class C felony.

As proposed by HB 117:

1. Sexual abuse of a minor under 13 years of age is a offense in the first degree and is a class B felony.

2. Sexual abuse of a minor aged 13 to 16 is sexual abuse in the second degree and is a class C felony.

HB 127:

12.55.125

Under current statute, the first felony conviction for sexual assault in the first degree, not involving firearms, use of a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 8 years. The proposal will change that sentence to 10 years.

Under current statute, the first felony conviction for sexual assault in the first degree involving firearms, a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 10 years. HB 127 changes that sentence to 12 years.

11.66.110

HB 128:

Under current statute, promoting prostitution is a class B felony. HB 128 provides that inducing or causing a person under 16 years of age to engage in prostitution is a class A felony.

ALASKA NETWORK ON DOMESTIC
VIOLENCE AND SEXUAL ASSAULT

P.O. BOX 809

JUNEAU, ALASKA 99802
586-3650

HB 53

POSITION PAPER
HB117: An Act relating to sexual abuse of a minor

The Alaska Network on Domestic Violence and Sexual Assault is a non-profit corporation composed of twenty-one programs statewide that provide domestic violence, sexual assault, and adult crisis intervention services to members of their respective communities. Network programs are funded in part through grants and contracts awarded by the Council on Domestic Violence and Sexual Assault.

The Network was established in 1978, and has as one of its primary focuses the elimination of domestic violence and sexual assault through provision of shelter, advocacy, and education/prevention services.

The Network maintains that, in cases involving sexual abuse of a minor, sexual contact and penetration are equally serious offenses that should be incorporated in the same felony classification.

The Network would strongly support a comprehensive overview of current statutes governing the prosecution, sentencing, and treatment of persons charged and convicted of sexual abuse of a minor.

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 117 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act revising the laws relating to sexual abuse of a minor."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 11.41 is amended by adding new sections to read:

Sec. AS 11.41.435. SEXUAL ABUSE OF A MINOR IN THE FIRST DEGREE. (a) A person commits the crime of sexual abuse of a minor in the first degree if

(1) that person engages in sexual penetration with a person who is under 13 years of age and at least three years younger than the offender or aids, induces, causes, or encourages a person who is under 13 years of age and at least three years younger than the offender to engage in sexual penetration with another person; or

(2) being 18 years of age or older, that person engages in sexual penetration with a person who is under 18 years of age and who

(A) is entrusted to that person's care by authority of law; or

(B) is that person's son or daughter, including an illegitimate or adopted child, or a stepchild.

(b) Sexual abuse of a minor in the first degree is a class A felony.

Sec. 11.41.437. SEXUAL ABUSE OF A MINOR IN THE SECOND DEGREE. (a) A person commits the crime of sexual abuse of a minor in the second degree if

(1) that person engages in sexual contact with a person who

is under 13 years of age and at least three years younger than the offender, or aids, induces, causes, or encourages a person under 13 years of age and at least three years younger than the offender to engage in sexual contact with another person;

(2) being 18 years of age or older, that person engages in sexual contact with a person who is under 18 years of age and who

(A) is entrusted to that person's care by authority of law; or

(B) is that person's son or daughter, including an illegitimate or adopted child or stepchild; or

(3) that person aids, induces, causes, or encourages a person who is 16 years of age or younger to engage in conduct described in AS 11.41.455(a)(2)—(6).

(b) Sexual abuse of a minor in the second degree is a class B felony.

* Sec. 2. AS 11.41.440 is repealed and reenacted to read:

~~Sec. 11.41.440. SEXUAL ABUSE OF A MINOR IN THE THIRD DEGREE.~~ (a) ~~A person commits sexual abuse of a minor in the third degree if~~

(1) that person engages in sexual penetration with a person who is aged 13, 14, or 15, and at least three years younger than the offender, or aids, induces, causes, or encourages a person who is aged 13, 14, or 15, and at least three years younger than the offender to engage in sexual penetration with another person;

(b) ~~Sexual abuse of a minor in the third degree is~~ a class C felony.

* Sec. 3. AS 11.41.410(a)(4) is repealed.

DEPT. of LAW
3/25/83

COMMENTARY AND SECTIONAL ANALYSIS FOR THE PROPOSED 1983 AMENDMENTS TO ALASKA'S LAWS RELATING TO SEXUAL ASSAULT AND SEXUAL ABUSE OF A MINOR

Section 1. AS 11.41.410, Sexual Assault in the First Degree.

This section repeals subsections (a)(3) and (4) of the Sexual Assault in the First Degree statute. These subsections are reclassified in section 3, below, as Sexual Abuse of a Minor in the First Degree.

Section 2. AS 11.41.420, Sexual Assault in the Second Degree.

This section accomplishes two things. It amends the current Sexual Assault in the Second Degree statute to define the crime as "sexual contact with another person without consent of that person." The amended language is consistent with that used in the Sexual Assault in the First Degree statute, which prohibits sexual penetration without consent. Under the current Sexual Assault in the Second Degree law the prosecutor must prove that the victim was "coerced" to submit to the sexual contact by the express or implied threat of imminent death, imminent physical injury, or imminent kidnapping. Technically, the defendant's use of force without any threats may not be sufficient to establish this crime; felony charges have been lost through a literal application of these terms.

The second change which this section makes is to raise the current class C felony offense of Sexual Assault in

the Third Degree, penetration with a person who is suffering from a mental defect or is incapacitated, to Sexual Assault in the Second Degree, a class B felony punishable by up to ten years in prison.

Section 3. AS 11.41.430, Sexual Abuse of a Minor In the First Degree.

This section creates a new classification of offense, Sexual Abuse of a Minor in the First Degree. This new crime prohibits sexual penetration with a person who is under the age of 13 and at least three years younger than the actor. It also prohibits sexual penetration with a person under 18 who is entrusted to the actor's care by authority of law or because the person is his son or daughter, including adopted, illegitimate or stepchildren. Basically, this provision covers conduct which is currently classified as Sexual Assault in the First Degree, but the language here adds the requirement of a three year age span between the actor and the victim. This requirement is added to ensure that a child who engages in sexual play with another child of the same age level could not be charged with a felony. Such behavior may in certain circumstances be cause for parental concern, but it is not considered appropriate or useful to classify it as a crime. Forcible sexual penetration of any person, including a child, would continue to be punishable as Sexual Assault in the First Degree, an unclassified felony.

These amendments address a serious omission in the present sexual assault laws by deleting the requirement that the actor be 16 years of age or older. The section is thus made applicable to juvenile offenders. This is an important consideration, as some studies of adult sexual offenders indicate that the offenders began to sexually assault in their early teen years. Early identification and treatment of juvenile sexual offenders may ultimately decrease the number of adult offenders. Sexual Abuse of a Minor in the First Degree is a class A felony offense. It carries a maximum sentence of up to 20 years in prison, and a presumptive term of five years upon conviction for a first offense.

Section 4. AS 11.41.435, Sexual Abuse of a Minor in the Second Degree.

This section creates a new classification of crime, Sexual Abuse of a Minor in the Second Degree. This includes the offenses found in the current Sexual Abuse of a Minor statute (AS 11.41.440), with the addition of the requirement that the actor be at least three years older than the victim. This language exempts teenagers who have consensual sexual relations with other teens near their own age (a 17 year old boy and his 15 year old girlfriend, for example) from prosecution for a felony. As in Section 3, above, the amendment deletes the requirement that the actor be 16 years of age or older, thus

making the statute applicable to juvenile offenders who assault children much younger than themselves--the babysitter/toddler situation, for example.

Subsection 3 creates a new offense to address an omission in the current law. Under current law sexual contact by a parent or guardian with his own child is prohibited only if the child is under 13 (a class C felony) or under 16 (a class A misdemeanor). Since fondling of a child's genitals or breasts by a parent is a serious violation of the trust and authority relationships within a family, and is often the precursor of more serious sexual conduct, this provision raises the age of children covered to 17, and makes this conduct a class B felony offense punishable by up to ten years in prison.

Section 5. AS 11.41.440, Sexual Abuse of a Minor in the Third Degree.

This section creates a new classification of offense entitled Sexual Abuse of a Minor in the Third Degree. Basically, this is the current Contributing to the Delinquency of a Minor statute raised from its current classification as an A misdemeanor to a class C felony offense. Class C felonies are punishable by up to five years in prison.

Section 6. AS 11.51.130(a)(4), Contributing to the Delinquency of a Minor.

Section 6 repeals the "sexual contact" subsection of the present Contributing to the Delinquency of a Minor statute. The seriousness of this conduct has been increased in Section 5, above, to Sexual Abuse of a Minor in the Third Degree, a class C felony.

Section 7. AS 11.41.460, Indecent Exposure.

This section creates a new crime entitled Indecent Exposure, which is the intentional exposure of a person's genitals, buttock, anus or female breast to another person with reckless disregard for the offensive, insulting or frightening effect that the exposure that might have on the other person. Under current law this conduct is considered "Disorderly Conduct", a class B misdemeanor offense with a maximum penalty of ten days in jail. Some recent studies indicate that exposure is sometimes the first step for sex offenders who later increase the seriousness of their conduct to sexual contact or penetration. The current law treats this behavior much too leniently. This section raises the classification of Indecent Exposure to an A misdemeanor level if the object of the exposure is a child under the age of 16. The offense

remains a B misdemeanor if the witness to the exposure is an adult.

Section 8. AS 11.61.110(a)(7), Disorderly Conduct.

Section 8 repeals the current "exposure" subsection of the Disorderly Conduct statute. This conduct is included in the Indecent Exposure provisions set out in section 7.

Section 9. AS 12.10.020, Specific Time Limitation.

This section creates an exception to the general five year statute of limitations (AS 12.10.010) to allow prosecution for a sexual offense against a child to be commenced within one year after the child reaches the age of 16, or reports the crime to a law enforcement officer, whichever occurs first. The period of limitation cannot be extended by more than ten years, however. This change is necessary because sexual offenses against young children (especially intrafamilial abuse) are frequently not discovered until the child reaches sufficient maturity to realize the wrongfulness of the conduct and to identify those adults to whom the conduct may safely be reported. A child of 12, 13 or 14 will often report for the first time sexual abuse which has been occurring since he or she was 4 or 5 years old. While the most recent assaults may be prosecuted, these offenses may be classified as less serious

than the earlier ones, because of the child's older age. In those situations where the sexual abuse has been a continuing course of conduct which spans several years of a child's life the trier of fact should be entitled to reach and consider all aspects of the adult's conduct.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 117 Date on Bill: 1/26/83
Title: An Act Relating to sexual abuse of a minor
Sponsor: Representative Pestinger
Requestor: House HESS

Dave Palmer

Brenda Stephens
Box 699
Soldotna, Ak. 99669
262-4643

FEB 21 1983

I would like to see stronger support for changes in our state statutes regarding sexual abuse of minors.

I realize that statistics can be used in a variety of ways. This is a problem that I see first-hand, not as statistics in my local paper. I work as a crisis volunteer for the women's center in Soldotna and see a need for more teeth in our laws protecting our young people from abusive adults.

I urge you to consider the recommendations made by Gayle Horetski to the House Health, Education and Social Services Committee.

Please, let's protect our young people.

Brenda Stephens

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The enactment of House Bill No. 117 will result in changing the offense of sexual abuse of a minor who is under 13 years of age from a Class C to a Class B felony. Conviction for this offense will result in longer sentences.

For purposes of this fiscal analysis, the following information was used:

1. There have been approximately 45 convictions annually for the crime of sexual abuse of a minor.
2. An assumption is made that 22 (approximately 50%) of the current convictions would be for the crime of sexual assault of a minor under 13 years of age.
3. Sentencing data for Class B and C felonies is not available by offense. Therefore, the data available for sentencing by class has been applied in this note. Therefore:

    a. There will be an increase in time served by convicted offenders of 1.08 years, the current difference between Class B and Class C average length of sentence served.

b. The effect would begin near the end of the first year the law is in effect as the average time sewed for a Class C felony is .8 years.
c. 60% of the persons convicted of a Class B felony actually serve time.

Therefore, the impact on the state correctional system will be the need for approximately 14 additional beds. (22 convictions x 60% receiving jail sentences x 1.08 additional years = 14.2 beds.) The cost of the beds is estimated to be: 14 x $146,000 (medium security bed cost) = $2,044,000.

It is assumed these beds would be added to those identified in other fiscal notes. Also, because of construction time, they would not be available for occupancy until FY 1986. Personnel Service costs are not identified until that time.

In estimating personal services costs, it is assumed 1 staff person will be required for every 2.5 inmates. Fourteen beds would require 5.6 positions. An average FY 1984 position cost of $44,000 (plus inflation) was used to project personal services costs. The final staffing of a correctional facility cannot be determined until it has been designed, and the staffing would be influenced by such factors as total bed capacity, floor plan for security, and programs to be provided as a part of rehabilitation.

CHILD PORNOGRAPHY

Q. What is the history behind the development of child pornography?

A. Throughout history children were exploited, sold and even killed. Sex between male adults and children had been sanctioned, or at the very least, tolerated as seen in institutions of slavery, prostitution and pornography. In the late 19th and early 20th centuries, western society was obsessed with the image of the pure, innocent, sexless little girl. The Arts were used to make the sexual use of children more acceptable. Florence Rush, noted author of a book on child sexual abuse, believes the frequent use of child sexuality by nineteenth-century authors contributed to the real use, abuse and sexual manipulations of children.

Q. What is the situation today? Certainly we have protection from the exploitation of children.

A. Today we expect the adult world to protect the young from sexual exploitation. Meanwhile, this society normalizes and accepts the exploitation of women in all forms of media. The last few years have brought much needed attention to the growing problem of child pornography, and fairly quick action has been taken by legislatures in our country. It is easier for us to become outraged by what is happening to young children than by what happens to grown women. We forget that young girls grow up to be women. About the time they re_h the age of consent, what protection there is stops and the legalized exploitation starts again.

Q. What exactly is happening in the child pornography industry? What do they do with these kids?

A. Until recently, much of child porn sold in America was smuggled from abroad, but now most of it originates here.

Robin Lloyd, reporter and author of *For Money or Love*, a book on boy prostitution, collected 264 different child-porn magazines, each costing an average of seven dollars. *Where the Young Ones Are*, a sex guide for pedophiliacs (pedophilia: sexual perversion in which children are the preferred sexual object), contains a listing of 378 places in fifty-nine cities where the young (sexual partners) can be found, and has sold over 70,000 copies. Also, publications advertise films entitled "Infant Love," "Children and Sex," "Little Girls," etc., in which one can see spread shots of children from 6 to 13 as they perform oral sex.

With little difficulty one can obtain *Lollitots*, which introduced Patti, "the most erotic ten-year-old you'll ever meet," or *Little Girls*, which offers pictures of ten and twelve-year-olds in intercourse with adult males. For $45 one can purchase a film in living color and see a nine-year-old in a variety of sex acts with two Arab boys, then with an adult.

Yes, child pornography is very big business. According to researchers and reporters, child models are not difficult to recruit. Many magazine publishers and film producers use their own children; others advertise to parents.

In the book "Take Back the Night – Women on Pornography" we are told, "A recent advertisement in Al Goldstein's magazine *Screw* offered $200 for young girl-child models. It brought dozens of responses from parents with female children.

A writer who followed up the ad reports: "Some parents appeared in the movie with their children; others merely allowed their children to have sex. One little girl, age 11, who ran crying from the bedroom after being told to have sex with a man of 40 protested, 'I can't do it.' 'You have to do it,' her parent answered. 'We need the money.' And, of course the little girl did."

Q. Exactly, how big is child pornography and why don't we know more about it?

A. The kiddy-porn industry is extremely clandestine – secretive, illegitimate and sly. Most statistics therefore are a loose approximation. In the opinion of Florence Rush, former social worker and author of a book on child sexual abuse, *The Best Kept Secret* – the numbers I quote here "represent only the tip of the iceberg."

FACT: Of the $2.5 billion porn industry, about $1 billion is from kiddy porn.

FACT: In 1975, Houston police uncovered a warehouse filled with child pornography, and among the collection were 15,000 color slides of children, 1,000 magazines, and thousands of reels of film.

FACT: At Crossroads Store in New York City, a group of investigators found, among the usual displays of *Lollitots, Moppets*, and other kiddy porn magazines, nineteen films on kiddy porn, and an additional sixteen on incest alone.

FACT: One and half million children under sixteen are used annually in commercial sex (prostitution or pornography).

FACT: Most runaways can survive only as prostitutes or by posing for pornography. Each year there are one million runaways, children whose ages range from eight through eighteen.

FACT: Covenant House in New York City shelters 5,000 runaways each year. Over 2,000 are involved in pornography and prostitution, and of this number, 1,000 are under 12.

FACT: Los Angeles police have estimated that 30,000 children are sexually exploited in Los Angeles alone every year.

Letter From The Editor

ANTI-PORNOGRAPHY AS A MOVEMENT

Diane E.H. Russell, Associate Professor of Social Science at Mills College, and a founding member of Women Against Violence in Pornography and Media, expresses a short-circuiting process that has plagued the issue of pornography. She states "In the case of pornography many people, including feminists, don't allow themselves to contemplate – is pornography a problem? Why does this problem exist? They simply say, 'I'm against censorship of any kind!' And the meaning of the First Amendment becomes the topic of discussion. In this way the freedom of speech issue has been used, not always consciously, to freeze us into saying and doing nothing against pornography." She addresses the need to end the short-circuiting in our thinking and feeling.

There are four distinct and important steps in dealing with any social problem:

First, we need to recognize it, define it, see it.

The second step involves *feeling about the problem* once it is recognized. To simply acknowledge rape, woman-battering, child pornography, and not feel outraged is one kind of unhealthy short-circuiting that goes on.

Third, we need to try to understand the *cause of the problem*, to analyze it, before we collectively take action.

And, finally, there is the question of *what to do about it.*

In the case of pornography, in skipping the first three steps and starting at step four the issue of the pros and cons of censorship or banning comes up, and this is only one of many, many questions.

The anti-pornography movement now realizes that obscenity laws and government control of the pornography industry is not the way to go. Pornography cannot flourish on a mass-marketed, industrial scale without two basic conditions. A culture which crushes human eroticism into the distorted and abusive framework of dominance and submission, creating a demand for pornography rather than erotica ("erotica" is rooted in eros or passionate love, and thus in the idea of positive choice, free will, the yearning for a particular person, from "Erotica and Pornography" article in MS., Nov., 1978 by Gloria Steinem); and free-enterprise capitalism, which will sell anything – even pain – for a profit.

Twentieth century capitalism supplies the means of mass production: efficient media technology, enormous profits for producers, and the freedom to market anything. And in enterprising capitalist nations, the law often follows the profits. Largely free of technological or legal constraints, mass-market pornography has now hit its stride. At $7 billion a year, pornography is not merely a thriving industry, it is an utterly predictable product of free-market capitalism in a technologically advanced sexist society.

What it boils down to is the fact that media affects the way men and women view themselves and each other. *Individually* then we decide if we agree with the images and messages that the media and pornography convey to us. If we don't like what we see, the media violence toward women and children, then we need to understand the established cultural and sexual attitudes that have allowed this to flourish and change them *together!*

The Anchorage Crime Commission – Chamber of Commerce subcommittee on Child Abuse is researching among other things statutes on Commercial Sale to personal consumption of pornography. [Paula M. Haley, Exec. Dir. of S.T.A.R. and Angela M. Rinaldo, past Exec. Dir. are serving on this committee.]

Pornography and the First Amendment

"Congress shall make no law respecting the establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances."
–First Amendment of the United States Constitution

Q. How does the First Amendment affect pornography?

A. Under this amendment, all speech (whether written or oral) is protected from governmental restriction unless proven to be one of the few categories of unprotected speech. Two types of unprotected speech relate to pornography: first, obscenity and second, child pornography.

There is no objective legal test for obscenity. Basically material is obscene if the average person, applying community standards, would find that such material as a whole appeals to prurient, i.e., lustful interests and lacks serious artistic, political or scientific value. There must be a court hearing first to determine if the material is obscene. If the court finds the material to be obscene, it will be removed from the stores and theaters. Just because one issue of a magazine is proven to be obscene does not mean that future issues of the magazine cannot be sold. Every new magazine issue, book or movie requires a separate court determination of obscenity.

In 1982, the United States Supreme Court added a new category of unprotected speech – child pornography, i.e., material that visually depicts sexual conduct by children. The legal procedure would be similar to the obscenity cases. The material cannot be forcibly removed from stores and theaters until it is proven.

Because of the importance of the First Amendment freedoms to our society, there can be no prior censorship by the government of anyone's speech. While the First Amendment legal procedure to remove pornography appears cumbersome because it must be repeated for every new pornographic item, the First Amendment also serves as a shield to the anti-pornography movement to protect its right to organize politically and to protest pornography.

Legal Advocate

CHILD SEX RINGS

The Anchorage media has recently grabbed on a theme known only to a few: child and adolescent sex rings. In separate accounts we have heard about attempts to extradite an alleged sex ring organizer from Florida to Anchorage; a Boys Club executive was charged with sexual abuse of minors; and a 19-year-old male charged with larceny claims in his defense that abuse in a prostitution and pornography ring contributed to his delinquent lifestyle. The police officer in charge of these investigations informed the press that only the "tip of the iceberg" has been exposed.

Research is beginning to shed some light on the dynamics of child sex rings. Among the information recently yielded are the following themes:

1) Runaways and kids with vulnerable lifestyles are especially susceptible.

2) Rings involve male victims approximately 3 to 1 over females.

3) Ann Burgess (the researcher who first defined the Rape Trauma Syndrome) has facilitated much recent research and has characterized three different types of sex rings. Two types involve primarily pre-pubecent children, the third and most sophisticated type involves those from puberty through age 18 or 19.

4) Many subtle (and a few not so subtle) methods are used to get victims involved and to force them to maintain secrecy about the rings.

5) The reporting of male victims (at all age levels) of sexual assault is increasing nationwide.

6) Ann Burgess suggests that these male children may be at an equal risk with females for sexual victimization.

Some features of the situations reported in Anchorage raise perplexing questions. In particular, it is noteworthy that disclosures of this victimization are not coming through the typical reporting channels. Instead, most disclosures are coming from a few adolescents already identified or in the custody of juvenile justice authorities. Others have come to light through police investigations resulting from the disclosures of other adolescents. The following are some tough questions that the Anchorage community should be asking itself:

1) Are we asking the right questions in looking at the lifestyles of "kids in trouble?"

2) Are we looking for sexual abuse in the right places?

3) What are the barriers keeping boys from talking about sexual victimization and human service systems from being receptive to hearing it?

4.) What are we doing to give permission to adolescents to talk about this kind of victimization?

5) What have we been doing in the socialization of our male children which keeps them (and us) blind to the risk of their sexual victimization?

–Ralph Brower
Male Education Project Director

JANUARY'S Volunteer of the Month

January's volunteer of the month, Linda Ambrosia, is a familiar face at all volunteer meetings. Linda has been an active S.T.A.R. volunteer for the last 3 years. She consistently takes a high number of hotline hours per month and she is always available to pinch hit for us. Linda is also eligible to be an advocate.

Linda said, "I chose to volunteer for S.T.A.R. because it is a big problem in Alaska. I've been doing crisis work off and on since 1968. I originally joined to work in prevention and when I saw the needs of the victim – I chose to work with hotline. I would like to see this become a **past problem!"**

She also always manages to make the long trek from her home in Eagle River to S.T.A.R. for meetings. Linda works as a substitute teacher. She's married and has one daughter.

Congratulations Linda! ! !

SEXUAL ASSAULT

1982 STATISTICS

The Direct Services unit of S.T.A.R. will be spending time this month compiling S.T.A.R.'s 1982 statistics on sexual assault. The final results will be in your next newsletter and should be interesting.

Special Contributors

Thanks to the following person for her generous donation to S.T.A.R.

Robin Ridder

HOLIDAY THANKS

The entire S.T.A.R. staff would like to thank each of the volunteers who took hotline shifts on Christmas and New Year's. Thanks to you we had 100% volunteer phone coverage. The following volunteers took Christmas and New Year's shifts:

DIANNE TOEBE SUSAN SACALOFF
MARTY KENNEDY JUDY PEACOCK
MARY RUSH DAWN RASMUSSEN
JEANNETTE MORIN
PAM CRAWFORD

We'd also like to thank all of the volunteers who took hotline during the busy month of December. We realize that people have a lot of social engagements during the holidays, and again we had 100% volunteer phone coverage. Thanks!!

MARCH 14, 1983 MEMORANDUM

TO: COMMITTEE ON HEALTH EDUCATION AND SOCIAL SERVICES
ALASKA HOUSE OF REPRESENTATIVES
FROM: PETER GOLL
SUBJECT: HB 117

1 SEXUAL ABUSE OF MINORS SUBJECT TO CUSTODIAL RELATIONSHIP

Currently, sexual abuse of a minor in one's legal custody (step-child, etc.) is not covered by statute unless that minor is under 16 (Class A misdemeanor) or under 13 (Class C felony). A minor between 16 and 18, in the custody of an adult is not protected from sexual contact by the guardian unless there is a close blood relationship (incest).

This is a problem in Alaska, especially for the retarded or socially backward child who fins himself in a no-escape situation under the legal control of an adult.

The matter is omited from HB117. It is addressed on page one (line 20) of the Dept. of Law's draft, and on page two (line 11) of that draft. Wording is inserted in HB117 draft committee subsitute, attached.

On the recommendation of the Department, penetration of a minor in custody is changed from an unclassified felony to a Class A felony.

2 CRIMES COMMITED BY MINORS AGAINST YOUNG CHILDREN NOT ADDRESSED

In HB 117, a person must be 16 years of age or older to be guilty of a violation. Nowhere is the six year old child protected from abuse by a 15 year old baby sitter or his or her friends. Nor is the 6 year old child protected from penetration by one under 16.

To remedy this, one could apply the language found on line 18 of page one of the Department of Law's draft (ie. "at least three years younger"). This would make a crime to commit sexual abuse of a minor three years younger than the offender.

It will also respond to problems of making felons of consenting adolescents.

3. THE DIVISION OF LEGAL SERVICES FINDS INEQUITIES IN SENTENCING IN HB 117

The wording of HB 117 groups sexual penetration of a minor under 13 with sexual contact of a minor under 13. Contact with one under 13 is therefore considered more serious (B felony) than penetration of a minor under 16 (C felony). The Department of Law version separates these offences, making penetration of a minor under 13 a class A felony, and contact with a minor under 13 a B felony as in HB117. The attached draft substitute corrects this problem per recommendation of Department of Law.

COMMENTARY AND SECTIONAL ANALYSIS
FOR THE PROPOSED 1983 AMENDMENTS TO ALASKA'S LAWS
RELATING TO SEXUAL ASSAULT AND SEXUAL ABUSE OF A MINOR

Section 1. AS 11.41.410, Sexual Assault in the First Degree.

This section repeals subsections (a)(3) and (4) of the Sexual Assault in the First Degree statute. These subsections are reclassified in section 3, below, as Sexual Abuse of a Minor in the First Degree.

Section 2. AS 11.41.420, Sexual Assault in the Second Degree.

This section accomplishes two things. It amends the current Sexual Assault in the Second Degree statute to define the crime as "sexual contact with another person without consent of that person." The amended language is consistent with that used in the Sexual Assault in the First Degree statute, which prohibits sexual penetration without consent. Under the current Sexual Assault in the Second Degree law the prosecutor must prove that the victim was "coerced" to submit to the sexual contact by the express or implied threat of imminent death, imminent physical injury, or imminent kidnapping. Technically, the defendant's use of force without any threats may not be sufficient to establish this crime; felony charges have been lost through a literal application of these terms.

The second change which this section makes is to raise the current class C felony offense of Sexual Assault in

the Third Degree, penetration with a person who is suffering from a mental defect or is incapacitated, to Sexual Assault in the Second Degree, a class B felony punishable by up to ten years in prison.

Section 3. AS 11.41.430, Sexual Abuse of a Minor In the First Degree.

This section creates a new classification of offense, Sexual Abuse of a Minor in the First Degree. This new crime prohibits sexual penetration with a person who is under the age of 13 and at least three years younger than the actor. It also prohibits sexual penetration with a person under 18 who is entrusted to the actor's care by authority of law or because the person is his son or daughter, including adopted, illegitimate or stepchildren. Basically, this provision covers conduct which is currently classified as Sexual Assault in the First Degree, but the language here adds the requirement of a three year age span between the actor and the victim. This requirement is added to ensure that a child who engages in sexual play with another child of the same age level could not be charged with a felony. Such behavior may in certain circumstances be cause for parental concern, but it is not considered appropriate or useful to classify it as a crime. Forcible sexual penetration of any person, including a child, would continue to be punishable as Sexual Assault in the First Degree, an unclassified felony.

These amendments address a serious omission in the present sexual assault laws by deleting the requirement that the actor be 16 years of age or older. The section is thus made applicable to juvenile offenders. This is an important consideration, as some studies of adult sexual offenders indicate that the offenders began to sexually assault in their early teen years. Early identification and treatment of juvenile sexual offenders may ultimately decrease the number of adult offenders. Sexual Abuse of a Minor in the First Degree is a class A felony offense. It carries a maximum sentence of up to 20 years in prison, and a presumptive term of five years upon conviction for a first offense.

Section 4. AS 11.41.435, Sexual Abuse of a Minor in the Second Degree.

This section creates a new classification of crime, Sexual Abuse of a Minor in the Second Degree. This includes the offenses found in the current Sexual Abuse of a Minor statute (AS 11.41.440), with the addition of the requirement that the actor be at least three years older than the victim. This language exempts teenagers who have consensual sexual relations with other teens near their own age (a 17 year old boy and his 15 year old girlfriend, for example) from prosecution for a felony. As in Section 3, above, the amendment deletes the requirement that the actor be 16 years of age or older, thus

making the statute applicable to juvenile offenders who assault children much younger than themselves--the babysitter/toddler situation, for example.

Subsection 3 creates a new offense to address an omission in the current law. Under current law sexual contact by a parent or guardian with his own child is prohibited only if the child is under 13 (a class C felony) or under 16 (a class A misdemeanor). Since fondling of a child's genitals or breasts by a parent is a serious violation of the trust and authority relationships within a family, and is often the precursor of more serious sexual conduct, this provision raises the age of children covered to 17, and makes this conduct a class B felony offense punishable by up to ten years in prison.

Section 5. AS 11.41.440, Sexual Abuse of a Minor in the Third Degree.

This section creates a new classification of offense entitled Sexual Abuse of a Minor in the Third Degree. Basically, this is the current Contributing to the Delinquency of a Minor statute raised from its current classification as an A misdemeanor to a class C felony offense. Class C felonies are punishable by up to five years in prison.

Section 6. AS 11.51.130(a)(4), Contributing to the Delinquency of a Minor.

Section 6 repeals the "sexual contact" subsection of the present Contributing to the Delinquency of a Minor statute. The seriousness of this conduct has been increased in Section 5, above, to Sexual Abuse of a Minor in the Third Degree, a class C felony.

Section 7. AS 11.41.460, Indecent Exposure.

This section creates a new crime entitled Indecent Exposure, which is the intentional exposure of a person's genitals, buttock, anus or female breast to another person with reckless disregard for the offensive, insulting or frightening effect that the exposure that might have on the other person. Under current law this conduct is considered "Disorderly Conduct", a class B misdemeanor offense with a maximum penalty of ten days in jail. Some recent studies indicate that exposure is sometimes the first step for sex offenders who later increase the seriousness of their conduct to sexual contact or penetration. The current law treats this behavior much too leniently. This section raises the classification of Indecent Exposure to an A misdemeanor level if the object of the exposure is a child under the age of 16. The offense

remains a B misdemeanor if the witness to the exposure is an adult.

Section 8. AS 11.61.110(a)(7), Disorderly Conduct.

Section 8 repeals the current "exposure" subsection of the Disorderly Conduct statute. This conduct is included in the Indecent Exposure provisions set out in section 7.

Section 9. AS 12.10.020, Specific Time Limitation.

This section creates an exception to the general five year statute of limitations (AS 12.10.010) to allow prosecution for a sexual offense against a child to be commenced within one year after the child reaches the age of 16, or reports the crime to a law enforcement officer, whichever occurs first. The period of limitation cannot be extended by more than ten years, however. This change is necessary because sexual offenses against young children (especially intrafamilial abuse) are frequently not discovered until the child reaches sufficient maturity to realize the wrongfulness of the conduct and to identify those adults to whom the conduct may safely be reported. A child of 12, 13 or 14 will often report for the first time sexual abuse which has been occurring since he or she was 4 or 5 years old. While the most recent assaults may be prosecuted, these offenses may be classified as less serious

than the earlier ones, because of the child's older age. In those situations where the sexual abuse has been a continuing course of conduct which spans several years of a child's life the trier of fact should be entitled to reach and consider all aspects of the adult's conduct.

IN THE _____

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

_____ BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act revising the laws relating to sexual assault and sexual abuse of a minor."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 11.41.410(a)(3) and (4) are repealed.

* Sec. 2. AS 11.41.420 is repealed and reenacted to read:

Sec. AS 11.41.420. SEXUAL ASSAULT IN THE SECOND DEGREE. (a) A person commits the crime of sexual assault in the second degree if he engages in

(1) sexual contact with another person without consent of that person; or

(2) sexual penetration with a person who he knows

(A) is suffering from a mental disorder or defect which renders him incapable of appraising the nature of the conduct under circumstances in which a person who is capable of appraising the nature of the conduct would not engage in sexual penetration; or

(B) is incapacitated.

(b) Sexual assault in the second degree is a class B felony.

* Sec. 3. AS 11.41.430 is repealed and reenacted to read:

Sec. AS 11.41.430. SEXUAL ABUSE OF A MINOR IN THE FIRST DEGREE. (a) A person commits the crime of sexual abuse of a minor in the first degree if THAT PERSON

(1) he engages in sexual penetration with a person who is under 13 years of age and at least three years younger than he THE OFFENDER or

aids, induces, causes or encourages a person who is under 13 years of age and at least three years younger than he to engage in sexual penetration with another person; or

(2) being 18 years of age or older, he engages in sexual penetration with a person who is under 18 years of age and who

(A) is entrusted to his care by authority of law; or

(B) is his son or daughter, including adopted, illegitimate, or stepchildren.

(b) Sexual abuse of a minor in the first degree is a class A felony.

* Sec. 4. AS 11.41 is amended by adding a new section to read:

Sec. 11.41.435. SEXUAL ABUSE OF A MINOR IN THE SECOND DEGREE. (a) A person commits the crime of sexual abuse of a minor in the second degree if

(1) he engages in sexual penetration with a person who is aged 13, 14, 15 or 16, and at least three years younger than he, or aids, induces, causes or encourages a person who is aged 13 14, 15 or 16, and at least three years younger than he to engage in sexual penetration with another person,

(2) he engages in sexual contact with a person who is under 13 years of age and at least three years younger than he, or aids, induces, causes or encourages a person under 13 years of age and at least three years younger than he to engage in sexual contact with another person;

(3) being 18 years of age or older, he engages in sexual contact with a person who is under 18 years of age and who

(A) is entrusted to his care by authority of law; or

(B) is his son or daughter, including adopted, illegitimate, or stepchildren; or

(4) he aids, induces, causes or encourages a person who is 16 years of age or younger to engage in conduct described in AS 11.41.455(a)(2) -- (6).

(b) Sexual abuse of a minor in the second degree is a class B felony.

* Sec. 5. AS 11.41.440 is repealed and reenacted to read:

Sec. 11.41.440. SEXUAL ABUSE OF A MINOR IN THE THIRD DEGREE. (a) A person commits sexual abuse of a minor in the third degree if he engages in sexual contact with a person who is aged 13, 14, 15 or 16, and at least three years younger than he.

(b) Sexual abuse of a minor in the third degree is a class C felony.

* Sec. 6. AS 11.51.130(a)(4) is repealed.

* Sec. 7. AS 11.41 is amended by adding a new section to read:

Sec. 11.41.460. INDECENT EXPOSURE. (a) A person commits the crime of indecent exposure if he intentionally exposes his genitals, buttock, anus or female breast to another with reckless disregard for the offensive, insulting or frightening effect the act may have on that person.

(b) Indecent exposure is a class A misdemeanor if the person before whom the exposure is made is under 16 years of age; otherwise it is a class B misdemeanor.

* Sec. 8. AS 11.61.110(a)(7) is repealed.

* Sec. 9. AS 12.10.020 is amended to add a new subsection to read:

(c) Even if the general time limitation has expired, a prosecution under AS 11.41.410 -- 455 for an offense committed against a person under the age of 18 may be commenced within one year after the crime is reported to a law enforcement official or the person reaches

the age of 16, whichever occurs first. In no case shall this provision extend the period of limitation by more than ten years.

Dear Ms. Bottrell:

Thank you for your extensive comments on CSHB 117.

The House Health, Education and Social Services Committee passed the original HB 117 out of committee at the request of the bill's sponsor.

If House Bill 117 passes both houses it will become law.

Presently the bill is in the House Judiciary Committee and I will forward your comments to Chairman Bussell for the Committee's consideration.

Thank you again for your comments.

Sincerely,

Mae Tischer

21 April 1983

Dear Representatives Tischer and Fritz:

This letter is written in support of CS for House Bill No. 117 (HESS) on behalf of the Fairbanks Inter-Agency Child Sexual Abuse Task Force.

The Task Force is composed of representatives from nearly every agency in this community with any responsibility for dealing with the problem of sexual abuse of our children, including the Fairbanks police department, Alaska State Troopers, Division of Family & Youth Services, WIC-CA, District Attorney's office, Attorney General's office, Family Focus, Community Mental Health, Resource Center for Parents and Children, Tanana Chiefs, and various other community groups who participate on an ad hoc basis. The goal of the Task Force is to promote co-operation and co-ordination among the various agencies who become involved with families where sexual abuse may be occurring. We have been functioning for nearly two years and have seen tremendous changes in the way these cases are handled by the various member agencies.

After reviewing a variety of legislation proposed this session on the subject of sexual abuse of children, the Task Force would like to voice its support for this bill, suggesting only the addition of another group of people to which it should apply. Our collective experience shows that children are often abused by members of their household who are not technically legal custodians or step-parents, but who have assumed the same parenting or caretaking role and who are, therefore, in a position of natural authority over the child.

If the intent of Secs. 11.41.435(a)(2) and 11.41.440(a)(3) is to cover conduct by those persons who abuse this position of trust and authority, then it should not be limited to those with legal authority only. From the child's perspective, it is irrelevant whether the abuser is legally married to the mother or not.

These sections properly cover the situation where the caretaker can substitute this natural authority for the use of force, and the legislation appropirately addresses the seriousness of such abuse. The Task Force proposes, however, that an additional subsection be added to the above sections to include any "caretaker or adult household member in a position of authority or control over the child."

This recommendation is in accordance with the guidelines proposed by the National Legal Resource Center for Child Advocacy and Protection of the

American Bar Association, as set out in their recent publication, "Recommendations for Improving Legal Intervention in Intrafamily Child Sexual Abuse Cases," October, 1982. (It should be pointed out that this position paper has not been voted on by the Board of Governors and thus does not constitute an official policy statement of the ABA)

The proposed provision specifically limits the offender to an adult person in a caretaker position in the home. Older siblings or adult relatives not residing in the home are covered under different statutes. It does, however, address the large category of live-in boyfriends or other caretakers who are in a position to exercise and exploit the same type of parental authority which this legislation already addresses.

Although it is not directly related to this piece of legislation, the Task Force members would also like to take this opportunity to voice concern about the application of the present Statute of Limitations to child sexual abuse cases, and suggest that it be changed so that the State is not legally barred from prosecuting a case just because the offense is more than five years past.

Given that a prominent feature of in-family abuse is that it may not be disclosed for a long period of time, there will be many, many cases where the victim does not even tell anyone until more than five years has passed. Children are legally disabled in so many ways because of their immaturity and inexperience; it would make sense not to impose upon them the legal obligation to report sexual abuse until they are of an age when they can reasonably be expected to report.

The Task Force supports a statutory provision that would toll the Statute of Limitations until the child is of legal age, or some other agreed-upon "age of responsibility" such as 16. Of course, many cases would be, as a practical matter, too stale to prosecute, but the legal bar should not be there, where it is unreasonable to expect reporting. Many of the member agencies would be able to document a significant number of instances where disclosure of abuse came more than five years later, but where the offender was still known to the victim, possibly still in a position to commit other offenses, and where the victim's memory is quite clear.

Thank you for your consideration of the above matters, particularly as it relates to the proposed amendment.

Sincerely,

Jill Bottrell
Member, Fairbanks Inter-Agency Child
Sexual Abuse Task Force

ALASKA NETWORK ON DOMESTIC
VIOLENCE AND SEXUAL ASSAULT

P.O. BOX 809

JUNEAU, ALASKA 99802
586-3650

HB 55

POSITION PAPER
HB117: An Act relating to sexual abuse of a minor

The Alaska Network on Domestic Violence and Sexual Assault is a non-profit corporation composed of twenty-one programs statewide that provide domestic violence, sexual assault, and adult crisis intervention services to members of their respective communities. Network programs are funded in part through grants and contracts awarded by the Council on Domestic Violence and Sexual Assault.

The Network was established in 1978, and has as one of its primary focuses the elimination of domestic violence and sexual assault through provision of shelter, advocacy, and education/prevention services.

The Network maintains that, in cases involving sexual abuse of a minor, sexual contact and penetration are equally serious offenses that should be incorporated in the same felony classification.

The Network would strongly support a comprehensive overview of current statutes governing the prosecution, sentencing, and treatment of persons charged and convicted of sexual abuse of a minor.

Staff Report
House bills 117,127,128
January 27, 1983

HB 117:

Under current statute, sexual abuse of a minor under 16 years of age is a class C felony.

As proposed by HB 117:

1. Sexual abuse of a minor under 13 years of age is a offense in the first degree and is a class B felony.

2. Sexual abuse of a minor aged 13 to 16 is sexual abuse in the second degree and is a class C felony.

HB 127:

Under current statute, the first felony conviction for sexual assault in the first degree, not involving firearms, use of a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 8 years. The proposal will change that sentence to 10 years.

Under current statute, the first felony conviction for sexual assault in the first degree involving firearms, a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 10 years. HB 127 changes that sentence to 12 years.

HB 128:

Under current statute, promoting prostitution is a class B felony. HB 128 provides that inducing or causing a person under 16 years of age to engage in prostitution is a class A felony.

MARCH 14, 1983 MEMORANDUM

TO: COMMITTEE ON HEALTH EDUCATION AND SOCIAL SERVICES
ALASKA HOUSE OF REPRESENTATIVES
FROM: PETER GOLL
SUBJECT: HB 117

1 SEXUAL ABUSE OF MINORS SUBJECT TO CUSTODIAL RELATIONSHIP

Currently, sexual abuse of a minor in one's legal custody (step-child, etc.) is not covered by statute unless that minor is under 16 (Class A misdemeanor) or under 13 (Class C felony). A minor between 16 and 18, in the custody of an adult is not protected from sexual contact by the guardian unless there is a close blood relationship (incest).

This is a problem in Alaska, especially for the retarded or socially backward child who fins himself in a no-escape situation under the legal control of an adult.

The matter is omited from HB117. It is addressed on page one (line 20) of the Dept. of Law's draft, and on page two (line 11) of that draft. Wording is inserted in HB117 draft committee subsitute, attached.

On the recommendation of the Department, penetration of a minor in custody is changed from an unclassified felony to a Class A felony.

2 CRIMES COMMITED BY MINORS AGAINST YOUNG CHILDREN NOT ADDRESSED

In HB 117, a person must be 16 years of age or older to be guilty of a violation. Nowhere is the six year old child protected from abuse by a 15 year old baby sitter or his or her friends. Nor is the 6 year old child protected from penetration by one under 16.

To remedy this, one could apply the language found on line 18 of page one of the Department of Law's draft (ie. "at least three years younger"). This would make it a crime to commit sexual abuse of a minor three years younger than the offender.

It will also respond to problems of making felons of consenting adolescents.

3. THE DIVISION OF LEGAL SERVICES FINDS INEQUITIES IN SENTENCING IN HB 117

The wording of HB 117 groups sexual penetration of a minor under 13 with sexual contact of a minor under 13. Contact with one under 13 is therefore considered more serious (B felony) than penetration of a minor under 16 (C felony). The Department of Law version separates these offences, making penetration of a minor under 13 a class A felony, and contact with a minor under 13 a B felony as in HB117. The attached draft substitute corrects this problem per recommendation of Department of Law.

SCHOOL CLOSURE DAYS

Having been an active teacher in Alaska for the past 23½ years, I have personally seen many days when schools have remained opened simply to meet the mandate of "student in session days", when it was clearly obvious that in doing so, the health and safety of many individual students were being compromised.

The superintendent of school districts needs to be able, at least on a limited basis, to provide school closure days, when in their opinion the health and safety of students may be jeopardized by requiring student attendance. (Example: days with extreme weather conditions, breakdown of school heating system, loss of electrical power, possible bomb threats, or other unforseen threats to health and safety conditions).

I might note that as a classroom teacher, I found that classroom procedures and general learning experiences are best retained by using normal procedures for missed work, instead of trying to make up missed work by holding school on Saturdays or extending school days on the end of the regular school year.

A personal example I might cite is: during one such day last year, I know of five automobile accidents involving students trying to get to school under extreme icy road conditions. School was held all that day with only 15-20% of the students present, and therefore, no regular classroom type instruction took place. The only purpose or value in holding school that day was to satisfy a requirement under State law. I might also add that the Matanuska-Susitna Borough is also being sued at this time over a bus accident that took place on a day when road conditions were extremely icy.

From: Rep Larson

Summary: Hb 125 by Larson

"An Act relating to 'emergency closure days' in response to a threat to the health or safety of students."

Section 1 AS 14.03.030- Public Schools Generally, School Term

THis section is amended by adding a new subsection providing for "(2) an 'emergency closure day' may be substituted for a day in session because of conditions posing a threat to the health or safety of students."

Substitution of an emergency closure day would be subject to the approval of the Commissioner of Education, and the proposed new law does not specify a maximum allowable number of days.

The law currently requires that the school term in Alaska include at least 180 days in session, except that subject to approval of the Commissioner, up to 10 days of in-service teacher training may be substituted for required school days.

This legislation does not provide for an effective date, therefore, the bill would be effective 90 days after the Governor's signature.

HOUSE BILL NO. 125

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to 'emergency closure days' in response to a threat to the health or safety of students."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.03.030 is amended to read:

Sec. 14.03.030. SCHOOL TERM. The school term begins and ends on the dates fixed by the governing body of the school district. However, the term shall include not less than 180 days in session, except that, subject to the approval of the commissioner [,]

(1) a day used for in-service training of teachers may be substituted for a day in session, up to a maximum of 10 days; and

(2) an "emergency closure day" may be substituted for a day in session because of conditions posing a threat to the health or safety of students.

INSERT:

...providing, however, that such conditions that pose a threat to the health or safety of students commenced or occurred after school has commenced for the day.

RATIONALE: The rationale has been forwarded that the district, once having started the day with kids in classes, would have double expenses; expenses for the day just started and expenses for the make up day and yet the state will reimburse only for one day.

In reality there is no significant expense to a district if school is shut down prior to busses moving and kids coming to the school.

What is common or public school within contemplation of constitutional or statutory provisions. 113 ALR 697.

Sec. 14.03.020. School year. The school year begins on the first day of July and ends on the 30th day of June. (§ 1 ch 98 SLA 1966)

Sec. 14.03.030. School term. The school term begins and ends on the dates fixed by the governing body of the school district. However, the term shall include not less than 180 days in session, except that, subject to the approval of the commissioner, a day used for in-service training of teachers may be substituted for a day in session, up to a maximum of 10 days. (§ 1 ch 98 SLA 1966; am § 1 ch 65 SLA 1972; am § 1 ch 137 SLA 1976; am § 1 ch 24 SLA 1979)

Effect of amendments. — The 1979 amendment deleted the former third sentence providing for approval of school schedules for a school term of less than 180 days in session.

Sec. 14.03.040. Day in session. Each day within the school term is a day in session except Saturdays, Sundays, and days designated as holidays by or according to AS 14.03.050. A school board may approve Saturdays as a day in session. The day in session in every school shall be at least four hours long, exclusive of intermissions, for the first, second, and third grades and five hours, exclusive of intermissions, for all other grades. The commissioner may approve a shorter day in session for any grade. The period of the day in session shall be devoted to the instruction of pupils or to study periods for the pupils. (§ 1 ch 98 SLA 1966; am § 2 ch 137 SLA 1976)

Sec. 14.03.050. School holidays. (a) Public schools shall not be in session on school holidays which are Labor Day, Thanksgiving Day, the day immediately following Thanksgiving Day, Christmas Day, New Years Day, Memorial Day, and the Fourth of July. If one of these holidays falls on a Saturday, the Friday immediately preceding is a school holiday. If one of these holidays falls on a Sunday the Monday immediately following is a school holiday. A teacher shall not be required to perform employment services on these holidays, nor may the salary of a teacher be diminished because the teacher does not perform employment services on a school holiday.

(b) The public schools shall be in session on all other holidays falling upon school days and shall conduct appropriate exercises in recognition of the day.

(c) The governing body of the school district may declare additional holidays. (§ 1 ch 98 SLA 1966)

Editor's notes. — In the last sentence of subsection (a), "the teacher" was substituted for "he" by the revisor of statutes pursuant to AS 01.05.031 and § 4, ch. 58, SLA 1982.

Sec. 14.03.060. Elementary, junior high, and secondary schools. (a) An elementary school consists of grades kindergarten through grade eight or any appropriate combination of grades within this range.

(b) A secondary school consists of grades seven through 12 or any appropriate combination of grades within this range. The establishment of one or two grades beyond the 12th grade is optional with the governing body of the school district.

(c) Grades seven through eight, nine, and ten or any appropriate combination of grades within this range may be organized as a junior high school.

(d) This section does not prevent a high school from issuing a diploma to a student who has completed the 12th grade. (§ 1 ch 98 SLA 1966)

POSITION PAPER / Department of Health and Social Services

POSITION PAPER

HOUSE BILL NO. 125

"An Act relating to 'emergency closure days' in response to a threat to the health or safety of students."

This Bill amends AS 14.03.030 by adding a provision that an "emergency closure day" may be substituted for a day in session because of conditions posing a threat to the health or safety of students.

The Department of Health and Social Services cannot comment on the educational impact of the new provision. Emergency closures for strictly health or safety reasons are a relatively uncommon event and can be kept at a minimum by strict enforcement of existing statutes and regulations relating to immunization requirements and building and safety codes. In the past year, there have been no instances in which the Division of Public Health has recommended closure of a school due to health reasons. The most likely reasons for closure would probably relate to environmental considerations due to failure of utilities such as heating, water or sewerage systems.

IV. ANALYSIS

The current conviction rate for sexual assault in the first degree (rape) is 110 persons per year. Of this number, approximately 90 are first convictions.

House Bill No. 127 increases the presumptive sentence for first felony convictions only. The sentences for second and third convictions are unchanged from existing law. The increase in presumptive sentence length for first time offenders of sexual assault is two years.

It is assumed for purposes of this fiscal note that every offender earns all good time available. Since one day of good time is earned for every three days served, the increase in time served by each of the 90 persons convicted would be one and one-half years. This will result in the need for 135 additional bed spaces within the Alaska correctional system.

The impact on the system will not be experienced until six (6) years after passage of the proposed legislation since that is the minimum time served to under a presumptive sentence of eight (8) years. Considering the passage of time involved from the appropriation of funds to the completion of construction, the capital funds are requested for FY 1988, with a projected date of July 1, 1990 for opening the new facility. The cost for construction is estimnated to be $183,000. This is based on an estimated cost per bed of $183,100 (FY 1984 costs, plus 10% inflation for each of four years) times 135 beds: 135 x $183,000 = $24,705,000.

No operating costs are identified in the fiscal note as they will not be experienced until FY 1991. Approximately 34 staff positions would be needed at that time, as well as funding for all areas related to the care and custody of the additional inmates.

controlled substance in the first degree shall be sentenced to a definite term of imprisonment of at least five years but not more than 99 years.
(c) A defendant convicted of a class A felony may be sentenced to a definite term of imprisonment of not more than 20 years, and shall be sentenced to the following presumptive terms, subject to adjustment as provided in AS 12.55.155 - 12.55.175:
(1) if the offense is a first felony conviction and does not involve circumstances described in (2) of this subsection, five years;
(2) if the offense is a first felony conviction, other than for manslaughter, and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, seven years;
(3) if the offense is a second felony conviction, 10 years;
(4) if the offense is a third felony conviction, 15 years.
(d) A defendant convicted of a class B felony may be sentenced to a definite term of imprisonment of not more than 10

AS12.55.125 DOCUMENT= 1 OF 1 PAGE = 3 OF 5

years, and shall be sentenced to the following presumptive terms, subject to adjustment as provided in AS 12.55.155 - 12.55.175:
(1) if the offense is a second felony conviction, four years;
(2) if the offense is a third felony conviction, six years.
(e) A defendant convicted of a class C felony may be sentenced to a definite term of imprisonment of not more than five years, and shall be sentenced to the following presumptive terms, subject to adjustment as provided in AS 12.55.155 - 12.55.175:
(1) if the offense is a second felony conviction, two years;
(2) if the offense is a third felony conviction, three

(f) If a defendant is sentenced under (a) or (b) of this section,

(1) imprisonment for the prescribed minimum term may not be suspended under AS 12.55.080;

(2) imposition of sentence may not be suspended under

AS 12.55.085;

(3) imprisonment for the prescribed minimum term may not be otherwise reduced.

(g) If a defendant is sentenced under (c), (d)(1), (d)(2), (e)(1), (e)(2), or (i) of this section, except to the extent permitted under AS 12.55.155 12.55.175,

(1) imprisonment may not be suspended under AS 12.55.080;

(2) imposition of sentence may not be suspended under AS 12.55.085;

(3) terms of imprisonment may not be otherwise reduced.

(h) Nothing in this section or AS 12.55.135 limits the discretion of the sentencing judge except as specifically provided.

(i) A defendant convicted of sexual assault in the first degree may be sentenced to a definite term of imprisonment of not more than 30 years, and shall be sentenced to the following presumptive terms, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(1) if the offense is a first felony conviction and

does not involve circumstances described in (2) of this subsection, eight years;

(2) if the offense is a first felony conviction, and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 10 years;

(3) if the offense is a second felony conviction, 15 years;

(4) if the offense is a third felony conviction, 25 years.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The current conviction rate for sexual assault in the first degree (rape) is 110 persons per year. Of this number, approximately 90 are first convictions.

House Bill No. 127 increases the presumptive sentence for first felony convictions only. The sentences for second and third convictions are unchanged from existing law. The increase in presumptive sentencing for first time offenders of sexual assault is two years.

It is assumed for purposes of this fiscal note that every offender earns all good time available. One day of good time is earned for every three days served. Therefore the increase in time served by each of the 90 persons convicted would be one and one-half years. This will result in the need for 135 additional bed spaces within the Alaska correctional system.

The impact on the system will not be experienced until six (6) years after passage of the proposed legislation since that is the minimum time served under a presumptive sentence of eight (8) years. Considering the time involved from appropriating funds to completion of buildings, the capital costs are requested

for FY 1987, with a projected date of July 1, 1989, for opening the new facility. The cost for construction is estimated to be $24,718,500. This is based on an estimated cost per bed of $183,100 (FY 1985 costs, plus 12% inflation for each of two (2) years) times 135 beds: 135 x $183,100 = $24,718,500.

No operating costs are identified in the fiscal note as they will not be experienced until FY 1990. Staff positions would be needed at that time, as well as funding for all areas related to the care and custody of the additional inmates.

Dear Representative Tischer:

The Alaska Action Trust is a statewide organization composed of attorneys actively involved in trial practice. The Trust has and seeks membership from attorneys practicing in all parts of Alaska and is supported by voluntary contributions from its members. The Trust members feel that their experience and background on specific legislation may assist you as a member of the House Health, Education & Social Services Committee of the Thirteenth Alaska Legislature.

The Trust therefore requests that you advise us of committee meetings and public hearings on the following bill presently before your committee: HB 127. By separate letter we are also requesting this information from other members of the committee.

If we can be of assistance to you by submitting written or oral testimony, please do not hesitate to contact us.

Sincerely,

ALASKA ACTION TRUST

The Tragedy of Teenage Prostitution

by FATHER BRUCE RITTER with BOB WEINSTEIN

We must face the shocking facts, says a Catholic priest, and care enough to try to change them.

"I am not going to make it. I am going to die out there. The streets are going to kill me."

He was 17 years old. We'll call him Louis. He was talking to one of the co-authors of this article, the Reverend Bruce Ritter, a 52-year-old Franciscan priest. Two years ago, Father Ritter started Covenant House. It is a shelter for teenagers, most of them runaways, who roam the sinful streets around Times Square in midtown New York.

Wherever there are large numbers of runaways, teenage prostitution is a fact. The problem is already very bad—and getting worse—in cities such as New York, Los Angeles, Miami, and Houston. But it's not just a big-city problem. Those runaways come from almost every corner of the United States. Fleeing or kicked out of their homes, they come to the cities with dreams of glamor and fun.

The Federal Bureau of Investigation keeps statistics on runaways. Between 600,000 and one million young people run away from home every year, the FBI reports. Not all of these, of course, end up in prostitution. In fact, quite a few return home very soon. But almost all teenage prostitutes start out as runaways.

These teenage runaways cannot get honest work. They have not finished school. Rightly or wrongly, they don't want to go home. Or maybe they don't have a home, or parents, anymore. Or maybe their parents don't want them to come home.

Over the past 18 months, 8,000 homeless young people have come to Covenant House. There, they can get a good night's sleep, eat nourishing meals, and clean up. Perhaps most important of all, they can talk about their lives with the volunteers who work there. Like Louis, who fears "the streets are going to kill me," 60 percent of the young people who show up at Covenant House are involved in prostitution.

At 17, Louis has been a hustler for three years. He didn't finish school and can't write very well. He's an alcoholic. He drinks every day, he says, to try to forget what he has to do to survive. He is a naturally bright person who, maybe, could have led a more "normal" life. But his chances, now, of leading anything like a normal life are just about zero.

Teenage runaways head for cities — and ruined lives. Father Ritter fights to save them.

What do volunteer workers say to teenagers like Louis who come to Covenant House and similar shelters around the country? The volunteers have only one hope: to try to convince a teenager that he or she has other choices in life. Maybe (a volunteer may suggest) going back home is better than staying

Few things get Father Ritter to put aside his work for Covenant House—even for a little while. This article was one of them. We are grateful to Father Ritter and to his co-author, Bob Weinstein, a frequent contributor to this magazine.

Senior Scholastic 1/8/79

on the streets. But many of these teenagers just can't believe that they can change their lives, that they have any choices at all.

So, they go back on the streets. Hundreds of them have been held prisoner, tortured, raped. Some of them have been murdered. One 16-year-old girl—we'll call her Alice—was held prisoner for a week, after a pimp picked her up in New York's Port Authority Bus Terminal. Alice was drugged, raped repeatedly, but finally escaped. Her pimp found her again and told her he had to have her back. He said he owned her. Besides, Alice was worth thousands of dollars a month to him.

Police have identified about 1,000 pimps in just the New York City midtown area. Each one usually controls between two and four girls like Alice. The prostitute is the "property" of the pimp. Each girl is expected to bring the pimp a certain amount of money a day, usually around $200. She has to. If she doesn't, a brutal beating is about the best she can hope for.

Prostitution has been called a "victimless crime." That means a crime that doesn't hurt anybody. But that leaves out all the young people who are beaten, tortured, held prisoner. And what about those who are murdered? What about the ones who commit suicide out of hopelessness and desperation?

These are the victims. But who, really, are they? Here are some statistics from Covenant House. Fifty percent of the teenage prostitutes are black; 18 percent are Spanish-speaking; 25 percent are white. The rest are of mixed ethnic backgrounds. Seventy-five percent are boys. The median age of both boys and girls is about 17. Almost one-half of them are 17 or younger. Nineteen out of 20 come from one-parent families. If they come from two-parent families, there is almost always alcoholism in the family.

Seventy-five percent of teenage prostitutes are children of the poor. Most of them have suffered child abuse. They have either been thrown out or walked out of homes that have broken up, or homes where there seems to be no love or understanding left.

To an experienced pimp, these needs for attention and security are easy to spot—and easy to prey on. A lot of scared young girls, for example, want to believe that the smooth, expensively dressed young men who seem to fall for them really care. The rude awakening often comes when the girl is asked to prove her love by repaying the man for his generosity. She can repay him, he tells her, by selling her body and making money for them both. For her, it can seem like her only option.

Meanwhile, the "sex industry" is booming. And teenage prostitution and pornography, too, get bigger every day. Business has never been better. Why? There are probably just two answers. They are two of the seven deadly sins—greed and lust. There is big money in selling sex. Greed makes people go after that money. The money comes from other people who lust after children and teenagers. And, of course, the greedy ones want to make sure money keeps rolling in. They are for the most part linked to what we know as organized crime. They have a big stake in being deadly efficient—for them, sex is a $4-billion-dollar-a-year industry. □

Father Bruce Ritter— On Stopping Teenage Prostitution

Senior: With all you've seen—all the pain and suffering—do you think it's possible to end the problem?

Father Ritter: I do. It seems, though, that very few people really want to do anything.

Senior: Do what? You make it sound as if individuals—young individuals—can do something. But is that realistic? What have adults, politicians, the police been able to do?

Ritter: Very little. But I think that's because they've only given lip service to the problem. But they've made little effort to stop it. The problem grows worse every day. But young people can care. Caring is a good way to start. If their sister or brother or close friend were on a street corner, it wouldn't be so hard to care. Caring is the first step in accepting responsibility—for yourself and for others.

Senior: That sounds good. But it also sounds like a lot of other things people have said before about love and caring making things all right....

Ritter: Wait a minute. That's only a beginning. The caring makes people *act*. And that's what it takes to make them realize they have power.

Senior: What kind of power?

Ritter: The power to put people into office—and to take them out. Politicians respond to the people who write them—people who care, people who vote. Letters are a good way for your readers to start. And before long, they'll be voting. They can vote against the uncaring politicians and judges and the do-nothing district attorneys.

Senior: But statistics show that not many young people actually vote.

Ritter: I know! That's immoral and irresponsible. I hear young people say that their vote doesn't count. But they don't even try to find out if that's true. They may shake their heads over a problem like teenage prostitution, but they don't try to *do* anything.

Senior: But why should they *really* care—about a problem that seems so far away?

Ritter: I thought I already gave them some good reasons. But here's another. Some day, they will have children of their own. And they have to decide if they want those children growing up in a world where young people are bartered like sacks of potatoes. They can't afford to wait until then... until those children are teenagers and maybe thinking of running away. That will be too late. The problem can't be—won't be—stopped overnight. It's going to take time. And the time to start is *now*. □

Teen-Age Prostitutes

Adolescent prostitution has been receiving a great deal of attention in Minnesota, and particularly in the Twin Cities area of Minneapolis-St. Paul. The area is notorious as the home of many young girls who are now working as prostitutes in New York City, Chicago, and California; so notorious that one section of New York with numerous adolescent prostitutes has become known as the "Minnesota Strip."

Based on 3 years of direct fieldwork, Michael Baizerman, Jacquelyn Thompson, Kimaka Stafford-White, and "An Old, Young Friend"—an 18-year-old woman with five years' experience in prostitution—have written of this problem in *Children Today*.

In the Twin Cities area, girls of all races are involved in prostitution; their ages range from 13 to 18. Some have a male pimp, others do not, and many make a transition from working independently to working for a pimp. Generally speaking, most of the young prostitutes work "the street"—both actual city blocks and other specific locations, such as shopping malls and the areas around some bars and after-hours clubs. Most sex acts take place in cars, although some girls use apartments and, more rarely, motel and hotel rooms.

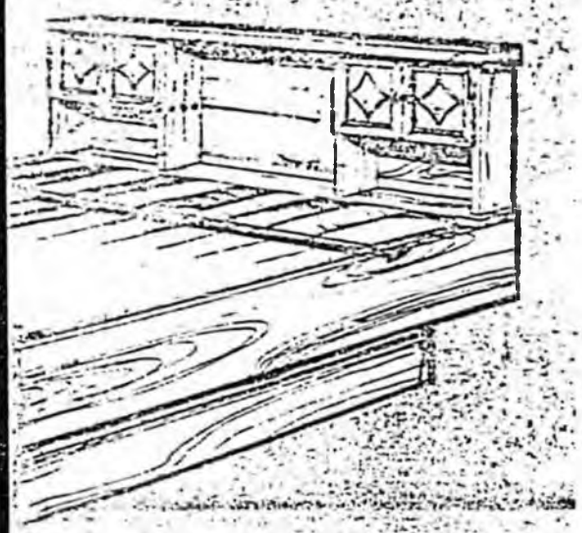
Many of the girls practice birth control; pills, followed by the IUD, are the two most popular forms. Since girls may begin using the pill at an early age, they may be at risk of resultant medical complications. Use of the IUD could lead, through violence during the sex act, to such serious problems as perforation of the cervix. Condoms seem to be used less as a pregnancy prophylactic than as a preventive for venereal disease.

Many girls do not know much about venereal disease, and what information they do have seems to be obtained from "the street." Some learn from experience that one consequence might be scar tissue on the fallopian tubes, which could prevent pregnancy. Generally, pimps take care of the medical and health expenses of their girls.

Many pimps working in neighborhoods and the metropolitan area do not use hard drugs and do not allow their girls to use them—hard drug use raises the risk of arrest and the cost of the pimp's operation. Hard drugs also compete with a pimp for the girl's dependency. This is not to say that many girls do not have a history of drug use or that some girls may not be intentionally introduced to drugs as a way to secure and control them. However, this latter pattern is more characteristic of interstate than of local patterns.

All of the pimps are male and most of the younger ones are black. Those who live in the neighborhood where the girls work—"popcorn" or "bubblegum" pimps, or "players"—are about 17, 18 and 19 years old, while those who come from outside the state are usually older, having moved up the "career ladder" from neighborhood pimp to small businessman. Black pimps tend to work on the street while white pimps, usually older, are more likely to be involved with more formally organized action such as call girls, saunas, and massage parlors.

In general, the younger pimps come from disadvantaged neighborhoods; they have relatively poor formal education, lack basic skills, and have few opportunities to obtain legitimate work. As a result, they are likely to be frustrated, angry, resentful, and unsure of themselves. They tend to use force to control their girls and may attempt to hurt a girl or someone who tries to interfere with their operation. It is likely, however, that many of these young men will move out of pimping if other possibilities are found. Those who stay in it do so partly because there are few work opportunities. Most do not stay out of any great pathological or perverse need.



Older and more sophisticated pimps rarely use physical force on their women. Their method of control is psychological and emotional, with the goal of having the girls become totally dependent upon them.

The local buyers or Johns seem to be white men over 25 years of age, both married and single. We know that many have families of their own—and that some men ask for girls of their daughters' age.

Although a wide variety of sex acts are performed, most men seem to want oral sex or intercourse. The price varies according to the act and the time involved. For ordinary oral sex or intercourse, it is about $25. Other factors—whether the girl works for a pimp, the location of the pick-up, the nature of the sex act, and whether or not there is a big convention in town—also influence the cost.

Most of the action seems to take place from lunchtime to late afternoon, and then later in the evening. These afternoon times fit well within typical male working schedules and allow married men the opportunity to be home in the evening and still engage in—and protect—their activities.

Business hours are also determined by the girls' schedules. Since they may also be students in junior and senior high school, the girls may choose to work only after school. Afternoon hours are convenient for girls who live at home and work at prostitution part time, without parental knowledge.

sentence of 3 years

By TERRY CARR
Daily News reporter

A 29-year-old father of five was sentenced to three years in prison Wednesday for running a prostitution ring of teen-age girls.

Willie B. Bell, who has been in jail since he was arrested on pimping charges in May, is the first person to be convicted and sentenced to prison under a 1980 law outlawing the promotion of prostitution among juveniles, prosecutors said.

Superior Court Judge Milton Souter said he added one year to Bell's sentence because of testimony Wednesday by another jail inmate, William Smith. Smith told the court Bell Wednesday morning threatened to harm him and his daughter unless Smith gave testimony favorable to Bell.

Bell denied making the threat.

Souter ordered Bell to prison despite pleas from defense attorney Peter Mysing, who called his client's offenses "a detour in his life" and said Bell was an "adoring father."

If Souter gave him probation, Bell told the judge, "you'll never see me in another courtroom for anything."

Souter called the crimes for which Bell was convicted in October a "dirty business."

"This sentence has to serve as a deterrent" to Bell and others engaged in prostitution, he said.

Souter also said he was influenced heavily by trial testimony and evidence that the Bell used violence and the threat of violence to control the girls in his prostitution ring.

Teen-agers who worked for Bell testified during the trial that Bell often beat them and threatened to kill them.

Souter said "the great majority of women would not engage in prostitution" unless threatened with violence, lured with the promise of narcotics, or by other means of persuasion.

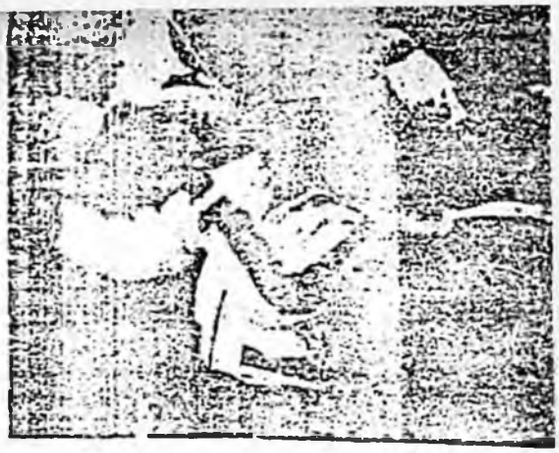
"Here, the powerful persuasion was threats of violence and, on at least one occasion, the use of violence," he said.

Bell, who sat silently throughout most of Wednesday's sentencing, spoke only to plead for probation and to contest the testimony of Smith, the inmate who claimed Bell had threatened him.

"I've been in jail," Bell said. "I learned my lesson in jail. I don't need to spend any more time in jail."

Smith, who was arrested here in December on an Arkansas theft charge, said he became friendly with Bell in jail. "You better get me out of this," Smith quoted Bell as telling him.

Smith, who at first refused to testify but relented under Souter's order, said Bell also threatened Smith's 14-year-old daughter unless Smith testified favorably.



Bell denied he threatened Smith or his daughter.

"All I told him was to come to court and testify and tell the truth," Bell said.

Souter, however, said he believed Smith and that he added a year to the sentence because of the threats.

"I think Mr. Bell needs to sit in jail and think about that. We're not going to tolerate that sort of behavior," Souter said.

Souter gave Bell credit for the 240 days he has already spent in jail. Bell will be eligible for parole after serving one-third of his sentence.

Plans to build a huge, centralized state office building in Anchorage will move a step closer to fruition next week with the selection of a local consultant to assist in site selection and design.

But at least two Anchorage lawmakers say they have major reservations about the structure.

Rep. Russ Meekins, recalling the construction of the new Federal Building here a few years ago, voiced fears that the addition of the massive complex to house state offices could depress the private market for office space here. Sen. Ed Dankworth said he is not convinced the project is needed.

Guided by Department of Administration Commissioner Bill Hudson, the office project is moving rapidly toward actual construction. Hudson says he hopes for an August groundbreaking.

Tuesday, the Anchorage Assembly backed the concept of locating a central state office building downtown. Hudson said the endorsement is [illegible]ble signal that we're on

Willie Bell convicted in teen-ager prostitute case

By JULIE ANNE GOLD
Daily News reporter

Willie B. Bell, accused as a Fourth Avenue pimp, was convicted of inducing a 14-year-old girl into a life of prostitution by a Superior Court jury Thursday.

The 29-year-old Bell faces up to 10 years for the first-degree felony charge.

In a complex reading of six separate verdicts, the jury found Bell innocent of forcing two other girls, ages 15 and 16, into prostitution, but guilty of promoting them to become prostitutes.

These lesser, third-degree charges carry possible prison sentences of up to a year and 90 days.

Delivering its sixth verdict in the case, the jury found Bell guilty of managing and supervising a prostitution enterprise, other than in a place of prostitution. The felony offense holds a maximum sentence of five years in prison.

Bell, nervously looking around the nearly empty courtroom Thursday, buried his heads in his hands after the clerk read the first "guilty" verdict.

"We plan to appeal," said Peter Mysing, Bell's attorney.

"All three ladies' testimony was damaging against Bell," Mysing said. "The issue was who was the jury going to believe."

Even though Bell admitted taking money that he knew came from prostitution from the 16-year-old, according to Msying, Bell never "caused" or "induced" the 14-year-old to become a prostitute.

However, the jury thought otherwise.

"There was definite evidence to support she was forced into prostitution," one juror said Thursday. "The photos showed she was beaten and bruised."

Prosecutor Martha Beckwith said the 14-year-old's testimony and a tape-recorded confrontation between Bell and the three girls probably were the most damaging evidence against Bell.

"He beat me real bad," a voice — identified by the state as belonging to the 14-year-old — said on the tape.

A series of color snapshots, passed from juror to juror, depicted the teen-ager with cuts and bruises on her face and arms.

However, the testimony of the older girls apparently did not convince the jury that Bell "forced" or "attempted to force" them into prostitution.

One of the girls, who admitted to being a prostitute before she met Bell, told the jury she was his lover for several months before his arrest.

"In her case, it was hard to tell what was a lovers' fight from a business fight," another juror said.

Another juror agreed, saying "there was just not enough evidence for a first-degree conviction" in connection with the two other girls.

But the jurors, gathered around Judge Milton Souter's third-floor jury room for the last time, all agreed there was plenty of evidence to convict Bell of the state's last charge — pimping for the three girls.

"The facts showed he drove them around" Fourth Avenue, one juror said, and "then waited and picked them up."

Mysing called his conviction a "surplus charge." The only way his client could be convicted of inducing the 14-year-old to become a prostitute, Mysing said Thursday, would be by pimping for her.

If Bell is sentenced to both charges the state will be guilty of double jeopardy, Mysing claimed.

Beckwith disagreed, saying she "was pleased" with the verdicts.

It was the first time "in at least four or five years" the state has successfully prosecuted someone for street pimping, she said.

Jury deliberates pimp case

By JULIE ANNE GOLD
Daily News reporter

The fate of Willie B. Bell, an Anchorage man accused of setting up three teenage girls in lives of prostitution, was being contemplated Wednesday night by a jury of six men and six women.

Closing arguments brought an end Wednesday to the eight-day trial in which three former teen-age prostitutes explained the ins and outs of working the streets of Anchorage to the jury.

Bell was arrested in May for allegedly forcing two of the girls, and attempting to induce the third, to engage in prostitution. He was also indicted on a fourth charge of illegally running a prostitution business.

If convicted, Bell, who has pleaded innocent to all the charges, could face up to 25 years in jail, according to the district attorney's office.

The case is the first time in many years the state has brought an alleged pimp to trial on felony charges, the district attorney's office said.

Prosecutor Martha Beckwith relied heavily Wednesday on the testimony of the three teenagers to prove the state's case against Bell.

Under oath the girls, ages 15, 16 and 17, pointed to the defendant — usually slouched in his chair — as their former pimp who often beat them and threaten to kill them for not making more money from "johns" or "dates."

Bell's lawyer, Peter Mysing, claimed Bell never agreed to be their pimp and that

they were free to leave him any time, but decided live with him while they — on their own —engaged in prostitution.

Mysing acknowledged Bell on occasion drove the girls downtown, accepted money from them and slapped them during "domestic" quarrels. However, he denied his client ever "induced or forced" them to be prostitutes.

In order to convict Bell on first-degree pimping charges, the state must prove he intended to cause or force the girls to engage in prostitution.

In an effort to discredit the girls' testimony, Mysing recounted Bell's testimony of driving one of the girls to the Big Timbers motel for a "date."

The room cost $37 and the girl received $20, Mysing said. Bell would have to be an "extremely bad pimp" if he had set up the meeting.

Beckwith defended the testimony of the girls. "She basically went through the wringer to come in and testify candidly," Beckwith said, defending the veracity of one of the girl's statements.

That girl admitted under cross-examination to being a prostitute and living with several men for a few months at a time before agreeing to live and work for Bell in January.

"Ladies and gentlemen, ask yourselves why Mr. Bell was involved with these young girls, these juveniles," Beckwith said. "Why did he give them rides" downtown, wait for them and pick them up.

"If it were not like men like Mr. Bell, perhaps juveniles would not run to the street. Bell performed a function on that street," Beckwith claimed.

If the jury reaches a verdict Wednesday, one court source said, the results would be sealed and not made public until this morning.

Stevens tells oil leaders state has good potential

By NANCY SHUTE
States News Service

WASHINGTON, D.C. — Sen. Ted Stevens, R-Alaska, told a meeting of oil and gas industry representatives exactly what they wanted to hear this week, promising Alaska energy reserves will rescue the United States from dependence on foreign oil.

Stevens, addressing the Garmen's Roundtable here Tuesday, made the occasion a dress rehearsal for his upcoming stump of the West in support of Republican presidential candidate Ronald Reagan's energy policy.

"Gov. Reagan was absolutely right when he said that Alaska has the oil potential of Saudi Arabia," Steven said. "But I think he was too conservative. Alaska has the potential of becoming several Saudi Arabias."

Stevens also called for a renewed effort to pass an Alaska lands bill when Congress returns for a post-election lame duck session Nov. 12, advocating defeat of the bill proposed by Rep. Morris Udall, D-Ariz., a week ago in the final moments of the session.

"I am going to ask members to demand that the Udall bill be changed — that leasing begin on the Arctic Wildlife Range in 1981. That should be the goal of the lame duck session."

Stevens lambasted President Jimmy Carter's energy policy, terming it the "moral equivalent of surrender." He accused Carter of having gone one step further than previous presidents in locking up Alaskan oil leases, particularly in the Arctic Wildlife Range.

"There hasn't been a single onshore lease in Alaska's federal lands since 1965," the senator said. "Carter went one step further. He used the Antiquities Act to withdraw 100 million acres, and has fought to prevent any leasing or even seismic testing of the Arctic Wildlife Range."

The Department of Energy, created by Carter, has "virtually bogged down" domestic oil and gas production, Stevens claimed.

Not an original Reagan supporter, Stevens said his only quarrel with the candidate's energy policy was over synthetic fuels.

"I disagree with Reagan on the Synfuels Corporation," he said. "I support it so long as it is mandated to depend on private enterprise to develop new technology." Reagan opposes the federally-funded development of synthetic fuels production.

Prostitutes' survival — old but tricky business

"Oh, the Sisters of Mercy, they are not departed or gone."
— Leonard Cohen

by Krys Holmes
and Ellis E. Conklin
Times Writers

Under the neon lights of the Scandanavian Club, Denise, a 22-year-old hooker, stood alone Monday night.

After a deep yawn, she lit up a cigarette, kicked the slush from her maroon leather boots and ambled down The Avenue.

Few people walked by her. And those who did didn't seem to notice. Denise is a Fourth Avenue fixture like the drunks and the hot chili at the Panhandle Cafe.

At $50 a crack and several "tricks" a night, Denise can make as much as $600 to $1,000 a week. All the money, however, goes to her pimp. And, as one police officer put it: "They all say they work alone, but there isn't one girl out there who doesn't have a pimp."

The pimp takes care of her room and board, clothing, and the modest accessories necessary to perform nightly in this ancient profession.

"Things are quiet now," she said. "They (police) made the big bust and there ain't nothing left for 'em, 'cept for me and couple of other girls.

"I think they want to get the streets clean for Fur Rondy," Denise said bitterly.

She quickened her pace, turned the corner at Fourth and Barrow, and decided she "don't want to talk no more."

There aren't many prostitutes talking right now. After a crackdown last weekend, most of them are scared. Others are in hiding "until the heat cools down." And many of them are still in jail dressed in blue jump suits, waiting for their pimps to post bail.

In the past 72 hours, Anchorage police, dressed in street clothes, have made 54 arrests for loitering and solicitation. Some of the women were collared as many as three times during the weekend. Chief Brian Porter said he can't remember seeing that much jail activity in several years here.

During the weekend, Porter said, the streets were thick with prostitutes, and competition among the women was fierce. Some actually tried to stop traffic or climb into cars, Porter said. A police officer walking down the street discovered a prostitute with her "trick" having sex in the man's car. She got her $50 for the deal — and was arrested on the spot. One local woman said her husband was propositioned as they walked to a restaurant in the Sunshine Mall.

There were no customers arrested, and not a single pimp.

Police say many of the women now working the streets came from Canada, Hawaii and the West Coast. Some came for more money; some because Anchorage has long

See Trick, page A-4

Trick

(Continued from page A-1)

been a part of the prostitutes' migration pattern between Honolulu, Seattle, San Francisco and Los Angeles.

And for others, it is the promise of making a bundle during the Fur Rendezvous celebration that begins next weekend, and the military's Brim Frost maneuvers, that bring some 60,000 potential customers to Alaska to play war games in the Interior and see the sights of Anchorage afterward.

Tim Casper, a veteran on the vice squad, said the number of prostitutes on The Avenue rises and falls in a pattern. "It's something you can really count on," he said. "In January, they're all over, and they'll be that way until we put the pressure on them."

The "pressure" starts when the public outcry rises above a tolerant grumble. Until then, police are encouraged to spend the taxpayers' money going after the less visible crimes: robberies, rapes and burglaries.

But prostitution takes its toll on Anchorage's streets. Customers are rolled. Men are robbed by the women they willingly pay for, as the girls try to make more money for their "men."

Of the 23 murders that occurred in Anchorage in 1982, three of them were directly related to prostitution, police say. In two of the homicides, it was the hooker who killed. In the third, a pimp shot a girl's customer.

Caspar said 30 to 40 percent of all the robberies and at least 60 percent of the pickpocketing in Anchorage is related to prostitution and street people on Fourth Avenue.

"We could put a lot of man hours into trying to build a felony theft case against one guy, and get very poor results. Or we could use the same number of officers and drag a few of the prostitutes off the streets and clean it up for a while," he said.

"My theory is to arrest them on loitering charges, and enforce their (probation) restrictions. Let them know Anchorage isn't going to tolerate it. Maybe then they'll leave, and with them the pimps will go, and the crime will go, too."

Most of the women are charged with loitering for purposes of prostitution, a misdemeanor. Because state laws about prostitution are ambiguous, and because a woman will almost always say she works alone, men are seldom arrested, and rarely prosecuted.

In this business, men may pay the money, but the women pay the price.

Joanne Baker, 26, is six months pregnant. She was arrested for soliciting Sunday night. It was her second arrest for prostitution since coming to Anchorage from Miami last year.

There were no extra beds at the Sixth Avenue Jail Sunday night; she slept on the floor.

Looking haggard as she gazed through the plexiglass window in the vistor's room, Joanne scratched her stringy blonde hair. Her blue eyes were watery and her arms were speckled with small red blotches. She didn't want to talk, especially to a reporter.

She said she turned to selling her body after she couldn't find work as a bar maid. Asked about the weekend sweep, Joanne said, "Police, they told us it was because of Fur Rondy. That's why. That's why they're hitting on us."

And when she gets out on the streets again? "Well, we'll just move to a different area. There's always a different area to go to," she replied.

However, Joanne isn't sure how she is going to make bail. She appeared panicky. She says she has no pimp to fork out the $300. "I don't know how I'm going to get it. I don't know. I don't know. Maybe, I'll call a friend."

Joanne and 20 other women were arraigned Monday before District Court Judge John D. Mason. They sat in the courtroom chained together.

Most of them were given bail and a court date, with the provision that they no longer sell their wares in the downtown area between Third and Sixth, from D Street to Barrow.

But most of them will. And many will go to jail. For the second, third, even seventh and eighth times.

Scott Sidell, a municipal prosecutor, said he has seen the same faces and names over and over again. Their names and ages are usually phony. But those arrested are all too often teen-agers posing as adults. Girls, posing as women, selling off their childhood bit by bit in exchange for an allowance, or a home, for a man who says he loves them.

It's shortly before midnight and Veronica stood in the doorway of an adult book store. She pulled her rabbit fur coat tighter around her. Her eyes searched for a possible customer. But no one was around.

During a brief conversation, Veronica said she's not worried about the police clampdown on her livelihood. "We'll be trickling back out again. The cops do this a couple of times a year. No big deal."

Standing alone again later, she spotted a man wearing an Army fatigue jacket, walking slowly near the Elbow Room. She waited until he passed right in front of her before she said, "Hey, you want to party?"

Her breath formed a tiny white cloud as she spoke.

They walked quickly together, neither of them speaking.

ALASKA NETWORK ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT

P.O. BOX 809

JUNEAU, ALASKA 99802

586-3650

POSITION PAPER

HB127: An Act to increase the punishment for sexual assault in the first degree

The Alaska Network on Domestic Violence and Sexual Assault is a non-profit corporation composed of twenty-one programs statewide that provide domestic violence, sexual assault, and adult crisis intervention services to members of their respective communities. Network programs are funded in part through grants and contracts awarded by the Council on Domestic Violence and Sexual Assault.

The Network was established in 1978, and has as one of its primary focuses the elimination of domestic violence and sexual assault through provision of shelter, advocacy, and education/prevention services.

While the Network is supportive of the diligent prosecution of persons charged with sexual assault, it is our strong feeling that a comprehensive, mandatory treatment and rehabilitation program, provided in conjunction with sufficiently lengthy jail terms, most effectively addresses the issues of protecting the victim and facilitating prevention.

Towards that end, the Network would strongly urge the Alaska State Legislature to consider conducting a comprehensive overview of the extent of prosecution, the impact of sentencing, and the quality of rehabilitative treatment in cases of sexual assault.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The current conviction rate for sexual assault in the first degree (rape) is 110 persons per year. Of this number, approximately 90 are first convictions.

House Bill No. 127 increases the presumptive sentence for first felony convictions only. The sentences for second and third convictions are unchanged from existing law. The increase in presumptive sentencing for first time offenders of sexual assault is two years.

It is assumed for purposes of this fiscal note that every offender earns all good time available. One day of good time is earned for every three days served. Therefore the increase in time served by each of the 90 persons convicted would be one and one-half years. This will result in the need for 135 additional bed spaces within the Alaska correctional system.

The impact on the system will not be experienced until six (6) years after passage of the proposed legislation since that is the minimum time served under a presumptive sentence of eight (8) years. Considering the time involved from appropriating funds to completion of buildings, the capital costs are requested

for FY 1987, with a projected date of July 1, 1989, for opening the new facility. The cost for construction is estimated to be $24,718,500. This is based on an estimated cost per bed of $183,100 (FY 1985 costs, plus 12% inflation for each of two (2) years) times 135 beds: 135 x $183,100 = $24,718,500.

No operating costs are identified in the fiscal note as they will not be experienced until FY 1990. Staff positions would be needed at that time, as well as funding for all areas related to the care and custody of the additional inmates.

Staff Report
House bills 117,127,128
January 27, 1983

HB 117:

Under current statute, sexual abuse of a minor under 16 years of age is a class C felony.

As proposed by HB 117:

1. Sexual abuse of a minor under 13 years of age is a offense in the first degree and is a class B felony.

2. Sexual abuse of a minor aged 13 to 16 is sexual abuse in the second degree and is a class C felony.

HB 127:

Under current statute, the first felony conviction for sexual assault in the first degree, not involving firearms, use of a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 8 years. The proposal will change that sentence to 10 years.

Under current statute, the first felony conviction for sexual assault in the first degree involving firearms, a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 10 years. HB 127 changes that sentence to 12 years.

HB 128:

Under current statute, promoting prostitution is a class B felony. HB 128 provides that inducing or causing a person under 16 years of age to engage in prostitution is a class A felony.

The Tragedy of Teenage Prostitution

by FATHER BRUCE RITTER with BOB WEINSTEIN

We must face the shocking facts, says a Catholic priest, and care enough to try to change them.

"I am not going to make it. I am going to die out there. The streets are going to kill me." He was 17 years old. We'll call him Louis. He was talking to one of the co-authors of this article, the Reverend Bruce Ritter, a 52-year-old Franciscan priest. Two years ago, Father Ritter started Covenant House. It is a shelter for teenagers, most of them runaways, who roam the sinful streets around Times Square in midtown New York.

Wherever there are large numbers of runaways, teenage prostitution is a fact. The problem is already very bad—and getting worse—in cities such as New York, Los Angeles, Miami, and Houston. But it's not just a big-city problem. Those runaways come from almost every corner of the United States. Fleeing or kicked out of their homes, they come to the cities with dreams of glamor and fun.

The Federal Bureau of Investigation keeps statistics on runaways. Between 600,000 and one million young people run away from home every year, the FBI reports. Not all of these, of course, end up in prostitution. In fact, quite a few return home very soon. But almost all teenage prostitutes start out as runaways.

These teenage runaways cannot get honest work. They have not finished school. Rightly or wrongly, they don't want to go home. Or maybe they don't have a home, or parents, anymore. Or maybe their parents don't want them to come home.

Over the past 18 months, 8,000 homeless young people have come to Covenant House. There, they can get a good night's sleep, eat nourishing meals, and clean up. Perhaps most important of all, they can talk about their lives with the volunteers who work there. Like Louis, who fears "the streets are going to kill me," 60 percent of the young people who show up at Covenant House are involved in prostitution.

At 17, Louis has been a hustler for three years. He didn't finish school and can't write very well. He's an alcoholic. He drinks every day, he says, to try to forget what he has to do to survive. He is a naturally bright person who, maybe, could have led a more "normal" life. But his chances, now, of leading anything like a normal life are just about zero.

Teenage runaways head for cities —and ruined lives. Father Ritter fights to save them.

What do volunteer workers say to teenagers like Louis who come to Covenant House and similar shelters around the country? The volunteers have only one hope: to try to convince a teenager that he or she has other choices in life. Maybe (a volunteer may suggest) going back home is better than staying

Few things get Father Ritter to put aside his work for Covenant House—even for a little while. This article was one of them. We are grateful to Father Ritter and to his co-author, Bob Weinstein, a frequent contributor to this magazine.

Senior Scholastic 9/8/79

on the streets. But many of these teenagers just can't believe that they can change their lives, that they have any choices at all.

So, they go back on the streets. Hundreds of them have been held prisoner, tortured, raped. Some of them have been murdered. One 16-year-old girl—we'll call her Alice—was held prisoner for a week, after a pimp picked her up in New York's Port Authority Bus Terminal. Alice was drugged, raped repeatedly, but finally escaped. Her pimp found her again and told her he had to have her back. He said he owned her. Besides, Alice was worth thousands of dollars a month to him.

Police have identified about 1,000 pimps in just the New York City midtown area. Each one usually controls between two and four girls like Alice. The prostitute is the "property" of the pimp. Each girl is expected to bring the pimp a certain amount of money a day, usually around $200. She has to. If she doesn't, a brutal beating is about the best she can hope for.

Prostitution has been called a "victimless crime." That means a crime that doesn't hurt anybody. But that leaves out all the young people who are beaten, tortured, held prisoner. And what about those who are murdered? What about the ones who commit suicide out of hopelessness and desperation?

These are the victims. But who, really, are they? Here are some statistics from Covenant House. Fifty percent of the teenage prostitutes are black; 18 percent are Spanish-speaking; 25 percent are white. The rest are of mixed ethnic backgrounds. Seventy-five percent are boys. The median age of both boys and girls is about 17: Almost one-half of them are 17 or younger. Nineteen out of 20 come from one-parent families. If they come from two-parent families, there is almost always alcoholism in the family.

Seventy-five percent of teenage prostitutes are children of the poor. Most of them have suffered child abuse. They have either been thrown out or walked out of homes that have broken up, or homes where there seems to be no love or understanding left.

To an experienced pimp, these needs for attention and security are easy to spot—and easy to prey on. A lot of scared young girls, for example, want to believe that the smooth, expensively dressed young men who seem to fall for them really care. The rude awakening often comes when the girl is asked to prove her love by repaying the man for his generosity. She can repay him, he tells her, by selling her body and making money for them both. For her, it can seem like her only option.

Meanwhile, the "sex industry" is booming. And teenage prostitution and pornography, too, get bigger every day. Business has never been better. Why? There are probably just two answers. They are two of the seven deadly sins—greed and lust. There is big money in selling sex. Greed makes people go after that money. The money comes from other people who lust after children and teenagers. And, of course, the greedy ones want to make sure money keeps rolling in. They are for the most part linked to what we know as organized crime. They have a big stake in being deadly efficient—for them, sex is a $4-billion-dollar-a-year industry. □

Father Bruce Ritter— On Stopping Teenage Prostitution

Senior: With all you've seen—all the pain and suffering—do you think it's possible to end the problem?

Father Ritter: I do. It seems, though, that very few people really want to do anything.

Senior: Do what? You make it sound as if individuals—young individuals—can do something. But is that realistic? What have adults, politicians, the police been able to do?

Ritter: Very little. But I think that's because they've only given lip service to the problem. But they've made little effort to stop it. The problem grows worse every day. But young people can care. Caring is a good way to start. If their sister or brother or close friend were on a street corner, it wouldn't be so hard to care. Caring is the first step in accepting responsibility—for yourself and for others.

Senior: That sounds good. But it also sounds like a lot of other things people have said before about love and caring making things all right....

Ritter: Wait a minute. That's only a beginning. The caring makes people *act*. And that's what it takes to make them realize they have power.

Senior: What kind of power?

Ritter: The power to put people into office—and to take them out. Politicians respond to the people who write them—people who care, people who vote. Letters are a good way for your readers to start. And before long, they'll be voting. They can vote against the uncaring politicians and judges and the do-nothing district attorneys.

Senior: But statistics show that not many young people actually vote.

Ritter: I know! That's immoral and irresponsible. I hear young people say that their vote doesn't count. But they don't even try to find out if that's true. They may shake their heads over a problem like teenage prostitution, but they don't try to *do* anything.

Senior: But why should they *really* care—about a problem that seems so far away?

Ritter: I thought I already gave them some good reasons. But here's another. Some day, they will have children of their own. And they have to decide if they want those children growing up in a world where young people are bartered like sacks of potatoes. They can't afford to wait until then... until those children are teenagers and maybe thinking of running away. That will be too late. The problem can't be—won't be—stopped overnight. It's going to take time. And the time to start is *now*. □

Teen-Age Prostitutes

Adolescent prostitution has been receiving a great deal of attention in Minnesota, and particularly in the Twin Cities area of Minneapolis-St. Paul. The area is notorious as the home of many young girls who are now working as prostitutes in New York City, Chicago, and California; so notorious that one section of New York with numerous adolescent prostitutes has become known as the "Minnesota Strip."

Based on 3 years of direct fieldwork, Michael Baizerman, Jacquelyn Thompson, Kimaka Stafford-White, and "An Old, Young Friend"—an 18-year-old woman with five years' experience in prostitution—have written of this problem in *Children Today*.

In the Twin Cities area, girls of all races are involved in prostitution; their ages range from 13 to 18. Some have a male pimp, others do not, and many make a transition from working independently to working for a pimp. Generally speaking, most of the young prostitutes work "the street"—both actual city blocks and other specific locations, such as shopping malls and the areas around some bars and after-hours clubs. Most sex acts take place in cars, although some girls use apartments and, more rarely, motel and hotel rooms.

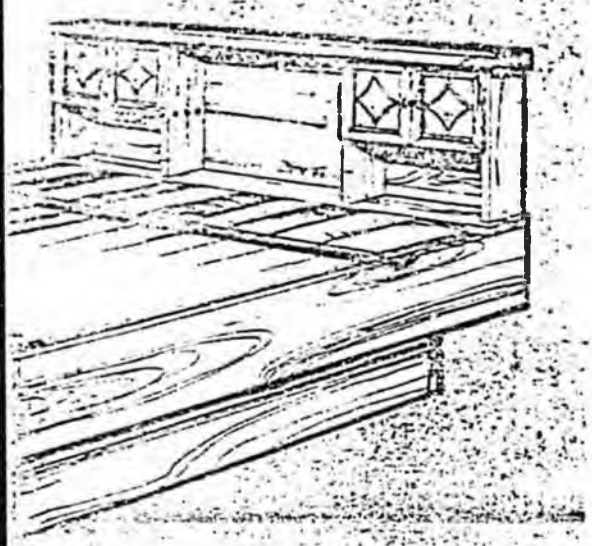
Many of the girls practice birth control; pills, followed by the IUD, are the two most popular forms. Since girls may begin using the pill at an early age, they may be at risk of resultant medical complications. Use of the IUD could lead, through violence during the sex act, to such serious problems as perforation of the cervix. Condoms seem to be used less as a pregnancy prophylactic than as a preventive for venereal disease.

Many girls do not know much about venereal disease, and what information they do have seems to be obtained from "the street." Some learn from experience that one consequence might be scar tissue on the fallopian tubes, which could prevent pregnancy. Generally, pimps take care of the medical and health expenses of their girls.

Many pimps working in neighborhoods and the metropolitan area do not use hard drugs and do not allow their girls to use them—hard drug use raises the risk of arrest and the cost of the pimp's operation. Hard drugs also compete with a pimp for the girl's dependency. This is not to say that many girls do not have a history of drug use or that some girls may not be intentionally introduced to drugs as a way to secure and control them. However, this latter pattern is more characteristic of interstate than of local patterns.

All of the pimps are male and most of the younger ones are black. Those who live in the neighborhood where the girls work—"popcorn" or "bubblegum" pimps, or "players"—are about 17, 18 and 19 years old, while those who come from outside the state are usually older, having moved up the "career ladder" from neighborhood pimp to small businessman. Black pimps tend to work on the street while white pimps, usually older, are more likely to be involved with more formally organized action such as call girls, saunas, and massage parlors.

In general, the younger pimps come from disadvantaged neighborhoods; they have relatively poor formal education, lack basic skills, and have few opportunities to obtain legitimate work. As a result, they are likely to be frustrated, angry, resentful, and unsure of themselves. They tend to use fear to control their girls and may attempt to hurt a girl or someone who tries to interfere with their operation. It is likely, however, that many of these young men will move out of pimping if other possibilities are found. Those who stay in it do so partly because there are few work opportunities. Most do not stay out of any great pathological or perverse need.



Older and more sophisticated pimps rarely use physical force on their women. Their method of control is psychological and emotional, with the goal of having the girls become totally dependent upon them.

The local buyers or Johns seem to be white men over 25 years of age, both married and single. We know that many have families of their own—and that some men ask for girls of their daughters' age.

Although a wide variety of sex acts are performed, most men seem to want oral sex or intercourse. The price varies according to the act and the time involved. For ordinary oral sex or intercourse, it is about $25. Other factors—whether the girl works for a pimp, the location of the pick-up, the nature of the sex act, and whether or not there is a big convention in town—also influence the cost.

Most of the action seems to take place from lunchtime to late afternoon, and then later in the evening. These afternoon times fit well within typical male working schedules and allow married men the opportunity to be home in the evening and still engage in—and protect—their activities.

Business hours are also determined by the girls' schedules. Since they may also be students in junior and senior high school, the girls may choose to work only after school. Afternoon hours are convenient for girls who live at home and work at prostitution part time, without parental knowledge.

sentence of 3 years

By TERRY CARR
Daily News reporter

A 29-year-old father of five was sentenced to three years in prison Wednesday for running a prostitution ring of teen-age girls.

Willie B. Bell, who has been in jail since he was arrested on pimping charges in May, is the first person to be convicted and sentenced to prison under a 1980 law outlawing the promotion of prostitution among juveniles, prosecutors said.

Superior Court Judge Milton Souter said he added one year to Bell's sentence because of testimony Wednesday by another jail inmate, William Smith. Smith told the court Bell Wednesday morning threatened to harm him and his daughter unless Smith gave testimony favorable to Bell.

Bell denied making the threat.

Souter ordered Bell to prison despite pleas from defense attorney Peter Mysing, who called his client's offenses "a detour in his life" and said Bell was an "adoring father."

If Souter gave him probation, Bell told the judge, "you'll never see me in another courtroom for anything."

Souter called the crimes for which Bell was convicted in October a "dirty business."

"This sentence has to serve as a deterrent" to Bell and others engaged in prostitution, he said.

Souter also said he was influenced heavily by trial testimony and evidence that the Bell used violence and the threat of violence to control the girls in his prostitution ring.

Teen-agers who worked for Bell testified during the trial that Bell often beat them and threatened to kill them.

Souter said "the great majority of women would not engage in prostitution" unless threatened with violence, lured with the promise of narcotics, or by other means of persuasion.

"Here, the powerful persuasion was threats of violence and, on at least one occasion, the use of violence," he said.

Bell, who sat silently throughout most of Wednesday's sentencing, spoke only to plead for probation and to contest the testimony of Smith, the inmate who claimed Bell had threatened him.

"I've been in jail," Bell said. "I learned my lesson in jail. I don't need to spend any more time in jail."

Smith, who was arrested here in December on an Arkansas theft charge, said he became friendly with Bell in jail. "You better get me out of this," Smith quoted Bell as telling him.

Smith, who at first refused to testify but relented under Souter's order, said Bell also threatened Smith's 14-year-old daughter unless Smith testified favorably.

Bell denied he threatened Smith or his daughter.

"All I told him was to come to court and testify and tell the truth," Bell said.

Souter, however, said he believed Smith and that he added a year to the sentence because of the threats.

"I think Mr. Bell needs to sit in jail and think about that. We're not going to tolerate that sort of behavior," Souter said.

Souter gave Bell credit for the 240 days he has already spent in jail. Bell will be eligible for parole after serving one-third of his sentence.

Willie Bell convicted in teen-ager prostitute case

By JULIE ANNE GOLD
Daily News reporter

Willie B. Bell, accused as a Fourth Avenue pimp, was convicted of inducing a 14-year-old girl into a life of prostitution by a Superior Court jury Thursday.

The 29-year-old Bell faces up to 10 years for the first-degree felony charge.

In a complex reading of six separate verdicts, the jury found Bell innocent of forcing two other girls, ages 15 and 16, into prostitution, but guilty of promoting them to become prostitutes.

These lesser, third-degree charges carry possible prison sentences of up to a year and 90 days.

Delivering its sixth verdict in the case, the jury found Bell guilty of managing and supervising a prostitution enterprise, other than in a place of prostitution. The felony offense holds a maximum sentence of five years in prison.

Bell, nervously looking around the nearly empty courtroom Thursdny, buried his heads in his hands after the clerk read the first "guilty" verdict.

"We plan to appeal," said Peter Mysing, Bell's attorney.

"All three ladies' testimony was damaging against Bell," Mysing said. "The issue was who was the jury going to believe."

Even though Bell admitted taking money that he knew came from prostitution from the 16-year-old, according to Msying, Bell never "caused" or "induced" the 14-year-old to become a prostitute.

However, the jury thought otherwise.

"There was definite evidence to support she was forced into prostitution," one juror said Thursday. "The photos showed she was beaten and bruised."

Prosecutor Martha Beckwith said the 14-year-old's testimony and a tape-recorded confrontation between Bell and the three girls probably were the most damaging evidence against Bell.

"He beat me real bad," a voice — identified by the state as belonging to the 14-year-old — said on the tape.

A series of color snapshots, passed from juror to juror, depicted the teen-ager with cuts and bruises on her face and arms.

However, the testimony of the older girls apparently did not convince the jury that Bell "forced" or "attempted to force" them into prostitution.

One of the girls, who admitted to being a prostitute before she met Bell, told the jury she was his lover for several months before his arrest.

"In her case, it was hard to tell what was a lovers' fight from a business fight," another juror said.

Another juror agreed, saying "there was just not enough evidence for a first-degree conviction" in connection with the two other girls.

But the jurors, gathered around Judge Milton Souter's third-floor jury room for the last time, all agreed there was plenty of evidence to convict Bell of the state's last charge — pimping for the three girls.

"The facts showed he drove them around" Fourth Avenue, one juror said, and "then waited and picked them up."

Mysing called this conviction a "surplus charge." The only way his client could be convicted of inducing the 14-year-old to become a prostitute, Mysing said Thursday, would be by pimping for her.

If Bell is sentenced to both charges the state will be guilty of double jeopardy, Mysing claimed.

Beckwith disagreed, saying she "was pleased" with the verdicts.

It was the first time "in at least four or five years" the state has successfully prosecuted someone for street pimping, she said.

Jury deliberates pimp case

By JULIE ANNE GOLD
Daily News reporter

The fate of Willie B. Bell, an Anchorage man accused of setting up three teenage girls in lives of prostitution, was being contemplated Wednesday night by a jury of six men and six women.

Closing arguments brought an end Wednesday to the eight-day trial in which three former teen-age prostitutes explained the ins and outs of working the streets of Anchorage to the jury.

Bell was arrested in May for allegedly forcing two of the girls, and attempting to induce the third, to engage in prostitution. He was also indicted on a fourth charge of illegally running a prostitution business.

If convicted, Bell, who has pleaded innocent to all the charges, could face up to 20 years in jail, according to the district attorney's office.

The case is the first time in many years the state has brought an alleged pimp to trial on felony charges, the district attorney's office said.

Prosecutor Martha Beckwith relied heavily Wednesday on the testimony of the three teenagers to prove the state's case against Bell.

Under oath the girls, ages 15, 16 and 17, pointed to the defendant — usually slouched in his chair — as their former pimp who often beat them and threaten to kill them for not making more money from "johns" or "dates."

Bell's lawyer, Peter Mysing, claimed Bell never agreed to be their pimp and that

they were free to leave him any time, but decided live with him while they — on their own —engaged in prostitution.

Mysing acknowledged Bell on occasion drove the girls downtown, accepted money from them and slapped them during "domestic" quarrels. However, he denied his client ever "induced or forced" them to be prostitutes.

In order to convict Bell on first-degree pimping charges, the state must prove he intended to cause or force the girls to engage in prostitution.

In an effort to discredit the girls' testimony, Mysing recounted Bell's testimony of driving one of the girls to the Big Timbers motel for a "date."

The room cost $37 and the girl received $20, Mysing said. Bell would have to be an "extremely bad pimp" if he had set up the meeting.

Beckwith defended the testimony of the girls. "She basically went through the wringer to come in and testify candidly," Beckwith said, defending the veracity of one of the girl's statements.

That girl admitted under cross-examination to being a prostitute and living with several men for a few months at a time before agreeing to live and work for Bell in January.

"Ladies and gentlemen, ask yourselves why Mr. Bell was involved with these young girls, these juveniles," Beckwith said. "Why did he give them rides" downtown, wait for them and pick them up.

"If it were not like men like Mr. Bell, perhaps juveniles would not run to the street. Bell performed a function on that street," Beckwith claimed.

If the jury reaches a verdict Wednesday, one court source said, the results would be sealed and not made public until this morning.

Stevens tells oil leaders state has good potential

By NANCY SHUTE
States News Service

WASHINGTON, D.C. — Sen. Ted Stevens, R-Alaska, told a meeting of oil and gas industry representatives exactly what they wanted to hear this week, promising Alaska energy reserves will rescue the United States from dependence on foreign oil.

Stevens, addressing the Gasmen's Roundtable here Tuesday, made the occasion a dress rehearsal for his upcoming stump of the West in support of Republican presidential candidate Ronald Reagan's energy policy.

"Gov. Reagan was absolutely right when he said that Alaska has the oil potential of Saudi Arabia," Steven said. "But I think he was too conservative. Alaska has the potential of becoming several Saudi Arabias."

Stevens also called for a renewed effort to pass an Alaska lands bill when Congress returns for a post-election lame duck session Nov. 12, advocating defeat of the bill proposed by Rep. Morris Udall, D-Ariz., a week ago in the final moments of the session.

"I am going to ask members to demand that the Udall bill be changed — that leasing begin on the Arctic Wildlife Range in 1981. That should be the goal of the lame duck session."

Stevens lambasted President Jimmy Carter's energy policy, terming it the "moral equivalent of surrender." He accused Carter of having gone one step further than previous presidents in locking up Alaskan oil leases, particularly in the Arctic Wildlife Range.

"There hasn't been a single onshore lease in Alaska's federal lands since 1965," the senator said. "Carter went one step further. He used the Antiquities Act to withdraw 100 million acres, and has fought to prevent any leasing or even seismic testing of the Arctic Wildlife Range."

The Department of Energy, created by Carter, has "virtually bogged down" domestic oil and gas production, Stevens claimed.

Not an original Reagan supporter, Stevens said his only quarrel with the candidate's energy policy was over synthetic fuels.

"I disagree with Reagan on the Synfuels Corporation," he said. "I support it so long as it is mandated to depend on private enterprise to develop new technology." Reagan opposes the federally-funded development of synthetic fuels production.

Prostitutes' survival — old but tricky business

"Oh, the Sisters of Mercy, they are not departed or gone."
— Leonard Cohen

by Krys Holmes
and Ellis E. Conklin
Times Writers

Under the neon lights of the Scandanavian Club, Denise, a 22-year-old hooker, stood alone Monday night.

After a deep yawn, she lit up a cigarette, kicked the slush from her maroon leather boots and ambled down The Avenue.

Few people walked by her. And those who did didn't seem to notice. Denise is a Fourth Avenue fixture like the drunks and the hot chili at the Panhandle Cafe.

At $50 a crack and several "tricks" a night, Denise can make as much as $600 to $1,000 a week. All the money, however, goes to her pimp. And, as one police officer put it: "They all say they work alone, but there isn't one girl out there who doesn't have a pimp."

The pimp takes care of her room and board, clothing, and the modest accessories necessary to perform nightly in this ancient profession.

"Things are quiet now," she said. "They (police) made the big bust and there ain't nothing left for 'em, 'cept for me and couple of other girls.

"I think they want to get the streets clean for Fur Rondy," Denise said bitterly.

She quickened her pace, turned the corner at Fourth and Barrow, and decided she "don't want to talk no more."

There aren't many prostitutes talking right now. After a crackdown last weekend, most of them are scared. Others are in hiding "until the heat cools down." And many of them are still in jail dressed in blue jump suits, waiting for their pimps to post bail.

In the past 72 hours, Anchorage police, dressed in street clothes, have made 54 arrests for loitering and solicitation. Some of the women were collared as many as three times during the weekend. Chief Brian Porter said he can't remember seeing that much jail activity in several years here.

During the weekend, Porter said, the streets were thick with prostitutes, and competition among the women was fierce. Some actually tried to stop traffic or climb into cars, Porter said. A police officer walking down the street discovered a prostitute with her "trick" having sex in the man's car. She got her $50 for the deal — and was arrested on the spot. One local woman said her husband was propositioned as they walked to a restaurant in the Sunshine Mall.

There were no customers arrested, and not a single pimp.

Police say many of the women now working the streets came from Canada, Hawaii and the West Coast. Some came for more money; some because Anchorage has long

See Trick, page A-4

Trick

(Continued from page A-1)

been a part of the prostitutes' migration pattern between Honolulu, Seattle, San Francisco and Los Angeles.

And for others, it is the promise of making a bundle during the Fur Rendezvous celebration that begins next weekend, and the military's Brim Frost maneuvers, that bring some 60,000 potential customers to Alaska to play war games in the Interior and see the sights of Anchorage afterward.

Tim Casper, a veteran on the vice squad, said the number of prostitutes on The Avenue rises and falls in a pattern. "It's something you can really count on," he said. "In January, they're all over, and they'll be that way until we put the pressure on them."

The "pressure" starts when the public outcry rises above a tolerant grumble. Until then, police are encouraged to spend the taxpayers' money going after the less visible crimes: robberies, rapes and burglaries.

But prostitution takes its toll on Anchorage's streets. Customers are rolled. Men are robbed by the women they willingly pay for, as the girls try to make more money for their "men."

Of the 23 murders that occurred in Anchorage in 1982, three of them were directly related to prostitution, police say. In two of the homicides, it was the hooker who killed. In the third, a pimp shot a girl's customer.

Caspar said 30 to 40 percent of all the robberies and at least 60 percent of the pickpocketing in Anchorage is related to prostitution and street people on Fourth Avenue.

"We could put a lot of man hours into trying to build a felony theft case against one guy, and get very poor results. Or we could use the same number of officers and drag a few of the prostitutes off the streets and clean it up for a while," he said.

"My theory is to arrest them on loitering charges, and enforce their (probation) restrictions. Let them know Anchorage isn't going to tolerate it. Maybe then they'll leave, and with them the pimps will go, and the crime will go, too."

Most of the women are charged with loitering for purposes of prostitution, a misdemeanor. Because state laws about prostitution are ambiguous, and because a woman will almost always say she works alone, men are seldom arrested, and rarely prosecuted.

In this business, men may pay the money, but the women pay the price.

Joanne Baker, 26, is six months pregnant. She was arrested for soliciting Sunday night. It was her second arrest for prostitution since coming to Anchorage from Miami last year.

There were no extra beds at the Sixth Avenue Jail Sunday night; she slept on the floor.

Looking haggard as she gazed through the plexiglass window in the vistor's room, Joanne scratched her stringy blonde hair. Her blue eyes were watery and her arms were speckled with small red blotches. She didn't want to talk, especially to a reporter.

She said she turned to selling her body after she couldn't find work as a bar maid. Asked about the weekend sweep, Joanne said, "Police, they told us it was because of Fur Rondy. That's why. That's why they're hitting on us."

And when she gets out on the streets again? "Well, we'll just move to a different area. There's always a different area to go to," she replied.

However, Joanne isn't sure how she is going to make bail. She appeared panicky. She says she has no pimp to fork out the $300. "I don't know how I'm going to get it. I don't know. I don't know. Maybe, I'll call a friend."

Joanne and 20 other women were arraigned Monday before District Court Judge John D. Mason. They sat in the courtroom chained together.

Most of them were given bail and a court date, with the provision that they no longer sell their wares in the downtown area between Third and Sixth, from D Street to Barrow.

But most of them will. And many will go to jail. For the second, third, even seventh and eighth times.

Scott Sidell, a municipal prosecutor, said he has seen the same faces and names over and over again. Their names and ages are usually phony. But those arrested are all too often teen-agers posing as adults. Girls, posing as women, selling off their childhood bit by bit in exchange for an allowance, or a home, for a man who says he loves them.

It's shortly before midnight and Veronica stood in the doorway of an adult book store. She pulled her rabbit fur coat tighter around her. Her eyes searched for a possible customer. But no one was around.

During a brief conversation, Veronica said she's not worried about the police clampdown on her livelihood. "We'll be trickling back out again. The cops do this a couple of times a year. No big deal."

Standing alone again later, she spotted a man wearing an Army fatigue jacket, walking slowly near the Elbow Room. She waited until he passed right in front of her before she said, "Hey, you want to party?"

Her breath formed a tiny white cloud as she spoke.

They walked quickly together, neither of them speaking.

RE: HB 128 "An Act raising the penalties for promoting child prostitution."

Child prostitution is a growing problem within the United States as well as within Alaska. Those who promote young people in prostitution commit a heinous crime and need to be punished to the fullest extent possible.

This bill raises the penalty for those who promote individuals under 16 years of age. The minimum penalty would change from four to seven years with the maximum sentence going from ten to twenty years.

Attached are a group of articles detailing areas of concern within the national and local press.

Children Today September/October 1979

ADOLESCENT PROSTITUTION

by Michael Baizerman, Jacquelyn Thompson, Kimaka Stafford-White and "An Old, Young Friend"

Adolescent prostitution is a topic of public and professional concern in many areas throughout the nation. It has been receiving a great deal of attention in Minnesota, and particularly in the Twin Cities area of Minneapolis-St. Paul. We are aware of our area's notoriety as the home of many young girls who are now working as prostitutes in New York City, Chicago and California. We could not help but be aware of the "Minnesota Strip" in New York City after the news coverage given to efforts of two local policemen to bring home some of the young people involved in prostitution there.

We are concerned, too, that sophisticated pimps are coming into Minnesota from other cities. Compared to many states, Minnesota is rich and until recently it has been an untapped resource as far as organized crime is concerned.

In response, public hearings have been held at city and state levels, and groups have been formed by government agencies and youth workers to study the situation and recommend actions. Programs have begun and legislation has been introduced at the state level.[1] Training sessions have been held for youth workers at the University of Minnesota and elsewhere, and public meetings have been called to present issues to parents and young people.

Michael Baizerman, Ph.D., is Associate Professor, Center for Youth Development and Research, and Associate Professor, Maternal and Child Health, University of Minnesota, Minneapolis. Jacquelyn Thompson and Kimaka Stafford-White are youth counselors with a Twin Cities youth agency. "An Old, Young Friend" is an 18-year-old woman with five year's experience in fee-for-service sex in Minneapolis-St. Paul and other cities.

Jodie Foster as a runaway teenage prostitute in the recent film "Taxi Driver."

Taken together, these activities have contributed to the Twin Cities becoming a center of inquiry and action on adolescent female prostitution. (Although there is certainly male prostitution in the Twin Cities area, it is apparently not as prevalent as it is in some other cities and not yet of the same public concern.)

Over a 3-year period, two of us have done direct fieldwork—casefinding, counseling and referral—with more than 300 young prostitutes in the Twin Cities area, including one of the coauthors of this article, "An Old, Young Friend." Most of these girls were native-born, from the Twin Cities or rural areas in the state, and about 70 percent had run away at some time. And, as part of a field study of the Center for Youth Development and Research at the University of Minnesota, three of us have interviewed the youth workers and some of these girls and their pimps. From them we have gathered observations and gained some understanding of the current phenomena of adolescent fee-for-service sex. This article is an introduction to our findings and observations.

A Brief History

Prostitution has been a fact of life in most of recorded history and children and youth have been sellers of sex for almost as long. Only since the early 1900s has youth been considered a separate stage of life; thus we can assume that many young people we now term youths were previously considered to be adults, whether they were involved in prostitution or in other, more conventional activities.

Prostitution by the young has been a form of slavery and of child labor. Young people worked as prostitutes to earn money for their families. Some of this activity was regulated by law—in England, for example, legislation set the minimum age for prostitution at 12 until 1874, at 13 in 1875 and at 16 in 1885.

Is the incidence of adolescent prostitution higher now than in the recent past? We don't know for sure, but we think that it is. We are also hearing more about it now. Some girls may become aware of prostitution as an "easy" way of earning money and decide to try it. Increased public awareness of adolescent fee-for-service sex often results in increased public pressure for police action, which in turn usually results in more arrests and prosecutions and, usually, "convictions." (These young people would be seen in juvenile court where there are hearings and depositions, not convictions.)

In addition, since young prostitutes work "the street" as opposed to working out of bars, hotels or parlors, they are more visible because they tend to congregate on the same streets.

Adolescent prostitution has also been linked to other contemporary youth problems: running away, physical and sexual abuse, incest and child pornography. Federal legislation passed last year, P.L. 95-225, is designed to protect children against sexual exploitation. It also extends the provisions of the Mann Act to apply to boys.

Prostitution in the Twin Cities

In the Twin Cities area, girls of all races are involved in prostitution; their ages range from 13 to 18. Some have a male pimp, others do not, and many make a transition from working independently to working for a pimp. As we have noted, most of the young prostitutes work "the street"—both actual city blocks and other specific locations, such as shopping malls and the areas around some bars and after-hours clubs. Most sex acts take place in cars, although some girls use apartments and, more rarely, motel and hotel rooms.

Many of the girls practice birth control; pills, followed by the IUD, are the two most popular forms. Since girls may begin using the pill at an early age, they may be at risk of resultant medical complications. Use of the IUD could lead, through violence during the sex act, to such serious problems as perforation of the cervix. Condoms seem to be used less as a pregnancy prophylactic than as a preventive for venereal disease.

Many girls do not know much about venereal disease, and what information they do have seems to be obtained from "the street." Some learn from experience that one consequence might be scar tissue on the fallopian tubes, which could prevent pregnancy. Generally, pimps take care of the medical and health expenses of their girls.

Many pimps working in neighborhoods and the metropolitan area do not use hard drugs and do not allow their girls to use them—hard drug use raises the risk of arrest and the cost of the pimp's operation. Hard drugs also compete with a pimp for the girl's dependency. This is not to say that many girls do not have a history of drug use or that some girls may not be intentionally introduced to drugs as a way to secure and control them. However, from what we have observed, this latter pattern is more characteristic of interstate than of local patterns.

All of the pimps are male and most of the younger ones are black. Those who live in the neighborhood where the girls work—"popcorn" or "bubblegum" pimps, or "players"—are about 17, 18 and 19 years old, while those who come from outside the state are usually older, having moved up the "career ladder" from neighborhood pimp to small businessman. Black pimps tend to work on the street while white pimps, usually older, are more likely to be involved with more formally organized action such as call girls, saunas and massage parlors.

In general, the younger pimps come from disadvantaged neighborhoods; they have relatively poor formal education, lack basic skills and have few opportunities to obtain legitimate work. As a result, they are likely to be frustrated, angry, resentful and unsure of themselves. They tend to use fear to control their girls and may attempt to hurt a girl or someone who tries to interfere with their operation. In our experience, however, many of these young men will move out of pimping if other possibilities are found. Those who stay in it do so partly because there are few work opportunities. We do not believe that most stay out of any great pathological or perverse need.

Older and more sophisticated pimps rarely use physical force on their women. Their method of control is psychological and emotional with the goal of having the girls become totally dependent upon them.

The local buyers or Johns seem to be white men over 25 years of age, both married and single. We know that many have families of their own—and that some men ask for girls of their daughter's age.

Although a wide variety of sex acts are performed, most men seem to want oral sex or intercourse. The price varies according to the act and the time involved. For ordinary oral sex or intercourse, it is about $25. Other factors—whether the girl works for a pimp, the location of the pick-up, the nature of the sex act, and whether or not there is a big convention in town—also influence the cost.

Most of the action seems to take place from lunchtime to late afternoon, and then later in the evening. These afternoon times fit well within typical male working schedules and allow married men the opportunity to be home in the evening and still engage in—and protect—their activities.

Business hours are also determined by the girls' schedules. Since they may also be students in junior and senior high

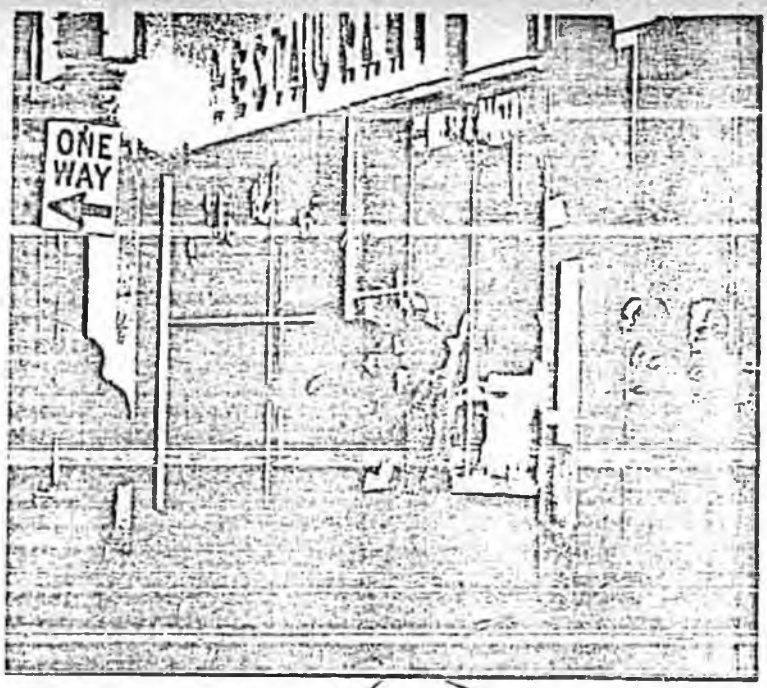
school, the girls may choose to work only after school. Afternoon hours are convenient for girls who live at home and work at prostitution part time, without parental knowledge.

Becoming A Teenage Prostitute

One pathway to prostitution is recruitment by a pimp. Why are some girls vulnerable to a pimp's advances? We believe that the risk of a girl being open to recruitment by a pimp increases with the following factors:

She may have a poor self-image. She is unattractive, possibly overweight and a "loner." She lacks knowledge of normal teenage boy-girl relationships, and she desires acceptance and attention. Aware of this, a pimp will take her to nice restaurants, buy her gifts and make her feel desirable.

She may be a runaway. Girls leave home for a variety of reasons, many of which reflect "healthy" or normal feelings of adolescents—the desire for adventure, to explore something new, to meet new people. Others, however, run away from problems, including physical and sexual abuse, family violence, other intrafamilial tensions and crises and problems with school, work or friends.



In our experience, it is the girl who runs away from abuse and/or family crises, who urgently wants and needs friendship, security and affection, who is most responsive to the solicitations of a pimp.

The need for money also makes a runaway—who is lonely, tired and hungry and has no place to go—vulnerable to such advances. Working for a pimp may seem to her to be a safe way to organize her work life—she sees him as offering protection against abuse and violence by the "trick," help with the police and the court and offering material and physical security.

To understand why and when these girls leave home is to understand a part of why they are vulnerable to a pimp. What is important here is not only the kind and severity of the incidents but the girl's experiences and understanding of these and her learned behaviors about being in her family. It is important to remember, however, that not all girls who run away from home respond to a pimp and go into prostitution.

Other girls who do not run away from home, but who experience similar personal and family problems, may also be vulnerable to a pimp's advances.

She may have friends in prostitution. She wants to be accepted by her peers, and she is impressed with the clothes, gifts and other material goods that a pimp provides.

She may be seeking . . . Some girls may be looking for a husband or a man to depend upon; others may seek material goods—expensive clothes, a big car, a luxurious apartment—which the pimp provides.

The girls described here usually do not know that they are being recruited for prostitution. In the first stage of the prostitution "career," a girl is picked out, or put at actual risk of "conversion," by others—other girls working for a pimp, a teenage boy who "fingers" or points her out to a pimp for money or status, or by others in the prostitution system. (In some cases, a girl may ask another prostitute to bring her into "the life.")

The pimp contacts the girl, begins dating her and, playing upon her normal interest in men and dating, works carefully to gain her love and trust—he gives her presents, takes her to parties and night spots and introduces her to sex with him. Because of her relative lack of normal girl-boy relationships—and, often, also because of less than ideal family relationships—she is responsive to him. Friends are probably as impressed with the pimp as she is and most likely will encourage her to see him.

During this time the girl, if she is living at home, begins staying out late or even all night, and family arguments arise from her behavior. The pimp reassures her that he wants and needs to see her more often; he tells her that her parents are interfering with their happiness, that they don't understand their love.

At this point the girl's ties to home are severely stretched or broken, and she may run away to live with her pimp. He introduces her to his friends and his other women and she finds a new "family" with them. When he asks her to perform sex with others for a fee, she agrees. She continues to show her love by working.

We believe that the "love approach" used by many pimps is a newer pattern in prostitution. Formerly, prostitution seems to have been more straightforward—the girl knew that she was a prostitute. Several of the girls we have talked with say that they are working to make a better life for themselves and their future husband.

From this stage, several "career lines" may be pursued. The girl may be promoted to another level in the prostitution system—moving from working on the street to working indoors, moving to another city or working for a more professional or full-time pimp.

Another line may lead to a change in the girl's status. She becomes pregnant. She may want to become a mother, or she may use her pregnancy as a way of getting out of the life. She may also see pregnancy as a way to keep her man.

Finally, the girl, as "business material," may be "used up" due to hard work, illness, violence, lack of physical stamina and use of drugs.

Working Independently

What about the girl who begins selling sex on her own? How does she learn about this "career," and why does she choose to try prostitution?

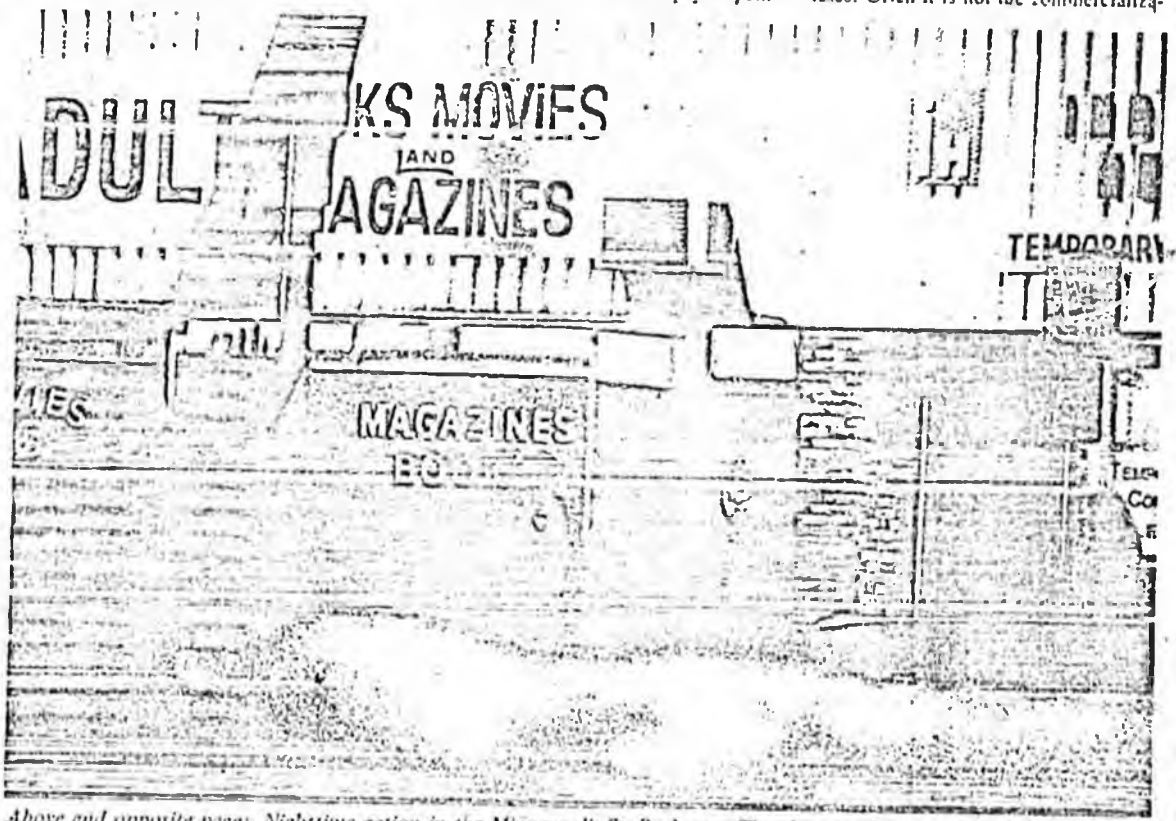
In our experience, most of the independent teenage prostitutes are poor, black and live in communities where they see other teenagers and women living at home and "working" as prostitutes. A girl is aware early of this social role and at some time may choose to try prostitution—and then decide to either stop or continue. Of course, most girls do not take this first step.

Within this perspective, the answer to why she decides to try prostitution is unique to each girl and could involve all of the personal, familial and situational factors described for girls who are recruited by pimps. However, the questions one would ask of a girl who began prostitution independently about why she chose to continue or take on a "manager" would be quite different from those one would ask of girls who were recruited by pimps.

Some girls simply need or want the money and think that prostitution provides an "easy" way of earning it. Because of the publicity given to runaways who engage in prostitution, this is a well-know pathway.

A girl who begins prostitution by working independently may "progress" to working for a pimp. Or, she may just experiment with prostitution for a short time and decide to stop. This is not an unusual pattern.

"Love" and Prostitution



Many adolescent prostitutes and youth workers believe that the main difference between many young prostitutes now and in the recent past is that the girls who now go into prostitution and stay in it do so because they are in love with their pimp.

We think that there is more to it than this, and believe it is useful to distinguish between using the word "love" to describe a total feeling and experience and using it to answer such questions as "Why did you get into prostitution?" and "Why do you stay in it?"

"Love" may be a good answer to these questions: it has the capability of changing the moral and/or psychopathological interpretation of a girl's status and behavior from something that is "bad" or "sick" to something only "sad" and "naive." "Love" is a culturally acceptable reason or explanation for feelings and behavior with which one may be uncomfortable, or which one may dislike or think will be unacceptable to others.

When asked to interpret what love means to them, young prostitutes have used such phrases as "feeling secure," "feeling cared for" and "being paid attention to." What we understand from these responses is that for some girls "prostitution" is not a reality. For them, what is real is that they are the pimp's "lady" or "woman"; this is what love means. (Girls in a "stable" compete with their "sisters" to be the pimp's "main woman" and work together to produce a good living for the pimp—and, thus, for themselves.)

It is precisely this reality which confounds many who seek to understand adolescent prostitution and which makes it so difficult to accept love as the answer to why young girls become prostitutes. Often it is not the commercializa-

Above and opposite page: Nighttime action in the Minneapolis-St. Paul area. The photographs were made from a special type of film used in police surveillance.

tion of sex which is at the root of our discomfort, nor is it the "immorality" of prostitution. Rather, it is the fraudulent manipulation of affection—the "con"—which outrages us. This is "puppy love" twisted and mauled for money and social status.

What Can Be Done?

To begin with a practical point, it should be noted that the involvement of some girls and young male pimps in fee-for-service sex is likely to continue. Efforts should be directed at controlling and keeping the phenomenon relatively small.

We see no simple or single way to control, reduce and/or prevent the phenomenon. No one social institution is solely responsible for action: police and courts alone are no more likely to achieve relative control and prevention than are education, counseling or "treatment." In most jurisdictions, no juvenile prostitution statutes exist. One could use petitions citing incorrigibility to hold the girls (the status offense group, or PINS) in detention homes until their cases are presented in juvenile court. However, in Minnesota, most of the depositions will not be to secure facilities, and the girl is able to return to the pimp.

A law enforcement approach directed toward the pimp will probably be futile. In our experience, attacks on the pimp only serve to bring the girl who loves him closer to him, and they simply move away or "go underground."

We have very little hope of discouraging pimping at the neighborhood level. Too many boys and men see the very few pimp "jobs" as the only ones open to them.

To arrest the buyers is an impossible task, given the size of a typical police force and the mobility of the pimps and girls. Laws focused on the buyer could be effective in raising the risk of going to a young prostitute, but it is likely that differential and selective enforcement of such laws would be seen. It may be easier to turn these men toward older prostitutes—assuming that their interest is in sex with a prostitute, not in sex with a teenager.

Regular customers can usually be spotted, since the girls stay in a relatively well-defined area. Reporters and photographers in the area and the threat of publicity could discourage some action. Community action could also be effective in keeping some men out of the area where young girls are working; however, this might be risky for those involved for some retaliation by pimps could be expected.

A better approach, we think, is to examine the pathways described earlier which lead to adolescent prostitution and to use the insights gained to design multiple ways of intervening. For example, in public meetings or in discussions in schools, community centers and social and youth agencies, adolescent girls could be informed about how pimps recruit, train and supervise girls. They should have opportunities to meet and learn from girls who have engaged in prostitution. Parents, too, should be involved in these meetings. Rather than using a "scare" approach, however, in our work we focus on the larger topics of dating and sexuality, making the point that dating is a normal adolescent activity, one which is fun and necessary to healthy development. Prostitution is presented as a distortion and manipulation of this normal activity. This approach could also be used in high risk neighborhoods and specifically with girls considered at high risk of becoming teenage prostitutes.

Also, the more parents and young people are aware of teenage prostitution and its patterns, the more likely it is that opposition to pimp activity in an area or school will develop.

Education, however, must be coupled with other approaches and actions. For girls who are already involved with a pimp, education is probably not effective. For very young prostitutes, those aged 12 to 15, a law enforcement approach may be the only viable way to achieve temporary separation of the girl from the pimp. However, we believe that many girls who are pulled away by police will try to return to their man.

For all young prostitutes, shelters must be available so that those who want to leave can do so at once, with the knowledge that they will be secure and protected from reprisals by pimps, parents or police. Shelters, or "safe houses," modeled after shelters for battered women, may be a home, a hotel room or part of a runaway house.[2] There girls have opportunities to talk about their experiences and to receive medical help and psychological and vocational counseling. Youth workers can spread the word "on the street" that options to leave do exist and will continue to be available. The girls must know that shelters can be used more than once, and that they will not have to pay—with money or with loss of self-respect—for going there. Getting this information to the girls and creating and sustaining such a service, however, are not simple tasks. In addition, there must be adequate protection—for both the girls and the workers—from retaliation by the pimp.

In the Twin Cities area, we are also making extensive use of street workers from youth agencies, who are available in the areas where the girls work to talk over feelings or problems, mediate crises with their families and pimps, and help them get to a safe house or obtain other assistance.

If all of these actions were undertaken simultaneously in a large city, it is likely that adolescent prostitution still would *not* disappear. Fewer young recruits might enter the life, but adolescent prostitution would probably continue on a lower level of activity and visibility. A community might be able to push out street prostitution, but it is much more difficult and dangerous to attack citywide, statewide and interstate organizations. To control these, Federal law enforcements powers are needed.

However, we do believe that effective action, in the form of public education, the provision of safe houses and the use of street workers, can be taken to reduce the number of young prostitutes. Clearly, there is no easy solution to adolescent prostitution, and we are only now beginning to address another problem: how to orient young girls, who may make as much as $200 a day in prostitution, toward a limited number of legitimate jobs in which they may be expected to earn, at best, a minimum wage. (Although girls working for a pimp turn their "earnings" over to him they receive, in return, support, lavish gifts and recognition from him.) And we must face the fact that there are few jobs for girls aged 12 to 16.

We emphasize that prostitution is, indeed, a dead-end job and provide vocational counseling and training to help them acquire skills for jobs which hold more promise for the future. ◘

---

[1] A metropolitan task force has recommended various legislation, including changes in laws which would increase time in prison for pimps and make it easier to convict them, and new legislation which would create service programs for the girls.

[2] In Minneapolis, for example, one shelter for young prostitutes and their children is funded by the Youth Development Bureau ACYF, as part of the Minneapolis Bridge runaway project.

Prostitutes' survival — old but tricky business

"Oh, the Sisters of Mercy, they are not departed or gone."
— Leonard Cohen

by Krys Holmes
and Ellis E. Conklin
Times Writers

Under the neon lights of the Scandanavian Club, Denise, a 22-year-old hooker, stood alone Monday night.

After a deep yawn, she lit up a cigarette, kicked the slush from her maroon leather boots and ambled down The Avenue.

Few people walked by her. And those who did didn't seem to notice. Denise is a Fourth Avenue fixture like the drunks and the hot chili at the Panhandle Cafe.

At $50 a crack and several "tricks" a night, Denise can make as much as $600 to $1,000 a week. All the money, however, goes to her pimp. And, as one police officer put it: "They all say they work alone, but there isn't one girl out there who doesn't have a pimp."

The pimp takes care of her room and board, clothing, and the modest accessories necessary to perform nightly in this ancient profession.

"Things are quiet now," she said. "They (police) made the big bust and there ain't nothing left for 'em, 'cept for me and couple of other girls.

"I think they want to get the streets clean for Fur Rondy," Denise said bitterly.

She quickened her pace, turned the corner at Fourth and Barrow, and decided she "don't want to talk no more."

There aren't many prostitutes talking right now. After a crackdown last weekend, most of them are scared. Others are in hiding "until the heat cools down." And many of them are still in jail dressed in blue jump suits, waiting for their pimps to post bail.

In the past 72 hours, Anchorage police, dressed in street clothes, have made 54 arrests for loitering and solicitation. Some of the women were collared as many as three times during the weekend. Chief Brian Porter said he can't remember seeing that much jail activity in several years here.

During the weekend, Porter said, the streets were thick with prostitutes, an competition among the women was fierce Some actually tried to stop traffic or clim into cars, Porter said. A police officer wal ing down the street discovered a prostitut with her "trick" having sex in the man' car. She got her $50 for the deal — and wa arrested on the spot. One local woman sai her husband was propositioned as the walked to a restaurant in the Sunshine Mall.

There were no customers arrested, an not a single pimp.

Police say many of the women now work ing the streets came from Canada, Hawai and the West Coast. Some came for mor money; some because Anchorage has lon

See Trick, page A-

Trick

(Continued from page A-1)

been a part of the prostitutes' migration pattern between Honolulu, Seattle, San Francisco and Los Angeles.

And for others, it is the promise of making a bundle during the Fur Rendezvous celebration that begins next weekend, and the military's Brim Frost maneuvers that bring some 60,000 potential customers to Alaska to play war games in the Interior and see the sights of Anchorage afterward.

Tim Casper, a veteran on the vice squad, said the number of prostitutes on The Avenue rises and falls in a pattern. "It's something you can really count on," he said. "In January, they're all over, and they'll be that way until we put the pressure on them."

The "pressure" starts when the public outcry rises above a tolerant grumble. Until then, police are encouraged to spend the taxpayers' money going after the less visible crimes: robberies, rapes and burglaries.

But prostitution takes its toll on Anchorage's streets. Customers are rolled. Men are robbed by the women they willingly pay for, as the girls try to make more money for their "men."

Of the 23 murders that occurred in Anchorage in 1982, three of them were directly related to prostitution, police say. In two of the homicides, it was the hooker who killed. In the third, a pimp shot a girl's customer.

Caspar said 30 to 40 percent of all the robberies and at least 60 percent of the pickpocketing in Anchorage is related to prostitution and street people on Fourth Avenue.

"We could put a lot of man hours into trying to build a felony theft case against one guy, and get very poor results. Or we could use the same number of officers and drag a few of the prostitutes off the streets and clean it up for a while," he said.

"My theory is to arrest them on loitering charges, and enforce their (probation) restrictions. Let them know Anchorage isn't going to tolerate it. Maybe then they'll leave, and with them the pimps will go, and the crime will go, too."

Most of the women are charged with loitering for purposes of prostitution, a misdemeanor. Because state laws about prostitution are ambiguous, and because a woman will almost always say she works alone, men are seldom arrested, and rarely prosecuted.

In this business, men may pay the money, but the women pay the price.

Joanne Baker, 26, is six months pregnant. She was arrested for soliciting Sunday night. It was her second arrest for prostitution since coming to Anchorage from Miami last year.

There were no extra beds at the Sixth Avenue Jail Sunday night; she slept on the floor.

Looking haggard as she gazed through the plexiglass window in the vistor's room, Joanne scratched her stringy blonde hair. Her blue eyes were watery and her arms were speckled with small red blotches. She didn't want to talk, especially to a reporter.

She said she turned to selling her body after she couldn't find work as a bar maid. Asked about the weekend sweep, Joanne said, "Police, they told us it was because of Fur Rondy. That's why. That's why they're hitting on us."

And when she gets out on the streets again? "Well, we'll just move to a different area. There's always a different area to go to," she replied.

However, Joanne isn't sure how she is going to make bail. She appeared panicky. She says she has no pimp to fork out the $300. "I don't know how I'm going to get it. I don't know. I don't know. Maybe, I'll call a friend."

Joanne and 20 other women were arraigned Monday before District Court Judge John D. Mason. They sat in the courtroom chained together.

Most of them were given bail and a court date, with the provision that they no longer sell their wares in the downtown area between Third and Sixth, from D Street to Barrow.

But most of them will. And many will go to jail. For the second, third, even seventh and eighth times.

Scott Sidell, a municipal prosecutor, said he has seen the same faces and names over and over again. Their names and ages are usually phony. But those arrested are all too often teen-agers posing as adults. Girls, posing as women, selling off their childhood bit by bit in exchange for an allowance, or a home, for a man who says he loves them.

It's shortly before midnight and Veronica stood in the doorway of an adult book store. She pulled her rabbit fur coat tighter around her. Her eyes searched for a possible customer. But no one was around.

During a brief conversation, Veronica said she's not worried about the police clampdown on her livelihood. "We'll be trickling back out again. The cops do this a couple of times a year. No big deal."

Standing alone again later, she spotted a man wearing an Army fatigue jacket, walking slowly near the Elbow Room. She waited until he passed right in front of her before she said, "Hey, you want to party?"

Her breath formed a tiny white cloud as she spoke.

They walked quickly together, neither of them speaking.

Jury deliberates pimp case

By JULIE ANNE GOLD
Daily News reporter

The fate of Willie B. Bell, an Anchorage man accused of setting up three teenage girls in lives of prostitution, was being contemplated Wednesday night by a jury of six men and six women.

Closing arguments brought an end Wednesday to the eight-day trial in which three former teen-age prostitutes explained the ins and outs of working the streets of Anchorage to the jury.

Bell was arrested in May for allegedly forcing two of the girls, and attempting to induce the third, to engage in prostitution. He was also indicted on a fourth charge of illegally running a prostitution business.

If convicted, Bell, who has pleaded innocent to all the charges, could face up to 25 years in jail, according to the district attorney's office.

The case is the first time in many years the state has brought an alleged pimp to trial on felony charges, the district attorney's office said.

Prosecutor Martha Beckwith relied heavily Wednesday on the testimony of the three teenagers to prove the state's case against Bell.

Under oath the girls, ages 15, 16 and 17, pointed to the defendant — usually slouched in his chair — as their former pimp who often beat them and threaten to kill them for not making more money from "johns" or "dates."

Bell's lawyer, Peter Mysing, claimed Bell never agreed to be their pimp and that

they were free to leave him any time, but decided live with him while they — on their own — engaged in prostitution.

Mysing acknowledged Bell on occasion drove the girls downtown, accepted money from them and slapped them during "domestic" quarrels. However, he denied his client ever "induced or forced" them to be prostitutes.

In order to convict Bell on first-degree pimping charges, the state must prove he intended to cause or force the girls to engage in prostitution.

In an effort to discredit the girls' testimony, Mysing recounted Bell's testimony of driving one of the girls to the Big Timbers motel for a "date."

The room cost $37 and the girl received $20, Mysing said. Bell would have to be an "extremely bad pimp" if he had set up the meeting.

Beckwith defended the testimony of the girls. "She basically went through the wringer to come in and testify candidly," Beckwith said, defending the veracity of one of the girl's statements.

That girl admitted under cross-examination to being a prostitute and living with several men for a few months at a time before agreeing to live and work for Bell in January.

"Ladies and gentlemen, ask yourselves why Mr. Bell was involved with these young girls, these juveniles," Beckwith said. "Why did he give them rides" downtown, wait for them and pick them up.

"If it were not like men like Mr. Bell, perhaps juveniles would not run to the street. He performed a function on that street," Beckwith claimed.

If the jury reaches a verdict Wednesday, one court source said, the results would be sealed and not made public until this morning.

Pimp gets sentence of 3 years

By TERRY CARR
Daily News reporter

A 25-year-old father of five was sentenced to three years in prison Wednesday for running a prostitution ring of teen-age girls.

Willie B. Bell, who has been in jail since he was arrested on pimping charges in May, is the first person to be convicted and sentenced to prison under a 1969 law outlawing the promotion of prostitution among juveniles, prosecutors said.

Superior Court Judge Milton Souter said he added one year to Bell's sentence because of testimony Wednesday by another jail inmate, William Smith. Smith told the court Bell Wednesday morning threatened to harm him and his daughter unless Smith gave testimony favorable to Bell.

Bell denied making the threat.

Souter ordered Bell to prison despite pleas from defense attorney Peter Myaing, who called his client's offense "a detour in his life" and said Bell was an "adoring father."

If Souter gave him probation, Bell told the judge, "you'll never see me in another courtroom for anything."

Souter called the crimes for which Bell was convicted in October a "dirty business."

"This sentence has to serve as a deterrent" to Bell and others engaged in prostitution, he said.

Souter also said he was influenced heavily by trial testimony and evidence that the Bell used violence and the threat of violence to control the girls in his prostitution ring.

Teen-agers who worked for Bell testified during the trial that Bell often beat them and threatened to kill them.

Souter said "the great majority of women would not engage in prostitution" unless threatened with violence, lured with the promise of narcotics, or by other means of persuasion.

"Here, the powerful persuasion was threats of violence and, on at least one occasion, the use of violence," he said.

Bell, who sat silently throughout most of Wednesday's sentencing, spoke only to plead for probation and to contest the testimony of Smith, the inmate who claimed Bell had threatened him.

"I've been in jail," Bell said. "I learned my lesson in jail. I don't need to spend any more time in jail."

Smith, who was arrested here in December on an Arkansas theft charge, said he became friendly with Bell in jail. "You better get me out of this," Smith quoted Bell as telling him.

Smith, who at first refused to testify but relented under Souter's order, said Bell also threatened Smith's 14-year-old daughter unless Smith testified favorably.

Bell denied he threatened Smith or his daughter.

"All I told him was to come to court and testify and tell the truth," Bell said.

Souter, however, said he believed Smith and that he added a year to the sentence because of the threats.

"I think Mr. Bell needs to sit in jail and think about that. We're not going to tolerate that sort of behavior," Souter said.

Souter gave Bell credit for the 240 days he has already spent in jail. Bell will be eligible for parole after serving one-third of his sentence.

Willie Bell convicted in teen-ager prostitute case

By JULIE ANNE GOLD
Daily News reporter

Willie B. Bell, accused as a Fourth Avenue pimp, was convicted of inducing a 14-year-old girl into a life of prostitution by a Superior Court jury Thursday.

The 29-year-old Bell faces up to 10 years for the first-degree felony charge.

In a complex reading of six separate verdicts, the jury found Bell innocent of forcing two other girls, ages 15 and 16, into prostitution, but guilty of promoting them to become prostitutes.

These lesser, third-degree charges carry possible prison sentences of up to a year and 90 days.

Delivering its sixth verdict in the case, the jury found Bell guilty of managing and supervising a prostitution enterprise, other than in a place of prostitution. The felony offense holds a maximum sentence of five years in prison.

Bell, nervously looking around the nearly empty courtroom Thursday, buried his heads in his hands after the clerk read the first "guilty" verdict.

"We plan to appeal," said Peter Mysing, Bell's attorney.

"All three ladies' testimony was damaging against Bell," Mysing said. "The issue was who was the jury going to believe."

Even though Bell admitted taking money that he knew came from prostitution from the 16-year-old, according to Maying, Bell never "caused" or "induced" the 14-year-old to become a prostitute.

However, the jury thought otherwise.

"There was definite evidence to support she was forced into prostitution," one juror said Thursday. "The photos showed she was beaten and bruised."

Prosecutor Martha Beckwith said the 14-year-old's testimony and a tape-recorded confrontation between Bell and the three girls probably were the most damaging evidence against Bell.

"He beat me real bad," a voice — identified by the state as belonging to the 14-year-old — said on the tape.

A series of color snapshots, passed from juror to juror, depicted the teenager with cuts and bruises on her face and arms.

However, the testimony of the older girls apparently did not convince the jury that Bell "forced" or "attempted to force" them into prostitution.

One of the girls, who admitted to being a prostitute before she met Bell, told the jury she was his lover for several months before his arrest.

"In her case, it was hard to tell what was a lovers' fight from a business fight," another juror said.

Another juror agreed, saying "there was just not enough evidence for a first-degree conviction" in connection with the two other girls.

But the jurors, gathered around Judge Milton Souter's third-floor jury room for the last time, all agreed there was plenty of evidence to convict Bell of the state's last charge — pimping for the three girls.

"The facts showed he drove them around" Fourth Avenue, one juror said, and "then waited and picked them up."

Mysing called this conviction a "surplus charge." The only way his client could be convicted of inducing the 14-year-old to become a prostitute, Mysing said Thursday, would be by pimping for her.

If Bell is sentenced to both charges the state will be guilty of double jeopardy, Mysing claimed.

Beckwith disagreed, saying she "was pleased" with the verdicts.

It was the first time "in at least four or five years" the state has successfully prosecuted someone for street pimping, she said.

Society November/December, 1979

grams for prevention and treatment. Their paper is the first to address adolescent abuse from the standpoint of a combination of factors, involving parents, children and social stresses, and is intended to guide future work on the subject.

Teen-Age Prostitutes

Adolescent prostitution has been receiving a great deal of attention in Minnesota, and particularly in the Twin Cities area of Minneapolis-St. Paul. The area is notorious as the home of many young girls who are now working as prostitutes in New York City, Chicago, and California; so notorious that one section of New York with numerous adolescent prostitutes has become known as the "Minnesota Strip."

Based on 3 years of direct fieldwork, Michael Baizerman, Jacquelyn Thompson, Kimaka Stafford-White, and "An Old, Young Friend"—an 18-year-old woman with five years' experience in prostitution—have written of this problem in *Children Today*.

In the Twin Cities area, girls of all races are involved in prostitution; their ages range from 13 to 18. Some have a male pimp, others do not, and many make a transition from working independently to working for a pimp. Generally speaking, most of the young prostitutes work "the street"—both actual city blocks and other specific locations, such as shopping malls and the areas around some bars and after-hours clubs. Most sex acts take place in cars, although some girls use apartments and, more rarely, motel and hotel rooms.

Many of the girls practice birth control; pills, followed by the IUD, are the two most popular forms. Since girls may begin using the pill at an early age, they may be at risk of resultant medical complications. Use of the IUD could lead, through violence during the sex act, to such serious problems as perforation of the cervix. Condoms seem to be used less as a pregnancy prophylactic than as a preventive for venereal disease.

Many girls do not know much about venereal disease, and what information they do have seems to be obtained from "the street." Some learn from experience that one consequence might be scar tissue on the fallopian tubes, which could prevent pregnancy. Generally, pimps take care of the medical and health expenses of their girls.

Many pimps working in neighborhoods and the metropolitan area do not use hard drugs and do not allow their girls to use them—hard drug use raises the risk of arrest and the cost of the pimp's operation. Hard drugs also compete with a pimp for the girl's dependency. This is not to say that many girls do not have a history of drug use or that some girls may not be intentionally introduced to drugs as a way to secure and control them. However, this latter pattern is more characteristic of interstate than of local patterns.

All of the pimps are male and most of the younger ones are black. Those who live in the neighborhood where the girls work—"popcorn" or "bubblegum" pimps, or "players"—are about 17, 18 and 19 years old, while those who come from outside the state are usually older, having moved up the "career ladder" from neighborhood pimp to small businessman. Black pimps tend to work on the street while white pimps, usually older, are more likely to be involved with more formally organized action such as call girls, saunas, and massage parlors.

In general, the younger pimps come from disadvantaged neighborhoods; they have relatively poor formal education, lack basic skills, and have few opportunities to obtain legitimate work. As a result, they are likely to be frustrated, angry, resentful, and unsure of themselves. They tend to use force to control their girls and may attempt to hurt a girl or someone who tries to interfere with their operation. It is likely, however, that many of these young men will move out of pimping if other possibilities are found. Those who stay in it do so partly because there are few work opportunities. Most do not stay out of any great pathological or perverse need.

Older and more sophisticated pimps rarely use physical force on their women. Their method of control is psychological and emotional, with the goal of having the girls become totally dependent upon them.

The local buyers or Johns seem to be white men over 25 years of age, both married and single. We know that many have families of their own—and that some men ask for girls of their daughters' age.

Although a wide variety of sex acts are performed, most men seem to want oral sex or intercourse. The price varies according to the act and the time involved. For ordinary oral sex or intercourse, it is about $25. Other factors—whether the girl works for a pimp, the location of the pick-up, the nature of the sex act, and whether or not there is a big convention in town—also influence the cost.

Most of the action seems to take place from lunchtime to late afternoon, and then later in the evening. These afternoon times fit well within typical male working schedules and allow married men the opportunity to be home in the evening and still engage in—and protect—their activities.

Business hours are also determined by the girls' schedules. Since they may also be students in junior and senior high school, the girls may choose to work only after school. Afternoon hours are convenient for girls who live at home and work at prostitution part time, without parental knowledge.

The Tragedy of Teenage Prostitution

by FATHER BRUCE RITTER with BOB WEINSTEIN

We must face the shocking facts, says a Catholic priest, and care enough to try to change them.

"I am not going to make it. I am going to die out there. The streets are going to kill me." He was 17 years old. We'll call him Louis. He was talking to one of the co-authors of this article, the Reverend Bruce Ritter, a 52-year-old Franciscan priest. Two years ago, Father Ritter started Covenant House. It is a shelter for teenagers, most of them runaways, who roam the sinful streets around Times Square in midtown New York.

Wherever there are large numbers of runaways, teenage prostitution is a fact. The problem is already very bad—and getting worse—in cities such as New York, Los Angeles, Miami, and Houston. But it's not just a big-city problem. Those runaways come from almost every corner of the United States. Fleeing or kicked out of their homes, they come to the cities with dreams of glamor and fun.

The Federal Bureau of Investigation keeps statistics on runaways. Between 600,000 and one million young people run away from home every year, the FBI reports. Not all of these, of course, end up in prostitution. In fact, quite a few return home very soon. But almost all teenage prostitutes start out as runaways.

These teenage runaways cannot get honest work. They have not finished school. Rightly or wrongly, they don't want to go home. Or maybe they don't have a home, or parents, anymore. Or maybe their parents don't want them to come home.

Over the past 18 months, 8,000 homeless young people have come to Covenant House. There, they can get a good night's sleep, eat nourishing meals, and clean up. Perhaps most important of all, they can talk about their lives with the volunteers who work there. Like Louis, who fears "the streets are going to kill me," 60 percent of the young people who show up at Covenant House are involved in prostitution.

At 17, Louis has been a hustler for three years. He didn't finish school and can't write very well. He's an alcoholic. He drinks every day, he says, to try to forget what he has to do to survive. He is a naturally bright person who, maybe, could have led a more "normal" life. But his chances, now, of leading anything like a normal life are just about zero.

Teenage runaways head for cities — and ruined lives. Father Ritter fights to save them.

What do volunteer workers say to teenagers like Louis who come to Covenant House and similar shelters around the country? The volunteers have only one hope: to try to convince a teenager that he or she has other choices in life. Maybe (a volunteer may suggest) going back home is better than staying

Few things get Father Ritter to put aside his work for Covenant House—even for a little while. This article was one of them. We are grateful to Father Ritter and to his co-author, Bob Weinstein, a frequent contributor to this magazine.

Senior Scholastic 2/8/79

on the streets. But many of these teenagers just can't believe that they can change their lives, that they have any choices at all.

So, they go back on the streets. Hundreds of them have been held prisoner, tortured, raped. Some of them have been murdered. One 16-year-old girl—we'll call her Alice—was held prisoner for a week, after a pimp picked her up in New York's Port Authority Bus Terminal. Alice was drugged, raped repeatedly, but finally escaped. Her pimp found her again and told her he had to have her back. He said he owned her. Besides, Alice was worth thousands of dollars a month to him.

Police have identified about 1,000 pimps in just the New York City midtown area. Each one usually controls between two and four girls like Alice. The prostitute is the "property" of the pimp. Each girl is expected to bring the pimp a certain amount of money a day, usually around $200. She has to. If she doesn't, a brutal beating is about the best she can hope for.

Prostitution has been called a "victimless crime." That means a crime that doesn't hurt anybody. But that leaves out all the young people who are beaten, tortured, held prisoner. And what about those who are murdered? What about the ones who commit suicide out of hopelessness and desperation?

These are the victims. But who, really, are they? Here are some statistics from Covenant House. Fifty percent of the teenage prostitutes are black; 18 percent are Spanish-speaking; 25 percent are white. The rest are of mixed ethnic backgrounds. Seventy-five percent are boys. The median age of both boys and girls is about 17: Almost one-half of them are 17 or younger. Nineteen out of 20 come from one-parent families. If they come from two-parent families, there is almost always alcoholism in the family.

Seventy-five percent of teenage prostitutes are children of the poor. Most of them have suffered child abuse. They have either been thrown out or walked out of homes that have broken up, or homes where there seems to be no love or understanding left.

To an experienced pimp, these needs for attention and security are easy to spot—and easy to prey on. A lot of scared young girls, for example, want to believe that the smooth, expensively dressed young men who seem to fall for them really care. The rude awakening often comes when the girl is asked to prove her love by repaying the man for his generosity. She can repay him, he tells her, by selling her body and making money for them both. For her, it can seem like her only option.

Meanwhile, the "sex industry" is booming. And teenage prostitution and pornography, too, get bigger every day. Business has never been better. Why? There are probably just two answers. They are two of the seven deadly sins—greed and lust. There is big money in selling sex. Greed makes people go after that money. The money comes from other people who lust after children and teenagers. And, of course, the greedy ones want to make sure money keeps rolling in. They are for the most part linked to what we know as organized crime. They have a big stake in being deadly efficient—for them, sex is a $4-billion-dollar-a-year industry. □

Father Bruce Ritter— On Stopping Teenage Prostitution

Senior: With all you've seen—all the pain and suffering—do you think it's possible to end the problem?

Father Ritter: I do. It seems, though, that very few people really want to do anything.

Senior: Do what? You make it sound as if individuals—young individuals—can do something. But is that realistic? What have adults, politicians, the police been able to do?

Ritter: Very little. But I think that's because they've only given lip service to the problem. But they've made little effort to stop it. The problem grows worse every day. But young people can care. Caring is a good way to start. If their sister or brother or close friend were on a street corner, it wouldn't be so hard to care. Caring is the first step in accepting responsibility—for yourself and for others.

Senior: That sounds good. But it also sounds like a lot of other things people have said before about love and caring making things all right....

Ritter: Wait a minute. That's only a beginning. The caring makes people *act*. And that's what it takes to make them realize they have power.

Senior: What kind of power?

Ritter: The power to put people into office—and to take them out. Politicians respond to the people who write them—people who care, people who vote. Letters are a good way for your readers to start. And before long, they'll be voting. They can vote against the uncaring politicians and judges and the do-nothing district attorneys.

Senior: But statistics show that not many young people actually vote.

Ritter: I know! That's immoral and irresponsible. I hear young people say that their vote doesn't count. But they don't even try to find out if that's true. They may shake their heads over a problem like teenage prostitution, but they don't try to *do* anything.

Senior: But why should they *really* care—about a problem that seems so far away?

Ritter: I thought I already gave them some good reasons. But here's another. Some day, they will have children of their own. And they have to decide if they want those children growing up in a world where young people are bartered like sacks of potatoes. They can't afford to wait until then... until those children are teenagers and maybe thinking of running away. That will be too late. The problem can't be—won't be—stopped overnight. It's going to take time. And the time to start is *now*. □

ALASKA NETWORK ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT

P.O. BOX 809

JUNEAU, ALASKA 99802

586-3650

POSITION PAPER

HB128: An Act raising the penalties for promoting child prostitution

The Alaska Network on Domestic Violence and Sexual Assault is a non-profit corporation composed of twenty-one programs statewide that provide domestic violence, sexual assault, and adult crisis intervention services to members of their respective communities. Network programs are funded in part through grants and contracts awarded by the Council on Domestic Violence and Sexual Assault.

The Network was established in 1978, and has as one of its primary focuses the elimination of domestic violence and sexual assault through provision of shelter, advocacy, and education/prevention services.

The Network supports the intent of HB128 in its efforts to discourage the perpetration of abusive behavior towards minors.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

If enacted, House Bill No. 128 would raise the penalties for promoting child prostitution from a Class B felony to a Class A felony.

* No data is available to indicate the frequency of this crime, the number of arrests or convictions. Therefore, no estimate can be made as to the fiscal impact if this legislation enacted. Since statistical data is not available, it is assumed that this offense is rarely encountered and any potential fiscal impact would be minimal, particularly since the bill is only raising an existing crime to a classification with longer sentences.

re HB 127

① - could you find if there are any statistics on actual deterent effect of increasing sentences by 1/5

② - what effect would these bills (117, 127, 128) have on # of prisoners in jail or under authority of corrections over a 5 year period (average)

Staff Report
House bills 117,127,128
January 27, 1983

HB 117:

Under current statute, sexual abuse of a minor under 16 years of age is a class C felony.

As proposed by HB 117:

1. Sexual abuse of a minor under 13 years of age is a offense in the first degree and is a class B felony.

2. Sexual abuse of a minor aged 13 to 16 is sexual abuse in the second degree and is a class C felony.

HB 127:

Under current statute, the first felony conviction for sexual assault in the first degree, not involving firearms, use of a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 8 years. The proposal will change that sentence to 10 years.

Under current statute, the first felony conviction for sexual assault in the first degree involving firearms, a dangerous instrument, or causing serious physical injury requires a presumptive sentence of 10 years. HB 127 changes that sentence to 12 years.

HB 128:

Under current statute, promoting prostitution is a class B felony. HB 128 provides that inducing or causing a person under 16 years of age to engage in prostitution is a class A felony.

RE: HB 127 " An Act to increase the punishment for sexual assault in the first degree."

The scope of this bill is to increase the punishment for those convicted of sexual assault in the first degree.

First degree sexual assault includes rape of any person, attempted rape with serious physical injury to the victim, any sexual involvement with a person under 13 years of age, and incest.

The specific punishment increases are outlined within HB 127.

SUMMARY: HB 137 "AN Act making a supplemental appropriation to the Department of EDucation for the retirement of school construcion debts; and providing for an effective date."

Section 1. THe supplemental appropriation requested is broken down further as two requests:

1. $5,522.0 - This amount is the difference between the 'estimated' and 'actual' claims from the municipalities under the new program as enacted last year. HB 279 (Chp. 92 SLA 82) removed the two year lag time for state reimbursement of the municipal debt retirement. It also raised the reimbursement rate from 80% to 90%.

43.18.100 - STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT.(copy attached) This section outlines the formula used for the state reimbursement.

$7,577.7 - Shortfall due to an attempt by last year's Legislature to utilize the Cigarette Tax Revenues to fund a portion of the entitlement.

Section 2. Immediate effective date clause.

Sec. 43.18.100. State aid for retirement of school construction debt. (a) During each fiscal year, the state shall allocate to a municipality that is a school district, the following sums:

(1) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction;

(2) 90 percent of

(A) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1977 and before July 1, 1978 to pay costs of school construction;

(B) cash payments made after June 30, 1976 and before July 1, 1978 by the municipality during the fiscal year two years earlier to pay costs of school construction;

(3) 90 percent of

[illegible] the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1978 and before January 1, 1982 to pay costs of school construction projects approved under AS 14.07.020(11);

(B) cash payments made after June 30, 1978 and before July 1, 1982 by the municipality during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(11);

(4) subject to (h) and (i) of this section 90 percent of

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after December 31, 1981 to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1982 by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11).

(b) The commissioner shall administer the program of reimbursement authorized under this section and shall provide by regulation for the filing of applications for reimbursement, the form of proof of costs for which application for reimbursement is made, and other regulations necessary to administer the program. The commissioner shall exclude from the total school construction cost of the local district all state and federal funds included in these costs except funds provided under this section and AS 43.50.140. In approving applications for reimbursement, the commissioner shall

(1) offset against the amount of reimbursement authorized the amount of any funds distributed to the borough or city in the second preceding fiscal year from the school fund provided for in AS 43.50.140;

(2) Repealed by § 10 ch 92 SLA 1982.

(c) The school construction account is established. Funds to carry out the provisions of this section may be appropriated annually by the legislature to the account. If amounts in the account are insufficient for the purpose of providing the share to which a borough or city is entitled under this section, those funds that are available shall be distributed pro rata among the eligible local governments.

(d) Money in the school construction account which, at the end of the fiscal year for which the money is appropriated, exceeds the amount required for the allocations authorized in this section reverts to the general fund.

(e) The commissioner shall annually provide a report to the legislature on allocations of state aid made under this section, including but not limited to, the amount of state aid paid on a per capita and per student basis and the resultant effect on the rate of levy of taxes by the municipality for educational purposes.

(f) Repealed by § 17 ch 147 SLA 1978.

(g) In this section, unless the context requires otherwise,

(1) "commissioner" means the commissioner of education;

(2) "costs of school construction" means the cost of acquiring, constructing, enlarging, repairing, remodeling, equipping or furnishing of public elementary and secondary school buildings and includes the sum total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

(h) An allocation under (a)(4) of this section for school construction begun after July 1, 1982, shall be reduced by the amount of money used for the construction of residential space, hockey rinks, planetariums, saunas, and other facilities for single purpose sporting or recreational uses that are not suitable for other activities. An allocation under (a)(1) of this section may not be reduced by the amount of money used for construction of a small swimming pool, tank, or water storage facility used for water sports. However, an allocation shall be reduced by the difference between the amount of money used to construct a swimming pool that is competition size or larger and the amount of money that would have been used to construct a small swimming pool, tank, or water storage facility, as determined by the commissioner.

(i) For the purposes of (a)(4) of this section

(1) an indebtedness for bonds is incurred after the bonds are sold;

(2) reimbursement for a cash payment may only be made after the payment is made to a vendor; and

(3) payments may not be made for costs that are incurred under a contract after the contract has been released. (§ 1 ch 249 SLA 1970; am § 1 ch 93 SLA 1971; am § 2 ch 137 SLA 1972; am § 1 ch 28 SLA 1973; am § 47 ch 127 SLA 1974; am §§ 1 — 3 ch 120 SLA 1977; am §§ 12, 17 ch 147 SLA 1978; am § 25 ch 168 SLA 1978; am §§ 8 — 10 ch 92 SLA 1982)

Effect of amendments. — The 1977 amendment, beginning "including but not limited to" in paragraph (2) of subsection (g), substituted "the sum total of all costs of financing and carrying out the project" for "but is not limited to the costs of acquisition of sites, legal, engineering, fiscal, architectural and other fees of specialists or consultants, costs of labor, materials, equipment and supplies, costs of authorization, issuance and sale of bonds, notes, or other evidences of debt" at the end of the first sentence and added the second sentence.

The 1978 amendment, effective July 1, 1978, substituted "80 per cent" for "50 per cent" at the beginning of paragraph (2), substituted "June 30, 1978 and before June 30, 1978" for "July 1, 1977" in subparagraphs (A) and (B) of paragraph (2), and added paragraph (3). The amendment also repealed subsection (f), which read "The provisions of (a)(2) of this section apply only to payments made before July 1, 1971. The provisions of (a)(3) of this section apply to payments made after June 30, 1971."

The second 1978 amendment, in paragraph (2) of subsection (g), substituted "the sum total of all costs of financing and carrying out the project" for "but is not limited to the costs of acquisition of sites, legal, engineering, fiscal, architectural and other fees of specialists or consultants, costs of labor, materials, equipment and supplies, costs of authorization, issuance and sale of bonds, notes, or other evidences of debt" at the end of the first sentence and added the second sentence.

The 1982 amendment, effective July 1, 1982, substituted "a municipality that" for "an organized borough or a city which" in the introductory language of subsection (a), substituted "the municipality" for "the borough or city" in paragraphs (1), (2)(A) and (B), and (3)(A) and (B), substituted "90 percent" for "80 percent" in the introductory language of paragraphs (2) and (3), inserted "and before January 1, 1982" in paragraph (3)(A) and (B), and added paragraph (4). The amendment also repealed paragraph (2) of subsection (b), which read "required the borough or city to provide, with its application, a certified copy of the notice to taxpayers required by AS 43.18.030," and added subsections (h) and (i).

Editor's notes. — AS 43.18.030, referred to in paragraph (2) of subsection (b), was repealed by § 11, ch. 155, SLA 1980. For programs of municipal assistance, see AS 29.88.010 — 29.95.030.

Sec. 43.18.105. Public school facilities construction advance account. The public school facilities construction advance account is established. The account consists of appropriations for distribution under AS 43.18.105 — 43.18.135 to boroughs and cities which are school districts to assist in paying the costs of public school facilities projects approved under AS 14.07.020(10) for which construction is commenced after June 30, 1978 and for which no bonding, notes, or other indebtedness was incurred before July 1, 1978. (§ 13 ch 147 SLA 1978)

Sec. 43.18.110. Eligibility. Eligibility of a proposed construction project for funding assistance under AS 43.18.105 — 43.18.135 shall be determined by the department based on standards and criteria established by regulation. The standards and criteria to be considered in determining eligibility include the following:

(1) emergency requirements;

(2) number of unhoused students;

(3) new elementary or secondary programs;

(4) existing community and school facilities and their condition; and

(5) economic and social stability of the community. (§ 13 ch 147 SLA 1978)

(§ 16 ch 187 SLA 1955)

ules to expenditure of tobacco — In order to insure that funds are used most effectively part of major rehabilitation, and major repair projects, the that expenditures from such funds be made only after study and concurrence by the city school board, the city council, and the commissioner of education (now Department of Education). 1962 Op. Att'y Gen., No. 24.

CHAPTER 36.
CIGARETTE TAX ADMINISTRATION

Section
10. Cigarette tax distribution

4 AAC 36.010. CIGARETTE TAX DISTRIBUTION. (a) The term "rehabilitation, construction, and repair" of school facilities, as used in the Cigarette Tax Act, refers to major repair projects, and cigarette tax funds may not be used for projects which are properly considered as normal operating and maintenance expenses of the school districts. The commissioner has discretion to disapprove expenditures which he determines should not be made from cigarette tax funds.

(b) Purchase of equipment shall not be approved unless it is in connection with a construction or major repair or rehabilitation project. Prior approval, by the commissioner, of the projects shall be obtained if reasonable question appears as to whether or not they may be approved.

(c) For distribution, cigarette tax moneys are divided into two major divisions

(1) the regional educational attendance area districts' share is determined by the ratio between the average daily membership in all regional educational attendance area districts and the average daily membership for all school districts in the state;

(2) the share for city and borough school districts is determined by deducting the regional educational attendance area districts' share, determined under (1) of this subsection, from the total tax. Each district will receive a portion of this share in accordance with the following formula:

$$Ca = \frac{Cs - Es}{2}$$

$$Cp = \frac{Cs - Es}{2}$$

$$Cl = \frac{Ca}{At} \times Al + \frac{Cp}{Pt} \times Pl + El$$

C Cigarette tax
s Participating school districts
A Average daily membership
E Basic allotment or equalization fund
l Any individual school district
Cs Total state cigarette tax allocated to school districts
Cl Any individual district's share of cigarette tax
At Total ADM in participating school districts
Pt Total professional workers in participating district schools
Cp Portion of total tax to be allotted on basis of professional workers
Pl Number professional workers in any individual school district
El Basic allotment of $3,000 per year to each participating school district
Ca Portion of cigarette tax to be allotted on basis of ADM

(d) Other conditions:

(1) Collection periods run from July 1 to June 30, inclusive, of each year. Distribution is based on the total sum available in each collection period;

(2) To be eligible to participate in a distribution for a given collection period, the applicant shall meet the following requirements:

(A) A district must have been in operation as a district school for the entire collection period for which distribution is sought;

(B) Within 21 days following the closing of the collection period, all participating districts must submit to the commissioner a "Letter of Application" on forms to be provided by the commissioner. The "Letter of Application" shall include a full explanation of the intended use of cigarette tax funds or justification of the need of the funds;

(C) All district which have had a previous distribution shall submit within 45 days following the closing of the collection period, a complete "Statement of Expenditures," on forms to be provided by the commissioner. Assurance must be given that state and local sales taxes, and federal transportation, long distance, or telegram taxes were not paid;

(D) Income derived from the investment of cigarette tax funds shall become cigarette tax funds and shall be accounted for in the same manner;

(E) All districts shall submit any other reports on cigarette tax funds as may be prescribed from time to time by the commissioner;

(3) Repealed 5/10/78;

(4) All cigarette tax disbursements shall be made only upon the specific authorization of the local school board and the minutes of the board shall include a listing of the expenditures as approved. Custody of cigarette tax funds is the responsibility of the school board and funds shall not be turned over to any other body unless a specific obligation must be met;

(5) Each district school shall maintain a separate bank account for cigarette tax moneys and shall file with the commissioner the name of the cigarette tax account and the name of the bank in which the account is kept;

(6) If a district school disincorporates, any unobligated balance owed to or remaining in their cigarette tax account shall be forwarded to the commissioner to be deposited to the cigarette tax fund and shall be included in the funds of the collection period in which returned;

(7) The average daily membership of schools operated under contract for the department is not included for the purpose of determining a district's cigarette tax share. (In effect before 7/28/59; rewrite (no changes made concerning intent) 4/17/68, Reg. 24; am 5/10/78, Reg. 66)

DEPARTMENT OF ADMINISTRATION

February 24, 1983

Mae Tischer, Chairman
House Committee on Health & Social Services
Pouch V
Juneau, AK 99811

RE: HB 137 Supplemental Appropriation for School Debt Reimbursement

Dear Ms. Tischer:

I appreciate the opportunity to spend time with you on HB 137 providing for a supplemental appropriation for debt reimbursement. Would you share this letter with the members of your committee.

The Matanuska-Susitna Borough will have a school bond election on April 12, 1983 for a $20 million bond issue for construction of a new elementary school north and west of Wasilla and for renovation of the Palmer Junior High School, which was constructed in 1954.

We want to tell the voters how much this bond issue will cost them assuming that they have a $100,000 house, assuming a 10 or 20 year term, assuming present day interest rates, and assuming State reimbursement of school debt principal and interest at 90% as provided in HB 279, passed by the last session of the Legislature.

We believe that the voters are entitled to know how much the State will be paying for construction of schools in organized school districts and how much local taxpayers will be paying. We have always given voters this type of information with the expectation that it could be relied upon and, up until this last year, we have given voters information upon the basis of which they could make an informed choice. We thought we gave the voters reliable information on the last bond issue of about $15 million, but as it turned out we were pretty far off.

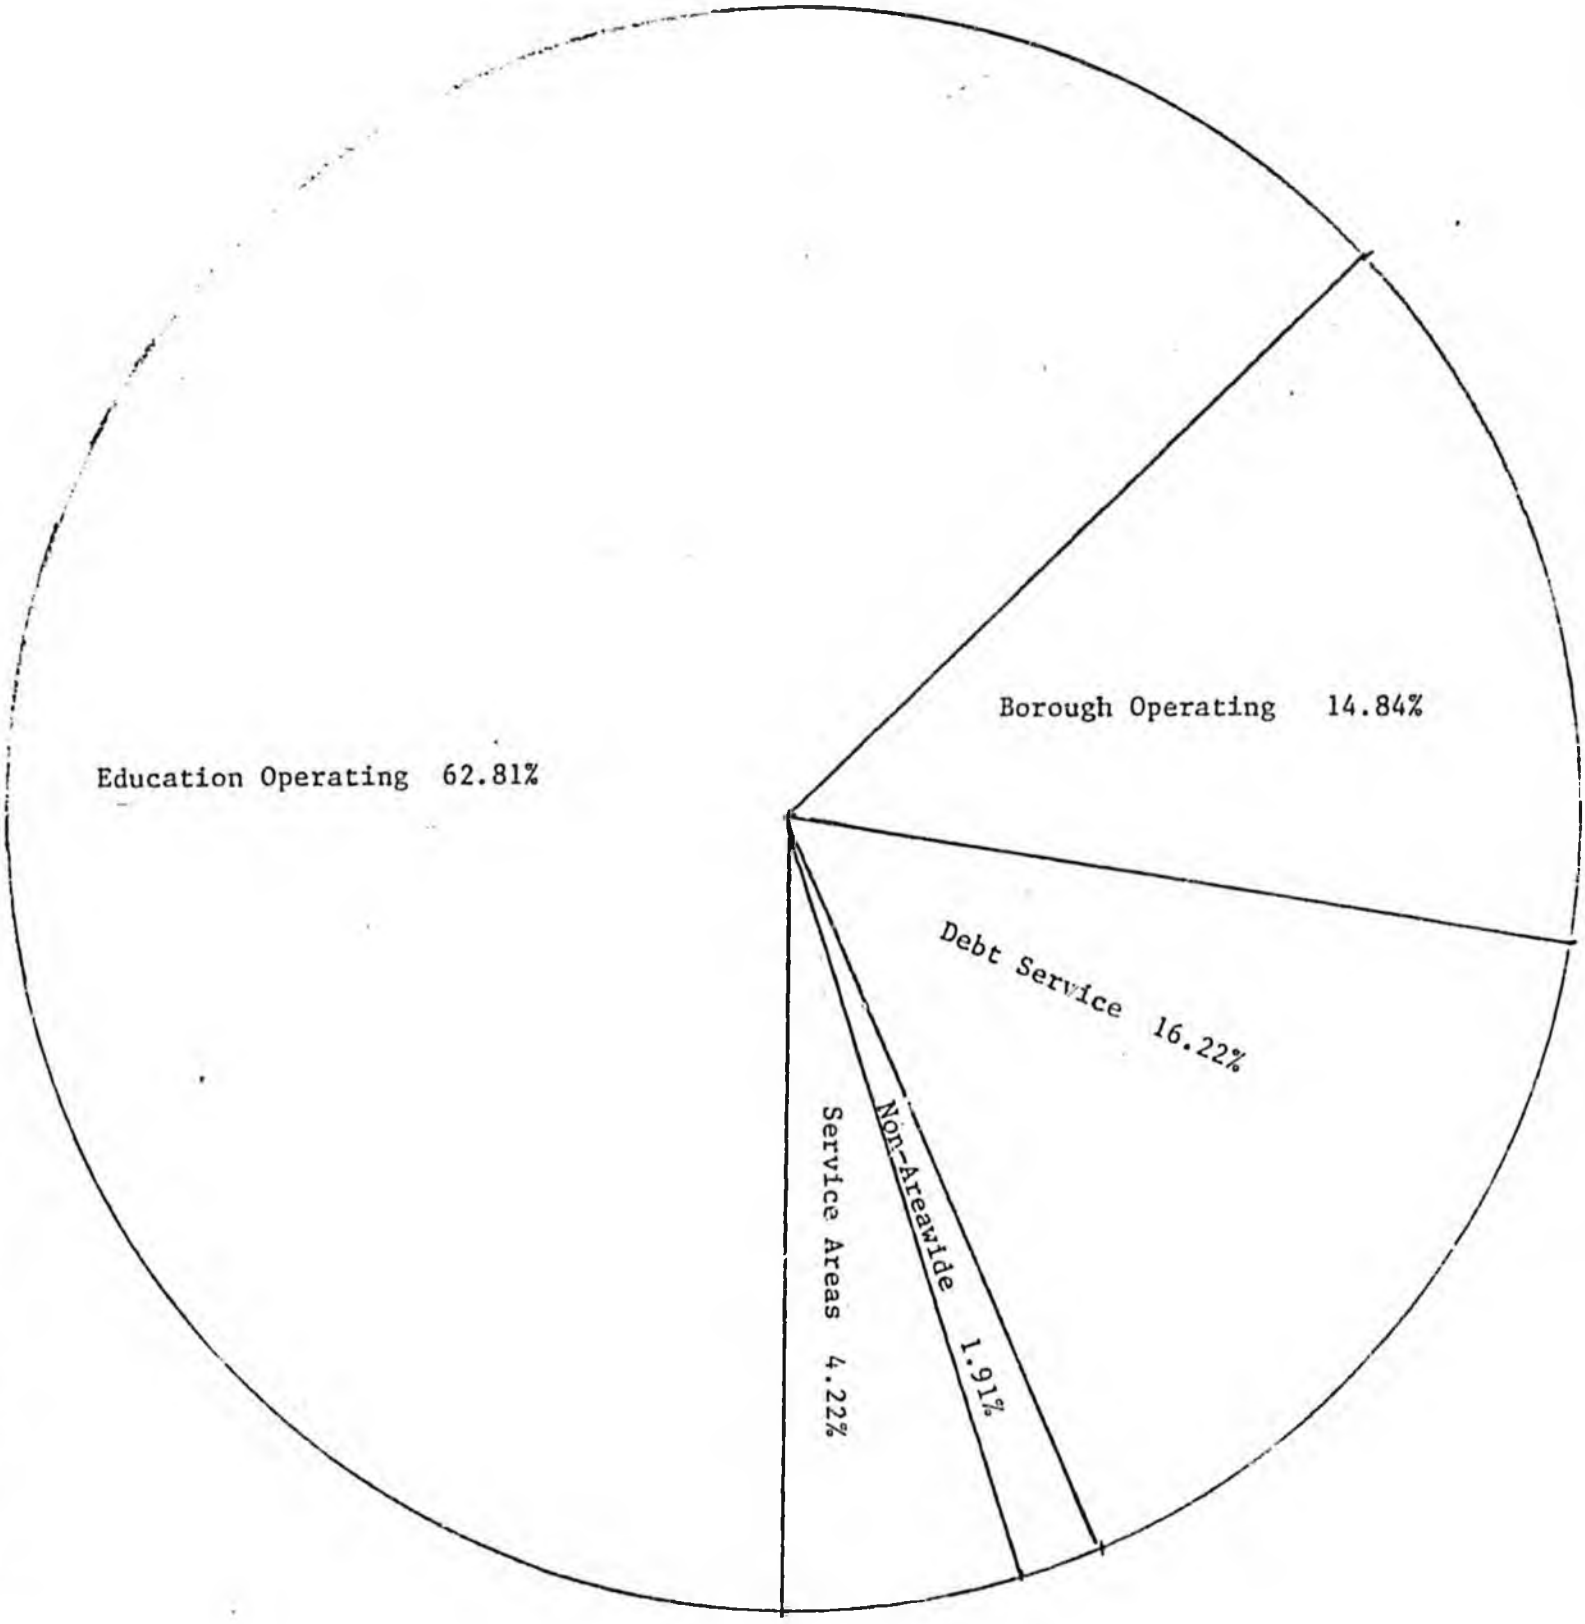
There was a sudden unexpected and unprecedented change in State policy toward school construction for this current fiscal year, which I think was based upon mistaken projections of school debt reimbursement requirements. The effect of this short-funding with respect to the recently incurred $15 million of school bonded indebtedness is $605,249 and the effect on previously incurred debt is $705,820 for a total shortfall of $1,311,069. The new debt, which will cause an unexpected increase in mill levy of about .6 mills, was funded at approximately 64% instead of the statutory 90%, and the old debt was funded at about 70% instead of the statutory 80%. The total effect of the short-funding on

our mill levy is approximately 1.3 mills since 1 mill raises about one million dollars in this Borough. Our current areawide mill levy is 4.9 so an unexpected 1.3 mill increase due to shortfunding affects our mill levy by about 25%.

I think that we were honest and reasonable in telling the voters what to expect when the last bond issue was put to a vote. I have been familiar with a history of state support for education going back into territorial days. Even though new State programs and other State programs have been phased out or reduced, there has been a consistency of support for education among the territorial legislatures and the State legislatures which I think we can be very proud of. I have seen the number of Anchorage schools increase from four in 1951 to 64 today, with very little double shifting over the years. In this Borough, we are going to have to build an average of about 1.5 schools a year if we are going to continue to see an 800 plus increase in students per year. We don't want to complain about the rapid increase in population in students that we have been experiencing. We want to solve these problems of growth in a responsible and consistent manner and we want to know what the ground rules are. We have not asked for 100% financing of new school buildings, because we are willing to shoulder a portion of the burden ourselves. So we are not asking for special treatment, or, for that matter, even treatment equal to that received by those who obtain 100% financing of new schools. We are asking for consistency and predictability in State school financing and believe that this ought to be a bedrock of State fiscal policy.

So, we do believe that HB 137 is a bill that fiscal conservatives ought to support as a matter of principle. We want to make good on our word because we think property taxpayers are entitled to accurate information.

I hope that the State HESS Committee will report out the bill with a strong and unanimous yes vote. Please let me know if you will have a teleconference on the bill.



Sincerely,

Gary Thurlow
Borough Manager

re: HB 137 - School Debt Supplemental Funding

The Alaska Municipal League supports HB 137 - Supplemental Appropriation for State Aid for the Retirement of School Construction Debt.

Several years ago the Legislature developed this program to reduce the inequities between the REAA's, where the state pays 100% of school construction costs and the municipal school districts, where the local taxpayers were footing the bill. The original program provided for a 80% reimbursement on a two-year time delay. Over the years, changes have been made, including giving the Department of Education plan approval authority and raising the percentage of reimbursement to 100% for payments on debt issued before July 1, 1977.

Last session, two other changes were made to the program. In order to partially alleviate the cash flow problems in rapidly growing areas that were caused by the two-year time delay in reimbursements, the program was modified last year to phase in a current year reimbursement program, providing for current year reimbursements of payments on debt issued after December 31, 1981. The other change made last year raised the percentage of reimbursement from 80% to 90% on debt issued after July 1, 1977.

The shortfall in FY 83 funding for this program was the result of two factors: incorrect application of tobacco tax receipts to this program and underestimation of the funding requirements for the current year reimbursement program. These problems should not reoccur because the tobacco tax issue has been clarified and the bugs should be worked out implementing the new section of the program.

MEMORANDUM State of Alaska

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89.2

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Debt Retirement Supplemental Request for post December 31, 1981 Indebtedness

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all claims for reimbursement under AS 43.18.100(a)(4), (current year reimbursement of school construction debt retirement payments).

ISSUE

Last year the legislature enacted legislation, (Chapter 92, SLA 1982), which provided for reimbursement to municipalities for school construction debt retirement payments in the same year in which they are made, rather than two years after they are made. The appropriation, based on the Alaska Municipal League estimate of FY 83 claims under this new program, was $13,466.4. Actual claims total $18,988.4, leaving the account $5,522.0 short.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with this request.

State aid for School construction debt retirement.

Chp. 92 SLA 82

(HB 279)

MEMORANDUM State of Alaska

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89.1

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Debt Retirement Supplemental Request for pre December 31, 1981 Indebtedness

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all claims for reimbursement under AS 43.18.100 (school construction debt retirement payments).

ISSUE

The department requested $44,103.3 for FY 83 debt retirement reimbursement claims under AS 43.18.100(a)(1)-(3), the two year lag reimbursement program. The legislature appropriated 36,203.3, assuming that that amount, in conjunction with the $7,000.0 appropriated in the Cigarette Tax category, would comprise a total sufficient to meet all claims. Actual claims for reimbursement for FY 83 total $43,781.0, and since the Cigarette Tax appropriation must be separate from the debt retirement appropriation, the debt retirement appropriation is $7,577.7 short.

BACKGROUND AND/OR PERTINENT INFORMATION

Because Cigarette Tax revenues are dedicated for school rehabilitation and renovation projects, there is a tendency to confuse them with school construction debt service payments reimbursement. However, debt retirement reimbursement is made on the basis of claims for payment, and Cigarette Tax revenues are disbursed on an entitlement basis, e.g., not every city and borough district has bonds eligible for debt retirement reimbursement, but all city and borough districts are entitled to receive Cigarette Tax payments. Therefore, the two appropriations must be distributed separately. Because of this distinction, only the actual appropriation for debt retirement could be used to pay the claims for reimbursement leaving a shortfall of 7,577.7 in that account.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with this request.

CATCH LINE
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT.

TEXT (A) DURING EACH FISCAL YEAR, THE STATE SHALL ALLOCATE TO A MUNICIPALITY THAT IS A SCHOOL DISTRICT, THE FOLLOWING SUMS:

(1) PAYMENTS MADE BY THE MUNICIPALITY DURING THE FISCAL YEAR TWO YEARS EARLIER FOR THE RETIREMENT OF PRINCIPAL AND INTEREST ON OUTSTANDING BONDS, NOTES OR OTHER INDEBTEDNESS INCURRED BEFORE JULY 1, 1977 TO PAY COSTS OF SCHOOL CONSTRUCTION;

(2) 90 PERCENT OF

(A) PAYMENTS MADE BY THE MUNICIPALITY DURING THE FISCAL YEAR TWO YEARS EARLIER FOR THE RETIREMENT OF PRINCIPAL AND INTEREST ON OUTSTANDING BONDS, NOTES OR OTHER INDEBTEDNESS INCURRED AFTER JUNE 30, 1977 AND BEFORE JULY 1, 1978 TO PAY COSTS OF SCHOOL CONSTRUCTION;

(B) CASH PAYMENTS MADE AFTER JUNE 30, 1976 AND BEFORE JULY 1, 1978 BY THE MUNICIPALITY DURING THE FISCAL YEAR TWO YEARS EARLIER TO PAY COSTS OF SCHOOL CONSTRUCTION;

(3) 90 PERCENT OF

(A) PAYMENTS MADE BY THE MUNICIPALITY DURING THE FISCAL YEAR TWO YEARS EARLIER FOR THE RETIREMENT OF PRINCIPAL AND INTEREST ON OUTSTANDING BONDS, NOTES OR OTHER INDEBTEDNESS INCURRED AFTER JUNE 30, 1978 AND BEFORE JANUARY 1, 1982 TO PAY COSTS OF SCHOOL CONSTRUCTION PROJECTS APPROVED UNDER AS 14.07.020(11);

(B) CASH PAYMENTS MADE AFTER JUNE 30, 1978 AND BEFORE JULY 1, 1982 BY THE MUNICIPALITY DURING THE FISCAL YEAR TWO YEARS EARLIER TO PAY COSTS OF SCHOOL CONSTRUCTION PROJECTS APPROVED UNDER AS 14.07.020(11);

(4) SUBJECT TO (H) AND (I) OF THIS SECTION 90 PERCENT OF

(A) PAYMENTS MADE BY THE MUNICIPALITY DURING THE CURRENT FISCAL YEAR FOR THE RETIREMENT OF PRINCIPAL AND INTEREST ON OUTSTANDING BONDS, NOTES OR OTHER INDEBTEDNESS INCURRED AFTER DECEMBER 31, 1981 TO PAY COSTS OF SCHOOL CONSTRUCTION, ADDITIONS TO SCHOOLS, AND MAJOR REHABILITATION PROJECTS THAT EXCEED $25,000 AND ARE APPROVED UNDER AS 14.07.020(11); AND

(B) CASH PAYMENTS MADE AFTER JUNE 30, 1982 BY THE MUNICIPALITY DURING THE FISCAL YEAR TWO YEARS EARLIER TO

PAY COSTS OF SCHOOL CONSTRUCTION, ADDITIONS TO SCHOOLS, AND MAJOR REHABILITATION PROJECTS THAT EXCEED $25,000 AND ARE APPROVED UNDER AS 14.07.020(11).

(B) THE COMMISSIONER SHALL ADMINISTER THE PROGRAM OF REIMBURSEMENT AUTHORIZED UNDER THIS SECTION AND SHALL PROVIDE BY REGULATION FOR THE FILING OF APPLICATIONS FOR REIMBURSEMENT, THE FORM OF PROOF OF COSTS FOR WHICH APPLICATION FOR REIMBURSEMENT IS MADE, AND OTHER REGULATIONS NECESSARY TO ADMINISTER THE PROGRAM. THE COMMISSIONER SHALL EXCLUDE FROM THE TOTAL SCHOOL CONSTRUCTION COST OF THE LOCAL DISTRICT ALL STATE AND FEDERAL FUNDS INCLUDED IN THESE COSTS EXCEPT FUNDS PROVIDED UNDER THIS SECTION AND AS 43.50.140. IN APPROVING APPLICATIONS FOR REIMBURSEMENT, THE COMMISSIONER SHALL

(1) OFFSET AGAINST THE AMOUNT OF REIMBURSEMENT AUTHORIZED THE AMOUNT OF ANY FUNDS DISTRIBUTED TO THE BOROUGH OR CITY IN THE SECOND PRECEDING FISCAL YEAR FROM THE SCHOOL FUND PROVIDED FOR IN AS 43.50.140;

(2) REPEALED BY SEC. 10 CH 92 SLA 1982.

(C) THE SCHOOL CONSTRUCTION ACCOUNT IS ESTABLISHED. FUNDS TO CARRY OUT THE PROVISIONS OF THIS SECTION MAY BE APPROPRIATED ANNUALLY BY THE LEGISLATURE TO THE ACCOUNT. IF AMOUNTS IN THE ACCOUNT ARE INSUFFICIENT FOR THE PURPOSE OF PROVIDING THE SHARE TO WHICH A BOROUGH OR CITY IS ENTITLED UNDER THIS SECTION, THOSE FUNDS THAT ARE AVAILABLE SHALL BE DISTRIBUTED PRO RATA AMONG THE ELIGIBLE LOCAL GOVERNMENTS.

(D) MONEY IN THE SCHOOL CONSTRUCTION ACCOUNT WHICH, AT THE END OF THE FISCAL YEAR FOR WHICH THE MONEY IS APPROPRIATED, EXCEEDS THE AMOUNT REQUIRED FOR THE ALLOCATIONS AUTHORIZED IN THIS SECTION REVERTS TO THE GENERAL FUND.

(E) THE COMMISSIONER SHALL ANNUALLY PROVIDE A REPORT TO THE LEGISLATURE ON ALLOCATIONS OF STATE AID MADE UNDER THIS SECTION, INCLUDING BUT NOT LIMITED TO, THE AMOUNT OF STATE AID PAID ON A PER CAPITA AND PER STUDENT BASIS AND THE RESULTANT EFFECT ON THE RATE OF LEVY OF TAXES BY THE MUNICIPALITY FOR EDUCATIONAL PURPOSES.

(F) REPEALED BY SEC. 17 CH 147 SLA 1978.

(G) IN THIS SECTION, UNLESS THE CONTEXT REQUIRES OTHERWISE,

(1) "COMMISSIONER" MEANS THE COMMISSIONER OF EDUCATION,

(2) "COSTS OF SCHOOL CONSTRUCTION" MEANS THE COST OF ACQUIRING, CONSTRUCTING, ENLARGING, REPAIRING, REMODELING, EQUIPPING OR FURNISHING OF PUBLIC ELEMENTARY AND SECONDARY SCHOOL BUILDINGS AND INCLUDES THE SUM TOTAL OF ALL COSTS OF FINANCING AND CARRYING OUT THE PROJECT; THESE INCLUDE, BUT ARE NOT LIMITED TO, THE COSTS OF ALL NECESSARY STUDIES, SURVEYS, PLANS AND SPECIFICATIONS, ARCHITECTURAL, ENGINEERING OR OTHER SPECIAL SERVICES, ACQUISITION OF REAL PROPERTY, SITE PREPARATION AND DEVELOPMENT, PURCHASE, CONSTRUCTION, RECONSTRUCTION AND IMPROVEMENT OF REAL PROPERTY AND THE ACQUISITION OF MACHINERY AND EQUIPMENT AS MAY BE NECESSARY IN CONNECTION WITH THE PROJECT, AN ALLOCABLE PORTION OF THE ADMINISTRATIVE AND OPERATING EXPENSES OF THE GRANTEE, THE COST OF FINANCING THE PROJECT, INCLUDING INTEREST ON BONDS ISSUED TO FINANCE THE PROJECT, AND THE COST OF OTHER ITEMS, INCLUDING ANY INDEMNITY AND SURETY BONDS AND PREMIUMS ON INSURANCE, LEGAL FEES, FEES AND EXPENSES OF TRUSTEES, DEPOSITARIES, FINANCIAL ADVISORS, AND PAYING AGENTS FOR THE

BONDS ISSUED AS THE ISSUER CONSIDERS NECESSARY.

(H) AN ALLOCATION UNDER (A)(4) OF THIS SECTION FOR SCHOOL CONSTRUCTION BEGUN AFTER JULY 1, 1982, SHALL BE REDUCED BY THE AMOUNT OF MONEY USED FOR THE CONSTRUCTION OF RESIDENTIAL SPACE, HOCKEY RINKS, PLANETARIUMS, SAUNAS, AND OTHER FACILITIES FOR SINGLE PURPOSE SPORTING OR RECREATIONAL USES THAT ARE NOT SUITABLE FOR OTHER ACTIVITIES. AN ALLOCATION UNDER (A)(4) OF THIS SECTION MAY NOT BE REDUCED BY THE AMOUNT OF MONEY USED FOR CONSTRUCTION OF A SMALL SWIMMING POOL, TANK, OR WATER STORAGE FACILITY USED FOR WATER SPORTS. HOWEVER, AN ALLOCATION SHALL BE REDUCED BY THE DIFFERENCE BETWEEN THE AMOUNT OF MONEY USED TO CONSTRUCT A SWIMMING POOL THAT IS COMPETITION SIZE OR LARGER AND THE AMOUNT OF MONEY THAT WOULD HAVE BEEN USED TO CONSTRUCT A SMALL SWIMMING POOL, TANK, OR WATER STORAGE FACILITY, AS DETERMINED BY THE COMMISSIONER.

(I) FOR THE PURPOSES OF (A)(4) OF THIS SECTION

(1) AN INDEBTEDNESS FOR BONDS IS INCURRED AFTER THE BONDS ARE SOLD;

(2) REIMBURSEMENT FOR A CASH PAYMENT MAY ONLY BE MADE AFTER THE PAYMENT IS MADE TO A VENDOR; AND

(3) PAYMENTS MAY NOT BE MADE FOR COSTS THAT ARE INCURRED UNDER A CONTRACT AFTER THE CONTRACT HAS BEEN RELEASED.

Linda please send a message to the Finance with HB 137 + indicate there is a potential problem that I foresee + that is accelerated rate payback of indebtedness i.e. — Presently the payback may range from 10-20 years. there is a trend for a shorter payback schedule like 3-6 years, which may increase the problem we are addressing ~~in~~ in HB 137. I hasten to point out that interest ~~[redacted]~~ payments would drop significantly + would therefore save money but that short payback schedule would require larger funds in shorter period of time.

Do you want this to go as a letter of intent - if so - the Committee must vote on it. no, just a regular memo to al. as a comment of concern.

MEMORANDUM

TO: Rep. Al Adams, Chairman
House Finance Committee

DATE: March 3,1983

FROM: Rep. Mae Tischer, Co-Chairperson
House HESS Committee

RE: HB 137

The House HESS Committee has passed out HB 137 with a do pass recommendation. During the discussion in regard to the supplemental appropriation for state aid for the retirement of school construction debt, the Committee focused briefly on the concern of a potential problem in the acclerated rate of reimbursements for indebtedness annually. Presently the payback may range from 10 to 20 years. There is a trend for a shorter payback schedule, possibly 3 to 6 years, which may increase the problem we are attempting to resolve in HB 137. I hasten to point out that interest payments would drop significantly and would therefore save money. However, the same short payback schedule would require larger appropriations in a shorter period of time.

re: HB 137 - School Debt Supplemental Funding

The Alaska Municipal League supports HB 137 - Supplemental Appropriation for State Aid for the Retirement of School Construction Debt.

Several years ago the Legislature developed this program to reduce the inequities between the REAA's, where the state pays 100% of school construction costs and the municipal school districts, where the local taxpayers were footing the bill. The original program provided for a 80% reimbursement on a two-year time delay. Over the years, changes have been made, including giving the Department of Education plan approval authority and raising the percentage of reimbursement to 100% for payments on debt issued before July 1, 1977.

Last session, two other changes were made to the program. In order to partially alleviate the cash flow problems in rapidly growing areas that were caused by the two-year time delay in reimbursements, the program was modified last year to phase in a current year reimbursement program, providing for current year reimbursements of payments on debt issued after December 31, 1981. The other change made last year raised the percentage of reimbursement from 80% to 90% on debt issued after July 1, 1977.

The shortfall in FY 83 funding for this program was the result of two factors: incorrect application of tobacco tax receipts to this program and underestimation of the funding requirements for the current year reimbursement program. These problems should not reoccur because the tobacco tax issue has been clarified and the bugs should be worked out implementing the new section of the program.

DEPARTMENT OF ADMINISTRATION

February 24, 1983

Mae Tischer, Chairman
House Committee on Health & Social Services
Pouch V
Juneau, AK 99811

RE: HB 137 Supplemental Appropriation for School Debt Reimbursement

Dear Ms. Tischer:

I appreciate the opportunity to spend time with you on HB 137 providing for a supplemental appropriation for debt reimbursement. Would you share this letter with the members of your committee.

The Matanuska-Susitna Borough will have a school bond election on April 12, 1983 for a $20 million bond issue for construction of a new elementary school north and west of Wasilla and for renovation of the Palmer Junior High School, which was constructed in 1954.

We want to tell the voters how much this bond issue will cost them assuming that they have a $100,000 house, assuming a 10 or 20 year term, assuming present day interest rates, and assuming State reimbursement of school debt principal and interest at 90% as provided in HB 279, passed by the last session of the Legislature.

We believe that the voters are entitled to know how much the State will be paying for construction of schools in organized school districts and how much local taxpayers will be paying. We have always given voters this type of information with the expectation that it could be relied upon and, up until this last year, we have given voters information upon the basis of which they could make an informed choice. We thought we gave the voters reliable information on the last bond issue of about $15 million, but as it turned out we were pretty far off.

There was a sudden unexpected and unprecedented change in State policy toward school construction for this current fiscal year, which I think was based upon mistaken projections of school debt reimbursement requirements. The effect of this short-funding with respect to the recently incurred $15 million of school bonded indebtedness is $605,249 and the effect on previously incurred debt is $705,820 for a total shortfall of $1,311,069. The new debt, which will cause an unexpected increase in mill levy of about .6 mills, was funded at approximately 64% instead of the statutory 90%, and the old debt was funded at about 70% instead of the statutory 80%. The total effect of the short-funding on

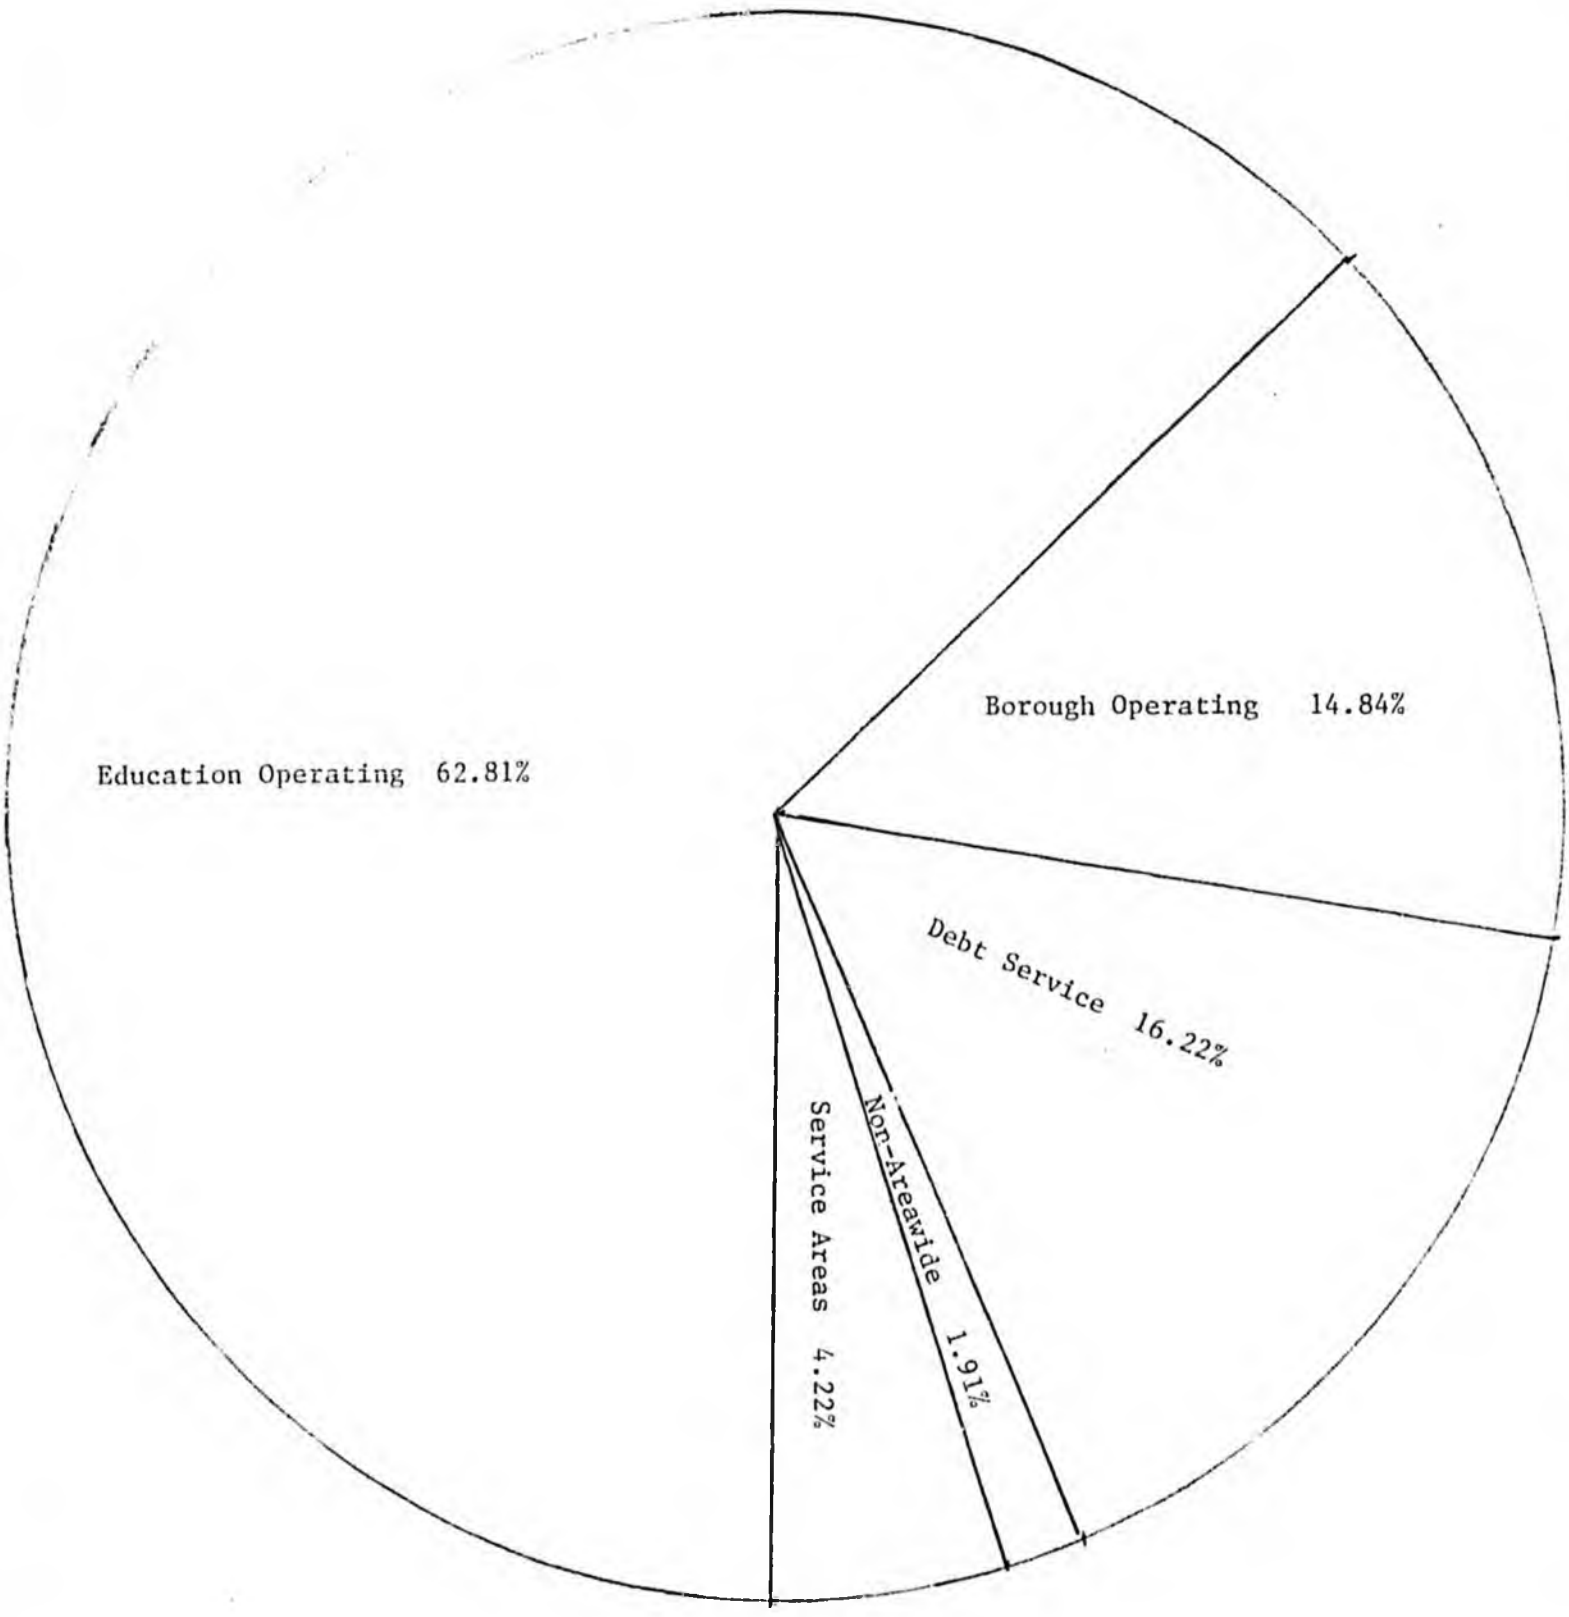
our mill levy is approximately 1.3 mills since 1 mill raises about one million dollars in this Borough. Our current areawide mill levy is 4.9 so an unexpected 1.3 mill increase due to shortfunding affects our mill levy by about 25%.

I think that we were honest and reasonable in telling the voters what to expect when the last bond issue was put to a vote. I have been familiar with a history of state support for education going back into territorial days. Even though new State programs and other State programs have been phased out or reduced, there has been a consistency of support for education among the territorial legislatures and the State legislatures which I think we can be very proud of. I have seen the number of Anchorage schools increase from four in 1951 to 64 today, with very little double shifting over the years. In this Borough, we are going to have to build an average of about 1.5 schools a year if we are going to continue to see an 800 plus increase in students per year. We don't want to complain about the rapid increase in population in students that we have been experiencing. We want to solve these problems of growth in a responsible and consistent manner and we want to know what the ground rules are. We have not asked for 100% financing of new school buildings, because we are willing to shoulder a portion of the burden ourselves. So we are not asking for special treatment, or, for that matter, even treatment equal to that received by those who obtain 100% financing of new schools. We are asking for consistency and predictability in State school financing and believe that this ought to be a bedrock of State fiscal policy.

So, we do believe that HB 137 is a bill that fiscal conservatives ought to support as a matter of principle. We want to make good on our word because we think property taxpayers are entitled to accurate information.

I hope that the State HESS Committee will report out the bill with a strong and unanimous yes vote. Please let me know if you will have a teleconference on the bill.

Sincerely,



Gary Thurlow

FISCAL YEAR 1983

MEMORANDUM State of Alaska

TO Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89.2

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Debt Retirement Supplemental Request for post December 31, 1981 Indebtedness

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all claims for reimbursement under AS 43.18.100(a)(4), (current year reimbursement of school construction debt retirement payments).

ISSUE

Last year the legislature enacted legislation, (Chapter 92, SLA 1982), which provided for reimbursement to municipalities for school construction debt retirement payments in the same year in which they are made, rather than two years after they are made. The appropriation, based on the Alaska Municipal League estimate of FY 83 claims under this new program, was $13,466.4. Actual claims total $18,988.4, leaving the account $5,522.0 short.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with this request.

Eligible 13,466,400	1st 70	Next 70	Granted @ 70.9190 paid	Paid	Difference in Thousands

State aid for school construction debt retirement.

Chp. 92 SLA 82

(HB 279)

MEMORANDUM State of Alaska

TO: Members, State Board of Education

DATE: December 30, 1982

FILE NO: 83-89.1

TELEPHONE NO: 465-2800

FROM: Office of the Commissioner

SUBJECT: FY 83 Debt Retirement Supplemental Request for pre December 31, 1981 Indebtedness

ABSTRACT

Funds appropriated by the last legislature are insufficient to cover all claims for reimbursement under AS 43.18.100 (school construction debt retirement payments).

ISSUE

The department requested $44,103.3 for FY 83 debt retirement reimbursement claims under AS 43.18.100(a)(1)-(3), the two year lag reimbursement program. The legislature appropriated 36,203.3, assuming that that amount, in conjunction with the $7,000.0 appropriated in the Cigarette Tax category, would comprise a total sufficient to meet all claims. Actual claims for reimbursement for FY 83 total $43,781.0, and since the Cigarette Tax appropriation must be separate from the debt retirement appropriation, the debt retirement appropriation is $7,577.7 short.

BACKGROUND AND/OR PERTINENT INFORMATION

Because Cigarette Tax revenues are dedicated for school rehabilitation and renovation projects, there is a tendency to confuse them with school construction debt service payments reimbursement. However, debt retirement reimbursement is made on the basis of claims for payment, and Cigarette Tax revenues are disbursed on an entitlement basis, e.g., not every city and borough district has bonds eligible for debt retirement reimbursement, but all city and borough districts are entitled to receive Cigarette Tax payments. Therefore, the two appropriations must be distributed separately. Because of this distinction, only the actual appropriation for debt retirement could be used to pay the claims for reimbursement leaving a shortfall of 7,577.7 in that account.

COMMISSIONER'S RECOMMENDATION

It is recommended that the Board concur with this request.

ALASKA AVIATION SAFETY FOUNDATION

PROPOSED

AVIATION SAFETY TRAINING PROGRAMS

CONTENT AND BUDGET
SUMMARY

1. Develop and validate the curriculum in the form of 25 lesson plans including instructor ("How to Teach") and student manuals for use by experienced Alaskan aviation operators (pilots, managers, etc.) when training both private and commercial operators to fly aircraft safely in Alaska generally and in specific regions of Alaska. The lesson plans will cover the following most hazardous of aviation operations:

   a. Gathering weather information

   b. Interpreting weather information and trends

   c. Landings and take-offs:
      1. Gravel and sand bars 2. Lakes 3. Tundra 4. Mud 5. Ice
      6. Beaches 7. Airstrips 8. Runways 9. Snow 10. Glaciers

   d. Flight techniques in adverse weather:
      1. Vertigo 2. Whiteouts/depth perception 3. Turbulence 4. Icing

   e. Navigation/Pilotage

   f. Mountain flying, general and specific pass flying

   g. Flight techniques - area specific

   h. Fuel management and handling

   i. Cold weather operations

   APPROXIMATE COST $573,400

2. Prepare one or two exemplary audio-visual presentations for use in teaching specific validated lesson plans.

   APPROXIMATE COST $180,000

   TOTAL ESTIMATE $753,400

It is anticipated that Department of Education will issue Request for Proposal bids based on the attached proposal and the Definition of Alaskan Aviation Training Requirements previously completed by the Foundation.

The cost estimates (detailed on next page) are Foundation estimates based on a single preliminary survey of potential contractors. Actual bids may be more or less than the estimate.

TOTAL:	$753,400.

Air carriers seek state-funded pilot training

Alaska Daily News 1-1-83

By CHUCK KLEESCHULTE
Daily News business reporter

Prompted by the promise of reductions in current sky-high insurance rates, Alaska air carriers are pushing hard to get a new pilot training program off the ground.

Air carriers over the weekend voted unanimously to seek $780,000 from the state's Legislature to fund the second stage of a proposed training program. It is designed so air taxi operators can offer courses for pilots and ground personnel tailor-made for Alaska weather and flying conditions.

"There is just no question that the aviation industry in this state needs more training. By additional training we can improve safety, cut accidents and reduce the rates air carriers pay for insurance," said Jim Dodson, an official of the newly formed Alaska Aviation Safety Foundation, sponsor of the new training program.

The Alaska Air Carriers Association in 1980, fresh on the heels of a National Transportation Safety Board report critical of air taxi operations in Alaska, hired American Airlines Training Corp. of Texas to study possible improvements in air carrier operations.

The American report completed last year stressed that Alaska's nation-leading air accident rate could be cut if pilots uniformly would be trained to handle Alaska aviation problems and be educated in safety practices so they would avoid wreckless behavior.

"We discovered when we studied Alaskan pilots that most needed more training to learn how to handle many uniquely difficult flying conditions. Flying in white-out conditions and flying where navigation is much more difficult make it important for Alaska pilots to be better trained than those in the Lower 48," says Michael K. Mitchell, an official of American Airlines Training Corp. "Flying out of Bethel daily requires more skill than a commercial 747 pilot ever needs," said Mitchell.

He says Alaska pilots, unlike those in the Lower 48, frequently have to fly by "dead reckoning" and by pilotage, using surface maps and landmarks to determine locations, rather than naglvational aides.

Mitchell said Alaska pilots especially face the danger of over-confidence prompting poor judgment in flight decisions, the so-called "Bush Syndrome."

To overcome such problems Mitchell proposes drafting pilot lessons especially tailored to Alaska problems, course manuals which Alaska air taxi operators will then use to satisfy Civil Aeronautics Board required refresher training.

Such training manuals, Mitchell said, could be written and in use by the end of 1984, provided funding for the safety program is found by this summer.

Lance Wells, executive director of the AACA, says the expenditure to fund the training program would ultimately benefit all air users through lower air fares, possible because of lower insurance liability premiums.

Dodson said several insurance firms have already promised to provide discounts to air taxi operators who complete the proposed safety program. He said the course also might attract other insurance firms to write policies for Alaskan air carriers.

At present only Lloyds of London underwrites aviation insurance given Alaska's high-risk loss history.

The possibility of lower rates is good news to an industry which already has seen nearly a dozen smaller operators go out of business during the past several years because of rapidly escalating insurance rates — the direct result of the state's high accident rate.

Alaska has a rate of non-fatal air accidents five times the rate of the Lower 48, a rate of fatal accidents twice the national average, says Alan L. Crawford, an NTSB regional investigator in Los Angeles.

Crawford during the carrier's annual convention in Anchorage Saturday urged Alaska officials to find funding for the safety program. Wells says carriers have received a commitment from the Sheffield administration to provide at least part of the amount needed for the program in the state's FY '84 budget now under development.

Wells, however, urged carriers to contact lawmakers to try to obtain full funding for the drafting of the training program.

Upgrade pilot training programs in Alaska

Alaska's air carriers have improved their aim considerably in efforts to shoot down the high cost of flying insurance. The target this legislative season is improved pilot training, and there is at least some chance of success.

Last year the industry sought help from Juneau in the form of legal limits to the financial liability facing air carriers in Alaska. Reducing the carriers' (and thus the underwriters') liability, it was thought, would translate into reduced insurance rates. But the legislation went nowhere — presumably because it pinpointed the wrong problem.

The problem with aviation and insurance coverage in Alaska is the high rate of accidents — not the legal responsibilities arising from them. And the high rate of accidents stems too often from human error arising from the combination of harsh weather, natural hazards, navigational difficulties and unwarranted overconfidence known as "the Bush syndrome."

Industry representatives tacitly admit as much in pressing for a state-funded pilot training program tailored to the special demands of Alaska flying conditions. "There is just no question that the aviation industry in this state needs more training," says Jim Dodson, an official of the Alaska Aviation Safety Program. "By additional training we can improve safety, cut accidents and reduce the rates air carriers pay for insurance."

There may be a battle over who will pay for the training. Air carriers have asked the legislature for $780,000 to fund the second stage of a proposed training program pitched to the needs of Alaska air taxi operators. The Sheffield administration apparently has expressed interest in picking up part of the tab, though a case also could be made for funding the program through a special levy on the industry.

There is little doubt of the pressures, challenges and risks associated with flying in Alaska. But the crucial factor in safely confronting those challenges is the human judgment of pilots who must know their profession better in Alaska than anywhere else in the country. "Flying out of Bethel daily requires more skill than a commercial 747 pilot ever needs," says an official of a company hired to study air carrier operations in Alaska.

That realization alone is enough to justify upgrading pilot training programs in our state. Aviation is a crucial lifeline to every corner of Alaska, and high insurance costs ultimately raise the cost of living throughout the Bush. Working to improve the competence and training of thousands of Alaska pilots can greatly improve the quality of life in dozens of communities that depend on them.

National Transportation Safety Board
Washington, D.C. 20594

Safety Information

FOR IMMEDIATE RELEASE

Tuesday
September 16, 1980

SB 80-78/3052
(202) 472-6100

Air taxis in Alaska have far higher accident rates than air taxis in the rest of the United States, the National Transportation Safety Board reported today in a special study.

Alaska's rate of nonfatal air taxi accidents per hour flown has been almost five times higher, and its fatal accident rate per hour more than twice, that of the rest of the country, the Board found.

The Board attributed the high rates to:

— The "bush syndrome," nourished by legends of Alaskan bush pilots, and other factors which today sometimes prompts air taxi pilots and passengers alike to take unwarranted risks to complete flights in the face of the state's unique environmental hazards.

— Inadequate airport facilities and pilots' frequent inability to obtain accurate information on airport conditions.

— Insufficient ground aids to navigation.

In 1974-78, Alaskan air taxi operators had a rate of 15.2 nonfatal accidents in every 100,000 hours, as compared with 3.3 in the rest of the country. The Alaskan rate of fatal accidents per 100,000 hours was 2.57; in the other states it was 1.11.

Sampling of Safety Board accident data showed that the pilot was cited as a causal or contributing factor in 85 percent of Alaskan air taxi accidents studied, as compared with 70 percent of similar accidents in the other states. The data also showed that most Alaskan accident pilots were experienced -- almost all had logged more than 1,000 hours, and 80 percent had more than 2,000 pilot hours.

The Board said Alaska air taxi operators believe the inadequacy of airport facilities and information on airport conditions are a significant factor in the state's air taxi accidents. And there is "virtual unanimity of opinion among

operators and pilots that runway conditions present a problem in much of rural Alaska" the Board reported.

Operators and pilots flying in the more rural areas also repeatedly cited the lack of navigation aids, inadequate observation of en route and destination weather, and inadequate dissemination of weather information when observations are made.

The Safety Board described as unprecedented for this or any other state a fiscal 1981 Alaska appropriation package totaling more than $51 million for further development of state aviation facilities. In combination with the Federal Aviation Administration's 10-year development plan for the state, improvements which the appropriation would finance could have a substantial impact on the safety of Alaska's aviation system, the Board said.

A series of 11 safety recommendations are incorporated in the Board's special study. Addressed to the State of Alaska, the FAA, and the Alaska Air Carriers Association, their goals include:

— Rapid completion of aviation projects to be funded by the $51 million appropriation.

— Centralization of authority and responsibility for planning operating and maintaining the State's aviation facilities.

— A comprehensive aviation system plan for Alaska.

— Permanent assignment of FAA operations and maintenance inspectors to Nome, Bethel and Ketchikan, and to "as many other regional hubs as possible."

— Continued development of weather data gathering and transmission facilities, including such new technology as weather observation by television and "meteor burst" communication which would transmit data from a single observation point in an Alaskan village simultaneously to all of the state's regional aviation hubs.

— Extension of the Alaska air carriers' safety program to specifically combat the "bush pilot syndrome."

The Safety Board's special study - "Air Taxi Safety in Alaska" will be available in approximately three weeks. Single copies may be obtained without charge by writing to the Publications Branch, National Transportation Safety Board, Washington, D.C. 20594. Multiple copies may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161.

Governor
State of Alaska
Juneau, Alaska 99801

SAFETY RECOMMENDATION(S)
A-80-96 through -100

The National Transportation Safety Board has studied the air taxi accidents which occurred in Alaska from 1974 through 1978. Accident data from the Safety Board's automated aviation accident data system for that period were analyzed by means of frequency distributions. Safety Board staff also visited Alaska to see the conditions under which the air taxi community operates, to discuss the community's attitudes and needs, and to examine the community's interaction with Federal and State agencies. While in Alaska, the Safety Board staff met with officials of the Federal Aviation Administration (FAA), the National Weather Service (NWS), the Alaska Department of Transportation and Public Facilities (DOT/PF), the Alaska Air Carriers Association, and 17 air taxi operators. 1/

The State of Alaska is heavily dependent on its air taxi industry to transport food, medicine, mail, and many other necessities of life to rural villages. Alaska, however, has an air taxi safety problem. During the 5-year period 1974-1978, there were 311 air taxi accidents in Alaska, of which 266 were nonfatal and 45 were fatal, compared with 753 air taxi accidents in the rest of the United States, of which 562 were nonfatal and 191 were fatal. More importantly, the nonfatal air taxi accident rate (per 100,000 flying hours) in Alaska is almost five times higher than the nonfatal air taxi accident rate in the rest of the United States, and the fatal air taxi accident rate in Alaska is more than double the fatal air taxi accident rate in the rest of the United States.

The Safety Board study concluded that there are three major factors responsible for the high air taxi accident rate in Alaska: (1) the "bush syndrome," (2) inadequate airfield facilities and inadequate communications of airfield conditions, and (3) inadequate weather observations, inadequate communications of the weather information, and insufficient navigation aids. The "bush syndrome" is an attitude on the part of air taxi operators, pilots, and passengers in Alaska that ranges from a casual acceptance of risks to a willingness to take unwarranted risks. Most of the active airports in Alaska are State owned and maintained, and many of their runways are inadequately maintained. Whiteouts, very rapid weather changes, and a scarcity of navigation aids cause pilots to make many off-airport takeoffs and landings in float-equipped and ski-equipped aircraft. The collection and dissemination of weather information and current runway condition information is hampered by a shortage of trained personnel and an inadequate communications system in rural Alaska.

1/ For more detailed information read "Special Study--Air Taxi Safety in Alaska" (NTSB-AAS-80-3).

The relationship between the State's air taxi operators and the FAA appears to be strained. Further, because of a lack of permanent FAA inspectors at the rural aviation transportation hubs, there is insufficient opportunity for the FAA to provide guidance to the air taxi operators.

The State of Alaska has recently appropriated, through Chapter 50, SLA 1980, substantial funds for the improvement of the State aviation system, including upgrading of runways and the installation of navigation aids, and weather reporting and communications equipment. A comprehensive State aviation system plan, adequate to implement the intent of Chapter 50, SLA 1980, does not appear to exist. Further, centralized control over, and authority for, developing such a plan does not appear to exist within the current State DOT/PF structure. Cooperation among the State, the FAA, the NWS, and the air taxi operators must be increased if the State is to develop and implement the plan.

Based on the results of this study, the National Transportation Safety Board recommends that the State of Alaska:

Coordinate with the Federal Aviation Administration and the National Weather Service to facilitate the rapid implementation of the air transportation projects contained in Chapter 50, SLA 1980. (Class I, Urgent Action) (A-80-96)

Improve the level of maintenance of the runway facilities at the rural villages within the State airport system. (Class II, Priority Action) (A-80-97)

Centralize authority and responsibility for planning, operating, and maintaining the State's aviation facilities. (Class II, Priority Action) (A-80-98)

Develop, in cooperation with the Federal Aviation Administration and the system users, a comprehensive aviation system plan and a program for the implementation of the plan. (Class II, Priority Action) (A-80-99)

Establish, in cooperation with the Federal Aviation Administration and the air taxi operators, a program to impress upon the public, particularly those living in rural villages, the importance of respecting and properly maintaining airfield facilities. (Class II, Priority Action) (A-80-100)

KING, Chairman, GOLDMAN and BURSLEY, Members, concurred in these recommendations. DRIVER, Vice Chairman, and McADAMS, Member, did not participate.

Accident data from the Safety Board's automated aviation accident data system for that period were analyzed by means of frequency distributions. Safety Board staff also visited Alaska to see the conditions under which the air taxi community operates, to discuss the community's attitudes and needs, and to examine the community's interaction with Federal and State agencies. While in Alaska, the Safety Board staff met with officials of the Federal Aviation Administration (FAA), the National Weather Service (NWS), the Alaska Department of Transportation and Public Facilities (DOT/PF), the Alaska Air Carriers Association, and 17 air taxi operators. 1/

The State of Alaska is heavily dependent on its air taxi industry to transport food, medicine, mail, and many other necessities of life to rural villages. Alaska, however, has an air taxi safety problem. During the 5-year period 1974-1978, there were 311 air taxi accidents in Alaska, of which 266 were nonfatal and 45 were fatal, compared with 753 air taxi accidents in the rest of the United States, of which 562 were nonfatal and 191 were fatal. More importantly, the nonfatal air taxi accident rate (per 100,000 flying hours) in Alaska is almost five times higher than the nonfatal air taxi accident rate in the rest of the United States, and the fatal air taxi accident rate in Alaska is more than double the fatal air taxi accident rate in the rest of the United States.

The Safety Board study concluded that there are three major factors responsible for the high air taxi accident rate in Alaska: (1) the "bush syndrome," (2) inadequate airfield facilities and inadequate communications of airfield conditions, and (3) inadequate weather observations, inadequate communications of the weather information, and insufficient navigation aids. The "bush syndrome" is an attitude on the part of air taxi operators, pilots, and passengers in Alaska that ranges from a casual acceptance of risks to a willingness to take unwarranted risks. Most of the active airports in Alaska are State owned and maintained, and many of their runways are inadequately maintained. Whiteouts, very rapid weather changes, and a scarcity of navigation aids cause pilots to make many off-airport takeoffs and landings in float-equipped and ski-equipped aircraft. The collection and dissemination of weather information and current runway condition information is hampered by a shortage of trained personnel and an inadequate communications system in rural Alaska.

1/ For more detailed information read "Special Study--Air Taxi Safety in Alaska" (NTSB-AAS-80-3).

3052

The relationship between the State's air taxi operators and the FAA appears to be strained. Further, because of a lack of permanent FAA inspectors at the rural aviation transportation hubs, there is insufficient opportunity for the FAA to provide guidance to the air taxi operators.

The State of Alaska has recently appropriated, through Chapter 50, SLA 1980, substantial funds for the improvement of the State aviation system, including upgrading of runways and the installation of navigation aids, and weather reporting and communications equipment. A comprehensive State aviation system plan, adequate to implement the intent of Chapter 50, SLA 1980, does not appear to exist. Further, centralized control over, and authority for, developing such a plan does not appear to exist within the current State DOT/PF structure. Cooperation among the State, the FAA, the NWS, and the air taxi operators must be increased if the State is to develop and implement the plan.

Based on the results of this study, the National Transportation Safety Board recommends that the Federal Aviation Administration:

Evaluate, in cooperation with the State of Alaska and the National Weather Service, the feasibility of equipping its flight service stations and the NWS-certified weather observers in rural villages with high-frequency transceivers that have the appropriate frequencies to facilitate the ground-to-ground communication of weather and runway conditions. (Class II, Priority Action) (A-80-101)

Locate and maintain permanently a Principal Operations Inspector and a Principal Maintenance Inspector at Nome, Bethel, Ketchikan, and at as many other regional aviation hubs as possible. (Class II, Priority Action) (A-80-102)

Continue to develop, in cooperation with the National Weather Service, the concept of "meteor burst" technology for transmission of weather observations from rural villages to regional aviation hubs in Alaska. (Class II, Priority Action) (A-80-103)

Continue to develop and improve, in cooperation with the National Weather Service, the technology of the television weather observation system in Alaska. (Class II, Priority Action) (A-80-104)

KING, Chairman, GOLDMAN and BURSLEY, Members, concurred in these recommendations. DRIVER, Vice Chairman, and McADAMS, Member, did not participate.

NATIONAL TRANSPORTATION SAFETY BOARD
WASHINGTON, D.C.

ISSUED: September 10, 1980

Forwarded to:

Honorable Langhorne M. Bond
Administrator
Federal Aviation Administration
Washington, D.C. 20591

SAFETY RECOMMENDATION(S)

A-80-86 through -89

The National Transportation Safety Board is investigating the presumed crash of a Cessna 340, N110RA, in the water near Petersburg, Alaska, on August 20, 1980. The aircraft, pilot, and three passengers are still missing.

The aircraft had been cleared for the approach to Petersburg when the pilot radioed that he was having control difficulties in the pitch axis. He requested and received clearance to climb to altitude and stated that his intentions were to return to Ketchikan, Alaska. Shortly thereafter, the pilot reported that the aircraft was breaking up.

The Safety Board's review of the maintenance records of the accident aircraft revealed a history of empennage structural problems dating back to 1977 when the aircraft had less than 100 hours total time. There were recurrent reports of in-flight empennage vibrations and recurrent findings of stabilizer and elevator structural cracks. Attempted corrective action had included installation of a new horizontal stabilizer at 174 hours and reskinning of the stabilizer at 893 hours. The left outboard elevator hinge bracket was found cracked and was replaced 8 days before the accident. Total time on the aircraft was 1,035 hours.

The Safety Board is aware of the special inspection requirements issued initially in December 1979, by the manufacturer in Cessna Multi-Engine Service Information Letter, ME-79-44, and the two subsequent revisions to the letter. The Board is also aware of Airworthiness Directive 80-16-06, dated August 23, 1980, which made Revision 2 of the Service Letter mandatory.

Recently, the Safety Board was informed by an FAA inspector in a General Aviation District Office that compliance with AD 80-16-06 has disclosed several instances of cracked structure in the elevator hinge area. In one case, a precautionary inspection on an aircraft with less than 40 hours total time revealed a crack in the elevator gusset.

The Safety Board is concerned that, at this time, the problem which is causing the empennage structural cracking on these particular models is not well defined. The service problems have been associated with those aircraft models with the larger

engines installed (greater than 285 maximum continuous horsepower) which were manufactured or modified before a structural change which strengthened the empennage was incorporated in the design. Additionally, the Safety Board is concerned that the 100-hour total time requirement for initial inspection and the 100-hour recurring inspection interval may not be adequate to detect potential failures. Also, structural cracks in low-time aircraft could be indicative of an unpredicted vibratory mode, a production line quality control deficiency, or both.

Therefore, the National Transportation Safety Board recommends that the Federal Aviation Administration:

Revise Airworthiness Directive 80-16-06, dated August 23, 1980, to require an initial inspection before further flight, regardless of the aircraft's total time, and restrict the performance envelope of those Cessna models affected by the AD to that of the basic Cessna model 335/340 until the empennage structural cracking problem is resolved. (Class I, Urgent Action) (A-80-86)

Evaluate the 100-hour recurring inspection interval now required in AD 80-16-06 to ascertain the need for a shorter interval, and amend the AD as appropriate. (Class I, Urgent Action) (A-80-87)

Evaluate the design certification data of the Cessna 335/340 empennage structure to ascertain if all possible vibratory modes and structural loads to which it can be exposed have been considered and require retrofit modification to aircraft affected by AD 80-16-06 as indicated to be necessary. (Class II, Priority Action) (A-80-88)

Evaluate the results of the initial inspections performed in compliance with the revised Airworthiness Directive, to ascertain the need for a Quality Assurance Systems Analysis Review (QASAR) of the Cessna 335/340 manufacturing process. (Class II, Priority Action) (A-80-89)

KING, Chairman, GOLDMAN and BURSLEY, Members, concurred in these recommendations. DRIVER, Vice Chairman, and McADAMS, Member, did not participate.

II. BACKGROUND 2

III. METHOD and DELIVERABLES 8

IV. FUTURE PHASES 11

V. FUTURE FUNDING FROM PRIVATE SOURCES . . . 12

EXECUTIVE SUMMARY

PURPOSE: What follows is a proposed plan to develop and implement Alaskan aviation safety lesson plans and safety training programs along with sample training media appropriate for advance safety training of Alaskan aviators in all aspects of private and commercial aviation operations. Piloting, ground operations, maintenance and management are examples of the areas covered with first emphasis on piloting.

BACKGROUND: In 1981 the Alaska Aviation Safety Foundation (Foundation) received funding from the State of Alaska to design a training program for Alaskan aviators. American Airlines Training Corporation won the contract for that study which was Phase I of the development of a "Total Training System". The study, in which experienced Alaskan aviators throughout the state were interviewed, produced a set of training objectives which was published in a 175 page report titled Definition of Alaskan Aviation Training Requirements. Copies are available.

The National Transportation Safety Board and the FAA have reviewed the study and found it to be excellent. Implementation of the training program suggested in the study will have a dramatic positive impact on safety in Alaska. Numerous insurance

underwriters have indicated the same with respect to insurance rates due to the lower risk they face in a more safety conscious market. This translated to significantly lower costs to intra-Alaska travelors since over 20% of air fares within Alaska at the present time are attributable to air carrier's insurance costs.

METHODS AND DELIVERABLES: The results of the above study are the basis of Phase II in the development and implementation of this "Total Training System" which consists of 4 phases. The Second Phase will be the development of lesson plans suitable for use by experienced Alaskan aviation operators for use when training others to operate safely in specific regions of Alaska. In addition, the Foundation will develop a sample audio-visual training program for one of the Phase II lesson plans as a sample of what will be used in Phase III of the "Total Training System."

The development of these detailed lesson plans anticipate the efforts of experienced education/ training specialists on site in Alaska working with highly experienced Alaskan pilots, managers and opinion leaders selected by the industry itself and the Foundation directors. The training specialists have selected several lesson plan formats for use

when processing the information from the Alaskan aviators into instructional materials for use throughout the Alaskan aviation cc mmunity. In addition to the aviation lesson plans, the Foundation will develop lessons for potential trainers specifying "how to teach" using current methods and media.

FURTHER PHASES: (Not included in current proposal costs.) Following the completion of Phase II, the F undation proposes to convert each lesson plan selected by Alaskan operators into an appropriate training system using audio-visual media. This will be Phase III of a planned four-phase effort. Phase IV efforts may require the construction of sophisticated aviation simulation training devices which can result in a "Total Training System" specifically and regionally designed for the unique Alaskan aviation environment. This Total Training System can have a significant effect by reducing the exposure to risk when flying throughout Alaska.

FUTURE FUNDING: The Alaska Air Carriers Association and Aviation Safety Foundation are working hard to minimize, if not avoid all together, future requests for funding from the State for these projects and on-going safety training programs. Private funding mechanisms are being developed and it is anticipated

that these will supply the on-going needs of the Foundation. Some of the mechanisms are already in place and others are soon to be implemented:

a. Group Insurance Dividends and Savings.
b. Captive Insurance Reserve Earnings
c. Standard Charitable Fund raising from major aviation users.
d. Fund raising events (safety conferences, etc.)

The present request is, in effect, seed money which will allow the Foundation to start producing fruits and attract more private money. Future State monies may be needed, however, for transition into more sophisticated training modes.

ANALOGY

The following section is included to explain and clarify the process of Total Training System development. The development of a Total Training System for Alaskan aviation is analogous to the development of a complete housing community. The phases are ANALYSIS, DESIGN, DEVELOPMENT, and IMPLEMENTATION.

PHASE I - ANALYSIS

In developing a housing community, the investors and builders need to now what type of houses the purchasers want and need. An ANALYSIS will determine the location of the community, type of structure, appropriate number of rooms, etc. A similar "needs analysis" is required in the development of a Total Training System.

The ANALYSIS, Phase I, has been done by the Alaska Aviation Safety Foundation during interviews and observations in Alaska. The training objectives so developed have been reported in the Phase I final report titled Definition of Alaskan Training Requirements. Copies of the 175 page document are available. Requests should be submitted to the Foundation whose address is on the cover of the proposal.

PHASE II - DESIGN

The second phase in developing a housing community will result in a set of detailed plans for use by a competent builder when building the houses described in Phase I. In addition, the designer usually builds a model home which represents to the buyer and to investors the capability to

produce a quality product in Phase III.

This proposal for Phase II is to develop usable lesson plans and an audio-visual program as part of the Total Training System for private and commercial Alaskan aviators.

PHASE III - DEVELOPMENT

Using the plans prepared in Phase II, the housing developers can select all or part of the dwellings which they feel are appropriate for construction. The model home can serve as a standard against which subsequent buildings can be measured.

In Phase III of the development of a Total Training System for Alaska Aviation, the Foundation has the option of selecting as many lessons as wanted and can be afforded for audio-visual and hands-on training programs.

PHASE IV - TOTAL IMPLEMENTATION

Finally, the housing project can be completed by building those facilities which create a community, such as completion of paved streets, building of community centers, development of planned support systems, etc.

Phase IV of the plan to develop a Total Training System for Alaskan aviators will need to be tied into an organized instructional delivery network; for example, a television

satellite with the final evaluation performed in simulated settings, preferably at central locations. Regional training centers will be opened throughout Alaska which provide general training as well as "region specific" training.

CHAPTER I

INTRODUCTION

This proposal describes a process for the development of a set of lesson plans. These plans will be appropriate for use by experienced Alaskan aviators to use in teaching courses designed to make the learners safer pilots and managers. In addition, the Alaska Aviation Safety Foundation proposes to develop a sample audio-visual training program. This A/V program will demonstrate sophisticated training programs and devices which might be used as the training programs become more sophisticated.

This paper describes the background leading up to the proposed effort in Chapter II. This includes a review of relevant studies by Parker Associates, the National Transportation Safety Board, and a description of the Definition of Alaskan Aviation Training Requirements prepared by the Foundation in 1981 and 1982. Chapter III describes the proposed method for transforming the previously defined training objectives into lesson plans relevant to the unique needs and conditions in Alaska. A description of the deliverables available at the completion of the proposed work is included in Chapter III. Chapter IV describes proposed future efforts which might be expected in the ongoing process of creating a "Total Training System" for private and commercial Alaskan aviation.

CHAPTER II

BACKGROUND

Alaska's dependence on the air taxi industry for delivery of needed goods and services and the safety problems besetting the air taxi operators have been documented in previous studies such as Parker Associates' study, Air Service to Rural Alaska: A Study in Inadequacy and a 1980 National Transportation Safety Board Special Study entitled Air Taxi Safety in Alaska. The NTSB study reported that, "...about 30 percent of all air taxi accidents in the United States occurred in Alaska, and their rate of occurrence was four times that of the accident rate for air taxi operators in the rest of the United States." This accident rate among Alaskan air taxi operators has resulted in a tragic loss of life and injuries sustained, in addition to skyrocketing insurance costs. A recent letter dated January 4, 1983 from the NTSB to the Air Carriers Association points out that the problem identified in 1980 continues to manifest itself in recent accidents. The NTSB urges early implementation of the program proposed by the Foundation in the "Final Report on Definition of Alaskan Aviation Training Requirements." A copy of the letter is attached as Exhibit "A".

The Parker and NTSB studies prompted a search for solutions to serious problem. An unsuccessful effort was made to identify and obtain an existing Arctic training program.

Inquiries were made of training personnel in the United States Air Force, the Canadian United Forces, and several Scandinavian countries. Existing training programs which were being conducted in Alaska were found to be designed to meet recertification requirements of the Federal Aviation Administration (FAA) and were not responsive to the unique Alaskan operational environment. "Advanced" safety training is necessary for Alaska flying conditions.

The decision was made to develop a specifically designed training program suited to the needs of Alaskan aviators. This training program could be based on accident records compiled by the FAA or the National Transportation Safety Board (NTSB). However, such records were often incomplete and, in fact, represented a list of failures. Instead, it was decided to discover how experienced Alaskan pilots, maintenance and managerial personnel learned to cope with the many challenging problems regularly faced by private and commercial Alaskan aviators. The process of discovery was developed and validated by John Flanagan and reported in Psychological Bulletin in 1954. Flanagan's critical incident methodology, in conjunction with traditional job analysis procedures, is the basis for the interviewing process used in this study.

After careful consideration, the State of Alaska provided

funding for the study. The funds were included with those to be administered by the Alaska State Department of Education. American Airlines Training Corporation won the contract and assisted the Foundation with the study.

The goal of the Foundation is to provide effective, advanced flight, operations and management training in Alaska, based on information gathered from experienced Alaskan aviators with excellent safety records.

This training will produce highly-qualified, professionally oriented pilots, mechanics and managers and will result in a lower accident rate. The Air Carriers Association has worked with insurance underwriters attempting to obtain insurance premium reductions for individuals and commercial operators who participate in the proposed Alaskan aviation training programs offered by the Association and the Foundation. Several underwriters have expressed support for the concept of reducing insurance premiums and making direct contributions to the Foundation (a charitable institution) if the Foundation starts producing fruits in the near future. Two underwriters already are, based on assurances that training programs will be forthcoming soon.

During the course of the study, the investigators travelled to 58 locations (cities, towns, villages) throughout Alaska; interviewed approximately 177 air taxi operators and pilots;

visited numerous aviation facilities; and attended several aviation related seminars and lectures.

The questionnaire used in the interviews was designed by the research team and modified in response to changes suggested by the Foundation Board of Directors, and to respondents' comments and answers during the first interviews. The interviews were conducted on a one-to-one basis and lasted an average of two hours. Background information, flight techniques and operational conditions in the Alaskan environment were collected from the interviews. Respondents provided a variety of specific techniques which have helped them to prevent hazardous situations from becoming serious accidents. The information in the completed questionnaires was organized into an outline form using a computer. This outline of information provided a data base from which the training objectives were synthesized. The final report contains the unvalidated information from the questionnaires and the training objectives.

The Alaskan aviation training objectives indicate what needs to be taught, the instructional media and devices appropriate for presenting the information, and how to evaluate mastery of the objectives. The training objectives will serve as the basis for further development of an Alaskan aviation training program.

REGIONALIZED APPROACH

Based on information collected in formal pilot interviews and informal conversations with many other Alaskans interested in aviation, a complete Alaskan training system would have to be regionally oriented. There are sufficient differences in flying conditions among geographic regions to warrant training that addresses specific regions in which a pilot operates. Such a regionalized approach would also enable pilots to spend as little time as possible away from their home base to complete a training program. In addition, aviation training in Alaska will emphasize the development and improvement of judgment and decision-making skills rather than the manipulative skills associated with aircraft operation.

In addition to identifying training requirements that address piloting, mechanical and managerial skills and competencies, the study also investigated the management of air taxi operations. It became obvious to the research team that some operators in Alaska manage safe, profitable air taxi services. Those factors that contribute to such an operation were identified and serve as training requirements for air taxi management training.

GENERAL FINDINGS: The information collected from the interviews showed that, although some training requirements and the

training objectives to meet those requirements were applicable to Alaskan aviation in general, the majority were specific to different geographical areas in the state and also to different types and configurations of aircraft (single engine, ski, helicopter, multi-engine, float, etc.). It was also recognized that the primary emphasis of an Alaskan training system should be the development of decision making skills on the part of the pilot rather than manipulative flying skills. For example, the training emphasis should be on when to make a 180° turn to escape adverse weather or leave a mountain pass, and include specific operational procedures to be performed on the basis of such a decision.

PRELIMINARY RESULTS: The study identified several factors that had to be considered in the design of an Alaskan aviation training system:

PRIVATE AND COMMERCIAL

1. The primary objective of the training system should be acceptable and applicable to private and commercial aviation operators conducting flight operations in a uniquely stressful environment due to weather, geographic, and other adverse operational conditions.

REGIONALLY SPECIFIC

2. The training system should be tailored to specific

geographical areas of the State and to different types and configurations of aircraft.

LOCALLY AVAILABLE

3. Components of the training system should be accessible to pilots in the community in which they are located. This would avoid, as much as possible, pilots spending time away from their primary job to attend training in a distant geographic location.

PRACTICAL

4. The requirement for training system components for localized on-job-site training could be met by using transportable training devices and interactive audio-visual and print media. These programs should contain instructional components tailored to geographic areas and aircraft types.

EVALUATION

5. Instructional programs would be designed to teach specific decision-making skills and the operational procedures to be performed on the basis of such decisions. Evaluation of student performance must be made by qualified, certified airmen with extensive experience in the given geographical area using structured evaluation methods.

DECISION MAKING SKILLS THEN APPLICATION

6. The training system should be capable of allowing the airmen to first learn the necessary discriminations and decision-making capabilities, and then apply these skills in a simulated or operational environment. Non-transportable training devices could be required for operational training.

TRAINING CENTERS

7. Area training centers should be established for specific geographic regions. These training centers could be co-located with existing Community College facilities. The training system would thus permit the learning of needed decision-making skills and operational procedures through transportable media, and evaluation of student performance by designated airmen for localized job-site training. Support and administration for this training would be provided by the area training center.

CHAPTER III

METHOD AND DELIVERABLES

This chapter describes the process which the Foundation proposes to use to transform the results of their report, Definition of Alaskan Aviation Training Requirements, into usable lesson plans and a sample audio-visual training program lesson.

The Foundation will assign persons with expertise in Alaskan aviation needs and experience in development of aviation training programs to work with Alaskan aviation Subject Matter Experts (SME's) for the duration of the contract resulting from this proposal. The Alaskan Aviation Safety Foundation will identify suitable SME's for each type of lesson.

The Foundation will contract with these SME's for a period of time sufficient to convert their unique knowledge into the content of the lesson plan. One to two weeks per SME will be required. Several elements will assist in the success of this process. First, appropriate lesson plan formats have been identified. Lesson plan formats will be presented to the Foundation Board for approval. The approved formats will be the basis for the information gathered from the SME's. Second, the research team has and will continue to use the recommended operational techniques previously identified

by experienced Alaskan aviators in the study to Definite Alaskan Aviation Training Requirements. These techniques can be evaluated for efficacy and validated during the development of the lesson plans.

The validated list of techniques will become the "Trigger" which can serve to remind the SME of as many techniques as possible. In the development of some lessons, it is anticipated that several SME's will be required. Where SME's cannot agree on techniques or appropriate procedures for a lesson, the training developers will look to the Foundation Board for guidance or will include alternative methods in the lesson plans. Provisions will be made in each plan for the experienced Alaskan aviator designated to teach the courses from these lesson plans to provide specific information appropriate to the geographical area in which the learner will be operating.

A lesson will be selected for development into an audio-visual format. The lesson, which should take approximately 30-40 minutes, may include slide/tapes or video tapes or similar media. It may, for example, train pilots in a subject such as flying through a pass, landing on a beach, checking weather in Alaska or a similar subject. This sample program will demonstrate the use of various media therefore, the cost of this product may not be representative of each training lesson. The sample program will become the standard for transforming all of the lesson plans into

various representative media formats during Phase III of the development of a total training system for Alaskan aviators.

At this time, it appears that the completed lesson plans should number about 25. These would be clustered into the following units:

- Weather in Alaska
- Adverse Weather Flying Techniques
- Takeoff and Landing Techniques for Special Surfaces
- Navigation and Piloting Techniques
- Mountain and Pass Flying
- Area Specific Flying Techniques
- Fuel Management and Handling Techniques
- Cold Weather Operating Techniques
- Hazardous Materials in Alaska
- Survival Training
- Management Training Plans

In addition, a lesson will be developed which will prepare experienced Alaskan pilots and operators to use the plans developed in this project to teach others.

CHAPTER IV

FUTURE PHASES

At the conclusion of the effort described in this proposal, the citizens of the State of Alaska will have a usable product which can have a significant effect on aviation safety in the State. However, although the production of a set of lesson plans is useful and desirable, they do not represent a Total Training System. The lesson plans are a second, but necessary, step in the continuing process of providing safer aviation activities in Alaska through improved training.

The next step is to professionally prepare all of the lessons in an audio-visual, computer assisted and satellite transmittable aviation training program. Even though some Alaskan opinion leaders would prefer that the automated audio-visual programs be produced this year, we believe it is better to prepare the lesson plans and let experienced Alaskan aviators validate their effectiveness before committing the resources to automate them. Then, the Alaska Aviation Safety Foundation can define and build the training media required to produce the best trained arctic pilots possible. Therefore, the Foundation is proposing that each step be taken sequentially and proven before committing to a total training system. We believe that this approach will result in the ultimate goal of maximum safety through a "Total Training System" that effectively meets the Alaskan aviation training requirements.

National Transportation Safety Board

Washington, D.C. 20594

January 4, 1983

Office of the Chairman

[illegible]
N 1/20/83

Mr. Lance Wells
Executive Director
Alaska Air Carriers Association
Box 6469
Anchorage, Alaska 99502

Dear Mr. Wells:

As a result of its special study 1/ of air taxi safety in Alaska, the National Transportation Safety Board recommended on September 25, 1980, that the Alaska Air Carriers Association, "Extend its safety program to reiterate the hazards of air taxi operations in Alaska and to overcome, in particular, the 'bush pilot syndrome'" (A-80-105). The Safety Board later classified the recommendation "Closed-Acceptable Action" as a result of your organization's efforts in launching the Alaska Aviation Safety Foundation to promote a safer air transportation environment in Alaska.

The concerns which prompted the Safety Board to conduct the special study of Alaska air taxi operators in 1980 reappeared during a recent investigation. On May 16, 1982, a Gifford Aviation, Inc., deHavilland DHC-6, operated as Wein Air Alaska Flight 517 under the provisions of 14 CFR Part 135, crashed at Hooper Bay, Alaska. 2/ The investigation revealed a casual attitude on the part of the pilots regarding adherence to weight and balance regulations and operating procedures which led to the airplane operating with a center of gravity considerably aft of the published limit. Additionally, the investigation revealed poor maintenance practices regarding the condition of seatbelts in the accident airplane as well as two other DHC-6's operated by Gifford Aviation, Inc. These unsafe practices were precisely the same type noted during the Safety Board's special study and which generated the Safety Board's earlier recommendation to your organization.

Our staff has recently reviewed the "Final Report on Definition of Alaskan Aviation Training Requirements" prepared by American Airlines Training Corporation under the auspices of the Alaska Aviation Safety Foundation. The Safety Board is pleased with the program's content, objectives, and goals and urges its early implementation as soon as funds become available.

Respectfully yours,

Patricia A. Goldman for

Jim Burnett
Chairman

SENATE BILL NO. 114

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Education for development by the Alaskan Aviation Safety Foundation of an Alaskan Aviation Training System; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $753,000 is appropriated from the general fund to the Department of Education for implementation development by the Alaskan Aviation Safety Foundation of an Alaskan Aviation Training System as outlined in the Final Report on the "Definition of Alaskan Aviation Training Requirements" from American Airlines Training Corporation to the Alaskan Aviation Safety Foundation, July 1982.

* Sec. 2. The unexpended and unobligated portion of the appropriation made by this Act lapses into the general fund June 30, 1984.

* Sec. 3. This Act takes effect July 1, 1983.

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/82)

HESS STAFF REPORT

February 15, 1983

Summary: HB 160 by Hurlbert: An act making a special appropriation to the Department of Education for development of a training program for Alaska aviation; and providing for an effective date.

Section 1: A one time appropriation from the general fund to the Department of Education.

Section 2: Lapse date clause - June 30, 1984.

Section 3: Effective date clause - July 1, 1983

Bill Intent:
1) Reduce loss of life
2) Reduce insurance rates for commercial air carriers

Explanation:

1) In response to the National Transportation Safety Board's recommendations regarding Alaska's high air taxi accident rate (known as 'bush syndrome') the Legislature appropriated funds in HB 60 of FY 82 to DOE to conduct a study. See attachment.

2) The FY 82 appropriation of $300,000 was a dedicated grant to the Alaska Aviation Safety Foundation (of the Alaska Air Carriers Assoc.) which in turn subcontracted with American Airlines Training Corporation for the study. See manual and copies or proposal in Section H attached.

3) Reportedly, the $300,000 was "seed" money and the Alaska Air Carriers also contributed funds to the project. Amount unkown and not yet verified.

4) Proposal directed at commercial pilots and their respective insurance underwriters. Consequently, legislation will not effect the private pilot and their insurance rates. Presently, Lloyds of London underwrites approximately 90% of the Alaska air taxi operations.

5) Assurance of insurance rate reduction is not incorporated into legislation. Currently, the annual cost of insurance for aviation in Alaska is approximately $30 - $40 million.

6) An evaluation of product proficiency (curriculum for training program) should be done as assurance of the program's effectiveness with respect to the fiscal expense of this legislation.

7) Similar legislation (SB 114 by Senator Josephson) is in the Senate HESS Committee. Copy included. The fiscal note is identical to that of HB 160; however, funds are not appropriated to DOE for distribution through the contract-bidding process as in HB 160. SB 114 directs the funds as a pass-through grant. DOE administers the funds to the Alaska Aviation Safety Foundation in conjunction with the American Airlines Training Corporation.

	proposal - Section H

SECTION H

This section presents a proposal for the specification of curriculum and instructional content for an Alaskan aviation training system. Initial findings and preliminary results are discussed in reference to the on-going development of the training program. The activities for the proposed follow-on contract are described and the deliverables specified.

General Findings

The information collected from the interviews showed that although some training requirements and the training objectives to meet those requirements were applicable to Alaskan aviation in general, the majority were specific to different geographical areas in the state and also to different types and configurations of aircraft (single engine ski, helicopter, multi-engine, float, etc.) It was also recognized that the primary emphasis of an Alaskan training system should be the development of decision-making skills on the part of the pilot rather than manipulative flying skills. For example, the training emphasis should be on when to make a 180° turn to escape adverse weather or leave a mountain pass, and include specific operational procedures to be performed on the basis of such a decision.

Preliminary Indicated Results

The study identified several factors that had to be considered in the design of an Alaskan aviation training system:

1. The primary objective of the training system should be acceptable and applicable to airmen conducting flight operations in a uniquely stressful environment due to weather, geographic, and other operational conditions.

2. The training system should be tailored to specific geographical areas of the State and to different types and configurations of aircraft.

3. Components of the training system should be accessible to pilots in the community in which they are located. This would avoid, as much as possible, pilots spending time away from their primary job to attend training in a distant geographic location.

4. The requirement for training system components for localized on-job-site training could be met by using transportable training devices and interactive audio-visual and print media. These programs should contain instructional components tailored to geographic areas and aircraft types. Instructional programs would be designed to teach specific decision-making skills and the operational procedures to be performed on the basis of such decisions. Evaluation of student performance must be made by qualified, certified airmen with extensive experience in the given geographical area using structured evaluation methods.

5. The training system should be capable of allowing the airmen to first learn the necessary discriminations and decision-making capabilities, and then apply these skills in an operational environment.
   Non-transportable training devices could be required for operational training.

6. Area training centers should be established for specific geographic regions. These training centers could be co-located with existing Community College facilities. The training system would thus permit the learning of needed decision-making skills and operational procedures through transportable media, and evaluation of student performance by designated airmen for localized job-site training. Support and administration for this training would be provided by the area training center.

7. Area training centers would be used to provide additional training, practice, and evaluation through training devices located at the regional facility. Evaluation of student performance at the area training centers would

again be made by qualified, certified airmen with extensive experience in the given geographical region using structured evaluation methods.

8. A centralized administrative facility would be required for the administration, standardization, and evaluation of area training centers and job-site training activities. This facility would probably be located in Anchorage.

PROPOSED FOLLOW-ON CONTRACT

AATC proposes to begin work on a continuation contract depending on fund availability. AATC will conduct an in-depth analysis of the Alaskan aviation training objectives, and will develop curriculum and instructional content specifications. This effort will be based upon the data obtained from the initial study discussed above. Two specific activities are proposed: analysis of training objectives and development of curriculum and instructional content specifications.

Analysis of Alaskan Aviation Training Objectives

The study for the Alaskan Aviation Safety Foundation resulted in the identification of training requirements for various geographical areas, different types of aircraft, and diverse types of operational conditions. In addition, training requirements were defined that are applicable to all Alaskan aircraft operations. These training requirements were synthesized into training objectives that included operational conditions and standards of performance.

In order to define an Alaskan aviation training system, each training objective must be translated into effective instructional components that will enable a student to meet the operational task performance standards specified in the training objective. AATC will conduct an in-depth analysis of each operational task specified in the training objectives.

Each operational task must be analyzed in terms of the specific behavior that must be learned. AATC will define the following components for operational tasks:

1. The task-related knowledge that must be learned. This knowledge includes the operational procedures, rules and concepts that must be learned.

2. The operational cues that must be perceived.

3 The decisions that must be derived from cue perception and based upon appropriate applications of learned knowledge, procedures, rules, and concepts.

4. The action that is required based upon a specific decision. These instructional components will be defined for the different operational conditions under which a task could be performed, such as different aircraft types and configurations.

Development of Curriculum and Instructional Content Specifications

An important step in the formulation of a training system is the sequencing of instructional components into instructional segments. These segments must be sequenced into curricula that are learning and cost-effective for each type of student population. AATC will accomplish the following activities:

1. Define training tracks based on geographical area and aircraft type and configuration.

2. Sequence instructional components into instructional segments.

3. Specify performance assessment methodology for instructional segments.

4. Specify specific learning activities for instructional segments.

5. Specify instructional strategies for instructional segments.

6. Generate instructional segment content specifications.

7. Sequence instructional segments into curricula for each training track.

The output of these steps will be instructional content specifications for each instructional segment, and the sequencing of instructional segments into curricula for each training track.

DELIVERABLES

The following items will be deliverable as a portion of the proposed contract as defined above.

Preliminary Specifications

AATC will deliver a description of the Alaskan Aviation Training System curriculum. AATC will provide the following document:

Curricula and Instructional Content Specifications

Curricula will be developed for each training track. The instructional segments will be specified and sequenced for each curriculum. An instructional content specification will be provided for each instruction segment.

Sample Training System Components

AATC will deliver a completely portable and self-contained component of the Alaskan aviation training system. This component will consist of the following items:

1. An audiovisual (sound/slide) program that is applicable to all Alaskan aircraft operators. A typical program would be:

   Subject: Navigation-Pilotage and Dead Reckoning Techniques

   Content:

   a. Approximately 160 slides with audio narration. The program will contain an instructional component of approximately 120 slides and an interactive evaluation component of approximately 40 slides.

   b. Carousels and binders for the program.

   c. Student programmed text materials for the program. These materials will include evaluation components.

   d. Instructor test evaluation guide for the program.

   e. Presentation device for audiovisual programs. This device will be a programmed learning device, using rear-screen projection with self-contained audio components. A student response feature will be included to permit correct/incorrect answer feedback to questions inserted anywhere in the program.

These deliverables will provide the basis upon which an Alaskan aviation training system can be produced.

Development Of Specified System Components and Operational Metholodogy

The development of specifications for training system components and operational methodology can be initiated at anytime after the initial specification determination activity is essentially complete. As a practical matter, however, the availability of funds probably will be the pacing factor.

Guidance of the Alaskan Aviation Safety Foundation and the Alaskan Air Carriers Association will be sought throughout the intervening time period as well as during the actual implementation. AATC will be pleased to discuss these concepts and to attempt to clarify any uncertainties at the convenience of the customer.

SB 80-78/3052
(202) 472-6100

Air taxis in Alaska have far higher accident rates than air taxis in the rest of the United States, the National Transportation Safety Board reported today in a special study.

Alaska's rate of nonfatal air taxi accidents per hour flown has been almost five times higher, and its fatal accident rate per hour more than twice, that of the rest of the country, the Board found.

The Board attributed the high rates to:

— The "bush syndrome," nourished by legends of Alaskan bush pilots, and other factors which today sometimes prompts air taxi pilots and passengers alike to take unwarranted risks to complete flights in the face of the state's unique environmental hazards.

— Inadequate airport facilities and pilots' frequent inability to obtain accurate information on airport conditions.

— Insufficient ground aids to navigation.

In 1974-78, Alaskan air taxi operators had a rate of 15.2 nonfatal accidents in every 100,000 hours, as compared with 3.3 in the rest of the country. The Alaskan rate of fatal accidents per 100,000 hours was 2.57; in the other states it was 1.11.

Sampling of Safety Board accident data showed that the pilot was cited as a causal or contributing factor in 85 percent of Alaskan air taxi accidents studied, as compared with 70 percent of similar accidents in the other states. The data also showed that most Alaskan accident pilots were experienced -- almost all had logged more than 1,000 hours, and 80 percent had more than 2,000 pilot hours.

The Board said Alaska air taxi operators believe the inadequacy of airport facilities and information on airport conditions are a significant factor in the state's air taxi accidents. And there is "virtual unanimity of opinion among

operators and pilots that runway conditions present a problem in much of rural Alaska" the Board reported.

Operators and pilots flying in the more rural areas also repeatedly cited the lack of navigation aids, inadequate observation of en route and destination weather, and inadequate dissemination of weather information when observations are made.

The Safety Board described as unprecedented for this or any other state a fiscal 1981 Alaska appropriation package totaling more than $51 million for further development of state aviation facilities. In combination with the Federal Aviation Administration's 10-year development plan for the state, improvements which the appropriation would finance could have a substantial impact on the safety of Alaska's aviation system, the Board said.

A series of 11 safety recommendations are incorporated in the Board's special study. Addressed to the State of Alaska, the FAA, and the Alaska Air Carriers Association, their goals include:

— Rapid completion of aviation projects to be funded by the $51 million appropriation.

— Centralization of authority and responsibility for planning operating and maintaining the State's aviation facilities.

— A comprehensive aviation system plan for Alaska.

— Permanent assignment of FAA operations and maintenance inspectors to Nome, Bethel and Ketchikan, and to "as many other regional hubs as possible."

— Continued development of weather data gathering and transmission facilities, including such new technology as weather observation by television and "meteor burst" communication which would transmit data from a single observation point in an Alaskan village simultaneously to all of the state's regional aviation hubs.

— Extension of the Alaska air carriers' safety program to specifically combat the "bush pilot syndrome."

The Safety Board's special study - "Air Taxi Safety in Alaska" will be available in approximately three weeks. Single copies may be obtained without charge by writing to the Publications Branch, National Transportation Safety Board, Washington, D.C. 20594. Multiple copies may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161.

SAFETY RECOMMENDATION(S)
A-80-96 through -100

The National Transportation Safety Board has studied the air taxi accidents which occurred in Alaska from 1974 through 1978. Accident data from the Safety Board's automated aviation accident data system for that period were analyzed by means of frequency distributions. Safety Board staff also visited Alaska to see the conditions under which the air taxi community operates, to discuss the community's attitudes and needs, and to examine the community's interaction with Federal and State agencies. While in Alaska, the Safety Board staff met with officials of the Federal Aviation Administration (FAA), the National Weather Service (NWS), the Alaska Department of Transportation and Public Facilities (DOT/PF), the Alaska Air Carriers Association, and 17 air taxi operators. 1/

The State of Alaska is heavily dependent on its air taxi industry to transport food, medicine, mail, and many other necessities of life to rural villages. Alaska, however, has an air taxi safety problem. During the 5-year period 1974-1978, there were 311 air taxi accidents in Alaska, of which 266 were nonfatal and 45 were fatal, compared with 753 air taxi accidents in the rest of the United States, of which 562 were nonfatal and 191 were fatal. More importantly, the nonfatal air taxi accident rate (per 100,000 flying hours) in Alaska is almost five times higher than the nonfatal air taxi accident rate in the rest of the United States, and the fatal air taxi accident rate in Alaska is more than double the fatal air taxi accident rate in the rest of the United States.

The Safety Board study concluded that there are three major factors responsible for the high air taxi accident rate in Alaska: (1) the "bush syndrome," (2) inadequate airfield facilities and inadequate communications of airfield conditions, and (3) inadequate weather observations, inadequate communications of the weather information, and insufficient navigation aids. The "bush syndrome" is an attitude on the part of air taxi operators, pilots, and passengers in Alaska that ranges from a casual acceptance of risks to a willingness to take unwarranted risks. Most of the active airports in Alaska are State owned and maintained, and many of their runways are inadequately maintained. Whiteouts, very rapid weather changes, and a scarcity of navigation aids cause pilots to make many off-airport takeoffs and landings in float-equipped and ski-equipped aircraft. The collection and dissemination of weather information and current runway condition information is hampered by a shortage of trained personnel and an inadequate communications system in rural Alaska.

1/ For more detailed information read "Special Study--Air Taxi Safety in Alaska" (NTSB-AAS-80-3).

The relationship between the State's air taxi operators and the FAA appears to be strained. Further, because of a lack of permanent FAA inspectors at the rural aviation transportation hubs, there is insufficient opportunity for the FAA to provide guidance to the air taxi operators.

The State of Alaska has recently appropriated, through Chapter 50, SLA 1980, substantial funds for the improvement of the State aviation system, including upgrading of runways and the installation of navigation aids, and weather reporting and communications equipment. A comprehensive State aviation system plan, adequate to implement the intent of Chapter 50, SLA 1980, does not appear to exist. Further, centralized control over, and authority for, developing such a plan does not appear to exist within the current State DOT/PF structure. Cooperation among the State, the FAA, the NWS, and the air taxi operators must be increased if the State is to develop and implement the plan.

Based on the results of this study, the National Transportation Safety Board recommends that the State of Alaska:

Coordinate with the Federal Aviation Administration and the National Weather Service to facilitate the rapid implementation of the air transportation projects contained in Chapter 50, SLA 1980. (Class I, Urgent Action) (A-80-96)

Improve the level of maintenance of the runway facilities at the rural villages within the State airport system. (Class II, Priority Action) (A-80-97)

Centralize authority and responsibility for planning, operating, and maintaining the State's aviation facilities. (Class II, Priority Action) (A-80-98)

Develop, in cooperation with the Federal Aviation Administration and the system users, a comprehensive aviation system plan and a program for the implementation of the plan. (Class II, Priority Action) (A-80-99)

Establish, in cooperation with the Federal Aviation Administration and the air taxi operators, a program to impress upon the public, particularly those living in rural villages, the importance of respecting and properly maintaining airfield facilities. (Class II, Priority Action) (A-80-100)

KING, Chairman, GOLDMAN and BURSLEY, Members, concurred in these recommendations. DRIVER, Vice Chairman, and McADAMS, Member, did not participate.

SAFETY RECOMMENDATION(S)
A-80-101 through -104

The National Transportation Safety Board has studied the air taxi accidents which occurred in Alaska from 1974 through 1978. Accident data from the Safety Board's automated aviation accident data system for that period were analyzed by means of frequency distributions. Safety Board staff also visited Alaska to see the conditions under which the air taxi community operates, to discuss the community's attitudes and needs, and to examine the community's interaction with Federal and State agencies. While in Alaska, the Safety Board staff met with officials of the Federal Aviation Administration (FAA), the National Weather Service (NWS), the Alaska Department of Transportation and Public Facilities (DOT/PF), the Alaska Air Carriers Association, and 17 air taxi operators. 1/

The State of Alaska is heavily dependent on its air taxi industry to transport food, medicine, mail, and many other necessities of life to rural villages. Alaska, however, has an air taxi safety problem. During the 5-year period 1974-1978, there were 311 air taxi accidents in Alaska, of which 266 were nonfatal and 45 were fatal, compared with 753 air taxi accidents in the rest of the United States, of which 562 were nonfatal and 191 were fatal. More importantly, the nonfatal air taxi accident rate (per 100,000 flying hours) in Alaska is almost five times higher than the nonfatal air taxi accident rate in the rest of the United States, and the fatal air taxi accident rate in Alaska is more than double the fatal air taxi accident rate in the rest of the United States.

The Safety Board study concluded that there are three major factors responsible for the high air taxi accident rate in Alaska: (1) the "bush syndrome," (2) inadequate airfield facilities and inadequate communications of airfield conditions, and (3) inadequate weather observations, inadequate communications of the weather information, and insufficient navigation aids. The "bush syndrome" is an attitude on the part of air taxi operators, pilots, and passengers in Alaska that ranges from a casual acceptance of risks to a willingness to take unwarranted risks. Most of the active airports in Alaska are State owned and maintained, and many of their runways are inadequately maintained. Whiteouts, very rapid weather changes, and a scarcity of navigation aids cause pilots to make many off-airport takeoffs and landings in float-equipped and ski-equipped aircraft. The collection and dissemination of weather information and current runway condition information is hampered by a shortage of trained personnel and an inadequate communications system in rural Alaska.

1/ For more detailed information read "Special Study--Air Taxi Safety in Alaska" (NTSB-AAS-80-3).

The relationship between the State's air taxi operators and the FAA appears to be strained. Further, because of a lack of permanent FAA inspectors at the rural aviation transportation hubs, there is insufficient opportunity for the FAA to provide guidance to the air taxi operators.

The State of Alaska has recently appropriated, through Chapter 50, SLA 1980, substantial funds for the improvement of the State aviation system, including upgrading of runways and the installation of navigation aids, and weather reporting and communications equipment. A comprehensive State aviation system plan, adequate to implement the intent of Chapter 50, SLA 1980, does not appear to exist. Further, centralized control over, and authority for, developing such a plan does not appear to exist within the current State DOT/PF structure. Cooperation among the State, the FAA, the NWS, and the air taxi operators must be increased if the State is to develop and implement the plan.

Based on the results of this study, the National Transportation Safety Board recommends that the Federal Aviation Administration:

Evaluate, in cooperation with the State of Alaska and the National Weather Service, the feasibility of equipping its flight service stations and the NWS-certified weather observers in rural villages with high-frequency transceivers that have the appropriate frequencies to facilitate the ground-to-ground communication of weather and runway conditions. (Class II, Priority Action) (A-80-101)

Locate and maintain permanently a Principal Operations Inspector and a Principal Maintenance Inspector at Nome, Bethel, Ketchikan, and at as many other regional aviation hubs as possible. (Class II, Priority Action) (A-80-102)

Continue to develop, in cooperation with the National Weather Service, the concept of "meteor burst" technology for transmission of weather observations from rural villages to regional aviation hubs in Alaska. (Class II, Priority Action) (A-80-103)

Continue to develop and improve, in cooperation with the National Weather Service, the technology of the television weather observation system in Alaska. (Class II, Priority Action) (A-80-104)

KING, Chairman, GOLDMAN and BURSLEY, Members, concurred in these recommendations. DRIVER, Vice Chairman, and McADAMS, Member, did not participate.

SAFETY RECOMMENDATION(S)

A-80-86 through -89

The National Transportation Safety Board is investigating the presumed crash of a Cessna 340, N110RA, in the water near Petersburg, Alaska, on August 20, 1980. The aircraft, pilot, and three passengers are still missing.

The aircraft had been cleared for the approach to Petersburg when the pilot radioed that he was having control difficulties in the pitch axis. He requested and received clearance to climb to altitude and stated that his intentions were to return to Ketchikan, Alaska. Shortly thereafter, the pilot reported that the aircraft was breaking up.

The Safety Board's review of the maintenance records of the accident aircraft revealed a history of empennage structural problems dating back to 1977 when the aircraft had less than 100 hours total time. There were recurrent reports of in-flight empennage vibrations and recurrent findings of stabilizer and elevator structural cracks. Attempted corrective action had included installation of a new horizontal stabilizer at 174 hours and reskinning of the stabilizer at 893 hours. The left outboard elevator hinge bracket was found cracked and was replaced 8 days before the accident. Total time on the aircraft was 1,035 hours.

The Safety Board is aware of the special inspection requirements issued initially in December 1979, by the manufacturer in Cessna Multi-Engine Service Information Letter, ME-79-44, and the two subsequent revisions to the letter. The Board is also aware of Airworthiness Directive 80-16-06, dated August 23, 1980, which made Revision 2 of the Service Letter mandatory.

Recently, the Safety Board was informed by an FAA inspector in a General Aviation District Office that compliance with AD 80-16-06 has disclosed several instances of cracked structure in the elevator hinge area. In one case, a precautionary inspection on an aircraft with less than 40 hours total time revealed a crack in the elevator gusset.

The Safety Board is concerned that, at this time, the problem which is causing the empennage structural cracking on these particular models is not well defined. The service problems have been associated with those aircraft models with the larger

engines installed (greater than 285 maximum continuous horsepower) which were manufactured or modified before a structural change which strengthened the empennage was incorporated in the design. Additionally, the Safety Board is concerned that the 100-hour total time requirement for initial inspection and the 100-hour recurring inspection interval may not be adequate to detect potential failures. Also, structural cracks in low-time aircraft could be indicative of an unpredicted vibratory mode, a production line quality control deficiency, or both.

Therefore, the National Transportation Safety Board recommends that the Federal Aviation Administration:

Revise Airworthiness Directive 80-16-06, dated August 23, 1980, to require an initial inspection before further flight, regardless of the aircraft's total time, and restrict the performance envelope of those Cessna models affected by the AD to that of the basic Cessna model 335/340 until the empennage structural cracking problem is resolved. (Class I, Urgent Action) (A-80-86)

Evaluate the 100-hour recurring inspection interval now required in AD 80-16-06 to ascertain the need for a shorter interval, and amend the AD as appropriate. (Class I, Urgent Action) (A-80-87)

Evaluate the design certification data of the Cessna 335/340 empennage structure to ascertain if all possible vibratory modes and structural loads to which it can be exposed have been considered and require retrofit modification to aircraft affected by AD 80-16-06 as indicated to be necessary. (Class II, Priority Action) (A-80-88)

Evaluate the results of the initial inspections performed in compliance with the revised Airworthiness Directive, to ascertain the need for a Quality Assurance Systems Analysis Review (QASAR) of the Cessna 335/340 manufacturing process. (Class II, Priority Action) (A-80-89)

KING, Chairman, GOLDMAN and BURSLEY, Members, concurred in these recommendations. DRIVER, Vice Chairman, and McADAMS, Member, did not participate.

I Material from Kathleen Smoyer

A) Letter of student loan denial

B) UAF & TVCC Grade Report

C) Financial Aid Statement

D) Postsecondary Regulations

Summary: Ms. Smoyer earned a 3.5 GPA at UAF while taking 10 credits during the Fall, 1982 semester, and she earned a 4.0 GPA at TVCC which she was attending concurrently. Because of present legislation, however, she was denied a student loan for the following semester.

II TVCC Letter from Campus President Rodney Enos

TVCC "supports the bill."

III JDCC Letter from Dean Richard Lee

"I feel that this is a constructive amendment which will allow greater flexibility for students in designating programs that will meet their educational goals."

IV UAJ Letter from Financial Aid Officer Dianne Schmitt

"This bill is acceptable and also beneficial to many of the students in Southeast Alaska

V Alaska Statewide Student Association

"This amendment would allow these perfectly legitimate, full-time students to be eligible for the loans."

VI UAF 1982-83 Alaska Student Loan Information Sheet

"Courses in the following areas cannot be counted toward the full-time financial aid requirement: Tanana Valley Community College, correspondence, extension, or television."

VII ACC Letter from Dean Roger Worsley

A) "I believe that students should be allowed to count credits from more than one institution toward fulfilling the requirement for eligibility for the student loan program."

B) Suggests that 75 percent or 9 credits be taken from the parent institution.

Summary: 75 percent or 9 credits will soon be included in Postsecondary Commission regulations.

VIII UAF Letter from Financial Aid Officer Carol Thompson

A) "We would also be required to include UA correspondence work and any other accredited school's correspondence study.

1) This information is incorrect, since the parent institution decides whether or not correspondence courses may be applied toward student loan eligibility. This statement also contradicts the information supplied in the UAF Student Loan Information Sheet included in this packet.

B) "Our primary concern at UAF is that the collection of the information needed to certify good academic standing and satisfactory progress would be so cumbersome and time consuming that our students would experience a considerable delay in actually receiving their state loan checks.

1) According to Dr. Romesberg, this problem only exists for the Spring semester. We are presently working with Dr. Romesberg and the Postsecondary Commission to improve this situation.

HOUSE BILL 174

The purpose of House Bill 174 is to allow students to combine credits from the postsecondary schools which they are concurrently attending in order to be eligible for student loans.

This bill primarily addresses a problem in Fairbanks, in which students attending either the University of Alaska or Tanana Valley Community College cannot combine their total number of credits in order to reach the number of credits necessary to achieve full-time student status.

The greater purpose of this bill is to allow students more flexibility in determining which courses they will take while attending college. This legislation in effect acknowledges the close interrelationship between community colleges and universities, and the healthy diversity of programs and courses in both of these institutions. In all cases, a student must be enrolled full-time in a degree program from an accredited school in order to be eligible for a student loan.

The provisions of HB 174 are already partially in effect in both Anchorage and Juneau. In Anchorage, a consortium agreement exists between the University of Alaska and Anchorage Community College in which an undergraduate student taking a total of 12 credits between both schools is eligible for a student loan. In Juneau, the relationship between the University of Alaska and Juneau-Douglas Community College is such that there is again no difficulty in a student being able to receive a loan while taking a combined full-time credit load.

No opposition to this dual enrollment was voiced by the administration at UAA, ACC, UAJ, or JDCC. Indeed, the feelings from these schools are extremely positive toward such a program. Verification of student grades is facilitated in these university-community college arrangements in that each school is able to directly access the student records of the companion school.

Dean Roger Worsley of ACC suggested that a student take 75 percent of the course load, or nine credits, from the parent institution in order to clarify which school is ultimately responsible for maintaining a student's complete academic records and for issuing student loan checks. According to Dr. Kerry Romesberg, a regulation within the Postsecondary Commission is expected to be enacted soon which will stipulate that this condition be followed. This regulation will also limit the amount of paperwork that financial aid officers will have to deal with for dual enrollment students.

A question has been posed several times as to whether or not credits from correspondence courses could be applied toward student loan eligibility under provisions of this bill. Under present regulations, students are allowed to apply these courses toward loan eligibility requirements at the discretion of the parent institution. These courses must be approved by the parent institution, and they must be administered by an accredited school.

The language of this bill differs slightly from the wording in Senate Bill 197 in that HB 174 refers to applying only credits, not credits or hours, toward student loan eligibility requirements. By accepting only credits, financial aid officers would not be subject to the time-consuming procedure of converting hours to credits.

The purpose of this bill, again, is simply to allow those students who are in financial need the opportunity to take full advantage of the academic programs offered at the schools in their area.

RE: Summary/ HB 174 "An Act relating to student loan eligibility"

Section 1: Amends 14.43.120(c) Conditions of Loans.

1). Allows students enrolled part-time in more than one institution for a total number of credits equivalent to a full-time student to be eligible to receive a loan from the Alaska Student Loan program.

2). Student must be in 'good standing' in all schools in which he or she is enrolled.

note: The definition of 'good standing' is established through regulation as:

1) maintaining 12 credit hours per semester; and
2) maintaining a 2.0 average.

Similar language has been proposed and included in the Senate version of the Student Loan Program revision legislation, SB 209 (HESS) which is currently in the Senate Finance Committee.

This legislation does not provide for an effective date, therefore, the bill becomes effective 90 days after the Governor's signature.

RE: LEGISLATION REGARDING THE ALASKA STUDENT LOAN PROGRAM

FEB 1 1 1983
Chancellor
University of Alaska, Juneau

Senate Bill # 118 reduces the time a student must be in the state before applying for a loan, but also limits loans to students who apply before graduation from high school. The one year residency requirement (reduced from two years) will put a stop to litigation in that area. However, the requirement for all loan applicants to apply while still in high school will be a detriment to the spirit of the loan program and establish a new justification for litigation.

As the UAJ Financial Aid Officer, I must oppose this bill for several reasons. 1) It is sometimes difficult for high school students to decide if they want to go to college. I know there will be many young people who will neglect to fill out the application before high school graduation and later decide to go to college. This bill is asking all seventeen year old students in Alaska to decide their life goal without experiencing life beyond the academic setting. 2) Many students do not consciously choose a career path until several years after high school and after many life experiences. This bill would not afford this type of student the same opportunity as that provided for students who begin college shortly after high school. 3) Many students wait several years after graduation from a baccalaureate program before persuing graduate study. This bill does not mention graduate study; therefore, I am assuming that it could also be interpreted to eliminate loans for post-baccalaureate students.

House Bill # 56 asks for the loan interest rate to be raised to 7% and for the loan to be limited to the cost of tuition, room and board. This bill is acceptable.

House Bill # 174 says that a student may attend classes at two institutions to accumulate the 12 credits required for the loan program. This bill is acceptable and also beneficial to many of the students in Southeast Alaska.

Alaska Statewide Student Association
P.O. BOX 548
DOUGLAS, ALASKA 99824
REPRESENTING STUDENTS OF THE UNIVERSITY OF ALASKA STATEWIDE SYSTEM

ASSA requests that the following section be added to SPONSOR SUBSTITUTE FOR HOUSE BILL 56:

AS 14.43.120(c) is amended to read:

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing or as a part-time student in good standing in more than one institution for a total number of credits equivalent to a full-time student in a career education program, college, or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection.

At present, students enrolled at both UAF and TVCC, UAA and ACC, or Sitka CC and Sheldon Jackson may not receive scholarship loans unless they have a total of twelve credit hours at one or the other institution. This amendment would allow these perfectly legitimate, full-time students to be eligible for the loans.

Thank you.

KCK

1982-83 ALASKA STUDENT LOAN INFORMATION

As a result of recent action by the Alaska Commission on Postsecondary Education, schools are no longer required to complete Part B of the Alaska Student Loan Application.

You may submit your application (two white copies) directly to the State Loan Office, retaining the yellow student copy, the cover sheets and this letter.

BE SURE THAT YOUR APPLICATION IS COMPLETELY FILLED OUT -- over 50% of the Alaska Student Loan applications are returned to the student because of omissions. When your application is received in Juneau, you will receive a blue post card with the date received indicated. This does not mean your application is complete; only that it has been received. You will next receive a promissory note in triplicate. Sign and date the note, list the dates of disbursement (8-20-82 for Fall 1982 semester and 1-1-83 for Spring 1983 semester), keep the marigold copy, and return the white and pink copies to Juneau.

Normally, the Financial Aid Office receives Alaska Student Loan checks in time to release funds at Registration. Before releasing checks, we must determine academic eligibility for each recipient. If you are currently enrolled at the University of Alaska-Fairbanks, you must be in good standing (2.0 semester and cumulative grade point average for undergraduates and 3.0 semester and cumulative grade point average for graduate students) to be eligible for your Fall 1982 check. Entering and transfer students must be admitted IN GOOD STANDING to a program leading toward a degree or certificate. Recipients must be full-time (12 credits for undergraduate, 9 credits for graduate students) and must complete 12 and 9 respectively each semester they receive a loan to be eligible for the following term.

Courses in the following areas cannot be counted toward the full-time financial aid requirement: Tanana Valley Community College, correspondence, extension, or television.

The eligibility requirements listed above reflect current Alaska State laws and regulations. NO EXCEPTIONS CAN BE MADE BY THE UNIVERSITY OF ALASKA-FAIRBANKS FINANCIAL AID OFFICE.

Any questions regarding the status of your application should be directed to the Alaska Student Loan Office in Juneau, since the Financial Aid Office acts only as a disbursing and certifying agency.

April 13, 1983

Representative Mike Davis
Pouch V
Juneau, Alaska 99811

Dear Representative Davis:

I am writing at the request of Kerry Howard to indicate my support of HB174 in concept. I believe that students should be allowed to count credits from more than one institution toward fulfilling the requirement for eligibility for the state student loan program.

However, I believe that there should be in place a consortium agreement between the two institutions as is now in existence between ACC/UAA. This agreement should require that 75 percent of the credits required for qualification should be taken at the parent institution. The parent institution is the institution which is disbursing the aid.

In the past, we have had problems in federal programs with students receiving aid from more than one institution. This is not the problem with the state loan, as there is only one check in this case. However, there is a lot of paperwork and staff time required in handling the state loan program. If a student were required to take 75 percent or nine credits from the parent institution, there would be an inherent commitment on the part of that student to attend that particular institution.

Another reason for this requirement is the necessity to certify academic eligibility between semesters. If a student is taking credits from more than one institution, a parent institution is required to obtain grade reports from all other institutions prior to certifying eligibility. This is simpler if consortium agreements are in effect. The time between semesters is short and the grade reporting process is lengthy. Reciprocal agreements between institutions for the release of grades is a complicated process covered by the privacy acts.

In summary, consortium agreements between cooperating institutions, with a parent institution requirement of 75 percent of the credits required for eligibility, would be a good addition to your bill in my view. Another desired addition would be for the parent institution to receive some support costs for facilitating the state loan program. Federal aid programs provide a percentage of dollars distributed to be used to administer their funds. The Alaska State Loan Program requires a lot of work on the part of our staff, but no funds are appropriated for this purpose. Our success in acquiring additional staff

through the University budget process has not been good. A five or ten percent overhead distribution to institutions handling a large volume of state loan checks would certainly be beneficial.

Sincerely,

Roger L. Worsley, Dean
Educational Services

UNIVERSITY OF ALASKA FAIRBANKS
Fairbanks, Alaska 99701

March 9, 1983

Representative Mike Davis
Alaska State Office Building
Pouch V
Juneau, AK 99811

Dear Representative Davis:

This letter is in response to your request that I provide information regarding any administrative problems that colleges and universities might encounter should House Bill 174 be enacted.

As you probably know, the loan regulations already permit schools to combine credits provided a consortium or formal transfer agreement exists between the schools involved. This permits schools to voluntarily combine credits for loan recipients. However, it is my impression that HB 174 would require that schools accept concurrent enrollment from other schools in addition to their own for the purposes of establishing academic eligibility for the Alaska Student Loan.

Our primary concern at UAF is that the collection of the information needed to certify good academic standing and satisfactory progress would be so cumbersome and time consuming that our students would experience a considerable delay in actually receiving their state loan checks. I am attaching a sample copy of the "Record of Disbursement and Receipt" form which accompanies each state loan check and which the school's Financial Aid Officer must sign before disbursing the check to the student. Please note that the school must certify that the student is/was enrolled in a degree or diploma or certificate program as a full time student and is maintaining satisfactory progress as determined by school policy. HB 174 would put schools in the position of making this certification only after a lengthy and cumbersome administrative process of 1.) collecting certification of enrollment and fee statements from each school the student is attending, 2.) collecting official transcripts at the end of each term from each school the student is attending, 3.) official evaluation of transfer credits at the end of each term by the home institution's registrar, and 4.) a combining of credits earned together with a revision of the semester and cumulative g.p.a. Even large schools with sophisticated computer capability would have to do most of this work by hand and on a student by student basis. We expect that the enactment of this bill would cause a delay in delivering ASL checks to all students of at least three to four weeks after registration. In addition, all of the certification activity would take place at the time of registration when we are most heavily involved with getting students registered for classes and assisting students with various financial aid problems.

I would also like to mention that under HB 174, our students would not be limited to a TVCC/UAF dual enrollment. We would also be required to include UA correspondence work and any other accredited school's correspondence study. There is even the possibility that an out-of-state school would offer a special extension course in Fairbanks. Chapman College did just that a few years ago when it offered MBA coursework in the Fairbanks area.

A student attending school out of state in a large metropolitan area could easily enroll in a three credit course at each of four schools. It would be very time consuming to combine those credits at one school if all of the schools had a different starting and ending date. There is also the very real possibility that there could be a combination of quarter and semester credits to evaluate. There are some schools outside that have discussed the possibility of withdrawing themselves from eligibility for the Alaska Student Loan because the regulations are so different then accepted financial aid standards for the aid their school offers. I believe there is a real risk that other schools may simply choose to not accept another state's imposition of academic regulation on their institution and opt out of participation in the Alaska Student Loan program. It is extremely difficult to serve student's needs in a timely manner when faced with a variety of conflicting financial aid standards.

Finally, I would like to confirm that UAF Financial Aid applicants for the current academic year were advised well ahead of time that they would be required to carry a minimum of 12 UAF credits per semester (undergraduates) in order to be eligible for the loan at this school. We accomplished this by publishing news releases in the student newspaper, and by attaching an instruction sheet to each Alaska Student Loan application form that was given out from this office. Because ASL regulations require a minimum of 12 credits to maintain eligibility, we suggest to students that they carry those 12 credits with UAF, then take any desired coursework from other schools in addition to that minimum course load. This gives them the flexibility of exploring other schools and subjects while maintaining their eligibility for the loan at UAF.

I hope this information is useful to you. Please call us if you have further questions. Our office phone number is 474-7256. We appreciate this opportunity to express our views and we look forward to working with you.

Sincerely,

Carol M. Thomson
Financial Aid Advisor

Analysis (HB174):

Allowing multiple enrollments should enable additional people to apply, but we have no way of determining what that number would be. We also have indication that some schools will require such cross-documentation that those students will face weeks and months of delays in receiving funds. Therefore, we have left the fiscal impact at zero.

5/11/83 House HESS

Tischer Kopenen
Fritz Herrmann
Davis Goll

HB174:

Davis - testified on behalf of his bill - Dist 19 - As a comm college instructor this bill came to pass.
Constituent - backup in file

- Credits interchangeable but not for purposes of receiving a student loan.

Tischer - how does one get Univ of Oreg - etc?

Davis - Yes. must get 13 credits @ the same campus. Consortium agreement in Anch but not in Juneau. Suggestion by Worley that 75% or 9 credits should be taken at the parent institution. I believe DR Romesburg can address this. Juneau sees administrative problems - records from too many institutions. Has been worked out in Anch - could be remedied in Juneau as well.

Goll: Concern - career education - under 14.43 - if you allow them to break up the credit load would you be breaking up their program. Intent - courses must contribute to degree program?

Davis. Further explained bill - example - Freshman level = 6 credits specifically must be taken but they don't necessarily count towards student loan eligibility.

Koppenen - Required courses & electives - this bill could address the elective courses?

Romesburg - Addresses FH's only. Not the law or regs restricting the students it exists solely with the Admin of the University.
Anchorage Campus uses contractual arrangement. Hiks additional burden.
Proposed regs - if enrolled in more than one inst. - 75% of courses @ mother institute

Tischer - TVCC to UAF doesn't want to agree?

Romesburg } Are Regents involved
} No autonomous decision by UAF

Dall - 14.43.125 - follows 120 - seems as the eligibility & continuation be the same - should we amend 43.125 -

Romesburg - No - @ no need for amendment.
Transfer guide avail (this year) to see if & how the class can transfer.
Consumer Protection role in state.

Hermann - Why if we're all one college aren't these transferrable?

KR decided by the dept as to which courses may transfer.

Davis – Gail's scenario is different than this bill addresses.

Herrmann – How many people will this effect.

Davis – Major impact on TVCC – students can't afford the disallowance. TVCC enrollment decreasing.

Gail – force UHF to recog Student as part time in good standing –

– Real Issue – acceptance of credits being transferred –

– Move out w/ Ind rec !

RE: Summary/ HB 174 "An Act relating to student loan eligibility"

Section 1: Amends 14.43.120(c) Conditions of Loans.

1). Allows students enrolled part-time in more than one institution for a total number of credits equivalent to a full-time student to be eligible to receive a loan from the Alaska Student Loan program.

2). Student must be in 'good standing' in all schools in which he or she is enrolled.

note: The definition of 'good standing' is established through regulation as:

1) maintaining 12 credit hours per semester; and
2) maintaining a 2.0 average.

Similar language has been proposed and included in the Senate version of the Student Loan Program revision legislation, SB 209 (HESS) which is currently in the Senate Finance Committee.

This legislation does not provide for an effective date, therefore, the bill becomes effective 90 days after the Governor's signature.

ATTN: Director

January 19, 1983

This is to appeal the loss of my Alaska Student Loan for spring semester, 1983. It was denied on the grounds that I no longer meet the eligibility requirements. Fall semester, 1982 I took 12 credits at the University of Alaska-Fairbanks, earned 10 of those credits, for a semester GPA of 3.0. I also took 4 credits at T.V.C.C., earned those 4 credits, for a semester GPA of 4.0. I therefore, earned a total of 14 credits for the fall semester of 1982, with my total GPA being somewhere between 3.0 and 4.0

When I went to see the UAF Financial Aid officer, the explanation was I did not complete 12 credits to be classified as a full time student and therefore, could not receive my A.S.L.P. loan this semester. They stated UAF and T.V.C.C. are different and the credit I earn at T.V.C.C. does not count. It is true that I registered at two different places and received two seperate grade reports. However, I paid only one tuition (that at UAF). This implies to me they are part of the same system.

With some research, I found that this division between UAF and T.V.C.C. is fairly recent and was told that notices of this were sent to all students, though I never received one. When I called the A.S.L.P. office in Juneau, I was told that they could do nothing unless the UAF Financial Aid office authorized me to receive the check. But when I went to Financial Aid they told me

they (UAF) didn't have the power to change the decision but that A.S.L.P. did. All I have encountered so far is this type of beaurocratic run-around and it is most confusing to me as a student. So I went to see George Winford (advisor and head of UAF Journalism department) who, by the way, supports my appeal. He informed me I could have my T.V.C.C. classes transfered to my UAF transcript, which I have done. It will now show that I have completed 14 credits for the fall semester of 1982.

Under Borrower's Responsibilities on my promissory note it states:

> I must maintain good standing, as defined for this program, in order to receive disbursement of my loan under the Alaska Student Loan Program. Good standing is defined as enrolling and completing at least a full-time student load while maintaining a grade-point-average of at least a "C" for an undergraduate or "B" for a graduate student.

It is my interpretation that I did comply with this regulation as worded in Item #8 of promissory note signed 9/7/82, and as my transcript will show.

I have had to borrow the money to pay my fees for this semester but must pay that person back and have no money on which to live. I am an earnest college student and I need my A.S.L.P. loan to continue my education. Therefore, I request that you reinstate my Alaska Student Loan for the spring semester of 1983 on the grounds that I <u>did</u> meet the requirements: completion of 14 credits at a 3.0+ GPA in fall of 1982.

Please review my appeal and let me know immediately of your decision.

Thank you very much for your consider[illegible]n...

KATHLEEN P. SPOTH (574-34-9200)

UNIVERSITY OF ALASKA, FAIRBANKS
Fairbanks, Alaska 99701

Smoger, Kathleen

We are sorry to inform you that you are academically ineligible to receive the following financial aid at the University of Alaska-Fairbanks for the coming semester for the reason listed below:

TYPE OF AID

___	Pell Grant	X	Alaska Student Loan
___	UAF Scholarship/Grant	___	State Educational Incentive Grant
___	McIntosh Estate Grant	___	Tuition/Fee Waiver
___	Alaska Native Scholarship	___	BIA Grant-In-Aid
___	State Room Scholarship	___	Guaranteed Student Loan
___	Athletic Grant	___	_____

REASON

___ You were admitted/readmitted on academic probation.

X You did not meet program requirements for continued eligibility. (Since there are different requirements for various programs, you may be eligible for one type of aid and ineligible for another.)

___ You received incomplete or deferred grade(s). These must be removed within 60 days after Registration or the aid will be cancelled.

Please contact our office in writing at least one week prior to Registration if you feel that an error has been made.

Sincerely,

Ida Greiner
Director, Financial Aid

STATEMENT OF BORROWER'S RIGHTS AND RESPONSIBILITIES

A STUDENT LOAN IS A SERIOUS LEGAL OBLIGATION. IT IS EXTREMELY IMPORTANT THAT YOU UNDERSTAND YOUR RIGHTS AND RESPONSIBILITIES. WHEN YOU, THE STUDENT BORROWER, SIGN THE REVERSE SIDE OF THIS NOTE IT MEANS THAT (1) YOU UNDERSTAND YOUR RIGHTS AND RESPONSIBILITIES, AND THAT (2) YOU AGREE TO HONOR THEM.

BORROWER'S RIGHTS:

1. The lender must provide me a copy of the completed Promissory Note no later than the time the loan is disbursed and by retaining the Borrower's Copy of this note, I indicate that this right has been fulfilled. The lender must return the original Promissory Note to me when I have paid the loan in full.
2. My yearly and cumulative maximum Alaska Student Loan amounts are:

Category of Borrower	Annual Loan Limit	Aggregate Loan Limit
Undergraduate student	$6,000	May receive loans up to 5 undergraduate academic school years.
Graduate student	$7,000	May receive loans up to 5 graduate academic school years. (Total years may not exceed 8)

3. I am not required to provide security for this loan. The lender may require an endorser to sign the Promissory Note only if an endorsement is necessary —because I am under sixteen years of age — to make the Promissory Note a binding obligation under State law.
4. Each loan check must be payable to me. The lender will mail the check to me in care of the Student Financial Aid Office at the school I will be attending and the check will require my endorsement.
5. I have a right to a 12 month "grace period" before the repayment period begins. The grace period starts the first day after I leave school or cease to attend an eligible educational institution on a full-time basis. My first payment will be due no later than the first of the thirteenth month after I leave school or cease to attend school on a full-time basis.
6. The lender is to provide me with a repayment schedule before the repayment period begins. The provisions of this schedule must conform to the provisions under REPAYMENT in the Promissory Note.
7. I will repay this loan in monthly installments within 10 years of the date of commencing repayment. However, the following exceptions to these rules apply:
   A. If, during the grace period I request a shorter repayment period, the lender may grant me a shorter period.
   B. Any period described under **DEFERMENT** in this Promissory Note will not be included in determining the 10 year period mentioned above.
8. I have a right to prepay the whole loan or any portion of the loan at any time without penalty.
9. If I meet certain requirements, I have a right to defer payment on the loan as set forth under **DEFERMENT** in the Promissory Note. Also, I have a right to a six month post-deferment grace period after each period of authorized deferment.
10. The Alaska Student Loan Program normally will pay the interest that accrues on the loan both before the repayment period, during any authorized deferment period, and during the six month period following deferment. In that event, the lender may not collect or attempt to collect this interest from me. The interest on the loan may not exceed five percent (5%) per year.
11. My loan obligation will be cancelled if I become fifty percent (50%) or more permanently disabled or if I die.
12. If I am willing, but financially unable to make payments under my repayment schedule, I may request the lender to allow any of the following (forbearance or hardship status):
    A. A short period during which I make no payments;
    B. An extension of time for making payment; or
    C. The making of smaller payments than were scheduled originally.
    However, the lender is not required to approve my request.
13. If the lender sells the loan or otherwise transfers the right to receive payment, I must be sent a clear notification which spells out my obligations to the party to which my loan was sold.
14. Default occurs when I fail to make an installment payment when due, or to meet other terms of the Promissory Note under circumstances where the Alaska Student Loan Program finds it reasonable to conclude that I no longer intend to honor the obligation to repay, provided that my failure persists for (a) 120 days if I repay in monthly installments, or (b) 180 days if I repay in installments due less frequently than monthly. If I default, I will owe the entire balance of the loan plus accrued interest. If I am able, but unwilling to repay my loans, the Alaska Student Loan Program may institute legal action to force me to repay my loans. If I am named in such a legal action, I will forfeit all partial cancellation benefits for which I am otherwise eligible.
15. The lender must keep on file a copy of the State laws and regulations that govern the Alaska Student Loan Program. I have a right to examine these materials if I wish.
16. I should investigate the availability of other forms of financial aid with the school's financial aid administrator. It may be to my benefit to determine my eligibility for grant, work-study and other sources of assistance before applying for a student loan. I understand that receipt of an Alaska Student Loan may eliminate any awards that I may receive from other programs.
17. If I meet the eligibility requirements listed under **PARTIAL CANCELLATION** in the Promissory Note, I may be entitled to up to 50% partial cancellation of the principal which was actually advanced to me, plus accrued interest of this loan through the Alaska Student Loan Program, subject to the restriction noted in item 14 in this statement.

BORROWER'S RESPONSIBILITIES:

1. I must use care in choosing a school. Each school must provide a prospective student with information about the school and its programs. I will consider this information carefully before deciding to attend a specific school. I understand that the State Government does not vouch for the quality of a school or its programs.
2. I must repay the loan in accordance with the repayment schedule that the lender will give me.
3. I must notify the lender promptly, in writing, if any of the following events occur before the loan is repaid:
   A. My failure to enroll in school for the period for which the loan was intended.
   B. My withdrawal from school or my attendance in school on less than a full-time basis.
   C. My transfer from one school to another school.
   D. My graduation from school.
   E. A change in my name (e.g., maiden name to married name).
   F. A change in my address.
   G. A change in my Alaska residency status.
4. If I qualify for a deferment of repayment, I must (a) provide the lender with written evidence of my eligibility, and (b) notify the lender as soon as the condition for which the deferment was granted no longer exits.
5. I must use the proceeds that I receive from this loan for tuition, room and board, fees, books and supplies to attend the school named, for the period indicated on the loan application.
6. I must maintain my Alaska residency status in order to receive disbursements of my loan under the Alaska Student Loan Program.
7. I must maintain full-time student status in order to receive disbursements of my loan under the Alaska Student Loan Program.
8. I must maintain good standing, as defined for this program, in order to receive disbursements of my loan under the Alaska Student Loan Program. Good standing is defined as enrolling and completing at least a full-time student load while maintaining a grade point average of at least a "C" for an undergraduate or "B" for a graduate student.
9. I must request an application form from the Alaska Student Loan Program Office in each year which I wish to apply for a loan under the program.
10. I must submit my complete and correct Alaska Student Loan Program application form to the Alaska Student Loan Program office by May 15 in order to receive priority processing of my application.

ALASKA STUDENT LOAN PROGRAM

REQUEST FOR WAIVER OF GOOD STANDING

Requirements (20 AAC 15.010)

A. Student: Kathleen M. Smoyer | Social Security Number: 574-34-9200

Current Mailing Address: Street: P.O. Box 2652 | City: Fairbanks | State: Alaska | Zip Code: 99707

Institution: University of Alaska-Fairbanks

B. I hereby request, for the reasons stated below, waiver of the good standing requirement for an Alaska Student Loan, as provided for in 20 AAC 15.040 (j), (k), and (l).

C. My loan was denied because of my failure to (please check):

- ☐ 1. maintain a cumulative C.P.A. of 2.0, undergraduate, or 3.0, graduate
- ☐ 2. maintain a term G.P.A. of 1.5, and/or
- ☒ 3. successfully complete a full-time student load the last term I borrowed under this program.

D. Reason for request (please check):

- ☐ Medical disability
- ☐ Death in the immediate family
- ☐ Administrative error
- ☐ Duress
- ☐ Record upon which ineligibility is based is from an attendance period five or more years in the past
- ☒ Other (Please explain)

Explanation attached.

E. Detailed explanation. Attach a detailed explanation of your justification for a waiver. Be specific. If you are appealing on a grade point average basis, include what your cumulative average is and how you have performed in the last couple of years (by term). If you are appealing for less than full-time attendance, include how many hours you did complete, how many you failed to successfully complete, and explain. If you are offering a time argument, include why you feel you are now more prepared for school than you were when you established your "ineligible" record. Include documentation. Transcripts may be required, doctor's certification will be required, evidence of adminstrative error will need verification.

F. SIGNATURE: My signature below certifies that in the absence of a Notary Public or other official authorized to administer an oath, I personally certify under penalty of perjury that the foregoing and accompanying documentation are true.*

Signed: Kathleen M. Smoyer | Date: Jan. 19, 1983

Location: (City and State) Fairbanks, Alaska

G. Keep one copy for your files, give one copy to your Financial Aid Office, and mail original to:

Alaska Commission on Postsecondary Education
Division of Student Financial Aid
Pouch FP
400 Willoughby Avenue
Juneau, Alaska 99811

* Under AS 09.63.020(b), a person who makes false sworn certification which he does not believe to be true, under penalty of perjury is guilty of perjury.

ALASKA STUDENT LOAN APPLICATION

This application to be used for the 1982-83 year only. If you will be attending a Voc-Tech school, attendance must begin on or after JULY 1, 1982. If you will be attending a college or university, to be used from Fall 1982 through Summer 1983.

ALASKA STUDENT LOAN PROGRAM, POUCH FP, 400 WILLOUGHBY AVENUE, JUNEAU, ALASKA 9981[illegible] AMENDMENT

WARNING: This assistance applied for herein may be provided by the State of Alaska. Any person who knowingly makes a false or misleading statement on this form shall be subject to prosecution under provision of Alaska Statute.

STUDENT BORROWER CERTIFICATION AND STATEMENT OF EDUCATION PURPOSE

I, the student borrower, certify that the information contained in Part A of this application is true, complete and correct to the best of my knowledge and belief and is made in good faith. I hereby authorize the educational institution to pay to the Alaska Student Loan Office any refund which may be due me up to the amount of this loan. I further authorize any educational institution that I may attend to release to the Alaska Student Loan Office or subsequent holder or their agents, any requested information pertinent to this loan (e.g. employment, enrollment status, current address). I certify that I will use any funds I receive under the Alaska Student Loan Program solely for the expenses related to attendance at the educational institution named on this form for the academic period covered by this application. I understand that I am responsible for repaying any funds I receive which cannot reasonably be attributed to meeting my educational expenses at the educational institution named on this form. I further understand that the amount of any repayment is based on regulations published by the Alaska Student Loan Office. I certify that I am not now in default on an Alaska Student Loan (ASL). I authorize the Alaska Student Loan Program to issue warrants necessary to cover the proceeds of my loan, in full or in part, made payable to me and sent in care of the student financial aid office at the educational institution named on this application form.

SCHOOL CERTIFICATION STATEMENT

I hereby certify that the student borrower named on this application form is neither in default nor owes a refund with respect to previous loans or grants received for attendance at this institution based on available records. I further certify that I have reviewed the information in Part A of this application, have noted any amendments to items #17 and #18 in the institutional columns, and that the information provided is true, complete, and correct to the best of my knowledge and belief.

3rd Disbursement	XX	XXX	XXX	$ 0.00
4th Disbursement	XX	XXX	XXX	$ 0.00
TOTAL LOAN AMOUNT				$ 5,950.00

PLEASE READ CAREFULLY THIS THE TERMS AND CONDITIONS OF THIS PROMISSORY NOTE AND THE STATEMENT OF BORROWER'S RIGHTS AND RESPONSIBILITIES.

YOUR REQUEST FOR A STUDENT LOAN HAS BEEN APPROVED FOR THE TOTAL LOAN AMOUNT INDICATED ABOVE. THE TERMS OF THIS PROMISSORY NOTE WILL BE INTERPRETED ACCORDING TO ALASKA STATUTE (14.40.751 to .806) AND ALASKA REGULATIONS (20 ACC 15.010 to .410) GOVERNING THE ALASKA STUDENT LOAN PROGRAM.

I, the borrower, promise to pay to the Alaska Student Loan Program, Pouch FP, 400 Willoughby Avenue, Juneau, Alaska 99811, the lender, all of the principal sum totaled above to the extent it is advanced to me, plus an amount equivalent to simple interest on this sum at the rate of five percent per year. If I fail to pay any of these amounts when they are due, I will also pay costs—including attorney's fees—that are permitted by State Regulations and are necessary for the collection of these amounts.

The lender and I understand th[illegible] the following terms apply to this loan:

REPAYMENT:
1. I will repay this loan in monthly installments during a repayment period that will begin no later than the 1st of the thirteenth month (the "grace period") after I either leave school or cease to carry a full-time academic workload at an eligible educational institution (the "school"). I may, however, choose to have the repayment period begin earlier. 2. I will repay this loan within ten (10) years from the date that the repayment period begins. If, during the grace period, I request a shorter repayment period, the lender may grant me a shorter period. In that event, I may, later choose to have the repayment period extended to the number of months remaining in the original 10 year repayment cycle at the time the extension is requested. Any approved period of deferment listed under DEFERMENT will not be included in determining the 10 year repayment period. 3. The particular terms and conditions of repayment that apply to this loan will be set forth in a separate document, known as a repayment schedule or a statement of loan terms, that the lender is to provide to me before the repayment period begins.

PREPAYMENT:
I may, at my option and without penalty, prepay all or any part of the principal and accrued interest of this loan at any time. If I do so, I will be entitled to a rebate of any unearned interest that I have paid. Any rebate I am entitled to will be calculated by multiplying the number of months the loan had been prepaid by the amount of the monthly interest charge listed on the repayment schedule or the statement of loan terms less any earned, unpaid interest listed on the repayment schedule or statement of loan terms.

DEFERMENT:
My loan payment will be deferred after the repayment period begins, provided I comply with the procedural requirments set forth in the regulations governing the Alaska Student Loan Program, in any of these circumstances:
1. While I am enrolled in full-time study at an eligible educational institution (12 semester or quarter hours for an undergraduate student, 9 semester or quarter hours for a graduate student, or 30 clock hours per week for a career education program student);
2. For a single period not to exceed one year while I am conscientiously seeking but unable to find full-time employment in the United States;
3. For a period not to exceed three years while I am serving as a full-time volunteer under the Peace Corps Act;
4. For a period not to exceed three years while I am serving as a full-time volunteer under the Domestic Service Act of 1973 (action programs);
5. For a period not to exceed two years while I am serving a first required internship/residency as part of the program of study;
6. For a period not to exceed three years while (a) I am fifty percent (50%) or more disabled as certified by a qualified physician or (b) I am unable to secure employment by reason of the care required by a spouse who is temporarily totally disabled;
7. For any period while I am serving on active duty in the Armed Forces of the United States.

I am also entitled to a six month grace period following any period of authorized deferment under this section before repayment is required to resume.

INTEREST:
1. The Alaska Student Loan Program will normally pay the interest that accrues on this loan prior to the repayment period, during any post-deferment grace period, and during any deferment period as specified under DEFERMENT in this promissory note. Prior to the loan repayment period, during any post-deferment grace period, and during any deferment period, the lender may not attempt to collect the interest from me. I may, however, choose to pay this interest myself.
2. Once the repayment period begins, I will be responsible for payment of all the interest that accrues on this loan, except for interest that accrues during any period described under DEFERMENT in this promissory note.
3. The Lender may add any interest that is not paid when it is due to the unpaid balance of this loan, in accordance with Alaska Regulations.

DEFAULT:
If I default on this loan, the lender may declare the entire unpaid amount of the loan, including interest, immediately due and payable. A default may also make me ineligible for the benefits described under DEFERMENT, INTEREST, and PARTIAL CANCELLATION in this promissory note. Under the Regulations governing this program, any of the following events could be considered a default: my failure to make a payment when it is due, my failure to notify the lender of a change in my name, address, withdrawal for full-time student status, change of schools, residency status, my failure to maintain Alaska residency, or if I falsify any document in connection with the making of this loan, whether by omission or commission.

DISABILITY OR DEATH:
If I become fifty percent (50%) or more permanently disabled, or if I die, my obligation to pay any amount owed to this loan will be cancelled as specified under the regulations governing the Alaska Student Loan Program.

SEP 10 1982
FINANCIAL AID
ACCOUNT #

PARTIAL CANCELLATION:
If I receive the appropriate degree, diploma or certificate for which this loan was made, and if I reside in Alaska within one year from the time I am awarded my degree, diploma or certificate, then upon my providing proof of graduation to the lender, I may receive partial cancellation of up to fifty percent (50%) of the original principal of this loan, plus all actual amounts advanced to me, and accrued interest when the following requirements have been satisfied:
1. I have completed over two but less than three consecutive years of Alaska residency, 10% of the principal and interest of this loan will be cancelled upon request in writing by me;
2. I have completed over three but less than four consecutive years of Alaska residency, 10% of the principal and interest of this loan will be cancelled upon request in writing by me;
3. I have completed over four but less than five consecutive years of Alaska residency, 10% of the principal and interest of this loan will be cancelled upon request in writing by me;
4. I have completed over five but less than six consecutive years of Alaska residency, 10% of the principal and interest of writing by me;
5. I have completed over six consecutive years of Alaska residency, 10% of the principal and interest of this loan will be cancelled upon request in writing by me.

I understand that if I cease to be a resident of Alaska during the period of the eligibility for partial cancellation, I lose my eligibility for any further partial cancellation benefits.

GENERAL:
1. The lender must provide me with a copy of this promissory note. By signing and dating this note below, I have indicated that I have retained the borrower's copy for my records. The terms of this promissory note will be interpreted according to the Regulations and Statutes governing the Alaska Student Loan Program as listed in bold print.
2. I will use all of the proceeds that I receive from this loan solely for tuition, books, required fees, room and board.
3. I am not required to provide any security for this loan. The lender may require my parent or legal guardian to sign the promissory note only if an endorser is necessary — because I am under sixteen years of age — to make the promissory note a binding obligation under Alaska Law.
4. I will promptly notify the lender, in writing, if any of the following events occur before the loan is repaid, change of my name, change of address, change of school enrollment status or change from Alaska residency status.
5. I understand that I will not be granted ASLP loans for more than five years of undergraduate study, or five years of graduate study, or for a total of eight years of combined study. Intervening years in which a loan was not received are not counted toward the total years permitted.
6. This loan will be disbursed to me in the amounts listed above and will be disbursed in accordance with the disbursement schedule on this form.

ACCEPTANCE:
I have read this promissory note, including the terms and conditions on the reverse side and agree to abide by these conditions.

STATEMENT OF BORROWER'S RIGHTS AND RESPONSIBILITIES

A STUDENT LOAN IS A SERIOUS LEGAL OBLIGATION. IT IS EXTREMELY IMPORTANT THAT YOU UNDERSTAND YOUR RIGHTS AND RESPONSIBILITIES. WHEN YOU, THE STUDENT BORROWER, SIGN THE REVERSE SIDE OF THIS NOTE IT MEANS THAT (1) YOU UNDERSTAND YOUR RIGHTS AND RESPONSIBILITIES, AND THAT (2) YOU AGREE TO HONOR THEM.

BORROWER'S RIGHTS:

1. The lender must provide me a copy of the completed Promissory Note no later than the time the loan is disbursed and by retaining the Borrower's Copy of this note, I indicate that this right has been fulfilled. The lender must return the original Promissory Note to me when I have paid the loan in full.
2. My yearly and cumulative maximum Alaska Student Loan amounts are:

Category of Borrower	Annual Loan Limit	Aggregate Loan Limit
Undergraduate student	$6,000	May receive loans up to 5 undergraduate academic school years.
Graduate student	$7,000	May receive loans up to 5 graduate academic school years. (Total years may not exceed 8)

3. I am not required to provide security for this loan. The lender may require an endorser to sign the Promissory Note only if an endorsement is necessary —because I am under sixteen years of age — to make the Promissory Note a binding obligation under State law.
4. Each loan check must be payable to me. The lender will mail the check to me in care of the Student Financial Aid Office at the school I will be attending and the check will require my endorsement.
5. I have a right to a 12 month "grace period" before the repayment period begins. The grace period starts the first day after I leave school or cease to attend an eligible educational institution on a full-time basis. My first payment will be due no later than the first of the thirteenth month after I leave school or cease to attend school on a full-time basis.
6. The lender is to provide me with a repayment schedule before the repayment period begins. The provisions of this schedule must conform to the provisions under REPAYMENT in the Promissory Note.
7. I will repay this loan in monthly installments within 10 years of the date of commencing repayment. However, the following exceptions to these rules apply:
   A. If, during the grace period I request a shorter repayment period, the lender may grant me a shorter period.
   B. Any period described under **DEFERMENT** in this Promissory Note will not be included in determining the 10 year period mentioned above.
8. I have a right to prepay the whole loan or any portion of the loan at any time without penalty.
9. If I meet certain requirements, I have a right to defer payment on the loan as set forth under **DEFERMENT** in the Promissory Note. Also, I have a right to a six month post-deferment grace period after each period of authorized deferment.
10. The Alaska Student Loan Program normally will pay the interest that accrues on the loan both before the repayment period, during any authorized deferment period, and during the six month period following deferment. In that event, the lender may not collect or attempt to collect this interest from me. The interest on the loan may not exceed five percent (5%) per year.
11. My loan obligation will be cancelled if I become fifty percent (50%) or more permanently disabled or if I die.
12. If I am willing, but financially unable to make payments under my repayment schedule, I may request the lender to allow any of the following (forbearance or hardship status):
    A. A short period during which I make no payments;
    B. An extension of time for making payment; or
    C. The making of smaller payments than were scheduled originally.
    However, the lender is not required to approve my request.
13. If the lender sells the loan or otherwise transfers the right to receive payment, I must be sent a clear notification which spells out my obligations to the party to which my loan was sold.
14. Default occurs when I fail to make an installment payment when due, or to meet other terms of the Promissory Note under circumstances where the Alaska Student Loan Program finds it reasonable to conclude that I no longer intend to honor the obligation to repay, provided that my failure persists for (a) 120 days if I repay in monthly installments, or (b) 180 days if I repay in installments due less frequently than monthly. If I default, I will owe the entire balance of the loan plus accrued interest. If I am able, but unwilling to repay my loans, the Alaska Student Loan Program may institute legal action to force me to repay my loans. If I am named in such a legal action, I will forfeit all partial cancellation benefits for which I am otherwise eligible.
15. The lender must keep on file a copy of the State laws and regulations that govern the Alaska Student Loan Program. I have a right to examine these materials if I wish.
16. I should investigate the availability of other forms of financial aid with the school's financial aid administrator. It may be to my benefit to determine my eligibility for grant, work-study and other sources of assistance before applying for a student loan. I understand that receipt of an Alaska Student Loan may eliminate any awards that I may receive from other programs.
17. If I meet the eligibility requirements listed under **PARTIAL CANCELLATION** in the Promissory Note, I may be entitled to up to 50% partial cancellation of the principal which was actually advanced to me, plus accrued interest of this loan through the Alaska Student Loan Program, subject to the restriction noted in item 14 in this statement.

BORROWER'S RESPONSIBILITIES:

1. I must use care in choosing a school. Each school must provide a prospective student with information about the school and its programs. I will consider this information carefully before [redacted] I understand that the State Government does not vouch for the quality of a school or its programs.
2. I must repay the loan in accordance with the repayment schedule that the lender will give me.
3. I must notify the lender promptly, in writing, if any of the following events occur before the loan is repaid:
   A. My failure to enroll in school for the period for which the loan was intended.
   B. [redacted]
   C. My transfer from one school to another school.
   D. My graduation from school.
   E. A change in my name (e.g., maiden name to married name).
   F. A change in my address.
   G. A change in my Alaska residency status.
4. If I qualify for a deferment of repayment, I must (a) provide the lender with written evidence of my eligibility, and (b) notify the lender as soon as the condition for which the deferment was granted no longer exists.
5. I must use the proceeds that I receive from this loan for tuition, room and board, fees, books and supplies to attend the school named, for the period indicated on the loan application.
6. I must maintain my Alaska residency status in order to receive disbursements of my loan under the Alaska Student Loan Program.
7. I must maintain full-time student status in order to receive disbursements of my loan under the Alaska Student Loan Program.
8. I must maintain good standing, as defined for this program, in order to receive disbursements of my loan under the Alaska Student Loan Program. Good standing is defined as enrolling and completing at least a full-time student load while maintaining a grade-point-average of at least a "C" for an undergraduate or "B" for a graduate student.
9. I must request an application form from the Alaska Student Loan Program Office in each year which I wish to apply for a loan under the program.
10. I must submit my complete and correct Alaska Student Loan Program application form to the Alaska Student Loan Program office by May 15 in order to receive priority processing of my application.

Article 9. Scholarship Loans and Tuition Grants.

Section		Section	
751.	Loan and tuition funds created	771.	Enforceability of certain contracts with minors
753.	Financial aid committee	773.	Repealed
755.	Applications	776.	Tuition grants
757.	Administration of program	781.	Limitation on grants
759.	Undergraduate loans	786.	Conditions of grants
761.	Graduate loans	791.	Eligibility of students
763.	Conditions of loans	796.	Application and certification
765.	Eligibility of students	801.	Fiscal and business management practices
767.	Selection criteria	806.	Definitions
769.	Discrimination prohibited		

Sec. 14.40.751. Loan and tuition funds created. (a) There is created a scholarship revolving loan fund. The fund shall be used to make scholarship loans to students selected under Secs. 751—806 of this chapter. All repayments of principal and interest on scholarship loans shall be paid into the scholarship revolving loan fund and shall be used to make new scholarship loans. If estimated funds available from scholarship loan repayments are inadequate to fully fund estimated scholarship loans for any fiscal year, additional funding from the general fund may be requested and appropriated for that year.

(b) There is created a tuition grant fund as an account in the general fund. The funds shall be used to make tuition grants to students selected under Secs. 751—806 of this chapter.

(c) On March 1 of each fiscal year, if there is a balance of appropriated but unobligated funds in the tuition grant fund created under (b) of this section, that sum shall be automatically transferred to the scholarship revolving loan fund created under (a) of this section to make additional scholarship loans during that fiscal year.

(Sec. 1 ch 98 SLA 1971; am Sec. 1 ch 156 SLA 1972; am Secs. 1,2 ch 136 SLA 1974; am Sec. 1 ch 136 SLA 1975, retroactive to February 1, 1975)

Sec. 14.40.753. Financial aid committee. (a) The student financial aid committee is composed of the members of the Alaska Commission on Postsecondary Education. The commission may delegate its functions under Secs. 751—806 of this chapter to a committee of its members, with augmented membership as the commission considers appropriate. The executive officer of the commission is the executive secretary of the committee. The Alaska Commission on Postsecondary Education shall administer the program established by Secs. 751—806 of this chapter.

(b) Members of the committee serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions.

(c) The selection committee shall make an annual report reviewing the work of the committee to the governor, the legislature and the private colleges and universities where students receiving tuition grants are enrolled.

(d) The committee shall meet at least once a year. The meetings shall be held at the call of the chairman or upon petition by two members. (Sec. 1 ch 98 SLA 1971; am Sec. 2 ch 156 SLA 1972; am Sec. 5 ch 78 SLA 1974; am Sec. 3 ch 136 SLA 1974)

Sec. 14.40.755. Applications. (a) Applications shall be submitted to the executive secretary of the committee.

(b) A person whose loan or grant application is not recommended or presented to the committee by the executive secretary may appeal to the committee through the chairman of the committee and the committee shall consider the application. (Sec. 1 ch 98 SLA 1971; am Sec. 3 ch 156 SLA 1972; am Sec. 4 ch 136 SLA 1974)

Sec. 147.40.757. Administration of program. The executive secretary shall administer the programs subject to review by the committee and in accordance with the regulations prescribed by the committee. The promulgation of these regulations is subject to the Administrative Procedure Act (AS 44.62), and a summary of the regulations shall be distributed to each applicant. (Sec. 1 ch 98 SLA 1971; am Sec. 5 ch 136 SLA 1974)

Sec. 14.40.759. Undergraduate loans. The committee may make a loan, not to exceed $6,000 in any one school year, to an undergraduate student eligible under AS 14.40.765. (am Sec. 1 ch 89 SLA 1981)

Sec. 14.40.761. Graduate loans. The committee may make a loan, not to exceed $7,000 in any one school year, to a graduate student who is eligible under AS 14.40.765 and is pursuing an advanced degree. (am Sec. 2 ch 89 SLA 1981)

Sec. 14.40.763. Conditions of loans. (a) Proceeds from scholarship loans may only be used for books, tuition and required fees, and for room and board

(b) The loans may only be used to attend a career education program or a college or university approved by the commission, and, if the loans are federally insured, by the United States Commissioner of Education. (Sec. 1 ch 99 SLA 1977; am Sec. 3 ch 87 SLA 1979)

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing in a career education program, college or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection. (am Sec. 3 ch 89 SLA 1981)

(d) Scholarship loans may not be made to a student

(1) for more than five years of undergraduate study;

(2) for more than five years of graduate study;

(3) for more than a total of eight years of undergraduate and graduate study (am Sec. 4 ch 89 SLA 1981)

(e) Loans are interest bearing while a student is enrolled under (c) of this section or is receiving a deferment of payments under (k) of this section; however, a student shall be entitled to have a portion of the interest paid on his behalf and for his account in accordance with (l) of this section. (am Sec. 2 ch 99 SLA 1977; am Sec. 4 ch 87 SLA 1979)

(f) Interest on a loan given under sections 751—806 of this chapter is at the rate of five percent a year.

(g) Repayment of the principal and interest on the loan begins no later than one year after the borrower terminates his studies. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than required by this subsection. (repealed and reenacted Sec. 5 ch 89 SLA 1981)

(h) Security may not be required for the loans; however, provision shall be made for payment of attorney fees and costs of court if either or both are incurred in collection of the amount owed on the loan.

(i) If a loan is in default, the commission shall notify the borrower that repayment of the remaining balance is accelerated and due by sending the borrower a notice by registered or certified mail. (am Sec. 6 ch 89 SLA 1981)

(j) A portion of a loan shall be paid on behalf of the borrower by the state if, upon completion of the course of study for which the loan was granted, the borrower is a resident of the state for at least two years. The portion of the loan that shall be paid by the state is the following percentages of the total loan received plus interest up to a total of 50 percent of the total loan:

(1) two—three years residence in the state, 10 percent;

(2) three—four years residence in the state, an additional 10 percent;

(3) four—five years residence in the state, an additional 10 percent;

(4) five—six years residence in the state, an additional 10 percent;

(5) over six years residence in the state, an additional 10 percent.

(Sec. 1 ch 98 SLA 1971; am Sec. 4 ch 156 SLA 1972; am Sec. 6 ch 78 SLA 1974; am Sec. 8 ch 136 SLA 1974; am Sec. 6 ch 87 SLA 1979; repealed and reenacted Sec. 7 ch 89 SLA 1981)

The reenactment of AS 14.40.763(j) in section 7 of this Act applies to any student who has obtained a scholarship loan under AS 14.40.751—14.40.806 since July 1, 1971. (Sec. 12 ch 89 SLA 1981)

(k) Periodic installments of principal shall be deferred, but interest shall accrue and be paid unless the student is eligible for interest payment benefits under (l) of this section during any of the following:

(1) return to student status as provided in (c) of this section;

(2) serving on active duty as a member of the armed forces of the United States;

(3) serving, for up to three years, as a full-time volunteer under the Peace Corps Act;

(4) serving, for up to three years, as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

(5) for a one-time period up to 12 months in which the borrower is seeking and unable to find employment in the United States; or

(6) if the borrower becomes 50 percent or more disabled as certified by competent medical authority. (repealed and reenacted Sec. 7 ch 87 SLA 1979)

(l) The state will pay the interest on that portion of a loan that is not federally insured during

(1) the period before the beginning of the repayment period of the loan; and

(2) deferments under (k) of this section.

(m) In case of hardship, the committee may extend repayment of a loan for an additional period of up to five years in increments no longer than 12 months each. (am Sec. 8 ch 89 SLA 1981)

(n) repealed. (Sec. 11 ch 89 SLA 1981)

(o) The provisions of (j) of this section do not apply to a loan to a borrower named in a complaint as a defendant in an action by the state or by the commission to secure payment of the unpaid balance of a loan made under AS 14.40.759 or 14.40.761. (am Sec 9 ch 89 SLA 1981)

(p) For purposes of this section, a person qualifies as a resident if the person is physically present in the state with the intent to remain permanently in the state or, if not physically present in the state, the person intends to return to the state and is absent due to military service. (am Sec. 9 ch 89 SLA 1981)

Sec. 14.40.765. Eligibility of students. (a) A person may apply for and obtain a scholarship loan if the person

(1) is a resident of the state at the time he applies for a scholarship loan;

(2) meets the requirements of (b) of this section; and

(3) is

(A) enrolled as a full-time student in a career education or associate or baccalaureate or graduate degree program; or

(B) a graduate of a high school, or scheduled for graduation from a high school within six months, with sufficient credits to be admitted to a career education program or to an accredited college or university.

(b) In addition to the requirements of (a) of this section, to obtain a scholarship loan a person must have been a resident of the state for at least two years at the time he applies for the loan. For purposes of this subsection, a person qualifies as a resident of the state if at the time he applies for the loan the person

(1) has been present in the state for at least two years unless his absence from the state during any part of the two years was due to military service; or

(2) is a person who is dependent on a parent or guardian for his care, and the parent or guardian has been present in the state for at least two years. (repealed reenacted Sec. 10 ch 89 SLA 1981)

Sec. 14.40.767. Selection criteria. (a) The selection committee shall grant loans based on total point accumulations under this subsection with priority going to those applicants with the highest point accumulations, except as provided in (b) of this section for loan applications completed before May 15 of each year. Points shall be awarded to applicants based upon student status and continuous Alaskan residency, according to the following schedule:

(1) student status:

(A) continuing undergraduate and graduate students with existing Alaska scholarship loans ..... 4 points

(B) continuing undergraduate and graduate students without existing Alaska scholarship loans ..... 3 points

(C) freshmen ..... 2 points

(D) new graduate students without existing Alaska scholarship loans ..... 1 point

(2) continuous Alaskan residency:

(A) students with continuous Alaskan residency of 10 years or more ..... 3 points

(B) students with continuous Alaskan residency of at least 5 years and less than 10 years ..... 2 points

(C) students with continuous Alaskan residency of more than 2 years and less than 5 years ..... 1 point

(3) students attending Alaska colleges or universities ..... 1 point.

(b) In awarding loans the selection committee shall award loans to applicants based upon the earliest date of completed applications if

(1) the applicant has accumulated at least 5 points under (a) of this section; and

(2) the applicant has filed a completed application not later than May 15 of the year for which the loan is requested. (repealed and reenacted Sec. 2 ch 87 SLA 1979)

Sec. 14.40.769. Discrimination prohibited. The student loan program shall be carried out without regard to the race, creed, sex, color, ancestry, national origin, or membership in fraternal or political organizations of the student applying for the loan. (Sec. 1 ch 98 SLA 1971)

Sec. 14.40.771. Enforceability of certain contracts with minors. A written obligation entered into by a minor at least 16 years of age, evidencing a loan or other assistance received by him from any person for the purpose of furthering his education in a career education program or an institution of higher learning, is enforceable against the minor with the same effect as if he were, at the time of its execution, 19 years of age, if the person making the loan has in his records before making the loan a certification from the institution that the minor is enrolled in the institution or has been accepted for enrollment. (Sec. 1 ch 98 SLA 1971)

Sec. 14.40.773. Repealed. (Sec. 6 ch 156 SLA 1972)

Sec. 14.40.776. Tuition grants. (a) The executive secretary of the committee shall award a tuition grant to a student in an amount up to the difference between (1) the cost, in a city where there is both a four-year state university and a four-year private university or in a city where there is both a two-year state community college and a two-year private college, for the operation of the state institution on a full-time student per academic year basis, and (2) the tuition or fees paid by the student at the state institution in those locations, but in no case may the amount exceed $2,500 plus a cost-of-living adjustment. Subject to the approval of the committee and to the availability of appropriated funds, the executive secretary may adjust the maximum grant based on a cost-of-living factor comparable to that employed in making adjustments to the state employee pay plan under AS 39.27.015. The tuition grant paid to a student may not be in an amount that would result in a student paying less in tuition or fees at a private college or university than would be required for a similar enrollment at the state institution in the same city. The grant shall be applied by the student toward his tuition at the private university or college in which he enrolls. (am Sec. 1 ch 246 SLA 1976)

(b) The computation of the cost for the operation of the state institution on a full-time student per academic year basis under (a) of this section may not include construction or capital improvement costs, debt service and expenditures for research and public service functions.

(c) The computation under (a) of this section shall be made by the executive secretary. He shall publish the accounting procedures employed in making the computation, including, but not limited to, the time period on which the computation is based and the cost figures used. This cost data shall be made available for information purposes to the officers or administrators of the state institution whose cost of operations is the basis for the computation and to the officers or administrators of the private colleges and universities in which students receiving tuition grants are enrolled. A committee consisting of a qualified member of the staff of the division of budget and management of the Department of Administration designated by the commissioner, a qualified member of the staff of the Legislative Budget and Audit Committee designated by the chairman of the committee, and one other specially qualified person in the field of accounting, business management or institutional finance appointed by the governor, shall review, and may hear an appeal from, the determination of the computation by the executive secretary. No officer, administrator or other member of the staff of a state institution whose cost of operations is under review or an officer, administrator, or other member of the staff of the private college or universities in which students receiving tuition grants are enrolled may be a member of that committee.

(Sec. 5 ch 156 SLA 1972; am Secs. 9, 10 ch 136 SLA 1974; am Sec. 2 ch 136 SLA 1975)

Sec. 14.40.781. Limitation on grants. (a) No grants may be made under sec. 776 of this chapter for any portion of tuition which would otherwise be paid under the terms of a federal grant program.

(b) The amount of the tuition grant under sec. 776 of this chapter that may be awarded to a student who is also the recipient of a federal grant for tuition is computed according to the formula G equals P minus S minus F, in which

(1) G = the grant awarded;

(2) P = the tuition and fees charged by the private college or university in which the student is enrolled;

February 17, 1983

Representative Mike Davis
P.O. Box 81435
College, Alaska 99708

Dear Mike:

In regards to HB 174, Tanana Valley Community College supports the bill relative to students who "in total" are enrolled in 12 credits or more which makes them a full-time student within the system.

Sincerely,

Rod

Dear Representative Davis:

Thanks for sending me a copy of House Bill No. 174 (An Act relating to student loan eligibility). I feel that this is a constructive amendment which will allow greater flexibility for students in designating programs that will meet their educational goals.

Sincerely,

Richard S. Lee, Dean
Juneau Douglas Community College

RE: LEGISLATION REGARDING THE ALASKA STUDENT LOAN PROGRAM

Senate Bill # 118 reduces the time a student must be in the state before applying for a loan, but also limits loans to students who apply before graduation from high school. The one year residency requirement (reduced from two years) will put a stop to litigation in that area. However, the requirement for all loan applicants to apply while still in high school will be a detriment to the spirit of the loan program and establish a new justification for litigation.

As the UAJ Financial Aid Officer, I must oppose this bill for several reasons. 1) It is sometimes difficult for high school students to decide if they want to go to college. I know there will be many young people who will neglect to fill out the application before high school graduation and later decide to go to college. This bill is asking all seventeen year old students in Alaska to decide their life goal without experiencing life beyond the academic setting. 2) Many students do not consciously choose a career path until several years after high school and after many life experiences. This bill would not afford this type of student the same opportunity as that provided for students who begin college shortly after high school. 3) Many students wait several years after graduation from a baccalaureate program before persuing graduate study. This bill does not mention graduate study; therefore, I am assuming that it could also be interpreted to eliminate loans for post-baccalaureate students.

House Bill # 56 asks for the loan interest rate to be raised to 7% and for the loan to be limited to the cost of tuition, room and board. This bill is acceptable.

House Bill # 174 says that a student may attend classes at two institutions to accumulate the 12 credits required for the loan program. This bill is acceptable and also beneficial to many of the students in Southeast Alaska.

Alaska Statewide Student Association
P.O. BOX 548
DOUGLAS, ALASKA 99824
REPRESENTING STUDENTS OF THE UNIVERSITY OF ALASKA STATEWIDE SYSTEM

ASSA requests that the following section be added to SPONSOR SUBSTITUTE FOR HOUSE BILL 56:

AS 14.43.120(c) is amended to read:

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing or as a part-time student in good standing in more than one institution for a total number of credits equivalent to a full-time student in a career education program, college, or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection.

At present, students enrolled at both UAF and TVCC, UAA and ACC, or Sitka CC and Sheldon Jackson may not receive scholarship loans unless they have a total of twelve credit hours at one or the other institution. This amendment would allow these perfectly legitimate, full-time students to be eligible for the loans.

Thank you.

1982-83 ALASKA STUDENT LOAN INFORMATION

As a result of recent action by the Alaska Commission on Postsecondary Education, schools are no longer required to complete Part B of the Alaska Student Loan Application.

You may submit your application (two white copies) directly to the State Loan Office, retaining the yellow student copy, the cover sheets and this letter.

BE SURE THAT YOUR APPLICATION IS COMPLETELY FILLED OUT -- over 50% of the Alaska Student Loan applications are returned to the student because of omissions. When your application is received in Juneau, you will receive a blue post card with the date received indicated. This does not mean your application is complete; only that it has been received. You will next receive a promissory note in triplicate. Sign and date the note, list the dates of disbursement (8-20-82 for Fall 1982 semester and 1-1-83 for Spring 1983 semester), keep the marigold copy, and return the white and pink copies to Juneau.

Normally, the Financial Aid Office receives Alaska Student Loan checks in time to release funds at Registration. Before releasing checks, we must determine academic eligibility for each recipient. If you are currently enrolled at the University of Alaska-Fairbanks, you must be in good standing (2.0 semester and cumulative grade point average for undergraduates and 3.0 semester and cumulative grade point average for graduate students) to be eligible for your Fall 1982 check. Entering and transfer students must be admitted IN GOOD STANDING to a program leading toward a degree or certificate. Recipients must be full-time (12 credits for undergraduate, 9 credits for graduate students) and must complete 12 and 9 respectively each semester they receive a loan to be eligible for the following term.

Courses in the following areas cannot be counted toward the full-time financial aid requirement: Tanana Valley Community College, correspondence, extension, or television.

The eligibility requirements listed above reflect current Alaska State laws and regulations. NO EXCEPTIONS CAN BE MADE BY THE UNIVERSITY OF ALASKA-FAIRBANKS FINANCIAL AID OFFICE.

Any questions regarding the status of your application should be directed to the Alaska Student Loan Office in Juneau, since the Financial Aid Office acts only as a disbursing and certifying agency.

Anchorage Community College A Unit of the University of Alaska System

April 13, 1983

Representative Mike Davis
Pouch V
Juneau, Alaska 99811

Dear Representative Davis:

I am writing at the request of Kerry Howard to indicate my support of HB174 in concept. I believe that students should be allowed to count credits from more than one institution toward fulfilling the requirement for eligibility for the state student loan program.

However, I believe that there should be in place a consortium agreement between the two institutions as is now in existence between ACC/UAA. This agreement should require that 75 percent of the credits required for qualification should be taken at the parent institution. The parent institution is the institution which is disbursing the aid.

In the past, we have had problems in federal programs with students receiving aid from more than one institution. This is not the problem with the state loan, as there is only one check in this case. However, there is a lot of paperwork and staff time required in handling the state loan program. If a student were required to take 75 percent or nine credits from the parent institution, there would be an inherent commitment on the part of that student to attend that particular institution.

Another reason for this requirement is the necessity to certify academic eligibility between semesters. If a student is taking credits from more than one institution, a parent institution is required to obtain grade reports from all other institutions prior to certifying eligibility. This is simpler if consortium agreements are in effect. The time between semesters is short and the grade reporting process is lengthy. Reciprocal agreements between institutions for the release of grades is a complicated process covered by the privacy acts.

In summary, consortium agreements between cooperating institutions, with a parent institution requirement of 75 percent of the credits required for eligibility, would be a good addition to your bill in my view. Another desired addition would be for the parent institution to receive some support costs for facilitating the state loan program. Federal aid programs provide a percentage of dollars distributed to be used to administer their funds. The Alaska State Loan Program requires a lot of work on the part of our staff, but no funds are appropriated for this purpose. Our success in acquiring additional staff

2533 Providence Avenue • Anchorage, Alaska 99508-4670 • Telephone 907/263-1200

through the University budget process has not been good. A five or ten percent overhead distribution to institutions handling a large volume of state loan checks would certainly be beneficial.

Sincerely,

Roger L. Worsley, Dean
Educational Services

263-1200

March 9, 1983

Representative Mike Davis
Alaska State Office Building
Pouch V
Juneau, AK 99811

Dear Representative Davis:

This letter is in response to your request that I provide information regarding any administrative problems that colleges and universities might encounter should House Bill 174 be enacted.

As you probably know, the loan regulations already permit schools to combine credits provided a consortium or formal transfer agreement exists between the schools involved. This permits schools to voluntarily combine credits for loan recipients. However, it is my impression that HB 174 would require that schools accept concurrent enrollment from other schools in addition to their own for the purposes of establishing academic eligibility for the Alaska Student Loan.

Our primary concern at UAF is that the collection of the information needed to certify good academic standing and satisfactory progress would be so cumbersome and time consuming that our students would experience a considerable delay in actually receiving their state loan checks. I am attaching a sample copy of the "Record of Disbursement and Receipt" form which accompanies each state loan check and which the school's Financial Aid Officer must sign before disbursing the check to the student. Please note that the school must certify that the student is/was enrolled in a degree or diploma or certificate program as a full time student and is maintaining satisfactory progress as determined by school policy. HB 174 would put schools in the position of making this certification only after a lengthy and cumbersome administrative process of 1.) collecting certification of enrollment and fee statements from each school the student is attending, 2.) collecting official transcripts at the end of each term from each school the student is attending, 3.) official evaluation of transfer credits at the end of each term by the home institution's registrar, and 4.) a combining of credits earned together with a revision of the semester and cumulative g.p.a. Even large schools with sophisticated computer capability would have to do most of this work by hand and on a student by student basis. We expect that the enactment of this bill would cause a delay in delivering ASL checks to all students of at least three to four weeks after registration. In addition, all of the certification activity would take place at the time of registration when we are most heavily involved with getting students registered for classes and assisting students with various financial aid problems.

I would also like to mention that under HB 174, our students would not be limited to a TVCC/UAF dual enrollment. We would also be required to include UA correspondence work and any other accredited school's correspondence study. There is even the possibility that an out-of-state school would offer a special extension course in Fairbanks. Chapman College did just that a few years ago when it offered MBA coursework in the Fairbanks area.

A student attending school out of state in a large metropolitan area could easily enroll in a three credit course at each of four schools. It would be very time consuming to combine those credits at one school if all of the schools had a different starting and ending date. There is also the very real possibility that there could be a combination of quarter and semester credits to evaluate. There are some schools outside that have discussed the possibility of withdrawing themselves from eligibility for the Alaska Student Loan because the regulations are so different then accepted financial aid standards for the aid their school offers. I believe there is a real risk that other schools may simply choose to not accept another state's imposition of academic regulation on their institution and opt out of participation in the Alaska Student Loan program. It is extremely difficult to serve student's needs in a timely manner when faced with a variety of conflicting financial aid standards.

Finally, I would like to confirm that UAF Financial Aid applicants for the current academic year were advised well ahead of time that they would be required to carry a minimum of 12 UAF credits per semester (undergraduates) in order to be eligible for the loan at this school. We accomplished this by publishing news releases in the student newspaper, and by attaching an instruction sheet to each Alaska Student Loan application form that was given out from this office. Because ASL regulations require a minimum of 12 credits to maintain eligibility, we suggest to students that they carry those 12 credits with UAF, then take any desired coursework from other schools in addition to that minimum course load. This gives them the flexibility of exploring other schools and subjects while maintaining their eligibility for the loan at UAF.

I hope this information is useful to you. Please call us if you have further questions. Our office phone number is 474-7256. We appreciate this opportunity to express our views and we look forward to working with you.

Sincerely,

Carol M. Thomson
Financial Aid Advisor

STATE OF ALASKA
ALASKA COMMISSION ON POSTSECONDARY EDUCATION
ALASKA STUDENT LOAN PROGRAM

EXAMPLE

RECORD OF DISBURSEMENT AND RECEIPT

LOAN RECORD TO DATE FOR 83 LOAN YEAR

FOR STUDENT [redacted] [redacted] SSN [redacted]

WARRANT NO. 145525 WARRANT DATE 02/09/83

DATE MAILED 02/14/83

SCHOOL ADDRESS

WARRANT AMOUNT:	$2,000.00
AMOUNT APPROVED:	$2,000.00
PRIOR PAYMENTS:	$0.00
TOTAL DISBURSED:	$2,000.00

UNIVERSITY OF ALASKA-FAIR
FAIRBANKS AK 99701

THIS WARRANT IS FOR FULL-TIME ATTENDANCE FOR SPRING SEMESTER TERM ONLY. IF YOU CANNOT CERTIFY THAT THIS STUDENT IS/WAS ENROLLED DURING THE TERM INDICATED, THIS WARRANT MUST BE RETURNED IMMEDIATELY.

THIS WARRANT SHOULD NOT BE RELEASED TO THE ABOVE NAMED STUDENT UNTIL THE SIGNATURE OF A SCHOOL OFFICIAL APPEARS BELOW AND SHOULD BE SIGNED BY THE ABOVE NAMED STUDENT WHEN DISBURSED ALSO. FAILURE TO SIGN AND RETURN THIS FORM WITHIN THIRTY (30) DAYS OF RECEIPT OF THIS WARRANT WILL RESULT IN NO FURTHER WARRANTS BEING ISSUED AND NO FURTHER LOANS BEING AUTHORIZED.

SCHOOL OFFICIAL'S CERTIFICATION

As the authorized school official, I certify that the above named student is/was enrolled in a degree or diploma or certificate program during the term indicated. I further certify that the student is/was enrolled in good standing as a full-time student for this period and is maintaining satisfactory progress as determined by school policy

DURING THIS SCHOOL TERM THIS STUDENT IS PAYING (PLEASE CHECK ONE):

_____ Resident tuition at this school

_____ Non-resident tuition at this school

_____ No differential in tuition at this school

DURING THIS SCHOOL TERM THIS STUDENT IS (PLEASE CHECK ONE):

_____ Undergraduate _____ Graduate

DATE TITLE SIGNATURE

STUDENT'S CERTIFICATION

I have this date received the above listed State of Alaska warrant and certify that it will be spent only for the legal items listed on the Promissory Note which I signed regarding this loan. I further certify that any change in my residency status, address, name, full-time student status, or finances has been reported to the Alaska Student Loan Office. I understand that if I do not maintain satisfactory academic progress as determined by the school I am attending, I will not be eligible for future loan disbursments.

DATE STUDENT'S SIGNATURE

RETURN SIGNED ORIGINAL TO:

ALASKA STUDENT LOAN OFFICE
POUCH F, STATE OFFICE BUILDING
JUNEAU, ALASKA 99811

THE STUDENT IS RESPONSIBLE FOR RETURNING THE ORIGINAL COPY OF THIS COMPLETED FORM TO THE ALASKA STUDENT LOAN OFFICE. FAILURE TO RETURN THE FORM WILL RESULT IN NO FURTHER WARRANTS BEING ISSUED.

ORIGINAL—RETURN TO ALASKA STUDENT LOAN OFFICE

05-005-80SL (Rev. 3/81)

Revisor's notes. — AS 14.43.125 was substituted for AS 14.40.765 to conform to the renumbering of that section by the revisor of statutes under AS 01.05.031.

Effect of amendments. — The 1981 amendment substituted "$7,000" for "$5,000" following "not to exceed."

Sec. 14.43.120. Conditions of loans. (a) Proceeds from scholarship loans may only be used for books, tuition and required fees, and for room and board.

(b) The loans may only be used to attend a career education program or a college or university approved by the commission, and, if the loans are federally insured, by the United States Commissioner of Education.

(c) To maintain a loan the student must continue to be enrolled as a full-time student in good standing in a career education program, college or university designated under (b) of this section. The commission shall adopt regulations defining "good standing" for purposes of this subsection.

(d) Scholarship loans may not be made to a student

(1) for more than five years of undergraduate study;

(2) for more than five years of graduate study;

(3) for more than a total of eight years of undergraduate and graduate study.

(e) Loans are interest bearing while a student is enrolled under (c) of this section or is receiving a deferment of payments under (k) of this section; however, a student is entitled to have a portion of the interest paid in accordance with (1) of this section.

(f) Interest on a loan given under AS 14.43.090 — 14.43.160 is at the rate of five per cent a year.

(g) Repayment of the principal and interest on the loan begins no later than one year after the borrower's studies are terminated. The loan shall provide for repayment of the total amount owed in periodic installments in not more than 10 years from the commencement of repayment, except as provided in (k) and (m) of this section. If the commission and the borrower agree to a different repayment schedule, the borrower shall repay the loan in accordance with the agreement. A borrower may make payments earlier than required by this subsection.

(h) Security may not be required for the loans; however, provision shall be made for payment of attorney fees and costs of court if either or both are incurred in collection of the amount owed on the loan.

(i) If a loan is in default, the commission shall notify the borrower that repayment of the remaining balance is accelerated and due by sending the borrower a notice by registered or certified mail.

(j) A portion of a loan shall be paid on behalf of the borrower by the state if, upon completion of the course of study for which the loan was granted, the borrower is a resident of the state for at least two years. The portion of the loan that shall be paid by the state is the following percentages of the total loan received plus interest up to a total of 50 percent of the total loan:

(1) two — three years residence in the state, 10 percent;

(2) three — four years residence in the state, an additional 10 percent;

(3) four — five years residence in the state, an additional 10 percent;

(4) five — six years residence in the state, an additional 10 percent;

(5) over six years residence in the state, an additional 10 percent.

(k) Periodic installments of principal shall be deferred, but interest shall accrue and be paid unless the student is eligible for interest payment benefits under (l) of this section during any of the following:

(1) return to student status as provided in (c) of this section;

(2) serving on active duty as a member of the armed forces of the United States;

(3) serving, for up to three years, as a full-time volunteer under the Peace Corps Act;

(4) serving, for up to three years, as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

(5) for a one-time period up to 12 months in which the borrower is seeking and unable to find employment in the United States; or

(6) if the borrower becomes 50 percent or more disabled as certified by competent medical authority.

(*l*) The state will pay the interest on that portion of a loan that is not federally insured during

(1) the period before the beginning of the repayment period of the loan; and

(2) deferments under (k) of this section.

(m) In case of hardship, the committee may extend repayment of a loan for an additional period of up to five years in increments no longer than 12 months each.

(n) Repealed by § 11 ch 89 SLA 1981.

(o) The provisions of (j) of this section do not apply to a loan to a borrower named in a complaint as a defendant in an action by the state or by the commission to secure payment of the unpaid balance of a loan made under AS 14.43.110 or 14.43.115.

(p) For purposes of this section, a person qualifies as a resident if the person is physically present in the state with the intent to remain permanently in the state or, if not physically present in the state, the person intends to return to the state and is absent due to military service. (§ 1 ch 98 SLA 1971; am § 4 ch 156 SLA 1972; am § 6 ch 78 SLA 1974; am § 8 ch 136 SLA 1974; am §§ 1—4 ch 99 SLA 1977; am §§ 3 — 8 ch 87 SLA 1979; am §§ 3 — 9, 11 ch 89 SLA 1981; AS 14.40.763)

Revisor's notes. — In ch. 98, SLA 1971, AS 14.43.120(j)(2) read "four — five years . . ." This was a typographical error occurring for the first time in the enrolled version of the bill (CSHB 415 [Finance am S] and has been corrected here.

Effect of amendments. — The 1979 amendment deleted "approved by the commission" following "career education program" and substituted the language

beginning "approved by the commission" for "accredited by the accreditation association for the region in which the college or university is located" in subsection (b), substituted "interest" for "non-interest" in subsection (e), added the language beginning "however, a student shall be entitled" to the end of subsection (e), rewrote subsection (g), and in subsection (j), substituted "paid on behalf of the borrower by the state" for "considered a grant," "borrower" for "grantee," and "three years" for "two years" in the first sentence, substituted "paid by the state" for "regarded as a grant" and "interest for up to a total of 40 percent" for "accrued interest" in the introductory language of the second sentence, and substituted "an additional 10 percent" for "20 percent" in paragraph (2), for "30 percent" in paragraph (3), and for "40 percent" in paragraph (4). The amendment also rewrote subsection (k) and added subsections (*l*), (m), and (n).

The 1981 amendment, added the second sentence of subsection (c). In subsection (d), the amendment added paragraphs (1) and (2) and in paragraph (3), substituted "a total of eight" for "six" preceding "years" and added "of undergraduate and graduate study" following "years." In subsection (i), the amendment substituted "shall" for "may" and "borrower" for "student." In subsection (m), the amendment substituted "12" for "six" preceding "months" and deleted "within the 15-year requirement of (g) of this section" following "months each." The amendment also rewrote subsections (g) and (j), added subsections (o) and (p) and repealed subsection (n) which read "Each year spent attending a college or university in Alaska qualifies as a year of employment and residency under (j) of this section, if the borrower resides no less than three years in Alaska after completion of the course for which the loan was granted, and has a total Alaskan residency of ten years time."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.-5.031(c) and § 4, Chapter 58 SLA 1982.

Section 8, ch. 99, SLA 1977 provides: "The change in the repayment period of student loans set out in AS 14.40.763(g) [now 14.43.120(g)] as amended by sec. 3 of this Act and the additional basis for granting a deferment of repayment of a student loan set out in AS 14.40.783(k) [now 14.43.120(k)] as enacted by sec. 4 of this Act shall, upon request of the loan recipient, be applied retroactively to the outstanding balance of principal of and accrued interest on loans made under AS 14.40.751 — 14.40.806 [now 14.43.090 — 14.43.160] as they read before the effective date of this Act."

Section 12 of ch. 89, SLA 1981, provides: "The reenactment of AS 14.40.763(j) [now 14.43.120(j)] in sec. 7 of this Act applies to any student who has obtained a scholarship loan under AS 14.40.751 — 14.40.806 [now 14.43.090 — 14.43.160] since July 1, 1971."

Legislative history reports. — For a report of legislative intent concerning the loan forgiveness provisions of ch. 89, SLA 1981 (FCCSSB 120), see 1981 Senate Journal p. 1560, 1580; 1981 House Journal p. 2289.

Sec. 14.43.125. Eligibility of students. (a) A person may apply for and obtain a scholarship loan if the person

(1) is a resident of the state at the time of application for a scholarship loan;

(2) meets the requirements of (b) of this section; and

(3) is

(A) enrolled as a full-time student in a career education or associate or baccalaureate or graduate degree program; or

(B) a graduate of a high school, or scheduled for graduation from a high school within six months, with sufficient credits to be admitted to a career education program or to an accredited college or university.

(b) In addition to the requirements of (a) of this section, to obtain a scholarship loan a person must have been a resident of the state for at least two years at the time of application for the loan. For purposes of

May 5, 1983

Analysis (HB174):

Allowing multiple enrollments should enable additional people to apply, but we have no way of determining what that number would be. We also have indication that some schools will require such cross-documentation that those students will face weeks and months of delays in receiving funds. Therefore, we have left the fiscal impact at zero.

University of Alaska, Juneau
11120 Glacier Highway
Juneau, Alaska 99801 (907) 789-2101

To: Chancellor Paradise

From: Dianne Schmitt, Financial Aid Officer

Date: February 15, 1983

RE: LEGISLATION REGARDING THE ALASKA STUDENT LOAN PROGRAM

Senate Bill # 118 reduces the time a student must be in the state before applying for a loan, but also limits loans to students who apply before graduation from high school. The one year residency requirement (reduced from two years) will put a stop to litigation in that area. However, the requirement for all loan applicants to apply while still in high school will be a detriment to the spirit of the loan program and establish a new justification for litigation.

As the UAJ Financial Aid Officer, I must oppose this bill for several reasons. 1) It is sometimes difficult for high school students to decide if they want to go to college. I know there will be many young people who will neglect to fill out the application before high school graduation and later decide to go to college. This bill is asking all seventeen year old students in Alaska to decide their life goal without experiencing life beyond the academic setting. 2) Many students do not consciously choose a career path until several years after high school and after many life experiences. This bill would not afford this type of student the same opportunity as that provided for students who begin college shortly after high school. 3) Many students wait several years after graduation from a baccalaureate program before persuing graduate study. This bill does not mention graduate study; therefore, I am assuming that it could also be interpreted to eliminate loans for post-baccalaureate students.

House Bill # 56 asks for the loan interest rate to be raised to 7% and for the loan to be limited to the cost of tuition, room and board. This bill is acceptable.

House Bill # 174 says that a student may attend classes at two institutions to accumulate the 12 credits required for the loan program. This bill is acceptable and also beneficial to many of the students in Southeast Alaska.

An Act Relating to The Board of Psychologist and Psychological Associate Examiners

by the Senate HESS Committee

Sec. 08.86.070 is repealed and reenacted to read:

Duties of the Board. (a) The Board shall

(1) establish examination requirements for eligible applicants for licensure to practice psychology;

(2) examine, or cause to be examined, eligible applicants for licensure or registratic

(3) approve the issuance of licenses to qualified applicants;

(4) establish standards for the practice of Psychology by regulation;

(5) conduct disciplinary proceedings in accordance with AS 08.86.010 - 08.86.230;

(6) adopt regulations requiring proof of continued competency before a license is renewed;

(7) prepare and submit an annual report to the department containing information concerning board activities, the number of examinations held, the number of applicants for examination, the number of persons who pass and the number who fail each examination, financial data, including receipts and expenditures, and other information the department may require;

(8) as requested by the department, monitor the standards and availability of psychological services provided in the state and report its findings to the department;

(9) collect, or cause to be collected, data concerning the practice of psychology by Psychologists and Psychological Associates in the state and submit the data to the department for maintenance;

(10) establish, by regulation, educational and training requirements for Psychological Associates licensed under As 08.86.010 - 08.86.230;

(11) the board may adopt regulations or do any act necessary to carry out its duties under AS 08.86.010 - 08.86.230

Sec 08.86.150 (1) is amended to read:

he holds a doctoral degree with primary emphasis on psychology from an accredited school <u>with an approved program</u>;

Sec 08.86.180 (a) Delete:

"Psychotherapy", "Psychotherapeutic", "Psychotherapist"

Sec 08.86.180 (b) (3) Delete:

"Psychotherapist"

Continue the existence of the Board for four years.

Board of Psychologist&
Psycholigical Assiciate Examiners
Goals & Objectives

Objectives:

It is the board's purpose to ensure that quality plychological care is available to the public and to upgrade the standards of mental health care available in the state.

Goals:

1) Develop CE requirements for relicensure to become effective in the next renewal period. (1981, June 30)

2) Implement Psychological Associate Regulations to facilitate entry of qualified Master's level psychologists into the professional field.

3) Further refine the state portion of the exam with future goal to develop work sample type examination.

4) Continuous refining of the examination procedure & materials.

5) Increase the availability of Psycholotical services to the public by supporting legislation to include such services under 2nd party reimbursement by Medicaid & Medicare.

6) Act to increase public awareness of Board activities via news letters or newspaper articals, also to educate the public of the purpose & and function of of the Board & of the types of services available in the practice of psychology in Alaska.

7) Clarify the Board's role in developing our Agressive Investigative Policy.

8) The Board would like to meet four times per year. Once in Juneau, twice in Anchorage, and once in Fairbanks, as well as offer two examinations. The Board would also like for one person to attend the National meetings.

FY '80 Performance Report

Board of Psychologist & Psychological Associate Examiners

This report is submitted to the Department of Commerce and Economic Development, Division of Occupational Licensing, in an attempt to assist them in evaluating the activities of the board.

1. OVERVIEW

A great deal of the board's effort during FY '80 was directed toward the matter of the Sunset legislation which had placed continuation of the board in question.

Two board members travelled to Juneau twice to testify before legislative hearings and met with legislators and the Health Coalition representative. Large amounts of support in both time and dollars were contributed to this effort by both the American Psychological Association and the Alaska Psychological Association. Members of the ALPA as well as members of the Alaska Community Mental Health Directors organization met in support of board continuation and provided contact and testimony to legislators. The State and national support of the Health Coalition representative provided an important means of educating board members and professionals within the State on the necessity of their involvement in the legislative process. This was also a crucial link in providing legislators with knowledge regarding the issues involved in the delivery of high quality psychological services to the public.

A large number of the board's legislative objectives were achieved through passage of SB 583 which substantially revised and expanded the Psychology Practice Act. Passage of SB 583 was a major accomplishment in that it clarified many issues and questions arising from the original legislation governing the board and the Psychological profession in the State.

At each meeting of the board, a division investigator presented any complaints which might come under the purview of the board. Progress has been achieved in increased participation of the board in investigative matters.

Mr. Jim Parsons attended the American Association of State Psychology Boards (AASPB) national meeting in August and served as a liaison between the national organization and the State board.

understanding the practice of psychology in its various facets and has been unable to provide adequate assistance in some areas. The board received an unfavorable review by the auditors, and was discredited by the legislature. The board has had confrontations with the Department of Law, the Ombudsmans Office, and several applicants. Through it all the board has taken some positive steps to correct the problems without compromising their standards and the best interests of the public.

It should be recognized that the professional practice of psychology is still developing at the national level. Without the historical background other professions are priviledged to have, it can be expected that certain problems will arise in the process. The board is doing its best with the resource at hand.

II. BOARD ACTIVITIES

The board held a total of three meetings in FY 1979. One, September 11-12, 1978 in Anchorage, another October 20, 1978, also in Anchorage, and the third March 30, 1979 in Juneau. The board had scheduled a fourth meeting, but due to budgetary constraints, it was rescheduled for July 5-6, 1979, in FY 80. The board also held one conference call meeting April 19, 1979.

In addition to these meetings, several members were able to participate in other meetings at the State and National Level. Pam Baglien, Ph.D., and Robert Bowers met twice with the Governor's Advisory Council on Mental Health. Jim Parsons and Dorothy Whitmore, Ed.D. reported on the boards activities to the Alaska Psychological Association. Finally, Mr. Parsons attended the annual American Association of State Psychology Boards in September, 1978.

III. EXAMINATIONS

The board administered two examinations during the period, one October 20, 1978 and the other April 20, 1979. There were four candidates for the October exam. All passed and were subsequently licensed.

There were 10 candidates for the April Examination. The exam consists of a National Multiple choice part and an essay part. One must pass both parts to be licensed. Of the 10 candidates seven passed the national exam. Of those seven, four passed the essay exam and were licensed. Two of the three who failed the National exam passed the essay portion; three who passed the National Portion failed the essay portion. Only one person failed both the essay and the National portion. A person must retake only those portions of the exam they did not pass.

FY 79 Performance Report

Board of Psychologist & Psychological Associate Examiners

This report is submitted to the Department of Commerce and Economic Development, Division of Occupational Licensing in an attempt to assist them in evaluating the activities of the Board.

I. OVERVIEW

In an overview, the boards primary objective for this past year was to develop and implement equitable regulations to carry out the provisions of the Alaska Statutes governing the practice of psychology. The board's failure to do this at an earlier date had led to conflicting policy and charges of arbitrary and capricious judgement on the part of the board. The board accomplished this for psychologist when their regulations became effective December 24, 1978. Regulations for Psychological Associates were brought up in the spring and should be ready for public hearing in the fall.

A secondary objective of the board has been to develop a more comprehensive State essay examination for licensure purposes. Alaska Statutes do not permit oral exams or interviews in the course of evaluating applicants, making it necessary for such an exam. The board opted to use the exam administered by the Florida Board for its Spring exam. The exam is comprehensive in nature with an established record and set answer key. The board did have difficulties with grading, however, taking over four months to grade and report scores to candidates.

A final concern during this year has been that of Sunset Legislation. Dan Allen of the Division of Legislative Audit was present to discuss with the board the nature of Sunset at its September 11 and 12, meeting. The board did not seriously consider the implications until its March 30, 1979 meeting. Several members had been present to testify before the House Commerce Committee via teleconference in February but the session was cancelled and never rescheduled. The board has taken several steps to remedy the problems noted in the audit report, and has defined some goals and objectives for the coming year. The board is working on Psychological Associate Regulations, has asked the division to prepare regulations requiring continuing education for relicensure, and has revised their application forms to eliminate impertinent data. The board is also seeking to define minimum competency standards for admittance to practice psychology in case the board is sunsetted and the division is called upon to make these decisions.

In summary, it has been an active year. The board has been hampered in its activities by the lack of definitive regulations, which should be alleviated with their recent passage. The division has had difficulty

IV. STATISTICAL DATA

There were 12 psychologist licenses issued during this period, five by exam and seven by endorsement. In addition, the board issued five temporary permits. Two of those will lapse because the candidates did not pass the April examination.

Dr. Mueller Continues His Media Effectiveness on Behalf of Psychology: Dr. Kenneth Mueller of the East Anchorage Psychiatric Group has continued his outstanding contribution to the advancement of Psychology as a science and profession in Alaska through his frequently occuring columns in the Living and Leisure section of the Anchorage Daily News. In early March Dr. Mueller, (a recent candidate for AlPA President-Elect) published a column that effectively synopsized some of the key concerns in support of continued licensure of Alaskan psychologists. The text of his article is reproduced below. The Executive Committee of AlPA expresses its sincere thanks to Dr. Mueller for his continued active contribution to our profession here in "The Great Land".

When shopping for a therapist, look for the license

dr. ken mueller

Finding a qualified therapist in Anchorage is no easy matter. There is a confusing array of services offered by practitioners who have a wide range of training and approaches.

As a consumer of health services, you can't be expected to evaluate the credentials of health service practitioners. However, the state can legally act in the public interest by licensing professional health practice.

If your therapist is a psychologist or a clinical social worker, here are 10 reasons why he or she should be licensed:

• This assures that when you engage a therapist, that person has had high levels of education, training and supervised experience. Licensed providers have been screened and evaluated carefully in terms of specific standards before they are allowed independently to provide services to you. The license also assures you that those standards are uniform from state to state, so if you are in therapy when you move, it is very likely the therapy can continue without major disruption.

• It provides a requirement that your therapist must continue his/her education and stay up to date on recent developments.

• It ensures privileged communications between you and your therapist (confidentiality).

• It discourages the use of fads and untested or experimental forms of therapy.

• Insurance reimbursement is possible. If your therapist is licensed, your insurance company has a standard for recognition and payment of this important health benefit to its subscribers.

• It ensures an enforceable code of professional conduct. The license can be denied, suspended or revoked to counter a threat to the public welfare.

• It assures you that your therapist is a member of a profession that will police itself. For example, the ethical standards of psychologists are stricter than any other set of standards regarding independent practice.

• It demonstrates respectability and accountability. Your therapist voluntarily applies for licensure. By so doing, he/she is making an effort to upgrade the quality of professional services. Your therapist should also be active with a state association. Submitting to peer review is an act of good faith.

• It provides an opportunity for you to press for redress of grievances without costly litigation.

• It helps consumers identify reputable therapists. Licensure makes qualified therapists more accessible by making it easier to find them. According to Will Bukland of the American Psychological Association, this results in increased competition in economic terms among professionals licensed in the same category, resulting in stability of fees and lower costs.

When licensing boards are under public review, grievances often emerge about their performance. Of course, the value of licensure to you, as a potential consumer of such services, clearly outweighs the problems that occasionally result from board performance. The bath water may need changing, but the baby is worth saving.

Clinical social workers are presently working toward a licensure bill so they can more effectively police themselves. This should directly benefit those who turn to them for help.

Licensure isn't a guarantee that you and your therapist will work effectively together, but it does increase the probability of a positive outcome by assuring that your therapist has met rigorous standards.

■ Dr. Mueller is an Anchorage psychologist.

Sunset Update: Bills to continue the licensing Board were submitted in late February. The Health, Education and Social Services Committees of both houses are reportedly in favor of a four year continuation. Hearings are to be held in Juneau on the 8th of March at 3PM. Members are urged to express their support of House Bill 856 and Senate Bill 823 as soon as possible; especially if any of the following committee members are your representatives/senators: Senators Parr, Stimson, Fischer, Colletta and Kelly; Representatives Bierne, Martin, Cato, Smith and Malone.

Treasurer's Perspective: With the receipt of the Psychology Defense Fund Grant of $5000 AlPa will be financially solvent for 1982 and able to meet the major aspects of its 1982 program, lobbying and Executive Officer costs states Treasurer Hal Post. However, very few of the membership cam through with donations in execess of the bsic $65 dues assessment for 1982. This result occured despite the resolution of the general membership at the 1981 meeting that "Members are encouraged to make additional voluntary dues contributions up to an amount equal to one day's pay." Thusfar only four members have made contributions in excess of the mandatory dues. Special appreciation is expressed to Dr. Jane Krauss, Dr. Cheryl Frair, & Dr. Boy Collier for their generous contributions as well as to Dr. Joel Wieman, each of these members paid dues in a manner consistent with the spirit of the resolution made at the 1981B meeting. Other members are encouraged to consider additional payments isofar as AlPA is not likely to receive further PDF grants if licensure is continued. We'll need to carry the full burden of continuing development of our state association by ourselves.

President-Elect Frair Accepts Position:(Dr. Cheryl Frair our newly elected President-Elect responded to the Executive Committee's request for an acceptance message with the following.)

Thank-you for your support in my becoming President-Elect of AlPA. With the major issues facing psychologists in Alaska at this time we need to remember AlPA, as our professional association, can be far stronger than any one of us alone. Over the years of my association with AlPA I have been dismayed at the factionalism and the attitude of "them" against "us". As professionals we need each others support in being better able to function as a psychologist, be it in a university or college classroom, a mental health clinic in Ketchikan, a school in Anvik, a private office in Fairbanks or at API. The development of the regional groups with representatives on the Executive Committee and the liason with the Alaska School Psychologists Association are a start toward developing a stronger statewide association. Please join together in supporting your profession and colleagues through AlPA.

Cheryl Frair, PhD

AlPA Executive Officer Invited to Address 1982 APA Convention: AlPA EO Dr. Dennis Scholl recently received and accepted an invitation from Division 31 of APA, Division of State Psychological Association Affairs, to participate in a State Pscyhological Association Affairs panel at the 1982 APA convention in Washington D.C.. The panel, chaired by Dr. James Lindeman the Division 31 president-elect and faculty of the U. of Oregon Health Sciences Center, will be entitled "Perils and Plusses of the Small State Psychological Association". EO Scholl is very interested in receiving letters, records or comments from Alaskan psychologists that will broaden the data base and validate his historical perspective on AlPA. If you have information on the hisotroy of AlPA or can otherwise contribute to the breadth and accuracy of Dr. Scholl's presentation please send in your information as soon as possible to the AlPA address. It is worthwhile to note that the Division 31 officers as well as APA see AlPA's support of the EO position as a model for all small population state associations.

FY '82 GOALS AND OBJECTIVES

Board of Psychologist & Psychological Associate Examiners

Goals:

It is the purpose and function of the board to ensure that quality psychological care is available to the public by assuring only qualified persons are admitted to practice psychology independently in the State; by actively enforcing the psychology practice act; and by promoting high standards within the profession throughout the State.

Objectives:

1) Promulgate psychological associate regulations to facilitate entry of qualified master's level psychologists into the professional field.

2) Promulgate regulations governing relicensure based on continued competency.

3) Refine the State portion of the licensing and explore the possibility of developing an examination committee.

4) Act to increase public awareness of board activities, and to educate the public of the purposes and function of the board, and of types of services available from psychologists in Alaska.

5) Meet four times this year and conduct two examinations.

6) Send a representative from the board to the national or regional AASPB meeting.

Dr. Turner and Dr. Baglien attended the meetings of the Governor's Advisory Council on Mental Health in February and May.

Dr. Paul Turner and Dr. Charles Bovee were new appointees during this year.

II BOARD ACTIVITIES

The board held a total of three meetings in FY 1980. One, July 5-6, 1979 in Anchorage, another September 18-19, 1979, in Anchorage, and the third on March 24-25, 1980, also in Anchorage. The board held two conference calls, August 30, 1979, and October 11, 1979.

III EXAMINATIONS

The board administered two examinations during the period. One, October 19, 1979 and the other, April 11, 1980, both held in Anchorage. There were five candidates for the October exam.

There were five candidates for the April examination. The exam consists of a national multiple choice part and an essay part. One must pass both to be licensed. A person may retake only those portions of the exam they did not pass.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 181

"An Act relating to regulation of the practice of psychology and continuing the existence of the Board of Psychologist and Psychological Associate Examiners; and providing for an effective date."

Discussion:

The Division of Mental Health and Developmental Disabilities supports the continuation of the Board of Psychologist and Psychological Associate Examiners. We believe a board composed of licensed psychologists is important to insure that persons applying for licenses have the proper qualifications and experience necessary to provide a high quality of service. Also, the board plays an important role in developing standards of service for licensed psychologists and psychological associates.

The utilization of boards such as this is common practice in the area of licensing and overseeing service delivery, especially in the area of health care. For example, the nursing profession, medical doctors, and other fields of health providers have similar boards composed of their peers.

The continuation of this board will help to insure that Alaska's growing public and private mental health system will provide a high quality of service by competent and qualified mental health professionals. The development and enforcement of standards is considered extremely important in an area such as this and should continue in order to insure the safety of the consumers of mental health care.

Recommendation:

The Department of Health and Social Services supports the passage of this bill.

Detail Bill Analysis House Bill 182

Under this bill a large segment of the work force currently entitled to full coverage for minimum wage would no longer be covered, and as a result the Department of Labors' work load to ensure workers are not abused and unfair trade practices do not occur would be increased.

The Department will require one Wage and Hour Investigator located in Anchorage to handle the additional workload. In addition, a Clerk Typist II will be necessary to lend the investigator support and free the position to make field calls.

Assumptions:

Effective date of July 1, 1983
6% per annum inflation rate
Equipment cost in FY 1984 is a one-time item

Potential for 22 separate programs that will require monitoring (13 currently operati ; with an average monthly capacity of 350 clients).

MEMORANDUM State of Alaska

TO: Robert L. Cole
Coordinator
Office of Alcoholism/Drug Abuse

DATE: April 12, 1982

FILE NO: J66-484-82

TELEPHONE NO: 465-3603

FROM: WILSON L. CONDON
ATTORNEY GENERAL

By: LS
Linda Scoccia
Assistant Attorney General

SUBJECT: Payment of Wages in Therapeutic Work Program

You have asked several questions regarding payment of wages to clients of Nugen's Ranch, a long-term alcohol treatment facility, for work that they do while residing at the Ranch. You state that a component of the program at Nugen's Ranch is work therapy, and that the program will develop a farm, with the clients engaging in such activities as harvesting crops, tending a greenhouse, and doing general housekeeping at the Ranch, as well as assisting nearby farmers with their crops. You also state that any proceeds in food or money will go back into facility operations.

You pose a series of questions regarding coverage of the client-workers for the above-mentioned activities under state and federal law; essentially, three issues are raised by your questions: (1) are the clients employees?; (2) if yes, are they working in covered employment?; and (3) if yes, are they exempt by virtue of their disability?

The state and federal laws which cover questions of minimum wage and overtime are, respectively, the Alaska Wage and Hour Act, AS 23.10.050-.150, and the Federal Labor Standards Act (FLSA), 29 USC §§201-219, and the regulations adopted thereunder. AS 23.10.065 /1 provides in pertinent part:

> MINIMUM WAGES. An employer shall pay to each of his employees wages at a rate of not less than 50 cents an hour greater than the prevailing Federal Minimum Wage Law or $2.60 an hour, whichever is greater, for hours worked in a pay period, whether the work is measured by time, piece, commission or otherwise.

/1 The federal counterpart is 29 USC §206. Since both federal and state law seem to apply, and state law is based on the federal law, see McGinnis v. Stevens, 543 P.2d 1221 (Alaska 1975), and, for purposes of this inquiry, they are virtually interchangeable, I shall not focus exclusively on either.

Both state and federal law have provisions exempting certain categories of workers from payment of the minimum wage /2 and providing, instead, for payment of less than the minimum wage. AS 23.10.070 provides in pertinent part:

> Sec. 23.10.070. EXEMPTIONS FROM MINIMUM WAGE. To the extent necessary to prevent curtailment of opportunies of employment, the commissioner may by regulations or orders provide for the employment at wages lower than the minimum wage prescribed in AS 23.10.050--23.10.150 or
>
> (1) an individual whose earning capacity is impaired by physical or mental deficiency, age, or injury, at the wages and subject to the restrictions and for the period of time which is fixed by the commissioner . . . /3

Under state regulation, however, persons participating in alcohol rehabilitation are specifically excluded /4 from the application of this statute. /5

/2 AS 23.10.070 and 29 USC §214, respectively.

/3 The federal exemption is similar, applying to those "whose earning capacity or productive capacity is impaired by age or physical or mental deficiency or injury", 29 USC §214(c)(1).

/4 Federal regulations, 29 CFR 529.1-529.17, discussed below, exclude such persons if their earning or productive capacity is so impaired that they are not able to earn the statutory minimum wage.

/5 8 AAC 15.120 provides in part:

> MINIMUM WAGE EXEMPTION FOR HANDICAPPED PERSONS.
>
> . . .
>
> (f) Persons undergoing rehabilitation treatment or therapy relating to narcotics or alcoholism are not considered handicapped for the purposes of AS 23.10.070 and this section.

Nor is the characterization of the work as "therapeutic" determinative; the question is whether the patient/client is an employee, that is, whether he or she is employed by the program. The FLSA simply defines "employ" /6 as "to suffer or permit to work". 29 USC §203(g). The test adopted by the federal courts looks to the "economic reality" of the situation in determining the existence of an employment relationship. In Souder v. Brennan, 367 F. Supp. 808 (D.C. Cir. 1973), patient-workers in state hospitals for the mentally ill and mentally retarded sought a determination that the provisions of the FLSA applied to them. The court found in their favor, and stated:

> [T]he reality is that many of the patient-workers perform work for which they are in no way handicapped and from which the institution derives full economic benefit. So long as the institution derives any consequential economic benefit the economic reality test would indicate an employment relationship rather than mere theraputic exercise. To hold otherwise would be to make therapy the sole justification for thousands of positions as dishwashers, kitchen helpers, messengers and the like.

367 F. Supp. at 813 (footnotes omitted).

After this decision, the U.S. Department of Labor promulgated, in 1975, new regulations /7 implementing the holding of this case. The regulations expressly apply to "patient-workers" in "residential centers for drug addicts or alcoholics". /8 The regulations define "employment relationship" as follows:

/6 The Alaska Wage and Hour Act does not define "employ", but AS 23.10.145 provides:

> DEFINITIONS. Terms used in AS 23.10.-050--23.10.150 shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it.

/7 29 CFR 529.1-529.17

/8 29 CFR 529.2(b) and (c)

"Employment relationship" generally arises whenever a patient is suffered or permitted to work. The toal facts surrounding a given situation, other than those factors specifically excluded in this subsection, determine whether the test is satisfied. A major factor in determining whether or not an employment relationship exists under this Part is whether the work performed is of any consequential economic benefit to the institution. Generally, work shall be considered to be of consequential economic benefit if it is of the type that nonhandicapped workers normally perform, in whole or in part, in the institution or elsewhere. A patient does not, however, become an employee merely if he or she performs personal housekeeping chores, such as maintaining his or her own quarters, or receives a token remuneration for his or her services. Nor does the patient become an employee if engaged in such activities as making craft products, where the patient voluntarily engages in such activity and the products become the property of the patient making them, or the funds resulting from the sale of the products are divided among the patients participating in that program or are used for purposes of purchasing materials consumed in making the craft products. On the other hand, determination of an employment relationship does not depend on the level of performance of the patient or whether the work is of theraputic value to the patient. /9

/9 29 CFR 529.2(d). Emphasis added.

Thus, the critical factor in determining the existence of an employment relationship is whether the program derives any "consequential economic benefit" from the work done by the clients or patients. As the regulation further states, such a benefit usually is found if the work is of the type that is usually performed by nonhandicapped workers. In the context of your program and the therapeutic purpose of the activities enumerated above, this question is not quite as susceptible of an easy answer as it is in the case of an institution such as a mental hospital which employs its patient as "dishwashers, kitchen helpers, messengers and the like". It does not seem as likely that at Nugen's Ranch a client tending a garden, for example, would be displacing or impairing the employment opportunities of another potential employee that the program would otherwise hire to perform that task. However, this question need not be decided, with respect to the activities you have described, because the final issue raised (I have saved the best for last) resolves the problem.

AS 23.10.055 lists employees who are exempt from the provisions of the Alaska Wage and Hour Act. Subsections (1) and (2) are dispositive. Subsection (1) provides:

> (1) an individual employed in agriculture which includes farming in all its branches and, among other things, includes the cultivation and tillage of the soil, dairying, the production, cultivation, growing, and harvesting of any agricultural or horticultural commodities, the raising of livestock, bees, fur-bearing animals, or poultry, and any practices (including forestry and lumbering operations) performed by a farmer or on a farm as an incident to or in conjunction with the farming operations, including preparation for market, delivery to storage or to market or to carriers for transportation to market;

Subsection (2) provides:

> (2) an individual employed in the catching, trapping, cultivating or farming, netting or taking of any kind of fish, shellfish, or other aquatic forms of animal and vegetable life;

Thus under Alaska law, Nugen's Ranch is not required to pay minimum wages to individuals engaged in general housekeeping /10, harvesting crops /11, tending a greenhouse, caring for animals, or fishing; nor is it required to do so under federal law. /12 It must be emphasized, however, that the inquiry is a factual one, and therefore each situation must be individually examined to determine whether the minimum wage laws apply. If clients of Nugen's Ranch were to engage in activities other than those you have described, the questions regarding applicability of the minimum wage laws would have to be looked at anew.

ployer and, where appropriate, the apprenticeship agency or responsible school official, setting out that representative's findings of specific pertinent facts and conclusions and that representative's order concerning the proposed annulment or withdrawal. In proceedings instituted for annulment, the order may provide for withdrawal instead of annulment if the proof warrants such withdrawal but fails to support adequately the annulment. Such an order shall be deemed issued and effective according to its terms when mailed.

(Secretary's Order No. 16-75, dated Nov. 25, 1975 (40 FR 55913); Employment Standards Order No. 76-2, dated Feb. 23, 1976 (41 FR 9016))

[43 FR 28469, June 30, 1978]

§ 528.6 Review.

Any employer and, when appropriate, any apprenticeship agency or responsible school official, who expressed timely objection to the proposed action prior to issuance of an order of annulment or withdrawal may obtain review, limited to the question of whether the findings of fact support the order under the regulations in this part. Application for such review shall be in writing addressed to the Administrator and mailed within 15 days after the order is issued. The Administrator may affirm, modify, or reverse the order, or may remand it for further proceedings. The order under review shall not be stayed in effect pending such review. Any aggrieved person may obtain such review of an order entered in proceedings instituted under paragraph (c) of § 528.3.

[21 FR 5316, July 17, 1956, as amended at 22 FR 5683, July 18, 1957]

§ 528.7 Effect of order of annulment or withdrawal.

Except as otherwise expressly provided in such order, any order of annulment or withdrawal under paragraph (a) or (b) of § 528.3 shall be effective to terminate all certifications to which the regulations in this part apply in effect at the establishment where the cause for withdrawal arose or where the annulled certificate had effect. After such annulment or withdrawal, such employer shall be ineligible to obtain or exercise the privileges granted in such a certificate until he satisfies the issuing officer that he will not again give cause for annulment or withdrawal if a certificate is issued.

(Secretary's Order No. 16-75, dated Nov. 25, 1975 (40 FR 55913); Employment Standards Order No 76-2, dated Feb. 23, 1976 (41 FR 9016))

SOURCE: 40 FR 5776, Feb. 7, 1975, unless otherwise noted.

§ 529.1 Statutory language and scope of regulations.

(a) The Fair Labor Standards Act as amended, among other things, makes provision for the employment of handicapped persons at subminimum wages under certificate. This provision is now designated as section 14(c) of the Act. It reads as follows:

(c) (1) Except as otherwise provided in paragraphs (2) and (3) of this subsection, the Secretary of Labor, to the extent necessary in order to prevent curtailment of opportunities for employment, shall by regulation or order provide for the employment

under special certificates of individuals (including individuals employed in agriculture) whose earning or productive capacity is impaired by age or physical or mental deficiency or injury at wages which are lower than the minimum wage applicable under section 6 of this Act but not less than 50 per centum of such wage and which are commensurate with those paid nonhandicapped workers in industry in the vicinity for essentially the same type, quality, and quantity of work.

(2) The Secretary, pursuant to such regulations as he shall prescribe and upon certification of the State agency administering or supervising the administration of vocational rehabilitation services, may issue special certificates for the employment of—

(A) handicapped workers engaged in work which is incidental to training or evaluation programs, and

(B) multihandicapped individuals and other individuals whose earning capacity is so severely impaired that they are unable to engage in competitive employment, at wages which are less than those required by this subsection and which are related to the worker's productivity.

(3) (A) The Secretary may by regulation or order provide for the employment of handicapped clients in work activities centers under special certificates at wages which are less than the minimum applicable under section 6 of this Act or prescribed by paragraph (1) of this subsection and which constitute equitable compensation for such clients in work activities centers.

(B) For purposes of this section, the term "work activities centers" shall mean centers planned and designed exclusively to provide therapeutic activities for handicapped clients whose physical or mental impairment is so severe as to make their productive capacity inconsequential.

(b) Authority to promulgate the regulations and issue the certificates referred to in section 14(c) has been delegated by the Secretary to the Administrator of the Wage and Hour Division (Secretary's Orders 13-71 and 15-71 (36 FR 8755 and 8756)).

(c) Patient workers whose earning or productive capacity is not impaired shall be paid at least the statutory minimum wage. For patient workers whose earning or productive capacity is impaired to the extent that they are not able to earn the statutory minimum wage, the regulations in this Part 529 govern certificates authorizing special minimum wages for patient workers in hospitals and institutions for the sick, the aged, and the mentally ill or defective with the following exceptions which are covered by Parts 524 and 525 of this chapter as appropriate:

(1) Patients of hospitals or institutions working for employers other than hospital or institution.

(2) Patients working in sheltered workshops, including work activities centers, as defined in Part 525, operated by the hospital or institution.

§ 529.2 Definitions.

(a) "Administrator" means the Administrator of the Wage and Hour Division, U.S. Department of Labor, the Administrator's authorized representative.

(b) "Patient worker" or "resident worker," hereafter referred to as "patient worker," means a sick, aged, mentally ill or defective individual who receives treatment or care by a hospital or institution, whether he or she is a resident or not, and has an employment relationship with such establishment, other than in a sheltered workshop program.

(c) "Hospital or institution," hereafter referred to as "institution," is a public or private, nonprofit or profit facility primarily engaged in (1) more than 50 percent of the income attributable to) providing residential care for the sick, the aged, or the mentally ill or defective, including but not limited to nursing homes, intermediate care facilities, rest homes, convalescent homes, homes for the elderly or infirm, halfway houses, residential centers for drug addicts or alcoholics and the like, whether licensed or unlicensed.

(d) "Employment relationship" generally arises whenever a patient is suffered or permitted to work. The totality of facts surrounding a given situation, other than those factors specifically excluded in this subsection, determine whether the test is satisfied. A major factor in determining whether or not an employment relationship exists under this Part is whether the work performed is of any consequential economic benefit to the institution. Generally, work shall be considered to be of consequential economic benefit if it is of the type that nonhandicapped workers normally perform, in whole or

In part, in the institution or elsewhere. A patient does not, however, become an employee merely if he or she performs personal housekeeping chores, such as maintaining his or her own quarters, or receives a token remuneration for his or her services. Nor does the patient become an employee if engaged in such activities as making craft products, where the patient voluntarily engages in such activity and the products become the property of the patient making them, or the funds resulting from the sale of the products are divided among the patients participating in that program or are used for purposes of purchasing materials consumed in making the craft products. On the other hand, determination of an employment relationship does not depend on the level of performance of the patient or whether the work is of therapeutic value to the patient.

(e) "Evaluation and training" means a program, authorized pursuant to section 14(c)(2)(A) of the Act, which provides competent instruction and supervision and is designed to determine a worker patient's potential and to teach adjustment to a work environment or the skills related to one or more types of work. The duration of the evaluation and training depends on the total facts of the situation, but in no case shall exceed 12 months. Time spent in an employment relationship in the institution prior to the effective date of these regulations shall be counted in determining the duration a patient worker is in evaluation and training. (Any workweek during which there was regular and recurrent engagement in work, even though small in amount, which gave rise to an employment relationship, shall be considered as a week spent in evaluation and training.)

(f) "Group minimum wage" means the minimum wage authorized pursuant to section 14(c)(1) of the Act which shall apply to all patient workers who have completed the evaluation and training program, if one has been authorized for the institution under this part (where no such program has been authorized, the group minimum wage applies immediately upon a patient's entering into an employment relationship with the institution), except for patient workers who are: Entitled to a commensurate wage higher than the group minimum wage; subject to an individual exception; or subject to a work activities center certificate, as defined in this part.

(g) "Individual exception" means authorization, pursuant to section 14(c)(2)(B) of the Act, to pay a particular patient worker whose earning or productive capacity is severely impaired less than the group minimum wage.

(h) "Work activities center" is an administrative classification given to a facility which has an approved program (other than a work activities center program as defined in Part 525), authorized pursuant to section 14(c)(3) of the Act, which is planned and designed exclusively to provide work activities for patients whose physical or mental impairment is so severe as to render their productive capacity inconsequential. The work activities shall be part of a recorded plan of therapy or care for such patients. Such activities need not, however, be restricted to a particular physical or program area of the institution, nor to a particular type of work. No program shall qualify for a work activities center certificate under this part unless the productive capacity of each individual in the program is so severely impaired as to make that person incapable of earning as commensurate pay at least 25 percent of the minimum wage under section 6 of the Act, and the patient workers are participating in the program as a part of planned therapy.

(i) "Commensurate pay" (the term used in these regulations) is intended to have the same meaning as "equitable compensation" and "wages related to the worker's productivity," which terms are used in the statute, and means wages which are commensurate with those paid nonhandicapped workers in the institution or in industry maintaining acceptable labor standards in the vicinity for essentially the same type, quality, and quantity of work. So for example, the commensurate pay of a patient worker who is 75 percent as productive, considering quality and quantity, as the average

nonhandicapped worker performing essentially similar work in the institution would be at least 75 percent of the wage paid to such nonhandicapped worker.

(j) "State agency" means the agency within the State which administers or supervises the administration of vocational rehabilitation services in any State of the United States, the District of Columbia, or any territory or possession of the United States.

(k) "The Act" means the Fair Labor Standards Act of 1938, as amended.

§ 529.3 Advisory Committee on Sheltered Workshops.

(a) The Advisory Committee on Sheltered Workshops, appointed periodically by the Secretary of Labor, shall advise and make recommendations to the Administrator concerning the administration and enforcement of this part and the need for amendments thereto and for such other purposes as may be desired by the Administrator.

(b) The Administrator may consult with the Advisory Committee on Sheltered Workshops prior to any action taken under this part and may afford the Committee 15 days, or such additional time as may be allowed, to present its views. The Administrator may also afford the Committee an opportunity to present its views in connection with any petition for review filed, any hearing held, and any petition for amendment of these regulations, or any proposed legislation by the Secretary of Labor pertaining to the problems dealt with in these regulations.

§ 529.4 Wage payments.

(a) A patient worker whose earning or productive capacity is not impaired shall be paid at least the statutory minimum wage. A patient worker whose earning or productive capacity is impaired to the extent that the individual is unable to earn at least the statutory minimum wage may be paid a subminimum wage but only after a certificate authorizing payment of such lower wage has been obtained from the Wage and Hour Division.

(b) Four types of certificates authorizing subminimum wages are available for patient workers in institutions: Evaluation and training, group minimum wage, individual exception, work activities center. All but the individual exception are group certificates. Under a group certificate, the patient is certificated and not the individual patient worker. In the case of the individual exception, authority to pay a subminimum wage must be obtained for each individual.

(c) Evaluation and training: Patient workers subject to an evaluation and training certificate shall receive at least commensurate pay; no minimum wage guarantee is required unless the Administrator, shall determine it is in the best interest of the patient workers that a minimum wage guarantee be set.

(d) Group minimum wage: Patient workers subject to a group minimum wage certificate shall receive at least the minimum wage authorized in the certificate or commensurate pay, whichever is higher. The group minimum wage shall not be less, and may be more, than 50 percent of the minimum wage under section 6 of the Act.

(e) Individual exception: A patient worker subject to an individual exception shall receive not less than the minimum wage authorized in the individual exception certificate issued for that patient worker or commensurate pay, whichever is higher. An individual exception shall not be less, and may be more, than 25 percent of the minimum wage under section 6 of the Act.

(f) Work activities center: Patient workers subject to a work activities center certificate shall receive at least commensurate pay; no minimum wage guarantee is required unless the Administrator, shall determine it is in the best interest of the patient workers that a minimum wage guarantee be set.

(g) Compensable time for a patient worker starts when the individual begins to perform work involving an employment relationship.

(h) Each patient worker's work performance shall be reviewed by the institution at three month intervals during the first 6 months in an employment relationship, and at least every 6 months thereafter and his or her wages adjusted accordingly. The review shall relate the patient wor

er's quantity and quality of performance to that of nonhandicapped workers receiving the prevailing wage in the institution for similar work or work requiring similar skills. If similar work or work requiring similar skills is not performed by nonhandicapped workers in the institution the prevailing wage paid nonhandicapped workers in the vicinity in industry maintaining acceptable labor standards shall be used. The review shall be made by a staff member or members who observe the patient worker(s) being rated on a continuing basis and who are familiar with appropriate nonhandicapped production standards.

(f) No part of the minimum wage and overtime earned by a patient worker can be deducted for the cost of room, board or services. The patient worker must receive his or her wages free and clear, except for legal payroll deductions. It is not the intention of these regulations, however, to preclude the institution thereafter from assessing or collecting the reasonable cost of room, board and other services actually provided to a patient worker to the extent permitted by applicable Federal or State law and on the same basis as it assesses and collects from nonworking patients.

§ 529.5 Application for certificates.

(a) Application for a certificate for an evaluation and training program, a group minimum wage, an individual exception, or a work activities center may be filed by any institution with the Regional Office or Caribbean Director of the administrative region or area of the Wage and Hour Division, U.S. Department of Labor, in which the institution is located. Application forms may be obtained from the appropriate Office.

(b) An application for an evaluation and training certificate and for an individual exception certificate for payment of a wage below 50 percent of the minimum wage under section 6 of the Act shall also be filed with the State agency. Before the Wage and Hour Division can act on such an application, the State agency must certify that the evaluation and training program meets the standards defined in § 529.2 or, in the case of an individual exception, that the individual's earning capacity is so severely impaired that he or she is unable to earn at least 50 percent of the minimum wage under section 6 of the Act.

(c) An institution initially applying for a certificate, other than an individual exception certificate, which does not have the information called for in the application, may be issued a temporary certificate if it meets the requirements of, and provides assurance of compliance with, this Part.

(d) Application for an individual exception certificate may be filed at the time of applying for a group minimum wage certificate or during the life of the certificate. The application must show, among other things, that the patient worker is unable to earn the minimum wage authorized in the group minimum wage certificate.

(e) An application for an individual exception filed before the patient worker has completed evaluation and training shall be considered timely. In such case, if action on the application is not completed before the expiration of the evaluation and training period, the minimum wage requested in the application by the institution (not less than 25 percent of the minimum wage) shall be the interim minimum wage.

§ 529.6 Criteria for consideration in issuance of certificates.

The following criteria will be considered by the Administrator in determining the necessity of issuing a certificate or certificates and the conditions to be specified therein:

(a) The present and previous earnings of the patient workers.

(b) Whether the patient workers are receiving commensurate pay.

(c) The nature and extent of the disabilities of the patient workers and the degree to which these factors affect earning or productive capacity of the patient workers.

(d) Whether the conditions required for certification under this part have been met.

(e) Whether the certification by the State agency has been made in accordance with this part.

§ 529.7 Issuance of certificates.

(a) Upon consideration of criteria specified in § 529.6, the Administrator may issue a certificate or certificates, as appropriate.

(b) If a certificate is issued, a copy shall be sent to the institution. If denied, the institution shall be notified in writing of the denial and the reasons therefor.

(c) A group minimum wage certificate may be issued for the entire institution or a department or departments of the institution.

§ 529.8 Terms and conditions of certificates.

(a) A certificate shall specify the terms and conditions under which it is granted.

(b) A certificate shall apply to every patient worker in the program for which the certificate is granted.

(c) A certificate shall be effective for a period to be designated by the Administrator, generally for a period of 1 year. Patient workers may be paid wages lower than the statutory minimum only during the effective period of a certificate.

(d) A group minimum wage certificate shall set a special minimum wage of not less than 50 percent of the minimum wage under section 6 of the Act. An individual exception certificate shall set a special minimum wage not less than 25 percent of the minimum wage under section 6 of the Act.

(e) An evaluation and training certificate and a work activities center certificate need not set a special minimum wage other than that required by paragraph (f) of this section or provided for by § 529.4.

(f) All patient workers subject to a certificate shall be paid wages commensurate with those paid nonhandicapped workers in the institution in which they are patients or in the vicinity in industry maintaining acceptable labor standards for essentially the same type, quality, and quantity of work, but not less than the certificate rate applicable if such a rate has been authorized.

(g) Patient workers shall be paid not less than one and one-half times the regular rate for all hours worked in excess of the maximum workweek applicable under section 7 of the Act.

(h) No patient worker shall be newly-employed under a certificate issued under these regulations while abnormal labor conditions, such as a strike, a lock-out, or other similar condition, exist in the institution.

(i) Each patient worker and his or her parent or guardian shall be informed promptly orally and in writing of his or her rights under the Act.

(j) The terms of any certificate may be amended for cause, upon request of the institution, or a patient worker or his or her parent or guardian, or upon the initiative of the Administrator.

§ 529.9 Renewal of certificates.

(a) Application may be filed for renewal of any certificate.

(b) If an application for renewal has been properly and timely filed prior to the expiration date of a certificate, the certificate shall remain in effect until the application for renewal has been granted or denied.

(c) Patient workers may be paid wages less than the statutory minimum after notice that the application for renewal has been denied, if review of such denial is requested in accordance with § 529.12: *Provided, however*, That if the denial is affirmed on review, the institution shall reimburse any person covered by the certificate in an amount equal to the difference between the applicable minimum wage and any lower wage paid such person subsequent to the effective date of denial.

§ 529.10 Records to be kept.

Every institution shall maintain and have available for inspection by the Administrator records of:

(a) Disability, which show the nature of each patient worker's disability.

(b) Productivity, which show the productivity of each patient worker on a continuing basis or at periodic intervals as defined in § 529.4(b).

(c) Prevailing wage, which show the prevailing wages paid nonhandicapped workers in the institution or in industry in the vicinity for essentially sim-

lar work to that performed by the patient workers.

(d) Production standards for an average nonhandicapped worker for each job being performed by a patient worker in the institution (for use as a norm in measuring patient worker productivity.)

(e) When an evaluation and training program is authorized by certificate, records showing which patient workers are in the evaluation and training program, and the total period of time each worker has been in such a category.

(f) When an institution holds both a work activities center certificate and a group minimum wage certificate, records showing which patient workers are under each certificate.

(g) Records showing the patient [illegible] tions have been authorized.

(h) In addition, the records required under all the applicable provisions of Part 516 of this chapter.

(i) Every institution having patient workers who are entitled to benefits under the Act shall at all times display a poster, as prescribed by the Administrator, in a conspicuous place in the institution where it may be observed readily by the patient workers and other workers in the institution.

(j) Records required by this section shall be kept for the periods specified in Part 516 of this chapter.

§ 529.11 Cancellation of a certificate.

(a) The Administrator may cancel any certificate for cause. A certificate may be canceled (1) as of the date of issuance, if it is found that fraud has been utilized in obtaining the certificate or in permitting a patient worker to be employed thereunder; (2) as of the date of violation, if it is found that any of the provisions of the Act or of the terms of the certificate have been violated; or (3) as of the date of notice of cancellation, if it is found that the certificate is no longer necessary in order to prevent curtailment of opportunities for employment, or that the requirements of this part have not been complied with.

(b) If a petition for review is filed under § 529.12, the effective date of the cancellation shall be postponed until action is taken thereon: *Provided, however,* That if the cancellation order is affirmed on review, the institution shall reimburse any person covered by the certificate in an amount equal to the difference between the applicable minimum wage and any lower wage paid such person subsequent to the effective date of cancellation.

(c) Except in cases of willfulness or those in which the public interest requires otherwise, before any certificate shall be canceled, facts or conduct which may warrant such action shall be called to the attention of the institution in writing and it shall be afforded an opportunity to demonstrate or achieve compliance with all lawful requirements.

[illegible]

Any person aggrieved by any action of an authorized representative of the Administrator taken pursuant to this part may, within 60 days or such additional time as the Administrator may allow, file with the Administrator a petition for review. Such review, if granted shall be made either by the Administrator or by an authorized representative who took no part in the action under review, who may, to the extent it is deemed appropriate, afford other interested persons an opportunity to present data and views.

§ 529.13 Submission of information, investigations, and hearings.

The Administrator may require at any time the submission of such information, other than that specified elsewhere in this part, as is deemed appropriate, or may conduct an investigation, which may include a hearing, prior to taking any action pursuant to this part. To the extent it is deemed appropriate, the Administrator may provide an opportunity to other interested persons to present data and views.

§ 529.14 Relation to other laws.

No provision of this part, or of any certificate issued under this part, shall excuse noncompliance with any other Federal or State law or municipal ordinance establishing higher standards

§ 529.15 Issuance of certificates for experimental purposes.

In addition to the issuance of certificates as provided in §§ 529.1 to 529.14, the Administrator may authorize the issuance of certificates to permit employment of patient workers in institutions at less than the applicable minimum wage under section 6 of the Act as part of experimental programs to increase employment opportunities for such persons. Such certificates shall be issued in such types of cases and on such terms and conditions within the scope of section 14 of the Act as the Administrator shall determine will best further any such experimental programs. Certificates issued under this section shall be limited to an effective period of not more than 1 year.

§ 529.16 Amendment of this part.

The Administrator may at any time upon his or her own motion or upon written request of any interested person setting forth reasonable grounds therefor, and after opportunity has been given to interested persons to present their views, amend or revoke any of the terms of this part.

§ 529.17 Review of regulations.

Approximately six months after the effective date of this part, the Wage and Hour Division will undertake a review of its program for administration and enforcement of this Part in consultation with the Advisory Committee on Sheltered Workshops.

§ 530.1 Definitions.

(a) The meaning of the terms "person," "employ," "employer," "employee," "goods," and "production," used in this part, is the same as in the Fair Labor Standards Act of 1938, as amended.

(b) "Industrial homeworker" and "homeworker," as used in this part mean any employee employed or suffered or permitted to perform industrial homework for an employer.

(c) "Industrial homework," as used in this part, means the production by any person in or about a home, apartment, tenement, or room in a residential establishment of goods for an employer who suffers or permits such production, regardless of the source (whether obtained from an employer or elsewhere) of the materials used by the homeworker in such production.

(d) The women's apparel industry is defined as follows: The production of women's, misses' and juniors' dresses, washable service garments, blouses and neckwear from woven or purchased knit fabric; women's, misses' children's and infants' underwear, nightwear, and negligees from woven fabrics; corsets and other body supporting garments from any material; other garments similar to the foregoing; and infants; and children's outerwear.

(e) The jewelry manufacturing industry is defined as follows:

(1) (i) The manufacturing, processing, or assembling, wholly or partially from any material, of jewelry, commonly or commercially so known. Jewelry as used herein includes without limitation, religious, school, college, and fraternal insignia; articles of ornament or adornment designed to be worn on apparel or carried on or about the person, including, without limitation, cigar and cigarette cases, holders, and lighters; watch cases; metal mesh bags and metal watch bracelets; and chain, mesh, and parts for use in the

SUBJECT: Minimum wage
(CSHB 182 (HESS))

TO: Representative Ramona L. Barnes

FROM: Russ Josephson
Legislative Counsel

The following is the sectional analysis that you requested:

Section 1 adds a new section to AS 23.10, providing that a participant in a residential drug abuse or alcoholism treatment program may be paid less than the minimum wage for work therapy performed by the patient.

Subsection (a) stipulates that the rate of pay must be approved by the commissioner of labor and that the rate must be in compliance with federal law.

Subsection (b) provides for the adoption of regulations by the commissioner of labor regarding the payment of wages for work therapy. Several factors are to be considered in the adoption of the regulations:

(1) Is the work the type that a participant in this type of program would do ordinarily and is the work for the mutual benefit of the patient and the program?

(2) Would the work ordinarily be done by full-time employees?

(3) Will the work produce income to the patient other than wages?

(4) What is the therapeutic benefit of the work, the skill required, and the role of work therapy in the patient's treatment plan?

(5) What is the impact of the wage scale on the program?

Section 2 adds a section to AS 47.37. Subsection (a) of this new section provides that the payment of wages for work therapy is an allowable cost, payable by a grantee with grant funds.

Subsection (b) provides that the wages may not be used for the costs of room, board or services, although reasonable costs of treatment may be assessed and collected, if done on the same basis as for non-working patients.

Subsection (c) provides that wages earned by a patient may be held in trust for the benefit of the patient and disbursed in several ways that are enumerated.

Section 3 adds a definition of "work therapy" to AS 47.-37.270.

Proposed CSHB 182 (HESS)
Dave Palmer
April 4, 1983

Section 1: (a) Authorization is given for exemption to the State minimum wage (AS 23.10.050 - 50 cents per hour greater than prevailing Federal minimum wage or $2.60/hour whichever is greater) for participants in work therapy programs.

(b) The Commissioner is required to adopt regulations regarding payment for work therapy while considering specific criteria indluded in the bill.

Section 2: (a) Wages paid for work therapy are considered allowable operational costs and are eligible for reimbursement by grants.

(b) No part of wages earned may be deducted for room, board or services.

(c) Wages may be held in trust and disbursed, with consent for specific purposes.

Section 3: Work therapy is defined.

No effective date.

The impetus for HB 182 is the Nugen Ranch, a treatment facility for chronic and debilitation alcoholics. A component of the treatment program is work on the ranch in exchange for minimal compensation. With the intent on establishing lost work habits, developing self esteem, and rekindling positive work attitudes, work as therapy is used at the ranch. However, Federal and State minimum wage laws apply. HB 182 provides an exemption from the State minimum wage, which exceeds the Federal minimum wage.

Exemptions to the State minimum wage currently exist (AS 23.10.070) for:

1. Individuals whose earning capacities are reduced by physical or mental deficiencies, age or injuries.

2. Apprentices (approved by the Commissioner)

3. A learner, subject to conditions set by the Commissioner.

DHSS Position: The position paper relates to HB 182, not proposed CSHB 182. it is relevant. The DHSS asks that the exemption apply to programs designed to last over 120 days. Short-term programs would be required to pay prevailing minimum wage.

Fiscal Note: The fiscal note for HB 182 is zero. However, the CSHB 182 requires the development of regulations and implies that review of programs would be necessary to assure compliance with those regulations. If not done before the hearing, the fiscal note requires revision.

You might WELCOME Phillip Volland AT AN APPROPRIAK time - Let the committee KNOW he's here.

Ask Volland - I think this bill is AN EXEMPTION to STATE MIN. WAGE ONLY.

POSITION PAPER/Department of Health & Social Service

MAR 8 1983

POSITION PAPER

HOUSE BILL 182

"An Act exempting participants in residential drug abuse and alcoholism treatment programs from Alaska's minimum wage provisions, and providing a wage scale."

The Department of Health and Social Services is supportive of this legislation.

The issues and remedies surrounding this proposed legislation arose with the advent of a long term care program for the chronic and significantly debilitated alcoholic. The individuals to be served by these programs have long histories of unemployment, skill depreciation, loss of positive employment experiences and loss of positive life experiences. Long term care is defined as treatment lasting from a minimum 120 days to a maximum of 2 years with an average length of 1 year.

One of the intents of long term care treatment program is to have clients engage in a form of work therapy as part of their overall treatment regime. Such work therapy will be designed to help the client re-establish or re-learn basic learning, life and employment skills. It is the intent of the long term care treatment program to be more than a warehouse for the most severely afflicted casualties of the disease alcoholism.

The Department is also concerned that clients' rights be protected. The Department is also concerned that short term treatment programs provide intensive therapy to appropriate clients. To this end the Department of Health and Social Services would recommend the following.

House Bill No. 182, lines 12 through 14 be amended to read:

> (b) Participants in residential drug and alcoholism treatment programs [designed to exceed 120 days in length,] may be paid less than the minimum wage prescribed in AS 23.10.050-23.10.150 for work therapy, as defined in AS 47.37.270.

House Bill No. 182, lines 16 through 19 be amended to read:

> Sec. 47.37.245. Wages of Patients. Participants in residential drug abuse and alcoholism treatment programs, [designed to exceed 120 days in length,] shall be paid for work therapy, as defined in AS 47.37.270, at the rates established under AS 33.32.050. [AS 33.32.050(a)].

These recommended changes would have the effect of limiting the applicability of the exemption from the minimum wage law. It is the Department's position that only long term care treatment programs (designed to exceed 120 days) be exempted.

Re: House Bill 182

Dear Representative Lacher:

I would like to take this opportunity to comment on H.B. 182 and, in particular, address the issue of possible conflict between the proposed legislation and the federal Fair Labor Standards Act.

As you may recall, I represent Alaska Alcoholism Rehabilitation Services, Inc., the nonprofit corporation which owns and operates a long-term residential treatment center for alcoholics in Wasilla, Alaska. Last year, on behalf of my client, I advised the State Office of Alcoholism and Drug Abuse of my opinion that state and federal law required the payment of a minimum wage to patients at residential treatment centers who are engaged in work therapy. I suggested that legislation be adopted to lessen the economic impact of this problem, and sought the assistance of various legislators last year; however, the session was too far along to yield results. I presume that you have copies of my original opinion letter to SOADA, dated February 23, 1982, and my letters to Representatives Donald E. Clocksin, Patrick J. Carney, and Senator Jalmar Kerttula, dated April 2, 1982.

Since the session began this year, I have been in frequent contact with Russ Josephson of the Law Division, and this week with your aide, Joan Matthews. I am aware of your concern about possible conflict between H.B. 182 and the Fair Labor Standards Act and hope that my comments may assist you in evaluating the proposed legislation. You may feel free to share this letter with the named sponsors of the bill.

FEB 23 1983

Let me begin by saying there are certain defects in H.B. 182 that I feel need correction, and that my opinion about possible solutions has changed since last year as a result of recent developments in case law. I have also proposed changes in H.B. 182 to address some problems which are not covered by the bill. Before explaining these issues in detail, let me first discuss my prior recommendations and the somewhat confusing legal principles that are involved in the state law/federal law conflict.

In my letter to SOADA of last year, I suggested that the application of the Fair Labor Standards Act (hereafter F.L.S.A.) to state-funded residential treatment centers could be avoided by adding language to state legislation which was keyed to the decision of the U.S. Supreme Court in National League of Cities v. Usery, 426 U.S. 833 (1976) (hereafter National League). This was because the National League decision held that the F.L.S.A. did not apply to wage and hour determinations which involve functions which state and local governments are created to provide, including those services which the states have traditionally afforded to their citizens. Among the services enumerated by the Supreme Court in National League was the field of "health care." The holding in National League was based on the application of the Tenth Amendment to the Constitution -- the constitutional provision which prohibits federal control over functions traditionally reserved to the states. Although the decision in National League was limited to states and their political subdivisions, the broad language used by the court suggested that the decision might also apply to state-funded, private organizations which deliver state services such as health care, and which are heavily regulated by the state.

Subsequent to the decision in National League, two federal courts specifically addressed the applicability of the holding in National League to local health care programs involving private nonprofit residential treatment centers funded by states. These two cases, Williams v. Eastside Mental Health Center, Inc., 509 F.Supp. 579 (N.D. Ala., S.D., 1980), and Richland County Assn. for Retarded Citizens v. Marshall, 660 F.2d 388 (9th Cir. 1981), were divided on the issue. Although the Richland County decision held that National League did not prohibit the application

FEB 23 1983

of the Fair Labor Standards Act to a private nonprofit corporation which operated a residential home for mentally retarded adults, the Williams case reached the opposite conclusion under nearly identical circumstances. When I originally wrote my opinion letter, it appeared possible that well drafted legislation, which recognized the state's interest in treating drug addicts and alcoholics as an essential state function and which met this function through the provision of funding to private nonprofit corporations, could provide the necessary protection established under the National League decision, and therefore render such treatment centers exempt from the minimum wage requirement of the F.L.S.A.

However, after speaking with Russ Josephson last month, I updated my research on the subject. Decisions issued during the last year in federal district courts as well as the United States Supreme Court now indicate that the protection originally thought available under the National League decision is no longer applicable to private nonprofit organizations which receive state funding, regardless of whether or not they are involved in administering services otherwise provided by the state.

Since my original letter to SOADA last February, two decisions were rendered by the United States Supreme Court which involved the application of National League. These cases, Hodel v. Virginia Surface Mining and Reclamation Association, ____ U.S. ____, 101 S.Ct. 2352 (1981), and United Transportation Union v. Long Island Railroad Company, ____ U.S. ____, 102 S.Ct. 1349 (1982), set out a three-pronged test to be applied in evaluating the Tenth Amendment protection announced in National League. To claim that a federal statute would not apply under the National League principle, the challenging party would have to establish that: (1) the challenged statute regulates the "states as states"; (2) the federal regulation addresses matters that are indisputably "attributes of state sovereignty"; and (3) the states' compliance with the federal law would directly impair their ability "to structure integral operations in areas of traditional functions."

FEB 23 1983

Although in National League the Supreme Court first cited fire protection, police protection, sanitation, public health, and parks and recreation as examples of services that are within the area of traditional operations of state and local governments, subsequent decisions of the U.S. district courts have refined these areas in far greater detail. See, e.g., N.L.R.B. v. Highview, Inc., 590 F.2d 174 (5th Cir. 1979) enforcement modified, 595 F.2d 339 (1979) (the care of the aged, sick and indigent); Enrique Molina-Estrada v. Puerto Rico Hwy. Auth., 680 F.2d 841 (1st Cir. 1982) (highway construction); Bonnette v. California Health & Welfare Agency, 525 F.Supp. 128 (N.D. Cal. 1981) (in-home support services for the blind, aged and disabled); Amersbach v. City of Cleveland, 598 F.2d 1033 (6th Cir. 1979) (operation of a municipal airport); and Alewine v. Cit, Council of Augusta, 505 F.Supp. 880 (S.D. Georgia 1981) (operation of a municipal transit system). The most significant development, however, has been the result of appeals in Williams v. Eastside Mental Health Center, supra, and Richland County Assn. for Retarded Citizens v. Marshall, supra, the two cases on which I based my earlier opinion.

The original Ninth Circuit decision in Richland County, which held that the Fair Labor Standards Act was applicable to private nonprofit residential treatment centers, was vacated by the Supreme Court on jurisdictional grounds in January of 1982, sub nom. Donovan v. Richland County Assn. for Retarded Citizens, ____ U.S. ____, 102 S.Ct. 713 (1982). Although the practical effect of the vacated judgment was to restore the district court's decision apparently holding the F.L.S.A. inapplicable to the treatment center, that opinion is unpublished and has little legal significance.

Of importance, however, is the chain of appeals on Williams. As you will recall, that decision held that the Fair Labor Standards Act was not applicable to a nonprofit treatment center because of its close relationship to the state via funding and regulations, and because the center served an essential state function in providing health care to citizens. The district court decision was reversed by the Eleventh Circuit on March 5, 1982 in a well-reasoned

FEB 23 1983

decision. Williams v. Eastside Mental Health Center, 669 F.2d 671 (1982) (copy enclosed). The court held that the protection accorded by National League was not available to nonprofit corporations receiving funding from the state, even though they may provide health care services on behalf of the state. I encourage you to read this decision thoroughly because of the very close analogy it presents to nonprofit corporations in Alaska which provide services through state funding in the health care, drug abuse, and alcoholism fields. In August of 1982 the decision was appealed to the United States Supreme Court, and on November 2, 1982 the petition for certiorari was denied by the Supreme Court, Eastside Mental Health Center v. Williams, ____ U.S. ____, 51 U.S.L.W. 3340. The effect of the denial of certiorari is to uphold the Eleventh Circuit's decision. It is therefore clear that the Fair Labor Standards Act does apply to private nonprofit residential treatment centers in Alaska, even though those programs receive state funding, are regulated by the state and deliver services the state might otherwise choose to provide on its own. Thus, I recommend that it is futile to try to adopt legislation stating that the treatment of alcoholics and drug addicts through private nonprofit corporations serves an important state function in an attempt to pass valid legislation that will enable those programs to pay a minimum wage less than that provided under the F.L.S.A. Because it is now clear that federal law will apply to residential treatment centers, H.B. 182 must be drafted in such a way that it is consistent with the Fair Labor Standards Act.

To fully understand the issue of conflict between state and federal law, let me briefly explain two legal doctrines that come into play in this area -- "supremacy" and "preemption."

Supremacy is a constitutional principle, based on Article IV of the U.S. Constitution, that state laws are void to the extent that they actually conflict with a valid federal statute, that is, they present an obstacle to the purposes and objectives of the federal statute. It is a doctrine often confused with a similar principle based on the supremacy clause, the doctrine of preemption.

FEB 18 1983

Preemption is a legal doctrine that prohibits the application of state statutes (whether in conflict with or consistent with federal statutes), if the federal legislative scheme evidences a congressional purpose to "occupy the field." Supremacy and preemption should not be confused. The preemption principle prohibits the states from legislating in a particular area; the principle of supremacy only prohibits the states from adopting legislation in conflict with federal legislation.

In the labor law area, the distinction between these two doctrines can be easily understood. The Fair Labor Standards Act did not preempt the field of labor law, Webster v. Bechtel, 621 P.2d 890 (Alaska 1980); see also 29 U.S.C. §218(a) (1975). Thus Alaska can adopt (and has adopted) its own laws governing the rates of pay for workers in the state. Nonetheless, the doctrine of supremacy prohibits this legislation from being in conflict with the Fair Labor Standards Act. Thus, Alaska cannot adopt a law that sets a lower rate of pay for workers in the state than is established under federal law. Therefore, the provisions of H.B. 182 cannot conflict with analagous provisions of the Fair Labor Standards Act.

This brings me to my analysis of H.B. 182 as presently drafted.

I have no problems with Section 1 insofar as it amends AS 23.10.070. The effect of the proposed amendment is to invalidate 8 AAC 15.120(f) which presently states that drug addicts and alcoholics are not handicapped workers with respect to AS 23.10.070. Because of problems with Section 2 of H.B. 182, however, and because of the need to address problems not covered by the proposed legislation, I have suggested some major additions to Section 1 of H.B. 182 (see discussion below).

AS 23.10.070 is analogous to Section 14 of the Fair Labor Standards Act, 29 U.S.C. 214, the "handicapped worker" provisions of the act. Thus it will be interpreted consistent with the F.L.S.A. and the regulations adopted thereunder. These regulations, codified at 29 C.F.R. 529 (copy enclosed), already provide a mechanism for the approval of the payment of subminimum wages to patient workers at "intermediate care facilities ... halfway houses, residential centers for drug addicts or alcoholics and the like whether licensed or not licensed." The practical effect

of amending AS 23.10.070 will be that affected treatment programs will have to apply for and obtain a certificate authorizing the payment of subminimum wages pursuant to the procedure set forth in 29 CFR 529.

Section 14 of the F.L.S.A. only permits the payment of subminimum wages, upon application and approval by the Department of labor, of not less than 50 percent of the prevailing minimum wage. In other words, the provision of federal law analogous to the amendment to AS 23.10.070 proposed by H.B. 182 does not allow the payment of any wage less than 50 percent of the prevailing minimum wage in Alaska, which is now $3.85 per hour.

Because of this fact, there is a conflict between H.B. 182 and the F.L.S.A. Section 2 of H.B. 182 sets the wages for work therapy "at the rates established under AS 33.32.050." If you refer to AS 33.32.050 you will note that the wage rate authorized therein may not exceed 50 percent of the minimum wage established under AS 23.10.065. In other words the bill, as presently written, authorizes the payment of wages less than what is required by federal law. This difference is fatal to the proposed legislation; if passed as presently written it will not survive a legal challenge based on the conflict with Section 14 of the Fair Labor Standards Act.

Another problem created by tying the wage rate to AS 33.32.050 is that AS 33.32.050 will automatically repeal in 1987. I suggest that it is imprudent to tie H.B. 182 to a law that will automatically expire four years from now. This will only mean that AS 47.37.245 would have to be amended again in 1987.

I have suggested additional amendments to Section 2 regarding the assessment of treatment fees to patient workers. My proposed subsection (b) is consistent with 29 C.F.R. 529.4(i). I have also added as subsection (c), somewhat similar to AS 33.83.50(c), clarifying a program's authority to hold wages in trust and disburse funds for appropriate purposes. As a practical matter, most residential treatment programs must hold money in trust in order to control the likelihood of intra-institutional

theft, and allocate money to the client consistent with his or her financial needs and other obligations.

I have no major problems with the definition of work therapy as defined in Section 3 of H.B. 182. I feel, however, that the present definition implies that work therapy will involve more formal "training" than actually occurs. I have suggested some minor changes in language which, I believe, more accurately reflect the concept of work therapy.

Any statutory definition of work therapy will, however, be incomplete. Litigation about this issue over the years, as well as opinions generated by the Wage and Hour Division of the Department of Labor, have only indicated the complexity of the concept. [See, e.g., Wyatt v. Stickney, 344 F.Supp. 373 (M.D. Ala. 1972), aff'd sub nom. Wyatt v. Aderholt, 503 F.2d 1305 (5th Cir. 1974); Opinion WH-375, signed by Wage Hour Administrator Ronald J. Jones, March 1, 1976; Opinion WH-334, signed by Acting Wage Hour Administrator Warren D. Landes, April 18, 1975. For instance, personal housekeeping chores are not considered work therapy under any definition, but regular building maintenance responsibilities would be considered work requiring compensation. There remains a question of whether wages need be paid for work therapy which produces saleable items from which the patients themselves profit.] Lest AS 47.37.270(14) itself be subject to future litigation, I suggest that H.B. 182 mandate the Department of Labor to adopt regulations implementing H.B. 182. Presumably, these regulations will be consistent with 29 C.F.R. 529, and reflect input from programs utilizing work therapy concepts for their clients. The end result will give programs better guidance on when wages are required to be paid.

My proposed changes in Section 1 of H.B. 182 include a mandate for the development of regulations. The guidelines I have suggested are consistent with case law as it has developed under Section 14 of the F.L.S.A.

FEB 23

Finally, the impact of having to pay patients engaged in work therapy at least 50 percent of the minimum wage will be a slightly higher cost to the state than presently exists under the proposed terms of H.B. 182. Although it is now clear that the law requires the payment of wages, I am not convinced that influential members of SOADA and the legislature will meet this responsibility by budgeting sufficient funds for programs to meet this obligation without curtailing services. Last year, for instance, the Governor's Review Board on Alcoholism -- fully aware that clients would have to be paid wages for work therapy -- recommended a cut in the Nugen's Ranch budget exactly equivalent to the funds budgeted for client wages. It would be anomalous if the Legislature adopted H.B. 182, but residential treatment programs were not awarded sufficient increases in grant funds to pay even the subminimum wage. I have therefore proposed amendments in Section 2 to meet this concern.

In summary, I therefore make the following recommendations:

1. There is no need to add a purpose clause to H.B. 182, as I originally suggested, since it is now clear that the Fair Labor Standards Act, as amended, 29 U.S.C. 201, et seq., will apply to residential drug and alcohol treatment programs in light of the U.S. Supreme Court's denial of certiorari in Williams v. Eastside Mental Health Center, 669 F.2d 671 (11th Cir. 1982), cert. den., ____ U.S. ____, 51 U.S.L.W. 3340 (Nov. 2, 1982).

2. Amend Section 1 of H.B. 182 to read as follows:

> (b) (1) Participants in residential drug and alcoholism treatment programs may be paid less than the minimum wage prescribed in AS 23.10.050 - 23.10.150 for work therapy, as defined in AS 47.37.270, and at rates approved by the commission pursuant to this section.

FEB 23

(2) The commissioner shall promulgate relgulations regarding the payment of wages for work therapy. In establishing these regulations, the commissioner shall be guided by the following standards:

(A) Whether the work performed by the patient is that which is ordinarily carried on by patients in a residential treatment program and is not for the economic benefit of the program, but solely for the mutual benefit of the participants;

(B) Whether the work performed by the patient would ordinarily be performed by full-time employees of the program;

(C) Whether the work performed by the patient is work which may produce income to the patient, other than wages;

(D) The therapeutic benefit of the work to the patient, the skill required to perform the work, and the role work therapy plays in the patient's treatment plan;

(E) The impact of the wage scale on the program, considering its size, level of funding, and the therapeutic treatment services to be provided.

3. Amend Section 2 of H.B. 182 so that it reads:

Sec. 47.37.245 WAGES OF PATIENTS.

(a) Participants in residential drug abuse and alcoholism treatment programs shall be paid wages for work therapy, as defined in AS 47.37.270. The coordinator shall make sufficient grant-in-aid funds available to programs for this purpose.

(b) No part of the wage earned by the patient worker can be deducted for the cost of room, board or services. The program, however, after the payment of wages, may assess and collect the reasonable cost of treatment according to rates established in accordance with AS 47.37.240, and on the same basis as it assesses and collects from non-working patients.

(c) Wages earned by the patient worker may be held in trust by the program for the benefit of the patient, and disbursed by the program, with the patient's consent

(1) for the support of the patient's dependents,

(2) to pay a civil judgment,

(3) for the purchase of gifts, clothing, and items of personal use,

(4) to pay restitution or a fine,

(5) for other purposes deemed appropriate by the treatment program.

4. Amend Section 3 of H.B. 182 to read as follows:

Work therapy means an activity that involves a patient in basic employment skills and assists the patient in reintegration into a community, but does not include such activities as personal housekeeping chores or cooperative responsibilities ecpected of each patient in the program.

FEB 2

Finally, on behalf of my clients I want to thank you for all of your efforts in getting the legislation introduced. Your attention to the problems faced by many drug and alcohol treatment programs reflects your conscientious attitude toward your constituents.

I hope that my comments have been helpful. Please keep me apprised of developments with H.B. 182 and feel free to call if I can be of further assistance.

Sincerely,

REESE, RICE AND VOLLAND, P.C.

Revised, July 1, 1982
Read at A. Like 12/16/82
Revised 2/14/83
FEB 23 1983

tive shall, after considering all pertinent matters presented, mail a letter to the employer and, where appropriate, to the apprenticeship agency or the responsible school official, setting out that representative's findings of specific pertinent facts and conclusions and that representative's order concerning the proposed annulment or withdrawal. In proceedings instituted for annulment, the order may provide for withdrawal instead of annulment if the proof warrants such withdrawal but fails to support adequately the annulment. Such an order shall be deemed issued and effective according to its terms when mailed.

(Secretary's Order No. 16-75, dated Nov. 25, 1975 (40 FR 55913); Employment Standards Order No. 76-2, dated Feb. 23, 1976 (41 FR 9016))

[43 FR 28469, June 30, 1978]

§ 528.6 Review.

Any employer and, when appropriate, any apprenticeship agency or responsible school official, who expressed timely objection to the proposed action prior to issuance of an order of annulment or withdrawal may obtain review, limited to the question of whether the findings of fact support the order under the regulations in this part. Application for such review shall be in writing addressed to the Administrator and mailed within 15 days after the order is issued. The Administrator may affirm, modify, or reverse the order, or may remand it for further proceedings. The order under review shall not be stayed in effect pending such review. Any aggrieved person may obtain such review of an order entered in proceedings instituted under paragraph (c) of § 528.3.

[21 FR 5316, July 17, 1956, as amended at 22 FR 5683, July 18, 1957]

§ 528.7 Effect of order of annulment or withdrawal.

Except as otherwise expressly provided in such order, any order of annulment or withdrawal under paragraph (a) or (b) of § 528.3 shall be effective to terminate all certifications to which the regulations in this part apply in effect at the establishment where the cause for withdrawal arose or where the annulled certificate had effect. After such annulment or withdrawal, such employer shall be ineligible to obtain or exercise the privileges granted in such a certificate until he satisfies the issuing officer that he will not again give cause for annulment or withdrawal if a certificate is issued.

(Secretary's Order No. 16-75, dated Nov. 25, 1975 (40 FR 55913); Employment Standards Order No 76-2, dated Feb. 23, 1976 (41 FR 9016))

MEMO TO: Ramona Barnes

FROM: Dave Palmer House HESS Committee x3777

SUBJECT: HB 182

The attached opinion from Nugen's attorney states that due to recent decisions of the courts, it is clear that HB 182 will not withstand a legal challenge. Do you want to direct legal services to redraft HB 182 as a sponsor substitute or should we schedule hearings on the bill as it is presently written?

sent persons in *Haas* and *Schutten*, has absolutely no interest in the subject matter of the suit, i.e., the lease. Hence judgment against GNCC for cancellation of the lease and an accounting would have no effect, practical or otherwise, on Lowell Kramer. As a result, we conclude that his interest in this suit would not be prejudiced by his absence as a party.

The final consideration is whether, given Lowell Kramer's interest in the litigation, GNCC might be subject to multiple or inconsistent liability. As we noted above, only Challenge and GNCC have any interest in the lease; thus GNCC's liability can extend only to Challenge and in any case will be finally resolved in this suit. *Cf. Haas, supra* (judgment in favor of Haas without Glueck as a party could leave bank open to double liability should Glueck later win a separate suit against the bank). The only other possible prejudice to GNCC would arise if the corporation claimed indemnity from Lowell Kramer for all or part of its liability. Because, as explained above, Kramer would not be legally bound by a judgment in this case, GNCC could theoretically lose a later suit for indemnity against Kramer. GNCC, however, may protect itself against this possibility by impleading Lowell Kramer under Rule 14.[5] Consequently, GNCC also suffers no prejudice by the absence of Lowell Kramer. *See Smith v. State Farm Fire & Casualty Co.*, 633 F.2d 401, 405 (5th Cir. 1980).

Because Lowell Kramer does not fit any of the Rule 19(a) tests for persons who should be joined if feasible, he *a fortiori* is not an indispensable party under Rule 19. Accordingly, we reverse the district court's dismissal order.

REVERSED.

5. Such joinder would come under the ancillary jurisdiction of the court, so that the case could go forward despite lack of complete diversity. *E.g., Revere Copper & Brass, Inc. v. Aetna Casualty & Surety Co.*, 426 F.2d 709, 715 (5th Cir. 1970). The plaintiff, however, may not assert any claims against the third-party defendant which do not have an independent jurisdictional basis. *Owen Equipment & Erection Co. v. Kroger*, 437 U.S. 365, 98 S.Ct. 2396, 57 L.Ed.2d 274 (1978).

David R. WILLIAMS, Plaintiff-Appellant,

v.

EASTSIDE MENTAL HEALTH CENTER, INC., a corporation, Defendant-Appellee.

No. 81-7284.

United States Court of Appeals, Eleventh Circuit.

March 5, 1982.

Former employee of mental health institution brought action against employer to recover an award of back pay allegedly owed under the minimum wage provisions of the Fair Labor Standards Act. The United States District Court for the Northern District of Alabama, J. Foy Guin, Jr., J., 509 F.Supp. 579 entered judgment in favor of former employer and former employee appealed. The Court of Appeals, Tuttle, Circuit Judge, held that: (1) not-for-profit mental health institution created by a statutory mental health authority was not a state or political subdivision and thus not exempt from the Fair Labor Standards Act on that basis, and (2) even if state had chosen to operate the institution as a state agency, the institution was not performing an integral function of the state and it thus would not be exempt from the Act.

Reversed.

James C. Hill, Circuit Judge, filed a special concurring opinion.

1. States ⇐4.16

In determining whether a state sovereignty has been unduly and unconstitutionally impaired by federal regulations, court

should look to the nature of the entity being regulated, the extent of control which the state maintains over the activities and administration of the entity in question, the function of the entity being regulated, and the nature of the federal regulation involved.

2. Labor Relations ⇐1248

In determining whether the Fair Labor Standards Act may constitutionally be applied to the activities of governmental entity, principles established in NLRB cases involving the issue of whether a particular entity is a political subdivision and thus exempt from the provisions of the National Labor Relations Act are applicable. National Labor Relations Act, § 2(2) as amended 29 U.S.C.A. § 152(2); Fair Labor Standards Act of 1938, § 6, 29 U.S.C.A. § 206.

3. Labor Relations ⇐1249

Not-for-profit mental health institution created by a statutory health authority was not a state or political subdivision and thus not exempt from the Fair Labor Standards Act because, although it was subject to substantial state regulation, it was analogous to a normal nonprofit institution in its basic corporate structure. Fair Labor Standards Act of 1938, § 6, 29 U.S.C.A. § 206.

4. Labor Relations ⇐1249

Even if state had chosen to operate not-for-profit mental health institution as a state agency, that institution was not performing an integral function of the state and thus would not be exempt from the Fair Labor Standards Act. Fair Labor Standards Act of 1938, § 6, 29 U.S.C.A. § 206.

5. Labor Relations ⇐1248

The type of integral state functions which are exempt from Fair Labor Standards Act are those which a state performs for or in relation to the society at large or the state as a whole. Fair Labor Standards Act of 1938, § 6, 29 U.S.C.A. § 206.

Reeves & Still, Edward Still, Birmingham, Ala., for plaintiff-appellant.

Beate Bloch, Associate Sol., Gregory O'Duden, Atty., U. S. Dept. of Labor, Div. of Fair Labor Standards, Washington, D. C., for Secretary of Labor amicus curiae.

Frank O. Hanson, Jr., Birmingham, Ala., for defendant-appellee.

J. Fairley McDonald, III, Asst. Atty. Gen., Ala. Dept. of Mental Health, Montgomery, Ala., for Ala. Dept. of Mental Health amicus curiae.

Before TUTTLE, HILL and JOHNSON, Circuit Judges.

TUTTLE, Circuit Judge:

This appeal involves a suit brought by the plaintiff-appellant against his employer for an award of back pay allegedly owed pursuant to the minimum wage provisions of the Fair Labor Standards Act [FLSA], 29 U.S.C.A. § 206 (1978). The district court, 509 F.Supp. 579, held that under the principles set out in *National League of Cities v. Usery*, 426 U.S. 833, 96 S.Ct. 2465, 49 L.Ed.2d 245 (1976), the defendant-appellee was exempt from the FLSA's minimum wage provisions. For the reasons that follow, we reverse.

I.

The plaintiff David R. Williams was an employee at the Eastside Mental Health Center [Eastside] from February, 1977 until May, 1979. Williams worked in Eastside's Transitional Home Program. This program operates as a type of halfway house, providing psychological rehabilitation services for individuals recently released from state mental hospitals or persons who might otherwise be heading for commitment to a state mental hospital. Eastside hired Williams as a live-in home manager. He was required to work in 96-hour shifts, residing at the home for four days, followed by four days off. Eastside paid Williams a fixed salary, and considered him to be on duty 24 hours per day for the four working days. In fact he was required to be at the home during the four working days only from 5 p. m. until 8 a. m. the following morning.

During the day he was allowed to leave the home if he was not needed. As a home manager Williams' primary function was to oversee and assist the training of residents in basic socialization skills and some routine daily activities.

Sections 206 and 207 of the FLSA require all employers subject to the Act to pay employees a certain minimum wage for the first 40 hours worked in a given week, and one and one-half times the regular wage for any time worked over the 40-hour base. *See* 29 U.S.C.A. §§ 206, 207 (1978). There is some dispute in the record from the court below regarding the number of hours Williams worked during his employment at Eastside. Assuming the facts as alleged by the plaintiff, the losing party in the district court's summary judgment order, the salary Williams received during his entire employment at Eastside was about $27,000 short of the minimum required under the FLSA.

II.

We must begin by describing the development and character of the defendant-appellee in this case, the Eastside Mental Health Center.[1] The state of Alabama first began treating mental patients in its state hospitals in 1861. Up through the 1960's Alabama provided comprehensive mental health services in state institutions such as Bryce Hospital, Searcy Hospital, and Partlow State School. In addition the state helped fund some smaller community mental health centers.

In 1965 the State Department of Public Health completed a two-year, federally financed study to plan for statewide provision of mental health services. This study recommended the establishment of a network of smaller, but comprehensive mental health centers throughout the state. Subsequently the state passed legislation creating the Department of Mental Health [the Department], *see* Ala.Code § 22-50-1 (1977), and enacted specific legislation to govern the creation and operation of regional authorities to administer a network of community mental health centers. *See* Ala.Code § 22-51-1 (1977). All boards and corporations established pursuant to the provisions of this Act are statutorily designated as public corporations. Ala.Code § 22-51-2 (1977). The Department then divided the state into mental health regions, and established mental health authorities under section 22-51-2 to organize and administer the provision of services for each region.

In 1969 the Jefferson-Blount-St. Clair Mental Health Authority [hereinafter "the Authority" or "the Jefferson Authority"] was incorporated as a public corporation under section 22-51-2 as the Authority for coordinating mental health services in the three named counties. The Authority divided its region into four catchment areas each with a population of roughly 185,000 persons, and determined that adequate services could be provided if there were established one comprehensive mental health center in each catchment area. Three such centers were in fact created, one of which was Eastside Mental Health Center, the defendant-appellee in this case. The other two were the Western Mental Health Center and the University Mental Health Center. These latter centers were established as public corporations under section 22-51-2.

Eastside opened its doors as a community mental health center on July 15, 1974. It operated out of a building purchased with state, county and city funds. Unlike its counterpart centers operating within the three-county region, Eastside was initially opened as an unincorporated service unit for the Jefferson Authority wholly owned and operated by the Authority. The Western and University Centers subsequently lodged a complaint that there was a conflict of interest in the Authority operating a center that was competing for funds with

1. For reasons that are made clear below, see pp. 676-678 *infra*, the issue of state sovereignty upon which the case turns requires a consideration of the nature of the entity claiming sovereignty, as well as the nature of its chief functions.

the other two centers.[2] In response to this complaint, the Authority then incorporated Eastside as a separate, non-profit entity under the Alabama non-profit statute. *See* Ala.Code § 10-3-1 (1977).[3]

As a non-profit corporation, Eastside is structured similarly to most private, non-profit institutions. Eastside has its own articles of incorporation and set of by-laws. These govern the general structure and management of the center, including appointment of its administrative board of directors. This board is responsible for seeing that adequate funds, staff and equipment are provided for the Center. The board also sets all major policies of the Center. Finally the board selects, hires, and fires the administrative staff of the Center.

Under the by-laws there are 14 separate agencies responsible for appointing the 18 members of Eastside's board of directors. Four directors are appointed by the Jefferson Authority; the other fourteen directors are appointed by a mix of state or public agencies and private, non-profit organizations.[4] The parties in the present controversy stipulated in the district court that 10 of the appointing organizations should be considered as state or public entities and six as private, non-profit groups. The status of the remaining two was to be determined by the district court. The by-laws also provide that the Jefferson Authority must ratify the appointment of all board members, including those appointed by private organizations. There is no indication in the by-laws that any of the appointing agencies or the Jefferson Authority has the power to remove a board member once appointed.

So far as disclosed by the record, all board members are to be motivated solely by what they believe is best for the Center and its clientele. They are not expected to represent or vote for policies favoring their appointing agency. Thus as long as state regulations are not violated, the administration of the institution is not subject to the legal dictates of any "official" state agency or officer.

Eastside's relationship to the Jefferson Authority and to the State of Alabama in general is controlled partially by provisions in the by-laws and articles of incorporation, partially by state licensing standards, and partially by the contracts it maintains with various state agencies for the provision of mental health services to its catchment area. In addition, federal regulations prescribe certain of the Center's activities, as Eastside receives about 38 percent of its funds from the federal government.

All mental health centers in Alabama, including Eastside, are subject to considerable state monitoring. Eastside must comply with the state's Standards for Community Mental Health Centers or be subject to revocation of its certification. Changes in the Center's articles of incorporation or by-laws must be approved by the Jefferson

2. Although the record is not clear on this point, it appears that the Jefferson Authority had some control over the dispersal of state funds to the three mental health centers in its region.

3. The court below determined that Eastside could not be established as a public corporation under section 22-51-2 because the community mental health centers statute allows only one public facility per county, and another center had already filed for incorporation "in the three-county area of Jefferson, Blount and St. Clair." *See* Mem. Op. filed March 24, 1981. Admittedly it is not clear how the statutory maximum had been reached if only one center had applied in a three-county area. Apparently each of the three entities, the Authority, and Western and University Mental Health Centers, had filled the statutory quota for each of the three counties.

4. The Health Departments of Jefferson, Blount, and St. Clair counties appoint one member of the board in rotation; similarly, the three counties' Departments of Pensions and Security, and the three counties' Associations for Retarded Citizens, each appoints one member in rotation. In addition the three County Commissions each appoints a member, the three appointees serving concurrently. Finally, the following agencies and organizations each appoints one board member: the Birmingham City Council, the Council for Exceptional Children, the Baptist Medical Center, the Hill Crest Foundation, Inc., the East End Memorial Hospital Association, the Mental Health Association of Jefferson County, the Occupational Rehabilitation Center, and the Birmingham Regional Health Systems Agency.

Authority. The Authority must also approve the Center's budget. Eastside is subject to auditing by both state and federal officials, and state examiners conduct frequent site visits to inspect its operations. Eastside also participates in Alabama's State Retirement System, and is exempt from state sales taxes. Finally, upon dissolution of the corporation, the articles of incorporation provide that all of Eastside's assets are to vest in the Jefferson Authority.

Eastside's general purpose is to provide comprehensive mental health and mental retardation services to a prescribed geographic area. The Center provides both inpatient and outpatient care, emergency care, consultation and educational services, as well as specialized services for children, elderly persons, and persons with alcohol or drug-related problems. In addition the Center runs the Transitional Home Program for people going to or about to return from a state hospital. The Center assists the local probate court in screening persons for state institutions. Finally, the Center provides some services for adult mentally retarded individuals. Some of these programs involve psychotherapeutic counseling, as well as prescribed medicine treatments. Eastside provides each of the services through contracts with schools, hospitals, nursing homes, or some other state facility or agency.

At present there are 25 community mental health centers in the State of Alabama. Twenty of these Centers are public corporations under Ala.Code § 22-51-2; two are operated directly by local governmental bodies. The remaining three are section 10-3-1 nonprofit corporations such as Eastside Mental Health Center.

III.

The defendant-appellee Eastside Mental Health Center claims exemption from the minimum wage provisions of the FLSA under the principles set out in the case of *National League of Cities v. Usery*, 426 U.S. 833, 96 S.Ct. 2465, 49 L.Ed.2d 245 (1976). Appellee asserts that the *Usery* case requires FLSA exemption for all state or public agencies performing traditional government functions. The appellee argues that because Eastside is so thoroughly allied with the State of Alabama, and furthermore because it is engaged in an ordinarily governmental function, namely, the provision of mental health services to the public, the *Usery* test has been satisfied and exemption is appropriate. We disagree with appellee's understanding of *Usery* and its corollary principles, and for the reasons that follow we hold that Eastside should not be exempt from the FLSA.

The overriding constitutional concern faced by the court in *Usery*, and thus by this Court in the present case, is the problem of affixing a clear and workable boundary between the two sovereignties in our federal system. The problem is amplified as always by the necessity that the result adhere to the facts before us while at the same time serve as a clear guide for future applications. And most importantly we are faced with the task of reaching a determination that is consonant with constitutional precedents.

The existing precedents make clear that the notion of state sovereignty is as important to a truly federal system of government as it is hard to define, let alone pigeonhole into any one constitutional provision. At least since the case of *McCulloch v. Maryland*, 17 U.S. (4 Wheat.) 316, 410, 4 L.Ed. 579 (1819), the Court has recognized that state and federal powers must be preserved in a delicate equipoise in a federal system such as we have. The need for this balancing of state and federal power "rests on the conviction that each government, in order that it may administer its affairs within its own sphere, must be left free from undue interference by the other." *Metcalf & Eddy v. Mitchell*, 269 U.S. 514, 523, 46 S.Ct. 172, 174, 70 L.Ed. 384 (1926) (citing *McCulloch v. Maryland*, 17 U.S. (4 Wheat) 316, 4 L.Ed. 579 (1819)). There exist certain constitutional provisions that emphatically, though perhaps ambiguously, address the necessity of protecting the sovereignty and power of the individual state

governments. *See Hans v. Louisiana*, 134 U.S. 1, 21, 10 S.Ct. 504, 509, 33 L.Ed. 842 (1890) (Eleventh Amendment protects states against unconsented suits even if they arise under the Federal Constitution or laws of the United States); *Hodel v. Virginia Surface Min. & Rec. Ass'n*, 452 U.S. 264, 101 S.Ct. 2352, 69 L.Ed.2d 1 (1981) (Tenth Amendment contains limits on federal power to regulate states as states).[5]

Resort to specific constitutional provisions, or even individual case precedents, is nevertheless inadequate to a determination of the proper balance to be struck between the state and federal sovereignties. "Experience has shown that there is no formula by which the line may be plotted with precision in advance." *Metcalf & Eddy v. Mitchell*, 269 U.S. at 523, 46 S.Ct. at 174 (1926). Indeed such an approach is apparently inappropriate. In the most recent judicial attempt to determine the appropriate state-federal relationship, the Court in the *Usery* case relied upon a wealth of case precedents involving issues ranging from intergovernmental tax immunity, to federal regulation of commerce, to state control over the location of its state capitol. *See Metcalf & Eddy v. Mitchell*, 269 U.S. 514, 46 S.Ct. 172, 70 L.Ed. 384 (1926); *United States v. California*, 297 U.S. 175, 56 S.Ct. 421, 80 L.Ed. 567 (1936); *United States v. Darby*, 312 U.S. 100, 61 S.Ct. 451, 85 L.Ed. 609 (1941); *Coyle v. Oklahoma*, 221 U.S. 559, 31 S.Ct. 688, 55 L.Ed. 853 (1911). In line with the *Usery* precedent, we thus feel it appropriate, indeed constitutionally incumbent upon us, to look to a range of case sources interpreting a variety of constitutional provisions and penumbras in determining how to strike the proper balance in the present case.

[2] In determining whether a state's sovereignty has been unduly and unconstitutionally impaired by federal regulation, the courts have in the past considered several factors. First, they have looked to the nature of the entity being regulated. In *Usery* the Court acknowledged that attributes of state sovereignty emanating from the federal structure of our government put the states on a different footing from purely private entities with respect to federal regulation of their activities. Citing *Coyle v. Oklahoma*, 221 U.S. 559, 31 S.Ct. 688, 55 L.Ed. 853 (1911), the Court in *Usery* declared that even some affirmative grants of constitutional power to the federal government must be limited when national regulations directly affect a state or its political subdivisions in carrying out normal governmental activities. *National League of Cities v. Usery*, 426 U.S. at 845, 855–56 n.20, 96 S.Ct. at 2471, 2475–76 n.20 (1976).

Of course the determination that a regulation affects a state or its political subdivision is not always a simple one to make. There exist many public or quasi-public agencies the status of which, for purposes of determining a state sovereignty question,

5. The ambiguity of Tenth Amendment case law is merely coextensive with the ambiguity of its language. *Compare United States v. Darby*, 312 U.S. 100, 61 S.Ct. 451, 85 L.Ed. 609 (1941) (Tenth Amendment states but a truism), *with Fry v. United States*, 421 U.S. 542, 547 n.7, 95 S.Ct. 1792, 1795 n.7, 44 L.Ed.2d 363 (1975) (Tenth Amendment declares policy that Congress may not exercise power so as to impair the states' integrity or their ability to function effectively in a federal system), *National League of Cities v. Usery*, 426 U.S. 833, 842, 96 S.Ct. 2465, 2470, 49 L.Ed.2d 245 (1976) (relying on Tenth Amendment case precedents to strike down FLSA as applied to state and municipal governments), *and Hodel v. Virginia Surface Min. & Rec. Ass'n*, 452 U.S. 264, 289, 101 S.Ct. 2352, 2366, 69 L.Ed.2d 1 (1981) (citing Tenth Amendment as embodying certain limits on federal Commerce Clause regulations).

Even Eleventh Amendment jurisprudence suffers from substantial confusion and complexity. For example, the principle of state immunity from unconsented suits has been qualified or at least restricted by a countervailing principle distinguishing suits against a state from suits against an individual officer of the state. The latter type of suits, at least in some circumstances, is not barred by the Eleventh Amendment. *Compare Ex Parte Young*, 209 U.S. 123, 28 S.Ct. 441, 52 L.Ed. 714 (1908) (establishing equitable cause of action against state officers in their individual capacities notwithstanding Eleventh Amendment) *with Edelman v. Jordan*, 415 U.S. 651, 94 S.Ct. 1347, 39 L.Ed.2d 662 (1974) (qualifying Ex Parte Young in situations where remedy requires payment of state funds as compensation for past damages).

is not easy to characterize. Frequently the courts have faced similar classification problems when deciding cases in the areas of state action doctrine, *see, e.g., Evans v. Abney*, 396 U.S. 435, 90 S.Ct. 628, 24 L.Ed.2d 634 (1970), § 1983 litigation, *see, e.g., Adickes v. Kress & Co.*, 398 U.S. 144, 90 S.Ct. 1598, 26 L.Ed.2d 142 (1970), and Eleventh Amendment sovereign immunity questions, *see, e.g., Edelman v. Jordan*, 415 U.S. 651, 94 S.Ct. 1347, 39 L.Ed.2d 662 (1974).[6]

At issue in *Usery* was the constitutionality of the Fair Labor Standards Act when applied to wages paid by state and subordinate political subdivisions to their employees. The Court held that this would seriously impair the right of the state to carry out its normal functions. It was only the payment of wages by *state or subordinate political bodies* that was involved there.[7] The Court in *Hodel v. Virginia Surface Min. & Rec. Assn., supra*, interpreted *Usery* as requiring that, *inter alia*, the federal regulation in question must address the "States as States" in order for there to be an infringement of state sovereignty. *Hodel v. Virginia Surface Min. & Rec. Assn.*, 101 S.Ct. at 2366 (1981).

[2] Beyond that we think the relevant inquiry is the extent of control the states maintain over the activities and administration of the entity in question. Indeed it seems to us appropriate to borrow from principles established by the court in NLRB cases involving the issue of whether a particular entity is a political subdivision and is therefore exempt from the provisions of the National Labor Relations Act, 29 U.S.C.A. § 152(2) (1973). *See NLRB v. Natural Gas Utility Dist.*, 402 U.S. 600, 91 S.Ct. 1746, 29 L.Ed.2d 206 (1971).[8] In *NLRB v. Natural Gas*, the Court in a close case considered relevant whether the entity seeking exemption was administered by individuals responsible to public officials or to the general electorate. *Id.* at 605, 91 S.Ct. at 1749–50. Although these cases turn on the construction of the Labor Relations Act and not on constitutional considerations of state sovereignty, we find them helpful in our inquiry, and until the Court holds otherwise we will adopt this approach.

Second, in deciding cases involving possible federal infringement of state sovereignty, the courts have assessed the function of the entity being regulated. In *Usery* the Court repeatedly emphasized that the FLSA directly affected a function that was traditionally a governmental activity, namely, the structuring of wage and hour policies. *National League of Cities v. Usery*, 426 U.S. at 845–46, 851–52, 96 S.Ct. at 2471–72, 2474 (1976). The Court alternately characterized this function as traditional, essential, fundamental, and integral. *Id.* at 845, 851, 96 S.Ct. at 2471, 2474. The Court listed several other functions that could be so characterized, including fire prevention, police protection, sanitation, public health, and parks and recreation. *Id.* at 851, 96 S.Ct. at 2474. Moreover, in overruling *Maryland v. Wirtz*, 392 U.S. 183, 88 S.Ct. 2017, 20 L.Ed.2d 1020 (1968), the Court

6. The Court in neither the *Usery* nor the *Hodel* case had to face this issue, as the nature of the regulated entities was not disputed in either case. In *Usery* many states were party to the suit, and the issue was whether the FLSA as applied directly to the states was within Congress' powers. *National League of Cities v. Usery*, 426 U.S. at 854, 96 S.Ct. at 2475 (1976). Similarly in *Hodel* the states were parties, and the Court did not question their status as states, but rather doubted that the states were being directly regulated by the federal government. *Hodel v. Virginia Surface Min. & Rec. Assn.*, 101 S.Ct. at 2366 (1981).

7. That subordinate bodies are included in the *Usery* exemption is a principle which derives from explicit language in the opinion, as well as by implication, at least insofar as the term relates to "such areas as fire protection, police protection, sanitation, public health, and parks and recreation." *National League of Cities, supra*, 426 U.S. at 851, 96 S.Ct. at 2474. The opinion specifically included "political subdivisions" as entities for which classification of sovereignties is appropriate. *Id.* at 855, n.20, 96 S.Ct. at 2476, n.20. Additionally, the Court mentioned state schools, hospitals, and other "subordinate arms of state government" as properly labelled sovereigns. *Id.*

8. We base our analogy to the labor cases on the simple fact that the precise term "political subdivision" is used in both the *Usery* case and the NLRB cases.

implicitly included the operation of public schools and hospitals as traditional functions of the states. 426 U.S. at 855, 96 S.Ct. at 2476. In *Hodel*, the Court listed the traditional nature of the function involved as the second condition precedent to a finding that a state's sovereignty has been constitutionally infringed by federal regulation. *Hodel v. Virginia Surface Min. & Rec. Ass'n*, 101 S.Ct. at 2366 (1981).

The third and final indicium of state sovereignty frequently considered by the courts is the nature of the federal regulation involved. The Court in *Usery* discussed at length the effects on state government operations that would result from application of the FLSA. The Court focused on the significant costs, both in terms of money and in terms of necessary restructuring of employment operations, that states would have to bear if forced to comply with the FLSA. *National League of Cities v. Usery*, 426 U.S. at 846–51, 96 S.Ct. at 2471–74 (1976). Similarly in *Fry v. United States*, the Court cited the unintrusive nature of the Economic Stabilization Act as a primary reason for upholding its application to state employees. *Fry v. United States*, 421 U.S. at 548, 95 S.Ct. at 1796 (1975). Finally, in the intergovernment tax immunity cases, the Court has been guided by an assessment of the interference with state government functioning. *See Helvering v. Gerhardt*, 304 U.S. 405 at 419–20, 58 S.Ct. 969 at 974–75, 82 L.Ed. 1427 (1938).

IV.

Before applying the foregoing principles to the facts of the case before us, we may well benefit from a quick study of Immanuel Kant's On the Old Saw: That May be Right in Theory but it Won't Work in Practice (E. B. Ashton trans. 1974). Precise legal guidelines easily applicable to particular fact situations do not exist in cases such as this involving broad constitutional concepts such as that of sovereignty. As will become clear shortly, our job is compounded in this case by the borderline nature of the facts before us. Nevertheless we are convinced that upon a consideration of all the factors, on balance it seems clear that Eastside is not and should not be treated as a sovereign entity in our federal system.

[3] The determinative fact in this case is simply that the entity with which we are dealing is not a state or a political subdivision of a state as defined by the Court in *Usery* and in other cases involving similar issues. Eastside Mental Health Center is not the State of Alabama, nor is it an agency or department of the State of Alabama. Indeed no party contends otherwise.

Moreover as it currently exists under Alabama state law, Eastside is not a public agency or corporation. As was noted earlier, the Center is incorporated as a non-profit institution under section 10–3–1, rather than as a public corporation under section 22–51–2 of the Alabama Code. The Center is in fact distinct from many of the other community mental health centers operating in the State of Alabama in precisely this regard. For whatever reason, Alabama did not elect to operate Eastside as a state institution with state employees; instead it set up a not for profit corporation with a separate, independent board of directors to administer it. Whatever may have been the state's reason for doing it this way, it must live with the consequences. It cannot claim an immunity based on a condition which it itself sought to avoid.

Here, then, lies the greatest difference between *Usery* and the facts of this case. Here we are concerned with application of the FLSA wages paid by a not for profit corporation which operates by contract with a public corporation of the State of Alabama and by contract with other entities. There is thus no impact on the state in its relation with its own employees. Thus, the FLSA does not affect the "States as States."

For such reasons as were satisfactory to it, the State of Alabama elected not to employ any persons to operate institutions performing such services as are performed by Eastside. By making this election it removed the agency from the protection of the Tenth Amendment as delineated in

Usery and *Hodel*. Instead, certain individuals organized a corporation under the general legislative authorization used by other citizens to organize all educational, religious and other eleemosynary institutions, which thereafter contracted with Jefferson, itself an independent corporation, to carry out these functions.

For purposes of the sovereignty issue before us, Eastside is thus best characterized as a private, non-profit corporation, licensed in the State of Alabama to perform the services of a community mental health center, and carrying out such services by means of ordinary contracts with various state and local agencies and institutions. It is thus analogous to a normal nonprofit institution in its basic corporate structure, while at the same time analogous to a private business doing contracting work for the state in its basic business operations.

Although the Center is subject to substantial state regulation, this fact does not change our characterization. With respect to the state licensing regulations, we find it difficult to distinguish Eastside from a variety of private corporations and professional individuals that are subject to similar state control pursuant to licensing statutes. Such controls are normal means by which states effectuate public policies through the regulation of private entities. These licensing controls do not, however, somehow magically transform the fundamental nature of the licensed entity into a public agency or official.

The additional control exerted by the Jefferson Authority over Eastside's budget, board of directors, and residual assets upon dissolution, are not so significant as to justify characterizing the Center as an arm of the state. With respect to the board of directors, not only does the State of Alabama not have control over the appointment of nearly one-half of the board membership, in addition it has no power whatsoever to dismiss any of the board appointments. Members of the board do not serve as representatives of the state or any of its agencies. For this latter reason it is clear that no member of the administrative board is directly responsible to a public official or to the general electorate. Under the test set out in *NLRB v. Natural Gas Utility Dist.*, 402 U.S. 600, 91 S.Ct. 1746, 29 L.Ed.2d 206 (1971), this factor indicates that Eastside is not a political subdivision of the State of Alabama. The other controls, while perhaps uncommon in the context of normal private corporations contracting with the states, must be viewed simply as stringent licensing standards necessary to the effective implementation of the state's police power in the mental health arena.

If the State of Alabama chooses to foster the provision of mental health services by allowing Eastside and similar mental health centers certain fringe benefits, including sales tax exemption and participation in the State Retirement System, this does not mean that Eastside should be viewed as an arm of the state. Alabama either provides or legally may provide similar benefits to entities that are declaredly not public agencies.[9]

[4] Our conclusion that the Eastside Mental Health Center is not a state agency or a political subdivision of the state is sufficient under the *Hodel* test for us to hold that it may not be exempt from the FLSA. Just as in *Hodel*, we need not reach the other factors in the sovereignty test if we initially find, as we do here, that the entity with which we are dealing is not a state. *See Hodel v. Virginia Surface Min. & Rec. Ass'n*, 101 S.Ct. at 2369 (1981). For this reason it is not necessary for us to consider the extent of the FLSA's effect on Eastside's function of granting mental health services, nor need we decide whether such function is traditional or essential. In

9. The State of Alabama does in fact grant sales tax exemption to many other private businesses. *See* Ala.Code § 40 23-4 (1975). In addition, membership in the State Retirement System is not limited to state agencies, as it is also available to employees of a "public or quasi-public organization." *See* Ala.Code § 36-27-6 (1975). Assuming Eastside is considered a quasi-public organization, it may participate in the retirement system and yet still not be a state or public agency within the meaning of the term as used in the *Usery* case.

view of the significance of the term "integral" used in the *Usery* opinion, however, we think it important to briefly discuss the application of this concept to the facts of this case. In short we believe that even if the State of Alabama had chosen to operate Eastside as a state agency, the Center is not performing an "integral" function and thus the *Usery* exemption would not apply.

In *Usery* the Court used the term "integral" to define the nature of a state operation that is protected by considerations of sovereignty. "We hold that insofar as the challenged amendments [of the FLSA] operate to directly displace the States' freedom to structure integral operations in areas of traditional governmental functions, they are not within the authority granted Congress by Art. 1, § 8, cl. 3." 426 U.S. at 852, 96 S.Ct. at 2474 (1976) (footnotes omitted).[10]

[5] Dictionary definitions indicate that the adjective "integral" signifies something that is a part of or is in itself a whole. *See Webster's New International Dictionary* 1290 (1936). We think an integral function is in this context one that a state performs for or in relation to the society at large, the state as a whole. One such function is the state's taxing power; another is the state's function of enacting laws for the public good through its legislative body. For purposes of determining whether a particular function is "integral" in the context of sovereignty decisions such as the one before us, we think it therefore helpful to look at whether the federal regulation in question affects a state function in a way that reverberates throughout the society as a whole.[11] For example, any interference with a state's provision of police protection to its citizenry, or its ability in general to pass laws in its legislature, clearly affects all people in the state. Such integral functions may be contrasted with those that, while perhaps traditional, are nevertheless not functions which relate to the entire state populace. An example of a non-integral function is a state's enactment of particular regulations addressing specific problems such as water usage, farming, railroads, utilities, etc. Even though such functions may have been traditionally carried out by the state, federal regulation thereof is not prohibited because the functions do not produce significant consequences affecting all persons in the state and thus are not, in our definition of the term, "integral" functions.[12]

With these principles in view, we find that Eastside's function of providing mental health services to the citizens of Alabama is

10. We believe that the term "integral" relates to the nature of the state function to be given sovereign protection. Admittedly the Court in *Usery* appears in the quoted passage to differentiate an "operation" from a "function." It may be said that the phrase "integral operation" refers to the manner in which the state chooses to carry out its traditional function, including the state's structuring of its wage policies for those employees carrying out such functions. Here the term "integral" would refer both to the fact that the setting of wage policies is *crucial* to the state's ability to carry out effectively a particular function, and to the fact that such policies affect the *whole* of the state's operations, in this case, all employees of the state. Under this view, it is of course true that any case such as the one before us involving the application of the FLSA to what is arguably a state entity involves an interference with the state's ability to structure its *integral* operations. In our opinion, however, the term "integral" also applies to the type of governmental function that is to be protected under a concept of state sovereignty.

At least one commentator agrees that the term "integral" is used in *Usery* to modify the type of state function involved. *See* Note, Taking Federalism Seriously: Limiting State Acceptance of National Grants, 90 Yale L.J. 1694, 1708 (1981). *See also, National League of Cities v. Usery*, 426 U.S. at 851, 855, 96 S.Ct. at 2476, (using phrase "integral governmental functions").

11. It bears noting that in this respect a determination of whether a function is integral requires an assessment of the effect of the federal regulation, which is in fact the third factor which the courts have considered in making sovereignty determinations. *See* pp. 678–679 *supra*.

12. Under our test regarding integral functions, the Court in *Hodel* could have easily found that the function of regulating the mining industry, while perhaps traditional, as the state parties argued, was nevertheless nonintegral because the federal interference did not affect the entire state citizenry.

comparitively inexpensive cost for establishing the long term alcoholism rehabilitation program so desperately needed in this state.

Secondly, the program may confront increased operational costs because of an obligation to pay clients at the facility a minimum wage while engaged in what is called "work therapy." The therapeutic design for Nugen's Ranch involved a scheme whereby clients, as part of their daily routine, would be involved in gardening, raising livestock, greenhouse activities, minor renovations on the facility, and the like. The program feels strongly that chronic alcoholics get no benefit from simply being "warehoused" at an institution for a period between six months and two years. Clients must be actively engaged in activities which will increase their health, occupy some of their time, and train them in minimal employment skills that can be helpful with their eventual reintegration into their community. This work therapy, when combined with traditional forms of counseling, should result in a high rate of success in treating chronic alcoholism.

But my analysis of state and federal law indicates that the program may be under an obligation to pay clients at least a minimum wage while engaged in the work therapy. For reasons that are not clear, state regulations pursuant to the Alaska Wage and Hour Act specifically exclude alcoholism and drug treatment programs from provisions which would otherwise enable the program to pay less than a minimum wage to clients. None of the specific exclusions of the Alaska Wage and Hour Act provide exceptions for long-term treatment facilities to pay clients less than a minimum wage. Because Alaska has not specifically identified this area of labor law as an issue of particular state concern, it is likely that federal law, in addition to state law, will require the payment of minimum wages. I have already provided SOADA with a detailed legal analysis of this problem, and am willing to provide you with a copy if you wish.

The impact on the program and the state is significant. Even with clients working only a few hours per day, the yearly cost of the program to pay a minimum wage to clients engaged in work therapy is estimated to be in excess of $230,000 per year. This adds a substantial cost to the operation of the program on a yearly basis.

The solution to this problem may be in a legislative amendment to the Alaska Wage and Hour Act exempting patient workers in residential drug and alcoholism treatment programs from the coverage of the statute, and an amendment to the Uniform Alcoholism Intoxication and Treatment Act

which would permit the payment of a sub-minimum wage to clients who are engaged in work therapy projects. I do not know whether legislation of this nature could be accomplished this session, and we look for your direction on this issue.

All of this is to say that the program needs your continued support on alcoholism monies this session, and assistance in possible legislative solutions to some of the problems already identified. The Ranch has been receiving strong and continued support from residents and organizations in the Mat-Su Valley, and we urge your continued support also.

You are more than welcome to call or write me if you have any questions.

Sincerely,

REESE, RICE & VOLLAND, P.C.

Philip R. Volland

cc: Leonard & Henrietta Nugen

The second problem with the current scheme is that it has no provisions for addressing the problem of the Department withholding a decision with respect to a pending grant application. In The Studio Club's situation, the grant for FY '82 had not yet been awarded. Therefore, the program had not entered into a contractual relationship with the agency, and there was no grant to suspend, nor was the pending grant ever denied. All that happened was that SOADA decided to "put on hold" any transactions related to the FY '82 grant application.

Undoubtedly, the program could have pursued remedies in court to secure certain protections during the process of review. But that is an illusory remedy for a non-profit organization that depends entirely on state funding. The program simply had no funds to finance the litigation that would have been necessary to prevent the kind of administrative abuse that the program never expected to happen in the first place.

It would appear to me that regulations could be adopted pursuant to 7 AAC 78.010 et seq. to provide the kind of procedural protections that I have listed above. This would certainly happen if the legislature amended AS 47.37 to mandate the appropriate regulations.

B. The Payment of Wages to Patient Workers

An entirely separate and unique issue to the program is the question of its legal obligation to pay clients a minimum wage for activities performed during "work therapy." As you recall, the scheme of Nugen's Ranch involves client activities in gardening, greenhouse work, housecleaning, and renovation work on the facility.

Although the question seems straightforward, the answer is not. I have enclosed with this letter my legal memorandum to SOADA outlining the results of my research. I encourage you to read it so that you can get a complete understanding of the various issues involved.

Current state and federal law clearly suggests that patient workers be paid a minimum wage. This is understandable in light of the fact that the case law developed from wholesale institutional abuses of clients in mental institutions who were required to perform work of questionable therapeutic value. But viewed from the program's perspective, this obligation makes little sense. First of all, the economic impact on the program is tremendous. Our estimates are that the increased operational costs for Nugen's Ranch for paying minimum wages to 48 clients

for only a few hours of work per day amounts to $230,000 annually. This is without an analysis of fringe, overhead costs, and the possible necessity to add additional clerical help to handle the administrative burden related to the payroll.

But the more important concern is the therapeutic value of the work to clients at the Ranch. It is in this area where the work therapy program planned for the Ranch differs from the activities normally required of patient workers in other institutions.

The program's treatment philosophy starts from the premise that it makes no sense to have clients sit around for two years while going through a long period of sobriety. The health of a chronic alcoholic has often deteriorated, and physical activity is necessary to restore this health. Equally true is the fact that a typical long-term inebriate has become a public pariah who lacks self-esteem, motivation, self-worth, and the most minimal of job skills. Work therapy can enable that individual to regain self-confidence and acquire some skills. And anyone in the treatment field will tell you that an alcoholic who has just recently stopped drinking needs something to occupy the time and energy that was once spent drinking. If nothing else, the work therapy helps keep the alcoholic from drinking by keeping him busy.

Unfortunately, the law does not address the different therapeutic values that work therapy holds for recovering alcoholics and drug addicts compared to patient workers in other kinds of institutions. The law simply applies an "economic reality test" as the rubric for when clients are to be paid the minimum wage. By definition, however, almost any form of work therapy will arguably meet the economic reality test and therefore require the payment of wages.

The options open to the program are not especially attractive. If the work therapy concept is scrapped because of the economic cost to the program, the Ranch will find itself stripped of a treatment technique which is critical to the success of the program. If the Ranch is compelled to divert substantial operational funds each year for the payment of client wages, other equally important aspects of the program - renovation, staff salaries, administration, etc. - will suffer.

The legal authority for the program to recoup wages paid to clients by charging them a higher fee for their cost of care amounts to a scam that has no practical or therpeutic value. The program would simply be "paying" clients with one hand, and taking it back with the other. This kind of charade to meet the requirements of the law would only serve to generate client resentment toward the program.

The program is not suggesting that the clients be paid no wages at all. Rather, it hopes to pay the clients some form of compensation so that each client can have his or her own money to use for the purchase of incidentals and gifts during treatment, and also be able to build up a reserve fund to be used at the time of release from treatment. All the program is asking for is relief from the obligation to pay each client $3.85 per hour.

I believe that this can be accomplished by an amendment to the Alaska Wage and Hour Act which would exempt drug and alcoholism centers from the obligation to pay a minimum wage to patient workers. I also believe it would be appropriate to amend the Uniform Alcoholism and Intoxication Treatment Act by adding a new section which would authorize the Department to fund programs for work therapy projects, including monies to pay a certain minimal compensation to clients (less than $1.00 per hour I would think). HL 194 currently contemplates an analogous institutional employment scheme for state prisoners and it might be possible to pay residents in long-term treatment centers at the same rate.

If these amendments are considered, it would be essential to include language stating that the legislation serves an important and exclusive state function (the treatment of alcoholism through funding to private, non-profit programs). This language, I believe, would protect the program from the application of the Fair Labor Standards Act by virtue of the holding in National League v. Usury.

Unfortunately, this entire problem regarding the payment of wages to clients just recently surfaced. I realize the practical problems of seeking these amendments this late in the legislative session. Please let me know if you see any way of obtaining the relief before the session ends.

MEMORANDUM

TO: Governor's Review Board on Alcoholism

FROM: Philip R. Volland, Attorney for
Alaska Alcoholism Rehabilitation Services, Inc.

DATE: May 25, 1982

RE: Payment of Wages to Clients
Engaged in Work Therapy at Nugen's Ranch

In the program's FY '83 grant application, and SOADA's review of the funding request, reference has been made to the allocation of funds for clients engaged in work therapy at Nugen's Ranch. This memorandum has been prepared in order to assist you in evaluating the projected costs of work therapy at the facility.

As you are aware, an essential component of the treatment philosophy at Nugen's Ranch is to have clients there engage in a form of "work therapy." The work therapy is designed to provide clients with basic learning, life, and employment skills; to enhance the clients' sense of belonging at the facility; and to prevent the "warehousing" of clients over a long period of time. Work therapy projects for each client will be tailored to the client's individual treatment plan. Originally, the work therapy project was designed to involve clients in the final renovation of the facility (painting, laying carpet, etc.), as well as to involve them in gardening activities, the raising of livestock, etc.

The work therapy plan that was proposed for the Ranch raised a legal question of whether or not clients should be paid for their work. After a review of this question by my office, and the office of the Attorney General, it was concluded that the Alaska Wage and Hour Act (AS 23.10.050-150) and the the Fair Labor Standards Act, (29 USC 201 et seq.), required that clients be paid the statutory minimum wage ($3.85) per hour) for certain work (e.g., renovations), but not for other work (such as general housekeeping). Although I disagreed with the Assistant Attorney General's conclusion about paying clients for "farming" activities, it was clear that the program would have to budget monies for the payment of clients engaged in work therapy, particularly if the work resulted in any consequential economic benefit to the

program. Without discussing the legal aspects of this particular problem in detail, I will simply note that the issue presents some far-reaching implications for residential drug and alcoholism treatment programs which involve clients in work therapy. I have at my disposal and will provide to any interested Review Board members copies of the legal opinions prepared on the issue by myself and by Linda Scocsia, Assistant Attorney General.

The uncertainty surrounding this issue presented a unique planning problem for the program this year. Because of the original plan to engage clients in a variety of work therapy, including renovation of the facility, and because the legal questions about payment were yet unresolved, the program submitted a grant request sufficient to cover the payment of wages for all anticipated work therapy. At the same time, the program pursued the alternative of complete renovation of the facility by a general contractor and the elimination of renovation work from the client work therapy plan. Both alternatives had to be pursued while awaiting a response from the Attorney General's office. As a consequence, the FY '83 grant request includes approximately $235,000 for client wages even though the renovation contract for the facility calls for the completion of all finish work in the main building. Nonetheless, a sufficient amount of grant funds need to be allocated to the program to cover those work therapy activities which do require the payment of wages.

The program hopes to redesign its work therapy program so as to involve clients in activities which can provide the benefits of personal labor, but which will not require the payment of the statutory minimum wage. For instance, it is anticipated that clients could raise crops and bedding plants in a greenhouse for sale to the community, not be paid an hourly wage for this work, but yet retain the proceeds from sale in a special fund reserved exclusively for the benefit of clients. The program also intends to pursue legislative amendments to the Alaska Wage and Hour Act next year in order to provide a clarification of the current state of the law and enable drug and alcohol programs to fully fund work therapy projects.

None of this is to suggest that the program is opposed to paying clients a wage for the work they perform during work therapy. Rather, the payment of wages to clients has its own inherent therapeutic value -- it assists in the enhancement of personal pride and dignity and permits clients to manage their own finances. But the payment of a statutory minimum wage for all work therapy presents a significant economic cost to the program that threatens the development of successful work therapy projects unless adequate funds are provided. Hopefully, the problem can be resolved during the coming year.

Your evaluation of the program's request for grant funds to cover client wages should be made in recognition of the fact that this issue is yet unresolved, and that the work therapy program employed at Nugen's Ranch may not incur the expenses originally estimated by the grant request.

Detail Bill Analysis House Bill 182

Under this bill a large segment of the work force currently entitled to full coverage for minimum wage would no longer be covered, and as a result the Department of Labors' work load to ensure workers are not abused and unfair trade practices do not occur would be increased.

The Department will require one Wage and Hour Investigator located in Anchorage to handle the additional workload. In addition, a Clerk Typist II will be necessary to lend the investigator support and free the position to make field calls.

Assumptions:

Effective date of July 1, 1983
6% per annum inflation rate
Equipment cost in FY 1984 is a one-time item

Potential for 22 separate programs that will require monitoring (13 currently operating with an average monthly capacity of 350 clients).

Proposed CSHB 182 (HESS)
Dave Palmer
April 4, 1983

Section 1: (a) Authorization is given for exemption to the State minimum wage (AS 23.10.050 - 50 cents per hour greater than prevailing Federal minimum wage or $2.60/hour whichever is greater) for participants in work therapy programs.

(b) The Commissioner is required to adopt regulations regarding payment for work therapy while considering specific criteria indluded in the bill.

Section 2: (a) Wages paid for work therapy are considered allowable operational costs and are eligible for reimbursement by grants.

(b) No part of wages earned may be deducted for room, board or services.

(c) Wages may be held in trust and disbursed, with consent for specific purposes.

Section 3: Work therapy is defined.

No effective date.

The impetus for HB 182 is the Nugen Ranch, a treatment facility for chronic and debilitation alcoholics. A component of the treatment program is work on the ranch in exchange for minimal compensation. With the intent on establishing lost work habits, developing self esteem, and rekindling positive work attitudes, work as therapy is used at the ranch. However, Federal and State minimum wage laws apply. HB 182 provides an exemption from the State minimum wage, which exceeds the Federal minimum wage.

Exemptions to the State minimum wage currently exist (AS 23.10.070) for:

1. Individuals whose earning capacities are reduced by physical or mental deficiencies, age or injuries.

2. Apprentices (approved by the Commissioner)

3. A learner, subject to conditions set by the Commissioner.

DHSS Position: The position paper relates to HB 182, not proposed CSHB 182. it is relevant. The DHSS asks that the exemption apply to programs designed to last over 120 days. Short-term programs would be required to pay prevailing minimum wage.

Fiscal Note: The fiscal note for HB 182 is zero. However, the CSHB 182 requires the development of regulations and implies that review of programs would be necessary to assure compliance with those regulations. If not done before the hearing, the fiscal note requires revision.

POSITION PAPER/Department of Health & Social Service

MAR 8 1983

POSITION PAPER

HOUSE BILL 182

"An Act exempting participants in residential drug abuse and alcoholism treatment programs from Alaska's minimum wage provisions, and providing a wage scale."

The Department of Health and Social Services is supportive of this legislation.

The issues and remedies surrounding this proposed legislation arose with the advent of a long term care program for the chronic and significantly debilitated alcoholic. The individuals to be served by these programs have long histories of unemployment, skill depreciation, loss of positive employment experiences and loss of positive life experiences. Long term care is defined as treatment lasting from a minimum 120 days to a maximum of 2 years with an average length of 1 year.

One of the intents of long term care treatment program is to have clients engage in a form of work therapy as part of their overall treatment regime. Such work therapy will be designed to help the client re-establish or re-learn basic learning, life and employment skills. It is the intent of the long term care treatment program to be more than a warehouse for the most severely afflicted casualties of the disease alcoholism.

The Department is also concerned that clients' rights be protected. The Department is also concerned that short term treatment programs provide intensive therapy to appropriate clients. To this end the Department of Health and Social Services would recommend the following.

House Bill No. 182, lines 12 through 14 be amended to read:

> (b) Participants in residential drug and alcoholism treatment programs [designed to exceed 120 days in length,] may be paid less than the minimum wage prescribed in AS 23.10.050-23.10.150 for work therapy, as defined in AS 47.37.270.

House Bill No. 182, lines 16 through 19 be amended to read:

> Sec. 47.37.245. Wages of Patients. Participants in residential drug abuse and alcoholism treatment programs, [designed to exceed 120 days in length,] shall be paid for work therapy, as defined in AS 47.37.270, at the rates established under AS 33.32.050. [AS 33.32.050(a)].

These recommended changes would have the effect of limiting the applicability of the exemption from the minimum wage law. It is the Department's position that only long term care treatment programs (designed to exceed 120 days) be exempted.

Re: Summary/ HB 291 "An Act providing for tuberculosis exams and quarantines"

This bill adds new sections to the Health & Safety Statutes, Article 3, Tuberculosis. Sec. 18.15 is amended which applies to Disease Control.

Sec 1.

18.15.135- Tuberculosis Exams

a) An individual must submit to an exam, whenever in the opinion of a medical officer of the Div. of Public Health, there is a public threat.

b) Exam shall be by written order with the individual's name and the time and place of the exam. The individual shall be served with a copy of the order.

c) Examination by licensed physician of the individuals choice as long as the exam complies with specific conditions approved by the medical officer

18.15.136- Quarantines (new section)

a) Maximum of 6 month quarantine allowed by medical officer of the Division of Public Health.

b) Written notice of quarantine as in provisions for order for examination. Expires on dates specified in the order or at the opinion of the medical officer of the Division.

18.15.137- Reporting Violations (new section)

Medical Officers must report violation to nearest law enforcement agency.

18.15.138- Penalty (new section)

Violation of terms of order constitutes a Class A misdemeanor subject to a maximum imprisonment of one year and a maximum fine of $5,000 or both.

Re/ HB 291, Quarantine

Rep. Vernon Hurlbert
Pouch V
Mailing Stop 3100
Juneau, AK 99811

Dear Rep. Hurlbert,

The City Council of Galena is very concerned about the lack of legislation to control communicable disease in Alaska. Here in Galena we have currently and have had in the recent past outbreaks of tuberculosis. The problem becomes particularly serious when an individual refuses treatment. This individual can then infect others, and the community has no protection as there is currently no law to force the individual to seek treatment (according to our attorney, Mary Nordale, and as we understand it from the opinions of the State Attorney General's office).

Tuberculosis is a disease that can be eliminated if infected individuals follow-through on treatment. We urge the State to provide legislation to give the necessary basis to force individuals with communicable diseases, particularly tuberculosis, to seek treatment.

Enclosed is a resolution from the Galena City Council supporting this issue.

We appreciate your attention to this problem and interest.

Sincerely,

Pat Myers

Pat Myers
City Manager

Resolution 82-22

A RESOLUTION ENCOURAGING LEGISLATION SUPPORTING ENFORCEMENT OF TREATMENT OF COMMUNICABLE DISEASES, PARTICULARLY TUBERCULOSIS, IN ALASKA.

WHEREAS, the City Council of Galena is the duly authorized governing body of the City of Galena, and;

WHEREAS, the City of Galena has experienced an ongoing problem with tuberculosis and a recent outbreak of the disease, and;

WHEREAS, the City is experiencing an incident where one individual who has active tuberculosis is refusing treatment, and;

WHEREAS, the nature of the tuberculosis disease is that it can be highly contagious and endanger a whole community, and;

WHEREAS, the disease can be prevented with adequate treatment, and;

WHEREAS, there is no legislation to enforce treatment, and;

WHEREAS, the City of Galena has a strong committment to protect the citizens, and;

NOW, THEREFORE, Be It Resolved That the City Council of Galena requests the legislators to enact legislation to require individuals to obtain treatment for tuberculosis and other communicable disease.

PASSED AND APPROVE this 16th day of December ,1982

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
HOUSE BILL NO. 291

For an Act entitled: "An Act providing for tuberculosis examinations and quarantines."

This Bill provides the Department of Health and Social Services with authority to require an individual suspected of having an active case of pulmonary tuberculosis to submit to an examination and to order the quarantine of a person with active pulmonary tuberculosis for a period of six months when such action is necessary to preserve and protect public health.

While tuberculosis is not the enormous health problem it was in the 1950s, a large number of persons infected in earlier years are at risk of reactivation of their disease and of being capable of spreading the disease to others. Over the past ten years, new active cases have numbered between 75 and 100 cases per year, placing Alaska among the five states with highest incidence.

Most persons with active tuberculosis are highly motivated to comply with treatment recommendations intended to render them non-infectious and to inactive their infections. A very few people, however, refuse to submit to examination or to accept treatment recommendations. Such individuals are a hazard to themselves, their families, communities and the general public.

The existing authority of the Department to require examination, isolation or treatment of individuals with communicable disease who may threaten the health of the public is not clear.

It is expected that the authority contained in this Bill would be exercised infrequently. Based on past experience, the estimate is that orders for examination may be required three times per year. Quarantine orders would be used even less frequently, perhaps not even one per year as the public becomes aware of a statutory provision which could compel quarantine.

The Department anticipates that on the rare occasions when quarantine may be required, it would be accomplished by restricting the individual's movements within his or her own home.

The Department supports passage of this Bill. Over the past few years, many cases of tuberculosis could have been avoided, including one near-fatal infection, had the source of infection been prevented from spreading the disease to others.

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 191 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to school board negotiations with certificated employees."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.20.550 is amended by adding a new subsection to read:

(b) Salary schedules or other pay provisions negotiated under this section that take effect on or after July 1, 1984, shall include performance and merit criteria, among others, that shall determine pay increases for individual certificated employees.

ASSBA - in support of this CS

1) Dale - Change shall to may pg 1 l 13

2) Davis - Could support some monitor award for an exceptional teacher

Proposed HESS committee substitute for HB 191

Change Section 1 .... new subsection s ....

Add the following paragraphs

(c) The parties may agree to waive the requirement that pay scales for certificated employees include criteria based upon performance and merit.

(d) In the event a negotiations dispute between the parties is not resolved through mediation either party may submit the issues in dispute to last best offer arbitration, item by item, according to the interest arbitration procedures of the American Arbitration Association. The decision of the arbitrator will be final and binding on the parties.

Binding Arbitration

(e) The objective criteria used to evaluate performance and award merit pay increases and class size and pupil/teacher ratios shall be established by the parties through the collective bargaining process.

NEA proposal not

Bob Cooksey

Del-Phi Technique – Copies to Committee

SS. 6S 191 –

Hurlbert – no way to implement it – School Districts will implement this. Reagan encourages – merit & confirm – rather than itemize.

David Weaver – 30 yr Fed Personnel Offcr – last stint – BIA Perf evaluation – Ø history in federal gov't. Good intentions but doesn't work. Worked hard @ trying to make this work – come down to work. Get our opinion & the, Were not Getting from having standards.

Negotiations – must be perf evaluation standards before this can come to the table. Save this effort – try to legislate something w/no framework of knowledge to implement. Syracuse N.Y. – inverse relationship Supervisors & Teachers!

Davis – Fed's still use Merit Pay.

Weaver – 1971 Retired doesn't know answer.

Doll – Opinion – Test for competency prior to certification Any supervisor as a personnel

Weaver – Rather than having someone in authority decide merit – motivation must come from individually – create a climate where employees want to do better.

SS HB 191

M. Miller — Conflict of Interest - wife is school teacher.
Davis — objected
Ball — Bonus System? How do you feel about replacing this w/ boards granting bonus w/o eliminating standardized salary structure.
Hurlbert — agrees w/ intent to get teachers to excel.
Kelly - When one is better
Hurlbert - Sponsor Sub.

Elizabeth Morris: - from Kbks (Parent) agrees w/ SSHB 191 Sends children to private school. Kbks. 50% drop out rate w/ Native children. 1500 Native kids & 11,900 Caucasian children in Kbks. Drop out rate is effected by teachers. Johnson O'Malley program. Good Program. 70% drop-out rate in Anchorage.

~~Jack Hebert~~ —

Bob Greene - In favor of Sponsor Substitute
Total Merit System in one shot - not feasible.
- dissension to teachers & education. Done from indiv approach to salary schedule which is complex.
1) Experience 5% per yr
2) additional educ component = 5%
3) annual negotiation = 7%
Your teacher could have 17% pay raise.

B. Greene continued.

① Put Merit component in there. Must improve.

② Can't pay for it = Salary in Pac N.W - 12,000 - 26,000
Engineers in Pac N.W. Ln @ 26,000. - Brain drain from Educ to other occupations.

Evaluation System is a farce. Reqs regarding evaluation annually. So then the exercise for no reason.

Gall - Why did so many teachers quit in Hydaburg. Last year? - Salary - no - not one person has left Ln of # - Ln of bad management.

★ Merit pay could be used to punish teachers - What kind of safeguards to insure against this? Don't dispute intent of 191 C this is too loose!

Greene - Futuristic legislation. 1st year that we have attention w/problem of funding education. Alot of work to put this together administratively. Local group will ★ set up criteria - this is a guarantee. So long as item is mentioned in

★ - binding arbitration that is in statutes for grievance procedures

Can negotiate anything you want now w/o this bill. - Merit or otherwise.

Fritz - Short of teachers? - Greene Bush yes - Urban - no

Steve Hole — opposes bill - concerns deal w/ criteria established & who makes determination & due process rights under this type of salary schedule -
* l 12 "shall include criteria" - worrisome language.
Miller — SS & HB 191 - l 14 difference "above" vs "when determining" - dept opposed to both?
Hole - Original bill was in form of bonus - not as much problem as in the spon. sub "when determining."
Tischer - Are you suggesting we set down criteria
Hole - Not suggesting anything - All negotiated agreements must include . . . . Based on performance and merit
Tischer Any objective criteria by which you can judge a teacher
Hole - Yes possibly - difficult to isolate on classroom characteristics. Did not mean to lead you to believe that the confrontations will occur everywhere.
Dodd - agree to benefits to higher achievers & still concerned about the exceptions. School Boards can back off w/binding arbitration. Does not specify what we are doing.
Tischer Maybe we have to define merit & performance
Hole - Pertains to a process that is on going. - a ✓ will also accompany HB 191.

Jean Krause. Pres of NEA – Teacher salaries. – also Principles (administrative groups)

1. Force out incompetent educators?
2. Evaluation procedures.
3. Support written evaluation procedures @ the beginning of the school years.
4. Certification, teacher – not a merit proposal
5. Is the intent to lower salaries – 55% rule – Teacher salaries are included under 55% not administrators.
6. Boards can hire & fire.
7. None has statewide merit pay plan thru out states.
8. Merit pay abandoned in Ariz for Principles & favoritism, harassment, beholdey to supervisors decrease idea of sharing – promotes competitiveness.
9. Supports Very Strong evaluation procedures
10. " Teacher preparation plans @ Universities
11. Talent Bank – should be used in teacher preparation curriculum.

Take Care of Evaluation System

↔ Held until a later date —

↔ Davis – to Krause Jean Available Articles re/ Merit Pay.

New task force pushes rewarding good teachers

RESEARCH TRIANGLE PARK, N.C. (AP) — A task force on education says states must begin giving rewards to teachers for doing a good joo.

"No public school system in America pays one teacher one penny more for doing a good job," Tennessee Gov. Lamar Alexander lamented. "They can make a little more for going back to school. They can make a little more for going into administration."

Alexander and seven other governors and 31 business and education leaders met here Wednesday as the National Task Force on Education for Economic Growth. They recommended that each state find ways to give "extraordinary rewards for extraordinary teachers."

The task force was convened because of what it called an emergency in American education. Its report will be issued early in the summer.

IBM Corp. Chairman Frank Cary, the co-chairman of the task force, said the draft agrees with a 29-page report released last week by the federal government's Commission on Excellence in Education, which put responsibility for improving education with school boards and state officials.

MEMORANDUM May 23, 1983

SUBJECT: Education of exceptional children (CSHB 194 (HESS))

TO: Representative Milo Fritz
Chairman, House Health, Education, and Social Services Committee

FROM: Keith B. Levy KBL
Legislative Counsel

You have asked whether CSHB 194 (HESS) requires a school district to provide special education and related services to an exceptional child whose parent refuses to consent to the transfer of the child to another school district that already offers an appropriate special education program. In my opinion, the bill does not necessarily require this and an amendment is necessary to make it clear.

Sections 5 and 6 of the committee substitute amend AS 14.30.186 to provide that school districts and regional educational attendance areas shall provide special education and related services in a school in the district for exceptional children residing in the district. Sec. 13 of the committee substitute amends AS 14.30.285(b) to provide that an exceptional child may be sent to a school outside the child's school district under certain circumstances. AS 14.30.285(f) provides that a child may not be transferred out of the district without the consent of the child's parent.

Thus, the school district has an obligation to provide special education and related services unless the child is transferred, but the child cannot be transferred unless the parent consents. The argument could be made that if the school district offers to transfer the child and the parent refuses to consent, the district has fulfilled its obligation to provide special education. To foreclose this possibility, I would recommend the following addition to the bill:

* Sec. . AS 14.30.285(f) is amended to read:

(f) No child may be transferred to a school outside the district in which the child resides without the consent of the parent or guardian. The withholding of consent to transfer an exceptional child by a parent does not relieve a school district or regional educational attendance area of the obligation to provide special education and related services to an exceptional child under AS 14.30.186.

This amendment would make it clear that the school district must provide special education and related services even if the parent refuses to allow the child to be transferred to a school outside of the district.

Sec. 14.20.550. Negotiation with certificated employees. Each city, borough and regional school board, shall negotiate with its certificated employees in good faith on matters pertaining to their employment and the fulfillment of their professional duties. (§ 1 ch 18 SLA 1970; am § 3 ch 71 SLA 1972; am § 21 ch 124 SLA 1975)

NOTES TO DECISIONS

Constitutionality. — This section and AS 14.20.610 state two goals which apparently conflict, but since the supreme court construes this section fairly narrowly, it finds no constitutional infirmity in this section and AS 14.20.610. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Requirements of section. — This section merely requires a school board to negotiate with a union. It does not require a board to accept any particular proposal a union might offer. It does not require [illegible] probably does not permit, a board to delegate to a union the sole power to make any decision. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

As to matters which affect educational policy and are, therefore, not negotiable, there is nevertheless implicit in the Alaska Statutes the intention that the school boards meet and confer with the unions. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

Negotiable items. — Salaries, fringe benefits, the number of hours worked, and the amount of leave time are negotiable. Kenai Peninsula Borough School Dist. v. Kenai Peninsula Educ. Ass'n, Sup. Ct. Op. No. 1537 (File Nos. 2470, 2492, 2563), 572 P.2d 416 (1977).

The salary of teachers is a proper subject of collective bargaining under Alaska's statutes. Rouse v. Anchorage School Dist., Sup. Ct. Op. No. 2106 (File No. 4715), 613 P.2d 263 (1980).

Nonnegotiable items. — Such items as (1) relief from nonprofessional chores, (2) elementary planning time, (3) paraprofessional tutors, (4) teacher specialists, (5) teacher's aides, (6) class size, (7) pupil-teacher ratio, (8) a teacher

Dear Jean:

I am aware that you testified before the Legislature last week on merit pay for administrators. What you are probably not aware of is the fact that I was involved in merit pay for principals for two years when I previously served as supervisor for elementary principals in the Anchorage School District. For your information, this provision was included in the negotiated agreement between the principals and the District.

It is interesting to note that while the concept seems to be worthwhile and would probably provide equity in compensation for our administrators, you should also note that the administration of a merit pay plan is cumbersome, inequitable and subjective. I would not recommend merit pay for teachers or administrators now or in the near future.

Should you need further information on the provisions of our merit pay plan, please call me.

Sincerely,

Rita R. Strachan

Rita R. Strachan

Anchorage Principals' Association

ANCHORAGE, ALASKA 99501

April 15, 1983

APR 19 1983

Ms. Jean Krause, President
NEA-Alaska
147 S. Franklin #201
Juneau, Alaska 99801

Dear Ms. Krause:

The Anchorage Principals' Association strongly opposes merit pay. We experienced three years of merit pay during the tenure of our previous negotiated agreement with the Anchorage School District. As a result of this experience, the principals had as their number one priority, during negotiations for our present agreement, the elimination of all merit pay items.

Merit pay drove a wedge between supervisors and staff at all levels. It interferred with effective employee evaluation, making it extremely difficult to maintain a trusting, working relationship between supervisor and subordinates.

In theory, merit pay sounds like a great way to provide incentive and reward for top performance. In practice, it is a means to favor those who follow, without question, and it divides the ranks, causing an atmosphere of mistrust and non-sharing of good, innovative, successful educational and managerial practices.

Respectfully yours,

William Frick

William Frick

Fort Yukon, Alaska 99740

February 16, 1983

Vernon L. Hurlbert
House of Representatives
State Capitol
Pouch V
Juneau, AK 99811

I am pleased to hear of your interests on Merit Pay for Teachers. For accountability purposes and to ensure full involvement on the part of students, I certainly support this effort. We at Yukon Flats are very concerned on the low achievement of students and lack of student motivation. The District has taken steps by developing a Teacher Incentive Plan (see attached), High School Requirements (see attached) and curriculum development district wide. We are also establishing eligibility criteria of "C" for any travel on school related activities as well as an incentive plan for students on academic achievement and attendance.

We have been negotiating a teachers contract for the past nine months. We are at impasse. I did recommend a Merit Pay System for teachers. Our professional negotiator did not recommend it due to difficulty we have had in negotiating a reasonable contract that we can live with. Also, because this would be introducing a new concept in Alaska which may not be acceptable. I am enclosing my idea for your review. I encourage you to pursue this effort. I look forward to seeing you next week.

MERIT PAY FOR TEACHERS

Teacher Initiative The District will award two of a possible eight merit points for teacher initiative, i.e. projects of activities that the teachers themselves choose to carry out. Teachers may earn their points in the basic curriculum; others may prefer to create new elective courses in area of interest. For example a teacher with a Master's Degree in Music may elect to teach music to junior high school students during her preparation period.

Teacher Cooperation The District will award four of a possible eight merit points for group efforts, in which teachers join forces to focus on a common goal. High school teachers, for example, unite to develop and implement a consistent disciplinary program, and they will receive merit points according to the degree of their success. Others may work to establish writing, health and physical education programs across the curriculum. Others may earn points for their cooperative efforts to organize contests and extra curricular activities.

The Principal's Role Only three points of the possible eight merit points may a teacher earn dependent on the principal's evaluation.

The Role of the School Board The Board draws up annual guidelines for teachers' proposals and then negotiates through a committee--discussing possible objectives, activities and methods of evaluation.

MEMORANDUM

TO: Teaching Staff

FROM: Beatriz Apodaca, Superintendent Beatriz

SUBJECT: 1983-84 YFSD Teacher Incentive Plan

To encourage excellence in teaching and to improve student learning the following incentives will be offered by YFSD.

Plan A. Participating in the Alaska State Writing Consortium
Mary Morris and Debbie Drong-Bjork participated in the Writing Consortium last summer in Fairbanks. Attached see Mary's enthusiastic remarks about this program. YFSD will again be able to send two teachers to the Consortium.

The consortium is made up of 13 Alaskan Districts which have joined together to help children learn how to write. The consortium offers a four-week course for teachers of all subject areas and all grades who want to see students write better. This also will provide you with the opportunity to earn five graduate credits.

Attached is selection criteria and how to apply, as well as other literature in the Alaska State Writing Consortium that may influence your decision.

Plan B. The District will award $400 to any two teachers in the District to purchase classroom materials, visit other programs in the state or observe other teachers in our District. Awards will be based on teacher initiative, student motivation and excellence in teaching.

1. Teachers may choose to carry out a project or activities within the basic curriculum Language Arts, Health, Science, Math or Computer Literacy.

2. Teachers may prefer to create new elective courses grounded in personal interests. For example, an elementary teacher with a masters in English may elect to teach a course in publications.

3. Teachers may join forces to focus on a common goal. For example, developing and successfully implementing a consistent disciplinary program, organizing contests and extra-curricular activities.

4. Administrative & Program staff will identify exampleary programs by March of 1984. If you are initiating any programs and would like YFSD staff to observe let us know in advance.

THE
LAKE AND PENINSULA
SCHOOL BOARD

SARA HORNBERGER, President 1976-1981
~~Port Alsworth, Alaska 99653~~
P.O. Box69, Iliamna, AK. 99606

Dear Representative Hurlburt:

Thank you for your letter of information about the bill to allow districts to give merit pay to exceptional teachers. I do support the bill with one reservation. It is not always easy to administer such a program. It is often difficult to draw the line as to where merit pay is warranted and where it is not. At this time, many school districts are paying bonuses to teachers of science and math often without regard to the ability of the teacher in the discipline and/or ability as a teacher. The teachers' unions also make it difficult to give merit pay. They protect the teachers no matter what their abilities just because they are teachers and pay their union dues (and I say this as a life member of the National Education Association and an honorary member of NEA-Alaska). However, a bill such as yours is good because it forces us to take time to face the issue and come up with guidelines, etc.

As a teacher of 17 years and a rural board member of seven years, I oppose binding arbitration in any form and I also oppose giving teachers the right to strike. Several times when I was teaching, our union tried to pull a strike and I always refused to strike (and my refusal sparked other refusals so the strike always failed). It is my opinion that public employees do not have the right to strike and if a person doesn't like that, go get another job. Back to binding arbitration. The taxpayers are the ultimate authority in the schools and if we give away binding arbitration, we might just as well disband publically elected school boards of directors and let the teachers elect a committee to run the schools.

Best wishes,

Sara Hornberger

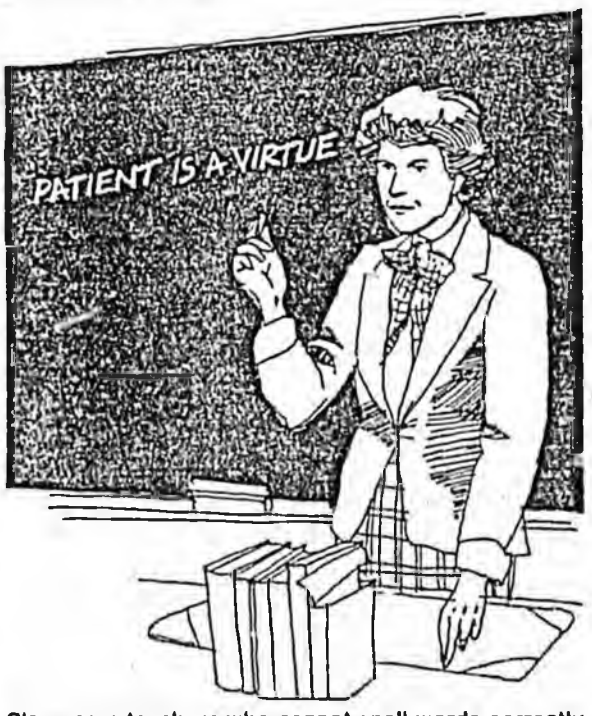
Sara Hornberger

What's Wrong With Our Teachers

Low prestige and few rewards are discouraging top students from entering the profession. Result: Too many instructors who don't measure up to the challenge.

A Texas elementary-school teacher gave a reading lesson under her hand-printed sign: "Patient is a virtue."

A Salt Lake City English teacher renowned for his excellence quit the classroom to earn twice as much in another job—driving a truck.



These cases illustrate two sides of a growing crisis in America's public schools: On the one hand, too many classrooms are burdened with teachers improperly prepared for their work. On the other, thousands of competent instructors are being lured from their jobs by more rewarding work elsewhere.

Educators insist that teachers don't deserve all the blame for the decay in American education as evidenced, for example, by the decline of Scholastic Aptitude Test (SAT) scores to a national average of 893 in 1982, from 958 in 1967. Factors such as budget cuts, curricula changes, classroom violence and competition for students' interest from TV and other outside forces also are cited for causing poor performances.

Increasingly, however, leading scholars insist that reform of the nation's schools—crucial to maintaining America's technological leadership—must start with teachers.

In a major study of the American teacher to be released in mid-March by a panel of top educators, project director Emily Feistritzer concludes: "The real crisis in teaching today is in who is entering the profession. And if we don't do something about that now, it will hurt America's competitive standing in the future."

ILLUSTRATION BY HAROLD BAER, JR.

Classroom teachers who cannot spell words correctly are a source of concern about incompetence.

Many remedies are being undertaken to reverse the situation. Colleges of education are raising their admissions standards, and beginning teachers are being tested to weed out incompetence. Higher pay is being considered in some areas.

To relieve a teacher shortage in math and science, the House of Representatives on March 2 approved a 425-million-dollar program designed to put more qualified instructors in the classroom. The bill, which awaits approval by the Senate, includes 250 million dollars in grants to the states and to local school districts to update the math and science skills of current teachers and to retrain teachers of other subjects to qualify them to teach math and science.

An intense immediate concern is the fact that most of the nation's brightest college students are rejecting careers as teachers at a time when enrollment increases are expected to create serious teacher shortages by 1990. Shortages already are appearing in some areas.

Fewer than 5 percent of the freshmen entering college last fall said they planned to become teachers—down from nearly 22 percent in 1966. Their low numbers were matched only by their low academic performances. The 1982 SAT scores for students entering education were 80 points below the national average in math and verbal skills—a combined score of 813 out of a possible 1,600. Future teachers ranked 26th in 29 academic fields surveyed.

Alarming Decline in Quality

Educators say many of the problems are traceable to a surge in public-school enrollment in the early '60s that put pressure on colleges of education to train thousands of teachers quickly. The boom also caused many states to certify new instructors who were not adequately prepared.

"They were just trying to get warm bodies into the classroom," recalls Samuel Sava, executive director of the National Association of Elementary School Principals.

Since then, educators note, the women's-liberation movement also has encouraged females to aspire to their highest goals of employment. As a result, many young women have decided that the teaching profession, for decades one of the best jobs available to them, did not have enough prestige and chose other careers.

The result has been an alarming decline in the quality of teachers entering many classrooms. While school officials claim that 95 percent of their teachers perform adequately, they also concede that cases of incompetence have become all too common:

- An elementary-school teacher in South Carolina was downgraded to a substitute after parents complained about the bad grammar and misspelled words she used in correcting students' papers.
- A California teacher stood with her back to the class while youngsters pelted her with spitballs, the noise becoming so intense that another teacher came to investigate. After other incidents of behavior that were judged to detract from her teaching, she was put on notice to improve or risk dismissal.
- A mathematics teacher in a Creve Coeur, Mo., high school was discovered by administrators to be "completely incompetent." Her problem: "Inability to read the chemistry of the kids. She wasn't capable of responding to the class. She'd miss the puzzled look on kids' faces."

Sufficient knowledge of the subject matter is only one of the criteria for successful teaching. Being able to communicate that information to large classes with both talented students and slow learners presents problems for some otherwise competent teachers. A Pasadena, Calif., teacher with a firm grasp on her subject matter "had no control of

her class. She was literally afraid of her gifted and accelerated students," says the superintendent. The district paid a settlement of $78,000 to terminate her services.

A study conducted for the National Institute of Education, which looked at college graduates who entered teaching in the late '70s, found that those with the highest academic ability were much more likely to leave their jobs than those who were lower achievers. Among high-achieving students, only 26 percent intended to teach at age 30, as compared with approximately 60 percent of those with the lowest academic ability.

Teachers find that part-time jobs in places such as a gas station make them vulnerable to students' taunts and jeers.

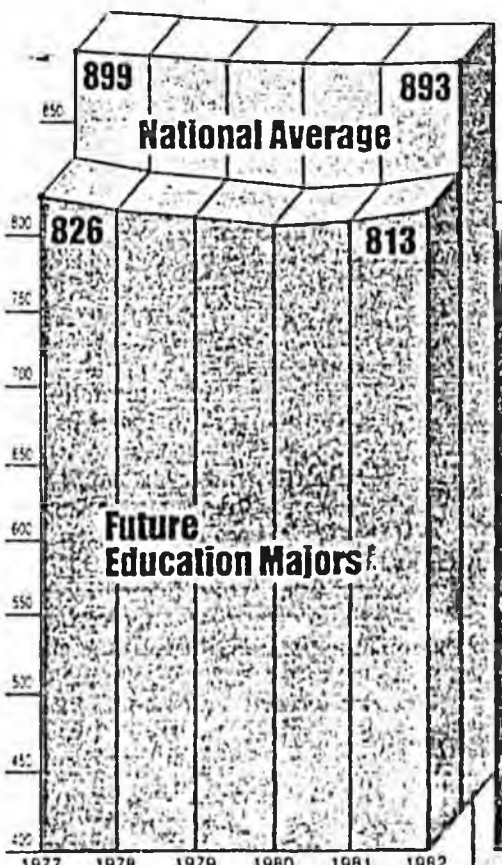
Many Americans worry about the damage that such experiences cause to impressionable young people. Mike Barnicle, columnist for the *Boston Globe*, received a letter from a high-school English teacher that included such comments as: "I get sick and tired of the vandalism and all the drinking, too much of it. I have been a teacher for eight years and I try and tell the kids. They have been a big increase in public drinking." Barnicle noted in his column: "For all practical purposes, she is a 31-year-old functional illiterate."

Educators blame the colleges of education that have turned out such barely literate instructors. A recent graduate of an Alabama college included the following note when applying for a local teaching job in 1980: "Students should be abble to, count two ten." He was not hired. Another alarming indication: One third of the nearly 7,000 prospective teachers who took California's first minimum-competency test failed to meet the most basic skill requirements.

Notes Dan Alexander, president of the Mobile County, Ala., school board: "If the current test-failure rate is, say, 20 percent, then you have to figure that 20 percent of the people who would have failed in the past are still teaching in the system."

Teachers "Are Beaten Down"

One of the worst effects of the crisis is the lowering of teachers' morale. A 1981 survey of the nation's 2.2 million public-school teachers by the National Education Association found that 24 percent of the teachers polled "probably would not" choose teaching as a career again. In 1961, fewer than 8 percent said they would reconsider.



What has happened over the past two decades to make teaching so unpopular? Responds Ernest C. Smith, a Los Angeles industrial-arts teacher with 15 years of experience: "Teachers economically and morally are beaten down."

Low pay is the top complaint. The National Center for Education Statistics estimates that the average current salary for classroom teachers is $17,644—up from $9,269 in 1971. However, in constant 1980-81 dollars, teachers have lost money, dropping from the 1971 equivalent of $20,168.

The outlook for the future is equally bleak. The center

USN&WR—Basic data, College Entrance Examination Board

expects salaries in 1991 to have risen to $20,113—still $55 below the 1971 mark.

"Looking down the way 20 years, I wouldn't want to support my family on a teacher's salary," says Patricia Nipper, a Latin teacher in Little Rock. With seven years' experience and a master's degree in English, Nipper earned $16,000 last year.

Many teachers are forced to take part-time jobs to supplement their salaries. Twenty-nine percent of the teachers surveyed in Texas last year had outside jobs, up from 22 percent in 1980. The experience can be humiliating. A Salt Lake City teacher finds his job at a gas station makes him the target of student ridicule: "Students that I had bring in their cars and ask for a dollar's worth of gas. They enjoy taunting me as their teacher who now has to wait on them."

Some instructors who know their subject matter are unable to provide adequate discipline for students unwilling to learn.

Teachers don't have to go far to find better-paying jobs, and many are doing so. The average starting salary for teachers is $12,800, compared with $16,200 for accountants and $20,364 for computer scientists. A master's degree may raise a starting teacher to $14,079, but engineers holding master's degrees receive $11,000 more as starting pay.

As a result, many college students, most often math and science majors, are seeking more lucrative careers. In Iowa, the number of graduates in mathematics education fell to 38 in 1981, down from 234 in 1970. The state needed 102.

Experienced teachers are joining the exodus from the classroom. Richard Ong, 25, recently left a computer teaching job in Los Angeles to program videogames for Mattel. The transfer instantly raised his salary 50 percent, from $16,000 to $24,000. If teachers such as Ong continue to leave at their current rate, more than a third of the nation's qualified secondary-school math and science instructors will be gone by 1992.

Many areas faced with these shortages have had to use teachers certified in other subject areas to teach math and science. In Pacific Coast states, 84 percent of the new math and science teachers were trained in other fields.

Educators as Baby-Sitters

Other reasons for leaving include problems of discipline in overcrowded classrooms that are filled with handicapped youngsters, children who speak little English, and the products of broken homes.

Says one suburban Washington, D.C., elementary-school teacher: "I have children who have been with a baby-sitter since they were 3 months old. They are demanding from me the individual attention, concern and caring they haven't gotten from their parents. I just can't give enough with 25 students in the room."

Thirty-four-year-old Gay Maise left her teaching position in a St. Louis suburb because of discipline problems: "I spent the entire first three months of school on discipline and classroom order. Forget about teaching subjects."

Teachers in many urban school districts live with the fear of violence. In February, an Atlanta teacher was cut in the neck during a robbery attempt while walking during school hours from the main school building to an annex. In

Teachers' Test—Can You Answer?

Six states use the National Teacher Examinations produced by the Educational Testing Service for teacher certification. Prospective teachers take a battery of tests on communications skills, general and professional knowledge and their specific field of study. Here are sample questions from those tests—

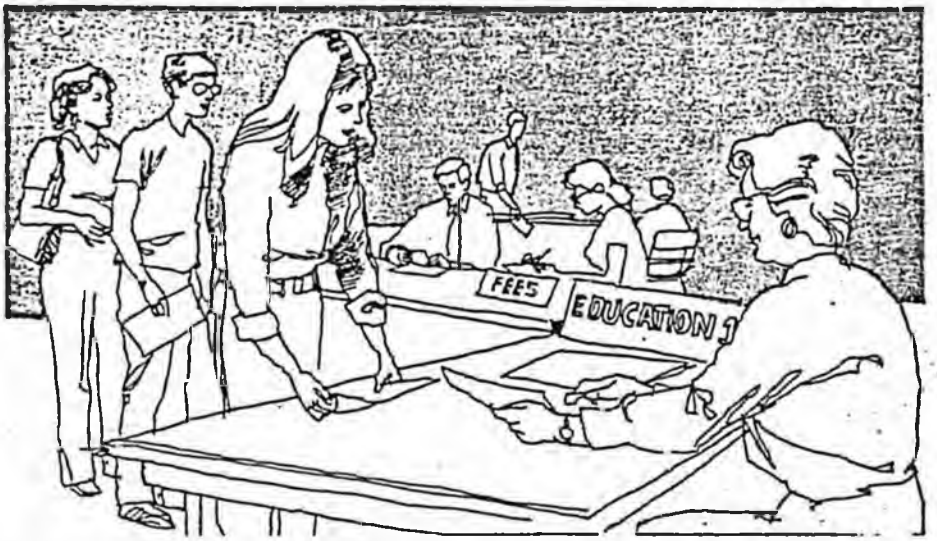
1. If the sum of two numbers is 18, which cannot be true of the numbers?

[A] Their sum is 0.
[B] Their product is 0.
[C] One number is twice the other number.
[D] One number is 8 times the other number.
[E] One number is greater than 18.

2. During a recession in the United States, unemployment is likely to be highest among which of the following groups?

[A] Public-school teachers.
[B] Army officers.
[C] Office managers.
[D] Automobile-assembly workers.
[E] Dairy farmers.

3. The maximum size of particles that can be moved by a river is related most directly to the:



[A] Length of the river.
[B] Speed of water in the river.
[C] Cross-sectional area of the river.
[D] Amount of salt dissolved in the river water.
[E] Number of waterfalls along the river's course.

4. Tom had a party for some friends and relatives, and 40 people came. If twice as many relatives had come, the number of people at the party would have been:

[A] Exactly 60.
[B] Exactly 80.
[C] Exactly 81.
[D] Between 40 and 80, but not necessarily 60.
[E] More than 40, but no maximum can be set.

Answers: 1. A, 2. D, 3. B, 4. D.

Questions are reprinted by permission of Educational Testing Service.

Incentives such as higher pay and tougher academic courses are being tried to encourage better-quality students to enroll in teacher-training programs.

Dade County, Fla., public schools reported 84 student assaults on school personnel during the first half of the past school year.

Tight budgets in many school districts have meant coping with inadequate supplies. In Prince George's County, Md., no new textbooks were purchased this year. As a result, many English teachers can't use favorites such as *The Great Gatsby* or *The Scarlet Letter* because there aren't enough books to go around. A poll of Louisiana teachers found nearly a third spend more than $100 of their own money annually to buy classroom materials.

"We're being asked to do more and more with less and less," notes Marty Berger, a Prince George's County psychology teacher who makes do with a 1974 text. "That forces you to be more creative, but it also makes it harder to maintain your enthusiasm."

Why, then, do so many teachers remain in the classroom? Because, they say, there are priceless rewards such as the moment when a child suddenly understands a math problem or discovers the joy of Shakespeare's plays.

Explains California industrial-arts teacher Ernest Smith: "It's a great feeling to meet a former student who says: 'You gave me a tough time, but now my life is bett-- ' "

For some individuals, these rewards were sufficiently attractive to lure them from higher-paying jobs in private industry. Wynetta McNeil, 31, left previous positions in finance and consulting to teach math and social sciences in Atlanta. She says: "I found that my skills were strong as a motivator. A lot of kids I work with have the talents that just have to be tapped. When I see the little light bulbs click on over their heads, I feel satisfied."

Melissa Lane, 16, a junior at North Hollywood High School, says good teachers are easy to identify: "They are excited about the subjects they teach. They're available at lunchtime if you need them. They always have plans and projects."

Screening Out Incompetents

Efforts are under way in many places to upgrade the quality of teachers while attracting more intelligent newcomers. By 1985, half of the 50 states will require new teachers to take a basic-skills test before they can operate in a classroom.

The tests screen out incompetent teachers and help pinpoint weak teacher-preparation programs. Since Louisiana began testing its future teachers in 1978, the passage rate has risen from an initial 53 percent to 75 percent last year.

In Florida, 84 percent of all t
who took the exam last Oct
passed. However, only 37 perce
the black students in education pa
which has raised concerns about
worsening of an already serious de
in the number of black teachers.
American Association of College
Teacher Education and other gr
are discussing ways to recruit top-q
ty black students and offer better p
aration programs.

Some areas also have tightene
procedures for determining how w
teacher controls a class or impart
or her knowledge to students.
states have begun delaying cert
tion for new teachers until they
completed a one-to-three-year in
ship on the job. During that time,
teachers are evaluated by admini
tors and other instructors.

Improvements also are under way in many of the 1
colleges offering teacher-education programs—only 5
which are approved by the National Council for Accre
tion of Teacher Education. Concern has generally foc
on the teaching-methods courses that critics say are bo
and are driving away many bright, ambitious students.

cluded that the U.S. "gets approximately what it pays
The bottom one third of the college-going population
seeking positions paying salaries in the bottom one thi
the economy."

Several states, including Florida and Texas, have
posed raising all teacher salaries significantly. Secretar
Education Terrel Bell favors creating a position of
"master teacher," which would command a salary sev
thousand dollars higher than a regular teacher's pay.
nessee Governor Lamar Alexander has proposed suc
program that would pay master teachers an average sa
of $26,873, which is 60 percent more than the salary
regular teacher.

While such a program would reward excellence, m
administrators say any type of merit-pay system would
hard to administer and might prove divisive. Says elem
tary-school Principal Elizabeth Decker of Loudoun Cou
Va.: "If every teacher is out for herself, the sharing
materials, ideas and talents tends to stop."

The question of how much teachers are worth ultima
boils down to how much students are learning. Notes
Angeles parent Annie Richardson: "Teachers will hav
rededicate themselves to produce better products or t
will never get the support of the public."

By LUCIA SOLORZANO with the magazine's domestic bureaus

Interview With Albert Shanker, President, American Federation of Teachers

Want Better Teachers? Raise Pay, Stop Classroom Violence

A well-known educator says that a vital part of the effort to improve the quality of instruction in our schools depends on the public—including a willingness to spend more.

Q. Mr. Shanker, why are teachers under so much fire now?

A. Not so long ago, many people in the general public were uneducated. Teachers were among the educated elite. But very quickly we've educated so many of our people that the gap between the general public and the teacher is no longer there. That makes teachers easier to criticize.

Also, we no longer have an elite student body, and we're not educating the masses as well as we used to educate the few. What teachers can do with children who are relatively advantaged is very different from what can be done with the kids who used to be pushed out of school. To some extent, teachers are blamed for that.

In addition, it is getting more difficult to find teachers of acceptable or high quality.

Q. What makes that so difficult?

A. A big part of it is the money—or lack of it. If somebody is asked to go into teaching at $12,000 a year but can become a trainee for some business at $20,000, you're not going to get very many candidates.

Also, 30 years ago about the highest profession that most women could aspire to was teaching. Now all sorts of other professions have opened up to them.

Q. How can better students be attracted to a teaching career?

A. The economic incentives have to be improved. You also have to solve the problem of violence and disruption. A person who is primarily interested in mathematics or Shakespeare loves that subject and feels that it is important enough to spend a lifetime imparting this knowledge to others. That person does not want to spend his or her time telling Johnny to put away his knife or to stop shrieking.

In many schools a teacher cannot get satisfaction from the job because of a small percentage of students who are sick, who are violent, who are not learning. Instead they are preventing other children from learning and are driving out competent and capable teachers.

A good teacher does not want to be a policeman, a psychiatrist or a jailer. The schools must come to grips with this.

Q. What about improving the teaching environment?

A. A lot of corporations are talking about "quality circles"—increasing productivity by increasing the participation and happiness of all who are involved. Schools have to develop in that direction, too.

In schools today, teachers are very often treated pretty much the way the children are. If they're absent for a day, they're asked to bring a doctor's note. Most people with intellectual self-respect and some accomplishment are not going to thrive in an atmosphere like that. Schools have to make teachers an equal partner in the educational endeavor.

Q. How do you define a competent teacher?

A. A teacher should have a relatively high level of literacy and should be competent in his or her own subject matter. Everyone who enters teaching ought to be tested on those skills. There also must be performance characteristics related to the interaction between teacher and students, but those have to be observed by people over a period of time.

There ought to be an internship period similar to what a doctor goes through. This should be done in a regular school setting over a two or three-year period of time in which the new person gets a good deal of help and is able to try out different things. It also ought to be a time after which, if the person isn't really good, you can say, "Goodbye—this is not for you."

Q. What are the characteristics of an excellent teacher?

A. The excellent teacher is a great artist. Greatness implies a certain creativity. Probably most adults have had at least one or two teachers who would have inspired them to come back to classes even on Saturday or Sunday. But you can't have all of your teachers at that level any more than you can expect every singer to be a Pavarotti. There's nothing wrong with being competent. Most teachers *are* competent, and what we need to do now is constantly to raise that level a bit. If we can do that, our schools will be in pretty good shape.

Q. Would it help to pay higher salaries to the best teachers?

A. If we could find a scheme that rewarded merit on some measurable and commonly accepted basis, there'd be nothing wrong with it. But wherever this has been tried, the majority of colleagues became demoralized because they felt it was not the meritorious person who was being rewarded. The money was being used to accomplish other purposes.

Q. Would it raise educational standards to pay more to teachers in fields where there is a shortage, such as math or science?

A. How much more are you going to pay them? Are you going to pay $1,000 or $2,000 more to a college graduate normally starting at $11,000 or $12,000? Industry will pay a science major $24,000. Do I hear anybody bidding $24,000? No.

Suppose that next year we have a shortage of English or kindergarten teachers. Will the public say: "Well, math and science are superior subjects. So when they're in short supply, we'll pay extra money. But anybody can teach English or kindergarten." Then you begin to teach children that it's not as important to learn English, that it's not as important to be able to understand or work with children who are younger.

Q. What can be done to improve or fire incompetent teachers presently in the classroom?

A. With people who are not making it, you first give them all the help you can. Then you do what any other employer does: You build a case against them. Tenure doesn't mean you keep your job. It just means that the boss has to go before somebody and give a reason for removing you. If you've got a good reason, there's no judge in the world who's going to uphold that teacher's right to stay there.

It is also important to stimulate teachers constantly. Teachers are locked up with children for almost their entire lives. They spend very little time with their colleagues. We need to develop ways for teachers to have a chance to read great literature, to discuss ideas, to be in an adult environment where they are respected by others. Getting excited about something and learning something new will generate the kind of enthusiasm we need to make teaching a really desirable profession again. □

Kerttula questions UA salary proposal

Associated Press

Juneau — Plans to increase staff salaries at the University of Alaska by 7.5 percent drew concern today during a Senate Finance Committee hearing on UA's proposed $174.28 million operating budget for fiscal 1984.

The package represents a 17 percent increase over UA spending this fiscal year.

Senate President Jay Kerttula, D-Palmer, who sat in during the fourth day of hearings on UA's proposed spending package, said he wondered why salaries were climbing in the midst of a recession.

"Salaries Outside are going down," Kerttula told UA-Anchorage Chancellor David Outcault.

Pay raises based on merit "are justified," Kerttula hastened to add, but he questioned the practice of issuing automatic pay raises in the face of hard times that bring "competition for jobs."

Contained in the UA request is a 3 percent "step" increase in pay, and a 4.5 percent cost-of-living increase for UA staff.

UA-Anchorage is requesting a total operating budget of $35.56 million.

In a separate matter, George P. Melican, chancellor of UA's Division of Community Colleges and Rural Education and Extension, decried the fact that tuition at Alaska's 10 community colleges is the highest in the nation among such institutions.

He said he is recommending that community college tuition not be increased at the same rate as university tuition, which, according to Sen. Jan Faiks, R-Anchorage, is 300 percent lower than the national average for state universities.

Melican had no figures immediately available showing how community college tuition compares with the national average.

White House Favors Civil-Service Pay Tied to Performance

By a WALL STREET JOURNAL Staff Reporter

WASHINGTON—The Reagan administration wants to place greater emphasis on job performance in determining the salaries of federal white-collar employees and the order of layoffs when furloughs are necessary.

Under a proposal being considered by the administration, a performance-based pay system would replace the current procedure under which these workers get increases based mostly on seniority. The proposal would retain the across-the-board yearly increases federal workers usually receive to keep their pay comparable to private-sector workers'. Further, the plan would make performance more important than seniority in determining which workers lose their jobs during layoffs.

The plan, which doesn't require Congressional approval, has been agreed to at the cabinet level. President Reagan is expected to give final approval.

The plan would bring about 1.4 million federal workers under a merit-pay system that currently includes about 125,000 senior federal executives.

Donald Devine, director of the Office of Personnel Management, said the proposed changes would "reform the system so it makes more sense from a management perspective." He added, at a briefing yesterday for a small group of reporters, that government decisions on the pay and laying off of personnel "are made with very little consideration given to how well they perform."

In the past, rumors of such proposals have been greeted with howls of protest from federal employee groups. Yesterday the American Federation of Government Employees, which represents about 700,000 workers, called the plan "a return to the spoils system." A spokeswoman said the government's performance-appraisal system, which has been used for senior executives since 1981, is "too new and too subjective to be an adequate criterion" for determining pay raises.

The latest proposal is another dose of harsh medicine for federal workers. Mr. Reagan's 1984 budget proposes that federal workers' pay be frozen next year and that workers' contributions to the pension system be raised. On Oct. 1, federal workers received a 4% increase. Further, the administration has proposed that the age at which civilian workers can retire with full benefits be increased, over a 10-year phase-in period, to 65 from 55.

Dunkin' Donuts, Franchisees To Raise Advertising Outlays

RANDOLPH, Mass.—Dunkin' Donuts Inc. disclosed in its annual report that the company and its franchisees plan to increase spending for advertising to $100 million in the five years ending 1987, from $43 million

Philips Unit Settles Suit Against Mattel Over TV-Game Patent

By a WALL STREET JOURNAL Staff Reporter

NEW YORK—North American Philips Corp. said it agreed to settle a television-game patent lawsuit it had filed against Mattel Inc.

Under the settlement, Magnavox Consumer Electronics Co., a unit of North American Philips, releases Mattel from all claims of patent infringement and grants Mattel a license for its television-game patents. An official of North American Philips declined to specify the amount of the licensing fees to be paid by Mattel, but he said: "We think it was a very satisfactory settlement for Magnavox."

In Hawthorne, Calif., Mattel also declined to disclose the amount of the royalties. The toy maker, publishing and entertainment concern said it had made adequate provision for payment, but wouldn't comment further.

The settlement involves a 1980 suit that contended that Mattel infringed Magnavox's patent on "Odyssey 2," a programmable television-video game, by introduction of Mattel's "Intellivision." At issue was the electronic circuitry that converts electrical impulses to images on the screen.

Last July, a federal judge in Chicago ruled that Mattel had infringed Magnavox's patent for certain television-video games, and Mattel later appealed the decision.

North American Philips has interests in consumer products, electrical and electronic parts, and professional equipment. It is a unit of Philips N.V. of the Netherlands.

Nissan Motor in USA Is Sued by Wisconsin Over Pickup Truck Ads

By a WALL STREET JOURNAL Staff Reporter

MILWAUKEE—The Wisconsin Attorney General sued Nissan Motor Corp. in USA, charging the unit of the Japanese auto maker with deceptive television commercials.

The suit, filed in Milwaukee County Civil Court, cites two 30-second television advertisements that ran last fall, featuring Datsun King Cab pickup trucks. The commercials said Datsun pickup truck prices "start at $5,858." King Cab models usually cost at least $7,000, according to the suit.

The ads included a disclaimer that the $5,858 price applied only to another model. The attorney general's suit charges that the disclaimer appeared too briefly to be read by viewers.

"We viewed it over and over and it really is impossible to read that disclaimer," said Jonathan P. Siner, an assistant attorney general.

The suit asks for penalties of as much as $500 for each time the ad is aired. It also seeks restitution for customers who shopped for King Cabs at $5,858 but paid more. Mr.

Basic verbal and mathematical skills don't make a good teacher, but the lack of them will surely make a bad one—and bad teachers mean inadequate education. Confronted with the fact that too many teachers do lack basic skills, the states are responding with a variety of remedies.

Teachers: A Question of Competence

"Why should we be able to read and write if our students can't?" a grade-school teacher commented sarcastically when asked about teacher competency. Needless to say, teachers don't appreciate being scapegoats for the failures of public education. Nevertheless, revelations about a generation of high school students who could neither read nor write has inevitably led to the questioning of teacher quality in America.

The mid-1970s was filled with press accounts of plummeting test scores and functionally illiterate high school graduates. The minimum competency movement was born and, when the dust settled, 40 states had enacted laws requiring basic skills tests in the public schools.

The teacher competency movement followed not far behind. "We started out testing the students," says House Speaker Frank Kelley of Arizona. "That's like measuring your body temperature to find out you're sick. So we found out that we were a

Teachers

little bit sick. Now we're looking at the education of teachers and the testing of those teachers before they can be certified to teach in Arizona."

The public, fueled again by press reports of teachers failing basic skills tests, garbled notes to parents, and incomprehensible homework assignments, began now demanding teacher accountability. In a 1979 Gallup Poll, a whopping 85 percent of respondants agreed that teachers should have to pass state exams in their subject areas.

Over the last several decades, the teaching profession has suffered some severe blows to its prestige. Whereas in the past, teachers were well-respected and generally had more education than the general public, today the public is often as well-educated, if not more educated, than teachers. "Teachers are surrounded by parents who feel that they could do as good a job teaching their children if they weren't too busy making more money," once commented Albert Shanker, president of the American Federation of Teachers (AFT).

Low salaries haven't helped attract qualified applicants to teaching. The 1981-82 average teaching salary was $18,976, according to the National Education Association (NEA), the country's largest teacher union. The low status and pay of the profession—not to mention the problems of violence, discipline and apathy in the classroom—is turning away many who in the past would have taught.

"We are no longer seeing the first cut of people who would have entered the profession 10 years ago," says Rich Hollhan of the Florida Education Standards Commission. "Those people are now in industry and other professions." Shortages of mathematics and science teachers are becoming especially acute because of the competition of higher-paying private-sector jobs. The exodus of women and minorities from teaching to new job opportunites offering more pay and status has also contributed to the decline in teacher quality.

Recent studies confirm that teaching does not attract the "best and brightest." In a study for the National Institute of Education, Phillip C. Schlechty and Victor S. Vance concluded from a review of Scholastic Aptitude Test (SAT) scores that teaching attracts and retains those with low measured academic ability while failing to attract or retain those with high measured academic ability. Thirty percent of all teachers are drawn from the lower 20 percent of academic achievement. And 34 percent of teachers committed to remain in teaching come from the lower 20 percent—61 percent from the lower 40 percent.

The nation's schools of education have also come under fire. Teacher preparatory schools have been criticized for minimal entrance requirements and low standards for graduation. The curricula has been scored for emphasis on teaching theory rather than on subject matter and actual student teaching experience.

But in most states, graduation from a school of education is all that is necessary for teacher certification. "Certification in most states is verification," says Lester Solomon, director of Georgia's performance-based certification program. That is, the state basically accepts the recommendation of a college.

Solomon does not consider such a system as setting standards. "Only when [the state] sets standards for a test or on-the-job assessment is the state really taking its responsibility of establishing standards for certification as opposed to just accepting a recommendation from the college."

State response to the public pressure for teacher accountability has initially been quite similar to demands for student competency. Twenty states now require, or will require in the future, that applicants for teacher certification be tested (see chart on page 13). In at least half of these states, the tests have been mandated by the legislature—the rest have been authorized by the state board or department of education.

Testing does not mean the same thing in all states: Some have developed their own tests, others use the Educational Testing Service's National Teacher Exam (NTE), South Carolina uses a combination; some states test the basic skills of reading, writing and mathematics, others test subject matter or professional teaching skills, some test a combination of these; in some states prospective teachers are tested before entrance to teacher preparatory programs, others test after graduation.

Is testing the answer to teacher competency? Critics argue that it is a "band-aid" approach that has no power to treat the causes of poor teaching and that testing alone cannot predict who will be an effective teacher. Many different qualities go into good teaching—and high measured academic ability may not necessarily be one of them. According to Schlecty and Vance, much research has been devoted to studying what makes a good teacher—without conclusive results.

Those who support testing of basic verbal and mathematical skills agree that a test will not tell you who will be a good teacher. But, they argue, the lack of such minimal skills will surely make a bad one. "We feel very strongly," says Florida's Hollhan, "that if teachers cannot demonstrate that level of competency, we don't need them."

Testing has been opposed in some states by minorities and teacher unions. Minorities argue that testing perpetuates past discrimination and also that standardized tests

are often culturally biased. Blacks in Florida maintain that that state's requirements for certification will eliminate blacks from the teaching profession. According to Holihan, Florida law requiring that applicants to teacher colleges be in the 40th percentile on the SAT is making a significant impact on the number of blacks admitted to teacher programs. After reviewing results just in from California's new proficiency test for teachers, officials projected in January that two-thirds of minority candidates failed the test, compared to a one-third overall failure rate.

NEA, with 1.6 million members, has also gone on record against testing. Last year, Massachusetts witnessed a battle over a bill that would have required a basic skills test of all teachers, including those already certified. According to a legislative aide, the Senate tabled the bill—after it was amended in the House to apply only to new teacher applicants—because of the volatility of the issue. The Massachusetts Teachers Association (MTA), a division of NEA and the state's largest teacher union, lobbied heavily against the bill. In the November elections, the union ranked candidates according to their position on the issue of competency testing.

Richard Durkin, lobbyist for the MTA, calls the type of testing Massachusetts was considering "punitive" rather than constructive. NEA does not consider testing a valid method of evaluating teachers and is opposed to its use as a sole condition for employment, especially after students have invested heavily in four years of education. Durkin and NEA support what they term more constructive approaches to teacher competency such as improved teacher education and provisional certification after graduation when a teacher can receive feedback and assistance. "I think evaluation is the key," says Durkin.

AFT, the smaller teacher union with a half million members, has come out in favor of testing, but both NEA and AFT vigorously oppose testing of teachers already or

States Requiring Testing for Certification

the job for purposes of retention or salary decisions. Although several have tried, no states have succeeded in enacting such legislation.

A number of states have recognized that testing alone will not assure quality teaching in the classroom. "Testing doesn't tell you that much," says Speaker Kelly of Arizona. "It's the training and the follow-through, making sure that measurable standards of competency are set and followed." Several states have broadened their testing programs to include a period of provisional certification and on-the-job training.

In states that have recently instituted or are experimenting with such programs, there is a high level of optimism and support. "We are very excited about the program," says Holihan. "This is a program we are very anxious to have succeed." Dr. Everett Howerton, associate superintendent of public instruction in Virginia, says that he cannot "recall two legislative items for which there was more widespread support" than for Virginia's plan for testing and assessment.

One of the more extensive programs is in Georgia, which has a three-year period of provisional certification—the longest of any state. The first part of Georgia's program is a state-developed diagnostic test. Administrators in Georgia felt the NTE, like most standardized tests, did little to provide clear objectives to applicants and feedback to those who fail.

The main focus of effort and money in Georgia is on-the-job training and development. Solomon believes that legislators should look at the whole process as not simply setting standards and weeding people out but as provi for growth and development. "Four years of college c not a finished teacher make," Solomon frequently legislators.

Since the mid-1970s, the state board of educatio Georgia has developed a sophisticated assessment gram. For certification, a teacher must master 14 c petencies, each measured by two to five indicators assessment team, made up of an administrator, a p teacher and someone external to the school sys evaluates the teacher. Seventeen regional centers, fur by the legislature, provide 50-hour training program those who serve on an assessment team.

To Solomon, the training centers are one of the bes vestments a legislature can make. Although the trainir a means to an end, i.e., the assessment of new teach both experienced teachers and administrators report ing profited greatly from the training. While it is costing state $3 million to run the training centers, Solomon siders this a small investment for such a high return or $900 million the state invests in teacher salaries. Howe the evaluation process can be done less expensively, s Solomon, by omitting the training centers and by using NTE rather than developing a new test.

Georgia has an 86 percent cumulative pass rate o test. Solomon estimates that approximately 2,100 pote teachers—out of the 15,000 applicants that have t tested since 1978—have been excluded from teachir Georgia. The assessment program is in its third year a has seen a steadily improving pass rate: 60 percent first year; 70 percent the second; and 80 percent expe this year. Solomon attributes the improving pass rat college and universities using the feedback from the and assessment process to better prepare students. teacher preparatory programs have begun to use Georgia assessment system in their student teaching grams.

Other states with comprehensive teacher progr in place include South Carolina, Florida, Virg Oklahoma, New York and Louisiana. S Carolina, Florida, Oklahoma and Louisiana screen plicants to teacher preparatory programs with eith basic skills examination or a certain high school g point average or score on standardized tests like the South Carolina requires student teaching in the junior senior year of the teacher program; Louisiana requires spective teachers to maintain a 2.5 grade point avera a preparatory program. These states require testing graduation and a one- tc two-year period of provisional tification when a teacher is evaluated and assisted.

Arizona instituted a basic skills test in 1980 and is

Twenty states now require, or will require, that applicants for teacher certification be tested. In at least half of the states, the tests have been mandated by the legislature.

experimenting with a pilot program in several school districts that provides for a one-year residency program before certification. Speaker Kelley believes "the key to the whole thing" is to require that competency in the classroom be demonstrated before certification is granted. He hopes the pilot project will demonstrate the program's value so that the legislature will provide funding. "I'm high on it," Kelley says. "I think this is the route to go."

In addition to setting certification standards, there are other steps states are taking to improve teachers. For example, state boards of education can work directly with schools of education to improve curricula, as Arizona is currently doing. A few states—California, New York and Oklahoma—have implemented programs for on-the-job teachers. Legislation in California in 1981 provided for professional teacher development centers to conduct basic skills training for teachers, and 1982 legislation provided funds for training programs for school administrators. Teacher preparatory programs themselves have begun to tighten standards and improve curricula. The impetus comes in part from the tightening of state standards and student failure to meet certification requirements.

Funding is an issue that most states are concerned with in this era of scarce fiscal resources. While testing is not an expensive program, especially if the NTE is used, the more extensive programs increase the costs. Many administrators and legislators are expressing concern about funding of current programs—and new ones. Utah is interested in a teacher competency program and is awaiting a report from the board of education. "We felt that Georgia had a good system but it set up a completely new bureaucracy within the state," says Senator William T. Barton, chairman of the Senate Public Education Committee, "so we're trying to come up with a way our existing state board can handle it with existing funds and personnel."

The availability of funds also has a bearing on teacher salaries. Legislators and administrators are very aware that setting standards and being selective must be balanced with attracting and retaining qualified teachers. Shortages of mathematics and science teachers will increase as well as in other fields if teaching is not competitive with other professions. Teachers' unions generally favor raising salaries before raising standards and requirements; legislators tend to favor raising standards, which would then justify higher salaries.

Some states are raising salaries as they implement new regulations. Florida, for example, aims to raise its salaries to the top 25 percent in the country within the next five years; Georgia is providing additional pay for its new teachers who go through the three-year assessment procedure.

Another means of raising the status and professionalism of teaching is to recognize different levels of teaching. Some states may move in this direction. Speaker Kelley in Arizona hopes to eventually "get into different levels of certification, including master teacher and so forth." Teachers should be rewarded for their competence so that a "'a teacher is a teacher is a teacher' just doesn't stand anymore."

Georgia is interested in providing the option to experienced teachers of going through the test and assessment procedure. Such teachers would then receive a performance-based teacher certificate and additional pay. States must move away from overall pay increases, Solomon thinks, and move toward performance-based increases—in part because there just isn't enough money to go around.

The "bottom line" of teacher competency, of course, is improved student learning. Because state programs to improve teacher quality are new, there is yet no data to assess the effects on learning. There is much room in the future for research that will correlate student achievement with what states are doing to improve teacher competency. And there is still room for further discovery and refinement of what makes for effective teaching.

Lisa Berland is assistant editor of State Legislatures.

HOUSE HEALTH, EDUCATION & SOCIAL SERVICES
STANDING COMMITTEE
April 13, 1983
1:06 p.m.

Members Present: Rep. Tischer, Co-Chair
Rep. Fritz, Co-Chair
Rep. M.W. Miller, Vice-Chair
Rep. Goll
Rep. Davis

Members Absent: Rep. Koponen
Rep. Cato

COMMITTEE CALENDAR

HB 257: "An Act relating to certain limitations and exclusions in health insurance policies."

HJR 35: Relating to payment for health services provided by the Alaska Area Native Health Service.

SSHB 191: "An Act relating to school board negotiations with certificated employees."

WITNESS REGISTER

Rep. Ward
State Capitol Building
Pouch V
Juneau, Alaska 99811
465-4939
Position Statement: Introduced a Committee Substitute for HB 257 which deleted Lines 16, 17 and 18 of the original bill; said he did not agree with the necessity of the deletion but would agree to it in order to expedite the bill's passage.

Martin Tirador
Blue Cross of Washington and Alaska
808 Doyon
Juneau, Alaska 99811
586-2142
Position Statement: Agreed to the changes made in the Committee Substitute; questioned the legal obligation of Native Health Service beneficiaries to pay; suggested a word change in Section 2, [illegible] 18 of CSHB 257.

Rep. Hurlbert
State Capitol Building
Pouch V
Juneau, Alaska 99811
465-3799
Position Statement: Supported passage of SSHB 191; contended that good teachers are not paid enough because of the pay scale must also contend with incompetent teachers.

Elizabeth Morris
141 Denkel #3
Fairbanks, Alaska 99701
452-3053
Position Statement: Testified in support of SSHB 191; agreed with the intent to reward good teachers and get rid of incompetent teachers; commented on the high drop out rate for native students in public schools.

Bob Green
Association of Alaska School Boards
326 4th Street
Juneau, Alaska 99801
586-1083
Position Statement: Supported SSHB 191 if the merit scale was only one of the ingredients used to determine teacher pay; stated the need for an incentive to keep good teachers in education; contended that teachers are not paid fairly.

Steve Hole
Department of Education
Pouch F
Juneau, Alaska 99811
465-2890
Position Statement: Opposed SSHB 191; stated concern about the criteria to be used, who would determine criteria, to what extent performance would determine pay; pointed out the nebulous language in SSHB 191; contented that SSHB 191 could lead to conflicts of interest.

Jean Krause
National Education Association - Alaska
147 S. Franklin, #207
Juneau, Alaska 99801
586-3090
Position Statement: Pointed out that other groups besides teachers negotiate their salaries; opposed the bill's intent to lower teacher salaries and control the local bargaining process; cited states where merit pay plans were

tried and rescinded due to failure; contended that merit pay scale would engender many problems including harassment, favoritism, and competitiveness, and discourage cooperation among educators; supported strong evaluation procedures.

SSHB 191: 2/11/83 - First Reading.

Committee referrals - HESS and Finance Committees.

No previous action in HESS Committee.

ACTION NARRATIVE

TAPE#28
Recording
Number 0001 Co-Chair Tischer called the meeting to order at 1:06 p.m. Representatives Fritz, Goll and Miller were present. Representative Davis arrived at 1:18 p.m. Co-Chair Tischer announced the committee calendar and the Chair's intent to move HB 257 and HJR 35 out of committee.

Number 0045 Co-Chair Tischer informed the committee that the CS for HB 257 was now available for review, and called the sponsor to the witness stand.

Number 0064 Rep. Ward claimed that the CS was written to clear up some alleged problems with HB 257 and expedite the bill's passage out of committee.

Number 0083 — Discussion regarding the difference between CSHB 257 and SB 257. Rep. Tischer pointed out that Lines 16, 17 and 18 of original bill were deleted in the committee substitute.

Number 0097 — Rep. Ward stated he still was not certain the lines needed to be deleted but would agree to the change in order to ensure the bill's passage.

Number 0104 — Martin Tirador, Blue Cross of Washington and Alaska, agreed with the Division of Insurance concerns presented at a previous hearing on HB 257. Mr. Tirador said the CS draft seemed to resolve most of the problems, but whether or not the beneficiary of Native Health Services had a legal obligation to pay was still questionable. Mr. Tirador was also concerned about where the money would go.

Number 0142 — Mr. Tirador stated that Indian Health Services had no mechanism to bill 3rd party payers; consequently, the companion resolution HJR 35 would be necessary for HB 257 to have any impact.

Number 0165 — Mr. Tirador recommended deleting the wording of Section 2, Line 18 and adding "is effective January 1, 1984 and applies to all policies issued on or upon renewal on or after that date," in order to prevent excess paperwork for insurance companies.

Number 0205 — Rep. Goll vocalized his understanding of Mr. Tirador's intent and then clarified the wording of the suggested amendment.

Number 0245 — Rep. Tischer said the intent of the bill was to create a mechanism to make hospitals more accountable for their services and encourage consumer responsibility.

Number 0270 — Mr. Tirador informed the committee of Blue Cross' policy which requires direct billing from the hospital.

Number 0290 — General discussion regarding billing procedures.

Number 0300 — Discussion about federal involvement in the implementation of the bills.

Number 0334 — Rep. Tischer contended that the bills will help hospitals create a cost effective balance.

Number 0350 — Mr. Tirador pointed out that while 9,000 hospitals have billing processes, the federal government is not a part of any of them.

Number 0358 — Co-Chair Tischer indicated that she would appreciate a motion to move the bills out of committee. Discussion followed regarding federal involvement and the lack of hospital representation during hearings of the two bills.

Number 0380 — In regards to HJR 35, Martin Tirador recommended encouraging the federal government to contract with 3rd party payers when appropriate.

Number 0401 — Rep. Goll moved the amendment of Section 2 of HB 257 to read "The act takes effect January 1, 1984, and applies to all policies issued or renewed on or after that date." Discussion followed.

Number 0414 — Rep. Goll withdrew his previous motion and moved to accept the corrected version of CSHB 257 in place of HB 257, and to pass CSHB 257 out of committee.

Number 0436 — Rep. Davis pointed out the cumbersome wording of the effective date clause. The committee agreed to let the drafter of the corrected CS for HB 257 word the clause in the appropriate manner.

Number 0445 — Co-Chair Tischer called for the previous question. There being no objections, the motion passed.

Number 0476 — Rep. Fritz moved to pass HJR 35 out of committee with individual recommendations. There being no objection, the motion passed.

Number 0495 — Co-Chair Tischer announced SSHB 191 as the next item on the committee calendar, and introduced the prime sponsor of the bill.

Number 0513 — Rep. Hurlbert, District 24, explained the rationale behind the changes in SSHB 191; stated his conviction that certificated employees should be payed according to

merit. Rep. Hurlbert argued that good teachers presently are not payed enough because the wage scale also includes the incompetent teachers. Rep. Hurlbert contended that SSHB 191 is conceptual because it is an attempt to quit paying teachers as if they are all doing a good job.

Number 0543 — Rep. Miller argued that line 14 of the sponsor substitute changes the intent of the original bill. According to Rep. Miller, HB 191 allowed for the addition of a bonus based on merit to an already established pay scale; whereas, SSHB 191 uses merit as the basis for a teacher's total pay.

Number 0560 — Rep. Tischer read both versions of the bill aloud.

Number 0575 — Rep. Miller stated a possible conflict of interest because his wife is a teacher; and asked to be excused from voting.

Number 0582 — Rep. Davis objected.

Number 0585 — Rep. Hurlbert explained that SSHB 191 mandates that performance and merit be the criteria for raises.

Number 0595 — Rep. Tischer contended that HB 191 encouraged raises above and beyond the regular pay; whereas, SSHB 191 would allow school boards to increase pay for some while keeping it the same for others.

Number 0620 — Rep. Goll suggested implementing a bonus system instead of eliminating a standardized pay structure.

Number 0632 — Rep. Hurlbert supported the bonus system idea and other ways to reward those who excel in teaching. He stated that good teachers should be payed better in order to keep them in education.

Number 0658 — Elizabeth Morris, Fairbanks citizen, agreed with SSHB 191; stated that some teachers should not be in the school system and that good teachers should be rewarded. Ms. Morris said that she sent her children to private schools because of the poor quality education in public schools especially with regards to native children.

Number 0675 — Ms. Morris described the problem native students encounter in public schools.

Number 0688 — In response to committee members' questions, Ms. Morris stated that the drop out rate for native students is 50% in Fairbanks, and 70% in Anchorage. According to Ms. Morris, a greater number of native teachers would benefit native students.

Number 0723 — Bob Greene, Association of Alaska School Boards, testified in favor of SSHB 191 as long as the merit scale was one component in the method of determining teacher pay. Mr. Greene said he would not approve if the merit scale was the only measure used to determine teacher pay. Mr. Greene contended that teachers are not payed fairly presently, and suggested adding a merit component to the experience, additional education, and annual components presently used. Mr. Greene said he was unsure how the system would work or be implemented, but that it was worth a try.

Number 0801 — Mr. Greene contended that teachers in Juneau are presently well payed, but anticipated that salaries would decline in the future. Mr. Greene argued that an incentive will be necessary to keep good teachers in education, but stated he was opposed to giving higher salaries to all teachers regardless of performance. Mr. Greene also predicted a nationwide shortage of teachers.

Number 0856 — Rep. Goll asked Mr. Greene for his explanation of why 90% of the teachers in Hydaburg quit last year. Mr. Greene answered that it was partly due to salary. Rep. Goll responded that the teachers he knew left not for money but because of poor management.

Number 0870 — Rep. Goll suggested that teachers could be manipulated and punished if SSHB 191 were enacted; questioned what would safeguard against teacher manipulation.

Number 0907 — Mr. Greene agreed that teachers presently leave the state for reasons other than money, and stated that SSHB 191 was futuristic legislation because 10 years from now teachers might leave for more money.

Mr. Greene concluded that SSHB 191 did not include a mechanism to determine criteria for merit in order to allow individual boards the opportunity to do so. Mr. Greene asserted that the statute for binding arbitration on grievance procedures would automatically protect staff members to some degree.

Number 0948 — Rep. Goll suggested replacing "shall" with "may" on Line 12 of SSHB 191 so that agreements would not be forced.

Number 0955 — Bob Greene opposed Rep. Goll's statement; contended that the bill would be unnecessary.

Number 0958 — Discussion regarding the shortage of physical sciences teachers in the lower '48. Bob Greene contended that the same proportion of teachers exists in Alaska, but that there was only a shortage of teachers in Bush areas.

Number 0976 — General discussion about incentives to teach in the Bush and Bush teachers pay scales.

Number 0999 — Steve Hole, Department of Education, said the department opposes SSHB 191. Mr. Hole stated concern about the lack of criteria and questioned who would determine merit, as well as do process rights under SSHB 191. Mr. Hole also questioned the meaning of "shall include criteria" on Line 12; asked to what extent performance would determine merit and pay.

Number 1014 — Rep. Miller asked if the department opposed both the original bill and the sponsor substitute. Mr. Hole responded that the department was less concerned about HB 191 than SSHB 191 because of the nebulous language in SSHB 191.

Number 1032 — Rep. Tischer said she presumed teachers would have input into determining the criteria on a local level.

Number 1037 — Steve Hole agreed that it would be up to each locality to enact the criteria, but pointed out that under SSHB 191 it would be mandatory to include a merit provision in all negotiated agreements regarding salary.

Number 1059

Mr. Hole suggested a scenario where teachers come with some criteria suggestions and the board comes with a set of criteria which meets their own needs, and the two parties are unable to negotiate. Mr. Hole testified that as a teacher he had been evaluated in part on the length of his hair, his style of dress, and the way he voted on bond issues. Mr. Hole asked how such impasses would be resolved equitably.

Number 1090

Rep. Tischer said that she hesitated to believe that negotiations between teachers and boards were actually that low.

Number 1113

Rep. Fritz commented that people are human, and asked Steve Hole if he had any recommendations for a set of objective criteria by which to judge the quality of teachers.

Number 1132

Mr. Hole responded that quality is often in the eye of the beholder, and that what is good in the way of teachers in one school is different for another.

Number 1156

Rep. Goll recognized that conflict exists between school boards and teachers and stated that if SSHB 191 were enacted it would need to provide for instances where people do not follow the law. Rep. Goll stated that the criteria would have to be worded carefully as it could be used negatively to punish those who do not perform according to the school board's wishes.

Number 1197

Jean Krause, National Education Association, Alaska reminded the committee and previous witnesses that groups other than teachers also negotiate their salaries, such as principals. Mr. Krause contended that SSHB 191 was a poor vehicle for forcing out incompetent teachers, and opposed the hidden intent of SSHB 191 to lower teacher salaries and control local bargaining procedures. Ms. Krause stated that NEA supports written, consistent evaluation procedures, and agrees that the best educators ought to be payed more but did not agree that merit pay was the appropriate means to that end. Ms. Krause also argued that the anticipated teacher shortage was not a good reason for the bill, and stated that many other factors

than money deter people from teaching in the Bush. Ms. Krause pointed out that no state in the USA has a statewide merit pay plan for teachers, and indicated that states which had tried the plan has rescinded them soon after.

Number 1230 — In addition, Ms. Krause contended that SSHB 191 would engender problems in education such as increased harassment, favoritism, bureaucracy, more "yes people", and competitiveness among teachers. Ms. Krause said that the merit pay plan would discourage cooperation among teachers, and affect the morale of all certificated staff members.

Number 1264 — Ms. Krause stated her support for strong evaluation procedures, changes in teacher preparation programs, and the creation of a talent bank of teachers to teach preparatory classes for prospective teachers.

Number 1273 — In response to Rep. Tischer's questions regarding the present use of teacher evaluations, Ms. Krause stated that the philosophy behind evaluations was to improve teacher performance and aid in decisions about future employment for specific teachers.

Number 1300 — Discussion regarding teacher evaluations and recent changes in education.

Number 1347 — Rep. Tischer asked why merit pay programs were rescinded in other states. Ms. Krause responded that they were rescinded because they did not work.

Number 1358 — Rep. Miller commented that evaluations in Fairbanks were conducted by principals, and that what one principal liked, the other disliked because they had different ideas of quality.

Number 1372 — Rep. Davis agreed with Ms. Krause's comments regarding the fallacies of the merit pay system, and the need to revise evaluation procedures. Rep. Davis also requested written material on the failure of merit system in other states.

Number 1386 — Co-Chair Tischer adjourned the meeting at 3:10 p.m.

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 191 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to school board negotiations with certificated employees."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.20.550 is amended by adding a new subsection to read:

(b) Salary schedules or other pay provisions negotiated under this section that take effect on or after July 1, 1984, shall include performance and merit criteria, among others, that shall determine pay increases for individual certificated employees.

B. Brune:
"Evaluation System" for tenured & non-tenured teachers requirement is in place.

HOUSE HESS
COMMITTEE MEETING
AGENDA

DATE: May 31, 1983

TIME: 1:00 p.m.

I. Call Meeting to Order

A. Note Committee Members Present

B. Welcome Those Observing

C. Remind those wishing to testify to sign up, and those giving testimony to speak up and state their names.

II. Announce Legislation Under Consideration:

HB 347 An act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date.

HB 194 An act relating to the education of exceptional children; and providing for an effective date.

SSHB 191 An act relating to school board negotiations with certificated employees.

Other notes or reminders:

ED FUNDS SET AT $15 BILLION

Appropriations for the Dept. of Education have been set at $15 billion for the remainder of fiscal 1983 (to Sept. 30). This is the Senate version of ED funding, about $700 million higher than the House voted. It also is more than $5 billion over President Reagan's initial request for ED.

In the MX missile and jobs program debates that dominated the continuing resolution, little attention was paid to issues in ED funding, with the sentiment in both the House and Senate obviously against the administration's $9.8 billion request for education funding.

Within the ED figure, there are some ups and downs. Chapter I (compensatory education) will receive $3.2 billion, up from $2.74 billion in the 1982 budget (also a continuing resolution). State grants for the handicapped increase from $931 million for 1982 to $970 million.

Chapter II, the block grants, didn't do as well, however, confirming fears that block grants become an easy target for cuts. The House would have held the appropriation at the 1982 figure of $483 million. The Senate amount prevailed, however, which allocates $475 million for the consolidated programs.

Although the House would have been slightly more generous, the new continuing resolution, nevertheless, gives vocational and adult education a big boost--from $743 million in 1982 to $823 million.

Because of protracted budget debates, ED has not had a formal appropriation since 1979, existing instead on a series of continuing resolutions. ED funding is part of the health and human resources appropriation measures, the largest in the federal budget after defense.

BELL KEEPS PUSHING TEACHERS' MERIT PAY

In at least two speeches this month, ED Secy. Terrel Bell has called for a new version of merit pay--an executive-level salary for "master teachers."

Speaking at Teachers College of Columbia U. (N.Y.) and again at the Southern Assn. of Colleges and Schools in Atlanta, the secretary said "we need to bring about the death of teacher salary schedules that allow no deviation or change."

He proposed that elementary schools establish "endowed chairs," like higher education institutions, for outstanding teachers, supplementing their salaries with donations from businesses and other sources. In New York, Bell mentioned a figure of a salary of $40,000 and up for the master teachers.

Bell admitted, however, that such a plan would be difficult to get by the teachers' unions, which have opposed merit pay plans because they say they fear favoritism in such a system.

The reaction of Georgia teacher groups to the proposal when it was made there, for example, was unanimously negative. Merit pay, said a Georgia Assn. of Educators spokesperson, could be used "to punish people who are not cooperative with the administration."

BRIEFLY STATED

- The Dept. of Justice says it will support the Boston Firefighters Union suit to overturn a federal court order requiring dismissal of white employees and retention of blacks with less seniority. A similar order forced Boston to lay off more than 1,000 teachers, but a Boston Teachers Union appeal of the order was rejected by the U.S. Supreme Court.
- The acting administrator of the Office of Juvenile Justice and Delinquency Prevention, Alfred Regnery, assured a House subcommittee hearing last week that he supported his agency's programs. Youth advocates fear that the former aide to conservative Sen. Paul Laxalt (R-Nev.) will seek to end the $70-million program.
- The National Science Foundation will begin a training program for high school math and science teachers next month.

Good teachers deserve a sweeter deal

By David R. Carlin Jr.

A FEW YEARS back, when I was a member of my local school board, I overheard one of our administrators explain that although he had loved being a classroom teacher, his family responsibilities—and his desire for more professional esteem—eventually required that he seek a more lucrative position as a school administrator.

"I was an excellent classroom teacher," he said, "and very much enjoyed my work. Administration, on the other hand, was never my cup of tea. Yet when the chance to become an administrator came along, I had to take it. After all, the pay was so much better than a teacher's pay. As a man with family responsibilities, how could I turn it down?"

It's a classic dilemma many talented and dedicated public school teachers have had to face: Either advance into a managerial position—and cease teaching forever—or remain in the classroom doing the thing you love best and watch others vault over you to positions of higher esteem, influence, and income. This strikes me as a no-win career advancement system. More to the point, I think this promotion system hurts the image of schools, and I suggest we revise it. Here's why:

The image we attempt outwardly to promote about our public school priorities is at odds with the subliminal message we foster. The official line is that the teacher is the key person in the system, the one performing the schools' most important function—helping kids learn from day to day, on a face-to-face basis—with administrators supplying necessary, though perhaps less noble, support.

But our two-tier structure, with administrators above and teachers below, belies this carefully crafted image. When school administrators outrank classroom teachers in prestige, power, and pay, you'd have to be simpleminded, indeed, to believe that teachers belong to the more important group. And I doubt many *teachers* are fooled when we tell them that we regard them, and not their more privileged administrators, as the most important group in the schools.

David R. Carlin Jr., a member of the Rhode Island state senate, teaches sociology at the University of Rhode Island and is a former member of the school board in Newport, R.I.

More significant than any affront or dilemma our two-tier structure causes for teachers, however, is this bilevel system's implied depreciation of teaching. When any social system ranks one group above another, it sends a message that the characteristic activity of one group is considered more valuable than the characteristic activity of the other group. In other words, the structure of our school system implies—regardless of our earnest protestations to the contrary—that we consider the act of teaching inferior to the act of administering.

What follows is worse yet. If the act of teaching is a second-rank activity, then what of teaching's correlate, the act of learning? It, too, our subliminal message says, is an inferior or second-class activity. And don't imagine that students—with those invisible antennae that give them their marvelous capacity for picking up unspoken signals—fail to get this message.

Here's an article you might find controversial. Let us—and your colleagues on school boards across North America—know what you think. Jot down your thoughts about the article on a piece of paper and mail it to *The American School Board* JOURNAL, 1055 Thomas Jefferson St. N.W., Washington, D.C. 20007. We'll peruse your responses and publish a roundup in a future issue.

What can be done to remedy the situation? Surely, we can't eliminate administrators (although inevitably there are moments, usually hours into a difficult board meeting, when every school board member has the ephemeral wish that this could be done). And we probably can't cut administrators' pay and prestige radically, to equalize their lot with that of teachers. Nor, I suppose, can most school systems afford to give teachers radical increases in pay, to raise them to the salary level of administrators.

One solution we might try, however, has proven successful in industries involved in manufacturing high technology products. Some research-and-development people employed by these firms, though committed to advancing in their careers, have no desire to become managers; they prefer to stick with their first loves, science and engineering. Many firms consequently have created two-track systems for career advancement: one track for those who want to abandon research-and-development work to become managers, the other track for those who want to continue being scientists and engineers.

I suggest that public schools try a similar two-track system. In addition to the traditional track, in which a teacher is promoted into administration, we could develop a career track in which a regular classroom teacher would advance to become a "master" teacher, with pay, prestige, and perhaps even influence as great as those of administrators. Not only would a two-track system be a boon to teachers who want to stay in the classroom, but—more significantly—it would broadcast the message that we don't regard teaching and learning as second-rank activities in our schools.

Let me assure you that I'm under no illusion that putting this rather simple idea into practice will be easy. Some tradition-bound taxpayers will resist paying higher salaries to a new class of master teachers, saying, "They didn't have them in my day, and look at me—I turned out just fine."

Teacher unions are likely to be more skeptical of my proposal. They have tended to oppose using any criterion other than seniority to grant advancement, privileges, or extra pay to teachers, and they probably would object to a two-track system on the ground that favoritism, not merit, might determine who moves ahead and who doesn't. To short-circuit this fear, any plan along the lines I've suggested naturally would have to be worked out together with teachers and their unions; it could not be imposed from above. An innovation of this magnitude has no chance of working unless it's supported by teachers, administrators, and board members.

The difficulties inherent in implementing a two-track promotion system are not insurmountable. Considering the probable outcome—retaining creative, motivated, and dedicated classroom teachers and encouraging only the best of the management-oriented teachers to administer schools—we would be remiss *not* to try to narrow the gap between the official doctrine and employment practices. Teachers must be allowed to become first-class citizens in their own school systems. □

BELL SUPPORTS EXTRA PAY FOR "MASTER TEACHERS"

Education Secretary Terrel Bell this week called on states and local schools to upgrade the teaching profession by rewarding outstanding teachers, whom he dubbed "master teachers," with higher pay.

At a news briefing Tuesday afternoon, Bell acknowledged that the prospect of a low salary discourages many would-be teachers, who turn instead to more lucrative professions or trades.

13-YEAR-OLD COMPUTER WHIZ TURNS TABLES ON TEACHERS

That creeping suspicion that students know more about computers than their teachers do is true in Havre, Mont., at least for eighth-grade computer whiz Mike Hamaoka.

The school district has hired Hamaoka, 13, to teach three in-service sessions on computer literacy. He is the only student on the four-member teaching team.

Assistant Superintendent Jim Longin said that in planning the courses he found he had three teachers who were knowledgeable enough about computers to train their peers, but that he needed one more. So he turned to Hamaoka. "I was afraid Mike might be threatened by working with adults or that adults might not like to have stuff laid on them by a kid. We really went through that."

But everything turned out fine in the one session held so far, with "very positive" reactions coming from the teachers, he said. "Mike has the kind of personality that's not at all arrogant. He's a very disciplined kind of guy. The teachers thought it was neat that he was willing to participate."

Everybody Learns Hamaoka is being paid about minimum wage for each of the six-hour sessions, said Longin. He added that, although the salary is less than regular in-service teachers get, the experience is a learning one for Hamaoka.

In an interview between classes at Havre Junior High this week, Hamaoka said he began to study computers in the sixth grade and that he "just kept reading more and more" about them. He also practices on friends' home computers, and finally, he said, "it got to the point where I knew more than most of my teachers."

Longin agreed with that assessment, saying, "He's taken a lot of work with his instructor at the junior high, but he's beyond that." Hamaoka, who has a straight A average and wants to make a career out of computers, also has been researching the subject at the nearby Northern Montana College library and is seeking access to the college's computer system--so far, without luck.

Hamaoka seemed unfazed by the idea of teaching a group of adults, some of whom are his former teachers. He merely said of the ones who had taught him: "We knew each other better." In general, he said, teaching adults is "pretty good, because adults learn faster than kids." --RW

BELL SUPPORTS EXTRA PAY FOR "MASTER TEACHERS" (Cont.)

"We're not attracting the desired numbers of bright and talented people into the teaching profession," he said. Unlike the ranking of college faculty, "we don't have anything in our system beyond the single salary schedule, and we don't have a method of rewarding our truly outstanding teachers."

Master teachers, as Bell conceives them, would be chosen by their peers and would serve as mentors for other teachers and for student teachers. Their rank would enable them to earn "significantly more" than other teachers, perhaps as much as $40,000 a year, Bell said.

Teacher salaries now range from about $11,000 for beginning teachers to top pay of between $20,000 and $25,000, according to Education Department staff. The graduated salary schedule is based on academic credentials and time in the field.

Bell said he had "floated" the idea to two education groups at recent meetings in Atlanta and New York and had got mixed reactions. His plan drew similarly mixed responses from the education community yesterday.

Unions Opposed Teachers unions, which have staunchly defended the existing salary system, were predictably opposed to Bell's notion. "To take a whole occupation that's severely depressed and offer a bonus to a mere handful is just silly," said Albert Shanker, president of the American Federation of Teachers.

Shanker said various schemes for merit pay have been tested in school districts, but all have been abandoned "because they just didn't work. We haven't seen any scheme that would not create more problems than it would solve."

Sharon Robinson, director of instruction and professional development for the National Education Association, called the master teacher idea "a grandstand ploy" and took issue with the ED secretary's model of college ranking and promotion.

In academe, "the tradition of peer review goes hand in hand with faculty participation in governance," Robinson said. "That opportunity has been denied at the elementary and secondary level. If teachers are qualified to decide who is most able, why shouldn't they be part of other policy decisions?"

Some Distinction Needed But a representative of another teachers' group saw things differently. "There needs to be some distinction for teachers who distinguish themselves; I'm all for it," said Jane Christensen, associate executive director of the National Council of Teachers of English and a former Denver schoolteacher. The question, said Christensen and others, is who decides, and on what basis?

The National School Boards Association is generally supportive of the idea "as a way of attracting the most qualified academicians and teachers," although it opposes a national mandate, according to Michael Resnick, NSBA assistant executive director of congressional/government relations. "If well-designed incentives could be instituted equitably, I would support them," agreed William Aldridge, executive director of the National Science Teachers Association.

Nevertheless, education representatives were not as sanguine as Bell that already-strapped states would rush to allocate additional funds for master teachers. Bell Tuesday urged states to make changes in school finance formulas to do so.

Said one disgruntled education association official, who asked not to be identified, "It's just another instance where they [federal officials] want to give advice and not provide any money. They're squeezing the hell out of state and local governments. And now they want them to fork out more?" --HH

NORTH CAROLINA, FLORIDA MOVE TOWARD REFORMS

The North Carolina and Kentucky state boards of education have voted to increase high school graduation requirements to 20 credits, an addition of two.

Beginning next year, North Carolina seniors must complete the extra courses. The board also voted to endorse "in principle" a scholars program to recognize students who earn at least 22 credits and maintain a "B" average.

In Kentucky, the board decided the extra credits should be in English and math. It also will ask the legislature to require beginning teachers to pass a competency test and serve a one-year internship before being certified.

Meanwhile, the Florida Dept. of Education reported it might need a 2% hike in the state sales tax to implement changes proposed by a blue-ribbon panel. The money raised--$1 billion--would be needed to upgrade equipment, update curriculum, recruit and train new math and science teachers and pay them better salaries, it said. But the panel's chairperson said the department was using the report to "pry loose more money.... Ninety percent of our report requires courage, not money," said B. Frank Brown of the Kettering Foundation.

MASTER TEACHER PLAN PROPOSED IN TENNESSEE

Tennessee Gov. Lamar Alexander has been traveling the state urging support for a $210-million, 10-point plan to improve public education, including a master teacher plan with incentive pay.

The plan would set up four career stages--apprentice, professional, senior and master teacher. The first two steps would remain the same as currently. For the third, the state would pay 30% more, and for a master teacher, 60% more. A master teacher would have at least 13 years of experience and additional duties, such as evaluating teachers.

The State Dept. of Education said about 60% of current teachers would be eligible for the master teachers category. They would have to renew their licenses every five years and be recommended by a new Master Teacher Certification Commission. Alexander announced a similar plan for principals which would focus on instructional skills.

STUDENT STRESS SAID NEARLY INTOLERABLE

High school students are under nearly intolerable levels of stress, research presented to the National Assn. of Secondary School Principals annual meeting last week shows.

Beth Jackson, principal of Kentridge Senior High School in Kent, Wash., said a survey of 1,200 10th-to-12th graders turned up as many as 350 "stresspoints," while 140-150 are about normal. The stresses, she said, come from worries about nuclear war, pressure from parents for good grades, peer pressures about drugs and sex and family problems, such as illness or divorce.

As many as one-half of the students reported frequent cases of depression or "blue days" and health problems such as back pain, colds, hives and stomach irritations, Jackson said. She urged educators to help students deal with abnormal amounts of stress through changing diets, increasing exercise and rest, learning relaxation techniques, developing more positive attitudes toward life and learning problem-solving skills.

BEST STUDENTS LOST, WHILE OTHERS GAINED, NAEP SAYS

The better students lost ground academically in the 1970s, while the less-able students made the biggest gains, the National Assessment of Educational Progress reported last week.

In a comparison of assessment scores five years apart, NAEP found the gap between high-achieving and low-achieving students is narrowing. Blacks were more likely to gain although they still remain behind whites.

For example, 9-year-olds in the

Tenn. Governor Presses Master-Teacher Proposal

N.E.A. Affiliate Opposes Concept, Offers Alternative

By Thomas Toch

Correspondent Jim O'Hara contributed to this report.

Gov. Lamar Alexander of Tennessee is mounting a carefully crafted, eclectic lobbying effort to win state legislative approval for his bold plan to introduce a statewide merit-pay system for teachers.

His initiative has attracted the close attention of the two leading national teachers' unions, whose leaders say the passage of the Tennessee plan may kindle similar moves in other states.

After announcing the so-called "master teacher" plan in January, the Governor began touring the state to promote it among civic clubs, parent-teacher associations, and school administrators; he even made the plan the topic of an address to the state manufacturers' association—which has since endorsed it.

12-Person Task Force

A 12-person task force of officials "on loan" from the Governor's office and other state agencies—six of whom have worked on Mr. Alexander's two successful gubernatorial campaigns—has been set up to push the plan. It has established a speakers' bureau and toll-free telephone hotlines, and has spent $17,000 printing and mailing a four-page flier on the 45 most-asked questions about the plan. Some Tennessee state legislators have dubbed the task-force members "Alexander's political operatives."

The Governor also made an unprecedented appearance before a joint meeting of the state's House and Senate education committees in a hearing room packed with supporters of the master-teacher plan, many of whom sported buttons reading "Master Teacher Now."

And Governor Alexander, seeking support beyond the education community, wooed a dozen of Tennessee's top lobbyists with a reception at his executive residence. Representatives of the state's beer, liquor, insurance, grocery, and real-estate industries were among those who heard the Governor's pitch on master teachers.

Local political observers said lobbyists have not been personally courted like that since the days of the administrations of Gov. Frank Clement in the 1950's and 1960's. The reception occasioned quips in the hallways of the state capitol about "master lobbyists."

The Governor's efforts have apparently already paid off. The master-teacher plan, which would replace the state's current two-tier teacher-certification system with a four-level plan designed to identify and reward top-level experienced teachers, has been endorsed by the Tennessee School Boards Association, the Tennessee Principals Study Council, the Tennessee Superintendents Study Council, the Memphis Board of Education, and the Tennessee Children's Services Commission, as well as by the manufacturers' group.

In addition, Mr. Alexander, a Republican, has won support for the master-teacher plan from the leadership of both chambers of the Democratically controlled Tennessee Legislature, and from other influential

Continued on Page 16

Tenn. Governor Presses for Master-Teacher Idea

Continued from Page 1

Democratic legislators.

One prominent Democratic representative, Stephen Cobb, who supported Governor Alexander's unsuccessful Democratic opponent in last November's gubernatorial election, said, "If the Governor is willing to go out on the limb for this one, I'll sit there with him."

Legislation containing Mr. Alexander's master-teacher proposal, as well as nine other less-controversial school-improvement provisions that he is urging, has been submitted by both Democratic and Republican sponsors in both houses of the Tennessee legislature, where they will be referred to the education committees.

Recertification Based on Ability

The Governor's master-teacher plan is based on the principles that better teachers should be paid higher salaries and that teacher certification—in particular, re-certification—should be based on proven ability rather than on academic credentials.

The plan would allow teachers to assume, over a period of years, progressively more responsibility, increased prestige, and considerably higher pay if they meet its standards.

About 15,000 (35 percent) of the state's 46,000 teachers would receive higher salaries under the plan by time it is fully implemented in 1986-87. The estimated cost for the pay supplements is $116.4 million annually.

Governor Alexander has proposed a 1-percent increase in the state's 4.5-percent sales tax to fund the program. And he has promised to veto any general tax increase that is not used to fund the master-teacher plan.

Incentive-Pay Plan

The master-teacher plan, according to Commissioner of Education Robert L. McElrath, began to evolve in January, 1981, when Governor Alexander told the newly appointed commissioner to develop some kind of incentive-pay plan.

The formulation of the plan began last spring, Mr. McElrath said, and was done by Donald England, the state's director of teacher certification; Carol Furtwengler, director of research in the state education department; John Folger and Chester E. Finn Jr. of Vanderbilt University's Institute for Public Policy Studies; and Keel Hunt, an aide to Mr. Alexander.

The group presented the Governor with a general outline of the plan in October.

The committee's support for the potentially controversial certification structure and pay scale was reinforced, according to Mr. McElrath, when members learned that the Carnegie Foundation for the Advancement of Teaching, which will publish a two-year study on public schooling this fall, was considering a recommendation calling for the adoption of similar merit-pay scales in every state.

Mr. McElrath said the four-tier system is similar to the ranking of university faculty.

Outright Rejection

The National Education Association's (N.E.A.) Tennessee affiliate, which represents over 80 percent of the state's 46,000 teachers, is vehemently opposed to the master-teacher section of Mr. Alexander's 10-point school-improvement plan. But, though politically powerful, the union has been almost alone in its outright rejection of the Governor's proposal.

The leaders of the Tennessee Education Association (T.E.A.) have been in daily telephone contact with N.E.A. officials in Washington, according to Sharon Robinson, director of professional development for the N.E.A. Caught off guard by the Governor's initiative, the T.E.A. in less than two weeks drafted an alternative bill, which will be considered by legislative committees this week.

The proposal calls for an across-the-board pay raise of 10 percent for every teacher in the state with a minimum of three years' experience and five years of college education. It would retain the current two-tier teacher-licensing procedure, except that a teacher would be granted the second, more permanent license by a proposed professional certification board controlled by teacher members of N.E.A.

N.E.A. Spent $200,000

The N.E.A. has spent close to $200,000 in the past several months to promote the establishment of similar N.E.A.-dominated certification boards in nine other states—Virginia, Indiana, Michigan, Texas, Arizona, Montana, Kansas, Alabama, and Iowa.

The T.E.A. bill, which also calls for more rigorous admission and graduation standards for teacher-training programs, does not mention incentive pay.

Ms. Robinson said that the N.E.A. is providing technical assistance, but not direct political support, to the T.E.A.'s efforts to defeat the Alexander bill.

Both the N.E.A. and the American Federation of Teachers (A.F.T) are paying close attention to the fate of Governor Alexander's plan.

"Whatever happens in Tennessee will have implications for the rest of the country, so we are watching the situation very carefully," said Marilyn Rauth, director of educational issues for the A.F.T.

The Tennessee Federation of Teachers, which represents a small number of Tennessee teachers, and the Tennessee Federation of Labor have adopted resolutions rejecting Governor Alexander's master-teacher plan.

The A.F.T., Ms. Rauth said, is not opposed to "exploring" the idea of paying superior, experienced teachers higher salaries. Both unions say their fundamental objection to past incentive-pay plans and to Governor Alexander's plan is what they describe as the plans' lack of sufficiently defined, objective criteria for deciding why one teacher should be paid more than another.

The Tennessee plan seeks to address this concern.

It calls for the evaluation of teachers who want to be considered for a higher-grade certificate by master teachers from outside their school system using an "observation instrument" based on research on effective schools now being developed by the state's education department. These master teachers will be appointed by one of three regional certification commissions, which will each have nine members: four master teachers, two master principals, one master supervisor, one person from a higher-education institution in the region, and one lay person.

The regional commissions will in turn report to a 13-member state certification system appointed by the Governor and confirmed by the state Senate and House. Three members of this body will be "distinguished lay persons" and four will be master teachers.

In addition, there will be two master administrators, one master supervisor, two "distinguished" representatives of higher education, and the commissioner of education.

State Commission

Decisions on an applicant for a master-teacher certificate will be made by the state commission. The regional commissions will make the initial recommendations for certification in the cases of apprentice, professional, and senior teachers.

Other procedures for certifying teachers under the master-teacher law would also include a review of evaluations by supervisors and others in authority, a personal interview, consideration of pupil performance, an examination of inservice and other professional-development activities undertaken by applicants, proficiency tests of the teachers' knowledge where applicable, and an assessment of additional criteria for the senior and master candidates.

PAY TEACHERS ACCORDING TO PERFORMANCE

A public school teacher's pay should be tied to classroom performance and not just college credits and seniority, recommends a commission set up by the Maryland State Board of Education to study ways to attract, train and keep high-quality teachers in the Maryland schools.

The panel, which included leaders of the state legislature and county school superintendents as well as parents and teachers, also called for rigorous licensing exams and a two-year internship for new teachers, higher pay for fields where there is a shortage of teachers, and tougher standards in college teacher training programs.

"Teachers in Maryland are under-prepared, under-managed, and under-rewarded," said Stephen W. McNierney, a Baltimore business executive who headed the commission. "No one believes that every teacher does an equally good job. Stop paying them as though you believe that. Above all, clearly and visibly reward superior effort and [teacher] performance."

Its recommendations, which come after 18 months of study, hearings and debate, drew warm praise from the state school Superintendent David Hornbeck but stiff criticism from the state's largest teachers union, the 36,000 member Maryland State Teachers Association.

Hornbeck said the recommendations will lead to better teaching and better learning, and said he would make specific proposals to the state board in December for carrying them out. "In almost any other profession that exists, evaluation is done and those who are superior are paid more," Hornbeck said. "Why should the schools be different? I don't understand that. They do it in colleges every day."

But Janice A. Piccinini, president of MSTA, declared that the proposals were unfair and discriminatory."

"There should be equal pay for equal work," Piccinini said. "There's no objective criteria for determining who is better than whom. We think only good teachers should be in the classroom."

The MSTA is an affiliate of the National Education Association, which has strongly opposed merit pay and licensing exams throughout the country.

One version of such a pay plan was endorsed by the District of Columbia Board of Education a decade ago as part of a school improvement proposal by Psychologist Kenneth B. Clark. Another plan was tried briefly by Montgomery County schools. Both plans were eventually scrapped after being strongly opposed by teacher groups.

Teacher licensing exams, however, have been adopted during the past five years in about 18 states, including Virginia. In Maryland briefer tests in basic reading and mathematic skills are now required in Montgomery and Prince George's counties.

Last winter the Virginia State Board of Education, under prodding from the state legislature, adopted a plan requiring all new teachers to get satisfactory ratings after a two-year provisional period, which is similar to the internship proposal in the Maryland panel's plan.

Only three members of the panel filed a dissenting report - Daniel Collins, Carol Miller and Beverly Stonestreet, all leaders of MSTA.

"It's just mildly outrageous," McNierney, senior vice president of Black and Decker said, "for people in a profession that specializes day after day in grading and evaluating people to say that teachers themselves can't be graded and evaluated."

- Educators Negotiating Service, 11/82

TEACHER QUALITY, DIFFERENTIAL PAY

A five-year program to upgrade standards for all employees in Houston includes pay differentials for teachers in critical shortage subject areas like math and science, "compressed" salary schedules, tests for new teachers and new evaluation procedures to grade teachers in such areas as use of instructional time, ability to motivate students, discipline, classroom management and student test scores.

The district is also developing specified competencies for every job category from custodian to superintendent and testing procedures for existing employees. Those who fail to meet the criteria will be offered extensive training to upgrade their skills.

Under the salary system, teachers who meet proficiency requirements will be placed on an "enhanced" salary schedule, while others will have their salaries frozen. Moreover, the district hopes to "grow its own teachers" by opening two magnet high schools for the teaching profession by the fall of 1983.

April 14, 1983

Re: SSHB191 "An Act Relating to School Board Negotiations with Certificated Employees."

I. NEA-Alaska has several concerns and questions regarding SSHB191.

A. Questions:

1. Is it the intent of the bill to cover all educators or just teachers?

   a). If to cover all educators then a means must be found to include administrative groups and individuals who do not bargain collectively.

   b). If intent to cover only teachers it is inequitable.

2. Is it the intent to find a means to force out incompetent educators? If so it is unnecessary because:

   a). There is in the Department of Education Regulations (Chapter 19) specific statements regarding purpose, scope, method, use and development of evaluation procedures as well as training in the use of those evaluation procedures. The stated purpose of evaluation is to improve the quality of instruction, to facilitate the learning process and "serve as a method for gathering data relevant to subsequent employment status decisions pertaining to the person evaluated (4AAC 19.010)."

   b). Local Boards of Education currently have statutory authority to hire and fire and tenure does not protect incompetent ed-

ucators (AS 14.20.030) (AS 14.20.175).

c). There currently exists in statute clearly defined language for non-retention and dismissal procedings. (AS 14.20.170; 14.20.175; 14.20.180; 14.20.205; 14.20.207).

d). There currently exists in statute provision for a Professional Teaching Practices Act (Section 14 Article 5 and AS 14.20.030) that allows the revocation of certificates held by incompetent educators.

3. Is it the intent to lower education salaries by paying only a few? If so I would point out:

a). AS 14.17.081 requires a minimum expenditure of 55% of its school operating expenditures in each fiscal year on the instructional component of the district budget. The 55% rule includes classroom teachers' salaries in its computation and excludes administrative and classified salaries.

b). 16 school districts were granted waivers in February by the State Board of Education (30.769% of the districts in the state spend less than 55% of their budget on teacher salaries benefits, text books and teaching supplies).

c). Based on the FY 82 audit the most any school district spent on its, instructional component was Juneau at 69.8%.

d). Teacher salaries are not a disporpotionate share of the districts' budgets; they are not comprising even 1/2 of most of the school district' costs.

4. Is it the intent to direct local bargaining? If so I find it ironic that those who cry out for local control in all other matters are so supportive of this bill since it does interfere with local control.

5. What is meant by a general pay scale for all employees?

6. Have the sponsors considered that school districts currently have the right to introduce this concept and relevant language to the bargaining table? It may be significant that the only district to

have bargained the concept and language (Anchorage) has since abandoned it.

B. Concerns:

1. This concept has been tried and rejected in other parts of the country as well as Anchorage:

   a). There is not a single state in the country that has a statewide merit pay plan for teachers in existence today. It was mandated for all school districts in Florida; however, it was later rescinded by the state legislature. The legislature enacted a merit pay plan in the State of New York and later rescinded it. Similar experiences occurred in Delaware, and South Dakota. Studies were conducted in North Carolina in pilot school systems; however, it was concluded that merit pay for teachers should not be implemented statewide.

   b). Experience with merit pay shows that morale is lower; team spirit is lost; competition becomes vicious; joint efforts, team efforts and mutual support disappear; suspicions run rampant; distrust increases; paper work increases; and politics are evident or at least believed to be evident.

2. We believe this concept will distort and diminish the positive uses of evaluation procedures in that it will provide more opportunity for subjectivity, favoritism, harrassment, punishment for personality differences and sycophantic behavior.

3. Opinions vary widely about what constitutes a "good" teacher and what constitutes a "bad" teacher. No one personality is going to please or be effective with all other personalities in any setting and that includes schools.

4. Teachers do not control most of the factors in education generally or in their classrooms. For example we do not control:

   - which students and how many of them are put into our classrooms;

   - access to all of the teaching materials we need (particularly media);

   - who is administrating the schools and districts in which we teach;

- the quality of reliable administrative supports for our efforts;

- support services (secretarial/clerical);

- community support/parental support;

- funds available to the school district;

- and frequently we do not control what classes or grades we will teach.

5. Finally, one might think that "good" teachers would be demanding a merit pay proposal; they are not. Teachers do not support the concept because they recognize the inherent divisiveness, subjectivity, and political ramifications of merit pay. They also recognize that their salaries become dependent on the whims of powerfully placed individuals.

C. Recommendations:

1. NEA-Alaska has long advocated:

a. Evaluation procedures implemented in every district that are:

(1). clearly written;

(2). developed jointly with the teaching staff;

(3). applied equitably;

(4). provide training in their use;

(5). available to the public; and

(6). recorded with the Department of Education.

b. Strengthening teacher training programs:

(1). Earlier and more extensive exposure to classroom experiences for persons aspiring to become teachers;

(2). More rigorous criteria for admission and graduation; and

(3). application of standards to teacher preparation programs and the initial certification of teachers should be governed by the teaching profession.

We believe there are many ways to improve and enhance education and the teaching profession, but we do not believe merit pay is one of those ways. Indeed, we believe and experience has shown, merit pay to impact negatively the educational process and professional relationships. We urge you not to support this concept or this bill.

Respectfully submitted,

Jean Krause

President, NEA-AK
174 South Franklin, #201
Juneau, AK 99801

Dear Jean:

I am aware that you testified before the Legislature last week on merit pay for administrators. What you are probably not aware of is the fact that I was involved in merit pay for principals for two years when I previously served as supervisor for elementary principals in the Anchorage School District. For your information, this provision was included in the negotiated agreement between the principals and the District.

It is interesting to note that while the concept seems to be worthwhile and would probably provide equity in compensation for our administrators, you should also note that the administration of a merit pay plan is cumbersome, inequitable and subjective. I would not recommend merit pay for teachers or administrators now or in the near future.

Should you need further information on the provisions of our merit pay plan, please call me.

Sincerely,

Rita R. Strachan

Anchorage Principals' Association

ANCHORAGE, ALASKA 99501

April 15, 1983

APR - 9 1983

Ms. Jean Krause, President
NEA-Alaska
147 S. Franklin #201
Juneau, Alaska 99801

Dear Ms. Krause:

The Anchorage Principals' Association strongly opposes merit pay. We experienced three years of merit pay during the tenure of our previous negotiated agreement with the Anchorage School District. As a result of this experience, the principals had as their number one priority, during negotiations for our present agreement, the elimination of all merit pay items.

Merit pay drove a wedge between supervisors and staff at all levels. It interferred with effective employee evaluation, making it extremely difficult to maintain a trusting, working relationship between supervisor and subordinates.

In theory, merit pay sounds like a great way to provide incentive and reward for top performance. In practice, it is a means to favor those who follow, without question, and it divides the ranks, causing an atmosphere of mistrust and non-sharing of good, innovative, successful educational and managerial practices.

Respectfully yours,

William Frick

William Frick
President

HB

192

STAFF REPORT

HB 192, PROTECTION OF THE ELDERLY

MARCH 10,1983

Purpose: To protect the elderly from abuse by requiring those working with elderly to report to the Department of Health and Social Services, evidence of abuse when it is observed.

The bill specifies numerous health professionals, and others, who are required to report evidence of abuse. "Abuse" means the infliction of physical pain, injury, or mental anguish, or the deprivation by a caretaker of services that are necessary to maintain the physical and mental health of an elderly person.

The Department of Health and Social Services suggests a change to add the word "willful" before the word "deprivation". The drafter of the bill suggests that since the bill is directed at the reporting of abuse, not the prosecution of those inflicting the abuse, the determination of intent should not be left up to the reporter. Thus, the addition is not necessary.

Failure by those obligated by the bill to report abuse is classed as a "violation" (AS 11.81.900). A violation is a non-criminal offense punishable by fine, but not imprisonment of other penalty. No jury trial or public defender is authorized. In the event that immediate harm seems imminent, the report of abuse must be made to a police officer who must act to protect the subject.

A person making a report of abuse in good faith is immune from civil or criminal liability.

The DHSS must investigate and report on each case of abuse brought to it. The DHSS must provide protective services as are available to the elderly. The Department is authorized to implement regulations to carry out the act. The regulations must be approved by the Older Alaskans Commission.

POSITION PAPER/Department of Health & Social Services

"An Act relating to protection of the elderly."

OVERVIEW

This Bill includes provisions for mandatory reporting of cases of physical harm to elderly persons, investigation of reports of harm by the Department of Health and Social Services, and the offering of appropriate protective services to elderly persons in an effort to prevent or alleviate physical harm.

STATEMENT OF THE PROBLEM

In the past few years there has been increasing awareness across the nation including Alaska, of the problems of elder abuse and neglect, as well as those elderly persons who are unable to protect or care for themselves. In 1981 an Elder Abuse Task Force was created in Anchorage and a pilot project grant was awarded to the Anchorage Community Mental Health Clinic Geriatric Unit to address the issue of elder abuse. In 1982, Elder Abuse Task Forces were created in Fairbanks and Juneau.

Elderly Alaskans in need of protective services are served by the Division of Family and Youth Services under its Adult Protective Service program which serves adults age 18 and over. Adult Protective Services are provided on a voluntary basis by a mandate under Title XX of the Social Security Act. Division social workers respond to voluntary reports of harm, investigate the circumstances of abuse, neglect, and exploitation, and offer appropriate protective services. If an adult client does not consent to services and is not incapacitated as defined under AS 13.26.005, the guardianship statute, the Division has no legal authority to intervene. If, however, an investigation indicates that an adult is incapacitated, the Division may petition the court for a guardian.

Division of Family and Youth Services' staff have actively participated in the Elder Abuse Task Forces. As a part of the Division's Fiscal Year 1983 Adult Protective Services Training Program, the issues of elder abuse, guardianship and conservatorship have been addressed. Community agencies, including programs serving older Alaskans, were invited and participated in these sessions which were conducted in Anchorage, Bethel, Fairbanks, Juneau, Ketchikan, and Nome.

Since reporting of abuse or physical harm to elderly persons is not mandatory, not all known cases are reported to a single agency. As a result, the actual extent of the problem is not known. Should the number of cases reported under the mandatory requirement significantly impact caseloads, the Division will include necessary documentation to

POSITION PAPER/Department of Health & Social Services

support the need for additional staff and service dollars in the FY 85 budget. If additional staff and service dollars become necessary but not available, the Division may not be able to meet the intent of the legislation.

RECOMMENDATION

The Department strongly endorses efforts to promote the independence and well-being of those elderly persons in need of protection. The procedures outlined in the Bill for action on reports, provision of protective services, review and referral, and confidentiality are in accordance with procedures established by the Department of Health and Social Services.

The Department recommends an amendment to Section 47.24.100(2), the definition of abuse. The Department recommends that the definition be amended as follows:

> "abuse" means the infliction of physical pain, injury, or mental anguish, or the willful deprivation by a caretaker of services that are necessary to maintain the physical and mental health of an elderly person.

Office of the Senior Citizen Ombudsman

April 1, 1983

Representative Mae Tischer
Alaska State House
Pouch V
Juneau, Alaska 99811

Dear Ms. Tischer,

Thank you for the time you spent last week listening to my concerns regarding HB-192. Not only was I interested to learn of your views regarding this piece of legislation but as a constituent of yours from Turnagain, I was very interested in hearing your philosophies regarding state government.

As we discussed, I am forwarding some statistics from the Anchorage study which indicates the real need for favorable passage of HB-192 by the Alaska State Legislature.

In 1981 the Anchorage Community Mental Health completed an informal survey of 75 documented cases of Elder Abuse in Anchorage. Conclusions of their study find the abused elder usually is a woman over 70 who lives with an adult child or family member. An abused person in Anchorage is usually more physically independent than on the national level, (40% in Anchorage and 25% nationally.)

Alcohol is more often the cause of abuse in Anchorage than nationally, (49 % in Anchorage and 28% nationally.) Stress caused by medical, psychological and economic factors are statistically comparable.

Two major differences surfaced regarding repeated abuse and the attempt to report abuse. In Anchorage, 90% of abusers repeat abuse whereas, nationally, 58% repeat the abuse. In Anchorage, 53% attempted to seek help versus 95% nationally sought to notify an agency or authority.

Furthermore, the study documented 43.3% of physical abuse compared to other kinds of abuse.

The Anchorage Task Force on Elder Abuse feels that this law will discourage repeated abuse (which we have shown is much more frequent in Anchorage than nationally.) Additionally

1577 "C" Street, Anchorage, Alaska 99501, 279-2232

the Task Force believes that reporting will occur because of the protection of the reporter. (The study also shows that fewer reports are made in Anchorage than are made nationally).

As you know, Alaska has laws which protect children and spouses from abuse but until recently it has not specifically addressed the hidden problem - the problem of elder abuse.

I urge you to vote favorably on the passage of this bill when the opportunity arises. If I can offer further assistance please contact me.

Sincerely,

JUNEAU ELDER ABUSE TASK FORCE
419 6th. St., C.C.S. Wing
Juneau, AK. 99801

Position Paper
House Bill 192
3/14/83

The Juneau Elder Abuse Task Force is an organization formed in response to the recognition of elder abuse as a serious problem nationwide and in the Juneau area. We organized in September of 1982 after a comprehensive training on Elder Abuse sponsored by the Older Alaskans Commission. The Task Force is comprised of representatives from 19 agencies in the Juneau area which provide a wide range of services including: social services, substance abuse prevention, health care, nursing home care, law enforcement, domestic violence and sexual assault programs, legal services, senior services and homemaker services.

Agencies represented on the Task Force have had comprehensive experience working with elders in the Juneau area and in outlying communities. Many agencies have specific experience in cases of elder abuse and neglect. Most agencies' staff provide direct service, in one form or another, to elders. All agencies have knowledge and expertise as well as sensitivity regarding the needs of elders.

Based on our experience and expertise in the field of elder abuse, the Juneau Elder Abuse Task Force offers the following comments and recommendations regarding HB 192.

1. In Chapter 24, Sec. 47.24.010 (a)(6), page 2, line 5, we recommend that Village Public Safety Officers (VPSOs) be specifically included with police officers and that the definition of "police officers" be broadened by referencing to AS 01.10.060(6) rather than the narrow definition in AS 18.65.290(2). The reason for this is that in rural areas, law enforcement officers are usually not formal police officers and are instead VPSOs or other officers of lesser authority. This change will encourage maximum reporting of elder harm.

2. In Chapter 24, Sec. 47.24.010(7), page 2, line 6 we recommend that home health aides and homemakers be included with village health aides. Again, our purpose here is to cover all professionals working with elders and to encourage maximum reporting.

3. In Chapter 24, Sec. 47.24.010(e) on page 3 at line 1 we recommend that VPSO be inserted after police officer and that the definition of police officer be referenced to AS 01.10.060(6). (See our #1 recommendation for rationale). Further, we recommend that there be only one sentence rather than two and that the word "and" be inserted between the statute and "The police" so that it is clear that the police must take immediate action to protect the elder from imminent physical harm.

4. In Chapter 24, Sec. 47.24.020(a) on page 3, at lines 13 and 14 we recommend that the words "make a reasonable effort to..." be deleted and that on line 15 the words "unless the elderly person refuses to participate in the interview" be added. We feel that unless the elderly person does not wish to participate in the interview, the department should personally interview the elderly person during an investigation of abuse. This is recommended because an investigation would be ineffectual and superficial if the victim was not interviewed.

5. In Chapter 24, Sec. 47.24.030(b), on page 4 at lines 7 through 11 we recommend that language be inserted to the effect that the Department of Law will assist the elder in securing an injuction against a caretaker who is interfering with the provision of protective services. This is recommended because otherwise, the section is vague and it is unclear as to how the Department could assist the elder in legal proceedings. An alternative to inserting this language would be to address this issue in the regulations that will be drafted under Sec. 47.24.070 of this bill. Whether through the regulations or in this bill, the Task Force felt that the Department should have instructions as to how elders will be assisted.

6. In Chapter 24, Sec. 47.24.040 on page 4 at line 13 we recommend that 45 days be inserted and 90 days be deleted unless this will create undue fiscal burden. We make this recommendation because 90 days is an awfully long time to wait before reviewing a case and may allow for inadequate monitoring of protection provided to an elder.

7. In Chapter 24, Sec. 47.24.070 on page 5 at lines 7 through 9 we strongly support the requirement that the Older Alaskans Commission approve regulations to implement Chapter 24.

8. In Chapter 24, Sec. 47.24.100(2) on page 5 at lines 22 through 25 we recommend that the words "...by a caretaker" on line 23 be deleted. We make this recommendation based on the direct experience of many Task Force members that persons other than caretakers often deprive elders of money, food, possessions, etc. It has come to our attention that the Department of Health and Social Services and the Older Alaskans Commission may recommend that the word "willful" be inserted in line 23 between "the" and "deprivation". We are opposed to this addition because adding "willful" will create significant proof problems in any case of illegal elder abuse. Rather, to address the issues of unintentional abuse or harm caused to an elder due to poverty of caretakers, we recommend that language addressing the problem of poverty and consequent harm to elders be inserted as an exception to "abuse".

9. In Chapter 24, Sec. 47.24.100(7) on page 6, line 10 we recommend that the words "...an elderly person or ..." be deleted so that neglect is only actionable when it is caused by an elderly person's caretaker. We recommend this to protect the freedom of choice regarding lifestyle and the right to privacy of elderly persons.

In general, the Task Force supports the purpose, intent and principle of HB192. We only offer the few preceding comments to make the proposed legislation as good and as effective as it can possibly be. Thank you for considering our comments.

OLDER ALASKANS COMMISSION
POSITION PAPER

Senate Bill 122 / House Bill 192
"An Act relating to protection of the elderly"

The Older Alaskans Commission urges passage of this legislation in order to provide protection and assistance to older persons who are unable to care for themselves.

Twenty other states currently have mandatory reporting laws for elderly abuse. During the past year both Delaware and New Mexico have passed this type of legislation. The Commission feels that mandatory reporting is essential in order to reach vulnerable persons who may be physically, psychologically or financially unable to help themselves.

Historically elder abuse has been a hidden social problem but it is one that is encounterered statewide by Commission funded senior projects. The Commissions senior ombudsman program received sixteen reports of abuse during FY 1982.

In 1981 the Administration on Aging funded a study of elder abuse in Anchorage through the Commission. Twenty agencies surveyed by the Anchorage Community Health Center for this study reported contacts with elder abuse cases. Seventy-five cases of elder abuse were reported in all. In 75% of these cases, the abuse had been going on for some time. In 53% of the cases the victims did seek help. The remaining victims who did not seek help are significant to the passage of this legislation.

The Commission recommends that "willful" be inserted before "deprivation" under Definitions, Sec. 47.24.100, (2) line 25. The purpose of this insertion is to ensure that poverty and other circumstances beyond a caretaker's control will not be considered as abuse. Staff also questions the intent of line 13 in Section 47.24.020 which states "The Department shall make every reasonable effort to personally interview the elderly person during the investigation". This could be construed to imply that the Department could make decisions about an abused person without contacting him.

The Commission is aware that a major criticism of elderly abuse mandatory reporting laws is that the necessary services may not be in place to meet the demand for them. The Commission does not concur. Elder abuse is not a problem that can denied or ignored. We hope to work closely with DFYS to assist in putting those necessary services in place.

We ask your support of this bill and in making the health and dignity of our elderly a major state priority.

ELDER ABUSE IN ANCHORAGE, ALASKA

ELDER ABUSE IN ANCHORAGE, ALASKA

Teri Spires, B.S. and Charles Mundorff, M.S.

Anchorage Community Mental Health Center, Anchorage, Alaska

This study was done in response to the phenomenon of elder abuse in the State of Alaska. This particular study, focused in the Anchorage area, was designed to assist in establishing perameters to the problem. Thirty agencies, 16 physicians, and four medical clinics were contacted. Seventy-five cases of elder abuse were documented. There were 34 cases of physical abuse, 53 cases of psychological abuse, 43 cases of material abuse and 18 cases of violation of rights.

Introduction

Abuse of the elderly by their spouse, family or caretaker is a problem often observed by service providers in the Anchorage area. Elder abuse in the past has not been addressed as a specific issue in Anchorage until the last year. Previous to this study, no research had been done in Alaska, but nationally a few studies have been conducted. These studies provide a good data base that exposes the incidence of elder abuse and the need for concern in our society. Unfortunately, elder abuse has not been addressed in Alaskan domestic violence programs. Consequently, the Region X Office on Aging targeted Anchorage as a pilot city for study and community planning in elder abuse.

In November 1980 a meeting of representatives from Alaska, Idaho, Washington and Oregon was called by Chisato Kawabori (Ph.D.), Director of Region X Aging Network, and Willard Mollerstrom (Ph.D.), Region X Director of N.I.M.H. Charles Mundorff of Anchorage Community Mental Health Center (A.C.M.H.C.) attended this meeting in Seattle. At this meeting, A.C.M.H.C. was considered a focal point for the problem of elder abuse in the State of Alaska.

At this time, A.C.M.H.C. was given the opportunity to receive a VISTA (Volunteer in Service to America) to research the problem and make recommendations for mental health programming for abused elders. The following study is a result of the VISTA's effort. These findings are compared to national results in order to lend a clear picture to service providers. This procedure will help determine any differences between Alaska and other states.

National Findings

Three major elder abuse studies have been done since 1979. They are from Boston, The University of Maryland and the University of Michigan. The latter were partially funded by the federal government. In June of 1979 there was a briefing by the House of Representatives Select Committee on Aging entitled Elder Abuse: The Hidden Problem. This briefing was held in Boston, Massachusetts. On April 28, 1980, a briefing on the same subject, domestic abuse of the elderly, was held in Union, New Jersey. The early research findings of these efforts are remarkably consistent, despite great differences in research approaches and settings.

The major studies of elder abuse point out the tentativeness of their results. Yet, the completed studies provide an excellent approach to the problem, and a profile of the victim and the abuser emerges.

The Massachusetts study, Block's Battered Elder Syndrome, and the Lau-Kosberg study points out the victim tends to be an older elderly person. The Massachusetts survey finds 55% of the citings are persons older than 75 years. All three studies agree that abuse is observed to be of elderly women (87% in Lau-Kosberg, 80% in Massachusetts, and 81% in The Battered Elder Syndrome. The majority of victims live with an adult child or other family members who become the abuser.

Usually the victims suffer from one or more disabilities which place them in a vulnerable position. Of the Massachusetts study respondents, 75% said the victim had physical or mental disabilities which kept him or her from meeting basic daily needs. Marilyn Block finds 62% of the victims could not prepare food, 54% could not self-medicate, and 62% needed help with personal hygiene. Besides physical impairment Lau and Kosberg report 41% are either partially or totally confused or senile. It is easy to imagine from the research that a victim of abuse is usually a person who may need constant attention and skilled care. These two factors can and do cause stress for the caretaker, who is at risk of becoming an abuser.

The Massachusetts survey finds in 75% of the abuse cases, the abuser lives with the victim; 86% of the abusers are relatives of the victim. The Battered Elder Syndrome finds close correlation: 81% of the abusers are related to the victim. Block also finds women, more often than men, are abusers. The figure cited is 58% of abusers are female. The Massachusetts study finds sons (24%), husbands (20%), and daughters (15%), make up the largest categories of abusive relatives. Lau and Kosberg find 30% of abusers are daughters, 14% are sons, 14% are grand-daughters, 12% are spouses, and 12% are siblings (usually a sister).

The Massachusets study finds the abuser is usually experiencing stress when the abuse occurs. The study finds 28% suffer from alcoholism or drug addiction, 18% complain of long-term medical problems, 16% struggle with long-term financial stress and 9% suffered from lack of needed services. The Battered Elder Syndrome points to psychological (58%) and economic (31%) factors leading to abuse. The Massachusetts survey finds 63% of respondents feel that the vulnerable elder,

requiring a high level of emotional and financial support, is a source of stress. In 58% of cases studied, abusers tend to repeat the abuse, according to Block.

One of the most remarkable statistics to come out of these studies has to do with the attempt to make cases of abuse known. Block finds in 95% of the cases studied, some attempt was made to communicate the existence of neglect or abuse to some authority. This fact points to the poor communication skills of the abuser and to the low self-esteem he or she may feel. After a failed attempt to get needed services, the abuser may give up. After a failed attempt to get help, the victim may, out of fear of reprisal, or removal from the home, resolve to live with the situation. This fact also points out the failure of social services systems to recognize cries for help from both the victim and the abuser.

Methods and Designs

From March 1, 1980 to June 30, 1981, A.C.M.H.C. conducted a survey of service providers concerning elder abuse. Thirty agencies, four clinics and 16 physicians were contacted.

Those who said they had seen cases were further contacted. They were asked to relate cases they had seen from January 1, 1980 to June 30, 1981. They were asked to give the first name and last initial of each person in every case. This was done to prevent duplication of information from agency to agency.

The cases were recorded on the form used by Marilyn Block and Janice Davidson in their study, The Battered Edler Syndrome. All questions were asked for each case (see Appendix A). One additional question was asked of each respondent concerning every case: is alcohol a problem in the situation?

The definition of elder abuse used in this study is the one used by Marilyn Block and Janice Davidson in their study.

Abuse refers to one or more of the following acts:

> physical abuse, including direct beatings, lack of food, lack of medical care, and lack of supervision;
>
> psychological abuse, including verbal assault, threat, fear, and isolation;
>
> material abuse, including theft or misuse of money or property and;
>
> violation of rights, including forced removal from home, or forced entry into a nursing home.

We are concerned with people who are 60 years or older. These are people who are in some way dependent on a son, daughter, other relatives or caretaker.

There is a high degree of interviewer reliability since only one person conducts the interviews. Agency contacts, mailings and interviews were all done by the same person.

The data obtained from the survey is summed and the percentages calculated. Thus the data is descriptive in nature and not intended to be baseline data. It must be stressed that the figures obtained from the agency contacts are estimates of what the professional feels are abusive situations. Estimated are based on second-hand knowledge so these results cannot be generalized beyond the agencies cooperating.

Results

Two major groups were contacted for this study. First, 30 agencies who showed an interest in senior citizens or are service providers were initially interviewed in order to assess which agencies had seen cases

they were willing to relate. The following is the contact list and some preliminary information about each (see below).

Agency Contacted	a.	b.	c.
1. Salvation Army	11	yes	yes
2. Nakoyia	2	yes	yes

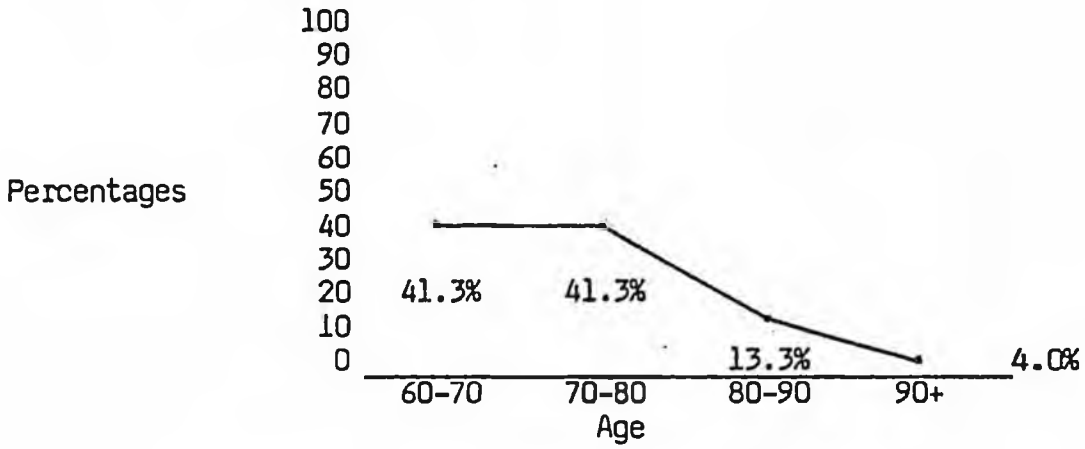
30. AK. Public Interest Research Group	2	yes	no

Key to Headings:

a. Number of persons contacted.
b. Does agency feel that elder abuse is a problem in Anchorage at this time?
c. Has agency seen any abuse cases since January, 1980?



*1. No record-keeping methods.

The second group contacted were physicians and clinics. A letter (see Appendix B) was sent to 16 physicians and four medical clinics. The names of 12 of the physicians were given to A.C.M.H.C. by the Municipal Senior Citizens Division. These physicians treat many older people or have expressed an interest in aging patients. The letter asked the physician or clinic to relate any cases of elder abuse they may have seen. Of the twenty contacted, none responded.

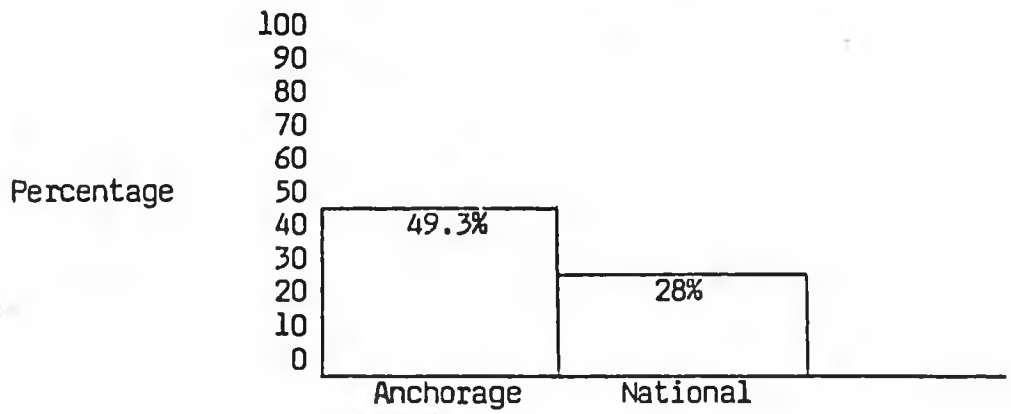
Twenty agencies related elder abuse cases. Seventy-five in all were related to the interviewer. This breaks down to an average of 3.75 cases per agency. The most cases in one agency was eight, the least was one. Of the 75 cases reported, 34 or 43.3% had some element of physical abuse. The most common physical abuse is not violent in nature. Lack of personal care constitutes 17.3%, bruises and welts 13.3% and lack of food 10.7%. The remaining percentage in all categories are found in Appendix C. Psychological abuse is found in 53 cases or 70%. Material abuse occurs in 43 cases or 57.3%. There is violation of rights in 18 cases or 24%.

The age of the abused elder in the Anchorage area is younger than in the Lower 48. Unlike the national studies, the exact ages of the victims can not be determined. Most professionals know only the general range of their client's age. Of the 75 cases, 82.6% were under 80 years. This statistic is not surprising considering the general youth of the Anchorage population. The abuser in our area is also younger than in other urban areas. The abuser is under 50 years old in 65.4% of the cases related to the interviewer.

Figure I. Percentage of Abused by Age

The abused elder is most likely to be female. In 76% of the cases the victim is a woman. This percentage is comparable to the national statistics. Also similar to the national statistic is the sex of the abuser. In Anchorage 53.4% of the abusers are women. In Marilyn Block's study 58% of the abusers are women. Daughters are first on the list at 22.7%, sons second at 21.3%, husbands are third at 10.7% and daughters-in-law are fourth at 9.3%.

The abused elder is most often observed to be White (69.3%). The statistic for the Native population is 18.7%; the Black population figure is 9.3%; and the Hispanic figure is 1.3%. Because the elder in most cases lives with a spouse or family member (55%), the statistic concerning the ethnic group of the abuser is almost exactly the same as the victim.



In most cases given to us, both the victim and abuser are low-income. Of the 75 cases, 54% of the victims and 44% of the abusers fit this category.

A question concerning the impairment of the victim was asked of all respondents. In 38.7% of the cases the abused elder is physically or mentally disabled to a great degree. In 21.3% of the cases the person

needed assistance with the Activities of Daily Living. In 40% of the cases the victim is physically self-sufficient.

Alcohol as a contributing factor in elder abuse seems to be a much greater problem in Anchorage than other areas. The national statistic is 28%, and in Anchorage it is 49.3%.

Figure II. Percentage of Alcohol as a Contributing Factor

In most of the cases observed (74.7%) the abuse had been going on for a long time. In some cases the abuse continued for years. In 53% of the cases the victim did seek help. But, just as significantly, 41.3% of the cases had not asked for assistance. The agencies responding found out about the abuse in any number of ways. The most common way was from the client (49.3%). Other reporting sources were hospitals or clinics (27.2%), private physicians (5.3%) and public or private social service agencies (12%). The agencies, when contacted by a reporting source, in most cases, responded to the victim with the services that the agency provides. In some cases the agency referred the clients to other agencies that could respond to other areas of need. Case studies are an excellent way to better understand how cases were being handled at the time of the survey.

Conclusions and Recommendations

From the study done by A.C.M.H.C. several conclusions and recommendations can be made. Most results are similar to the national statistics, but there are some differences.

The abused elder in the Anchorage area is most likely to be a White, low-income woman over 70. She lives with an adult child or family member. A person in Anchorage is more likely to be physically independent than the national counterpart. The abuser is apt to be a middle aged White, low-income woman. In a sense, she is a victim of her situation. In many cases she is experiencing stress due to crowded living conditions, inadequate income, health problems, ignorance about services and feeling as if she is parenting a parent.

These stresses can result in many kinds of abuse. Physical mistreatment is clearly acknowledged as abuse. The results of physical abuse are more obvious and often deemed more serious than the results of other types of abuse. Psychological abuse may be less obvious but it is no less damaging to the elderly person. Cases of psychological abuse were sited far more frequently than other types. All 20 agencies reported cases involving some form of psychological abuse. Of the 75 cases of elder abuse, 70% involved this abuse.

The dependence of elderly people on others leaves their financial affairs open to misuse and theft. Because some elderly feel as if they are a burden or they may be left alone, they do not always move to remedy a case of economic abuse. In Alaska, the existence of the longevity bonus, native claims settlement payments and a high incidence of alcohol abuse make elders prime candidates for financial exploitation by caretakers.

Alcohol as a contributing factor to elder abuse is much greater than in other areas of the United States. Alcohol abuse is not limited to the

abuser. In some cases the elder abuse victim misuses alcohol and in other situations it is family-wide. A.C.M.H.C. as well as other service providers feel that this possibility should be considered when providing services to abused elders and caretakers.

Agencies surveyed believe that there are some things that can be done that would help them deal more effectively with the problem of elder abuse. A list of these actions follows:

1. An elder abuse mandatory reporting law.
2. Improving low-income housing opportunities for the elderly.
3. Beginning an adult day care center in the Anchorage area.
4. Some provisions for in-home respite care.
5. More staff for protective services.

There was one major problem in doing a study of this nature in Alaska. The group studies is age 60 and older. The older native population has a gap in that age group because many of that generation died during the tuberculosis epidemic. There is a lack of information concerning elder native Alaskans because of this factor.

Though some conclusions about abusers and victims can be made, these people come from any race, social or income group. The elder abuse cases given to the A.C.M.H.C. are only a few of the cases that enter the social service system. The real numbers are still to be discovered. Through a pilot project, A.C.M.H.C. is launching a concentrated program of public education. We hope to encourage a public awareness that will foster voluntary reporting by service providers and the general public. We are far from solving the problems of elder abuse, but by using some of the same methods used by child abuse researchers in the 1960's we hope to gain a better understanding of and form a methodology for dealing with the serious social problem of elder abuse.

APPENDIX B

LETTER TO PHYSICIANS AND CLINICS

Dear Doctor:

During the last few months Anchorage Community Mental Health Center has been researching the problem of elder abuse in the Anchorage area. We are very interested in any experience you may have had with your patients or their families. The information is purely for research purposes. Names are not necessary and all reports are confidential.

We are using the definition used by Marilyn R. Block and Janice L. Davidson in their study The Battered Elder Syndrome.

Abuse refers to one or more of the following acts:

physical abuse, including direct beatings, lack of food, lack of medical care, and lack of supervision;

psychological abuse, including verbal assault, threat, fear and isolation;

material abuse, including theft or misuse of money or property and

violation of rights, including forced removal from home, or forced entry into a nursing home.

When you are searching your mind for cases that you believe may qualify as elder abuse, keep in mind that the age we are referring to is 60 or older. These are people who are in some way dependent on a son, daughter, or other relative or caretaker.

Any response or comment by you is considered essential to this study. Please call me by August 21, 1981 at A.C.M.H.C. 276-5400.

ACTION NARRATIVE

TAPE#20
Recording
Number 0001 Co-Chair Tischer called the meeting to order at 1:11 p.m. Representatives Fritz, M. Miller and Koponen were present. Representative Davis arrived at 1:22 p.m. Representatives Cato and Goll were excused due to illness. Co-Chair Tischer announced the committee calendar and then called for testimony on CSSB 96.

Number 0038 Dr. E.S. Rabeau, Department of Health & Social Services, said the the Department supports CSSB 96, which causes a delete-add appropriation from the surplus funds. Dr. Rabeau urged quick passage of the bill in order to prevent pulling money from other funds to cover testing and vaccinating activities which have already begun.

Number 0070 Dr. Rabeau explained that the money involved in implementing CSSB 96 would come from surplus funds not the permanent fund.

Number 0121 Rep. Fritz moved to pass CSSB 96 out of committee with a do pass recommendation. There being no objection, the motion passed.

Number 0137 General discussion regarding Hepatitis-B vaccinations and testing.

Number 0155 Co-Chair Tischer read the names of individuals available for questioning during the work session on HB 192 and invited Rep. Clocksin, sponsor of HB 192, to address the committee.

Number 0180 Rep. Clocksin testified in favor of HB 192; spoke to proposed HB 192 amendments. Rep.

Clocksin supported deleting the word "employees" on Page 2, Line 2 and adding subsections (11) Village Public Safety Officers, (12) Emergency Medical Technicians and Mobile Intensive Care Paramedics, (13) persons under Homemaker and Home Health Aide Programs to Page 2 after Line 9.

Number 0227 — Rep. Tischer questioned the inclusion of "conservators" on Page 2, Line 4. Rep. Clocksin explained that conservators are appointed and thereby responsible by law for the protection and care of one unable to care for him or herself.

Number 0254 — Rep. Clocksin reported that physicians assistants are also required to report elder abuse under HB 192.

Number 0263 — Rep. Clocksin pointed out the necessity of carrying over previous amendments to Page 3, Section (e) to include "Village Public Safety Officers". Rep. Clocksin also favored eliminating the requirement of a "reasonable effort" on Page 3, Line 13 and substituting the following language change: The department shall personally interview the elderly person during the investigation unless the person is unconscious or otherwise physically or mentally impaired to such an extent as to be unable to respond to questions.

Number 0290 — Rep. Clocksin recommended deleting the phrase "that is certified by the state" on Page 5, Line 1.

Number 0332 — After discussion regarding the question of privilege, Rep. Clocksin responded that privilege is designed for doctor-patient confidentiality and informed the committee that the Senate deleted the entire privilege section (47.24.075). Rep. Clocksin suggested adding the following language instead: The physician-patient privilege and psychotherapist-patient privilege are waived to the extent that AS 47.24.010 and 020 require reporting of abuse, neglect or abandonment. Dr. Fritz agreed with the intention to waive the privilege for the purpose of reporting the abuse only.

Number 0362 — Discussion regarding child abuse laws and reporting mandates. Rep. Tischer suggested

comparing child abuse laws with HB 192 in order to promote uniformity.

Number 0370 — Rep. Clocksin spoke in favor of changing the definition of abuse by inserting "requiring medical treatment" after "anguish" and deleting the phrase "by a caretaker" on Page 5, Line 23.

Number 0436 — Rep. Clocksin's amendment was submitted with the intent that "requiring medical treatment" apply only to "mental anguish".

Number 0454 — Rep. Clocksin supported deleting "by an elderly person or" on Page 6, Line 10.

Number 0470 — Rep. Clocksin testified in opposition to a proposed amendment which would add "willful" before the word "deprivation" on Page 5, Line 23. Rep. Clocksin explained that the purpose of that definition relates to reporting abuse not determining its criminal nature.

Number 0509 — According to Rep. Clocksin, there are 3 possible courses of action under HB 192; criminal prosecution, investigation by the department and subsequent provision of protection services, and the decision that the claim is unfounded.

Number 0553 — In response to Rep. Tischer's stated concerns with unnecessary program expansion and false reports of abuse, Rep. Clocksin explained the bill's minimal fiscal impact and stated that new services will be provided only when justified by statistics. As such, he asserted that HB 192 requires and provides for documentation.

Number 0580 — Discussion regarding the need for HB 192. Rep. Clocksin cited an Anchorage study on elder abuse and the many unreported cases.

Number 0600 — Rep. Clocksin mentioned a Senate proposal which mandates reporting all elder abuse to the prosecutor in the Department of Law. Rep. Clocksin said he had no position on the proposal; however, he expressed concern with unnecessarily burdening the prosecutor with too many reports.

Number 0650 — General discussion about regulation changes.

number 0672	Rep. Davis moved to amend HB 192 as proposed by Rep. Clocksin. Co-Chair Tischer asked Rep. Davis to withdraw his motion and suggested letting staff members draw up a Committee Substitute for the committee's review. Rep. Davis withdrew the motion.
Number 0696	Rep. M. Miller moved to insert "willful" before "deprivation" on Page 5, Line 23, and then withdrew his motion. Rep. M. Miller then moved to insert "intentional" before "deprivation" on Page 5, Line 23. Rep. Davis objected.
Number 0708	Rep. Tischer called for a roll call vote on the motion. The motion to insert "intentional" passed by a vote of 3 to 2. HESS Committee staff was then instructed to draft a Committee Substitute for HB 192 to address amendments proposed by Rep. Clocksin.
Number 0725	Discussion regarding Section 47.24.075.
Number 0750	General discussion about the definition of an elderly person on Page 6, Line 3.
Number 0790	Rep. M. Miller moved to amend the 60-year age requirement to 65 years of age. Discussion followed.
Number 0851	Co-Chair Tischer moved the previous question. The motion to change "60" to "65" on Page 6, Line 3 passed by a 3 to 2 vote.
Number 0874	Rep. Tischer commented on definitions of mental health and read the definition of neglect under child abuse laws.
Number 0891	Rep. M. Miller expressed concern over the definition of mental anguish.
Number 0944	Rep. Fritz requested information on elder abuse laws in other states.
Number 0980	The committee discussed the fiscal note for HB 192.
Number 1013	Rep. Tischer commented on reasonable cause. Discussion led to the conclusion that reasonable cause is already identified by law, consequently it is not necessary to include it in HB 192.

Number 1023 The meeting adjourned at 2:45 p.m.

HOUSE HEALTH, EDUCATION & SOCIAL SERVICES
STANDING COMMITTEE
March 14, 1983
1:00 p.m.

Members Present: Rep. Fritz, Co-Chair
Rep. Tischer, Co-Chair
Rep. M.W.Miller, Vice-Chair
Rep. Cato
Rep. Goll
Rep. Davis

Members Absent: Rep. Koponen

COMMITTEE CALENDAR

HB 117: "An Act relating to sexual abuse of a minor."

HB 107: "An Act relating to the right to a natural death."

HB 192: "An Act relating to protection of the elderly."

WITNESS REGISTER

Rep. Clocksin
State Capitol Building
Pouch V
Juneau, Alaska 99811
465-3704
Position Statement: Sponsor of HB 107 and HB 192.

Dr. Rodmar Wilson
Department of Health & Environmental Protection
Box 6-650
Anchorage, Alaska 99502
264-4621
Position Statement: Agreed with the concept of not prolonging death; said that HB 107 would be meddlesome; disapproved of HB 107 because of the possibility of a patient changing his/her mind.

Prent Gazaway
1521 W. 14th
Anchorage, Alaska 99501
277-2073
Position Statement: Urged quick passage of HB 107; stated support for HB 192.

Delcey Kinny
Alaskans for Life
9118 Nagoon
Juneau, Alaska 99801
789-0683
Position Statement: Testified against HB 107; explained her opposition to the living will concept.

Florence Orr
3000 E. 15th Avenue
Anchorage, Alaska 99501
279-3001
Position Statement: Said the living will has been a legislative priority of the Older Persons Action Group for 2 years.

Irene Hedstrom
1521 N. Street
Anchorage, Alaska 99501
Position Statement: Supported HB 107; disagreed with prolonging life when no hope for recovery exists.

Lola Reed
831 W. 19th
Anchorage, Alaska 99503
279-3006
Position Statement: Testified in favor HB 107; asserted that HB 107 grants people the right to choose a natural death.

Theodore Grahm
Chugiak Senior Center
Chugiak, Alaska
688-2677
Position Statement: Stated that Chugiak senior citizens support HB 107; endorsed the passage of HB 192.

Pasquale M. Benigno
9715 Trapper's Lane
Juneau, Alaska 99801
Position Statement: Spoke against HB 107; argued that people already have the right to a natural death.

Virginia Blanchard
923 W. 11th Avenue
Anchorage, Alaska 99501
276-3075
Position Statement: Supported HB 107; reminded previous witnesses that participation in the program is voluntary.

Dr. E.S. Rabeau
Division of Public Health
Department of Health & Social Services

Pouch H-06
Juneau, Alaska 99811
465-3090
Position Statement: Testified that the Department supports the intent of HB 107; agreed that the bill addresses patients' rights.

Dove M. Kull
Older Alaskans Commission
326 4th Street
Juneau, Alaska 99801
586-2670
Position Statement: Supported passage of HB 107;testified to the immediate need for HB 192.

Mary Horton
2516 Scott Drive
Juneau, Alaska 99801
789-9222
Position Statement: Contested the need for HB 107.

Lou Osmond
Pioneers Home
923 W. 11th Avenue
Anchorage, Alaska 99501
276-3414
Position Statement: Spoke in favor of HB 107.

Leona Pfisterer
Pioneers Home
923 W. 11th Avenue
Anchorage, Alaska 99501
276-3414
Position Statement: Approved HB 107; testified to the emotional and practical costs of keeping people alive with extraordinary means.

Margot Dick
Juneau Elder Abuse Task Force
419 6th Street
C.C.S. Wing
Juneau, Alaska 99801
586-6233
Position Statement: Supported HB 192; presented an overview of Task Force recommendations.

Charles Mundorf
Alaska Community Mental Health Center
120 E. 4th Street
Anchorage, Alaska 99501
276-5400
Position Statement: Testified to the need for HB 192.

Elizabeth Muktarian

Department of Health & Social Services
Pouch H05
Juneau, Alaska 99811
465-3208
Position Statement: Spoke for the Department in favor of passing HB 192; recommended amending the definition of abuse on Page 5, Lines 22-25 of Sec. 47.24.100.

Tom Scott
1135 W. 8th, #7
Anchorage, Alaska 99501
274-3651
Position Statement: Recommended amending the list of health care providers in HB 192.

Dennis Murray
Senior Citizens of Kodiak
Box 315
Kodiak, Alaska 99615
486-6181
Position Statement: Supported HB 192; said it heightens awareness of elder abuse and provides a mechanism for dealing with the problem.

Dennis DeWitt
Alaska State Hospital Association
319 Seward
Juneau, Alaska 99801
Position Statement: Presented recommendations for possible amendments to HB 192; called attention to possible problems with multiple reporting and the privilege clause.

Barbara McPherson
Older Alaskans Commission
Pouch C
Juneau, Alaska 99803
465-3250
Position Statement: Stated the commission's support for passage of HB 192; recommended adding the word "willful" to the definition of abuse; supported previous comments on multiple reporting and the privilege clause.

Beth Bishop
Southeast Senior Services
4181 6th Street
C.C.S. Wing
Juneau, Alaska 99801
586-6233
Position Statement: Supported HB 192 and language changes addressing the possibility of multiple reporting; disapproved of adding "willful"

to the definition of abuse.

Rosemary Haffner
615 H Street
Anchorage, Alaska 99501
272-9431
Position Statement: Conveyed support of the Ombudsman for HB 192; opposed adding "willful" to the definition of abuse; stated that multiple reporting could be addressed through regulations.

PREVIOUS ACTION

HB 117: 1/26/83 - First Reading.

Committee referrals - HESS, Judiciary, Finance and Rules Committees.

See HESS minutes of February 9 and 28, and March 11, 1983.

HB 107: 1/21/83 - First Reading.

Committee referrals - HESS, Judiciary and Rules Committees.

No previous action in HESS Committee.

HB 192: 2/11/83 - First Reading.

Committee referrals - HESS, Finance and Rules Committees.

No previous action in HESS Committee.

ACTION NARRATIVE

TAPE#18
Recording
Number 0001 Co-Chair Fritz called the meeting to order at 1:00 p.m. Representatives Tischer, M.W. Miller, Cato and Goll were present. Representative Davis arrived at 1:25 p.m. Co-Chair Fritz announced the committee calendar and cited HB 117 as the first order of business.

Number 0030 Rep.M.W. Miller moved to postpone action on HB 117 until further notice. There being no objection, the motion passed.

Number 0035

Co-Chair Fritz opened the floor to testimony on HB 107. Rep. Clocksin, sponsor of HB 107, explained that HB 107 gives legal recognition to the rights of the terminally ill and establishes a procedure for the declaration of will form. Rep. Clocksin dispelled possible arguments about the religious significance of the bill; stated that all surveyed religions support the right to a natural death.

Number 0100

Rep. Clocksin then testified as the sponsor of HB 192. Rep. Clocksin explained that the bill applies only to physical abuse of the elderly and requires the victim's consent before beginning an investigation. Rep. Clocksin informed the committee about elder abuse in Alaska and referred to the limited fiscal implications of HB 192.

Number 0162

Dr. Rodmar Wilson, Department of Health and Environmental Protection, spoke against HB 107; stated that the bill was meddlesome. Dr. Wilson expressed sympathy with the concept of not prolonging death, but disagreed with HB 107 because doctors can not accurately predict when death will occur and patients may change their minds after signing living wills.

Number 0291

Rep. Goll pointed out that patients can revoke their statements.

Number 0377

Prent Gazaway, Anchorage citizen, stated his belief that HB 107 meets the wishes of senior citizens associations and gives people freedom. Mr. Gazaway urged a quick passage of HB 107 and also stated his approval of HB 192.

Number 0426

Delcey Kinny, Alaskans for Life, stated AFL's opposition to HB 107 and the living will concept. Ms. Kinny argued that the right to a natural death already exists, and that living wills cause havoc in the doctor - patient relation and underwrite the rights of those who do not sign. In addition, Ms. Kinny spoke against State involvement with a person's decision regarding death.

Number 0546

Florence Orr, Older Persons Action Group, stated that the living will has been a APAG legislative priority for 2 years; asserted that the previous witness was confused about

peoples' rights.

Number 0582 — Irene Hedstrom, Pioneers Home, supported HB 107; said that most people at the Pioneers Home are not afraid of death, but are afraid of prolonging death through the use of machines especially when no hope for recovery exists; cited the burden to the individual, family and Medicare.

Number 0632 — Lola Reed testified in favor of HB 107; stated that the right to a natural death is an issue of personal choice. Ms. Reed asserted that HB 107 grants people that choice.

Number 0662 — Theodore Grahm, Chugiak Senior Center, stated that Chugiak senior citizens support HB 107.

Number 0678 — Pasquale Benigno spoke against HB 107; argued that people already have the right to die without the use of extraordinary means.

Number 0701 — Rep. Goll asserted that currently doctors who "pull the plug" in response to a patient's request can be charged with a criminal offense.

Number 0736 — Virginia Blanchard supported the right to a natural death; stated that people do not have to participate in the program; asserted her intention to sign a living will if the bill passes.

Number 0755 — Dr. Rabeau, Department of Health & Social Services, stated that the Department supports the intent of HB 107; said that the bill addresses the rights and wishes of patients.

Number 0779 — Dove M. Kull, Older Alaskans Commission, said she believes in the right to die with dignity and wants for the world to let her go when she is ready; supported passage of HB 107.

Number 0797 — Mary Horton contested the need for HB 107; said the right to a natural death is already an inalienable right under the constitution.

Number 0851 — Lou Osmond supported HB 107; said she does not wish to use a life support system nor to wait around for relatives to decide whether

or not she will be allowed to die.

Number 0893 — Leona Pfisterer spoke in favor of approving HB 107; testified that keeping people alive with extraordinary means is too costly in terms of emotions as well as money.

Number 0917 — There being no further witnesses to testify on HB 107; Co-Chair Fritz opened the floor to testimony on HB 192.

Margot Dick, Juneau Elder Abuse Task Force, supported HB 192 for the Task Force; presented an overview of their recommendations for amending HB 192.

Number 1020 — Charles Mundorf, Alaska Community Mental Health Center, testified to the need for HB 192. Mr. Mundorf informed those present of the recent documentation of 75 cases of physical abuse of elders in Anchorage and the widespread problem of psychological abuse of the elderly. He also stated that currently reporting of abuse is poor.

Number 1068 — Discussion regarding the verification of psychological abuse.

Number 1084 — Elizabeth Muktarian, Department of Health & Social Services, conveyed the Department's recommendation to pass HB 192. Ms. Muktarian acknowledged the growing awareness of elder abuse and asserted that the procedures outlined in HB 192 are in accordance with departmental policies. Ms. Muktarian said the Department recommends amending the definition of abuse on Page 5, Lines 22-25 of Section 47.24.100 to read the "willful deprivation".

Number 1130 — Tom Scott, Emergency Medical Services in Anchorage, recommended amending the HB 192 list of health care providers to include EMS paramedics and Emergency Medical Technicians.

Number 1145 — Theodore Grahm, Chugiak Senior Center, endorsed the passage of HB 192.

Number 1150 — Dove Kull, Older Alaskans Commission, stated her awareness of the psychological and economic abuse of elders; said she knows of people who are in need of the bill's protection now.

Number 1173 — Dennis Murray, Senior Citizens of Kodiak; supported HB 192 as an individual; said the bill heightens awareness of the problem and gives a mechanism to deal with the problem. Mr. Murray stated he sees more psychological and economic abuse as a professional than physical abuse, but agreed that HB 192 is at least a beginning.

Number 1187 — Dennis DeWitt, Alaska State Hospital Association, recommended requiring only those who are trained to report abuse under the law, further defining "verifying", and preventing the possibility of multiple reporting. Mr. DeWitt also suggested that the patient-physician privilege clause is open to misinterpretation and should therefore be reviewed.

Number 1266 — Barbara McPherson, Older Alaskans Commission, said the commission urges passage of HB 192 to provide protection for the elderly; recommended inserting the word "willful", and mandating that the victim be contacted before beginning an investigation. Ms. McPherson also stated support for the previous remarks on the privilege clause and multiple reporting.

Number 1297 — Rep. Tischer requested statistics on abuse of the elderly. Ms. McPherson said accurate statistics are not available because of the lack of mandatory reporting in Alaska.

Number 1314 — Beth Bishop, Southeast Senior Services, supported HB 192 and language changes to address the possibility of multiple reporting; informed the committee that 90% of abusers repeat and that reporting abuse is very difficult especially in small towns. Ms. Bishop supported the Juneau Task Force recommendations; however, she disagreed with adding "willful" before "deprivation", suggesting it would be too difficult to prove.

Number 1347 — Rosemary Haffner, Alaska Legal Services - Attorney for Seniors, conveyed the support of the Ombudsman for HB 192; stated opposition to adding "willful"; suggested addressing the issue of poverty in some manner. Ms. Haffner asserted that multiple reporting could be addressed through regulations.

Number 1377

Co-Chair Fritz thanked the witnesses and observers for their participation and patience.

The meeting adjourned at 3:03 p.m.

SENATE JUDICIARY COMMITTEE

Meeting Minutes
May 9, 1983

The meeting was called to order by Chairman Ray at 1:35 p.m. All members were present.

The first order of business was the Committee Substitute (HESS) for Senate Bill 122--Protection of the elderly, as to which Senator Ray announced that the bill was in the Senate Rules Committee when a problem arose with the term "mental anguish" in the definitions section, at page 5, line 27. Senator Josephson, one of the bill's prime sponsors, explained that he is fully aware of the problem and has no objections to deleting that term. Senator Ray concurred and then suggested that the term "economic exploitation" be added to cover the type of exertion of undue influence and economic coercion that was involved in the Groucho Marx case in California. Senator Pettyjohn, however, questioned the inclusion of this new term and concept and stated that it may create an unduly heavy burden in trying to enforce the legislation. Senator Pettyjohn also raised some questions about the procedures set forth in the bill and a discussion was had on these points with Senators Ray and Josephson joining therein.

Dove M. Kull, a member of the Older Alaskans Commission, testified in favor of the bill, emphasizing that the lack of statutory authority is the biggest hindrance to states being able to assist abused elderly persons and that many other states have enacted or are considering enacting similar legislation.

Beth Bishop, with Southeast Senior Services, testified in favor of the bill, focusing on the types of problems encountered and the other types of programs that are also needed to adequately protect the abused elderly.

John Wolfe, Executive Director of the Older Alaskans Commission, testified in favor of the bill and offered to answer any questions the members of the Committee may have. Senator Eliason asked a question about the language at page 3, line 29, of the bill and Mr. Wolfe responded by explaining the basic purpose and intent of the language.

By concurrence of a majority of the members of the Committee, it was agreed that the bill will be amended (and the amendments will be incorporated into a new committee substitute) so that the term "economic harm" will be inserted wherever appropriate and will be defined as "intentional economic exploitation by theft, fraud and coercion." Also, as previously agreed, the term "mental anguish" will be deleted from the definitions section, at page 5, line 27.

Senator Eliason asked a question about the language at page 3, line 8, regarding immunity for reporting instances of harm to the elderly and why these provisions are necessary. A discussion was had on this point

with Senator Josephson joining therein and pointing out that the provisions in question merely parallel what has been done in the child abuse area and only provide a qualified immunity because a good faith requirement is built into the bill.

Senator Pettyjohn asked why mentally and physically handicapped persons aren't included in the bill and a discussion was had on this point with Senators Ray, Josephson and Ziegler joining therein, whereupon Senator Josephson moved that the bill, as amended (with the amendments incorporated into a new committee substitute) pass out with individual recommendations. Senators Ray, Josephson, Ziegler and Eliason voted Do Pass. Senator Pettyjohn voted No Recommendation.

The second order of business was the proposed committee substitute (Berrier draft dated 5/7/83) for Senate Bill 257--Legislative ethics, as to which Senator Ziegler stated that it is the worst piece of legislation he has ever seen and that he has the following specific objections to it regarding which discussion was had wherein all Committee members participated:

> The provisions starting on page 3, line 21 relating to fundraisers;
>
> The provisions of section 24.60.080 on page 6 relating to gifts;
>
> The provisions of section 24.60.100 on page 7 relating to representation;
>
> The provisions of section 24.60.110 on page 7 relating to having to resign a conflicting position as it applies to an attorney legislator who is under an ethical duty not to withdraw from a case unless his client consents.

Senator Josephson concurred with Senator Ziegler's concerns about the fundraisers provisions and pointed out that they shouldn't apply to a legislator who is trying to raise funds for anything other than legislative campaigns; i.e., the prohibition shouldn't apply to a legislator who wants to run for statewide or congressional office. Therefore, Senator Josephson suggested that the word "legislative" be added in front of the phrase "campaign purposes" on page 3, line 24, of the proposed committee substitute.

Senator Pettyjohn stated that forcing legislators to hold fundraisers in their own district during session is too restrictive; therefore, he moved that the proposed committee substitute be amended to only prohibit fund raisers in Juneau during session. In his motion Senator Pettyjohn also incorporated Senator Josephson's prior suggested language addition. The motion passed after a vote was taken wherein Senators Josephson, Ziegler and Pettyjohn voted in favor and Senators Ray and Eliason voted against.

Senator Fahrenkamp testified and raised serveral concerns about the bill in its present form, including:

Subsection (g) on page 3, relating to fundraisers; and

Section 24.60.080 on page 6, relating to gifts, as to which a lengthy discussion was had wherein all Committee members participated and Senator Josephson suggested that the language of that section be changed to alleviate Senator Fahrenkamp's concerns.

Senator Mulcahy then testified and also expressed concerns similar to Senator Fahrenkamp's regarding the gifts section, explaining that travel to remote areas to attend conferences and meetings regarding matters of legislative concern is very important to bush legislators, whereupon Senator Pettyjohn moved--and the motion passed without objection--that the following sentence be added at the end of section 24.60.080:

"A gift of travel and hospitality received by a member of the legislature in obtaining information on matters of legislative concern is not prohibited by this section."

Senator Ferguson then testified and proposed that the following language be page 3, line 17, of the proposed committee substitute:

"Food or foodstuffs indigenous to the state that are generally shared as a cultural or social norm."

A motion was made to adopt Senator Ferguson's suggested amendment and the motion passed without objection.

Senator Ray moved that in subsection (f) of section 20.60.030, dealing with conflicts of interest, the words "with approval of the legislature" be added immediately before the word "establish" on page 3, line 18 of the proposed committee substitute. The motion passed without objection.

Senator Josephson moved that CSSB 257, as amended (with the amendments incorporated into a new committee substitute) pass out with individual recommendations. Senators Ray, Josephson and Pettyjohn voted Do Pass. Senators Ziegler and Eliason voted No Recommendation.

The third and final order of business was the following new subcommittee assignments:

SB 26	Civil immunity for rendering services in response to hazardous materials emergencies	Eliason
SB 290	Transfer of forfeited aircraft to Alaska Wing, Civil Air Patrol	Ray
CSHB 290	Harming a police dog	Ziegler

There being no further business the meeting adjourned at 2:50 p.m.

COMMITTEE REPORT

SENATE

FURTHER:

4/28/83

Date: 5/9/83

Mr. President:

The Committee on JUDICIARY has had SB 122

Relating to the protection of the elderly.

under consideration and (a majority of the committee) (the committee) reports it back with the following recommendations:

SEC. 47.24.030

a)THE DEPARTMENT SHALL PROVIDE PROTECTIVE SERVICES AT THE CONSENT OF THE ELDER PERSON, OR IF THAT PERSON IS INCAPACITATED, THE DEPARTMENT MAY PETITION THE COURT TO APPOINT A GUARDIAN.

b) THE DEPARTMENT MAY DISCLOSE THE REPORT AT THE REQUEST OF THE ELDER PERSON, AND , ON REQUEST, DISCLOSE REPORTS OF HARM AT AN INSTITUTION CERTIFIED BY THE STATE.

SEC. 47.24.060 - LISTS ACTIONS AVAILABLE TO THE DEPARTMENT TO SAFEGUARD AN ELDERLY PERSON.

Missouri Gerontology Institute

Guide on AGING

Protective Services Legislation for the Elderly

C. Edwin Vaughan
Department of Sociology
and Center on Aging Studies
University of Missouri-Columbia

- *An 89-year-old woman lives alone in a trailer court outside a southern Missouri town. She is blind and has become too weak to lift a jug of water.*
- *A man in his sixties, who was once left bound hand and foot in a car by his caretakers, signs over his pension check to them each month because he is afraid they otherwise would turn him out.*
- *A 77-year-old man is chronically depressed and disoriented from the interaction of excessive dosages of medication being given to him by another person charged with his care.*

These are only three of the estimated 19,000 elderly Missourians who need protection from abuse, neglect, or exploitation. This guide will describe forms of abuse and situations in which it is likely to occur, and summarize the provisions of Missouri law to deal with abuse.

The law

In response to public concern, the Protective Services Law for the Elderly was passed by the Missouri General Assembly and signed by the Governor in 1980. This law is designed to assist and protect persons age 60 or older who are unable to perform or obtain essential services or to protect their own interests. The protective services provided by this law consist of visits by social workers supplemented by such community functions as visiting nurses services, homemaker services, hot meal delivery, and telephone checks. Legal intervention may also enter the picture in the form of guardianship, commitment, emergency service delivery, and protective placement.

Missouri is one of only thirteen states that has a law specifically designated to help prevent abuse and neglect of the elderly. This law establishes a system for reporting instances of abuse and neglect and provides for assistance to be given to the victims.

The Missouri Gerontology Institute develops and coordinates instruction, research and extension activities on aging among the University of Missouri campuses (Columbia, Kansas City, Rolla and St. Louis), Lincoln University, and the Missouri Cooperative Extension Service

How to report abuse or neglect

If you have reasonable cause to suspect that an elderly person is suffering serious physical harm and is in need of protective services, use the Elderly Abuse and Neglect Hotline maintained by the Department of Social Services Division of Aging. The hotline number is 1-800-392-0210.

Or, if you prefer, write the Department at:

Central Registry Unit
Division of Aging
P.O. Box 1337
Jefferson City, MO 65102

When making your report include the following information:

1. Name, age, and address of the older person in need.
2. Names and addresses of any individuals responsible for the older person.
3. The nature and extent of the older person's condition.

You are not required to give your name when making a report. If you are uncertain of how to proceed or have any questions, call the toll-free hotline number mentioned above.

Types of abuse

To assist you in identifying cases of abuse, the law describes four basic situations in which serious harm is likely to come to an individual:

1. **Self-neglect.** This situation is indicated by the elderly person's failure or inability to provide for his or her own essential needs, resulting in substantial risk that physical harm will ensue.
2. **Self-abuse.** In this situation there is reason to believe that an elderly person will inflict physical harm upon himself, as evidenced by his own actions or threats to do so.
3. **Abuse to others by an elderly person.** This situation is one in which there is a substantial risk that an elderly person will inflict physical harm upon another, as evidenced by his own actions or behavior.
4. **Abuse to elderly by others.** In this situation there is a substantial risk that further physical harm will occur to an older person who has already suffered physical injury, neglect, sexual or emotional abuse, other forms of maltreatment, or the wasting of his financial resources by another person.

The following discussion will focus on abuse to the elderly by others.

Abuse by others

A study by the Office on Aging in Bergen County, New Jersey has shown that there are four main categories of abuse to the elderly by other persons:

1. **Physical abuse.** This may take various forms, including shaking or shoving, tying the elderly person to a chair so "he won't hurt himself" while others are gone, and encouragement by the family or a physician for the elderly person to be given drugs to make him or her "manageable."
2. **Deprivation.** This is withholding life's necessities, such as food, clothing, shelter, and medical care.
3. **Financial abuse.** This involves the removal of money or real estate from the older person's control when it is not necessary for the good of the individual to do so.
4. **Emotional abuse.** This includes such things as verbal abuse (excessive criticism or unrealistic demands), forcing the elderly person to change his or her residence, and infantilization (denying the older person the right to be treated as an adult, to be informed about his or her own health condition, to participate in family and social situations, and so forth). Emotional abuse is covered by the Protective Services Law only when there is evidence of physical harm resulting from the emotional abuse. Such problems as ulcers and high blood pressure are evidence of such physical harm.

What happens after you report

If you make a report of abuse or neglect, a local social service worker will visit the older person's residence to evaluate the situation. In emergency cases this visit will be made within twenty-four hours; in less severe cases a maximum of thirty days is permitted.

By reporting abuse or neglect you will not be forcing an older person to accept services he or she does not want. The Protective Services Law states that if an elderly person does not consent to receive protective services, those services will not be given; and if the elderly person withdraws consent previously given, the services will be discontinued. The only exceptions are those cases in which there is reason to believe that the older person lacks the capacity to consent. In such instances the director of the Department of Social Services may seek a court order.

Abusers cannot interfere

In some abuse cases, an abuser may refuse to allow anyone to visit the person being abused. In such instances the Department of Social Services may petition the court for a warrant. The Department may also petition the court to forbid anyone from interfering with the delivery of services to the elderly person.

If an older person is unable to give consent

If a case is one of self-neglect or self-abuse and the older person is unable to give consent for assistance, the Department of Social Services may initiate proceedings to provide the necessary protective services.

When the police are involved

In some instances it is necessary for the police to become involved in protective cases. If a police officer believes that an older person is in immediate danger, he or she may arrange for that person to be taken to a medical facility for emergency treatment. If the police officer is barred from entering by someone in the home, the officer may apply for a court warrant to enter and remove the elderly person to the medical facility.

When medical treatment is necessary

Sometimes when an elderly person has been admitted to the hospital as a result of abuse, the relative or guardian refuses to give consent for medical treatment and the elderly person himself is unable to give consent. In these cases the head of the medical facility may file a court petition for authorization of treatment, and the court may appoint a temporary guardian to oversee the treatment. In life-threatening situations in which immediate medical treatment is needed, such treatment may be given by the facility before a court hearing is held.

Once again, it should be emphasized that the rights of the competent elderly person shall be maintained—and these rights include the right to refuse medical care on the basis of religious faith or conviction.

Characteristics of abusers and abused

To prevent incidents of abuse it is necessary to understand the common characteristics of abusers, the abused, and situations in which abuse is most likely to occur.

The abused and their situations

The older the individual the more likely he or she is to be abused; reported cases of abuse are most common among people over 75 years of age. Persons become not only physically weaker with age but also more psychologically dependent due to such aging-related changes as loss of usefulness, loss of social standing, and loss of contact with friends. Since some older persons are not only weak but also physically or mentally impaired, they are sometimes treated as children or, even worse, as less than human. It is in such situations that abuse is most likely to occur.

Abused elderly usually are living with relatives and the most frequent abusers are the offspring. A situation in which the elderly person lives with his or her child can bring out deep-seated emotional responses in the offspring who may find it difficult to accept the parent's dependency. The parent may in turn sense this stress on the offspring's part and try to demonstrate his strength and independence by taking on tasks beyond his ability. The result is often failure, tension, and frustration. Additionally, if grandchildren are in the family, the elder may attempt to parent them, causing conflicts over discipline, household procedures, and lifestyles.

In our society, for complex and diverse reasons, abuse of the elderly is most common in white families, and females tend to be abused more than males.

While abused older persons are found among all income levels, middle-class elderly experience more abuse than upper or lower-class elderly. This can be attributed to the emphasis which the middle-class puts on the work ethic and the resultant tendency of retired persons to view themselves as useless and unproductive—a view which may be subconsciously or consciously shared by other family members. Moreover, middle-class family members are more likely to separate and live long distances from each other as the children marry and move away, often to other cities.

If elderly parents eventually come to live with their children it is often a shock for the children to observe the changes that have occurred since they last visited. To observe these changes all at once and to have to cope with them daily puts stress on both parents and children. By contrast, if a parent is living with or near the child as old age approaches, as is not uncommon in lower-class families, there can be gradual adjustments made as changes occur in the parent.

The abusers

Abusers tend to be middle-aged offspring who are looking forward to freedom and relax-

ation in the form of retirement and the departure of their own children from the home. An elderly parent moving into the household represents an intrusion into their plan, and the economic drain can be extremely stressful if there are still dependent children living at home.

Abusers tend to be female, since the responsibility of caring for an elderly parent typically falls upon a daughter. Because middle-aged women are likely to be working, many find it difficult to fit caregiving into their schedules, thus adding to the personal as well as financial pressures.

Many abusers were abused as children. On the other hand, abused elderly tend to deny that they are abused because they are ashamed to admit that their own children are abusers. They also may fear that they will be compelled to move to another setting if they report abuse, or that any complaint will lead to further abuse.

Guidelines for action

Being alert to potential abuse situations, and being willing to report abuse incidents, are two good ways to help curtail abuse in Missouri. However, further preventive measures can be taken on a community basis which would go far in this regard. The following measures are both possible and essential for the well-being of many older persons and their families.

1. Education projects should be established for the families of elderly persons, particularly middle-aged offspring who either now take care of their parents or are likely to in the future. Middle-aged children must be educated on the physical and psychological changes that come about with the aging process and the best ways of dealing with them.
2. Training projects for social service personnel should be initiated to increase their effectiveness in dealing with abuse and neglect. The training should instruct them in recognizing the signs of a potential abuse situation, and train them in early intervention and in helping both the elderly and families. Such sensitivity and alertness is especially needed in cases of frail elderly persons living alone. Service personnel in a position to observe the condition of such frail elderly include visiting nurses, county health nurses, homemaker aides, physicians, clergymen, meals-on-wheels drivers, friendly visitors, outreach workers from community ag ies and county councils on aging, and so forth.
3. Networks of supportive services should be established for families and elderly who live in situations where abuse or neglect has already occurred. Such services would strive to prevent further abuse by alleviating the problems which led to the abuse.

A detailed copy of the legislation itself may be obtained by writing to the Division of Aging, P.O. Box 1337, Jefferson City, MO 65102.

Through adult education and the strengthening of community voluntary support systems, we may minimize the occasions when the law must be used. Always, but particularly in this area, an ounce of prevention is worth a pound of legal care.

"Elder Abuse in Anchorage, Alaska" October, 1981

FINDINGS OF A.C.M.H.C. - 1981 - Anchorage, Alaska

In the study conducted by A.C.M.H.C. of 75 cases documented, 34 cases (43.3%) of physical abuse were found. A breakdown of the abuse sustained follows:

lack of personal care	17.3% *
bruises and welts	13.3%
lack of food	10.7%
medicines withheld	8.0%
freezing	6.7%
malnutrition	6.7%
direct beatings	5.3%
abrasions and lacerations	2.6%
bone fractures	2.6%
sexual assault	1.3%
imprisonment	1.3%

Psychological abuse was sustained by 53 elders (70%)

fear	46.7% *
verbal assault	28.7%
threat	18.7%

Material abuse occurred in 43 cases (57.3%)

misuse of money or property	45.3% *
theft of money or property	26.7%

* categories are not mutually exclusive

There was violation of rights in 18 cases (24%)

forced social isolation	16.0% *
forced from home	6.7%
forced into nursing home	5.3%

AN ANALYSIS OF LAWS CONCERNING ELDER ABUSE: LRSE SUMMARY
(Alaskan statutory provisions substituted)

The following is a summary of the above referenced publication which was prepared by Legal Research and Services for the Elderly of Boston. Alaskan statutory provisions have been substituted to assist the reader to understand what legal remedies are available in Alaska.

The problem of elder abuse requires social service and legal remedies. In LRSE's view, the response models of child and spouse abuse are limited because they "have not necessarily been effective and because the elderly raise distinct issues."

The abuse elderly person is typically in a vulnerable and dependent position. The primary caretaker is often also the abuser.

I. TWO CLIENT GROUPS

a. Those who are willing and eager to pursue on their own initiative, service provisions or a legal (criminal or civil) remedy;

b. those who cannot or do not seek assistance and who enter the system through intervention procedures

   1. some form of State intervention may be an alternative

   2. the primary consideration is the individual's capacity to make the needed decisions.

II. RESPONSES

a. "Responses must make available and provide accessible, effective social services, alternative housing, health care, emotional support, etc. The parameters of these options must be expanded beyond what is currently available."

b. "Legislation, drafted to include a means for providing social and health services to the abused, must set forth the framework for procedures which can establish surrogate authority in cases where the abused elderly person lacks the capacity to consent to services or manage his/her own life and property. Concurrent with these procedures there must be protection of the due process rights of the elderly individual."

III. CRIMINAL REMEDY

a. Filing of criminal complaint, e.g., assault; blackmail.

b. If pursued, it should be in conjunction with a civil remedy or inclusion of protective orders during the criminal proceeding.

c. Linkage with service provision is necessary.

IV. CIVIL REMEDY

a. Under AS 9.55.600, "a person subjected to domestic violence may petition a superior court for injunctive relief restraining the infliction of further domestic violence against the petitioner by the respondent." (Domestic violence means a crime under AS 11.41.100 - 11.41.530 committed against a spouse, former spouse, or a member of the social unit comprised of those living together in the same dwelling as the respondent.) The order may include provisions which:

1. restrain the respondent from subjecting the petitioner to domestic violence;

2. direct the respondent to vacate the home of the petitioner;

3. restrain the respondent from communicating directly or indirectly with the petitioner;

4. direct the respondent to pay medical expenses incurred by the petitioner as a result of the domestic violence.

The court must send a copy of the order to the appropriate local law enforcement agency. Peace officers shall use every reasonable means to enforce an order.

AS 9.55.610 provides for emergency injunctive relief.

b. According to LRSE the degree of protection provided under such statutes depends on enforcement provisions. "...if protective orders are violated, the abused individual must return to court for further remedy. This not only makes the process more cumbersome, but also fails to address the need for immediate and effective protection and enforcement by the police. Particularly (sic) cases of elderly abuse, reliance on this procedure would significantly increase the difficulty on the part of any infirm individual to rely on the remedy of the law."

V. ISSUES RE LEGAL REMEDIES

"Often the elderly person will not agree to go to seek a legal remedy. Even if the individual is willing and eager to go to court, removing the caretaker from the home will require the social service system be able and willing to compensate for the lost support and assistance. Furthermore, shelters, which have been established to provide alternative housing for abuse victims often cannot meet the needs of the infirm or more dependent elder."

VI. PROTECTIVE SERVICES

The "social service agency must seek and obtain the consent of the individual before making a referral, discussing a case inter-agency, or instituting a case plan" in order to ensure the individual's right to privacy. LRSE also points out that this right which is fundamental to our legal system cannot be rationalized by the notion of the "best interests" of the client.

a. Non-judicial alternatives for elderly persons who need assistance but who do not lack capacity:

1. managing finances or access to resources

a. joint bank accounts, restricted bank accounts, direct deposit

b. representative payee for Social Security

2. Power of Attorney

3. Trusts

b. Judicial Alternatives

There are three judicial alternatives in Alaska: conservatorship, guardianship and civil commitment

1. Conservatorship

A. AS 13.26.165 states that a conservator may be appointed in relation to the estate and affairs of a person if the court determines that:

i. the person is unable to manage his property and affairs effectively for reasons such as mental illness, mental deficiency, advanced age, chronic use of drugs, chronic intoxications, confinement, detention by a foreign power, or disappearance and

ii. the person has property which will be wasted or dissipated unless proper management is provided, or that funds are needed for the support, care and welfare of the person or those entitled to be supported by him and that protection is necessary or desirable to obtain or provide funds

B. This may be an appropriate course of action in a case of exploitation if the elderly person lacks the capacity to manage his property.

2. Guardianship

A. Under AS 13.26 a guardian may be appointed for an "incapacitated person," i.e., "a person whose ability to receive and evaluate information or to communicate decisions is impaired for reasons other than minority to the extent that he lacks the ability to provide for himself the essential requirements for his physical health or safety without court-ordered assistance."

B. AS 13.26.090 states:

Guardianship for an incapacitated person shall be used only as is necessary to promote and protect the well-being of the person, shall be designed to encourage the development of

maximum self-reliance and independence of the person, and shall be ordered only to the extent necessitated by the person's actual mental and physical limitations. An incapacitated person for whom a guardian has been appointed is not presumed to be incompetent and retains all legal and civil rights except those which have been expressly limited by court order or have been specifically granted to the guardian by the court.

C. LRSE points out that this is a "drastic remedy" and "rarely constitutes the needed and least restrictive option which is required by the large class of persons in need of protective services. Agencies often look to a guardianship as a means of getting decisions made that the elderly person refuses to make. Thus, it becomes a tool to enforce the service agencies' notions of (supposedly) the 'best interests' of the client."

3. Civil Commitment

AS 47.30.655 - 47.30.915 outlines the procedure for involuntary commitment procedures for a person alleged to be mentally ill and, as a result of that condition, alleged to be gravely disabled or to present a likelihood of serious harm to himself or others.

VII. STATE INTERVENTION AND PROTECTIVE LEGISLATION

"Elder Abuse in Massachusetts: A Survey of Professionals and Paraprofessionals" conducted by LRSE indicated "that in a majority of the reported cases of abuse the elderly client is unable or unwilling to pursue a legal remedy on his/her own behalf. The survey results indicate that in a large proportion of cases a barrier to service provisions existed. The greatest percentage reported that this barrier was the refusal of the victim to acknowledge the problem or take action about it."

"The abuse, exploitation, neglect and abandonment of persons sixty and older often affects individuals who are infirm, confused and dependent. These persons may lack the physical ability or mental capacity to seek services or to consent to assistance. In such cases, remedies which require the initiation of the client are insufficient."

The issues of how and when to intervene in elder abuse cases in such cases poses a dilemma.

"Thus, is raised the classic conflict between the right of the individual to privacy and self-determination in opposition to the power of the state to intervene where state interests of protection of vulnerable persons exist.

Basic to our legal system is the individuals' right of self-determination and right to privacy. This constitutional right is an expression of the sanctity of individual free choice and self-determination as fundamental constituents of life. The individual's civil rights are not absolute or without limit. The state can and does intervene by regulation and prohibiting certain behavior. Intervention by the state results from a balancing of the state's interests against the interests of the individual to be left alone. The

parameters of state intervention are often unclear, reflecting historical and social trends.

Theoretically, state intervention occurs pursuant to two legal concepts:

a. the police power gives the state authority to regulate activities that involve the health and safety of society;

b. parens patriae gives the state authority to act in a parental capacity for persons who cannot care for themselves or who are dangerous to themselves.

While the state's exercise of its police powers has theoretically always been limited by the strictest of procedural safeguards in order to protect the individual from deprivation of his/her constitutional rights, the exercise of the parens patriae power has traditionally been marked by an atmosphere of informality. These informal procedures have been justified by the impression that the court's determination was to be based solely on the individual's 'best interest,' thus, eliminating the need for an adversarial process. This reasoning, although still adhered to, conflicts with reality in that the exercise of parens patriae often includes serious limitations on individual rights in the form of involuntary placement or institutionalization. Although clearly an infringement of the individual's rights, this rationale continues to enable the state to act in the supposed 'best interests' of the individual, often with minimal due process safeguards."

"The issues raised by this legislation are controversial, as well as complicated. Any discussion involves complex questions of a legal, medical and psychological nature. To these questions one brings the need for the intricate and delicate balance between the principle that society has the duty to protect those unable to protect or provide for themselves, and the constitutionally assured right of personal choice and individual freedoms.

The critical provisions of an abuse reporting and protective services law are those which determine and define how this conflict, between individual rights and state intervention, is resolved. These provisions primarily center around the definition of persons covered by the law, the standards for reporting and investigation as they affect rights of privacy and confidentiality, the right of access into private homes to investigate and to provide services, and due process safeguards in the determination and provision of involuntary services. In addition, there is the critical issue whether such laws are linked with service provision systems capable of meeting the needs of persons under the purview of the law. Further, the payment procedures for these services causes administration and legal difficulties.

Persons Covered

The premise of the protective services legislation is that persons exist in society who are unable to care for and/or protect themselves. Society, in the form of the State, as parens patriae, assumes the responsibility of this care and protection. The criteria for State intervention should clearly be one linked to the existence of abuse, neglect, exploitation and/or abandonment and a functional, mental or physical, inability to care for or protect oneself. The scope of the law and the determination of need on the part of persons covered should be defined according to this premise to

assure that vulnerable persons who are abuse victims are protected and reached by services."

VIII. LRSE STATUTORY RECOMMENDATIONS

The following are the LRSE recommendations for a protective services and abuse reporting statute:

1. The law should apply to persons sixty and over who are abused, neglected, exploited or abandoned, and to persons 18 and older who lack the physical or mental capacity to care for their basic needs and/or protect themselves.

2. Abuse includes, but is not limited to, the willful infliction of physical pain, injury or mental anguish, or the willful deprivation by a caretaker of services which are necessary to maintain physical or mental health.

   Neglect refers to an elderly or incapacitated person who is either living alone and not able to provide for him/herself the services which are necessary to maintain physical and mental health, or is not receiving the said necessary services from the responsible caretaker.

   Exploitation refers to the act or process of taking advantage of an elderly or incapacitated person by another person or caretaker whether for monetary, personal, or other benefit, profit or gain.

   Abandonment refers to the desertion or willful foresaking of an elderly or incapacitated person by a caretaker and obligations owed an elderly or incapacitated person by a caretaker or other person.

   All other terms used should be clearly defined in the statute.

3. One State agency shall be responsible for developing an adult protective services program for all citizens. This designated agency or department shall provide services to persons covered by this statute.

4. A report should be required to be made by certain categories of persons, including physician, nurses, social workers, coroners, medical examiners, dentists, hospital staff, nursing home staff, home health agency and staff, home care corporation (staff and homemakers), clergy, adult foster care facility, police officers, pharmacists, etc.

   Anyone of the above categories who has reasonable cause to believe or suspect that an elderly or incapacitated person has been abused, neglected, exploited or abandoned, or is in a condition which is the result of such treatment shall make a report to the appropriate agency withing 24 hours.

5. Anyone else who has 'reasonable cause to believe or suspect' may report this information to the appropriate agency.

6. The identity of the reporting person should be confidential and be disclosed only with the consent of that person or by judicial process.

A person acting in good faith who makes a report should be immune from civil and criminal liability.

7. A person required to report, but who fails to do so, should be liable for a fine of $500 to $1,000.

8. One State agency should be responsible for receiving and investigating all reports. Each report received should be registered by the agency with all available information from the reporter.

   The agency chosen to receive and investigate reports should have a system and personnel to:

   A. receive reports 7 days a week, 24 hours a day;

   B. keep records;

   C. have knowledge of services available;

   D. have access to services;

   E. have a statewide mandate;

   F. have the ability and staff (trained) to respond quickly.

   A centralized intake system should be geared into a regional response system if possible.

   The investigating agency should also either provide services or coordinate service provision by subcontracting and referral. This should be determined according to existing State service systems.

9. The initial investigation should be conducted by persons trained in human services.

10. Upon receiving a report made in accord with the law, the agency should commence an investigation. This investigation should include a home visit and consultation with service agencies, and persons with knowledge of the case, (including the reporter for further information if possible and necessary). The initial investigation for verification and assessment should be completed within 72 hours. The investigator should have access to a multi-disciplinary geriatric team for consultation.

    A. If the report is not verified, the case is closed.

    B. If the report is verified, an assessment of the individual's functional capacity, the situation and the resources available to the person should be made by a multi-disciplinary team with expertise in the particular field of disability.

11. In conducting the investigation, the agency may seek the assistance of law enforcement officials and the courts. If access is denied to the investigator, either by the elderly or incapacitated person or a caretaker, the agency may petition for a court order to enjoin intervention with access to investigate. Such an order shall be issued upon specific facts shown that: 1) there is a reasonable cause

to suspect that the person in question is or has been abused, neglected, exploited or abandoned; and 2) access has been denied to the representatives of the agency required to investigate such reports.

12. Regulations should be promulgated which assure continuity of case management for investigation, assessment, case plan development and service provision.

13. Voluntary services shall be provided for the least restrictive alternative, client self-determination, and continuity of care.

    A fair hearing procedure should be developed and implemented so that any service plan can be appealed on denial of application for specific services or for failure to provide the least restrictive alternative.

14. The department/agency should establish by regulation a sliding fee scale to be used in determining fees for services provided on a voluntary basis.

    The department should maximize all available Federal reimbursements for such services. There should be no charge to the individual in question for the cost of the investigation, assessment, etc. These costs are to be borne by the State.

15. If an adult refuses services or withdraws consent, the agency must terminate intervention proceedings. This is consistent with the right of the adult to refuse treatment. The case is closed unless the department seeks to provide services pursuant to involuntary provision procedures.

16. Standards of non-emergency involuntary intervention and services provision must include the following:

    A. Assessment of need and eligibility

       adult refuses services
       lacks capacity to consent
       no one else can/willing to consent (See #22)

    B. Clear and convincing evidence

    C. Least restrictive alternative; non-institutional placement where possible

    D. a geriatric/clinical assessment by social worker, physician, mental health practitioner, lawyer to assure appropriate case plan and placement should be required to any court order.

    E. Placement shall not be made in a mental institution, nor will any proceeding be a determination of incompetency.

17. Any voluntary service provision or placement shall only be authorized pursuant to a court order after a hearing on the merits.

    The adult in question shall be assured the right to counsel; if she/he is indigent, the court shall appoint counsel. The adult shall also

have the right to be present and to cross-examine the parties involved. If counsel is waived, the court shall appoint a guardian ad litem to act in the interest of the adult in question.

18. Adequate notice should be assured. At least 14 days prior to the hearing, the court should order served upon the person and any interested party, a copy of the petition and notice including an explanation of the proceedings, the date, time and location; the proposed service plan; and the rights of the adult in question at said hearing to counsel, to be present, etc.

19. The court order for any protective placement must be specific as to such placement, including reasons for finding it necessary and that it is the least restrictive alternative. This should be stated in the court record.

20. The initial care plan submitted to the court should specify details of services, medical treatment, and relocation. The court order issued should be specific as to services, treatment, placement approved.

    Any modification can only be made pursuant to court order.

21. The court should limit the order to six months or less; upon court review, it can be extended for another period of time (up to six months).

22. The determination of 'lacks the capacity to consent' should be made according to the following:

    > the adult bases decisions on delusions or hallucinations, is unable to make or implement decisions, or is unable to comprehend a decision's effect. The decision itself for refusing services cannot be the sole evidence for finding the person lacks capacity to consent.

23. Involuntary services should be borne by the State unless a court, after a determination of financial ability, orders the client to pay or the client agrees to pay.

24. Standards of emergency involuntary intervention and service provision must include the following:

    Emergency means that an elderly or incapacitated person is living in conditions which present a substantial risk of death or immediate and serious physical harm to him/herself or others:
    a finding based on clear an convincing evidence that the adult in question is incapacitated and in need of services,
    an emergency exists,
    the individual lacks the capacity to consent, no one else can/is willing to consent,
    the proposed order is substantially supported by the findings.

25. In issuing an emergency order, the court shall adhere to the following limitations:

A. The court should specifically order those services necessary to remove the conditions creating the emergency.

B. Hospitalization or change of residence shall not be included unless specifically ordered by the court upon a finding that such action is necessary.

C. Emergency intervention should be limited to a period of 72 hours, renewable for 72 hours upon a showing to court of necessity to remove emergency conditions.

D. Court should appoint a temporary guardian with responsibility for the person's welfare and authority to give consent for emergency services (as ordered by the court) for the duration of the order.

E. Court should provide that the elderly person is assured all rights except those limitations provided for in the order.

F. Access to the premises will be ordered by the court to carry out the order in cases where voluntary access has been denied.

26. Notice shall be provided (including relevant and factual information of the basis of the petition) to the person, his/her spouse, children, next of kin, or guardian at least 24 hours prior to the hearing.

This notice may be waived upon a showing that: 1) immediate and reasonable forseeable physical harm will result from the delay; and 2) reasonable attempts have been made to give notice to the above parties.

27. Emergency placement: If it appears probable from the personal observation of a police officer that an elderly person will suffer immediate and irreparable physical injury or death if medical care is not provided, and that person is incapable of giving consent, and that it is not possible to follow the hearing procedures, that office should be able to transport the person to an appropriate medical facility for medical treatment.

Notice of this action shall be given to persons listed in #26 within four hours. A petition for emergency medical intervention should be required to be filed within 24 hours of this action and a hearing should be held with all due process guarantees with 48 hours of the transfer.

28. In all cases, the drafting and adoption of adult protective service provisions should be linked with the developing of extensive service systems which emphasize alternatives to institutional care."

Chapter 05. Administration of Welfare, Social Services and Institutions.

Section

10. Duties of department
20. Confidential character of public assistance records
30. Misuse of public assistance lists and records
40. Consent to conditions of federal programs
50. Policy
60. Purpose and policy relating to children

Sec. 47.05.010. Duties of department. The Department of Health and Social Services shall

(11) "mental health professional" means a psychiatrist or physician who is licensed to practice in this state or employed by the federal government; a clinical psychologist licensed by the state Board of Psychologists and Psychological Associate Examiners; a psychological associate with a clinical psychology or counseling specialty licensed by the Board of Psychologists and Psychological Associate Examiners; a registered nurse with a master's degree in psychiatric nursing, licensed by the State Board of Nursing; and a social worker with a master's degree in social work and experience in the field of mental illness;

(12) "mental illness" means an organic, mental, or emotional impairment that has substantial adverse effects on an individual's ability to exercise conscious control of his actions or ability to perceive reality or to reason or understand; mental retardation, epilepsy, drug addiction, and alcoholism do not per se constitute mental illness, although persons suffering from these conditions may also be suffering from mental illness;

(13) "peace officer" includes a state police officer, municipal or other local police officer, state, municipal, or other local health officer, public health nurse, United States marshal or deputy United States marshal, or a person authorized by the court;

(14) "provider of outpatient care" means a mental health professional or hospital, clinic, institution, center, or other health care facility designated by the department to accept for treatment patients who are ordered to undergo involuntary outpatient treatment by the court or who are released early from inpatient commitments on condition that they undergo outpatient treatment;

(15) "screening investigation" means the investigation and review of facts which have been alleged to warrant emergency examination or treatment, including interviews with the persons making the allegations, any other significant witnesses who can readily be contacted for interviews, and if, possible, the respondent, and an investigation and evaluation of the reliability and credibility of persons providing information or making allegations;

(16) "state" means a state of the United States, the District of Columbia, the territories and possessions of the United States, and the Commonwealth of Puerto Rico, and, with the approval of the United States Congress, Canada;

(17) "professional person in charge" means the senior mental health professional at a facility or his designee; in the absence of a mental health professional it means the chief of staff or a physician designated by the chief of staff. (§ 1 ch 84 SLA 1981)

(51) "sexual contact" means

(A) the intentional touching, directly or through clothing, by the defendant of the victim's genitals, anus, or female breast; or

(B) the defendant's intentionally causing the victim to touch, directly or through clothing, the defendant's or victim's genitals, anus, or female breast;

(52) "sexual penetration" means genital intercourse, cunnilingus, fellatio, anal intercourse, or an intrusion, however slight, of an object or any part of a person's body into the genital or anal opening of another person's body; each party to any of the acts defined as "sexual penetration" is considered to be engaged in sexual penetration;

(53) "solicits" includes "commands";

(54) "threat" means a menace, however communicated, to engage in conduct described in (1) — (7) of AS 11.41.520(a) but under (1) of that subsection includes all threats to inflict physical injury on anyone;

(55) "violation" is a noncriminal offense punishable only by a fine, but not by imprisonment or other penalty; conviction of a violation does not give rise to any disability or legal disadvantage based on conviction of a crime; a person charged with a violation is not entitled

(A) to a trial by jury; or

(B) to have a public defender or other counsel appointed at public expense to represent him;

(56) "voluntary act" means a bodily movement performed consciously as a result of effort and determination, and includes the possession of property if the defendant was aware of his physical possession or control for a sufficient period to have been able to terminate it. (§ 10 ch 166 SLA 1978; am §§ 29 — 32 ch 102 SLA 1980; am §§ 12 — 14 ch 45 SLA 1982; am §§ 12 — 15 ch 143 SLA 1982)

Effect of amendments. — The 1980 amendment, in subsection (b), inserted "any deadly weapon or" preceding "anything which" near the beginning of paragraph (11), and deleted "'dangerous instrument' includes 'deadly weapon'" at the end of paragraph (11); inserted "or pointing" preceding "a firearm" near the middle of paragraph (12), and added "and intentionally placing another person in fear of imminent serious physical injury by means of a dangerous instrument" at the end of paragraph (12); rewrote paragraph (21); and substituted "body member or" for "bodily" preceding "organ" near the end of paragraph (49).

The first 1982 amendment, effective January 1, 1983, in subsection (b), substituted "AS 11.71.900(10), (11), and (14)" for "AS 17.12.150" in paragraph (4) and rewrote paragraphs (6) and (16).

The second 1982 amendment, in subsection (a), added the language beginning "when intentionally causing a particular result" to the end of paragraph (1), and in subsection (b), inserted "government" in paragraph (37), inserted "including data or information stored in a computer program, system, or network," "a domestic pet or livestock regardless of value," and "a" preceding "public utility" in paragraph (44), added the subparagraph (A) and (B) designations in paragraph (49), substituted "caused by an act performed under circumstances that create" for "which creates" in subparagraph (49)(A), and substituted "physical injury that" for "which" and "that unlawfully terminates" for "physical injury which unlawfully terminates" and deleted "or" preceding "protracted loss" in subparagraph (49)(B).

Editor's notes. — For declaration for legislative purpose, see § 1, ch. 45, SLA 1982 in the 1982 Temporary and Special Acts and Resolves.

(Title effective January 1, 1973)

Sec. 13.21.065. Service on foreign personal representative. (a) Service of process may be made upon the foreign personal representative by registered or certified mail, addressed to his last reasonably ascertainable address, requesting a return receipt signed by addressee only. Notice by ordinary first-class mail is sufficient if registered or certified mail service to the addressee is unavailable. Service may be made upon a foreign personal representative in the manner in which service could have been made under other laws of this state on either the foreign personal representative or his decedent immediately before death.

(b) If service is made upon a foreign personal representative as provided in (a) of this section, he shall be allowed at least 30 days within which to appear or respond. (§ 1 ch 78 SLA 1972)

Article 4. Judgments and Personal Representative.

Section
75. Effect of adjudication for or against personal representative

Sec. 13.21.075. Effect of adjudication for or against personal representative. An adjudication rendered in any jurisdiction in favor of or against any personal representative of the estate is as binding on the local personal representative as if he were a party to the adjudication. (§ 1 ch 78 SLA 1972)

Chapter 26. Protection of Persons Under Disability and Their Property.

Article
1. General Provisions (§§ 13.26.005—13.26.020)
2. Guardians of Minors (§§ 13.26.030—13.26.085)
3. Guardians of Incapacitated Persons (§§ 13.26.095—13.26.155)
4. Protection of Property of Persons Under Disability and Minors (§§ 13.26.165—13.26.315)
5. Powers of Attorney (§§ 13.26.325—13.26.330)

Article 1. General Provisions.

Section
05. Definitions and use of terms
10. Jurisdiction of subject matter; consolidation of proceedings
15. Facility of payment or delivery
20. Delegation of powers by parent or guardian

Sec. 13.26.005. Definitions and use of terms. Unless otherwise apparent from the context, in this code:

(1) "incapacitated person" means any person who is impaired by reason of mental illness, mental deficiency, physical illness or disability, advanced age, chronic use of drugs, chronic intoxication, or other cause (except minority) to the extent that he lacks sufficient

utory period depends on the character of the property. One test is whether the adverse possessor has used and enjoyed the land as "an average owner of similar property would use and enjoy it." Alaska Nat'l Bank v. Linck, Sup. Ct. Op. No. 1372 (File No. 2754), 559 P.2d 1049 (1977).

Applied in Classen v. State, Dep't of Hwys., Sup. Ct. Op. No. 2246 (File No. 4332), 621 P.2d 15 (1980).

Sec. 09.25.060. Sale or transfer of personal property.

NOTES TO DECISIONS

This section establishes, etc.

In accord with original. See Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

And this presumption is rebuttable.

In accord with original. See Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

The presumption serves, etc.

In accord with 1st paragraph in original. See Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

In accord with 2nd paragraph in original. See Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Once the presumption is established the opposing party has the burden of proving that the non-existence of the presumed fact is more probable than its existence. Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

The only effect resulting from a presumption of fraud being a statutory presumption is that the party asserting fraud does not have to introduce evidence of fraudulent intent. He still must plead and prove the conditions necessary to invoke the presumption. Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Presumption of prima facie fraud construed as affirmative defense. — The presumption of prima facie fraud established by this section should be construed as an affirmative defense in the same manner as actual fraud. Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

A statutory presumption of fraud, similar to fraud, falls within the definition of an adverse defense since a simple denial of the complaint would not raise such a defense. Rollins v. Leibold, Sup Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Which must be specially pleaded. — A statutory presumption of fraud thus should be considered an affirmative defense, subjecting the party to the requirement of Civ. R. 8(c) that such a defense be specially pleaded. Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Or be waived. — Civil R. 8(c) requires a party to plead affirmatively fraud as a defense, and failure to so plead results in a waiver of the defense. Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Party not prejudiced by raising issue of fraud at trial. — Where a party was on notice that the defense that the sale was ineffective due to the lack of delivery and change of possession of the property would be raised at trial, since these are the factual bases for the statutory presumption of fraud, it does not appear that he was prejudiced by the raising of the issue and the resulting instruction of the court, even though the defense was not affirmatively pleaded. Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Review where issue of fraud not raised in pleadings. — Even if the issue of fraud has not been raised in the pleadings of the parties, a party is still entitled to review of the issue on appeal if the issue was tried by the express or implied consent of the parties, under Civ. R. 15(b). Rollins v. Leibold, Sup. Ct. Op. No. 910 (File No. 1646), 512 P.2d 937 (1973).

Quoted in First Nat'l Bank v. Enzler, Sup. Ct. Op. No. 1170 (File No. 2181), 537 P.2d 517 (1975).

Sec. 09.25.110. Inspection and copies of public records.

NOTES TO DECISIONS

For discussion of the history of this section, see City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Broad policy. — This section and AS 09.25.120 articulate a broad policy of open records. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

The "agencies and departments" language used in this section must be read as referring to the agencies and departments of the governments to which the statute applies, but that language itself does not define what the applicable level of government is. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

The word "public" as used in this section and AS 09.25.120 with "officer" refers both to state and local officials. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Application to municipalities. — The provisions of this section are applicable to municipalities. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

In light of the common law rule, legislative history, and the court's reading of the sections, the state supreme court will construe this section and AS 09.25.120 as that court would have construed them prior to 1957, which is as a strong legislative declaration that records in the possession of municipalities shall be available for public inspection, subject to exceptions based on need. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Disclosure of applications for public posts. — Strong public interest in the disclosure of the affairs of government generally, and in an open selection process for high public officials in particular, requires public disclosure and inspection of applications for posts having substantial discretionary authority. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Sec. 09.25.120. Inspection and copying of public records.

NOTES TO DECISIONS

For discussion of the history of this section, see City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Broad policy. — AS 09.25.110 and this section articulate a broad policy of open records. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Effect of "in the state" language. — When the legislature chose to say "in the state," and not "of the state" in the first sentence of this section, they were conscious of the fact that they were defining scope and had it been intended to limit the application of this section to state agencies and departments, it could easily and clearly have done so. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

The word "public" as used in AS 09.25.110 and this section with "officer" refers both to state and local officials. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Application to municipalities. — The provisions of AS 09.25.110 and this section are applicable to municipalities. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

In light of the common law rule, legislative history, and the court's reading of the sections, the state supreme court will construe AS 09.25.110 and this section as that court would have construed them prior to 1957, which is as a strong legislative declaration that records in the possession of municipalities shall be available for public inspection, subject to exceptions based on need. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op.

No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Disclosure of applications for public posts. — Strong public interest in the disclosure of the affairs of government generally, and in an open selection process for high public officials in particular requires public disclosure and inspection of applications for posts having substantial discretionary authority. City of Kenai v. Kenai Peninsula Newspapers, Inc., Sup. Ct. Op. No. 2479 (File Nos. 4954, 5433), 642 P.2d 1316 (1982).

Sec. 09.25.121. Copies of public records for veterans. When a copy of a public record is required by the division of veterans' affairs, Department of Commerce and Economic Development or by the United States Veterans' Administration to be used in determining the eligibility of a person to participate in benefits, the official custodian of the public record shall, without charge, provide the applicant for the benefits, a person acting on his behalf, or an authorized representative of the division of veterans' affairs or the United States Veterans' Administration with a certified copy of the record. (AS 09.25.123; § 1 ch 35 SLA 1981)

Cross references. — As to records of veterans of the armed forces, see AS 26.10.070.

Editor's notes. — This section was enacted as AS 09.25.123 but was renumbered by the revisor of statutes pursuant to AS 01.05.031.

Sec. 09.25.125. Enforcement: Injunctive relief. A person having custody or control of a public record who obstructs or attempts to obstruct, or a person not having custody or control who aids or abets another person in obstructing or attempting to obstruct, the inspection of a public record subject to inspection under AS 09.25.110 or 09.25.120 may be enjoined by the superior court from obstructing, or attempting to obstruct, the inspection of public records subject to inspection under AS 09.25.110 or 09.25.120. (§ 1 ch 74 SLA 1975)

Sec. 09.25.160. Challenge of privilege.

NOTES TO DECISIONS

Cited in Allred v. State, Sup. Ct. Op. No. 1304 (File No. 2343), 554 P.2d 411 (1976).

Sec. 09.25.220. Definitions. In AS 09.25.150 — 09.25.220, unless the context otherwise requires,

(1) "privilege" means the conditional privilege granted to public officials and reporters to refuse to testify as to a source of information;

(2) "public official" means a person elected to a public office created by the Constitution or laws of this state, whether executive, legislative or judicial, and who was holding that office at the time of the communication for which privilege is claimed;

18.50.380; (2) records pertaining to juveniles; (3) medical and related public health records; (4) records required to be kept confidential by a federal law or regulation or by state law. Every public officer having the custody of records not included in the exceptions shall permit the inspection, and give on demand and on payment of the legal fees therefor a certified copy of the writing or record, and the copy shall in all cases be evidence of the original. Recorders shall permit memoranda, transcripts, and copies of the public writings and records in their offices to be made by photography or otherwise for the purpose of examining titles to real estate described in the public writings and records, making abstracts of title or guaranteeing or insuring the titles of the real estate, or building and maintaining title and abstract plants; and shall furnish proper and reasonable facilities to persons having lawful occasion for access to the public writings and records for those purposes, subject to reasonable rules and regulations, in conformity to the direction of the court, as are necessary for the protection of the writings and records and to prevent interference with the regular discharge of the duties of the recorders and their employees. (§ 3.23 ch 101 SLA 1962)

Cross references.—See Civ. R. 44(b)(4). As to management and preservation of public records, see AS 40.21.

Sec. 09.25.130. Effect of private seals and scrolls. Private seals and scrolls as a substitute for seals are abolished. They are not required to an instrument, but when used their effect remains unchanged. (§ 3.10 ch 101 SLA 1962)

Sec. 09.25.150. Claiming of privilege by public official or reporter. Except as provided in §§ 150—220 of this chapter, no public official or reporter may be compelled to disclose the source of information procured or obtained by him while acting in the course of his duties as a public official or reporter. (§ 1 ch 115 SLA 1967)

Editor's note.—Section 2, ch. 115, SLA 1967, provides: "This bill changes Rule 43(h) of the Supreme Court Rules [of Civil Procedure] by adding to the privileges there listed, the conditional privilege for public officers and reporters as to sources of information."

Sec. 09.25.160. Challenge of privilege. (a) When a public official or reporter claims the privilege in a cause being heard before the supreme court or a superior court of this state, a person who has the right to question him in that proceeding, or the court on its own motion, may challenge the claim of privilege. The court shall make or cause to be made whatever inquiry the court thinks necessary to a determination of the issue. The inquiry may be made instanter by way of questions put to the witness claiming the privilege and a decision then rendered, or the court may require the presence of other witnesses or documentary showing or may

by other departments of the executive branch when the commissioner determines that the needs of the other departments will be best served by the authorization. Nothing in this section precludes the department from obtaining necessary contractual assistance for automatic data processing activities. Nothing in this section precludes the legislature or judicial system from recruiting and employing data processing personnel or from obtaining necessary contractual assistance for automatic data processing activities.

(f) The division of data processing shall coordinate with the divisions of telecommunications in providing for the effective transfer of information by telecommunications through the establishment of compatible systems and common standards. (§ 2 ch 170 SLA 1972; am Executive Order No. 50, § 8 (1981))

Effect of amendments. — The 1981 amendment added subsection (f).

Article 4. Older Alaskans Commission.

Section	Section
200. Older Alaskans Commission	230. Powers, duties, and limitations
210. Meetings	240. Definitions
220. Compensation	

Sec. 44.21.200. Older Alaskans Commission. (a) The Older Alaskans Commission is established in the Department of Administration. The members of the commission include

(1) the commissioner of the Department of Administration or the commissioner's designee;

(2) the commissioner of the Department of Community and Regional Affairs or the commissioner's designee;

(3) the commissioner of the Department of Health and Social Services or the commissioner's designee;

(4) the chairman of the Pioneers' Homes Advisory Board appointed under AS 44.21.100 — 44.21.130; and

(5) seven Alaskans selected on the basis of their knowledge and demonstrated interest in the concerns of older Alaskans, appointed by the governor in accordance with (b) of this section.

(b) After requesting from senior citizens organizations the names of persons who are qualified for and interested in serving on the commission, the governor shall appoint the members of the commission under (a)(5) of this section. Appointments shall be made by the governor to assure representation of low-income persons and minorities, and representation from rural and urban areas of the state, and to secure statewide geographical representation on the commission. At least six of the persons appointed by the governor shall be 60 years of age or

older. At least two of these persons shall be 65 years of age or older. Each member appointed by the governor shall be a resident of the state.

(c) The persons appointed under (a)(5) of this section serve overlapping four-year terms, and serve at the pleasure of the governor. A member may be reappointed, but no member appointed under (a)(5) of this section may serve more than two consecutive terms or eight consecutive years, whichever is longer.

(d) If a person appointed under (a)(5) of this section fails to attend three consecutive meetings of the commission, a majority of the members of the commission may request the governor to terminate the membership of the member and to fill the vacancy.

(e) A vacancy in the membership of persons appointed under (a)(5) of this section shall be filled by appointment by the governor. The person appointed shall serve for the unexpired portion of the term. (§ 2 ch 79 SLA 1981)

Editor's notes. — Section 13, ch. 79, SLA 1981, provides: "INITIAL MEMBERSHIP AND MEETING OF COMMISSION (a) Of the seven public members first appointed by the governor to the Older Alaskans Commission under AS 44.21.200(a)(5),

(1) three shall serve a term of two years;

(2) two shall serve a term of three years;

(3) two shall serve a term of four years.

(b) In making appointments of the first public members of the Older Alaskans Commission under AS 44.21.200(a)(5), the governor shall designate an expiration date of the terms of members first appointed in accordance with (a) of this section.

(c) The governor shall determine the date and place of the first meeting of the Older Alaskans Commission; however, that meeting shall be held not later than 60 days after the effective date of this Act.

Sec. 44.21.210. Meetings. (a) The commission shall meet at the call of the chairperson, at the request of a majority of the members, or at a regularly scheduled time as determined by a majority of the members. The commission shall meet at least six times each year.

(b) The members of the commission listed in AS 44.21.200(a)(1) — (4) may not vote on matters before the commission. A majority of the members of the commission listed in AS 44.21.200(a)(5) constitutes a quorum for conducting business and exercising the powers of the commission.

(c) The commission shall elect one of its members as chairperson, and may select other officers it considers necessary. (§ 2 ch 79 SLA 1981)

Sec. 44.21.220. Compensation. Members of the commission receive no compensation for their services, but are entitled to per diem and travel allowances authorized by law for other boards and commissions under AS 39.20.180. (§ 2 ch 79 SLA 1981)

Sec. 44.21.230. Powers, duties, and limitations. (a) The commission shall

Sec. 18.65.270. Applicability of Administrative Procedure Act. AS 18.65.150 — 18.65.290 shall be administered in compliance with the Administrative Procedure Act (AS 44.62). (§ 1 ch 178 SLA 1972)

Sec. 18.65.280. Exemptions. (a) The commissioner and deputy commissioner of public safety and the chief administrative officers of local police departments are exempt from the requirements of AS 18.65.240. However, a person appointed chief of a local police department after July 1, 1981, who performs any operational duties, shall meet the requirements of AS 18.65.240(a)(1).

(b) A political subdivision with an established police training program meeting the requirements of AS 18.65.220(2) and (3) may exclude itself from the requirements of AS 18.65.240 by ordinance. The exclusion has no effect on eligiblity to receive federal or state grants. (§ 1 ch 178 SLA 1972; am § 9 ch 19 SLA 1981)

Revisor's notes. — The words "a political subdivision" were substituted for "any local government" in subsection (b) by the revisor of statutes pursuant to AS 01.05.031.

Effect of amendments. — The 1981 amendment rewrote this section.

Sec. 18.65.290. Definitions. In AS 18.65.130 — 18.65.290

(1) "council" means the Alaska Police Standards Council;

(2) "police officer" means a full-time employee of the state or a local police department with the authority to arrest and issue citations; detain a person taken into custody until that person can be arraigned before a judge or magistrate; conduct investigations of violations of and enforce criminal laws, regulations and traffic laws; search with or without a warrant persons, dwellings, and other forms of property for evidence of a crime; carry a concealed weapon; and take other action consistent with exercise of these enumerated powers when necessary to maintain the public peace;

(3) "chief administrative officer" means a chief of police or other official who is head of a police department in a political subdivision. (§ 1 ch 178 SLA 1972; am §§ 10, 11 ch 19 SLA 1981)

Effect of amendments. — The 1981 amendment rewrote paragraph (2) and added paragraph (3).

Opinions of attorney general. — To be a police officer within the meaning of this statute, an officer must be currently working full time for a police department, that is an organized civil force whose basic purpose and function is to maintain peace and order and to prevent and investigate criminal offenses. September 18, 1977, Op. Att'y Gen.

As applied to the coverage of AS 18.65.130 — 18.65.290, the term "police officer" is more restrictively defined than the definition in AS 01.10.060(6) to include all those full-time employees of police departments administered by the state or one of its political subdivisions, who have full police duties and the authority to enforce all of the laws of the State of Alaska which carry a penalty for their violation. September 18, 1977, Op. Att'y Gen.

Comparing the classification of "peace officer" in AS 01.10.060(6) with that of "police officer," it is apparent that police officers, as defined in paragraph (2), are always peace officers since they have full police duties that are exercised on a full-time basis. However, the converse of

has statute info already

STAFF REPORT

HB 192, PROTECTION OF THE ELDERLY

MARCH 10,1983

Purpose: To protect the elderly from abuse by requiring those working with elderly to report to the Department of Health and Social Services, evidence of abuse when it is observed.

The bill specifies numerous health professionals, and others, who are required to report evidence of abuse. "Abuse" means the infliction of physical pain, injury, or mental anguish, or the deprivation by a caretaker of services that are necessary to maintain the physical and mental health of an elderly person.

The Department of Health and Social Services suggests a change to add the word "willful" before the word "deprivation". The drafter of the bill suggests that since the bill is directed at the reporting of abuse, not the prosecution of those inflicting the abuse, the determination of intent should not be left up to the reporter. Thus, the addition is not necessary.

Failure by those obligated by the bill to report abuse is classed as a "violation" (AS 11.81.900). A violation is a non-criminal offense punishable by fine, but not imprisonment of other penalty. No jury trial or public defender is authorized. In the event that immediate harm seems imminent, the report of abuse must be made to a police officer who must act to protect the subject.

A person making a report of abuse in good faith is immune from civil or criminal liability.

The DHSS must investigate and report on each case of abuse brought to it. The DHSS must provide protective services as are available to the elderly. The Department is authorized to implement regulations to carry out the act. The regulations must be approved by the Older Alaskans Commission.

2. a) Organizational Support for Bill	**2. b) Organizational Opposition to Bill**
1. Anchorage Elder Abuse Task Force 2. Office of Senior Citizen Ombudsman 3. Alaska White House Conference Delegates	Unknown

3. Program Effects of Bill

The responsibilities assigned to the Commission under this legislation are consistent with current responsibilities and functions and will not require additional staff or expenditures. Under AS 44.21.230 the Commission is authorized to make recommendations with respect to regulations for services that benefit older Alaskans and to receive reports from state agencies concerned with the conditions and needs of older Alaskans.

4. Fiscal Impact: ☒ None ☐ Fiscal Note Attached

5. Amendments Proposed:

Commission staff recommends that "willful" be inserted before "deprivation" under Definitions, Sec. 47.24.100, (2) line 23.

6. Comments:

This legislation is consistent with AS 44.21 and the legislative mandates of the Older Alaskans Commission which seek to ensure health and dignity for the State's elderly. Historically elder abuse is a hidden social problem but one that is encountered by Commission funded senior programs statewide. These programs and the Commission will welcome specific procedures and services for handling these critical problems.

IN THE HOUSE BY CLOCKSIN

HOUSE BILL NO. 192

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to protection of the elderly."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. In order to protect elderly persons from physical harm resulting from abuse, neglect, and abandonment and to assist elderly persons who are unable to protect or care for themselves, the legislature requires the reporting to the state by health professionals and others of cases involving elderly persons who have been or are being physically harmed. It is the intent of the legislature that these reports of harm be investigated and that appropriate protective services be offered in an effort to prevent or alleviate physical harm to the elderly persons of the state. It is further the intent of the legislature to provide immunity from civil or criminal liability to persons making good faith reports of physical or other harm to an elderly person.

* Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 24. PROTECTION OF THE ELDERLY.

Sec. 47.24.010. REPORTS OF HARM. (a) The following persons who, in the performance of their professional duties, have reasonable cause to believe that an elderly person has suffered physical harm as a result of abuse, neglect, or abandonment shall, not later than 24 hours after first having cause for the belief, report the harm to the Department of Health and Social Services:

(1) a physician or other licensed health care provider;

(2) a mental health professional as defined in AS 47.30.-915(11);

(3) a pharmacist;

(4) an administrator or employee of a nursing home, residential care or health care facility;

(5) a guardian or conservator;

(6) a police officer as defined in AS 18.65.290(2);

(7) a village health aide;

(8) a social worker;

(9) a member of the clergy;

(10) a staff employee of a project funded by the Older Alaskans Commission.

(b) A report of harm made under this section may include the name and address of the person reporting the harm and shall include

(1) the name and address of the elderly person;

(2) information relating to the nature and extent of the abuse, neglect, or abandonment;

(3) other information that the person reporting the harm believes might be helpful in an investigation of the case or in providing protection for the elderly person.

(c) A person who fails to comply with this section is guilty of a violation as defined in AS 11.81.900(55).

(d) This section does not prohibit a person listed in (a) of this section from reporting cases of physical or other harm to an elderly person that have come to the person's attention in a nonprofessional capacity, nor does it prohibit any other person from reporting physical or other harm to an elderly person that the person has reasonable cause to believe is a result of abuse, neglect, or abandonment.

(e) If immediate action is necessary to protect the elderly person from imminent physical harm, the person shall make the report

of harm to a police officer as defined in AS 18.65.290(2). The police officer shall take immediate action to protect the elderly person and shall, at the earliest opportunity, notify the department.

(f) A person who, in good faith, makes a report of physical or other harm to an elderly person under this chapter, or who participates in judicial proceedings related to the submission of reports under this chapter, is immune from any civil or criminal liability that might otherwise be incurred or imposed.

Sec. 47.24.020. ACTION ON REPORTS. (a) Upon receiving a report of physical harm, the department shall promptly initiate an investigation to determine the physical condition of the elderly person named in the report and whether action or services are needed for the protection of the elderly person. The department shall ~~make a reasonable effort to~~ personally interview the elderly person during the investigation.

(b) The department shall prepare a written report of the investigation, including findings, recommendations, and a determination of whether and what kind of protective services are to be offered to the elderly person. Upon request, the person who reported harm to the elderly person shall be notified of the status of the investigation.

(c) The department shall immediately terminate an investigation under this section upon the request of an elderly person who is the subject of a report of harm. However, if the department has reasonable cause to believe that the elderly person is incapacitated, the department may petition the superior court under AS 13.26 for appointment of a guardian or temporary guardian for the elderly person for the purpose of obtaining consent to continue the investigation.

Sec. 47.24.030. PROTECTIVE SERVICES. (a) The department shall provide available protective services to a harmed elderly person if

and to the extent to which the elderly person consents. If the department has reasonable cause to believe that the elderly person lacks the capacity to consent to receiving protective services, it may petition the superior court under AS 13.26 for appointment of a guardian or temporary guardian for the elderly person for the purpose of obtaining consent.

(b) If an elderly person who has consented to receiving protective services is prevented by a caretaker from receiving the services, the department may assist the elderly person to petition the superior court for an injunction restraining the caretaker from interfering with the provision of protective services to the elderly person.

Sec. 47.24.040. REVIEW AND REFERRAL. The department shall, not later than 90 days after initiating the provision of protective services to an elderly person, initiate a review of the case to determine whether continuation or modification of protective services that are being provided is warranted. The department shall reevaluate the case every 90 days thereafter until the case is closed.

Sec. 47.24.050. CONFIDENTIALITY OF REPORTS. (a) Investigation reports and reports of harm filed under this chapter are confidential and are not subject to public inspection and copying under AS 09.25.110 - 09.25.125. However, in accordance with this chapter and department regulations issued under this chapter, investigation reports may be used by appropriate governmental agencies inside and outside the state, in connection with investigations or judicial proceedings involving abuse, neglect, or abandonment of an elderly person.

(b) The department shall disclose a report of harm if the elderly person who is the subject of the report consents in writing. The department shall, upon request, disclose the number of verified reports of harm that occurred at an institution for care of the elderly.

that is certified by the state.

Sec. 47.24.060. AUTHORITY OF THE DEPARTMENT. In performing its duties under this chapter, the department may, subject to the person's consent, initiate actions necessary to assure the health, safety and welfare of an elderly person, including the transfer of the elderly person from a nursing home, residential care or health care facility.

Sec. 47.24.070. REGULATIONS. Regulations to implement this chapter shall be approved by the Older Alaskans Commission (AS 44.21.-200) before adoption by the department.

Sec. 47.24.075. EVIDENCE NOT PRIVILEGED. Neither the physician-patient nor the husband-wife privilege is a ground for excluding evidence regarding an elderly person's harm, or its cause, in a judicial proceeding related to a report made under this chapter.

Sec. 47.24.080. QUARTERLY REPORT. The department shall submit to the Older Alaskans Commission each quarter a statistical report of the department's activities related to the protection of elderly persons in the state. The report may not disclose the identity of victims or perpetrators of the abuse, neglect, or abandonment.

Sec. 47.24.100. DEFINITIONS. In this chapter

(1) "abandonment" means desertion of an elderly person by a caretaker;

(2) "abuse" means the infliction of physical pain, injury, or mental anguish, or the deprivation by a caretaker of services that are necessary to maintain the physical and mental health of an elderly person;

(3) "caretaker" means a person who is responsible for the care of an elderly person as a result of family relationship, or who has assumed responsibility for the care of an elderly person voluntarily, by contract, or by court order;

(4) "department" means the Department of Health and Social Services;

(5) "elderly person" means a resident of Alaska who is 60 years of age or older;

(6) "incapacitated" means a person's ability to receive and evaluate information or to communicate decisions is impaired for reasons other than minority to the extent that the person lacks the ability to obtain the essential requirements for physical health or safety without court-ordered assistance;

(7) "neglect" means the failure by ~~an elderly person or~~ a caretaker to provide services necessary to maintain the physical and mental health of the elderly person;

(8) "protective services" means services intended to prevent or alleviate harm resulting from abuse, neglect, exploitation, or abandonment.

IN THE HOUSE BY CLOCKSIN

HOUSE BILL NO. 192

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to protection of the elderly."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. In order to protect elderly persons from physical harm resulting from abuse, neglect, and abandonment and to assist elderly persons who are unable to protect or care for themselves, the legislature requires the reporting to the state by health professionals and others of cases involving elderly persons who have been or are being physically harmed. It is the intent of the legislature that these reports of harm be investigated and that appropriate protective services be offered in an effort to prevent or alleviate physical harm to the elderly persons of the state. It is further the intent of the legislature to provide immunity from civil or criminal liability to persons making good faith reports of physical or other harm to an elderly person.

* Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 24. PROTECTION OF THE ELDERLY.

Sec. 47.24.010. REPORTS OF HARM. (a) The following persons who, in the performance of their professional duties, have reasonable cause to believe that an elderly person has suffered physical harm as a result of abuse, neglect, or abandonment shall, not later than 24 hours after first having cause for the belief, report the harm to the Department of Health and Social Services:

(1) a physician or other licensed health care provider;

(2) a mental health professional as defined in AS 47.30.-915(11);

(copy)

ADD: (11) VPSO
(12) EMT or mobile intensive care PARAMEDICS
(13) HOMEMAKER program or HEALTH AID

(3) a pharmacist;

(4) an administrator ~~or employee~~ of a nursing home, residential care or health care facility; & DELETE

(5) a guardian or conservator;

(6) a police officer as defined in AS 18.65.290(2);

(7) a village health aide;

(8) a social worker;

(9) a member of the clergy;

(10) a staff employee of a project funded by the Older Alaskans Commission.

(b) A report of harm made under this section may include the name and address of the person reporting the harm and shall include

(1) the name and address of the elderly person;

(2) information relating to the nature and extent of the abuse, neglect, or abandonment;

(3) other information that the person reporting the harm believes might be helpful in an investigation of the case or in providing protection for the elderly person.

(c) A person who fails to comply with this section is guilty of a violation as defined in AS 11.81.900(55).

(d) This section does not prohibit a person listed in (a) of this section from reporting cases of physical or other harm to an elderly person that have come to the person's attention in a non-professional capacity, nor does it prohibit any other person from reporting physical or other harm to an elderly person that the person has reasonable cause to believe is a result of abuse, neglect, or abandonment.

(e) If immediate action is necessary to protect the elderly person from imminent physical harm, the person shall make the report

Refer to VPSO

of harm to a police officer as defined in AS 18.65.290(2) or VPSO. The police officer shall take immediate action to protect the elderly person and shall, at the earliest opportunity, notify the department.

(f) A person who, in good faith, makes a report of physical or other harm to an elderly person under this chapter, or who participates in judicial proceedings related to the submission of reports under this chapter, is immune from any civil or criminal liability that might otherwise be incurred or imposed.

Sec. 47.24.020. ACTION ON REPORTS. (a) Upon receiving a report of physical harm, the department shall promptly initiate an investigation to determine the physical condition of the elderly person named in the report and whether action or services are needed for the protection of the elderly person. The department shall [make a reasonable effort to] personally interview the elderly person during the investigation. Unless person is unconscious or otherwise impaired and can not respond.

(b) The department shall prepare a written report of the investigation, including findings, recommendations, and a determination of whether and what kind of protective services are to be offered to the elderly person. Upon request, the person who reported harm to the elderly person shall be notified of the status of the investigation.

(c) The department shall immediately terminate an investigation under this section upon the request of an elderly person who is the subject of a report of harm. However, if the department has reasonable cause to believe that the elderly person is incapacitated the department may petition the superior court under AS 13.26 for appointment of a guardian or temporary guardian for the elderly person for the purpose of obtaining consent to continue the investigation.

Sec. 47.24.030. PROTECTIVE SERVICES. (a) The department shall provide available protective services to a harmed elderly person if

and to the extent to which the elderly person consents. If the department has reasonable cause to believe that the elderly person lacks the capacity to consent to receiving protective services, it may petition the superior court under AS 13.26 for appointment of a guardian or temporary guardian for the elderly person for the purpose of obtaining consent.

(b) If an elderly person who has consented to receiving protective services is prevented by a caretaker from receiving the services, the department may assist the elderly person to petition the superior court for an injunction restraining the caretaker from interfering with the provision of protective services to the elderly person.

Sec. 47.24.040. REVIEW AND REFERRAL. The department shall, not later than 90 days after initiating the provision of protective services to an elderly person, initiate a review of the case to determine whether continuation or modification of protective services that are being provided is warranted. The department shall reevaluate the case every 90 days thereafter until the case is closed.

Sec. 47.24.050. CONFIDENTIALITY OF REPORTS. (a) Investigation reports and reports of harm filed under this chapter are confidential and are not subject to public inspection and copying under AS 09.25.110 - 09.25.125. However, in accordance with this chapter and department regulations issued under this chapter, investigation reports may be used by appropriate governmental agencies inside and outside the state, in connection with investigations or judicial proceedings involving abuse, neglect, or abandonment of an elderly person.

(b) The department shall disclose a report of harm if the elderly person who is the subject of the report consents in writing. The department shall, upon request, disclose the number of verified reports of harm that occurred at an institution for care of the elderly.

[that is certified by the state.]

Sec. 47.24.060. AUTHORITY OF THE DEPARTMENT. In performing its duties under this chapter, the department may, subject to the person's consent, initiate actions necessary to assure the health, safety and welfare of an elderly person, including the transfer of the elderly person from a nursing home, residential care or health care facility.

Sec. 47.24.070. REGULATIONS. Regulations to implement this chapter shall be approved by the Older Alaskans Commission (AS 44.21.-200) before adoption by the department.

Sec. 47.24.075. EVIDENCE NOT PRIVILEGED. Neither the physician-patient nor the husband-wife privilege is a ground for excluding evidence regarding an elderly person's harm, or its cause, in a judicial proceeding related to a report made under this chapter.

Sec. 47.24.080. QUARTERLY REPORT. The department shall submit to the Older Alaskans Commission each quarter a statistical report of the department's activities related to the protection of elderly persons in the state. The report may not disclose the identity of victims or perpetrators of the abuse, neglect, or abandonment.

Sec. 47.24.100. DEFINITIONS. In this chapter

(1) "abandonment" means desertion of an elderly person by a caretaker;

(2) "abuse" means the infliction of physical pain, injury, or mental anguish, or the deprivation [by a caretaker] of services that are necessary to maintain the physical and mental health of an elderly person;

(3) "caretaker" means a person who is responsible for the care of an elderly person as a result of family relationship, or who has assumed responsibility for the care of an elderly person voluntarily, by contract, or by court order;

(4) "department" means the Department of Health and Social Services;

(5) "elderly person" means a resident of Alaska who is ~~60~~ 65 years of age or older;

(6) "incapacitated" means a person's ability to receive and evaluate information or to communicate decisions is impaired for reasons other than minority to the extent that the person lacks the ability to obtain the essential requirements for physical health or safety without court-ordered assistance;

(7) "neglect" means the failure [DELETE ~~by an elderly person~~ or] a caretaker to provide services necessary to maintain the physical and mental health of the elderly person;

(8) "protective services" means services intended to prevent or alleviate harm resulting from abuse, neglect, exploitation, or abandonment.

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to protection of the elderly."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. In order to protect elderly persons from physical harm resulting from abuse, neglect, and abandonment and to assist elderly persons who are unable to protect or care for themselves, the legislature requires the reporting to the state by health professionals and others of cases involving elderly persons who have been or are being physically harmed. It is the intent of the legislature that these reports of harm be investigated and that appropriate protective services be offered in an effort to prevent or alleviate physical harm to the elderly persons of the state. It is further the intent of the legislature to provide immunity from civil or criminal liability to persons making good faith reports of physical or other harm to an elderly person.

* Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 24. PROTECTION OF THE ELDERLY.

Sec. 47.24.010. REPORTS OF HARM. (a) The following persons who, in the performance of their professional duties, have reasonable cause to believe that an elderly person has suffered physical harm as a result of abuse, neglect, or abandonment shall, not later than 24 hours after first having cause for the belief, report the harm to the Department of Health and Social Services:

(1) a physician or other licensed health care provider;

(2) a mental health professional as defined in AS 47.30.-915(11);

(3) a pharmacist;

(4) an administrator of a nursing home, residential care or health care facility;

(5) a guardian or conservator;

(6) a police officer as defined in AS 18.65.290(2);

(7) a village public safety officer;

(8) a village health aide;

(9) a social worker;

(10) a member of the clergy;

(11) a staff employee of a project funded by the Older Alaskans Commission;

ADD: → (12) an employee of a homemaker program or home health aide program.

(b) A report of harm made under this section may include the name and address of the person reporting the harm and shall include

(1) the name and address of the elderly person;

(2) information relating to the nature and extent of the abuse, neglect, or abandonment;

(3) other information that the person reporting the harm believes might be helpful in an investigation of the case or in providing protection for the elderly person.

(c) A person who fails to comply with this section is guilty of a violation as defined in AS 11.81.900(55).

(d) This section does not prohibit a person listed in (a) of this section from reporting cases of physical or other harm to an elderly person that have come to the person's attention in a non-professional capacity, nor does it prohibit any other person from reporting physical or other harm to an elderly person that the person has reasonable cause to believe is a result of abuse, neglect, or

abandonment.

(e) If immediate action is necessary to protect the elderly person from imminent physical harm, the person shall make the report of harm to a police officer as defined in AS 18.65.290(2) or a village public safety officer. The police officer or village public safety officer shall take immediate action to protect the elderly person and shall, at the earliest opportunity, notify the department.

(f) A person who, in good faith, makes a report of physical or other harm to an elderly person under this chapter, or who participates in judicial proceedings related to the submission of reports under this chapter, is immune from any civil or criminal liability that might otherwise be incurred or imposed.

Sec. 47.24.020. ACTION ON REPORTS. (a) Upon receiving a report of physical harm, the department shall promptly initiate an investigation to determine the physical condition of the elderly person named in the report and whether action or services are needed for the protection of the elderly person. The department shall personally interview the elderly person during the investigation, unless the person is unconscious or otherwise physically or mentally impaired to such an extent as to be unable to respond to questions.

(b) The department shall prepare a written report of the investigation, including findings, recommendations, and a determination of whether and what kind of protective services are to be offered to the elderly person. Upon request, the person who reported harm to the elderly person shall be notified of the status of the investigation. The department shall provide to the Department of Law a copy of each report of an investigation of harm to an elderly person that resulted from abuse.

(c) The department shall immediately terminate an investigation

under this section upon the request of an elderly person who is the subject of a report of harm. However, if the department has reasonable cause to believe that the elderly person is incapacitated, the department may petition the superior court under AS 13.26 for appointment of a guardian or temporary guardian for the elderly person for the purpose of obtaining consent to continue the investigation.

Sec. 47.24.030. PROTECTIVE SERVICES. (a) The department shall provide available protective services to a harmed elderly person if and to the extent to which the elderly person consents. If the department has reasonable cause to believe that the elderly person lacks the capacity to consent to receiving protective services, it may petition the superior court under AS 13.26 for appointment of a guardian or temporary guardian for the elderly person for the purpose of obtaining consent.

(b) If an elderly person who has consented to receiving protective services is prevented by a caretaker from receiving the services, the department may assist the elderly person to petition the superior court for an injunction restraining the caretaker from interfering with the provision of protective services to the elderly person.

Sec. 47.24.040. REVIEW AND REFERRAL. The department shall, not later than 90 days after initiating the provision of protective services to an elderly person, initiate a review of the case to determine whether continuation or modification of protective services that are being provided is warranted. The department shall reevaluate the case every 90 days thereafter until the case is closed.

Sec. 47.24.050. CONFIDENTIALITY OF REPORTS. (a) Investigation reports and reports of harm filed under this chapter are confidential and are not subject to public inspection and copying under AS 09.25.-110 - 09.25.125. However, in accordance with this chapter and

department regulations issued under this chapter, investigation reports may be used by appropriate governmental agencies inside and outside the state, in connection with investigations or judicial proceedings involving abuse, neglect, or abandonment of an elderly person.

(b) The department shall disclose a report of harm if the elderly person who is the subject of the report consents in writing. The department shall, upon request, disclose the number of verified reports of harm that occurred at an institution for care of the elderly.

Sec. 47.24.060. AUTHORITY OF THE DEPARTMENT. In performing its duties under this chapter, the department may, subject to the person's consent, initiate actions necessary to assure the health, safety and welfare of an elderly person, including the transfer of the elderly person from a nursing home, residential care or health care facility.

Sec. 47.24.070. REGULATIONS. Regulations to implement this chapter shall be approved by the Older Alaskans Commission (AS 44.21.-200) before adoption by the department.

Sec. 47.24.075. QUARTERLY REPORT. The department shall submit to the Older Alaskans Commission each quarter a statistical report of the department's activities related to the protection of elderly persons in the state. The report may not disclose the identity of victims or perpetrators of the abuse, neglect, or abandonment.

Sec. 47.24.100. DEFINITIONS. In this chapter

(1) "abandonment" means desertion of an elderly person by a caretaker;

(2) "abuse" means the infliction of physical pain, injury, or mental anguish, or the deprivation by a caretaker of services that are necessary to maintain the physical and mental health of an elderly person;

(3) "caretaker" means a person who is responsible for the care of an elderly person as a result of family relationship, or who has assumed responsibility for the care of an elderly person voluntarily, by contract, or by court order;

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: House Bill No. 192 Date on Bill: February 11, 1983
Title: "An Act relating to protection of the elderly."
Sponsor: Clocksin
Requestor:

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital								
Operating				17.5	19.3	21.2		
Total				17.5	19.3	21.2		

b. Revenues:

Revenue								

2. Source of funds to offset fiscal impact of bill:
The funding source was not identified by the authors of the Bill.

3. Assumptions:

Passage of this Bill in its present form would necessitate educating the public through the news media and handouts. Regulations would need to be promulgated. These functions would be performed by existing staff. Without historical data for reporting abuse, neglect, or abandonment, the assumption is made that one-half again as many situations reported would result in placement, and counseling with both the individual and the family.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It not represent the policy of the Sheffield Administration or the final estimate of f impact.

POSITION PAPER/Department of Health & Social Services

"An Act relating to protection of the elderly."

OVERVIEW

This Bill includes provisions for mandatory reporting of cases of physical harm to elderly persons, investigation of reports of harm by the Department of Health and Social Services, and the offering of appropriate protective services to elderly persons in an effort to prevent or alleviate physical harm.

STATEMENT OF THE PROBLEM

In the past few years there has been increasing awareness across the nation, including Alaska, of the problems of elder abuse and neglect, as well as those elderly persons who are unable to protect or care for themselves. In 1981 an Elder Abuse Task Force was created in Anchorage and a pilot project grant was awarded to the Anchorage Community Mental Health Clinic Geriatric Unit to address the issue of elder abuse. In 1982, Elder Abuse Task Forces were created in Fairbanks and Juneau.

Elderly Alaskans in need of protective services are served by the Division of Family and Youth Services under its Adult Protective Service program which serves adults age 18 and over. Adult Protective Services are provided on a voluntary basis by a mandate under Title XX of the Social Security Act. Division social workers respond to voluntary reports of harm, investigate the circumstances of abuse, neglect, and exploitation, and offer appropriate protective services. If an adult client does not consent to services and is not incapacitated as defined under AS 13.26.005, the guardianship statute, the Division has no legal authority to intervene. If, however, an investigation indicates that an adult is incapacitated, the Division may petition the court for a guardian.

Division of Family and Youth Services' staff have actively participated in the Elder Abuse Task Forces. As a part of the Division's Fiscal Year 1983 Adult Protective Services Training Program, the issues of elder abuse, guardianship and conservatorship have been addressed. Community agencies, including programs serving older Alaskans, were invited and participated in these sessions which were conducted in Anchorage, Bethel, Fairbanks, Juneau, Ketchikan, and Nome.

Since reporting of abuse or physical harm to elderly persons is not mandatory, not all known cases are reported to a single agency. As a result, the actual extent of the problem is not known. Should the number of cases reported under the mandatory requirement significantly impact caseloads, the Division will include necessary documentation to

POSITION PAPER/Department of Health & Social Services

support the need for additional staff and service dollars in the FY 85 budget. If additional staff and service dollars become necessary but not available, the Division may not be able to meet the intent of the legislation.

RECOMMENDATION

The Department strongly endorses efforts to promote the independence and well-being of those elderly persons in need of protection. The procedures outlined in the Bill for action on reports, provision of protective services, review and referral, and confidentiality are in accordance with procedures established by the Department of Health and Social Services.

The Department recommends an amendment to Section 47.24.100(2), the definition of abuse. The Department recommends that the definition be amended as follows:

> "abuse" means the infliction of physical pain, injury, or mental anguish, or the willful deprivation by a caretaker of services that are necessary to maintain the physical and mental health of an elderly person.

OFFICE OF THE GOVERNOR

BILL ANALYSIS

Department	Sponsor (Principal)	Bill Number
Administration	Rep. Clocksin	HB 192

Department Position

The Older Alaskans Commission supports the enactment of elderly protection legislation and the mandatory reporting of physical abuse of elderly persons.

Division Director	Date	Commissioner	Date
Jon B. Wolfe	3/3/83		

GOVERNOR'S OFFICE USE

Comments:

☐ Position Noted	By	Date

SUMMARY

1. a) Related Bills (Similar or Conflicting	1. b) Other Agencies Affected by Bill
SB 122 Sens. Josephson & Fischer	Division of Family and Youth Services, DHSS
2. a) Organizational Support for Bill	**2. b) Organizational Opposition to Bill**
1. Anchorage Elder Abuse Task Force 2. Office of Senior Citizen Ombudsman 3. Alaska White House Conference Delegates	Unknown

3. Program Effects of Bill

The responsibilities assigned to the Commission under this legislation are consistent with current responsibilities and functions and will not require additional staff or expenditures. Under AS 44.21.230 the Commission is authorized to make recommendations with respect to regulations for services that benefit older Alaskans and to receive reports from state agencies concerned with the conditions and needs of older Alaskans.

4. Fiscal Impact: ☒ None ☐ Fiscal Note Attached

5. Amendments Proposed:

Commission staff recommends that "willful" be inserted before "deprivation" under Definitions, Sec. 47.24.100, (2) line 23.

6. Comments:

This legislation is consistent with AS 44.21 and the legislative mandates of the Older Alaskans Commission which seek to ensure health and dignity for the State's elderly. Historically elder abuse is a hidden social problem but one that is encountered by Commission funded senior programs statewide. These programs and the Commission will welcome specific procedures and services for handling these critical problems.

RE: Revision of the Proposed Draft/
CS for HB 194 (HESS)

The following changes have been made from the direction of the Committee at the May 23rd. H.E.S.S meeting:

1). Page 3, Line 28 to Page 4, Lines 1&2:

Sec. 14.30.191, with the advice of the draftor, was repealed and re-enacted for ease of legibility. This amendment was suggested by the Dept. of Education to include the participation of the Dept. of H & S S (see position paper attached by DH&SS).

2). Page 5, Lines 9-28:

Reinserted Section 12 pertaining to the transfer of exceptional children. This language now excludes the 'cost to the sending district' provision of the original bill but retains the necessary language of the revision. The cost remains with the state in this CS, consequently, a new fiscal note of $700,000 is attached.

3). Page 6, Lines 14-22:

Reinserts current law revisions with the exclusion of the 5% cap on ADM for Special Education. (See attached May 23 proposed amendments by Rick Robertson, Asst. A.G.)

4). Page 3 Lines 15-19:

14.30.191(b) was previously repealed. At the direction of the Committee, this section has been retained to allow for parental participation before completion of the evaluation, rather than relying on the regulation process for this input. Sec. 20 (repealer section) now excludes 14.30.191(b).

5). Page 7, Lines 14-24:

Sec. 18 AS 14.30.347 was previously repealed. The draft retains this section with a minor revision on line 15 of page 7. Repealer section (Section 20) excludes 14.30.347 in this version.

M E M O R A N D U M

TO: House H.E.S.S. Committee

FROM: Linda Otey, Committee Aide

SUBJ: Proposed CS for HB 194

DATE: May 23, 1983

At the last H.E.S.S. meeting on Saturday, May 21, the Committee asked the following questions in regard to the Draft of CSHB 194:

Rep. Herrmann: 1. Effects of AS 14.30.191(d) removing coordination between Department of Health and Social Services and Department of Education. The new language directs Department of Education to establish regulations or require the school districts to establish standards and procedures for the identification and classification of exceptional children.

2. The Department of Health and Social Services will be in attendance and will provide the Committee with a position paper.

Rep. Davis: 1. Asked staff to check on repealers in the proposed CS:

Sec. 20; Pg 9.
14.30.186(c) & (d) -
14.30.191(b) -
14.30.260 -
14.30.280 -
14.30.330
14.30.340
14.30.347

Rick Robertson, Assistant Attorney General will also be available to address these repealers. (Statutes attached)

Rep. Tischer: 1. Requested that Department of Education be present to address "Regulations" currently "on hold" for enabling legislation.

2. Also requested Department of Education to address 5% Cap for special education. The Department currently does this by regulation.

Note: Assistant Attorney General Rick Robertson was not present at the last meeting. In speaking with him earlier today, he suggested that the committee cannot simply delete Sections 12 and 15 in their entirety; but only the changes from current law. He will prepare amendments with the committee's intent allowing for current law to remain through these sections of the bill.

Note: New fiscal note attached by Dept. of Educ.

345. Repealed
347. Transportation of exceptional children
350. Definitions

Sec. 14.30.180. Purpose. It is the purpose of sections 180—350 of this chapter to provide competent education services for the exceptional children in the state who are at least three years of age and for whom the regular school facilities are inadequate or not available. (Sec. 1 ch 120 SLA 1959; am Sec. 1 ch 144 SLA 1970; am Sec. 1 ch 79 SLA 1974)

Sec. 14.30.185. Repealed. (Sec. 59 ch 98 SLA 1966)

Sec. 14.30.186. Coverage. (a) A borough or city school district shall provide for special services for exceptional children represented by not less than five children residing in the district.

(b) The board of a regional educational attendance area shall provide for special services in a school in the area for exceptional children represented by not less than five children residing in the area served by the school.

Repealed by CSHB 194 ← (c) Nothing in this section shall prevent special services from being offered to classifications represented by less than five children. ← CS removed "less than five"

Repealed by CSHB 194 ← (d) A school district or a regional educational attendance area required by secs. 10—305 of this chapter to provide special services for exceptional children may cooperate with one or more school districts or regional educational attendance areas in providing special classes. If, under the cooperative agreement, there are no special classes offered within a school district or regional educational attendance area, exceptional children may attend special classes in the cooperating school district or regional educational attendance area providing the special classes. } meaning unclear

(Sec. 2 ch 81 SLA 1965; am Sec. 1 ch 46 SLA 1966; am Sec. 46 ch 98 SLA 1966; am Sec. 22 ch 46 SLA 1970; am Secs. 2, 3 ch 144 SLA 1970; am Secs 23, 24 ch 124 SLA 1975)

Sec. 14.30.190. Repealed. (Sec. 4 ch 144 SLA 1970)

Sec. 14.30.191. Educational assessment. (a) Before placement in a special education program and not less than once a year for as long as the child is assigned to a special education program, an exceptional child shall receive an educational assessment for the identification and classification of the learning, mental and physical status of the child.

Repealed by CSHB 194 ← (b) ~~Upon~~ completion of the assessment and before placement, the school district shall provide to the parent or guardian of each exceptional child, an opportunity for consultation about the assessment. A consultation will be available after each reevaluation of the condition and placement of the exceptional child. } addressed in regs & procedures naturally - parent already participa

(c) If a parent or guardian believes that the educational assessment of his child is in error, he may request an independent examination and evaluation of the child. If a substantial discrepancy exists between the educational assessment of the school district and the independent evaluation, and if the parent or guardian so requests, a hearing shall be held before a hearing officer in order to resolve the discrepancy between evaluations and to determine the appropriate educational program placement for the exceptional child. The Department of Education shall adopt regulations for the conduct of hearings authorized by this section, for the appointment and qualifications of the hearing officer. Regulations adopted and proceedings conducted under this section are subject to the Administrative Procedure Act.

(d) The Department of Education and the Department of Health and Social Services shall cooperatively establish by regulation diagnostic standards for the identification and classification of the learning, mental and physical status of exceptional children. Standards relating to special education programs, individual or general, shall remain the responsibility of the Department of Education in conjunction with the local education agency. (Sec. 5 ch 144 SLA 1970; am Sec. 6 ch 104 SLA 1971; am Sec. 2 ch 79 SLA 1974)

Sec. 14.30.200—14.30.220. Repealed. (Sec. 5 ch 70 1963)

Sec. 14.30.230. Repealed. (Sec. 6 ch 144 SLA 1970)

Sec. 14.30.231. Advisory committee. The commissioner of education and the commissioner of health and social services shall establish an advisory committee, the function of which is to provide information and guidance for the development of appropriate special education programs and services for exceptional children. Membership of the advisory committee shall include, but not be limited to, persons representing local education agencies, state agencies, parent groups and organizations concerned with programs and services for exceptional children. (Sec. 7 ch 144 SLA 1970; am Sec. 6 ch 104 SLA 1971)

Sec. 14.30.240. Repealed. (Sec. 5 ch 70 SLA 1963)

Sec. 14.30.250. Teacher qualifications. No person shall be employed to teach a class for exceptional children unless he possesses a valid teacher certificate, and, in addition, such training as the department may require by regulations. (Sec. 9 ch 120 SLA 1959; am Sec. 47 ch 98 SLA 1966)

Repealed by CSHB 194 ←

Sec. 14.30.260. Exception to Qualifications. The school board for a district or regional educational attendance area may waive part of the qualifications for teachers as set out in section 250 of this chapter, if necessary, during the first school year special services are offered in the district or area.

(Sec. 10 ch 120 SLA 1959; am Sec. 6 ch 125 SLA 1961; am Sec. 48 ch 98 SLA 1966; am Sec. 23 ch 46 SLA 1970; am Sec. 25 ch 124 SLA 1975)

Sec. 14.30.270. Substitutes. Section 250 of this chapter does not prohibit the employment of a person, otherwise qualified to serve as a substitute teacher, to serve as a teacher of a class for exceptional children. (Sec. 12 ch 120 SLA 1959; am Sec. 49 ch 98 SLA 1966)

Repealed by CSHB 194 ←

Sec. 14.30.280. Psychologist qualifications. The minimum standards for a psychologist are the minimum standards set out in the state classification plan for a psychologist, and such additional requirements as the department prescribes by regulation. (Sec. 11 ch 120 SLA 1959; am Sec. 2 ch 125 SLA 1961; am Sec. 50 ch 98 SLA 1966)

Sec. 14.30.285. Transfers of exceptional children. (a) The Department of Education shall institute a statewide program for the education of exceptional children, to insure that whenever possible children are educated in the state at locations in or near their resident school district.

(b) The identified exceptional child may be sent to another school district or in-state educational program if the child resides in a district or school attendance area where an adequate program of education for an exceptional child is not available and if the commissioner of education determines that another school district or in-state educational program is adequate to meet his needs. If the school district approves the enrollment of the exceptional child in another school district or in-state institution and the child is enrolled, the child's education expenses shall be paid as follows:

(1) the sending school district shall pay the receiving district or institution an amount of money equal to the sending district's local cost-per-pupil rate;

(2) the Department of Education shall pay the remainder of the annual cost of the child's education above that provided for in (1) of this subsection.

(c) The identified exceptional child may be sent out of the state for special education if the child resides in a district or school attendance area where the educational program offered is not appropriate for the needs of the child and if the commissioner of education determines it is not feasible for the child to be enrolled in a special program in the state. If the Department of Education approves the enrollment of an exceptional child in an out-of-state institution and the child is enrolled in the institution, the child's education expenses shall be paid by the Department of Education.

(d) For the purposes of this section a child's education expenses are limited to the actual cost of necessary care, transportation and instruction, including room and board, while attending the designated institution.

(e) The educational assessment of an exceptional child which indicates that the educational program which is locally available is inappropriate for the needs of the child shall conform to the standards set out in section 191 of this chapter.

(f) No child may be transferred to a school outside the district in which the child resides without the consent of the parent or guardian. (Sec. 2 ch 46 SLA 1966; am Secs. 8, 9, ch 144 SLA 1970; am Sec. 6 ch 71 SLA 1972; am Sec. 3 ch 79 SLA 1974)

Sec. 14.30.295. Repealed. (Sec. 4 ch 79 SLA 1974)

Sec. 14.30.300. Repealed. (Sec. 5 ch 70 SLA 1963)

Sec. 14.30.305. Children hospitalized or confined to their homes. Special instructional services for exceptional children who are hospitalized or confined to their homes may be provided by a school district. A child who receives at least 10 hours of instruction per week may be counted as a pupil in average daily membership when computing state support under the public school foundation program. (Sec. 2 ch 46 SLA 1966)

Sec. 14.30.310. Repealed. (Sec. 5 ch 70 SLA 1963)

Sec. 14.30.320. Repealed. (Sec. 5 ch 70 SLA 1963)

Rejected by CSHB194

Sec. 14.30.330. Application for enrollment. (a) The parent or guardian of an exceptional child, or the school administrator, for exceptional children residing in the district or area in which the administrator is employed, shall make application for the enrollment of the child. If the administrator makes the application, it shall be with the full knowledge and consent of the parent or guardian.

(b) The application shall be on forms provided by the department and shall be submitted to the governing body of the district in which the child resides. When an application is submitted to a school board, it shall be forwarded to the commissioner.

(c) Final certification of a student for special services is the responsibility of the commissioner. The child shall undergo evaluation as defined by regulation of the department by qualified personnel for the purpose of determining whether or not the child is capable of receiving benefit from enrollment in a special education program. If determined eligible and capable of receiving benefit, and upon approval of the application by the commissioner, the child shall be recommended for enrollment. (Sec. 17 ch 120 SLA 1959; am Sec. 4 ch 125 SLA 1961; am Sec. 51 ch 98 SLA 1966; am Sec. 12 ch 144 SLA 1970)

Repeal

Sec. 14.30.340. When not required to enroll. No handicapped child may be required to enroll in a special education program if the parent or guardian of the child certifies to the satisfaction of the school board of the public school system where the child resides that the child is receiving adequate educational advantages. A child shall be excused from the compulsory education requirements if a physician certifies in writing that the child's bodily, mental or emotional condition does not permit his attendance at school. (Sec. 18 ch 120 SLA 1959; Sec. 6 ch 125 SLA 1961)

Sec. 14.30.345. Repealed. (Sec. 59 ch 98 SLA 1966)

related services

Repeal

Sec. 14.30.347. Transportation of exceptional children. When transportation is required to be provided as part of special services, exceptional children shall be carried with other children, except when the nature of their physical or mental handicaps is such that it is in the best interest of the exceptional children, as determined by the school district, that they be transported separately. State reimbursement for transportation of exceptional children shall be as provided for transportation of all other pupils except that eligibility for reimbursement shall not be subject to restriction based on the minimum distance between the school and the residence of the exceptional child. (am Sec. 1 ch 52 SLA 1976)

Sec. 14.30.350. Definitions. (1) "exceptional children" means children who differ markedly from their peers to the degree that they are better served by placement in a special learning program designed to serve their particular exceptionality; these children may be identified in the following categories:

POSITION PAPER/Department of Health & Social Services

HCS HOUSE BILL NO. 194 (HESS)

For an Act entitled: "An Act relating to the education of exceptional children; and providing for an effective date."

This Department is generally supportive of HB 194 but has one specific suggestion for improvement: on page 4, lines 2-5 retaining a consultation role for the Department of Health and Social Services in establishing the standards and procedures for identification and classification etc., would ensure the best efforts of both departments in this process. Specifically, on line 2, after department, add "in consultation with the Department of Health and Social Services."

There are several important improvements that will occur in special education programming as a result of this bill's passage; therefore, the Department of Health and Social Services supports this bill with the change discussed above.

TO: House H.E.S.S. Committee

FROM: Linda Otey, Committee Aide

SUBJ: Proposed CS for HB 194

DATE: May 23, 1983

At the last H.E.S.S. meeting on Saturday, May 21, the Committee asked the following questions in regard to the Draft of CSHB 194:

Rep. Herrmann: 1. Effects of AS 14.30.191(d) removing coordination between Department of Health and Social Services and Department of Education. The new language directs Department of Education to establish regulations or require the school districts to establish standards and procedures for the identification and classification of exceptional children.

2. The Department of Health and Social Services will be in attendance and will provide the Committee with a position paper.

Rep. Davis: 1. Asked staff to check on repealers in the proposed CS:

Sec. 20; Pg 9.
14.30.186(c) & (d) -
14.30.191(b) -
14.30.260 -
14.30.280 -
14.30.330
14.30.340
14.30.347

Rick Robertson, Assistant Attorney General will also be available to address these repealers. (Statutes attached)

Rep. Tischer: 1. Requested that Department of Education be present to address "Regulations" currently "on hold" for enabling legislation.

2. Also requested Department of Education to address 5% Cap for special education. The Department currently does this by regulation.

Note: Assistant Attorney General Rick Robertson was not present at the last meeting. In speaking with him earlier today, he suggested that the committee cannot simply delete Sections 12 and 15 in their entirety; but only the changes from current law. He will prepare amendments with the committee's intent allowing for current law to remain through these sections of the bill.

Note: New fiscal note attached by Dept. of Educ.

Sec. 14.30.180. Purpose. It is the purpose of sections 180—350 of this chapter to provide competent education services for the exceptional children in the state who are at least three years of age and for whom the regular school facilities are inadequate or not available. (Sec. 1 ch 120 SLA 1959; am Sec. 1 ch 144 SLA 1970; am Sec. 1 ch 79 SLA 1974)

Sec. 14.30.185. Repealed. (Sec. 59 ch 98 SLA 1966)

Sec. 14.30.186. Coverage. (a) A borough or city school district shall provide for special services for exceptional children represented by not less than five children residing in the district.

(b) The board of a regional educational attendance area shall provide for special services in a school in the area for exceptional children represented by not less than five children residing in the area served by the school.

Repealed by CSHB 194 ← (c) Nothing in this section shall prevent special services from being offered to classifications represented by less than five children.

Repealed by CSHB 194 ← (d) A school district or a regional educational attendance area required by secs. 10—305 of this chapter to provide special services for exceptional children may cooperate with one or more school districts or regional educational attendance areas in providing special classes. If, under the cooperative agreement, there are no special classes offered within a school district or regional educational attendance area, exceptional children may attend special classes in the cooperating school district or regional educational attendance area providing the special classes.

(Sec. 2 ch 81 SLA 1965; am Sec. 1 ch 46 SLA 1966; am Sec. 46 ch 98 SLA 1966; am Sec. 22 ch 46 SLA 1970; am Secs. 2, 3 ch 144 SLA 1970; am Secs 23, 24 ch 124 SLA 1975)

Sec. 14.30.190. Repealed. (Sec. 4 ch 144 SLA 1970)

Sec. 14.30.191. Educational assessment. (a) Before placement in a special education program and not less than once a year for as long as the child is assigned to a special education program, an exceptional child shall receive an educational assessment for the identification and classification of the learning, mental and physical status of the child.

Repealed by HB 194 ← (b) Upon completion of the assessment and before placement, the school district shall provide to the parent or guardian of each exceptional child, an opportunity for consultation about the assessment. A consultation will be available after each reevaluation of the condition and placement of the exceptional child.

(c) If a parent or guardian believes that the educational assessment of his child is in error, he may request an independent examination and evaluation of the child. If a substantial discrepancy exists between the educational assessment of the school district and the independent evaluation, and if the parent or guardian so requests, a hearing shall be held before a hearing officer in order to resolve the discrepancy between evaluations and to determine the appropriate educational program placement for the exceptional child. The Department of Education shall adopt regulations for the conduct of hearings authorized by this section, for the appointment and qualifications of the hearing officer. Regulations adopted and proceedings conducted under this section are subject to the Administrative Procedure Act.

(d) The Department of Education and the Department of Health and Social Services shall cooperatively establish by regulation diagnostic standards for the identification and classification of the learning, mental and physical status of exceptional children. Standards relating to special education programs, individual or general, shall remain the responsibility of the Department of Education in conjunction with the local education agency. (Sec. 5 ch 144 SLA 1970; am Sec. 6 ch 104 SLA 1971; am Sec. 2 ch 79 SLA 1974)

Sec. 14.30.200—14.30.220. Repealed. (Sec. 5 ch 70 1963)

Sec. 14.30.230. Repealed. (Sec. 6 ch 144 SLA 1970)

Sec. 14.30.231. Advisory committee. The commissioner of education and the commissioner of health and social services shall establish an advisory committee, the function of which is to provide information and guidance for the development of appropriate special education programs and services for exceptional children. Membership of the advisory committee shall include, but not be limited to, persons representing local education agencies, state agencies, parent groups and organizations concerned with programs and services for exceptional children. (Sec. 7 ch 144 SLA 1970; am Sec. 6 ch 104 SLA 1971)

Sec. 14.30.240. Repealed. (Sec. 5 ch 70 SLA 1963)

Sec. 14.30.250. Teacher qualifications. No person shall be employed to teach a class for exceptional children unless he possesses a valid teacher certificate, and, in addition, such training as the department may require by regulations. (Sec. 9 ch 120 SLA 1959; am Sec. 47 ch 98 SLA 1966)

Repealed by CSHB 194

Sec. 14.30.260. Exception to Qualifications. The school board for a district or regional educational attendance area may waive part of the qualifications for teachers as set out in section 250 of this chapter, if necessary, during the first school year special services are offered in the district or area.

(Sec. 10 ch 120 SLA 1959; am Sec. 6 ch 125 SLA 1961; am Sec. 48 ch 98 SLA 1966; am Sec. 23 ch 46 SLA 1970; am Sec. 25 ch 124 SLA 1975)

Sec. 14.30.270. Substitutes. Section 250 of this chapter does not prohibit the employment of a person, otherwise qualified to serve as a substitute teacher, to serve as a teacher of a class for exceptional children. (Sec. 12 ch 120 SLA 1959; am Sec. 49 ch 98 SLA 1966)

Repealed by CSHB 194

Sec. 14.30.280. Psychologist qualifications. The minimum standards for a psychologist are the minimum standards set out in the state classification plan for a psychologist, and such additional requirements as the department prescribes by regulation. (Sec. 11 ch 120 SLA 1959; am Sec. 2 ch 125 SLA 1961; am Sec. 50 ch 98 SLA 1966)

Sec. 14.30.285. Transfers of exceptional children. (a) The Department of Education shall institute a statewide program for the education of exceptional children, to insure that whenever possible children are educated in the state at locations in or near their resident school district.

(b) The identified exceptional child may be sent to another school district or in-state educational program if the child resides in a district or school attendance area where an adequate program of education for an exceptional child is not available and if the commissioner of education determines that another school district or in-state educational program is adequate to meet his needs. If the school district approves the enrollment of the exceptional child in another school district or in-state institution and the child is enrolled, the child's education expenses shall be paid as follows:

(1) the sending school district shall pay the receiving district or institution an amount of money equal to the sending district's local cost-per-pupil rate;

(2) the Department of Education shall pay the remainder of the annual cost of the child's education above that provided for in (1) of this subsection.

(c) The identified exceptional child may be sent out of the state for special education if the child resides in a district or school attendance area where the educational program offered is not appropriate for the needs of the child and if the commissioner of education determines it is not feasible for the child to be enrolled in a special program in the state. If the Department of Education approves the enrollment of an exceptional child in an out-of-state institution and the child is enrolled in the institution, the child's education expenses shall be paid by the Department of Education.

(d) For the purposes of this section a child's education expenses are limited to the actual cost of necessary care, transportation and instruction, including room and board, while attending the designated institution.

(e) The educational assessment of an exceptional child which indicates that the educational program which is locally available is inappropriate for the needs of the child shall conform to the standards set out in section 191 of this chapter.

(f) No child may be transferred to a school outside the district in which the child resides without the consent of the parent or guardian. (Sec. 2 ch 46 SLA 1966; am Secs. 8, 9, ch 144 SLA 1970; am Sec. 6 ch 71 SLA 1972; am Sec. 3 ch 79 SLA 1974)

Sec. 14.30.295. Repealed. (Sec. 4 ch 79 SLA 1974)

Sec. 14.30.300. Repealed. (Sec. 5 ch 70 SLA 1963)

Sec. 14.30.305. Children hospitalized or confined to their homes. Special instructional services for exceptional children who are hospitalized or confined to their homes may be provided by a school district. A child who receives at least 10 hours of instruction per week may be counted as a pupil in average daily membership when computing state support under the public school foundation program. (Sec. 2 ch 46 SLA 1966)

Sec. 14.30.310. Repealed. (Sec. 5 ch 70 SLA 1963)

Sec. 14.30.320. Repealed. (Sec. 5 ch 70 SLA 1963)

Repealed by CSHB 194

Sec. 14.30.330. Application for enrollment. (a) The parent or guardian of an exceptional child, or the school administrator, for exceptional children residing in the district or area in which the administrator is employed, shall make application for the enrollment of the child. If the administrator makes the application, it shall be with the full knowledge and consent of the parent or guardian.

(b) The application shall be on forms provided by the department and shall be submitted to the governing body of the district in which the child resides. When an application is submitted to a school board, it shall be forwarded to the commissioner.

(c) Final certification of a student for special services is the responsibility of the commissioner. The child shall undergo evaluation as defined by regulation of the department by qualified personnel for the purpose of determining whether or not the child is capable of receiving benefit from enrollment in a special education program. If determined eligible and capable of receiving benefit, and upon approval of the application by the commissioner, the child shall be recommended for enrollment. (Sec. 17 ch 120 SLA 1959; am Sec. 4 ch 125 SLA 1961; am Sec. 51 ch 98 SLA 1966; am Sec. 12 ch 144 SLA 1970)

Repealed

Sec. 14.30.340. When not required to enroll. No handicapped child may be required to enroll in a special education program if the parent or guardian of the child certifies to the satisfaction of the school board of the public school system where the child resides that the child is receiving adequate educational advantages. A child shall be excused from the compulsory education requirements if a physician certifies in writing that the child's bodily, mental or emotional condition does not permit his attendance at school. (Sec. 18 ch 120 SLA 1959; Sec. 6 ch 125 SLA 1961)

Sec. 14.30.345. Repealed. (Sec. 59 ch 98 SLA 1966)

Repealed

Sec. 14.30.347. Transportation of exceptional children. When transportation is required to be provided as part of special services, exceptional children shall be carried with other children, except when the nature of their physical or mental handicaps is such that it is in the best interest of the exceptional children, as determined by the school district, that they be transported separately. State reimbursement for transportation of exceptional children shall be as provided for transportation of all other pupils except that eligibility for reimbursement shall not be subject to restriction based on the minimum distance between the school and the residence of the exceptional child. HB 194 was accompanied by two zero fiscal notes and the following transmittal letter:

BILL HB0194
PAGE 00229
DATE 02/11/83
CHAMBER HOUSE
TEXT Dear Mr. Speaker:
Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bil l relating to the education of exceptional children. This bill updates existing statutes which require special services for gifted and handicapped children.
Alaska law has required that special services be provided exceptional children since 1965. Through enactment of the Education for all Handicapped Children Act (P.L. 93-142) in 1975, Congress made federal funds available for the education of handicapped children and established various requirements to be met by participating states. This bill amends existing statutes to assure that Alaska is in compliance with those requirements.
In addition, this bill makes minor changes in the method by which certain services are funded. The bill requires schools to pay for the services provided to children who are transferred for the purpose of receiving adequate services and places a ceiling on the number of gifted students for whom special state funds are available. These changes are made to encourage local responsibility and effective use of state funds.

Sincerely,
/s/Bill Sheffield
Bill Sheffield
Governor

Exceptional Children (education of)

HOUSE BILL NO. 194, by the Rules Committee by request of the Governor. Relates to education of exceptional children. Updates statutes in order to conform with federal law (see accompanying letter from the Governor). Sections of the bill provide the following:

—in cases involving enrollment of an exceptional child in another school district, the sending school district shall pay the child's educational expenses (currently the sending district pays an amount equal to its local cost-per-pupil rate and the Dept. of Education pays the remainder of the annual cost of the child's education);

—deletes reference to school districts providing special instructional services for exceptional children who are hospitalized or confined to their homes. Provides for state support of such programs.

--provides for state support of programs for gifted children, stating that support under the Public School Foundation Program for special education and related services is limited to not more than five percent of the average daily membership of the district or educational attendance area.

--adds section allowing the Dept. of Education, by regulation, to provide for the appointment of surrogate parents to represent exceptional children in matters relating to the provision of an appropriate public education.

--rewrites section defining "exceptional children", adding categories for the deaf, deaf-blind, hard of hearing, learning disabled, orthopedically impaired, other health impaired, seriously emotionally disturbed, speech impaired, and visually handicapped children. Also defines "school district" and "special education".

Repealers include: AS 14.30.186(c) (relates to coverage of special services for exceptional children, and states that nothing prevents special services from being offered to classifications represented by less than five children in a school district or REAA); AS 14.30.186(d) (relates to cooperation between school districts and REAA's in providing special services); AS 14.30.191(b) (relates to consultation with parents on the educational assessment of a child); AS 14.30.260 (Exception to qualifications--waiver by school district of teacher qualifications); AS 14.30.280 (relates to minimum standards for psychologists); AS 14.30.330 (Application for enrollment); and AS 14.30.347 (Transportation of exceptional children).

Provides Act takes effect July 1, 1983.

Introduced February 11 and referred to Health, Education & Social Services, then to Finance.

In his message transmitting the bill to the House for consideration, Governor Sheffield stated:

> Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the education of exceptional children. This bill updates existing statutes which require special services for gifted and handicapped children.
>
> Alaska law has required that special services be provided exceptional children since 1965. Through enactment of the Education for all Handicapped Children Act (P.L. 93-142) in 1975, Congress made federal funds available for the education of handicapped children and established various requirements to be met by participating states. This bill amends existing statutes to assure that Alaska is in compliance with those requirements.

Exceptional Children (education of)

HOUSE BILL NO. 194, (see page 157). Reported back to the House on May 25 by Health, Education & Social Services with the committee recommending it be replaced with a HESS Committee Substitute and that it do pass. Concurring: Fritz (Co-Chairman), Tischer (Co-Chairman), Goll, Koponen, Davis and Herrmann. To Finance.

The HESS CS makes the following changes:

--Adds new language to AS 14.30: "Sec. 14.30.337. ATTENDANCE REQUIRED. The parent or guardian of an exceptional child shall ensure that the child attends a program of special education and related services provided under AS 14.30.180 - 14.30.350 unless the parent or guardian demonstrates to the satisfaction of the school district that the child is receiving an appropriate education." New Secs. 1 through 3 amend portions of AS 14.30 to make violation of the above a misdemeanor, punishable by a fine of between $50 and $200, plus the cost of prosecution (amends AS 14.30.020); to require the chief administrative officer to report all apparent violations to the governing body of the district (amends AS 14.30.030); and to provide that if it is not practical for an existing law enforcement agency to enforce AS 14.30.337, the governing body of the school district or the B.I.A. may appoint the necessary truent officers to enforce the law (amends AS 14.30.050).

--Eliminates amendment to AS 14.30.285(b) that would have required a school district that sends an exceptional child for placement in another district to assume the child's education expenses (see p. 157).

--Deletes (b) from new section on state support of programs for gifted children: "State support under the public school foundation program for special education and related services for gifted children is available for not more than five percent of the average daily membership of the district or educational attendance area."

--Adds new Sec. 19 that amends AS 14.30.347, "Transportation of Exceptional Children," to read: "When transportation is required to be provided as <u>related</u> [PART OF SPECIAL] services, exceptional children shall be carried with other children, except when the nature of their physical or mental handicaps is such that it is in the best interest of the exceptional children, as determined by the school district, that they be transported separately. . . . "

--Deletes language from new definition of "seriously emotionally disturbed" children: ". . . the term includes children who are schizophrenic but does not include children who are only socially maladjusted [, UNLESS IT IS DETERMINED THAT THEY ARE SERIOUSLY EMOTIONALLY DISTURBED]."

--Repeals AS 14.30.340, "When not Required to Enroll." Provides that no handicapped child may be required to enroll in a special education program if the parent or guardian demonstrates that the child is receiving adequate educational advantages. Further provides that the child must be excused from the compulsory education requirements if a physician certifies in writing that the child's bodily, mental or emotional conditions does not permit attendance at school."

—Rewrites AS 14.30.191 relating to evaluation of exceptional children. Incorporates the same amendments as the original, except also requires the Dept. of Education to consult with the Dept. of Health and Social Services when adopting regulations that establish, or require school districts to establish, standards and procedures for the identification and classification of exceptional children.

—Deletes repeal of AS 14.30.191(b) and AS 14.30.347 (see p. 158).

SUBJ: CS for HB 194 "An act relating to the education of exceptional children and providing for an effective date."

DATE: May 19, 1983

The proposed draft has deleted two controversial issues from the original legislation with the intent of maintaining the bill's purpose as a technical revision in order to bring State Statutes into conformity with Public Law 94-142 and thus securing federal receipts for Alaska's Special Education Programs. The federal receipts for FY 83 were as follows:

1. PL 94-142: Provided special education to cities and boroughs in the amount of $1,431,670.

2. PL 89-313: Provided funds for the handicapped to Rural Education Attendance Areas in the amount of $1,842,910.

Total dollars received in special education categories for FY 83 = 3,274,580.

The two sections that have been deleted are:

1. Section 12 - payments of transfer costs will be paid by the school districts rather than the Department as under current law; and

2. Section 15 - a limit of 5% of the average daily membership of the district or rural education attendance area will be provided for by the public school foundation program for special education.

needs to be back in but re-written

proposed regs

current regs & proposed regs

In previous testimony it has been explained that the actual wording of this bill has been patterned very closely to Federal Law (PL 94-142) in order to insure continued federal funding. Currently, there are proposed regulations "on hold" by the revisors of the Attorney General's Office until passage of this legislation. Current law prohibits the enactment of the proposed regulations.

There appears to be public concern in regard to the definition section of the bill. Even though most of the language is taken from the Public Law, there is local concern as to its effects in services rendered to school age children. The question of whether or not "similar" language keeping with the intent of the Federal Law would be sufficient to receive the $1.4 million (FY 83) for special education.

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 194 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the education of exceptional children; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.30.020 is amended to read:

Sec. 14.30.020. VIOLATION. A person violating AS 14.30.010 or AS 14.30.337 is guilty of a misdemeanor and upon conviction is punishable by a fine of not less than $50 nor more than $200, plus the cost of prosecution, and may be imprisoned until the fine and costs are paid or until the convicted person has served one day for every $2 of the fine and costs, at which time the fine and costs are automatically discharged. Each unlawful absence is a violation and if an absence is extensive there is a new violation each time five consecutive days of the absence elapse. The court may suspend sentence, stay or postpone enforcement of execution, or release from custody a person found guilty upon the conditions which are in the best interests of the child. In any event, at the expiration of the school year, the person shall be released and discharged from all penalties provided by this section.

* Sec. 2. AS 14.30.030 is amended to read:

Sec. 14.30.030. REPORT OF VIOLATIONS AND PROCEDURES. The chief administrative officer of a district or state-operated school shall report all apparent violations of AS 14.30.010 or AS 14.30.337 to the governing body of the district. The governing body shall, on receiving the report or on the complaint of any person, provide for a full

and impartial investigation of all charges of violation. In private or federal schools, the chief administrative officer shall make a full and impartial investigation of all apparent violations. If it reasonably appears upon investigation that a person has violated AS 14.30.010 or AS 14.30.337, the governing body of a district or state-operated school, or the chief administrative officer of a private or federal school, shall make and file with the district court a complaint against the person, charging the violation. The judge or magistrate may issue a warrant for the arrest of the person and may act upon the complaint.

* Sec. 3. AS 14.30.050 is amended to read:

Sec. 14.30.050. TRUANT OFFICERS. (a) If it is not practical for an existing law enforcement agency to enforce AS 14.30.010 or AS 14.30.337, the governing body of the school district or the Bureau of Indian Affairs may appoint the necessary truant officers to enforce AS 14.30.010 or AS 14.30.337. The state shall not contribute to the expenses of an officer appointed by the Bureau of Indian Affairs.

(b) A truant officer may arrest and bring before any district court judge or magistrate, a person violating AS 14.30.010 or AS 14.30.337 upon a warrant issued by the district court judge or magistrate.

* Sec. 4. AS 14.30.180 is amended to read:

Sec. 14.30.180. PURPOSE. It is the purpose of AS 14.30.180 - 14.30.350 to provide an appropriate public [COMPETENT] education [SERVICES] for [THE] exceptional children in the state who are at least three years of age [AND FOR WHOM THE REGULAR SCHOOL FACILITIES ARE INADEQUATE OR NOT AVAILABLE].

* Sec. 5. AS 14.30.186(a) is amended to read:

(a) A borough or city school district shall provide [FOR]

special education and related services for exceptional children [REPRESENTED BY NOT LESS THAN FIVE CHILDREN] residing in the district.

* Sec. 6. AS 14.30.186(b) is amended to read:

(b) The board of a regional educational attendance area shall provide [FOR] special education and related services in a school in the area for exceptional children [REPRESENTED BY NOT LESS THAN FIVE CHILDREN] residing in the area served by the school.

* Sec. 7. AS 14.30.191(a) is amended to read:

Sec. 14.30.191. EDUCATIONAL EVALUATION [ASSESSMENT]. (a) Before placement in a [SPECIAL EDUCATION] program of special education and related services and not less than once every three years [A YEAR] for as long as the child is assigned to the [A SPECIAL EDUCATION] program, an exceptional child shall receive an educational evaluation [ASSESSMENT] for the identification and classification of exceptional children [THE LEARNING, MENTAL AND PHYSICAL STATUS OF THE CHILD].

* Sec. 8. AS 14.30.191(c) is amended to read:

(c) If a parent or guardian believes that the educational evaluation [ASSESSMENT] of the child is in error, the parent or guardian may request an independent [EXAMINATION AND] evaluation of the child. If a substantial discrepancy exists between the educational evaluation [ASSESSMENT] of the school district and the independent evaluation, and if the parent or guardian so requests, a hearing shall be held before a hearing officer in order to resolve the discrepancy between evaluations and to determine the appropriate educational program [PLACEMENT] for the exceptional child. [THE DEPARTMENT OF EDUCATION SHALL ADOPT REGULATIONS FOR THE CONDUCT OF HEARINGS AUTHORIZED BY THIS SECTION AND FOR THE APPOINTMENT AND QUALIFICATIONS OF THE HEARING OFFICER. REGULATIONS ADOPTED AND PROCEEDINGS CONDUCTED UNDER THIS SECTION ARE SUBJECT TO THE ADMINISTRATIVE PROCEDURE ACT.]

* Sec. 9. AS 14.30.191(d) is amended to read:

(d) The department [DEPARTMENT OF EDUCATION AND THE DEPARTMENT OF HEALTH AND SOCIAL SERVICES] shall [COOPERATIVELY ESTABLISH] by regulation establish, or require school districts to establish, [DIAGNOSTIC] standards and procedures for the identification and classification of [THE LEARNING, MENTAL AND PHYSICAL STATUS OF] exceptional children. [STANDARDS RELATING TO SPECIAL EDUCATION PROGRAMS, INDIVIDUAL OR GENERAL, SHALL REMAIN THE RESPONSIBILITY OF THE DEPARTMENT OF EDUCATION IN CONJUNCTION WITH THE LOCAL EDUCATION AGENCY.]

* Sec. 10. AS 14.30 is amended by adding a new section to read:

Sec. 14.30.195. HEARINGS. (a) The department shall by regulation provide for administrative hearings to be conducted under AS 14.30.180 - 14.30.350.

(b) The agency conducting a hearing under this section may issue subpoenas under AS 44.62.430 and may petition the superior court for adjudications of contempt under AS 44.62.590.

* Sec. 11. AS 14.30.231 is amended to read:

Sec. 14.30.231. ADVISORY COMMITTEE. The Governor's Council for the Handicapped and Gifted established under AS 47.80 shall serve as [THE COMMISSIONER OF EDUCATION AND THE COMMISSIONER OF HEALTH AND SOCIAL SERVICES SHALL ESTABLISH] an advisory committee, the function of which is to provide information and guidance for the development of appropriate [SPECIAL EDUCATION] programs of special education and related services for exceptional children. [MEMBERSHIP OF THE ADVISORY COMMITTEE SHALL INCLUDE, BUT IS NOT LIMITED TO, PERSONS REPRESENTING LOCAL EDUCATION AGENCIES, STATE AGENCIES, PARENT GROUPS AND ORGANIZATIONS CONCERNED WITH PROGRAMS AND SERVICES FOR EXCEPTIONAL CHILDREN.]

* Sec. 12. AS 14.30.250 is amended to read:

Sec. 14.30.250. TEACHER QUALIFICATIONS. A [NO] person may not

[SHALL] be employed as a teacher of [TO TEACH A CLASS FOR] exceptional children unless that person possesses a valid teacher certificate [,] and, in addition, such training as the department may require by regulation.

* Sec. 13. AS 14.30 is amended by adding a new section to read:

Sec. 14.30.255. ADMINISTRATOR QUALIFICATIONS. A person may not be employed as an administrator of a program of special education and related services unless that person possesses a valid administrative certificate and, in addition, such training as the department may require by regulation.

* Sec. 14. AS 14.30.270 is amended to read:

Sec. 14.30.270. SUBSTITUTES. AS 14.30.250 does not prohibit the employment of a person, otherwise qualified to serve as a substitute teacher, to serve as a substitute teacher of [A CLASS FOR] exceptional children.

* Sec. 15. AS 14.30.285(d) is amended to read:

(d) For the purposes of this section a child's education expenses are limited to the actual cost of necessary care, transportation, and special education and related services [INSTRUCTION], including room and board [, WHILE ATTENDING THE DESIGNATED INSTITUTION].

* Sec. 16. AS 14.30.305 is amended to read:

Sec. 14.30.305. STATE SUPPORT OF PROGRAMS FOR CHILDREN HOSPITALIZED OR CONFINED TO THEIR HOMES. [SPECIAL INSTRUCTIONAL SERVICES FOR EXCEPTIONAL CHILDREN WHO ARE HOSPITALIZED OR CONFINED TO THEIR HOMES MAY BE PROVIDED BY A SCHOOL DISTRICT.] A child who is hospitalized or confined to home and who receives at least 10 hours of special education and related services [INSTRUCTION] per week may be counted as a pupil in average daily membership when computing state support under the public school foundation program.

* Sec. 17. AS 14.30 is amended by adding a new section to read:

Sec. 14.30.325. SURROGATE PARENTS. (a) The department may by regulation provide for the appointment of surrogate parents to represent exceptional children in matters relating to the provision of an appropriate public education.

(b) A surrogate parent is not liable for civil damages as a result of an act or omission committed in the surrogate parent's official capacity, except that a surrogate parent may be liable for civil damages as a result of gross negligence or intentional misconduct.

* Sec. 18. AS 14.30 is amended by adding new sections to read:

Sec. 14.30.335. ELIGIBILITY FOR FEDERAL FUNDS. Notwithstanding any other provision of AS 14.30.180 - 14.30.350, the department may do all things necessary to qualify for federal funds that are available to the state for the education of exceptional children.

Sec. 14.30.337. ATTENDANCE REQUIRED. The parent or guardian of an exceptional child shall ensure that the child attends a program of special education and related services provided under AS 14.30.180 - 14.30.350 unless the parent or guardian demonstrates to the satisfaction of the school district that the child is receiving an appropriate education.

* Sec. 19. AS 14.30.350 is repealed and reenacted to read:

Sec. 14.30.350. DEFINITIONS. In AS 14.30.180 - 14.30.350,

(1) "department" means the Department of Education;

(2) "exceptional children" means children who differ markedly from their peers to the degree that special facilities, equipment, or methods are required to make their educational program effective; these children may be identified in the following categories:

(A) "deaf" children exhibit a hearing impairment that hinders the child's ability to process linguistic

information through hearing, with or without amplification, and that adversely affects educational performance;

(B) "deaf-blind" children exhibit concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational problems that they cannot be accommodated in a special education program solely for deaf or blind children;

(C) "gifted" children exhibit outstanding intellect, ability, or creative talent as determined in accordance with regulations of the department;

(D) "hard of hearing" children exhibit a hearing impairment, whether permanent or fluctuating, that adversely affects educational performance but that is not within the meaning of (A) of this paragraph;

(E) "learning disabled" children exhibit a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations; the term includes such conditions as perceptual handicaps, brain injury, minimal brain disfunction, dyslexia, and developmental aphasia; this category does not include children who have learning problems that are primarily the result of visual, hearing, or motor handicaps, of mental retardation, of emotional disturbance, or of environmental, cultural, or economic disadvantage;

(F) "mentally retarded" children score two or more standard deviations below the national norm on an individual standarized test of intelligence and exhibit deficits in adaptive behavior manifested during the developmental period, that

adversely affect the child's educational performance;

(G) "multihandicapped" children exhibit two or more of the conditions described in (A), (B), (D) - (F) and (H) - (L) of this paragraph, the combination of which causes such severe educational problems that they cannot be accommodated in a special education program for any one of the conditions;

(H) "orthopedically impaired" children exhibit a severe orthopedic impairment, including impairments caused by congenital anomaly, disease, or other causes, that adversely affects educational performance;

(I) "other health impaired" children exhibit an autistic condition that is manifested by severe communication and other developmental and educational problems or exhibit limited strength, vitality, or alertness due to chronic or acute health problems such as heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophelia, epilepsy, lead poisoning, leukemia, or diabetes, that adversely affects educational performance;

(J) "seriously emotionally disturbed" children exhibit one or more of the following characteristics over a long period of time and to a marked degree, that adversely affects educational performance: (i) an inability to learn that cannot be explained by intellectual, sensory, or health factors; (ii) an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; (iii) inappropriate types of behavior or feelings under normal circumstances; (iv) a general pervasive mood of unhappiness or depression; or (v) a tendency to develop physical symptoms or fears associated with personal or school problems; the term includes children who are schizophrenic

but does not include children who are only socially maladjusted;

(K) "speech impaired" children exhibit a communication disorder, such as stuttering, impaired articulation, a language impairment, or a voice impairment, that adversely affects educational performance;

(L) "visually handicapped" children exhibit a visual impairment that, even with correction, adversely affects educational performance;

(3) "related services" means transportation and developmental, corrective, and other supportive services required to assist a handicapped or gifted child to benefit from special education, and includes but is not limited to speech pathology and audiology, psychological services, physical and occupational therapy, counseling services, and medical services for diagnostic or evaluation purposes;

(4) "special education" means specially designed instruction to meet the unique needs of a handicapped or gifted child, and includes but is not limited to classroom instruction, instruction in physical education, instruction in vocational education, home instruction, instruction in a hospital or institution, and summer school;

(5) "school district" means a borough school district, a city school district, or a regional educational attendance area.

* Sec. 20. AS 14.30.186(c) and (d), 14.30.191(b), 14.30.260, 14.30.280, 14.30.330, 14.30.340, and 14.30.347 are repealed.

* Sec. 21. This Act takes effect July 1, 1983.

Dear Rep. Tischer,

Regarding House Bill No. 194, Sec. 14.30.350, page 9, line 3, I strongly urge deletion of the phrase "which adversely affects educational performance."

This might deny treatment to children who stutter, have voice disorders, those under age six and many mild or moderate speech and language impaired children. The development and well-being of these individuals would be adversely affected.

Thank you for your consideration.

Sincerely Yours,

Mary Jonkovich, M.A., C.C.C.

Juneau, Alaska

Dear Ms Tasker:

I would like to voice concern over a section of House Bill 194, specifically Page 4, line 4 of section 14.30.350 Definitions. The phrase "which adversely affects educational performance" should be deleted or at least changed to read "not necessarily affects educational performance. By professional definition, school performance is not even an indicator of specific speech impairments. A child's educational performance may reflect a problem in area of communication, but not necessarily. If this phrase is left in, I fear that many children will be excluded from speech services they need, just because their educational performance does not show

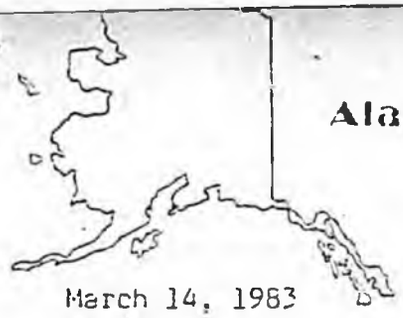
Juneau, AK 99811

Dear Chairperson:

It has come to my attention that regulations pertaining to the eligibility of speech impaired children in the public schools are in the process of being adopted by the Department of Education. These regulations evidently were adopted by the State Board in Fall, '82. I am concerned about the implications of these regulations with respect to service to the communicatively handicapped children. Under the pending regulations, only children whose communication disorder adversely affects their educational performance will be allowed service. This may deny treatment to children who stutter, those under six years of age, those with voice disorders, and many mild to moderate speech and language impaired children. The total development and well-being of these individuals will be adversely affected.

Another area of concern is the designation of responsibility for diagnosing these children. We believe that speech/language pathologists are the only qualified professionals to do this.



I urge you to consider changes in these items of the regulations.

Sincerely,

Duane R. Gray
Speech Therapist

Harold J. Raynolds, Commissioner
Alaska Department of Education
Pouch F
Juneau, AK 99811

Dear Commissioner Raynolds:

It has come to the attention of the Alaska Speech-Language-Hearing Association that regulations pertaining to the eligibility of speech impaired children in the public schools are in the process of being adopted by the Department of Education. These regulations evidently were adopted by the State Board in the Fall of 1982. We are deeply concerned about the implications of these regulations with respect to service to communicatively handicapped children. Under the pending regulations, only children whose communication disorder adversely affects their educational performance will be allowed service. This may deny treatment to children who stutter, those under six years of age, those with voice disorders, and many mild to moderate speech and language impaired children. The total development and well-being of these individuals will be adversely affected.

Another area of concern is the designation of responsibility for diagnosing these children. We believe that speech/language pathologists are the only qualified professionals to do this.

A third area of concern is lack of information we received regarding the development and promulgation of these regulations. In this case, it was crucial that we be made aware of developments regarding the regulations. The Office of Exceptional Children did not provide such information. We would like redress for this error by having the above concerns addressed at this time with additional public hearings preceeded by proper notification of impacted parties, including parents and speech/language pathologists.

Please reply as soon as possible regarding pending changes in state regulations pertaining to the eligibility of speech impaired children in the public schools and the above areas of concern.

Sincerely,

Monica Ferguson Shirley

Juneau, AK 99811

Dear Chairperson:

It has come to the attention of the Alaska Speech-Language-Hearing Association that legislation has been submitted to modify statutes regarding special education in the form of House Bill 194. We are deeply concerned about the implications of these proposed changes in statutes with respect to service to communicatively handicapped children. Under these proposed changes, only children whose communication disorder adversely affects their educational performance will be allowed service. This may deny treatment to children who stutter, those under six years of age, those with voice disorders, and many mild to moderate speech and language impaired children. The total development and well-being of these individuals will be adversely affected.

Another area of concern is the designation of responsibility for diagnosing these children. We believe that speech/language pathologists are the only qualified professionals to do this.

We do not support House Bill 194 and urge you to reconsider this bill. We request a letter be forwarded at your earliest convenience indicating the status of House Bill 194 and further measures that we may take as an association to stop this legislation.

Sincerely,

Monica Ferguson Shirley

RE: 4AAC 52, Education for Exceptional Children

At the October 7, 1982 meeting in Haines, the State Board of Education adopted regulations 4AAC 52.010-4AAC 52.920. Attached is a copy of the regulations for your information. An effective date has not yet been determined by the Office of the Attorney General and the Office of the Lieutenant Governor.

X (j) To be eligible for special education and related services as a speech impaired child, a child must

(1) exhibit a communication disorder, such as stuttering, impaired articulation, a language impairment, or a voice impairment, which adversely affects educational performance;

---

(2) require special facilities, equipment, or methods to make his educational program effective;

(3) be diagnosed by a physician, speech pathologist, or speech therapist as speech impaired; and

(4) be certified by a multidisciplinary team as qualifying for and needing special education services for the speech impaired.

(k) To be eligible for special education and related services as an other health impaired child, a child must

(1) exhibit an autistic condition which is manifested by severe communication and other developmental and educational problems, or exhibit limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condi-

PUBLIC INPUT RE: HB 194

From: George Toriano - Speech and Hearing Therapist

1.) I favor fully funding HB 194

2.) I favor the following word changes in HB 194:

a. in the section regarding those people able to diagnose children as speech impaired, please eliminate 'physicians' as they are not qualified to diagnose such impairments. The others in that section are okay.

b. in Section 1 (j) the child's impairment must adversely affect educational performance in order to be eligible for services. Please add 'and/or social or emotional performance' to the section.

Testimony taken over the phone on 5/17/83.

RE: Staff Summary HB 194 "An act relating to the education of exceptional children; and providing for an effective date."

A sectional analysis was provided by the Department of Education.

Mr. Rick Roberton, Assistant Attorney General, drafted the bill and is unable to attend today's meeting due to a prior engagement.

The purpose of HB 194 is to bring state statutes into conformity with Public Law 94-142. The revision was written using the Federal Special Education Handbood as a guide. Currently, the Attorney General's Office is revamping the regulatory provisions regarding special education. Consequently, several special education regulations are under review.

Most of HB 194 involves technical changes. The substantive changes are as follows:

1) Section 12 - payments of transfer costs will be provided for by the district rather than the Department as under current law.

2) Section 15 - a limit of 5% of the average daily membership of the district or rural education attendance area will be provided for by the public school foundation program for special education.

POSITION PAPER/Departme

Secondly, establishment of standards and procedures for the identification and classification of exceptional children is a difficult task which would be beyond the capabilities of school districts. Furthermore, if school districts were required to set such standards and develop such procedures, there would be no statewide uniformity. This would result in widely varying programs, would make technical assistance and quality assurance more difficult, and would splinter the activities and effectiveness of statewide protection and advocacy efforts. Unless there is a compelling reason to change, it is recommended that line 20 of page 2 omit "or require school districts to establish."

Dr. Shapiro

Third, on page 8, lines 16 through 26, the following wording would be preferable since it better reflects the recent deliberations of experts in the field of childhood emotional disturbance: "Severe mental disorder" means an illness, disease, organic brain syndrome or other condition which substantially impairs thought, perception of reality, emotional process, judgement, or behavior such that (1) educational performance is adversely effected or (2) there is an inability to build or maintain satisfactory interpersonal relations with peers or teachers."

Finally, on page 9 the definition (K) would be better stated "communicatively disordered" children exhibit a disorder such as ....." This definition would be more in line with the current nomenclature in this field of special services.

Location	Change
Section 1-5	Amendments bring statutory language into conformity with federal requirements. Deletion of last sentence in section 5 is picked up in section 6 and 7.
Section 6	This change makes it clear that where appropriate, the Department will require school districts to establish local standards for program eligibility, and procedures for testing or other forms of eligibility determination, and classification of exceptionality.
Section 7	Makes more clear the burden and process for administrative resolution of disputes arising from this chapter.
Section 8	Clarifies the advisory role of the Governor's Council for the Handicapped and Gifted.
Section 9	Clean up.
Section 10	Requires directors of special education programs to be administratively certificated..
Section 11	Clean up.
Out — Section 12	In addition to general language clean up, this section would require school districts which do not provide appropriate special education services to pay the costs associated with transferring students to wherever the services are available.
Section 13	Clean up.
Section 14	Clean up.
Out — Section 15	Places in statute a previously regulatory restriction on the number of pupils who may be claimed for state aid purposes in the classification of gifted/talented. The purpose of this restriction is to enable districts to use their own criteria for defining gifted/talented students and designing appropriate programs and services for those students, while at the same time applying a uniform limit on what the state will pay for those programs. This does not limit the number of students who may be served in gifted/talented programs, it only limits what the state will pay for them.
Section 16	Enacts a state statute in conformity with federal requirements.

Location	Change
Section 17	Standard language for programs with dual federal - state responsibilities and financial support.
Section 18	Clean up.
Section 19	Brings definitions into conformity with federal provisions.
Section 20	Repeals citations no longer applicable, or obviated by this bill.
Section 21	Effective date section.

COMMENTS ON HB 194

"An Act relating to the education of exceptional children; and providing for an effective date."

BACKGROUND:

The purpose of this bill appears to be a revision or "clean up" of existing state special education laws to make them consistent with current practices in special education, compatible with the federal law P.L. 94-142, and to provide a sufficient statutory basis for comprehensive special education programs and regulations in Alaska.

While the bill generally meets this purpose, several sections need revision and additional items need to be included.

SUGGESTIONS FOR IMPROVEMENTS:

1. Sec. 5. A.S.14.30.191c (page 2)

   An independent evaluation must be provided at school district expense unless the district goes to hearing and shows why an independent evaluation is not warranted. This is the federal rule, included in our state regulations, and should be included in law.

2. Sec. 12 A.S. 14.30.285(b) (page 4)

* We suggest deletion of the word "institution" on line 6, line 12, and line 15, and addition of the words educational program or residential school as the Council does not support institutionalization of children for educational purposes.

* Out-of-district placement should only occur if an appropriate educational program cannot reasonably be made available locally. Please delete "is not" on lines 9-10 and add this phrase. It is not reasonable to allow local educational agencies to send children away without a requirement and Departmental monitoring to make sure that the local district makes every effort to establish a program.

* The Department should approve the placement and pay the local district for the cost of the educational expenses which are above the local cost-per-pupil rate for special education. This would keep the focus on local district responsibility to make the payment, monitor the placement, make sure the IEP is developed and implemented, arrange for visits home, and communicate with parents. It would also provide an incentive to the local district to develop and provide the program locally if it could obtain state funding to do so. Why are we willing for the state to pay $50,000 to send a child out of state and to pay nothing to keep the child at home? Under the present arrangement

Summary

As the state's special education advisory board comprised of parents, teachers, and administrators of education and social service programs across the state, the Council is required to take a close look at and comment on laws and regulations for special education. We support enactment of a strong state law for special education which has all the strengths and protections of P.L. 94-142 which has now been in effect nationwide since 1975 and has withstood the tests of implementation and political changes. Revisions and additions as suggested above would go far toward insuring a strong and reasonable state statutory framework.

We also support continuation of categorical funding and improvements in fiscal accountability for special education.

Thank you for this opportunity to comment.

March 23, 1983

MAR 24 1983

The Honorable Mae Tischer
The Honorable Milo Fritz
State Capitol Building
Pouch V
Juneau, AK 99811

Dear Representatives Tischer & Fritz:

Please accept this letter as written testimony relative to H.B. 194.

The Alaska Council of School Administrators wishes to express concern about the provisions of section twelve of the bill that would transfer the fiscal responsibility for placing low incidence handicapped students in an educational program outside the school district from the Alaska Department of Education to the placing district.

At the present time, these costs are borne by the Department of Education through grants to the larger districts, namely Anchorage.

To change this method of operation at this time would place a rather heavy burden on small districts of the state. Individual costs could exceed $35 to $40 thousand dollars and the state-wide cost could near or exceed one million dollars.

Alaska's Department of Education has indicated that this bill is necessary in order for D.O.E. to curb the outside placing of students unnecessarily. I submit that there are other, less drastic, means of obtaining the same objective.

Please investigate this provision with great care before giving it consideration.

Respectfully,

Don MacKinnon

MEMORANDUM State of Alaska

TO: Bruce Botelho
Assistant Attorney General
Human Services-Juneau

DATE: March 11, 1983

FILE NO: 377-015-83

TELEPHONE NO: 465-3603

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: HB 194

By: Thomas H. Robertson
Assistant Attorney General
Human Services-Juneau

This memorandum is written in response to your recent request on the above subject. My reaction to Larry Feeney's comments is set out below.

1. The reference to "handicapped child" seems to be an oversight. I checked with Steve Hole who agrees that this section should address enrollment of an "exceptional child".

2. The language of AS 14.30.330 seems to focus on the process of enrollment. However, in order to eliminate any lack of clarity concerning the requirement of enrollment, I suggest that this section be amended as set out in the appendix.

3. This section does not specify the entity to whom one must "demonstrate" that a child is receiving an appropriate education because at the time it was drafted the Department of Education did not have a clear preference. This lack of specificity could be eliminated by regulation. However, Steve Hole indicated that the determination should be made by the district. This is accomplished in the appendix.

I understand that the Department of Education is considering at least one other amendment. If you have additional questions, please let me know.

* Sec. ___. AS 14.30.020 is amended to read:

Sec. 14.30.020. VIOLATION. A person violating AS 14.30.010 or AS 14.30.340 is guilty of a misdemeanor and upon conviction is punishable by a fine of not less than $50 nor more than $200, plus the cost of prosecution, and may be imprisoned until the fine and costs are paid or until the convicted person has served one day for every $2 of the fine and costs, at which time the fine and costs are automatically discharged. Each unlawful absence is a violation and if an absence is extensive there is a new violation each time five consecutive days of the absence elapse. The court may suspend sentence, stay or postpone enforcement of execution, or release from custody a person found guilty upon the conditions which are in the best interests of the child. In any event, at the expiration of the school year, the person shall be released and discharged from all penalties provided by this section.

* Sec. 18. AS 14.30.340 is amended to read:

Sec. 14.30.340. WHEN [NOT] REQUIRED TO ATTEND [ENROLL]. (a) The parent, guardian, or other person having responsibility for or control of an exceptional child shall insure that the child attends a [NO HANDICAPPED CHILD MAY BE REQUIRED TO ENROLL IN A SPECIAL EDUCATION] program of special education and related services provided under AS 14.30.180 -- 14.30.330 unless [IF] the parent, [OR] guardian, or other person [OF THE CHILD] demonstrates [CERTIFIES] to the satisfaction of the school district [BOARD OF THE PUBLIC SCHOOL SYSTEM WHERE THE CHILD RESIDES] that the child is receiving an appropriate education [ADEQUATE EDUCATIONAL ADVANTAGES. A CHILD SHALL BE EXCUSED FROM THE COMPULSORY EDUCATION REQUIREMENTS IF A PHYSICIAN CERTIFIES IN WRITING THAT THE CHILD'S BODILY, MENTAL OR EMOTIONAL CONDITION DOES NOT PERMIT ATTENDANCE AT SCHOOL].

(b) Violation of this section is punishable under AS 14.30.020.

Sec 12. Add: However, A DISTRICT MAY SEEK A WAIVER FROM THE REQUIREMENTS THAT A DISTRICT IN THE [illegible]

Dear Ms. Tonkovich,

Thank you for your recent letter concerning HB 194.

This bill is currently in the House HESS Committee. We have already heard some testimony on this bill. We are now looking at ways of improving this legislation. In this regard, your suggestions are quite helpful. I will see that they are taken into consideration before the bill passes from the committee.

I am taking the liberty of forwarding your comments to Rep. Tischer, who is co-chair of the House HESS committee.

Thank you again for writing.

Sincerely,

Mike

Rep. Mike Davis

March 24, 1983

Dear Rep. Davis,

Regarding House Bill No. 94, Sec. 14.30.350, Page 9, line 3, I strongly urge deletion of the phrase "which adversely affects educational performance."

This might deny treatment to children who stutter, have voice disorders, are under six years of age, and many mild and moderate speech and language impaired children. The development and well-being of these individuals would be adversely affected.

Thank you for your consideration.

Sincerely yours,
Mary Bonkovich, M.A., C.C.C.

Ms. Susan M. Baldwin
P.O. Box 3584
Homer, Alaska 99603

Dear Ms. Baldwin:

Thank you for your letter in regard to HB 194, "An Act relating to the education of exceptional children." To date, the HESS Committee has had one hearing on the legislation. It is not my intention to reschedule the bill at this time. In the event that the Governor insists on moving this legislation (he is the sponsor of the bill) I would have to insist on further public testimony and input, perhaps through the teleconferencing network. Your letter will be copied to all the members of the Committee and my staff will notify you if and when this bill is rescheduled.

As I understand it, the legislation basicly 'cleans - up' Alaska's special education statuates in bringing them into conformity with Federal law. However, I am aware of the suggested substantive changes that you and others have mentioned that raise important questions in regard to the true intent of the legislation.

Sincerely,

milo

pls respond

Dear Chairperson:

Please let me express my concerns to this committee, as I understand you are hearing HB 194 dealing with regulations governing the eligibility of communicatively handicapped children in the public schools. As a speech therapist employed in the Alaska public school system and author of a book entitled, A Child Learns to Speak, ~~and~~ I feel qualified to comment on two serious errors in these regulations. First, the regulation reads that only children whose communication problems adversely affect their "educational" performance will be allowed service in the public schools. This would deny services to preschool speech handicapped children right at a time when correction is most critical and beneficial. It would deny services to children whose social and emotional skills are affected by a communication handicap. Good oral communication skills are a prerequisite to successful teaching of reading, writing, and social skills to children.

Second, the regulations read that a child which is communicatively impaired "...be diagnosed by a

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

This Act will not have a fiscal impact on the Department of Law, except that the potential for future litigation will be reduced by its enactment. The proposed legislation brings state law into conformance with U.S. Department of Education regulations dealing with the availability of education services for exceptional children. Although Alaska has never experienced difficulties in this government program area, some other states' provisions for the education of exceptional children has caused considerable litigation in these jurisdictions. This bill is intended to lessen the potential for such litigation.

APPENDIX C

REAA OVERSIGHT COMMITTEE SURVEY
OF REAA CONCERNS REGARDING TEACHER HOUSING
(COMPLETED IN 1980)

CONCERN #2 - SCHOOL DISTRICT INVOLVEMENT IN TEACHER HOUSING

CHUGACH REAA	---	A teacher apartment is included in the school at Tatitlek. As the new school is completed and the anticipated students arrive, additional housing must be secured. There is not now any additional housing available in Tatitlek. Whittier has sufficient rental units available.
DELTA GREELY REAA	---	the District does not provide or subsidize teacher housing.
LOWER KUSKOKWIM REAA	---	there is some District-owned housing in Bethel, Atmautluak, Kongiganak, Eek, Platinum. In Kwethluk, Napaskiak, Akiachak, the District is negotiating with local village councils for the construction of units to be leased to the District and subleased to teachers. In the remaining villages, teachers are required to live in whatever is available. The District is intending to create an enterprise fund this year.
LAKE & PENINSULA REAA	---	Housing is provided for the principal teacher in 13 villages, with three extra units in Nondalton and 1 being completed in Kokhanok. Village residents have been encouraged to come up with housing, but the expense is considerable.
NORTHWEST ARCTIC REAA	---	The District maintains a total of 40 units for teacher housing. These units were turned over to the District in 1976 and have been used for teacher housing ever since. The estimated revenue generated by the rents from these units is $200,000. The estimated M & O expense is in excess of $500,000. Some of the alternatives the District is doing to get out of teacher housing is leasing the management of existing units to a third party who is presently planning on building additional housing units in some of the villages, closing down the housing units and using them for various educational purposes, and encouraging village residents to build housing for teachers. It is the intent of the District to close down and be out of teacher housing within four (4) years.
RAILBELT REAA	---	the District presently owns 5 trailers and 3 teacherages. The District is slowly phasing out of teacher housing at the rate of 2 or 3 places a year to make sure that the communities local housing market can pick up the slack.

#2 - TEACHER HOUSING (cont.)

SOUTHEAST ISLAND REAA --- Due to the unique nature and economic base of logging camps and small fishing villages, it is generally necessary for the school district to furnishing housing trailers to its teachers. It is doubtful that housing will ever be available through private sources in most of these communities. Per the master contract with the teachers, teachers are not charged for living in district-owned trailers, but are responsible for utility and heating costs. In addition, teachers who rent private housing are reimbursed up to $200 for rental costs. Teacher housing for trailer purchase alone cost $82,000 in FY 80 and $54,000 in FY 79.

SOUTHWEST REAA --- The District policy requires that the professional staff to live in district-owned or leased housing units unless provided a waiver by the Superintendent. In 7 of th 11 villages, all of the certificated staff live in district-owned housing. In the remaining villages, there is a combination of district-owned housing units (15), district leased housing units (8) and a few homes owned by teachers (3). In Dillingham, there are 2 district-owned housing units, 6 district-leased housing units, and 3 owned by certificated staff.

YUKON FLATS REAA --- $20,000 has been budgeted for maintenance and operation of teacher housing for 1980-81. This is a 66% reduction from FY 1979-80 when the furniture in District wide housing was brought up to standard. Rentals average $250 - $300 per month, which is consistent with rentals in the region. Although the District intends to get out of teacher housing, there is no clear-cut plan on how to do this.

YUKON/KOYUKUK REAA --- In most situations in the District there is a combination of district-operated rental units and privately owned houses and rental units. Where the district rents units, the occupant pays a rental fee plus all utility costs. The District Board within its' policies has expressed a desire not to be in the housing business. At the present time, however there does not seem to be any alternative to providing rental units in some locations.

CONCERN #2 - SCHOOL DISTRICT INVOLVEMENT IN TEACHER HOUSING

KUSPUK REAA	---	Lack of teacher housing which contributes to turnover in staff. The apartment in Aniak rents for approximately $750 per month and electricity is extra. The School Board has approached the village corporation and asked for help regarding construction of housing. Housing allowance for teachers is $200 per month.
ADAK REAA	---	Some of the teachers use the BOQ housing. Seven teachers are wives of military personnel. BOQ housing is used for workers in the summer, after the second week of August teachers have the use of the BOQ.
CHATHAM REAA	---	Not able to house all of employees and there's a great need for more teacher housing as no other local housing is available. We've been able to get some housing at our local motels and we are forced to subsidize the rent when the rate exceeds the district rental rates.
ALASKA GATEWAY REAA	---	Not involved in teacher housing at the present time, with the exception of some potential contract provisions which should have little or no expense to the district.
COPPER RIVER REAA	---	Have at all the sights except Glenallen. At Kinney Lake two trailers were brought in when housing was critical occupants have until the end of the school year housing in the area. Maintain list of rental units.
BERING STRAITS REAA	---	Do not furnish teacher housing. Not part of the negotiated agreement. Staff housing is a major problem, other employers in the area furnish housing for their employees. Banks are reluctant to make home loans because surveying is not complete. Housing in the area are not adequate (poor insulation, no running water). Five of the schools have apartments.
RIBILOF REAA	---	The school district wants to stay out of the housing business. We currently rent from the National Marine Fisheries. This provides good housing with inconvenience. Specifically, within two days after school lets out, teachers must vacate their home and make them available to federal employees. The district has built a house for the superintendent.

CONCERN #2 - SCHOOL DISTRICT INVOLVEMENT IN TEACHER HOUSING

IDITAROD REAA --- The district has been gradually getting out of owning and providing employee housing since 1976, this has been difficult since there is a shortage of adequate rental units. A rent and utility subsidy was initiated in fairness to teachers who had high rent but this is the last year of this program. Housing is also needed for classified and administrative personnel. 39 units are needed to house personnel.

ANNETTE ISLAND SCHOOLS --- Teacher housing is a real problem, local tribal laws have stopped most commercial housing plans of local people. Ten teachers live at base housing located 7 miles from the school. The district would prefer to have private or town provided teacher housing. Teacher recruitment is difficult when housing is not guaranteed.

LOWER YUKON --- The Lower Yukon School District is one of the few districts in the state where the regional School Board has made a committment to district personnel in this regard. Each certified teacher is subsidized approximately $200 per month, this costs the district approximately $250,000 per year. The only viable alternative the Board has is to adjust rents on the housing units so that the housing units are self supporting. And the Board is doing this.

RESULTS OF ALASKA ANALYSTS/DITTMAN RESEARCH SURVEY WHICH PERTAIN TO TEACHER HOUSING

SURVEY OF TEACHERS
WITHIN THE
REGIONAL EDUCATION ATTENDANCE AREA
PROGRAM

COMPLETED

FOR

THE ALASKA STATE HOUSE OF REPRESENTATIVES

HEALTH, EDUCATION AND SOCIAL SERVICES
INTERIM COMMITTEE

NOVEMBER, 1979

BY

ALASKA ANALYSTS/DITTMAN RESEARCH
ALASKA BANK OF COMMERCE BUILDING
3230 C STREET
ANCHORAGE, ALASKA

INTRODUCTION AND BACKGROUND

The purpose of the survey was to provide an effective means of evaluating the Regional Education Attendance Area's teacher placement program in terms of bringing quality education and educators to the Bush.

The study was undertaken for the Alaska State House of Representatives by the Health, Education and Social Services interim committee under the leadership of Representative Thelma Buchholdt.

FOCUS

The focus was on the teachers themselves; how and where they were recruited, the type of orientation for teaching in the bush they received, what kind of teaching and living conditions they encounter, why they are teaching in the bush, and how long they plan to remain teaching in the bush. Additionally, it was important to learn whether the teachers felt there was a certain "productive" period of time for teaching in the bush after which teacher effectiveness is lowered, what makes teachers stay in the bush, and what makes them decide to leave. Also, a general forum was provided for teachers to confidentially and candidly describe their thoughts concerning the questionnaire, teaching in the bush, or anything else they felt should be examined.

METHODOLOGY

It was determined that a questionnaire could be mailed to each of the approximately 900 teachers in the REAA, and that total confidentiality could be assured the respondents. The questionnaire instrument was developed by the staff of Alaska Analysts/Dittman Research to include questions requested by the House HESS interim committee and others as considered necessary for an effective questionnaire design.

Prior to the mailing of the questionnaire, each superintendent received an "alert letter" notifying him of the survey and requesting his assistance in encouraging the teachers to respond. In addition, each questionnaire included a cover letter describing the purpose of the survey, and a self-addressed, stamped envelope was provided.

The returned questionnaires were reviewed for completeness, edited and coded for transfer to IBM cards, keypunched and verified, and data-processed featuring the Statistical Package for the Social Sciences (SPSS). The SPSS package is one of the most advanced data-processing systems available and was designed specifically for use in processing survey research findings.

In total, nearly half of the REAA teachers responded to the questionnaire -- 392 questionnaires were returned before the cut-off date for processing, and an additional 39 were received following the cut-off date.

FOREWORD

In order to provide for the most valuable and candid replies, total confidentiality was assured each respondent. Teacher names and teaching locations were not requested.

The results described in this report are presented as totals from teachers throughout all REAA districts, and unless volunteered by the respondent, no effort was made to list or identify specific districts or schools. In evaluating the results, it should be noted that although all respondents were REAA teachers, not all teachers taught in a remote village. The totals include teachers from Adak (U.S. Naval Station), Delta Junction, Glennallen and Whittier as well a bush districts and regions.

For the most full and complete understanding of the REAA teacher program (from the teacher's point of view), it is recommended the reader thoroughly review the GENERAL COMMENTS section included in this report (Volume I), and VERBATIM COMMENTS included in Volume II. The statements included in Volume II include responses to the following questions:

"Why did you choose to teach in the bush?"

"How do you feel the orientation might be improved -- what do you wish had been covered?"

"Do you feel the teachers in your village generally stay too long or not long enough?"

"Are you welcome in the homes of the villagers-- why is that?"

"What type of expenses are a burden on your budget?" and "Essentials that are not available".

MEMORANDUM

TO: Mae Tischer, Co-Chairman
Milo Fritz, Co-Chairman
House Health, Education and Social Services Committee

FROM: Representative Al Adams AAA

SUBJECT: HB 196 - Teacher Housing in Rural Areas

I appreciate the committee's deliberations over House Bill 196 and its interest in teacher housing in the rural areas of our state. I want to take this opportunity to share with you a study House Research completed in 1981 on the subject, as well as address some of the questions raised during the committee hearing.

First, I want to make it very clear that it is not my intent to obligate school districts, in any way, to provide teacher housing. I believe sections 2 and 3 of the legislation are very clear in stressing this point and am comfortable that they can not be construed, over the years, to mean otherwise. Section 1 adds to the powers of regional school boards that they may, not shall, provide housing through various arrangments. It is very clear that this is an option, not a requirement.

I also understand the committee expressed concern that a district may encounter financial liabilities as a result of the bill's provisions. By way of some background, in testimony before the REAA Budget Oversight Committee, REAA's from around the state indicated that they were attempting to get of the teacher housing business. Instead, their preference was that individuals or village corporations build housing, and some suggested a preference for lease

agreements. Unfortunately some banks are reluctant to make loans in rural Alaska to build multi-family housing without some guarantees. If, however, the individual seeking the loan has assurances, such as a lease agreement with a school district, I understand a bank is more inclined to favorably consider the loan application. As a result, if a district can offer such a commitment, a district can get out of the housing business, teachers can have improved housing, the private sector can create jobs and possibly make some money. Without this bill, a regional school board can not make that necessary commitment.

Currently school districts handle annual budgets totaling millions of dollars. If a district should chose to enter into a housing lease arrangement, I believe each district can locally determine the fiscal implications of that contract and evaluate the district's ability, or inability, in meeting such an obligation. I hope this explains my approach to allowing a school district to decide locally if and how it wants to approach teacher housing. I trust they have the judgement to enter into such agreements. If they don't, there are certainly other areas which we had better also examine.

As to the status of land and the amount available in rural Alaska, I have requested the Department of Community and Regional Affairs to put together available information. I will forward it to committee members as soon as it is received.

Again, thank you for the committee's attention to the bill.

December 14, 1981

MEMORANDUM

TO: Representative Al Adams

FROM: Christine Johnson, Research Staff

SUBJECT: Rural Teacher Housing
Research Request No. 81-162

This memorandum is in response to your request for alternative solutions to the problem of housing for teachers in rural parts of the state. Our findings are presented in this memorandum under the following three headings:

I. Background
II. Present Housing Problems
III. Options for Legislative Consideration

Summary

- Problems with teacher housing are not the same in each rural community. In some communities, the problem is a shortage of housing, with neither school district housing nor privately owned rental housing available. In other communities there is rental housing available, but it is very poor quality, sometimes below the standards of other homes in the community. The high cost of housing and utilities in some rural communities may also present a problem. These costs may impose a financial burden on teachers living in this housing or on local school districts which try to absorb some portion of the costs.

- It is difficult to document the extent to which teacher housing is a problem based on the information which is readily available at this time. Although there have been four surveys pertaining to teacher housing in the last two years, one of them is incomplete and the other three are not sufficiently detailed.

- It is particularly difficult to determine where there is a shortage of housing. In a 1980 survey, 10 of the 21 Regional Educational Attendence Areas (REAA's) in the state reported that more housing for teachers was needed in their area. Three other REAA's were already arranging for construction or lease of additional units. Additional housing may have been needed in the other REAA's as well, but they did not specifically report it in their reponses.

- Roughly one-fifth of rural teachers responding to two statewide surveys said they lived in housing that was "less than adequate" or "tent-like." (For the purposes of the survey, "tent-like" housing was defined as

housing which has wood heat, a honeybucket, and no running water.) There is no indication from the results of the surveys how the teachers' housing compared to other homes in the community.

- Both teachers and school district officials who responded to the surveys noted the high cost of teacher housing in some communities. One set of survey results shows roughly one-quarter of the respondents paying housing costs of at least $500 per month during the 1980-81 school year. It was unclear from the responses to the survey whether these figures included monthly utility costs as well. The largest portion of the respondents - approximately one-half - pay monthly costs of less than $300. A significant number of these teachers were living in housing provided by the local school district, however, and may have been paying less market value ~~costs~~ rent.

- In another survey, 27 (52%) of the state's 52 school districts reported that they provide housing benefits of some kind to at least two of their employees. These benefits include accommodations in living quarters owned or leased by the school district, monthly housing subsidies, salary adjustments, and/or assistance in locating rental units.

- Eighteen of the school districts estimated that they spent a total of $2.6 million on housing benefits during the last school year. Six of these districts reported spending at least $100,000. Most of the districts which provided estimates of their costs felt that they were somewhat low because their accounting procedures were not sufficiently sophisticated to break down all of their expenditures.

- Alternative solutions to the problem of teacher housing might include:

  - reversing current State policy so that school districts may use capital construction funds they receive from the State to build, purchase, and renovate teacher housing units;

  - reinstituting the 1980 grant program through which rural school districts received funds to purchase mobile housing units or construct housing for teachers;

  - increasing the availability of loan money to private individuals and local private entities, such as the regional non-profit corporations, so that they can construct or renovate housing for lease to school districts or teachers;

  - offering a State subsidy to offset a portion of teachers' housing costs;

  - requiring school districts to tell prospective teachers about housing costs and conditions so that they can negotiate salaries and benefits with this information in mind.

I. BACKGROUND

Until the early nineteen-seventies, living quarters for teachers were built along with schools in rural parts of Alaska. Both the Bureau of Indian Affairs (BIA) and the State of Alaska regularly constructed teacher housing units whenever housing was not available locally.

The State stopped providing teacher housing in approximately 1974. This change in policy was the result of a decision by members of the Legislature that housing for teachers should be a local responsibility. According to Bud Saylors, who was serving in the Legislature at the time and who is now in charge of the employee housing program for the State, creation of the Regional Educational Attendance Areas was under consideration and the mood in the Legislature was to transfer responsibilities for education from the State to the local level.

The landmark Molly Hootch case had been filed when construction of teacher housing was halted but a settlement had not yet been reached. (The case was settled out of court in 1976.) Consequently, there was no housing for teachers provided with the schools which were built as a result of that case.

According to Bud Saylors, it was never clear precisely who at the local level the Legislature expected would begin to provide living quarters for teachers when the State stopped doing so. It appears that at least some members of the Legislature assumed that teacher housing would continue to be a public responsibility. According to Saylors, a number of legislators supported the proposal that the State stop building teacher housing because they thought that by transferring obligations of this kind to the local level, the State might compel residents of the Unorganized Borough to form local governments and begin levying taxes.

In fact, very little teacher housing has been built since the Legislature's decision. School districts have assumed some responsibilities pertaining to the provision of teacher housing. For example, they are the landlords for the teacher housing units built by the BIA and the State prior to 1974. (Title to the property generally rests with the State, although the districts may own the units outright, if they choose.) In communities where living quarters have not been constructed, the districts frequently lease housing for teachers from private owners or assist teachers in finding rental housing. The districts have little, if any, funds with which they are permitted to build or purchase additional teacher housing, however. As a result, they are very limited in their ability to provide assistance in communities where there is no rental housing available locally or where the housing is substandard.

To obtain funding for construction, repair, and improvement projects, each year school districts which are REAA's must submit requests to the State Department of Education (AS 14.08.161). Requests for teacher housing units are routinely vetoed by the Department of Education and the Governor because of their understanding of the Legislature's intent that the State not fund construction of teacher housing.

Similarly, municipal school districts are entitled to State aid for 80% of the amount they must pay to retire outstanding bonds for contruction of schools, renovations, additions, and other capital projects (AS 43.18.100). However, they are specifically prohibited by a Department of Education regulation from receiving this aid to retire bonds used for construction of staff housing (4 AAc 31.090(8)).

It is possible for school districts to use a portion of the money they receive through the public school foundation program to provide teacher housing. These funds are earmarked for operational costs; however, money which remains at the end of a fiscal year may be used at the school districts' discretion. These "carry over" funds have been used in the past by a few districts to buy or construct teacher housing units.

Previous Attempts to Address the Teacher Housing Problem

The shortage of teacher housing has been brought to the attention of the Legislature and State officials on several occasions in the past. Two programs have been developed specifically to remedy the problem: the Non-Owner Occupied Rural Mortgage Purchase Program and the Mobile Housing Grant Program.

To date, the effect of these two programs has been somewhat limited. The Non-Owner Occupied Rural Mortgage Purchase Program has only issued loans since 1979, and until recent public information efforts by the Alaska Housing Finance Corporation, which administers the program, it was not widely known in rural Alaska, particularly in small and more remote communities. Consequently, the program has not had much effect to date on the availability of rental housing in rural Alaska.

The Mobile Housing Grant Program, which was a one-time effort unlike the housing loan program, had far less impact on the teacher housing problem than the Legislature expected. The program received a $1 million appropriation which the Legislature anticipated would be sufficient to purchase 30 to 40 mobile housing units for rural communities. The actual costs of purchasing and delivering a mobile unit turned out to be almost three times what the Legislature had

expected. As a result, only 12 units could be purchased instead of 30 to 40.

The Department of Education estimated to us this fall that there was a demand for roughly three to four times as many housing units as were provided through the housing grant program, i.e., between 36 and 48 units, based on the response of rural school districts. If the price per mobile unit had been what the Legislature expected it to be, the Mobile Housing Grant Program could have satisfied a large portion of this total demand for housing units and perhaps significantly alleviated the shortage of teacher housing. As it was, the program relieved the housing problem in only 6 rural communities.

The Mobile Housing Grant Program and Rural Non-Owner Occupied Housing Loan Programs are described in more detail below.

Non-Owner Occupied Rural Housing Loan Program. In 1979, the Alaska Housing Finance Corporation developed the Rural Non-Owner Occupied Housing Loan Program specifically to increase the availability of rental housing for teachers in rural parts of the state. The program makes long-term financing available for single family rental units and multi-family units as large as eight-plexes. The current interest rate is 9.5%.

The program was initially funded by means of a loan for $2.6 million from the State Department of Revenue. An additional $5 million was appropriated during the 1981 Legislative session to continue the program. AHFC expects that this money will be depleted by the end of the current fiscal year, and intends to request additional funding during the next legislative session. According to a spokesperson for AHFC, interest in the program has been steadily increasing. This is due in part to the efforts which AHFC made this year to inform residents of rural areas about the program.

Mobile Housing Grant Program. In 1980, the Legislature allocated $1 million from a $64 million bond sale to provide teacher housing units throughout the state. This was the first direct State expenditure for teacher housing since approximately 1974.

In a letter discussing the legislative intent for the appropriation, Representative Brian Rogers, the chair of the Free Conference Committee for the bill, said the funding was intended for mobile housing units which could be purchased relatively inexpensively for $25,000 - $30,000, and moved into villages by barge, ferry, or large helicopter. The units would not provide housing for teachers which was significantly better than other homes in the community. They were to be

located on school property and connected to school utilities. Local school districts were expected to assume the cost of installing the units, which were to become property of the districts once they were in place.

The appropriation for the mobile housing units was given to the Department of Transportation and Public Facilities (DOTPF) to administer. DOTPF found that the cost of placing a mobile housing unit in rural communities was significantly above the per unit cost anticipated by the Legislature. According to DOTPF, the cost of a unit FOB in Seattle was between $25,000 - $30,000; however, the cost of transporting a unit from Seattle to a rural site was roughly twice that amount, resulting in a total delivered price of approximately $82,000 per unit. Consequently, a maximum of 12 housing units could be purchased with the appropriation rather than 30 - 40 units as the Legislature had anticipated.

Instead of purchasing the mobile housing units, the Department of Transportation and Public Facilities developed a teacher housing grant program in cooperation with the Department of Education (DOE). DOTPF and DOE notified each rural school district that they were offering 12 grants of $82,000 each. Districts which were awarded the grant money could use it to purchase mobile housing units from Seattle, or they could use it to build housing, buy modular HUD housing, or purchase existing homes. The only requirement for districts which elected not to buy one of the mobile home units was that they provide housing with at least two bedrooms, so that a minimum of two teachers could be accommodated.

Because it was too difficult to determine where the greatest need for teacher housing existed, DOTPF and DOE offered housing grants to communities according to their ranking on the priority list developed for construction of schools as a result of the settlement in the Molly Hootch case. (As noted previously, none of the Molly Hootch schools had teacher housing, as they were built by the State following its decision not to provide living quarters for teachers.) There were several communities on the priority list which turned down the offer of a housing unit. According to Lee Hayes, who heads Planning and Facilities for DOE, these communities generally felt that the housing already available for teachers was sufficient.

A total of nineteen school districts requested a housing grant and met the qualifications. (To qualify, DOTPF and DOE required that the school district provide a resolution from the community where the housing unit would be placed demonstrating the community's approval.) However, only three of these school districts and a total of six communities received grants. At the request of the school districts,

DOTPF and DOE awarded grants for more than one housing unit to several communities. The districts argued that the teacher housing needs in a community should be fully met, rather than providing adequate housing for some but not all of the teachers. Grant recipients are shown on the following table below.

The housing units were scheduled to be shipped to the communities or constructed during the 1981 construction season so that they would be ready for occupation during the present school year.

TABLE I
School Districts and Communities
Awarded Grants for Teacher Housing
1980-81

School District	Community	No. of Grants
Lower Kuskokwim	Quinhagak	2
	Tununik	1
	Napakiak	2
	Goodnews Bay	2
Southwest REAA	Manokotak	3
Bering Straits REAA	Brevig Mission	2
TOTAL 3 districts	6 communities	12 grants

II. PRESENT HOUSING PROBLEMS

In the past two years, there have been four surveys of housing arrangements for teachers in rural parts of Alaska. Unfortunately, from the results of these surveys it is difficult to determine what current housing arrangements are and what problems exist.

Existing Housing Arrangements

Rural school districts, particularly the REAA's, generally have an assortment of housing arrangements for their teachers. In some communities, there is school district housing. Generally, this is the housing which was built by the BIA and the State prior to 1974. As noted earlier, when the State Operated School System was dismantled and the BIA school program phased out, responsibility for the housing units was transferred to the local school districts.[1]

In communities where there is no teacher housing or where there is not enough housing for all the teachers, some school districts lease housing from local residents to sublet to teachers. The districts may charge a subsidized rental rate for this housing, or pay the costs of teachers' utilities. Alternatively, districts may ask that teachers find and rent their own housing from local residents. When the cost of renting from private owners is high, districts frequently provide monthly housing stipends or inflate teachers' salaries to reflect local housing costs.

In a survey conducted by the Association of Alaska School Boards (AASB) during the 1980-81 school year, 27 (52%) of the state's 52 school districts reported that they provide housing benefits of some kind to at least two of their employees.[2] These benefits include accommodations

---

[1]REAA's hold most of this housing on a "use permit" basis. Actual title to the property generally rests with the State. AS 14.08.151 originally prohibited REAA's from owning land and buildings. This was amended in 1978 so that the State could transfer ownership of property to the REAA's at their request. As yet, none of REAA's have requested that title to the teacher housing units be tranferred to them, possibly because they must assume full maintenance costs for the units if they do so.

[2]The school districts which provide housing for two or more employees are: Adak REAA, Aleutian Chain REAA, Annette Island REAA, Bering Strait REAA, Chatham REAA, Copper River REAA, Craig City, Galena City, Hydaburg City, Iditarod REAA, Kenai Borough, Klawock City, Kodiak Island Borough, Kuspuk REAA, Lake and Peninsula REAA, Lower Kuskowkim REAA, Lower Yukon REAA, North Slope Borough, Northwest Arctic REAA, Pribilof Islands REAA, Railbelt REAA, Southeast Island REAA, Saint Mary's City, Southwest Region REAA, Yakutat City, Yukon Flats REAA, Yukon Koyukuk REAA.

in living quarters owned or leased by the school district, monthly housing stipends, salary adjustments, and/or assistance in locating rental units. Four districts offer housing benefits to only one employee.[3] The AASB survey is attached as Appendix A.

It is not possible to determine the specific housing arrangements in each rural school district from the results of the surveys. NEA-Ak, the largest teachers' union in the state, initiated a survey during the 1980-81 school year which provides some information in this regard; however, the survey is not yet complete. Preliminary results are summarized on the table on the following page. (See Appendix B for a more detailed breakdown of the preliminary results.) As the table shows, responses were received from teachers in only 12 of the 52 Alaska school districts. Additionally, the number of teachers who responded from most districts is very small, with the exception of the Kuspuk District and the Bering Strait District.

Of the 92 teachers who responded to the survey, 38 (41%) live in housing owned or leased to them by the school district. Forty-seven teachers (51%) rent housing from some other source. According to the information in Appendix B, most of these teachers, 41 rent from private individuals; however, 2 rent housing from the city, and 4 rent housing from the local regional or village corporation.

Thirty-eight teachers (41%) reported that they received a monthly housing stipend from their school district. The amount of the stipend ranged from $100 to $500 per month. Only 29 of the respondents (32%) said they received neither housing nor a housing stipend from their school district. However, compensation for the local cost-of-living may have been included in the salaries of these teachers.

---

[3]The districts which provide housing for only one employee are: Bristol Bay Borough, Chugach REAA, Hoonah City, Sitka Borough.

TABLE II
Summary of Preliminary Results of 1980-81 NEA-Alaska Survey of
Rural Teacher Housing Arrangements and Housing Quality

School District	No. of Communities Responding/Total	No. of Teachers Responding/Est.Total	Housing Arrangements				No. Who Receive Housing Subsidy	% of Respon-dents	Amount of Subsidy Per Mo.

Housing Problems

Based on the responses to the surveys, it appears that the teacher housing problem generally takes one of three forms in rural communities:

1. There is no school district housing or private rental housing available. As a result, teachers must camp out in the school, in an abandoned cabin, in the church, or rely on someone in the village to take them in.

2. In some communities, there is rental housing available, but it is of very poor quality, often below the standards of other homes in the community. This creates both physical and psychological hardships for the teachers.

3. The housing which is available is expensive. The school districts must frequently pay teachers increased wages to offset the high rents or directly subsidize a portion of their rent or utility costs.

Teachers who responded to the surveys also cited the following secondary issues:

- the lack of reliable information from the school districts about the housing situation in communities where teachers are being placed;

- inconsistent treatment by school districts which provide housing units and housing/utility subsidies for some but not all of their teachers;

The three primary problems are discussed in more detail below.

Housing shortage. From the results of the surveys, it is impossible to determine precisely where there is a shortage of housing, and the number of housing units which are needed. At least on a school district basis, the best indication of where there is a housing shortage comes from a survey of the twenty-one REAA's, conducted by the Legislature's REAA Budget Oversight Committee in the fall of 1980. Of the 20 REAA's which responded (the Aleutian Islands REAA did not respond), 7 specifically noted that more housing for teachers was needed in their area. These REAA's were: Chugach, Chatham, Bering Strait, Pribilof Islands, Iditarod, and Annette Island. Three other REAA's - Lower Kuskokwim, Lake and Peninsula, and Northwest Arctic - reported that they were already trying to arrange for the construction or lease of more teacher housing units. Additional teacher housing may have been needed in the other 10 REAA's as well, but they did not report it in their responses. A copy of the survey results is attached as Appendix C.

Substandard housing. The NEA-Alaska survey contains some data regarding the percentage of rural teachers living in substandard housing. As noted earlier, survey results are only available from 92 teachers at this time. In response to questions regarding the quality of their housing, 9 (10%) of the respondents said they live in luxury housing and have everything which one would expect to find in an Anchorage apartment. Forty-two teachers (46%) described their accomodations as "rural standard", with hot and cold running water, toilet facilities, a shower or bathtub, electricity, a stove, and a refrigerator. Twenty-one respondents (23%) said they had most but not all of these amenities, and characterized their housing as "rural substandard." Twenty teachers (22%) reported that their housing was "tent-like" with wood heat, a honeybucket, and no running water. These teachers lived in Sambell (1), Shishmaref (2), Koyuk (1), White Mountain (2), Galena (1), Red Devil (2), Sleetmute (3), Aniak (1), Crooked Creek (1), Stony River (2), Atmautluak (2), Goodnews Bay (1), and Ambler (1). Teachers were not asked how their housing compared to other homes in the community.

These results regarding the quality of teacher housing correspond roughly to the results of an earlier, more comprehensive survey of REAA teachers conducted by Alaska Analysts/Dittman Research in 1979. Approximately 400 of the 900 teachers employed by the REAA's responded. Sixteen percent (16%) of these teachers reported that their housing was less than adequate. This compares to 22% of the respondents in the NEA-Alaska survey who said that their housing was "tent-like." A larger percentage of the teachers who responded to the Alaska Analysts/Dittman Research survey described their housing as more than adequate or luxury, i.e., 27% compared to 10% of the respondents in the NEA-Alaska survey. Ninety-two percent (92%) of the respondents in the Alaska Analysts/Dittman Research survey said they had electricity in their home. Seventy-four percent (74%) had plumbing and 63% had oil heat. A copy of this survey is enclosed as Appendix D.

A number of teachers who responded to the NEA-Alaska survey reported that the condition of their housing caused them physical and psychological hardships. Some respondents were concerned that it reduced their efficiency as teachers as they took time away from teaching and after-school activities to chop wood, haul water, make extensive repairs, insulate, etc. Others said that living below the standards of everyone else in the village reinforced their feelings of being an outsider and made them feel as though they weren't wanted in the community. A significant number of respondents felt that housing quality contributed to the high degree of teacher turnover in Bush communities.

High costs. Both teachers and school district officials who responded to the surveys noted the high cost of teacher housing in some communities. The table on the following page summarizes monthly housing costs of teachers who responded to the NEA-Alaska survey of teacher housing.[4] Based on this information, almost half of the respondents (49%) reported monthly housing costs of less than $300. However, a significant portion of these people were living in school district housing, which may have been rented to them at less than the market value. Twenty-two percent (22%) of the respondents were paying between $300 and $499, while 23% paid $500 per month or more. Most (67%) of the teachers paying more than $500 per month were living in housing provided by a private owner, either a private individual, regional or village corporation, or a local government, rather than in housing provided by the school district.

It is unclear from the results of the NEA-Alaska survey whether the figures for monthly housing costs include monthly utility costs as well as monthly rents and mortgage payments. Monthly utility costs may be significant. For example, respondents from the Kuspuk School District and the Bering Strait School District reported that the monthly cost for household electricity ranged between $25 - $230 and oil costs were between $60 and $300 per month. Two-thirds to three-quarters of the teachers who responded to the Alaska Analysts/Dittman Research survey, conducted in 1979, reported that they paid utility costs in addition to their monthly rent.

---

[4]It is should be reiterated that although the NEA-Alaska survey represents the best information available about rural teachers' housing costs and conditions, its results should be used with some care because of the small size of the sample.

TABLE III
Monthly Housing Costs of Teachers Who Responded to NEA-Alaska Survey
1980-81 School Year

Housing Arrangement

	Rent from District	Rent from Private Individual(s)	Rent from Village or Regional Corp.	Rent from Municipality	Own Home	TOTAL	
$ 0		4				4	
$ 1 - 199	3	8		1	1	13	(49%)
$200 - 299	17	8	2		1	28

TOTAL	38	41	4	2	7	92	(100%)

Source: House Research Agency, 12/15/81, from preliminary results of the NEA-Alaska teacher housing survey.

Based on the information on Table IV on the following page, school districts were providing direct housing subsidies to 38 (41%) of the 92 respondents to the NEA-Alaska survey. This included subsidies to 22% of the respondents whose housing costs were less than $300 per month, 40% of the respondents paying $300 - 499 per month, and 90% of the respondents who paid more than $500 per month. As the table shows, most of these teachers received subsidies covering 25 - 49% of their monthly housing costs. The exceptions to this were generally teachers paying less than $300 per month all of whom had at least 75% of their housing costs subsidized. (This suggests that school districts provided the same amount of money to all the teachers they subsidized regardless of the teachers' monthly housing costs. A $200 subsidy, for example, represents roughly a 70% subsidy for teachers with housing costs of less than $300, but at most a 40% subsidy for teachers with housing costs over $500.)

TABLE IV
No. of Respondents Who Received Housing Subsidies
By Portion of Housing Payment Which Is Subsidized

Monthly Housing Costs	Portion of Monthly Housing Payment Which Is Subsidized: Under 25%	25-49%	50-74%	75-100%	Over 100%	% Unknown	Total No. of Respondents W/ Subsidy
Under $300				4	4	2	10 (26%)
$300 - 499		3	4			1	8 (21%)
$500 or more		15	4				19 (50%)
Unknown						1	1 (3%)
		18	8	4	4	4	38 (100%)

Source: House Research Agency, 12/16/81, from preliminary results of NEA-Alaska teacher housing survey for 1980-81 school year.

Rural teachers who responded to the Alaska Analysts/Dittman Research survey said that the primary burden on their household budget was travel (including air freight) costs. While housing was cited as both a burden on household budgets and an essential which was not readily available, travel and health care were cited more frequently.

Costs to the school districts. According to the survey of all 52 Alaska school districts conducted by the Association of Alaska School Boards (AASB), every school district which currently provides teacher housing benefits said it would like to discontinue its benefit program and not be involved in the housing business (see Appendix C). There appear to be three principal reasons for this sentiment:

- the current cost to the district of maintaining housing units and providing monthly housing stipends and subsidies;
- the problems inherent in being a landlord;
- the desire of school boards, in particular, not to compete with the private housing market.

It is unclear from the responses to this survey whether those districts which cited high costs, for example, as the primary reason they wanted to end their involvement with teacher housing would feel differently if their costs could be reduced.

The AASB survey asked the school districts to estimate "the total annual cost to the district for teacher (staff) housing, i.e., expenses for maintenance and operation, utilities, rent subsidies to staff, and etc., that are not covered by the revenues generated by teacher housing, for example, rent collected by the district." These results are shown on Table V on the following page.

Only 18 districts responded to the question. A significant number of districts, including some of those who provided an estimate, said that their accounting procedures were not sophisticated enough for them to break down all their expenditures for teacher housing. For example, when one generator supplies both the school and the adjoining teacher housing unit, they were uncertain how much of the cost of running the generator should be applied against the teacher housing unit. A similar situation exists with regard to maintenance costs. A maintenance person may do repair work on both the school and the teacher's living quarters during a trip to the village. In most instances, the districts do not distinguish between the amount of time spent on repair work for the school and the amount of time spent on the housing unit. As a result, most of the districts which provided estimates felt they were somewhat low.

As the table shows, the 18 districts who responded estimated that they spent a total of $2.6 million on staff housing during the last year. The North Slope Borough accounted for approximately 35% of that amount. Six of the districts spent at least $100,000.

TABLE V
School District Expenditures for Teacher Housing
1980-81 School Year

District	Expenditure
Aleutian Chain REAA	$ 52,000+
Bering Strait REAA	190,825
Chatham REAA	48-50,000
Copper River REAA	25,000
Craig City	1-2,000
Galena City	100,000
Hydaburg City	8,000+
Klawock City	5,000
Kodiak Island Borough	47,579+
Lake & Peninsula REAA	90,000+
Lower Yukon REAA	256,790
North Slope Borough	904,200
Northwest Arctic REAA	475,000
Pribilof Islands REAA	28,000+
Southeast Island REAA	127,366
Saint Mary's City	86,400
Yukon Flats REAA	27,000
Yukon Koyukuk REAA	110,000
TOTAL	$2,585,160+

III. OPTIONS FOR LEGISLATIVE CONSIDERATION

There are a number of ways in which the Legislature might address the problem of teacher housing in rural areas. One significant factor in identifying an appropriate approach is that the problem is not the same in all parts of the state. In some communities, the problem is a shortage of housing, either housing provided by the school district or privately owned rental housing. In other communities, rental housing is available, but it is of extremely poor quality. Alternatively, there are some school districts which are making significant expenditures each year to provide housing benefits in some form to their teachers and staff. In other areas, the high costs of housing and utilities are being absorbed by the teachers themselves.

We have identified five alternative solutions for your consideration. Some address the shortage of available housing, others the condition of existing rental units, and others current housing costs.

- Permit districts to use monies allocated to them under AS 14.08.161 and AS 43.18.100 for the construction, purchase and rehabilitation of teacher housing units. This would require that the State reverse its policy of not providing funding for teacher housing units.

- Expand the 1980 $1 million mobile housing grant program.

- Increase the availability of loan money to private individuals, and local private entities such as regional non-profit corporations so that they can construct and renovate housing for lease to the school districts.

- Subsidize teacher housing costs.

- Require that school districts tell prospective teachers about housing costs and conditions so that they can negotiate salaries and benefits with this information in mind.

Each of these options is discussed briefly below, with the exception of the final one, as it is a proposal which you introduced during the last legislative session.

State Construction Monies. One means of addressing the teacher housing problem would be to reverse current State policy and permit school districts to use the capital construction monies they receive from the State to build, purchase, and renovate teachers' housing units.

As noted earlier in this memorandum, the State had been constructing teachers' housing along with schools in rural areas until 1973 or 1974. This policy was reversed by the Legislature which felt teacher housing should be a local responsibility. Because it had been only a policy of the State to provide teacher housing prior to 1973-1974, and not a requirement of State law, it was not necessary for the Legislature to enact legislation in order to restrict further housing construction. Consequently, the State is not currently prohibited by statute from furnishing teacher housing units. Bud Saylors, who was serving in the Legislature at the time, recalled that the initial restriction had been expressed through legislative intent, although he wasn't certain of this. Lee Hayes, who heads Planning and Facilities for the Department of Education, believes it was a verbal agreement between the Legislature and the Administration. Therefore, the current policy concerning teacher housing could probably be changed by means of another expression of legislative intent, through resolution, or a budgetary footnote.

Expand Mobile Housing Grant Program. A housing grant program offers one means of funding construction of additional teacher housing units. This approach to providing housing units is described on pages 5-7 in the first section of this memorandum; the mechanism which was developed for dispensing grant money could probably be expanded and/or revised.

To accommodate school districts which would like to phase out their teacher housing programs, it may be possible to change the guidelines of the 1980 grant program so that money for housing units could be awarded either to school districts or directly to other local entities, such as village councils or the regional non-profit corporations.

Ms. Radei of your staff has raised the question of whether a grant program would be equitable, as it would benefit school districts which had not taken the initiative to build or purchase teacher housing on their own. Based on our research, very few school districts have bought or built teacher housing units at their own expense (possibly because their funds for this have been restricted). The districts have relied on the housing units which were built by the BIA and the State prior to 1974. When there have not been enough of these units, districts have generally leased housing from private owners to sublet to teachers or required the teachers to find housing on their own.

It may be possible to expand the housing grant program to include money for renovation of teacher housing units. This could benefit the few school districts which have constructed or purchased housing at their own expense, as well as the districts which own BIA or SOS units which have fallen into disrepair.

Loans For Privately Constructed Housing. Another possible means of relieving the shortage of rental housing for teachers is to increase the availability of loan money for non-owner occupied (i.e., rental) housing units. This alternative has the potential advantage of increasing the involvement of the private sector in providing housing for teachers, which all of the rural school districts have said they desire.

At present, there are three State housing loan programs which specifically serve the rural parts of the state. These are: the Non-Owner Occupied Rural Mortgage Purchase Program and the Rural Housing Mortgage Purchase Program, which are administered by the Alaska Housing Finance Corporation, and the Non-Conforming Housing Loan Program which is administered by the Division of Housing Assistance of the Department of Community and Regional Affairs.

It is possible to obtain financing for rental housing through all three of these programs. The Non-Owner Occupied Housing Loan Program finances rental housing exclusively, as explained earlier in this report. The other two loan programs are restricted to making loans for housing which will be owner-occupied. Both programs may lend money for duplexes, however. Although the borrower himself/herself must occupy one of the units in the duplex, the other unit may be used for rental purposes.

It is important to note that the three rural housing loan programs are relatively new programs. AHFC developed its two programs in 1979. The Non-Conforming Housing Loan Program purchased its first loan in February of this year. Given time, the three programs, as they are currently structured, could significantly increase the availability of rental housing in rural communities. The two owner occupied housing programs are somewhat limited in their direct contribution to the supply of rental housing; however, as current homeowners use loan money from either program to buy or build new homes for themselves, some of their existing housing may be turned into rental units.

The Legislature could take two additional steps to increase the supply of loan money for rental housing in rural areas. The first would be to maintain or increase the amount of money which each of the existing rural housing loan programs has to lend. Both AHFC and the Department of Community and Regional Affairs will be requesting additional appropriations for their programs during the next legislative session. The Legislature could also: 1) expand the scope of the Non-Conforming Housing Loan Program so that it includes loans for non-owner occupied housing; or 2) keep the owner-occupied provision but permit the program to make loans for larger units (e.g., tri-plexes or four-

plexes where the owner lives in one of the units). The Non-Conforming Housing Loan Program differs from AHFC's rural housing loan programs in several ways. These differences generally make it easier for rural residents to qualify for a home loan through the Non-Conforming Housing Loan Program than through AHFC, even though the interest rates charged by AHFC are slightly lower. The major ways in which the Non-Conforming Housing Loan Program differs from the AHFC rural loan programs are:

- Less stringent financial qualifications for loan recipients. To qualify for a loan through AHFC, principal and interest payments may not be more than 25% of the borrower's gross income, and the borrower's total indebtedness may not total more than 33% of his/her gross income. The Non-Conforming Housing Loan Program considers only the borrower's total indebtedness, which may not be more than 35% of his/her gross earnings. An individual with annual gross earnings of $25,000, for example, could have mortgage payments as high as $8,750 per year ($729 per month) and still qualify for a loan through the Non-Conforming Housing Loan Program. To qualify for an AHFC loan, his/her annual payments would have to be less than $6,250 ($521 per month). The higher indebtedness allowance makes it somewhat easier for individuals with low incomes to obtain a home loan in areas where housing costs are high.

- Slightly lower standards for construction. To qualify for AHFC financing, a home must at least meet the standards of other houses in the area. The Non-Conforming Housing Loan Program permits significantly more variation, requiring only "structural integrity." This means that the building and the foundation must be of sufficient quality to last for the duration of the loan, and the property must not present any health or safety hazards. The program has no stipulations regarding the amount of living space necessary per household member.

- Special mortgage payment provisions. To accomodate seasonal workers and individuals who do not have steady employment, mortgage payments can be made quarterly, semi-annually, or annually rather than on a monthly basis.

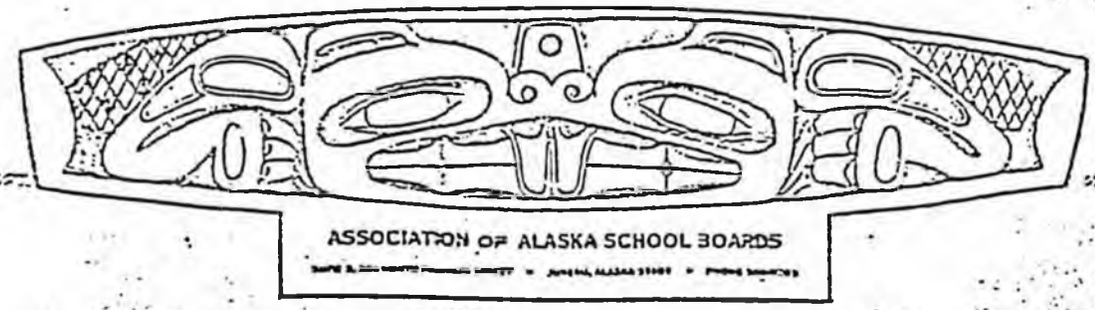
- Direct lending capability. To date, the Non-Conforming Housing Loan Program has been a mortgage purchase program. During this fiscal year, the program will begin to make loans directly to borrowers in some instances. This will assist people who live in areas where there are no local lenders, or those who cannot qualify for short-term construction financing from local banks.

State Housing Subsidy. One solution to the problem of high housing costs might be some form of State housing subsidy or housing assistance payment, such as some school districts already pay. This could be paid directly to teachers to lower their monthly housing expenditures.

Alternatively, it could be paid to the school districts to enable them to offer teacher housing subsidies, or as reimbursement for subsidies they already provide. Subsidies currently provided by districts are in the form of: 1) direct cash payments; 2) low rents in housing owned or leased by the district; and 3) salaries adjusted for local housing costs. The net effect should be the same regardless of who receives the payments.

Senate Bill 176, introduced last session by Senators Ferguson and Stimson, provides for housing subsidies through the creation of a rental housing assistance program. In areas where there is a shortage of rental housing for teachers, the REAA's may establish rental housing assistance programs, make payments to teachers living in rental units, and request reimbursement of those payments from the State Department of Education.

Two points should be made concerning this legislation. First, it applies only to REAAs. It excludes city and borough school districts, several of which currently face teacher housing problems. Secondly, the formula used to calculate the amount each teacher will receive under the program may be difficult to use. The bill currently reads as follows:



> The monthly rental housing assistance payment made to a teacher shall be that amount by which (1) the monthly rent necessary to provide the owner of the rental unit an annual gross rental income of 15 percent of the assessed value of the property exceeds (2) an index figure determined by the average monthly rent charged for approximately equivalent rental housing for the three most populous municipalities in the state.

The first portion of the formula presents problems in that the assessed value of the property may be difficult to determine. Generally, property is only assessed in areas where there are property taxes. As you know, this excludes much of rural Alaska. According to the State Assessor, Terry Earley, only 2 out of approximately 110 second class cities currently levy property taxes and assess local property. Earley estimated that the cost of assessing property in rural communities would be roughly $80 per lot, provided every lot in the community was included. He thought the cost of getting an appraisal for a single piece of property might be $500-600 at minimum.

If you would like us to evaluate any of these alternatives further, or if there other alternatives you would like us to examine, please let us know.

STAFF (TEACHER) HOUSING SURVEY

OF ALL SCHOOL DISTRICTS

IN ALASKA

MARCH, 1981

SCHOOL DISTRICT STAFF (TEACHER) HOUSING

A. Definition of the Problem:

Before addressing what has commonly been referred to as the "Teacher Housing Problem," some definitions must be cleared up first. For example, as the Iditarod School District stated in their response to our questionnaire, "All staff housing is a problem, not just teacher housing." Principals, highly skilled maintenance personnel, and central office administrators have also found it difficult to obtain housing and several districts have also provided these employees with housing, over 90% of the housing provided is for teachers, however.

Attempting to define each district's involvement in staff housing is often a confusing exercise. Some districts actually own housing units, some lease housing from local residents for staff, some simply subsidize staff members by paying them so much per month to find and rent their own housing, and many use a combination of all three. Consequently, for the purposes of this study, AASB defined "staff housing" as any housing and/or housing related benefits , i.e. actual housing, subsidies or stipends, payment of utilities and other costs, payment of part or all of rent, any maintenance and operation, and/or any other related costs and/or benefits involved with staff housing.

B. Scope of the Problem:

Of the 52 school districts in the State of Alaska, 21 school districts do not provide any housing related benefits to employees, and 31 school districts provide some housing benefit(s) to at least one employee. Only 27 school districts actually provide housing benefits to more than one employee. Of those 27 districts, 18 are REAAS and 9 are municipal school districts.

In providing housing benefits to employees, school districts, almost without exception, absorb some or all of the costs in providing such benefits. These costs must come out of the districts' educational budgets. Trying to determine how much districts are spending in this area is again a very difficult task to define and determine. For example, many of the REAAS inherited BIA constructed schools where the teachers' quarters are part of the school building, a school building that has its own generator plant. How does the district estimate the cost of the heating, maintenance, and electricity for teacher housing in such cases? In addition, when a maintenance person goes out to a

village to work on school facilities, he/she will often work on the teachers' quarters. Unless the district has a fairly sophisticated work order system of maintenance, then trying to determine how much the district is spending on staff housing maintenance is guesswork, at best. Consequently, in responding to our survey, almost all of the districts remarked that the figures they put down for staff housing were actually estimates and the actual costs were undoubtedly much higher.

For our survey we defined the "actual cost" of staff housing to the district as:

> The total annual cost to the district for teacher (staff) housing, i.e., expenses for maintenance and operation, utilities, rent, subsidies to staff, and etc., that are not covered by the revenues generated by teacher housing, for example, rent collected by the district. In other words, the actual costs that the district must absorb for teacher (staff) housing.

Different districts estimated different annual costs for staff housing. The North Slope School District estimated spending $904,200 per year on staff housing. This is probably a fairly accurate estimate as the district has a very sophisticated maintenance and general accounting system. Some districts, however, reported that they had just begun to break these costs out and really had no way of determining costs for staff housing at this time.

The total for all the districts who could report actual costs was $2,585,160 state-wide. This two and a half million dollars is recognized as being a very low figure. The actual costs are much higher. Thus, the actual total annual state-wide cost for teacher (staff housing--which does not include costs for capital construction and renovation to provide new housing--is well over 2.6 million dollars per year for providing present housing.

C. Future of the Problem:

In our survey we asked each district if they would wish to discontinue their involvement in providing staff housing if a workable alternative became available. All 27 responses from the 27 school districts providing housing stated a definite preference for getting out of the housing business. Seven of those 27 district responses stated that the district was already phasing

out of the business of providing staff housing. Of those, all but one was turning over the staff housing to private enterprise. The other district, Copper River, was providing mobile home trailer hook-ups on school sites so that teachers could purchase their own trailers. (This district is on a road system.) Thus, by 1983, only 21 districts will be providing staff housing as private enterprise is slowly replacing school district involvement.

D. Possible Solutions to the Problem:

Each district was also asked what alternatives to district owned housing they had tried in the past and/or anticipated using in the future. Five districts reported purchasing trailers and two districts reported they had built teacher housing. With varying degrees of success, 19 districts reported renting privately owned housing in smaller communities. In some districts, the district leased the housing year around and sub-leased it to teachers. (Several districts reported problems with district owned and/or leased housing in that some staff, particularly single teachers, did not want to live in the more expensive district housing if they could rent a cabin for much less money.) In other districts, teachers rent their own housing.

Eight districts reported entering into long-term leases with village corporations and private individuals. Thus, the owners could get financing to build housing and the district was assured of obtaining housing.

Almost all districts reported having periodic housing shortages. No single solution seemed to work best as one solution might work well in one community and be totally disfunctional in another -- all in the same school district.

E. Closing Remarks:

All of the school districts that provide staff housing in the state want to get out of the staff housing business. Seven districts, or over one quarter of the 27 districts now providing housing, will be phased out of the housing business by 1983. Private enterprise is taking over that function.

For the other 21 school districts, phasing out of the housing business is <u>not</u> a realistic alternative at this time, however, that day may come. The key may be to allow districts to make that determination for and by themselves, otherwise, school districts and the State

may assume that responsibility for an unduly long time period, thus, monopolizing and thwarting the gradual involvement of private enterprise.

Summary: HB 196, By Adams etal.

"An Act relating to provisions of adequate housing for public school teachers in rural areas."

Chapter 08. Education in the Unorganized Boroughs

Section 1. AS 14.08.101 - Powers

A regional school board may... 10) enter into leases to provide rental housing for teachers.

Section 2. AS 14.08.111 - Duties

A regional school board shall..10) inform prospective employees of the housing situation where they will be working and assist them (when possible) in securing housing.

Chapter 14. Local Administration of Schools

Section 3. AS 14.14.090 - Additional Duties (to Municipal School Districts)

A school board shall...(9) applies to municipalities in adding duty of informing and assisting prospective employees of the housing situation should they be assigned to rural areas.

office, each school board member shall take and sign the oath or affirmation prescribed by AS 14.12.090.

(b) The officer of the board responsible for the custody of regional educational attendance area funds shall execute a bond of $50,000 with the commissioner. (§ 2 ch 124 SLA 1975)

Sec. 14.08.101. Powers. A regional school board may

(1) sue and be sued;

(2) contract with the department, the Bureau of Indian Affairs, or any other school district, agency, or regional board for the provision of services, facilities, supplies or utilities;

(3) determine its own fiscal procedures including but not limited to policies and procedures for the purchase of supplies and equipment; the regional school boards are exempt from the Fiscal Procedures Act (AS 37.05);

(4) appoint, compensate and otherwise control all school employees in accordance with this title; these employees are not subject to the State Personnel Act (AS 39.25);

(5) adopt regulations governing organization, policies and procedures for the operation of the schools;

(6) establish, maintain, operate, discontinue and combine schools subject to the approval of the commissioner;

(7) recommend to the department projects for construction, rehabilitation, and improvement of schools and education-related facilities as specified in AS 14.11.010(a), and plan, design, and construct the project when the responsibility for it is assumed under AS 14.11.020;

(8) exercise those other functions that may be necessary for the proper performance of its responsibilities;

(9) by resolution adopted by a majority of all the members of the board and provided to the commissioner of the department, assume ownership of all land and buildings used in relation to the schools in the regional educational attendance area. (§ [illegible] 124 SLA 1975; am § 2 ch 57 SLA 1976; am § 1 ch 147 SLA 1[illegible] § 4 ch 92 SLA 1982)

→ 10)

Effect of amendments. — The 1978 amendment added paragraph (9).

1982 amendment rewrote paragraph (7).

NOTES TO DECISIONS

As to absence of duty on regional educational attendance areas to bargain collectively with noncertificated employees, see note following chapter analysis. Northwest Arctic Regional Educ. Attendance Area v. Alaska Pub. Serv. Employees, Local 71, Sup. Ct. Op. No. 1811 (File Nos. 3360, 3362), 591 P.2d 1292 (1979).

Applied in Northwest Arctic Regional Educ. Attendance Area v. Alaska Pub. Serv. Employees, Local 71, Sup. Ct. Op. No. 1811 (File Nos. 3360, 3362), 591 P.2d 1292 (1979).

Section 1) HB 194

Collateral references. — Power to require construction or repair of school buildings. 1 ALR 1559.

Power of school authorities to employ physicians, nurses, oculists, and dentists. 12 ALR 922.

Extent of legislative power with respect to attendance and curriculum. 39 ALR 477; 53 ALR 832.

Kindergartens or specialized departments, power and duty of school authorities to maintain. 70 ALR 1313.

Power of school or local authorities as to granting leases of school property. 111 ALR 1051.

Sec. 14.08.111. Duties. A regional school board shall:

(1) provide, during the school term of each year, an educational program for each school age child who is a resident of the district;

(2) develop a philosophy of education, principles and goals for its schools;

(3) employ a chief school administrator and approve the employment of the professional administrators, teachers and noncertificated personnel necessary to operate its schools;

(4) establish the salaries to be paid its employees;

(5) designate the employees authorized to direct disbursements from the school funds of the board;

(6) submit the reports prescribed for all school districts;

(7) provide for an annual audit in accordance with AS 14.14.050;

(8) provide custodial services and routine maintenance of school buildings and facilities; and

(9) establish procedures for the review and selection of all textbooks and instructional materials before they are introduced into the school curriculum; the review includes a review for violations of AS 14.18.060. (§ 2 ch 124 SLA 1975; am § 2 ch 17 SLA 1981)

10)

Effect of amendments. — The 1981 amendment added paragraph (9).

NOTES TO DECISIONS

As to absence of duty on regional educational attendance areas to bargain collectively with noncertificated employees see note following chapter analysis. Northwest Arctic Regional Educ. Attendance Area v. Alaska Pub. Serv. Employees, Local 71, Sup. Ct. Op. No. 1811 (File Nos. 3360, 3362), 591 P.2d 1292 (1979).

Applied in Northwest Arctic Regional Educ. Attendance Area v. Alaska Pub. Serv. Employees, Local 71, Sup. Ct. Op. No. 1811 (File Nos. 3360, 3362), 591 P.2d 1292 (1979).

Sec. 14.08.115. Advisory school boards in regional educational attendance areas. A regional school board may establish advisory school boards, and by regulation shall prescribe their manner of selection and organization, and their powers and duties. (§ 2 ch 24 SLA 1979)

Section 2) HB 196

declare the position vacant and shall notify the ex-member by registered mail. The vacancy shall be filled as provided by AS 14.12.070. (§ 1 ch 98 SLA 1966)

Sec. 14.14.090. Additional duties. In addition to other duties, a school board shall

(1) determine and disburse the total amount to be made available for compensation of all school employees and administrative officers;

(2) provide for, during the school term of each year, an educational program for each school age child who is a resident of the district;

(3) withhold the salary for the last month of service of a teacher or administrator until the teacher or administrator has submitted all summaries, statistics, and reports which the school board may require by bylaws;

(4) transmit, when required by the assembly or council but not more often than once a month, a summary report and statement of money expended;

(5) keep the minutes of meetings and a record of all proceedings of the school board in a pertinent form;

(6) keep the records and files of the school board open to inspection by the public at the principal administrative office of the district during reasonable business hours;

(7) establish procedures for the review and selection of all textbooks and instructional materials before they are introduced into the school curriculum; the review includes a review for violations of AS 14.18.060. (§ 1 ch 98 SLA 1966; am § 3 ch 17 SLA 1981)

→ 8)

Effect of amendments. — The 1981 amendment added paragraph (7).

NOTES TO DECISIONS

Stated in Tunley v. Municipality of Anchorage School Dist., Sup. Ct. Op. No. 2160 (File Nos. 4796, 4797, 4826), 631 P.2d 67 (1980).

Sec. 14.14.100. Bylaws and administrative rules. (a) The school board policies relating to management and control of the district shall be expressed in written bylaws formally adopted at regular school board meetings.

(b) Administrative rules which do not embody school district policy need not be promulgated as bylaws; however, the rules shall be in written form and readily available to all school personnel. (§ 1 ch 98 SLA 1966)

MEMORANDUM

TO: Representative Mae Tischer, Co-Chairman
Representative Milo Fritz, Co-Chairman
House Health, Education and Social Services Committee

FROM: Representative Al Adams AA

SUBJECT: House Bill 196 - Provision of Adequate Housing for Public School Teachers in Rural Areas

HB 196 is pending in your committee and I would appreciate an opportunity for a hearing at your earliest convenience.

Basically the bill does three things:

Section 1. Adds to the powers of regional school boards the ability to enter into leases to provide rental housing for teachers;

Section 2. Adds to the duties of regional school boards the requirement to inform all employees of the housing situation where they will be working and to assist them in securing housing. (The bill does not require school boards to provide housing or subsidize housing; and

Section 3. Adds additional duties to school boards in municipalities which are the same as those in section 2. (Municipalities already have the general power to provide housing).

For your further information, enclosed is a copy of the recently completed Rural Housing Survey completed by the National Education Association. I hope the committee members will find it helpful in understanding the housing conditions in rural Alaska.

Should the committee require any additional information or have further questions, please let me know.

RE: COMPILATION OF RESULTS FROM THE 1982-83 RURAL HOUSING SURVEY

Pursuant to NBI 82-28 NEA-Alaska with the support and assistance of NEA-Research sent housing status surveys to nearly 1100 members in 39 local associations. Distribution of surveys was through local site or building representatives or through the local president. Approximately 305 completed surveys from 81 sites were returned from 23 local associations. It should be noted that all teachers living in a single household were instructed to complete only one survey. The survey consisted of four parts, the first three of which lent themselves to computer compilation and analysis by NEA-Research which will be provided in a separate report. The fourth part consisted of seven open ended questions which required hand compilation. Each response to each question was assigned to a like statement, multiple responses were allowed. Attached you'll find the summation by region.

1. If you plan to teacher in rural Alaska indefinitely, why?

		Costal	Interior	Kodiak Aleutian	Southeast	Total
	TOTAL # RESPONDING	87	20	14	7	128
	REASONS GIVEN

4. IN WHAT WAY DO YOU FEEL NEA-ALASKA OR YOUR LOCAL ASSOCIATION CAN HELP TO "SOLVE" THE TEACHER HOUSING PROBLEM?

5. WHAT ARE YOUR PERSONAL IDEAS FOR ARRIVING AT SOLUTIONS TO THE TEACHER HOUSING PROBLEM?

The responses received to the above two questions did not lend themselves to simple groupings. In general, the responses fell into five categories summarized below:

1. Legislative: District should be required to provide teacher housing; District should be encouraged to be involved in teacher housing; legislature should establish standards for teacher housing; land should be made available to teachers to build their own housing; legislature should fund teacher housing; loans should be available to teachers to build; require districts to be truthful in describing housing; protect teachers from retallation if they break their contract because of bad housing; and require housing as a condition of opening school.

2. NEA-Alaska: Go public with the problem and its impact on instruction; become the provider/landlord; research and document; support local bargainers; keep trying; stop trying; and work with regional corporations to supply housing.

3. Local Associations: Help locate and list available housing (or make district do it); bargain hard; negotiate equitable rents; policies and procedures; build units; stay out of housing; and address the unique problems of single teachers.

4. Responsibility: District should provide all housing; district should provide housing when individuals, villages, or corporations do not; teachers and villages should independently (from the district) arrive at a solution; take housing away from district to avoid it being used as a threat.

5. Independence: Housing should not be mandatory, get out and stay out of housing, teachers should live under same conditions as villages.

The overwhelming majority of responses fell in the first 4 categories.

A conclusion that can be drawn from the responses is that no one solution will work in all districts or even among all villages within a district. The message was clear; keep trying and be flexible.

6. Is there an alternative housing unit available to you at your site?

In general multiple respondents from the same site concurred on the answer to this question, wherever there was a difference of opinion the majority response was recorded with the minority response noted below.

	Costal	Interior	Aleutian Kodiak	Southeast	Total
Number of sites responding	53	14	9	5	81
Number of sites with alternative housing available	11	5	2	0	18
Number of sites without alternative housing available	42	9	7	5	64

Notes: Many of the respondents who indicated that there were alternative units available described them as being too costly, abandoned village housing, available only for short periods of time, or too far away from the school (7 miles in one location).

Responses were received from the following districts (by region):

Costal were from: Nome, N.W. Arctic, North Slope, Bering Straits, Lower Yukon, Chevak, Lower Kuskokwim, S.W. Region, Mid-Kuskokwim, and Lake and Peninsula.

Interior Responses were received from: Yukon Koyukuk, Yukon Flats, Railbelt, Iditarod, Tanana.

Kodiak/Aleutian Responses were from: Kodiak, Unalaska, King Cove, Aleutian.

Southeast Responses were received from: Metlakatla, Craig, Klawock, and S.E. Island.

MEMORANDUM State of Alaska

TO: Marshall L. Lind, Commissioner
Department of Education

DATE: November 17, 1982

FILE NO.:

TELEPHONE NO.: 465-2890

FROM: Steve Hole, Education Administrator
Management, Law and Finance
Department of Education

SUBJECT: November 10, 1982 Teacher Housing Meeting held in Fairbanks

As you requested, I attended the above meeting. Also present were Jim Elliott and Bob Davis for the department, Mary Ann Einenger, Steve Pulkkinen, Bob Cooksey, Ray Virg-in, Jean Robb and Jean Krause for NEA-Alaska and Patsy Aamodt for the State Board.

As a result of the meeting, the department representatives agreed to recommend to you the following:

That the department recommend to the State Board that it:

a) officially acknowledge that teacher housing is, to an indeterminate extent, a problem that does impact the quality of instruction provided to students;

b) request the Governor's office to request an appropriation for the requests for teacher housing submitted by school districts in the FY 84 CIP budget;

c) support NEA-Alaska efforts to compile data substantiating the scope and degree of teacher housing problems statewide;

d) direct the department to assist appropriate groups, to the extent practicable, in resolving immediate teacher housing problems;

e) continue to work with the Teacher Housing Liaison Committee to try to come up with workable solutions to problems associated with this issue.

cc: J. Elliott
J. Krause
P. Aamodt

RURAL TEACHER PERCEPTIONS

and

HOUSING SURVEY

Part One: Demographic
Part Two: Quality
Part Three: Cost Information
Part Four: Miscellaneous open ended attitudinal questions.

Introduction

In late November 1982 NEA-Alaska mailed nearly 1,100 Rural Housing Surveys to the teachers in 39 school district, in 193 rural villages or cities. By January 31, 1983, 360 teachers from 90 villages or cities of 23 districts had returned the survey. Approximately 65% of the responses were filled out jointly by teaching couples bringing the percentage of respondents to better than 50% of potential. (344 responses were received in time for computer coding and analysis in Parts 1, 2 and 3. All responses were included in Part 4.)

PART 1: Demographic

1. Years teaching - Total/District/Village:

	Years In Teaching	%	Years In District	%	Years In Village	%	Years In Village If own own home
1 year	12	(3.6)	81	(24.7)	105	(31.9)	1 (3%)
2 years	25	(7.6)	61	(18.6)	57	(17.3)	1 (3%)
3 years	36	(10.9)	67	(20.4)	68	(20.7)	8 (24.2%)
4 years	32	(9.7)	46	(14.0)	35	(10.6)	5 (15.2%)
5 years	29	(8.8)	20	(6.1)	23	(7.0)	3 (9.1%)
6 years	32	(9.7)	17	(5.2)	16	(4.9)	4 (12.1%)
7 years	19	(5.8)	13	(4.0)	8	(2.4)	3 (9.1%)
8 years	21	(6.4)	4	(1.2)	2	(.6)	1 (3%)
9 years	9	(2.7)	2	(.6)	0	(.0)	0 (0)
10 years	22	(6.7)	2	(.6)	2	(.6)	2 (6.1%)
10+years	93	(28.2)	15	(4.6)	13	(4.0)	5 (15.2%)
Total	330		328		329		33
No Response	4		6		5		0

2. Marital Status

Married 219 (65.8%)
Single 114 (34.2%)

3. Teaching outside of major/minor fields.

138 (41.3%) are teaching an average of 2 subjects each outside of their major/minor field.

Part 2: Housing Quality

1. Housing best described as fine/adequate.

	Fine		Adequate		Poor	
W/Sewer/Septic	28	(8.4%)	151	(45.3%)	0	(0)
W/Humus/Chemical	38	(11.4%)	10	(3.0%)	0	(0)
W/Honeybucket	12	(3.6%)	90	(27.0%)	0	(0)
Other	4	(1.2%)	0	(0.%)	0	(0)

2. District's efforts to describe/accuracy and perceptions of housing situation.

	Did District Accurately Describe Housing		Could District Have Accurately Described Housing		Would you Have Believed It	
Yes	168	(52.8%)	244	(83.3%)	230	(80.7%)
No	150	(47.2%)	49	(16.7%)	55	(19.3%)

3. Amenities/necessities/luxuries available in home: by provider (percentage).

	Total	Dist. Owned	Village Owned	State/Fed Owned	Private Landlord	Yourself
Running Water	75.4	89.6	87.9	86.7	49.5	71.9
Hot Running Water	71.5	88.0	87.9	86.7	41.1	68.8
Electricity	93.4	95.2	100.0	80.0	90.5	93.8
Refrig.	88.6	100.	90.9	100.	69.5	93.8
Freezer	55.9	68.8	66.7	53.3	27.4	84.4
Washer	55.3	61.6	66.7	80.0	33.7	75.0
Dryer	55.0	67.2	66.7	80.0	30.5	59.4
Tables/Couch/ Chairs	84.7	93.6	84.8	80.0	73.7	90.6
Adequate Storage	63.7	58.	75.8	86.7	48.4	75.0
Total Respondents Each Provider:	333	125	33	15	95	32

4. How does your housing compare to other housing in the village by provider:

	Total	District Owned	Village Owned	State Federal Owned	Private Landlord	Yourself
Better	140 (44%)	65 (53.7%)	14 (42.4%)	11 (73.3%)	25 (27.2%)	15 (46.9%)
About the Same	117 (36.8%)	35 (28.5%)	16 (48.5%)	4 (26.7%)	38 (41.3%)	13 (40.6%)
Worse	48 (15.1%)	18 (14.6%)	3 (9.1%)	0	24 (26.1%)	2 (6.3%)
Total (Don't knows omitted)	305	119	33	15	87	30

5. Time spent surviving by activity by owner of dwelling. Summarized by type of activity only (time ranged from one hour per week to 10 hours per week per activity).

	Total	Yourself	School District	Village	Feds/ State	Private	Other
Hauling Water	88 (26.3)	10	19	5	1	45	6
Hauling Wood	38 (11.4)	8	3	2	0	22	1
Hauling Oil	31 (9.3)	5	1	0	0	23	1
Repairs	93 (27.8)	12	32	10	2	34	1
Other #1	31 (9.3)	4	8	2	1	10	4
Other #2	11 (3.3)	3	3	0	1	3	1

(Percent is based on the number of respondents who indicated time spent on a task divided by the total number of respondents).

PART 3: Costs

1. Do you own or rent your own home? If rented, who owns it and who do you pay the rent to:

Own 33 (10.3%)
Rent 286 (89.7%)

	RENT PAID TO: Owner of Home	School District	Corporation	Landlord	Not Applicable
School District	125 (43.7%)	125	0	0	0
Village	33 (11.5%)	22	6	3	2
State or Feds	15 (5.2%)	12	1	1	1
Private Landlord	95 (33.2%)	20	3	72	0
Other	18 (6.3%)	13	3	1	1
TOTALS	286	192 (67.1%)	13 (4.5%)	77 (26.9%)	4 (1.4%)

2. Monthly rent/mortgage with utility costs included. Percentage figures by vertical column shown in brackets. (No responses now shown).

OWNER OF UNIT BY CATAGORY

	Total	Yourself	School District	Village	Feds/ State	Private	Other
Less than 300	90 (29.7)	5 (21.7)	22 (18.0)	5 (16.1)	8 (57.1)	45 (47.4)	5 (29.4)
301-450	67 (22.1)	6 (26.1)	27 (22.1)	11 (35.5)	3 (21.4)	19 (20.0)	1 (5.9)
451-600	56 (18.5)	3 (13.0)	34 (27.9)	4 (12.9)	0	10 (10.5)	4 (23.5)
601-750	28 (9.2)	6 (26.1)	11 (9.0)	1 (3.2)	2 (14.3)	6 (6.3)	2 (11.8)
751-900	33 (10.9)	1 (4.3)	16 (13.1)	5 (16.1)	0	9 (9.5)	2 (11.8)
More than 900	29 (9.6)	2 (8.7)	12 (9.8)	5 (16.1)	1 (7.1)	6 (6.3)	3 (17.6)
TOTAL	303	23	122	31	14	95	17

PART 4: Positive negative aspects of rural teacher/living.

1. 141 or 39% of the respondents indicated that they intended to remain in rural Alaska indefinitely. The reasons given included:

Lifestyle	48%
Teaching Environment	46%
Community/People	35%
Financial	16%
"Enjoy It"	12%
Near Retirement	7%
Poor Job market	6%
Challenge	4%
Supportive Administration	1%
Good Housing	1%

2. 31 or 9% of the respondents planned to leave rural Alaska as soon as possible. The reasons given included:

Housing	39%
Admin/Community	35%
Isolation	29%
Family Needs	29%
Retiring	6%
Other	3% to 6%

(Return to school, teacher in subject area, medical, climate, costs each was named on 3% to 6% of the returns.)

3. 184 or 51% of the respondents offered comments on the positive aspects of rural living/teaching that would tend to keep them in rural Alaska. The comments given included:

Teaching Environment	60%
Lifestyle	55%
Community/People	37%
Financial	26%
Good Housing	8%
Challenge	4%
Administration	3%
Near Retirement	1%

4. 192 or 53% of the respondents offered comments on the negative aspects of rural living/teaching that would tend to cause them to leave rural Alaska. The comments included:

Isolation	35%
Housing	32%
Community	29%
Cost/Availability of travel/Goods/Services	24%
Administration	22%
Personal	21%
Teaching Conditions	15%
Climate	10%

5. The question was asked, "Is there an alternative housing unit available to you at your site?" The respondents from the 90 villages/cities indicated that at 18 or 20% of the sites alternative housing was available while at 72 or 80% of the sites there is no alternative housing.

Conclusions:

"Of the 4 most frequently cited positive aspects only "lifestyle" is completely personal. The remaining three "teaching environment", "Community/People", and "financial" are dependent on a multitude of factors, that can be nurtured.

"Of the negative aspects only "personal" needs and "climate" are beyond the control of anyone other than the individual or Mother Nature. "Isolation", "housing", "cost", and "administration" can be addressed through negotiations and/or political action. "Teaching Conditions", "Administration", and "community" can be addressed through community organizing, political action and professional developments.

"A conclusion that can be drawn from the data is that when the positive aspects of rural living/teaching are present to a greater degree than their corresponding negative, teachers will stay. At what point on the see-saw of positives-negatives the individual teacher falls/gets off is clearly a unique to each individual. There is however a communal effect present: for example, if the major positives for a teacher are the comradery of the staff (teaching environment), skiing/fishing (lifestyle and community) and using traditional teaching methods (teaching environment), what happens when the district involuntarily transfers half the team out of the village (administration), or the village puts pressure on to stop fishing (community then isolation), or the district adopts a rigid (or loose) curriculum (teaching environment) or a new principal is put in (administration)? Depending on the individual the negatives may reach the point where he/she leaves, causing a change in someone elses balance.

"Lastly, while housing in and of itself is not a significant factor in the teachers list of "positives" it is a major factor in the lists of "negatives" and reasons given for leaving an area. The conclusion drawn from the data is that housing may become the proverbial "straw that broke the camel's back." That is, if the positive/negative balance of other factors is near the threshold of causing a teacher to leave, housing becomes the tie breaker. Put another way, a teacher <u>may</u> be more tolerant of isolation or a heavy workload or a hostile administration or a hostile community if they can go to an adequate home at the end of a day.

TO: Rep. Mae Tischer March 9,1983

FROM: Heidi H. Borson
HESS Committee Staff

RE: Partial transcript of 3/9/83 House HESS meeting on HB 196

Rep. Goll: What is the status of the ability of a REAA district to purchase and operate housing? I know in Angoon, for example, they have done so. I'd like to clear up the question as to who is owning this housing which is owned by either the municipality or the school system right now.

Steve Hole: Under 14.08, I believe it's in the chapter on REAA's, unless the REAA/the regional board has petitioned the State for ownership and title to all school and education related facilities operated by the district, ownership is vested with the State notwithstanding who purchased it.

Rep. Goll: So it is possible now in every community in the State for the school system, via the State, to own and operate housing for teachers. Is that correct?

Steve Hole: At least in the unorganized borough, it is possible. I believe the ability of a borough of any class or a first class city which is also a school district would be subject to ordinance.

Rep. Goll: So the law provides for the availability of housing owned by every school district or municipality encompassing a school district to... What I'm trying to find out here - there is no need to address the problem of ownership of housing. If the school system or a city or the State wishes to own and provide housing for teachers, it can do so. Is that correct?

Steve Hole: I believe technically that's correct. But there is a reason to address that issue, Representative.

Rep. Goll: Thank you. Maybe we could take that up in the future.

Sheryl Krasko

February 2, 1983

Ms. Pam Neal
2757 John Street 1st
Juneau, Alaska 99801

Dear Pam:

Mike Franks has passed on to me your request for information regarding the Lower Kuskokwim School District's present teacher housing program. I will provide a brief overview and appropriate documents that will hopefully assist you in your lobbying efforts.

Many of the REAA's inherited various numbers of housing units when they were formed. Some of these had been former Bureau of Indian Affairs houses, other had been established under the Division of State supported schools, ASPOS, and PUBSD respectively. Lower Kuskokwim School District was primarily a real exception in this regard. Sixteen (16) new high schools were completed in two (2) years, with no provisions made (by legislative mandate) for teacher housing. Extremely poor living conditions were available for our teachers at many sites.

As a means of attempting to remedy the situation, the Lower Kuskokwim Education Association and the Lower Kuskokwim School District negotiated an agreement relative to the active pursuit of teacher housing by the District. An aggressive stance has been taken by the District, and 22 housing units have been constructed in the past two (2) years. Additionally, various warehouses and other buildings have been semi-converted to make at least substandard housing available.

The District further inherited a number of housing units from the Bureau of Indian Affairs with the recent transfer of Bureau of Indian Affairs schools. A number of staff equal to or greater than the available housing was also, of course, inherited.

The present District housing program is truly a joint venture between the teachers association and the District. A Housing Review Board consisting of two (2) teachers and one (1) administrator is very involved in over-seeing the program. The Superintendent is an ex-officio member of this group. The program is operated as an Enterprise Fund, with rents paid by the teachers designed to cover maintenance and operating costs as well as some of the refurbishing of units. Various difficulties have become apparent during this first year ofoperation. A number of these have recently been resolved, and some major steps taken toward program improvement.

A detailed needs assessment is now being completed at each site, with general results available in approximately ten (10) days. This assessment is made under the auspices of the local Advisory School Board, with administration and teacher input.

At some sites we still have teachers living in warehouses and even in parts of the school. At a number of sites the old Bureau of Indian Affairs housing is also in very serious need of refurbishing. The needs assessment will be sent to you. Within 45 days of its completion we will also have available a scope of work, including material and labor costs, for needed major maintenance. Also available will be an assessment of capital construction needs.

A draft of the housing program activity plan recently developed is enclosed for your reference, along with a draft revision of the housing program regulations. Article XXIV of the negotiated agreement also provides insight into the operation of the housing program, particularly the needs assessment process mentioned above.

If you have specific questions after reviewing this material, please call me at the Lower Kuskokwim School District. Jim Kass and/or Mike Franks should be able to provide you with specific information regarding the needs assessment in my absence.

Sincerely,

Lin Laughy, Administrative Consultant

MODEL HOUSING RESOLUTION

WHEREAS, there are not sufficient and/or adequate teacher housing units in the community of _____ and;

WHEREAS, the lack of sufficient and/or adequate teacher housing units impairs the ability of the community to recruit and maintain teaching staff, and;

WHEREAS, it is the desire of the community to provide sufficient and/or adequate teacher housing units in order that teaching staff may be recruited and retained, and;

WHEREAS, the community has identified the following land upon which teacher housing units may be located,

(place land description here including map)

BE IT THEREFORE RESOLVED, that the Advisory School Board of _____ requests the Lower Kuskokwim School District to provide (put in type and size of unit desired) _____ to be funded by the enterprise fund. If other source of funding is desired so designate.

Ratified this _____ day of _____, 19__.

Lease Guidelines

1. LKSD has a commitment to certified staff to provide housing with specified standards at specified rents. When housing doesn't meet those standards then tenants pay less ~~or nothing~~ until those standards are met.

2. The rents teachers pay provide the sole income for LKSD housing. There is no other place to get monies to pay for lease costs and/or repairs.

3. Teacher rents are set by negotiated agreements and become part of the contract existing between teachers and LKSD.

4. The rental amounts are determined by reviewing costs of the past and projecting construction and maintenance costs into the future.

5. LKSD and LKEA review the cost figures monthly and average them throughout the district to determine contract revisions necessary. Then a comparison of costs at village owned housing to LKSD produced housing is made.

6. Those sites that can provide housing at costs equal to or less than LKSD produced housing get lease contracts on a long-term basis to assure the village landlords of the continued tenant with assurances of care and concern for the property.

7. If possible and with agreement of the property owner, LKSD would like to maintain, repair, and/or remodel leased property with the site administrator selecting the workers for such services. The hlpe being that this would give work to village people and provide quicker service to tenants. Those times when local expertise wasn't available, outside aide would come in and provide the service.

8. Alaska law provides that the owner will assume adequate maintenances and LKSD realizes that owners often can't provide ready money to pay for unexpected costs. To solve this problem the lease could provide for maintenance and upgrade costs to be deducted from rents owed and at no time would owner have to provide cash to maintain or repair the property.

9. Any repairs or fixed replacements would become the property of the owner. This would not include items that were portable or not permanently affixed to the building.

10. The terms of the lease could be up to five (5) years with rents payed January through June in six (6) monthly installments. Payment would be accompanied by the past six months expense list by item.

Dmcn

Net Inflow = Income less expenses Beginning cash = Last month's ending cash

Ending Cash = net inflow + beginning cash

There are three catagories of housing: A,B,C. @ has different minimum specifications & rent.

We predict a negative balance in August of +100,000 dollars, even though as can be seen, teachers are paying considerable amounts.

Summer rent reductions are to be the real rent rate less 1/3.

LOCATION	NEW UNITS REQUESTED	RELATED REQUESTS	COMMENTS
AKIAK	(1) 2 BR Unit	That LKSD lease the 2 Corporation owned houses which teachers now live in.	No more then 2 Bedrooms in the new unit.
AKIACHAK	0	Purchase a duplex, trailer and house from Akiachak limited.	Teachers presently live in these units.
ATMAUTLUAK	0	0	The Trailer unit is in need of new furniture (very poor condition)
CHEFORNAK	(1) 2 BR (1) 3 BR	0	The request has not yet been reviewed by the ASB - such review take place Feb. 10. Trailers are mentioned in the staff report as the desired units.
KASIGLUK		Enter lease with the Kasigluk Corporation for the construction of a duplex containing a (1) BR unit and (2) BR unit.	Descision needed immediately so that corporation could order materials

RESIDENTIAL TEACHER LEASE

BY THIS AGREEMENT made and entered into on this _____ day of _____, 19__, between the LOWER KUSKOKWIM SCHOOL DISTRICT, herein referred to as the Lessor, and _____, herein referred to as Lessee, Lessor leases to the undersigned Lessee, subject to the terms and conditions enumerated herein, the premises located in _____, State of Alaska, and more particularly described as follows:

together with all appurtenances, for one year, to commend on the ____ day of _____, 19__, and to continue until the ____ day of _____, 19__. Upon written application this lease may be extended consistent with District and Advisory School Board housing regulations.

The particular terms and conditions of this lease are as follows:

1. RENT - Lessee agrees to pay the Lessor as rent for the leased premises the sum of _____ Dollars per annum. Lessee agrees to pay by means of payroll deduction in equal installments

to start with the _____ paycheck.

2. LEASE TERMINATION - If Lessee should at any time be dismissed from the service of Lessor, be transferred to another site during the term of this lease, be non-retained, or voluntarily quit the service of Lessor, Lessor shall have the right to terminate this lease and reenter upon, and take possession of, said premises upon ten (10) days written notice to vacate said premises, either given to the Lessee in person, by leaving a copy of such notice upon the premises, or by mailing a copy to the Lessee at the address for the premises, or at such other address provided by Lessee in writing to Lessor.

   Upon such termination of the lease, subject to the other provisions of this lease relating to damage, and reports, Lessee shall only be liable for the rent to the date of the termination of the lease, and if rent has been collected beyond that date, it shall be refunded to the Lessee, provided he/she vacates said premises according to the written notice.

3. SECURITY FOR DAMAGE - Lessor may deduct from Lessee's final paycheck up to $300.00 or the

actual cost of replacement or repair, whichever is higher, where damages to the premises result from the following:

a. Failure by the Lessee during the tenancy to maintain the premises, or failure after the termination of the tenancy to leave the in as clean and orderly condition as when he/she found it, normal wear and tear excepted.

b. Failure of the Lessee to dispose from the leased premises of all ashes, rubbish, garbage and other waste in an appropriate manner.

c. Failure of the Lessee to keep all plumbing fixtures on the leased premises as clean as their condition reasonably permits.

d. Abuse by the Lessee of any electrical, plumbing, sanitary, heating, ventilating, kitchen and other facilities and appliances so as to damage same.

e. Deliberate or negligent destruction, defacement, damage, impairment, removal or alteration, without the consent of the Lessor, of any part of the premises by the Lessee.

f. Damage by pets.

Where Lessee is scheduled to leave the premises after a period of occupancy, but his/her final paycheck is issued in May or June, Lessor may deduct $300.00

as security deposit from the last of the payments he or she is to receive under his or her contract. Lessor will inspect the premises at Lessee's departure for damage listed above which may signal the right to retain an appropriate part of the deposit. As used herein, the term "Lessee" shall include not only the individual or individuals signing this lease agreement, but also all children relatives, agents, guests, and others who are either under the control of the undersigned Lessee or who are knowingly permitted by the undersigned Lessee to engage in any of the actions or failures to act described in this paragraph, or who are present on the premises under Lessee's actual or implied consent. However, where Lessee accomodates Lessor by allowing school district employees, job applicants, or other guests or invitees shelter at the premises, the Lessee shall not be responsible for any damage caused by such school district guests or invitees.

4. ALTERATIONS AND IMPROVEMENTS - Lessee shall make no alterations to the buildings and appurtenances on the leased premises or construct any building or make other improvements on the leased premises without the prior, written consent of the Lessor. All alterations,

changes and improvements built, constructed or placed on the leased premises by the Lessee, with the exception of fixtures, improvements and/or amenities removable without structural damage to the premises and movable personal property, shall, unless otherwise provided by another written agreement between Lessor and Lessee, become the property of the Lessor, at no cost to Lessor, and remain on the leased premises at the termination of the lease.

5. DESTRUCTION OF PREMISES - In the event that the leased premises, or any part thereof, shall be rendered untenantable by fire, snow, storm or other casualty or deterioration not the fault of the Lessee, this lease agreement at the option of the Lessor, may terminate for that part of the premises rendered untenantable. Thereupon, Lessor shall where possible place Lessee in suitable alternate housing including any time while repairing the premises. If the premises are rendered untenantable by any action or omission of the Lessee, Lessee's obligation to pay rent shall continue. However, Lessor shall, where available, place Lessee in suitable alternate housing. In lieu of terminating this lease in whole or in part because all or part of the premises are rendered untenantable by

fire, snow, storm or other casualty or deterioration, Lessor may, at its option, but without prejudice to its other remedies, repair the premises to a tenantable condition and maintain this lease in effect, though the rent shall be diminished in proportion to the fraction of the premises which are temporarily untenantable, or for the period of time when the entire premises are untenantable.

6. UTILITIES - Lessor will pay for water, sewer, gas or other fuel, and electricity required on the premises except that utilities shall not be provided during the summer months if provision of such utilities is dependent upon the operation of the school plant or the employment of persons normally on vacation.

7. STATUTES, ORDINANCES, ETC. - Lessee shall comply with all applicable statutes, ordinances, rules, orders, regulations and requirements of Federal, State and local governments relating to the premises.

8. EMERGENCY REPAIRS - In the event of sudden damage or leaking of the roof, breaking or cracking of windows or doors, bursting or leaking of water pipes, or water heaters or any other sudden emergency which renders the leased premises or its contents or occupants liable to imminent harm or other damage or

destruction, Lessee shall promptly make all repairs, reasonably necessary and possible to prevent future damage, destruction or injury to the leased premises, contents therein or occupants thereof.

However, where Lessee is not competent by dint of lack of experience, training, proper equipment, or physical ability, Lessee is required to do only what he or she reasonably can to retard damage to the premises. Once done, Lessor is responsible to provide suitable competent persons and necessary material and equipment at the earliest possible time to reconstruct the damaged premises, providing the damage has not rendered the premises untenantable. (See Paragraph 5).

In the event that said sudden, emergency damage was not the responsibility of the Lessee, Lessee may submit to Lessor receipts, invoices and other documents evidencing cost of materials used by Lessee in said repairs, and Lessor will reimburse Lessee at the actual cost to Lessee.

9. USE OF PREMISES - Lessee agrees that the leased premises are to be used primarily for residential purposes and incidentally for

4773

activity related to Lessee's performance of his/her employment obligations with Lessor. Lessee may not use the premises as a retail or wholesale location for goods and/or services. However, nothing here is intended to limit Lessee's conduct of hobbies or othr activities which do not result in abusive use of the premises.

10. APPLICATION OF LEASE - This lease applies regardless of whether the leased premises are owned by the Lessor or leased by the Lessor from other entities.

11. CONDITION OF PREMISES AND FURNISHINGS - Lessee hereby acknowledges receipt and acceptance of the leased premises with the particular items of furniture and appliances contained therein. Lessee further acknowledges that he/she has examined the premises and said furniture and applicances and that he/she finds the premises and said furniture and a plicances in good order and co dition except as noted on attached Appendix "A". At the termination of this lease, Lessee will yield to Lessor the premises and all such furniture and appliances in as good order and condition as at the date of this lease, ordinary wear and tear expected, and

extraordinary loss due to fire, storm and other causes beyond the Lessee's control excepted. Lessee shall neither remove nor permit to be removed any of said furniture or appliances from the leased premises, not permit any part of said furniture or appliances to be exposed to the weather.

At the termination of the lease and any renewals thereof, the Lessor shall indicate in writing on Exhibit "A" its acceptance or rejection of Lessee's representation that furniture and applicances are returned in as good order and condition as at the date of this lease, ordinary wear and tear excepted and extraordinary loss due to fire, storm, and other causes beyond the Lessee's control excepted. Any rejection of that representation will be fully explained thereon.

12. INSURANCE - Lessee may, at his or her option, maintain fire, hazard, theft or other insurance on Lessee's personal belongings kept in or upon the leased premises. Lessor shall not act as insuror of Lessee's personal property kept in or upon the leased premises. However, if loss of Lessee's goods is due to negligence of Lessor either in its duty to provide a safe and habitable

4771

dwelling or as a result of acts of commission or omission of its agents, employees, guests, or invitees, Lessee excepted, Lessor shall be responsible.

13. ACCESS - The Lessee shall not unreasonably withhold consent to the Lessor or its agents to enter into or upon the leased premises at reasonable times and in a reasonable unobtrusive manner in order to inspect the premises, make necessary or agreed repairs, alterations, or improvements, supply necessary or agreed services, or exhibit the leased premises to prospective or actual purchasers, mortgagees, tenants, workmen or contractors.

Except in case of emergency, or unless it is impractical to do so, the Lessor shall give the Lessee at least twenty-four (24) hours advance notice of its intent to enter into the premises.

The Lessor or its agents may enter into the leased premises without the consent of the Lessee in case of emergency.

14. EXTENDED ABSENCE - The Lessee shall notify the local unit administrator of any anticipated, extended absence by the Lessee from the premises

in excess of seven (7) days. Said notice shall be in writing delivered prior to the beginning of the absence.

15. CONDEMNATION - If the leased property, or any part thereof, is taken by eminent domain, this lease shall expire on the date when the leased premises shall be so taken, and the rent shall be apportioned as of tnat date. No part of any condemnation award shall belong to the Lessee.

16. JOINT AND SEVERAL OBLIGATION - If more than one person is the Lessee of the premises, or if more than one person occupies the leased premises even though not all occupants have signed this lease, the undersigned Lessees shall be jointly and severally liable for all damages and rent unless a defaulting occupant is an employee of Lessor in which case the non defaulting tenant shall be responsible only for his/her proportionate part of the rent and only for damages he/she actually caused, or knowingly permitted.

17. NOTICE - All notices required to be given by Lessee to Lessor pursuant to this agreement or law, shall be delivered or mailed, postage prepaid, to the Lower Kuskokwim School District,

Attention: Superintendent, unless Lessor notifies Lessee in writing of another address to be used.

All notices required to be given by Lessor to Lessee may be delivered or mailed to Lessee at the leased premises described herein, and any such delivery or mailing to the Lessee at the leased premises shall constitute sufficient notice to the Lessee, unless Lessee has previously provided a written notice to the Lessor of a different address for Lessee's receipt of notice.

18. WAIVER - Neither the acceptance of rent nor any other act or omission of Lessor at any time or times after the happening of any event which would enable Lessor to cancel this lease or declare Lessee's interest hereunder forfeited, shall operate as a waiver of any past or future violation, breach or failure to keep or perform any covenant, agreement, term or condition hereof or to deprive Lessor of his/her right to cancel or terminate this lease at any time that cause for cancellation or termination may exist, or be construed so as to at any future time estop Lessor from promptly exercising any

any other option, right or remedy that it may have under any term or provision of this lease.

19. RENT REDUCTION - Units which will be occupied the following year by the Lessee but vacant during the summer months shall have the rental rate reduced by 33% during months or part thereof when the unit is not occupied by the Lessee. If not due to negligence on part of the Lessee a unit loses electricity, water, sewer or heat for more than ten (10) days in a calendar month the Lessee may petition the Housing Review Board for a 33% rent reduction for that month.

DATED this ____ day of _____, 19, __, at _____, Alaska.

LOWER KUSKOKWIM SCHOOL DISTRICT

LESSOR: LESSEE:

_____ _____

Newtok-Review of Housing Needs

Housing in Newtok is critical. The present staff of 2½ teachers lives in construction warehouses. These warehouses are less than the "C" class quality stipulated in the negotiated agreement. They are not "houses, apartments or trailers". Additional housing is urgently needed in Newtok.

At present, the local A.S.B., principal/teacher, and staff have submitted to Michael Franks a housing resolution. It calls for the building of one, two unit duplex, each unit having 2 bedrooms. A map has also been included indication the site location of said duplex.

However, many complications remain. On three separate occasions (inservice and 2 principal meetings) the Superintendent has expressed a possibility that there may not be money available to construct new housing as had been done in the 1981-1982 school year. He has also orally assured me that the seriousness of Newtok's housing starts.

Thus the dilemma. Our staff struggles living in the present housing. If we wait for new housing and it is not forthcoming we must remain in sub-standard housing. If we try to refurbish our existing housing and then do get new housing, the result is needless expenditure of limited enterprise fund monies.

Any refurbishing or maintenance will be quite expensive. Jim Strohmer's shelter needs the following:

a) since it is sinking it must be raised above ground level
b) level the floor
c) put in cupboards and other storage areas (shelves)
d) interior walls and floors need to be sealed
e) interior painting
f) running water
g) proper electrical wiring-at present all wiring is exposed and fixtures are "naked"
h) additional heating units
i) improved sanitation-presently using a honey bucket without ventilation
j) improved ventilation-presently there is only one small window in the shelter
k) addition of floor coverings
l) addition of another entrance-at present there is only one entrance/exit
m) improved kitchen facilities
n) leaky roof needs repair

Terry and Barbara McCarthy's shelter needs:

a) interior painting
b) linoleum
c) repairs on front door closurers
d) addition of another entrance
e) honey bucket ventilation
f) running water
g) 2 closets plus additional storage shelving
h) cupboards
i) firewall around cook stove

Continued

j) repair of porch and roof leaks
k) checkout of electrical wiring in overhead florescent lights.

It has been abvious to all that have viewed our housing that we need assistance in Newtok. We hope that others would concur and the end result would be construct of the teacher duplex our community desires.

Resprectfully Yours,

Terrence McCarthy

FISCAL NOTE

THE LEGISLATURE OF THE STATE OF ALASKA
THIRTEENTH LEGISLATURE
BILL/RESOLUTION NO: HB 216
TITLE: "An Act relating to labor relations between school boards."
AGENCY AFFECTED: Department of Labor
Page 2

Under this bill the Department of Labor will act as the Labor Relations Agency for all school districts and be responsible for investigation of representation petitions; determination of appropriate units for collective bargaining purposes; investigation of unfair labor practices charges; monitoring elections; and holding representation and unfair labor practices hearings.

Two investigators (located in Anchorage) are required to conduct the investigations, monitor the elections, and hold informal hearings. One clerical position will be required to provide support to the investigators.

In addition to the costs associated with the two Wage and Hour Investigators and one clerical support position are costs to contract for a hearing officer on 26 occasions ($20,700) and court reporting services including transcripts ($11,300), plus printing ($5,000) and legal costs ($12,000). A total of $10,296 has been included in travel for the hearing officer's transportation and per diem (12 trips of 4 days each) = [$513 + ($85) 4] 12 = $10,296.

Of these costs, only the equipment costs of $4,800 are one-time items.

For Fiscal Year 1985 a variable inflation rate, by line item (average 3.5 percent), is used and in Fiscal Year 1986 through Fiscal Year 1989 a 6 percent inflation rate is used.

Please note Fiscal Year 1987 has an anticipated reduction of one investigator and three months of the clerical support position. After two years this labor relations activity is expected to stabilize.

JUSTIFICATION

This position will conduct investigations and informal hearings of unfair labor practices complaints filed with this agency. The position will be responsible for monitoring school district representation elections and assisting school districts in complying with state and federal labor relation laws. The investigator will travel extensively throughout the state performing these investigations, hearings, and monitoring functions.

Personal Services calculations are based on the current salary schedule plus five percent inflation.

Travel funds allow for 12 (4-day) trips costing an average of $518 for transportation and per diem of $340.

Contractual Services costs are comprised of telephone charges, equipment rent, management services support of $4,483 and $3,600 for space rent.

The equipment costs for a desk, file, partitions, and bookcase are one-time charges.

Staff Report
HB 217 relating to Prison Facilities
Dave Palmer
April 18, 1983

HB 217 mandates that after July 1, 1983, all newly maximum security prisons be constructed in the vicinity of Seward.

The position paper from Department of Health and Social Services adamantly opposes the bill, and requests that the decision on correctional facility locations be based on criminal justice criteria.

The fiscal note is zero based on lack of information.

Next referral is to Judiciary Committee

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

House Bill No. 217

"An Act relating to the establishment of prison facilities."

House Bill No. 217 modifies AS 33.30.020 by making that section subject to the provisions of AS 33.30.025 which is entitled Location of Facilities. AS 33.30.025 requires that after July 1, 1983, the Commissioner shall locate all newly constructed maximum security prison facilities within the vicinity of Seward.

The Department of Health and Social Services and the Division of Adult Corrections totally opposes the concept of predetermined building sites for prison facilities. It is imperative that such decisions be made by professional correctional practitioners and based on sound criminal justice criteria for site location to ensure that the prison facilities meet standards for programming, security, and safety.

V. ANALYSIS

No specific additional costs can be identified related to the requirement to locate all newly constructed maximum security prison facilities within the vicinity of Seward.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

House Bill No. 275

"An Act relating to the establishment of prison factilities."

House Bill No. 275 modifies AS 33.30.020 by making that section subject to the provisions cf AS 33.30.025 which is entitled Location of Facilities. AS 33.30.025 requires that after July 1, 1983, the Commissioner shall locate all newly constructed maximum security prison facilities within the vicinity of Palmer, Wasilla, and Sutton.

The Department of Health and Social Services and the Division of Adult Corrections totally opposes the concept of predetermined building sites for prison facilities. It is imperative that such decisions be made by professional correctional practitioners and based on sound criminal justice criteria for site location to ensure that the prison facilities meet standards for programming, security, and safety.

HESS

Dear Mae,

HB 217 establishes a maximum security facility in Seward and is presently sitting with House HESS. This bill, of which I am the original sponsor, is one of my top priorities for the session.

Mae, I respectfully request the committee's consideration of HB 217 at the earliest possible date. Naturally, my office will be most cooperative in providing you with back-up material.

Thank you.

Best regards,

OK

Roger Endell
Director Division of Corrections
Alaska Department of Health & Social Services
2200 East 42nd Avenue
Anchorage, Alaska 99508

Dear Mr. Endell:

As you know the City of Seward has invited the State of Alaska to seriously consider placing a Long Term Correctional Facility on its Spring Creek area property. The purpose of this report is to present the assets of Seward and the Spring Creek Site for such a facility. If you concur with this assessment the City of Seward will hold a public hearing to verify local support for the placement of this facility in Seward.

At this time and after examining the project impacts from all sides I feel Seward has a positive attitude towards this facility and will accept it and welcome the associated employees and their families.

While Seward is offering free land for this facility we also recognize that there are several options available to use in construction. One method we feel would benefit the state is for Seward to build the facility, with state appropriated funds, and then lease it back to the state for $1.00 a year. Seward has management capability for a project this size. We feel we could bring it "on line" sooner and cheaper to the state than by using the existing state process.

Seward is a full service community with good multi-modal transportation access that is offering a compatable safe and secure Long Term Correctional Facility site. We urge you to give serious consideration to our offer and this assessment report.

Should you have any questions or need additional information please let me know.

Sincerely,

Ron Garzini
Seward City Manager

PURPOSE OF REPORT

The State of Alaska is seeking a site for a long term correctional facility.

The City of Seward has proposed a site within its boundaries. The 100 acres is located across Resurrection Bay approximately eight miles from the center of Seward. The site is publicly owned and would be provided to the State at no cost.

The purpose of this report is to assess the suitability of the site and the community as a location for a correctional facility of this type. Often times a large public facility project such as this long term correctional facility only includes the immediate facility funding as part of the project. This often necessitates a second level of funding to complete the support services necessary for it to function as it was intended. This assessment attemts to address the availability and suitability of those support facilities and services.

It lists all the major community facilities and support services found in the service area. This information was obtained by an on site examination and through interviews with the facility/service managers or directors.

Location of a long term correctional facility in Seward will create certain impacts. These will be both positive and negative depending on a particular point of view. For example, the local labor force will change - employment in construction and support services will increase. About 300 jobs will be created. This may also bring pressure for higher wages.

School enrollment will increase, while downtown parking space will be harder to find. Additional medical facilities may become available as will retail stores. More traffic will appear on the streets and delivery of some service may decrease as costs increase.

During the collection of data for this report it was recognized that the placement of any correctional facility should consider the impact

of that facility and all its support requirements on that area in which it is to be located. This means that not only the States concern for inmate security and other requirements must be met, but those of the employees, their families, inmate families and community acceptance must also be considered.

One factor that cannot be assessed in a report of this nature is community attitiude. That will occur at a later date through public comment period and action by the City Council.

ORGANIZATION OF REPORT

The report is organized in two major sections to recognize the direct requirements for facility construction as well as the requirement for the supporting facilities and services.

- Site Assessment - address site requirements and characteristics.

- Community Assessment - address the facilities and services in the community necessary to support the correction facility.

These two sections are preceded by a summary and followed by a list of acknowledgements.

FINDINGS
AND
SUMMARY
OF
ASSESSMENT

The City of Seward has selected a site for consideration by the State of Alaska for the placement of a long term correctional facility. The site is within the Seward City limits and there are over 100 acres of available public and vacant land at the site.

The following are summary statements relative to the Seward area and the Spring Creek area suggested for placement of the State Long Term Correctional facility:

Site Assets

- Well drained - level - partially cleared having good construction and foundation material.

- Remote yet accessable and within a City offering a full range of community services.

- Meets all state locational requirements for SIZE - ACCESSABILITY - NO ENCUMBRANCES - SERVICE AVAILABILITY.

- Land available at no cost.

- Required acreage for facility, expansion, buffers and support services.

- Compatible use with assurance of continued compatibility and non outside encroachments.

- Only minimum changes in land use plans and zoning would be needed.

- Site assessment/feasibility work completed with adjacent Industrial Park assessment.

- Utilities readily available to the site.

- Utility costs could be shared with existing industrial uses.

Community Assets

- Within a fully serviced community.

- No additional community capital expense for correctional impact.

- City has expansion capability with minimum or no impact in:
  - Fire and Police Protection
  - Sewer and Water Service
  - Schools
  - Electrical Service
  - Transportation
  - Employment
  - Recreation
  - Communication
  - Land Availability

- Available services reduce need for inmate transport to other areas.

- Visitor, legal support housing capabilities exist.

- Secure location with ease of security enforcement.

- Choice of rural or urban living environment for employees and families.

- Existing in place emergency and backup support provided by Seward services.

- Retail and speciality services in place and available for use by the correctional facility employees and their families.

- Long distance employee commuting will not be necessary. Will add to security.

- In place Vocational Technical Center for inmate and employee use/education: Will be asset to prison industries.

- Counseling service; Seward Life Action Council (SLAC).

- Hospital and medical and emergency services in place and available for inmates and employees.

- Court system - easily expanded to Superior Court level.

- Support security via United States Coast Guard and Alaska Fish and Game patrol vessel.

- Regional library.

- Reduced total costs as site has access and is ready for construction thus saving time and reducing loss to inflation.

- Use of port will provide long term savings in operation costs. Direct shipment of operational supplies and heating fuel in bulk quantity.

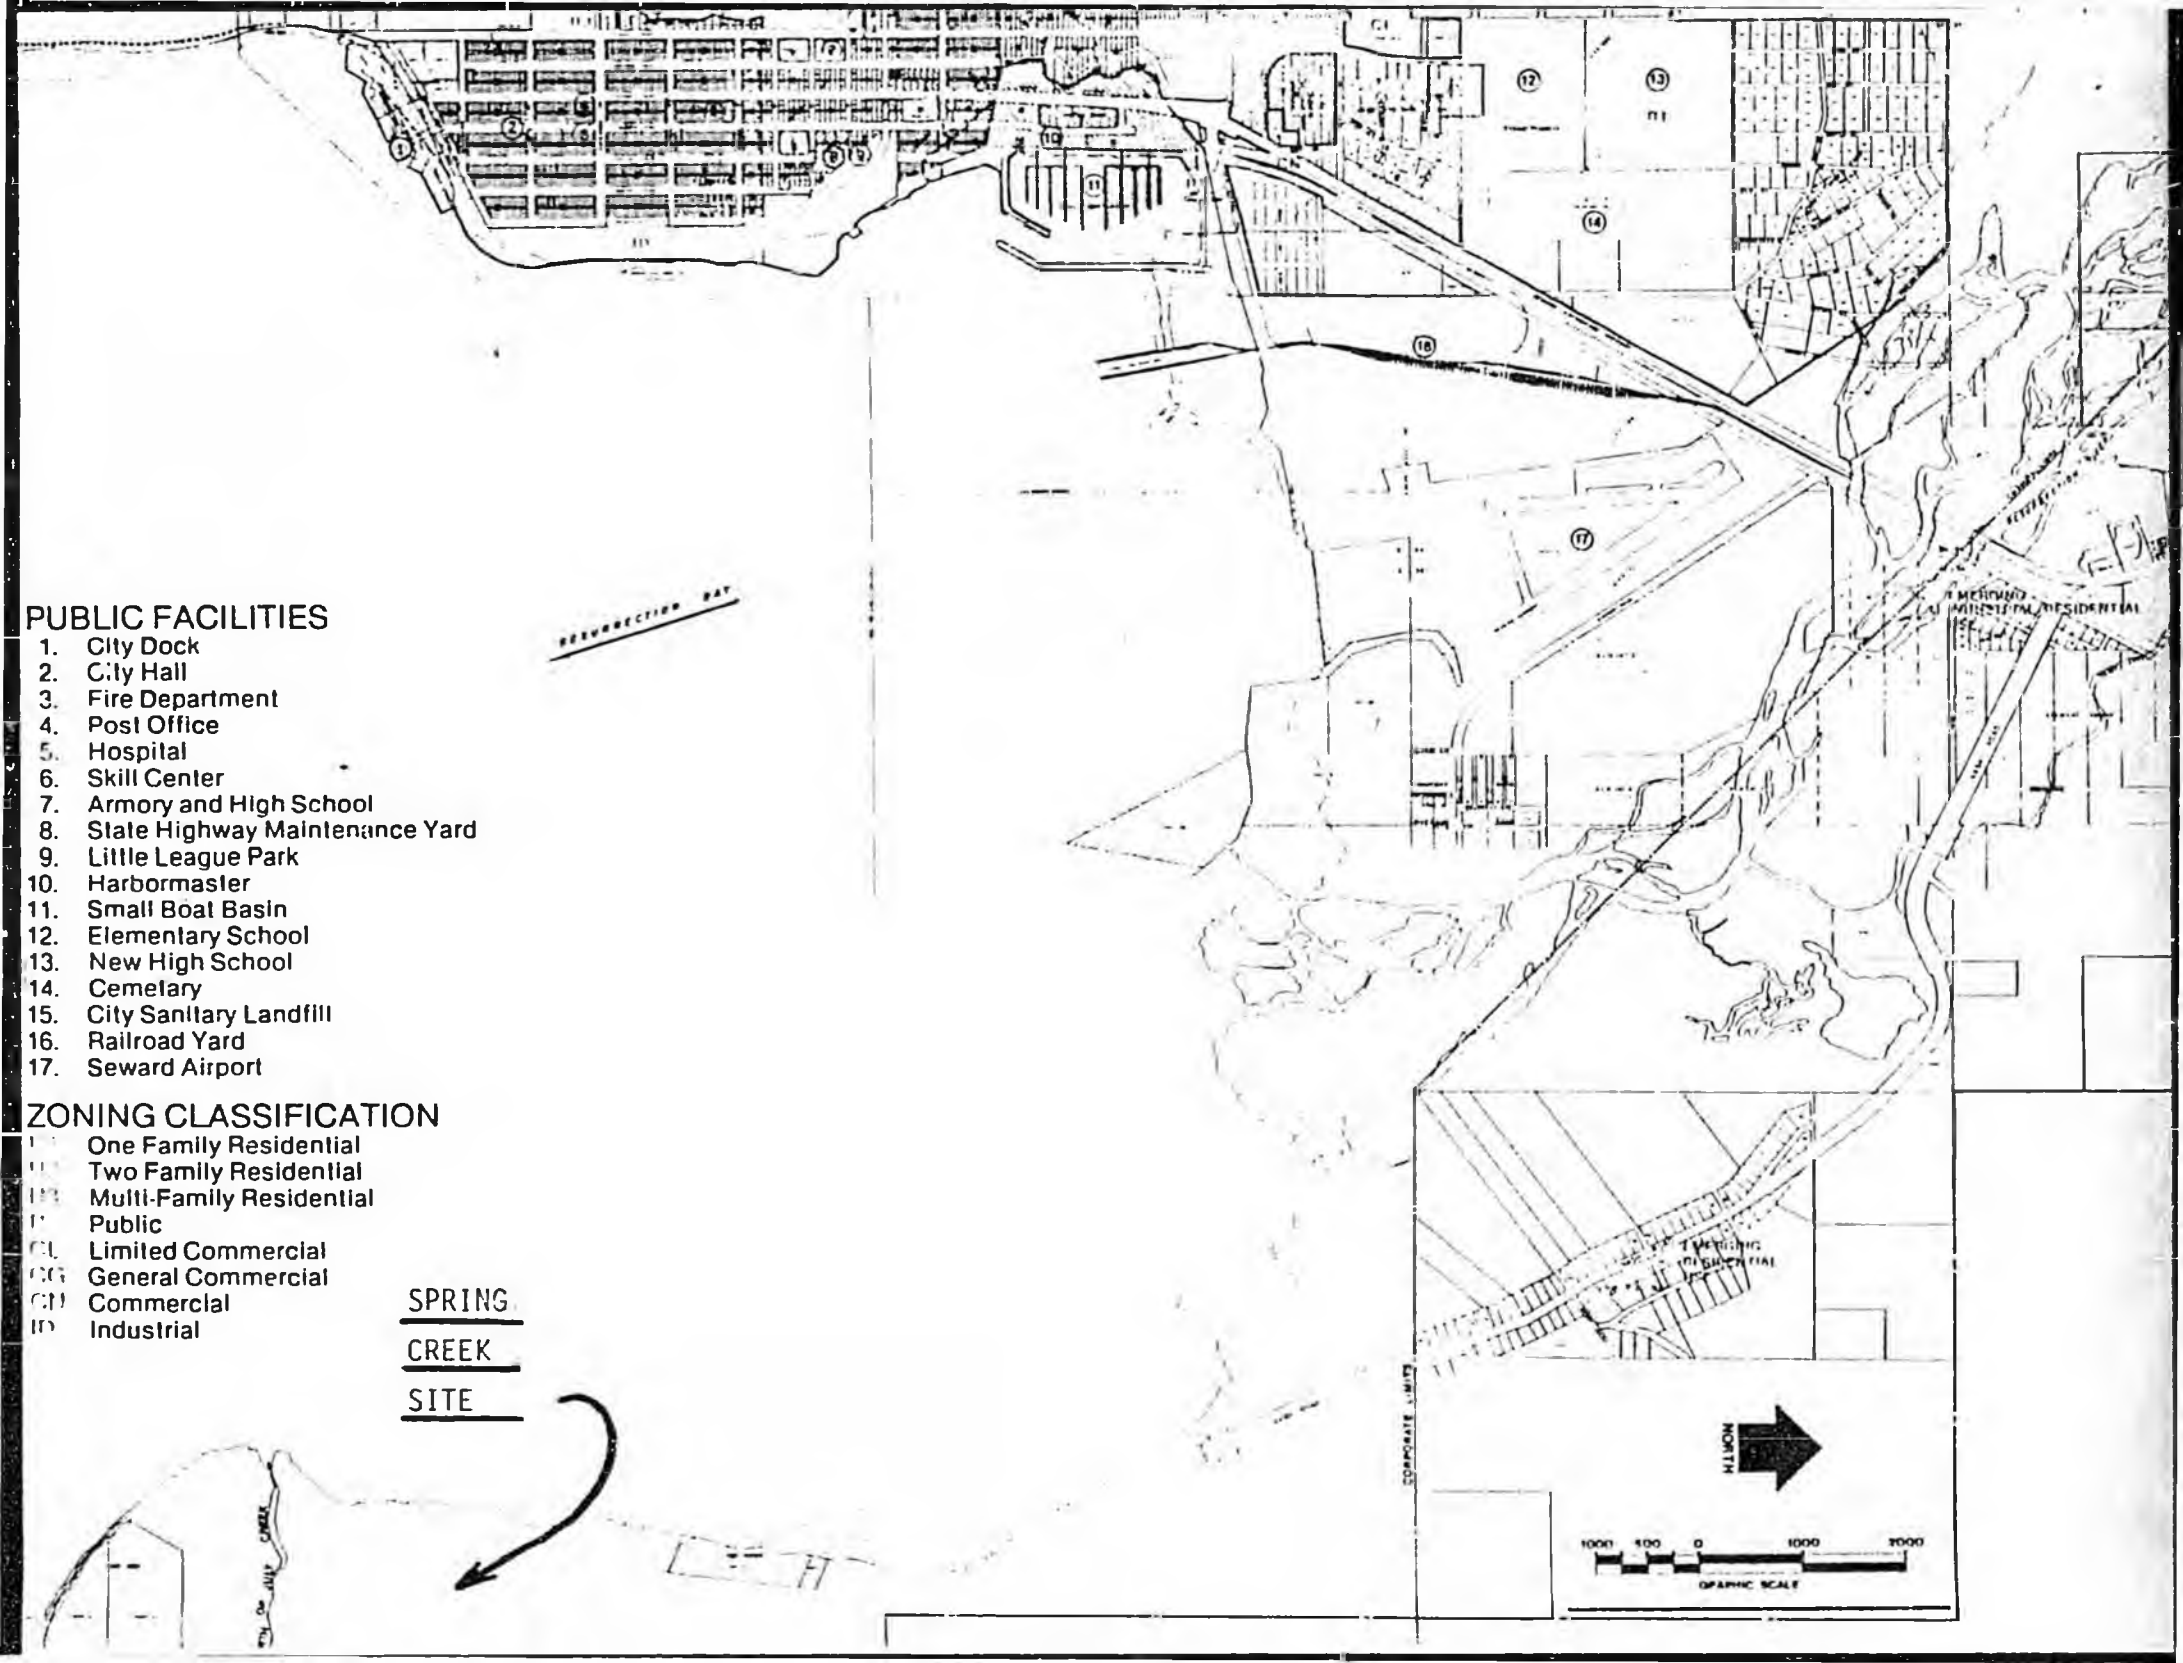
- Use of port will provide savings in costs for Prison Industries materials.

SITE REQUIREMENTS AND SUITABILITY

SITE CHARACTERISTICS

The suggested location for this Alaska Long Term Correctional Facility is at the Spring Creek area adjacent to the Fourth of July Creek and the Seward Marine Industrial Center. It is approximately eight miles by paved road from Seward's town center to the site, but only three miles across Resurrection Bay.

The size of the site is approximately 100 acres. It is rectangular in shape and all areas would be adequate for location of a large facility. The land is in public ownership and is surrounded by other land owned by the U.S. Forrest Service. Some private land borders the site nearest the Seward Marine Industrial Center. This area is well buffered by trees and does not create any land use conflicts.



The site is level and well drained. On one side, however, there is a small hill that, if included within the 40 plus acre selection, would make an ideal observation area. Surrounding land uses are vacant/forest. The only development in the area is the Seward Marine Industrial Center.

SITE/LOCATION REQUIREMENTS

The following is a discussion of the assumed site/location requirements desired by the State of Alaska in placement of Long Term Correctional Facility.

Regional Location: To meet American Correctional Association Standard 4147 for Adult Correctioanl Institutions, the South Central Regional Long Term Facility should be located within 50 miles of a civilian population center of at least 10,000 people, to accommodate access to the courts, a hospital and public transportation.

If this requirement were to be met in Alaska, all prisons would be in the Anchorage, Fairbanks and Juneau areas. Obviously, the population requirement does not strictly apply to Alaska. However, other criteria should be met. This criteria is access to courts, hospitals, public transportation, etc. All of these criteria are now met or will soon be available, as incidental services to the proposed correctional site in Seward.

PUBLIC FACILITIES

1. City Dock
2. City Hall
3. Fire Department
4. Post Office
5. Hospital
6. Skill Center
7. Armory and High School
8. State Highway Maintenance Yard
9. Little League Park
10. Harbormaster
11. Small Boat Basin
12. Elementary School
13. New High School
14. Cemetary
15. City Sanitary Landfill
16. Railroad Yard
17. Seward Airport

ZONING CLASSIFICATION

- One Family Residential
- Two Family Residential
- Multi-Family Residential
- Public
- Limited Commercial
- General Commercial
- Commercial
- Industrial

Site Availability: The site should be owned by the State of Alaska or available without cost and should not be committed to an incompatible land use. Designated public parks, recreational areas, wildlife preserves and other uses that are not fully compatible should be avoided if possible.

The suggested Seward site has over 100 acres of public owned land. The area is within an identified industrial development park. Land uses are compatible. There is no other development in the area.

A full range of support services are available to the site. It is secluded yet accessible and, because of surrounding land use and ownership patterns, will not become an incompatible use in the future.

Site Size: A site of from 30 to 75 acres, unencumbered by leases, easements or rights-of-way is desirable in order to allow flexibility in site planning and an additional buffer.

The suggested site has over 100 acres of level easily developable land. Buffers exist in the form of natural features and land ownership patterns. Sufficient acreage exists to allow for facility support and expansion purposes. There are no easements, rights-of-way or other encumbrances on this site.

Physical Site Characteristics: The development site should have a topographic slope of less than 20 per cent; it should not be within a designated 100 year or 500 year flood plain, or other area seasonally flooded by lake, pond or stream; and it should have well drained soils that are generally suitable for construction and on-site development of sewage disposal facilities.

The suggested site is level, well drained and partially cleared, thus facilitating easy development. Activity associated with the Seward Marine Industrial Center altered the natural flow of the Fourth of July Creek, thus removing this area from the 100 and 500 year flood plains. The soils are well drained and are considered to be excellent for construction and foundation purposes. Disposal of wastewater and general soils conditions are discussed elsewhere in this report.

Site Accessibility: The site must be accessible by an existing public road or be within two miles of a public road with reasonable assurance that access to the site can be obtained.

An existing paved road now provides access to within one mile of the site. The final mile of road accessing the site is a gravel road suitable for construction needs.
