Utilities are available or could be easily developed.

SITE SUITABILITY

The suggested Seward Spring Creek Correctional Facility location is in an ideal place for such a facility. The site itself also has many attributes as a building site. These features can be listed as:

- Within a fully serviced community.
- Not generally visible or having a high public profile.
- Ample land for buffers, support services and expansion
- Level, good soils, partially cleared and ready for construction.
- Access, utilities, and service available to the site.
- Multi-modal access.
- No, or few, community support facility expenses.
- Proximity to Port facilities reduce construction and supply costs.
- Remote, for security purposes, location with easily implemented security measures.

COMMUNITY ASSETS

- Proximity to all support service thus reducing need to transport inmates.

- Community service capability to meet impact with minimum disruption.

These and other benefits mean not only short term immediate saving to the state, but long term savings in operational costs and social disruption.

GENERAL SETTING

Seward, located on Resurrection Bay, is Alaska's only natural ice-free, deep-water port with year round rail, highway and road service. It is approximately 120 miles by highway from Anchorage, 114 by rail and 35 minutes by air. It has well maintained docks, complete marine services, dockside rail facilities and community support services.

Founded in 1903, Seward has more of a planned townsite and appears more "orderly" than most of the small towns in Alaska. Most streets are paved and have sidewalks. Most of the businesses are located in a downtown area. These include grocery, hardware, drug store, men and family clothing department stores, fabric and gift shops, beauty salons, barber shop, restaurants, hotels, offices, etc. The post office, library, hospital and ferry terminal are all within easy walking distance of the town center.

The population of Seward is approximately 1850 with another 1600 persons living within the area of trade influence. Employment for this population is concentrated in the following sectors or employers:

- Alaska Railroad
- Port of Seward
- Fishing
- Logging
- Government and Service

At present, 18% of the workforce is unemployed.

Two new schools were constructed in the 1970's. They serve all students in grades K through 12 in Seward and high school students from Moose Pass and Cooper Landing. The new high school includes a gymnasium and swimming pool, widely used by the community schools program and local swimmers.

Many clubs and recreational opportunities are available for any interest from bird watching to sailing to baseball, skiing, bowling and basketball.

Seward is a home rule city with an elected Mayor and Council and a hired City Manager. Seward provides electricity, sewer, water, garbage pickup and several T.V. stations via satellite for a nominal rate.

There is a 1% City sales tax and a 2% borough sales tax. The City property tax rate is 5 mills. The borough assesses 2.5 mills The Cities bonded indebtedness is only 4.62% of assessed valuation.

For the past several years the City has concentrated in the development and construction of an industrial center combining harbor, ship lift and marine industrial development.

The University of Alaska has a facility in Seward in the Institute of Marine Science research. These facilities add to the cultural and educational opportunities to a degree unusual in such a small city.

Two traditional summer events drawing hundreds of visitors to Seward are the 4th of July Mt. Marathon race and the 10 day Silver Salmon derby in August. Boating and sailing enthusiasts whose boats are moored in Seward small boat harbor converge on Seward every weekend during the summer. The Seward small boat harbor has 550 slips and plans call for an additional 1000 slips in the near future.

Thus, Seward is a complete community with a full range of community facilities and services.

These facilities and services are discussed in detail below.

PUBLIC SAFETY / HEALTH

Police

The Seward Police Department consists of nine full time employees with three auxiliary members.

Four State Troopers also serve the area from Seward to Hope. This lineal positioning would be a benefit for road security/blockade purposes in the event of inmate escape. The Seward jail can house 14 prisoners in 6 cells, 5 in a dormitory type cell and 8 in maximum security cells equipped with electric doors. There are two separate

cells for women and juveniles. The City of Seward employs six jailers, all trained at Federal and State competency levels. This facility is equipped with T.V. monitors, freezers, micro wave oven, and feeds prisoners with food prepared at the Seward General Hospital.

A full range of emergency and communication equipment is in place. This includes radio communication, compatability with the Alaska Railroad, State Troopers and U.S. Coast Guard. There is a fully equipped police boat and the Alaska Department of Fish and Game also has a new boat that could, if needed, also provide security patrol assistance in Resurrection Bay.

Fire Protection

The City of Seward has a Fire Class rating of 5. Service is provided by 31 volunteers and a full time chief. Presently, two pumper trucks are the major equipment items. Funding requests for a new bay and ladder truck have been submitted to the legislature.

Another fire service district area is located at Bear Creek just outside Seward. An existing agreement between the City and Bear Creek station calls for back up service in case of extreme emergencies.

In relation to the proposed long term correctional facility it is approximately 8 miles to both the Bear Creek and Seward fire stations. The response time from both of these stations to the site is 13 minutes.

The suggested site is also less than one mile from the existing Seward Marine Industrial Center. This center will have its own (additional to that of the City and Bear Creek) fire protection facility consisting of a building and support trucks and equipment. It is scheduled for completion in 1985. It will be manned on a volunteer basis by the Marine Center employees and the other Seward volunteers.

By utilizing this facility and proper planning, the correctional facility fire protection service costs can be reduced greatly. With the City's current fire rating and in place wells, mains and

water system it will be able to accept the growth of correctional employees, their families and secondary growth without a reduction in their Class 5 rating or additional capital facilities expenses.

Seward Life Action Council

The Seward Life Action Council (SLAC) is a non-profit corporation formed to provide quality community based mental health, alcoholism, drug abuse and general counseling services to residents of Seward and the surrounding area. SLAC is governed by a Board of Directors comprised of people from the community.

Funding for SLAC is provided through grants from the State Office of Alcoholism and Drug Abuse and Division of Mental Health and Development Disabilities and by support from the City of Seward and other local contributions.

SLAC personnel consists of qualified professionals in the fields of mental health and substance abuse. A full-time licensed Ph.D. Psychologist and certified masters level Chemical Dependancy Therapist offer a comprehensive approach in a variety of treatment modalities. A community outreach worker conducts prevention and education programs and coordinates special community projects. These qualifications make their services eligible for insurance coverage by some firms.

SLAC maintain regular office hours Monday through Friday, except authorized holidays. An on-call counselor is available 24 hours a day seven days per week.

Fee for services are assessed on a sliding scale based on the ability to pay. Services are never denied due to inability to pay. In addition to providing service for state correctional employee families, it is anticipated that this service could also contract with the state to provide inmate counseling.

SLAC owns its facility and could accomodate additional staff with only minimum modifications. In fact, the current organizational structure and SLAC administration is set up to expand its staff with no interruption of service.

Seward Hospital

The Seward General Hospital is a general acute care hospital providing all general services; general surgery, internal medicine, cardiology, orthopedic surgery, radiology and pathology through the addition of visiting specialist physicians. Current occupancy is about 14%. The following, in part, was taken from the state DOT/PF Inventory and Conditions Survey reports.

Seward General Hospital is a 31-bed acute care center constructed in 1955. Currently it serves a population of about 3,500 in Seward and the surrounding area, but the community is now experiencing substantial population growth. The hospital is centrally located in Seward, adjacent to a nursing home and a doctors' clinic.

With only minor modifications for room security purposes, the Seward Hospital could be used to provide major medical service to the correctional inmates.

Court System

Seward is now served by a Magistrate who is also fully qualified and has on occasion served as District Court Judge.

The present court room has space for approxiamtely 50 spectators and prospective jurors. It has a jury room, washroom facilities, attorneys work rooms and judges chambers. This facility is located in the existing City Hall where the City Police and jail are also located.

While these facilities are adequate for todays needs, continued growth in Seward and the Kenai Peninsula, coupled with a continued heavy court case load in Anchorage and elsewhere in southcentral Alaska, indicate that some upgrading will be needed.

It is anticipated that this will occur with or without a long term correctional facility being located in Seward. It is also anticipated that any court facility upgrading would be designed to accommodate correctional court needs thus enabling a sharing of facility uses and saving of capital and operating expense to the state.

Assuming upgrade work would occur within the existing facility, only the jury and security functions would need immediate alterations.

EDUCATION

Schools

The City of Seward elementary and high schools are part of the Kenai Peninsula Borough School District.

The high school, serving grades 9 - 12, was completed in the late 1970's and has a designed capacity of 300 students. It now serves approximately 160 students, leaving an expansion capacity of 140 students. These additional students could be absorbed with no change in the facility and only minor changes to service and office accomodations.

The elementary school serves grades K - 8 and has a designed capacity for 450 students. Approximately 300 students are now enrolled, leaving an expansion capacity of 150.

Based on an average size of three persons per household, approximately 300 additional families and their children could be absorbed into the existing school facilities now located in Seward.

Some of the facilities and services existing in these adjacent buildings include:

- Theater
- Swimming Pool
- Gymnasium
- Full Service Lunch Room
- Exercise Room
- Racquet Ball Court
- Outside Track, Soccer and Play area

An extensive Community Schools program is provided with an average of 12 courses being offered by the Kenai Peninsula Community College.

Day care facilities also exist in the community and it is assumed that additional services would be provided by the private sector as demand dictated.

Vocational Technical Center

The following is taken directly from the Alaska Vocational Technical Center catalog of 1983:

The Alaska Vocational Center is an adult post-secondary educational institution dedicated to offering quality vocational/technical education to residents throughout the State of Alaska.

Educational programs at AVTEC provide the student with sufficient occupational skills to both benefit from and contribute to the economic growth of Alaska. This may include the development of basic occupational skills and/or upgrading of present skills.

At AVTEC the comprehensive instruction, counseling, residential student services and job placement contribute to the students' development of acceptable attitudes, work habits and technical knowledge to enter the job market.

Programs are offered to Alaskans whose knowledge and skills are appropriate to the programs selected and who can benefit from them, regardless of educational, cultural, or economic background. The Alaska Vocational Technical Center offers students training and instruction to help them meet minimal competencies established for skill areas based upon an analysis of occupations for which they are being prepared. This effort is supported by extensive vocational counseling, testing, supporting learning resources and open-exit scheduling. The Center maintains flexible curricula and programs that may truly reflect and respond to the needs and demands of the Alaskan job market, and the people seeking a place in that market.

The current Vocational Departments and Center Services are:

VOCATIONAL DEPARMENTS
- Food Service
- Office Occupations
- Building Maintenance
- Mechanics
  - Heavy Equipment
  - Power Plant
  - Diesel Mechanics
  - Welding
  - Auto
- Oil Technology
- Forestry
- Emergency Medical Services
- Marine Navigation

STUDENT SERVICES
- Counseling
- Job Development

CENTER SERVICES
- Student Housing
- Family Housing
- Food Service Facility
- Library
- Medical
- Recreation

The vocational departments could be expanded to serve the long-term correctional facility without need of capital expenditures, except for specified tools or equipment associated with particular classes. The services would also be available for employees and their families.

The Port and Railroad also provide good access to raw materials needed to support a prison industries program, which in turn could be assisted by the Vocational Education Center.

Library

Seward has a large "regional center" library unique for a city this size. A private endowment has enhanced the facilities and services of the library. The library space was recently remodeled to accommodate the increased demands on its use. This library with its close proximity to the suggested correctional facility could provide service to that facility. It would also benefit its employees and their families.

TRANSPORTATION

Seward is the only community in the state with a deep year round ice-free port having road, railroad and air service transportation available to it. As such there are many options available that would make both the construction of a correctional facility and its operation very efficient.

The proximity of the correctional facility to the port would mean cheaper construction and operations in that:

- on site material storage is available,
- a reduction in handling and transfer of material would be realized,
- the short distance between area where material is received and construction site means less transportation costs,
- there would be less material handling as supplies - food, prison industries materials and heating oil could be purchased in bulk quantities with direct delivery.

The railroad offers yet another access alternative. The Alaska Railroad is now providing mixed use (freight and passenger) service, which could be used by the correctional facility. The establishment of daily coal trains to Seward and mixed use service will provide economical and secure transportation, when needed, between Seward, Anchorage and Fairbanks.

The surrounding terrain and only one road access add additional security means to deter escapes and facilitate capture in the event an escape should occur.

The following is a general presentation of the various transportation modes now serving Seward:

Highway

Seward is connected to Anchorage and Kenai via the Seward Highway. Anchorage is approximately 125 miles away and Soldotna, 95 miles. The Seward Highway is part of the Federal Aid Primary Road System with an estimated capacity of 14,000 vehicles per day. The annual daily traffic now averages 800 to 3,000 vehicles per day. The State of Alaska Six Year Capital Improvement Program lists numerous reconstruction projects for upgrading the Seward Highway to a 40-foot wide section consisting of two 12-foot traffic lanes and two 8-foot paved shoulders.

Bus transportation is available on a year round basis, with two lines operating in the summer. Bus service is provided by 15 and 45 passenger buses. All of the above haul freight into and out of Seward.

Railroad

Seward is the southern terminus of the federally owned Alaska Railroad. The railroad operates a break-bulk port which handles equipment, palletized material and other large items. The railroad reserve, 100 acres, can for the most part be considered an industrial area with shipping support facilities and storage areas. This could serve as a material staging area during constuction as well as a shipping center for the prison industry products.

At present the railroad has only chartered passenger service to Seward, but the advent of coal shipments scheduled for the fall of 1984 could permit a regular passenger service in conjunction with coal and regular freight trains.

Ports

Seward has several major docks: the Alaska Railroad dock (2-600 foot berths, 1-200 foot berth, 35 feet deep), the City dock (berth for 100 foot vessels, 13 feet deep) and the Fourth Avenue dock (berth for 400 foot vessels, 80 feet deep). The Alaska Railroad east berth has two cranes with capacity of 45 short tons and 105 foot radius reach.

The state ferry serves Homer, Seldovia and Kodiak on a regual basis and Valdez and Cordova on weekends in the summer. This could facilitate transfer of inmates and family visits from these communities.

Airport

Seward is served by a general aviation airport constructed and maintained by the Alaska Department of Transportation, Division of Aviation. There are two asphalt runways, the primary one is 4750 feet long and 100 feet wide while the secondary is 2300 feet long and 75 feet wide. A small asphalt apron exists just west of the secondary strip. No navigation or approach aids exist so

the airport is closed when conditions fall below those required by Visual Flight Rules operation. The addition of a microwave landing system, which is feasible, would permit instrument approach.

Charter air service is available with four aircraft of varying sizes which are available for medical evacuation, or other special transporation requirements.

UTILITIES & SERVICES

Electrical

Seward's electrical power is purchased from Chugach Electric via a tranmission line which generally parallels the Seward Highway. Seward owns three diesel generators with 5,500 KW capacity for emergency and peak load. The present mainline transformer has a capacity of 5,000 kW.

The capacity of the present system is adequate to meet current demands. A major upgrading of the power delivery system within the city was completed in the fall of 1979. These improvements included a new transformer and new feeder voltage regulators to increase capacity to 7500 KVA.

The City is currently negotiating a new ten year contract with Chugach Electric. In addition approximately 14 miles of transmission line outside of Seward have been identified to be upgraded for increased local (Seward) consumption. This upgraded line is needed by Seward, with or without the correctional facility.

At present a 69 KV line is available to the suggested prison site. This is more than enough power needed to serve both the prison and the Seward Marine Industrial Center. A substation is planned as part of the Industrial Center Complex. Thus, power would also be available at minimal cost to the correctional facility.

Ample power is presently available to the site to meet construction needs. Additional power sources will be available with the completion of the Bradley Lake Dam Hydroelectric project and delivery grid.

Water

Seward has an excellent water system with high volume capacity drawing from a combination of wells and surface supplies. Two high elevation storage tanks provide 600,000 gallons of water storage. The existing system has been expanded and improved under the guidance of a comprehensive water system plan developed in 1975. Additional mains into industrial areas and more storage capacity were included. The system as upgraded can accommodate a population of 10,000.

Adequate water supplies have been identified, wells drilled and water available to the Seward Marine Industrial Center. There is more than adequate water volume to extend service to the adjacent Spring Creek site.

Wastewater

Seward is served by a gravity sewer system throughout the community. The City adopted a Comprehensive Wastewater Facility Plan to meet current Federal Regulations requiring secondary treatment. An aerated lagoon system is located at Lowell Point, south of the City. The intercepter system is designed for a saturation population of 20,500 while the treatment lagoon was initially constructed to meet the requirements of 5,000 with future expansion to accommodate a population of 10,000.

The previously referenced feasibility study for the Fourth of July Creek Industrial Development prepared by Arctic Environmental Engineers found the following:

> The Fourth of July Creek is well suited to conventional wastewater collection, treatment and disposal techniques. No unusual conditions exist that would require specialized or extremely advanced practices. Resurrection Bay can be used as the receiving water for wastewater effluent and is located adjacent to the site. The types of sewage

treatment that can be utilized at Fourth of July Creek are limited by current technology and agency regulations and not by site limitations.

Essentially three basic sources of sewage need to be considered. These are domestic, industrial and fisheries wastes. Domestic wastes can be futher broken down into low density industrial complexes or residential development on one hand and the same type of waste but in large quantities on the other.

A large development, such as a prison, would require a central sewage treatment facility. A collection system would be required to bring the wastes to the facility. One of the many package treatment plants on the market today would handle a fair sized development easily. Another method of treating this type waste is an aerated lagoon similar to the type the City has selected for Lowell Point. Lagoons are simple to construct and operate and are relatively inexpensive. It is anticipated that the correctional facility and the Seward Marine Industrial Center would share a common facility. This could produce a savings in both construction and operation.

Fuel

Presently two bulk fuel plants serve the Seward area: Chevron and Texaco. Each handles gasoline, diesel and related products. Natural gas is not available in the area.

A 22,000 gallon per hour pipeline is available for fueling large vessels at the end of the Alaska Railroad dock. The fishing fleet is supplied by tank trucks at the small boat harbor.

The Chevron distributer receives his fuel from Nikiski (Kenai), while Texaco is supplied from Anchorage via rail car.

With the installation of the Seward Marine Industrial Center direct bulk heating oil shipments could be made to within a mile of the proposed correctional facility. This direct delivery added to a bulk heat oil storage facility would provide substantial cost savings during the life of the facility.

Telephone

The General Telephone Company of Alaska serves Seward and currently operates about 1,500 stations for 900 customers. Long distance communication facilities consist of trunk lines tied to the Anchorage exchange. During normal business hours they are used at near capacity. The utility indicates it is capable of expanding the system to meet the type of demand that would be associated with a correctional facility, with a lead time of only six to nine mont .

LIVING QUARTERS

Housing

At present Seward has a very low housing vacancy rate. However, ample fully serviced and developable land exists within the City as well as the area immediately outside Seward.

One such area is the Gateway Subdivision. The City is now developing this 135 acre lost subdivision adjacent to the High School. It has plotted single family and multi-family lots. These lots will be fully developed with all utilities and roads in place. This will help insure that land is available for new housing construction that will be needed for the correctional facility employees and support personnel. The City has authorized a five million dollar bond to develop the Gateway subdivision, so its availability is assured. This, plus the existing developable lots provide an ample choice of housing accommodations.

Visitor Accommodations

Seward has served as a recreational center for many years. As such, it has developed a visitor/transient support industry with motels, camper parks and restaurants.

These facilities are now in place and available to serve correctional facility visitors as well as visiting lawyers, parole board members or other providers of service. The multi-modal access to Seward also provides visitor accessability.

HOUSE BILL NO. 217

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the establishment of prison facilities."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 33.30.020 is amended to read:

Sec. 33.30.020. COMMISSIONER TO ESTABLISH AND ADMINISTER PRISON FACILITIES. Subject to the provisions of AS 33.30.025, the [THE] commissioner shall establish prison facilities and classify the prisoners in prison facilities. The commissioner shall provide for the safety, subsistence, proper government, and discipline of prisoners. The commissioner shall establish programs for the treatment, care, rehabilitation and reformation of prisoners.

* Sec. 2. AS 33.30 is amended by adding a new section to read:

Sec. 33.30.025. LOCATION OF FACILITIES. After July 1, 1983, the commissioner shall locate ~~all~~ a newly constructed maximum security prison facilities within the vicinity of Seward.

HOUSE BILL NO. 219

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 5. LOCAL CITIZEN ADVISORY BOARDS.

Sec. 14.40.700. LOCAL CITIZEN ADVISORY BOARDS ESTABLISHED. There are established Local Citizen Advisory Boards to consider certain decisions of the Board of Regents of the University of Alaska.

Sec. 14.40.710. APPOINTMENT OF BOARD MEMBERS. The governor shall appoint the members of the Local Citizen Advisory Boards [subject to confirmation by a majority of all the members of the legislature in joint session.] The names of those appointed shall be sent to the legislature within five days after the opening of the session, [for confirmation or rejection. If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after the rejection. If the legislature adjourns without confirming the nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.]

Sec. 14.40.720. TERM OF OFFICE. The term of office of a member of a Local Citizen Advisory Board is four years. A member may not

Showing Sponsor's proposed amendments in brackets.

serve more than two terms. The term of office begins on the first Monday in February of the year in which the appointment is made. Each member serves until a successor is appointed and qualifies.

Sec. 14.40.730. BOARD OF REGENTS TO ESTABLISH SERVICE AREAS. The Board of Regents shall divide the state into the following three separate geographic university service areas: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, and the University of Alaska at Juneau, and two geographic community college service areas: the Anchorage Community College, and all other community colleges. Each geographic service area shall be served by a Local Citizen Advisory Board and each Local Citizen Advisory Board shall have nine members.

Sec. 14.40.740. DUTIES OF LOCAL CITIZEN ADVISORY BOARDS. (a) A decision of the board pertaining to budget transfers and requests, building construction, academic programs, and student activities, and the sharing of facilities and services between geographic service areas and institutions shall be submitted to the Local Citizen Advisory Boards affected by the decision for consideration.

(b) Within 30 days after a decision of the board is submitted to a Local Citizen Advisory Board for consideration, the Local Citizen Advisory Board shall notify the board if it wishes to make a recommendation concerning that decision.

(c) If a Local Citizen Advisory Board notifies the board within 30 days that it wishes to make a recommendation concerning a decision of the board, the board may not implement that decision until the Local Citizen Advisory Board makes its recommendations, or until 60 days after the notification, whichever is first.

(d) If the board rejects the recommendation of a Local Citizen Advisory Board it must file a written report specifying the reasons

for rejection with the governor and both houses of the legislature 60 days prior to implementing the decision affected by the recommendation.

FROM: Representative John Lindauer

RE: House Bill #219: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

The purpose of this bill is to give more stature to the local citizen advisory boards so that their recommendations on local matters will be given more weight.

House Bill #219 statutorially establishes the existing local citizen advisory boards. The major difference is that the members of the local boards would be appointed by the Governor instead of the University as they are now. The Citizen Advisory Boards would continue to review and make recommendations on decisions of the University of Alaska's administration and the Board of Regents which impact their local areas.

The advisory board members would serve four year terms with two terms the maximum number.

The bill requires the Board to Regents to establish a minimum of five local advisory boards. The Regents could create more and might well do so for each of the community colleges. The basic five are: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, the University of Alaska at Juneau, the Anchorage Community College and the rest of the community colleges as a group.

Each advisory board will continue to make recommendations to the Board of Regents only on decisions related to their institutions. The Regents keep all of their current power and remain totally free to accept or reject any advisory board recommendation.

RE: Proposed Amendment to House Bill #219

I request that the House Health, Education, and Social Services Committee make the following amendment to House Bill #219 when it considers House Bill #219:

1. Delete beginning on page 1, line 15: . . .subject to confirmation by a majority of all the members of the legislature in joint session. . .

2. Delete beginning on page 1, line 18: . . .for confirmation or rejection. If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after rejection. If the legislature adjourns without confirming a nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.

3. Delete on page 2, line 3: and qualifies.

TO: HESS Committee Members April 7, 1983

FROM: Linda Otey, Committee Aide

RE: Summary of HB 219

Summary - HB 219 "An act relating to Local Citizen Advisory Boards of the University of Alaska."

New Sections Added to 14.40 "The University of Alaska and the Community Colleges."

Section 1 14.40.700 - The legislature would establish Local Citizen Advisory Boards (LCAB's) to consider certain decisions by the Board of Regents of the University of Alaska.

14.40.710 - Governor would appoint members of LCAB's subject to confirmation the legislature. (See proposed amendments by sponsor.)

14.40.720 - Sets up a 4-year term of office for LCAB members and forbids serving more than 2 terms. (See proposed sponsor amendments.)

14.40.730 - Establishes three geographic university service areas - University of Alaska at Anchorage, Fairbanks, and Juneau; and two community college service areas - Anchorage Community College and all others. Each service area would be served by a LCAB and each board would consist of 9 members.

14.40.740 - Outlines duties of boards:

1) Board of Regent decisions pertaining to budget transfers and requests, building construction, academic programs, student activities, and sharing of facilities and services between geographic service areas and institutions must be submitted for consideration to the LCAB effected by the decision.

2) If LCAB wishes to make a recommendation after the first 30 days of review, the Board of Regents is prohibited from acting on the decision until the recommendation is made or until 60 days after the notification, whichever is first.

3) If the Board of Regents rejects the recommendation it must file a written report specifying the reasons for the

rejection with the Governor and the legislature 60 days prior to implementing the decision.

No effective date clause - consequently effective 90 days after the Governor's signature.

3/8/83

March 21, 1983

HB219

ASSUMPTIONS

1. Each Local Citizen Advisory Board will meet the same number of times as the full Board of Regents and its major working committees. During FY83 the Board of Regents scheduled eight meetings. It is assumed that this number of meetings will remain constant each year during the projection period.

2. It is assumed each member of the Local Citizen Advisory Board will serve without compensation other than reimbursement for reasonable and necessary travel expenses in accordance with standard University policy and regulations. Further, it is assumed each board member will be compensated one day's per diem per meeting. For cost projections meetings are assumed to be convened in the respective cities of the Chancellor's offices for the region for which the board serves.

3. Coordination of meetings, travel and clerical support for each Local Citizen Advisory Board is estimated to require a permanent half-time administrative secretary. FY84 cost for five half-time administrative secretaries is projected to be $67,900.

4. Support operating expenses for office space, utilities and other overhead costs for each advisory board are assumed to be shared with the respective Chancellor's office. These costs are estimated to be $3,000 per board for FY84. Supplies necessary to fulfill the mission of the boards are projected at $1,000 for FY84 for each board.

5. Inflation for calculation of operating costs for FY85 through FY88 is assumed to be 7 percent annually.

PROGRAM SUMMARY

The FY84 estimated cost for travel and per diem is based on the following schedule of meeting locations and travel mix of local members (those not requiring air travel) and non-local members requiring air travel (and their hypothetical origins) to attend the advisory board meetings.

Local Citizen Advisory Board	Meeting Location	Local Attendance	Non-local Attendance Air Transportation Point of Origin
UA/Fairbanks	Fairbanks	5 members	Nome Anchorage (two members) Galena
UA/Anchorage	Anchorage	9 members	-
UA/Juneau	Juneau	7 members	Sitka Ketchikan
Anchorage CC	Anchorage	9 members	-
Community Colleges	Anchorage	-	Juneau Ketchikan Bethel Nome Fairbanks Kotzebue Palmer Kenai Valdez

Based on the transportation schedule listed above, estimated average travel costs per board member for each meeting, per diem per board member and total annual costs for each advisory board are provided below:

Local Citizen Advisory Board	Average Travel Per Member	Per Diem Per Member	Total Per Diem and Travel For 9 Members Attending 8 Meetings in FY84
UA/Fairbanks	$ 80.00	$ 90.00	$ 12,240
UA/Anchorage	-	80.00	5,760
UA/Juneau	30.00	90.00	7,920
Anchorage CC	-	60.00	5,760
Community Colleges	225.00	85.00	22,320
			$ 54,000

Total FY84 estimated cost of implementation of HB219 for the five Local Citizen Advisory Boards:

Personal Services	$ 67,900
Travel and Per diem	54,000
Contractual Services	15,000
Commodities	5,000
Total	$ 141,900

AGENCY COMMENTS

1. The University of Alaska believes the creation of Local Citizen Advisory Boards would add redundancy to the University's decision-making process which would reduce the efficiency of governance of the university and generate additional expense. Currently under university policy 02.04.01, Community College Councils, which include between 9 and 15 members for each of the community colleges, review and recommend approval or disapproval of new programs, annual proposed operating and capital budget requests, annual community college plans, and statewide policies and regulations before their submission to the Board of Regents. Having Local Citizen Advisory Board review Board of Regents' decisions which have included the review and input of the Community College Councils would create duplication and unnecessary waste.

2. In addition to the Community College Councils' input into the university's decision-making process, every meeting of the Board, its committees, and subcommittees is open to the public for comments and input. Members of the community are welcome to provide input to every Board of Regents' decision and policy considered by the university.

3. Creation of the Local Citizen Advisory Boards could cause delays in the implementation of critical Board of Regents' decisions of up to six months. The university is required to meet several deadlines by the State for the continuance of its operations, for example, submission of the annual operating and capital budget requests. Adding the Advisory Boards to the university's decision-making process could jeopardize either meeting critical and/or mandatory deadlines or failure to fulfill the requirements of the law regarding the advisory board process.

4. Additional indirect costs are associated with the additional time necessary for the Board of Regents' consideration and response to Local Citizen Advisory Boards' recommendation and/or the implementation of the Board of Rgents' original or modified decision. In addition to the actual costs of responding to Advisory Boards' recommendations, significant expense could be incurred through delay of construction of capital projects. Depending on timing, an entire construction season could be missed resulting in an additional year's inflation being added to the cost of a university construction project. It is the University's position that the potential additional expense is unwarranted.

JOB DESCRIPTION

Local Citizen Advisory Board — Date: March 21,1983

TITLE: Administrative Assistant I
Range 74

JOB SUMMARY

Under the general supervision of the Chairperson, assembles and distributes the LCAB agenda; attends LCAB meetings for the purpose of taking, transcribing, and distributing the minutes and recommendations; makes arrangements for board meetings and official functions and other assignments as may be prescribed.

MAJOR DUTIES

1. Makes arrangements for LCAB meetings by announcing meetings; preparing travel and travel reimbursement requests as necessary; collecting, compiling, typing and mailing agenda.

2. Attends all LCAB meetings; takes, transcribes and distributes minutes of all meetings to the board and appropriate others.

3. Types, copies and distributes minutes and recommendations to the University Board of Regents and LCAB members.

4. Assists in collection, indexing and maintaining files and official records of the LCAB, assumes responsibility for the maintenance and security of confidential documents.

5. Serves as telephone and walk-in receptionist at LCAB office.

6. Maintains soft ledger of LCAB budget and expenditures.

7. Makes travel and accommodations arrangements for members of the board and others, schedules meetings and conferences as needed.

8. Prepares correspondence.

KNOWLEDGE, SKILLS AND ABILITIES

Working knowledge of filing systems; office procedures and standard office machines required; familiarity with soft ledgers and general admainistrative procedures desirable.

Skills in typing and transcription from mechanical dictating equipment accurately and at a rapid rate required; strong human relations and interpersonal skills desired.

Ability to learn to format of agenda and minutes; to maintain confidentiality, and to provide mature and sensitive professional services to members of the board, the University community and the public.

EXPERIENCE

Experience demonstrating the knowledge, skills and abilities required to fulfill the major job duties, as described above.

rejection with the Governor and the legislature 60 days prior to implementing the decision.

No effective date clause - consequently effective 90 days after the Governor's signature.

Re: SSHB 219

In response to the questions you raised during the committee meeting of 4/15/83 regarding SSHB 219:

1. The sponsor of the legislation is having the bill re-drafted to clarify his intent of the definition of service area to be based on geographical areas as opposed to school specialization areas. The new draft of the bill will incorporate the distinction using 'geographical'.

2. A copy of the 'new' draft with the amended language clarifying 'geographical' service areas is being teletyped to the University of Alaska, Fairbanks to Dr. Sherman Carter. A new fiscal note has been requested in considering this version of the bill.

A copy of the current bill (SSHB 219 final) is attached for your review.

cc: All Committee Members

WORKING WITH A MAXIMUM SECURITY PRISON IN SEWARD, ALASKA

A Seward group is proposing a new concept to show how the bottomfishing industry, the City of Seward, and the State of Alaska can work together to be a great benefit to a State Prison.

Our preliminary studies have made known some very interesting facts:

1. There is a tremendous supply of bottomfish and fish of all depths within a 12 hour sailing time from Seward port. Tests by fisheries experts have been made through the years and estimated quantities are on record. Russian, Japanese, Korean, and Polish ships have been fishing and harvesting our fish for many years.

2. U.S. involvement in bottomfishing is gaining in importance but does not compare with progress made by other countries. Bottomfish consumption in the domestic markets of the United States has been low, particularly in inland areas of the country, but better in the coastal states. However, in the last three to four years, a new acceptance has been identified and people are more aware of fish food as a low-cost healthy food need. Costs generally for domestically-produced fish are higher than similar imported fish and this presents a definite problem. Higher labor costs in catching and final preparations have exhibited real growth in the industry.

3. A joint venture operation in Seward between Seward, private industry, and the State of Alaska could place within the prison compounds a fish fillet and packing plant to process bottomfish into marketable packaging according to the particular needs of the market. The product can be sold fresh in the Alaska market, flown to nearby markets, or frozen and shipped to any available market as needed. The advantages are numerous. It could employ prison employees on a year-around basis. It would give to the industry a stable, experienced adult work force that is not subject to change of jobs; i.e. one which cannot find a place to live, is subject to unsatisfactory working conditions, bad weather, and a host of other problems that make conditions difficult for on-shore processors. It could help stabilize the production costs and at the same time return wages to prisoners and an on-going net back to the prison system to help defray operating costs. A fish reduction plant is nearby to utilize any fish waste as a by-product of this operation.

4. It presents then an opportunity for rehabilitation of prisoners. Here is their chance to learn the fundamentals of a rapidly-growing fishing industry. Opportunities in catching, processing, mechanical functions, and transportation that could provide steady jobs at good wages when the prisoner exits the system. Classes can be provided in their non-working hours to give them the fundamental knowledge to compete in the labor market. This background and job-learning opportunity could keep them gainfully employed and from returning to the prison system.

5. General manufacturing is very difficult to attract to Alaska which rates fiftieth on a scale of desirability to manufacturers. Therefore we must work harder than ever to be competitive in any manufacturing endeavors. Any product produced in Alaska and shipped to other markets has a tendency to reduce the very high costs of shipping to Alaska.

State ranks next to last in luring manufacturers

By Mark Segami

First it was Inc. magazine, then it was the Forbes magazine article.

Now, perhaps a more telling blow to Hawaii's business climate has been delivered by the public accounting firm Alexander Grant & Co.

In its 1982 study of general manufacturing business climates in the U.S., Alexander Grant places Hawaii 49th overall in degree of attractiveness to manufacturers.

Hawaii and Alaska were not included in the original study, which measured only the 48 contiguous states.

However, a follow-up summary on Alaska and Hawaii, using the same 22 weighted factors, puts Alaska dead last with an overall "business climate" score of minus 219.

Hawaii, next to last, had a score of plus 6. The next lowest state was Michigan, with a score of 16.

Florida, for the second straight year, captured the No. 1 spot as the state most attractive to manufacturers. Its score was 85.

Jim Watts, partner in charge of Alexander Grant's Hawaii office, said too much emphasis shouldn't be placed on the rankings.

"In factors that the state or county has control over, where do we rank?" is the question that should be posed, Watts suggested.

Of the 22 factors, 12 were deemed controllable by government: taxes; change in taxes; expenditures versus revenue growth; debt per capita; welfare expenditures; unemployment compensation benefits; unemployment compensation net worth; maximum workers' compensation benefits; workers' comp rates; vocational education enrollment (as a percentage of population); high school educated adults; and environmental controls.

Hawaii ranked 49th or 50th for change in taxes and workers' compensation rates. It was between 40th and 48th on taxes, debt per capita, welfare expenditures, union membership, and a non-government controlled factor—energy costs.

Areas where Hawaii did rather well were: government expenditures versus revenue growth; change in average wages; and change in union membership.

Hawaii ranked no. 2, behind Alaska, in expenditures versus revenue growth, which indicates how well a state was able to match expenditures with revenues and the attitude of the legislatures in balancing budgets.

Hawaii also was second in average wages, which indicates a favorable trend in the cost of labor. The state was third overall in rate of change in union membership, which indicates a declining trend in unionization of the workforce and its resulting impact.

Hawaii was dead last in workers' compensation rates, however. News reports peg the increase in the rates for Hawaii's businesses to be 29 percent in 1983.

But, as Watts noted, perhaps the study's greatest value lies in its pinpointing of weaknesses in each state.

It is the fourth year of the study and it is conducted with the assistance of the Conference of State Manufacturers' Associations.

Still a headache, but—

Uncle Sam pays bills to businesses faster

By Mark Coleman

Thanks to a new law, late payments by government agencies to private vendors are becoming less of a headache for businesses nationally and in Hawaii.

Overdue bills owed by Uncle Sam once cost companies hundreds of millions of dollars. The cost is less now with prompter payments, but the problem hardly has evaporated.

In Hawaii, overdue bills owed by government to businesses still probably involve hundreds of thousands of dollars a year, according to Dick Waidzunas, Honolulu complaints against federal agencies still abound, but not as much as before.

"We're not getting as many complaints as we used to because most of the federal contracting officers now are aware of the new law and are trying to comply," Waidzunas said last week.

He said that since the Prompt Payment Act became effective in October, "all federal contracting officers are running like hell to get things paid."

Where complaints have been registered, he said, "it was just a matter of contracting the top contracting offi-

Editorials

A prison at Seward

FOR MANY reasons, Seward should be selected as the site of the state's new maximum security prison.

Because the town has no honest-to-goodness representation in the Legislature, it faces an uphill battle in its effort. The Matanuska Valley and Haines are also in contention.

But Seward's offering, a 100-acre site eight miles from the center of town in the Spring Creek area, offers the most advantages.

NO LAND purchase would be required in Seward. The site under consideration is already in public ownership. It is commodious and can accommodate future expansion.

The surrounding terrain provides maximum security at minimum cost or concern. There are mountains on two sides and water on a third, and there is only one exit.

The site is accessible to the rest of Alaska by car, train or airplane.

And numerous support facilities already exist in Seward, including the infrastructure for urban services and professions: doctors, dentists, health services, municipal and borough governments, hospital, schools, police and fire protection, banks, stores, communications facilities, churches, social and cultural facilities and programs as well as recreation possibilities unequaled in other parts of the world.

Also, a court system is in place in Seward.

BEST OF ALL, the people of Seward want the prison and have asked for it. The state corrections director has described the business and government leadership there as being outright enthusiastic over the prospect.

In the Matanuska Valley, businessmen are pushing for Sutton as a location, but the people in that community have voted almost unanimously that they don't want the prison.

Seward in some ways is an orphan. Those who are supposed to look out for its interests in the Legislature are all residents of other towns. The Matanuska Valley, on the other hand, has powerful representation in Juneau, including the president of the Senate, Jay Kerttula.

Seward recently lost an $8 million grain terminal when the new state administration shut down the project before construction was completed.

Alaska's federal representatives are working against the town as they try to effect changes in the Jones Act. The changes, if they occur, would quash Seward's hopes of becoming the port for a shipping line that wants to start Alaska service.

Seward wants the prison, it needs it and it has a great deal to offer. That is where it should be located.

Freight rates

ALASKANS are still waiting for Sen. Ted Stevens to produce on a statement he has made that he will review changes in law that would reduce overall freight rates for Alaska.

The senator, in a speech to the Legislature in February, said he intended to do that. He mentioned it again in the March newsletter that was sent to Alaskans from his Washington office.

What is Mr. Stevens doing about freight rates? What does he mean when he says he will review changes in the law?

Those are good questions to ask the senator next time he comes to the state.

Linda,

Enclosed is the memo regarding the constitutionality of HB 219 that you requested. Dorothy Peavey of Representative Lindauer's office informs me that they have also released the latest version of the bill to your office. My memo concludes that the bill as originally written is probably not unconstitutional. The revised bill is clearly not unconstitutional. In it, the power of the Local Citizen Advisory Boards to tie up the Board of Regents is removed, and they become truly advisory boards without any real power other thanthat of making recommendations. Therefore, the constitutional concern of usurping power from the Board of Regents is removed.

Keith

STATE OF ALASKA COPY

THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 9, 1983

SUBJECT: Citizen Advisory Boards
(Work Order No. 13-0201)

TO: Representative John Lindauer

FROM: Keith B. Levy
Legislative Counsel

You have requested an opinion as to the constitutionality of Work Order No. 13-0201, "An Act relating to Local Citizen Advisory Boards of the University of Alaska." The constitutional issue raised by this bill has to do with the constitutional autonomy of the board of regents of the university. As you know, Article VII, section 3 of the state constitution provides:

> The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor subject to confirmation by a majority of the members of the legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

Accordingly, the board of regents is the constitutionally mandated governing body of the university. However, there is some authority to the effect that the constitution does allow the legislature to exercise a certain amount of control over the university. Although the extent of that control has not been precisely defined, it is my opinion that the citizen advisory board bill, as currently drafted, does not exceed the legislature's power to control the university.

In University of Alaska v. National Aircraft Leasing, Ltd., 536 P.2d 121 (Alaska 1975), the state Supreme Court held that the university's constitutional and statutory autonomy does not mean that the university is exempt from a statute prohibiting trial by jury in suits against the state.

Furthermore, in an Opinion of the Attorney General, February 28, 1977, the attorney general suggested that the Fiscal Procedures Act and the Executive Budget Act probably apply to the university. Although neither of these authorities is directly on point, they do affirm the principle that the legislature can exercise some authority over the university and the board of regents.

It seems certain that the legislature has the power to create local boards to advise the board of regents as long as those boards are not used to usurp the governing authority given the board of regents by the constitution. The citizen advisory board bill, as drafted, does not appear to do that. Of course, the question is still open and subject to judicial interpretation. However, as long as the citizen advisory boards remain truly advisory, there is probably no constitutional problem with the bill.

IN THE HOUSE

HOUSE BILL NO. 219

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to Local Citizen Advisory ~~Boards~~ councils of the University of Alaska."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 5. LOCAL CITIZEN ADVISORY ~~BOARDS~~ Councils

. Sec. 14.40.700. LOCAL CITIZEN ADVISORY ~~BOARDS~~ councils ESTABLISHED. There are established Local Citizen Advisory ~~Boards~~ Councils to consider certain decisions of the Board of Regents of the University of Alaska.

Sec. 14.40.710. APPOINTMENT OF BOARD MEMBERS. The governor shall appoint the members of the Local Citizen Advisory ~~Boards~~ Councils subject to confirmation by a majority of all the members of the legislature in joint session. The names of those appointed shall be sent to the legislature within five days after the opening of the session, for confirmation or rejection. If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after the rejection. If the legislature adjourns without confirming the nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.

Sec. 14.40.720. TERM OF OFFICE. The term of office of a member of a Local Citizen Advisory Council is four years. A member may not

serve more than two terms. The term of office begins on the first Monday in February of the year in which the appointment is made. Each member serves until a successor is appointed and qualifies.

Sec. 14.40.730. BOARD OF REGENTS TO ESTABLISH SERVICE AREAS. The Board of Regents shall divide the state into the following three separate geographic university service areas: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, and the University of Alaska at Juneau, and ~~two geographic community college service areas: the Anchorage Community College, and all other community colleges~~. Each geographic service area shall be served by a Local Citizen Advisory ~~Board~~ Council and each Local Citizen Advisory ~~Board~~ Council shall have nine members.

Sec. 14.40.740. DUTIES OF LOCAL CITIZEN ADVISORY ~~BOARDS~~ COUNCILS. (a) A decision of the board pertaining to budget transfers and requests, building construction, academic programs, and student activities, and the sharing of facilities and services between geographic service areas and institutions shall be submitted to the Local Citizen Advisory ~~Boards~~ Councils affected by the decision for consideration.

(b) Within 30 days after a decision of the ~~board~~ BOARD is submitted to a Local Citizen Advisory ~~Board~~ Council for consideration, the Local Citizen Advisory ~~Board~~ Council shall notify the board if it wishes to make a recommendation concerning that decision.

(c) If a Local Citizen Advisory ~~Board~~ Council notifies the board within 30 days that it wishes to make a recommendation concerning a decision of the board, the board may not implement that decision until the Local Citizen Advisory ~~Board~~ Council makes its recommendations, or until 60 days after the notification, whichever is first.

(d) If the board rejects the recommendation of a Local Citizen Advisory ~~Board~~ Council it must file a written report specifying the reasons

for rejection with the governor and both houses of the legislature 60 days prior to implementing the decision affected by the recommendation.

(2)

SSHB219
FISCAL NOTE

ASSUMPTIONS

1. Each Local Citizens Advisory Board will average eight meetings per year.

2. The annual inflation rate for future fiscal years FY85 through FY88 is assumed to be approximately 7%.

3. Members of the Local Citizens Advisory Board will not receive per diem allowances unless they travel to the meetings held away from their place of residence.

4. The University of Alaska, Fairbanks and the University of Alaska, Juneau will have a service area which is larger than the local municipality. The University of Alaska, Fairbanks has a statewide service area and the University of Alaska, Juneau has a regional service area for southeast Alaska. Accordingly, for the University of Alaska, Fairbanks, it is assumed that seven (7) members of the Advisory Board will be from outside the Fairbanks area and for the University of Alaska, Juneau, it is assumed that four (4) members will be from outside the municipality of Juneau.

5. It is assumed that this revised bill no longer envisions prior approval of actions by the Board of Regents before actions can be initiated, which provision was contained in the earlier version of HB219, but that now the local citizen advisory boards' review would not delay action being initiated. However, this point is not completely clear since wording in the proposed bill, section 14.40.740 (2) indicates that the local citizen advisory boards would inform the governor and legislature when the boards "vote to reject or oppose" decisions by the Board of Regents or the university president. Perhaps words such as "disagree with" should be substituted for the words "reject or oppose" as stated in the substitute bill.

(3)

SSHB219
FISCAL NOTE

COST ANALYSIS

1. Assume seven members of the UA/Fairbanks advisory board will need to travel, and assume four members of the UA/Juneau board will need to travel. Then their travel costs are as follows:

Local Citizen Advisory Board	Average Travel per Member	Per Diem per Traveling Member	Total Per Diem and Travel for 8 Meetings in FY84
UA/Fairbanks	$ 80	$ 90	$ 9,520
UA/Anchorage	-	-	-
UA/Juneau	30	80	3,520
Community Colleges	-	-	-
Total			$13,040

The purpose for calculating travel for UA/Fairbanks and UA/Juneau, is because their service areas are not restricted to the local community. UA/Fairbanks has a statewide function with elements funded by UA/Fairbanks in numerous places throughout the state. Therefore, any board, in order properly to review functions pertaining to UA/Fairbanks should not be simply drawn from Fairbanks. Similarly, UA/Juneau generally has a service area including all of southeast Alaska and a statewide function with respect to its status as a Sea Grant activities. As a result of this, some board members are assumed to live outside the immediate community where these schools are located. It is reasonable to assume that their travel costs and per diem should be paid by the state.

2. It is estimated that each Local Citizens Advisory Board would require one man-month per year of clerical support as follows:

Cost per man-month for clerical support	$ 2,263
Number of services areas	x 14
Total cost (14 x $2,263)	$ 31,682

The purpose for clerical support would be to collect materials relating to decisions made by the Board of Regents and the President and distribute those materials to all members of their respective boards. The person should attend Board meetings and record votes, prepare letters for transmittal to the Governor and Legislature and send requests for information to University officials. Additionally, the person would have to schedule meetings and notify participants of meeting times and places and insure that facilities are available.

(4)

SSHB219
FISCAL NOTE

3. Additional support costs are estimated to include, for each Local Citizens Advisory Board, approximately $2,000 for the copying of materials, postage, and general office supplies in order to provide copies of decisions and actions to each board member. Since there are 14 services areas, this cost is $28,000 per year.

Statewide Budget Office April 18, 1983

5

SSHB219
FISCAL NOTE

AGENCY COMMENTS

1. The University of Alaska believes the creation of Local Citizens Advisory Boards would add redundancy, reduce efficiency and generate additional expense. Currently under university policy 02.04.01, Community College Councils, which include between nine and 15 members for each of the community colleges, review and recommend approval or disapproval of new programs, annual proposed operating and capital budget requests, annual community college plans, and statewide policy and regulations before their submission to the Board of Regents. Having additional Citizens Advisory Boards would create duplication and unnecessary waste of people's time and effort.

2. The Advisory Boards proposed by the bill could not replace existing advisory councils, since the existing councils are appointed through the authority of the Board of Regents to guide the board before it takes actions, whereas the proposed citizen advisory boards which would be established by House Bill 219 have a different function, namely reviewing actions which have been taken.

3. In addition to the Community College Councils' input into the University's decision making process, every meeting of the Board, its committees and subcommittees is open to the public for comments and input. Members of the community are welcome to provide input to the Board of Regents' decisions and policies being considered by the University.

4. The Board of Regents is a constitutionally established authority with the responsibility to govern the University system. The Board of Regents is held accountable to citizens of the state, students, legislators and faculty to govern properly and provide postsecondary education in an efficient and effective manner. All decisions made by the Board of Regents are open to public scrutiny and are reported on a timely basis to virtually everyone in the state.

5. Regents' actions are preceded by hours of discussion, testimony and study. That information is needed for reviewing the propriety of specific regents' actions to understand the reasons for actions taken and implications. One primary problem with instituting local advisory boards as proposed in SSHB219 is the fact that the needs of various areas simply cannot be considered in isolation. Individually, on their own merits, numerous proposals are entirely valid. However, a local advisory board has no way of knowing whether or not its proposals are more or less urgent than those being considered for other elements of the university in other locations.

University of Alaska
Fairbanks, Alaska 99701

Received 4/13/83

Ms. Dorothy Peavey
Administrative Aide
Office of Representative John Lindauer
Pouch V
Juneau, AK 99811

Dear Ms. Peavey:

This is to reply to papers which I received from you today pertaining to HB 219, copies of which are shown as the first attachment, for convenient reference. The university's fiscal note on HB 219 which I submitted on 22 March is shown as the second attachment to this letter.

Current advisory boards are appointed by the authority of the Board of Regents and receive staff administrative support from the university. The proposed statutory mandated boards to be appointed by the governor would be external to the university and would indeed require some support to get administration processed and require the incurring of some additional cost. As one small example, if the cost is zero, as you apparently maintain, how are you going to pay for phone bills, and postage and meeting rooms? Since the proposed boards would be drawn from larger geographical areas than most of the current advisory boards used for elements of the university, such as the respective community colleges, I concluded that operations of the boards would require that travel costs be incurred.

The most significant fiscal impact of HB 219, however, would not be in direct operating costs for the new citizen advisory boards but would be in the indirect cost which would result from requirements imposed by the bill. It would require lengthy delays in implementing regents' actions pertaining to budget transfers and requests, building construction, academic programs, student activities, and the sharing of facilities and services between geographical service areas and institutions, as regents' actions in all these areas would require review by the new advisory boards before the university administration could implement regents' directives. Have you ever seen a regents' agenda? Do you have any idea what resulting delays would mean if no action could be implemented after virtually any regents' action until after reviews proposed by HB 219? To take advantage of construction seasons and for numerous reasons of operational necessity, there is a need promptly to initiate actions after the Board of Regents authorizes or instructs the university administration to do so. Customarily, the regents make their actions effective on the day that they are passed, thus allowing the university administration then immediately to sign contracts and otherwise to proceed.

The advisory boards proposed by the bill could not possibly replace existing advisory councils, in spite of the stated intent, since the existing councils are appointed through the authority of the Board of Regents to guide the board before it takes actions, whereas the proposed citizen advisory boards which would be established by House Bill 219 have a completely different function, namely reviewing regents actions which have been taken.

With specific reference to the "several inaccuracies" which your attached letter claims are included in my fiscal note --

1. It is improper to conclude that the advisory boards which House Bill 219 would cause to be appointed can be strictly local. For example, UAF has a statewide function with elements funded by UAF in numerous places throughout the state. So any board, properly to review functions pertaining to UAF, should not simply be drawn from Fairbanks. Further, my assumption was that with the responsibilities which these review boards would hold, board members should receive per diem similar to that which is provided to members of the Board of Regents. If this assumption is false, and the advisory boards would receive no per diem, that direct cost can certainly be deleted. This and other assumptions I made are clearly stated and can be discounted or ignored if any reader of my fiscal note wishes to do that.

2. With respect to the difference in inflation rates, your letter to me cites -- while the House Finance Committee currently is using a 3.9 annual inflation rate for FY84 funding considerations, I personally expect inflation in the future again to rise. Legislation tells us what money the university will get for expected inflation, if any, but not what cost the university must incur for actual increased air fares and such. My fiscal note was not just for FY84 but also for years into the future. Thus, I stated an assumed 7 percent inflation rate. If any reader of my note wishes to assume that future years' inflation will be 3.9 percent or less, he or she certainly may do that. The whole point is that whatever the precise inflation rate for direct cost in this case makes no decisive difference in decisions which now need to be made on HB 219. Direct costs imposed by the bill are minuscule compared with the indirect cost which the bill would cause by increasing administration and by snarling university operations, since the bill would

cause the university not to be able to take various needed actions for months while regents' actions were in the process of being reviewed.

3. Again, I assumed there would be non-local members of the advisory boards for reasons partially explained above. If there is going to be one such board appointed for all community colleges other than ACC, which colleges are located all over the state, I do not understand how you can assume that such a board can come from one local community.

You are right, I do find the fiscal note you sent me on HB 219 written by Kerry Romesberg interesting. I also find it wrong; I find it curious that he was asked to write it on 30 March, when the university was the unit effected and had been asked to and did write a fiscal note on this bill on 22 March; and I find it amazing that Dr. Romesberg felt that he could and should write a zero fiscal note on the bill without even conferring with the university, since he was and is in no position to assess the impact or cost of the bill on the university's actual operations. I would be flabbergasted if anybody could read HB 219 and conclude that it would result in absolutely zero increase cost.

My own final comments are these:

1. Advisory boards proposed by HB 219 could not possibly function. Each regents' action is preceded by hours of discussion and testimony and such. That information is needed for some board reviewing the propriety of any specific regents' action to understand the reasons for it and the implications of it. We could not possibly just mail regents' actions to the new advisory councils for review. They could not possibly make such reviews on any informed basis without knowing related background information. To do their job, they would need to talk with and have presentations by dozens of university people. How would they get all around the state with zero increased cost, to submit needed information to the new councils?

2. I do have the authority to speak for the University of Alaska administration on the fiscal note and the one I wrote stands. I cannot now give you a legal opinion of the constitutionality of HB 219, but my own personal opinion is that the bill would interfere illegally with

the regents' constitutional authority and responsibility to govern the university, and I have no idea what the regents would do about that if the bill were passed.

3. Since I was earlier instructed to submit copies of my fiscal note on HB 219 to the House HESS Committee and did that, I shall send copies of these papers to persons listed below who may wish to consider these points, and both the university's fiscal note I submitted and the Postsecondary Commission's fiscal note which Dr. Romesberg submitted.

4. For reasons explained above and in my fiscal note, my personal views on the bill may very well be biased, as you claim. However, I believe that my assumptions were clearly and fairly stated, and I resent the accusation in your letter to me that the conclusions in my fiscal note were "deliberately erroneous."

Sincerely,

Sherman Carter

Dr. Sherman Carter
Executive Vice-President
University of Alaska
101 Bunnell Building
303 Tanana Drive
Fairbanks, Alaska 99701

Dear Dr. Carter:

Thank you for the fiscal note on HOuse Bill #219 which statutorially mandates Local Citizen Advisory Boards. After reviewing your fiscal note, I was surprised at your conclusions which appear to be deliberately erroneous and biased.

The University currently has Citizen Advisory Boards which are appointed by the University and which have no funds allocated to them. I find no rationale which would indicate that in transferring to the Governor the power to appoint members to the boards there would be a need for staff, contractual services, commodities, and travel funds.

There also are several inaccuracies in your assumptions on the fiscal note:

1. In assumption #2, you cite a need for "reasonable and necessary travel expenses." With a "local" advisory board, with an emphasis on local, I question that travel expenses would be "reasonable and necessary". You also assume per diem compensation would be necessary. However, in no way does HB 219 authorize this assumption.

2. In assumption #5, you cite a 7% annual inflation. The House Finance Committee is currently using a 3.9% annual inflation rate.

3. In your program summary, you cite a need for non-local members of the local citizen advisory boards — four non-local members for the UA/Fairbanks board, and two non-local members for the UA/Juneau board.

I am enclosing a fiscal note prepared by Dr. Kerry D. Romesburg of the Postsecondary Commission which I think you will find interesting. I look forward to your response to these comments, or to receiving a revised fiscal note.

Sincerely,

Dorothy L Peavey

ASSUMPTIONS

1. Each Local Citizen Advisory Board will meet the same number of times as the full Board of Regents and its major working committees. During FY83 the Board of Regents scheduled eight meetings. It is assumed that this number of meetings will remain constant each year during the projection period.

2. It is assumed each member of the Local Citizen Advisory Board will serve without compensation other than reimbursement for reasonable and necessary travel expenses in accordance with standard University policy and regulations. Further, it is assumed each board member will be compensated one day's per diem per meeting. For cost projections meetings are assumed to be convened in the respective cities of the Chancellor's offices for the region for which the board serves.

3. Coordination of meetings, travel and clerical support for each Local Citizen Advisory Board is estimated to require a permanent half-time administrative secretary. FY84 cost for five half-time administrative secretaries is projected to be $67,900.

4. Support operating expenses for office space, utilities and other overhead costs for each advisory board are assumed to be shared with the respective Chancellor's office. These costs are estimated to be $3,000 per board for FY84. Supplies necessary to fulfill the mission of the boards are projected at $1,000 for FY84 for each board.

5. Inflation for calculation of operating costs for FY85 through FY88 is assumed to be 7 percent annually.

PROGRAM SUMMARY

The FY84 estimated cost for travel and per diem is based on the following schedule of meeting locations and travel mix of local members (those not requiring air travel) and non-local members requiring air travel (and their hypothetical origins) to attend the advisory board meetings.

Local Citizen Advisory Board	Meeting Location	Local Attendance	Non-local Attendance Air Transportation Point of Origin
UA/Fairbanks	Fairbanks	5 members	Nome Anchorage (two members) Galena
UA/Anchorage	Anchorage	9 members	-
UA/Juneau	Juneau	7 members	Sitka Ketchikan
Anchorage CC	Anchorage	9 members	-
Community Colleges	Anchorage	-	Juneau Ketchikan Bethel Nome Fairbanks Kotzebue Palmer Kenai Valdez

Based on the transportation schedule listed above, estimated average travel costs per board member for each meeting, per diem per board member and total annual costs for each advisory board are provided below:

Local Citizen Advisory Board	Average Travel Per Member	Per Diem Per Member	Total Per Diem and Travel For 9 Members Attending 3 Meetings in FY84
UA/Fairbanks	$ 80.00	$ 90.00	$ 12,240
UA/Anchorage	-	80.00	5,760
UA/Juneau	30.00	80.00	7,920
Anchorage CC	-	80.00	5,760
Community Colleges	225.00	85.00	22,320
			$ 54,000

Total FY84 estimated cost of implementation of HB219 for the five Local Citizen Advisory Boards:

Personal Services	$ 67,900
Travel and Per diem	54,000
Contractual Services	15,000
Commodities	5,000
Total	$ 141,900

AGENCY COMMENTS

1. The University of Alaska believes the creation of Local Citizen Advisory Boards would add redundancy to the University's decision-making process which would reduce the efficiency of governance of the university and generate additional expense. Currently under university policy 02.04.01, Community College Councils, which include between 9 and 15 members for each of the community colleges, review and recommend approval or disapproval of new programs, annual proposed operating and capital budget requests, annual community college plans, and statewide policies and regulations before their submission to the Board of Regents. Having Local Citizen Advisory Board review Board of Regents' decisions which have included the review and input of the Community College Councils would create duplication and unnecessary waste.

2. In addition to the Community College Councils' input into the university's decision-making process, every meeting of the Board, its committees, and subcommittees is open to the public for comments and input. Members of the community are welcome to provide input to every Board of Regents' decision and policy considered by the university.

3. Creation of the Local Citizen Advisory Boards could cause delays in the implementation of critical Board of Regents' decisions of up to six months. The university is required to meet several deadlines by the State for the continuance of its operations, for example, submission of the annual operating and capital budget requests. Adding the Advisory Boards to the university's decision-making process could jeopardize either meeting critical and/or mandatory deadlines or failure to fulfill the requirements of the law regarding the advisory board process.

4. Additional indirect costs are associated with the additional time necessary for the Board of Regents' consideration and response to Local Citizen Advisory Boards' recommendation and/or the implementation of the Board of Rgents' original or modified decision. In addition to the actual costs of responding to Advisory Boards' recommendations, significant expense could be incurred through delay of construction of capital projects. Depending on timing, an entire construction season could be missed resulting in an additional year's inflation being added to the cost of a university construction project. It is the University's position that the potential additional expense is unwarranted.

JOB DESCRIPTION

Local Citizen Advisory Board — Date: March 21,1983

TITLE: Administrative Assistant I
Range 74

JOB SUMMARY

Under the general supervision of the Chairperson, assembles and distributes the LCAB agenda; attends LCAB meetings for the purpose of taking, transcribing, and distributing the minutes and recommendations; makes arrangements for board meetings and official functions and other assignments as may be prescribed.

MAJOR DUTIES

1. Makes arrangements for LCAB meetings by announcing meetings; preparing travel and travel reimbursement requests as necessary; collecting, compiling, typing and mailing agenda.

2. Attends all LCAB meetings; takes, transcribes and distributes minutes of all meetings to the board and appropriate others.

3. Types, copies and distributes minutes and recommendations to the University Board of Regents and LCAB members.

4. Assists in collection, indexing and maintaining files and official records of the LCAB, assumes responsibility for the maintenance and security of confidential documents.

5. Serves as telephone and walk-in receptionist at LCAB office.

6. Maintains soft ledger of LCAB budget and expenditures.

7. Makes travel and accommodations arrangements for members of the board and others, schedules meetings and conferences as needed.

8. Prepares correspondence.

KNOWLEDGE, SKILLS AND ABILITIES

Working knowledge of filing systems; office procedures and standard office machines required; familiarity with soft ledgers and general admainistrative procedures desirable.

Skills in typing and transcription from mechanical dictating equipment accurately and at a rapid rate required; strong human relations and interpersonal skills desired.

Ability to learn to format of agenda and minutes; to maintain confidentiality, and to provide mature and sensitive professional services to members of the board, the University community and the public.

EXPERIENCE

Experience demonstrating the knowledge, skills and abilities required to fulfill the major job duties, as described above.

RE: Summary of HB 219

Summary - HB 219 "An act relating to Local Citizen Advisory Boards of the University of Alaska."

New Sections Added to 14.40 "The University of Alaska and the Community Colleges."

Section 1 14.40.700 - The legislature would establish Local Citizen Advisory Boards (LCAB's) to consider certain decisions by the Board of Regents of the University of Alaska.

14.40.710 - Governor would appoint members of LCAB's subject to confirmation the legislature. (See proposed amendments by sponsor.)

14.40.720 - Sets up a 4-year term of office for LCAB members and forbids serving more than 2 terms. (See proposed sponsor amendments.)

14.40.730 - Establishes three geographic university service areas - University of Alaska at Anchorage, Fairbanks, and Juneau; and two community college service areas - Anchorage Community College and all others. Each service area would be served by a LCAB and each board would consist of 9 members.

14.40.740 - Outlines duties of boards:

1) Board of Regent decisions pertaining to budget transfers and requests, building construction, academic programs, student activities, and sharing of facilities and services between geographic service areas and institutions must be submitted for consideration to the LCAB effected by the decision.

2) If LCAB wishes to make a recommendation after the first 30 days of review, the Board of Regents is prohibited from acting on the decision until the recommendation is made or until 60 days after the notification, whichever is first.

3) If the Board of Regents rejects the recommendation it must file a written report specifying the reasons for the

IN THE HOUSE

HOUSE BILL NO. 219

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 5. LOCAL CITIZEN ADVISORY BOARDS.

Sec. 14.40.700. LOCAL CITIZEN ADVISORY BOARDS ESTABLISHED. There are established Local Citizen Advisory Boards to consider certain decisions of the Board of Regents of the University of Alaska.

— Sec. 14.40.710. APPOINTMENT OF BOARD MEMBERS. The governor shall appoint the members of the Local Citizen Advisory Boards [subject to confirmation by a majority of all the members of the legislature in joint session.] The names of those appointed shall be sent to the legislature within five days after the opening of the session, [for confirmation or rejection: If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after the rejection. If the legislature adjourns without confirming the nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.]

Sec. 14.40.720. TERM OF OFFICE. The term of office of a member of a Local Citizen Advisory Board is four years. A member may not

Showing Sponsor's proposed amendments in brackets.

serve more than two terms. The term of office begins on the first Monday in February of the year in which the appointment is made. Each member serves until a successor is appointed [and qualifies.]

Sec. 14.40.730. BOARD OF REGENTS TO ESTABLISH SERVICE AREAS. The Board of Regents shall divide the state into the following three separate geographic university service areas: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, and the University of Alaska at Juneau, and two geographic community college service areas: the Anchorage Community College, and all other community colleges. Each geographic service area shall be served by a Local Citizen Advisory Board and each Local Citizen Advisory Board shall have nine members.

Sec. 14.40.740. DUTIES OF LOCAL CITIZEN ADVISORY BOARDS. (a) A decision of the board pertaining to budget transfers and requests, building construction, academic programs, and student activities, and the sharing of facilities and services between geographic service areas and institutions shall be submitted to the Local Citizen Advisory Boards affected by the decision for consideration.

(b) Within 30 days after a decision of the board is submitted to a Local Citizen Advisory Board for consideration, the Local Citizen Advisory Board shall notify the board if it wishes to make a recommendation concerning that decision.

(c) If a Local Citizen Advisory Board notifies the board within 30 days that it wishes to make a recommendation concerning a decision of the board, the board may not implement that decision until the Local Citizen Advisory Board makes its recommendations, or until 60 days after the notification, whichever is first.

(d) If the board rejects the recommendation of a Local Citizen Advisory Board it must file a written report specifying the reasons

for rejection with the governor and both houses of the legislature 60 days prior to implementing the decision affected by the recommendation.

March 21, 1983

TO: House Health, Education, and Social Services Committee

FROM: Representative John Lindauer

RE: House Bill #219: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

The purpose of this bill is to give more stature to the local citizen advisory boards so that their recommendations on local matters will be given more weight.

House Bill #219 statutorially establishes the existing local citizen advisory boards. The major difference is that the members of the local boards would be appointed by the Governor instead of the University as they are now. The Citizen Advisory Boards would continue to review and make recommendations on decisions of the University of Alaska's administration and the Board of Regents which impact their local areas.

The advisory board members would serve four year terms with two terms the maximum number.

The bill requires the Board to Regents to establish a minimum of five local advisory boards. The Regents could create more and might well do so for each of the community colleges. The basic five are: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, the University of Alaska at Juneau, the Anchorage Community College and the rest of the community colleges as a group.

Each advisory board will continue to make recommendations to the Board of Regents only on decisions related to their institutions. The Regents keep all of their current power and remain totally free to accept or reject any advisory board recommendation.

March 21, 1983

HB219

ASSUMPTIONS

1. Each Local Citizen Advisory Board will meet the same number of times as the full Board of Regents and its major working committees. During FY83 the Board of Regents scheduled eight meetings. It is assumed that this number of meetings will remain constant each year during the projection period.

2. It is assumed each member of the Local Citizen Advisory Board will serve without compensation other than reimbursement for reasonable and necessary travel expenses in accordance with standard University policy and regulations. Further, it is assumed each board member will be compensated one day's per diem per meeting. For cost projections meetings are assumed to be convened in the respective cities of the Chancellor's offices for the region for which the board serves.

3. Coordination of meetings, travel and clerical support for each Local Citizen Advisory Board is estimated to require a permanent half-time administrative secretary. FY84 cost for five half-time administrative secretaries is projected to be $67,900.

4. Support operating expenses for office space, utilities and other overhead costs for each advisory board are assumed to be shared with the respective Chancellor's office. These costs are estimated to be $3,000 per board for FY84. Supplies necessary to fulfill the mission of the boards are projected at $1,000 for FY84 for each board.

5. Inflation for calculation of operating costs for FY85 through FY88 is assumed to be 7 percent annually.

PROGRAM SUMMARY

The FY84 estimated cost for travel and per diem is based on the following schedule of meeting locations and travel mix of local members (those not requiring air travel) and non-local members requiring air travel (and their hypothetical origins) to attend the advisory board meetings.

Local Citizen Advisory Board	Meeting Location	Local Attendance	Non-local Attendance Air Transportation Point of Origin
UA/Fairbanks	Fairbanks	5 members	Nome Anchorage (two members) Galena
UA/Anchorage	Anchorage	9 members	-
UA/Juneau	Juneau	7 members	Sitka Ketchikan
Anchorage CC	Anchorage	9 members	-
Community Colleges	Anchorage	-	Juneau Ketchikan Bethel Nome Fairbanks Kotzebue Palmer Kenai Valdez

Based on the transportation schedule listed above, estimated average travel costs per board member for each meeting, per diem per board member and total annual costs for each advisory board are provided below:

Local Citizen Advisory Board	Average Travel Per Member	Per Diem Per Member	Total Per Diem and Travel For 9 Members Attending 8 Meetings in FY84
UA/Fairbanks	$ 80.00	$ 90.00	$ 12,240
UA/Anchorage	-	80.00	5,760
UA/Juneau	30.00	80.00	7,920
Anchorage CC	-	80.00	5,760
Community Colleges	225.00	85.00	22,320
			$ 54,000

Total FY84 estimated cost of implementation of HB219 for the five Local Citizen Advisory Boards:

Personal Services	$ 67,900
Travel and Per diem	54,000
Contractual Services	15,000
Commodities	5,000
Total	$ 141,900

AGENCY COMMENTS

1. The University of Alaska believes the creation of Local Citizen Advisory Boards would add redundancy to the University's decision-making process which would reduce the efficiency of governance of the university and generate additional expense. Currently under university policy 02.04.01, Community College Councils, which include between 9 and 15 members for each of the community colleges, review and recommend approval or disapproval of new programs, annual proposed operating and capital budget requests, annual community college plans, and statewide policies and regulations before their submission to the Board of Regents. Having Local Citizen Advisory Board review Board of Regents' decisions which have included the review and input of the Community College Councils would create duplication and unnecessary waste.

2. In addition to the Community College Councils' input into the university's decision-making process, every meeting of the Board, its committees, and subcommittees is open to the public for comments and input. Members of the community are welcome to provide input to every Board of Regents' decision and policy considered by the university.

3. Creation of the Local Citizen Advisory Boards could cause delays in the implementation of critical Board of Regents' decisions of up to six months. The university is required to meet several deadlines by the State for the continuance of its operations, for example, submission of the annual operating and capital budget requests. Adding the Advisory Boards to the university's decision-making process could jeopardize either meeting critical and/or mandatory deadlines or failure to fulfill the requirements of the law regarding the advisory board process.

4. Additional indirect costs are associated with the additional time necessary for the Board of Regents' consideration and response to Local Citizen Advisory Boards' recommendation and/or the implementation of the Board of Rgents' original or modified decision. In addition to the actual costs of responding to Advisory Boards' recommendations, significant expense could be incurred through delay of construction of capital projects. Depending on timing, an entire construction season could be missed resulting in an additional year's inflation being added to the cost of a university construction project. It is the University's position that the potential additional expense is unwarranted.

JOB DESCRIPTION

Local Citizen Advisory Board — Date: March 21,1983

TITLE: Administrative Assistant I
Range 74

JOB SUMMARY

Under the general supervision of the Chairperson, assembles and distributes the LCAB agenda; attends LCAB meetings for the purpose of taking, transcribing, and distributing the minutes and recommendations; makes arrangements for board meetings and official functions and other assignments as may be prescribed.

MAJOR DUTIES

1. Makes arrangements for LCAB meetings by announcing meetings; preparing travel and travel reimbursement requests as necessary; collecting, compiling, typing and mailing agenda.

2. Attends all LCAB meetings; takes, transcribes and distributes minutes of all meetings to the board and appropriate others.

3. Types, copies and distributes minutes and recommendations to the University Board of Regents and LCAB members.

4. Assists in collection, indexing and maintaining files and official records of the LCAB, assumes responsibility for the maintenance and security of confidential documents.

5. Serves as telephone and walk-in receptionist at LCAB office.

6. Maintains soft ledger of LCAL budget and expenditures.

7. Makes travel and accommodations arrangements for members of the board and others, schedules meetings and conferences as needed.

8. Prepares correspondence.

KNOWLEDGE, SKILLS AND ABILITIES

Working knowledge of filing systems; office procedures and standard office machines required; familiarity with soft ledgers and general admainistrative procedures desirable.

Skills in typing and transcription from mechanical dictating equipment accurately and at a rapid rate required; s[illegible]ng human relations and interpersonal skills desi[illegible].

Ability to learn to format of agenda and minutes; to maintain confidentiality, and to provide mature and sensitive professional services to members of the board, the University community and the public.

EXPERIENCE

Experience demonstrating the knowledge, skills and abilities required to fulfill the major job duties, as described above.

HOUSE BILL NO. 219

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 5. LOCAL CITIZEN ADVISORY BOARDS.

Sec. 14.40.700. LOCAL CITIZEN ADVISORY BOARDS ESTABLISHED. There are established Local Citizen Advisory Boards to ~~consider certain decisions of the Board of Regents~~ make recommendations on the Local Activities of the University of Alaska.

Sec. 14.40.710. APPOINTMENT OF BOARD MEMBERS. The governor shall appoint the members of the Local Citizen Advisory Boards subject to confirmation by a majority of all the members of the legislature in joint session. The names of those appointed shall be sent to the legislature within five days after the opening of the session, for confirmation or rejection. If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after the rejection. If the legislature adjourns without confirming the nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.

Sec. 14.40.720. TERM OF OFFICE. The term of office of a member of a Local Citizen Advisory Board is four years. A member may not

serve more tha, two terms. The term of office begins on the first Monday in Feb:uary of the year in which the appointment is made. Each member serves until a successor is appointed and qualifies.

Sec. 14.40.730. BOARD OF REGENTS TO ESTABLISH SERVICE AREAS. The Board of Regents shall divide the state into the following ~~three~~ one for each community college plus one each for separate geographic university service areas: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, and the University of Alaska at Juneau, ~~and two geographic community college service areas: the Anchorage Community College, and all other community~~ lleges. Each geographic service area shall be served by a Local Citizen Advisory Board and each Local Citizen Advisory Board shall have nine members.

Sec. 14.40.740. DUTIES OF LOCAL CITIZEN ADVISORY BOARDS. (a) ~~A~~ Regents' decision of the ~~board~~ pertaining to, budget transfers and requests, building construction, academic programs, and student activities, and the sharing of facilities and services between geographic service areas and institutions shall be ~~submitted~~ made available to the Local Citizen Advisory Boards affected by the decision for consideration.

(b) Within 30 days after a decision of the board is submitted to a Local Citizen Advisory Board for consideration, the Local Citizen Advisory Board shall notify the board if it wishes to make a recommendation concerning that decision.

(c) If a Local Citizen Advisory Board notifies the board within 30 days that it wishes to make a recommendation concerning a decision of the board, the board may not implement that decision until the Local Citizen Advisory Board makes its recommendations, or until 60 days after the notification, whichever is first.

(d) If the board rejects the recommendation of a Local Citizen Advisory Board it must file a written report specifying the reasons

for rejection with the governor and both houses of the legislature 60 days prior to implementing the decision affected by the recommendation.

IN THE HOUSE

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 219

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 5. LOCAL CITIZEN ADVISORY BOARDS.

Sec. 14.40.700. LOCAL CITIZEN ADVISORY BOARDS ESTABLISHED. There is established a Local Citizen Advisory Board for each postsecondary education service area established under AS 14.40.730. A Local Citizen Advisory Board shall make recommendations to the Board of Regents concerning activities of the University of Alaska that affect the service area the advisory board serves.

Sec. 14.40.710. APPOINTMENT OF BOARD MEMBERS. The governor shall appoint nine members to each Local Citizen Advisory Board. A member shall reside within the area that is served by the Local Citizen Advisory Board to which that member is appointed. The names of those appointed shall be sent to the legislature within five days after the opening of the legislative session following appointment.

Sec. 14.40.720. TERM OF OFFICE. The term of office of a member of a Local Citizen Advisory Board is four years. A member may not serve more than two terms. The term of office begins on the first Monday in February of the year in which the appointment is made. Each member serves until a successor is appointed.

Sec. 14.40.730. BOARD OF REGENTS TO ESTABLISH POSTSECONDARY EDUCATION SERVICE AREAS. The Board of Regents shall establish the

following postsecondary education service areas: the University of Alaska at Anchorage, the University of Alaska at Fairbanks, the University of Alaska at Juneau, and a service area for each community college.

Sec. 14.40.740. DUTIES OF LOCAL CITIZEN ADVISORY BOARDS. (a) A decision of the Board of Regents pertaining to a postsecondary education service area concerning budget transfers and requests, building construction, academic programs, student activities, and the sharing of facilities and services between postsecondary education service areas shall be made available to each Local Citizen Advisory Board affected by the decisior for consideration.

(b) Within 30 days after a decision of the Board of Regents is available to a Local Citizen Advisory Board for consideration, the Local Citizen Advisory Board shall notify the Board of Regents if it wishes to make a recommendation concerning that decision.

(c) If a Local Citizen Advisory Board notifies the Board of Regents within 30 days that it wishes to make a recommendation concerning a decision, the Board of Regents may not implement that decision until the Local Citizen Advisory Board makes its recommendations, or until 60 days after the notification, whichever is first.

(d) If the Board of Regents rejects the recommendation of a Local Citizen Advisory Board, the Board of Regents must file a written report specifying the reasons for rejection with the governor and both houses of the legislature 60 days prior to implementing the decision affected by the recommendation.

* Sec. 2. AS 14.40.700 - 14.40.740 enacted by sec. 1 of this Act are repealed July 1, 1986.

Davis Kopenen

HB 243

Davis - Proposed Changes? -

Palmer - No - special interest folks

Davis - Move HB 243 -

Tisher - No Objections

HB 219 -

Lindauer - ① change of 9 to 21 members

② ③ Advisory role for Constitutional

Tischer - Entertain Motion

Davis - Object - want to run by people before voting on bill

Tisher - Have had since Wednesday to look @ bill.

Miller - move SS for HB w/ 2nd. rec.

Davis - Object again

Kopenen - Definition of service areas - ① Some colleges operate based on areas of specialization or geographical areas? ②

- Has Lindauer approached the question I have raised.

② - Fiscal note - ⅓ of State each - should be provision for meetings - should be a-

fiscal note!

- Salary & members of Post Secondary Commission

Tischer - Motion on Floor - w/ Ind Rec.
Tischer - In favor - 2 against 2 -
- Motion failed
Kopenen - Objection to 2 pts - ① geographical or specialized servi areas & ② fiscal note. (Define service area)
feels that a geographical divisn would lead to duplication. Request fiscal note - forewarn Univ of changes in sponsor Sub.
Tischer - Not willing do more today - will hear it Monday - Staff will provide by Sunday @ 2pm.
Davis - Conceptual problems - will not move bill.

March 21, 1983

TO: House Health, Education, and Social Services Committee

FROM: Representative John Lindauer

RE: Proposed Amendment to House Bill #219

I request that the House Health, Education, and Social Services Committee make the following amendment to House Bill #219 when it considers House Bill #219:

1. Delete beginning on page 1, line 15: . . .subject to confirmation by a majority of all the members of the legislature in joint session. . .

2. Delete beginning on page 1, line 18: . . .for confirmation or rejection. If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after rejection. If the legislature adjourns without confirming a nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.

3. Delete on page 2, line 3: and qualifies.

HB

225

UPDATING THE ALASKA OPTOMETRY LAW

Alaska Board of Examiners
in Optometry

Alaska Optometric Association

TABLE OF CONTENTS

1. Proposed revisions to AS 08.72, Alaska Optometry Law

2. Explanatory notes to the bill

3. Exhibits

   A. Guidelines for pharmacology training in optometry

   B. Comparison of optometry and medical school training in ocular anatomy, physiology, pathology, general and ocular pharmacology

   C. States authorizing drug utilization in the practice of optometry

4. Public benefits of the legislation

5. Criticism of the legislation by ophthalmologists, and answers to the criticism

6. Appendix: Full curricula of optometry and medical schools compared in Exhibit B

Explanatory Notes to the Bill

Section 1

Addition of the phrase, "or other procedures taught by schools and colleges of optometry", in the definitions is designed for maximum flexibility, so the statute will not have to be revised in the future as optometric education changes.

Deletion of the phrase, "other than by the use of drugs", is the core element of this proposal. The private sector of optometry is the only sector that cannot use drugs, due to this provision.

Section 2

In approving undergraduate and post graduate programs in theoretical and applied pharmacology, the board has access to uniform guidelines (Exhibit A).

Optometry and medical school training programs in the eye and eye medicine are compared in Exhibit B. This is to show that relatively little emphasis is placed upon the eye in medical schools despite the fact that generalists in medicine can and do use eye medications.

Section 3

This revises the pharmaceutical section of the Alaska Statutes to allow pharmacists to sell drugs to optometrists.

EXHIBIT A

Guidelines for Pharmacology Training

in Optometry

Major Points

1. Uniform standards exist for training programs in the schools and colleges of optometry

(4)

ASSOCIATION of SCHOOLS and COLLEGES of OPTOMETRY

SPECIAL ISSUE OF ASCOPE

Vol. 2 Number 9 June 6, 1975

Pharmacology Curriculum Guidelines for Continuing Education Courses

Prepared by the Council on Academic Affairs of the Association of Schools and Colleges of Optometry, Richard Hazlett, O.D., Chairman

These guidelines have been prepared for distribution throughout the optometric profession and education system.

Before final adoption of these guidelines, consideration was given to comments received from a wide professional audience.

Adopted
March 13 1975

Guidelines for Pharmacology Continuing Education

I. Purpose: To establish guidelines for continuing education courses in pharmacology for practicing optometrists.

II. Course objectives: to increase the optometrist's knowledge of:
- A. the systemic effects of systemic medications from a mechanistic, diagnostic and therapeutic standpoint,
- B. the ocular effects of systemic medications from a mechanistic, diagnostic and therapeutic standpoint,
- C. the ocular effects of ocular drugs from a mechanistic, diagnostic and therapeutic standpoint,
- D. the systemic effects of ocular drugs from a mechanistic, diagnostic and therapeutic standpoint, and
- E. diagnostic ocular pharmaceutical agents (DPA) --- theory and practice.

III. Guidelines for the course content.

A. General Pharmacology
1. Principles of Drug Actions
   a. Dosage forms
   b. Routes of administration
   c. Pharmacodynamics
      (1) absorption
      (2) distribution
      (3) fate (metabolism)
   d. Mechanisms of action
      (1) agonists and antagonists
      (2) receptors and acceptors
      (3) synergism, additivity and competitive antagonism
2. Host Factors and Placebos
3. Drug Categories (to include adverse ocular and systemic effects)
   a. Neuropharmacologic agents
      (1) anesthetics
      (2) CNS depressants (general)
      (3) effects of drugs on synaptic transmission
      (4) major and minor tranquilizers
      (5) antidepressants
      (6) CNS stimulants (general)
      (7) analgesics (selective CNS drugs)
   b. Cardiovascular agents
      (1) hemopoietics
      (2) antihypertensives
      (3) anticoagulants
      (4) cardiac glycosides
      (5) antiarrhythmics
      (6) vasolidators

c. Renal agents
d. Gastro-intestinal agents (especially anticholinergics)
e. Endocrine drugs (including steroids and the birth control pills)
f. Antiallergic agents
g. Antibiotic-chemotherapeutic agents
h. Antifungal agents
i. Disinfectants
j. Vitamins
k. Antiviral agents
l. Cancer chemotherapeutics
m. over-the-counter (OTC) agents

4. Drug abuse
5. Drug contraindications during pregnancy

B. Ocular Pharmacology

1. Principles of Drug Actions
   a. Dosage forms
   b. Routes of administration
   c. Pharmacodynamics
      (1) absorbtion
      (2) distribution
      (3) fate (metabolism)
2. Drug Categories, to include adverse ocular and systemic effects, and
   a. Neuropharmacoligic agents (autonomics)
      (1) review of nervous systems
      (2) autonomic drugs
         ((a)) sympathomimetics
         ((b)) parasympathomimetics
         ((c)) sympatholytics
         ((d)) parasympatholytics
      (3) ocular anesthetics
   b. Agents affecting trans-membrane fluid transport
   c. Antibacterial agents
   d. Antinflammatory agents
      (1) antihistamines
      (2) steroids
      (3) sympathomimetics
      (4) parasympatholytics
   e. Antiviral agents
   f. Antifungal agents
3. Differential Diagnosis of Ocular Neuromuscular Disorders
4. Review of Ocular Side Effects of Systemic Drugs
5. Review of Systemic Side Effects of Ocular Drugs
6. Review of Ocular Side Effects of Ocular Drugs
7. Ocular Urgencies and Emergencies, including glaucoma management
8. Drug Contraindications During Pregnancy
9. Medical Urgencies and Emergencies
10. Malpractice and Jurisprudence

IV. Teaching/Learning Activities

1. patient history
   a. Medical history
   b. Patient's current drug regimen, and the effects of thes drugs on ocular structure and function
2. Sterile technique--proper instillation of "drops"
3. Refractive examination and fundus examination
   a. pre-medication procedures
      (1) advice to patients (effects of DPAs)
      (2) tonometry
      (3) angle evaluation
   b. Application of mydriatic/cycloplegic and related examination procedures
   c. Post-medication procedures
      (1) corneal examination
      (2) tonometry
      (3) advice to patient (i.e., return of pupil to normal, etc.)
   d. Diagnostic techniques and instrumention
      (1) tonometry, including Goldmann applanation
      (2) angle evaluation with the biomicroscope, including genioscopy
      (3) stain analysis
      (4) monocular and binocular fundus examination, including indirect ophthalmoscopic and biomicroscopic procedures
4. Clinical competency

A. comprehensive examination procedure will be established to evaluate each student as to his skill and competency in the use of DPAs and relevant instrumentation, and

B. the effect of systemic medication on ocular structure

C. the effect of ocular instillations on systemic sturcute and function.

EXHIBIT B

Comparison of optometry and medical school training in ocular anatomy, physiology, pathology, general and ocular pharmacology

Major Points

1. Optometric training far exceeds medical school training in the eye and eye medicine.

2. Medical school graduates can prescribe over 2000 drugs, including all eye drugs, under the principle of unlimited licensure.

3. Doctors of optometry use some of the eye drugs, approximately 15-20 in number.

Iowa	June 8, 1979
Georgia	February 14, 1980
Arizona	April 1980

*both diagnostic and therapeutic

[In addition, there are eight (8) other states that do not statutorily prohibit the use of DPAs by optometrists; several of these states have attorney general opinions (+favorable) (-unfavorable) on this point: Alabama (AG-), Florida (AG+), Idaho (State Board Statement +), Indiana (AG+), Michigan (AG-), Minnesota, New Jersey (AG+), Virginia (AG-).]

For your information we are including an updated map showing geographically the utilization of pharmaceutical agents by optometrists.

Public Benefits of the Legislation

1. Availability of Services

Ophthalmologists are located in only 5 Alaskan cities: Anchorage, Fairbanks, Juneau, Ketchikan and Soldotna. Optometrists are located at the following cities not served by ophthalmologists: Sitka, Kodiak, Bethel, North Pole, Wasilla, Palmer, Kenai. In most of these cities, a patient with minor eye disease has no practical recourse but to see a general physician, who does not have the optometrist's degree of training in differential diagnosis or the instruments with which to accomplish the diagnosis. Since optometrists make trips to many rural and bush areas, they can provide basic eye health services to villages now principally served by health aides, with 6 to 24 weeks of training and having only radio contact for doctor consultation.

2. Quality of Services

Besides their obvious value to the health aide system, optometrists can serve as a valuable resource to physicians in cities not served by an ophthalmologist. This occurs with the optometrist employed by the native health corporation in Bethel (not bound by the drug restrictions of the Alaska optometry law). General physicians, to their credit, tend to refer patients to the most qualified practitioner in their area. It is not surprising therefore, that MDs in Kodiak have endorsed previous drug usage bills in optometry.

3. Cost of Services

Just as a general practitioner charges a lower fee (typically half) than does a specialist for doing similar work (obstetrics, pediatrics, etc.), so an optometrist (a generalist and primary care provider with respect to the eye) can be expected to charge less for treating minor eye diseases than does the ophthalmologist (the specialist).

Criticism of the Legislation by Ophthalmologists,

and Answers to the Criticism

1. The legislation is not necessary. The present system of ophthalmologists, general practitioners and health aides handles the eye care needs of Alaskans quite well.

Doctors of optometry are an underutilized resource. They can deliver services of higher quality, at greater availability and lower cost than can the existing system alone. This is detailed in the section entitled, Public Benefits of the Legislation.

2. Optometrists claim competancy, but their training programs are inadequate, particularly as to qualifications of faculty, and clinical experiences available to their students.

Optometry schools receive state and federal funds, and are accredited by both regional and professional accrediting organizations. It is not in the interest of schools or the profession at large to allow inadequate programs to exist in this sensitive area, for the sake of saving money. All optometric faculties include MDs, and PhDs in such specialized fields as physiology, pharmacology, biochemistry and microbiology. Many are present or past members of medical school faculties. With drugs, as in other areas of the professional curriculum, optometrists are trained well beyond the level at which they must function in day to day practice. While it is impossible to have too much clinical experience, optometry students enjoy more than adequate exposure to the common eye diseases they must deal with. In their two years of clinic experience, they see much more eye pathology than general medical students, but less than residents (trainees) in ophthalmology. Many rare eye diseases will not be seen in a three year residency in ophthalmology.

3. Optometrists can detect abnormalities but cannot diagnose. Treatment requires, first of all, an accurate diagnosis.

Optometrists can diagnose some eye diseases; definitive diagnosis of others requires specialized examination by the ophthalmologist. At still other times, consultation with the specialist will allow a diagnosis to be made. The same is true for a general physician or for a specialist whose case lies partly in the province of another specialist. No practitioner is going to be foolish enough to treat a case if he isn't sure what it is, if more competant authority is reasonably available.

4. Optometrists study the eye but they are not trained in broad medical principles. The general physician knows the entire body and can generalize certain principles to the eye even though he may not have as many hours of study specifically in the eye as the optometrist.

Optometrists study general anatomy, physiology, pathology and pharmacology precisely because certain general principles need to be understood before considering a particular organ system like the eye. The educational model is similar to dentistry. In both professions, the body as a whole is studied in less detail than is done by medical students, because neither are treating kidney disease or setting broken legs. Yet the necessary general principles are learned. Both dentists and optometrists are medically trained, in ways that are appropriate to their respective fields of work.

5. Given drugs for diagnosis and some treatment, ODs would go in over their heads, attempt to be ophthalmologists.

This is not the case in other fields and there is no evidence that it has happened or will happen in optometry. Malpractice insurance rates are no higher in drug states than in non-drug states. Besides a basic conservatism common to all professionals, optometrists are constrained by the knowledge that their malpractice insurance coverage does not extend to activities that are outside their recognized scope of practice.

6. Defining procedures "as taught by schools and colleges of optometry" is too general, could allow the optometry board to do almost anything.

"As taught" is purposely general, to allow the board to react to continuing changes in the education of the profession. It is the responsibility of the board, as an agency of the State of Alaska, to know the areas in which optometrists are trained and educated, to examine them for competance and license or fail to license them accordingly. Most board members are also practitioners. It is not in their interest to license fellow practitioners to do procedures that could bring discredit to the profession or raise malpractice insurance rates. This is also true of other health care regulatory boards.

7. Drug usage by optometrists constitutes competition in the historical province of ophthalmology.

Ophthalmologists, nationally and in Alaska, tend to concentrate in urban areas, where they spend a majority of their time practicing optometry. In the last 15 years they have entered the field of contact lenses, an area pioneered by optometry. Much earlier, their predecessors (oculists), entered the optometrists' field of refraction after abandoning the belief, common among Victorian era physicians, that glasses weakened the eyes. Competition both ways is appropriate. It is not in the public interest to exclude a qualified bidder from the marketplace.

APPENDIX

Full curricula of optometry and medical schools compared in Exhibit B

Southern College of Optometry

Catalog 1979-80

FOURTH PROFESSIONAL YEAR (CONTINUED) SPRING QUARTER			HOURS CREDIT
Optometry	430	Optometry Seminar: Curent Problems (3 HRS. LEC.)	3
Optometry	431	Clinical Case Analysis III (2 HRS. LEC.)	2
Biomedical	432	Vision Science Seminar: Current Problems (2 HRS. LEC.)	2
Clinic	430	General Clinic Practice VII (1 HR. LEC., 16 HRS. LAB)	5*
Clinic	431	**Specialty Clinics (Two required, each for 1 Qtr. Hr. of credit) (8 HRS. LAB)	2
		TOTAL	14

*Credit will be reduced by 1 quarter hour after 1979-80.

**A minimum of two quarter hours of credit each must be completed in Contact Lenses and in Orthoptics & Vision Training, during the fourth year, as well as a minimum of one quarter hour of credit in Pathology. Additional clinic rotations may be selected from Geriatrics, Low Vision, Dermatology, Neurology, Pediatrics, Neurophysiology, or any other approved clinical area.

COURSE DESCRIPTIONS

Courses numbered in the 100 series are for first professional year students, 200 for second professional year students, 300 for third professional year students, and 400 for fourth professional year students. The letter E following a course number indicates that the course is offered for college credit through the Continuing Education Program. The four-year program provides more than 4000 clock hours of instruction in optometric science and clinical optometry and carries a minimum of 232 quarter hours of credit.

The curriculum is organized for administrative purposes into three departments: Biomedical Sciences, Optometry and Clinic. The Biomedical Sciences Department is inter-disciplinary, offering sequences in anatomy and physiology, chemistry, physics, physiological optics and psychology. The Optometry Department offers diversified instruction in all phases of optometric theory and practice. The Clinic Department offers extensive experience in out-patient vision care.

BIOMEDICAL SCIENCES DEPARTMENT

110 HUMAN ANATOMY & PHYSIOLOGY I: STRUCTURE & FUNCTION (6 quarter hours)
Five hours of lecture and one two-hour laboratory per week. A course covering basic cell biology, general human embryology, ocular embryology and histology, with detailed emphasis on the tissue structure of the eye and ocular adnexa. The gross anatomy of the human body is studied, particularly the skull, circulatory system of the orbit, orbital contents, and ocular adnexa. The course also includes general physiology of the organ systems.

111 VISUAL OPTICS I: PHYSICAL AND GEOMETRICAL OPTICS (5 quarter hours)
Three hours of lecture and one two-hour laboratory. A detailed study of the variations in light rays between different optical media. Includes the theory of rectilinear propagation, reflection and refraction at plane, spherical, and cylindrical surfaces, and thin lenses.

120 HUMAN ANATOMY AND PHYSIOLOGY II: STRUCTURE AND FUNCTION (6 quarter hours)
Five hours of lecture and one two-hour laboratory per week. Continuation of 110.

121 VISUAL OPTICS II: PHYSICAL AND GEOMETRICAL OPTICS (4 quarter hours)
Three hours of lecture and one two-hour laboratory. A continuation of Bio 111. Includes the Gaussian system, the schematic eye and its applications, selected optical instruments, common aberrations, and the effect of apertures. Prerequisite: Bio. 111.

122 VISUAL PERCEPTION: PSYCHOPHYSIOLOGICAL OPTICS (5 quarter hours)
Four hours of lecture and one two-hour laboratory per week. An introduction to Vision Science, which involves the behavior-scientific approach to understanding vision and visual perception. Special emphasis is placed on monocular visual function and on the theories and data relevant to visual perceptions.

130 HUMAN ANATOMY AND PHYSIOLOGY III: STRUCTURE AND FUNCTION (6 quarter hours)
Five hours of lecture and one two-hour laboratory per week. Continuation of 120.

131 VISUAL OPTICS III: PHYSICAL AND GEOMETRICAL OPTICS (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. Physical Optics comprises those phenomena bearing on the nature of light, including processes which involve the interaction of light with matter. Some topics considered are nature and propagation of light, photometry, dispersion, interference, diffraction, polarization, and spectra.

133 VEGETATIVE PHYSIOLOGY: OCULAR BIOCHEMISTRY (3 quarter hours)
Three hours of lecture per week.
Analysis of the intraocular fluids, aqueous chemistry and flow; secretory mechanism, intraocular pressure; vitreous structure and protein; lens and its function related to its composition. Lens proteins, metabolism cataract. The cornea and sclera; metabolism, nutrition and growth processes; retinal metabolism, glycolysis.

210 PRINCIPLES OF MEDICINE I: GENERAL PATHOLOGY (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. An introduction to reaction of the body as a whole to disease. Injuries including genetic, metabolic, infectious, immunologic degenerative, hemorrheologic and neoplastic processes are reviewed.

211 PHYSIOLOGICAL OPTICS I (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A study of the eye as an optical system including the dioptric and physiological components, and the functioning of the visual system.

212 NEUROANATOMY AND NEUROPHYSIOLOGY I (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. Embryological development, structure, and function of the nervous system are studied. Functional components of the nervous system with special reference to modifications are studied.

* 213 PRINCIPLES OF PHARMACOLOGY AND THERAPEUTICS (2 quarter hours)
Two hours of lecture per week. The course covers basic principles of pharmacology, including drug absorption, distribution, metabolism, and excretion. The autonomic nervous system will be covered and an introduction to drug dosage forms and drug dosage regimens.

* 220 PRINCIPLES OF MEDICINE II: CLINICAL PATHOLOGY AND PHARMACOLOGY (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. The study of the etiology, pathophysiology, treatment and ocular complications of systemic diseases. An organ system modular approach will be adop

221 PHYSIOLOGICAL OPTICS II (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A stud monocular sensory aspects of vision and the physiology of ocular mot

224 OPHTHALMIC PATHOLOGY I (6 quarter hours)
Five hours of lecture and one two-hour laboratory per week. A thoro consideration of diseases of the eye, its adnexa, and the visual pathv and of pathologically induced changes in the visual fields. Techniques instrumentation for detection, measurement, and diagnosis of eye orders are studied intensively.

* 230 PRINCIPLES OF MEDICINE III: CLINICAL PATHOLOGY AND PH/ MACOLOGY (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A contin tion of Bio. 220.

231 PHYSIOLOGICAL OPTICS III: MONOCULAR SENSORY AND BINOCUL VISION (3 quarter hours)
Two hours of lecture and one two-hour laboratory per week. A continuat of monocular sensory aspects of vision, color vision and binocular visi

234 OPHTHALMIC PATHOLOGY II (6 quarter hours)
Five hours of lecture and one two-hour laboratory per week. Continuati of Bio. 224.

235 APPLIED PSYCHOLOGY: PATIENT BEHAVIOR (1 quarter hour)
One hour of lecture per week. The psychology of patient handling, wi respect to refractive error and numerous ocular and visual anomalie Patient management with respect to age (infancy to the elderly) a counseling, generally. Special attention is given to how the doctor explai and informs the patient of clinical entities, particularly "referral typ cases. Emphasis will be given to the commonest conditions met with practice, including cataract, glaucoma, retinal separation, multip sclerosis, strabismus, and refractive error.

* 310 PRINCIPLES OF MEDICINE IV: PEDIATRICS AND PEDIATRIC OPTOMETR (3 quarter hours)
Three hours of lecture per week. The course will be concerned with growt and development of the young; childhood diseases; hereditary and geneti disorders of the eye and adnexa in pediatric ophthalmic medicin emotional components in pediatrics; disease processes and therapeutic of the eye and adenxa. The ophthalmic examination of infants an children; ophthalmic optics and dispensing for refractive errors and th correction of refractive errors, the correction of low vision problems i children.

312 NEUROANATOMY & NEUROPHYSIOLOGY II (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A laboratory course dealing with the electrical properties of the body and the means of measuring and interpreting electrical activity of the ner[illegible]stem and the muscular system: EEG, EMG, ERG, EOG.

* 313 ADVANCED PRINCIPLES OF PHARMACOLOGY & THERAPEUTICS (2 quarter hours)
Two hours of lecture per week. The course covers principles of phar-

macology, including drug absorption, distribution, metabolism, and excretion. The autonomic nervous system will be covered and an introduction to drug dosage forms and drug dosage regimens.

320 PRINCIPLES OF MEDICINE V: GERONTOLOGY & GERIATRICS (3 quarter hours)
Three hours of lecture per week. The processes of aging; diseases of the elderly. Disease processes and therapeutics of the aging eye and adnexa. Ophthalmic optics and correction of refractive errors in the geriatric patients, aphakia, correction of low vision problems in the elderly.

321 PRINCIPLES OF MEDICINE VI: NEUROLOGY (2 quarter hours)
Two hours of lecture per week. Introduction to neurology, including the peripheral nervous system, diseases of the spinal cord and brain; clinical examination of the nervous system; special senses; neurological symptoms; diseases of the cranial nerves; common psychiatric disorders, neurosis, psychosis, alcoholism, anxiety, etc.

323 PHARMACOLOGY: OCULAR & SYSTEMIC PHARMACOLOGY (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A course covering basic concepts of current ocular pathological problems. Included are consideration of local and systemic treatment of ocular pathologies, use of diagnostic agents, and ocular side effects of non-ocular drugs.

330 PRINCIPLES OF MEDICINE VII: DERMATOLOGY (2 quarter hours)
Two hours of lecture per week. Appreciation of skin disorders with emphasis on ocular or adnexa implications. Topics will include collagen diseases, pre-cataract skin changes, psoriasis, facial tumors, tumors of eyelid, eyelashes, eyebrows, eczemas; Seborrheic, atropic and allergic dermatitis; Steven-Johnson and dry eye syndrome; Xeroderma, Lipoid Storage Diseases, Xanthalasma; Seborrheic exfoliation. Viral diseases of skin with ocular manifestation, including Vaccinia, Herpes Simplex, Herpes Zoster, Chickenpox, measles, Verrucae; Bullous Dermatoses, disturbances of pigmentation, nutritional disturbances and drug reactions.

333 PHARMACOLOGY: CLINICAL PHARMACOLOGY (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. An advanced course designed to integrate the student's knowledge of pathology and pharmacology. Special emphasis will be placed on further developing differential diagnostic skills, the skills necessary to manage and/or monitor patients who manifest diagnosed ocular conditions and/or systemic conditions with ocular and visual complications, and in addition, to develop further screening techniques for detecting high incidence general health problems.

432 VISION SCIENCE SEMINAR: CURRENT PROBLEMS (2 quarter hours)
Two hours of lecture per week. Various topics concerning aspects of vision science are discussed in terms of current problems.

OPTOMETRY DEPARTMENT

110 BASIC OPTOMETRY (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. Introduction to the use of the trial frame, trial case, retinoscope, ophthalmoscope, ophthalmometer and other instruments used in the visual analysis. Normal refractive states and deviations are studied along with common visual anomalies. Techniques of taking the principal optometric data and the case history are introduced, followed by the evaluation of single findings and the inference of deviant processes from patterns of findings.

111 PREVENTATIVE AND COMMUNITY OPTOMETRY: EPIDEMIOLOGY AND RESEARCH METHODOLOGY (4 quarter hours)
Four hours of lecture per week. Statistical methods as applied to data obtained in optometric examinations and visual science. Measures of central tendency, variability, correlation, standard errors, and tests of significance of commonly used statistics including introduction to the analysis of variance. Experimental design and logic of controlled experimentation, reliability of observations, statistical versus experimental means of controlled experimentation, analysis, interpretation and communication of experimental results.

120 INTERMEDIATE OPTOMETRY I (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A continuation of 110.

121 PREVENTATIVE AND COMMUNITY OPTOMETRY: JURISPRUDENCE (2 quarter hours)
Two hours of lecture per week. Prevailing statutory and common laws relevant to rights and responsibilities of the optometrist are presented and the legal principles with which an optometrist should be familiar are discussed.

130 INTERMEDIATE OPTOMETRY II (5 quarter hours)
Four hours of lecture and one two-hour laboratory per week. A continuation of 120.

131 HISTORY OF OPTOMETRY (1 quarter hour)
One hour of lecture per week. The development of the profession of optometry from antiquity to the present is surveyed. The role of certain optometric organizations, as well as noted figures in the history of vision science and optometry are studied for perspective.

210 ADVANCED OPTOMETRY I (4 quarter hours)
Three hours of lecture and one two-hour laboratory. The procedures and rationales of graphical, normative and functional visual analysis are studied and compared. Selected optometrics are compared in relation to the diagnosis and treatment of various visual problems.

220 ADVANCED OPTOMETRY II (4 quarter hours)
Three hours of lecture and one two-hour laboratory. A continuation of 210.

222 OPHTHALMIC OPTICS I (2 quarter hours)
Two hours of lecture per week. Fundamentals of ophthalmic mechanics, pertinent mathematics, practical training in the fabrication of common types of ophthalmic lenses and spectacles. Dispensing procedures of fit-

ting and adjusting of spectacles to various facial contours are included. Tool kits are required.

230 ADVANCED OPTOMETRY III (5 quarter hours)
Four hours of lecture and one two-hour laboratory. A continuation of 220.

232 OPHTHALMIC OPTICS II (2 quarter hours)
One hour of lecture and one two-hour laboratory per week. A continuation of Opt. 222. Tool kits are required.

310 CONTACT LENS PRACTICE I (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. The history and development of contact lenses, lectures on the anatomy and physiology of the cornea and eyelids, optics, instrumentation, and lens design. Symptomatology with emphasis on differential diagnosis is presented. Flurorescein analysis of diagnostic lens/cornea relationships is emphasized. Material concerning lens modification procedures, verification of lenses, and fitting techniques is presented in the laboratory.

311 ORTHOPTICS & VISION TRAINING I (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. A study of the influence of vision on human potential, performance, and behavior at various levels of development.

320 CONTACT LENS PRACTICE II (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. Advanced optics, bifocal lenses, scleral lenses, and contact lens telescopic systems are presented. Prerequisite: Optometry 310.

321 ORTHOPTICS & VISION TRAINING II (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. Fundamental principles and modern concepts of vision training and orthoptic procedures are presented as they apply to improvement of vision function, reestablishment of efficient binocular vision, and modification of behavior through performance and achievement gains in the individual.

331 PREVENTATIVE & COMMUNITY OPTOMETRY: ENVIRONMENTAL VISION (3 quarter hours)
Three hours of lecture per week. An analysis of the role of the optometrist and the practice of optometry in industry and other public, military, and educational settings where large groups of individuals are sharing a common environment.

332 VISION SCIENCE LABORATORY (2 quarter hours)
A group of courses from which the student elects one. Each course includes two hours of lecture or one hour of lecture and one two-hour laboratory per week and is research oriented, with classroom activity devoted to clarifying and discussing laboratory techniques. Offered to appeal to student interests in pursuing special research topics in greater depth in areas such as Physical Optics, Geometrical Optics, Physiological Optics, Psychological Optics, and Experimental Optometry.

333 LIMITED VISION (PARTIAL SIGHT) (4 quarter hours)
Three hours of lecture and one two-hour laboratory per week. Differential procedures of evaluation of patients with severe and intractable visual deficits. Anatomical, physiological, and psychological aspects are integrated in considering the most suitable optic compensation.

401 PREVENTATIVE & COMMUNITY OPTOMETRY: ECONOMICS & PRACTICE MANAGEMENT (4 quarter hours)
Four hours of lecture per week. Professional and economic aspects of the ethical practice of optometry are studied in detail. Special attention is given to selection of a practice location, planning and equipping the office, fee structures, office and personnel management, records systems, and effective communications at the professional level. The basic concepts of ethical professional conduct and their application to standards of practice are considered from the points of view of the individual optometrist, the patient, the profession, and the public.

402 PREVENTATIVE & COMMUNITY OPTOMETRY: PUBLIC HEALTH (2 quarter hours)
Two hours of lecture per week. A general introduction to the principles of public health, the concepts of epidemiology, and the structure and functioning of local, state, and federal health departments and agencies.

410 OPTOMETRY SEMINAR: CURRENT PROBLEMS (3 quarter hours)
Three hours of lecture per week. Modern techniques used in various aspects of optometry, including contact lenses, general refraction, pathology, etc.

411 CLINICAL CASE ANALYSIS I (2 quarter hours)
Two hours of lecture per week. Analysis of patient cases, including general, and various specialty areas.

420 OPTOMETRY SEMINAR (2 quarter hours)
Two hours of lecture per week. A continuation of 410.

421 CLINICAL CASE ANALYSIS II (2 quarter hours)
Two hours of lecture per week. A continuation of 411.

430 OPTOMETRY SEMINAR: CURRENT PROBLEMS (3 quarter hours)
Three hours of lecture per week. A continuation of 420.

431 CLINICAL CASE ANALYSIS III (2 quarter hours)
Two hours of lecture per week. A continuation of 421.

CLINIC DEPARTMENT.

Satisfactory completion of all course work in the Optometry Department (excluding History of Optometry) and Clinic Department in the First and Second Professional Years is prerequisite to the Third Professional Year Clinic Department work. Additionally, the three-quarter, Second Professional Year general and ocular pathology series; the Second Professional Year course in Pharmacology and Therapeutics; and the Second Professional Year course in Applied Psychology, all in the Biomedical Department, are prerequisites for Third Professional Year clinic assignments.

110 CLINIC ORIENTATION (1 quarter hour)
One two-hour laboratory per week. An orientation to the clinic by means of participation in school screenings and external clinics, to the extent of recording and assisting upper classmen in performance of clinical routines. This one-hour course is extended over the first three quarters of the optometry program and is designed to afford the beginner an appreciation of the social aspects of vision care.

210 CLINICAL PROCEDURES (1 quarter hour)
One two hour clinic laboratory per week. This course is an introduction to clinical procedures, emphasizing patient handling, case histories, record keeping, preliminary testing, and instrumentation. This one-hour course is extended over the Fall, Winter and Spring quarters of the Second Professional Year.

* 310 CLINICAL PRACTICE I (3 quarter hours)
↓ One hour of lecture and two four-hour laboratories per week. Extensive familiarization with clinical facilities and procedures and individually supervised experience in the coordination and application of various theories and techniques of optometry in the out-patient clinic. The taking of case histories, measurement of visual skills, refractive status, status of accommodation and convergence and their coordination, pathology and visual fields examination, subnormal vision, eikonometry, prescribing and dispensing.

320 CLINICAL PRACTICE II (4 quarter hours)
One hour of lecture and three four-hour laboratories per week. A continuation of 310.

330 CLINICAL PRACTICE III (4 quarter hours)
One hour of lecture and three four-hour laboratories per week. A continuation of 320.

331 SPECIALTY CLINICS (2 quarter hours)
Two four-hour laboratories per week. Introduction to clinical procedures in Contact Lenses and in Orthoptics and Vision Training.

400 CLINICAL PRACTICE IV (5 quarter hours)
One hour of lecture and four four-hour laboratories per week. A continuation of 330.

401 SPECIALTY CLINIC (2 quarter hours)
A topic selected from a wide variety of subjects. A minimum of two quarter hours of credit each must be completed in Contact Lenses and in Orthoptics and Vision Training, during the fourth year, as well as a minimum of one quarter hour of credit in Pathology. Additional clinic rotations may be selected from Geriatrics, Low Vision, Dermatology, Neurology, Pediatrics, Neurophysiology, or any other approved clinical area.

410 GENERAL CLINIC PRACTICE V (5 quarter hours)
One hour of lecture and four four-hour laboratories per week. A continuation of 400.

411 SPECIALTY CLINICS (2 quarter hours)
Two four-hour laboratories per week. A continuation of 401.

420 GENERAL CLINIC PRACTICE VI (6 quarter hours)
One hour of lecture and five four-hour laboratories per week. A continuation of 410.

421 SPECIALTY CLINICS (3 quarter hours)
Three four-hour laboratories per week. A continuation of 411.

430 GENERAL CLINIC PRACTICE VII (5 quarter hours)
† One hour of lecture and four four-hour laboratories per week. A continuation of 420.

* 431 SPECIALTY CLINICS (2 quarter hours)
Two four-hour laboratories per week. A continuation of 421.

FOURTH-YEAR EXTERNSHIPS. The externship program is designed for fourth-year clinicians in optometry to broaden and supplement their experience in evaluating, diagnosing, and treating conditions of the eye and visual system. Externships are five weeks in duration, and they may be scheduled during any of the four quarters of the fourth professional year. Fourth-year students are required to take at least one externship prior to graduation. A student who is unable to participate in an assigned externship for exceptional reasons must consult with the Dean of Faculty.

It is permissible for a fourth-year student to participate in more than one externship, or in an externship of longer than five weeks in duration. No more than one quarter may be spent in any one location.

The externship program provides a wide range of geographical locations in hospital, private clinic, and private practice settings. In all cases the extern serves under the direct supervision of optometric, osteopathic, or medical physicians who hold at least temporary appointments to the adjunct faculty of the College.

Eligibility requirements for externship participation are as follows:

1. The student must be in good standing (i.e., not subject to termination for disciplinary reasons); and
2. Not on probation (either academic or disciplinary); and
3. Be a regular student (i.e., pursuing a course of study leading to certification or to a degree offered by the College); and
4. Must have satisfactorily completed all courses in the O.D. degree curriculum through the spring quarter of the third year; and
5. Must have passed clinical competency evaluation.

EXTERNAL STUDIES PROGRAM COURSES

133E VEGETATIVE PHYSIOLOGY: OCULAR BIOCHEMISTRY (3 quarter hours)
Three hours of lecture per week. Analysis of the intraocular fluids, aqueous chemistry and flow; secretory mechanism, intraocular pressure; vitreous structure and protein; lens and its function related to its composition. Lens proteins, metabolism cataract. The cornea and sclera; neurological aspects of sensation; metabolism, nutrition and growth processes; retinal metabolism, glycolysis.

316E GENERAL PHARMACOLOGY (3 quarter hours)
Three hours of lecture per week. A comprehensive course covering contemporary therapeutic principles and agents. Included are origins, chemical nature, mechanism of actions and interactions, major effects, and absorption and fate of the most commonly used drugs.

326E OCULAR PHARMACOLOGY (3 quarter hours)
Three hours of lecture per week. A course covering basic concepts of current ocular pathological problems. Included are consideration of local and systemic treatment of ocular pathologies, use of diagnostic agents, and ocular side effects of non-ocular drugs.

336E CLINICAL PHARMACOLOGY (3 quarter hours)
Two hours lecture and one two-hour laboratory per week. An advanced course designed to integrate the student's knowledge of pathology and

Medical School

UNIVERSITY OF MINNESOTA

Medical Student Government and Student Societies

The Medical Student Council, the student governing body, is composed of representatives from each class and from several minority groups that are elected each year. Council members meet regularly and frequently to discuss problems common to the student body and to plan a variety of projects and service activities. The council represents the interests of the medical students to the administration and the faculty. The medical students, through the council, have adopted an honor code covering examination procedures. Upon admission to the Medical School, each student, after suitable briefing, signs a statement indicating that he or she is well acquainted with the provisions of this code and agrees to abide by it. The Ethics Committee of the Medical Student Council is responsible for investigating reports of any suspected violations of this code.

There are several medical fraternities available for men and one medical sorority available for women. These organizations play a major role in the social life of many medical students.

The national medical scholastic society, Alpha Omega Alpha, selects academically high-ranking students from the junior and senior classes for election to membership. The James Moore Society is composed of 25 students elected by the membership on the basis of research interest and achievement. The group meets monthly at the home of one of several faculty members for discussions of medical subjects and other topics of current interest. The Cyrus P. Barnum, Jr., Society, an organization of students working toward the combined M.D.-Ph.D. degree, meets regularly for scientific and informative evening discussions to which speakers are invited.

The American Medical Student Association (AMSA), an integral part of the Medical Student Council, is incorporated as one of the major activities of the council. The association chairperson acts as local AMSA chapter president. This group sponsors certain school-wide functions through the student council. The membership fee is nominal, and members receive monthly copies of the national periodical.

The wives of many medical students are active in the Women's Auxiliary of the Student American Medical Association (WA-SAMA). This group holds monthly meetings featuring speakers who discuss topics of interest.

IV. M.D. PROGRAM

The Medical School provides the faculty and facilities for instruction of students in the course in medicine. The primary goal of medical education is to produce good physicians possessing sound training in quantitative human biology. Beyond the Medical School and the award of the M.D. degree, all graduates are obliged, by requirements for specialization and/or licensure, to undertake additional formal education or training. And beyond these formal programs are the continuing education activities that individuals in practice must demand of themselves. Much of the success of the sequence of undergraduate-graduate-continuing education, called the continuum of medical education, is dependent on individual responsibility and initiative. Therefore, to encourage such development in medical students, the concept of the student as learner is emphasized in the curriculum.

The course of study for the M.D. degree consists of a core program of 8 academic quarters and a track (option, elective) program of 5 academic quarters. Within the core program, the first 4 quarters, termed Phase A, include course work in basic medical sciences, behavioral science, and introductory experiences with patients. The next 4 academic quarters of the core program, termed Phase B, consist of integrated interdepartmental courses organized and taught along organ, system, and topical lines. In the Phase D portion of the curriculum students, with the help of an adviser, plan a program of elective courses. All students must include in this program experience in both medicine and surgery that will be suitable preparation for advanced clinical responsibilities in subsequent training after completion of work for the M.D. degree. Students making satisfactory progress may, after adviser, track, and special committee review, be approved to complete Phase D in less than 5 academic quarters (minimum 3 quarters of study) providing they make arrangement for a first year of graduate study in a teaching hospital. Alternatively, students may complete Medical School in 5 quarters in Phase D with no restriction or requirement as to type of graduate program activity. Students are required to take and pass parts I and II of the National Board Examinations as a requirement for graduation and the M.D. degree.

Phase A

In the first 4 quarters of the Medical School program, studies cover the structure and function of the human organism and the emotional, social and psychological development of the individual. In Phase A, the student begins clinical activities through tutorial assignments and clinical correlation sessions in Introduction to Clinical Medicine. The Phase A program is intended to involve the student physician in individual synthesis and correlation of the basic sciences with clinical applications and in direct, personal confrontation with human illness and patient care. The required program in Phase A consists of the following courses:

Fall Quarter and Winter Quarter (A-1 and A-2)

- Gross Anatomy (Anat 5100-5101)
- Human Histology (Anat 5103-5104)
- Embryology (Anat 5106-5107)
- Medical Biochemistry (MdBc 5100-5101)
- Introduction to Clinical Medicine (InMd 5100-5101)
- Behavioral Science (AdPy 5107-5108)

Spring Quarter and Summer Quarter (A-3 and A-4)

- Medical Physiology (Phsl 5110-5111)
- Pathology (Path 5101)
- Neuroanatomy (Anat 5111)

Introduction to Clinical Medicine (InMd 5002-5003)
Microbiology (MicB 5205-5206)
Pharmacology (Phcl 5110-5111) 8 cr. See p 56

In both fall and winter quarters, students may elect to attend one of several weekly small group meetings at which topics of personal concern, current interest, or medical importance are brought up for discussion.

Phase B

The 4-quarter sequence of Phase B begins in the fall and consists of integrated, interdepartmental courses designed to highlight fundamental principles in clinical medicine and to emphasize pathophysiologic concepts. The courses are organized in relation to organs, systems, or topics. Two courses in the Phase B sequence, Student as Physician and Human Behavior, are designed, respectively, to increase the student's clinical skills and knowledge and to enhance the student's awareness of psychopathology and psychological factors related to illness.

Core activities in some courses consist of small group discussions, with lectures and other formal presentations optional. Extensive syllabi and reference lists are provided for each student. The student is encouraged to exercise independent and mature judgment in the learning process by arranging her or his own activities. The student may utilize this time for study in the Learning Center, participation in additional clinical experiences, or completion of elective courses available to students in Phase B. The formal Medical School activities in Phase B are divided into three categories:

1. Core Time—Lectures or small group discussions related to a specific organ, system, or topic, and weekly clinical tutorials. Attendance is expected.
2. Optional Activities—Supplementary scheduled activities, such as lectures that expand material offered in the core or, in some cases where lectures are optional, films, additional clinical experiences, laboratories, demonstrations, clinical rounds, teaching rounds, or clinical-pathological conferences. Attendance is voluntary.
3. Electives—Courses offered throughout the year covering various topics of interest to medical students but not necessarily related to the core program.

The required program in Phase B consists of the following courses:

REQUIRED PHASE B COURSES

InMd 5110—Medical Genetics	2 cr
InMd 5220—Cardiovascular	3 cr
InMd 5221—Respiratory	3 cr
InMd 5228—Ear, Nose, and Throat	2 cr
InMd 5212—Human Behavior	5 cr
InMd 5231—Gut	4 cr
InMd 5234—Biometry and Epidemiology	1 cr
InMd 5226—Blood	3 cr
InMd 5222—Fluid and Electrolytes	3 cr
InMd 5223—Kidney and Urinary Tract	3 cr
InMd 5230—Nervous System and Muscle Disorders	5 cr
InMd 5232—Bones, Joints, and Connective Tissue	4 cr
InMd 5224—Endocrine and Metabolism	4 cr
InMd 5225—Reproduction	4 cr
InMd 5227—Skin	2 cr

InMd 5229 Eye 2 cr
InMd 5233 Human Sexuality 3 cr

Phase D

Phase D is designed to extend the curriculum goals of relevance, flexibility, and the student as learner. Prior to completion of Phase B, students select a track and an adviser within that track for the balance of the Medical School program. Students are reminded not to confuse the selection of a track at this point with their eventual need to choose a practice specialty. The six broadly defined career pathways or tracks, encompassing all disciplines and providing varied options for all students, are the following:

Track 1—Medicine, Pediatrics, Medical Specialties including Obstetrics
Track 2—Surgical Specialties
Track 3—Psychiatry and Behavioral Sciences
Track 4—Neurological Sciences
Track 5—Family Practice
Track 6—Medical Investigation and Special Programs

The student, with the help of an adviser, develops an individualized elective program of study related to personal interests and career goals. Each student's program is approved and progress monitored by the appropriate track committee.

There are electives strongly recommended for the several tracks. In general, and as a logical extension of the core material and tutorial format in Phase B, each student is advised to spend 12 to 18 weeks in externship-type electives such as those offered in medicine, neurology, obstetrics, pediatrics, psychiatry, and surgery. The balance of the individual program is drawn from the extensive elective courses offered by each Medical School department. Students may consider elective work in other medical schools, in the United States or elsewhere. Up to 1 quarter of credit for such activities may be approved by the adviser and track committee. The flexibility of the elective program and the general nature of the pathways provide an opportunity for creative and interested students to avail themselves of the widest possible spectrum of educational activities to further their professional growth.

Students are eligible to begin Phase D on completion of Phases A and B and after taking part I of the national boards. Students with deficiencies in Phase A or B or who have taken but not passed part I are reviewed by the Scholastic Standing Committee for a decision as to arrangement of their continuing academic program. The content of Phase D, approved by the adviser and Phase D track committee, is determined by a review of each student's educational needs in light of his or her projected career goals. There are no restrictions on the type of internship or first-year training program for students graduating in 4 years. In the standard 13-quarter curriculum, in the case of 3-quarter programs, students must provide evidence that they will spend their first postdoctoral year (internship or first year of graduate training) in a university or other major affiliated teaching hospital.

The major goals of the orthopedic surgery courses are to provide the medical student with the foundation necessary for performing a basic neuromusculoskeletal examination of the patient, for correlating the clinical expressions of disease with basic science knowledge, and for recognizing those patient problems that require immediate appraisal and resolution. In a number of clinical electives the student experience has the option of participating in the diagnostic and therapeutic management of patients with orthopedic and traumatic disabilities; this advanced experience provides an understanding of fundamental orthopedic principles, the scope of orthopedic surgery, and the opportunities for both clinical and basic investigation in orthopedic surgery.

OPTOMETRY
SUITE 204 DENALI PROFESSIONAL CENTER
3401 DENALI STREET
ANCHORAGE, ALASKA 99503

HESS

January 29, 1984

The Honorable Mae Tischer
Chairman, Health, Education and
Social Services Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

The attached draft committee substitute for HB 225 incorporates the following changes requested by your committee:

1. Specific exclusion of controlled substances and surgery (Sections 4 and 5)

2. Listing of categories of drugs that will be permitted (Sec. 1)

3. Specific requirements for certification, with mandated continuing education after certification (Section 1)

Previous versions of the bill had changes in AS 08.64 (medical practice act) that appear no longer necessary, since the 1983 revision of the medical practice act adds language (AS 08.64.170(a)(4)) stating that "A person who is licensed or authorized under another chapter of this title may engage in a practice that is authorized under that chapter."

In Section 1, we have added the further limitation that drugs be topically applied only. (In North Carolina and Florida, optometrists can use systemic drugs. The topical limitation will effectively restrict Alaskan optometrists to mild cases of anterior eye pathology.)

In Section 2, we have revised AS 08.72.240(9) (Grounds for imposition of disciplinary sanctions) to make it consistent with the intent of the bill.

Section 3 adds non-compliance with certification provisions as grounds for disciplinary sanctions.

The attached article from the Journal of Medical Education shows the contrast between the median 15 hours of eye medicine received by general physicians (who can and do use these drugs) and the 200 hours required of optometrists under this draft substitute. This understates the comparison, for the 200 hours does not include the detailed courses in ocular anatomy, physiology and pathology which form a portion of the basic medical science training received by the optometrist.

Please let me know if we can provide further information.

Very truly yours,

Phillip W. Bach

Phillip W. Bach, O.D., Ph.D.

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 225 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the practice of optometry and authorizing the use of certain drugs by optometrists."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.72 is amended by adding a new section to read:

Sec. 08.72.277. USE OR PRESCRIPTION OF LEGEND DRUGS. (a) A licensee may not use, dispense or prescribe legend drugs under this chapter without a license endorsement issued by the board, certifying his competance to use such drugs.

(b) A licensee may not use, dispense or prescribe any drug identified by the United States Drug Enforcement Administration as a controlled substance.

(c) A licensee may not use, dispense or prescribe a legend drug that is not prepared and marketed for topical application to the human eye or eyelid. Topical drugs which may be used under this section shall be limited to the following categories:

(1) Anesthetics;

(2) Antihistamines;

(3) Anti-infectives

(4) Anti-glaucoma agents;

(5) Antivirals;

(6) Corticosteroids;

(7) Cycloplegics;

(8) Decongestants;

(9) Hyperosmotics;

(10) Mydriatics.

(d) An applicant for certification under (a) of this section shall furnish transcript credits or other evidence, acceptable to the board, showing that he has completed not less than 200 hours of didactic instruction, practical training and supervised experience devoted exclusively to the subjects specified in (1) - (3) of this subsection, given by an accredited school or college of optometry or medicine, and indicating that he has passed written and practical examinations in these subjects. The subjects are

(1) general and ocular pharmacology;

(2) review of ocular pathology and differential diagnosis;

(3) treatment of pathology of the eye and its adnexa, including the use of legend drugs.

(e) An endorsement issued under (a) of this section shall expire with the license to which it attaches and may be renewed upon evidence of satisfactory completion of continuing education specified by regulation of the board for holders of such an endorsement.

* Sec. 2. AS 08.72.240(9) is amended to read:

(9) failed to refer a patient to the appropriate health care practitioner [AFTER ASCERTAINING THE POSSIBLE PRESENCE OF OCULAR DISEASE.] <u>for conditions beyond the scope of his training;</u>

* Sec. 3. AS 08.72.240 is amended by adding a new paragraph to read:

(10) used, dispensed or prescribed a legend drug except as provided under AS 08.72.277.

* Sec. 4. AS 08.72.300(2) is amended to read:

(2) "optometry" is the examination [, OTHER THAN BY THE USE OF DRUGS,] of the human eyes and the visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye; or the diagnosis and treatment, including the use of drugs but excluding the use of surgery, of inflammations, infections and injuries of the eyes and eyelids; [,] or the prescription or application of lenses, prisms or ocular exercises for the correction or relief of the human eye;

* Sec. 5. AS 08.72.300(3) is amended to read:

(3) "practicing optometry" is an examination [, OTHER THAN BY THE USE OF DRUGS,] of the human eyes and visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye; or the diagnosis and treatment, including the use of

drugs but excluding the use of surgery, of inflammations, infections and injuries of the eyes and eyelids; [,] or the prescription or application of lenses, prisms or ocular exercises for the correction or relief of the human eye; [,] or the holding of oneself out as being able to do so;

* Sec. 6. AS 08.72.300 is amended by adding a new paragraph to read:

(7) "legend drugs" means drugs whose containers must bear a label prohibiting dispensing without a prescription.

NOTICE: This ... may be protected by copyright law. (Title 17 US. Code)

notion and has emphasized to trainees that the hospital does not endorse them as being competent to engage in family practice. However, since state laws permit an M.D. licensee to do any type of practice he wishes, it is the feeling of the director that the public would be better served by potential family practitioners having some rather than no additional training. Since there are a number of physicians seeking some training to change their specialty, consideration should be given to longer hospital training periods or a return to specially designed preceptorships to accommodate them.

With respect to those family doctors in retraining, the program would be improved by a more specific set of goals and more careful monitoring of achievements than has as yet been accomplished. The author is aware of two other programs offering similar training. At Creighton University School of Medicine rural family doctors are trained in a specific area, for example, cardiology techniques such as Swan-Ganz catheter insertion. At the Medical College of Pennsylvania inactive physicians or physicians in administrative positions are being trained in primary care.

Conclusions

A pilot miniresidency in family practice has been in operation at Santa Monica Hospital Medical Center since 1979. Many of the applicants were practicing in other specialties and seeking to make a change to family practice. It is unrealistic to expect that the available two- to six-week period can accomplish this objective, and there is a need for a different kind of program to accommodate such circumstances. Training goals for family doctor residency refresher training must be more specific and evaluations more formal than is now the case in the Santa Monica experience.

Ophthalmology Teaching in Medical Schools

Robert E. Kalina, M.D., Henry J. L. Van Dyk, M.D., and George W. Weinstein, M.D.

The Association of University Professors of Ophthalmology (AUPO) was founded in 1965 and is made up of the chairmen of all departments or divisions of ophthalmology in U.S. medical schools (1). A major interest of the body, individually and collectively, is medical student education.

Some members of the AUPO believe that recent medical school graduates are less well prepared in ophthalmology than those of the more distant past. Also reduced familiarity with ophthalmology by physicians in future generations has been cited as a potential problem in the legislative and legal arenas (2).

The results of two AUPO surveys of ophthalmology teaching are reported here.

Survey Techniques

Questionnaires were mailed in 1974 and again in 1979 to the members of the AUPO. Each member was asked to complete the form or to forward it to the individual in his unit most responsible for medical student education. Confidentiality was optional and was elected by some.

The survey document used in 1979 duplicated the questions of 1974 and in addition

This survey was supported in part by a grant to the University of Washington from Research to Prevent Blindness, Inc.

Dr. Kalina is professor and chairman, Department of Ophthalmology, University of Washington School of Medicine, Seattle. Dr. Van Dyk is professor, Department of Ophthalmology, Louisiana State University School of Medicine, New Orleans. Dr. Weinstein is professor and chairman, Department of Ophthalmology, West Virginia University School of Medicine, Morgantown.

inquired about the usage and usefulness of the *Ophthalmology Study Guide for Students and Practitioners of Medicine*, a joint publication of the AUPO and the American Academy of Ophthalmology and Otolaryngology (AAOO) which first appeared in 1976 and now is in its third edition (3). This guide is based upon seven objective areas thought to represent essential knowledge requirements for all physicians. These objectives were developed as a result of a survey of 1,600 respondents representing medicine at undergraduate and graduate levels of general and specialty orientation (4, 5).

Results

Responses were received from 74 of 102 member schools in 1974 (73 percent) and from 81 of 110 schools in 1979 (74 percent) (Figure 1). There was a decline in mean required curriculum hours from 25 in 1974 to 20 in 1979, while the median declined from 18 to 15. Hours actually assigned to the department or division of ophthalmology decreased proportionately from a mean of 22 in 1974 to 20 in 1979. Assigned hours were used most frequently for lectures or demonstrations.

All responding institutions offered medical student electives in ophthalmology in 1979, but only a minority of students chose them (mean 25 percent, median 15 percent). Use of audiovisual self-instruction units rose from 66 percent in 1974 to 82 percent in 1979.

The study guide, not available in 1974, had been adopted as a syllabus by 58 percent of institutions in 1979, while 28 percent used another syllabus, usually prepared locally. In most cases the study guide was purchased by the student and used for self-instruction and as a supplement to lectures. The microfiche illustrations, newly added in the third edition (1978), had been found useful by students in 67 percent of schools using the study guide.

Discussion

The surveys reported here were prompted in part by suspicion among the AUPO members that curriculum time devoted to ophthalmology had suffered during the widespread curriculum revisions which have taken place in U.S. medical schools during recent years.

Although data are not available from the preceding era, the results of the study reported here indicate that currently assigned time for

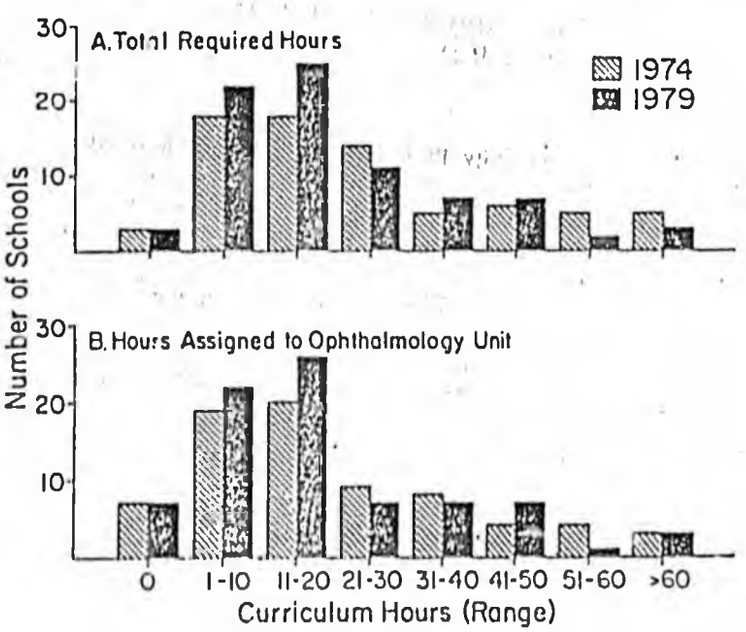

FIGURE 1
Minimum requirements for ophthalmology in U.S. medical schools.

teaching ophthalmology is limited and gradually declining. One logical extension might be a declining ability for appropriate diagnosis, management, or referral of patients with eye disorders, who form a significant segment of those seeking primary care.

The results of these surveys may not include ophthalmology teaching done in the primary care clinical setting. It seems likely that such on-site instruction would be effective and appear relevant to students in that the patient-problem-teacher loop is shortest there; but the authors believe that such teaching events are rare, often unscheduled, and likely to be the first to suffer from time constraints.

Knowledge that curriculum time was limited and that competition for it was keen was one of the prime motivating factors for the development of the AAOO/AUPO study guide. Standardization of objectives to be achieved was presumed then as now to be a laudatory goal. However, the availability of clearly defined objectives has coincided with apparent duced national curricular emphasis upon ophthalmology.

Not only is the curricular time available to ophthalmology small, but also surprisingly few students (25 percent) choose ophthalmology electives. The reasons for limited elective participation may range from the influence of counselors to lack of available electives. Whatever the cause, the effect must be negative upon student appreciation for what the specialty offers. In view of the excess of candidates for the limited number of ophthalmology residency positions, a main concern is that students who will practice other specialties, especially primary care, learn proper diagnosis and treatment of some ophthalmic disorders so that they may avoid inappropriate referral to medical or nonmedical practitioners.

The author gratefully acknowledges the kind assistance of Ms. Maggie Rider and Ms. Deborah Holifield in the preparation of this manuscript. Depo-Provera used in some of the work reported upon was supplied by The Upjohn Company.

People do not decide voluntarily what will arouse them sexually. Rather, in maturing, they discover the nature of their own sexual orientation and interests. Persons differ from one another in terms of a) the types of partners whom they find to be erotically appealing and b) the types of behaviors that they find to be erotically appealing. They also differ in intensity of sexual drive, the degree of difficulty that they experience in trying to resist sexual temptations, and in their attitudes about whether or not such temptations should be resisted.

When persons experience strong erotic desires to engage in types of sexual behaviors that could cause themselves or others harm (eg; sadistic, coercive or masochistic sexual involvements), or when they experience strong erotic attractions toward unacceptable sexual partners (eg; children), psychiatric help may become a consideration. This is particularly so when a person reports an inability to successfully resist sexual temptations through "will power" alone, even though in terms of conscience and intellect he may want to resist, and in addition may have been trying very hard to do so.

Some psychiatric diagnoses can be made then, simply by asking cooperative persons about the range of behaviors that they find to be erotically appealing, and about the difficulty they experience in trying to resist succumbing to such sexual temptations. This line of questioning can identify persons who meet the DSM-III diagnostic criteria for sexual exhibitionism, sexual sadism, sexual masochism, transvestism, and compulsive voyeurism.[1] Each of these represents an unconventional form of sexual appetite. Such questioning can also identify the compulsive paraphilic rapist. These men, unlike the average man, often experience great difficulty resisting erotic temptations to repeatedly expose themselves, to repeatedly have themselves beaten, to repeatedly peep in windows, or to repeatedly rape, depending upon the nature of their particular sexual compulsion. Masturbation cannot fully satisfy these cravings because what they crave is not just sexual release, but a specific type of sexual activity.

Another way in which sexual problems, possibly requiring psychiatric assistance, can be identified is by inquiring about the types of sexual partners that a person finds to be erotically appealing, and about how difficult it is to resist the temptation to become involved sexually with such partners. Some men, for example, report that they are attracted sexually to both children and adults, but that when they have a satisfying adult relationship they are able to resist the temptation of becoming sexually intimate with a child. Some such men, however, during periods of time in their lives when they do not have a satisfying adult relationship, do become involved sexually with children. Nicholas Groth has referred to men who find both adults and children to be erotically appealing as regressed pedophiles.[2] There are other men who experience absolutely no erotic attraction whatsoever towards adults, but who have a great deal of difficulty resisting the sexual temptations that they experience towards children. Nicholas Groth has referred to these men as fixed pedophiles. Some men who experience pedophilic desires report feeling sexually driven to repeatedly seek out intimate relationships with children whereas others

seem most vulnerable primarily in situations where a child is already easily and readily available.

Pedophilia, then, is simply a term used to indicate that an adult finds children to be sexually appealing. This condition, for unknown reasons, seems to occur almost exclusively in men. If it is only children and not adults that a man finds to be sexually appealing then the term fixed pedophilia can be used. If a man is attracted sexually only to boys, a diagnosis of homosexual pedophilia can be made, whereas, if he is attracted only to girls a diagnosis of heterosexual pedophilia may be in order. If gender is not a factor, the appropriate diagnosis is bi-sexual pedophilia.

Some men who are attracted sexually to children desire not to be, and would like to change. Under such circumstances, their sexual attraction to children is said to be ego-dystonic. If a man's sexual attraction towards children does not conflict with his conscience and personal moral convictions, then his pedophilic desires are said to be ego-systonic. In very rare instances, some men experience erotically sadistic desires towards children. Under such circumstances a diagnosis of sexual sadism should also be made.

Following is a brief verbatim quote from a man whose sexual orientation can be characterized as fixated, ego-dystonic, homosexual pedophilic. This man was also found, on chromosomal analysis, to have Klinefelter's Syndrome. Normally persons are erotically attracted to members of the opposite sex. In Klinefelter's Syndrome, in several ways, it is unclear which sex is the opposite sex.[3] Klinefelter's patients manifest a 47 XXY chromosomal karyotype pattern. Thus, genetically, Klinefelter's patients can be thought of either as males (XY) with an extra X chromosome, or as females (XX) with an extra Y chromosome. That some patients with Klinefelter's syndrome experience ambiguity regarding sexual or gender preference at a psychological level is not incongruous with the gender ambiguity manifested at the genetic level. The comments of this homosexual pedophilic Klinefelter's patient give some sense of how tortured and conflicted he feels by the sexual lusts and cravings that he experiences towards young boys.

> "What starts a person like myself doing what I do? Why me? Why can't I be normal like everybody else? You know, did God put this as a punishment or something towards me. I am ashamed. Why can't I just go out and have a good time with girls. I feel empty when a female is present. An older "gay" person would turn me off. I have thought about suicide. I think after this long period of time I have actually seen where I have an illness. It is getting uncontrollable to the point where I can't put up with it anymore. Its a sickness, I know its a sickness, but as far as society is concerned you are a criminal and should be punished. Even if I go to jail for 12 or 15 years, or whatever, I am still going to be the same when I get out."

This last statement was not meant to be defiant.

Etiology of Pedophilic Sexual Desires

How is it that sexual orientation and interests are acquired? It appears that both life experience and constitution play a role. Many years ago, Dr. John Money reported a tragic case in which one of two genetically identical male twins was so severely damaged at the time of circumcision several months after birth that a total penectomy was required. That child was then reared as a girl. The child's chromosomal pattern, of course, remained unchanged and she has now reached her teenaged years. She has developed breasts by virtue of having been administered estrogens and surgically an artificial vagina has been created. According to Diamond, however, she nevertheless experiences considerable difficulty adjusting as a female, and she is in some ways ambivalent about her status.[4] This has led him to conclude that although social forces can indeed play some role in the development of gender identity and sexual orientation, this is so only within the very circumscribed limits set by biological heritage. Still, at age 19 this twin raised as a female apparently feels herself to be a women in terms of gender identity and also experiences at least some level of sexual attraction towards age appropriate males. Thus, although she is a woman with an XY rather than an XX chromosomal karyotype, as a consequence presumably of how she had been raised, she feels herself to be a woman and she finds men to be sexually appealing.

There are many additional examples showing that environment and life experience can play at least some role in the development of gender identity and in the development of sexual orientation and interest. Nicholas Groth and others have shown that many men who experience pedophilic erotic urges as adults were themselves sexually involved with adults when they were children.[2] Why sexual involvements with an adult during childhood seems to put one at risk of experiencing pedophilic sexual urges later on in life is unknown.

Biology, too, can play a role in the development of sexual orientation and interest. In most species of birds, for example, only the male sings. Such songs are ones of courtship, apparently designed to attract females. However, if a female zebra finch is given testosterone at crucial times during early development she too will sing.[5] There are numerous other similiar examples.

In humans, sexual behavior is often a response to subjectively experienced erotic desires and fantasies. Although it appears that specific sexual tastes or preferences may sometimes be modified by virtue of early life experiences, the phenomenon of sexual desire itself is apparently unlearned and rooted deeply in biology. Males do not have to be taught, for example, how to attain an erection. Furthermore, just as is true of language and dialect, once acquired sexual desires are not readily modified. There is no reason to believe that it is any easier for the fixated homosexual pedophile to lose his interest in children and to become sexually aroused by females, than it would be for the average male to lose his interest in women and to instead begin lusting for young boys.

It is just as reasonable to ask whether one might be put at risk of developing unconventional sexual interests such as pedophilia by virtue of

the presence of certain biological abnormalities, as it is reasonable to ask whether one can be put at such risk by being exposed early on in life to certain environmental events. One way of addressing this issue would be to determine whether or not there is an increased prevalence of biological abnormalities of the sort thought to be related to human sexuality, amongst a group of men who experience unconventional sexual interests.

Table 1 shows the frequency of various sorts of biological abnormalities in a group of 41 men, all of whom met the DSM-III diagnostic criteria for some form of paraphilia, ("sexual deviation disorder").[3] The majority of these men were either pedophiles or exhibitionists. As documented in Table 1, and confirmed by statistical analysis, there does appear to be an association between certain kinds of biological abnormalities and the presence of unconventional kinds of sexual interests such as pedophilia.

Recently, as shown in Figure I, Dr. Gary Gaffney of the Johns Hopkins Hospital in a soon to be published study, documented an abnormal pattern of leutinizing hormone (LH) release over time in response to the intravenous administration of a bolus of leutinizing-hormone-releasing-factor (LHRF) in a group of pedophilic patients. The development of new technologies such as positron emission tomography may help document which areas of the brain become metabolically active during sexual arousal.[4] Such techniques may also be able to determine whether the brains of men who experience pedophilic sexual urges differ in regional metabolism from the brains of men who experience more conventional sexual attractions.

Assessing the "Sex Offender": The distinction between (1) diminished mental capacities, (2) personality traits, and (3) sexual orientation

Sexual involvements with children are against the law. Thus, a person may be defined as a "sex offender" by virtue of having behaved in a particular way. Many such men are referred for psychiatric evaluation following legal transgressions. However, a diagnosis such as pedophilia cannot be made simply by considering behavior alone. Rather, for purposes of diagnosis and for proper treatment, the physician must try to appreciate the state of mind which contributed to the individuals behavior.

Like any behavior, sexual behavior with a child can occur for a variety of reasons. For example, a person with schizophrenia may behave in a particular way in response to hallucinations "telling him to do so," whereas the alcoholic's behavior may be a reflection of diminished judgement secondary to intoxication. A mentally retarded individual may become involved sexually with a child (who incidently, may be of the same approximate mental age as he) because of the lack of availability of adult partners and the lack of capacity to fully appreciate and understand the wrongful nature of his actions. In none of these instances would a primary diagnosis of pedophilia necessarily apply.

In DSM-II, conditions such a pedophilia used to be considered sub-categories of a specific personality type (ie; the so-called antisocial personality disorder). DSM-III acknowledges that this is by no means necessarily so. Diagnosing a person as a pedophile says something about

the nature of his sexual desires. It says nothing whatsoever, however, about temperment, or about traits of character such as kindness versus cruelty, caring versus uncaring, sensitive versus insensitive, conscientious versus lacking in conscience, and so on. Thus, a diagnosis of pedophilia does not necessarily mean that a person is lacking in conscience, diminished in cognitive capabilities, or somehow "characterologically flawed." Rather, he may be a concerned person dealing less than successfully with sexual temptations of a sort which are very foreign to most men.

It is easy for a non-smoker to argue that any smoker could stop if he or she really wanted to; in the case of the pregnant smoker, if not for her own sake than surely for the sake of not damaging her unborn child. It is easy for a non-obese person to argue that successful dieting can be accomplished through will power alone. Patients on kidney dialysis made thirsty by the procedure often have great difficulty maintaining necessary fluid restrictions even though not doing so can be life threatening to them.[7] The more thirsty they are made by the procedure, the more difficulty they experience in limiting fluid intake. The researchers who documented this finding concluded that limits to fluid intake set by physicians may not suffice because they differ from those set by the patients own physiology. It is easy however, for a person who is not thirsty to argue that such patients could resist the temptation to consume excessive amounts of fluid if they really wanted to do so. Similarly, it is easy for a person who is not tempted sexually by children to argue that any pedophile could stop having sex with children if he really wanted to, and would simply make up his mind to do so. When it comes to appetites, or drives, such as hunger, thirst, pain, the need for sleep, or sex, however, biological regulatory systems may exist that can cause an individual to experience desires to satisfy those hungers in ways that cannot invariably be successfully resisted by "will-power" alone. Persons can become so discomforted by cravings related to such appetites that they feel compelled to act in ways that diminish their discomfort. Thus, in each of the above instances, professional assistance is often required.

Professional assistance may be extremely crucial in the case of the pedophile because it is imperative that he stop his prior behavioral patterns immediately, one hundred percent of the time, and forever. Though necessary, this can nevertheless be a very formidable goal to have to achieve. It is a goal made possibly even more difficult if the individual in question does not believe that sexual involvements with children are morally wrong (ie; if he finds his pedophilic desires to be ego-syntonic). It may also be more difficult to achieve, if in addition to desiring sex with children, the individual in question is one for whom the children in his life form the sole basis for love, affection, companionship, intimacy and other deeply rooted human needs.

When a person falls deeply in love with another person, be it a child or an adult, it becomes easy for that person to convince himself that the relationship is good and healthy and not harmful or wrong. One of the major issues in trying to understand human behavior relates to where the line should be drawn between considering a person to be the passive product of life experience and constitution versus considering him by virtue of his

having subjective consciousness to be an active agent capable of transcending prior determinants. Most of us feel a strong emotional bond with children. Why some men experience intense erotic feelings in the context of their otherwise healthy relationships with children, in a way that is not so for most men, and why in the absence of professional assistance it is so difficult for some such men to change is not fully understood.

Treatment of Pedophilia

Four major modalities have been proposed for the treatment of pedophilia. They are psychotherapy, behavior therapy, surgery and medication. Classical psychodynamic theory assumes that all men would ordinarily develop conventional erotic attractions towards age appropriate partners of the opposite sex, but that this does not occur in some instances because unhealthy early life experiences interfere with the normal process of psychological maturation. Therapy utilizes the process of introspection to try to figure out what went wrong, with the expectation that newly acquired insights will then facilitate the problem being rectified.

It is doubtful that persons can come to fully understand the basis of their own sexual interests through the process of introspection alone. The average man probably cannot figure out simply by thinking about it, why he prefers women rather than men. Similarly, it is not certain that the pedophile can figure out the basis of his own sexuality. Furthermore, even if he could, knowing why one is hungry, be it for food or for children, doesn't make one any less hungry. Nor does it make it any easier for one to resist the temptations experienced by virtue of one's own appetites. Finally, there is little convincing evidence showing that the traditional psychotherapies alone are an invariably effective means for treating pedophilia.

Behavior therapies tend to be less concerned with the historical anticedents of pedophilia than with the question of what can be done about it. The feature common to most behavioral approaches is an attempt to extinguish erotic feelings associated with children, while simultaneously teaching an individual to become sexually aroused by formerly non-arousing age appropriate partners. Although in laboratory situations behaviorists have shown that some pedophilic men no longer demonstrate physiological evidence of sexual arousal when looking at pictures of naked children, and that they can begin to show arousal to age appropriate stimuli, it has not been well established that such changes invariably carry over into the non-laboratory situation. Most of us can appreciate how difficult it would be to try to stop feeling the sexual attractions that we have experienced as natural throughout our lives.

Two types of surgery have been proposed as a treatment for pedophilia, (1) stereotactic neurosurgery and (2) removal of the testes. Neurosurgery for this purpose is still investigational and will not be discussed here, but its rationale has been explored in an excellent review article by Dr. Kurt Freund.[8]

Removal of the testes (castration) has been suggested as a treatment for pedophilia because the testes are the major source of testosterone production in the body. There has been much confusion about castration, a procedure which does not remove the male genitals, but which instead is simply intended to lower testosterone. Lowering testosterone is one way of lowering sexual libido. The idea of lowering testosterone in the case of the pedophile is to try to decrease the intensity of his sexual cravings for children. Some critics have argued that castrating the "sex offender" is like cutting off the hand of the thief. This is in no way so. Cutting off the penis would be analogous to cutting off the hand of the thief. Removal of the testes lowers testosterone, which in turn can lower the intensity of consciously experienced erotic desires. In human beings such desires constitute a motivating basis for sexual behavior.

Testosterone is an extremely powerful hormone. If the testes of a male fail to produce adequate amounts in early embryonic life he will be born with the external anatomical appearance of a female. Thus, testosterone causes external anatomical masculinization of the fetus and also produces certain changes in the endocrinological functioning of the male brain. The marked increase in testosterone level which occurs at the time of puberty in males is associated with the development of increased pubic and facial hair, deepening of the voice, an increase of muscle mass, and a marked increase in sexual libido.

In animals, lowering testosterone by means of removing the testes usually eventually leads to total cessation of virtually all sexual behavior, although sometimes this may take as long as two years to occur.[8] In humans, the relationship between very low testosterone levels and low sexual libido is fairly well established. This evidence comes from a variety of sources including studies on hypogonadal men, data from persons with adreno-genital disorders, studies on drugs which lower testosterone as a side effect, and from several well controlled studies looking at the effects of administering testosterone in an attempt to increase sexual libido.[9-11]

In an article entitled, "Therapeutic Sex Drive Reduction" Dr. Kurt Freund reviewed data regarding removal of the testes in humans as a method of lowering testosterone.[8] Several studies with long followup periods from a variety of European and Scandinavian countries documented that lowering testosterone in this way did indeed frequently lower both sexual libido, and subsequent frequencies of improper sexual activities. In one study in Denmark, for example, Sturup reported upon a 30 year investigation on 900 castrated "sex offenders" involving over 4,000 followup examinations documenting less than a 3% recidivism rate.[12] Ficher Van Rossum, in Holland, Kinmark and Oster in Sweden and Cornu in Switzerland reported comparable findings, as did several other investigators.[13-15] The study in Holland involved 237 men with a 1.3% recidivism rate. The Swedish studies with similarly low recidivism rates, evaluated 307 men. In the Swiss study there was a 5.8% recidivism rate among 121 men following castration contrasted with 52% recidivism in the non-castrated control group. Followups ranged from 5 to 30 years. Bremer reported a 58% recidivism rate in the 5 years prior to treatment in a group of men who showed only a 7.3% recidivism rate during the 5 years post-surgery.[16] Thus the surgical

method of lowering testosterone did seem to enable many men to better control their sexual behaviors. Furthermore, many of these men did not lose the capacity to perform sexually following castration. Perhaps this finding seems somewhat less surprising if one considers the analogy of suppressing hunger. In being less hungry a person may feel less driven to seek out food, thereby making dieting easier, but under such circumstances he would not lose the ability to eat.

Today it is no longer necessary to perform castration in order to reduce testosterone levels. Rather, this can now be done pharmacologically in a graduated way without the physical or psychological trauma of surgery. In Europe and the Scandinavian countries cyproterone acetate has been used for this purpose and there are several "blind" as well as non-blind studies supporting its effectiveness.[17,18] In the United States, since Dr. John Money first began doing so in 1967 the drug most often employed as a pharmacological method for lowering testerone has been medroxyprogesterone acetate (Depo-Provera).[19-23]

Depo-Provera can be injected intramuscularly once per week. There it binds to the muscle from which it is then gradually released over the course of several days into the blood stream. At this time the initial starting dosage used in the Hopkins clinic has been 500 mgs IM once per week of the 100 mg per cc concentration. No more than 250 cc is given into a single injection site. Major side effects have been weight gain and in some cases hypertension. The drug, which is not feminizing, may cause an increased incidence of breast cancer in female beagle dogs, and of uterine cancer in monkeys. It has been used in over 80 countries of the world as a female contraceptive; supported in its use for this purpose by the World Health Organization. No studies showing an increased risk of cancer in males (either humans or animals) have been reported.

There is no doubt that Depo-Provera consistently decreases serum testosterone levels significantly. This can be confirmed by means of a simple blood test. Lowering testosterone can in turn lower sexual libido, which in turn seems to enable some men to more appropriately control their sexual behaviors. The idea of using Depo-Provera in the case of the pedophile is to try to decrease the intensity of his sexual cravings, thereby hopefully making it easier for him to successfully resist unwanted temptations.

Most pedophiles receiving Depo-Provera also attend group counseling sessions similiar to the type often used with alcoholics. That is, men are expected to acknowledge being tempted to something that they realize they must not do. They then discuss amongst themselves strategies intended to help enable them to resist such temptations successfully (ie; whom to call, what situations to avoid, early warning signs, and so on). The medication is intended to make resisting such temptations somewhat easier.

What is not yet fully established regarding the use of Depo-Provera is optimal dosage, which of the paraphilias will respond most adequately, long term side effects, compliance rates, and precise long term recidivism percentages. There is little reason to believe, however, that recidivism rates should be any higher than those low rates documented when surgical

removal of the testes was used as a method for lowering testosterone. It is not clear why in some cases Depo-Provera fails to be of help. Like any effective medication, Depo-Provera seems to help some men, fails to help some for whom it had been considered appropriate, and for others should not even be considered appropriate in the first place.

Of over 130 men treated at Hopkins over the past year for some form of paraphilia (mostly pedophilia and exhibitionism) less than 5% have relapsed. In addition, compliance rates have been better than 90%. There has been some concern about whether Depo-Provera should be given to men who are on legal probation. If it is not an effective drug then it should not be used at all. If it is effective as it often seems to be, then it is difficult to see why a person should be denied the opportunity to take it just because he is on probation, or perhaps even incarcerated. Some incarcerated men report that Depo-Provera frees them from intrusive obsessional sexual preoccupations.

It appears then that Depo-Provera can be used to help some men help themselves. Some pedophiles report being unable to successfully resist sexual temptations through "will-power" alone even with the assistance of professional counseling. Such individuals should be afforded the opportunity to see whether or not Depo-Provera confers upon them an increased capacity for self control, thereby enabling their behavior to be more a reflection of their intellectual desires and conscience than of their lusts and passions.

Some critics have argued that psychotrophic drugs such as Depo-Provera may in some way be "mind controlling". No drugs used in psychiatry are capable of "mind control" in the sense of being able to transform a conservative into a liberal, a Democrat into a Republican, a Jewish person into a Catholic, and so on. The only medical indications for which psychotrophic drugs are used is (a) to decrease suffering (as in the case of antidepressant medications), (b) to restore function (as in the case of "antipsychotic medications"), or (c) to increase, rather than decrease, a persons capacity to successfully exercise self-control (as in the case of Depo-Provera).[24]

Pedophilia refers to a particular type of sexual orientation. By virtue of experiencing such desires, desires that many pedophiles wish they did not have, professional assistance is often needed. When such men seek help, understanding, empathy, and professional competence is required, not stigmatization or unenlightened scorn.

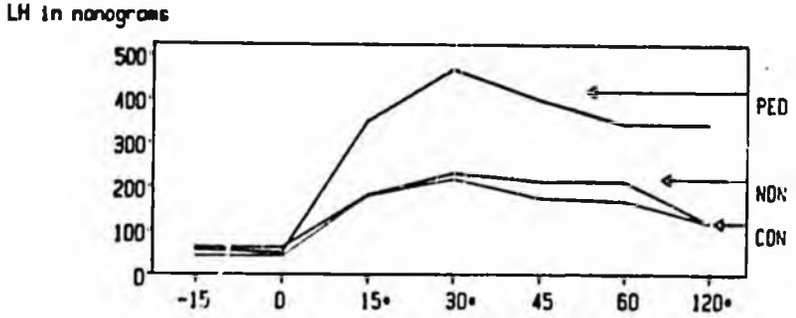

Table 1

Biological abnormalities in a group of 41 Consecutively Assessed Paraphilic Male Patients

	Abnormality	*Number of Patients Showing this type of abnormality
1.	Chromosomal Anomalies	7 (most common = XXY)
2.	Hormone Abnormalities	
	A. Testosterone	18 (4 low) (14 high)
	B. FSH	8 (high)
	C. LH	14 (2 low) (12 high)
3.	Abnormality of Brain Structure (on CT Scan)	7
4.	Abnormal Electrical Activity of Brain (on EEG)	4
5.	Abnormal Neurological Examination	5
		N = 63
6.	"NC" Abnormalities Detected (excludes dyslexia, schizophrenia, and learning disorders)	

*Some patients had more than one type of abnormality.

LH RESPONSE TO LH-RH IN PEDOPHILIA

PED: Pedophilic (7)
NON: Non-pedophilic paraphilic (5)
CON: Control (5)

100 mcg. LH-RH given at Time = 0

*p < 0.05 H-test

Figure 1. Abnormal release of leutenizing hormone (LH) over time in response to the intraveneous injection of a bolus of 100 micrograms of leutenizing hormone releasing factor (LHRF) in a group of 7 male pedophilic patients. The control groups consisted of (a) 5 men with conventional sexual interests, and (b) 5 men with unconventional sexual interests (paraphilias) other than pedophilia. LHRF was injected at time zero.

* = statistically significant at the .05 level

Ped = pedophiliacs

Non = nonpedophilic paraphilics

Con = conventional sexual interests

Psychiatric Clinics at The Johns Hopkins Hospital

Larry E. Tune, editor

Sexual Deviation Syndromes

FRED S. BERLIN AND GENEVIEVE S. COYLE

Department of Psychiatry and Behavioral Sciences, The Johns Hopkins Hospital, Baltimore, Maryland

CASE PRESENTATION (VOYEURISM)*

The patient, a white man in his early forties, entered hospital in the fall of 1980 to begin treatment for voyeurism. Although he had experienced the urge to spy upon naked or partially clad women as early as age 6, it was not until his late teens that this interest became a consuming preoccupation. Since his late teens, he had spent as many as five or six evenings a week "peeping" through windows at women disrobing, usually masturbating himself while doing so. Never desiring further contact with any of them, he never attempted entry into a home, nor had he wished to be observed while watching.

The patient found voyeurism more erotically arousing than sexual intercourse with a consenting partner. Voyeuristic urges were with him much of the time, and he reported frequently having to make an effort to inhibit erection when in the presence of an attractive female.

Voyeurism, usually performed alone, but occasionally with a group of other men, caused him numerous problems over the years. While in college, the amount of time consumed "peeping" caused decreased academic performance, and similar activities during his second term in the Navy led to a less than honorable discharge.

His first wife committed suicide, possibly in part as a response to discovery of his sexual predilections. His second wife obtained a legal separation after discovering that he had been masturbating while watching his daughter sleeping, a behavior that troubled him a great deal afterwards, once his sexual desires had been relieved by orgasm. Although arrested twice for voyeurism, once in 1967 and again in 1976, he had never broken the law in any other way; he is responsibly employed; and he is otherwise a pleasant and conscientious person. A devout man of above average intelligence, he had often prayed for "divine inspiration to help solve his problem." In spite of compulsory court-ordered psychotherapy following each of his arrests, he continued experiencing voyeuristic urges until hospitalization. Upset about the recent separation from his wife, the patient had referred himself for hospitalization. He had not been apprehended recently and was facing no legal charges at the time of admission.

Family history was unremarkable except that his father was 69 years old when the patient was born, and during childhood the patient had been separated from his mother for five years after she contracted tuberculosis. Physical examination was essentially normal, but his luteinizing hormone (LH) level was 98 ng/ml (normal, 36–64).

While still hospitalized the patient began treatment with weekly intramuscular injections of 500 mg of medroxyprogesterone acetate, which suppressed his serum testosterone to below normal levels. For the last seven months he has continued weekly injections on an outpatient basis. Since the third week of treatment he has been reporting relief from incessant voyeuristic urges and thoughts, along with cessation of related behaviors. He and his wife have reunited, and he has been speaking to church groups and other interested organizations about his apparent success in treatment.

* Case discussed at Psychiatric Grand Rounds, February 2, 1981.

DISCUSSION

According to the Diagnostic and Statistical Manual of Mental Disorders (DSM III), voyeurism involves the repetitive seeking out of situations in which an individual observes unsuspecting women who are either naked, in the act of disrobing, or engaging in sexual activity (1). The act of looking ("peeping") is accompanied by sexual excitement, frequently with orgasm, usually produced concurrently by masturbation, or later in response to the memory of what was witnessed. Further sexual contact does not occur, with the memory or act of looking, rather than intercourse, constituting the final basis for sexual gratification.

Approximately 25% of known voyeurs are married, dramatizing the desire of these men to spy upon women who do not know they are being observed. Although voyeuristic behavior usually begins around puberty, related fantasies may be experienced much earlier. Untreated, the behavior is ordinarily chronic, which is not surprising since it is sexually motivated, and the sex drive does not cease. Factors predisposing to development of voyeurism are unknown, with associated complications usually resulting from discovery or arrest. The prevalence of voyeurism in the general population has not been ascertained, but thus far it has been reported only in men. Visual stimulation can be an integral part of conventional sexual activity, but in those instances optimal sexual arousal does not require that the observed partner be unsuspecting, nor is observing the final desired act.

Rationale for Treatment

Voyeurism is classified as one of the paraphilias (sexual deviation disorders). Other paraphilias include pedophilia (sexual craving for children), exhibitionism, transvestism (cross dressing for erotic pleasure), zoophilia (sexual attraction towards animals), erotic masochism, and raptophilia (paraphilic, or compulsive, rape). Behaviors engaged in by persons manifesting one of these syndromes can bring them into conflict with the law, raising the issue of whether punishment or treatment is more appropriate. In considering the possibility of treatment one must try to determine whether the behavior in question was an expression of a recognizable and treatable psychiatric syndrome (2). Not all sex offenses (a legal term) are committed by persons manifesting a sexual deviation disorder, or paraphilia (a medical term). Sex offenses can be committed for a variety of reasons depending upon the state of mind that led the offender to act.

Some sex offenders may be treatable even when their behavior is not the manifestation of a sexual deviation disorder, but rather the reflection of another psychiatric condition. For example, rape could be perpetrated by a deluded person out of touch with reality, responding to the auditory hallucinations of schizophrenia. In this case, phenothiazine medication might be helpful, whereas lithium carbonate might aid the person responding in a sexually inappropriate manner to the heightened erotic appetite of mania. Treatment with antabuse and counseling might benefit the alcoholic who becomes sexually disinhibited when intoxicated, and education might be useful to the mentally retarded individual who must learn to express his sexual urges appropriately.

In contrast to the examples just cited, some sexual offenses are enacted as a response to intense and persistent unconventional sexual cravings, that is, secondary to a sexual deviation disorder. Most men with conventional heterosexual interests have no desire for erotic intimacy with a seven-year-old boy (as does the homosexual pedophile), or to expose themselves repeatedly on a street corner (as does the exhibitionist). In addition, few men experience an overwhelming desire to peek in windows—a desire sufficiently intense to lead to repeated risk to job, reputation, family, and possibly encarceration. Thus, the belief that exhibitionists, paraphilic rapists, pedophiles, or voyeurs are simply "normal, self-indulgent men" with conventional sexual interests, men who are merely misbehaving (requiring punishment rather than treatment) seems incorrect, as well as rehabilitatively ineffectual.

Diagnosis

Diagnosis of a sexual deviation syndrome can be made by examining a person's thoughts, feelings, and behavior. Persons with sexual deviation syndromes such as pedophilia or voyeurism experience repeated persistent fantasies about unconventional sexual activities. The homosexual pedophile (often impotent with women), repeatedly fantasizes about young boys, whereas the voyeur is preoccupied with thoughts of "peeping." Asking an individual about his masturbatory fantasies can give a clue regarding his sexual interests, because erotic arousal and erection for the purpose of masturbation may be difficult in the absence of sexually stimulating mental imagery.

Accompanying the unconventional sexual fantasies experienced by persons with sexual deviations are intense erotic cravings. These cravings lead to a discomforting feeling when frustrated; a discomfort which can be relieved temporarily if deviant fantasies are enacted. Thus, the temptation to act can become difficult to resist. If a person experiences a strong desire to engage in illegal sexual involvements, there is considerable risk he may get into trouble repeatedly because his unconventional sexual drive keeps reoccurring. The paraphilic rapist who craves coercive sexual activities may repeatedly rape in spite of incarceration because punishment does little to reduce his intense unconventional sexual drive. Although many men can become sexually aroused by descriptions or scenes of coercive sexual acts, most do not have the constant ruminations that characterize a craving, and most do not have to resist repeatedly the temptation to rape in order to stay out of trouble. Groth reported that although about 25% of child molesters re-

ferred to his clinic were "first offenders" according to the law, first conviction rarely constituted the first such incident in the offender's life (3).

Rape, sexual involvement with children, public exposure of genitals, and "peeping" are behaviors, and in and of themselves do not allow one to make the diagnosis of a sexual deviation syndrome. Men with conventional sexual desires, for instance, may occasionally look through a window at a partially clad woman; an occasional incident of this sort does not make one a voyeur. However, when such behaviors are a reflection of ongoing sexual preoccupations and cravings to act repeatedly in those ways, a diagnosis of paraphilia can be made. Karl Jaspers described deviant sexual cravings as intolerable states, similar to addictions, that demand action in order to be alleviated (4).

Individual paraphilic syndromes tend to be relatively stable, just as is conventional heterosexuality. Voyeurs do not become transformed into pedophiles, transvestites or exhibitionists. Sexual behavior seems to be a relatively stereotyped response to one's erotic interests, and these appear to be relatively stable throughout an individual's adulthood.

Types of Treatment

Conventional heterosexuality can be conceptualized as a syndrome, comprising erotic thoughts, feelings, and associated behaviors, just as is exhibitionism or voyeurism. Thus, use of the term "treatment" involves making a value judgment. Some (e.g., NAMBLR—The National Association for Man-Boy Love Relationships) have argued that sexual involvement with children causes no harm, and should not be considered sick or bad. Most persons in our culture disagree. Those who do use the term "treatment" feel that it should become a consideration when one's sexual behaviors compromise the rights of well-being of others. Four general types of treatment have been proposed: psychotherapy, behavior therapy, surgery and medication.

Psychodynamic therapies usually assume that sexually deviant behaviors are the result of unconscious conflicts, and that "uncovering" these conflicts allows a person to better understand himself. However, it seems doubtful whether persons can really come to fully understand the basis of their own sexual interests. Eicher, for example, discovered that feelings of gender identity may be related to the presence or absence of H-Y antigen (5). In addition, understanding the etiology of one's sexual urges doesn't necessarily change them. There is little evidence that traditional psychotherapies are consistently effective in treating paraphilic syndromes.

Behavior therapies are less concerned with the historical antecedents of unconventional sexual behaviors than with the question of what can be done about them. A variety of techniques have been attempted. A common feature involves efforts to diminish the appeal of previously erotic deviant stimuli (such as children), while at the same time teaching an individual to become sexually aroused by a more appropriate partner, or sexually satisfied in a more appropriate way. This is clearly a formidable task, analogous to trying to teach a man with conventional heterosexual interests to become erotically attracted to boys. Most of the literature on behavioral treatment of sexual deviation consists of anecdotal case reports without proper controls. However, Marks was able to document good results at two-year follow-up with behavioral treatment of transvestites (men who dress in women's clothing for erotic pleasure), but he obtained poor results using the very same behavioral technique with transsexuals (men who feel themselves to be women trapped in the body of the wrong sex) (6). A recent review by Blair and Lanyon suggests that exhibitionism may sometimes respond well to a behavioral approach (7).

Two types of surgery, neurosurgery and orchidectomy, have been used to treat paraphiliacs, often when violent physical assault has been a significant component of the sexual syndrome. A recent article by Freund reviewed the literature dealing with the effects of such surgery on animals and humans (8). For humans undergoing neurosurgery to try to decrease deviant sexual desires the population size is too small to allow generalization of results, but in animals specific brain areas seem to be important contributors to sexual behavior. While castration is an unacceptable form of treatment in the United States, its use as an option to incarceration in other countries dramatically decreased the recidivism rate of deviant sexual acts (though not to zero), sometimes without causing total impotence (9).

Two medications used to treat sexual deviations are cyproterone acetate, which is unavailable in this country, and medroxyprogesterone acetate. Both decrease levels of serum testosterone. The intent is to try to decrease the intensity and frequency of sexual fantasies and preoccupations, making self-control easier. Neither drug acts specifically on deviant urges, but rather each appears to be a suppressant of sexual desire in general. Counseling is ordinarily given in conjunction with medication to help the patient cope with difficulties resulting from his deviant sexual needs.

Associated Biological and Characterological Pathologies: Questions of Etiology

Goy and McEwen, at a conference at The Massachusetts Institute of Technology, suggested that biological factors may contribute more than previously recognized to human sexual behavior (11). Recently, an entire issue of *Science* (Vol. 211, No 4488) addressed this topic, as well as related issues. Biological factors in animals significantly influence sexually related activities. In some species of birds, normally only males sing, but if a female zebra finch that has been administered estradiol while just an embryo is given androgen hormones as an adult, she will do so also, and will have an increased number of cells in the nucleus robustus archistraitalis and other brain areas (12). She will also display distinctly male courtship behavior. Adult female rats who were exposed to testosterone at a specific time *in utero* will show sexual mounting behavior that normally predominates in male rats (13). In humans, there is evidence that some women initiate sexual activity most often during the ovulatory period of the menstrual cycle (14). Because sexual behavior is so intimately related to biology and species preservation, as well as to psychological and experiential factors, it is reasonable to look for organic pathologies in men experiencing unconventional sexual cravings.

Table 1 lists associated pathologies found in a group of 22 consecutively assessed paraphilic patients. Most were referred to Hopkins by their attorneys, or by the courts, though a few were self-referred. Eighteen of the twenty-two evidenced a variety of abnormalities that included structural brain damage, elevated testosterone levels, genetic anomalies, seizure disorders, and pituitary hormone dysfunctions. As a safeguard against selection bias, appropriate control group data are needed for comparison purposes, especially regarding the variance of testosterone levels in "normal" men. "Normal" laboratory values of testosterone are based on small sample sizes, and conceivably could be in error. However, it is clear that many sex offenders seen here at Hopkins have evidenced significant organic pathology. This finding makes plausible the hypothesis that biological vulnerabilities in some individuals may predispose them to develop unconventional sexual desires (15). As the data presented are preliminary this is only a hypothesis, and further research is planned.

Factors contributing to the development of normal, as well as unconventional, sexual desires are poorly understood. In addition to the possible role of biogenic elements, there is evidence that particular sorts of early life experiences (e.g., being a victim of child abuse), may also sometimes be relevant (16). Many pedophiles have been sexually molested themselves as children (3).

Expression of sexual desire can be influenced by many aspects of a person's character. Thus, whether a pedophile is physically assaultive toward children may depend not only upon his sexual feelings, but also upon whether he is assaultive in general. There is no evidence that persons with deviant sexual cravings are more assaultive (except for paraphilic sadists and rapists) than persons with more conventional orientations. A study in Detroit of over 1,252 sex offenses against children, for

TABLE 1

Associated Findings in 22 Consecutively Referred Male Patients with Sexual Disorders

Patient	Diagnosis	Associated Findings	
1	Exhibitionism	Elevated testosterone: 912 ng/ml	History of head injury in auto accident, grand mal seizures
2	Homosexual pedophilia	905 ng/ml	
3	Heterosexual pedophilia	1263 ng/ml	Mild ventriculomegaly. Cortical atrophy most pronounced in area of right sylvian fissure. 24 hour urine pregnanetriol = 3.1 ng
4	Raptophilia	916 ng/ml	Grand mal seizures
5	Homosexual pedophilia	1230 ng/ml	
6	Hypersexuality	880 ng/ml	Family history of adrenogenital syndrome
7	Voyeurism	Elevated LH: 98 ng/ml	
8	Homosexual pedophilia	77 ng/ml	Generalized muscular hypotonia
9	Homosexual pedophilia	Cortical atrophy (on CAT scan, secondary to auto accident)	Grand mal seizures, recurrent slow delta wave and sharp activity over frontal anterior region (more pronounced on right)
10	Hypersexuality		Cortical blindness, mild mental retardation
11	Homosexual pedophilia		Cortical blindness
12	Heterosexual pedophilia		Visual spatial defects. Right sided partial hemiparesis of upper extremity with spasm
13	Homosexual pedophilia	Dyslexia	
14	Homosexual pedophilia	Dyslexia	Childhood lisp requiring speech therapy
15	Homosexual pedophilia	Childhood learning disorder	Strabismus
16	Homosexual pedophilia	Kleinfelter's syndrome	90% mosaic (previously undiagnosed). Elevated FSH and LH
17	Sexual sadism	Basal ganglion dysfunction	Oculomotor abnormality. Gait disturbance
18	Homosexual pedophilia	Schizophrenia	
19	Homosexual pedophilia	No abnormalities detected	
20	Voyeurism		
21	Voyeurism		
22	Homosexual pedophilia		

Testosterone was considered elevated if blood levels were more than 2 standard deviations above the mean (mean = 575 ± 15[illegible] SD). Ordinarily 2.5% of men would be expected to have such an elevation. In this sample 27% (6 of 22) had elevations. Normal 24 hour urine pregnanetriol = <2.5 ng

example, found that the great majority did not result in physical injury (3). Although outdated psychiatric classification schemes listed sexual deviation as a form of sociopathy, persons with unconventional sexual desires may show no other evidence of antisocial character traits.

Pharmacological Treatment With Medroxyprogesterone Acetate

Medroxyprogesterone acetate can be injected intramuscularly, usually weekly, frequently at an initial dosage of 500 mg. It is then slowly absorbed into the blood stream and carried to receptor sites, reducing circulating levels of testosterone by decreasing testicular output. It does not appear to affect testosterone production by the adrenal gland, but does prevent the compensatory elevation of follicle-stimulating hormone (FSH) and LH ordinarily expected as a response to decreased testicular output. Dosage can be titrated to obviate total impotence, and the medication is not feminizing. Major side effects are weight gain and mild lethargy, but cold sweats, nightmares, myalgia, dyspnea, hyperglycemia, azospermia, hypertension, and breast cancer (in dogs) have all been reported. Most effects seem fully reversible when medication is discontinued, although long-term follow-up in excess of ten years has not yet been possible. The 100 mg/ml concentration has greater bioavailability and is less painful than the 400 mg/ml solution. No more than 250 mg should be administered into a single injection site.

A number of carefully documented studies conducted by Dr. John Money suggest that administration of this drug decreases the frequency of erotic imagery and the intensity of erotic cravings, as well as the frequency of erection and masturbation (17). Following treatment, a number of paraphilic patients have stopped deviant behavior entirely, reporting relief from pressure to enact troublesome sexual urges, while still maintaining the capacity for intercourse.

Table II summarizes changes in sexual behavior in 20 chronic paraphilic patients treated with medroxyprogesterone acetate. These data suggest that the drug can be helpful in a high proportion of cases, provided the patient is compliant in taking it. Compliance may depend partially upon the nature and intensity of the deviant cravings themselves, and also upon other aspects of a person's character and behavior such as his tendency to abuse alcohol, his capacity to form affectionate relationships, his temperament, and his attitude about treatment. Certain syndromes such as pedophilia may be more or less difficult to treat than others such as exhibitionism.

When patients stop taking the medication, their hunger for deviant sexual activities seems to return, putting them at risk of again engaging in behaviors which satisfy that hunger. Thus, the treatment seems to work by suppressing sexual appetite, rather than by acting as a temporary catalyst until psychological counseling can become effective. Although psychological counseling may not diminish erotic cravings, some patients report that it does help them in their efforts to establish a more appropriate sexual pattern. Brief psychiatric hospitalization for three or four weeks at the beginning of treatment may aid subsequent compliance.

Future Research

Medroxyprogesterone acetate has not yet been subjected to a double-blind clinical trial. This should be done, possibly using intramuscular injections of fluphenazine decanoate (a medication with similar side effects that does not reduce testosterone) as a pharmacologically active control. This should provide additional information regarding the effects of testosterone levels upon sexual feelings and thoughts.

Further advances toward understanding the relationship between biology and sexual experience should come about as a result of development of the position emission scanner (PET scanner). Rather than showing brain structure, this device provides a picture which varies in color depending upon the rate of metabolic activity in various brain areas. It will be informative to learn what regions of the brain are metabolically active during sexual arousal; whether these areas differ in persons experiencing unconventional sexual desires; and what the effects of treatment with medroxyprogesterone acetate are upon brain activity.

Only by learning more about what motivates "sex offenders" will it be possible to find out how to prevent voyeurism and other improper sexual acts. Present approaches, including incarceration, have not proven helpful, and it is important to meet the need that exists within the community to deal effectively with these kinds of problems. It is hoped that the Hopkins program for studying and treating these conditions will continue to prove useful. Treating such patients can present difficulties because of stigma and prejudice sometimes directed toward persons and institutions doing so, but it is clear that many of these people, such as the patient under discussion, legitimately need and deserve help. More than 50 centers in the United States treat such patients (18).

Medicolegal Issues

The topic of sexual deviation and its treatment raises a number of medicolegal and ethical concerns. In a recent editorial in *The American Journal of Psychiatry* Seymour Halleck questioned whether a person facing incarceration can provide truly voluntary consent to receive treatment, knowing that refusal will lead to imprisonment (19). Admittedly, such decisions can be difficult. However, a person does not lose the capacity to choose just because a decision is difficult. Cancer patients sometimes have to choose between taking unpleasant chemical agents or dying. Furthermore, there is legal precedent for requiring individuals to take medication (e.g., measles vaccine), when not doing so threatens the well-being of others. Were persons incarcerated, or facing incarceration, to be denied access to antiandrogenic medications, based upon the idea that they are incapable

TABLE II

Changes in Sexually Deviant Behaviors in 20 Chronic Paraphilic Male Patients Treated With Medroxyprogesterone Acetate*

Patient	Diagnosis	Average frequency of sexually deviant behaviors before treatment†	Length of drug treatment‡	Occurrence of Deviant Behaviors	
				During treatment	After treatment
1	Homosexual pedophilia	once/week	5 years, 9 months	None	No relapse
2	Homosexual pedophilia	twice/month 1 known arrest	1 year	None	Relapsed
3	Heterosexual exhibitionism	2 times/week	10 months	None	Relapsed
4	Homosexual masochism	4 times/week	3 months	None	Relapsed
5	Bisexual pedophilia	2 times/week	3 months	None	Relapsed
6	Transvestism homosexual incest	7 times/week 2 known incidents	1 year, 4 months	None	Relapsed
7	Heterosexual sadism	once every 2 weeks for 25 years	3 years, 3 months	None	Still in treatment
8	Homosexual pedophilia	2 times/week 6 arrests in 6 years	10 months	None	Relapsed
9	Homosexual pedophilia	Once every 2 months 4 arrests in 6 years	2 years	None	Still in treatment
10	Homosexual pedophilia	once/week 14 arrests in 29 years	3 years, 9 months	Relapsed	Treatment continue
11	Homosexual pedophilia	2 times/week 7 known arrests	4 years, 2 months	None	Still in treatment
12	Voyeurism heterosexual pedophilia	2 times/week (pedophilia) 5–8 arrests	5 years, 3 months	None	Relapsed
13	Homosexual pedophilia	2 times/week since age 10	5 years, 9 months	None	No relapse
14	Homosexual pedophilia	once/month numerous arrests, 4 convictions, 4 parole violations	3 years, 8 months	Relapsed	Treatment continue
15	Homosexual pedophilia, exhibitionism	probably several incidents/year	3 years, 9 months	None	No relapse
16	Homosexual pedophilia	once/week	1 year, 1 month	None	Relapsed
17	Heterosexual voyeurism	once/month	1 year	Relapsed (while intoxicated)	Treatment continue (in prison)
18	Heterosexual exhibitionism	5 times/day since age 11 numerous arrests	2 years, 2 months	None	Relapsed
19	Heterosexual exhibitionism	2 times/week	2 years, 1 month	None	Relapsed
20	Heterosexual exhibitionism	4 times/week binges of 20/day	2 years, 3 months	None	Still in treatment

Adapted from Reference 10

* Deviant behavior was considered to have occurred if the patient was accused of having it, or admitted to it, even if it did not come to the attention of the law

† Based on institutional records and patients' statements

‡ Patients who stopped medication did so against advice, except in the cases of patients 13 and 15

of voluntary consent, it is likely that civil libertarians would protest. It can be argued that administering medication to a willing convicted person (even as part of an investigative study, provided it may directly benefit him) is very different from using him to study the effects of a drug (e.g., rabies vaccine) unrelated to his potential benefit.

Another medicolegal issue raised in considering the matter of sexual deviation relates to the concept of "free will," a concept whose meaning has been pondered by philosophers for centuries. Society, through its laws, needs to hold individuals accountable for their own behavior. Some persons are able to control their sexual behavior without help, but persons are likely to differ in the intensity and quality of their erotic desires. Many paraphilic men, prior to treatment with medication, report that their desires are so intense that they are unable to resist temptation successfully. Many of the same men report that their desires become sufficiently diminished while taking medication that they are able to stop deviant activity (and they do). Some state that while taking medication they feel for the first time that they have a choice about whether or not to act. There are other psychiatric syndromes as well (e.g., compulsive handwashing) in which, prior to treatment, persons seem to lack the capacity to stop certain behaviors on their own. Such data clearly present difficult legal and ethical dilemmas.

The psychiatric literature is sometimes misleading to guiding the law about the topic of sexual deviation. Many psychiatric texts, for example, state that rape

not a sexually motivated crime, but rather an act of anger and hostility directed toward women. While it is true that some rapists have hostile motives, and that some suffer from sexual dysfunctions such as premature ejaculation, the motivation to rape can be sexual rather than hostile. Furthermore, to argue that rape is not at least partially a sexually motivated act makes little sense when a man has obtained an erection and forces intercourse. The following verbatim excerpts from letters written by a convicted paraphilic rapist document that rape is sometimes very much a sexually motivated act (which is not to suggest that rape is nonassaultive).

> Sir, I am 32 years old and in the penitentiary for several rapes. All my life I've felt I wasn't normal ... being the sex maniac I've been ... messed up in sexual thought and behavior for God only knows how long. Since I was 4 or 5 years old, sex has been 90% of my thoughts. After I was married I would have sex with my wife every night, then I would go masturbate. Sex was all I could think of. The rapes started when I [saw] a naked woman through a window. Since that time it's been 8 or 10, maybe more. The only way to stop the thoughts was to have sex or ejaculate. Sometimes I masturbated. After (each rape) I felt ashamed. I tried to stop and could for a month or longer, but ended up doing it again. It was as if I was being driven. I know it [doesn't] sound true or logical, but at a certain point, I could not control myself. The important thing to me now is getting relief from sexual thoughts. My wife said I could have come to her with this. How could I tell a woman I have something this bad? She never denied me sex. When I was arrested, I was so glad it was finally over. The only things against the law I've ever done is because of sex. I don't like to hurt people. Some people have told me I'm just a dirty person, and I did those things because I wanted to and enjoyed it. This is not true. Maybe I did want to in a way, subconsciously or something. But I did not enjoy being that kind of a person. I have cried and hated myself. At a certain point understanding fails me. I can't comprehend. What makes a person want to do these things?

Summary

Sexual deviation syndromes (paraphilias) are diagnosable psychiatric syndromes manifested by 1) recurrent persistent deviant fantasies, 2) intense erotic cravings that are noxious when frustrated, and 3) relatively stereotyped behaviors in the sense that exhibitionists expose themselves, whereas voyeurs "prep." These syndromes follow a predictable course, often respond to biological treatments, and may have associated organic pathologies, but their etiologies are poorly understood. Sexual offenses, as defined legally, may or may not be perpetrated by persons with one of these syndromes. When offending behavior is related to such a syndrome, medroxyprogesterone acetate may be helpful, provided the patient is compliant. It is not known whether this medication can help when such behavior is unrelated to deviant sexual cravings, as when rape is committed in response to anger and hostility—something which may occur more rarely than many psychiatric texts suggest. Legal demands for justice and safety as well as medical concerns for understanding care must both be considered, because each is important. When a person seeks help, as did the patient presented, his difficulties should be appreciated rather than scorned as perversions.

ACKNOWLEDGMENT

The authors wish to thank Dr. Paul McHugh, Dr. John Money and Ms. Maggie Rider for their encouragement and kind assistance.

THE BIOSEXUAL PSYCHOHORMONAL CLINIC
EVALUATION SERVICES

Before a patient can be accepted into the treatment program of the Biosexual Psychohormonal Clinic an evaluation appointment is necessary.

Evaluations before possible admission into the program are performed through the outpatient services, Meyer Building, of the Johns Hopkins Hospital. Appointments are made through Ms. Maggie Rider, (301) 955-6292. The service is ordinarily performed only on Wednesday mornings beginning at 8:30 a.m., and will generally be completed by noon.

The cost of this visit is currently $160 for the evaluation, plus $120 for lab fees (blood will be drawn and a number of lab tests will be performed). Payment is expected at the time of the visit. However, insurance may cover part or all of the fees. You will be expected to file a claim for reimbursement. Medical Assistance is accepted. However, if your Medical Assistance originates from another state we will need prior confirmation that your home state will cover our costs. When a service is not available in one state but is available in another the home state will frequently allow this cost to be paid from their funds. Should you have major medical insurance coverage please be sure to bring the necessary forms at the time of the appointment. If documented financial need can be provided sometimes a deferred payment plan can be arranged. A deposit is required to hold an appointment date.

Inpatient evaluations are often done for those patients who reside outside the state of Maryland. This type of evaluation consists of an in hospital stay of approximately three to four weeks. Treatment plans are formulated and begun during this time, as well as plans for continuing care after discharge, based on the individual needs and circumstances.

In some cases emergency evaluations can be arranged, performed on an outpatient basis. Costs are based on the time spent with a physician, plus the lab fees. An approximate fee would be in the vicinity of $200, plus the $120 lab fee.

Currently the waiting time before being seen for these services is approximately:

_____for outpatient evaluation, _____for inpatient evaluation, and

_____for emergency evaluation.

FEE SCHEDULE

CLINIC EVALUATION	$160
LAB - BLOOD WORK	135
CONSULTATIONS	90 (per hour)
RE-EVALUATION	75
GROUP THERAPY SESSION	65
DEPO-PROVERA INJECTION	27.50 (only)

(Fees are subject to change. Please inquire. Deferred payment plans considered with documented financial need.)

Treatment of Sex Offenders with Antiandrogenic Medication: Conceptualization, Review of Treatment Modalities, and Preliminary Findings

BY FRED S. BERLIN, M.D., PH.D., AND CARL F. MEINECKE

Sexual deviation disorders, or paraphilias, are diagnosable psychiatric syndromes manifested by 1) recurrent fantasies about deviant sex, 2) intense associated cravings, and 3) stereotypic behavioral responses. Pedophiles seek out children in response to their erotic thoughts and urges, whereas exhibitionists expose themselves. Paraphiliac syndromes ordinarily follow a chronic course and may be associated with biological pathology, but etiological factors are poorly understood. Treatment becomes a consideration when the well-being or rights of others are compromised. Proposed treatments have included psychotherapy, behavior therapy, surgery, and medication. Medroxyprogesterone acetate, which reduces testosterone, may diminish sexual preoccupation and urges, making self-control easier.

The sexual deviation disorders, or paraphilias, include voyerism, exhibitionism, erotic sadism, and pedophilia (sexual attraction to children). They are considered psychiatric syndromes by the medical profession and are listed as diagnostic categories in the official psychiatric nomenclature. However, persons who manifest the behaviors characteristic of these syndromes often come into conflict with society, which considers them criminal offenders. This paper examines the rationale for treating these conditions medically rather than punitively and reviews the treatments available, especially use of the antiandrogenic agent medroxyprogesterone acetate (Depo-Provera). It also alludes briefly to some of the medicolegal implications of providing treatment. Rather than detailing data from any single study, this paper will present an overview of relevant issues plus some case reports and preliminary findings.

DIAGNOSIS OF A PARAPHILIAC SYNDROME

One way of arriving at a diagnosis is to appreciate the presence of a syndrome, which is a cluster of features that appear together consistently. Historically, it has proven helpful to identify and label such syndromes. Mania, for example, can be diagnosed by recognizing a syndrome that includes delusions of grandeur, sustained mood change, hyperactivity, and prolonged insomnia. Disease syndromes such as these tend to follow a relatively predictable course and often respond in a predictable way to treatment.

According to *DSM-III*, a diagnosis of paraphilia can be made by identifying such a syndrome. This is done by examining a person's cognitive, emotional, and behavioral state. Cognitive examination reveals recurrent persistent fantasies about deviant sex. Examination of the feeling state discloses erotic cravings perceived as noxious when frustrated. The frustration can be relieved temporarily if deviant fantasies are carried out. Behavioral examination shows relatively stereotyped sexual activity because erotic pleasure is maximized only when deviant fantasies are enacted precisely. The exhibitionist, therefore, exposes himself in response to his fantasies and urges on repeated occasions, often in a stereotypic manner. The pedophile, frequently impotent in adult sexual relationships, seeks out young children, sometimes of a particular age, sex, and appearance, in keeping with his fantasies. One would not ordinarily expect a pedophile to develop some other paraphiliac syndrome, such as exhibitionism or erotic sadism, any more than one would expect an adult with conventional heterosexual desires to suddenly begin fantasizing about and seeking out young children. The expression of deviant sexual desires can be modified depending on the character traits of the individual experiencing them. Paraphiliac syndromes typically manifest themselves initially at puberty and follow a chronic course that may, however, be altered by treatment. At present their etiology is unknown, although certain types of early life experiences are thought to be possible contributory factors in some instances. The etiology of erotic desires and fantasies that influence conventional heterosexual behavior, as well as knowledge about what makes a stimulus sexually appealing, is also poorly understood.

TABLE 1
Associated Findings in 17 Consecutively Referred Male Patients with Sexual Disorders

Patient*	Sexual Disorder	Associated Findings
1	Sexual sadism	Oculomotor abnormality suggestive of basal ganglion dysfunction; unexplained gait disturbance
2	Homosexual pedophilia	Dyslexia; childhood lisp requiring speech therapy
3	Homosexual pedophilia	Cortical atrophy (history of head injury secondary to automobile accident); grand mal seizures; recurrent runs of slow delta waves and sharp activity over frontal anterior brain regions (more pronounced on right side)
4	Homosexual pedophilia	No associated abnormalities detected
5	Hypersexuality	Family history of adrenogenital syndrome; elevated testosterone (1040 ng/100 ml)†
6	Voyeurism	No associated abnormalities detected
7	Homosexual pedophilia	Klinefelter's syndrome (previously undiagnosed); XXY present in 90% of cells; elevated FSH and LH; decreased testosterone; XXY genotype
8	Homosexual pedophilia	Strabismus; childhood learning disorder (originally misclassified as mental retardation)
9	Heterosexual pedophilia	Schizophrenia
10	Homosexual pedophilia	No associated abnormalities detected
11	Exhibitionism	Elevated testosterone (912 ng/100 ml); head injury in automobile accident, comatose several months; grand mal seizures
12	Heterosexual pedophilia	Brain damage secondary to automobile accident at age four; right-sided partial hemiparesis of upper extremity with spasm
13	Homosexual pedophilia	Elevated testosterone (905 ng/100 ml)
14	Heterosexual pedophilia	Near total blindness secondary to brain damage in an automobile accident
15	Heterosexual pedophilia	Elevated testosterone (1263 ng/100 ml); mild generalized ventriculomegaly and cortical atrophy most pronounced in area of the right sylvian fissure (by CT scan); elevated 24-hour urine pregnanetriol (3.1 mg; normal<2.5 mg)
16	Homosexual pedophilia	Elevated LH (77 ng/ml; normal range is 36 to 64); generalized muscular hypotonia
17	Paraphiliac rape	Elevated testosterone (916 ng/100 ml); grand mal seizures

*Patient 2 was seen at the Maudsley Hospital in London; the others were seen at the Johns Hopkins Hospital in Baltimore.
†Testosterone was considered elevated if blood levels were more than 2 standard deviations above the mean (mean = 575 ± 130). Ordinarily, 2½% of men would be expected to have such an elevation; in this sample 29% of the men (5 of 17) had elevated testosterone.

In addition to the triad of cognitive, emotional, and behavioral findings, physical and laboratory examinations may reveal associated organic pathologies. Preliminary data from our center suggest that there may be an unusually high frequency of genetic, hormonal, or neurological anomalies (see table 1). It may be that biological vulnerabilities in some individuals predispose them to develop unconventional sexual desires (1). However, this hypothesis requires further confirmation by comparison with a control population.

Diagnosis of a paraphiliac syndrome cannot be made on the basis of sexual behavior alone because similar behaviors can occur for a variety of reasons. For example, rape could be committed in response to recurrent urges and fantasies about having coercive sex; in such cases the diagnosis of paraphilia would be appropriate. However, rape could also be initiated by a hallucinating person in response to voices telling him to do so, by a mentally retarded person with conventional rather than deviant sexual desires who "doesn't know any better," or by a hostile, angry individual to humiliate a woman. Such differential diagnosis is important because treatment may be different for a hallucinating, retarded, or impulsive angry person than it is for a paraphiliac. Not all sex offenses (a legal term) are committed by persons manifesting a sexual deviation disorder or paraphilia (a medical term).

METHODS FOR TREATING PARAPHILIAC PATIENTS

Our review of the relevant literature revealed over 230 references pertaining to treatment of sexual deviations. In addition to the medication therapies, psychodynamic therapy, behavior modification, and surgery have been tried.

Psychodynamic theory generally assumes that sexually deviant behaviors occur because of unresolved unconscious conflicts, and treatment is directed at uncovering such conflicts (2–4). To our knowledge there have been no well-controlled clinical trials to demonstrate that any of the individual or group psychodynamic methods result in sustained behavioral change in these conditions, and achieving insight into how they may have developed does not necessarily alter them. In point of fact, most of us have little understanding about why particular things arouse us sexually (5, 6). The causes of sexual cravings are probably multifactorial and are often unknown. Lichen and associates (7), for example, have shown that feelings of gender identity in some transsexuals may be correlated with the presence or absence of H-Y antigen.

Behavior therapists are often less concerned with the antecedent causes of unconventional sexual be-

havior than with what can be done about it (8–10). A number of techniques, including hypnosis and biofeedback, have been advocated. Usually the principle is to try to make an unacceptable erotic stimulus less appealing while the person is trained to become sexually aroused by a formerly neutral, or aversive, stimulus. This can be done in the case of pedophilia by following erotic thoughts about children with a mild electric shock and by instructing the patient to masturbate while looking at pictures of a nude, age-appropriate partner. Although this approach is occasionally successful, results are more often disappointing. Most of the literature on psychodynamic or behavioral treatment of sex offenders has consisted of uncontrolled individual case reports without long-term follow-up. It appears that brief changes in behavior are relatively easy to accomplish, but long-term maintenance of such change is achieved far less frequently. Nevertheless, behavior therapy has on occasion been helpful, and it should not be dismissed entirely as a form of treatment. Marks and associates (11), for example, showed good results at two-year follow-up in the treatment of transvestites but poor results with transsexuals.

Biological therapies have included surgical castration, intramuscular injections of medroxyprogesterone acetate, or oral administration of cyproterone acetate (the latter is currently unavailable in the United States) (12–14). Forced castration is clearly not acceptable as treatment in this country but has met with some success elsewhere (15–17). Castration in animals leads to a reduction of sexual behaviors and often causes total impotence. Brain surgery has also been attempted as a treatment for sexually deviant behaviors, presumably with the idea of ablating pathways thought to be involved in sexual desire, but this approach has met with only limited success (18).

When medication has been used to try to reduce sexual cravings, efforts have been made to titrate the dosage so as not to cause total impotence. The medication currently in use investigatively in the United States is medroxyprogesterone acetate (19). It is an antiandrogenic agent that can be administered once or twice per week intramuscularly to be gradually absorbed into the bloodstream, causing a reduction in circulating levels of the male sex hormone, testosterone. Effects appear to be fully reversible within a few months after the medication is stopped, although it has not yet been used widely enough for us to be sure this is entirely true. Major side effects are weight gain and mild lethargy; cold sweats, nightmares, dyspnea, hyperglycemia, hypogonadism, and leg cramps have also been reported. High doses can cause breast cancer in female beagle dogs, but the drug does not appear to do so in humans, and it does not cause men to become feminized in appearance (20). The 100 mg/ml concentration of medroxyprogesterone acetate has a better bioavailability and is less painful when injected than the 400 mg/ml concentration. Besides decreasing testosterone secretion by the testes, the medication appears to act centrally on the brain as well. This hypothesis is supported by two observations. First, increasing doses of medication seem to decrease erotic fantasies even when serum testosterone levels remain unchanged. Second, there is no compensatory elevation of FSH or LH production by the pituitary gland as a response to lowered levels of testicular testosterone production. Because medroxyprogesterone acetate is given by injection, it is easy to monitor treatment compliance. Psychiatric counseling is ordinarily given in conjunction with the medication to help patients cope with the difficulties encountered as a consequence of their unconventional sexual desires. Most men are hospitalized during the initial phase of treatment.

EVIDENCE THAT MEDICATION CAN BE HELPFUL

Because of difficulties in carrying out research with persons whose behaviors, if untreated, can cause others distress, a controlled double-blind study on the use of medication has not been done. This is necessary before firm conclusions about therapeutic efficacy, or mode of action, can be made. Recently the Evaluation Research Group, a private corporation, was funded by the National Center for the Prevention and Control of Rape to formulate a model to evaluate the relative effectiveness of various sex offender treatment programs (21). In the meantime, there are some data available in support of the hypothesis that medroxyprogesterone acetate can reduce the intensity of deviant sexual urges and the frequency of accompanying erotic fantasies. Evidence from some of the major studies conducted at this center will be reviewed briefly.

In one study (22) conducted at Johns Hopkins Hospital under the direction of Dr. John Money, 10 paraphiliac men were given medroxyprogesterone acetate intramuscularly approximately once per week. Data were gathered from structured personal interviews with patients and family members who made themselves available and from social agencies and institutional records. Evaluations made before and after treatment suggested that medroxyprogesterone acetate decreased the reported frequency of erotic imagery, as well as the frequency of erection and ejaculation. In addition, some men stopped offensive sexual behavior entirely, sometimes for as long as a couple of years, reporting relief from the psychological pressure to act on their paraphiliac urges. Presumably the decreased frequency of erotic thoughts comes about, at least in part, as a consequence of lowered levels of testosterone.

In a follow-up study to the one just cited, 20 men with histories of chronically recurrent paraphiliac behavior were placed on medroxyprogesterone acetate for varying lengths of time. Details of the study protocol itself are described elsewhere (23). Additional data obtained by subsequent interview and review of the records of the same 20 men who participated in that study are detailed here for the first time (see table 2). Only 3 of the 20 patients showed recurrences of sexually deviant behavior while taking medication, in

TABLE 2
Changes in Sexually Deviant Behaviors in 20 Chronic Paraphiliac Male Patients Treated with Medroxyprogesterone Acetate[a]

Patient	Age (years)	Diagnosis	Average Frequency of Sexually Deviant Behaviors Before Treatment[b]	Drug Treatment[c]		Occurrence of Sexually Deviant Behaviors	
				Length	Maximum Dosage	During Treatment	After Treatment
1	34	Homosexual pedophilia	Once/week	5 years, 9 months	500 mg/week	None	Treatment dropout; no relapse less than 1 year after treatment
2	31	Homosexual pedophilia	Twice/month; 1 known arrest	1 year	300 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
3	30	Heterosexual exhibitionism	Twice/week	10 months	250–300 mg/week	None	Treatment dropout; relapsed more than 1 year after treatment
4	34	Homosexual masochism	4 times/week	3 months	200 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
5	27	Bisexual pedophilia	Twice/week	3 months	400 mg/week	None	Treatment dropout; relapsed more than one year after treatment
6	43	Transvestism; homosexual incest	7 times/week; 2 incidents	1 year, 4 months, intermittently	150 mg every other week	None	Relapsed less than 1 year after treatment
7	52	Heterosexual sadism	Once every 2 weeks for 25 years	3 years, 5 months	600 mg/week	None	Treatment continues; no relapses
8	29	Homosexual pedophilia	Twice/week; 6 arrests in 6 years	10 months	500 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
9	36	Homosexual pedophilia	Once every 2 months; 4 arrests in 6 years	2 years	500 mg/week	None	Treatment continues; no relapses
10	56	Homosexual pedophilia	Once/week; 14 arrests in 29 years	3 years, 9 months	300 mg/week	Relapsed	Treatment continues
11	40	Homosexual pedophilia	Twice/week; 7 known arrests	4 years, 2 months	400 mg/week	None	Treatment continues; no relapses
12	45	Voyeurism; heterosexual pedophilia	— Twice/week, 5–8 arrests; numerous institutionalizations	5 years, 3 months	300 mg/week	None	Relapsed less than 1 year after treatment; treatment now resumed
13	27	Homosexual pedophilia	Twice/week since age 10	5 years, 9 months	200 mg/week	None	Treatment completed; no relapse more than 1 year after treatment
14	41	Homosexual pedophilia	Once/month; numerous arrests; 4 convictions; 4 reported parole violations	3 years, 8 months	500 mg/week	Relapsed	Treatment continues
15	37	Homosexual pedophilia; exhibitionism	Record unclear; probably several incidents/year	3 years, 9 months	350 mg/week	None	Treatment completed; no relapse less than 1 year after treatment
16	26	Homosexual pedophilia	Once/week	1 year, 1 month	200 mg/week	None	Treatment dropout; relapsed more than 1 year after treatment
17	24	Heterosexual voyeurism	Once/month	1 year	400 mg/week	Relapsed after alcohol consumption	Treatment continues; in prison
18	40	Heterosexual exhibitionism	Five times/day since age 11; first arrest at age 21; numerous others	2 years, 2 months	200 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
19	29	Heterosexual exhibitionism	Twice/week	2 years, 1 month	250 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
20	46	Heterosexual exhibitionism	Four times/week; binges of 20/day	2 years, 3 months	300 mg/week	None	Treatment continues; no relapses

[a] Sexually deviant behavior was considered to have occurred if the patient was accused of having or admitted having a deviant sexual contact (for example, an episode of public sexual exposure). Any occurrence of such behavior was counted as a relapse once treatment had been initiated, even if it did not come to the attention of the law or an official complaint.

[b] Based on institutional records and patients' statements.

[c] Study participants who stopped taking medroxyprogesterone acetate did so at their own request or on medical advice, except in the cases of patients 13 and 14. Some patients were irregularly compliant with medication even during the period when it was being prescribed.

one such case, relapse was clearly related to alcohol abuse. The recidivism rate jumped dramatically when patients discontinued their medication regimen. Of the 11 patients who discontinued medroxyprogesterone acetate against medical advice, 10 relapsed. Two who discontinued treatment with approval have thus far not relapsed. Whether the marked number of patients in this study who eventually relapsed would have remained symptom free had they been required to continue taking medication (perhaps, for example, as a condition of parole) is not known. Reasons for the high attrition rate have yet to be analyzed, although it is clear that some patients found the routine of weekly injections and frequent investigational blood tests burdensome.

The preliminary impression based on these data and other cases now being analyzed is that in general, these men appear to do well in response to antiandrogenic medication as long as they continue taking it and as long as their problems are rather clearly confined to unconventional sexual cravings. They seem to do less well if they have been noncompliant about taking the medication or if in addition to having such cravings they abuse drugs and alcohol, are sexually impulsive, or have a history of other sorts of sociopathy or violence. Some paraphiliacs are concerned about the consequences to others of their unconventional cravings, whereas some are not. Thus, prognosis may depend not only on the effects of medication on the deviant thoughts and cravings comprising the syndrome, but also on other features of the person manifesting the syndrome, such as his attitude about treatment and commitment to it.

Although anecdotal clinical reports are of limited research value, three brief case examples are presented here to help illustrate the types of patients who have been receiving medication.

CASE REPORTS

Case 1 (sadistic paraphilia). Mr. A, a 47-year-old man, complained of being unable to obtain sexual satisfaction unless he hurt his wife. His preoccupation with sadistic fantasies made it difficult for him to concentrate, even at work. He believed his actions to be wrong and consistently felt disgusted and remorseful afterward, often working overtime to avoid the opportunity to harm her. However, every few weeks his cravings would build up to a point where he could not control them. During 25 years of marriage, he had frequently handcuffed his wife, shaved her head, stuck pins in her back, and struck her—although never so forcefully as to require medical or legal attention. Alternative means of obtaining sexual satisfaction such as masturbation led to erection, but ejaculation could not be achieved unless he hurt her. Neurological examination showed evidence of nonprogressive basal ganglia dysfunction, and he had a mild gait disturbance.

Mr. A began treatment voluntarily 4 years ago after he became frightened he might seriously harm or even kill his wife. Since that time there has not been even a single recurrence of the sexual sadism that had occurred previously for nearly 25 years. Conventional sexual activities have become a regular part of Mr. A's marriage, and as before, there has been no extramarital involvement. He believes he can control his paraphiliac desires, which he said have become much less intense, only with help from antiandrogenic medication. He has found considerable relief from the obsessive erotic urges that he had previously experienced as noxious rather than pleasurable. With treatment his serum testosterone has been maintained at below-normal levels.

Case 1 was an example of sadistic sexual desire qualitatively deviant from accepted cultural norms. Case 2 is an example of quantitative deviance, that is, of significantly heightened sexual drive.

Case 2 (hypersexuality). Mr. B, a 17-year-old, stated that he was preoccupied with erotic fantasies to such a degree that they interfered with work and family relationships. His wife confirmed his report that he sometimes demanded intercourse as often as 15 times in a single day. There was a family history of andrenogenital syndrome, and his mother had taken thyroid medication when pregnant. The patient's serum testosterone level was 880 ng/100 ml, above the normal (i.e., more than 2 SD) postpubertal range of 225–875 ng/100 ml as reported by the laboratory performing the assay. No cause could be detected, although receptor site sensitivity to testosterone has not yet been tested (24). Treatment with 400 mg per week of medroxyprogesterone acetate reduced the elevated testosterone level to a prepubertal value of 70 ng/100 ml. The patient reported relief from intrusive fantasies, as well as improved work and interpersonal relationships.

Case 3 (paraphiliac rape). Mr. C, a 32-year-old man with adult-onset idiopathic epilepsy since age 19 but seizure free for the past 3 years, was referred for treatment after committing two rapes. Although never charged previously, he admitted to a lengthy history of similar behavior satisfying legal criteria for rape, beginning at age 20. His first sexual experience was at the age of 6 or 7 with a 14-year-old babysitter who had asked him to watch her masturbate while clothed in her undergarments. Since then, he has fantasized several times daily about similar encounters, often masturbating while doing so. At the age of 15 he broke into the office of a gynecologist who had been dating his sister to steal textbooks to "learn more about the female body." He had a steady girlfriend at the time of hospital admission but he had never found sexual activities with her sufficiently satisfying. He usually masturbated about four or five times per day while fantasizing about various women performing autoerotic acts. In his fantasies he would always imagine forcing a woman previously unknown to him to masturbate while clad in her undergarments. He had been too embarrassed to ever tell any of his regular girlfriends about his erotic preoccupation, and he rarely sought a second encounter with any women whom he had forced to have sex, feeling compelled instead to repeat the episode with a fresh partner.

The patient maintained an apartment separate from his girlfriend. Three or four times per week he would try to meet a new woman (preferably slim and wearing pants rather than a skirt) whom he would persuade to join him at his apartment to smoke marijuana; he never used threats up to that point. Subsequently, however, he would threaten to harm the woman unless she removed all the clothing from below her waist except her panties and masturbated while he watched and masturbated himself. On some occasions he would have intercourse, but this was the exception rather than the rule. Each episode invariably followed this same pattern: he estimated that there had been more than 60 such episodes since he was age 20. On some occasions he would threaten his victim with a knife as well as verbally, but in those instances when she refused to be intimidated, he always allowed her to leave without becoming physically assaultive. As far as we could determine, on no occasion did he injure a woman physically, and none of his erotic fantasies was sadistic in the sense of wanting to inflict pain. After each episode he would escort the woman out, "trying to be kind, apologizing, and making sure she was okay," with no further threats. He reported that he would then invariably vomit, feeling "disgusted, sick, and remorseful" and vow never again to act in such a manner. However, in a few days his fantasies and urges would recur with renewed intensity and the whole pattern would be repeated.

Mr. C believed coercion of another person was wrong. Worried about the troubles his actions could cause him, and appeared to have some concern for his victims. Nevertheless, he stated that his erotic thoughts and cravings consistently proved to be more than he could resist. In his words, "It's like an insatiable drive, like a pressure that is always on me. Sometimes I can push it off by masturbating, but eventually I feel driven to repeat this thing over and over." His serum testosterone level was found to be 916 ng/100 ml (well above the reported normal 3 SD range of 275 to 875). Because we are only now beginning a careful, rigorously supervised treatment protocol, it is too soon to know whether success can be achieved.

DISCUSSION

Persons who engage in dangerous or offensive sexual behaviors pose a variety of medicolegal problems, especially if juveniles or nonconsenting adults are involved. Some persons undoubtedly misuse other people with little concern for them and may require quarantine or punishment. Others (just as is true of some drug addicts, cigarette smokers, or overeaters) may be in a sense victims of intense cravings that are quite resilient and therefore difficult, if not impossible, to resist. Such persons must still assume responsibility for their own actions, but when they seek medical help they should be treated with an appreciation for their difficulties rather than with stigmatization, scorn, or contempt (25). This requires that helping professionals be able to deal with their own feelings. Although many treatments, including psychodynamic and behavioral therapies, have been tried in the past, only recently has the potential for help in the form of medication become available. Some might argue that in a way paraphiliac behavior is no more a reflection of disease than is conventional sexual activity. In a nonjudgmental sense, this may be true. However, syndromes are often labeled diseases when they impair functioning or cause suffering. Since paraphiliac behaviors can infringe on the rights and well-being of nonconsenting persons, causing suffering, it seems proper to make a value judgment about them, that is, that they must stop and because the cravings associated with such behavior can often be alleviated by medication, the term "treatment" still seems appropriate. Unconventional sexual activities between consenting adults that cause no harm do not ordinarily require psychiatric care.

Preliminary data on the use of medroxyprogesterone acetate to treat sex offenders clearly suggest that a means must be found to ensure continued compliance with the treatment regimen before one can feel relatively confident about efficacy. There is precedent, however, for solving compliance problems by requiring persons to take medication by legal mandate (e.g., smallpox vaccine), when not doing so poses a threat to the well-being of others. Exploration of such a solution, should it be considered, would have to be done with due care so as not to infringe on human rights by imposing treatment. Nonetheless, one would not want to deny a convicted offender the right to receive treatment, when this could be done safely, as an option to imprisonment. In trying to provide treatment to patients, protection of potential victims must be considered. However, society as well as the sex offender will likely benefit if the offender can be treated successfully rather than being imprisoned and then released unchanged. There is no evidence, except in the case of the paraphiliac sadist or rapist, that having a paraphiliac syndrome increases the probability of physical violence, and some paraphiliacs seem reasonably well adjusted at work and in other spheres of social endeavor (26).

People do not decide voluntarily what will arouse them sexually. Data presented here suggest that nonlearned biological as well as learned environmental factors may play an etiological role in the development of sexually deviant behaviors. Better understanding of causal factors may eventually lead to more specific forms of treatment. At a symposium at the Massachusetts Institute of Technology Goy and McEwen (27) reviewed evidence suggesting that nonlearned biological factors may be more important determinants of human sexual behavior than is generally appreciated. Improved understanding of possible genetic, hormonal, or neurochemical bases for human sexual pathology should be sought in pursuing further the rationale for treatment with medication. The new positron emission tomographic scanner may help provide additional clues regarding brain functioning during sexual arousal. Currently, treatment with medroxyprogesterone acetate involves using it as a suppressant of sexual desire in general. It seems to decrease the intensity of sexual urges but does not change them qualitatively. If there is an unlearned biological basis for deviant

sexual activity, an ideal medication might suppress deviant sexual cravings alone without affecting more conventional erotic interests. When medroxyprogesterone acetate is discontinued, allowing the sexual appetite to heighten or return, behaviors engaged in to satisfy that appetite are also likely to be reinstituted. Thus, when not taking medication, many paraphiliac men report being unable to use willpower to stop deviant sexual behaviors, and do not. While receiving injections, many of the very same men report that they are then able to stop, and do.

Given our present level of knowledge of the paraphilias, it is still too soon to predict with confidence the future of hormonal treatment programs. It is unclear whether the compliance problems evidenced by some patients can indeed be solved. It is possible that even with improved compliance, future results may yet fail to support preliminary impressions of good therapeutic efficacy. Certainly many more data are needed. Even so, it is already clear that several patients have experienced marked reductions in sexually deviant activity and fantasy while taking medroxyprogesterone acetate. This suggests that the idea of considering at least some sexual offenses to be a behavioral manifestation of intense aberrant drives, possibly related to a dysfunction in brain and representing a condition that is potentially treatable with medication, merits continued investigation. It is hoped that legal demands for justice can be reconciled with medical concerns for understanding care.

BIOSEXUAL PSYCHOHORMONAL CLINIC

The Biosexual Psychohormonal Clinic is designed to treat patients with the following problems:

Homosexual Pedophile — Voyeurism — Exhibitionism
Sexual Sadism — Heterosexual Pedophile — Hypersexuality
Transvestism — Other Psychosexual Disorders

Clients usually come to treatment because they are court-referred, self-referred or via other sources, i.e., family or community agencies.

The patient is evaluated by a team of professionals (social workers, nurses, physicians) in our Wednesday A.M. clinic. This assessment may or may not include a physical exam, lab work, and use of information from other agencies. Some of our recommendations may include long term care in a structured facility, inpatient care on our unit at the Johns Hopkins Hospital, referrals to other agencies, outpatient psychotherapy, followup residence at a psychiatric half-way house, vocational rehabilitation referral, and/or Depo-Provera injections.

If, as a result of our evaluation, the patient is admitted to our inpatient service the client is subject to a more complete psychiatric evaluation, physical exam, blood chemistry and may be started on Depo-Provera on a trial basis. (See Dr. Berlin's publication for explanation of Depo-Provera and how the medication is used). The patient is observed closely regarding progress and prognosis. Standard insurances such as Blue Cross/Blue Shield will often cover costs of inpatient or outpatient care and assessment.

When the patient is discharged from our inpatient service he is followed by our outpatient department and Depo-Provera plus psychiatric counseling and continuing reassessment is given weekly or bi-weekly, according to patient needs. Our other responsibilities may also include testifying in court, keeping in contact with probation officers and referring families for counseling.

Currently we are in our "infancy" in our research and investigational treatment of sex offenders. We are interested in knowing about other programs also.

Antiandrogenic and Counseling Treatment of Sex Offenders

RATIONALE FOR DEPO-PROVERA TREATMENT OF SEX OFFENDERS (PARAPHILIACS)

Studies begun at Johns Hopkins in 1963 have shown that sex offenders or paraphiliacs, for example, pedophiliacs, treated with the antiandrogenic hormone, Depo-Provera, plus counseling have gained in self-regulation of sexual behavior. Depo-Provera suppresses or lessens the frequency of erection and ejaculation and also lessens the feeling of libido and the mental imagery of sexual arousal. To illustrate: for the pedophiliac there will be a decreased erotic "turn-on" to children. Metaphorically, this medication can be thought of as an appetite suppressant for the sex drive, intended to make self-governancy easier, usually with the help of adjunctive individual or couple counseling.

ANTIANDROGENIC EFFECT OF DEPO-PROVERA

Depo-Provera, a long-acting, injectable form of medroxyprogesterone acetate manufactured by Upjohn, is a synthetic progestin which is classified pharmacologically as an antiandrogen. Antiandrogen inhibits the release of androgen, the so-called male hormone, from the testicles. Some progestinic hormone is normally present in the male body but at a very low level. Increasing the level allows progestin to compete with androgen and to take over. Androgen is a sexual activator. Progestin is sexually inert. It therefore induces a period of sexual quiescence in which the sex drive is at rest.

MODE OF ENDOCRINE ACTION

In terms used by endocrinologists, Depo-Provera inhibits, through its effect upon neural pathways in the brain, the release of luteinizing hormone (LH) from the pituitary gland. LH is the chemical messenger which normally stimulates the testicles to produce androgen. Hence, the ultimate effect of Depo-Provera is to reduce the level of androgen, especially testosterone, in the blood stream. Typically, in the adult male, Depo-Provera reduces the blood level of testosterone to that of a normal prepubertal boy (from approximately 575 nanograms/100milliliters to 125/nanograms/100 milliliters).

BRAIN EFFECT

In addition to lowering the level of testosterone, Depo-Provera like all progestinic hormones, acts on the brain. In small doses, as in the treatment of sex offenders, the influence on sexual pathways in the brain, though mild, has the great advantage of being sexually calming or tranquilizing. The patient feels relief from an urge that was formerly insistent, commanding, and not subject to voluntary control.

PERIPHERAL PHYSIOLOGICAL EFFECTS

Depo-Provera, through decreasing the testosterone level, temporarily decreases penile erection and ejaculation, and the production of sperm (spermatogenesis). This means that a man probably could not father a child while taking the medication. The medicine is not feminizing (men do not grow breasts). In addition, the sexual

accessory organs, the prostate and seminal vesicles, temporarily shrink. Increased drowsiness, and weight gain, as well as increased blood pressure can occur. Other occasional side effects are discussed in papers published as a result of work in this clinic. Those papers are available.

REVERSIBILITY OF CHANGES — The changes attributed to the medication are reversible upon cessation of treatment; within 7 - 10 days erectile and ejaculatory capacity begin to return, along with the subjective experience of more sexual drive. However, as use of this medication is still relatively new for sex offenders (first use was in 1966), the possibility of irreversible or more long-term side effects cannot be completely excluded.

DOSAGE LEVEL — Tailored for the specific patient, intramuscular injections of Depo-Provera range from 100 milligrams to 800 milligrams every seven days. The typical weekly maintenance dosage of Depo-Provera for sex offenders is 500 milligrams.

HORMONAL MONITORING — Hormonal measures of testosterone and LH (Luteinizing Hormone) initially can be monitored periodically to gauge the effectiveness of the dosage. The recent application of radioimmunological techniques to the assay of testosterone and LH has made such endocrine monitoring precise, reliable, rapid, and relatively inexpensive, as compared to prior methods.

NO INCREASED TOLERANCE — Most patients do not require a progressively increasing dosage, because there is no tolerance build-up to Depo-Provera. However, some may require dosage changes.

COMPARISON WITH SURGICAL CASTRATION — Prior to the discovery, manufacture, and medical use of antiandrogen, the method of reducing the level of testosterone in men was surgical castration. Used in many societies throughout history, castration is disfavored in contemporary American legal-medical management of sex offenders. Obviously, surgical castration is irreversible. It is also less effective than hormonal antiandrogenic therapy. Castration also increases levels of LH from the brain whereas medication lowers these levels.

BEHAVIORAL EFFECTS OF DEPO-PROVERA TREATMENT — In some cases, it is possible for patients to be weaned off Depo-Provera. Since the weaning is a step-by-step lowering of the hormone dosage, it is possible for the patient to discover how completely he has become relieved of the tendency to engage in the sex offending behavior, both in actuality and imagination. In some cases, there is long-lasting remission, so that the patient is no longer compelled to commit sex offenses, but is enabled to have a sex life with a socially suitable consenting partner instead. Some patients prefer to continue on a low, maintenance dosage of the medication so as to ensure a maximal guarantee of no relapse. Those patients who establish a strongly pair-bonded relationship with a permanent partner appear to be additionally guaranteed against relapse. The counseling component of treatment facilitates this achievement and is essential. If for some patients the medication aids only as a sexual appetite suppressant, then stopping the medication would increase the risk of relapse. If the person should again become tempted to repeat his strong, unconventional sexual compulsion (eg; for children, or to expose publicly), then resumption of treatment would be advised.

COMPLIANCE — Some patients, as in all specialties of medicine, are more faithful than others in adhering to medication schedules. Some overly confident patients drift into non-compliance. Other patients neglect specific instructions about their medication schedule. For this reason, it is advisable that as a condition of probation or parole, supervision be legally required so as to ensure strict compliance in adhering to the treatment schedule.

STATISTICAL ASSESSMENT — Sex offenders treated with Depo-Provera at Johns Hopkins are kept in long-term follow-up. Twenty have now been followed for between 5 months and 15 years. Of this group, 17 have proved able to self-regulate their sexual behavior while receiving the medication, and 3 have had relapses. Almost all who stopped medication against medical advise subsequently relapsed.

COUNSELING THERAPY — Counseling sessions are provided weekly, at first, and then may be tailored to individual needs. These sessions are intended to help the patient to establish a new life-style. They are also intended to help the patient cope with problems that have developed as a consequence of his prior life style. Therapy may occur either individually or with groups.

THE BIOSEXUAL PSYCHOHORMONAL CLINIC
EVALUATION SERVICES

Before a patient can be accepted into the treatment program of the Biosexual Psychohormonal Clinic an evaluation appointment is necessary.

Evaluations before possible admission into the program are performed through the outpatient services, Meyer Building, of the Johns Hopkins Hospital. Appointments are made through Ms. Maggie Rider, (301) 955-6292. The service is ordinarily performed only on Wednesday mornings beginning at 8:30 a.m., and will generally be completed by noon.

The cost of this visit is currently $160 for the evaluation, plus $120 for lab fees (blood will be drawn and a number of lab tests will be performed). Payment is expected at the time of the visit. However, insurance may cover part or all of the fees. You will be expected to file a claim for reimbursement. Medical Assistance is accepted. However, if your Medical Assistance originates from another state we will need prior confirmation that your home state will cover our costs. When a service is not available in one state but is available in another the home state will frequently allow this cost to be paid from their funds. Should you have major medical insurance coverage please be sure to bring the necessary forms at the time of the appointment. If documented financial need can be provided sometimes a deferred payment plan can be arranged. A deposit is required to hold an appointment date.

Inpatient evaluations are often done for those patients who reside outside the state of Maryland. This type of evaluation consists of an in hospital stay of approximately three to four weeks. Treatment plans are formulated and begun during this time, as well as plans for continuing care after discharge, based on the individual needs and circumstances.

In some cases emergency evaluations can be arranged performed on an outpatient basis. Costs are based on the time spent with a physician, plus the lab fees. An approximate fee would be in the vicinity of $200, plus the $120 lab fee.

Currently the waiting time before being seen for these services is approximately:

_____for outpatient evaluation, _____for inpatient evaluation, and

_____for emergency evaluation.

Sex Offenders: A Biomedical Perspective and a Status Report on Biomedical Treatment*

Fred S. Berlin, M.D., Ph.D.

Individuals may be considered sex offenders if they behave in particular ways, for example, by becoming sexually intimate with a child. In general, behavior, whether sexual or nonsexual, is a reflection of one's state of mind, as persons tend to act in response to their thoughts and feelings. Some states of mind can be considered pathological, for example, when an individual loses the capacity to determine whether heard voices are coming from the environment or are imaginary. This type of psychological impairment can occur in a variety of psychiatric syndromes such as schizophrenia, dementia, delirium, or manic depressive illness–each of which requires a different form of treatment. Persons mentally ill in these ways sometimes commit sex offenses. On the other hand, some persons commit sex offenses in response to intense, unconventional sexual hungers (e.g., for children). Individuals with deviant or unconventional sexual orientations may also require psychiatric help. Properly diagnosing whether a sex offense is the manifestation of a specific psychiatric syndrome such as schizophrenia, dementia, mania, exhibitionism, or pedophilia can be important in trying to provide optimal care. The etiological determinants of conventional, as well as of unconventional, erotic interests are undoubtedly multiple, but there is evidence that biological factors such a hormone levels or chromosomal makeup sometimes play a major contributory role with respect to the nature of an individual's sexual desires. Biological treatments which alter the physical milieu of the brain, for example, by decreasing the amount of the "male sex hormone" testosterone that is present, may sometimes be able to facilitate better self-control of sexual behavior. This, might be the case, for instance, if treatment that lowers testosterone levels results in a pedophile experiencing a decrease in the subjective intensity of his unconventional sexual appetite. There may be implications regarding how society through its laws should view some sex offenders if (a) it is the case that biological factors, such as

*The author gratefully acknowledges the kind and invaluable assistance of Ms. Maggie Rider, Ms. Claudia Halko, Ms. Deborah Holifield, Ms. Nancy Mace, Mr. Timothy Rider, and Dr. Phillip Slavney in the preparation of this manuscript.

chromosomal abnormalities, contribute to the development of unconventional erotic desires that may tempt persons to want to commit sex offenses, and if (b) it is also the case that surgical or antiandrogenic medication treatments can result in biological and psychological changes that provide such individuals with an increased capacity for self-control not previously present.

PART I: SYNDROMES AND THE IMPORTANCE OF DIFFERENTIAL DIAGNOSIS

Introduction

The present chapter discusses the importance of making a proper differential diagnosis in assessing "sex offenders" for potential treatment. It also explores the relationship between biological factors, such as hormone levels or chromosomal anomalies, and sexual phenomenology (i.e., the mental experiences, thoughts, lusts, and fantasies that constitute states of erotic desire). Currently available treatments are briefly reviewed from a biomedical perspective, with a particular emphasis on the use of surgery and medications. The idea of using pharmacological agents to treat sex offenders is relatively modern, although surgical procedures such as castration which, like some medications, diminish androgen levels have been employed for this purpose for quite a while. The following is a brief case vignette which serves as an example of the type of patient for whom medication treatment may be appropriate, as well as a basis for the subsequent discussion of the various issues and considerations, diagnostic and otherwise, which must be reflected upon in trying to provide optimal understanding and care.

Case Presentation

Mr. A., a 40-year-old white male, was referred by his attorney for assessment as a consequence of the patient's sexual involvement with a 13-year-old boy. Having been charged five years earlier with a similar offense, at the time of his assessment the patient was on court-mandated probation. Though apprehended only once before, he had been sexually active almost exclusively with young males, most ranging between the ages of 14 and 17 (but some as young as age 8), since he himself was 7 years old.

Sexual activity, which included undressing, fondling, mutual masturbation, and oral-genital contact occurred frequently with a variety of partners, sometimes as often as several times per month. In almost all cases the children were persuaded rather than coerced, but in two instances, while intoxicated, Mr. A. threatened the victims with a paring knife. The patient indicated that he had begun to drink frequently "to get up the courage to approach potential partners."

After each incident the patient felt ashamed and guilty, vowing that he would try not to act similarly in the future. However, in time, as his sexual urges began once again to intensify, he would give in to temptation. The mere happenstance of watching young boys in television commercials would sometimes elicit a strong urge to focus his attention towards the child's genital area. In describing the mental experiences that led him to act in these ways, the patient, in an interview with Dr. John Money, made the following comments:

> If I have seen an exceptionally nice looking boy I get aroused. I want to go over there, but then again I don't. I see him, and I want to get out of there because I know I am going to start fantasizing. I have noticed that the first thing is I drop my eyes to his genitals. It gets more intense, the fantasies, that is. I dream about a South Sea island, nothing but boys on the island. It is kind of like a fight between the good side and the bad side, like Dr. Jekyll and Mr. Hyde. Sometimes the way to cure it is to masturbate, and that takes care of it. There are other times when I get so aroused I just have to get it sexually together. It worries society. It worries me very much. I know it is wrong. I know what the legal issues are, but at the time I am not thinking of legal issues. All I can think about is getting the boy. I want to keep doing it, and doing it, and doing it. No matter how. Getting the boy. Sometimes I think, "Hey, what are you doing? I don't want to hurt anyone." I really do not want to hurt these children, but I am very afraid that I might.

In attempting to understand his condition, the patient made the following comments:

> What starts a person like myself doing what I do? Why me? Why can't I be normal like everybody else? You know. Did God put this as a punishment or something towards me? I am ashamed. Why can't I just go out and have a good time with girls? I feel edgy when a female is present. An older "gay" person would turn me off. I have thought about suicide. I think after this long period of time I have actually seen where I have an illness. It is getting uncontrollable, to the point where I can't put up with it anymore. It is a sickness. I know it's a sickness, but as far as they [society] is concerned, you are a criminal and should be punished. Even if I go to jail for 12 or 15 years, or whenever, I am still going to be the same when I get out.

This last statement was not meant to be defiant.

Physical and laboratory examination of the patient revealed a number of biological pathologies (see Table 5-1). These findings suggest that the patient has Klinefelter's syndrome, the significance of which will be discussed subsequently.

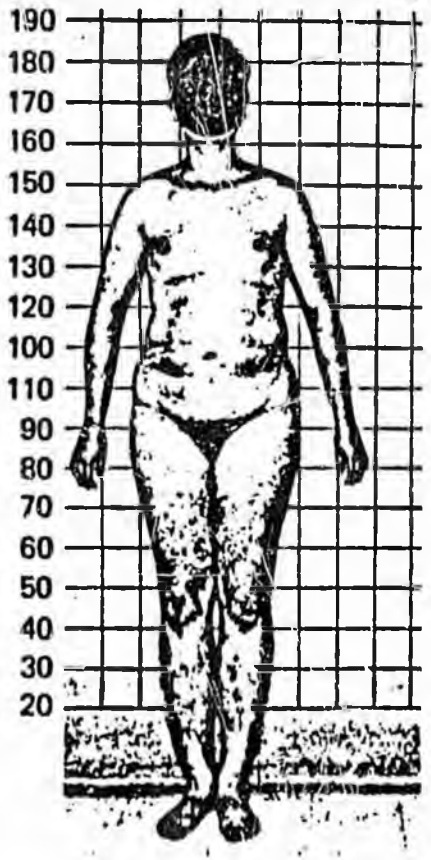

Table 5-1. Abnormal Physical and Laboratory Findings on Mr. A.

Physical Findings:

1. Scars on chest from previously performed bilateral mastectomies, done because of gynecomastia (enlarged breasts) which developed at puberty
2. Hypogonadism (small testicles)
3. Abnormally long arms and fingers

Laboratory Findings:

1. Low sperm count
2. Elevated luteinizing hormone (148 ng/ml); normal LH in adult males = 36–64 ng/ml
3. Elevated follicle stimulating hormone (638 ng/ml); normal FSH in adult males = 98–276 ng/ml
4. Low testosterone (153 ng/100 ml); normal (s.d. = 2) range in adult males = 275–875 ng/ml
5. 47 XXY chromosome pattern; normal male pattern = 46 XY

Typical patient with Klinefelter's syndrome. Note the gynecomastia and female distribution of adipose tissue. (Photo courtesy of Dr. John Money.)

Pedophilia as an Example of a Diagnosable Sexual Deviation Syndrome

The case just presented is an example of homosexual ephebophilia, which means that the patient is a man whose sexual orientation, interests, and preferences are directed predominantly towards postpubertal boys. Were he interested mostly in prepubertal boys, a diagnosis of pedophilia, rather than ephebophilia, would be more accurate. For purposes of the present discussion, the term pedophilia will be used when referring to persons sexually oriented towards children, regardless of whether the children are pre- or postpubertal.

According to the 3rd edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM III), there are three criteria which must be satisfied in order to make such a diagnosis.[1] First, it is necessary to establish that the patient becomes erotically excited by the act or fantasy of engaging in sexual activities with children. Secondly, if the patient is an adult, rather than an adolescent, the children must be at least ten years his junior. Finally, it must be clear that any sexual acts engaged in with children are not either due to other mental disorders such as schizophrenia, dementia, or drug intoxication, or due to lack of an suitable age-appropriate partner, which occurs in some cases of incarceration or incest.

As is true of persons with conventional heterosexual interests, the onset of sexual behavior in persons with unconventional, or "deviant," erotic desires usually begins around the time of puberty. Related fantasies, however, may have been experienced much earlier. In the absence of appropriate treatment, the course of such syndromes tends to be chronic, which is not surprising because the sex drive is maintained over time.

In terms of reported cases, pedophilia appears to be almost exclusively a male problem, although its exact prevalence is unknown. The majority of cases in the literature have involved heterosexual pedophilia (men attracted towards little girls), but more recently some centers have reported a higher frequency of homosexual involvements.[2] In ancient Greece, homosexual pedophilic behavior was considered acceptable. Socrates, for example, wrote, "A valued company might be composed of boys and their lovers . . . for of all men they would be ashamed to desert one another."[3] Judeo-Christian beliefs, however, based in part upon the biblical story of Sodom and Gomorrah (hence, the term sodomy), clearly consider it to be immoral.[4–6] In some states, a possible legal sentence for engaging in sex with a minor is the death penalty.[7] Although in American society a child can clearly become quite distressed by involvement with a pedophile (hence the importance of applying effective interventions to stop such behavior), it is also the case that some children become even more upset by the reactions of well-intentioned adults who find out about their sexual involvements.[8] Tragically, sometimes children also feel guilty and responsible for any punishment imposed upon a former partner, a person (perhaps even a relative) whom they may actually like a great deal.

Sexual activity by pedophiles with children rarely involves physical assaultiveness and is usually the result of persuasion rather than coercion, although the series of brutal slayings in Atlanta, Georgia, during 1980 and 1981 represented an exception.[9] A study in Detroit, Michigan, of over 1752 sex offenses against children found that physical injury occurred in less than 9% of the cases.[10] When a pedophile craves sadistic sexual involvement with children, a second diagnosis of erotic sadism should also be made. Though most children are warned to be leery of strangers, the victims of pedophiles, unlike the victims of exhibitionists, usually know their partners well, and sexual activity (which is often mutual fondling and masturbation rather than intercourse) frequently occurs in the home of either the victim or the perpetrator.[1,8] Whereas some pedophiles merely lust after children, some seem to fall in love with them, which may make treatment more difficult.

Why persons differ from one another in sexual orientation and in the nature and intensity of their erotic desires is unknown. It is unclear why most men find women sexually appealing whereas some are erotically attracted towards young boys. Nor is it clear why still others experience recurring urges to expose themselves publicly or to rape repeatedly. In some instances, certain types of early childhood experiences seem to play a contributory factor in determining adult sexual interests. Many pedophiles, for example, were themselves sexually involved with adults as youngsters.[11] In other cases, biological pathologies such as structural brain damage, hormonal dysfunctions, genetic anomalies, or electrical disturbances of the brain seem to play a role.[2,12] Persons who meet the diagnostic criteria for a sexual deviation syndrome, of which pedophilia is an example, may be appropriate candidates for treatment with antiandrogenic medications.

Diagnosing a Sexual Deviation Syndrome

The term used in DSM III to categorize sexual deviation syndromes is paraphilia, which means attraction to deviance.[1] Diagnosis of a sexual deviation syndrome can be made by inquiring about a person's thoughts, feelings, and behaviors. Individuals with deviant sexual interests ordinarily experience repeated erotic fantasies about engaging in unconventional forms of sexual activity. Asking an individual about his masturbatory fantasies can be revealing in this respect because erotic arousal for the purpose of masturbation may be difficult in the absence of erotic mental imagery.[13,14] The homosexual pedophile frequently fantasizes about young boys, whereas the heterosexual exhibitionist has recurring thoughts about exposing himself to women. The male transvestite is preoccupied with the idea of cross-dressing in female clothing. Rather than depending solely upon introspective reports, Dr. Gene Abel of the New York State Psychiatric Institute suggests that the rate of change in the diameter of the pupil of the eye can also be used as a means of determining whether a particular stimulus, such as the picture of a nude child, is sexually arousing (see Figure 5-1). Measures of penile tumescence and other forms of polygraphic data have also been used to try to document unconventional sexual interests.[13]

Accompanying the unconventional sexual fantasies experienced by persons who can be diagnosed as having a sexual deviation syndrome are intense erotic cravings. These cravings are experienced as frustrating and discomforting when deviant fantasies cannot be enacted. Karl Jaspers, the eminent German phenomenologist (who was probably influenced in his thinking by Krafft-Ebing and Havelock Ellis), characterized deviant sexual cravings as intolerable states, similar to addictions, that demand action in order to be alleviated.[16] However, many persons with conventional heterosexual interests can also feel discomforted if sexually frustrated; such frustration may motivate a person to seek out a consensual sexual partner. The individual with a pedophilic sexual orientation, however,

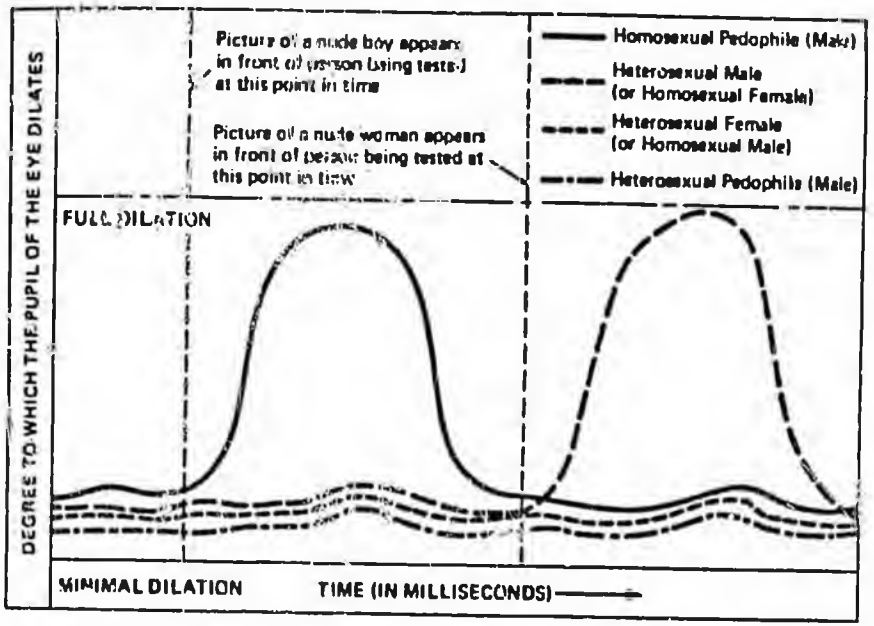

Figure 5-1 Schematic representation of the pupillary responses of four persons with different sexual orientations.

faces much greater difficulties in the sense that all those whom he may find naturally appealing (i.e., children) are forbidden as partners. Living in a world where all those who are sexually appealing are forbidden as partners must be difficult—a situation heterosexual adults can, perhaps, empathize with by imagining living in a world where one was expected to have sex only with children.

People do not decide voluntarily what will arouse them sexually. Rather, they discover within themselves what sorts of persons and activities are sexually appealing to them. Sexual behavior in general tends to be in part a response to one's erotic desires and fantasies. Thus a man with conventional heterosexual interests tends to seek out adult women, just as the homosexual pedophile (who may be impotent with women) seeks out boys. The heterosexual voyeur repeatedly seeks out situations where he can "peep" upon unsuspecting naked or partially clad females in response to his sexual cravings, whereas the male transvestite repeatedly cross-dresses.

DSM III lists nine major diagnostic subcategories of paraphilia (see Table 5-2).[1] In earlier, outdated classification schemes, sexual deviation syndromes were often considered to be a subdivision of the so-called sociopathic personality type. It is important to appreciate that sexual orientation can be assessed independently of character traits. Some men with unconventional sexual orientations show no other evidence of "sociopathic personality traits," such as disrespect for authority, other

kinds of criminal behaviors, truancy, vocational irresponsibility, or lack of concern for others. On the contrary, men with unconventional sexual orientations such as pedophilia can manifest a range of character traits, just as is true of persons with conventional heterosexual orientations."[17] Thus, terms such as pedophilia refer to the nature of a person's sexual orientation or to the nature of his sexual desires, and not to his traits of character. A paraphiliac man who has been consistently nonviolent in temperament would not ordinarily be expected to undergo a sudden change in personality so as to become a physical danger to others.

Differential Diagnosis as a Basis for Determining Appropriate Psychiatric Treatment

Many persons are referred for psychiatric assessment and possible treatment by virtue of the fact that they have behaved in a particular way (e.g., by having sexual involvement with a child) and, thus, they carry the label "sex offender." Not all sex offenses (a legal term), however, are the reflection of a sexual deviation disorder or paraphilia (a medical term). In assessing a sex offender for possible treatment, the psychiatrist or evaluator must try to ascertain (1) the state of mind the individual was experiencing that led him to act in a particular way, and (2) whether the behavior in question was the manifestation of a diagnosable and potentially treatable psychiatric syndrome.

A sex offense could represent the expression of any of a number of psychiatric conditions. Schizophrenia, for example, is a syndrome comprised of (1) delusions, which are rigidly held, idiosyncratic, false beliefs that cannot be corrected by reason (e.g., the belief that one has a bomb inside one's head); (2) auditory hallucinations ("hearing" voices when no one is speaking); (3) disorganized thinking (in both logic and syntax); (4) insomnia; (5) agitation; (6) emotional apathy; (7) loss of initiative; and (8) bizarre behavior.[18] The term schizophrenia refers to the cluster of associated features comprising the syndrome and not to the person manifesting the condition.[19] Schizophrenia must be differentiated from other psychiatric syndromes such as dementia, delirium, and affective illness because delusions, hallucinations, and bizarre behavior may occur in these disorders as well. In dementia and delirium, however, delusions and hallucinations when present are accompanied by disorientation and intellectual decline, whereas in affective illness these symptoms occur within the setting of a sustained mood change. The age of initial onset of schizophrenia is almost always in the late teens or early twenties, and like a variety of other medical conditions (such as juvenile onset diabetes), its course is chronic. There is evidence that this form of mental illness, in which persons lose the capacity to perceive accurately whether heard voices are real or imaginary, may be associated with a genetic predisposition.[18] Thus, schizophrenia seems to occur most frequently within certain families. An associated biological pathology may be the presence of heightened levels of various chemical neurotransmitter substances (such as dopamine) in the brain.[20]

Mr. B. was a patient who developed the delusion that he needed to drink the blood of women in order to remain alive. Initially, in response both to this rigid false belief and to "voices telling him to do so," he sacrificed several animals and drank their blood. Subsequently, he physically assaulted several women in an effort to obtain blood from them, which resulted in his being charged with a second degree sex offense. In this case, the offense in question was clearly a behavioral manifestation of his schizophrenic condition, and his sexual orientation and erotic desires were apparently quite conventional. Appropriate treatment for the symptoms of schizophrenia includes the use of phenothiazine medications or other sorts of neuroleptic drugs.[21] However, just as is the case when insulin is employed to treat diabetes, present-day pharmacological therapy does not represent a complete cure for this illness.

Sex offenses can also be a reflection of other psychiatric conditions such as manic-depressive illness.[22] In addition to delusions of grandeur (e.g., the belief that one is Christ) and elated mood, one of the other symptoms of the manic syndrome is often an increase in sexual appetite. Mr. C. is a 54-year-old man who would repeatedly expose himself to middle-aged women only when in the midst of such an episode. At other times, when his mood was stable and his capacity to perceive reality intact, he would never act in such a fashion. The appropriate treatment in his case, as a prophylaxis against future recurrences of this psychiatric illness (whose natural course, like asthma, is episodic rather than chronic), is lithium carbonate. When well, this patient experienced perfectly conventional erotic interests and, thus, would not satisfy the diagnostic criteria of a sexual deviation syndrome.

Sex offenses can be perpetrated by persons with conventional sexual desires and orientations while intoxicated with drugs or alcohol. Here psychological counseling (plus, perhaps, Antabuse—a medication that makes a person feel physically ill if he consumes alcohol while taking it) would likely be the treatment of choice. A mentally retarded person with conventional erotic interests who "didn't know any

better" might also commit a sex offense and possibly require counseling plus sex education. Mr. D. is an intelligent man with conventional sexual interests who began an incestuous relationship with his sister before either of them was old enough to appreciate the implications of such behavior. Here, counseling to help them deal with their guilt and family concern was the treatment employed. Finally, a self-centered, self-indulgent person with conventional sexual desires, but with no concern for the well-being of others, might also commit a sex offense. An example would be the criminal who rapes a woman in the midst of a robbery because he feels he can get away with it. Such a person might well have no diagnosable psychiatric illness, and a proper disposition might include quarantine in the form of incarceration.

Rationale for Treatment When a Sex Offense Is the Manifestation of a Sexual Deviation Syndrome

Based upon the preceding discussion it should be clear that some sex offenses are committed by men who are not simply self-indulgent individuals with conventional erotic interests misbehaving. Unlike the homosexual pedophile, most men (including homosexual men) experience absolutely no desire to engage repeatedly in sexual involvements with young boys.[23] Rather, the average man would be repulsed by such an idea. Whereas the exhibitionist lusts for the opportunity to repeatedly expose himself publicly, most men would be embarrassed or humiliated at the prospect of behaving in such a fashion. Though many men might indeed turn their gaze towards a partially clad woman visible through a nearby window, few experience recurrent urges to "peep" repeatedly at the risk of job, reputation, family, and incarceration as does the voyeur.[24,25] The average man would feel foolish dressed in woman's clothing, whereas the male transvestite finds this erotically arousing. Although many men find themselves capable of being sexually stimulated by descriptions or scenes of coercive sexual acts, the average man certainly does not experience repeated ruminations and cravings to rape. Nor, as is the case with the paraphiliac (or compulsive) rapist, does he repeatedly have to resist the temptation to rape in order to remain out of trouble.[2] Thus, the assumption that paraphiliac behavior is little more than misbehavior is a conceptually invalid oversimplification. This kind of oversimplification leads to interventions that are rehabilitatively ineffectual. The recidivism rate is extremely high when punishment is the "treatment" of choice, as punishment does virtually nothing to make it any easier for a man to resist deviant sexual cravings. One hears of numerous instances in which a paraphiliac rapist, recently freed from prison on work release, has already raped again repeatedly. Quarantine, as opposed to punishment, may indeed be necessary so long as an individual poses a threat to others (as is sometimes true of some persons with contagious diseases), but if effective treatment that assures public safety can be applied, the need for isolation from the community may be obviated.

PART II: BIOLOGICAL PATHOLOGIES AND ETIOLOGIES

Klinefelter's Syndrome as an Example of a Biological Condition Possibly Predisposing towards Sexual Deviation

Mr. A., whose case was discussed earlier, was found to have Klinefelter's syndrome. Dr. Harry Klinefelter and his colleagues described this condition for the first time in 1942 in the *Journal of Clinical Endocrinology*.[26] Klinefelter's syndrome is a condition characterized by (1) the development of gynecomastia (enlarged breasts) at the time of puberty, (2) aspermatogenesis (low sperm production), and (3) an increased excretion of follicle stimulating hormone (FSH) by the pituitary gland in the brain.

Normally a person without Klinefelter's syndrome has 23 pairs, or a total of 46, chromosomes—each of which contains millions of genes. One-half of each chromosome pair is obtained from the mother, and the other half from the father, at the moment of conception. Twenty-two of the 23 chromosome pairs are termed autosomes, and as far as is known they are not directly related to the determination of the body's gender appearance.

In most cases, every cell in a person's body contains a replica of all 46 chromosomes. Any cell can be obtained from an individual, prepared in a special way, and then looked at under a microscope, to actually visualize them. When this is done, ordinarily by looking at a white blood cell, the chromosomes can be lined up and numbered as shown in Figure 5-2. Usually these chromosomes look the same in every cell. When this is not so, as when some cells contain 46 chromosomes but others 45, this is known as a mosaic pattern. The top part of each chromosome pair is called the p-section, and the lower part the q-section. If a chromosome abnor-

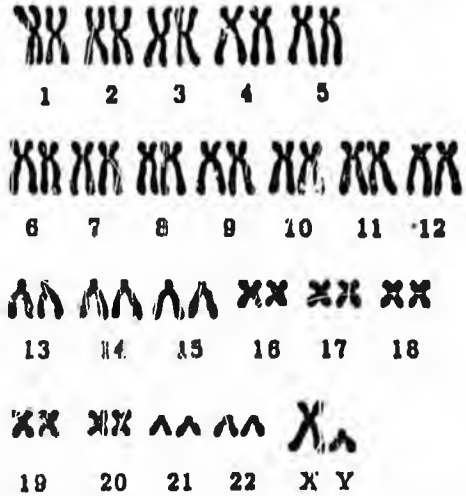

Figure 5-2. Normal male (46 XY) chromosome pattern.

mality were to consist of extra genetic material being present on the top part of chromosome pair number 9, this would be indicated by the notation 9 (p+).

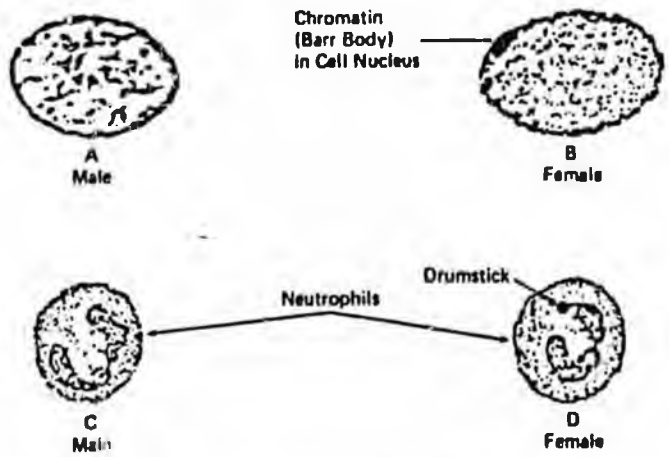
If one of the 23 pairs of chromosomes looks like a small X matched with another small X, a person will look like a female at birth (barring certain medical complications).[27] On the other hand, if that chromosome pair looks like a small X matched with a small Y, the person will usually look like a male because the presence of a Y-shaped chromosome ordinarily instructs the body to take on a male appearance. On rare occasions, a woman may be found to have an XY rather than an XX chromosome pattern, if chemical receptors in the cells in her body lack the capacity to respond to genetic messages sent out via hormones from the Y chromosome.[28]

In Klinefelter's syndrome, instead of having 23 pairs of chromosomes for a total of 46, 47 chromosomes are present, one of which is an extra X. Thus, although due to the presence of a Y chromosome, the Klinefelter's child ordinarily appears to be a boy at birth; genetically speaking, the child can be thought of either as a male (XY) with an extra X chromosome or as a female (XX) with an extra Y chromosome. Although most Klinefelter's patients have only one extra X chromosome and are therefore said to have a 47 XXY karyotype pattern, some have even greater numbers of additional X chromosomes present.

Besides the XX or XY pattern, other physical indices have been used to try to ascertain biological gender. Although most women have two X chromosomes in every cell, one of these two is ordinarily partially inactivated.[29,30] As a result, if a cell is taken from a woman, by gently scraping the buccal surface of her tongue, and it is then properly prepared and looked at under a microscope, a clump of stained chromatin will be seen within this cell's nucleus. Lyon was the first to suggest that this "chromatin positive material," also known as a Barr body, is actually a partially inactivated and clumped up extra X chromosome.[31] Since the "normal" (XY) male has only one rather than two X chromosomes, he has no extra one present to clump, and thus he will test chromatin negative. The Klinefelter's male, however, because he does have two X chromosomes will stain chromatin positive and thus, on the basis of this test, appear to be a female.

Another test sometimes used to identify biological gender involves looking at neutrophils, a type of white blood cell, under a microscope. Ordinarily the nucleus inside a neutrophil obtained from a woman contains a drumstick-like appendage (see Figure 5-3).[31] This "drumstick" is not seen in neutrophils obtained from "normal" (46XY) males, but it is seen in Klinefelter's patients.

As early as 1957, Money and Hampson suggested that sex differences can be looked at in a variety of ways besides physical appearance (see Table 5-3).[32] When this is done using Klinefelter's patients as an example, it becomes clear that questions as to whether an individual is a man or a woman, and questions about what sexual orientation and gender identity should be, become much more difficult to answer than is ordinarily appreciated. Because Klinefelter's patients are born looking like males, their parents naturally enough routinely assign them a male sex role, and they are raised as boys. However, in terms of gender identity, some of



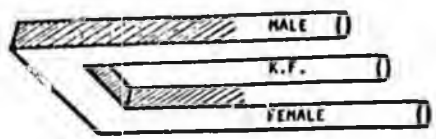


Figure 5-3. (A) Cell nucleus from buccal smear of "normal" male. (B) Cell nucleus from buccal smear of "normal" female. (C) Neutrophil from "normal" male. (D) Neutrophil from "normal" female.

Table 5-3. Male versus Female Sexual Characteristics in Klinefelter's Patients.

	IN KLINEFELTER'S SYNDROME (K.F.)
1. Sex of assignment and rearing	*Male*
2. Feelings of gender identity	May be *male* or *female*
3. (a) Sexual orientation (b) Sexual behavior	May be towards members of the same or opposite sex (which sex is the opposite sex in K. F. syndrome?)
4. External anatomical sex (phenotype)	*Male* at birth; then becomes both *male* and *female* (e.g., enlarged breasts) at puberty
5. Hormonal sex	Hormonal profile (of testosterone, FSH, and LH) is similar to postmenopausal *females*
6. Gonadal (and internal anatomical) sex	Male, but *hypogonadal*
7. Chromosomal sex (genotype)	*Male/female* — karyotype (XXY) *Female* — Barr body *Female* — neutrophilic drumstick

them, as early as age 7, have felt themselves psychologically to be girls.[33] Dr. John Money described the case of an otherwise normal 8-year-old boy brought for psychiatric assessment by his frustrated parents because he insisted he felt more comfortable dressed in girls' clothing. Chromosomal analysis revealed that he had Klinefelter's syndrome. As demonstrated by the case of Mr. A. discussed earlier, a number of Klinefelter's patients are sexually attracted to little boys rather than to members of the opposite sex, but in some ways it is unclear which sex is the opposite sex when it comes to Klinefelter's syndrome. Why some Klinefelter's patients find children rather than adults appealing is unclear. It is clear, however, that the sight of an infant usually elicits some feeling (albeit asexual) in most people. The possibility that feelings towards children (including the so-called maternal instinct) may be at least partially influenced by genetic factors cannot be excluded.[34] Although body phenotype is masculine during childhood, 80% of Klinefelter's patients grow large breasts and develop a "female distribution of adipose tissue" at the time of puberty (see Table 5-1).[35,36] The "hormonal sex" of these patients as measured by levels of FSH, LH, and testosterone is somewhat similar to that of a postmenopausal woman. Although Klinefelter's patients have testes rather than ovaries, their testes are very small, and produce little testosterone and virtually no sperm. As noted earlier, in terms of (1) chromosomal karyotyping, (2) Barr body testing, and (3) assessment of neutrophils for the presence of "drumsticks," Klinefelter's males produce the same test results as females. Thus, perhaps it should come as no surprise when one discovers that a patient like Mr. A. who has Klinefelter's syndrome also has problems in terms of sexual orientation and in terms of the nature of his erotic desires.

Although Klinefelter's patients have been well studied medically, little epidemiological data surveying the prevalence of sex-related disturbances in the Klinefelter's population as a whole are available.[37] In many studies, pertinent questions regarding sexual phenomenology and experience were never asked.[38] Furthermore, the prevalence of sexual deviation, gender dysphoria, and related phenomena amongst the general public has not been well documented and therefore is unavailable for comparison purposes. For these reasons, in spite of the case of Mr. A. presented earlier, conclusions regarding the relationship between Klinefelter's syndrome and sexual deviation must be evaluated cautiously. Nevertheless, review of the literature (despite some disagreements[35,39,40]) suggests that the prevalence of sexual deviation syndromes in Klinefelter's patients may indeed be higher than it is amongst non-Klinefelter's men.[41–50] Baker and Stoller, for example, reviewed over 100 pertinent articles and arrived at such a conclusion.[33] Since most Klinefelter's patients appear to be essentially normal boys until puberty, it is difficult to account for this apparently high prevalence of sexual deviation on the basis of child rearing practices or other types of early life experiences.

Not all patients with Klinefelter's syndrome show evidence of sexual deviation; rather some are hyposexual instead. In such cases, testosterone has sometimes been administered to increase rather than decrease sexual capacity. When this has been done, these patients have reported a heightening of erotic desire, which again demonstrates the apparent relationship between testosterone levels and sexual phenomenology.[51–53]

Although most Klinefelter's patients have low testosterone levels, often the levels are not so low as to obliterate sexual desire significantly. Therefore, when sexual desires are deviant, as is the case with pedophilia, attempts to further reduce sexual appetite may still be warranted. This highlights the fact that the rationale for utilizing testosterone-depleting methods to treat paraphiliacs is based upon appreciation of the nature and intensity of the individual's erotic cravings, and not upon documentation of a biological abnormality. However, just as lung cancer is more likely to occur if a person smokes than if he does not, the likelihood of sexually deviant urges may be greater in the presence of certain kinds of biological abnormalities than in their absence.

Etiology of Conventional and Unconventional Sexual Desires—Associated Biological Pathologies

Mr. A., whose case of homosexual pedophilia was discussed earlier, was also diagnosed as having Klinefelter's syndrome. This, coupled with the fact that medications may sometimes be used in treatment, raises the question of whether one should routinely look for possible biological contributors to sexual behavior. In animal species other than man, biological factors clearly contribute significantly to such behavior. Female dogs, for example, become sexually responsive to male dogs only while in heat (estrus). At such times, in response to the odor of chemical substances emitted from the females, the males themselves become sexually much more assertive. In many species of birds, only the male sings. If a female zebra finch is given estradiol as an embryo, plus androgen hormones as an adult, she will sing a male courtship song without having heard it previously.[54] In addition, she will display typically male mating behavior and, like normal males (but unlike normal females), will have an increased number of cells in the nucleus robustus archistratialis and other brain regions (see Figure 5-4a).

In most species of rat, normally only males mount. "Mounting" is a behavior that involves placing the forepaws on the back of another animal while posturing the body in a fashion conducive to intercourse. Adult female rats given testosterone at a specific time in utero will also show this behavior which normally predominates in males.[55] Male rats do not normally build nests or care for their young, but they will build nests and show other kinds of "maternal behavior" if electrical stimulation is applied to certain brain areas.[56] Male Siamese fighting fish are preprogrammed genetically to respond aggressively to the sight of another male. Tinbergen described in great detail how specific configurations of visual stimuli can elicit (or "release") specific sexual behaviors in stickleback fish.[57] The same is true of spiders and blowflies[58] (see Figure 5-4b). In some cases, animals are pre-

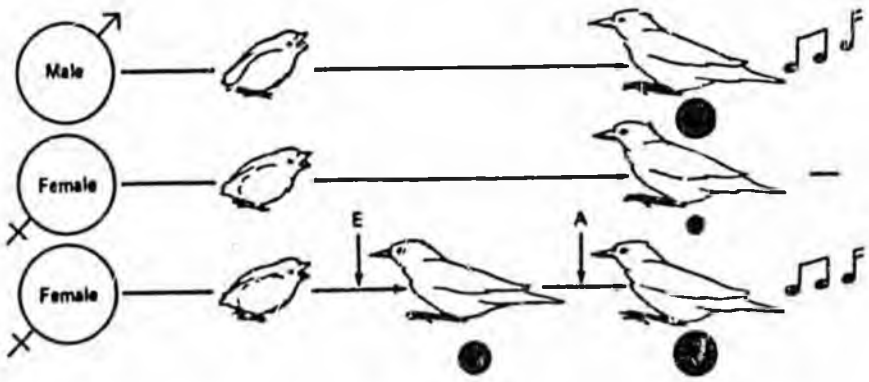

Figure 5-4a. Sex differences in male and female finches. Male birds sing; females do not. However, females treated with estradiol (E) just after hatching, and with androgen (A) in adulthood, do sing and exhibit other male behavior. Shaded disks represent the relative size of one brain region involved in song production. (From reference 54.)

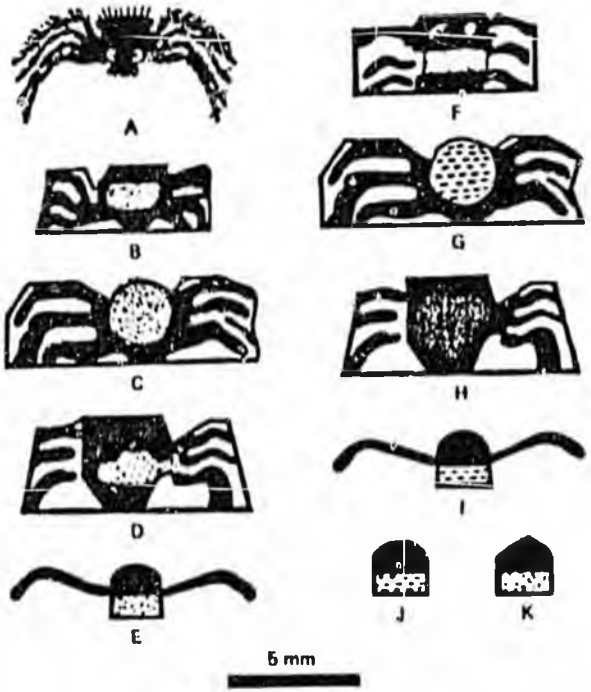

Figure 5-4b. Visual specificity of the sexual responsiveness of spiders. Male spiders with no prior sexual experience may attempt to mate (or attack) moving colored objects shaped like those on the left, but they will not do so with those on the right. (From reference 58.)

programmed genetically to respond sexually to sounds rather than vision. The sound of the wing beat of the female is the stimulus which attracts male crickets and mosquitos.[58] Some animals have an innate predisposition to follow, and become psychologically attached to, the first large object they see moving during a "critical time period" in early life. Attractions acquired in this fashion are said to be "imprinted."[59] Lorenz described young ducks who became so imprinted towards him that they tried to feed him live worms—a drive apparently so strong that they would try to force them into his ears if he closed his mouth.[60] Early life imprinting can influence the nature of an adult animal's sexual attractions.

In 1978, researchers reported a study in the *New England Journal of Medicine* documenting the observation that some women initiate sexual behavior most frequently during the ovulatory period (days 12 through 17) of their menstrual cycles.[61] This is a time in the cycle when the androgenic hormone androstenedione is ordinarily at its peak.[62] When estrogen and progesterone hormones were given to these women in the form of birth control pills, the result was a suppression of the ovulatory peak of female-initiated sexual behavior. Since regular menstrual cycling, including monthly menstruation, continued normally, this decrease in the frequency of female-initiated sexual behavior around the time of ovulation was apparently attributable, either directly or indirectly, to the altered hormonal status of the women in question.

Human males do not have to be taught how to obtain an erection. Instead, at some time in their lives, presumably because they are genetically preprogrammed to do so, they begin to have erections in response to specific kinds of tactile, mental, olfactory, or visual stimuli (such as the sight of a shapely female) Even human infants seem to respond instinctively in specific ways to certain stimuli such as a loud sound (which causes a startled reaction), the visual perception of height (which causes hesitation), or the sight of a familiar face (which causes smiling).[58] Goy and McEwen at a symposium at the Massachusetts Institute of Technology in 1977 suggested that biological factors may contribute more than previously appreciated to human social and sexual experience.[63] Recently, Pillard and co-workers summarized data suggesting that there may be a genetic predisposition towards male homosexuality.[64]

In humans (as well as in animals), structural and functional differences in the brain between males and females seem to depend upon exposure to various "sex hormones" during particular phases of embryonic development.[65–70] Females exposed prenatally to high doses of androgens tend, as adults, to show patterns of psychosexual development more typically seen in males.[71,72] Prenatal exposure to progesterone may have a "feminizing effect."[73,74] Exposing a male human fetus to medications containing estrogen may lead to a pattern of adult psychosexual behavior more frequently seen in women.[75,76] Oral administration of 10 mg per day of testosterone to adult women can increase sexual responsiveness and libido without causing masculinizing bodily changes.[77]

Because it seemed possible that biological factors might contribute significantly to human sexual behavior, a variety of laboratory tests were performed on a group of paraphiliac patients.[2] These data, which have recently been updated, are presented in Table 5-4. Although it will be important to perform similar tests on an appropriately matched group of persons with conventional sexual desires, for comparison purposes, there does appear to be a very high frequency of biological pathologies in these patients. These pathologies include structural brain damage, hormonal abnormalities, electroencephalographic dysfunctions, and chromosomal anomalies (such as Klinefelter's syndrome).

Thus far, the possible role of biology as an etiological contributor to sexuality has been discussed. However, Stoller hypothesized that whereas biological factors may become a compelling determinant of sexual experience and function in the presence of significant organic anomalies (Stoller's "biological force" hypothesis), sometimes environmental influences such as early life experiences may play a more dominant role.[33] In this connection, Dr. John Money has discussed the case of a pair of genetically identical twins, one of whom required a total penectomy (surgical removal of the penis) a few days after birth, due to trauma suffered during circumcision. Subsequent to that penectomy, plus additional reconstructive surgery (and hormone supplementation at puberty), the child in question was reared as a girl. Although perhaps somewhat "tomboyish" in interests and play during childhood, this 46 XY female, now a teenager, feels herself psychologically to be a woman. Her sexual orientation and interests are directed towards age-appropriate males, and someday she hopes to marry and adopt children. Her genetically identical twin feels himself to be masculine, and he finds females appealing. Thus, it is clear that both biological and environmental factors can influence sexual phenomenology and behavior.

PART III: THERAPIES

Psychotherapy and Behavior Therapy as Treatments—Biological and Syndromal Considerations

Four major types of treatment have been proposed to try to help sex offenders. They are psychotherapy, behavior therapy, medication, and surgery. Unfortunately, recognition that optimal treatment may depend upon proper differential diagnosis has often been unappreciated. Sometimes the goals of therapy are stated explicitly, for example, to help a person gain greater capacity for self-control, but this is not always the case.

Most psychodynamic theories make the assumption that conventional heterosexuality alone is natural, and that other orientations and preferences are pathological variants which only occur when proper development goes awry. These theories see sexual deviation as a reflection of "unconscious" psychological conflicts and postulate that such conflicts come about as a result of unsatisfactory early life experi-

Table 5-4. Associated Findings in a Group of Male Patients with Sexual Disorders.

PATIENT DIAGNOSIS	ASSOCIATED FINDINGS
1. Erotic sadism	Oculomotor abnormality suggestive of basal ganglion dysfunction. Unexplained gait disturbance.
2. Homosexual pedophilia	Dyslexia; childhood lisp requiring speech therapy.
3. Homosexual pedophilia	Cortical atrophy; grand mal seizures; recurrent slow delta waves and sharp activity over frontal brain regions on EEG.
4. Hypersexuality	Elevated testosterone; family history of adrenogenital syndrome.
5. Homosexual pedophilia	Klinefelter's syndrome, mosaic (90% 47 XXY, 10% 46 XY). Elevated FSH and LH. Low testosterone.
6. Homosexual pedophilia	Strabismus; childhood learning disorder.
7. Heterosexual pedophilia	Schizophrenia.
8. Exhibitionism	Elevated testosterone; prior history of coma several months following head trauma; grand mal seizures.
9. Heterosexual pedophilia	Cortical atrophy (2° to trauma); right-sided partial hemiparesis; visual spatial deficits.
10. Homosexual pedophilia	Elevated testosterone.
11. Heterosexual pedophilia	Near total blindness due to brain damage.
12. Heterosexual pedophilia	Elevated testosterone; mild ventriculomegaly and cortical atrophy most pronounced in area of right sylvian fissure (by CAT scan); elevated 24-hour urine pregnanetriol (3.1 mg — normal is less than 2.5 mg).
13. Homosexual pedophilia	Elevated LH. Generalized muscular hypotonia.
14. Paraphiliac rape	Elevated testosterone; grand mal seizures.
15. Homosexual pedophilia	Elevated testosterone.
16. Hypersexuality	Cortical atrophy; cortical blindness; mild mental retardation.
17. Voyeurism	Elevated LH.
18. Homosexual pedophilia	Dyslexia.
19. Homosexual pedophilia	Mosaic chromosomal pattern (97.5% XY, 2.5% XX); large heterochromatic region at centromere of autosome number 19 (polymorphic variant); low LH.
20. Homosexual pedophilia	46 XY, inversion 9(p+ q−) chromosome pattern. High LH.
21. Homosexual pedophilia	47 XYY chromosome pattern. Elevated testosterone, FSH, and LH.
22. Paraphiliac rape	Elevated FSH.
23. Exhibitionism	Elevated LH.
24. Homosexual pedophilia	Low LH.
25. Heterosexual pedophilia	Elevated testosterone, FSH, and LH.
26. Homosexual pedophilia	Klinefelter's syndrome; elevated FSH and LH. Low testosterone.
27. Heterosexual pedophilia	Elevated testosterone.
28. Homosexual pedophilia	Elevated testosterone.
29. Voyeurism	Elevated testosterone and LH.
30. Hypersexuality	Elevated testosterone; structural brain damage.
31. Homosexual pedophilia	Elevated testosterone, FSH, and LH. EEG abnormality.
32. Transsexualism	Klinefelter's syndrome. Low testosterone.
33. Homosexual pedophilia	Elevated testosterone.
34. Homosexual pedophilia	Klinefelter's syndrome. Elevated FSH and LH. Low testosterone.

NOTE: Normal (s.d. = 2) testosterone range in men = 275–875 ng/100 ml. Normal FSH in males = 98–276 ng/ml. Normal LH in males = 36–64 ng/ml. No associated abnormalities were detected in seven other patients with sexual disorders who were also assessed.

ences. However, in the author's opinion, they rarely explain adequately why such experiences should be expected to result in specific problems such as exhibitionism, rather than pedophilia or juvenile delinquency. Usually the intent of therapy is to try to "uncover" conflicts so that an individual can rework his developmental problems. In point of fact, there is reason to doubt whether sex offenders come to fully understand or change their sexuality by such means.

In an investigation published in *Lancet* in 1979, Eicher studied a group of transsexuals (persons who feel themselves to be psychologically "trapped in the body of the wrong sex").[78] He examined the white blood cells of these persons, looking for the presence or absence of a cell surface substance known as H-Y antigen.[28] Ordinarily (as depicted schematically in Figure 5-5), H-Y antigen is present on the surface of cells taken from men, but absent in women. In some transsexuals, Eicher found that the gender the individual felt himself (or herself) to be corresponded with the presence or absence of H-Y antigen, rather than with that individual's bodily appearance. If Eicher's observations can be replicated, this suggests that "sex change operations," which have been performed on some transsexuals, may actually serve to correct body phenotype (external appearance) to conform with H-Y antigen genotype.[79,80] Such knowledge is clearly not accessible via introspective methods alone. Even if a person could come to such an understanding, this would not necessarily make it any easier for him to change his behavior. There is little solid evidence that traditional psychotherapies, when used alone, are consistently effective in treating paraphiliac syndromes.

Behavior therapists tend to be less concerned with the historical antecedents of unconventional sexual behavior than with the question of what can be done about it. The feature common to most behavior therapies is that the therapist prescribes a course of action for the patient to follow which is intended to help decrease his attraction towards previously erotic deviant stimuli, such as children. Often a simultaneous attempt is made either to teach the patient more appropriate ways of achieving sexual satisfaction or to condition him to become sexually arousable by an age-appropriate consensual partner. This is clearly a formidable task.

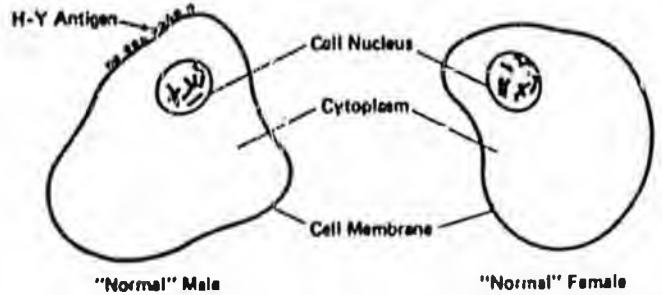

Figure 5-5. H-Y antigen is ordinarily present on the surface of cells taken from men but absent in women, as shown schematically in this figure.

Much of the literature regarding the behavioral treatment of sex offenders is anecdotal. However, Isaac Marks at the Maudsley Insitute in England documented good therapeutic results at two-year follow-up in treating transvestites (men who become erotically aroused by dressing in women's clothing), but the very same behavioral approach failed with transsexuals (men who feel themselves to be women).[81,82] Blair and Lanyon obtained good results in using behavior therapy to treat some exhibitionists.[83] Behavior therapy has not proven consistently effective in treating pedophilia. This suggests that some sexual deviation syndromes may be responsive to behavioral therapy treatments, whereas others may not. Perhaps more attention needs to be paid to differences amongst these syndromes, in addition to studying their common features.

Medication to Treat Sexual Deviation Syndromes

The purpose of utilizing medication to treat sexual deviation syndromes is to try to decrease sexual libido. The rationale for doing this is based upon the assumption that if one experiences sexual hungers of the sort that might cause problems, for example, a hunger for children, one is better off being less hungry. Because the various medications used for this purpose are not intended to make a man impotent and incapable of sexual activity, they may be most helpful in facilitating self-control in cooperative persons whose "offending behavior" is an expression of unconventional sexual tastes. They may be less helpful when the "offending behavior" is a manifestation of diminished intellect, psychosis, personality problems, or drug-induced intoxication—though such as hypothesis requires validation.

In utilizing drugs as a possible treatment method, one can address the issue of the relationship between biological factors, such as testosterone levels, and states of mind, such as those related to sexual desire. It is important to recognize, however, that the use of biological methods to successfully treat a condition does not prove that the condition and the treatment are directly and simply related. Aspirin can be used to treat a fever, but fever is not due to, or precipitated by, aspirin deficiency.

Amongst the drugs that have been used investigatively to try to treat sexual deviation syndromes are certain of the major tranquilizers such as benperidol.[84–86] Initially, use of these drugs for this purpose was based upon the observation that patients taking them for other reasons sometimes reported diminished libido. However, there is little substantive evidence to support the notion that these drugs can be used successfully in the treatment of paraphiliacs.

A class of drugs not yet utilized which may play a future role in treating these conditions are the gonadotropin releasing hormone (Gn-RH) agonists.[87] Again, rationale for their use is based upon the theory that the hormone testosterone "fuels" the sex drive in men. It is the increased production of testosterone by the testes around the time of puberty which correlates with (a) masculinizing bodily

changes such as deepening of the voice and growth of facial hair and (b) an increased psychological interest in sex. Prolonged (as opposed to brief) administration of Gn-RH agonists, for reasons that are poorly understood, paradoxically inhibits the release of follicle stimulating hormone (FSH) and luteinizing hormone (LH) from the anterior pituitary gland in the brain (see Figure 5-6). This, in turn, results in decreased testosterone output by the testes, which require stimulation from FSH and LH in order to produce testosterone. The adrenal gland, which also

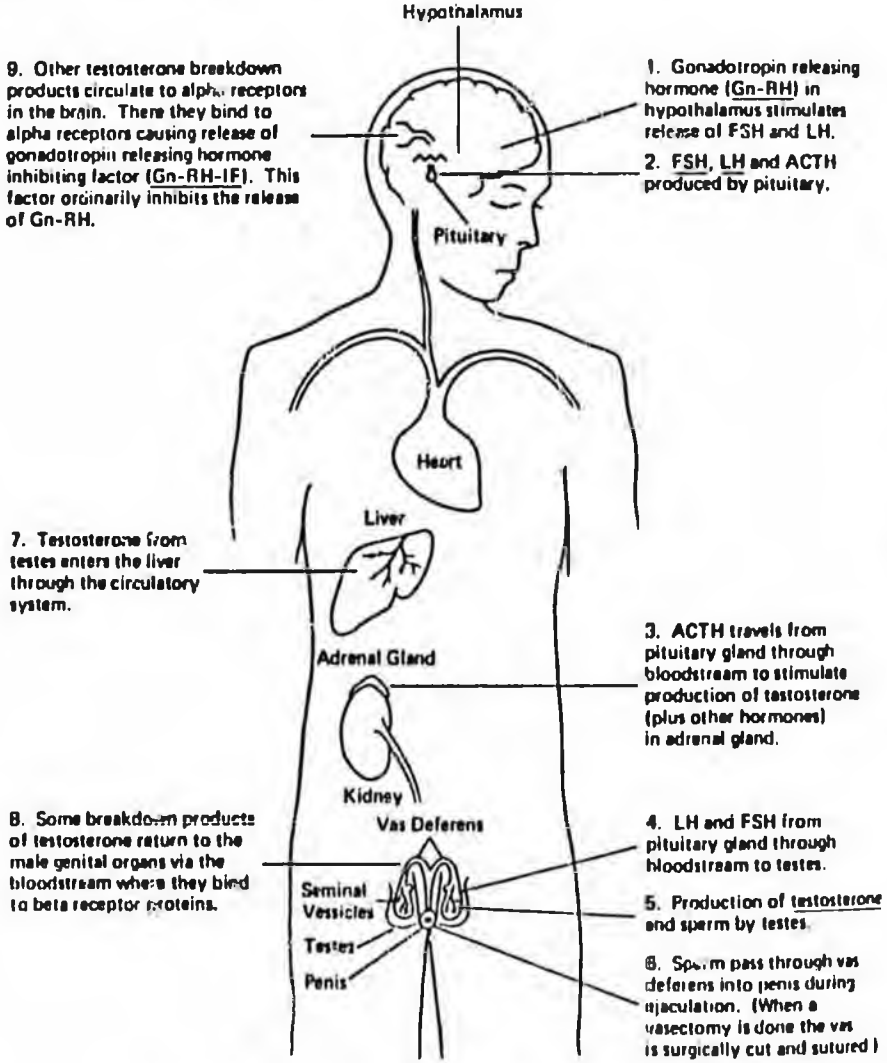

Figure 5-6. Relationships among various "male sex hormones."

produces testosterone in very small amounts, does not depend upon FSH and LH stimulation for this purpose. ACTH, another hormone produced by the pituitary gland, on the other hand, can influence adrenal testosterone output. A recently identified substance, Gn-RH inhibiting factor (see Figure 5-6), which may someday be useful in decreasing sex drive, has not yet been synthesized and therefore is unavailable for therapeutic purposes at present.[88]

Two other drugs that reduce testosterone levels which have been used in an attempt to treat sexual deviation syndromes are cyproterone acetate (CPA) and medroxyprogesterone acetate (MPA). Cyproterone acetate, which must be taken daily in pill form, is currently unavailable in the United States. A controlled double-blind clinical trial performed in Canada concluded that this medication could successfully reduce sexual interest and libido in a group of paraphiliac patients.[89] This investigation did not use a pharmacologically active substance with similar side effects for comparison purposes, however, thereby leaving doubt about whether study participants were indeed "blind" as to when CPA was or was not actually being administered. This raises the possibility that patients may have reported reduced libido as a psychological reaction to feeling "drugged" and that their feelings of diminished sexual interest may not have been attributable entirely to a pharmacologically induced decrease in testosterone levels.

When cyproterone acetate is administered, the pituitary gland does not increase production of FSH in response to decreased testosterone levels as occurs when an individual is castrated. This suggests that the drug has an effect not only upon the testes but upon the brain as well, presumably in areas relevant to sexual phenomenology and function. The same is true of medroxyprogesterone acetate.

None of the drugs used in the treatment of sexual deviation syndromes acts specifically to decrease deviant sexual desires while leaving conventional sexual interests intact. Thus, currently available medications do nothing to change sexual orientation; rather, if successful, they simply suppress sexual appetite in general.

Two major options are possible as a means of trying to reduce the presumed sex drive stimulating effects of testosterone. One is to try to interfere with testosterone production, whereas the other is to try to block the effects of testosterone (or more accurately, of its breakdown products) upon the brain. In the future, it may be possible to block the central effect of testosterone breakdown products upon the brain without interfering with levels of circulating testosterone peripherally. However, this cannot yet be done safely in humans.

The theoretical rationale for using testosterone-depleting medications to treat paraphiliacs would be strengthened if it could be shown empirically that intensity of sexual desire is indeed correlated with testosterone level. Davidson and colleagues showed that administration of testosterone to men whose plasma levels were below 150 ng per 100 ml led to a prompt increase in sexual appetite and activity.[90] However, Brown and others, in a study involving 101 men, demonstrated that variations in testosterone level within the intermediate range (275 to

875 ng per 100 ml in many laboratories) did not necessarily correlate with self-reports of sexual interest.[91] In animal studies, moderate decreases in testosterone level due to CPA administration failed to decrease sexual activity as significantly as had been expected.[92] Thus, in order to achieve therapeutic sex drive reduction, a significant decrease in testosterone level may be essential.

According to Laschet and Laschet, 80% of the men involved in a nonblind clinical trial reported significant reductions in sex drive in response to a daily oral dose of 100 mg of cyproterone acetate.[93] Twenty percent of the men required 200 mg per day orally, or 300 to 600 mg intramuscularly every week to ten days, in order to achieve a comparable effect. Follow-up of over 300 men for periods as long as eight years revealed few serious side effects when these dosages were employed.[94]

Stern and Eisenfeld showed that administration of radioactive-labeled testosterone to castrated rats pretreated with CPA did not result in its being bound to peripheral target tissues such as the seminal vesicles.[95] Thus, CPA appears to prevent the binding of testosterone to peripheral target organs. However, CPA does not block testosterone uptake in central hypothalamic brain regions thought to mediate sexual behavior.[96] In contrast, medroxyprogesterone acetate does, but it does not prevent testosterone binding peripherally. MPA inhibits FSH more than LH, whereas CPA inhibits only LH (see Figure 5-6). Thus, these two antiandrogenic drugs appear to exert an effect in slightly different ways. Both, however, reduce production of testosterone from its chemical precursors.[97,98] Antiandrogens may also exert an effect by preventing the rise in testosterone which ordinarily occurs as a consequence of sexual stimulation.[99]

Medroxyprogesterone Acetate (Depo-Provera). In the United States, medroxyprogesterone acetate is the drug that has been used most frequently to treat paraphiliac patients.[2] This medication is available in depot form, which means that it is prepared in such a fashion that it can bind to muscle, from where it is gradually released into the bloodstream. Injecting a depot drug into muscle accomplishes the same purpose as taking pills daily, in that both keep medication constantly present within the bloodstream so that it can act on appropriate tissue and organ receptors (see Figure 5-7). Some of the medication travels through the circulation bound to carrier proteins, whereas the remainder circulates in an unbound (or free) form. The customary starting dosage of MPA has been 500 mg per week of the 100 mg per ml solution. No more than 250 mg is given into a single injection site. The 100 mg per ml solution has greater bioavailability (i.e., it produces higher blood levels at a given dosage) and is less painful than the 400 mg per ml concentration. Periodic blood tests can be performed to document decreases in serum testosterone levels, and the medication is not feminizing (e.g., it does not cause breast enlargement). Dosage can be titrated so as not to cause total impotence, but studies to determine optimal dosage levels have yet to be performed.

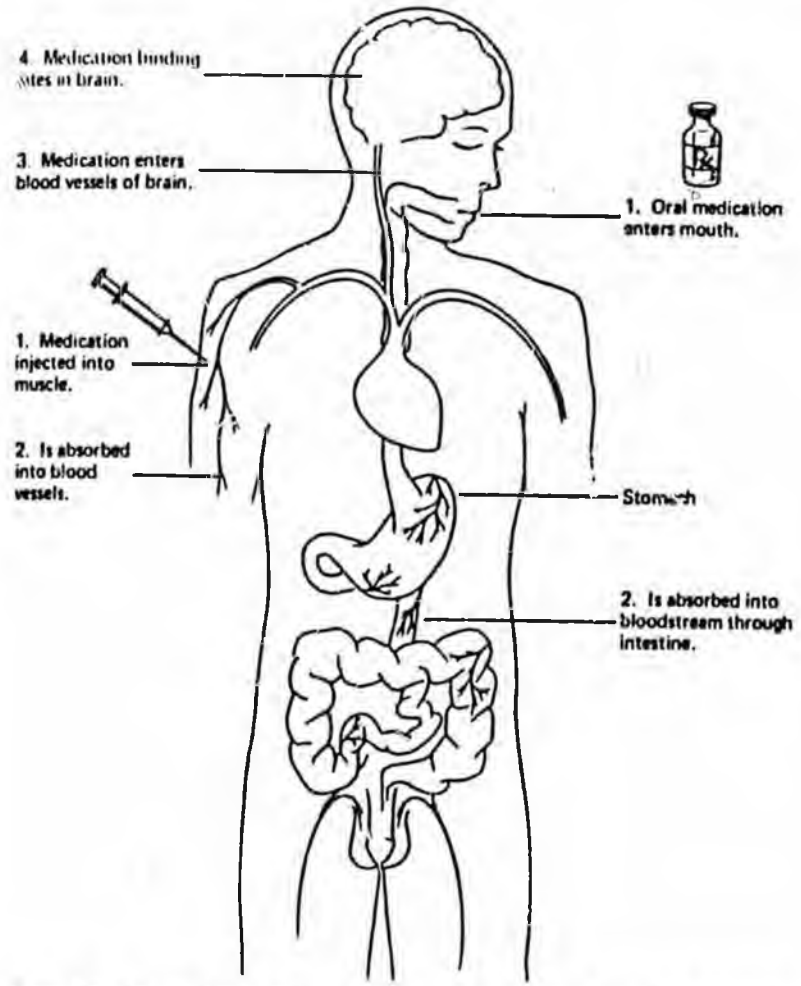

Figure 5-7. Comparability of oral and intramuscularly injected medication treatment.

The major side effects of MPA include weight gain, mild lethargy, cold sweats, nightmares, and hot flashes. Hypertension is common. Elevated blood glucose, dyspnea (shortness of breath), hypogonadism (shrunken testicle size), and malignant breast tumors (in female beagle dogs) have also been reported. The drug causes a decreased sperm count which makes impregnation unlikely, but the remaining sperm can be atypical which suggests that the fetus might be deformed were a man to father a child while taking the drug. It is believed that these major side effects are reversible if medication is stopped.

Table 5-5 shows changes in sexually deviant behavior in a group of 20 chronic paraphiliac patients treated with medroxyprogesterone acetate.[2] Of these patients,

Table 5-5. Changes in Sexually Deviant Behaviors in 20 Chronic Paraphiliac Male Patients Treated with Medroxyprogesterone Acetate.*

PATIENT	AGE (YEARS)	DIAGNOSIS	AVERAGE FREQUENCY OF SEXUALLY DEVIANT BEHAVIORS BEFORE TREATMENT†	DRUG TREATMENT‡		OCCURRENCE OF SEXUALLY DEVIANT BEHAVIORS	
				LENGTH	MAXIMUM DOSAGE	DURING TREATMENT	AFTER TREATMENT
1	34	Homosexual pedophilia	Once/week	7 years, 9 months	500 mg/week	None	Treatment dropout; no relapse less than 1 year after treatment
2	31	Homosexual pedophilia	Twice/month; 1 known arrest	1 year	300 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
3	30	Heterosexual exhibitionism	Twice/week	10 months	250–300 mg/week	None	Treatment dropout; relapsed more than 1 year after treatment
4	34	Homosexual masochism	4 times/week	3 months	200 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
5	27	Bisexual pedophilia	Twice/week	3 months	400 mg/week	None	Treatment dropout; relapsed more than 1 year after treatment
6	43	Transvestism; homosexual incest	7 times/week; 2 incidents	1 year, 4 months, intermittently	150 mg every other week	None	Relapsed less than 1 year after treatment
7	52	Heterosexual sadism	Once every 2 weeks for 25 years	3 years, 5 months	600 mg/week	None	Treatment continues; no relapses
8	29	Homosexual pedophilia	Twice/week; 6 arrests in 6 years	10 months	500 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
9	36	Homosexual pedophilia	Once every 2 months; 4 arrests in 6 years	2 years	500 mg/week	None	Treatment continues; no relapses
10	56	Homosexual pedophilia	Once/week; 14 arrests in 29 years	3 years, 9 months	300 mg/week	Relapsed	Treatment continues
11	40	Homosexual pedophilia	Twice/week; 7 known arrests	4 years, 2 months	400 mg/week	None	Treatment continues; no relapses
12	45	Voyeurism; heterosexual pedophilia	Twice/week; 5–8 arrests; numerous institutionalizations	5 years, 3 months	300 mg/week	None	Relapsed less than 1 year after treatment; treatment now resumed
13	27	Homosexual pedophilia	Twice/week since age 10	5 years, 9 months	200 mg/week	None	Treatment completed; no relapse more than 1 year after treatment
14	41	Homosexual pedophilia	Once/month; numerous arrests; 4 convictions, 4 reported parole violations	3 years, 8 months	500 mg/week	Relapsed	Treatment continues
15	37	Homosexual pedophilia; exhibitionism	Record unclear; probably several incidents/year	3 years, 9 months	350 mg/week	None	Treatment completed; no relapse less than 1 year after treatment
16	26	Homosexual pedophilia	Once/week	1 year, 1 month	200 mg/week	None	Treatment dropout; relapsed more than 1 year after treatment
17	24	Heterosexual voyeurism	Once/month	1 year	400 mg/week	Relapsed after alcohol consumption	Treatment continues; in prison
18	40	Heterosexual exhibitionism	Five times/day since age 11; first arrest at age 21; numerous others	2 years, 2 months	200 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
19	29	Heterosexual exhibitionism	Twice/week	2 years, 1 month	250 mg/week	None	Treatment dropout; relapsed less than 1 year after treatment
20	46	Heterosexual exhibitionism	Four times/week; binges of 20/day	2 years, 3 months	300 mg/week	None	Treatment continues; no relapses

*Sexually deviant behavior was considered to have occurred if the patient was accused of having or admitted having a deviant sexual contact (e.g., an episode of public genital exposure). Any occurrence of such behavior was scored as a relapse once treatment had been initiated, even if it did not come to the attention of the law as an official complaint.

†Based on institutional records and patients' statements.

‡Study participants who stopped taking medroxyprogesterone acetate did so against medical advice, except in the cases of patients 13 and 15. Some patients were irregularly compliant with medication even during the period when it was being prescribed.

15% (3 of the 20) showed recurrences of deviant activity while taking the medication, indicating that it is not 100% effective. On the other hand, 85% of these men were without further legal involvements while receiving medication, sometimes for periods as long as several years. The number of patients reported upon was small, and additional studies with larger numbers of patients need to be conducted. Some of the patients were self-referred and had no legal charges against them.

Most of the patients reported upon in Table 5-5 were not hospitalized to initiate treatment and were not required to take medication as a condition of probation. In time, many became noncompliant, sometimes because they believed themselves cured. Currently, most patients are briefly hospitalized for three or four weeks at the beginning of treatment, and subsequent outpatient compliance has improved dramatically.

The data presented in Table 5-5 show clearly that in most cases, when paraphiliac patients discontinue medications they relapse. This supports the hypothesis that this form of treatment is not a cure or a temporary catalyst to be used until psychotherapy can become effective. Rather, for the majority of patients, the medication appears to act as a sexual appetite suppressant. If deviant hungers are allowed to return, most patients seem again to be at risk of giving into temptation by satisfying those hungers. In a few cases, patients have reported that MPA fails to significantly decrease their sexual drive. Why this should be so is not known.

In the future, it will be important to conduct a controlled double-blind study in which neither the patient nor the evaluator is aware of whether MPA or a placebo with similar side effects has been administered. Fluphenazine, a drug with a similar intramuscular route of administration and similar side effects, which does not lower testosterone could be utilized for this purpose. Such a study could help document that any reduction in the frequency of sexual fantasies and in the intensity of erotic cravings experienced while receiving MPA was indeed related to lowered testosterone levels, rather than to psychological expectation or other factors independent of testosterone level. Such a study is now being planned. If it can be shown conclusively in this way that MPA does indeed decrease sexual appetite, changes in long-term recidivism rates could then also be ascertained amongst sex offenders treated with MPA, whose offending behavior either was, or was not, thought to be the manifestation of a sexual deviation syndrome.

Ancillary Care. Treating patients with antiandrogenic medications involves considerably more than simply providing injections. Although psychological counseling has not been shown to be a method capable of reducing sexual desire, such counseling may well be beneficial in other ways to the person who has been experiencing such desires. Although medication may decrease the lust a homosexual pedophilic man experiences for little boys, it cannot replace feelings of companionship, intimacy, affection, devotion, or love that may previously have been provided by children. Thus, once deviant erotic urges have been diminished by medication, an individual may also find counseling helpful in his effort to adopt a new life-style. For those who fail to respond to medication, supportive therapy and guidance to encourage efforts to resist temptation should be tried.

In initiating medication treatment, a brief period of psychiatric hospitalization lasting three to four weeks may be useful for three reasons, in addition to affording an opportunity for more comprehensive assessment. First, it removes the patient from unsupervised situations in which he might succumb to temptation before medication can begin exerting its anticipated effect. Secondly, many patients seem to develop a stronger alliance with potential help givers when living in hospital than when treatment is initiated on an outpatient basis. It is perhaps for this reason that brief hospitalization has sometimes been found to significantly increase subsequent outpatient compliance. Finally, while hospitalized, patients can speak with a group of other men having similar difficulties, which often brings a sense of relief and of being accepted as a person, thereby opening up the opportunity for greater candor. Many of these men have never before had a chance to talk openly with others without fearing that they would be perceived, and dealt with, in a demeaning way. Although the hospital staff in no way condones their behavior—quite the contrary—they do attempt to appreciate the basis for it, and they treat patients respectfully and kindly. The families of these patients can also be seen at this time, which can be important given the nature of their problems. How does a wife tell the neighbors that her husband has been arrested for exhibitionism or for sexually fondling the child next door? Patient confidentiality is maintained, but noncompliance is reported to the courts when appropriate. Rehospitalization may be required if outpatient treatment, which can include group therapy, is proceeding poorly. It is made clear to patients that a goal of therapy is to try to help them discontinue sexual behavior that violates the rights of others—not to make them feel better or less guilty about continuing it.

Surgery as Treatment for Sexual Deviation

The use of surgery to treat paraphiliac patients is well summarized in an article entitled "Therapeutic Sex Drive Reduction" written in 1980 by Dr. Kurt Freund of the Clark Institute of Psychiatry in Toronto.[100] The two major types of surgical procedures which have been used are (1) orchidectomy (castration) and (2) stereotactic neurosurgery. Stereotactic neurosurgery is performed with the aid of microscopic-sized surgical instruments capable of producing minimal-sized brain lesions. The effects of surgery (and of electrical and chemical stimulation or ablation of potential surgical sites) have been studied in both animals and men. Obviously, surgery should be considered as a therapeutic option for sex offenders only under extraordinary circumstances.

Castration. There are few well-controlled studies assessing the effects of castration upon an animal's tendency to approach a potentially available sexual partner.[100] Nevertheless, there appears to be little doubt that removal of the gonads

eventually decreases sexual interest significantly in most animals. In comparison to the rate of testosterone depletion, however, the corresponding postsurgical fading out of sexual behavior in castrated animals can be very slow. Furthermore, sexual interest may wane more slowly than sexual capacity as evidenced by the observations that (1) ejaculatory capacity often disappears before the animal loses the ability to sustain an erection and (2) the animal may continue attempting to mount receptive females even after erections have become rare.[101]

Individual differences amongst castrated animals are frequent. Pheonix and colleagues observed a substantial overall decline in virtually all aspects of sexual behavior in ten castrated monkeys.[102] However, while some of the animals ceased ejaculations immediately following surgery, others did not do so until over a year later. These postsurgical differences could not be attributed to presurgical differences in frequency of sexual behavior. The causes of individual variations in the rapidity with which various animals cease sexual behavior following orchidectomy are not clear, just as it is unclear why some humans continue to have apparently high libidos even after treatment with testosterone-depleting agents.

A number of studies have looked at the recidivism rate of sex offenses following castration in humans. Sturup and others conducted over 4000 follow-up examinations of 900 castrated sex offenders in Denmark over a 30-year period between 1929 and 1959.[103,104] There was definite recidivism of only 1.1% after castration, and if unclear cases were included, the recidivism rate was 2.2%. Wiffels reported comparable findings.[105] Ficher Van Rossum reported a 1.3% recidivism rate amongst 237 Dutch cases, and Kinmark (and Oster) reported similarly low rates on 307 Swedish patients.[103] Bremer found a 7.3% recidivism rate after five years in a group of 41 castrated sex offenders who, prior to treatment, had a recidivism rate of 58%.[106] Reported recidivism rates of castrated German sex offenders were also low.[107] This study also reported on normal German men forcibly castrated under Hitler.

Comu, in Switzerland, compared 121 castrated sex offenders with 50 offenders who had refused recommended castration.[108] Follow-up ranged between 5 and 30 years. The recidivism rate of castrated offenders was 5.8%, indicating that castration does not make further sexual offenses impossible. However, the recidivism rate of the 50 offenders who had refused castration was 52% (15 committed one additional offense, while 11 others committed between two and seven additional offenses each). Presumably, these differences in recidivism rate were a reflection of whether or not castration had been performed, although the possibility that the voluntarily castrated group contained more patients genuinely motivated to stop offending behavior cannot be entirely excluded. Prior to castration, both groups had a comparable frequency of offending behavior.

Freund pointed out that the degree to which sexual drive decreases after castration appears to depend upon the length of time of testosterone depletion.[100] Thus, if it is the case that some repeat sex offenses occur a short time after surgery, even further lowering of the recidivism rates might be possible by keeping patients in the hospital longer following castration.

Besides documenting changes in recidivism rate, a number of investigators obtained self-reports from sex offenders regarding potency. In many cases following castration, some degree of erotic desire and the capacity to perform sexually remained.[107–109] Hackfield pointed out that this does not present a problem in terms of treatment since the surgery fulfills its intent if it decreases sex drive sufficiently to enable the patient to refrain from acting upon unacceptable erotic urges.[110] Sturup described several cases in which pleasurable intercourse was successfully practiced for many years following castration in response to advances from consensual female partners.[104] Although a castrated man could reverse his condition by undergoing testosterone treatment, few cases have been detected in which this has occurred without medical approval.

Testosterone appears to be a prehormone which is broken down in the liver to form other metabolically active substances. Some of these bind to receptor sites in the brain, presumably stimulating areas related to erotic desire. Other testosterone breakdown products bind to receptors on peripheral tissues likely related to physical capacity to obtain erection and to ejaculate (see Figure 5-6). Freund suggests that someday it may be possible to administer active breakdown products of testosterone to castrated sex offenders, which will enhance their sexual capacity by affecting peripheral receptors without increasing sexual desire (via central brain stimulation) to a level where it becomes difficult to resist temptation.[100]

Neurosurgery. The second type of surgical procedure used in the treatment of sex offenders is stereotactic neurosurgery. In order to try to determine whether such surgery might be feasible in humans, a great deal of animal experimentation has been performed. That work has attempted to identify structures in the brain (1) that accumulate relatively large amounts of sexual hormones, (2) that lead to changes in the output of sexual hormones in response to either stimulation or ablation, or (3) that lead to changes in sexual behavior in response to either stimulation or ablation. Some researchers have also studied "experiments of nature" by looking at alterations in sexual behavior that correlate with human brain pathology.[111]

It is clear from studies done upon animals that lesions in some brain regions can readily decrease the frequency of sexual behavior without affecting either perceptual-motor capacity or circulating testosterone levels.[112,113] The area preoptica in the hypothalamus is one such region.[113] It seems to be particularly rich in sex hormone receptors. Other areas of the brain such as the limbic system accumulate sexual hormones to a lesser degree or not at all.

Exposing various areas of the brains of live animals to sex hormones to see whether sexual behavior will occur is another method used in an attempt to identify potential neurosurgical sites. This has produced some intriguing observations. Estrogen applied locally to specific hypothalamic sites in male rats leads to a lordotic

response—a backward elevation of the pelvis that facilitates intercourse in females.[112] Testosterone implants in certain hypothalamic sites can reactivate mating behavior in castrated male animals, but similar implants in other brain sites cannot.[114] Electrical stimulation in the dorsal part of the lateral area preoptica causes almost uninterrupted mounting and frequent ejaculations in male rats.[115]

In 1939, Kluver and Bucy described a syndrome in cats, produced by bilateral temporal lobectomy, that included intensified indiscriminate sexual behavior.[116] In 1954, Schreiner and Kling showed that this hypersexual activity could be abolished by castration but reinstituted with testosterone replacement therapy—which suggests that the behavior in question was sex hormone related.[117] They demonstrated that lesions to specific sites in the ventromedial nucleus of the hypothalamus could also abolish this hypersexual activity.

In 1966 a team of neurosurgeons performed stereotactic brain surgery on a homosexual pedophile, making a lesion in the ventromedial nucleus of the hypothalamus in the same area that had seemed to decrease hypersexuality when it had been ablated in Kluver-Bucy cats.[118] The patient subsequently indicated that his erotic fantasy life was virtually abolished and that he had lost his pedophilic urges. In 1979, Orthner (and others) reported that substantial therapeutic sex drive reduction had been achieved in 34 sex offenders treated neurosurgically in a similar way.[111,112,119] Although no formal instruments were used to confirm the validity of the patients' self-reports, in many cases follow-up extended over several years with no known rearrests. Major side effects were increased appetite, weight gain, and reported absence of dreaming. Freund feels that this surgical team may have obtained genuine success and that if it can be more conclusively established that neurosurgery appreciably lowers the recidivism rate of sex offenders, none of the reported side effects appeared disproportionate.

Schmidt and Schorsch cautioned that psychosurgery of this sort has sometimes been performed without proper safeguards with poor results.[120] They cited a study by Muller involving ten paraphiliac patients. Three years after surgery, four of the ten patients were lost to follow-up, three were said to be significantly improved, and two unimproved. Of the two unimproved patients, both subsequently underwent castration. The tenth patient in this series, a pedophile with sadomasochistic fantasies, was relased from prison after neurosurgery and was administered antiandrogenic medication until he complained of impotence with an age-appropriate girlfriend, at which time medication was stopped. Several weeks later he was accused of murdering a 10-year-old child.

A recent governmental task force appointed to consider the topic of psychosurgery in the United States concluded that it does hold therapeutic promise but recommended that its use be confined to designated research centers to try to assure proper safeguards.[121,122] Some authorities feel that brain surgery to attempt to decrease troublesome sexual appetites should for the time being be discontinued until further data from animal experimentation become available.[123]

Future Research

Figure 5-8 shows pictures obtained by means of a CAT scan and a PET scan. The term CAT scan is an abbreviation for computer assisted tomography. The equipment involved in producing these X-rays is manufactured by the EMI Corporation; thus, EMI scan is also sometimes employed.

When first marketed, the CAT scan represented a significant improvement over previously available X-ray procedures because not only could it show the presence of hard structures such as bones or tumors, but it was also capable of depicting the details of softer tissues such as kidney, lung, or brain. Furthermore, with the aid of computer analysis it could safely produce pictures of these structures corresponding to various depths within the tissue being X-rayed. X-rays of the brain taken by CAT scan depict structure but not function.

The term PET scan is an abbreviation for positron emission tomography. This test, like thyroid scanning, requires that the patient be administered a small amount of radioactive material—in this case glucose—which emits positrons. A computer attached to Geiger counter type sensors placed around the patient's head then produces a series of cross-sectional pictures of the brain at various depths. These pictures vary in color according to the amount of glucose being utilized as a source of energy at a given anatomical site. In this manner, the PET scanner can provide a picture showing which areas of the brain are most active metabolically at a given time—for example, during sexual arousal. Because the half-life (decay time) of radioactive glucose labeled in this fashion is short, the test is believed to be safe; it is no more dangerous than conventional thyroid scanning procedures which have been used medically for many years.

The PET scanner may help provide answers to the following questions. What areas of the brain are metabolically active during sexual arousal? Do these areas differ in persons with unconventional sexual orientations or interests? Do these areas differ in persons with organic anomalies such as Klinefelter's syndrome? What are the effects of testosterone-diminishing medications, which given in low or higher dosage forms, upon brain activity during sexual arousal?

PART IV: MEDICOLEGAL ISSUES AND SUMMARY

Medicolegal Issues

In considering the treatment of sex offenders with surgery or with antiandrogenic medications, a number of ethical and medicolegal issues must be addressed. Recently, in an editorial in the *American Journal of Psychiatry*, Dr. Seymor Halleck called for the establishment of guidelines regarding the use of antiandrogenic medications.[124] Two issues of concern to him related to (1) maintaining the constitutional rights of citizens, even those convicted of sex offenses and (2) the question

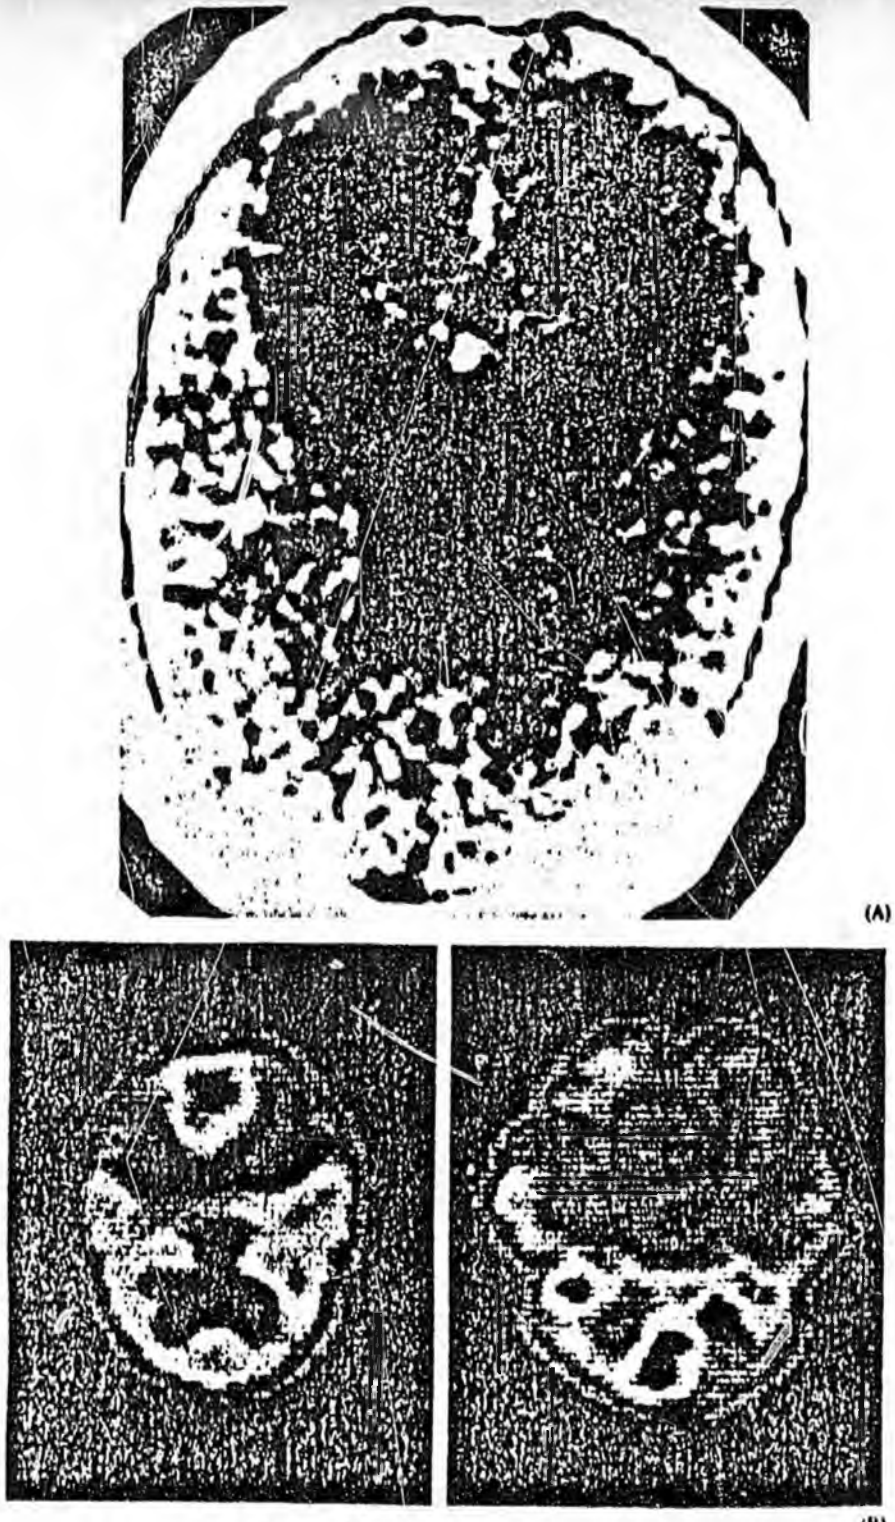

Figure 5-8. (A) CAT scan. (B) PET scan.

of whether persons facing prolonged incarceration are capable of giving informed consent regarding the use of this form of treatment.

In most democratic societies, individuals are generally free to do whatever they choose, as long as in doing so they do not interfere with the rights and well-being of others. When a person's behavior does pose a threat to the well-being of others, as clearly occurs when an individual rapes, for example, his freedom and rights are diminished for the common good. Thus, a convicted sex offender does not possess all the rights of a person who has not violated the law.

When an individual represents a threat to the safety of others, there is legal precedent for requiring him to take medication (e.g., measles vaccine). In this sense, then, requiring a convicted sex offender either to take antiandrogenic medications as a condition of probation or to go to prison may not be an unconstitutional violation of his rights.[125] Admittedly, making such a decision can be difficult, but just because the consequences of a decision may be difficult does not mean that one loses the capacity to choose. Cancer patients often have to choose between taking medication and dying.

Paraphiliac patients should not be denied access to antiandrogenic medications they wish to take which might be helpful in their treatment. Recently, a prisoner in Maryland successfully petitioned the court for the right to receive such treatment. Administering a properly informed, convicted person medication that may directly benefit him is very different from using him to study the effects of a drug, such as rabies vaccine, unrelated to his personal well-being. Paraphiliacs taking antiandrogenic medications can benefit if (1) they gain greater capacity for self-control, (2) they obtain relief from intrusive erotic obsessional fantasies, or (3) they avoid the necessity for quarantine from the community.

The medical profession needs to make clear the nature of the effects of psychiatric medications in general. They are not administered to control attitudes or behaviors such as those relating to political affiliations. They are not "mind controlling." Rather, they are usually given with the intent of increasing the capacity for self-control and restoring function (such as the ability to determine whether "heard" voices are real or imaginary).[126] Antiandrogenic medications are given in an attempt to increase rather than decrease self-control.[126]

Summary

Sexual deviation syndromes (paraphilias) are diagnosable psychiatric conditions manifested by (1) recurrent deviant fantasies, (2) intense erotic cravings, and (3) relatively stereotyped behaviors as a response to those cravings. The behaviors are stereotyped in the sense that exhibitionists expose themselves, whereas pedophiles seek out children and transvestites cross-dress. Paraphiliac syndromes are not necessarily mutually exclusive, but like conventional heterosexuality, their course is chronic. They may respond to biological treatments and may have associated

organic pathologies (such as Klinefelter's syndrome), but their etiologies are poorly understood.

Sexual offenses, as defined legally, may or may not be perpetrated by persons with one of these syndromes. When offending behavior is related to such a syndrome, (1) intramuscularly administered medroxyprogesterone acetate, (2) orchidectomy to diminish testosterone, or (3) cyproterone acetate may be helpful. However, antiandrogenic medication can only help if the patient is compliant. Orally administered medroxyprogesterone (at a daily dosage of 150 mg) has not been shown to be helpful.[128] It is not known whether antiandrogenic medication can help when offending behavior is unrelated to deviant sexual cravings, as when rape is committed opportunistically or in response to anger and hostility. Stereotactic psychosurgery is still a somewhat controversial procedure that is not yet widely enough available to be considered a practical treatment option for sexual deviation syndromes at this time. Behavior therapy may help some patients learn how to better resist their urges, but it may work less well with some paraphiliac syndromes than with others. When a sex offense is the reflection of a psychiatric illness such as schizophrenia or manic-depressive syndrome, medication treatment appropriate to that condition should be instituted. Legal demands for justice and safety as well as medical concerns for understanding care must both be considered, because each is important. When a person seeks help, his difficulties should be appreciated rather than scorned as perversions.

SOLDOTNA OPTOMETRY CLINIC
JOHN A. DEMSKE, O.D.
DOCTOR OF OPTOMETRY
WOODRUEF BLDG. - SUITE 202, 155 SMITH WAY
SOLDOTNA, AK 99669

TELELPHONE (907) 262-3168

February 2, 1984

Representative Mae Tischer
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer,

Per your request during the teleconference hearing in regard to HB 225, I offered to send you the names of individuals involved with the written national exam for therapeutic drug usage by optometrists. I have spoken with Dr. Norman Wallis, who holds the dual role of president of the International Association of Boards of Optometry(IAB) and the executive director of the National Board of Examiners in Optometry(NBEO). Dr. Wallis informed me that the exam is in the planning stages and that he expects it to be ready for use by Spring of 1985. If you have any further questions, you could contact Dr. Wallis at 5530 Wisconsin Avenue, N.W., Suite 950, Washington, D.C. 20815. PH (301)652-5192.

Dr. Wallis was out of his office until today and that is why it has taken me so long to get this information to you.

Much of the testimony concerned optometrists using drugs with supervision by a physician. Of the 38 states where optometrists use drugs, only North Carolina has any type of regulation regarding supervision, and this supervision is informal where the physician acts as a consultant. Unlike a nurse practicioner or physicians assistant , the North Carolina optometrist is solely responsible for the prescription. That is the way I would want to prescribe drugs and I'm sure that the majority of O.D.s in the state feel the same.

Several times during the teleconference the situation in Bethel was mentioned as an ideal situation regarding supervision. Since I worked there for five years, I think I can shed some light on the conditions. The optometrists have standing orders which specify drugs, their dosages and uages.

The standing orders are approved after a trial period in which the doctor of optometry demonstrates his knowledge and proficiency. After the trial period, the optometrist can use these drugs in-office and write precriptions without consultation or supervision. If the optometrist wishes to use a drug that is not listed on the standing orders, then a consultation is required and the consultants name is noted on the prescription.

In my opinion, the North Carolina law is a far superior model in terms of administration, logistics,and interprofessional communication. If you have any further questions on the North Carolina model, I suggest that you contact Dr. John Robinson, Sec.-Treas.-N.C. State Board of Optometry, P.O. Drawer 609, Wallace, N. C. 28466.

In closing, I apologize for the lateness and length of this letter, but I feel that this is information of which you should be aware. If you have any further questions, don't hesitate to contact me.

Sincerely,

J. A. Jemska OD

1) Dr. Bo...
272-5353
276-8120
to offer his support to substitute HB 225 - wishes not to have bill "watered down"

2) Dr. Impo - Kodiak
486-5782
486-6117
to voice support for HB 225 in order to conserve fisheries & bycatch to both areas

3) Dr. Metaxas - Anth...
one of 2 fishery ... -
called to support HB 225

Dr. Thompson
pro HB 225

Dr Curtis Johnson
supports provisions to HB 225

Dr. Maynard Falconer
support pro bono HB 225
279-8422

Dr. John Monk - Portland
supports Rep. Hall's
provisions to HB 225

HB225

OPTOMETRISTS

MAE –

This cut & paste of HB225 makes it internally inconsistent –

Section 1 authorizes prescription & use of legend drugs, but the definition of legend drugs is DELETED on p. 3.

Both DIAGNOSIS & TREATMENT is limited to the ANTERIOR SEGMENT of the eyes & eyelids. Someone would have to explain what is significant about the ANTERIOR PORTION of EYES AND EYELIDS.

⇒ The proposal doesn't limit INJECTIBLES or CONTROLLED SUBSTANCES as the summary suggests.

The CS for Senate bill will be available by the HEARING time. It allows use of DRUGS FOR DIAGNOSTIC NOT TREATMENT purposes and sets out the Rules Board to establish what drugs may be prescribed – They MUST be approved by the Board of Medical Examiners.

I haven't read it yet – That's from Senate HESS STAFF.

10:15 AM

Dave

Trigger – Dept of Ecm Develops
Opposes "Legend" drugs term

MAY 10 1983

May 5, 1983

Representative Mae Tischer
Co-chairman House HESS Committee
Pouch V
Juneau, AK 99811

Dear Ms. Tischer:

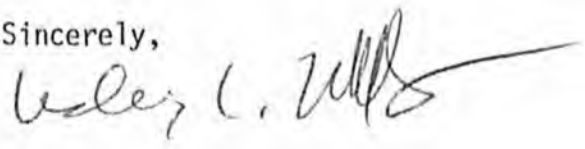
I am writing you in support of the bill which would allow optometrists to use pharmaceutical agents in their clinical practice in the State of Alaska. I know this topic is an emotional issue, however, I feel that careful review of other states, etc. will substantiate the fact that with proper education and training it is safe. As well, in the present day of astronomical health care costs I feel it would be cost efficient. I also feel it can be demonstrated that better and more appropriate referrals to physicians can be made with the use of pharmaceutical agents by optometrists.

I write to you with a personal background of graduating from both optometry school and medical school. I am very comfortable presently and have no axe to grind, rather simply wish to express my personal heart felt opinion.

Let me now address some specific aspects of optometric and medical education by my own first hand experience.

Medical school traditionally prepares the student in general medical and surgical background for post-graduate training programs. Detailed anatomy and physiology of organs such as the eye is not emphasized during medical school. As well, during surgical rotation in medical school it is uncommon to be exposed to ocular surgery. Because heart disease, cancer, and stroke are the biggest killers of the U.S. population, medical school clinical training is heavily devoted to general internal medicine, general surgery, obstetrics--gynecology and pediatrics. There are usually fourth-year electives in 4-12 week blocks where a student may increase his/her exposure to subspecialty medical and surgical areas such as: ophthalmology, ear/nose and throat, urology, pulmonary medicine, cardiology, etc. In my experience a small minority of students choose ophthalmology as a clinical rotation.

By a small personal survey in the area of Oklahoma in which I reside, most primary care physicians (general practitioners, family practice, internists, and pediatricians) state they had from one to three weeks of medical school devoted to ophthalmological care. This includes both didactic coursework and clinical experience. I do not need to remind you that these physicians treat eye diseases on an unrestricted basis.



On the other hand, optometry school is mostly devoted to ocular training. There are courses in general pathology and ocular signs of systemic disease because the optometrist is responsible to detect systemic diseases with ocular manifestations and to make appropriate referrals. The detailed ocular anatomy, ocular physiology, ocular pathology, and ocular pharmacology training in optometry school is far superior to the same ocular topics in any general medical school course in the country. This is not to slight medical education, there simply is not enough medical school curriculum time to devote to the eye because of training in vital organ systems such as the heart, lung, vascular system, etc.

Secondly, I will discuss my personal experience with side effects of ocular pharmacologic therapy. This section will be very brief as I have never had a patient with anything other than a very minor side effect from ocular pharmaceutical agents. I have seen a few mild allergic reactions and none of these serious and none had any evidence of systemic reactions such as elevated blood pressure, rapid heart rate, arrhythmias of the heart, etc. None ever required hospitalization and certainly there were no deaths. I saw very few significant side effects and all which did occur were very minor in nature.

In summary I would like to point out that ophthalmologists are vitally needed. The medical profession would be in sad shape without them because of their expertise in the area of ocular trauma, cataract surgery, retinal surgery, serious ocular infections, etc. However, in a rural state the ophthalmologists are primarily in large and medium sized cities with a poor distribution in the rural communities.

I also strongly feel that optometrists are vitally needed. Optometrists are well distributed in rural communities and by definition serve as primary care professionals. In my opinion, the patient, particularly in the rural areas and small town, will be the beneficiary of modern optometric practice. With the use of pharmaceutical agents, disease detection will be facilitated thus making the referral system into medicine more efficient. As well, this will save the patient a lot of inconvenience and time. I feel optometrists should be allowed to practice modern optometry which includes pharmaceutical agents. I believe the key to utilizing these medications by health care professionals is education and training.

Sincerely,

Lesley L. Walls, O.D., M.D.

To: HESS Committee
From: Dave Palmer
Subject: HB 225, SB 189, Optometrist Diagnostic drugs
Date: April 28, 1983

Attached is a copy of a working draft of a CS for SB 189.
The bill is different from the bill before the committee in several ways:

-The Board of Examiners in Optometry is expanded by one member, who is a physician.

-The Board is authorized to adopt regulations concerning the use of diagnostic drugs.

-The state medical board shall provide "advice and guidance" to the Board of Examiners in Optometry in developing a list of diagnostic druge and their dosages.

-provides for continuing education

-requires an optometrist to advise the patient and refer the patient to a medical specialist if a pathological condition is found.

-When using the term "Dr." or "Doctor", the word Optometrist must be used also,

-specifies requirements for an optometrist to be licensed to prescribe diagnostic drugs.

-optometry is defined to allow the use of diagnostic drugs.

-defines diagnostic drugs: cycloplegic, mydriatic or topical anesthetic....

Heard 4/27 Hearing

TESTIMONY IN SUPPORT OF HOUSE BILL 225

Health, Education and Social Services Committee

Alaska State House of Representatives

April 27, 1983

Steve Dobson, O.D.

Gentlemen of the Committee, my name is Steve Dobson. I am an optometrist in private practice in Anchorage. I am a 1980 graduate of the Southern California College of Optometry, and in 1981 completed a one year residency in rehabilitative optometry at an outpatient clinic of the Veterans Administration hospital in Los Angeles.

My testimony will focus on optometric education, for the most frequent charge raised by ophthalmologists in opposing this type of legislation is that optometrists do not have a physician's broad medical background, which they say is necessary in order to do competant diagnosis and treatment.

It so happens, like many propaganda arguments, that this one has a grain of truth in it. What may appear to be a local inflammation can actually be a manifestation of infection or dysfunction elsewhere in the body. Experience in administering a variety of drugs in a variety of modes makes it easier to learn new drugs and new treatment protocols.

However if the argument is carried too far, it begins to break down. One can say that it is useful to be trained as a general physician before treating specific parts of the body. But is it absolutely necessary? Ophthalmologists, who are trained on the physician-specialist model, would say that a physician's background is necessary even to be able to judge when to treat a case and when to refer it for more specialized care. However it takes no special expertize to realize that if that were the case, then dentists and podiatrists, who are not trained as physicians, would be incompetant or only marginally competant.

Let's take a closer look at the alternative model of education, on which dentists, podiatrists and optometrists are trained. For convenience, I will consider just dentistry and optometry, but podiatry follows similar principles. Dentists and optometrists have at least as many hours of training in anatomy as physicians. But that training is structured differently. Their studies in gross human anatomy give somewhat less emphasis to the body below the neck but more emphasis in the head and neck region, as compared with medical students. This is followed by intensive study of organ systems of special interest - the teeth and oral cavity for dentists, the eye and adnexa for optometrists. This is a level of detail that physicians do not encounter until they enter specialty residencies. Other courses, such as general

physiology, microbiology and general pathology, are also slightly less detailed than those given medical students. But again, when corresponding studies in the target organ systems are added in, the hours exceed those of the medical student. If we take the process one step further and add the hours of the medical student and the resident together, the total hours in any given subjedt would now be greater than those for the dentist and optometrist. For optometry and dental students, classroom and laboratory time in these subjects, called basic science, totals about a thousand hours, or 25% of the total clock hours in the curriculum. The remainder is given over to specialized theory and procedures courses, and experience in the clinic.

At this point, let me interject that in case it should be supposed or alleged that optometric courses are not of the same quality as dental courses, I would point out that where optometry and dental schools are co-located, as at the University of Alabama in Birmingham and the University of Houston, optometry and dental students not only take the same courses but sit together in the same classrooms and laboratories whenever there is enough commonality in content to make this practical. For example, general physiology and microbiology in the case of Birmingham. In both optometry and dental schools, physicians are used in their areas of greatest expertise, primarily pathology and therapeutics. Pharmacology is taught by pharmacologists and physiology is taught

by physiologists.

Courses in the whole body emphasize unifying principles, which serve as a foundation for understanding all regions. At the stage of target organ study, specific interrelationships between target organ pathology and systemic pathology are learned. It is also at this stage that the student learns what effects a drug may have on other organs of the body.

Without putting too fine a point on it, it is hopefully evident from this that someone who will be working with a portion of the body and dealing with a specific set of interrelationships between this portion and the rest of the body does not have to have the same kind of whole body training as someone who will be treating many different parts of the body. The specializing physician model of education is a good one, but is it enough better than the dental model to justify the increased costs?

With respect to drugs, however, optometry has differed from dentistry until recent years. When the optometry laws were enacted in the first quarter of the century, restrictions against drug use were inserted into nearly every statute as a compromise with the physicians and oculists of the day, who opposed enactment of the optometry laws. In the succeeding years, optometry developed strong capabilities in the detection and diagnosis of ocular

pathology, but its lack of access to prescription drugs effectively limited its therapeutic services to conditions treatable with over the counter drugs, compresses and mechanical procedures. During the same period, ophthalmology developed from a primitive extension of general medicine into a recognized specialty. In the 1970s general and ocular pharmacology were removed from their positions within other courses in the optometric curriculum, and expanded into full fledged, free standing courses. Concurrently, optometrists introduced bills that would allow them to use drugs to aid in diagnosis, on the theory that such limited legislation would be easier to pass. There began a slow, state by state process of passing legislation, against fierce ophthalmological opposition. As of now, 36 states allow some form of drug use by optometrists. In 1976, West Virginia became the first state to enact legislation allowing optometrists to use drugs for both diagnostic and therapeutic purposes. In 1977, North Carolina passed a similar measure and Florida received an attorney general opinion favorable to the use of therapeutics. In 1980, Oklahoma passed enabling legislation. In support of these states, nearby optometry schools strengthened their programs in therapeutics. At present, drug-based therapeutics is taught at an undergraduate and postgraduate level by Pennsylvania College of Optometry in Philadelphia and Southern College of Optometry in Memphis, and by the University of Alabama at Birmingham School of Optometry on a postgraduate basis. Other schools are planning similar programs. Pennsylvania's therapeutics course was taken by a

majority of Alaska's ODs last year. Opportunities for additional clinical experiences in therapeutics developed quickly and dramatically. Federal law in 1976 formally established Optometry Services within the Veterans Administration hospital system. These Optometry Services provide primary eye care therapeutics, usually under the prescription signing arrangement noted by Dr. Demske. A number of the Services have developed 1 year residency programs for optometrists, such as the one I went through. Opportunities are also available for ODs and undergraduate optometry students to study at these hospitals for shorter periods of time. In Atlanta, there is a three year old optometric clinic that does nothing but treat ocular pathology on referral from physicians and optometrists in the area. Students from four optometry schools do semester rotations there, and similar centers are being planned in other cities. There is thus developing a spectrum of training opportunities, both basic and advanced, for optometrists in therapeutics.

It appears that at long last the quirks of the original optometry laws are being removed and optometry will be allowed to undergo a more natural evolution. Optometry will continue to compete with ophthalmology, as podiatry competes with orthopedic surgery, though in the case of optometry, surgical training is not on the horizon. While the medical branches may not like it, such competition is good for the public. Optometry, like podiatry, can now offer quality, cost effective services in areas where specialists are overtrained

and general practitioners are undertrained. Dentistry has no competition from medicine, but its training is also based on the more cost effective model.

One more thing needs to be said. Ophthalmologists have criticized other aspects of optometric education, saying that there are too few MDs teaching in optometry schools and that clinical experiences are not adequate. In point of fact, ophthalmologists have actively tried to hinder the education of optometrists. There is a great deal of peer pressure on ophthalmologists, and through them, on their colleagues in other branches, not to teach in optometry schools. In 1955, the American Medical Association, at the request of the Section on Ophthalmology, adopted a resolution declaring it unethical for a doctor of medicine to teach in a school or college of optometry. Such resolutions have more than nominal influence upon physicians, for unethical behavior can serve as the basis for denial of hospital privileges by individual hospital medical staffs. Some physicians ignored the directive and continued to teach, and schools filled in the gaps by using osteopaths, who were not affected. The resolution was rescinded 11 years later, in 1966.

Ophthalmology has also opposed virtually every piece of legislation that would facilitate the professional development

of optometry, including funds for construction of optometry school buildings and clinics, Health Professions Student Loans, and capitation grants. Fortunately, most Congressmen and legislators saw the value of optometry to society, and the efforts of ophthalmology to block funding were largely unsuccessful. From 1964 to 1980, ophthalmologists were able to prevent reimbursement to optometric patients for services covered under Medicare. As a result, optometry lost 30% of its patient population over age 65. It also deprived optometry school clinics of a prime source of pathology for teaching purposes. It is not fair to criticize something when you are actively trying to bring about that which you criticize.

In conclusion, I would ask that you allow optometry in Alaska to take full advantage of the educational opportunities that are unfolding, so as to maximally benefit the public which it serves. Overly restrictive compromises will simply result in further legislative battles down the road. The bill in its present form conforms to the framework for decision making that has stood the test of time in other professions. It makes no legislative sense to take a responsible profession out of one box and place it in a slightly larger box. Given the opportunity, optometry will exercize the same good judgment as the other professions. And the public will be the beneficiary.

SUBJECT: Optometry
(HB 225)

TO: Representative Milo Fritz
Co-Chairman, House Health, Education
and Social Services Committee

Representative Mae Tischer
Co-Chairman, House Health, Education
and Social Services Committee

FROM: Russ Josephson
Legislative Counsel

I would like to bring to your attention Sec. 6 of HB 225, as introduced. In this section, AS 08.64.360 is amended by adding the words "an optometrist" to those excepted from practicing medicine without an appropriate license. It is my feeling that the amendment of AS 08.64.360 in Sec. 6 would provide us with a "cleaner" statute if it read, "Except as provided under AS 08.64.170" rather than as it is amended in Sec. 6 of HB 225. You will note that in Sec. 1 of the bill we have excepted those practicing optometry by amending AS 08.64.170(a). Therefore, I would recommend that Sec. 6 of the introduced bill be amended.

If you have any questions about this matter, please do not hesitate to call.

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
HOUSE BILL NO. 225

MAR 0 1983

"An Act relating to the practice of optometry and authorizing the use of prescription drugs by optometrists."

This Bill would permit the use of legend drugs by certain optometrists and would delete from the definition of optometry the restriction against the use of drugs. Legend drugs as defined in Section 5 of the Bill "means drugs whose containers must bear a label prohibiting dispensing without a prescription". The Bill also specifically permits optometrists to engage in the "diagnosis and treatment, including the use of drugs, of inflammations, infections and injuries of the eyes and eyelids".

A majority of states now allow optometrists to use diagnostic topical drugs, either through specific enabling legislation or through the lack of specific prohibitions. Few, if any, permit the use of therapeutic drugs. This Bill, as now written, would apparently permit the use of any drug, whether topical or systemic, in the diagnosis and treatment by an optometrist of inflammations, infections and injuries of the eyes and eyelids. Arguably, the proposed legislation may be construed to permit the practice of opthalmologic surgery by optometrists since surgery is not specifically prohibited.

Even the use of diagnostic topical drugs by optometrists, i.e., drugs which cause the pupil to open or to close down or which paralyze the muscles which control the shape of the lens, has been controversial. Those in favor of the use of drugs by optometrists argue that optometric services are more widely distributed than ophthalmologic services and that the optometrist serves as an entry point for primary eye care. The use of diagnostic drugs is said to expand the ability of the optometrist to recognize eye abnormalities and to increase medical referral for diagnosis and treatment. The optometric group also states that the use of diagnostic drugs rarely causes adverse effects.

Those opposing such legislation argue that the use of drugs would not materially improve the capacity of optometrists to recognize abnormalities. Optometrists are not expected to diagnose diseases of the eye and, if a departure from normal is noted, the patient is expected to be referred to a physician for diagnosis. The concern on the part of the medical community is that the optometrists would be making diagnostic judgements which the physicians do not believe them qualified to make. Moreover, the medical community notes that adverse reactions, while admittedly rare for certain of the diagnostic drugs, can have extremely serious consequences when they do occur. A higher rate of predisposition to a certain type of glaucoma in Alaska Natives is cited. Use of mydriatic drugs could possibly precipitate an attack. The potential use of therapeutic drugs can be expected to raise even greater concern.

Limitations are placed on the use of certain diagnostic drugs by legislation in some states. In Oregon, for example, the Board of Optometry is empowered to designate the diagnostic pharmaceutical agents for topical use, but provides that the designation shall be with the advice and guidance of the Board of Medical Examiners.

POSITION PAPER/Department of Health and Social Services

Some states define the type of training in pharmacology which would be required before an optometrist would be permitted to use even diagnostic drugs. HB 225 contains no such provisions.

The Department of Health and Social Services does not support HB 225 in its present form because of the overly broad definition of the types of drugs which would be authorized, vagueness with regard to the limits of optometric practice and lack of provisions with regard to the educational qualifications required for use of drugs. If the Legislature chooses to authorize use of certain drugs by optometrists, the Department suggests that definitions and restrictions similar to those in use in other states may be advisable and that the professional opinion of the medical and optometric communities should be sought to insure the health and safety of the general public.

Nevada	May 25, 1979
Iowa	June 8, 1979
Georgia	February 14, 1980
Arizona	April 25, 1980
Idaho	March 23, 1981
Oklahoma	April 6, 1981
Washington	April 23, 1981
Missouri	July 24, 1981
Minnesota	March 8, 1982
Mississippi	March 17, 1982
Virginia	February 25, 1983

*both diagnostic and therapeutic use

NOTE: None of these laws has ever been repealed. However, a July 30, 1982 opinion of the Texas state attorney general has rendered that state's unusual provision (an amendment to the medical practice act), which was enacted on August 5, 1981, inoperative.

SOURCE: Dennis Swarner O.D & Robert O'Connell, O.D.

GENERAL LEGISLATION: 4 states

There are four states which authorize the use of pharmaceutical agents by optometrists by extant general law or favorable attorney general opinion:

Alabama	(diagnostic use)
Florida	(diagnostic and therapeutic use)
Indiana	(diagnostic use)
New Jersey	(diagnostic use)

NOTE: In addition, in Michigan, while there is no statutory prohibition of the use of pharmaceutical agents by optometrists, there is a negative opinion of the state attorney general.

For your information we are including an updated map showing, geographically, the utilization of pharmaceutical agents by optometrists.

Note: Section 39, chapter 842, Oregon Laws 1977, is operative July 1, 1986, and provides:

Sec. 39. ORS 683.010, 683.020, 683.030, 683.035, 683.040, 683.050, 683.060, 683.070, 683.080, 683.100, 683.110, 683.120, 683.130, 683.140, 683.155, 683.170, 683.180, 683.190, 683.210, 683.250, 683.260, 683.270, 683.275, 683.280, 683.290 and 683.990 relating to optometrists are repealed.

GENERAL PROVISIONS

683.010 Definitions. As used in this chapter, unless the context requires otherwise:

(1) "Board" means the Oregon Board of Optometry.

(2) "Practice of optometry" means the employment of any means other than the use of drugs, except diagnostic agents, topically applied, known generically as cycloplegics, mydriatics, topical anesthetics, dyes such as fluorescein, and, for emergency use only, miotics, for the measurement or assistance of the powers or range of human vision or the determination of the accommodative and refractive states of the human eye or the scope of its functions in general or the adaptation of lenses or frames for the aid thereof, subject to the limitations of ORS 683.040.

(3) "Trial frames" or "test lenses" means any frame or lens used in testing the eye which is not sold and not for sale. [Amended by 1971 c.102 §1; 1975 c.175 §1]

683.020 Certificate of registration required to practice optometry. No person shall engage in the practice of optometry or display a sign or in any other way advertise or hold himself out as an optometrist without having first obtained a certificate of registration from the board as provided for in this chapter. In any prosecution for the violation of this section, the use of test cards, test lenses or of trial frames is prima facie evidence of the practice of optometry. [Amended by 1971 c.102 §2]

683.030 Persons and practices not affected. This chapter shall not be construed to prevent any person duly licensed to practice medicine and surgery from treating or fitting glasses to the human eye, nor to prohibit the sale of complete ready-to-wear eye glasses as merchandise from a permanent place of business in good faith and not in evasion of this chapter by any person not holding himself out as competent to examine and prescribe for the human eye.

683.035 Discrimination against optometrists prohibited. No official, board, commission or other agency of the state or of any of its political subdivisions or municipalities shall discriminate between duly licensed optometrists and any other person authorized by law to render professional services which a duly licensed optometrist may render, when such services are required. Such services shall be paid for in the same manner and under the same standards as similar professional services. [1963 c.121 §1]

LICENSING

683.040 Qualifications of applicants. (1) Every person desiring to commence the practice of optometry in this state must show by satisfactory evidence that he is of good moral character and has graduated from a school of optometry which is recognized and approved by the board and which maintains a standard of four school years of at least nine months each.

(2) Every person desiring to commence the practice of optometry after January 1, 1976, or employ the use of diagnostic agents shall in addition to the requirements of subsection (1) of this section have satisfactorily completed a course in pharmacology, as it applies to optometry, by an institution accredited by a regional or professional accreditation organization which is recognized or approved by the National Commission on Accrediting or the United States Commissioner of Education, with particular emphasis on the topical application of diagnostic agents to the eye for the purpose of examination of the human eye and the analysis of ocular functions, approved by the Oregon Board of Optometry. [Amended by 1971 c.102 §3; 1975 c.175 §2]

683.050 Persons licensed in another state. In lieu of the educational requirements of ORS 683.040, it shall be deemed equivalent if an applicant submits satisfactory proof to the board that he:

(1) Has passed an examination in optometry before a state board of examiners in another state of the United States and that the certificate granted in token thereof is then in force; and

(2) Was actually engaged in the practice of optometry in such state for the full period of three years subsequent thereto.

POSITION PAPER/Department of Health and Social Services

Rep Tischer

POSITION PAPER

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 225 (HESS)

JAN 14 1983

"An Act relating to the practice of optometry and authorizing the use of certain drug by optometrists."

The Committee Substitute makes several changes to existing statute and to the original bill: (a) membership in the Board of Examiners in Optometry is expanded to six to include a physician licensed in the state; (b) duties of the board are broadened to include development, with the advice and guidance of the state medical board, of a list of prescription and non-prescription drugsand dosages which may be used in the practice of optometry in the state and requirements for continuing education of optometrists desiring to use drugs; (c) registration or licensure of an optometrist to practice beyond the scope of the individual's training is prohibited; and (d) language is added to require an optometrist to clarify the nature of his or her practice when using the prefix "Dr." or "Doctor".

The Department recommends that the board size remain an odd number by reducing the number of optometrist members to three while retaining the public member and the physician member.

There is a minor difference in the language of the original and committee substitute bills with regard to the types of drugs which would be permitted. The original version uses the adjective "legend" while the substitute refers to "legend", "prescription" and "non-prescription" drugs. It is assumed that "non-prescription" refers to commonly available over-the-counter preparations.

Both versions include in the definition of optometry the "diagnosis and treatment, including the use of drugs, of inflammations, infections, and injuries of the eyes and eyelids". This provision remains the most controversial element of the Bill although the provision for approval of the types of drugs by the optometric board with the advice and guidance of the medical board may reassure, to some extent, those concerned with the apparently unrestricted access to drugs permitted in the original version.

While the committee substitute is an improvement over the original version of the bill, the Department still considers the definition of optometry to be too broad, e.g., it would not prohibit the use of surgery nor the use of systemic drugs. **At a minimum the inclusion of surgery within optometric practice should be prohibited and drug use should be limited to topical diagnostic preparations and anesthetics approved by the optometric board with the advice and guidance of the medical board.**

practice - by statute would not the bill, which optometrists would be legal to perform surgery.

POSITION PAPER/Department of Health and Social Services

While the vast majority of health care practitioners are prudent and sincere, the Department does not believe that individual practitioners should be left entirely free to define the scope of their practices. The Department does not believe a user of health services should have to rely solely on the professioal integrity of the provider for assurance of quality of care. This is one of the functions of the licensing statutes of the state.

The Department is opposed to the use of therapeutic drugs by optometrists. The possibilities of problems because of systemic effects, idiosyncratic or allergic reactions and drug interactions, while not common, require diagnostic and therapeutic responses which cannot be guaranteed though training courses in pharmacology.

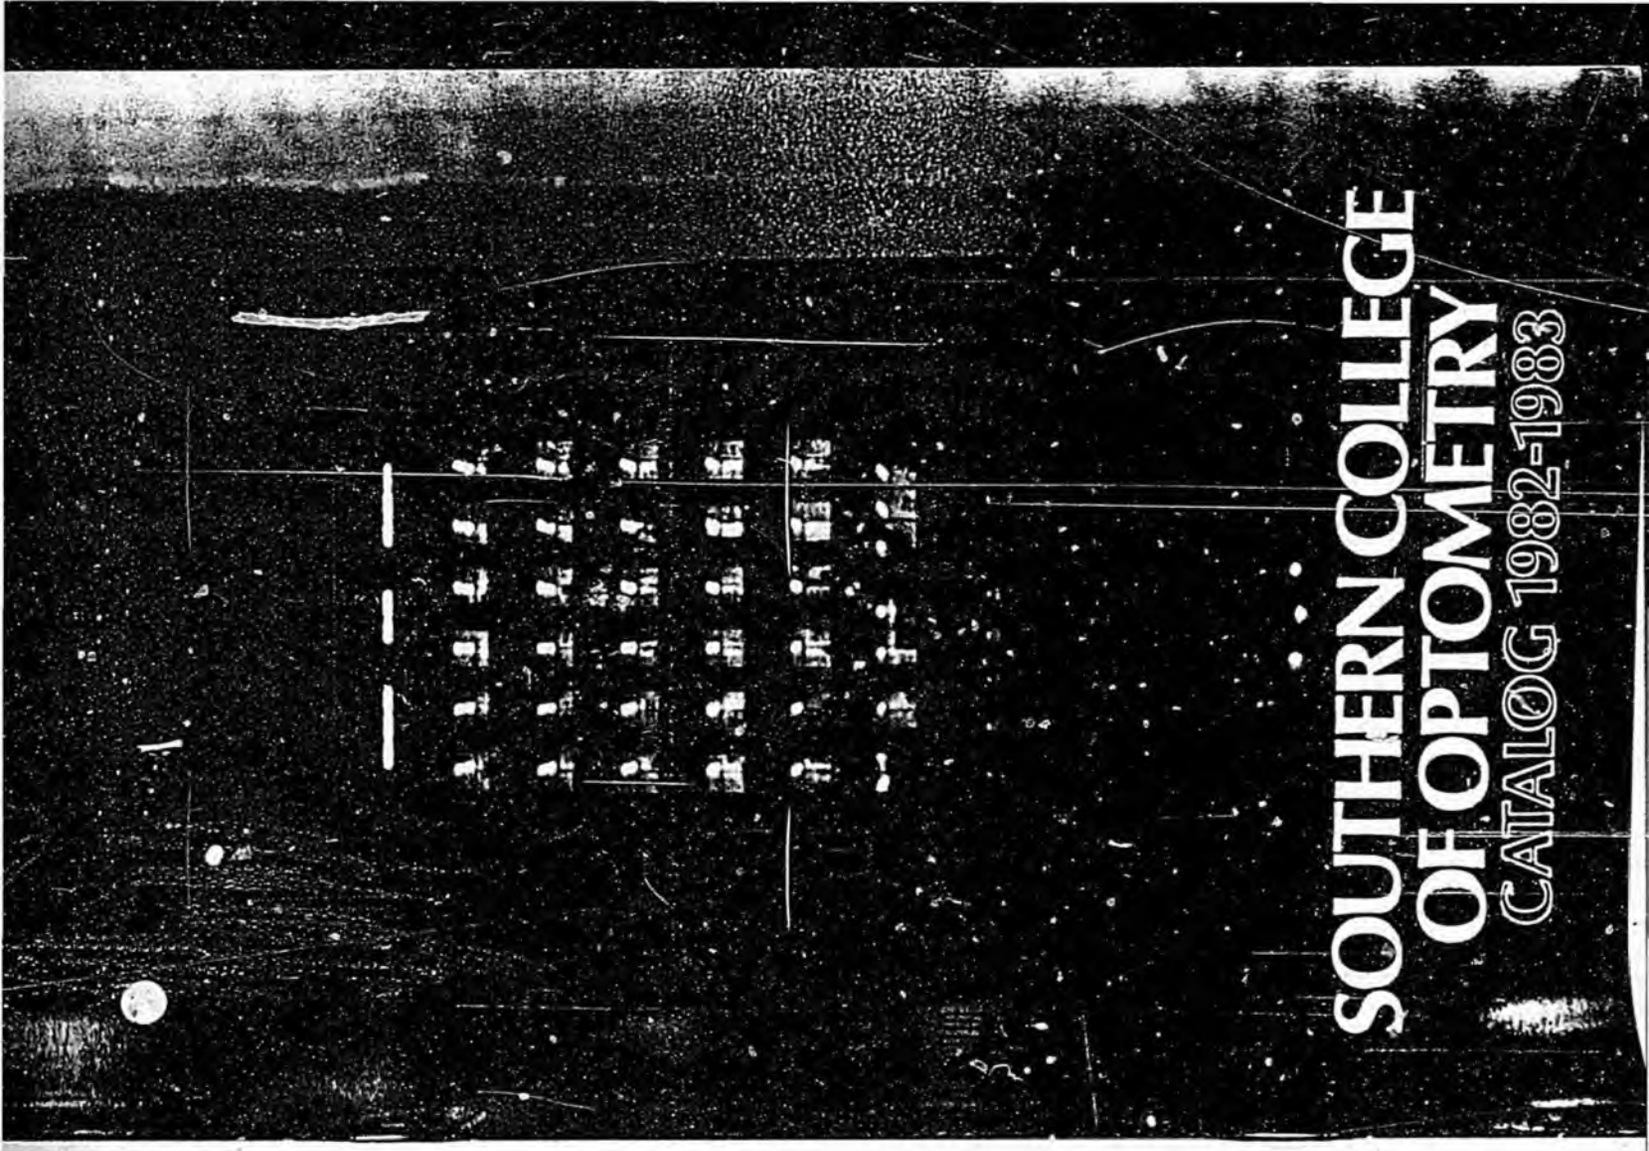
STAFF REPORT

HB 225, Relating to Prescription of
Drugs by Optometrists
April 25, 1983
Dave Palmer

HB 225 authorizes optometrists to use and prescribe legend drugs in diagnosis and treatment of conditions of the eyes and eyelids. It also requires the Board of Examiners in Optometry to provide for continuing education.



The bill authorizes the optometrist to use legend drugs for both diagnostic and treatment purposes. A majority of states authorize the use of legend drugs for diagnosis, but not for treatment. (See Oregon law attached).

The arguments in favor and in opposition of the bill are presented well in Dr. Rabeau's position paper. In a rural setting, particularly in Alaska where referrals to other professionals are difficult, the authorization to allow optometrists to expand their capabilities may carry more credence than in more populated states.

One method, proposed this session in Oregon, is to allow the use of drugs for treatment purposes by optometrists after they have received an endorsement by the Board of Examiners of Optometry and they are authorized to prescribe or use drugs or treatments that are approved jointly by the Board of Examiners in Optometry and by the Board of Medical Examiners.

The fiscal note from Commerce and Economic Development is $38,300 for FY 84.

The fiscal note from Department of Health and Social Services is zero.

West Virginia Optometry Law

30-8-1. EVIDENCE OF QUALIFICATION TO PRACTICE AND REGISTRATION REQUIRED.—Any person practicing or offering to practice optometry in this State shall be required to submit evidence that he is qualified so to practice, and shall be registered as hereinafter provided, and it shall be unlawful for any person to practice or offer to practice optometry in this State, except under the provisions of this article.

30-8-2. PRACTICE OF OPTOMETRY DEFINED.—Any one or any combination of the following practices shall constitute the practice of optometry:

(a) The examination of the human eye, with or without the use of drugs, prescribable for the human eye, which drugs may be used for diagnostic or therapeutic purposes for topical application to the anterior segment of the human eye only, and, by any method other than surgery, to diagnose, to treat or to refer for consultation or treatment any abnormal condition of the human eye or its appendages;

(b) The employment without the use of surgery of any instrument, device, method or diagnostic or therapeutic drug for topical application to the anterior segment of the human eye intended for the purpose of investigating, examining, treating, diagnosing, improving or correcting any visual defect or abnormal condition of the human eye or its appendages;

(c) The prescribing and application or the replacement or duplication of lenses, prisms, contact lenses, orthoptics, vision training, vision rehabilitation, diagnostic or therapeutic drugs for topical application to the anterior segment of the human eye, or the furnishing or providing of any prosthetic device, or any other method other than surgery necessary to correct or relieve any defects or abnormal conditions of the human eye or its appendages.

Nothing in this section shall be construed to permit an optometrist to perform surgery, use drugs by injection or to use or prescribe any drug for other than the specific purposes authorized by this section.

30-8-3. BOARD OF OPTOMETRY, DUTIES.

30-8-3a. REGISTRATION OF OPTOMETRIC CORPORATIONS.

30-8-3b. PRACTICE OF OPTOMETRY BY OPTOMETRIC CORPORATIONS.

30-8-4. REGISTRATION PREREQUISITE TO PRACTICE OF OPTOMETRY; EXCEPTIONS.—No person shall practice or offer to practice optometry in this State without first applying for and obtaining a certificate of registration for such purpose from the West Virginia Board of Optometry; but the following persons, firms and corporations are exempt from the operation of this article, except as hereinafter provided:

(a) Persons who have heretofore been registered as optometrists in this State, or who were engaged in the practice of optometry in this State before the passage of any law by this State regulating such practice, and who have heretofore received from the Board of examiners certificates of exemption from examination;

(b) Persons authorized under the laws of this State to practice medicine and surgery or osteopathy;

(c) Persons, firms and corporations who sell eye glasses or spectacles in a store, shop or other permanently established place of business on prescriptions from persons authorized under the laws of this State to practice either optometry or medicine and surgery;

(d) Persons, firms and corporations who manufacture or deal in eye glasses or spectacles in a store, shop or other permanently established place of business, and who neither practice nor attempt to practice optometry.

30-8-5. QUALIFICATIONS OF APPLICANT FOR REGISTRATION, EXAMINATION.—An applicant for registration shall present satisfactory evidence that he is at least eighteen years of age, of good moral character and temperate habits, and has graduated from a high school or secondary school, or has completed an equivalent course of study approved by the West Virginia board of optometry, has satisfactorily completed all preoptometry or premedical college requirements and has graduated from a school or college of optometry approved by said board. No school or college of optometry shall be approved by the West Virginia board of optometry unless at first it has been accredited by a regional or professional accreditation organization which is recognized by the national commission on accreditation or the United States commission of education. Each applicant shall submit to and be examined in all phases of optometry as is provided by the school or college of optometry and shall include, but not be limited to, anatomy and physiology of the human eye, the use of instruments such as the ophthalmoscope, retinoscope, tonometer, slit lamp biomicroscope, the general laws of optics and refraction, general and ocular pharmacology, general and ocular pathology and other such subjects or instrumentation as the board of optometry may deem necessary.

The West Virginia board of optometry shall be responsible to determine the educational training received by the applicant from the schools and colleges of optometry, the educational qualifications of each applicant and the administering of the examination and certifications of each applicant commensurate with his education. No optometrist shall be registered or certified to practice optometry in the state of West Virginia in any area that is beyond the scope of his educational training as determined by the West Virginia board of optometry: Provided, That any optometrist presently registered in the state of West Virginia and who desires to employ the use of pharmaceutical agents must submit to the West Virginia board of optometry evidence of satisfactory completion of all necessary educational requirements as made mandatory by the West Virginia board of optometry: Provided further, That the West Virginia board of optometry shall provide for continuing educational requirements to be completed from time to time by all optometrists desiring to employ the use of pharmaceutical agents.

30-8-6. CERTIFICATE OF REGISTRATION OR EXEMPTION SHALL BE DISPLAYED; BILL OF PURCHASE. Every person practicing optometry shall display his certificate of registration or exemption in a conspicuous place in the principal office wherein he practices optometry, and, whenever required, shall exhibit such certificate to the board of examiners or its authorized representatives. And whenever practicing the profession of optometry outside of or away from said office or place of business, he shall deliver to each customer or person so fitted with glasses a bill of purchase which shall contain his signature, home post-office address, and the number of his certificate of registration or exemption, together with a specification of the lenses furnished.

30-8-7. ANNUAL RENEWAL OF REGISTRATION; RESTORATION OF EXPIRED CERTIFICATE. Every registered optometrist who desires to continue in active practice or service shall, annually, on or before the first day of August, of each year, renew his certificate of registration, and pay an annual renewal fee of twenty dollars. Every certificate of registration which has not been renewed during the month of August in any one year shall expire on the first day of September of that year. A registered optometrist whose certificate of registration has expired may have the same restored only upon payment of the required renewal fee. Any registered optometrist who retires from the practice of optometry for more than five years may renew his certificate of registration upon payment of all lapsed renewal fees.

30-8-8. REFUSAL TO ISSUE, SUSPENSION OR REVOCATION OF CERTIFICATE; FALSE AND DECEPTIVE ADVERTISING. The Board may either refuse to issue, or may refuse to renew, or may suspend or revoke any certificate of registration for any one, or any combination, of the following causes: Violation of a rule or regulation governing the ethical practice of optometry promulgated by the Board under the authority granted by this article; conviction of a felony, as shown by a certified copy of the record of the court wherein such conviction was had; the obtaining of, or the attempt to obtain, a certificate of registration, or practice in the profession of optometry, for money, or any other thing of value, by fraudulent misrepresentation; gross malpractice; continued practice by a person knowingly having an infectious disease; habitual drunkenness, or addiction to the use of morphine, cocaine, or other habit-forming drugs; advertising, practicing, or attempting to practice under a name other than one's own; advertising by means of knowingly false or deceptive statements. All advertising, whether by means of newspapers, or in any manner, whatsoever, of the following statements, or statements of similar import, that are "false and deceptive" within the meaning of this law, shall be prohibited. False and deceptive advertising shall include but not be limited to the following: (a) Advertising of complete glasses, that is to say, lenses and frames or mountings, at a stated price, either alone or in conjunction with professional services; (b) advertising "free examination of eyes", or "free consultation", or "free advice", or words of similar import and meaning; (c) advertising frames or mountings for glasses, by advertisement which does not accurately describe the same in all its component parts (all such advertisements shall state clearly, in type equal in size to the price figures given, that such price does not include cost of lenses, or professional services in examining of eyes), and, (d) advertising a particular sum or sums of money required as a "down" or cash payment, or any definite amount or amounts of future payments, or when the same shall be paid.

30-8-9. OFFENSES; PENALTIES; JURISDICTION OF JUSTICES. Each of the following shall constitute a misdemeanor punishable, upon conviction, for the first offense, by a fine of not less than one hundred nor more than two hundred dollars, and, upon conviction for a second or subsequent offense, by a fine not less than two hundred nor more than five hundred dollars, or by imprisonment for not less than thirty nor more than ninety days, or by both such fine and imprisonment, at the discretion of the court. The practice of, or an attempt to practice optometry, without a certificate of registration as a registered optometrist, except as hereinbefore provided; permitting any person in one's employ, supervision or control, to practice optometry, unless such a person has a certificate of registration as a registered optometrist when such certificate is required by this article; the obtaining of, or an attempt to obtain, a certificate of registration, or practice in the profession, or money, or anything of value, by fraudulent misrepresentation; the making of any willfully false oath or affirmation, whenever an oath or affirmation is required by this article; the violation of the provisions of section six of this article.

Justices of the peace shall have concurrent jurisdiction with circuit and criminal courts for the enforcement of this article.

30-8-10. UNLAWFUL PRACTICE OF OPTOMETRY; PENALTIES.—Any corporation or voluntary association shall not practice, or assume to practice, or in any manner to hold itself out to the public as being entitled to practice the profession of optometry, or advertise the title of optometrist in such a manner as to convey the impression to the public that it is entitled to practice optometry, or furnish optometric advice and services, or advertise that, either alone or together with or by or through any person, whether a duly registered and licensed optometrist or not, it has, owns, conducts or maintains an office or place for practice of optometry. Any duly registered and licensed optometrist shall not associate himself with any corporation or voluntary association for the practice of optometry, or in any manner practice such profession, on a salary or commission basis, for any such corporation or voluntary association. Any corporation or voluntary association violating any of the provisions of this section, or any officer, trustee, director, agent or employee of such corporation or voluntary association who, either directly or indirectly, engages in any of the acts, shall be guilty of a misdemeanor and upon conviction thereof shall be fined not less than one hundred nor more than one thousand dollars. The fact that any such officer, trustee, director, agent or employee shall be a duly registered and licensed optometrist shall not be held to permit or allow any such corporation or voluntary association to do the acts prohibited herein, nor shall such fact be a defense upon the trial of any of the persons hereinbefore mentioned for a violation of this section. Any duly registered and licensed optometrist who shall violate the provisions of this section shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not less than ten dollars nor more than twenty-five dollars, and each and every day such violation continues shall constitute a separate offense; and in addition to the foregoing penalties, such offending optometrist shall have his license to practice suspended for a period of one year, by the court in which such conviction is had. Provided that this section shall not apply to a partnership of two or more duly registered and licensed optometrists who practice under their own names.

It shall be unlawful for any registered optometrist to practice his profession as an employee, lessee, or sub-lessee of any commercial or mercantile establishment or to practice his profession in connection therewith, or to advertise either in person or through any commercial or merchantile establishment that he is a duly registered practitioner, and is practicing or will practice optometry as an employee, lessee, or sub-lessee of any such commercial or mercantile establishment or in connection therewith. But nothing herein shall be construed to prohibit or prevent the rendering of professional services to the officers and employees of any person, firm or corporation by an optometrist, whether or not the compensation for such services is paid by the officers and employees, or by the employer, or jointly by all or any of them. Any person violating this provision shall be guilty of a misdemeanor, and, upon conviction thereof shall be fined not less than fifty nor more than five hundred dollars, and each and every day such violation continues shall constitute a separate offense.

Wisconsin Optometry Law

Optometry

449.01 (1) Optometry. (a) (1) The practice of optometry is defined as follows: The employment of any means including topical ocular diagnostic pharmaceutical agents under S. 449.17, to determine the visual efficiency of human visual system, including refractive and functional abilities or preliminarily diagnose the presence of ocular disease or ocular manifestations of systematic disease and other departures from normal.

(2) The diagnosis and treatment of the refractive and functional ability of the visual system and enhancement of visual performance by prescribing, furnishing, fitting or employing ophthalmic lenses, con-

offered by *Pacific University*
Diane P. Yolton, Ph.D.
Jimmy Bartlett, O.D.
Roland Manthei, Ph.D.
March 27-28-29 UAA
April 24-25-26 UAA

PATHOPHYSIOLOGY AND PHARMACOLOGY: principles of pharmacology, clinical application of ocular pharmacology and ocular toxicology. Pathophysiology of ocular allergy, infection and inflammation. Pharmacologic considerations in ocular steriod therapy, and in glaucoma therapy.

offered by *Pennsylvania College*
Philip Gerbino, Pharm.D.
Mack Lipken, Jr., M.D.
May 1-2 UAA

APPLIED PHARMACOLOGY: administration of drugs, Rx writing, patient management.
SYSTEMIC DISEASE: systemic disease related to ocular disease. Allergic-immunology; cardiovascular-cerebrovascular; endocrine; hematological; infectious and inflammatory; metabolic-chromosomal; musculoskeletal; mucocutaneous-dermatological; neurological nutritional-gastrointestinal

offered by *Pennsylvania College*
Louis Catania, O.D.
Linda Casser, O.D.
May 22-23-24 UAA

ANTERIOR SEGMENT DISEASE: corneal dystrophies, degenerations, infections, inflammations, irritations, injuries. Differential diagnosis, systemic considerations, treatment/management of anterior uveitis. Eyelid/adnexa disorders. Disorders of the lacrimal system, conjunctiva, sclera, and episclera.

offered by *Pacific University*
Tom Lewis, O.D., Ph.D.
Ronald Reed, M.D.
....and clinical staff
June 11-12-13 UAA and clinics

GLAUCOMA: anatomy-pathophysiology review. Epidemiology-risk factors. Examination, differential diagnosis, clinical classification. Medical management, surgical considerations. Concepts and controversies in glaucoma care. Methods of examination and clinical procedures.

offered by *Pennsylvania College*
Theodore Buckner, M.D.
....and clinical staff
September 10-11-12 clinics

ANTERIOR SEGMENT DISEASE CLINIC: examination protocols, techniques in dilitation and irrigation, gland expressing, epilation, cyst drainage, scrapings, cultures, cytology. Foreign body removal. Management of lacerations and corneal abrasions. Techniques for diagnosing systemic disease; exophthalmometry, ophthalmodynamometry. Clinical procedures

REGISTRATION FORM

Advance registration of $100 is required and due by February 24, 1982. Please complete the form below and return with payment to: Alaska Optometric Association, 3401 Denali Street, Suite 204, Anchorage, Alaska 99503

Tuition: $1,550

Payments and Due Dates

$100	February 24, 1982
400	March 17, 1982
400	April 17, 1982
400	May 17, 1982
250	September 1, 1982

NAME _____

ADDRESS _____

City _____ State/Zip _____

I will need the following required textbooks:

_____ Goodman and Gilman, The Pharmacological Basis of Therapeutics $45.00

_____ Fraunfelder & Roy, Current Ocular Therapy $43.00

_____ Deborah Pavon-Langston, Manual of Ocular Diagnosis & Therapy $15.00

FACULTY

Jimmy Bartlett, O.D.
Associate Professor, Director of Continuing Education University of Alabama in Birmingham School of Optometry/ The Medical Center

Theodore Buckner, M.D.
Board Certified Ophthalmologist, Wills Eye Hospital, Philadelphia, Attending Surgeon, Shore Memorial Hospital, Somers Point, New Jersey

Linda C. Casser, O.D.
Assistant Professor, Pennsylvania College of Optometry, Chief, Primary Care Module No. 4, The Eye Institute, Pennsylvania College of Optometry, Philadelphia

Louis J. Catania, O.D.
Director, Center for Continuing and Post-Graduate Education Pennsylvania College of Optometry, Philadelphia; Past Director, Primary Care Optometry Residency Program of the Joseph C. Wilson Health Care Center Medical Group, Rochester, New York

Philip Gerbino, Pharm.D.
Associate Professor of Clinical Pharmacy, Philadelphia College of Pharmacy and Science; Former Director of Drug Information Center of Cornell University

Thomas L. Lewis, O.D., Ph.D.
Doctorate in Anatomy, Jefferson Medical College; Dean of Academic Affairs and Associate Professor, Pennsylvania College of Optometry

Mack Lipkin, Jr., M.D., F.A.C.P.
Graduate of Harvard Medical School; Board Certified in Internal Medicine; Assistant Professor of Medicine, University of Rochester School of Medicine, Rochester, New York

Roland W. Manthei, Ph.D.
Doctorate in Pharmacology, University of Chicago; Professor of Pharmacology, Jefferson Medical College, Philadelphia

Ronald R. Reed, M.D.
Board Certified from Wills Eye Hospital; Adjunct Assistant Clinical Professor, University of Rochester, School of Medicine Strang Memorial Hospital, Department of Ophthalmology

Diane Yolton, Ph.D.
Assistant Professor of Anatomy and Pathology, Pacific University College of Optometry.

Clinical Faculty will include experienced clinicians including optometrists and ophthalmologists from various universities and V.A. medical centers in the United States.

Sponsored by Alaska Optometric Association

in cooperation with....

notion and has emphasized to trainees that the hospital does not endorse them as being competent to engage in family practice. However, since state laws permit an M.D. licensee to do any type of practice he wishes, it is the feeling of the director that the public would be better served by potential family practitioners having some rather than no additional training. Since there are a number of physicians seeking some training to change their specialty, consideration should be given to longer hospital training periods or a return to specially designed preceptorships to accommodate them.

With respect to those family doctors in retraining, the program would be improved by a more specific set of goals and more careful monitoring of achievements than has as yet been accomplished. The author is aware of two other programs offering similar training. At Creighton University School of Medicine rural family doctors are trained in a specific area, for example, cardiology techniques such as Swan-Ganz catheter insertion. At the Medical College of Pennsylvania inactive physicians or physicians in administrative positions are being trained in primary care.

Conclusions

A pilot miniresidency in family practice has been in operation at Santa Monica Hospital Medical Center since 1979. Many of the applicants were practicing in other specialties and seeking to make a change to family practice. It is unrealistic to expect that the available two- to six-week period can accomplish this objective, and there is a need for a different kind of program to accommodate such circumstances. Training goals for family doctor residency refresher training must be more specific and evaluations more formal than is now the case in the Santa Monica experience.

Ophthalmology Teaching in Medical Schools

Robert E. Kalina, M.D., Henry J. L. Van Dyk, M.D., and George W. Weinstein, M.D.

The Association of University Professors of Ophthalmology (AUPO) was founded in 1965 and is made up of the chairmen of all departments or divisions of ophthalmology in U.S. medical schools (1). A major interest of the body, individually and collectively, is medical student education.

Some members of the AUPO believe that recent medical school graduates are less well prepared in ophthalmology than those of the more distant past. Also reduced familiarity with ophthalmology by physicians in future generations has been cited as a potential problem in the legislative and legal arenas (2).

The results of two AUPO surveys of ophthalmology teaching are reported here.

Survey Techniques

Questionnaires were mailed in 1974 and again in 1979 to the members of the AUPO. Each member was asked to complete the form or to forward it to the individual in his unit most responsible for medical student education. Confidentiality was optional and was elected by some.

The survey document used in 1979 duplicated the questions of 1974 and in addition

This survey was supported in part by a grant to the University of Washington from Research to Prevent Blindness, Inc.

Dr. Kalina is professor and chairman, Department of Ophthalmology, University of Washington School of Medicine, Seattle. Dr. Van Dyk is professor, Department of Ophthalmology, Louisiana State University School of Medicine, New Orleans. Dr. Weinstein is professor and chairman, Department of Ophthalmology, West Virginia University School of Medicine, Morgantown.

inquired about the usage and usefulness of the *Ophthalmology Study Guide for Students and Practitioners of Medicine*, a joint publication of the AUPO and the American Academy of Ophthalmology and Otolaryngology (AAOO) which first appeared in 1976 and now is in its third edition (3). This guide is based upon seven objective areas thought to represent essential knowledge requirements for all physicians. These objectives were developed as a result of a survey of 1,600 respondents representing medicine at undergraduate and graduate levels of general and specialty orientation (4, 5).

Results

Responses were received from 74 of 102 member schools in 1974 (73 percent) and from 81 of 110 schools in 1979 (74 percent) (Figure 1). There was a decline in mean required curriculum hours from 25 in 1974 to 22 in 1979, while the median declined from 18 to 15. Hours actually assigned to the department or division of ophthalmology decreased proportionately from a mean of 22 in 1974 to 20 in 1979. Assigned hours were used most frequently for lectures or demonstrations.

All responding institutions offered medical student electives in ophthalmology in 1979, but only a minority of students chose them (mean 25 percent, median 15 percent). Use of audiovisual self-instruction units rose from 66 percent in 1974 to 82 percent in 1979.

The study guide, not available in 1974, had been adopted as a syllabus by 58 percent of institutions in 1979, while 28 percent used another syllabus, usually prepared locally. In most cases the study guide was purchased by the student and used for self-instruction and as a supplement to lectures. The microfiche illustrations, newly added in the third edition (1978), had been found useful by students in 67 percent of schools using the study guide.

Discussion

The surveys reported here were prompted in part by suspicion among the AUPO members that curriculum time devoted to ophthalmology had suffered during the widespread curriculum revisions which have taken place in U.S. medical schools during recent years.

Although data are not available from the preceding era, the results of the study reported here indicate that currently assigned time for

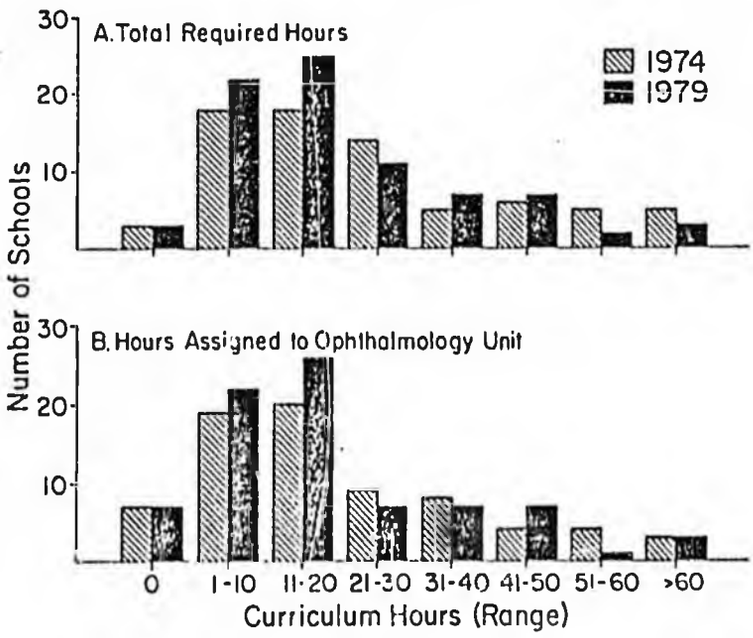

FIGURE 1
Minimum requirements for ophthalmology in U.S. medical schools.

teaching ophthalmology is limited and gradually declining. One logical extension might be a declining ability for appropriate diagnosis, management, or referral of patients with eye disorders, who form a significant segment of those seeking primary care.

The results of these surveys may not include ophthalmology teaching done in the primary care clinical setting. It seems likely that such on-site instruction would be effective and appear relevant to students in that the patient-problem-teacher loop is shortest there; but the authors believe that such teaching events are rare, often unscheduled, and likely to be the first to suffer from time constraints.

Knowledge that curriculum time was limited and that competition for it was keen was one of the prime motivating factors for the development of the AAOO/AUPO study guide. Standardization of objectives to be achieved was presumed then as now to be a laudatory goal. However, the availability of clearly defined objectives has coincided with apparent reduced national curricular emphasis upon ophthalmology.

Not only is the curricular time available to ophthalmology small, but also surprisingly few students (25 percent) choose ophthalmology electives. The reasons for limited elective participation may range from the influence of counselors to lack of available electives. Whatever the cause, the effect must be negative upon student appreciation for what the specialty offers. In view of the excess of candidates for the limited number of ophthalmology residency positions, a main concern is that students who will practice other specialties, especially primary care, learn proper diagnosis and treatment of some ophthalmic disorders so that they may avoid inappropriate referral to medical or nonmedical practitioners.

RE: HB 225, CSHB 225 Versions 1 and 2

COMPARATIVE ANALYSIS

CSHB 225 Version #2	HB 225
Sec. 1 An optometrist with an endorsed license may use and prescribe legend drugs, and may use nonprescription drugs under this chapter.	Sec. 1 An optometrist with an endorsed license may use and prescribe legend drugs.
Includes the following:	
Sec. 2 Adds one person to the of examiners in optometry.	No alteration to present board statutes.
Sec. 3 Stipulates that the added member will be a licensed physician in Alaska; requires that the public member on the board have no direct or indirect interest in the practice of optometry, opticianry or medicine.	Not included.
Sec. 4 Under powers and duties of the board of examiners in optometry: 3) States that the board, with the guidance of the state medical board, shall develop a list of specific prescription, nonprescription, diagnostic and therapeutic drugs and their dosages that may be used by authorized optometrists. 4) Mandates the provision of continuing education for optometrists who want to use drugs.	Not addressed in HB 225.
Sec. 5 With regards to registration: b) Adds that an optometrist may not be certified to practice optometry beyond the scope of his/her training; stated that the board of examiners in optometry is determine an optometrist's qualifications.	No alteration to present statutes.
Sec. 6 Adds another ground for disciplinary action by the board: 10) Using the prefix 'Dr.' or 'Doctor' before the license holder's name without using the word 'optometrist' in connection with the title.	Not addressed.

Comparison continued:

CSHB 225 - Version #2	HB 225
Sec. 7 Regarding the use or prescription of drugs: Subsections a,b,c,d,e refer to 'drugs'.	Sec. 2 Regarding the use or prescription of drugs: Subsections a,b,c,d,e refer to 'legend drugs'.

In addition:

Definitions for 'optometry', 'practicing optometry', and 'legend drugs' are the same in HB 225 and CSHB 225 - Version #2.

Both bills also include Section 08.64.360 regarding penalties for practicing without a license or in violation the applicable statutes.

CSHB 225 - Version #2 and CSHB 225 - Version #1 differ in one respect only, that being that CSHB 225 - Version #1 adds Section 08.72.278 regarding approved drugs. This section names drugs which may be used in addition to the list of drugs to be developed by the board of examiners of optometry and the state medical board.

MEMORANDUM

February 17, 1984

SUBJECT: Optometry
(HB 225)

TO: Representative Mae Tischer
Chairman, House Health, Education,
and Social Services Committee

FROM: Russ Josephson
Legislative Counsel

You have requested a comparison of the introduced version of HB 225 and the committee substitute for your committee dated February 3, 1984. Perhaps it will be easiest to compare the two bills if I begin with a brief sectional analysis of each bill.

HB 225

Section 1 Amends the provision of law governing the practice of medicine by persons other than physicians by adding a new paragraph allowing optometrists to use certain drugs under the provisions of the remainder of the bill.

Section 2 Provides for identification and approval of (1) training programs for the use of drugs and (2) continuing education programs. Also provides for license endorsements certifying completion of required training for drug use, regulations concerning the use or prescription of legend drugs, the loss of license endorsements for violations of those regulations, and the furnishing of the names of holders of license endorsements to the board of pharmacy.

Section 3 Amends the definition of "optometry" reflect the provisions of the bill for the use of drugs.

Section 4 Amends the definition of "practicing optometry" as in Section 3.

Section 5 Adds a definition of "legend drugs".

Section 6 Adds optometrists to those excepted from the provisions of law penalizing the practice of medicine by persons who are not physicians.

CSHB 225 (HESS)

Section 1 Provides an additional ground for the imposition of disciplinary sanctions that the board of examiners in optometry may impose under AS 08.72.240: use, dispensing, or prescription of a drug in violation of the new provision regulating drug use by optometrists (Section 2). In addition, provides a modification of the provision that requires referrals to appropriate health care practitioners.

Section 2 Adds a new section to the statutes, providing for the use of legend drugs, excluding controlled substances and other types of drugs. Lists the categories of topical legend drugs that may be used by an optometrist who has obtained a license endorsement from the board of examiners in optometry. Lists the requirements for a license endorsement, including the required training before and after receiving an endorsement.

Section 3 Contains a new definition, "legend drugs". Also amends the definitions of "optometry" and "practicing optometry" to reflect the provisions of the bill concerning the use of drugs. The definition of "legend drugs" is identical to that in the introduced version of the bill. The amendments of "optometry" and "practicing optometry" differ from those in the introduced version of HB 225 in that they have added a phrase to exclude the use of surgery in diagnosis and treatment. The definitions in the introduced version of the bill do not mention surgery.

As you can see, the two bills accomplish basically the same thing. The major differences are as follows:

HB 225 contains (in Sections 1 and 6) amendments regarding the practice of medicine and providing the necessary exemptions for optometrists using drugs. CSHB 225 (HESS) does not contain these provisions, but it should.

Both bills provide for license endorsements and for the training required before and after receiving an endorsement. HB 225 provides for regulations to handle those requirements; CSHB 225 (HESS) provide more detail in the statute.

CSHB 225 (HESS) provides a new ground for discipline by the board of examiners in optometry; violation of the provisions concerning drugs. It also amends another ground for discipline, failure to refer a patient to the appropriate health care practitioner. Neither of these provisions was in the introduced version of the bill. HB 225 did provide for regulations concerning the use or prescription of legend drugs, and it provided for the suspension or revocation of the license endorsement for violation of the regulations.

CSHB 225 (HESS) is more specific than HB 225 in its detailing of the types of drugs that may be used by optometrists.

The definitions in CSHB 225 (HESS) contain provisions concerning the prohibition of surgery in diagnosis and treatment by optometrists. Similar language does not appear in HB 225.

HB 225 provided for the names of endorsement holders to be submitted to the board of pharmacy. CSHB 225 (HESS) does not contain this provision.

I trust these sectional analyses and this comparison will be useful. If I may be of further service, please call.

Representative Mae Tischer
Pouche V
Juneau, Alaska 99811

Dear Representative Tischer,

I felt as though the teleconference which you chaired on HB 225 went very well and I wish to congratulate you on your smoothly run hearing. You raised two points which I felt were exceedingly important and although I touched on the responses I do feel as though they deserve ampliflication.

You were frustrated at the inability of the public to differentiate between optometrists and opthalmologists as they can differentiate between gynecologists and peditricians! We agree with your problem and as a result have started to educate the public as to the vast difference in education between an O.D. vs M.D.! Our cause, however, is frustrated by the trend by O.D.'s who portray themselves to the public as the provider of total eye care! Witness, for example, the name of some of the optometry offices in Anchorage: 'Anchorage Eye and Contact Lens Centre', or Opthalmic Associates'. These titles more than suggest that total medical and surgical eye care is offered at these establishments. With such misleading introduction, you can easily see why our patient education campaign is going slowly!

Your referral to this bill as a "turf" battle is a reasonable conclusion. If it viewed in that sense then imagine the "bag of worm's" that the legislature is getting into if it legislates this group of providers into an entirely new professionbased on a post-graduate 100 hour crash course! How will the legislature handle the myraid of other Alaskans who wish to legislate themselves into a new profession! Will it grant the "born again Professionals" new enriched status based on a 100 hour course or will it refer them back to the appropriate professional school for the time honored educational background?

Your question concerning cost of an office visit is also very important in that you will find the cost of a visit to an O D. is traditionally equal to or more often higher than a comparable visit to an M.D.! If the public were truely informed as you would have them be, would they seek out a optometric office visit when they could buy an M.D. for the same price? This situation poses a dilemma for the O.D.'s and helps to explain their duplicity in advertising their services.

Please let me know if I can answer any more questions for your committee and please notify me of additional hearings you may schedule.

Sincerely,

Peter E Cannava, MD

Peter E. Cannava, M.D.

P.S. Please disperse a copy of this letter to your committee members. Thanks!

Mae, if I remember correctly Dr. Cannava gave testimony at the optometric hearings I promised to send

February 17, 1984

SUBJECT: Optometry
(HB 225)

TO: Representative Mae Tischer
Chairman, House Health, Education,
and Social Services Committee

FROM: Russ Josephson
Legislative Counsel

You have requested a comparison of the introduced version of HB 225 and the committee substitute for your committee dated February 3, 1984. Perhaps it will be easiest to compare the two bills if I begin with a brief sectional analysis of each bill.

HB 225

Section 1 Amends the provision of law governing the practice of medicine by persons other than physicians by adding a new paragraph allowing optometrists to use certain drugs under the provisions of the remainder of the bill.

Section 2 Provides for identification and approval of (1) training programs for the use of drugs and (2) continuing education programs. Also provides for license endorsements certifying completion of required training for drug use, regulations concerning the use or prescription of legend drugs, the loss of license endorsements for violations of those regulations, and the furnishing of the names of holders of license endorsements to the board of pharmacy.

Section 3 Amends the definition of "optometry" reflect the provisions of the bill for the use of drugs.

Section 4 Amends the definition of "practicing optometry" as in Section 3.

Section 5 Adds a definition of "legend drugs".

Section 6 Adds optometrists to those excepted from the provisions of law penalizing the practice of medicine by persons who are not physicians.

CSHB 225 (HESS)

Section 1 Provides an additional ground for the imposition of disciplinary sanctions that the board of examiners in optometry may impose under AS 08.72.240: use, dispensing, or prescription of a drug in violation of the new provision regulating drug use by optometrists (Section 2). In addition, provides a modification of the provision that requires referrals to appropriate health care practitioners.

Section 2 Adds a new section to the statutes, providing for the use of legend drugs, excluding controlled substances and other types of drugs. Lists the categories of topical legend drugs that may be used by an optometrist who has obtained a license endorsement from the board of examiners in optometry. Lists the requirements for a license endorsement, including the required training before and after receiving an endorsement.

Section 3 Contains a new definition, "legend drugs". Also amends the definitions of "optometry" and "practicing optometry" to reflect the provisions of the bill concerning the use of drugs. The definition of "legend drugs" is identical to that in the introduced version of the bill. The amendments of "optometry" and "practicing optometry" differ from those in the introduced version of HB 225 in that they have added a phrase to exclude the use of surgery in diagnosis and treatment. The definitions in the introduced version of the bill do not mention surgery.

As you can see, the two bills accomplish basically the same thing. The major differences are as follows:

HB 225 contains (in Sections 1 and 6) amendments regarding the practice of medicine and providing the necessary exemptions for optometrists using drugs. CSHB 225 (HESS) does not contain these provisions, but it should.

Both bills provide for license endorsements and for the training required before and after receiving an endorsement. HB 225 provides for regulations to handle those requirements; CSHB 225 (HESS) provide more detail in the statute.

CSHB 225 (HESS) provides a new ground for discipline by the board of examiners in optometry; violation of the provisions concerning drugs. It also amends another ground for discipline, failure to refer a patient to the appropriate health care practitioner. Neither of these provisions was in the introduced version of the bill. HB 225 did provide for regulations concerning the use or prescription of legend drugs, and it provided for the suspension or revocation of the license endorsement for violation of the regulations.

CSHB 225 (HESS) is more specific than HB 225 in its detailing of the types of drugs that may be used by optometrists.

The definitions in CSHB 225 (HESS) contain provisions concerning the prohibition of surgery in diagnosis and treatment by optometrists. Similar language does not appear in HB 225.

HB 225 provided for the names of endorsement holders to be submitted to the board of pharmacy. CSHB 225 (HESS) does not contain this provision.

I trust these sectional analyses and this comparison will be useful. If I may be of further service, please call.

The ALASKA OPTOMETRIC ASSOCIATION

AFFILIATED WITH
AMERICAN OPTOMETRIC ASSOCIATION

PRESIDENT

Alaska's doctors of optometry (O.D.) are preparing to introduce legislation that will allow qualified Alaskan ODs to use prescription drugs in the treatment of infections, allergic inflammations and minor injuries of the eyes and lids not requiring the services of a specialist Many such conditions are treated by general practitioners, who have minimal training in this area. However the optometrist, who is considerably better qualified by training, experience and instrumentation than a general practitioner, must refer his patient to an MD (usually an ophthalmologist), at additional expense to the patient. We have estimated, based on the experience of West Virginia, that the elimination of extra visits would save Alaskans $235,000. in the first 3 years, not counting travel and lost time.

A majority of Alaska's ODs have recently completed a 120 hour course of postgraduate education and training in ocular therapy. While 120 hours (and an equal amount of home study) is extensive for working practitioners, it should be considered only against a background of 4000 hours of professional training, much of it in the background medical sciences The combination provides a medical background comparable to dentistry and podiatry. Dentists and podiatrists, like physicians, have unrestricted drug prescribing authority, though in practice they limit themselves to drugs appropriate to their field.

Drug legislation in more restricted form was originally introduced in 1978, when it passed the House. However ophthalmologists, who oppose the bill, have been able to tie it up in one committee or another since that time, despite a two thirds favorable majority in each house. If passage is further delayed, the skills gained or sharpened in this training will begin to deteriorate and problems of "grandfathering" may arise. The bill provides that prescribing authority will be limited to those ODs who have been trained and certified in primary care therapeutics.

ACTION NARRATIVE

TAPE#5, Side 1
Recording
Number 0001

Chairman Tischer: I express my sincerest apology for the delay of 45 minutes of at least beginning this meeting as I said before the meeting should be in Anchorage, however, the members were not able to leave Juneau because of inclement weather, the airplanes weren't flying so we are conducting this hearing from the site here in Juneau.

Chairman Tischer: I'd like to now welcome those who have come to all sites either to observe or testify, there are several members of the public here and I right now don't have their names. I'll call off the names that are listed here on all sites and if there are any others I wish that you would pass the names on to me before we start the hearing process. Those that I have listed to testify from the other parts of the state; John Demsky and Dr. Peter Cannava from Soldotna, in Anchorage; Charles Rush, Jan Nyboer, Steven Dobson, Mr. Center and James Patterson, there is also an observer I understand in Anchorage, Dr. Jim Graves. In addition, we have a witness in Mat Su, Denise ... and please correct me if I'm mis-pronouncing these names, and Dr. Jim Taylor who is an observer at this time from Bethel and who may wish to make comments. In Juneau; we have Harry Treager and Stuart Ball, with that list than I extend an invitation for Mr. James Demsky in Soldotna, if you would like to come forward we would appreciate hearing from you.

Number 0024

James Demsky: My name is John Demsky and I'm an optometrist and practicing in Alaska for 6 years, five of those years with the Yukon-Kuskokwim Health Corporation and recently I've opened a private practice in Soldotna. I gave a lengthy testimony for the hearing in April, I believe and I don't want to repeat myself too much. I'm also a member of the Board of Optometry and I would like to make a few comments as to the Board's position; first of all we do not

intend to have any grandfather, the certification used drugs would be by examination. We plan on increasing the hours of continuing education prior with the percentage related pharmacology and pathology. The advantages that we see are;

1) prevented health care

2) much cost to the consumer

3) provide higher level of care

Number 0041

There is 38 states that can use drugs now, 35 of them diagnostic and 3 with therapeutic, one of the states just passed their therapeutic....last year. North Carolina in 1977 and West Virginia in 1976. There are no drug related complaints against West Virginia optometrists since that time and there have been only two formal complaints against North Carolina's optometrists and there's also been a national study done by the National Association of Insurance Commissioners from July of '75 through December of '78 and that period of time there were 47 claims against the optometrists and 354 claims against ophthalmologist and there is not any significant difference between drugs and non-drug states of optometrists. I believe that since I've said most of my other testimony previously thats all I wish to say today. Thanks.

Number 0055

Chairman Tischer: Thank you very much, Mr. Demsky. Would you be open for questions from the committee? Mr. Demsky: Certainly.

Chairman Tischer: Rep. Martin wishes to ask you a question Mr. Demsky.

Number 0058

Rep. Martin: Yes sir, I'm interested in the continuing education program, I know that if not last summer or the summer before the optometrist profession had an extensive education course during the summer involving many hours. Can you give us an update perhaps as to how many optometrists today would qualify for certification of diagnostic drugs with the latest minimum standards that the profession is putting upon itself?

Mr. Demsky: I could not answer accurately the diagnostic drugs because our pursuit is for therapeutic drugs, I do know from the course that was offered a year ago which had primary emphasis on therapeutic drugs that the majority of MD's from the state passed that took that course and passed the final exam. That course would fulfill all the requirements for using therapeutics and just about all the states, of course the major requirement is being able to pass the exam given by the Board, so all applicants would have to take ours and additional exam for diagnostic. Since your question was about diagnostic, I would just say just guessing that about 75-80% in the state already have the requirements for diagnostic drugs.

Rep. Martin: Thank you for clarifying that difference between therapeutic and diagnostic; we haven't had this bill for awhile and I forgot the difference. I think thats it for right now, Chairman. Thank you.

Number 0080

Chairman Tischer: Let the record show that Rep. Miller of North Pole is now present; and Rep. Davis would like to ask a question.

Rep. Davis: Just a quick question; Dr. Demsky do you have any comments on the bill that is still in the committee?

Dr. Demsky: Are you referring to the Committee Substitute? Rep. Davis: Yes, thats correct CS for HB 225.

Chairman Tischer: I'd like to clarify this for the committee's benefit and for those that are listening, we are hearing the original HB 225 and the reason that we are doing that is because there are three Committee Substitutes all prepared by Sen. Josephson and the sites out there do not have copies of that, so if you are referring to any particular version you must first of all state the version number and the section and line that you are identifying, if you would please, committee members and those who have copies of other bills out on the field you would have to refer to which bill or which version you are complimenting or criticizing and which section. To solve the confusion, the Chair is identifying the

original House Bill only.

Number 0097

Rep. Davis: I'm just curious on what his testimony is on the original bill or if he has an alternative one that he supports, I'd like to know that.

Mr. Demsky: Yes, the original bill was shot down rather excessively for its lack of ... I would say and there are several alternative bills that I would certainly consider, I do not have a copy of the Committee Substitutes in front of me, but I do know that one of the Committee Substitutes included a position on the optometry board and a list of prescription and non-prescription drugs with the advice and guidance of the state Medical Board. In regard to that Committee Substitute I don't see any advantage of having a position on our board, I would be in favor of having a list of different classifications of drugs that we could use, but not a list perse of each individual drugs. That is the only Committee Substitute that I am aware of, also the initial bill does not have any statements about the exam itself or the continuing education that is required and it does not list the drugs. According to the initial bill there are not any limitations whatsoever, according to the bills that we have considered as an alternative the drugs would be limited to topical ophthalmological drugs only with emergency use for systemic drugs in the office only.

Number 0126

Chairman Tischer: Thank you John. I'm looking at a version number 1 and it really doesn't matter which version. I think which version you are referring to is that particular version, which is version 1. It does set out the scope of practice, it does set out the section in section, the list of people who should be sitting on a board, one of which would be a physician and let me just read that to you and see if this meets the qualifications that you wish.

The board will consist of (6) members instead of (5), there should be a change in the original statute, appointed by the Governor the members must serve staggered term years, there will be (4) members and shall be licensed practicing optometrists

who have been residents for at least three years, one board member shall be a public member with no interest, direct or in-direct practicing optometry; one board member shall be a licensed physician in the state. That one provision is provided for in the Committee Substitute and in addition it has another section that is called approved drugs and this is how it reads:

The licensee holding a certificated issued under AS. 08.72.277. The employer prescribe an addition to the drugs approved under another statute, legend drug as follows; and then they identify the actual drugs, subsection topical anesthetics anti-effective which lists the types of drugs underneath it, anti-glaucoma agents and so forth down the list, there are probably 35 different drugs that are listed. You're composing that these drugs not be listed that identify only in categories, is that what you are suggesting?

Number 0156

Dr. Demsky: That is correct.

Chairman Tischer: And how would you ask those drugs to be listed in categories, what categories would you suggest?

Dr. Demsky: I believe the ones that you have listed there, the anesthetic, optometric and anti-glaucomas.

Chairman Tischer: Thank you very much, do you have any comments for us to hear?

Dr. Demsky: I don't believe so.

Number 0163

Chairman Tischer: The next witness that I'd like to call would be Charles Rush from Anchorage.

Charles Rush: Good Morning, I'm sorry that I'm not well prepared on this, this is the first time that I've seen the bill, however, I am on the Board of Pharmacy and I serve as the Secretary and we addressed this bill or a similar one a couple of years or maybe last year and essentially I just want to be sure that that letter was still in the possession of the Legislature and would be considered.

I think essentially, what we said in that letter was that this was a real concern to us, that in pharmacy we have and always had sort of a traditional problem and its a very minor one with dentists who have restricted prescriptive authority in the date prescribed for the mouth, and we have the same type of problem with the veterinarians who are limited to animal, and this sometimes is a problem if they get out of their speciality.

Now we really ran into problem when we got the nurse practitioner and the physician's assistants who were given the authority to prescribe and when they came to us with this we did not see it would be a problem and we said that we thought we could monitor all the NP's and PA's. When it happened all of a sudden we were faced with every NP and every PA that had a different regiment that they could write for, as set up by their collaborating physician. This we soon found that pharmacist could not do, we were not able to keep track of the certain items that each nurse practitioner or PA was allowed to prescribe, so at that time we went to the medical board and the nursing board and we said that there was no way that we could monitor, that we felt that this had to be changed and the responsibility for the PA and nurse practitioner had to be the responsibility of the collaborating physician. Naturally all care was going to be exercised in throwing their prescriptions, but if they got outside of their field than they were allowed to prescribe and that is something the collaborating physician would have to check on and would have to handle. I feel that this optometrist would be a similar category and it would be extremely hard for the pharmacist to first of all would have to identify their prescription so that the pharmacists knew that this was an optometrist and he had limited prescribing authority and then at that time it would have to be very plain what that prescribing authority was. I think thats our main concern, the other thing that we did not address here I would presume and I would hope that you are not planning on having any DEA numbers involved with the optometrist and they would not prescribe for controlled

substance. Has that been considered?

Number 0212

Chairman Tischer: If you are asking the committee that question, is that what you are doing?

Mr. Rush: Yes, I am. I just read through this real quickly, I don't see where its addressed here, the use of prescription or legend drugs.

Chairman Tischer: There is nothing in this proposed piece of legislation that addresses controlled substances as far as I can see.

Mr. Rush: Controlled substances are legend drugs, however, normally they are classified separately, I believe if it were addressed it would save, possibly it should be in the statute, that DEA drugs, controlled substances would not be prescribed and that they would not have DEA number.

Chairman Tischer: Thank you, thats a good suggestion. How do you feel about categorical listing in this proposed piece of legislation, Mr. Rush?

Mr. Rush: I feel that its difficult I don't know, I think its going to be very hard for pharmacist to draw the line or know where the line is drawn at, if thats what you are doing. Maybe it should be like industry, they are limited to diseases of the mouth, maybe the only limitation should be limited to the eye, I don't know, maybe thats too broad a category.

Chairman Tischer: Mr. Rush, if I may, the bill addresses that by virtue of the definitions that are contained within the bill and what the licensing process should be. I have a question, am I given to understand that at the present time the pharmacists are the police force of the prescription industry if you will on all fields of medicine or is that just a policy?

Number 0241

Mr. Rush: I think this is maybe the way it really works, a pharmacist is certainly jointly liable if he fills a prescription for say for instance a dentist, who is prescribing something that is not related to the mouth. In that particular case the

pharmacist I feel is probably under a real obligation, not to fill that prescription.

As far as a doctor of medicine is concerned there is no limitation, there's certainly a limitation if you do something wrong, if its an overdose or something they should catch, but as far as a veterinarian writing a prescription for a human, now the pharmacist fills that, he certainly has some liability.

I think the same thing is true with dentistry and I think that under this, the optometrist, and I don't think we like the word "policeman" but essentially is, yes, you are saying to us, do not fill prescriptions except for the eyes and the eyelids than they are going to give us a specific list. And so, when the prescription comes in it is his determination, it could result in a law suit if he strays away from that.

Number 0261

Chairman Tischer: I think what you are saying to the committee, Mr. Rush, is that the pharmacy industry and profession feels a moral obligation to police that prescription portion of dispensing drugs to the best of their ability. What I would like to know is that if you are mandated by the law to do that and rather than the moral obligation part of it?

Mr. Rush: Well, I certainly think that we are mandated by law, yes, its in the dental statutes that they can only prescribe for diseases of the mouth, under the nurse practitioner they can only prescribe the items or the legend drugs that their collaborating physician allows them to write for. So I think, definitely that means the pharmacists fills the prescription outside of that scope, certainly, its against the law, so I don't think its a moral, I think it is law.

Chairman Tischer: Mr. Rush, I am going to ask for a legal opinion from the Attorney General's office on that account, so that the committee has a clear understanding of whether or not its a policy issue more than it is a statute. What I'm looking at here is a provision within one of the substitutes and it says; "the board shall furnish to the

Board of Pharmacy the names of all holders of endorsements issued under this section", you mean its a policy of one board to supply the pharmaceutical board list of all the holders or allowed to prescribe drugs? But it does not say anything that you are liable to police their actions and I think we need an opinion on that.

Chairman Tischer: Rep. Martin has a question.

Number 0288

Rep. Martin: Thank you Madam Chairman, Good Morning Charles, as you said we have been on this thing for 4 or 5 years now, same thing, no progress. The same questions are being asked and I believe there are answers if we don't try to nit pick this bill to death one way or the other, there's always going to be any if or but. But I feel that the categorizing drugs is probably the best way to go through this as you know in your profession there's always new drugs on the market for new things and its awful hard to keep up with, and thats up to the professional group. Ones to regulation and the ones to educational program, we know in the last two years the optometrist have done a superb job in upgrading everyone's education, making sure they had minimum hours of training for x use to what drugs or what procedures, and rather than tidy all these things in the law itself that we should let the regulation and the education be the guide line of what they are allowed to do. If we get involved in saying that we want drugs only for the eyes we know that anything that enters the body is going to go through the whole body no matter what point of interest, and than we get into the nit picking technologies on that too. What I'm looking for is to allow a professional group and we have to have faith in those professional groups to give the best that they have to offer to the patients. And I feel that in this state we have a lot of top rated optometrists that go out into the remote areas and if they have the expertise they should be allowed to use them and work upon the patients that they suddenly run into that needs it.

Number 0313

Mr. Rush: I don't know if I definitely disagree with what you said there, Terry. I

think our concern on the Board of Pharmacy is that we not put our pharmacist in the position where it is extremely difficult for them to know whether they are allowed where its legal to fill a prescription or not and I think that maybe something should be continued if you are considering that they are going to give us a list, like the list that we got of the nurse practitioner and of the PA's. That has had a few problems, they add new people all the time to the list and then there are people who are taken from the list that are no longer licensed and this gets into a continual need for updating and especially we have in our nurse practitioners and the PA's regulations a part that says if a collaborating physician no longer collaborates with the nurse practitioner, the Pharmacy Board will be let known in 24 hours. Because, if this happens, the collaborating physician has some problem with the nurse practitioner or the PA, than its essential that we get that information quickly so that we can notify the pharmacist and they don't fill the prescription.

Number 0332

Rep. Martin: Thank you, I whole wholeheartedly agree with your problem and personally think the pharmacists have done a number one job around the state in trying to control misuse of drugs whether it comes to doctors or where you are almost forced to at times to accept that prescription when you know darn well that a problem will speculate anyway. And I very much appreciate pharmacists I've known who have conscientiously notified the various departments if they can't get the doctor to rightly consider the prescriptions. I personally appreciate the concerns that you are expressing, I think its a very valid report and maybe the optometrist can work up an easier procedure for the pharmacist, because they want to protect themselves too. They don't want their image tarnished by any weak members.

Number 0345

Chairman Tischer: Thank you.

Chairman Tischer: I'd like to now go to Juneau, we have a Stuart Ball who would like to testify, and for those who are listening or preparing to testify I appreciate very

much if you would as you come to the table announce your name and your affiliation if any.

Number 0354

Stuart Ball: My name is Dr. Stuart Ball, an ophthalmologist, and would initially say that I am opposed to this bill. Let me go through my qualifications through college; pre-medical education, medical school - 4 years, did straight medicine, internship and 3 years of ophthalmology training for the year of specialized training in New York City and glaucoma. I'm opposed to this bill, because it proposes to give the privilege of practicing medical care of the optometrists, it is put forth by some who sincerely, but mistakenly believe that optometrists have the proper training. Fact is, this is not so. It is only recently that any ... attention has been turned to the medical care and diagnosis and treatment of condition of the eye in optometry school.

The majority of practicing optometrist have only accuracy look at this and even recently trained optometrist have certainly not had enough. The lectures they have had in optometry schools do not qualify them to practice as physicians. I maintain that is wrong minded to propose by legislative fiat to give to any professional group the rights and privileges that should have first been earned, to give the optometrist the right to practice and than ask them to return for the education they need, seems to me be both ridiculous and frightening. The fact is, few had the ... education and none had the clinical training to practice and diagnose the treatment of medical conditions of the eye without the supervision of a qualified physician. I implore you the legislature to consider the seriousness of this bill, we are talking here about people, sight and the health of their eyes. National public opinion polls, and I'm sure you'll agree, rank loss of sight, second only to cancer as their greatest fear. You have the responsibility to protect the public, if passed this bill under consideration would only serve the complicated already confusing situation. Most of the public is unaware of the difference between an optometrist and ophthalmologist and the great differences in their capabilities and training. Passages

of this bill would imply to the public both that optometrists have the ability to diagnose and manage eye conditions and a complete understanding of the use of these drugs and the management of their possible complications. None of these conditions are true. Optometrist have claimed they can safely use the medication proposed but during my glaucoma fellowship I personally witnessed three surgical emergencies brought on solely by the use of these drugs and many more which the quick and accurate diagnosis and emergency medical treatment was vital to preserving the sight.

Number 0401

I shudder to think that the bill was passed and the public was further confused about who is the proper provider primary eye care, what needless pain and suffering and loss of sight might be caused. In summary, I feel this bill proposes to give an unearned privilege without corresponding requisite responsibility. It is unearned, because optometrists have had even none or inadequate clinical training, and they propose in this bill to determine among themselves who is competent among them to use the drugs. That frightens me, it should frighten you and would certainly frighten an informed public, also this bill gives the right to "to diagnose" to people who qualify at best only to detect and do so without requiring referral to a qualified physician for diagnosis and care. I think there's room for compromise though, certainly compromise substitute bill as being submitted to both the House and Senate for proposing to give educationally, qualified and tested optometrists the use of a limited list of drugs to assist in their detection of abnormalities of the eye, but it also recognizes their limitations to "to diagnose" as distinct from detect abnormalities of the eye and requires the referred to a qualified physician.

Number 0423

I feel this is the most appropriate to the realities of the situation and the welfare of all concerned and if I could just answer one comment that was made by the optometrist who spoke first. About the realities and the insurance; he mentioned insurance rates from '75 and '78 which were published I think by the National Association Insurance

Adjusters. I want to note that those dates were before those states had drug bills for diagnostic drugs, but were not therapeutic drugs and from '79 to '80; the insurance rates for optometrists went up 38% because of the claims against them, and since then they have gone up dramatically more, but I don't know the percentage.

Number 0435

Chairman Tischer: Thank you very much, Dr. Ball, are there questions from the committee? Rep. Davis?

Rep. Davis: Thank you Madam Chairman. Thank you for your testimony, I'm curious to know if you seen this CS for HB 225 that has been referred to as the compromise bill or is it one of Sen. Josephson's?

Chairman Tischer: Which version?

Rep. Davis: I think the only version that I've seen is Sen. Josephson's.

Chairman Tischer: You will note that some of us have several versions from Sen. Josephson's and at the top of the right hand corner for those who are privy to having a copy, its version number 1, 2 and 3, and each one is different. While you are looking for that, well, I'll let you ask that question first.

Chairman Tischer: I was looking at version number 1 to begin with.

Rep. Davis: The last version is the version the committee was looking at, version number 3.

Chairman Tischer: The real watered down one, is that what you think?

Number 0452

Dr. Ball: The last version is the one thats actually in the other body right now is the one you feel is the compromised one, the one you can live with? Is that what you're saying?

Number 0457

Chairman Tischer: Its going to be real confusing for all those listeners and observers who are testifying to carry on a conversation without documents in front of them, so I caution to the committee to make

sure that when you are identifying anything please refer to a section or a line and identify what document you are looking at. So that even though people who don't have the document in front of them will know what you are talking about.

Chairman Tischer: Rep. Davis, do you have your answer?

Rep. Davis: Yes, thank you Madam Chairman.

Chairman Tischer: Are there any questions from the committee for Dr. Ball?

Chairman Tischer: I have a question Dr. Ball; version number one of Sen. Josephson's bill; identifies a list of approved drugs and they are categorized and under the categories are subsections that list various drugs that could be used by a licensee holding a certificate. In other words the licensed optometrists that is controlled by the optometry board and so forth, would you please look at that list and make comments on it please.

Number 0476

Dr. Ball: Yes, I've been looking at the list and topical anesthetics which I think they can, certainly those who have been properly trained and tested on their recent use and effectives, I think is outside their realm and implies that they have a sufficient clinical understanding and knowledge to diagnose conditions. And I think they can detect when there is an abnormality, but I think it puts too big of a burden on them who have only gone back to learn.

Number 0486

Chairman Tischer: If you were sitting down on an examination for an optometrist who maintain that they had the skill and the education to utilize having effective drugs and demonstrate to you through testing and examination that they had those qualifications, what would you say?

Number 0491

Dr. Ball: If I can set an exam and they passed it, I would still feel there other people, paramedical people who can demonstrate for efficiency and certain limited areas; like intensive care nurses have certain limited specified capabilities

and certain situations, but that even then is still always under the supervision of a physician to re-evaluate and to monitor what they do, and I feel in these situations, where the health of the eye preservation of sight is always a factor. And the other categories is even more important, any glaucoma agents, any inflammatory agents, any virals, the situation comes even more important. I think that in any of these situations, they would first have to demonstrate for efficiency, but always under the guidance of a physician.

Number 0496

Chairman Tischer: I would like to have you first answer my question, if you put the exam to the optometrist and they passed the exam sufficiently to meet your desires and your needs, proving or disapproving one or the other, that they have the ability to do anything; what you are saying to me is that you would still not allow them to do it unless you supervise them, is that correct?

Dr. Ball: Yes.

Chairman Tischer: Thank you doctor. I would also like to have for those who are in the field, if you stay at the sites if you have any questions of the other witnesses through the Chair, I would appreciate you either submitting them, so we can ask them if you are not going to stay or that you direct them yourself. I think this would be a good time to have an exchange of dialog, so if you have a specific question through the Chair to another witness that would clarify for the committee and inform them I would appreciate you doing that. The next witness that we would call is in the Mat Su Valley; Dr. Denise ..., and please correct my pronunciation, if you would please.

Number 0499

My name is Denise ... and I'm an optometrist in private practice here in Mat-Su Valley and I've been here for about two years. I'm testifying in favor of diagnostic and therapeutic drug use by optometrists. You have already heard much on this, so I'll be brief. Dr. Ball seems to feel that none of the optometrists have the proper ... clinical training. I, however, was an optometrist working in Thialand for a year after I graduated and I used both diagnostic

and therapeutic drugs there and I felt that my optometric education adequately prepared me for any type optometric care. The nearest ophthalmologist to me in Thialand was about 8 hours away and I referred all my surgical patients to him, but I felt qualified to do basic diagnostic treatment myself. To be able to provide that same scope of care here in Alaska, I think would be extremely useful, not only to the optometrist but also obviously to the patient. Here in the valley, we don't have an ophthalmologist here all the time, our offices open late on Fridays and also open on Saturdays, and the General Practitioner here in town are open during those particular hours. So if you have a patient that comes with some kind of contact lens over wear or small abrasion and you want to give them some kind of antibiotic just to ....you cannot do that, so you either have to send that patient to the Palmer Emergency Room which is going to cost them a lot of money and time or send them to Anchorage, which is a real hardship on people, especially your older patients who don't like to drive that distance. So, basically,

I see it as an increased inconvenience for the patient, a lot of decrease in cost for patient and especially for people who practice not in Anchorage are a real advantage to the people that you serve.

Chairman Tischer: Does that conclude your testimony?

Denise ...: Yes, it does.

Chairman Tischer: Any questions from the committee?

Chairman Tischer: I have a question for you doctor, there is a proposed list of drugs in version number one of Committee Substitute and identify those in categories, although I did not read the entire list. How do you feel about the legislation proposing listing specific drugs versus categorical drugs or none?

Denise ...: Well I'd be in favor of categorical, however, listing them seems a little bit restrictive just because new

drugs come on the market every so often if you have a certain list and your list will be outdated and you'll have a problem if can you prescribe it and you need to change the bill and that sort of thing.

Chairman Tischer: I also have another question, Doctor, in the proposed legislation. Do you have a copy of the original bill?

Denise ...: Yes, the original bill,

Chairman Tischer: Thank you. Are there any provisions in House Bill 225, original version that you feel needs to be expanded or declarified for the protection of the optometrist as well as to prove your worth, if you will?

Denise: Basically, it seems that everything is really complete, again you have to refer to our legislative committee and again I'm not a part of that, I'm somewhat uninformed as to the various versions.

Chairman Tischer: Thank you. I have another question, will you hold on, I have to look it up. How do you feel about a provision that would require that upon the advice and guidance of state medical board that developing a specific list of prescriptions and non-prescription, diagnostic and therapeutic drugs and their dosages be used in practice of optometry?

Denise: I don't particularly like that for the reason being that with advising consent it means that if you try to get a group of people together to advise and consent to anything, its a very difficult thing to do, you have to get a meeting, you have to get optometrist and ophthalmologist together and you have to get something accomplished. Three things which are all very difficult to do.

Chairman Tischer: The language reads; with advice and guidance, it does not require approval of the medical board, but just the advice and guidance, in my interpretation it means that there be a collaborative effort to ...(end of tape).

Tape 5, Side 2
Recording
Number 0001

Chairman Tischer continues: ... The approval of the Medical Board be secured but that the Board of Optometry and the Board of Medicine collaborate for the best interest of the client.

Denise: ...I don't really see a big problem with that.

Chairman Tischer: Thank you very much. We'll call the next witness; James Patterson, and please indicate yourself and who you are.

James Patterson: My name is Jim Patterson, I'm an ophthalmologist who has been in private practice in Anchorage for the past 12 years; I am testifying as a concerned individual. I'm opposed to HB 225 because I feel that the present level of education and background of practicing Alaskan optometrist in no way qualifies them for using drugs for diagnosis and or treatment or to perform surgery. There are several articles and literature which dramatically demonstrate the educational differences between ophthalmologist and optometrist. One of the better articles by Don Pearson and it appeared in the transaction of the American Academy of Ophthalmology and ...; these articles indicate the present day optometrists, these are the individuals who are practicing in Alaska are sorely lacking in medical and clinic expertise. Another article by Dr. Campbell, he states an accurate and appropriate referral for treatment of eye problem in the effectively performed on the basis of a good history and externally examination...(noise in background). As high as 95% of all eye disorders can be protected and determined in this fashion, all of these procedures can be performed without the use of any diagnostic drugs. I would like to address the categorization of drugs listed in the proposed bill and point out one specific example: Cocaine, in the broad sense of the word is a ... drug, drugs when applied the front surface of the eye can be absorbed systematically within a minute of 7 to 8 seconds, it has a topical effect of numbing the front surface, it was one of the first

agents to use to perform eye surgery, it also dilates the pupils.

Number 0033

This drug included for use by optometrists in present form of legislation, this drug presently requires DEA numbers and approval for physician to prescribe this agent. In summary, if optometrists want to function as ophthalmologist, let us protect the people of the State of Alaska and require them to go back to school through the existing program and gain the necessary clinical and practical experience needed in this field of medicine. For these reasons, I urge you to defeat this proposed legislation in its present form. Thank you.

Number 0042

Chairman Tischer: Thank you, Dr. Patterson, are there questions from the committee? I see none. I have a question, Dr. Patterson, rather a comment, this present legislation that is before the committee is the original House Bill and for the benefit of those who do not have the document before them, I would like to read Sections 2 and 3, actually they are practically the same. One is the "optometry" is the examination of, the other section is; the "practicing optometry" and I would like to read that and have you comment Doctor, if you would please:

"Practicing optometry" is an examination of the human eyes and visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye; or the diagnosis and treatment, including the use of drugs, of inflammations, infections and injuries of the eyes and eyelids; or the prescription or application of lenses, prisms or ocular exercises for the correction or relief of the human eye; or the holding of oneself out as being able to do so.

Number 0060

Chairman Tischer: I heard in your testimony something referring to surgery which this

proposed legislation does not address, but in addition to that, would you comment on that definition and give us some guidance?

Number 0063 Dr. Patterson: I would think that a surgical procedure would be the removal of a foreign body from the surface of the eye or perhaps even the removal of a partially penetrating foreign body. If an individual given an agent which has sufficient power to numb the front surface of the eyes and such a procedure can be performed I would expect that such an individual might be tempted to remove the foreign body after having removed several foreign bodies, perhaps they might be so inclined to remove a growth on the surface of the eye, since they have the agents to perform such. Surgery is not specifically excluded in the bill and I would see problems with possibly extending into the surgical area. I have trouble redefining optometry as a practice in which eye disease is diagnosed as also specific therapeutic and diagnostic procedures are performed.

Number 0078 Chairman Tischer: But there is no identification in that definition at all that deals with disease or any inference even close inference as far as I can see and surgery, Doctor, I wanted to know what you're interpreting that section of the bill correctly.

Number 0081 Dr. Patterson: I'm saying that, yes, I realize that surgery is not specifically addressed in that bill, I think that deficiency, I also am against saying optometrists diagnose and treat diseases of the eye.

Number 0085 Chairman Tischer: Thank you, Doctor, are there any questions from the committee? If not, we will go on to the next witness and that will be Steven Dobson from Anchorage.

Number 0092 Steven Dobson: This is Steven Dobson, I'm an optometrist practicing in Anchorage, I was born and raised in Alaska and attended the local Community College and University and Undergraduate. I received my Doctor of Optometry Degree from Southern California College of Optometry, I also completed a one-year residency at the Veterans Medical

Center in Los Angeles; and first of all I am very grateful for the Alaska Student Loan Program and also the WICHE program that helped finance this study. I decided to return to Alaska to practice optometry at the level of which I've been trained, I guess thats why I'm testifying here before the committee today about the issues that have been brought up by prior testimonies.

I would like to clear one area of confusion, thats the area of professional judgment; if the law requires that I treat any or all eye diseases, I have a difficult time going to my office each morning, needless to say, I utilize the professional judgment every day on every patient, and even with the drug law I still would be referring many of my patients for that secondary and ... eye care, a need whether medical or surgical.

Currently, one of the most significant role models we can use to guide this legislation is that of a West Virginia, they had a therapeutic drug law now since 1976 and I don't have the latest which talks about the success of this bill in terms of decreasing patient care cost and all of the optometric care. I do have a letter in front of me that was written three years ago; they used a total of 72 different drugs for the human eye, they treated some 47,000 individual patients, the distance of these patients would have otherwise traveled to geographical locations. Other than those treated by optometrist were treatment by ophthalmologist or appropriate medical specialist, combined a total of 620,000 average miles, 52 pathological conditions were diagnosed and treated by the West Virginia optometrist and there are 135 West Virginia optometrist that have this traditional privileges for optometric license in that state. Its also noted that there has been no reports to the Board of any adverse reaction to the diagnosis and treatment rendered to patients involved in any West Virginia certified optometrist.

Number 0136

I also have another very brief letter that was written two weeks ago from the Director of Nebraska Department of Social Services and she was responding to Sen. Don Wesley who is in the Nebraska State Legislature and

the comments were as follows:

The department anticipates a decrease in expenditures for these services for the following reasons: (Now Nebraska is also introducing a therapeutic legislation), and her first statement was; the plans will now have to go through the optometrist to an ophthalmologist for this minor treatment, therefore, the department would have to pay for one office visit and instead of two office visits. The medicaid and liable fees for optometry visits are generally less than liable fees paid to ophthalmology.

Number two: This legislation will have a very positive effect on the availability of service to the clients as there are a few ophthalmologists in outside and out state Nebraska.

We have very similar situations here in Alaska, and another issue that has been brought up in prior hearings is that for some reason the bill ends up in the Finance Committee and obviously this must be a stall tactic. The comment made here was the administrative cost of this bill would be minimal, estimated at less than $500. and so I hope that this bill will not be tied up in the Finance Committee again, its absolutely non-productive.

Number 0157

Steven Dobson: Again some restrictions I think may be appropriate on this drug bill and one was brought up earlier by Mr. Rush and that is; controlled substances should be eliminated and therefore, would not require any DEA numbers, also classifications of drugs I think are appropriate. Restricting these specific drugs would be inappropriate because certain patients as you know have sensitivities to certain drugs and also drugs do change. That would require legislative hearings to allow the use of new drugs that do come on the market. In reference to Dr. Patterson's comment that 95% of all eye conditions were diagnosed without drugs, my question is why do most all ophthalmologists dilate the vast majority of their patients for routine eye exams.

Secondly: Foreign body removal, I work on

Saturdays and also have evening appointments in my office and patients who are working in a garage and get dust or piece of rust in the eye and make stick on the cornea, any of these are easily rinsed out with a saline irrigation. We require even a Q-tip or something to superficially take this away and again these patients are referred to the emergency room, especially after hours. And again, a day doesn't go by that a contact lens patient doesn't show up in the office with an over wear or a condition that would require that they have an antibiotic and our decision is to refer them to a general physician who has less expertise and does not have the equipment or again send them to the eye specialist, the ophthalmologist for treatment. And in my conclusion, I urge the support of a diagnostic and therapeutic bill. I will answer any questions at this time.

Number 0188

Chairman Tischer: Thank you Steve, are there any questions from the committee? Rep. Martin.

Rep. Martin: Madam Chairman, I don't have any question except to confirm a couple of things with Dr. Dobson. We have a West Virginia Board of Optometry of 1981 report and someone has conscientiously updated it to department numbers to the various categories of drugs and the number of patients and so on. But what I like about the West Virginia report and also the Nebraska report is that they show in those areas they have similar problems to what we have in Alaska and that is a geographical problem and economic problem, a problem of availability of services needed by the people and its in my mind that the optometrist, because of the way they develop their professional group in this state of reaching people, going out into the rural areas and provide a major access to providing services that people need on small emergency basis.

Number 0201

And to me, we would be very negligent and not do our duty as legislators not to consider these factors and making it possible for people in the remote areas to receive the best medical available. Some day, some age when the ophthalmologists are

willing to travel to the bush, are willing to go out there and make themselves available to the people, than we may be able to reconsider 10 to 20 years down the road. If a person gets a splinter in their eye due to an accident or a hunter is out there and he or she knows they can see an optometrist near by; than we should help them...best, professional expertise to that individual.

Number 0213

Chairman Tischer: Thank you Rep. Martin, I'd like to ask Mr. Dobson and Mr. Patterson who is sitting here with us a couple of questions; Mr. Dobson if I were to come to you with a piece of dust in my eye, how much would charge me?

Dr. Dobson: I wouldn't charge you anything. The average patient ...brings up the issue of the economics and situation. A lot of patients come in for a routine eye examination at the same time they will mention their eyes have been tearing or redness and may have a minor infection in addition to a visual problem, and to treat that at the same time, the additional fees would be nominal. We have not set a fee schedule for that, we don't have those privileges.

Chairman Tischer: No, I'm talking just about, if I came into your office unannounced and you had time, wouldn't you charge me for an office call? Not just because I'm a representative, but because I live Spenard and am walking up to your place and I need some help.

Number 0230

Dr. Dobson: It would probably determine a number of factors; a standard office call would probably be $25.00, but again.

Chairman Tischer: Thats what I wanted to know, what your standard office call was.

Dr. Dobson: Prior patients, we see them for other care, we see them quite often for contact lens, irritation, various questions they have and again we don't charge every time they come into the office, but I would think that an office visit would be appropriate and that fee again would probably depend on type of service.

Chairman Tischer: Thank you and Dr. Patterson, if I came to you with the same problem, how much would you charge me for an office call?

Number 0240

Dr. Patterson: I would have to agree with Dr. Dobson, if you came in, there probably will be no charge. The routine office is run anywhere in my office from $26 to $45 depending upon what services provided. No one is turned away from my office and the fees are negotiated all the way down to nothing, this is what I interpret as the patient's financial status.

Chairman Tischer: Thank you, Dr. Patterson.

Chairman Tischer: Dr. Ball is sitting here with us also, I think he would like to make a comment before we go on to the next witness.

Dr. Ball: Well, I wanted to comment to the third question of the remoteness, which is also an issue, the remoteness of the people in the bush or in little cities or on islands to good medical care for eye problems. I want to say first all, ophthalmologist do travel to some of these remote areas and I in fact have been and we do go to Sitka, Tenakee, Wrangell and Petersburg and Pelican and places like this to give optical care. Secondly: I just joined Dr. Page so we are able to travel to these places more frequently, and to give you the exact frequency I can't right now since we are in the determination stages on how frequent we can do it with other person covering practice in Juneau, and certainly its not there all the time, but there is no optometrist in Pelican either. They were doing it in rotation basis as well. But I think just to use expediency as justification for less then adequate medical care is not I think valid.

Number 0269

Chairman Tischer: Thank you, I have something to clear up with the committee members, I mistakenly saw the name Josephson on the revisions that we have on file as being Sen. Josephson, that happens to be drafter of the revisor, I apologize for my mistake.

Rep. M.W. Miller: Madam Chairman thats correct, but Sen. Josephson is also the original sponsor of the Senate side with this piece of legislation.

Chairman Tischer: Rep. Martin?

Number 0276

Rep. Martin: Thank you. I'm glad to hear what Dr. Ball said, this is my feeling that because the competition in the field and because we had no ophthalmologist in Southeast for a long time. The only resource that people had with eye trouble besides needing a prescription like I do, the only resource they had as to optometrist for help, there was a lot of good optometrist...I know ophthalmologist they can really help you. I'll make a point, I'll call Dr. So and So in Seattle and I'm very pleased to see that we have specialist here in Juneau and Southeast, and I know the professional people here will establish, optometrist will establish a good relationship once they have mutual touch with each other. And that an optometrist will say, hey, I know of an ophthalmologist in Southeast who is really good, you don't have to travel to Juneau or Anchorage anymore, that's the whole idea; where we allow each profession ... in the long run allow the public to know if your professional people work in hand and glove with each other. I don't believe in there needs to be competition.

Number 0293

Chairman Tischer: Rep. Davis.

Rep. Davis: One comment and one question; last year there was a testimony on this piece of legislation and one optometrist made the comment that when he was traveling in the villages, that the health aides had a lot less training, and they could a lot more things with the eye than they could, by law. Which is sort of an interesting observation, and the other question; what percentage of care in your office is treatment of people with over use of contact lenses?

Dr. Dobson: First of all a comment on the policy about the public health service, I am not a member of the public health service.

I serve as an advisement for the health

service, mainly for pediatric ophthalmology problem, I have also done contract work in the villages doing eye screening and ... for the public health service. My understanding and having talks with specifically with the present Director, Dr. Holly Corshion, that all drugs are dispensed under the umbrella and with the full protection of the license of the ophthalmologist and the Public Health Service. The optometrist were working directly for the Public Health Service, function under this umbrella the Health Aides also work under this umbrella, if this policy has been changed I'm not aware of it. The second question as to what percentage of the individuals in my practice are over wearing contact lenses? I see anywhere from 85 to 120 people a week, on the average probably during that week if there would be 1 or 2 contact lens over wearing syndromes. Most of these are minor, heal quite readily, perhaps I don't even need a topical antibiotic to treat them.

Number 0327

Rep. Davis: Yes, thank you Dr. Patterson, I realize that those health aides in the village would be the under the umbrella with somewhat else, but I just meant on sight they have perhaps greater capability of treatment of the eye than the optometrist, its just a comment that someone made. Thank you for the information.

Number 0331

Dr. Patterson: I think the excessibility to additional advice, and consultation is an important factor there. I think thats why the system has worked so well, either through the radio network or through telephone, either with the regional hospital like in Bethel or even contact with the main hospital here in Anchorage. System has worked for ...its an every effective system.

I think that this is the kind of set up that might be looked at very carefully and maybe some of the good points be incorporated in the situation here in private practice here in Alaska.

Chairman Tischer: Dr. Patterson, it comes to mind a question as to all through the process of hearings on this bill and other bills that are proposed pieces of legislation that deal with other term

medical profession and so forth, the legislature is seeing a real tremendous turf battle here. Thats what I have come to realize, its a frustration on the part of the legislators to accommodate the needs of our constituents and the folks in the rural areas. We find it difficult to manage this turf battle, if you will, and I guess a couple of questions; why the heck don't the professions get a little closer together in resolving some of these types of things in the best interest of the general public? And two; why is it that the general public, I'm asking this specifically of the ophthalmologists, why in the world doesn't the public understand what the difference is between an optometrist and ophthalmologist? It seems to me as if though the profession would be the primary folks that would be interested in making sure thats a clarification to the public.

Number 0363

Dr. Patterson: Without the answer to those questions I don't claim to have a particular insight. I myself, an ophthalmologist, presently because of two excellent optometrist that I had the pleasure of serving within the United States Navy. I deal with my fellow ophthalmologists on a personal individual basis, I deal with fellow optometrists on a personal individual basis, realizing that there are some individuals who are highly skilled, some that are not so highly skilled and than some I disagree remarkedly with. I do not interpret this legislation as the turf bill, granted 5 years ago I did. Realistically thinking and trying to study this, this bill will in no way affect my practice, financially, emotionally or any other way.

So I dismiss it as a turf battle, I have no qualms speaking as an individual allowing optometrist to use certain medications that are listed out as prescribed and those that are given preparation for "diagnostic purposes". I have very marked reservations in creating another class of medical providers using prescription type drugs. I've persisted in coming to these hearings and making my presence known as much as I can because of my own personal beliefs on this latter as ...

Number 0392

Chairman Tischer: Thank you Dr. Patterson and could you address the problem that was mentioned here earlier, the general public doesn't really know the difference between ophthalmologist and optometrist?

Everybody knows the difference between a gynecologist and a pediatrician, but apparently very few people know what the difference is between an optometrist and ophthalmologist, so could you tell us how better you could improve that understanding to the public.

Number 0399

Dr. Patterson: I think the way we can improve is through educational programs. During the last 7 to 8 years, ophthalmologist has been behind the times in their political loxy, its taken us 3 to 5 years to catch up. We have national organizations, our present academy is doing TV spots, they are putting editorials in the newspapers in trying to educate the public. Its been my impression that people are smarter than a lot of us would generally like to give them credit for, I get a fair number of my people referred from optometrist, I also get a fair number of my people referred from themselves, because they are smart enough to realize that they have a major ophthalmological problem as opposed to an optometric problem. One other point, if this were such a burning consumer issue, I'm surprised that our legislative hearing this morning isn't just absolutely packed with consumers. I wonder why there are none present.

Number 0419

Chairman Tischer: Thank you doctor, thats why I think its a turf battle. Are there any questions from the committee? If not we'll go on to the next witness and, Rep. Davis?

Rep. Davis: That was one of my concerns too, last year, it didn't seen to be a big out cry by the consumer with this piece of legislation, but I can understand the general public not necessarily knowing the difference between professions. Some don't even know the difference between a democrat and a republican.

Number 0430

Chairman Tischer: Thank you Mr. Davis, Mr.

Harry Treager please, he is here in Juneau and we ask him to come forward to the table.

Harry Treager: Madam Chairman, my name is Harry Treager, I'm the Director of Division of Occupation Licensing for Department of Commerce. I don't not have a formal presentation to you, I can only tell you that as the administrative support for the Board of Pharmacy and for the State Medical Board, their positions are unchanged from last year, they opposed the legislation. I do not have any of the technical answers for you, as far as your questions in regards to the registration factor, if an optometrist is given prescriptive authority and do they answer to the Board of Pharmacy or do they both answer to the Board of Dispensing Opticians or Optometry, the answer would be, the Board of Pharmacy make the report to the Board of Optometry and the Board of Optometry would have the licensing jurisdiction. Other than that, unless there's some questions from the committee.

Number 0448

Chairman Tischer: Thank you Mr. Treager, is there any legal obligation on the part of the pharmacist to be the watch dog of dispensing drugs from the prescription end of it?

Harry Treager: Madam Chairman, In response to your question, I would have to say yes, because if a pharmacist licensed by the Board of Pharmacy is in violation of their statute which is filling prescriptions or over dosing by prescribing health care professionals, than they are responsible to the Board of Pharmacy, so they would be in jeopardy.

Chairman Tischer: A little more clarity on that, what if an optometrist prescribed a drug that was not in one of those categories like over dosing or the frequency of renewal and so forth, but was simply a request by an optometrist who fills the prescription for a client and the client went to the pharmacy and presented the prescription request, is the pharmacist responsible for what kind of drug that optometrist can dispense?

Harry Treager: Yes ma'am, we had one case as Mr. Rush the Secretary of the Pharmacy

Board pointed out.

Chairman Tischer: No, I'm talking specifically about optometry right now.

Number 0466

Harry Treager: Yes, I'm giving you a correlation between the two, if the pharmacist felt that the drug should not be prescribed he would contact a member of the Pharmacy Board. So, the answer to your question is yes, they could refuse to fill a prescription.

Chairman Tischer: And if they did by accident fill a prescription, lets just say accidentally, maybe they didn't look at the list, for whatever reason they dispensed that drug, and someone else knew that drug should not be dispensed on behalf of the optometrist, wouldn't the pharmacist be legally liable?

Harry Treager: Madam Chairman: In response to your hypothetical question, I have to give you a hypothetical answer. So far, all evidence points out that the licensed pharmacists in the State of Alaska are pretty conscientious and they have not to my knowledge or to the investigating agency knowledge fills any unauthorized prescriptions as you pointed out, as scenario.

Number 0483

Chairman Tischer: I'm not questioning the responsibility or the ethics in terms of dedication to their profession at all, I just want to know whether or not by whatever quirk of an imagination, a pharmacist prescribed a drug that they weren't legally privileged to do and the prescription was filled by the pharmacist to the client, if the pharmacist is going to be legally liable or is it the optometrist who is initially and primarily liable for asking for that drug to be dispensed? That is really my question and it has nothing to do with ethics or their dedication to their profession.

Number 0493

Harry Treager: Madam Chairman, I understood your question, but its hard for me to answer both the optometrist and pharmacist would be held liable to their respective boards.

Chairman Tischer: That's more clearer, thank you. Rep. Martin?

Rep. Martin: Perhaps a statement, in relationship to your question about the concern about the pharmacy board, Number one: Over the years I've been involved in medicine there has been a number one agency that really monitors whether by law or their professional standards what medical professions are doing in the misuse or use ...medical services... so there is going to be a potential abuse, they are going to be the first one to stop it. Also, I think we do have a ...in the FDA and the Medicaid Program, Medicare Program that monitors the prescriptions that go out and here again those doctors in the past who have been guilty of over use or abuses that came to the pharmacy and I don't think they'll hesitate to make sure the optometrist are responsible agencies once it is given to them. So it is not written in law, we do have this agency that above all has been controlling the misuse of drugs.

Number 0499

Chairman Tischer: They are to be complimented. Do you have any more comments Mr. Treager?

Mr. Treager: No Madam Chairman.

Chairman Tischer: Thank you very much, if you will stick around, maybe there's somebody else who might have a question.

Chairman Tischer: We have several more witnesses before we break for lunch, so I'd like to with the committee's permission to go ahead since they were patient with us to wait on the beginning of this hearing. We have a doctor Peter Cannava in Soldotna. Is Dr. Cannava available?

Dr. Cannava: Yes, my name is Peter Cannava and I'm an ophthalmologist in Soldotna here and I'd like to address a few points and I'd like to answer some questions which I felt were left unanswered. One point I think is important, is that there is no human cry from the people of the state for this bill to pass and there's several good reasons for it. One of which is that the people desire

stricter drug control laws, not liberalization of the existing drug laws.

The state already spends a lot of money on enforcing drug laws and tracking down drug problems, we don't really don't in any way and the people don't I gather from their attitude desire any more liberalization over it.

Number two: The cost of medicine is high and the people of the state and the country would do anything to try and hold the cost of the way it is or at least reduce it. And this bill is going to increase the cost, for several reasons; one of this is repetition of service and the second reason is, its going to increase the cost of medicine, its for the mis-diagnosis with the implications which will ensue after that.

The third reason; it will increase the cost of medicine in the treatment of disease and injury because there will possibly ...too long without the appropriate treatment being started. The last reason why I feel that it will increase the cost is that this was ... there's very little difference in charge between an optometrist and ophthalmologist for an office visit for similar service and I think if the people can buy an ophthalmologist visit for $25 and an optometrist for $25 there is little reason to suspect they will select the ophthalmological visit that is the same amount, because the money is buying a lot more. There were some questions raised which I don't think were answered, so I would like to mention to Rep. Davis that well it is true that the health aides in the village and even the EMT on ambulance have ... (noise on tape) responsibilities in certain instances than do the optometrists.

I think it should be realized these paramedical people are controlled by physicians and any time they act they do phone in for permission from physician and are very willing to do this.

Optometrists are very reluctant to be under the supervision of the physicians or hospital and as you can see from the wording

on the bill they resent and are very much oppose to having to answer to physicians, and I think thats an important difference because the health aide issue and the EMT issue is raised so frequently. Rep. Tischer said why isn't the public more attuned to the difference between OD and the MD? And I don't think you run around finding medical doctors advertising that they do things that the optometrists does. But the reverse is very true, there use to be a clear difference between the OD and the MD, because our services were advertised differently. The past few years you will notice that the optometrists are advertising that they perform services which traditionally were performed before by physicians and I think is certainly muddying the water.

The last issue you mentioned turf battle; I think you can interpret somewhat a turf battle and it wouldn't be hard to make the analogy of our feeling with those of lawyers for example; if optometrist said, well we had 100 hours of court law, we want to go to court with our clients and practice law, or if an accountant says, we had 100 hours of court law, we want to go to court and represent our clients, how would the lawyers feel if such were to occur? That's all I have to say. Thank you.

Chairman Tischer: Thank you very much, Rep. Davis has a question.

Rep. Davis: Yes, I just have a quick question, I appreciate your comments. My question is; is there some kind of an agreement, lets say an optometrist has someone in his office and its Saturday and he's in a village, is there some kind of an umbrella coverage where he could than, if is possible that he could then contact...and say look and I have this situation in my office or whatever. Is that a practice that is common or is that even permissible by law?

Dr. Cannava: That's a good question, I think the Bethel situation functions very nicely, we hear the Bethel optometrist do ... (end of tape).

Tape 5, Side 2, 2 of 2
Recording
Number 0002

Chairman Tischer: Thank you very much, would you clarify one more thing for the committee, I thought I heard you say in the beginning you favored the legislation, I would like your position made quite clear to us.

Dr Cannava: I favor the legislation, I'm opposed to the legislation, did I hear you correctly?

Chairman Tischer: We are getting a three time around echo here and I presume your getting the same thing, I'm not sure, maybe someone's microphone is broken or something, now I understand you to say that you do oppose the bill, is that correct doctor?

Dr Cannava: Correct.

Chairman Tischer: Thank you very much for your testimony, we have a Jan Nyboer from Anchorage to testify.

Number 0011

Moderator from Anchorage says there is an echo on the line.

Number 0020

Dr.. Jan Nyboer: This is Dr. Jan Nyboer speaking, I'm a forty-one year old ophthalmologist, certified and I have been practicing in Anchorage area for the last 8 years. I might just briefly mention you my background; aside from my degree from college, I have received a Masters Degree in Physiology and Pharmacology, I have aside from the 4 years of medical school have received additional year in internship training at a 4 year residency training in ophthalmology at the Mayo Clinic.

One thing that pressed me about our speciality is that I like optometry, ophthalmology is a branch medicine and I feel optometry since it is not a branch of medicine can just further confuse this matter. Our background has done in training has been closely integrated with clinical experience in knowledge and pursue this knowledge that we are able to gain knowledge which really bring us to day really defending our position as ophthalmologist. We are proud of our profession and realize

what we can do in terms of the public service.

The medical point that I'm opposing is the use of drugs by the optometrists is this; the eye can not be treated apart from the rest of the body, statement by Dr. Patterson earlier mentioned 95% of all the eye problems can be diagnosed and treated by pen light or undilated pupil carefully history .... Yes, we do dilate people's eye in our office but we are interested in giving that last 5%. Now before, ...for a general exam, perhaps you could be surprised what we could tell you about your eyes, and again I mention that we are concerned more than just the eye.

A similar local complaint could indicate that something else is wrong and perhaps I would be able to tell you that you have early signs of diabetes, hypertension, early signs of multiple sclerosis, brain cancer and brain tumors, maybe thyroid ... disorders, or even a surgical problem. Its hard for me to even imagine what my background knowledge without having this intensive integrated clinical experience in the past, even began to guess whats going on with these situations and for this reason, sometimes I have to consult other physicians and colleagues to get further answers.

Number 0054

In short, when I'm looking through the eye, looking at the back of this its not that we are just ...(noise on tape) computer print out of what we see there, its an analytical procedure considering all the possibilities drawn and all the general medical knowledge in training and clinical experience. In terms of the drugs being applied to the eye, it is well known that it enters in the blood stream quickly and ...the problems of some of these drugs have the potential to stop the heart, stop breathing, cause seizures and could even blindness... and what physician is going to want to cope with these types of questions. Now some of the optometrists in Alaska who want the privilege of using diagnostic and therapeutic drugs for their clients and I say some because they are not all in agreement that they want this. It has being denied in the past by all previous Alaskan

Legislators, but it is re-attempted every year. And with this privilege, comes responsibility, but how can one be really responsible without the knowledge, even general physicians here in town and emergency room physicians are aware of their limited knowledge and the potential hazards to the patients.

They are intimidated by a good percentage of these cases they have and so they do call us for consultation immediately, eye sight is too precious and too perishable to laws, however well, their intentions may be that could result in permanent loss or impaired vision. So if I can by my position here against this bill can say that by opposing this bill, I feel that I have won, because I'm a long term thinker and not a short term immediate gratification thinker.

Now, considerations further on this, dilations for treatment of course have certain dangers and we don't need to get into that, how does the optometrist really know what he is treating without that indepth knowledge, when does he decide to refer the case, what if he never does refer the case.

Number 0085

I can tell you from my experience at Mayo Clinic, we saw interesting cases from all over the country, I can go through several horror stories regarding delayed referrals and situations like this and who pays double or suffers...(noise on tape). So, the optometrists have the right to use free enterprise, but there are some things I feel they don't have, basic college degree, medical training, clinical experience, they are not educated primarily by ... they do not have hospital privileges, many of them do not have a follow through program, after the patients referral for which they can learn from the past patients and many of them do not have rapport with other ... for advise. There are some things that I feel the optometrist should not have; I feel they should not receive support in the national campaign to get something for nothing, they want the MD's image without 24 years of schooling. They want to re-educate the public by PR rather than further educating themselves, they want their patient's trust

without taking the responsibility. I am not in favor of any compromise bill, I may sound abrasive, maybe we are dealing with a ego problem or a financial marking problem looking for legal license, but please don't give it to them. Thank you.

Number 0107

Chairman Tischer: Thank you Dr. Nyboer, I would just like to make a comment from some of the comments which you were making. As little similarity to the bill before us in terms of the expansion that you talked about; one of which is the hospital privilege and so forth. I would not want anyone to be misled by the some of the testimony that you have given, although you were justifying the Doctorate that you hold in order to practice medicine. I do have a question; the frequency in which the other states allowed prescription drugs to be dispensed and prescribed by optometrists, can we have approximately 35-38 states who's citizens are now jeopardized if you will, according to the ophthalmologists' position in terms of their eye health. Do you think that is a menace mistake, that 38 states have already made and how do you compare that with those that have not so far, thats about 2/3 of the entire 50 states.

Number 0123

Dr. Nyboer: Well, you know, two wrongs do not make a right, I feel that I can't really in terms of the numbers I'm not prepared to ... those numbers, only to say that, someone would like to give me some testimony from ophthalmologist and basically check the fruit on the tree and talk to the people that are in the middle of the system and namely the ophthalmologist and feel how happy they are with the situation. I really don't know.

Chairman Tischer: Thank you doctor. I think the main concern of this committee is to make sure that there are provisions for the general public for their protection of health and welfare, and also, on the other hand to make sure that there isn't a corner on the market, if you will, on any specific thing. Not just dealing with the paramedical profession. This committee is concerned and will deliberate on those issues as best as we know how and the advise from the professionals and legal

professionals that we are able to garner. We have one more person to testify, unless there are others out there, Mr. Center from Anchorage and is that person still available?

Number 0142

Mr. Center: My name is Thomas Center, M.D., I'm a board certified dermatologist who has been in practice in both Anchorage and Fairbanks, and am going on my third year. I also am informally an emergency room physician, approximately 7,000 hours I've serve in various emergency rooms across the country. I have not practiced that sort of medicine since coming to Alaska. I'm here this afternoon for two reasons; one as an individual physician, and the second; is in my capacity as President elect of the Anchorage Medical Society, the later capacity I would like to inform members of the committee that the Anchorage Medical Society unanimously indorses the resolution firmly opposing this bill. As an individual physician I just have a couple of comments to make and than I will be done.

Number 0156

The first that I have is; I wonder what need there is for this proposed bill, as being pointed out by a couple of the other speakers this morning there are no consumers present in this room and I would be curious to see how many consumer patients are in the other rooms around the state. Secondly: Again to repeat that comment made earlier by both Dr. Patterson and Dr. Nyboer, the 95% of eye complaints can be handled essentially with very little hands on medicine and no drugs, I think is a very good one to keep in mind. However, back in my experience as an emergency room physician, most problems that I saw when I was in the emergency room were referred on to an ophthalmologist, because I felt even with two months of clerk-ship as a medical student and then as a resident in dermatology, I did take a month of ophthalmology because I felt that there was enough correlation between the eye and the skin and that I should broaden my knowledge in that area. Even with those two months I felt I still felt uncomfortable, particularly I worried about the last 5% that Dr. Nyboer so eloquently talked about.

Number 0171

The second concern that I have; is really

related to the first, in addition to the need I wonder about the possible harm that could be brought upon the patients of Alaska by giving a group of people who not really have the training or background to handle some more sophisticated drugs that I can see possibly could be included in this generic list thats been offered. Let me give you a couple specific examples; and again I am not an ophthalmologist. I wonder about someone as an optometrist being allowed to prescribe a drug such as demoral, this is a drug which is a ... blocker, what little I know about the drug and is used in ophthalmology, is that its marvelous, it helps to control glaucoma, however, like any good drug it has side effects.

From my emergency room background, I know that such a drug in that class precipitate a case of asthma, and what would the optometrist do if he were to prescribe this drug if he were in the bush somewhere, (loud noise on tape), even more alarming to me would be an ... reaction, a person could get from topical neosporin, if put in someone's eye rapidly absorb in the system where the patient could suffer from complete cardiac arrest and die. I would like to ask the members of the committee, would you like to have that resting on your conscience, I'm done, thank you.

Number 0189

Chairman Tischer: Thank you Dr. Center, any questions from the committee members? I'll repeat a question that I had for the previous witness. Whats your feeling on the measure of success if you will, by the push if you will, the optometrist throughout the country successfully presenting arguments and obviously new legislation was initiated and about 38 other states regarding the dispensing of prescription drugs. Whats your opinion about that?

Number 0195

Dr. Center: Again, this is my personal opinion, I think that the optometrists in those states must have good lobbyists and I don't think that their legislatures in those states are good as ours, furthermore, thats one of the reasons I came to Alaska, because I felt that the lawmakers were a little more inlightened and would protect the public with far greater expense than the 38 states

where the optometrists are allowed to prescribe drugs.

Chairman Tischer: Thank you very much doctor. Dr. Ball has a comment.

Number 0202

Dr. Ball: I would like to make a comment to your questions, specifically to clarify in those 38 states that have given the optometrists the right to prescribe drugs, it is only three states that optometrists have the right to prescribe drugs, the other 35 states have the use of diagnostic drugs in their office.

Chairman Tischer: Thank you for that clarification, Dr. Ball. Are there any other witnesses out in the field that wish to come forward and testify before we take a recess for our next bill.

Number 0210

Dr. Jim Graves: Hello, this is Jim Graves, optometrist from Fairbanks, Alaska, Fairbanks Medical and Surgical Clinic. I'm back in this year to state my position on this legislation, I went to Pacific University College of Optometry with a grant from the State of Alaska, and this was sponsored in part by WICHE, as with Dr. Dobson. When I went to Pacific University and was also involved in elective for sensor ships, such as, at the Yukon-Kuskokwim Health Corporation and Seattle Indian Health Board, I studied both diagnostic and therapeutic pharmaceutical agents, and much of that study was done in a clinical study. Since my schooling I've come back to Alaska my home to practice, being a resident in Alaska for 15 1/2 years, I wanted to establish an optometric practice in Alaska even though I knew relative to what I learned in school, and being ... to optometry to practice I would still be able to practice limited optometry.

I feel that those who will benefit most by the passage of this legislation would be the patients themselves. When applicable, they'll have the same appropriate services as provided by ophthalmologists, by optometrists without extra expenditures.

I'm not concerning myself right now with the difference between fee amounts, but the fact

is whenever you have to go to a second doctor its going to cost you a second fee. I would also like to mention the importance in the extra time off that a person must take off to go to an ophthalmologist for a second evaluation.

Also, I would like to ask Dr. Patterson before he changed his position on the use of diagnostic drugs, Dr. Nyboer and Dr. Center, what about the other 5%, the extra 5 out of every 100 persons, that may have a serious problem with their eyes that could potentially be blinding. If optometrist are limited to such that they have just those clinical evaluatory tests to make without the use of drugs, would they than, as you mentioned have 5 out of every 100 that could potentially go blind, whenever they could go to that primary health specialist? Thats all, thank you.

Number 0252

Chairman Tischer: Thank you. Are there questions from the committee members? I have a question or comment, and it deals with your educational background, specifically you mentioned in regards to study of dispensing drugs and so forth. I need to have some clarification on that as far as individual's concern, when you go to school and are studying to become an optometrist, how does your education and requirements compare do that of an ophthalmologist in dealing with prescription drugs in dispensing and administering that, please, if you have that information.

Number 0258

Dr. Graves: Ma'am I feel that could be best addressed by a committee member relative to this legislation.

Chairman Tischer: I'm not sure what you mean by that.

Dr. Graves: Thats a committee member meaning an optometrist who is on the committee to follow this legislation through.

Chairman Tischer: You are talking about optometrist committee, you are not talking about the legislative committee, is that correct?

Dr. Graves: Yes ma'am.

Chairman Tischer: Do you have someone in mind?

Dr. Graves: Well, I think Dr. John Demsky is one, Dr. Steven Dobson would be another one.

Chairman Tischer: Thank you, are either one of those gentlemen present yet and if so, would either one of them come forward and try to answer my question?

Number 0270

This is the moderator in Anchorage, Mr. Dobson is no longer present at the Anchorage center.

Chairman Tischer: Is Dr. Demsky in Soldotna available?

Dr. Dobson: Yes I am.

Chairman Tischer: I will restate my question as best as I know how. I'd like to know from somebody when an optometrist or one who is wishing to become one takes their training and scholastic education on drugs and prescription drugs and such as that.

How does that prepare with an ophthalmologist's training, is it optional in terms of what is studied and is there amount of time that must be is mandated for comple[illegible] and certification of your educa[illegible] What is it that is different from optometrist and an ophthalmologist? Co[illegible] you tell me that?

Number 0283

Dr. Dobson: I can try. I graduated over 10 years ago and at that time there was only (1) state that allowed any optometrist to use drugs, so my pharmacology training ends in formal optometry school is very limited.

I had a (2) hour course in most of the training I received and since than its been post-graduate or just about all of it. Now all optometry schools have a minimum of 110 hours of ocular and systemic general pharmacology and courses they also have labs for using those drugs. Ophthalmologists receive their diagnostic training in medical school and they received much more intensive training and clinical use of therapeutic

drugs, most optometrists schools work jointly with other medical schools or with pre-sensorships, inter-ships such as Dr. Graves and Dr. Dobson mentioned, or their therapeutic use of medicine. Did I answer your question?

Number 0299

Chairman Tischer: Yes, you did in part, what it sounds as though, sounds like there is going to be any measure of relaxing, you would have to have examination to decide whether or not an individual qualified and knowledgeable versus their training and their clinical experience in dispensing drugs and application, thereof, am I joined the proper conclusions?

Number 0304

Dr. Dobson: Yes, I would not want any grandfather and if this bill is passed, as a board member we intend to examine everyone who wants to use drugs.

Chairman Tischer: Thank you, Dr. Ball, do you have any comments on that? Could you help us out with that a little bit?

Number 0309

Dr. Ball: Yes, initially I'm a little confused that somebody who admittedly had so little training initially and than only in post-graduate courses later is going to be the person deciding who has adequate training to dispense drugs under the present proposed bill. And to answer your question; as was pointed out just before, in the past optometry schools have not covered pharmacology or only in just a little cursory lectures at present they do require two semesters of pharmacology, as do medical schools require two semesters of pharmacology, but the big difference is after that, thats in second year of medical school for the next 6 years theres the practice of pharmacology in human subjects, it marks the difference between an ophthalmologist and optometrist.

Chairman Tischer: Thank you for your help Dr. Ball. Are there any other witnesses out in the area that would like to testify?

Number 0332

Dr. Demsky: I would like to further clarify that, in regards to Dr. Ball's comment about our limited knowledge, we certainly intend to use all of the resources available for

writing the exam and for giving the exam, as the other three states do, who now use therapeutics. Our national board is in the process of writing a written national exam for pharmacology and pathology for those states who have the use of therapeutics.

Chairman Tischer: Thank you, as that exam is being written, what assistance from the medical profession are you aware of in creating that examination?

Dr. Demsky: I believe there are specialists and authorities, especially in ophthalmology who will be assisting in the writing of the exam, however, since I'm not associated with that board, I cannot answer that, not 100% accurately.

Chairman Tischer: Thank you, would you be able to assist this committee by giving contact that we might secure information that is desirable for committee members regarding that national test? Is there a contact, is there a board, office telephone number or address that you might request that information?

Dr. Demsky: I believe there is, I don't have that with me, but I could send it to your attention, if thats alright with you.

Chairman Tischer: I would appreciate that very much if you could, are there any other witnesses that could wish to testify.

Moderator: Rep. Tischer, this is Anchorage and Dr. Patterson would like to make additional comment at this time.

Number 0348

Dr. Patterson: Rep. Tischer, in one of the references that I alluded to in my original testimony is by Dr. Pearson, specifically looks at the curriculum with the number of hours of study in pharmacology and comparing optometry to ophthalmology, this study was published in '77,

I have included it in my packets that I've sent before, I will do so after this testimony, but Dr. Pearson ... lives 126 hours of pharmacology being standard or average in the optometric schooling contrast to rather marketedly to 200 hours in the

ophthalmological training with additional 3 years of clinical experience with 148 hours of ocular pharmacology. Pathological training; study of pathology, specifically 60 hours optometrist compared to better than 200 hours, so approximately 3 to 1 would be a conservative estimate, difference in hours devoted to study, and like I said earlier, I would be sending you this with the letter, Thank you.

Chairman Tischer: Thank you, Dr. Patterson. What I'm attempting to do here is to secure enough information so that the second bill might be drafted, if that is the wish of the committee, to make sure that guidelines that are provided for in the legislation so that all areas are protected, but all areas are equally addressed and thats the reason for my questions and request for information. It is not the wishes of the Chair that this measure goes unaddressed, on the other hand we are very cognizant of the dangers involved in exercising legislative powers over an area that none of us have the expertise to do, we are hopefully going to garner as much information from the professionals as possible so that we can make an intelligent judgment as to what decisive action can be taken in fairness to all.

I just want to insure those that are still listening that I'm not interested in ram roding this legislation through with eyes closed, on the other hand I'm not interested in preserving a turf that may very well be expanded carefully and with consideration for the benefit of the general public as a whole. So, thank you very much for those of you who have put the time in testifying and again, my apologies for the lateness of the beginning of this hearing, with that we are going to recess for 20 minutes so that committee members can grab a sandwich and be back at 1:15 p.m., to continue the hearing on the next House Bill. Thank you very much. Recess.

Tape #6, Side 1, 1 of 2
Recording
Number 0002

Dr. Jay Bonner: ...well I first can't answer your number of the ones that have been misdiagnosed, the majority of patients that

I am seeing now are referred by another physician because they see my expertise in the field of phrenologist because they either didn't know they had ... problem or they were questioning what type of problem they had. The majority of these are legitimate questions, many of them don't have questions that are being asked; example, they refer a patient to, since we are talking about adrenal problem, does this patient have ... disease. I think that the question that they are asking you is legitimate many times, this is a rare disease many times they don't have it, the question they pose is; legitimate and so that...(loud noise in background). The naturopath owe them one patient that I can think of it not directly referred to me, the patient from the naturopathic physician came on their own. So I just want to be more specific.

Number 0014

Chairman Tischer: Thank you doctor, that answers my question very nicely. I appreciate your comment. Lets see, I think we have, we need to go to Mat-Su now.

Number 0017

(anonymous) ...and I'm a mother of four children and I would first like to make a statement, that I and my husband are in favor of the House Bill 347 for the licensing of naturopathic physicians, and I feel it is our constitutional moral right to chose the kind of doctor and treatment that we feel that is best for ourselves and our family. Naturopathic treatment has helped me in Alaska, Oregon and Utah, when other types of treatment could not.

I feel that highly trained and skilled naturopaths in our state would be an advantage to us in our community, and also to ensure that naturopathic medicine will be practiced responsibly and professionally, so I would urge you to support this bill.

I would also like to say that I've had one child in naturopathic clinic in Oregon and I had two children at home with naturopaths, I had one in the hospital and I have always had very professional care and felt very comfortable and I would also have another child coming and I would definitely want to have it at home and have that choice over

the hospital. I feel that its helped many women who had children at home for the naturopath and they never had complications or problems, and when they had, the naturopath was able to take care of them responsibly and I also like to state that you mentioned before that the reason we didn't have a Board of Naturopath before was there wasn't enough people, there was only 3 or 4 practicing in Alaska.

If this wasn't passed than what would ensure that in the meantime we would be able to practice according to the ...of our conscience ...that there was not a board to regulate this and I would just like to urge you to pass the bill and put my support and my family's support on this bill. Thank you.

Number 0036

Chairman Tischer: Thank you, I have a question, as a mother of 6 children who were born 5 different births, I have twins, you and I can have a private conversation here if you would. One of the doctors in her earlier testimony, I don't know exactly who it was, had indicated that there are times that during childbirth as you and I both know, there is usually surgical procedure to arrest the stretching of the vagina for the child to pass through, sometimes that tear reaches a long way. Have you had that experience in your natural childbirth, whether it be with a naturopath or midwifery? How was that handled, did the naturopath do the surgical stitching or what happened?

Number 0046

...Yes, my first child was 8-lbs, 14-oz and I did not have a surgical for the baby to come through and there is a procedure by messaging and by helping the baby to come through that this is not necessary. I had all four of my children without any risk or care without any surgical tear and I just had a baby that was 9-lbs., 10-oz. also.

Chairman Tischer: Boy, you beat me about 3 oz., there. Thank you, I would like to go to Fairbanks and than we have one witness here in Juneau.

Number 0054

Shirley... in Fairbanks: I would like to speak for Sheila Baker who could not wait,

she had to be back at work, so this is her written statement that I will be reading:

As the former owner of a health food store many people who are not helped by standard medical procedures were helped immensely by a naturopathic doctor in Anchorage. I myself have been, and feel very strongly about being denied my rights to use the type of medical care I want. A woman I know had a tumor on her uterus and the medical doctor wanted to remove the tumor which would result in the abortion of the baby she was carrying, she asked me what to do, and I said, if I were she I would go to the naturopathic doctor in Anchorage, which she did. Not only did the naturopathic doctor dissolve the tumor with treatment, but the woman gave birth to a beautiful, healthy son. And on my own, I strongly support House Bill 347 for my ... for naturopath and I think that one of the important things that we looked at today so far is that keeping these people and other alternatives, health practitioners in the closet will not help people get healthy. All we'll do is help people practice fearfully and without more information in the public and its very important that we let more people know that alternative help is available without leaving the state, and that we make here quality alternative help available to anyone who desires it. Thank you.

Number 006? Chairman Tischer: Thank you very much, and now from Juneau we have Mr. Treager.

Number 0064 Harry Treager: Madam Chairman, my name is Harry Treager and I'm the Director of the Division of Occupational Licensing for Department of Commerce. I am just here to answer any questions the committee might have. I think that possibly I could offer some assistance with a difference of license and ...license activity, without the state license sanction. Its been my experience from the Attorney General's Office that without a license doesn't mean that the practice can't continue.

The license moreless legitimizes the profession, but any profession would carry over to another already licensed profession is where the problem starts to exist. And I

think from hearing some of the testimony this afternoon. (problems on microphone, Anchorage couldn't hear the testifier).

Harry Treager: Again, Rep. Tischer, its the licensing or unlicensing function, its because one occupation or profession is not licensed does not prohibit that occupation from proceeding, its when they carry over areas of those already licensed; such as naturopathic healing to medicine, thats where the problems become complicated. Our position is that we are not restricting anyone from seeking what ever care or treatment they desire. Its just that cross over situation that complicates the issue, and I think one of the things we would have no problem with licensing naturopaths, I think our problem is with defining the scope of practice.

Chairman Tischer: So, its really a turf that we are protecting in a licensed area and a non-license area, isn't that correct?

Its kind of like truckers that in some places they are required to be licensed to do certain things and travel certain places and where somebody else gets into their area there is a complaint, because they are infringing on, I think its the same thing as professions. Am I reading this correctly, Mr. Treager?

Number 0095

Mr. Treager: Madam Chairman, I don't think I'm qualified to on the turf protection issue, you could also say turf protection and try to become licensed also. It sounds to me more like a legal question, but I just encourage the committee to give something in the scope of practice that you would want me or for the state to follow.

Number 0100

Chairman Tischer: Thank you, Rep. Uehling has a question.

Rep. Uehling: One of the questions that I had, do we have an idea to exactly how many naturopaths we have in the state right now and what we are talking about as far as numbers?

Mr. Treager: Rep. Uehling, the last knowledge I had was two; Dr. Pettyjohn in

Anchorage and Dr. Jamison here in Juneau.

Rep. Uehling: A follow-up question, what you're saying is we have a couple of people, it sounds as if have other people to testify, but there is no licensing structure, there is a licensing structure now?

Chairman Tischer: There is no licensing structure, Rep. Uehling, for naturopathic medicine and I add to Mr. Treager's comments that even as of late last year there was testimony and you will see it in your minutes that there were two practicing naturopaths known, there was another naturopathic practitioner that wasn't practicing that medicine because there was no licensing procedure. There are also several chiropractors that are trained as naturopathic physicians, but are practicing under the licensure of chiropractic.

Rep. Uehling: Than I will also follow a question on that, so in other words if we were to license them, what is that potential number that we will actually have, obviously there is a lot of report there from the stand point of people testifying, but what is the potential number that we are going to license?

Chairman Tischer: There has been a request for that information and all that I have been able to determine is that, there are more that would attempt to be licensed if there was a provision for that so that they could legally practice and there has been a request to establish a board for naturopathic medicine and it has been suggested that perhaps we might make a provision within this legislation, that when the numbers reach, lets say (6) that is an automatic trigger to establish a board for examination of licensing. But until that time, although there has been objection by a number of witnesses, that the Department of Commerce and Economic Development be the overseer until that time occurs, but the objection comes from the fact that there is no expertise in that department literally do the licensing and examining, because they don't have the background.

So it would have to be some input from some place or some content within this legislation to establish guidelines by which the department could establish their examination criteria and thats what the original bill attempted to do, to give that guideline and seek that input. Tt is definitely addressed and we might want find ...so that it provides the guidelines for the department of temporarily at least, to do exactly that. I'm sure that the profession itself probably would be instrumental itself in assisting in that and I sure would be glad to and as well as consultation with the medical profession in order to make sure that the general public's protection is at hand.

Number 0140

Chairman Tischer: If there are no further questions from Mr. Treager, than I'd like to go back to Anchorage again and take the next two witnesses.

Diane McDermott: Hello, I'm here to speak in favor of House Bill 347, my husband wrote this editorial and it explains our feelings on this matter. (loud noise on tape) ... my wife and I were informed by our pediatrician that our son would have to be kept on three very strong drugs and a series of allergy shots for several years. (loud noise on tape).

Number 0168

Chairman Tischer: Thank you very much Diane, I wasn't able to hear you as clearly as I'd like to have and I'm going to ask the committee members if they heard. Otherwise we could perhaps ask LIO to transmit your testimony written so we could make it part of the record, just for clarity, if you could do that Diane, we would be very appreciative. Thank you and I would like to have the next witness in Anchorage.

Number 0173

Moderator in Anchorage: Rep. Tischer we have Julia Reinhart from Anchorage next.

Julia Reinhart: I have had a relatively short experience ...very pleased to say that I've experienced. First of all, there's been some questioning of the training that naturopaths receive. In many cases a patient does not even know what to ask the regular physician as far as their training

is concerned, we don't know what to ask a doctor, do you know how to do this medication, all kinds of ways given, will you show me? Do you see what I'm saying, we don't even know what to ask the regular doctor in his training. What it comes down to is the patient's responsibility to establish individual trust in whoever is treating him. There are incompetent physicians, even with all their ...regulations, boards and so forth, licensing or requirements that they have to meet. So I think first of all, I want to continue to be able to go to naturopath,

I'm sorry that there are so many licensing requirements in effects of life, but if this bill is required for my naturopath to continue practicing, I am in favor of it. If someone is concerned about the care that they are receiving whether from a naturopath or from their regular doctor it is up to them to ask questions and establish the trust in their care giver. Thank you.

Number 0195

Chairman Tischer: Thank you very much, Julia. Are there questions of the committee? Hearing none, I'd like to go to Mat-Su and take another of their witnesses please.

Debra Lucas: I'm a patient of Dr. Pettyjohn. When I came up here almost two years ago I was 8 1/2 months pregnant, when I was down in Texas my doctor told me I would have to have a Caesarean. When I got here I couldn't find an OB doctor to take me, so I was referred to Dr. Pettyjohn from my brother-inlaw and he told me that there was no complications why I couldn't have my child naturally and have it at home. I had my son at home and I was in labor for 21 1/2 hours, my son did rip me with his shoulders, Dr. Pettyjohn took care of me and I've been going to him ever since. I'm 6 1/2 months pregnant now and I wouldn't go to an OB doctor if it was the last thing to do, that would be the only way I'd go. I am for this bill and I think it needs to be passed and I agree with everybody that is for this, I think it does need to be passed. It is our opportunity to have the choice of who we want to go to and who we don't want to go to. Thank you.

Number 0213

Chairman Tischer: Thank you Debra, if I may ask you a personal question, can you and if you care to answer tell me why you weren't acceptable as a patient to an OB doctor, under what conditions did you seek one?

Number 0217

Moderator in Mat-Su: Madam Chairman, your coming in very badly and we could not understand your question.

Chairman Tischer: Thank you, I'll try again, please identify if I'm coming through better; Debra, could you tell me if you would please, if you care to answer, why was that you weren't accepted by an OB physician and by what criteria did you try to select one when you first came here?

Debra: Yes, I was referred to three different doctors and I won't give their names, but none of them wanted to take me because I was so far along and didn't want to take the risk. When I left Texas I had my medical records with me, blood tests and everything so that if anything did happen to me or if I had to go through the emergency room I had all my paper work with me.

Number 0231

Chairman Tischer: Are you saying that because of your risk that they didn't want to attend to the birth of your child, is that what you are saying?

Debra: I don't understand that question, please repeat it.

Chairman Tischer: I'm trying to figure out as a mother of (6) how in the heck did a doctor turn you down if you went to them for assistance in the attempt to have your child, if they turned you down and wouldn't accept you as their patient.

Debra: I was told that I was too far along for them to accept me and I don't feel that was right if they are an OB doctor they should be able to take anybody no matter what risk they have.

Number 0242

Chairman Tischer: Thank you very much for your candid remark, Debra. I would like to go to Fairbanks for the next witness.

Efrin Resume: This is Fairbanks and I am Efrin Resume and I have a few points to bring up: One is that I was raised in New York State and at that time the chiropractor profession was not licensed, as a matter of fact it was one of the last states not to be licensed. Now I was raised and my family on chiropractic care and naturopathic care and so we were very involved in what was going on there. At last (the AMA in New York State by the way was very strong), they realized that some licensing was necessary and what they tried to do in my opinion was have chiropractic license with the greatest limit possible and so chiropractors were licensed there even though it did take them a very long time. It seems to me that licensing is the only way that doctors in this state can answer their own questions as to the professionality and still of the naturopath.

The other area I would like to address; that since I've been in Alaska for the last 15 years, I have lived a great amount of time in the bush, as a matter of fact 11 years ago and a couple of days, I delivered my own daughter in a cabin on the Yukon River and I have not had any specific training in any of these areas that we are talking about. But I did try to get as much advise as I could and I have talked to many of the people living in the bush in the Interior of Alaska and I have not found yet one person who was not very interested in naturopathic medicine and was not followed and tried to get advise in those areas.

So I think that there is a great need for when one was in the bush one might have a radio and one may be able to get a plane called in or have a plane, but basically the many situations even in a village, prevented medicine is crucial. This isn't enough time in many circumstances to get to the doctor, so many young people come into Alaska and wanting to be away from the city vendors have had a great need to learn and to get by as far as keeping their health and keeping the health of their families safe where they do not need surgery or do not need to get to a hospital. Naturopathic medicine is that alternative, that helps people learn more about their bodies and do care for

themselves where they will avoid having to have the use of a hospital. So I am very much in support of HB 347. Thank you.

Number 0284

Chairman Tischer: Thank you, are there questions of the committee. Hearing none, I'd like to announce that because there's at least 15 or 16 folks at the Anchorage site still waiting to testify and I am going to take 3 at a time from Anchorage, than alternate to Fairbanks and back to Anchorage or the Mat-Su so that we will give equal time to every one before they decide to leave.

Number 0293

Steven Cox: My name is Steven Cox and I reside here in Anchorage, and I would like to state a few facts; my opinion for passing HB 347, it is my belief that people in the United States are ...(loud noise in background) ... for the American Medical Association and through this we had very little choice as far as what type of medical care or health care we need to have. (loud noise on tape). I feel it is very beneficial and has come a long way ... but I also believe that our nation also needs more emphasis placed on life saving medicine which naturopathic practitioners provide. (loud noise on tape)

Number 0336

Chairman Tischer: Thank you very much and could we have the next witness from Anchorage, please.

Number 0337

David ...: My name is David ... I am speaking for myself and also for my wife, I've been a patient of Dr. Pettyjohn since when he first began his practice in Anchorage and I have never had any cause to regret that my family has been under his care, what I'm basically saying is that I'm very much in favor of this.

Three doctors here have said they have no objection to alternative health practitioners practicing, but they don't want to see any kind of licensing which to my mind is they are going to give us our choice, but they are going to deny the practitioners the right to provide us what we want and thereby, make us incompetent in what is now perceived as a crime, practice of medicine without a license. They are

denying the practitioners the right to provide them with care that they would give us, there seems to be a growing body of evidence that a lot of the practices, methods and really the entire focus of the "traditional medical community" are inappropriate or based on assumptions which have not been proven or just plain don't work. So I think that we really come down to a question of attitude and approach, prevention versus treatment of symptoms helping the body to heal itself versus intervention with drugs, which often have many unpleasant side effects and also often inappropriate and unnecessary surgical procedures.

I feel that naturopaths need to be licensed, I would hope that would be just the beginning, I would like to see a licensing procedure established for mid-wifes. I'd like to point out in Holland the OB courses are taught by the teachers of the national mid-wives' school, the mid-wife in Holland teach the doctors how to do their jobs, because it is perceived in that the country that the mid-wives know more about what they are doing. My own child was born with the services of a mid-wife and I was present there, there were no complications of any kind for which I would say that we were blessed, but the attitude of the mid-wife that dealt with us and the attitude of all the mid-wives that I talked to is one of constant vigilance to possible trouble and they have fairly strict series of guide lines so that if you don't fit within the practice of their requirement they won't do the delivery, they will send you to the doctor or to the hospital. They know what their limitations are and everything that I've seen says they are eager to operate within their limitations. I would say this an attitude that characterizes all the alternatives of practitioners which I dealt with and I recommend that this bill be passed into law.

Number 0401

Chairman Tischer: Thank you very much David, and more witness from Anchorage, hold on just a minute, Rep. Koponen has a question.

Rep. Koponen: Thank you Madam Chair, the

question I have is in regards to mid-wives, do you happen to know how many mid-wives there are in the different categories?

David: I don't understand what you mean by categories.

Rep. Koponen: Well there are nurse mid-wives or plain mid-wives or nurse practitioners who are mid-wives or in other words if there are people who aren't MD's who do attend childbirth and I'm just wondering if you have any notion how many types of mid-wives there are, or how many gentlemen, mid-wives. I heard a number of mid-wives in practice and I was wondering how they were in practice.

Number 0416

David: Well, mid-wives that we dealt with was a nurse mid-wife, her education was in England and she immigrated to the Unites States and she went through a re-accredited program with a college on the east coast, I believe Boston. I've known mid-wives that fall into all three categories, I would say that they are all characterized by the same kind of attitude toward what it is they are doing, they are dedicated people who are trying to see the best done with the least amount of intervention possible, more by allowing nature to do the job, than to force issue.

Number 0428

Rep. Koponen: Do they have difficulty in practicing that you know of?

David: Yes, there is a great deal of difficulty in practicing, I've known several mid-wives who were given good service to their clientele who have been harassed by medical community, have met with open hostility in attempting to make referral.

I've heard of comments from the medical communities if they chose to go the mid-wife that you are stuck with it, we aren't going to help you. And I know thats a ... for me to say, but I have witnessed such a thing to happen.

Rep. Koponen: In light of that, which do you think is the more immediate problem, licensure of mid-wives or licensure of naturopaths?

David: Frankly, I would seem them as equal necessities, there's an immense growing number of community people who are teaching the natural methods of health and the naturopaths and the mid-wives have received ... in the same basic category of health care, it comes down to the question of specialization as you find in the more conditional medical community.

Rep. Tischer: Thank you very much, we have one more witness from Anchorage.

Number 0454

Karen Red Stone: I'm here to testify for this bill, I've looked around at these three doctors that gave their testimony and I must admit admit that I was rather upset by the last, I wished that I had taken enough notes that I would be able to counter some of the claims that she made, and I feel sorry that the women who have gone through .., as she has gone would deny the naturopaths who have also the same amount of college and medical schooling. The doctors I saw here in town were willing to use drugs the first couple of months to help me with the ...to prevent premature labor, none of them wanted to check into the background of why I was so ill for a couple of months except to tell me that it was in my head. And I'm sorry, but I couldn't buy that, I did see a naturopath, I worked with him for 9 months, became pregnant, I was 15 pounds underweight at that time, the first 3 months of pregnancy, I found myself hospitalized both previous pregnancies, this time I did not, I gained 15 pounds, brought my weight up for normal pregnancy and continued on. In the spring I had dilation that occurred at 20 weeks and continued dilating up until I delivered my daughter, who was born 4 days before her due date. She was the only baby that I had that I could carry full term and I must remind you that I lost two besides the two that were premature, both came from going with the medical community.

I have a daughter who is 5 1/2 years, who tends to have nosebleeds, I have medicine for her that says prescribed by naturopath, if she takes two pills every two minutes for about five minutes, her nosebleed will stop, however, the school nurse at her school refuses to give my daughter her medicine,

she would rather let her bleed for 30 minutes, and this woman could not get it stopped and I went to the school to pick up my daughter, I found the blood on the the front of her clothes and the waste paper basket half full of tissues that were bloody. Now that is the kind of standard medical care that these doctors are trying to keep us in line with, and I don't want any part of it, and I would also like to point out, that naturopaths in their naturopathic college have existed before the AMA was started.

After the AMA was started there was so many doctors that were so against the naturopathic route, that the AMA ... and politics managed to close these colleges down, I would suggest that before people condemn the education of naturopaths, they should check in to their education. I would also like to say that naturopaths do use laboratories, they use pathologists, my doctor sent my daughter to the pathologist and he ran laboratory tests on her to make sure that she didn't have a breathing disorder and that would be the cause of her nosebleeds. I know that my mother doesn't necessarily believe in naturopaths and is a little upset because I don't take my children to "the regular doctor", but I would like to point out that my mother is consistently on prescription drugs and must run a bill that is at least $60 a month and has been for the last 10 years and I see her getting no better. I see her staying the same and as far as I'm concerned I don't want my choice taken from me.

I think this licensing is what is needed and I think its good, as far as superficial laceration would be merely a minor cut, I see no reason for these people to be terrible upset that an 8 inch gash is going to taken as a superficial laceration that seems to be taken things a bit too far. I don't know what else I could say, I've been to these teleconferences before, I have gotten a hold of legislators before and I received letters, and I'm just a little tired that we are spending all this time talking about whether or not it should be or not be. If this bill passes it would certainly help us with our medical

insurance, we pay $700 a year insurance and it doesn't cover naturopath and since I don't see a medical doctor and none of my family does, we pay for that extra out of our pocket. If this bill was passed we could get the insurance to cover the naturopathic which would in turn cut down the money that we spend every year, I think thats all I have to say, thank you.

Number 0499

Chairman Tischer: Thank you very much Karen, any questions from the committee? Rep. Koponen?

Rep. Koponen: I'm not entirely certain that licensure makes much different than what the insurance company is willing to sell you on the policy. I know that the policies that we handle cover a great number of medical practices, but not others, it doesn't cover examination and it lists a whole list of things.

Chairman Tischer: Thank you Rep. Koponen, we will now go to the witness in Mat-Su.

Molly Mauline: I am for bill number 347, I have not had a lot of experience with naturopaths, mainly because my family has been blessed with good health and also I don't have much need for any type of doctors, except when I had my babies. But I do believe that we as Alaskans deserve the choice to chose what kind of health care we would like for our family, if maybe that in the future I would need more services of the medical community and I would like to be able to choose, I would like to try the natural method first ...(end of tape)

Tape 6, Side 2, 2 of 2
Recording
Number 0001

Chairman Tischer: In messages which have come in on this particular bill last year, during the last session and I compiled all those and if those that didn't receive them were unware, I provided the message from the public to them and there is a large group of folks out there that not only support this, but wish it to be moved along and we would like to do that. But once it hits the floor for debate and vote, if we don't have your legislature in our pocket, so to speak, for their yes vote, the bill could be voted

down, not only that, but once it passes through the committees, but especially in the other body, and the legislation becomes watered down or practically made in effective. Than you would see perhaps a movement of that particular legislation to the floor of the Senate, and passage may take place and a valueless bill would have become a statute.

What we need is the cooperation of the entire body on both sides of the isle in order to pass this piece of legislation. We have not yet been able to confirm that support, not because of their constituency support, but because of other valid or invalid reasons, whatever, the case may be, so the tough issue here is we need to get the support of the other legislators in order to get their yes vote on both sides of the house, both the Senate and the House.

Along with that we have one more hoop to jump through and that is the legislation has to be signed by the Governor, and as you know the latitude of the Governor is to sign, not sign or veto and many times, especially veto comes under constitutional issues or others issues that are sent down as an opinion by the Attorney General, and the legislacure has to take heed of that. In order for us to move along, in our best interests and yours to garner the support and cooperation from all three areas in order to pass this legislation and I sincerely hope that we can do that before the end of this session, it is my wish to do so. So I appreciate your comments, they are very well taken, thank you. Could we go on to Juneau, we have Dr. Jamison, would you please come forward.

Number 0035

Scott Jamison: I'm a doctor of naturopathic medicine, I am a graduate of the National College of Naturopathic Medicine in Portland, Oregon, currently living and practicing in Juneau, Alaska, and I wish to speak today in favor of the licensing of the naturopathic profession. In previous testimony, I spoken to different points of concern on HB 347, I've spoken to the establishment of a Licensing Board of Naturopathic Examiners, which I would like to see, but at the same time I understand

the financial limitation of such an act, I've spoken to the scope of practice which has come into question and a number of items that have already been in my testimony.

What I would like to say today is simply that our profession has been around for over 150 years and we have been recognized as being valuable in the field of preventive health care and natural health care for that length of time. And that our profession deserves to be recognized legislatively, many of our therapies are simple as common sense itself, as earlier testimony by a woman who stated naturopathic profession goes all the way back to ..., and further.

In addition to these traditional health practices that we learned over the years we have the valuable information of scientific community giving us bio-chemical and molecular information on the functioning of the body, biophysiology, pathology and so on. And naturopathic profession than is a combination of traditionally proven treatment and the latest scientific information in the field, rather than talk any longer, I would simply make myself open to questions from members of the committee. So at this point if there are any questions, I'll be glad to answer them.

Number 0065

Chairman Tischer: Thank you Dr. Jamison, Rep. Davis?

Rep. Davis: I have a question or perhaps a comment, Dr. Jamison, if you could at some later date take a look at the bill, you had some concerns on it, perhaps you could provide that to the committee, last year we were looking at a proposed bill and also a committee substitute so perhaps you could make some comments on that, go through the bill and see what concerns you have and give us your testimony.

Dr. Jamison: I'll be glad to do that.

Number 0075

Rep. M.W. Miller: Dr. Jamison, on April 22, 1983, you testified against this same bill, what has made you change, now that you support, because it is the exact same bill, what has made you change?

Dr. Jamison: The guiding force in making me change my mind on this bill is the committee substitute offered by Dr. Fritz who is no longer a member of the HESS Committee, but apparently his committee substitute is still here.

Rep. M.W. Miller: Are you testifying because you like the committee substitute, we are not discussing the committee substitute we are discussing the original bill, HB 347.

Number 0087

Dr. Jamison: At this point in time I feel that the House Bill currently is the best thing we have going for us, there have been concerns expressed to me, that I have addressed in previous testimony, and as regards to naturopathic professions there are still very few naturopaths practicing in the state and in terms of presenting a united front I want to go along with my profession. Although there are concerns that I would like to see addressed in the bill, I've already mentioned the establishment of the Board of Naturopathic Examiners. In previous testimony I've spoken to our scope of practice. Towards the end of the bill there is a grandfather clause which would was added on to the original bill four years ago when it was first submitted. Neither Dr. Pettyjohn nor myself particularly feel a need for that clause, although it was added and if the committee feels that is not necessary or that is not advantageous, I would personally not be upset if it weren't deleted in the bill.

Chairman Tischer: In other words, Dr. Jamison, the grandfather clause in the existing piece of proposed legislation would allow practicing physicians presently practicing to continue practice and to receive a license without the examination and what you are saying is that there would be no reason for you or any other practicing naturopath to refuse to take or not wanting to take the examination that you would prefer to be able to take that examination, to prove your worth and expertise in order to be licensed under the limitations of the present legislation, or whatever it comes out as. Is that correct?

Number 0112

Dr. Jamison: Thats correct.

Chairman Tischer: Thank you, are there any other questions from the committee?

Number 0114

Moderator in Anchorage: There is some concern in Anchorage that the committee members and witnesses in Juneau are not using their microphones, we hear the exchanges in the committee room in Juneau and there is quite a bit of interest here in what is being said there. We would ask that the people in Juneau to remember that there are listeners here in the North. The next witness is Joanne Selmar.

Number 0121

Joanne Selmar: I want very much to support House Bill 347, I have been a patient of Dr. Pettyjohn for at least 4 years and he has helped me in so many ways in clearing up my digestive problems that I hadn't been able to get help prior to 6 years before that. And through him and following his guidance and advise I now can have a balanced metabolism. And I think very much that he would continue to help people who want to be with him. Thank you.

Chairman Tischer: Thank you very much Ms. Selmar. Could we have one more witness from Anchorage before we go to Mat-Su.

Number 0132

Dr. McGuire: I'm an orthopedic surgeon practicing in Anchorage and I'm a member of the Alaska State Medical Association. I'm speaking from two view points; one from that of a concerned citizen and physician and one of that as a representative from State Medical Society. I'd like to thank you the opportunity to appear before you.

First I would like to point out what we perceive to be certain issues of fact and that is that we have not found this legislation, but it appears that it has been mandated by the Attorney General and that it has been asked for by naturopaths. It is not our position that we would deny to any patient the opportunity to seek whatever medical care they would deem appropriate, however, if the state has licensing care, we are concerned that it be done in a fashion that all who would seek this care have the assurance that they understand what care it

is and what things are included in that scope of practice.

Theoretic stands I would invite your attention on page 5 of the bill and some of these points may be reiterated in the sense that they have been previously mentioned.

There is a concern on our part as to what constitutes superficial lacerations and abrasions, what in fact are benign superficial abrasions and how will this be defined, and further if they are removed is there a standard of care as to their ultimate diagnosis? And I would point out to you that certain lesions which indeed appear very superficial if they are not subjected to appropriate pathological diagnosis may in fact not be that, but may be something far more malignant and I think those are important considerations.

Furthermore, we are concerned about the consultation available in the removal of certain foreign bodies, sometimes what appears to be a simple problem and in fact is not a simple problem and can lead to other serious consequences if not managed to appropriately. For example, foreign body in the ear if not managed appropriately can become impacted, in fact and cause significant difficulties with hearing, etc.

Again we would reiterate if anyone who wants to seek medical care on their own or any fashion, we are certainly not opposed to, we are concerned again that they understand that the understanding is wide spread. What for example, will be the treatment of complications should they occur in the course of ordinary obstetrical problems? Are these individuals in fact trained for neonatal resuscitation and if not should that be something that could be considered.

Certainly any normal childbirth suffers the potential of becoming complicated at any time if the infant in question is having difficulty. What are the procedures that will be followed or to insure the most optimal of outcome?

Number 0172

In paragraph B of that same sentence, we go down subsection 4, in which it would appear

from reading of this, that certain drugs will be allowed to be used by naturopaths, our concern is, as regards to local anesthetics, will these be applied topically or will they be injected or will they be applied to the mucous membranes? There are legitimate concerns I think as to that, for example, if local anesthetics are used in injectable fashion they can be rather severe in immediate and ... reactions to them. Are there provisions for these to be managed and should they be spelled out or should there be some appropriate referral? Once again the difficulty with plants and animals concentrate etc. has been mentioned, certainly many of the drugs we use right now are ... of plants and animal origin, and if such can be very potent medicine, should these be defined further and are they defined further?

Number 0185

Finally, what remedies are available for patients for poor results for pain, will these doctors be subject to the same malpractice problems that the rest of the medicine is subject to or will there be pure review? If so, how will it be accomplished? Who in fact will determine whether or not the individuals have training as outlined in the proposed bill. And finally, what will be the position in regards to the present existing malpractice view panel as to naturopaths, should they be licensed? Once again, I would like to reiterate that the cross for this bill has certainly not come from the medical doctors as a group nor to my knowledge individually, but rather has come from the Attorney General who ruled that these individuals must come under the laws of relating to the medical practice and finally, I think from the individuals themselves. Thank you for the opportunity to present this information, I'll be happy to answer any questions if I can.

Number 0198

Chairman Tischer: Thank you Dr. McGuire, I have before me, this is in regard to the Attorney General remarks that you made. I am aware of the fact that there is one naturopath, Dr. Pettyjohn who has been ordered by the Attorney General to cease and assist in practicing.

I have before me, March 29, 1979, Attorney

General's opinion handed down by Attorney General Gross, on page 2 it reads; given the medical boards posture with respect to naturopathy it is highly unlikely that the state would undertake any action to prosecute or otherwise discipline an individual naturopath for the unlawful practice of medicine. In essence than, the naturopathy within the State of Alaska is an unlicensed activity, and it goes on say in the second paragraph:

It is my understanding from the conversation with your administrative assistant Carlos Mercer, by the way this opinion was directed to Mike Colletta who happened to be at that time, Chairman of Rules in the House, it says; it is my understanding from my conversation with the administrative assistant that you are currently contemplating legislation to regulate the practice of naturopathy in the state. In formulating this legislation, two fundamental issues arise:

1. Does the practice of naturopathy constitute a practice which poses a risk to the health and safety of Alaskans? Such that it should be regulated and,

2. In what manner can the state best control entrance into the occupation and support and enforce standards of practice among licensed practitioners.

Chairman Tischer: Now the two points I think you have addressed properly in terms of questioning the pure review and my question to you in that regard is; would you favor establishing a pure review board, such as the medical profession has the dentistry and so forth, would you favor that there be a professional of state board of naturopaths consisting of a number of profession involved in health care? In order to do this pure review in number 2, I would like to have your reactions on that, on the original Attorney General's opinion.

Number 0230

Dr. McGuire: I'm not sure I'm in the position to speak on the original Attorney General's opinion, certainly I'm not an expert on the law. I would as to the risk and safety of the patient, I think that is a

legitimate concern, and inspite of some contentions on some orders that the Board of Medical establishment is interested only in the well being. I think it is a legitimate concern that we've attempted to present.

Whether or not, the establishment of a pure review board is the best solution to this problem. I don't know I would find myself in sympathy with Mr. Smith's testimony earlier that we find ourselves increasingly saddled with regulations and restrictions and assumingly unending appearance of board and licensing, etc. I wonder whether or not, such a system might be more complicated than productive. I don't have a solution to that problem, as I said earlier, we didn't propose this bill, we are trying to present what we think are legitimate concerns in that regard. I realize I haven't answered your question precisely not because I'm not trying to, but because I can't.

Number 0247

Chairman Tischer: I appreciate that doctor, I'd like to pursue this Board of Examiners or whatever we are going to wind up calling and ask the question in dealing with the established medical profession. What guidelines are you committed to practice and would you prefer that it could be less limited and less regulated and less restrictive?

Dr.McGuire: I think our guidelines for practice are clearly spelled out and there are several stages of redundancy where they have practices beginning in both at the level of the state and local medical societies, continuing on to the hospital based physicians which are subject to privileging credentialing and appear review process which to say the least, are elaborate, and finally, ending with the state division of licensure which has the authority upon sufficient evidence to revoke the license.

One of the problems that we may face in this state, is certainly the medical doctors don't want to be in the position of commenting on whether or not a given naturopath is a good naturopath, certainly it is not our area expertise, it is not our interest to do

I would however, pointout to you that I think we are capable of commenting on whether the result of pain by a particular method of treatment are favorable to the patient and whether or not they should be pursued as a group, and that I'm pointing out to you again does not mean to say that I'm applying that naturopathy isn't useful or should be used, I don't have an opinion on that, I'm expressing a concern as to how if the state takes upon itself the burden of licensing these individuals, how indeed will they ensure that the license so given speaks to the issues raised.

Number 0271

Chairman Tischer: Thank you Doctor, and one more question that I have and I appreciate those comments. Its my understanding that at this time the practitioners of naturopathy are not allowed to, don't have physician's privilege in hospitals that are normally extended to professions such as yours, and is that correct and whats your opinion about that?

Number 0277

Dr. McGuire: To my knowledge that is correct, that I think those apply simply to naturopaths or other alternative health care practitioners who do not have privileges to practice within the hospital.

I think that is a subject upon which we could spend an entire day, but there are several comments that are germaine, at the present time in Anchorage the situation is such that we are in dire shortage of hospital beds for patients who are treated by traditional means, I don't mean to point out words by medical doctors and surgeons if you will.

Providence finds itself in a position frequently of having 99 to 100% occupancy, what I've seen personally is, patients in the halls because there are no beds to put them. Now certainly we are moving in that direction with the recent approval of ... to allow building of such hospital beds and outpatient facilities are helping that burden, but I wonder if we extend these privileges to other practitioners what the practical effect would be. Now I'm concerned if that be the case the individuals who are in dire straight will

not have room for hospitalization.

Thats what I think is the first and most obvious concern, there are other significant concerns on how the practice of surgery, for example, will be regulated, at the present time there are elaborate training of requirements for any surgeon within Anchorage itself general practitioners who are medical doctors who completed medical schools and family practice residency do not have specific free standing ability, capabilities or privileges. We felt that was necessary with our own profession because we felt that the present standard of surgery is so demanding and exacting that is not something that can be practiced casually. But it would seem to me that this would apply across the board to other practitioners, now as to the areas of internal medicine, I would think that as I'm an orthopedic surgeon, particularly confident to comment on those what I would suspect that the same kind of concerns would attain.

Number 0306 Chairman Tischer: Thank you doctor and I have one more question, this is on personal basis, as far as individual physician is concerned. Would you collaborate for the best interest of a patient with a naturopath and treatment of that patient?

Number 0310 Dr. McGuire: Well I personally have not had the occasion to do so, because I've never been consulted by a naturopath nor have I been consulted by a patient with a request that I do so. I'm somewhat at a loss to respond to that for the reason that I do not consider myself an expert in naturopathy and thats why I don't know what the questions would be that would be asked of me. I think I can say this, and this I'm speaking for myself personally and not as a representative of the medical society, as far as I'm concerned my position as a physician is to see those patients for the problems that I considered myself to be expert in dealing with and I'll see those patients whether they are not they were referred by a chiropractor or by anyone else. Now whether or not it is that I collaborate with the care of that treatment by a mutual program of treatment worked out

by the naturopath or chiropractor, I think that that is not something I'm prepared to respond to. I don't know the questions about how that would work and I have a lot of questions about the ultimate benefit to the patient would be, I hope that answers your question.

Number 0325

Chairman Tischer: In part it has doctor, I just wanted to know whether or not you would be reluctant to assist or to collaborate with the treatment of a patient, if they requested that collaboration, for example if I fell down and dislocated my shoulder and my regular physician was naturopath and that I also felt as if though because it was a bone injury I should see an orthopedics, would you be offended or professionally perhaps reluctant to work with my naturopath in treatment of that dislocated shoulder?

Number 0333

Dr. McGuire: Again I'm speaking personally and not as a representative of other physicians, I personally wouldn't have any problems. I would ask the question though, how would we resolve the problem if a recommendation that I thought was important to the patient was in contra distinction to the recommendation of the naturopath had or for that matter, any other alternative health practitioner and who ultimately would hold the responsibility for the treatment outcome if one or the other is preserved.

Again I don't mean to be evasive, but I think these are complicated issues and my saying would be that I am perfectly willing to collaborate with naturopaths so it may lead me to a situation which I wouldn't be willing to. I would say again, emphasize that point I have a certain sense of the ethics of medicine and I believe in it strongly and if I don't that I would be asked to do something that I thought was not in the best interest of the patient. According to my training and experience than I think that I would not be willing to be a party to that no matter who asked me to do that, and for whatever its worth that would apply if it were another physician who wanted to do that. I would say respectfully that my opinion is to the contrary and that my recommendations are due otherwise.

Number 0352

Chairman Tischer: Thank you doctor, I appreciate those comments, its been very helpful and I guess the reason that I ask is it comes right down to what you are directing to me and that is if it were my shoulder and if it was an injury that I've asked you to look at as well as another physician, whether it be an optometrist or a naturopath or what have you, that ultimately don't you believe that it would be my decision as to who's advise I was going to take?

Dr. McGuire: I think thats absolutely true, it should be your advice and I would like to emphasize the comment that I made early on, speaking personally for certain and I thinking speaking for medical establishment as a whole. There is a perception on a part of many people that we are somehow felt that ... and that no one has the opportunity to seek the kind of care they would want and I think thats erroneous. I can say with no question at all thats erroneous as far as I'm concerned. I'm a great believer and all the freedoms that we have and everybody should be free to do whatever it is they want to do. I'm concerned however, when we take upon ourselves as members of society to legislate and to license individuals and with that it carries a responsibility to be certain that we define what in fact those individuals are, what they do and therefore, what the public can reasonably expect from them. But in another way, if we give the stamp of authority of the state to an individual and therefore allow the public to believe ...unwillingly that they are capable of doing next thing in fact they are not, than I would hold that we are amiss with the legislation and our legal responsibility.

Number 0380

Chairman Tischer: Thank you for your testimony. I think the next place is Mat-Su is it not?

Number 0384

Mark Rierdan: Good afternoon, I'm here to voice my support for HB 247. I'm married and have (3) children and the past year we have all been treated by Dr. Pettyjohn, a naturopathic doctor in Anchorage, as a matter of fact he delivered my last child.

I feel that naturopathic medicine is not

only a viable alternative ...(loud noise on tape) medical community in Alaska. Being a natural born skeptic I was at first somewhat apprehensive about being treated by naturopathic means, but after some study and talks with Dr. Pettyjohn, my mind was put at ease and now I'm quite comfortable and now go to Dr. Pettyjohn as our family doctor. In conclusion I feel would be grave judgment if HB 347 did not pass and you would be committing a disservice to this community, if you did not support this bill, thank you.

Number 0396

Chairman Tischer: Thank you very much, I'd like to now go to Fairbanks, is there another witness?

John Ghoddio: I am representing Fairbanks North Star Holistics Network which is a group of 200 concerned citizens who meet monthly for interest in having alternatives for holistic medicine including naturopathic doctors available to us. We strongly support the passage of HB 347, but would also like to say that every person that came here today is in support of HB 347. Thank you.

Rep. Koponen: Thank you Madam Chairman, John, is there a naturopathic practitioner in the Fairbanks area at this time and if so, do you have their name or any information about them?

John Ghoddio: Unfortunately there is none and a lot of people have to travel a long way to get treatment by naturopathic doctors, so we are really in need of one.

Number 0417

Rep. Koponen: Isn't there a place on Eleventh Avenue downtown that advertises naturopathic services? I have a photograph of a store down on Eleventh that advertises or are they just advertising supplies?

John Ghoddio: We have places in Fairbanks where you can get herbal supplies and other alternatives, but not naturopathic doctors.

Number 0425

Chairman Tischer: I would now like to go to Anchorage for the next witnesses.

Dr. Jay Bonner: (loud noise in background)... My first comment is to agree

with the doctor you spoken to before me and the last statement that Dr. McGuire made on the sample of approval that you will be given to the practice of naturopathic medicine by legitimizing the practice through a licensing board, I think its not in the best interest of the public. (am I coming through)? By licensing the naturopath you have given a creditation to their training, I practiced for 17 year in the Southern Mississippi as a teacher in the School of Medicine and the University of Mississippi.

I taught many of these subjects that are outlined on page 2, others that were left out were internal medicine, pediatrics and ... these are left out that are suppose to be included in their training. I am not aware that any particular licensing of these two that is nationwide as there is of medical school. The first part of this century there was a report on the medical indication in this country and it pointed out some of the problems of medical education that there were many licensing boards, many groups that joined together in approving and overlooking the ...I don't think there is that track record with naturopathic medicine in this country.

We had many years of looking into how to practice medicine and how they are taught, many of the subjects that are listed here. By giving a license to these individuals and saying that we are crediting them, we are also crediting their education, we are saying that we know that they passed these particular subjects and I do not believe they have had legitimate training on all these subjects that are listed.

Also, I don't believe that the instructors that are hired by these naturopathic have the doctor's degree in chemistry and anatomy and microbiology, etc., and that the teachers are competent to teach the individuals these particular subjects. I'm not disagreeing that people have the right to chose to go to naturopathic physician if they want to so, but I'm saying that we should not by any means say that we are giving a stamp of approval to any of these training or practice of naturopathic

medicine.

Also, you mentioned that you were going to devise a test, I'm not sure how this test could be devised, to test a naturopathic physician and licensing them. I'd like to additionally express my concern of the medications that they prescribe, animal and plant compounds or extracts and of course as pointed out earlier many of these that we prescribe as insulin, cortisone, thyroid and plant medications, etc. can be very toxic and should go in use under special circumstances. There are other substances that I know the naturopathic physicians are prescribing or they are dispensing to the patient called ...adrenal extract, valid extract and I have seen these in patients that bought these to my office. Almost a 100% of the patients that I've seen in my office that have been seen by naturopathic physicians have been mis-diagnosed and mistreated or treated inappropriately.

I think I'm surrounded by a number of people who have had very positive experience with naturopathic physicians and I'm glad that they have and had no adverse effect. But I'm just telling you the many patients here in Anchorage who had adverse effects on these treatments or negligent in the treatment because they had not seen a physician to correctly treat them early enough. And I have seen complications as a result, probably from some of these substances that are being prescribed although I cannot surmise the investigation to determine exactly whats in these substances that are given to the patients and I would call naturopathic physicians before to try to talk to them to see what is in these substances so I can determine what is the result of what they were taking or the result of something else, and they would not communicate with me. I would just get a list of what they were taking from the office shelf.

I would also like to speak to the consumer, because I have had privilege of having 3 children and I have had obstetrician who been certified in the practice of obstetrics to deliver my children. For millions of years, as long as man has been on this earth

there has been a natural childbirth and I imagine that billions of people who have been born here by far the majority have been by natural childbirth. I think in this day and age in this country that I would not personally select anything but an obstetrician or a family practitioner who's had a lot of experience in delivering children, but for my own safety and for the safety of my newborn child.

Thank you for letting me testify and at this time I would like to answer any questions. If you would propose the same question to me as you did to Mr. McGuire, would I collaborate with a naturopathic physician? I would not collaborate, I have had couple of referrals from naturopathic physicians and well, one that I can remember and I cannot collaborate with that physician. I'm not exactly sure what you mean by collaboration, however, I prescribed what I thought was best for the patient and I don't think any of them have the training that I do to determine what is best for the patient. Now if they would like to carry out or help enforce my prescriptions or my treatment of the patient I would not (loud noise in the background).

Chairman Tischer: Thank you doctor, I have a question and I would like to go back to the instances where you talked about the patients you had, obviously taken ill with some toxic substances, something like that, I'm not sure that I followed your comments, but I'd like to have you be more specific about those particular instances. Can you give me a closer vision of what you were talking about, precisely and how you got to see these patients in the first place, were they referrals and from whom?

Dr. Bonner: My current practice is limited to referrals from physicians, because I'm very busy now, I've been practicing in Anchorage for (4) years, Initially when I came here patients sought my care because they knew I was a phrenologist, there was no other practice in phrenologist in the state at that time. Majority of them were self-referred patients, the ones who had been to naturopath before.

I still do see some patients who have been to naturopaths and if the naturopath were to refer one to me I would probably see the patient, depending on whether or not it was in my field or not, I certainly would not see them for dislocated shoulder. But the ones that I did see that were mis-diagnosed, some of them had mis-diagnoses of thyroid diseases when they did not have a thyroid problem, they were taken some sort of thyroid extract. I've seen patients who had over active thyroid problems who were also taking a thyroid extract which would be against the practice of medicine, if you had an over active thyroid to additionally prescribe thyroid on a long term basis you could try on set basis for what we call suppression care, but not for a long term treatment of that particular individual.

So I do not know as I said earlier what are in these extracts, there is a ... thyroid which is made from animal gland extracts which has been prescribed for many years as a thyroid replacement for people who have under active thyroid which is ... drug approved by the FDA. I don't think any of these substances are extracts that they are using are approved by the FDA. In fact I just don't know what they are and I don't know how to find out exactly what they are, they are what they say they are, thyroid extract, adrenal extract, ... extract and they are not being used properly.

Another case would be adrenal extract, a patient was diagnosed as having an under active adrenal and our terminology would be attitude's disease or ...-adrenal problem and they were getting adrenal extract... the patient was mis-diagnosed as having adrenal insufficiency and did not need cortisone and cortisone if it isn't adrenal extract they are prescribing is ... specific indication for it. And if it is prescribed for certain doses it has very hazardous side effects like ...(loud noise in background and end of tape).

Tape 6, Side 1, 2 of 2
Recording
Number 0003

Chairman Tischer: Thank you for your testimony. There are no questions from the committee, so I would like to go back to

Anchorage to take the next three witnesses from Anchorage.

Number 0005

Virginia Pettyjohn: I'm the wife of Dr. Pettyjohn, I hold a Bachelor of Arts Degree in Physical Education and hold a teaching certificate in the State of Alaska. I feel this is important because I'm not speaking from respective of one who has not been through several years of schooling and thus have an educated approach to this. I'm also the mother of four children all whom were delivered naturally through a clinic and through my home.

It has been brought up by the speakers from the medical profession that have legitimate concerns about training and the specific things that are designated that a naturopath is able to do. The testimony, I feel that they would like to so limit the scope of the practice of naturopath that it would be non-existent and that this is through benefit not only to self, but their profession that they don't have to be in competition with anyone else. It sounds like a major grocery store limiting another alternative of store that would be in competition with him. I would like to point out to few of the legislators that before we had not heard the general public's speak in direct opposition, it has only been those who are in competition with naturopath.

I'd like to say that the general public has been here and several people had to leave and many whom have not been able to stay because of the time factor, and also the factors that this has been filled and there hasn't been a place to sit down. I think that HB 347 needs to be passed specifically because of the posture of the medical board and the Division of Occupational Licensing and ...the law needs some improvement in order for naturopaths to continue their practice. Thank you.

Number 0031

Chairman Tischer: Thank you very much Mr. Pettyjohn. Any questions from the committee? None, could I have the next witness.

Number 0033

Dr. Patton Pettyjohn: I have been practicing in Anchorage for (4) years now.

I'd like to if I may address my issues for the scope of naturopathic practice, a lot of the opposition from the medical profession is in regards to the scope of practice and whether or not have a qualification. The bill that is submitted is very closely resembles the law thats in the State of

Oregon and has been in existence there for since 1927.

Naturopathic physician decides using natural therapy which includes plants and animals, also trained as general practitioners and such. We have training in minor surgery and if we have the particular training prior than we should be allowed to practice for surgery, especially where it involves childbirth, because it would be very inconvenient if we have the quality and expertise to repair a vaginal laceration.

But because of the pressure from the medical community you feel that you do not include this into the law, than we will have to unnecessarily transport every woman who had a laceration to the hospital when its not her desire to do so, when there would be someone right in her home capable to do such.

Also, in regards to superficial lacerations again, this is something which the State of Oregon for the past 50 years had no problem with, with naturopaths. Any qualified physician can suspect malignant lesions and if they are suspicious than they can get a biopsy to exclude whether they are suspicious or not before they would attempt to do any superfluous surgery on that lesion. So it hasn't been a problem in other states and I can't see why it should be a problem in this state as it is written in the law.

There were some questions also regarding plant, animal and mineral substances that some of these products are potentially used as medicine, of course they are, thats what naturopaths are trained to do, use natural animal substances, natural plant substances as medicine. And we realize that some of these are used by the medical profession as well, but that should not exclude us from

using them if we have the training and expertise to use them. So if we feel that fox glove which the lab may ... is in the best interest of the patient than we feel that we have the expertise to treat that patient with that plant, that we feel that our training, we should be allowed to do so.

If we feel however, that a patient needs hospitalization and needs a particular prescription that is out of our field, its out of our expertise and needs to be managed by highly skilled and staff of the hospital, than we will refer that, but see every general practitioner, every family physician has the same dilemma to face. They have to practice within their qualifications, every pilot has to make decisions whether he wants to fly in certain weather and the same thing with physicians, if he does not feel competent with the specific procedure, he refers, but that doesn't necessarily mean that there would be other naturopathic physicians that would feel competent to do minor surgery, because we have been trained to do so. And these are things that would be handled under office procedure.

Number 0082

There was a statement made by one of the doctors that made reference to, she wonders who teaches these classes and wonders if they are qualified to do so. If she had made much investigation she would realize that the basic medical sciences of anatomy and physiology about chemistry, pathology and micro-biology have all been taught in schools by professionals, academic people who have Phd's in those particular basic sciences. Because of the flak that we gotten in the past relating to minor surgery, that it is made sure in our schools we are taught minor surgery by licensed surgeons from one of the medical schools in that community, to make sure that they have no misgivings the kind of qualifications that the training these naturopaths receive concerning minor surgery. The reason why we do minor surgery is to see a complete family practitioner and naturopathic schools have always taught minor surgery, have always taught natural childbirth and obstetrics, its not something new that we are asking for.

Number 0096

Because we are taught and we are trained, we should have the ability to practice our profession as trained, just like the medical doctors have the privilege of practicing as they are trained. At this time I would just like to conclude my remarks and say again that I feel that it is very important that we as naturopaths have constitutional right to practice as we are trained and that patients also can be available to our services.

At the present time there is a problem because the medical board's posture and these are made up of medical doctors, they do not want us to treat the sick anymore in any form whatsoever. It doesn't make any difference if we are using natural therapy or not, they do not want to treat the sick unless this bill is passed. So I urge the passage of this bill and will be open for questions at this time.

Number 0106

Chairman Tischer: Thank you Dr. Pettyjohn, Rep. Koponen has a question and so do I.

Rep. Koponen: Dr. Pettyjohn, during the course of the testimony this afternoon some comment was made about the problems that you have had in continuing your practice, someone mentioned cease and assist order; could you be more specific in what this regarding this disability you have currently in not being licensed?

Number 0114

Dr. Pettyjohn: Certainly, when I first came to Alaska I was told through the Attorney General, that naturopathy was an unlicensed activity and I could practice unharassed.

That was under the Hammond Administration and now we are the Sheffield Administration and there are new people in different departments and divisions. It was brought to the attention of Occupational Licensing that I was diagnosing and treating the sick and so because of that the issue to cease and assist order, saying that was a practice of medicine I needed a license to do that.

My attorney right now, went to court to keep my practice open and we have in fact a restraining order ... against that, cease and assist order, until certain hearings can

be made. After which time, we will proceed into court to declaratory judgment, but this may take several months or even a year to complete the judicial process whether or not I have the constitutional right to practice.

Naturopathy is not a sub-speciality of medicine and should not be under the jurisdiction of the medical board and it appears we need a licensing procedure so that naturopaths can diagnose and treat the sick in Alaska, unless we can go to court and get a declaratory judgment.

Number 0135 — Chairman Tischer: Dr. Pettyjohn, Rep. Davis has a question.

Number 0137 — Rep. Davis: I assume that you've seen the original bill and proposed committee substitute and I'm curious as to what your feelings are on that, and also the licensing board that you admit. There are only two people that are practicing with your profession in the state, I don't know how that would work. My second questions is; would you oppose to have other than naturopathy people on that board, having a medical doctor on that board? Thank you.

Number 0145 — Dr. Pettyjohn: I was opposed to Milo Fritz' committee substitute, because he removed the minor surgery and practice of obstetrics, the use of x-ray diagnosis and many other things that we are trained to do, moreless, said that we could treat with nutritional therapies and that was it. Of course, we do that, but he watered the bill down so much that it took out half the things that I've been trained to do. So I was in opposition to that committee substitute. I want to practice as trained, I want to practice as I'm licensed to do in Oregon and I feel I have that right.

The second question; yes, thats one of the reasons why because they are not allowed naturopaths in Alaska, thats the reason why we felt that naturopathy should first be licensed under the Department of Commerce to the Division of Occupational Licensing. We tried to set out in the legislation, the principle and the regulations which the naturopaths would be licensed, so that the

department would have to follow the law as it is written. They would have to examine the applicants, make sure that they were qualified in the different subjects that naturopaths must be trained and if there were complaints than the Department would have to handle those.

As far as I know know, there are three full-time practicing naturopaths in Alaska, and there are four others who would be qualified to become licensed if they chose to, because they have legitimate degree and these are also practicing as chiropractors in Alaska.

So those are the people that I'm aware of that have the ability to be licensed. I know of two students that want to come to Fairbanks who are graduating this year and I have not too long ago also received some letters from three other naturopathic physicians from Oregon who (one has graduated a year ago, two others that are graduating this year) would like to come to Alaska and I am waiting for this license or bill to pass and to find out the outcome of my court case, whether or not they would like to come to Alaska.

Number 0182 Chairman Tischer: Rep. Davis has one more brief question.

Rep. Davis: In prior testimony, Dr. Jamison mentioned that he learned there would be some kind of peer board versus being licensed and having an oversight by a branch of the State of Alaska at least within the Commerce Department, but do you know who is not practicing that would license in the Fairbanks area?

Number 0189 Dr. Pettyjohn: Yes, Dr. Spaulding and Dr. Hampton, both are chiropractors who have naturopathic degrees and are licensed in other states as naturopaths. And also, theres a Dr. Weaver here in Anchorage who is a chiropractor that would be qualified to be licensed, and there's a Dr. Hammond in Juneau, who is a chiropractor that would be qualified to be licensed as a naturopath.

Number 0196 Chairman Tischer: Dr. Pettyjohn, I have a couple of questions; would you read to me the cease and assist order for the record or

if you send it to me, I would appreciate it. I'm presuming that its written.

Dr. Pettyjohn: Yes, it is and after our conversation after I first received it, I took it into your office there in Anchorage and I told them to hand deliver it to you because you weren't there, but I can certainly send another copy to you.

Number 0202

Chairman Tischer: Well, if you brought it up to me, I'm sure it must have been sent down here to Juneau, the next thing I'd like to ask you is; what is your definition of "minor surgery"?

Number 0206

Dr. Pettyjohn: Minor surgery, we tried to define it as according to the way it was defined in the Oregon Statute, but minor surgery technically means, you do not go into the chest cavity or the abdominal cavity and do surgery. Those are typically referred to major surgery techniques, however, there are many minor surgery techniques that need to be done by a highly skilled surgeon that would be very high risk and should be done in hospitals, and this is the judgment of the physician, where to refer and when it would be the best interest of the patient to refer to a specialist.

Primarily as naturopaths we are interested in the surgical procedures that can be done safely in the office, repairing superficial lacerations, wart removal, hemorrhoid treatment, removing ... and minor surgery techniques related to childhood.

These are common office procedures type of techniques that we are trained to use, and if there was a technique that was under some type of legality permissible as minor surgery and we attempted to do that in our office and had not proper training in that specific technique, than we would be open to the same judicial process as all other family practitioners are, it would be malpractice negligents, or whatever. But this is up to the professionally trained clinician, physician to know when he is not qualified within that particular technique.

We have had 50 hours of professional schooling in minor surgery in school and we

had the clinical intern-ship where we are instructed in the surgical techniques through qualified physicians that are licensed in those states where we received our schooling, and those techniques which we have been trained we feel we should be allowed to use and if there are some minor surgery technique that we are not trained in, than it would be our responsibility to refer them if the case would arise if we feel that patient would be best served by going to a physician thats highly skilled in a particular technique.

Number 0243

Chairman Tischer: So vaginal lacerations under your estimations would be classified as minor surgery, is that correct?

Number 0245

Dr. Pettyjohn: That is correct, however, if there is a particular type of laceration which perhaps involves the tearing of the rectum and a particular naturopathic physician didn't feel competent to repair that, than thats where his judgment comes in, and of course he would refer so that the patient could get the best treatment possible.

Chairman Tischer: Thank you, what I'm trying to get at is, in the list of the original bill of licensure requirements, minor surgery has been a c ate. That is inclusive of the types of instruction that would be included for testing purposes and examination purposes for licensure. And as you well know the debate on what is minor surgery, it has been brought up in testimony today, is likely to be contested again.

I'm trying to the best of my ability outline some kind of a format by which the quality prevails in terms of the testing, and if i is based on the educational procedures that are given to the applicant for licensure based on the norm in terms of naturopathy study, than I think we have some basis to go on. But as you know that has been a basis of objection and I'm trying to maintain some equilibrium on that issue.

Another issue that I would like to expound on a little bit, is prescription drugs and that which was related in terms of natural

elements. Two of them were brought up, you mentioned fox glove or ..., and the other one was cocaine, and the fact that there are physicians dispensing those purity drugs in pure form if you will, under prescription and the naturopaths preference to dispense that in the form of a natural herb.

I have a theoretical question; if you were to prescribe fox glove for me for whatever reason, would I be able to overdose on that prescription in its natural form and if so what provision would be made in the prescriptions that I would not be allowed to overdose?

Number 0278

Dr. Pettyjohn: Yes, with everything that we give a patient, we would give them instructions to follow and after we give that substance to a patient, you know if they don't follow those instructions certainly they could overdose themselves, everything has potential harmful effects if misused and abused. There are some plants that have potentially toxic effects and naturopath physicians are trained to use these non-toxic, non-poisonous dosages and so if the patient wants to overdose themselves and go contrary to the order than, yes, they could potentially overdose themselves on some remedies that have potentially toxic effects, but thats the same with any type of medicines.

Number 0290

Chairman Tischer: Thank you very much Dr. Pettyjohn.

Number 0294

Moderator in Anchorage: Rep. Tischer we have a witness and several had to leave, right now we have Dr. Jasper.

Number 0297

Dr. Jasper: I'm a naturopathic physician, I grew up in Haines, Alaska & am a third generation...(loud noise in background). I feel some of the comments were unnecessary and the question whether or not the practitioners are qualified to practice is an irrelevant question (noise on tape)...

The point is every physician will diagnose a patient that others have not been able to diagnose accurately and every physician will mis-diagnose a patient, who will eventually seek health care elsewhere and they will be

able to make an accurate diagnosis. I think thats a point that should be kept in mind. I urge that this bill be passed and people ought to have that choice for their health care practitioners. I appreciate Dr. ... comments, I was available to talk to him about his feelings to the testimony, he felt that maybe if we had a naturopathic board and have at least one medical doctor on it, and keep a very close eye on our practice maybe that would be acceptable to him. I indicated to him that I didn't think that was necessary. They practice without a naturopathic physician to keep a close eye on them. He felt that was not the same situation, but I feel very much it is, the right of the physician to practice to provide health care to those patients that feel competent in their services. I don't want to be ... in my comments today, but I think that the points that are being brought up here today are largely irrelevant.

Number 0355 — We have nurse practitioners here in this state as well as physician assistants that practice in this state and other states that have wide scope of practice and are able to prescribe many drugs and perform minor surgical procedures and do all of these things. And these are physician assistants who have maybe two years of training, we have nurse practitioners who have gone on for additional training beyond their nursing, but yet we ask for the scope of practice which wouldn't exceed that which they give the nurses or physicians' assistant. Now all of a sudden they call it a question, concern over public's safety. I feel that naturopathic physicians ought to practice, at least in the same scope of a nurse or physician. If there are questions I would be glad to address them.

Number 0369 — Chairman Tischer: Thank you very much, Dr. Jasper. I see no questions coming from the committee members, if we completed the three designated people from Anchorage, we will go to Mat-Su.

Number 0376 — Moderator in Fairbanks: We have no participants left here in Fairbanks, would it be ok for me to disconnect from the teleconference?

Chairman Tischer: Yes, should you have contact with those that weren't able to testify, I would ask you to tell them if they have testimony which is pertinent they are free to send by telecopy to the committee so that we can make their testimony part of the record. I apologize for the lengthy hearings, but since all things weren't equal today, I would like to continue until at least a majority of the people are hear. Thank you Paula.

Number 0388

Georgia ... in Mat-Su: I'm speaking for myself, my husband and my two sons. We support HB 347, we are extremely concerned of the fate of the naturopathic doctor in our state, Dr. Pettyjohn has been our family doctor for four years. We are tired of going to medical doctors who knew practically nothing about nutrition and diet and absolutely nothing about herbs. Dr. Pettyjohn took the time to listen very thoroughly to our symptoms and inquired about the total picture of our health and diet. The herbs and nutritional supplements that we received from Dr. Pettyjohn are superior to others found locally. We resent tremendously the idea that people ignorant to the science of naturopathy and preventive medicine are trying to abolish the science practice in our state and worldwide. We feel it is entirely our right to seek professional (loud noise in background) ... Thank you.

Number 0416

Chairman Tischer: Thank you Georgia, are there questions from the committee? Hearing none, I would like to go back to Anchorage and take couple more testimonies from Anchorage.

Number 0419

Sandra Jay: I'm a chiropractor recently licensed in Anchorage, I'd like to testify in support of HB 347. Because our time is simply growing short, I'd like to say that I agree with the support on the statements made and the only thing that I might add is; there are many people who question the competency of medicine and medical doctors, but that is not a good reason to prevent them from practice and they do practice freely across the nation and world. I don't see any reason why there is a difference between them in that circumstance and the

naturopaths and their circumstance. Other than that, all the reports that I've heard from people who have been treated by Dr. Pettyjohn and Dr. Jasper have been very positive, and I see no reason why they should not continue to practice in the way that serves the public very well. Thank you.

Number 0434 Chairman Tischer: I have a question for you as a chiropractor; if a board of examiners were to be created for naturopathic medicine, what would be your suggestion be as to the types of expertise to sit on that board?

Number 0439 Sandra Jay: They would have to be judged by people that are trained naturopaths and those people would have to have naturopathic education for naturopathic colleges. I would suggest inclusion of a lay member, inclusion of a chiropractic board and I assume they would be included on other boards in the state. At the moment I know most board members are appointed by the Governor, I feel quarrel with that, or possibly even an elected position. Does that answer your question?

Number 0448 Chairman Tischer: Yes, Sandra, thank you very much. The dilemma that we would face at this time in creating that board would be that the same people who would be sitting on the board at this time because of the small numbers of practitioners in naturopathic medicine would also be judging themselves, unless another board outside of state, for example, might suffice until at such a time that we grew in numbers. What would be your opinion on how we would handle that?

Number 0456 Sandra Jay: I have a question in return that must have also risen when the board was first put into practice for any of the professions that are licensed, and I would think that similar guidelines could be followed in those instances.

Number 0460 Chairman Tischer: Thank you, that's a good suggestion. Do you feel that the existing original bill as it now reads at least has provisions that cover the question whether or not there are competent people in the Department of Commerce to administer an

examination? Do you think that we have covered enough basis in the bill to properly examine the potential candidates so that they could prove themselves in their profession to practice here?

Number 0469 — Sandra Jay: I briefly read over the bill that I have in my hand, it seems that the areas examined are quite complete, I don't know who in the division would be qualified to test those, as I do not know if there are professional people trained in those areas employed by the division.

Number 0475 — Chairman Tischer: Thank you for your comments, Sandra. Can we go to the next witness in Anchorage. I would like the audience to recognize that Rep. Ward has now joined the committee as an observer.

Number 0480 — Sherry...(loud noise in background)...There would be great disservice done to the people of Alaska if House Bill 347 were turned down. As a mid-wife I have been in both hospital and home birth and I did much handling of births in the hospital and very much in my personal care of mother and babies. In working with Dr. Jasper, I've seen skill, care and concern during deliveries. He hasn't hesitated to refer patients during pregnancy and during delivery if he felt there was a need to.

Number 0494 — Chairman Tischer: Thank you Sherry, could you explain a little bit further on your role as a mid-wife, are you licensed, how do you practice, do you keep an office, how do you get your referrals and so forth?

Number 0496 — Sherry...: I am what they call a mid-wife, not certified. I practice mainly for home births, do pre-natal for Dr. Jasper, (loud noise in background)... We do very many referrals for people who have been dissatisfied with hospital births and have been very happy with home births. Did I answer your question?

Number 0499 — Chairman Tischer: Yes Sherry, thank you very much, at this time I have to make this comment because you are not present here in the room. Mr. Treagor who earlier testified on behalf of the Department of Commerce and Economic Development in Licensing Division

is sitting here and closed his ears to the fact that you are a lay mid-wife and that you are not licensed, so I sent him away from here. I want to also, go on record that I credit you with the courage to come forward knowing that you may be jeopardizing your position and if anything occurs in the next forseeable future years, I believe the next two, and if you are practicing your mid-wifery that I wish that you would contact me, because I will like to know whether you are going to be harassed or not, because of your testimony. Thank you.

Jean ... from Anchorage: My family and I have been very pleased with the service and good health we enjoyed from our naturopathic doctors during the last four years. We believe so strongly in naturopath that we use Dr. Pettyjohn, even if our Blue Cross does not cover the bill. Our health in all cases have improved much better and faster with the homeopathic remedies, than with the regular antibiotics and drugs that the doctors have prescribed. I have found Dr. Pettyjohn to be conservative in his approach compared to our medical doctors and pediatricians. There have been times that Dr. Pettyjohn has had to refer to specialist and he does not hesitate to say when he (loud noise in background)... I appreciate having a natural alternative to my health care and I feel that I should have the right to chose what kind of health care I receive. Please support HB 347. Thank you.

Chairman Tischer: Thank you very much Jean, we appreciate your comments.

Ruby Pettyjohn in Mat-Su: My name is Ruby Pettyjohn and obviously I'm for HB 347; at this time I would like to make one other comment in regard to what the doctor had to say. At the present time I have been under the care of three specialists with kidney problems. One in Salt Lake, one in a prominent clinic in Seattle and one here in town. They each diagnosed a little differently and the mode of treatment was different. I also of course went to Dr. Pettyjohn and at the same time I also confirmed with a naturopath in Seattle. I think that there comes a time when the patient has the responsibility, I have had

of course had to evaluate all of the information that I've gotten and made my decision as to what I would do. I don't think you can legislate the responsibility of the patient in these matters, but I think that we have a right for a choice in what we do and I would like to support the bill.

Chairman Tischer: Thank you Ms. Pettyjohn. No questions from the committee. Lets go back to Anchorage and take the next three witnesses.

Karen Jasper in Anchorage: I would like to support HB 347, I believe that we live in a free country and that we should have the choice of the physician that tends our family ... (end of tape)

Tape 6, Side 2, 2 of 2

Recording Number 0001 — Karen Jasper continues: I know that naturopaths are qualified and trained properly to handle emergencies and illnesses, I support this bill very much. Thank you.

Number 0005 — Thank you Karen and to the moderators in both Anchorage and Mat-Su can you give us a list or a number of people who are left who would like to be heard before I continue?

Number 0008 — This is the moderator in Anchorage, we have two more witnesses who have not had a chance to testify and Dr. Bonner has an additional comment she would like to make.

Number 0011 — This is the moderator in Mat-Su, we have three people who are waiting to testify.

Number 0013 — Captain E.P. Pettyjohn: I would like to add my support to the licensing of naturopath in Alaska, I am a very strong believer in the benefit of naturopathic medicine. Several years ago my wife was severely ill and we took her to all the best MD's in the Anchorage area, and I honestly believe that she would have died, had we not found a fine naturopathic physician in Seattle who treated her successfully. We need good qualified naturopaths in Alaska and I am Captain E.P. Pettyjohn from Alaska Airlines.

Number 0021 — Chairman Tischer: Thank you Captain, I

wished you would have flown down here today so we could have come back to Anchorage to hold this hearing. Unfortunately, we are isolated from that, thank you.

Number 0024

Connie Walker in Anchorage: I would like the bill put into law, I have gone to Dr. Pettyjohn over the last four years and have found him to be a very confident physician.

I have had some rather bad experiences with the medical society here in Anchorage, but don't wish to go into detail, but this is one of the reasons that I feel that I prefer to go to a naturopath, because my experience with naturopaths has been superior to that of going to a regular medical doctor. Once more I wish to voice my opinion, I am in favor of this bill.

Number 0032

Chairman Tischer: Thank you Connie, I have a question for you, if you would answer please. If you are seeking medical advise from a naturopath, in what way do you feel that you would benefit by the authorization of dispensing the natural drugs for example, in this bill it addresses that it would allow the naturopaths to practice medicine, to practice naturopathic medicine in the manner in which they have been educated and trained to do, have you felt as though you had some restrictions on that delivery of service at this time?

Number 0042

Connie Walker: I don't feel that there has been any restrictions, however I can see what is going to take place if this bill does not become law. The doctors here will probably be asked not to practice, and this would be a disservice to people that depend on them, who do not care to go to a medical doctor. Now, Dr. Pettyjohn has referred me to a regular medical doctor for previous problems and I feel that he would continue to do such in the future and under his guidance I would go to a medical doctor for those problems. As to why I am so interested in this bill, I have always been interested in medical professions until the time I was very small. I also have been interested in all the different alternatives health practices here in Anchorage, I've also been extremely interested in naturopathic doctoring and would honestly

like to be a physician. However, I do have a family and it does require 7 years of study to become a doctor, and at this time I find that is a conflicting thing for me, I could not go to Oregon and become a physician without great difficulty to my family. I hope this answers your question.

Number 0059 Chairman Tischer: Thank you Connie, I appreciate that.

Number 0061 Paula Pettyjohn from Mat-Su: I support HB 347 and I think that it should be passed. I find it interesting to note that each and every doctor who testified earlier, when they were referring to naturopath physicians and their experience and training, they started out by saying; I don't believe and I don't know, and I don't feel, they had no real basis except for their feelings about naturopathic education and the profession itself. How can they be asked to give an expert opinion on something they haven't researched and that they know nothing about.

I doubt that when the laws were passed the license ... of dentists could do oral surgery and chiropractors that the medical profession was consulted into greater detail. Why are they than being consulted now?

The naturopathic view and treatment itself is light years away from the traditional medical profession, the naturopath's views to get the body to heal itself and the traditional medical profession is either treat the symptom and not necessarily the illness itself. They can't take care of the problem then they'll try to cut it out. The doctors and the representatives of the medical society are saying that the ... (loud noise in background). Doctors are making it very difficult for people to bear children and have traditional OB care and they are looking for alternative methods, because they just cannot afford what they are being charged right now. I've seen Dr. Pettyjohn deliver babies and I can assure you that his care is far superior to anything that I've received in the hospital.

If my doctors were even there to begin with, which most of them weren't, the nurses

delivered it. I think we should have the alternative. I completely support this bill, and I hope you guys have been listening to what we've been saying today, I think its very important for our medical care. Thank you.

Number 0114 — Chairman Tischer: Thank you Paula, and I assure you, we have been listening, we have been more than listening, we have been taking notes and we record everything down in a form of minutes for permanent record, so that I want to reassure everyone that, we are not just cursory listening to you. Could we now go back to Anchorage again?

Number 0119 — Moderator in Anchorage: We have three more witnesses and Dr. Bonner who wishes to comment. Our next witness is Bill...

Number 0123 — Chairman Tischer: Before Bill ... testifies, could you indicate if Dr. Pettyjohn is still in the room?

Moderator in Anchorage: Yes. Dr. Pettyjohn is still here.

Chairman Tischer: After the testifying of this one witness, I have one question to ask him.

Number 0127 — Bill ...: I'm a local businessman, and I'd like to go on record in favor of the bill and would like to see it passed. I am representing my wife and family, who have been treated successfully by Dr. Pettyjohn. I'll keep this brief... thank you.

Number 0132 — Chairman Tischer: Thank you Bill, before we go to Mat-Su, Dr. Pettyjohn if you will come forward for just a moment, in the committee substitute that was offered by Dr. Fritz, there is one line that I would like to consult you with and get your reaction on it. It has to do with the disciplinary sanction section, it states that; after a hearing the department may deny, suspend or revoke a license or censor a licensee, if the person;

(1) habitually overusing alcoholic beverages,

(2) impersonating a health care provider,

(3) performs or assists in the performance of abortions,

What is your reaction to that specification?

Number 0146 Dr. Pettyjohn: Well, concerning abortions, as far as I'm concerned you could put in a law that naturopaths are not allowed to do abortions, and that philosophy of naturopathic profession, is to do no harm to the patient, and I feel that personally that, that would be no problem. Naturopaths as far as I know are not licensed to do abortions in any other state and the United States and that it would be a conflict of the philosophy of natural treatment and to do no harm to the patient. So that would be no problem with me personally.

Number 0156 Chairman Tischer: Thank you doctor, now could we hear from the witness.

Number 0158 Tom Pettyjohn in Mat-Su: I'm the brother of Dr. Pettyjohn and I don't have a lot more to add to the comments today, but I do agree with the passage of HB 347. I would just like to add that I am personally acquainted with my brother and his dedication of the well being and the health of his patients and I know that he spent many years of service of trying to gain and educate, and trying to do the best that he can. He can take care of the health of the people and this is one of the true goals in his life, its to provide good health for those people that seek him out and this is my comment.

Number 0172 Chairman Tischer: Thank you very much Tom. There are no questions from the committee members, so lets go back to Anchorage for the next witness there.

Number 0175 Cindy Ziegler in Anchorage: Good afternoon, I'm here to support HB 347, and I would like to say basically that I am as far as for medical care I seek traditionally with the traditional medical establishment probably 90% of the time. I have used naturopath medicine about 2 or 3 occasions and I found it to be very satisfactory when I was at dead end wall with traditional medical help. It did not automatically transfer me over to constantly using the naturopathic way, however, it was very comforting at the time

to know when I reached the dead end at one point that there was an alternative that I could go to and make an intelligent decision of my own.

As near as I can gather from the research that I've done, the study areas and the training of the naturopathic physicians and much of the training is exactly the same or very similar to what the traditional medical physicians receive. If the naturopathic approach and use of that material is different than I'm not too sure why that upsets the many people it seems to upset. I resent very much the idea the medical profession or the legislature or anyone else to come forward in a protective role and concern for my welfare. I am a totally rational, intelligent human being and not someone who doesn't know anybody or doesn't know what she is talking about and that choices should be taken out of my hand because these people are more educated and know what is good or bad for me.

The other question that I would like to mention or address which prompted me to get up and speak; one of the last remarks about the misuse of drugs and their concern that naturopath may in fact misuse drugs. If there hasn't been enough television programs and books on the subject of doctors misusing drugs, and doctors giving out valium prescription and etc., to people who misuse them or handing them out like candy, I really fail to see much difference between the abuse of a prescription under a naturopath is and to the abuse of a prescription under a physician's use. That is a person's choice. It seems to me a person's choice should be something that they can't take away from and should be something that we should be allowed to have a little bit of say in. Thank you.

Number 0202

Chairman Tischer: Thank you Cindy, I appreciate your comments. Now could we go to Mat-Sue and is this the last witness?

Moderator in Mat-Su: Madam Chairman there are no more witnesses.

Chairman Tischer: Thank you, are there any more witnesses in Anchorage that would like

to speak?

Number 0209 — Cathy ...: I'm a registered nurse and I'm very enthusiastic of HB 347, if it passed it would mean the fostering and encouraging the naturopathy in the State of Alaska. Not only would the licensing of naturopathic physicians would be a means of quality control, I believe it would also encourage more naturopaths to relocate to Alaska and making this method of healing available to more Alaskans. I urge you to pass this bill for the benefit of the profession and the health and welfare of all Alaskans.

Number 0219 — Chairman Tischer: Thank you very much Cathy. We appreciate your comments, there are no questions from the committee members, so are there other people who would like to speak in Anchorage?

Number 0225 — Dr. Bonner: Thank you for allowing me to speak again, the main reason that I wanted to speak again; was to say that after listening to many patients here and people who testified about naturopathic medicine, I did want to make a point that a lot of people seem to be confusing the issue of natural childbirth with the practice of naturopathic medicine. Remember I said earlier that billions of people of course we all know have been delivered by natural childbirth or none of us would be here today. And of course natural childbirth, majority of people are able to do very well with natural childbirth, it seems a lot of women confuse natural childbirth with the practice of naturopathic medicine and we are not opposed to natural childbirth of course in the practice of medicine. I would be remiss of course rebutting some of things that were said about my earlier testimony and so I would like to say something about that right now.

Number 0240 — The comments were made that said I did not investigate whether or not the naturopathics were well staffed or whether they were well trained, and there is a position paper that you are pretty well aware of that was put forth last year on HB 347, in which it said, in 1968 studies, U.S. Department of Health, Education & Welfare stated that naturopathic theory and practice are not based upon the

body and basic knowledge relating to health diseases and health care which has been ...of course this division has been willing to unchange today. They are not in the line of the usual customary practice in standard medical practice in the community, and this is where I based some of my comments about that they had mis-diagnosed patients.

I know that physicians do not always make correct diagnosis, but I think the majority of the physicians could pursue a diagnostic or scientific approach through the procedure of the diagnosis and disease that is based on scientific evidence in the scientific community, thats why they accept this throughout the entire medical community in the world. The naturopathic physicians do not use this same methodology, as far as I concerned.

Number 0256

An early comment by the naturopathics today; it was opposed to abortions, and I respect that opinion. I am certain he was sincere in his opposition to abortion, however, the Anchorage Medical Society had a meeting the other night and an obstetrician testified and said someone here locally, practicing naturopathic medicine who used such an abortion in the home and did an episiotomy.

It is unfortunate that the obstetrician could not come this afternoon, because the obstetrician was involved in the delivery of a baby in the hospital, but I don't know whether or not this is hearsay or this is sufficient. I think this physician has actual evidence that this was practiced by someone who says they are practicing naturopathic medicine whether they fall into the same category as these other naturopaths, I do not know. Thats the end of my comment.

Number 0271

Chairman Tischer: Thank you doctor, one thing I would like to make the committee aware is that, if such a statement from the physician although it was a statement, I caution you to understand that that was hearsay and unless those accusations can be proven to us we will strike it from the record, dealing with the abortion issue on the naturopath. I would do the same for any physician, unless they were present and in

the room to answer such an accusation. With that than I believe we had satisfied all the stations in Anchorage who wish to testify as far as I know. We can close the network now.

Number 0280 Moderator in Anchorage: Dr. Jasper did also want to make additional comment to the committee.

Number 0286 Dr. Jasper: I appreciate the opportunity to address the committee again. I made a list of specific points I wanted to address.

The slanderous statement made by Dr. Bonner is typical of ill will among people who make the statement that such a practice is going on in the naturopathic medicine, and than not to substantiate it with a name, date or place is the worst type of dirty politics that I'm aware of. I find it reprehensible that she would make that statement. I feel that the statement was slander in its nature and that she owes an apology.

The people who have come to this hearing in good faith, expecting to have a chance to hear things and not to hear that type of slander or statement.

Going off of that, Dr. Bonner's statement that she supports natural childbirth in the practice of medicine is the medical establishment's idea of natural childbirth and the practice of medicine is in a room located in the hospital which is made up to look like a hotel room, wallpapers, lamps and etc. And if the person did not ...(loud noise on tape) the situation they will have the baby there, otherwise they take them up one flight of stairs in an elevator and have a standard hospital delivery. Many hospitals in the country are now doing this, they only did that in response to the movement, the grass-roots movement to seek out better obstetrical care. There was only mid-wives and naturopathic physicians begin ... and becoming more and more prominent than a competitive measure, the hospitals began trying to offer a service similar to try and regain the market there.

Number 0311 I think the reason people confuse natural

childbirth with the naturopathy is because, by and large, naturopathic physicians are the ones who do natural delivery, the home delivery. So I can see why that confuses what exists, and its not a confusion, its a fact.

Medical doctors by and large don't do natural childbirth today, or were trained in and more appreciative of the medicated standard type of delivery. Its not a confusion, its a fact there. The report that she made in reference to the 1968 report from the U.S. Department of Health, the fact that that report is (16) years old, was also issued by the United States Department of Health which was all staffed by medical doctors. Now this is very similar to, I use these names only as an example, but because the case is similar; that Chevron Gas Company issuing a report that Texico doesn't have good of a gas, that really doesn't mean that Texico doesn't have good gas, but only that Chevron is anxious to sell their product.

As far as our profession that we are pursuing scientific basis in our diagnostic procedures, again I find that to be an error. We pursue the same diagnostic techniques that their profession uses, the terms of radiological work-up, the pathological reports, etc., and for her to say that we don't use that as a basis of our diagnostic work-up, she is in error on that.

Number 0330

I think what's important here is this is a human rights issue, its the right of people to make their own choices in ways that affect their lives. And just because one particular profession does not understand the things that we understand and are not aware of the knowledge we have doesn't make our knowledge any less beneficial. We all know that for over fifty years the treatment of scurvy with vitamin C was considered a quack treatment, because the standard accepted medical society did not accept the treatment of vitamin C, but that story also goes farther. It took fifty years for the Royal British Navy to accept the vitamin C as a treatment for scurvy, it took eighty years for the British Medical Society to accept vitamin C in the treatment of scurvy.

And so, here we have the same thing, the summary of today's hearing is that those of us who are in favor and of the established medical community who are against it. This is why there needs to be a choice in health care through a choice establishing ...certainly both professions have a lot to offer, both professions utilize quite a lot of people when their services or desires are most appropriate. Thank you.

Number 0352 Chairman Tischer: Thank you, Dr. Jasper. Since there are no other witnesses in Anchorage, is that correct?

Moderator in Anchorage: Dr. Center has asked for a minute to testify.

Chairman Tischer: Well, we have the minute but two committee members have already left, because of the bad weather and they are fearful that they won't get home tonight.

We could extend this hearing to another time, may I suggest that Dr. Center perhaps submit a written comment to the committee and we could make it part of the record in that fashion if that's acceptable procedure to him.

Number 0364 Moderator in Anchorage: Dr. Center will forward his comments to you.

Number 0366 Chairman Tischer: Thank you, I also extend that invitation to anyone else that may have additional comments to make or rebuttals to comments that were made and so forth. The committee is open to any type in that way before the deliberations finish on this particular piece of legislation, with that I'll ask the moderators to close down the network.

Number 0375 Chairman Tischer: For the record before we adjourn this meeting, I'd like to indicate that committee has not yet received a fiscal note from the Department of Commerce and Economic Development. We do have a HESS Department fiscal note on this, which is a zero fiscal note. The committee will be asking for a fiscal note from Legislative Finance also. It will be the practice of this Chair to require that the legislative fiscal arm of the Legislature provide us

with fiscal notes. As you well know sometimes fiscal notes that come down are tainted by favoring or disfavoring any particular piece of legislation, and I feel it is necessary to qualify those fiscal notes by an independent fiscal note based on information that we are able to garner or wishes of this committee. So don't be surprised if we recommend a fiscal note passed on with a bill from Legislative Finance. With that than, are there any comments from the committee?

Number 0394 — Rep. Davis: I will be writing to Dr. Hampton and Dr. Spaulding who are chiropractors or naturopaths in Fairbanks, I'll be asking for their comments and will give you a copy.

Number 0398 — Chairman Tischer: Can you do that with rapid haste? I would appreciate that. I will be directing staff and I worked on this personally and have put together and have already developed some language that I think we've already asked the drafter to include.

What I want to do is to bring that draft for you independently so that you will have an opportunity to study it and next time we meet on this, it will be from the limbo file and expect it practically any time. We have taken testimony last year and this year and I think we've exhausted our external differences.

Number 0422 — Chairman Tischer adjourned the meeting.

POSITION PAPER/Department of Health & Social Serv

POSITION PAPER

DRAFT COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 225 (HESS)

For an Act entitled: "An Act relating to the practice of optometry and authorizing the use of certain drugs by optometrists."

This draft Committee Substitute differs from the original Bill in several significant ways:

1. It permits the board of optometry to impose disciplinary sanctions on optometrists who fail to refer a patient to an appropriate health care practitioner for treatment of conditions beyond the scope of the licensee's training.

2. It forbids use of controlled substances.

3. It permits use of topical ophthalmic drugs only in contrast to the original Bill which would have permitted use of systemic drugs.

4. It defines the types of topical drugs which can be used and eliminates a role for the board in determining what drugs can be used.

5. It defines the type of training which must be obtained before a license endorsement can be issued in contrast to the original Bill which required the board to issue regulations prescribing training.

6. It prohibits the practice of surgery by optometrists.

This draft Committee Substitute, in the view of the Department, is a definite improvement over the original Bill. The Department would still prefer to restrict the types of topical drugs which are authorized to diagnostic drugs.

Article 1. Board of Examiners in Optometry.

Section
10. Creation and purpose of board of examiners
20. Membership of board and terms of office
25. Removal of board members
30. Vacancies
40. Qualifications
50. Power of board to adopt regulations
60. Miscellaneous powers and duties of board
70—100. [Repealed]

Sec. 08.72.010. Creation and purpose of board of examiners. There is created the Board of Examiners in Optometry to regulate and control the practice of optometry and to protect and promote the public health, welfare, and safety. (§ 35-3-132 ACLA 1949; am § 2 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment added "to regulate and control the practice of optometry and to protect and promote the public health, welfare, and safety."

Sec. 08.72.020. Membership of board and terms of office. The board consists of five persons, appointed by the governor. Members serve staggered terms of four years. (§ 35-3-132 ACLA 1949; am § 23 ch 102 SLA 1976; am § 3 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "four" for "three" and deleted the former third sentence, which read: "The terms of the public members of the board shall be set so that they do not expire at the same time."

Sec. 08.72.025. Removal of board members. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal. (§ 4 ch 75 SLA 1980)

Sec. 08.72.030. Vacancies. The governor shall fill vacancies on the board by appointment for the unexpired term. (§ 35-3-132 ACLA

Sec. 08.72.040. Qualifications. Four board members shall be licensed, practicing optometrists who have been residents for at three years. One board member shall be a public member. A who has served two successive complete terms may not be until four years from the expiration of the second term that served. (§ 35-3-132 ACLA 1949; am § 23 ch 102 SLA 1976; 75 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "Four" for "Three," and the materinl beginning, "One board member" and ending "term that he served" for the former second sentence, which read: "Two shall be have no direct health care industry."

Sec. 08.72.050. Power of board to adopt regulations. The board shall adopt rules and regulations

(1) necessary for the proper performances of its duties;

(2) governing the applicants and applications for licensing;

(3) for the registration of optometrists;

(4) necessary to govern the practice of optometry;

(5) prescribing requirements which a person licensed under this chapter must meet to demonstrate continued professional competency. (§ 35-3-133 ACLA 1949; am § 6 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment added paragraph (5).

Sec. 08.72.060. Miscellaneous powers and duties of board. (a) The board or a member designated by the board, may issue subpoenas, administer oaths and take testimony concerning any matter within its jurisdiction.

(b) The board may

(1) adopt a seal;

(2) define professional conduct and adopt rules of professional conduct.

(c) The board shall

(1) elect a president and secretary from among its members;

(2) order a licensee to submit to a reasonable physical examination if the licensee's physical capacity to practice safely is at issue.

(d) Repealed by § 3 ch 59 SLA 1966.

(e) Repealed by § 23 ch 75 SLA 1980.

(f) Repealed by § 3 ch 59 SLA 1966. (§§ 35-3-133, 35-3-140 ACLA 1949; am § 3 ch 59 SLA 1966; am §§ 7, 8, 23 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment rewrote subsections (b) and (c), and repealed subsection (e), which read "The board may define professional conduct and adopt rules of professional conduct."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.72.070. Applicability of Administrative Procedure Act. Repealed by § 23 ch 75 SLA 1980.

Sec. 08.72.080. Compensation of board and secretary. Repealed by § 3 ch 59 SLA 1966.

Collateral references. — Right of corporation, or individual not himself licensed, to practice optometry through licensed employee. 102 ALR 343; 128 ALR 955.

One who fills prescription under reciprocal arrangement with optometrist, as subject to charge of practice of optometry without license. 121 ALR 1455.

Practicing medicine, surgery, dentistry, optometry, podiatry, or other healing arts without license as a separate or continuing offense. 99 ALR2d 654.

Sec. 08.72.115. Malpractice insurance.
Repealed by § 40 ch 117 SLA 1978.

Editor's notes. — The repealed section derived from § 24, ch. 102, SLA 1976.

As to purpose of repealing act, see § 1, ch. 177, SLA 1978 as amended by § 7, ch. 46, SLA 1982, in the 1982 Temporary and Special Acts and Resolves.

Sec. 08.72.120. Registration. It is unlawful for a person to practice, or attempt, or offer to practice, optometry without first obtaining a certificate of registration from the board, and without filing the certificate with the clerk of the superior court in each judicial district in which the person practices. (§ 35-3-135 ACLA 1949)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.72.125. Registration of branch offices. (a) The board shall issue a branch office certificate of registration to an Alaskan licensee who maintains a full-time practice in the state but who serves other communities in the state on a part-time basis.

(b) It is unlawful for a person to practice, or to attempt or offer to practice, optometry in communities on a part-time basis without obtaining a branch office certificate of registration from the board, and without filing the certificate with the clerk of the superior court in each judicial district in which the person maintains a branch office.

(c) The board shall prescribe in the regulations the factors to be considered in issuing a branch office certificate of registration. (§ 2 ch 78 SLA 1969; am § 9 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "shall" for "may," and inserted "a branch office certificate of registration" in subsection (a).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 08.72.130. Optometry register. The clerk of the superior court in each judicial district shall keep a record known as the "Optometry Register" and record the certificate of registration of each optometrist who files a certificate. The clerk shall charge the regular filing fee for registration. When an optometrist dies, or when the

Sec. 08.72.230. Fees and disbursements. The department shall collect all fees and keep a record of each transaction, and shall remit to the Department of Revenue all money received. (§ 35-3-138 ACLA 1949; am § 12 ch 76 SLA 1969)

Sec. 08.72.240. Grounds for imposition of disciplinary sanctions. The board may impose disciplinary sanctions when the board finds after a hearing that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects the licensee's ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under the licensee's supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs the licensee's ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) failed to refer a patient to the appropriate health care practitioner after ascertaining the possible presence of ocular disease, (§ 35-3-140 ACLA 1949; am § 32 ch 177 SLA 1978; am § 17 ch 75 SLA 1980)

Effect of amendments. — The 1978 amendment added paragraph (4) of this section as it existed prior to the 1980 amendment.

The 1980 amendment rewrote the section.

Revisor's notes. — This section was renumbered by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

As to the purpose of the 1978 amendatory act, see § 1, ch. 177, SLA 1978 as amended by § 7, ch. 46, SLA 1978, in the 1982 Temporary and Special Acts and Resolves.

Sec. 08.72.250. Disciplinary sanctions. (a) When it finds that a licensee is guilty of an offense under AS 08.72.240, the board may impose the following sanctions singly or in combination:

Sec. 08.72.275. Lenses and frames for eyeglasses and sunglasses. (a) A person may not fabricate, distribute, sell, exchange, deliver or possess with intent to distribute, sell, exchange or deliver eyeglasses or sunglasses unless they are fitted with plastic lenses, laminated lenses, heat-treated glass lenses, or glass lenses made impact resistant by other methods. All plastic and heat-treated glass lenses, before they are mounted in frames, shall be capable of withstanding the impact of a five-eighths inch steel ball dropped on the lens from a height of 50 inches. The impact test shall be conducted at room temperature, with the lens supported by a plastic tube one inch inside diameter, one and one-fourth inch outside diameter, with a one-eighth inch by one-eighth inch neoprene gasket on the top edge.

(b) A person may not fabricate, distribute, sell, exchange, deliver or possess with intent to distribute, sell, exchange or deliver eyeglasses or sunglasses having frames manufactured from cellulose nitrate or other highly flammable materials.

(c) A person who violates this section is punishable by a fine of not less than $50 nor more than $100.

(d) A licensee may sell, exchange or deliver eyeglasses or sunglasses which do not meet the requirements of (a) of this section if the sale, exchange or delivery is authorized in a written request signed by the patient. (§ 1 ch 220 SLA 1968; am § 1 ch 48 SLA 1973; am § 20 ch 75 SLA 1980)

Effect of amendments. — The 1980 amendment added subsection (d).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 34, SLA 1982.

Sec. 08.72.280. Violations. A person may not falsely personate a registered optometrist, or buy, sell or fraudulently obtain a certificate of registration issued to another or advertise the practice of optometry in violation of rules of the board. Practicing or offering to practice optometry is sufficient evidence of a violation of this chapter. (§ 35-3-144 ACLA 1949)

Sec. 08.72.290. Penalty. A person who violates this chapter is guilty of a misdemeanor and is punishable by a fine of not less than $100 nor more than $500, or by imprisonment for a term of not less than 30 days nor more than 90 days, or by both. (§ 35-3-145 ACLA 1949)

Article 4. General Provisions.

Section
300. Definitions
310. Short title

Sec. 08.72.300. Definitions. As used in this chapter

(1) "board" means the Board of Examiners in Optometry;

(2) "optometry" is the examination, other than by the use of drugs, of the human eyes and the visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription or application of lenses, prisms or ocular exercises for the correction or relief of the human eye;

(3) "practicing optometry" is an examination, other than by the use of drugs, of the human eyes and visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription of lenses, prisms or ocular exercises for the correction or relief of the human eye, or the holding of oneself out as being able to do so;

(4) "lenses" means conventional or contact lenses;

(5) "recognized school or college of optometry" is one which is approved by the American Optometric Association or one of its committees;

(6) "department" means the Department of Commerce and Economic Development. (§ 35-3-131 ACLA 1949; am § 2 ch 95 SLA 1966; am § 13 ch 76 SLA 1969, am § 53 ch 218 SLA 1976; am §§ 21, 22 ch 73 SLA 1980)

Cross references. — For professional examination requirements for optometrists, see AS 08.02.010.

Effect of amendments. — The 1980 amendment rewrote paragraphs (2) and (3).

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SENATE BILL NO. 189 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the practice of optometry and authorizing the use of diagnostic drugs by optometrists."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.72.020 is amended to read:

Sec. 08.72.020. MEMBERSHIP OF BOARD AND TERMS OF OFFICE. The board consists of six [FIVE] persons, appointed by the governor. Members serve staggered terms of four years.

* Sec. 2. AS 08.72.040 is amended to read:

Sec. 08.72.040. QUALIFICATIONS. Four board members shall be licensed, practicing optometrists who have been residents for at least three years. One board member shall be a public member with no interest, direct or indirect, in the practices of optometry, opticianry or medicine. One board member shall be a physician licensed in this state. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term that the person served.

* Sec. 3. AS 08.72.050 is amended by adding a new paragraph to read:

(6) concerning the use of diagnostic drugs and the educational requirements for a license validation for their use.

* Sec. 4. AS 08.72.060(c) is amended by adding new paragraphs to read:

(3) with the advice and [guidance] consent of the state medical board, develop a list of specific diagnostic drugs and their dosages that may be used in the practice of optometry in this state by a

person licensed and registered by the board and with a license validation for the use of diagnostic drugs; and

(4) provide for continuing education, including an examination, for optometrists desiring to use diagnostic drugs.

* Sec. 5. AS 08.72.120 is amended by adding a new subsection to read:

(b) An optometrist may not be registered or certified to practice optometry in this state beyond the scope of the optometrist's training. The board of optometry shall determine the optometrist's qualifications.

* Sec. 6. AS 08.72 is amended by adding a new section to read:

Sec. 08.72.235. REFERRAL TO MEDICAL SPECIALIST. An optometrist who determines during the examination of a patient that a pathological condition may exist shall

(1) advise the patient of the possible condition; and

(2) refer the patient to an appropriate medical specialist for further evaluation.

* Sec. 7. AS 08.72.240 is amended by adding a new paragraph to read:

(10) has used the prefix "Dr." or "Doctor" before the licensee's name without using the word "optometrist" as a suffix to the licensee's name or in connection with it.

* Sec. 8. AS 08.72 is amended by adding a new section to read:

Sec. 08.72.257. DIAGNOSTIC DRUGS. (a) An optometrist registered and certified to practice in this state who desires to employ the use of diagnostic drugs shall

(1) submit to the board evidence of satisfactory completion of the educational requirements of the board for the use of diagnostic drugs; and

(2) pass an examination administered by the board.

(b) An optometrist seeking to be registered and certified to

practice in this state with a license validation for the use of diagnostic drugs shall

(1) submit to the board at the time of the licensing examination evidence of satisfactory completion of the board's educational requirements for the use of diagnostic drugs; and

(2) pass an examination administered by the board.

(c) Upon a determination that the applicant in (a) or (b) of this section has met the requirements for the use of diagnostic drugs, the board shall validate the license of the optometrist or successful applicant to allow the use of diagnostic drugs.

(d) An optometrist with a license validation for the use of diagnostic drugs shall undertake the continuing education requirements established under AS 08.72.060(4). Failure to fulfill the continuing education requirements shall be grounds for revocation of the license validation for the use of diagnostic drugs.

(e) An optometrist with a diagnostic drug validation may by written order or prescription sell, give away, barter, exchange, or distribute diagnostic drugs.

Orig. Amendment

* Sec. 10. AS 08.72.300(2) is amended to read:

(2) "optometry" is the examination, other than by the use of drugs, except diagnostic drugs, as limited by this Act, of the human eyes and the visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription or application of lenses, prisms or ocular exercises for the correction or relief of the human eye;

* Sec. 10. AS 08.72.300(3) is amended to read:

(3) "practicing optometry" is an examination, other than by the use of drugs, except diagnostic drugs, as limited by this Act. of the human eyes and visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractive and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal which requires referral to other health care practitioners; or the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription of lenses, prisms or ocular exercises for the correction or relief of the human eye, or the holding of oneself out as being able to do so;

* Sec. 12. AS 08.72.300 is amended by adding a new paragraph to read:

(7) "diagnostic drug" means a cycloplegic, mydriatic or topical anesthetic that is listed in the official United States Pharmacopoeia, or official National Formulary, or in a supplement to either of them, and approved in accordance with AS 08.72.060(c)(3)

Sec. 9. AS 08.72.290 is repealed and reenacted to read:

Sec. 08.72.290. PENALTY FOR PRACTICING WITHOUT A LICENSE OR IN VIOLATION OF CHAPTER. A person practicing optometry in the state without a valid license or permit or who violates this chapter is guilty of a class B misdemeanor. Each day of illegal practice is a separate offense.

Sec. 13. AS 08.64 is amended by adding a new Sec. 08.64.108

Sec. 08.64.108. Regulation of diagnostic drugs as used in the practice of optometry. The board shall adopt regulations necessary to carry into effect the provisions of AS 08.72.060(c)(3).

WEST VIRGINIA BOARD OF OPTOMETRY

JOHN E. CASTO, O.D.
SECRETARY-TREASURER
WEST VIRGINIA BOARD OF OPTOMETRY
611 SIXTH AVE.
P.O. BOX 710
ST. ALBANS, W.VA. 25177

February 27, 1981

(Updated spring 1983, as shown below)

The Honorable Warren R. McGraw
President, Senate of West Virginia
State Capitol Building
Charleston, West Virginia 25305

The Honorable Clyde M. See, Jr.
Speaker, West Virginia House of Delegates
State Capitol Building
Charleston, West Virginia 25305

RE: Report on Enrolled H.B. 1005 of 1976

Dear President McGraw and Speaker See:

The purpose of this letter is to report to each of you and your respective bodies on the Enrolled H.B. 1005 enacted on February 20, 1976 by the Sixty-Second Session of the West Virginia legislature. As you may recall, this law updated the statutory definition of "optometry" to include, among other things, the limited use of drugs prescribable for the human eye for both diagnosis and treatment, under carefully prescribed certification authority delegated to the West Virginia Board of Optometry. This Board has endeavored continuously and faithfully to both certify and monitor the use of drugs by optometrists practicing under the registration of this Board.

Recent information compiled from the one hundred thirty-five ~~(135)~~ 153 West Virginia registered optometrists now certified by this Board for drug usage is as follows:

1. A total of seventy-two ~~(72)~~ 79 different drugs prescribable for the human eye have been employed by these West Virginia certified optometrists since the law was enacted.

2. Forty-seven thousand one hundred twenty-one ~~(47,121)~~ 100,000 individual patients have been seen by these optometrists and conditions such as infectious or allergic conjunctivitis, corneal abrasions and blepharitis (granulated eye lids) have been treated by those certified in the compilation.

3. The distance those patients, who otherwise would have had to travel to geographical locations other than those of the treating optometrists for treatment by ophthalmologists or appropriate medical specialists to whom they formerly were referred, would have had to travel would have required that over ~~620,000~~ 1,800,000 aggregate miles be traveled by the ~~47,121~~ 100,000 patients.

4. Fifty-two ~~(52)~~ 53 different pathological conditions have been diagnosed and treated by these West Virginia certified optometrists.

These ~~135~~ 153 West Virginia optometrists who have been certified in every county of the state are now, faithfully and well, providing updated eye health care benefits to the people of West Virginia.

It should be additionally noted that there has been no report to this Board of any adverse reaction in the diagnosis and treatment rendered to patients involved by any West Virginia certified optometrist.

Please be advised that this Board is quite aware of the full responsibility placed upon it by the legislature in the enactment of this Law, Enrolled H.B. 1005. This data was compiled in a continuing effort to support the trust which has been reposed in it. Each of you are encouraged to call upon this Board for any additional information which may be helpful.

Sincerely yours,

John E. Casto, O.D.

John E. Casto, O.D.
Secretary-Treasurer

JEC/scp

* Sec. 6. AS 08.72 is amended by adding a new section to read:

Sec. 08.72.305. Legend drugs permitted. A licensee holding a certificate issued under AS 08.72.277 may employ or prescribe only those legend drugs specified under the following classifications:

(a) Topical anesthetics

(1) Benoxinate

(2) Proparacaine

(b) Anti-infectives

(1) Bacitracin

(2) Chloramphenicol

(3) Erythromycin

(4) Gentamycin

(5) Polymixin B

(6) Sulfacetamide

(7) Tetracycline

(8) Tobramycin

Anchorage, Alaska 99503

Dear Doctor Bach:

In response to your request I have formulated a list of pharmaceutical agents which may be helpful in preparing your legislation. The current graduating class from the Pennsylvania College of Optometry has developed competency in utilizing pharmaceutical agents in the various catagories and classifications listed below.

Currently the students at the College develop a theoretical knowledge of these pharmaceutical agents through various didactic courses, and expertise in the clinical utilization of these drugs through a variety of clinical experiences. These clinical experiences occur in various settings such as The Eye Institute of the Pennsylvania College of Optometry, Veterans Administration Medical Centers, Health Maintenance Organizations, Armed Forces Hospitals, and private practice settings.

A major emphasis of the curriculum at the College is the differential diagnosis of ocular diseases and systemic diseases with ocular complications. We feel the critical step in the management of ocular and visual disorders is the specific differential diagnosis. The application of pharmaceutical agents is simply one of the competencies necessary in the continuum of the diagnosis and management of ocular diseases.

Listed below are the major classifications and catagories of pharmaceutical agents commonly utilized in the patient care setting of the College. Examples are given of different drugs in each catagory. This is not to be interpreted that other drugs within these catagories are not utilized when specifically needed, based on the professional judgements of the clinician.

I. Topical Anesthetics
   Example: Proparacaine
   Benoxinate

II. Mydriatics
   A. Sympathomimetics
      Example: Phenylephrine
   B. Parasympatholytics
      Example: Atropine group

III. Cycloplegics
   A. Parasympatholytics
      Examples: Atropine group
      Cyclopentolate

IV. Miotics
   A. Examples: Pilocarpine
      Anticholinesterases

V. Antimicrobials
   A. Antibioltics
      Examples: Tetracycline
      Erythromycin
      Gentamicin
      Chloramphenicol
      Bacitracin
      Cephalosporins
   B. Antibacterial
      Example: Sulfonamides
   C. Antiviral
      Example: Idoxuridine
   D. Antifungal
      Example: Natamycin

VI. Anti-inflammatory
   Example: Corticosteroids

VII. Anti-glaucomma
   A. Sympathomimetics
      Example: Epinephrine
   B. Sympatholytic
      Example: Timolol Maleate
   C. Parasympathomimetics
      Examples: Pilocarpine
      Anticholinesterases
   D. Carbonic Anhydrase Inhibitors
      Example: Acetazolamide

VIII. Antihistamines
Examples: Diphenhydramine
Antazoline

IX. Miscellaneous Legend Drugs
Example: Hyperosmotic Agents

X. Over-the-counter Drugs
Example: Dyes
Ocular Lubricants
Decongestants

I hope this list is of some help to you in constructing your new legislation. The Pennsylvania College of Optometry stands prepared to assist you educationally in meeting the visual care needs of the people of Alaska.

Sincerely,

Thomas L. Lewis, O.D., Ph.D.
Dean of Academic Affairs

TLL:dmf

Nancy Dietrick at Senate HE&S says DRAFT CS won't be ready for 2 hours - I saw the draft before it was cleared out of legal services. The bill is quite a bit different than the 225, I'd say schedule AGAIN or wait for CSSB 189 (if it gets out of Senate).

Has Dr Rabkin had
input into the Senate Sub
n do you know.

He wrote the position papers, but
I don't know what he's done on
the CS - I think it comes out of
comm. tee - Doubt he's been too
involved, but don't know for sure.

SPECIFIC LEGISLATION: 32 States

The list (and dates of enactment) of the 32 states with current legislation specifically authorizing optometrists to utilize pharmaceutical agents is as follows:

STATE	DATE OF ENACTMENT
Rhode Island	July 16, 1971
Pennsylvania	March 1, 1974
Tennessee	May 8, 1975
Oregon	May 20, 1975
Maine	June 24, 1975
Louisiana	July 6, 1975
Delaware	July 10, 1975
West Virginia*	March 4, 1976
California	July 9, 1976
Wyoming	February 17, 1977
New Mexico	March 4, 1977
Montana	April 12, 1977 (at 10:10 a.m.)
Kansas	April 12, 1977 (at 2:00 p.m.)
North Carolina*	June 3, 1977
Kentucky	March 29, 1978
Wisconsin	April 29, 1978
Nebraska	February 13, 1979
South Dakota	March 15, 1979
Utah	March 21, 1979
North Dakota	March 22, 1979
Arkansas	April 2, 1979
Nevada	May 25, 1979
Iowa	June 8, 1979
Georgia	February 14, 1980
Arizona	April 25, 1980
Idaho	March 23, 1981
Oklahoma	April 6, 1981
Washington	April 2[illegible] 1981
Missouri	July [illegible] 1981
Minnesota	March [illegible] 1982
Mississippi	March 17, 1982
Virginia	February 25, 1983

*both diagnostic and therapeutic use

NOTE: None of these laws has ever been repealed. However, a July 30, 1982 opinion of the Texas state attorney general has rendered that state's unusual provision (an amendment to the medical practice act), which was enacted on August 5, 1981, inoperative.

SOURCE: Dennis Swarner O.D & Robert O'Connell, O.D.

GENERAL LEGISLATION: 4 states

There are four states which authorize the use of pharmaceutical agents by optometrists by extant general law or favorable attorney general opinion:

Alabama	(diagnostic use)
Florida	(diagnostic and therapeutic use)
Indiana	(diagnostic use)
New Jersey	(diagnostic use)

NOTE: In addition, in Michigan, while there is no statutory prohibition of the use of pharmaceutical agents by optometrists, there is a negative opinion of the state attorney general.

For your information we are including an updated map showing, geographically, the utilization of pharmaceutical agents by optometrists.

Note: Section 39, chapter 842, Oregon Laws 1977, is operative July 1, 1986, and provides:

Sec. 39. ORS 683.010, 683.020, 683.030, 683.035, 683.040, 683.050, 683.060, 683.070, 683.080, 683.100, 683.110, 683.120, 683.130, 683.140, 683.155, 683.170, 683.180, 683.190, 683.210, 683.250, 683.260, 683.270, 683.275, 683.280, 683.290 and 683.990 relating to optometrists are repealed.

GENERAL PROVISIONS

683.010 Definitions. As used in this chapter, unless the context requires otherwise:

(1) "Board" means the Oregon Board of Optometry.

(2) "Practice of optometry" means the employment of any means other than the use of drugs, except diagnostic agents, topically applied, known generically as cycloplegics, mydriatics, topical anesthetics, dyes such as fluorescein, and, for emergency use only, miotics, for the measurement or assistance of the powers or range of human vision or the determination of the accommodative and refractive states of the human eye or the scope of its functions in general or the adaptation of lenses or frames for the aid thereof, subject to the limitations of ORS 683.040.

(3) "Trial frames" or "test lenses" means any frame or lens used in testing the eye which is not sold and not for sale. [Amended by 1971 c.102 §1; 1975 c.175 §1]

683.020 Certificate of registration required to practice optometry. No person shall engage in the practice of optometry or display a sign or in any other way advertise or hold himself out as an optometrist without having first obtained a certificate of registration from the board as provided for in this chapter. In any prosecution for the violation of this section, the use of test cards, test lenses or of trial frames is prima facie evidence of the practice of optometry. [Amended by 1971 c.102 §2]

683.030 Persons and practices not affected. This chapter shall not be construed to prevent any person duly licensed to practice medicine and surgery from treating or fitting glasses to the human eye, nor to prohibit the sale of complete ready-to-wear eye glasses as merchandise from a permanent place of business in good faith and not in evasion of this chapter by any person not holding himself out as competent to examine and prescribe for the human eye.

683.035 Discrimination against optometrists prohibited. No official, board, commission or other agency of the state or of any of its political subdivisions or municipalities shall discriminate between duly licensed optometrists and any other person authorized by law to render professional services which a duly licensed optometrist may render, when such services are required. Such services shall be paid for in the same manner and under the same standards as similar professional services. [1963 c.121 §1]

LICENSING

683.040 Qualifications of applicants. (1) Every person desiring to commence the practice of optometry in this state must show by satisfactory evidence that he is of good moral character and has graduated from a school of optometry which is recognized and approved by the board and which maintains a standard of four school years of at least nine months each.

(2) Every person desiring to commence the practice of optometry after January 1, 1976, or employ the use of diagnostic agents shall in addition to the requirements of subsection (1) of this section have satisfactorily completed a course in pharmacology, as it applies to optometry, by an institution accredited by a regional or professional accreditation organization which is recognized or approved by the National Commission on Accrediting or the United States Commissioner of Education, with particular emphasis on the topical application of diagnostic agents to the eye for the purpose of examination of the human eye and the analysis of ocular functions, approved by the Oregon Board of Optometry. [Amended by 1971 c.102 §3; 1975 c.175 §2]

683.050 Persons licensed in another state. In lieu of the educational requirements of ORS 683.040, it shall be deemed equivalent if an applicant submits satisfactory proof to the board that he:

(1) Has passed an examination in optometry before a state board of examiners in another state of the United States and that the certificate granted in token thereof is then in force; and

(2) Was actually engaged in the practice of optometry in such state for the full period of three years subsequent thereto.

HB225

November 30, 1982

The Honorable Mae M. Tischer
Alaska State House of Representatives
3305 Oregon Drive
Anchorage, Alaska 99503

Dear Representative Tischer:

Alaska's doctors of optometry (O.D.) are preparing to introduce legislation that will allow qualified Alaskan ODs to use prescription drugs in the treatment of infections, allergic inflammations and minor injuries of the eyes not requiring the services of a specialist. Many such conditions are treated by general practitioners, who have minimal training in this area (see attached article on ophthalmology training in medical schools). However the optometrist, who is considerably better qualified by training, experience and instrumentation than a general practitioner, must refer his patient to an MD (usually an ophthalmologist), at additional expense to the patient. We hav estimated, based on the experience of West Virginia (report to the West Virginia Legislature attached), that the elimination of extra visits would save Alaskans $235,000. in the first 3 years, not counting travel and lost time.

A majority of Alaska's ODs have recently completed a 120 hour course of postgraduate education and training in ocular therapy. A copy of the course outline and prospectus are attached. While 120 hours (and an equal amount of home study) is extensive for working practitioners, it should be considered only against a background of 4000 hours of professional training, much of it in the background medical sciences (copy of Pennsylvania College of Optometry curriculum attached). The combination provides a medical background equaling or exceeding dentistry (dental curriculum attached. Basic medical sciences in both curricula highlighted). Dentists, like physicians, have unrestricted drug prescribing privileges, though in practice they limit themselves to drugs appropriate to their field.

Drug legislation in more restricted form was originally introduced in 1978, when it passed the House. However ophthalmologists, who oppose the bill, have been able to tie it up in one committee or another since that time, despite a two thirds favorable majority in each house. If passage is further delayed, the skills gained or sharpened in this training will begin to deteriorate and problems of "grandfathering" may arise.

We will present further backup information at hearing. In the meantime, please feel free to contact me if you need any additional information.

Very truly yours,

Phillip W. Bach

WEST VIRGINIA BOARD OF OPTOMETRY

JOHN E. CASTO, O.D.
SECRETARY-TREASURER
WEST VIRGINIA BOARD OF OPTOMETRY
611 SIXTH AVE.
P.O. BOX 710
ST. ALBANS, W.VA. 25177

February 27, 1981

The Honorable Warren R. McGraw
President, Senate of West Virginia
State Capitol Building
Charleston, West Virginia 25305

The Honorable Clyde M. See, Jr.
Speaker, West Virginia House of Delegates
State Capitol Building
Charleston, West Virginia 25305

RE: Report on Enrolled H.B. 1005 of 1976

Dear President McGraw and Speaker See:

The purpose of this letter is to report to each of you and your respective bodies on the Enrolled H.B. 1005 enacted on February 20, 1976 by the Sixty-Second Session of the West Virginia legislature. As you may recall, this law updated the statutory definition of "optometry" to include, among other things, the limited use of drugs prescribable for the human eye for both diagnosis and treatment, under carefully prescribed certification authority delegated to the West Virginia Board of Optometry. This Board has endeavored continuously and faithfully to both certify and monitor the use of drugs by optometrists practicing under the registration of this Board.

Recent information compiled from the one hundred thirty-five (135) West Virginia registered optometrists now certified by this Board for drug usage is as follows:

1. A total of seventy-two (72) different drugs prescribable for the human eye have been employed by these West Virginia certified optometrists since the law was enacted.

2. Forty-seven thousand one hundred twenty-one (47,121) individual patients have been seen by these optometrists and conditions such as infectious or allergic conjunctivitis, corneal abrasions and blepharitis (granulated eye lids) have been treated by those certified in the compilation.

3. The distance those patients, who otherwise would have had to travel to geographical locations other than those of the treating optometrists for treatment by ophthalmologists or appropriate medical specialists to whom they formerly were referred, would have had to travel would have required that over 620,000 aggregate miles be traveled by the 47, 121 patients.

4. Fifty-two (52) different pathological conditions have been diagnosed and treated by these West Virginia certified optometrists.

These 135 West Virginia optometrists who have been certified in every county of the state are now, faithfully and well, providing updated eye health care benefits to the people of West Virginia.

It should be additionally noted that there has been no report to this Board of any adverse reaction in the diagnosis and treatment rendered to patients involved by any West Virginia certified optometrist.

Please be advised that this Board is quite aware of the full responsibility placed upon it by the legislature in the enactment of this Law, Enrolled H.B. 1005. This data was compiled in a continuing effort to support the trust which has been reposed in it. Each of you are encouraged to call upon this Board for any additional information which may be helpful.

Sincerely yours,

John E. Casto, O.D.

Representative May Tisher
State Capitol
Pouch V
Juneau, AK 99811

Dear Representative Tisher:

I would like to take this opportunity to voice my opposition to House Bill 225 which is due to appear before your committee. This bill is designed to allow optometrists the use of prescription medications for diagnosis and treatment of eye disorders.

Without taking too much of your time I would like to state that I feel this is likely inappropriate for various reasons. One, when freedom to prescribe medications to patients is given to a paramedical personnel, generally it is tied to a supervisory provision in which the provider is suppose to be under the auspices of someone in the medical profession. This, while being admirable in its intent, is impossible in its application. Having recently arrived to Alaska from North Carolina, which happened to have been the second state in the Union to allow optometrists use of medications, I was able to observe such a bill in action for a period of time. In general I do not feel that this right was abused by the optometrist, but in point of fact, there is no way to supervise such usage of medications and pharmacists seem uniformly willing to fill any prescription from an optometrist and provide absolutely no policing effort themselves. Two, once a group of medications is approved for use, a whole new spectrum of medications are available for use in that the medicines tend to be grouped together under certain general headings by the Food and Drug Administration. While I feel it is probably desirable to have optometrists free to use topical anesthetics and diagnostic pupillary agents to aid in the examination of patients, it is essentially impossible to restrict their use of medications to only these agents. If it were possible, I would feel that this is a favorable approach to take to broadening their health care.

A further point would be one to defend my view point. It seems many people hold the view that opposition to such a measure comes from a competitive basis from the medical profession and not one with the patients' true concern at heart. I would like to

542 WEST SECOND AVENUE ANCHORAGE, ALASKA 99501-2242 Telephone 907/276-1617

emphasize that whether or not the bill is passed will have little or no impact on the type of practice any of the ophtnalmologists in the community have. Rather it provides a greater freedom for patient misuse than a loosening of any trade restrictions imposed by present regulations.

Please give thoughtful consideration to the bill when it is presented with these points in mind.

Sincerely,

Edward E. Crouch, M.D.

Prepresentative Mae Tischer
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

Senate Bill #189 and House Bill #225 should be applicable in the practice of Optometry only in remote areas where medical personnel (M.D./D.O.) are not available. In Anchorage for example, medical personnel are available to treat patients with eye disorders.

On the other hand, Optometrists should be permitted to use such medications as necessary in examining eyes, measuring errors in refraction and prescribing glasses to correct these defects.

Sincerely,

Dr. Kenneth Y. E. Chang, M.D.

STAFF REPORT

HB 230 LICENSING AND PRACTICE OF MEDICINE

MARCH 18, 1983

SB 164

Dave Palmer, HHESS

08.64.010 Sec. 1. Changes area of residency of the board of medical examiners from separate judicial districts to different geographical areas.

08.64.020 Sec. 2. Provides that member's terms are staggered. Restrains reappointment after 2 successive terms.

08.64.040 Sec. 3. Allows board to adopt rules to remove members who do not attend meetings.

08.64.085 Sec. 4. No chang...specifies meeting times and duties.

08.64.170. Sec. 5. Licens to practice medicine or osteopathy is required.

08.64.240 Sec. 6. Reworded version of existing section. Allows board to refuse license for same reasons as it may impose disciplinary sanctions.

08.64.250 Sec. 7. Changes licensure by "endorsement" to "credentials", following nationally recoginzed language. Adds podiatry, which is a practice already covered by statute, but was omitted from certain sections like this one.

08.64.270 Sec. 8. Adds reference to AS 08.64.209 (podiatrists).

08.64.311 Sec. 9. Fees are changed from biennial to four years after date of issue.

08.64.315 Sec. 10. New fees are established. These are consistent with other licensing fees within the division of occupational licensing.

08.64.325 Sec. 11. Grounds for imposition of disciplinary sanctions. Criteria for sanctions are defined. Proposed bill is more specific than current law. Reference to the Administrative Procedure Act (AS 44.62) is deleted.

08.64.330 Sec. 12. Disciplinary sanctions. Sanctions are specified, expanded, and defined in much greater detail than in current law.

Staff report, HB 230
HHESS palmer

08.64.360 Penalty for practicing without a license or in violation of the chapter. Specifies class B misdemeanor for persons practicing without a license.

08.64.380 (2) Sec. 14. practice of medicine is redefined.

Section 15. Statutes are repealed regarding substitution for members on the board (030), payment of per diem (110), annual report to the governor (200[1]), moral character (200[1]), and abortions (380[3]).

Amendments to the bill have been proposed that will add a chief investigator assigned to the Board and an executive director for the board. Investigators currently work under the auspices of the Division of Occupational Licensing, and investigate all issues within the division' jurisdiction. One investigative position, although authorized, has been cut due to the 5% reduction in the governor's budget.

OK on the investigator
Nix on the Exec Dir.

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

For an Act entitled: "An Act relating to the regulation of the practice of medicine."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050 is amended by adding a new subsection to read:

(c) The department shall employ an individual who is not a member of the board to be assigned, as a primary duty, to be the investigator for the board. The State Medical Board (AS 08.64.010) shall approve the employment of the investigator. The investigator shall

(1) conduct investigations into alleged violations of AS 08.64, and into alleged violations of regulations and orders of the State Medical Board;

(2) at the request of the State Medical Board, conduct investigations based on complaints filed with the department or with the board; and

(3) be directly responsible and accountable to the State Medical Board, except that only the department has authority to terminate his employment.

* Sec. 5. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.075. EXECUTIVE DIRECTOR OF THE BOARD.

With approval of the board, the department shall employ an individual who is not a member of the board to serve as the executive officer of the board. The executive director is in the partially exempt service under AS 39.25.120. The executive director shall

(1) perform the administrative duties required by the department, by the board, and by this chapter;

(2) carry out regulations and policies of the board; and

(3) assist the board in conducting continuing education programs and examinations of applicants for licenses.

IN THE HOUSE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

HOUSE BILL NO. 230

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to licensing and regulation of the practice of medicine."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.64.010 is amended to read:

Sec. 08.64.010. CREATION AND MEMBERSHIP OF STATE MEDICAL BOARD. The governor shall appoint a board of medical examiners, to be known as the State Medical Board, consisting of five [LICENSED] physicians <u>licensed in the state</u> [, RESIDING IN AS MANY SEPARATE ALASKA JUDICIAL DISTRICTS AS POSSIBLE,] and two persons with no direct financial interest in the health care industry. <u>To the extent possible each physician member must reside in a geographical area of the state that is different from that of every other physician member.</u>

* Sec. 2. AS 08.64.020 is amended to read:

Sec. 08.64.020. [STATE MEDICAL BOARD] TERM OF OFFICE. Members shall be appointed for <u>staggered terms</u> [A TERM] of four years, subject to confirmation by a majority of the members of the legislature in joint session, and shall hold office until their successors are appointed and qualified. <u>A person who has served two successive complete terms may not be reappointed until four years after the expiration of the second term</u> [THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD SHALL BE STAGGERED SO THAT THEY DO NOT EXPIRE AT THE SAME TIME].

* Sec. 3. AS 08.64.040 is amended to read:

Sec. 08.64.040. REMOVAL OF MEMBERS. The governor may remove a member of the board for cause. <u>The board may by regulation provide</u>

that unexcused absences from meetings are cause for removal.

* Sec. 4. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.085. MEETINGS OF THE BOARD. The board shall meet at least four times a year.

Sec. 08.64.101. DUTIES. The board shall

(1) examine and issue licenses to applicants;

(2) submit an annual report of its proceedings to the governor, including a statement of money received and disbursed;

(3) after a hearing, impose disciplinary sanctions on persons who violate this chapter, or the regulations or orders of the board;

(4) adopt regulations insuring that renewal of licenses is contingent upon proof of continued competency on the part of the licensee.

* Sec. 5. AS 08.64.170 is amended to read:

Sec. 08.64.170. LICENSE TO PRACTICE MEDICINE OR OSTEOPATHY. (a) A person may not practice medicine, podiatry, osteopathy or acupuncture in the state unless the person is licensed under this chapter, except that

(1) a physician assistant may examine, diagnose or treat persons under the supervision, control, and responsibility of either a physician licensed under this chapter or a physician (Board) exempted from licensing [LICENSURE] under AS 08.64.370;

(2) a physician trained mobile intensive care paramedic may render emergency lifesaving service; [AND]

(3) a person licensed under AS 08.36 (DENTISTRY) may perform acupuncture in the regular practice of dentistry, subject to the regulations of the Board of Dental Examiners; and

(4) a person who is licensed or authorized under another

chapter of this title may engage in a practice which is authorized under that chapter.

* Sec. 6. AS 08.64.240 is repealed and reenacted to read:

Sec. 08.64.240. LICENSE REFUSED. (a) The board shall refuse to grant a license if

(1) the applicant fails or cheats during the examination;

(2) the board determines that the applicant is professionally unfit to practice medicine or osteopathy in the state; or

(3) the applicant fails to comply with a requirement of this chapter.

(b) The board may refuse to grant a license to any applicant for the same reasons that it may impose disciplinary sanctions under AS 08.64.325.

* Sec. 7. AS 08.64.250 is amended to read:

Sec. 08.64.250. LICENSURE BY CREDENTIALS [ENDORSEMENT]. The board may waive the examination requirement and license by credentials [ENDORSEMENT] if the physician or podiatry applicant meets the requirements of AS 08.64.200 or 08.64.209, submits proof of continued competence as required by regulation, pays the required fee and has

(1) an active license from a board of medical examiners established under the laws of a state or territory of the United States or a province of Canada issued after thorough examination; or

(2) passed an examination given by the National Board of Medical Examiners or the Federation of State Medical Boards of the United States if the applicant is a physician, or has passed an examination given by the National Board of Podiatry Examiners if the applicant is a podiatrist.

* Sec. 8. AS 08.64.270(a) is amended to read:

(a) The board may issue a temporary permit to an applicant who

qualify for physicians qual for osteopath Podiatrist

meets the requirements of AS 08.64.200, [OR] 08.64.205, or 08.64.209 and pays the required fee.

* Sec. 9. AS 08.64.311 is amended to read:

Sec. 08.64.311. [BIENNIAL] LICENSE RENEWAL. Licenses shall be renewed four years after the date of issue [BIENNIALLY].

* Sec. 10. AS 08.64.315 is amended to read:

Sec. 08.64.315. FEES. The following fees are imposed under this chapter:

(1) application	$ 50	[$ 25]
(2) license by examination	200	[125]
(3) license by credentials [ENDORSEMENT] or waiver of examination	200	[100]
(4) temporary permit	50	[25]
(5) locum tenens permit	50	[25]
(6) license renewal [, BIENNIAL], active	600	[100]
(7) license renewal [, BIENNIAL], inactive	200	[25]
(8) license by reexamination	150	[75]

* Sec. 11. AS 08.64.325 is repealed and reenacted to read:

COPY

Sec. 08.64.325. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. (a) The board may impose a sanction if the board finds after a hearing that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation while providing professional services or engaging in professional activities;

(3) advertised professional services in a false or

misleading manner;

(4) has been convicted, including conviction based on a guilty plea or plea of nolo contendere, of (A) a felony or other crime if the felony or other crime is substantially related to the qualifications, functions, or duties of the licensee; or (B) a crime involving the unlawful procurement, sale, prescription or dispensing of drugs;

(5) has procured, sold, prescribed or dispensed drugs in violation of any law, regardless of whether there has been a criminal action;

(6) intentionally or negligently permitted the performance of patient care by persons under the licensee's supervision which does not conform to minimum professional standards even if the patient was not injured;

(7) failed to comply with this chapter, a regulation adopted under this chapter, or with an order of the board;

(8) has demonstrated

(A) professional incompetence, gross negligence, or repeated negligent conduct;

(B) addiction to, severe dependency on, or habitual overuse of alcohol or other drugs which impairs the licensee's ability to practice safely;

(C) unfitness because of physical or mental disability;

(9) engaged in unprofessional conduct or in lewd or immoral conduct in connection with the delivery of professional services to patients;

(10) has violated AS 18.16.010;

(11) has violated any code of ethics adopted by regulation

by the board;

(12) has denied care or treatment to a patient or person seeking assistance from the physician if the only reason for the denial is the failure or refusal of the patient to agree to arbitrate as provided in AS 09.55.535(a); ARBITRATION of dispute.

(13) has had a license or certificate to practice medicine in another state, a territory of the United States, or a province of Canada suspended or revoked unless the suspension or revocation was caused by the failure of the licensee to pay fees to that state, territory, or province.

If one holds this in another state can he pay fees here + practice

(b) In any case involving (a)(13) of this section, the final findings of fact, conclusions of law, and order of the authority which suspended or revoked a license or certificate constitute a prima facie case (1) that the license or certificate was suspended or revoked and (2) of the grounds under which the suspension or revocation was granted.

COPY

* Sec. 12. AS 08.64.330 is repealed and reenacted to read:

Sec. 08.64.330. DISCIPLINARY SANCTIONS. (a) If the board finds that a licensee has committed an act set out in AS 08.64.325(a), the board may COPY

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require the licensee to

(A) report regularly to the board on matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee; or

(7) impose one or more of the sanctions set out in (1) -- (6) of this subsection.

(b) The board may end the probation of a licensee if it finds that the deficiencies which required this sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeal process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he or she continues to practice. A person whose license is suspended under this section is entitled to a hearing by the board no later than seven days after the effective date of the order. After a hearing, the person may appeal the suspension to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

How is this determined - what criterion

(e) A license may be suspended upon receipt of a certified copy of evidence that the licensee's license to practice medicine in another state or a territory of the United States or a province of Canada has been suspended or revoked. The suspension remains in effect until a hearing can be held by the board.

(f) The board shall be consistent in the application of disciplinary sanctions. A significant departure from earlier decisions of the board involving similar situations must be explained in findings of fact or orders made by the board.

* Sec. 13. AS 08.64.360 is amended to read:

Sec. 08.64.360. PENALTY FOR PRACTICING WITHOUT A LICENSE OR IN VIOLATION OF CHAPTER. Except for a physician assistant, [AND] a physician-trained mobile intensive care paramedic under AS 08.64.170, and a person licensed or authorized under another chapter of this title who engages in practices for which that person is licensed or authorized under that chapter, a person practicing medicine or osteopathy in the state without a valid [OBTAINING AND FILING AN APPROPRIATE] license or permit is guilty of a class B misdemeanor [AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $100, OR BY IMPRISONMENT FOR NOT LESS THAN 10 DAYS NOR MORE THAN 90 DAYS, OR BY BOTH]. Evidence that the defendant has failed to file a license with the clerk of the court is prima facie evidence that the defendant is not licensed. Each day of illegal practice is a separate offense.

Sec. 14. AS 08.64.380(2) is repealed and reenacted to read:

(2) "practice of medicine" or "practice of osteopathy" means:

(A) for a fee, donation, or other consideration, to diagnose, treat, operate on, prescribe for, or administer to any human ailment, blemish, deformity, disease, disfigurement, disorder, injury, or other mental or physical condition; or to attempt to perform or represent that a person is authorized to perform any of the acts set out in this subparagraph;

(B) to use or publicly display a title in connection with a person's name including "doctor of medicine," "M.D.," "doctor of osteopathic medicine," "D.O.," or a specialist designation including "surgeon," "dermatologist," or any title which tends to show that the person is willing or qualified to diagnose

or treat the sick or injured; perdiem ANNUAL REPORT TO GOV. GOOD MORAL character

* Sec. 15. AS 08.64.030, 08.64.110, 08.64.140, 03.64.200(1), and 08.64.380(3) are repealed.

"unprofessional conduct" violation to 08.16.010

STAFF REPORT

HB 230, LICENSING AND PRACTICE OF MEDICINE

MARCH 18, 1983

Dave Palmer, HHESS

08.64.010 Sec. 1. Changes area of residency of the board of medical examiners from separate judicial districts to different geographical areas.

08.64.020 Sec. 2. Provides that member's terms are staggered. Restrains reappointment after 2 successive terms.

08.64.040 Sec. 3. Allows board to adopt rules to remove members who do not attend meetings.

08.64.085 Sec. 4. No change...specifies meeting times and duties.

08.64.170. Sec. 5. License to practice medicine or osteopathy is required.

08.64.240 Sec. 6. Reworded version of existing section. Allows board to refuse license for same reasons as it may impose disciplinary sanctions.

08.64.250 Sec. 7. Changes licensure by "endorsement" to "credentials", following nationally recoginzed language. Adds podiatry, which is a practice already covered by statute, but was omitted from certain sections like this one.

08.64.270 Sec. 8. Adds reference to AS 08.64.209 (podiatrists).

08.64.311 Sec. 9. Fees are changed from biennial to four years after date of issue.

08.64.315 Sec. 10. New fees are established. These are consistent with other licensing fees within the division of occupational licensing.

08.64.325 Sec. 11. Grounds for imposition of disciplinary sanctions. Criteria for sanctions are defined. Proposed bill is more specific than current law. Reference to the Administrative Procedure Act (AS 44.62) is deleted.

08.64.330 Sec. 12. Disciplinary sanctions. Sanctions are specified, expanded, and defined in much greater detail than in current law.

Staff report, HB 230
HHESS palmer

08.64.360 Penalty for practicing without a license or in violation of the chapter. Specifies class B misdemeanor for persons practicing without a license.

08.64.380 (2) Sec. 14. practice of medicine is redefined.

Section 15. Statutes are repealed regarding substitution for members on the board (030), payment of per diem (110), annual report to the governor (200[1]), moral character (200[1]), and abortions (380[3]).

Amendments to the bill have been proposed that will add a chief investigator assigned to the Board and an executive director for the board. Investigators currently work under the auspices of the Division of Occupational Licensing, and investigate all issues within the division's jurisdiction. One investigative position, although authorized, has been cut due to the 5% reduction in the governor's budget.

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

For an Act entitled: "An Act relating to the regulation of the practice of medicine."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050 is amended by adding a new subsection to read:

(c) The department shall employ an individual who is not a member of the board to be assigned, as a primary duty, to be the investigator for the board. The State Medical Board (AS 08.64.010) shall approve the employment of the investigator. The investigator shall

(1) conduct investigations into alleged violations of AS 08.64, and into alleged violations of regulations and orders of the State Medical Board;

(2) at the request of the State Medical Board, conduct investigations based on complaints filed with the department or with the board; and

(3) be directly responsible and accountable to the State Medical Board, except that only the department has authority to terminate his employment.

* Sec. 5. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.075. EXECUTIVE DIRECTOR OF THE BOARD.

With approval of the board, the department shall employ an individual who is not a member of the board to serve as the executive officer of the board. The executive director is in the partially exempt service under AS 39.25.120. The executive director shall

(1) perform the administrative duties required by the department, by the board, and by this chapter;

(2) carry out regulations and policies of the board; and

(3) assist the board in conducting continuing education programs and examinations of applicants for licenses.

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of AS 24.20.271(1) and AS 44.66.050 (sunset legislation), a review of the Alaska State Medical Board was conducted to review Board activities and accomplishments to determine if the Board has been operating in an effective, efficient, and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Alaska State Medical Board should be reestablished. The law currently specifies that this Board will terminate on June 30, 1983, but will continue until June 30, 1984, for the purpose of concluding its affairs.

Scope

The major areas reviewed were the Board's operations and its licensing, examination, administration, complaint, and affirmative action functions. Our review consisted of analyzing and evaluating the following:

1. Applicable statutes and Board regulations;
2. tests of records and documents of the Board and the Division of Occupational Licensing (OL), Department of Commerce and Economic Development;
3. interviews with OL employees;
4. complaints filed with OL, the Ombudsman's Office, and the Equal Employment Opportunity Office; and,
5. interviews with Board members.

ORGANIZATION AND FUNCTION

The State Medical Board is a regulatory board with 7 members: 5 licensed physicians, and 2 public members with no direct financial interest in the health care industry. It is preferable that the licensed physicians reside in as many separate Alaska judicial districts as possible.

The function of the Board is to determine the minimum quality of medical care by:

1. Examining and issuing licenses to qualified applicants.

2. Establishing or amending rules and regulations necessary and desirable to enforce the statutes of the State.

3. Holding hearings in order to revoke, annul, or suspend the license of a person violating the medical statutes and regulations.

The Board regulates the following groups engaged in medical practice in Alaska: physicians, steopaths, physician assistants (PA's), podiatrists, and acupuncturists. Most licensing requirements are established by statute. However, statutes have granted power to waive some requirements in favor of conditions concerning special licenses--those by endorsement, those for temporary licensure up to 8 months or until the Board meets to consider the application, whichever occurs first, and a temporary locum tenens permit which is valid for 120 consecutive days.

An applicant for registration as a medical practitioner must have passed an examination given by the National Board of Medical Examiners or the Federation of State Medical Boards of the United States. An oral interview is also administered by a member of the Board. Foreign medical graduates who are graduated from medical colleges not recognized by the American Medical Association or one of its agencies must be certified by the Educational Council of Foreign Medical Graduates or be licensed by examination in another state or territory of the United States or a province in Canada.

Licensure by a temporary permit allows a practitioner the opportunity to practice medicine when all other requirements are met. It is renewable only once.

REPORT CONCLUSIONS

In our opinion, the State Medical Board should be reestablished. The practices of medicine, osteopathy, and acupuncture by physicians, osteopaths, physician assistants, paramedics, and podiatrists is regulated by the Alaska State Medical Board. Because these occupations affect the public's health, safety, and welfare, in our opinion they should be subject to regulations and controls. Establishing minimum educational and experience requirements provided reasonable assurance to the public that licensees are qualified. In addition, active investigation of complaints from the public and other practitioners ensures that licensees continue to practice in a competent manner.

In our opinion, these functions are needed for the protection of the public. Although we believe the Medical Board has effectively accomplished these functions, we are making a recommendation which we believe is needed in order for the State Medical Board to more effectively serve the Alaska public.

We recommend legislative consideration be given to statutory change which would (1) define unprofessional conduct or practices, (2) require hospitals to notify the Medical Board when a practitioner is deemed a potential danger to the public, and (3) change the composition of the Board to represent all persons regulated (see Recommendation No. 1).

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

Legislative consideration should be given to regulatory changes concerning the disciplinary process and the composition of the Board.

The 1978 audit recommended the establishment of regulations to ensure consumer complaints receive an impartial examination on the basis of merit. CSSB 237 delineated the grounds for imposition of disciplinary sanctions and disciplinary actions to be imposed. These grounds included unprofessional business practices as well as malpractice. This bill did not pass, and we recommend that it be reintroduced to the Legislature.

In addition, we believe statutory changes in the following areas would benefit the public:

A. Hospitals should be required to notify the State Medical Board when a practitioner's hospital privileges are refused or restricted because that person is a real or potential danger to the public. If hospitals were to report such actions, the Medical Board could initiate an investigation to determine if a questionable practioner should retain his or her license.

B. The Board should adequately represent those persons it regulates. The Board regulates 689 physicians, 73 physician assistants, 53 paramedics, and 10 podiatrists. The Board is currently composed of 5 physicians and 2 public members. Allowing participation of all occupations regulated by the Board would ensure that one occupational group does not promote its interests over the interests of an unrepresented occupational group.

AUDITOR'S COMMENTS

The illness of one of the Division's three full-time investigators resulted in minimal investigative effort for the State Medical Board during the last year as the Division could not replace him until his resignation of June 2, 1982. The Division hired an investigator to fill this position as of June 28, 1982.

As a result of this situation, investigative effort was not sufficient to provide adequate public protection.

Once the unit is fully operational, we believe a management analysis would be in order to determine if additional resources are needed to help reduce the backlog of 44 cases, 17 of which are priority I (life threatening).

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative attainments as Board activities relate to the public need factors defined in the "Sunset" law. These analyses are not intended to be comprehensive in nature, but address those areas we were able to cover within the scope of our review.

I. The extent to which the board, commission or program has operated in the public interest.

A. The following demonstrate the Board's performance in the public's best interest:

1. The board has held an average of 4 meetings a year in various locations in Alaska.

2. The Board provided an examination twice a year for candidates.

3. Since 1978, the Board has established regulations for continuing Medical Education, Physician Assistants, and Paramedics.

B. The following conditions and activities existed which could not be demonstrated to be in the public's best interest:

1. There has been no examination of complaints by consumers because AS 08.64.380 does not specify unethical economic or business practices as unprofessional conduct (see Recommendation No. 1).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource and personnel matters.

A. The following enhanced the performance of the Medical Board.

1. The Board received funding and support from OL in the amount of $108,704 (see Appendix A).

2. The Board received assistance in drafting legislation and regulatory changes from OL.

3. The Board receives legal assistance from the Attorney General's Office.

4. The Board receives cooperation from the Department of Health and Social Services in licensing paramedics as a result of a Memorandum of Agreement between the two agencies.

B. The following practices have impeded the Board's performance:

1. The Division of Occupational Licensing (OL) has not been able to provide the necessary investigative effort required by AS 08.01.050(19); and the Board has not been able to provide regulations covering unethical or improper actions on the part of licensees (see Auditor's Comments).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

A. The following statutory changes were recommended by the Board:

1. The Board has recommended and strongly supported passage of CSSB 237 delineating grounds for imposition of disciplinary sanctions and sanctions to be imposed among other changes to the Medical Practices Act.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

A. Encouragement of persons to report to the Board is demonstrated by the following:

1. The placement of advertisements requesting input on proposed regulation changes.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

A. The Board's meetings and examinations are advertised in newspapers by OL to encourage public

participation. In one case, OL had not placed an advertisement for an examination.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

A. The Office of the Ombudsman and the Attorney General's Office has no consumer complaints regarding the Alaska State Medical Board.

B. There is no provision for consumer complaints in AS 08.64 (see Recommendation No. 1).

VII. The extent to which a board or commission which regulated entry into an occupation or profession has presented qualified applicants to serve the public.

A. The following demonstrate the Board's performance in presenting qualified applicants, and ensuring their continued competence:

1. The Board has issued 349 licenses, temporary permits, locum tenens permits, physician assistant authorizations, and paramedic authorizations since July 1981.

2. The Board has demonstrated a liberal policy of licensing by endorsing physicians from other states.

3. The Board requires foreign Medical Graduates to have qualifications equivalent to other applicants. This is evidenced by the requirement of the FLEX exam and of completed internship or residency. Note that the requirement of an internship or residency makes it impossible for any medical school graduate to come directly to Alaska upon graduation, since there are no internship or residency programs in Alaska.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

A. According to the State Equal Employment Opportunity Office, applications require

unnecessary information such as an applicant's date and place of birth, weight, height, social security number, and sex. However, the Board believes this information is needed to facilitate its background investigations for licensure.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

A. The Division of Legislative Audit has recommended a review of the following statutes for possible revision:

1. A statutory change for AS 08.64.010 should be considered to allow all occupations regulated by the Board to be represented on the Board (see Recommendation No. 1).

2. A statutory change for AS 08.64.336 should be considered to require hospitals to report to the Medical Board when a practitioner's hospital privileges are refused or restricted because that person poses a danger to the public (see Recommendation No. 1).

B. The Division of Legislative Audit has recommended that the Medical Board consider regulations to protect the public in the following areas:

1. Regulations are needed to make actions on the part of licensed persons, which are unethical, improper, and not in the best interest of the welfare of the public violations of the licensing act (see Recommendation No. 1).

APPENDIXES

APPENDIX A

ALASKA STATE MEDICAL BOARD
REVENUES COMPARED WITH EXPENDITURES
For the Fiscal Year Ended June 30, 1981
(UNAUDITED)

Average Revenue (Schedule 1 and Note 1)		$ 49,502
Expenditures (Note 2)		
Direct Expenditures	$14,050	
Indirect Expenditures	94,654	
Total Expenditures		108,704
Excess of Revenues Over Expenditures		$(59,202)

Schedule 1
Types of Revenues

Revenues	Amount		Collection Time
Application Fee		$ 25	With Application
Examination Fee		125	With Application
Endorsement Fee		100	With Application
Temporary Permits		25	With Application
Locum Tenens Permits		25	With Application
Renewal, Active		100	Biennially
Renewal, Inactive		25	Biennially
Reexamination Fee:			
Part I	$15		With Application
Part II	20		With Reapplication
Part III	40	75	With Reapplication
Parts I and II by Individual Subject		10	With Reapplication
Physician Assistant:			
Authorization Fee		25	With Application
Renewal Fee		25	Biennially
Paramedic:			
Authorization Fee		50	With Application
Renewal Fee		50	Biennially

Note 1

Most of the medical revenues are composed of renewal registration fees. These fees are collected once every two years and cause revenues in one year to be much greater than the revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected in fiscal years 1980 and 1981 in order to obtain an accurate representation of collected revenues.

Note 2

Direct expenditures include Board travel and those expenditures shown for the Board in the Division's accounts. Indirect expenditures are an allocated percentage of the administrative expenses of OL and an allocated percentage of the investigative expenses of OL. They do not include expenditures for efforts of other departments, such as the Department of Law, that may be assisting the Board and OL.

LEGISLATIVE
AUDIT

September 29, 1982

Gerald Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, AK 99811

RE: Performance Review of
the Alaska State Medical
Board, July 31, 1982

Dear Mr. Wilkerson:

Thank you for your recent letter, as well as the copy of the "Preliminary Audit Report". In accordance with a telephone report from Patricia Harms of your Division, I have had copies made and forwarded them to the other Board members as well as to the Division of Occupational Licensure. I have informed those who will be receiving copies that the report is confidential and not for public release.

My comments are as follows (please refer to the cited page of the audit):

Page 2: The Board also regulates mobile intensive care paramedics in addition to those professions listed. This omission is obviously an oversight since the audit recognizes (page 7, pgh 4) the Memorandum of Agreement between the Board and Department of Health and Social Services dealing with this group.

Page 4: Recommendation #1 - I agree wholeheartedly with the recommendation as stated. As I have previously indicated to the Auditors, I have some reservations relating to adequate representation of those persons it regulates. In order to obtain proportional representation, the size of the Board would have to be large, clearly resulting in "large group inefficiencies". I would be absolutely opposed to any legislation depriving us of our public members or any dilution of the medical expertise which the Board needs in dealing with disciplinary and licensing matters. In priciple, I would like to see "non-M.D. professional representation" on the Board provided that the Board does not become large and unwieldy, and I would suggest that the best way to accomplish this would be a statutory change adding one additional position to the Board to be chosen from amongst the other regulated groups in whatever manner the governor deems appropriate. I do not feel that the Board has short-shrifted any of the non-physician groups which it currently regulates, however, and such a change may be simply solving a problem which does not exist. Currently, the Board makes use of the Alaskan Academy of Physician Assistants, as well as representatives of the Paramedics and Podiatrists in dealing with licensure and regulation of these groups.

RE: Performance Review of
the Alaska State Medical
Board, July 31, 1982

continuation Page 4 -
I am personally unaware of any changes in regulations or licensing which the Board has made over the past four years, in the absence of consultation and advice of the affected group.

As regarding the remainder of the recommendation, I enthusiastically applaud the Auditor's endorsement of CSSB 237. The Board has requested that this be reintroduced into the next legislative session (Board resolution September 10, 1982 at a meeting in Nome), and this has been done. In addition to the features of the Bill which are mentioned, the Bill also creates a position of Executive Officer for the Board (certainly not a precedent - the Board of Nursing, Real Estate Examiners, etc. already have Executive Officers). The Board feels this will "keep the ball rolling" between meetings, improve the efficiency of staff support, and allow for better tracking of our various legislative concerns. Further, by establishing the position of an investigator responsible primarily to the Board, we feel that the investigative deficiencies to which the Audit refers (page 5) can be abolished.

Finally, the Board members feel that statutory change to require hospitals to notify the Board in case of serious credentialling action which would help the Board become aware of potential problems before they become actual problems.

Page 7, pgh B. The Board has not been able to provide regulations covering unethical or improper actions on the part of licensees, feeling that this is essentially an impossible task. A number of national professional groups have attempted to formulate a formal code of ethics in the past, most notably the American Medical Association, but these have been almost universally abandoned. Although the Legislature has apparently granted to the Board the power to adopt in regulation a code of ethics, AS08.64.380.G, I suspect that it would prove difficult if not impossible to formulate a comprehensive ethical code.

In summary, I feel that the "Preliminary Audit Report" is fair and accurate. With the reservations expressed above, I agree with the recommendation enclosed in the report. I feel that the report accurately reflects the public spirited efforts of the Board and its various members, and I feel that Ms. Harms and Mr. Busch have done a commendable job in identifying the problems against which the Board has to struggle in order to accomplish its goals and objectives.

As only one of two "leftovers" from the first audit of the Board several years ago, I am personally appreciative of the time and consideration which the auditors spent in order to provide a fair and accurate assessment of the Board's status.

RE: Performance Review of
the Alaska State Medical
Board, July 31, 1982

As Chairman, I feel that I speak for the Board in saying that I appreciate both the final result and the effort which went into the report.

Sincerely,

Jeffrey A. Partnow, M.D., Chairman
Alaska State Medical Board

October 13, 1982

RECEIVED
OCT 14 1982
LEGISLATIVE AUDIT

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Thank you for the opportunity to comment on your preliminary Performance Review of the Alaska State Medical Board. The Department of Commerce and Economic Development agrees with your finding that the Medical Board has been operating in the public interest and should be continued.

The department concurs with your recommendations that an equivalent to the former CSSB 237 be introduced in the 1983 legislative session and that hospitals be required to notify the Medical Board when a practitioner's hospital privileges have been refused or restricted due to the practitioner's actual or potential danger to the public.

The department does not feel that the composition of the board should be changed at this time. Liability for the authorization of physician assistants and paramedics to practice lies soley with their collaborating physicians. There are only ten podiatrists licensed by the board, of which only four presently reside in Alaska. A member from this profession on the board does not appear to be necessary.

Lastly, we are in basic agreement with the auditor's comments on page 5 of the report. The investigative unit is presently fully staffed, and complaints are being handled in an expeditious manner. As of June 30, 1982, 21 cases were reported as pending. During a recent board meeting (September 9-10, 1982) 15 were closed. There are presently six active cases, none are priority one. In this regard, we would like to comment on the choice of the word "backlog" to describe those cases which are presently under investigation. We believe that the term "backlog" may be misleading to the extent that it implies that no investigative action has been taken on a case. All complaints presently filed with the Division of Occupational Licensing are being actively investigated and their status is more correctly described as "active." A single case may remain open for an extended period of time and receive substantial attention because of its complexity and would be considered an "active" case rather than a "backlog" case in our terminology.

08-H2LH

The above comments notwithstanding, the department concurs with the basic recommendation that closer management analysis is appropriate here to determine whether additional investigative support is necessary.

Thank you again for the opportunity to comment on your findings.

Sincerely,

Charles R. Webber
Commissioner

CRW/mc1/8

(13) failing, barring unforeseen conditions, to properly prepare, according to generally accepted procedures, all antlers, horn, hides and capes to be delivered to the taxidermist or to the client at the conclusion of a hunt in a satisfactory and unspoiled condition;

(14) failing to endeavor to salvage all meats of trophies taken by his client, in accordance with existing state law;

(15) promoting hunting or the taking of trophies by means other than fair chase: specifically, the pursuit of a trophy in an illegal or unsportsmanlike manner, by herding, driving or chasing of animals with the use of any mechanically powered equipment;

(16) failing to practice sound wildlife conservation or failing to create an awareness of conservation needs and practices during his associations with the public. (Eff. 6/28/74, Reg. 50)

ARTICLE 2.
ABORTIONS.

Section
60. Termination of pregnancy
70. Informed consent
80. Medical procedures
90. Evaluation
100. Consultation requirements
110. Abortion procedures
120. Standards for hospitals and facilities
130. Records
140. Limitation

12 AAC 40.060. TERMINATION OF PREGNANCY. Termination of pregnancy must be requested by the pregnant woman, unless she has been adjudged mentally incompetent or is unmarried and under 18 years of age, in which case the request must be made by her parent or guardian. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)
Authority: AS 11.15.060(a)(3)
AS 08.64.105

12 AAC 40.070. INFORMED CONSENT. Unless otherwise provided in 12 AAC 40.060, a written informed consent shall be obtained from the patient or from any other person whose consent is required before termination of a pregnancy. Such written informed consent shall be on the patient's chart. The patient and other persons whose consent is required shall be advised of the medical implications and the possible emotional and physical sequelae of the procedure. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)
Authority: AS 08.64.105

12 AAC 40.080. MEDICAL PROCEDURES. The patient shall be examined by a physician licensed in Alaska, and a written record of the patient's physical and emotional health shall be prepared before performing an abortion procedure as set out in 12 AAC 40.110. (Eff. 12/20/70. Reg. 36; am 8/29/73, Reg. 47)
Authority: AS 08.64.105

12 AAC 40.090. EVALUATION. The attending physician shall make an evaluation of the patient and an estimation of the duration of gestation based upon the patient's history, examination and test results. This information shall be recorded on the patient's chart. (Eff. 12/20/70, Reg. 36)
Authority: AS 08.64.105

12 AAC 40.100. CONSULTATION REQUIREMENTS. Abortions interrupting a pregnancy up to and including the twelfth week of gestation may be performed without consultation. Abortions performed after the twelfth week of gestation shall be preceded by consultation with another physician. The consultation shall include an opinion as to the preferred method of termination of pregnancy. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)
Authority: AS 08.64.105

12 AAC 40.110. ABORTION PROCEDURES. During the second or third trimester of a

pregnancy, acceptable procedures include dilatation and curettage, suction aspiration of the uterus, injection of pharmacological agents, hysterectomy and hysterotomy. The exact procedure to be used will depend upon the patient's total health, age, associated disease and pathology, and anomalies such as skeletal defects and other medical indications. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)

Authority: AS 08.64.105

12 AAC 40.120. STANDARDS FOR HOSPITALS AND FACILITIES. (a) During the second or third trimester of a pregnancy, abortions shall be performed under sterile conditions. A bed and a registered nurse shall be available for a minimum recovery period of one-half hour. A registered nurse shall be present during the procedure.

(b) During the second or third trimester of a pregnancy, blood, blood derivatives, blood substitutes or plasma expanders shall be immediately available when an abortion is performed, and an operating room appropriately staffed and equipped for major surgery in accordance with regulations adopted under AS 18.20.060 shall be immediately available. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)

Authority: AS 08.64.105

12 AAC 40.130. RECORDS. During the second or third trimester of a pregnancy, the attending physician shall record a medical history, findings of the physical examination, operative report of the abortion procedure and pathology report as part of the clinical record to be maintained by the hospital or facility. The physician and hospital or facility shall treat the patient's identity and medical record as confidential information. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)

Authority: AS 08.64.105

12 AAC 40.140. LIMITATION. A fetus which has not developed beyond 150 days after the first day of the last menstrual period may be considered non-viable for purposes of AS 11.15.060(a). In the performance of an abortion after that date, the physician shall be guided by a reasonable judgment as to whether the fetus is viable in fact. (Eff. 12/20/70, Reg. 36; am 8/29/73, Reg. 47)

Authority: AS 11.15.060(a)
AS 08.64.105

ARTICLE 3.
CONTINUING MEDICAL EDUCATION

Section
200. General requirements
210. Credit hours
220. Certification of compliance

Editor's Note: For new location of the substance of former 12 AAC 40.160, see 12 AAC 40.990.

12 AAC 40.200. GENERAL REQUIREMENTS. (a) A physician seeking renewal of a license on or after January 1, 1986 shall obtain an average of 17 credit hours of continuing medical education during each year of the previous license period.

(b) If a licensee fails to meet continuing medical education requirements due to illness or other extenuating circumstances, the board will, in its discretion, grant an extension of time in compliance with AS 08.64.312(c). The board will consider each case on an individual basis. (Eff. 10/8/81, Reg. 80)

Authority: AS 08.64.100
AS 08.64.312(b)

12 AAC 40.210. CREDIT HOURS. (a) Except as provided in (b) of this section, a licensee may meet the continuing medical education requirements set out in 12 AAC 40.200(a) only by obtaining credit hours in a Category I continuing medical education program accredited by the American Medical Association.

(b) The board will accept the following as the equivalent of the credit hours required under 12 AAC 40.200(a):

(1) a current physician's recognition award from the American Medical Association, American Podiatry Association, American Osteopathy Association, or a recognized subspecialty board; or

(2) a current recertification by a specialty board recognized by the American Medical Association. (Eff. 10/8/81, Reg. 80)

Authority: AS 08.64.100
AS 08.64.312(b)

12 AAC 40.220. CERTIFICATION OF COMPLIANCE. (a) A licensee shall submit, upon a form supplied by the board, a sworn affidavit of compliance with the continuing medical education requirement at the time the licensee applies for license renewal.

(b) The board will, in its discretion, require a licensee to submit additional evidence of compliance with the continuing medical education requirement. The licensee shall maintain evidence of compliance. (Eff. 10/8/81, Reg. 80)

Authority: AS 08.64.100
AS 08.64.312(b)

MOBILE INTENSIVE CARE PARAMEDICS

Section
300. Application for license
310. Qualification for license
320. Approved curriculum
330. Persons currently practicing as mobile intensive care paramedics
340. License issuance and expiration
350. Renewal of license
360. Grounds for suspension, revocation or refusal to issue a license
370. Scope of authorized activities
380. Prohibited acts
390. Identification

12 AAC 40.300. APPLICATION FOR LICENSE. (a) An applicant for a license as a mobile intensive care paramedic shall apply in writing to the board.

(b) The application will be provided by the board and must contain the name, age, mailing and geographical address (if different), the time spent in study, the place, year and school from which the degrees or certificates were granted, evidence that the applicant meets the requirements of 12 AAC 40.310, and any other information the board considers necessary.

(c) The application must be made under oath before a person empowered by AS 09.65.010 to administer oaths and must be signed by the sponsor physician. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.310. QUALIFICATION FOR LICENSE. An applicant for license as a mobile intensive care paramedic must

(1) be 19 years of age or older;

(2) be a high school graduate;

(3) be of acceptable moral character;

(4) be currently certified as an emergency medical technician by the National Registry of Emergency Medical Technicians or the Alaska Department of Public Safety or the Alaska Department of Health and Social Services;

(5) be under the supervision of a sponsor physician approved by the board;

(6) have successfully completed an approved curriculum under 12 AAC 40.320;

(7) have satisfactorily completed a six-month internship as a mobile intensive care paramedic;

(8) pass the written and practical examination for emergency medical technician-paramedic administered by the National Registry of Emergency Medical Technicians, or an examination approved by the board;

(9) submit a nonrefundable license application fee in the amount of $50. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.320. APPROVED CURRICULUM. (a) The approved curriculum for license as a mobile intensive care paramedic is the U.S. Department of Transportation National Training Course Emergency Medical Technician Paramedic, 1977, or an equivalent program approved by the board.

(b) The curriculum must prepare the mobile intensive care paramedic to demonstrate the skills established by the National Academy of Sciences/National Research Council Task Force on Emergency Medical Technicians, Standards

for Emergency Medical Technician-Paramedic Performance, 1977.

(c) The training program must be under the direction of a physician licensed in the state where the training takes place. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.330. PERSONS CURRENTLY PRACTICING AS MOBILE INTENSIVE CARE PARAMEDICS. A mobile intensive care paramedic practicing in this state under the supervision of a board-approved sponsor physician upon January 13, 1980, will be issued a license without examination if application is made within 180 days after January 13, 1980. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.340. LICENSE ISSUANCE AND EXPIRATION. Upon documentation of successful completion of the requirements of this chapter, a license will be issued by the department to an applicant to practice as a mobile intensive care paramedic. A license expires biennially on a date set by the department. A license must be renewed under 12 AAC 40.350. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.350. RENEWAL OF LICENSE. (a) Upon receipt of written application by a licensee, the board will renew the license for two years if

(1) the licensee submits satisfactory evidence of completion of continuing medical education consisting of not less than 30 classroom hours and 30 clinical hours for each year he has practiced as a licensed mobile intensive care paramedic;

(2) the licensee submits to the board a written recommendation as to his fitness to practice as a mobile intensive care paramedic made by the applicant's sponsor physician; and

(3) payment of a nonrefundable license renewal fee of $50 is received.

(b) When a license cannot be renewed under (a) of this section, the licensee must resubmit an initial application under 12 AAC 40.300 – 12 AAC 40.310.

(c) The board will, in its discretion, exempt a mobile intensive care paramedic from the requirements of (a)(1) of this section upon application giving evidence satisfactory to the board that he or she has been unable to comply with the requirements because of extenuating circumstances. No person will be exempted from more than 60 hours of continuing education in a four-year period. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.360. GROUNDS FOR SUSPENSION, REVOCATION OR REFUSAL TO ISSUE A LICENSE. The board, after compliance with the Administrative Procedure Act (AS 44.62), will, in its discretion, revoke, suspend, or refuse to issue a license for

(1) fraud or deceit in obtaining a license required by this chapter;

(2) habitual abuse of alcoholic beverages or depressants, or illegal use of hallucinogenic or stimulant drugs as defined by AS 17.12.150(3) or the use of narcotic drugs as defined by AS 17.10.230(13);

(3) violation of the Controlled Substances Act (PL 91-513; 84 Stat. 1242) or any other federal law pertaining to medical practice and drugs;

(4) gross misconduct by a licensee in the performance of his or her duties as a mobile intensive care paramedic which tends to endanger life or limb;

(5) practice beyond the scope authorized by the sponsor physician. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.370. SCOPE OF AUTHORIZED ACTIVITIES. (a) A licensed mobile intensive care paramedic, when under the supervision of a sponsor physician, may perform the activities listed in this subsection. The direct supervision of these activities may be delegated when caring for a patient in a hospital under the direct supervision of a physician, or at the scene of a medical emergency when voice contact is monitored by a physician and direct communication is maintained, on the order of the physician, or when under the specific standing order of a physician. The activities are

(1) performing cardiopulmonary resuscitation and defibrillation;

(2) initiating and maintaining intravenous routes using approved intravenous techniques and solutions;

(3) performing pulmonary ventilation by approved methods;

(4) performing gastric suction by intubation;

(5) obtaining blood for laboratory analysis;

(6) applying rotating tourniquets;

(7) administering parentorally, orally, or topically any approved agents or solutions;

(8) performing other emergency procedures authorized by a supervising physician.

(b) A person enrolled in a mobile intensive care paramedic training program may perform the activities set out in (a) of this section insofar as:

(1) the activities are required as part of the training program;

(2) the activities which take place in a hospital are supervised by a physician; and

(3) the activities which take place outside a hospital are supervised by a licensed mobile intensive care paramedic.

(c) A person who is completing the internship required by 12 AAC 40.310(7) may perform the activities in (a) of this section for no more than six months. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.380. PROHIBITED ACTS. No person may represent himself or herself as

a paramedic, mobile intensive care paramedic, or emergency medical technician-paramedic unless he or she is licensed as a mobile intensive care paramedic under this chapter. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

12 AAC 40.390. IDENTIFICATION. While performing the duties of a mobile intensive care paramedic, the licensee shall display over the right breast pocket of the uniform the identifying insignia prescribed by the department. (Eff. 1/13/80, Reg. 73)

Authority: AS 08.64.100
AS 08.64.107

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

IN THE HOUSE

HOUSE BILL NO. 230

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to licensing and regulation of the practice of medicine."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.64.010 is amended to read:

Sec. 08.64.010. CREATION AND MEMBERSHIP OF STATE MEDICAL BOARD. The governor shall appoint a board of medical examiners, to be known as the State Medical Board, consisting of five [LICENSED] physicians licensed in the state [, RESIDING IN AS MANY SEPARATE ALASKA JUDICIAL DISTRICTS AS POSSIBLE,] and two persons with no direct financial interest in the health care industry. To the extent possible each physician member must reside in a geographical area of the state that is different from that of every other physician member.

* Sec. 2. AS 08.64.020 is amended to read:

Sec. 08.64.020. [STATE MEDICAL BOARD] TERM OF OFFICE. Members shall be appointed for staggered terms [A TERM] of four years, subject to confirmation by a majority of the members of the legislature in joint session, and shall hold office until their successors are appointed and qualified. A person who has served two successive complete terms may not be reappointed until four years after the expiration of the second term [THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD SHALL BE STAGGERED SO THAT THEY DO NOT EXPIRE AT THE SAME TIME].

* Sec. 3. AS 08.64.040 is amended to read:

Sec. 08.64.040. REMOVAL OF MEMBERS. The governor may remove a member of the board for cause. The board may by regulation provide

that unexcused absences from meetings are cause for removal.

* Sec. 4. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.085. MEETINGS OF THE BOARD. The board shall meet at least four times a year.

Sec. 08.64.101. DUTIES. The board shall

(1) examine and issue licenses to applicants;

(2) submit an annual report of its proceedings to the governor, including a statement of money received and disbursed;

(3) after a hearing, impose disciplinary sanctions on persons who violate this chapter, or the regulations or orders of the board;

(4) adopt regulations insuring that renewal of licenses is contingent upon proof of continued competency on the part of the licensee.

* Sec. 5. AS 08.64.170 is amended to read:

Sec. 08.64.170. LICENSE TO PRACTICE MEDICINE OR OSTEOPATHY. (a) A person may not practice medicine, podiatry, osteopathy or acupuncture in the state unless the person is licensed under this chapter, except that

(1) a physician assistant may examine, diagnose or treat persons under the supervision, control, and responsibility of either a physician licensed under this chapter or a physician exempted from licensing [LICENSURE] under AS 08.64.370;

(2) a physician-trained mobile intensive care paramedic may render emergency lifesaving service; [AND]

(3) a person licensed under AS 08.36 DENTISTRY may perform acupuncture in the regular practice of dentistry, subject to the regulations of the Board of Dental Examiners; and

(4) a person who is licensed or authorized under another

chapter of this title may engage in a practice which is authorized under that chapter.

* Sec. 6. AS 08.64.240 is repealed and reenacted to read:

Sec. 08.64.240. LICENSE REFUSED. (a) The board shall refuse to grant a license if

(1) the applicant fails or cheats during the examination;

(2) the board determines that the applicant is professionally unfit to practice medicine or osteopathy in the state; or

(3) the applicant fails to comply with a requirement of this chapter.

(b) The board may refuse to grant a license to any applicant for the same reasons that it may impose disciplinary sanctions under AS 08.64.325.

* Sec. 7. AS 08.64.250 is amended to read:

Sec. 08.64.250. LICENSURE BY CREDENTIALS [ENDORSEMENT]. The board may waive the examination requirement and license by credentials [ENDORSEMENT] if the physician or podiatry applicant meets the requirements of AS 08.64.200 or 08.64.209, submits proof of continued competence as required by regulation, pays the required fee and has

(1) an active license from a board of medical examiners established under the laws of a state or territory of the United States or a province of Canada issued after thorough examination; or

(2) passed an examination given by the National Board of Medical Examiners or the Federation of State Medical Boards of the United States if the applicant is a physician, or has passed an examination given by the National Board of Podiatry Examiners if the applicant is a podiatrist.

* Sec. 8. AS 08.64.270(a) is amended to read:

(a) The board may issue a temporary permit to an applicant who

Qualify for physicians used for osteopath Podiatrist

meets the requirements of AS 08.64.200, [OR] 08.64.205, or 08.64.209 and pays the required fee.

* Sec. 9. AS 08.64.311 is amended to read:

Sec. 08.64.311. [BIENNIAL] LICENSE RENEWAL. Licenses shall be renewed four years after the date of issue [BIENNIALLY].

* Sec. 10. AS 08.64.315 is amended to read:

Sec. 08.64.315. FEES. The following fees are imposed under this chapter:

(1) application	$ 50	[$ 25]
(2) license by examination	200	[125]
(3) license by credentials [ENDORSEMENT] or waiver of examination	200	[100]
(4) temporary permit	50	[25]
(5) locum tenens permit	50	[25]
(6) license renewal [, BIENNIAL], active	600	[100]
(7) license renewal [, BIENNIAL], inactive	200	[25]
(8) license by reexamination	150	[75]

* Sec. 11. AS 08.64.325 is repealed and reenacted to read:

COPY

Sec. 08.64.325. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. (a) The board may impose a sanction if the board finds after a hearing that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation while providing professional services or engaging in professional activities;

(3) advertised professional services in a false or

misleading manner;

(4) has been convicted, including conviction based on a guilty plea or plea of nolo contendere, of (A) a felony or other crime if the felony or other crime is substantially related to the qualifications, functions, or duties of the licensee; or (B) a crime involving the unlawful procurement, sale, prescription or dispensing of drugs;

(5) has procured, sold, prescribed or dispensed drugs in violation of any law, regardless of whether there has been a criminal action;

(6) intentionally or negligently permitted the performance of patient care by persons under the licensee's supervision which does not conform to minimum professional standards even if the patient was not injured;

(7) failed to comply with this chapter, a regulation adopted under this chapter, or with an order of the board;

(8) has demonstrated

(A) professional incompetence, gross negligence, or repeated negligent conduct;

(B) addiction to, severe dependency on, or habitual overuse of alcohol or other drugs which impairs the licensee's ability to practice safely;

(C) unfitness because of physical or mental disability;

(9) engaged in unprofessional conduct or in lewd or immoral conduct in connection with the delivery of professional services to patients;

(10) has violated AS 18.16.010;

(11) has violated any code of ethics adopted by regulation

by the board;

(12) has denied care or treatment to a patient or person seeking assistance from the physician if the only reason for the denial is the failure or refusal of the patient to agree to arbitrate as provided in AS 09.55.535(a); ARBITRATION of dispute.

(13) has had a license or certificate to practice medicine in another state, a territory of the United States, or a province of Canada suspended or revoked unless the suspension or revocation was caused by the failure of the licensee to pay fees to that state, territory, or province.

(b) In any case involving (a)(13) of this section, the final findings of fact, conclusions of law, and order of the authority which suspended or revoked a license or certificate constitute a prima facie case (1) that the license or certificate was suspended or revoked and (2) of the grounds under which the suspension or revocation was granted.

COPY * Sec. 12. AS 08.64.330 is repealed and reenacted to read:

Sec. 08.64.330. DISCIPLINARY SANCTIONS. (a) If the board finds that a licensee has committed an act set out in AS 08.64.325(a), COPY the board may

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require the licensee to

(A) report regularly to the board on matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee; or

(7) impose one or more of the sanctions set out in (1) -- (6) of this subsection.

(b) The board may end the probation of a licensee if it finds that the deficiencies which required this sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeal process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he or she continues to practice. A person whose license is suspended under this section is entitled to a hearing by the board no later than seven days after the effective date of the order. After a hearing, the person may appeal the suspension to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) A license may be suspended upon receipt of a certified copy of evidence that the licensee's license to practice medicine in another state or a territory of the United States or a province of Canada has been suspended or revoked. The suspension remains in effect until a hearing can be held by the board.

(f) The board shall be consistent in the application of disciplinary sanctions. A significant departure from earlier decisions of the board involving similar situations must be explained in findings of fact or orders made by the board.

* Sec. 13. AS 08.64.360 is amended to read:

Sec. 08.64.360. PENALTY FOR PRACTICING WITHOUT A LICENSE OR IN VIOLATION OF CHAPTER. Except for a physician assistant, [AND] a physician-trained mobile intensive care paramedic under AS 08.64.170, and a person licensed or authorized under another chapter of this title who engages in practices for which that person is licensed or authorized under that chapter, a person practicing medicine or osteopathy in the state without a valid [OBTAINING AND FILING AN APPROPRIATE] license or permit is guilty of a class B misdemeanor [AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $100, OR BY IMPRISONMENT FOR NOT LESS THAN 10 DAYS NOR MORE THAN 90 DAYS, OR BY BOTH]. Evidence that the defendant has failed to file a license with the clerk of the court is prima facie evidence that the defendant is not licensed. Each day of illegal practice is a separate offense.

* Sec. 14. AS 08.64.380(2) is repealed and reenacted to read:

(2) "practice of medicine" or "practice of osteopathy" means:

(A) for a fee, donation, or other consideration, to diagnose, treat, operate on, prescribe for, or administer to any human ailment, blemish, deformity, disease, disfigurement, disorder, injury, or other mental or physical condition; or to attempt to perform or represent that a person is authorized to perform any of the acts set out in this subparagraph;

(B) to use or publicly display a title in connection with a person's name including "physician," "doctor of medicine," "M.D.," "doctor of osteopathic medicine," "D.O.," or a specialist designation including "surgeon," "dermatologist," or any title which tends to show that the person is willing or qualified to diagnose

or treat the sick or injured;

* Sec. 15. AS 08.64.030, 08.64.110, 08.64.140, 08.64.200(1), and 08.64.380(3) are repealed.

Ms. Mae Fisher
Member of HESS Committee
Alaska State House of Representatives
Pouch V
Juneau, AK 99811

Dear Ms. Fisher:

I am in receipt of a copy of House Bill Number 230, entitled "An Act Relating to the Licensing and Regulation of the Practice of Medicine." With your indulgence, as a member of the present Alaska State Medical Board, I would like to comment on the act as it is presently envisioned.

In general, as far as it goes, the proposed act should help the Board to function more effectively. Particularly important is the provision under Section 08.64.330 that gives the Board discretion to summarily suspend certain licenses pending very rapid hearing. This would permit us to fulfill our obligation to protect the public health when egregious acts of poor practice come to our attention. At the present time, we feel quite frustrated in dealing with such situations, and have, on ocassion, had to watch while these things drag through the courts over a very prolonged period of time. I am sure that the provision will be used very sparingly, but it is good to know that it is there in case of acute need. There are also a number of house cleaning provisions in the proposed bill which should make the job of the Board easier and more efficient. It also strikes me that raising the fees is certainly in order, as a licensing function such as the Board of Medicine should surely pay for itself.

I have only two minor problems with the bill as it is presently written. One concerns Section 08.64.010. Therein is contained the statement that "...to the extent possible each physician member must reside in a geographical area the state that is different from that of every other physician member..." It should be pointed out that the Medical Board functions, more or less continuously, and the individual members are responsible for issuing temporary and locum tenens permits on an almost weekly basis. There are several natural ports of entry into Alaska. These include Ketchikan, Juneau and, to the greatest extent, Anchorage. It is also noted that the vast majority of the state's physicians do indeed practice in the Anchorage area. It, therefore, does not seem at all unreasonable if more than one physician member of the board resides in the Anchorage area. This simply takes account of the reality of the situation as it is now and is likely to remain for the foreseeable future. It is further understood that the language, specifically the phrase "...to the extent possible...," is permissive, but I would hate to think that we were evading the intent of the law by having two physician members and one public member from the Anchorage area as is the case presently. Being from a "bush" area,

I understand certain objections to Anchorage getting all the goodies, but in this particular situation, the practicalities dictate that a preponderant representation of Anchorage on the Board is not at all unreasonable.

Another minor problem that I have with the law that is presently written concerns Section AS08.64.380, in regard to the requirement that licenses are not valid until such time as they are recorded with the Clerk of Court. It is understood that the Clerk of Court in this case is the Clerk of the Superior Court in the judicial district in which the individual is practicing. As far as I can understand, this requirement dates back to Section 35-3-93 of ACLA, dated 1949. In other words, this is a remnant territorial statute. I would reason that this came about in territorial days when the far flung nature of the state and lack of communication made it imperative that the judicial system act as a repository of vital statistics.

I think, at the present, the State Licensing Board can adequately carry out this function. It may seem a minor point, but the realization that this statute was on the books only came to the Medical Board's attention about a year ago, and we basically found that essentially everyone was in violation of it, including all the members of the Board. With the most recent license reapplications, we sent out notice that everyone should quickly hustle down to their local Clerk of Court and get their license registered. When we did this in Ketchikan, we discovered that the Clerk of Court did not have the slightest idea of what we were talking about. I suppose what I am saying is that this is one of those situations that should fall under sunset review and be eliminated as essentially no longer necessary in the state. It would seem to eliminate a needless nuisance.

My biggest problem with the legislation as introduced concerns what it fails to contain. Appended to this letter is a copy of proposed legislation in draft form, relating to the creation of an executive director for the Board of Medicine, and a position for an investigator within the Board of Medicine. I realize that these positions will doubtlessly cost the state some money at a time when budgets are being cut. Nonetheless, it has been the experience of the Board that the number of applications is rising, the number of unqualified individuals applying for licenses in the state is rising rapidly, and there are situations arising within the state that very definitely require investigation, and we simply do not have the manpower to look into them in an efficient and timely manner.

The Board is charged with making sure that the practice of medicine within the State is competent, and we lack the tools to carry out the job. Because the members of the Board are required to sit more or less in judgment on these matters, it is not appropriate for the Board to do investigations on its own. As such this would be in contravention of the philosophy of law adopted in this country. Therefore, we need an investigator.

Even more than this, with the business of the Board becoming more complex and increasing rapidly in the number of cases that we need to consider, an executive director for the Board seems to be a paramount necessity. It would be my opinion that the extra salaries would more than be repaid by identifying and dealing with problems before they develop. It is quite apparent that it is much easier and more cost effective to deny questionable licenses before they are issued, than try to revoke them after they are already in effect. This is because of legal considerations of fiduciary interest that apply to operative licenses. It is therefore a much easier thing to issue a statement of issues in denying a license than it is to go through an enormously complicated and extremely expensive hearing process to revoke a license.

If we had an investigator and executive director on staff, we would be able to catch these things before they develop. It is very clear to the Board that we are seeing an enormous increase in questionable applications from people who either have no qualifications or who have been denied licenses in other jurisdictions. Our estimates vary from a fourfold to a tenfold increase over the last two years. The cost of even one or two revocation procedures could easily pay for the two salaries involved. One procedure that is now going on has consumed over two years and has gone through a formal hearing, Superior Court process, and it is presently before the Supreme Court. As anyone who is familiar with legal proceedings knows, these sorts of procedures are enormously expensive. I would, therefore, urge you to give very, very serious consideration to including provisions for an executive director and investigator in the body of the amendments to the bill that you are now considering.

I would like to commend you on the work that you have done so far and urge you on the final step in making the Board an effective tool of state government.

Sincerely,

Thomas L. Conley, M.D.
Member of the State Board of Medicine

Enclosure

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

For an Act entitled: "An Act relating to the regulation of the practice of medicine."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050 is amended by adding a new subsection to read:

(c) After consulting with the State Medical Board (AS 08.64.010), the department shall employ an individual who is not a member of the board to be assigned as the investigator for the board. The investigator shall

(1) conduct investigations into alleged violations of AS 08.64, and into alleged violations of regulations and orders of the State Medical Board;

(2) at the request of the State Medical Board, conduct investigations based on complaints filed with the department or with the board; and

(3) be directly responsible and accountable to the State Medical Board, except that only the department has authority to terminate his employment.

* Sec. 2. AS 08.64.010 is amended to read:

Sec. 08.64.010. CREATION AND MEMBERSHIP OF STATE MEDICAL BOARD.

The governor shall appoint a board of medical examiners, to be known as the State Medical Board, consisting of five [LICENSED] physicians licensed in the state and [,] residing in as many separate geographical areas of the state [ALASKA JUDICIAL DISTRICTS] as possible, and two persons with no direct financial interest in the health care industry.

* Sec. 3. AS 08.64.020 is amended to read:

Sec. 08.64.020. [STATE MEDICAL BOARD] TERM OF OFFICE. Members shall be appointed for staggered terms [A TERM] of four years, subject to confirmation by a majority of the members of the legislature in joint session, and shall hold the office until their successors are appointed and qualified. A person who has served two successive complete terms may not be reappointed until four years after the expiration of the second term [THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD SHALL BE STAGGERED SO THAT THEY DO NOT EXPIRE AT THE SAME TIME].

* Sec. 4. AS 08.64.040 is amended to read:

Sec. 08.64.040. REMOVAL OF MEMBERS. The governor may remove a member of the board for cause. The board may by regulation provide that unexcused absences from meetings is cause for removal.

* Sec. 5. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.075. EXECUTIVE OFFICER OF THE BOARD. After consulting with the board, the department shall employ an individual who is not a member of the board to serve as the executive officer of the board. The executive officer shall

(1) p rform the administrative duties required by the department, by the board, and by this chapter;

(2) carry out regulations and policies of the board; and

(3) assist the board in conducting continuing education programs and examinations of applicants for licenses.

* Sec. 6. AS 08.64.270(a) is amended to read:

(a) The board may issue a temporary permit to an applicant who meets the requirements of AS 08.64.200, [OR] 08.64.205, or

* Sec. 7. AS 08.64.315 is amended to read:

Sec. 08.64.315. FEES.

The following fees are imposed under this chapter:

(1)	application	$ 50 [$25]
(2)	license by examination	200 [125]
(3)	license by credentials ENDORSEMENT or waiver of examination	200 [100]
(4)	temporary permit	50 [25]
(5)	locum tenens permit	50 [25]
(6)	license renewal , BIENNIAL, active . . .	600 [100]
(7)	license renewal , BIENNIAL, inactive . .	200 [25]
(8)	license by reexamination	150 [75]

HOUSE LABOR AND COMMERCE COMMITTEE

March 4, 1983

Representative Joe Hayes, Speaker of House
Alaska House of Representatives
Pouch V,
Juneau, Alaska 99811

Re: Alaska State Medical Board

Dear Mr. Speaker:

Pursuant to AS 44.66.050(a) the House Labor and Commerce Committee has held hearings regarding the above referred Board. Under AS 44.66.050(e) the Committee recommends adoption of the attached Committee Bill continuing the Board. The Legislative Budget & Audit Committee report outlined some concerns that have been reviewed by the Alaska State Medical Board. The Labor & Commerce Committee is satisfied that those concerns are being addressed in an expeditious manner.

The Committee believes the Alaska State Medical Board should be reestablished. The Alaska State Medical Board regulates the practices of medicine, osteopathy, and acupuncture by physicians, osteopaths, physician assistants, paramedics, and podiatrists. By establishing minimum educational and experience requirements and actively investigating complaints from the public and other practitioners, the Alaska State Medical Board provides a

needed public service. Specifically, the findings of the Committee of the public need for the Board as required under AS 44.66.050(c) are as follows:

AS 44.66.050(c) " A determination as to whether a board or commission or agency program has demonstrated a public need for its continued existence shall take into consideration the following factors:"

(1) the extent to which the board, commission or program has operated in the public interest;

The Alaska State Medical Board provides for examinations twice a year and has held an average of 4 meetings a year in various locations throughout the State.

2) the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters;

The Alaska State Medical Board has been impeded in its operation by the lack of statutory authority to address licensing and business practice(s) violations. Also, the Division of Occupational Licensing has been unable to provide support necessary to the Board and the Courts are not placing emphasis on the findings of the Board developed through the hearing process.

(3) the extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest;

The Alaska State Medical Board has recommended and strongly supported legislation to correct these problem areas.

(4) the extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided;

The Alaska State Medical Board has encouraged interested persons to report by advertising and requesting public input on proposed regulation changes.

(5) the extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions;

The Division of Occupational Licensing places advertisements of the Alaska State Medical Board's meetings and examinations.

(6) the efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved;

While there have been no consumer complaints filed with the Ombudsman or the Attorney General's Office regarding the Alaska State Medical Board, there is no provision for consumer complaints in AS 08.64.

(7) the extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public;

The Alaska State Medical Board has issued 349 licenses, temporary permits, locum tenens permits, physician assistant authorizations, and paramedic authorizations since July 1981. The Board has a liberal policy of licensing by endorsing physicians from other states. The Alaska State Medical Board requires the FLEX exam and of completed internship or residency which serves to protect the public.

(8) the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest; and

The Committee believes the Alaska State Medical Board to be in compliance with applicable law and regulation.

(9) the extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

The Committee believes adoption of the proposed legislation would better serve to protect the interests of the public.

Pursuant to AS 44.66.050(d) the Committee recommends the following:

(d) As to each board, commission, or agency program assigned to it for purposes of review, the committee of reference shall, not later than the 60th day of the legislative session, submit a report to the presiding

officer of the house. The report shall contain a summary of the findings of the committee as to the compliance of the board, commission or program with the factors enumerated in (c) of this section, together with a summary or recommendations of the committee as to each of the following:

(1) an identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address;

The Alaska State Medical Board regulates the medical practice of physicians, osteopaths, physician assistants, podiatrists, and acupuncturists.

(2) a statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments;

The objective of the Alaska State Medical Board is to ensure that the public is provided safe and effective medical care by qualified health care professionals.

(3) an identification of any other programs having similar, conflicting or duplicate objectives;

The Committee found no other program having similar, conflicting or duplicate objectives.

(4) an assessment of alternative methods of achieving the purposes of the program;

The Committee could find no viable alternative method of achieving the purposes of the Alaska State Medical Board.

(5) an assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level;

The Committee believes the consequence of eliminating the Alaska State Medical Board or funding its activities at a lower level would be an unnecessary exposure to potential improper medical care.

(6) a justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts; and

The critical necessity for proper medical treatment is the primary justification for the continuation of the Alaska State Medical Board.

(7) any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest.

The Alaska State Medical Board should be given legislative support in addressing the concerns outlined by the Legislative Budget and Audit report.

Respectfully submitted:

STAFF REPORT

HB 243, child care, developmentally disabled

March 21, 1983

HOUSE HESS COMMITTEE

Day care assistance is provided for the care of children of a low or moderate income family if a parent or guardian is freed to work or seek work or to attend school. Eligibility for children expires on their 11th birthday. HB 243 extends eligibility for children who have developmental disabilities without regard to the child's age.

The argument in support of HB 243 is that a child with a developmental disability still requires parental attention after the 11th birthday. The inclusion of children with developmental disabilities should be beneficial to the "normalization" of the child's environment. Regulations should be adopted to assure that children of large age differences are carefully supervised. One possibility is to have separate classes of day care programs. One for children under 11 years of age, one for the others. It has also been suggested that an incentive be added to encourage day care centers to accept the developmentally disabled. This could be in the form of training for staff, perhaps.

POSITION PAPER

RE: HB 243
SPONSOR: Representative Phillips

Program Effects:

The bill would provide day care assistance to an estimated 25-45 developmentally disabled children above 11 years of age, whose parents are in working or training. The Department currently provides for the placement of some handicapped children under 11, usually on a case basis. In those special cases, the Department authorizes up to double the average monthly subsidy for the care of these children. The Department would see this bill as expanding that policy to developmentally disabled children who are minors.

Comments:

The Department supports raising the age limit above 11 years of age for minor children who have a developmental disability, with two major caveats.

1) The Department can support the bill only if there is a rewrite of the licensing codes which protects, through regulation, age specific normalized environments of all children. The mixing of older developmentally disabled children with much younger children could, if not regulated, be potentially damaging to both groups.

2) Specialized training must be available to day care providers who accept these children to help them adequately deal with their needs.

A survey conducted in the fall of 1982 in Fairbanks concluded that licensed child care centers were willing to take handicapped children if specialized assistance training were available. The Department has had no training dollars to allow this to occur. The Department would require funds to hire a half-time specialist to work with providers to assure that the provider meets the intent of the legislation, the regulations and most importantly, the needs of the child.

It is estimated there are between 25-45 children, whose parents are working or training, that might be eligible for this program if the age limit were raised. However, because parents of many developmentally disabled children may not have had the option of being in the job or training market, the Department cannot know what the real population is. The number of families served under this program could very well be much higher. This year, the Department has been contacted by parents of handicapped children in both Kenai and Fairbanks requesting assistance. Last year before funds were available to Catholic Social Services, we also had requests from parents in the Anchorage area.

Finally, while the Department recognizes the need exists it is important to note that the Division does not have expertise in the complex problems of developmentally disabled children. Studies indicate that handicapped students benefit from special pre-school programs, no matter how severe their disability. The Day Care Assistance program was not designed to accomodate these special needs. It is our concern that the real needs of developmentally disabled children not be addressed solely through this program.

Bill Analysis-Fiscal Note

H.B. 243

The Department currently provides funds through the Day Care Assistance Program for children of low income families at an average rate of $180 per child per month. Policy Memorandum #3 allows for increased subsidy rates of up to double the cost of care for handicapped children with written documentation by a physician, thus an average monthly rate for handicapped children is $360.

The Division of Mental Health estimates 45 eligible children who would be affected by this bill. The Department suspects there are likely to be more needs for this service than currently can be quantified. Thus the note is based on 45 children of $360 average monthly costs for twelve months.

The Department currently provides training and technical assistance to child care center and home staff with three full-time professionals. This bill would necessitate an additional half-time professional of range 17 in the classified service. That cost for FY 84 would be $21.5 thousand. An additional $5 thousand would be necessary for travel to provide this training.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 243

"An Act relating to day care assistance for parents of developmentally disabled children."

The existing statutes (A.S. 44.47) specifies that eligible low income parents of children under 11 years of age may receive assistance in payment of costs of day care from licensed day care providers. HB 243 amends this specification by adding developmentally disabled minors (i.e., developmentally disabled persons under 18 years of age.)

Analysis:

Regular day care assistance is intended to provide low income parents with an incentive to pursue careers and income producing jobs that would otherwise be unavailable because of the care and attention parents must give to their children. The assistance, in the form of payments for day care, applies in cases wherein children are under 11 years of age.

This age limit specification assumes that, having reached 11 years of age, a child will have developed enough to be able to take care of himself for brief periods of time without direct care or supervision.

However, in circumstances wherein a childs' mental or physical development is impaired to the degree that the child, even though over 11 years of age, is not able to thrive or care for themselves for a brief period of time, the intent of the law is not met.

HB 243 intends to obviate this circumstances by allowing day care assistance to be provided to otherwise eligible families who have developmentally disabled children over the regular age limit of 11 years.

One liability of the Bill is that it may allow the possible situation in which children of very different ages and sexes are cared for in close proximity. In an extreme case one can envision, say, a 17 year old being cared for with four small children of the opposite sex. Non-normal situations such as these would be taken care of by means of changes in licensing regulations to ensure an age-specific normalized environment for both the developmentally disabled child and the non-disabled child.

Population and estimated overall cost:

It is difficult to estimate the number of parents that would be eligible much less those who would partake of the assistance even though eligible. However, some gross estimates can be made. Based on information communicated by a special pilot program for day care for developmentally disabled people in the Anchorage area, it is estimated that 25 families in Alaska would be added to the existing number of eligible families if HB-243 were to become law. If instead of basing our judgments on this "guesstimate" we were to extrapolate from statistics supplied by the Department of Labor, it is estimated that there are about 90 developmentally persons who are 10 to 18 years of age whose parents would be eligible for substantial day care assistance. If about half of these families chose to enroll their children in day care centers or homes that, in turn, would be willing to take the older children, the result is that about 45 new children would be enrolled

as a result of HB-243. (It should be noted that these estimates do not include low income parents who have developmentally disabled children under 11 years of age. These parents are already eligible for day care assistance under the present statute.)

Even though there is a good deal of disparity between the two estimates, the estimate does indicate, at least, that we do not have hundreds of parents being unserved. The figure is likely to be less than 50 parents who would be enrolled as a result of HB-243.

Presently, a customary cost to the State for day care assistance is approximately $400 per month for a severely developmentally disabled child of an eligible family. If 25 to 45 children would be added as a result of HB-243, then $120,000 to $216,000 would be required to provide assistance to the additional families enrolled.

In addition to these expenditures administered by the Department of Community and Regional Affairs, the Department of Health and Social Service would require a temporary six month position to write and promulgate new and amended licensing regulation to ensure age specific normalized environments. The cost for this is estimated at $26,061 and is explained in the attached fiscal note. It is also anticipated that, as a result of changes in licensing regulations, training existing day care providers will be necessary. It is anticipated that the nature and cost of this training will be included in the position paper being submitted by the Department of Community and Regional Affairs with whom we have coordinated regarding this Bill.

Summary:

HB-243 does not, by itself, mandate adequate day care for developmentally children over 11 years of age. It will, however, (1) provide for a monetary incentive for day care centers and homes to provide such care and (2) provide for an incentive for low income parents who have developmentally disabled children who are over 11 and who cannot be left alone to engage in remunerative work while maintaining the child in the natural home environment.

POSITION PAPER/Department of Health & Social Services

Department Position:

The Department of Health and Social Services supports HB-243 in concept, but implementation would require substantial increase to the Governor's Budget and such a change has not been approved by the Governor's Office.

HOUSE BILL NO. 243

"An Act relating to day care assistance for parents of developmentally disabled children."

Fiscal Note, page 2

IV. ANALYSIS:

A. Assumptions:

Enactment of this bill would result in the need to license new homes for the care of developmentally disabled children. Homes or centers currently licensed for day care would have to be reassessed to meet new licensing criteria.

B. Program Summary:

1. Promulgating new and amended licensing regulations would require establishment of a Community Care Licensing Specialist II position for 6 months, after which it would phase out. Existing staff in other areas would absorb the additional workload in FY 84.

2. Travel is included to conduct public hearings on regulations, and for travel to and from homes and centers being licensed.

3. No revenues will be received.

C. Computations: No additional expenditures are anticipated for FY FY 85-88. Division will absorb changes due to licensing regulation changes.

D. Economic Impact: Licensure will provide a safe environment for care.

E. Impact on Local Governments: There will be no fiscal impact on local governments.

JUSTIFICATION

This position will be required one time for six months to prepare licensing regulations and implementation materials. Day care licensing regulations have not been changed in six years. A number of needed changes, including safeguarding provisions for the handicapped, have been identified, but changes are indefinitely delayed due to limited staff time and other pressing priorities. If the Bill is passed licensing regulation changes will be immediately necessary to protect young children from the danger of normal activity of pre-teens and teens, to ensure adequate programming for the handicapped, and to develop family day care regulations for specializing in care for the handicapped. Following is the work plan for this position: 1) Develop revised regulations for day care facilities/conduct hearings. 2) Develop a guidebook and sample forms and policy material to implement the regulations. 3) Prepare implementation plan which would inlcude a orientation of licensing staff, Day Care Assistance local agents, and licensees. 4) Draft, in coordination with the Department of Education, a document entitled "How to Start a day care center, family day care home, or pre-school in Alaska." 5) Revise the 1976 publication entitled "How to Choose Day Care for your Child."

MEMORANDUM

TO: Representative Phillips

FROM: Felicity Watt, Research Staff FW

RE: Assistance for Parents of the Developmentally Disabled
Research Request 82-57

You have asked that we look into supplemental funding for day care to be provided to the parent of a 10 year old developmentally disabled child. We have identified an advocacy group and a school that are available to respond to your constituent's request for information.

The daytime school program at Catholic Social Services for the developmentally disabled is managed by Judy Ebbert. Ms. Ebbert said that the school is for children from the ages of six weeks to sixteen years. Though the school charges a monthly rate of $400, that cost will be modified on a case-by-case basis in accordance with the parent's need. According to Dr. Gregovich, Program Administrator for the developmental disabilities program in the Department of Health and Social Services, $625,000 in grant money for handicapped day care and respite care was awarded by the department to Municipality of Anchorage this year. These funds were then subcontracted to Catholic Social Services to assist them in serving developmentally disabled children.

The school is located at 811 West Sixth Avenue and Ms. Ebbert asked that your constituent contact her to discuss the cost adjustment which could be made for her and transportation arrangements that may be made to accommodate her Eagle River location. Judy Ebbert's telephone number is 274-1546.

In the course of our research, we also learned of an organization called Protection Advocacy for the Developmentally Disabled, Inc. (P.A.D.D) which is available to assist your constituent in locating possible programs and sources of funding. P.A.D.D. will pursue federal funding avenues and conduct research on behalf of the parent of a developmentally disabled child. We spoke with case workers for P.A.D.D. in both Juneau and Anchorage who indicated they would be happy to research the case and investigate possible solutions at both the State and national level. Annely Girard of Anchorage expressed great enthusiasm about acting as an advocate on your constituent's behalf.

Ms. Girard can be contacted at 274-3650. P.A.D.D's Anchorage office opens Friday (March 5) at which time the telephone is expected to be connected. If there is no answer at the above number, Ms. Girard asks that the parent contact her at her home telephone which is : 278-3966.

There seem to be no funds available to replace the Alaska Department of Community and Regional Affairs' day care assistance Program (DCAP) once a child surpasses the eligible age for that program. We talked at length with Ms. Lare, the director of DCAP and discussed the possibility of reinterpreting the ceiling age for eligibility for DCAP on the basis of mental rather than chronological years in the particular cases of developmentally disabled children. As the cut off age is prescribed by statute [AS 44.47.310(3)] which defines child as "any person below eleven years of age," Ms. Lare does not believe she has the authority to change that requirement.

Ms. Lare had contacted members of the Governor's Council on the Handicapped and Gifted in Fairbanks and relayed to us their interest in the situation; however, they have no access to funds which would ameliorate the current dilemma.

We also talked to the Whaley school and the Anchorage Community Mental Health Center who were unable to offer other alternatives for your constituent to pursue.

Re: HB 243 Day Care Assistance

Dear Representative Phillips:

Thank you for following through on your promise to try to find a way to provide assistance to handicapped or disabled children who need after school day care but who are over eleven years of age.

Following a brief review of HB 243 the Council offers these comments:

1. We support the need for the day care subsidy for parents of handicapped or disabled children.

2. Amending the Day Care Assistance law to include disabled children over age eleven incurs a minimum of change in the current program now administered successfully to handicapped and non-handicapped children under age eleven by the Department of Community and Regional Affairs.

3. It will be necessary to protect against the potential detrimental effects of inappropriate placement of older children with young children in day care centers. Therefore a re-examination and revision of day care regulations and licensing requirements will be required to insure that:

   a. day care environments, whether in centers or day care homes, meet the age-stage developmental needs of the children served (programs offer social educational and recreational experiences which fit normal patterns for the individuals served).

   b. the physical health and safety of handicapped and non-handicapped children are protected (programs prevent harm or injury which could result if older, physically aggressive children are served in the same setting with toddlers or young children without sufficient staff and supervision).

4. Training opportunities will need to be made available to day care workers to help them to better understand and care for children with special needs. The Department of Community and Regional Affairs has already provided excellent training opportunities through special grants for a variety of day care training and management needs. This can be expanded to include training for day care workers who care for handicapped children. Day care providers who already serve younger handicapped children have most of the knowledge and resources to meet this need.

5. Consideration should be given to changing the target population from a minor who has a "developmental disability" (the definition adopted from A.S. 47.80 is no longer current under the federal Developmental Disability Act P.L. 95-602 and is functionally obsolete in the human services field) to a minor who has a "handicapped or disability" to allow inclusion of children who have physical disabilities, orthopedic handicaps, or health impairments as well as those with mental retardation or mental impairments. The need for after school day care of physically dependent children is similar to that of mentally handicapped children and should be able to be met through this program. There does not appear to be a reason to include one category of handicapped or disabled children and exclude another if the basic goal is to assist parents who have a special day care need because they have a handicapped child who cannot fend for him or herself after school. Implementing regulations could further define the terms.

6. Special subsidy rates would need to be allowed so that remuneration would be related to the additional costs of caring for children with special needs.

There are additional needs to assist parents to care for handicapped children as they grow and develop. What may be an after school day care need today may become a different need tomorrow, depending on changes in the family, where the family lives, and changing developmental and care needs of the handicapped child. Also, there are many communities in Alaska which do not have day care centers or licensed day care homes. To provide a broad-based but individual and local response to these changing needs we hope you will also continue to explore the family subsidy or family assistance concept which you worked on earlier this session. We have obtained more program and cost information and will provide it to you under separate cover. We feel that the number of services and amounts of subsidy can be refined, narrowed, and limited to affordable and manageable levels. With a simple family assistance program we could provide families with handicapped children who do not live in large communities or in proximity to formally organized service programs a somewhat equal opportunity to obtain the support and help they need.

It is heartening to see that you and your legislative colleagues are grappling with these service issues and devising responsive solutions to complex problems. Programs such as day care assistance do much to ease the burden of care and enable parents of handicapped children such as my husband and myself to work and pursue careers and attend to the needs of our other children. They also reduce the need for costly out-of-home placement or institutional care for handicapped children. Many thanks for your willingness to listen and to try out new solutions.

At your suggestion a copy of this letter will be provided to co-sponsors Representative Malone and Representative Koponen, and offered as testimony on the bill to the HESS Committee members.

Sincerely,

Jane White

Who We Are . . .

Protection and Advocacy (P.A.D.D.) is a private not-for-profit corporation that exists to protect and advocate for persons with developmental disabilities.

This agency was created by a federal law, Public Law 95-602, which requires each state to have an agency for protection and advocacy purposes. Since it is a private agency, we are not administered by federal or state government, although funding for P.A.D.D. does come through the federal Department of Health and Human Services and the Alaska Department of Health and Social Services.

Our purpose is to see to it that governmental units at all levels respect and comply with the legal and human rights of persons with a developmental disability. We monitor activities in the private sector as well as the public.

Above all, our goal is to help persons with a developmental disability to know their rights and to assist them in pursuing remedies on their own. Legal action is a final recourse and we believe many other steps can and should be taken before legal remedies are sought.

. . . And What We Do

We provide public awareness of the human rights of persons with a developmental disability. We also provide information to persons with a developmental disability to assure that they and their families know and better understand their rights.

We provide information on the rights of persons with a developmental disability. Armed with correct information and backup support from us, we feel that direct intervention by our agency is not necessary in many cases.

If our help is needed, we do not hesitate to intervene on the behalf of a client. In many cases, PADD has acted as a liaison between a governmental agency and a concerned parent, arbitrating the differences that might exist.

In addition to direct advocacy, we provide guidance to legal services and training groups.

As a corporation, PADD may file class action suits on behalf of persons with a developmental disability. Such direct intervention is a role we take only when far-reaching change is needed to improve the lives of persons with a developmental disability.

How We Can Help . . .

We can provide the tools needed to advocate for persons with a developmental disability. Those tools include information, legal guidance, training and if need be, direct advocacy.

P.A.D.D. is a resource agency. We are here to help and are capable of providing much more than just moral support.

When direct action is called for, we will act. Action may include providing input into the legislative process, acting as a liaison for a client or assisting or initiating legal suits when broader issues are involved. As a last resort we may take direct action on alleged violations alleged violations of the legal rights of persons with a developmental disability.

Our Goal:

To protect the rights of persons with a developmental disability and to enourage them to become self-advocates whenever possible in legal or human rights concerns.

The People We Serve . . .

PADD works on behalf of any person, regardless of age, who has a developmental disability. The disability must be attributable to a mental or physical impairment or combination of mental and physical impairments, and it must be manifested before the age of twenty-two and be likely to continue indefinitely.

The disability must result in substantial functional limitations in three or more of the following areas of major life activity: self-care, receptive and expressive language, learning, mobility, self-direction, capability for independent living and economic self sufficiency.

Finally, we serve those with a disability which reflects the need for a combination and sequence of special, inter-disciplinary or generic care, treatment or other services which are of lifelong or extended duration and are individually planned and coordinated.

SERVICES

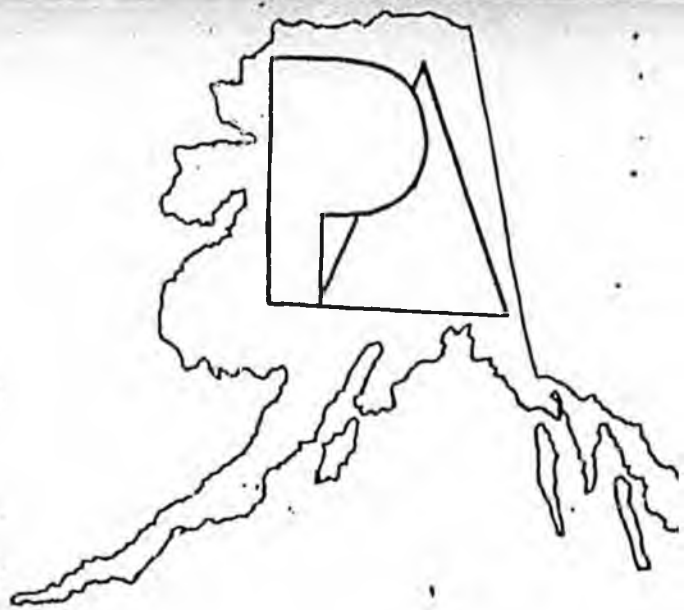
There are three basic services provided by PADD.

ADVOCACY SERVICE

This service includes investigation or negotiation on a client's behalf. Information or referral to a more appropriate agency is also part of this service.

LEGAL SERVICE

This service may provide legal support to lawyers working on behalf of a PADD client, refer clients to attorneys familiar with developmental disability law, contribute to training workshops and seminars (and -- in some cases -- directly represent eligible clients).



TRAINING SERVICE

PADD's staff can provide in-service training, workshops and presentations regarding our services, due process or legal rights of persons with a developmental disability.

HOW TO MAKE A REFERRAL

Clients may request PADD services directly or referrals can be made from agencies, concerned friends, parents, other advocates or service providers. PADD's staff will emphasize talking directly to the person with the disability rather than about them with referral sources. PADD will employ a wide variety of techniques for informing persons with developmental disabilities of the services available to them and attempt to make service accessible throughout the State. You may call collect

94-142 and 504: Numbers that Add Up to Educational Rights for Handicapped Children

A Guide for Parents and Advocates

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

The Children's Defense Fund (CDF) is a national, nonprofit public charity created to provide long-range and systematic advocacy on behalf of the nation's children. Through research, public education, litigation, technical assistance to state and local groups, community organizing and monitoring federal administrative and legislative policies and programs, CDF seeks to change policies and practices resulting in the neglect or mistreatment of millions of children. Our goal is to place the needs of children and their families higher on the nation's public policy agenda.

CDF is supported primarily by foundations. We have no chapters and are not a membership organization, but work closely with other groups to help individuals, parents, and advocacy groups work on behalf of children. We welcome those who are interested in receiving up-to-date information on a range of public policies affecting children to become subscribers of our newly launched children's public policy network.

The increased involvement of individuals and groups on behalf of children throughout the nation is critically important. We hope all taking the time to read this Agenda will begin to:

- Become informed about the needs of children nationally and in your own area.
- Talk to other parents, individuals and groups in your community to gain strength from numbers to pursue local change for children.
- Speak up to unresponsive policymakers and political officials who fail to protect children's interests or provide them with needed services.

As a public charity, CDF is permitted under the Tax Reform Act of 1976 to spend a small percentage of its budget on legislative activities. Because our legislative resources are limited and must be strictly accounted for, we carefully target our efforts on issues where we have particular expertise, can make a difference, and will represent a point of view that will not otherwise be heard.

This handbook is one of a series of booklets published by the Children's Defense Fund to encourage a stronger role for families and community groups in protecting children's rights. Other titles in this series are listed on the inside back cover.

1. Introduction

It is commonly thought that a free appropriate public education is the birthright of every American child. But until the enactment of recent landmark legislation—passed after years of public hearings, debate, consultation, and investigation—this right was routinely denied to millions of the nation's handicapped children. A large proportion were kept out of school altogether, while others had to make do with inadequate and piecemeal educational services.

The two laws described in this handbook represent an effort to change this pattern of neglect. They recognize that if children are to grow up to become productive and self-sufficient members of the community, they need the benefits of an appropriate education, adequate health care, and meaningful training and social services *while they are young*. This is especially true for handicapped children who must develop extra skills to compensate for whatever disability they may have. The earlier these services are provided, the greater the gains will be in the child's development.

This handbook is designed to give you an understanding of your child's educational rights under these new federal laws. One, called P.L. 94-142,[1] is a comprehensive law setting forth the fundamental rights necessary to ensure that all handicapped children receive the free appropriate public education to which they are entitled. The other, Section 504,[2] is a more general civil rights law which also applies to educational services. Section 504 makes it illegal for any agency or organization receiving federal funds to discriminate *in any way* against handicapped people. It requires any public or private organization receiving federal money to take special steps to make it possible for people with mental, perceptual, physical or emotional handicaps "to learn, work, and compete on a fair and equal basis." Non-compliance can mean a cutoff of all federal support to the agency or organization.

Despite the fact that these laws are now on the books and apply to most school districts in the United States, it's going to take a lot of work to put them into action. And without your active involvement in the process of getting a good school placement and appropriate services for your child, the changeover will be even slower. Both laws contain provisions for your participation in decisions all along the line. We urge you to exercise these rights and hope this handbook will be useful along the way.

1.1 Know the Law

The first step is to know what the regulations actually say. You can get a copy of P.L. 94-142 regulations (42 *Federal Register* 42474, *et seq.*) by writing your Congressperson or ordering it from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402; 45 cents per copy. The Section 504 regulations (42 *Federal Register* 22676, *et seq.*) can be obtained from the U.S. Department of Health, Education and Welfare, Office for Civil Rights, 330 Independence Avenue, S.W., Room 5400, Washington, D.C. 20201.

It is also important to know what your state and local plans for services to handicapped people say. Each state and local school district is required to develop special education plans *each year* and make them available to the public for review and comment *before* they are adopted. The plans must detail how the state and each school district intend to carry out the law. Copies can be ordered from your State Department of Education[3] and local school district superintendent.

All school districts should have copies of the two sets of federal regulations, the state plan, and the local district's own plan. You have a right to see these documents.

Read and review these documents with care. Workshops, training sessions, or problem clinics can be sponsored by parent organizations to learn about the laws and sharpen your ability to enforce them. Communicate your concerns about proposed state and local plans. If there are glaring needs that you feel are not being filled, say so.[4]

[1] Public Law 94-142 (20 United States Code § 1401, *et seq.*), the Education for All Handicapped Children Act, was enacted in 1975. Its regulations—on which this handbook is based—were published in the Federal Register on August 23, 1977.

[2] Regulations implementing Section 504 of the Rehabilitation Act of 1973 (29 United States Code §794), the Civil Rights Act for Handicapped Persons, were published in the May 4, 1977 Federal Register.

[3] A list of the addresses of State Departments of Education is contained in section 6.5 of this handbook.

[4] Highlighted text from "What Does It Take to Make a Law Work?" *Report from Closer Look* (Winter-Spring 1977). A publication of the Closer Look Information Center for the Handicapped, P.O. Box 1492, Washington, D.C. 20013.

1.2 How this Handbook is Organized

This handbook should serve as a general guide to educational services and the processes for getting them under P.L. 94-142 and Section 504. It is divided into the following sections:

- **What the Laws Cover.** The first section includes information on the range of disabilities protected, age requirements, and relevance to children in institutions and foster homes.
- **The School District's Responsibilities.** The second section describes all of the special education services and assistance your child is entitled to under the laws.
- **How the Evaluation Process Works.** The third section explains the procedures used to identify, evaluate and place your child in an educational program fitting his or her needs. A key part of the evaluation process is development of an IEP—individualized education program.
- **Your Rights When You Disagree With the School.** The fourth section describes how you can challenge your school's evaluation or placement decision. Enforcement tools include independent evaluations, hearings, administrative reviews, complaints and lawsuits.
- **Resources.** The fifth section lists local, state, and national organizations that can provide information and help at various points in the process.
- **Appendix.** Legal Citations to Federal Statutes and Regulations.

2. What the Laws Cover

2.1 Who is Eligible for Free Public School Services?

The definition of "handicapped children" is very broad. It includes children with any of the following handicaps, no matter how severe or mild the handicap is:

- Hearing impairments or deafness
- Speech impairments
- Visual impairments or blindness
- Emotional disturbance
- Mental retardation
- Physical impairments
- Learning disabilities
- Chronic or long-term health problems
- "Other conditions"

2.2 How Old does your Child have to be to Receive Special Help?

The age requirements are also broad. There are presently three categories of children who are eligible for special education services. These include all children who are:

- Covered by your state's public education laws—usually 6-17 years old
- Presently receiving services from any federally funded program (such as Headstart or Vocational Education), whether they're younger or older than the state school age
- In any disability category required by state law or court order to be served

All children aged 3-18 will be eligible by September 1, 1978, and all children aged 3-21 by September 1, 1980, unless state law or practice does not allow serving 3-5 or 18-21 year-olds.

2.3 What about Children Placed Outside Their Homes?

The laws apply to all children regardless of their residence. Children living with their own parents, institutionalized children, children in group homes, and children in foster homes are all eligible.

3. The School District's Responsibilities

The law guarantees *every* child a free public education. This means that a child with special learning needs is entitled to free special services to meet those needs.

3.1 What Special Services does the Law Provide?

The range of services your child is entitled to includes:

Early identification and assessment of disabilities (The procedure for evaluating your child's special needs and developing an individualized education program is discussed in the next section.)

- Specially trained teachers and teachers' aides
- Speech and language therapy
- Special materials and equipment
- Counseling
- Psychological services
- School health services
- Medical services for diagnostic or evaluation purposes
- Physical therapy
- Occupational therapy
- Special transportation to school and activities within school
- Vocational education
- College placement services
- Parent counseling and special homemaker services that teach natural and foster parents how to care for handicapped children
- Other programs and services if they are necessary for your child's education

Above all, your child is entitled to *effective* instruction in the basic skills needed to become self-sufficient: reading, writing, speaking, and arithmetic.

3.2 Do the Laws Extend to Extracurricular Activities?

Yes. Handicapped and non-handicapped children need to spend time together and share activities outside the classroom. After-school programs are often as important to a child's development and healthy adjustment in the community as schoolwork. Your child has the same rights as non-handicapped children to participate in:

- Clubs
- Career and educational counseling
- Meals
- Recess periods
- Physical education, including a specially designed program if necessary
- All school athletic programs, including competition
- Early morning and after-school day care programs
- Music, art, crafts, homemaking, industrial arts, or other special interest activities
- Health services
- Referrals to agencies that provide assistance to handicapped persons
- Employment services

These activities should be fully integrated with those of non-handicapped children. If your child's individual needs cannot be met in a regular setting, however, then the same opportunities must be made available in other ways.

3.3 Can Services be Provided to Children in Regular Classes?

If your child's disability calls for intensive one-to-one teaching in a very quiet setting or specialized, perhaps immovable, equipment that is available in only one place in the school district, he or she might be sent to a different facility, spend part of the day in a "resource" classroom, or be enrolled in a day treatment program.

Usually, though, special education services can be arranged with the help of special teachers or teachers' aides who work along with the classroom teacher. Tests and work assignments must be modified, and different techniques and materials used for children with particular disabilities. Under the law, schools are now responsible for routinely providing such services as: interpreters for deaf children, taped tests, brailled materials and readers for children with visual problems, and specially adapted equipment for physical handicaps if needed.

3.4 What about Children in Day or Residential Treatment Programs?

Most children don't need separate, special schools or residential care. But, if it is in your child's best interest—after careful evaluation and *with your agreement*—he or she can be placed in a private school, day program, or residential setting. Your school district is then responsible for paying for all educational, room, board, transportation, and non-medical care costs. Any private school program selected must meet state and federal standards and must safeguard both you and your child's rights. An important point: If a residential placement is called for, your child *must be placed as close to home as possible.*

If you voluntarily choose to place your child in a private facility—even though the state has offered a free appropriate education for your child—then the state is not required to pay. However, your child is still eligible for evaluation by the school district and can take advantage of the special education and related services offered to other handicapped children by the district.

3.5 Architectural Barriers

It is illegal to place handicapped children in separate buildings or trailers simply because the regular school building has stairs, narrow doorways, inaccessible bathrooms and other physical barriers that make it hard for handicapped students to get in or around. Schools must immediately start making their buildings and classes accessible to all students. Ramps must be built and classes relocated *right now*, if necessary. Any significant reconstruction must be completed by June 3, 1980. All new construction must be designed to be readily usable by handicapped persons.

The law applies to pre-schools, elementary schools, secondary schools, colleges, and post-secondary vocational schools.

3.6 Who Provides and Pays for Transportation?

The school is required to provide whatever transportation is necessary to ensure that your child receives an appropriate education. This may involve setting up a special transportation system if your child has physical disabilities or lives too great a distance from the school. He or she is automatically eligible for special transportation if all of the other children in the community get transportation services. If, however, the school doesn't normally provide transportation, it is up to you to show why your child needs it—a doctor's note or note from you on your child's disability should be sufficient.

Most schools already provide their non-handicapped students with free transportation to and from school and special school activities. If there is a fee, handicapped children can't be charged any more for their transportation than non-handicapped children, even if special equipment, personnel, or services must be used.

Make sure appropriate transportation is specifically mentioned in your child's individualized education plan—IEP.

3.7 Mainstreaming/Least Restrictive Environment

The law recognizes that it's important for your child to have the experience of functioning in the real world with all kinds of children. He or she is growing up in a complex society and will someday be living and working with non-handicapped adults. Schools are therefore required to educate your child—to as great an extent as possible—in regular school settings with non-handicapped children of the same age group.

Only if your child's needs are so special that they can't be met in a regular class with additional aids and services should placement in a separate area be considered. Even then, the special separate class placement should be limited—not all day long—and should be located in the regular school building—not trailers or different facilities—whenever possible. Placement in separate buildings should take place *only* when the services are so specialized that they could not possibly be provided in a regular school building.

This does not mean that your child can be put in a regular class just to sit in the back or be ignored. The special services he or she needs *must* be provided in full. The purpose, however, of the law's emphasis on the "least restrictive environment" is to give your child a chance to go to school in the most natural and integrated setting possible. Experience has shown that separation tends to encourage unfair labels and unfair treatment.

4. How the Evaluation Process Works

Both Section 504 and P.L. 94-142 guarantee parent[5] involvement in every decision affecting your handicapped child. Without your consent, no school district or official can:

- Evaluate your child's abilities and educational needs,
- Determine which special education services are necessary, or
- Place your child in a special education program.

The law encourages your presence at all discussions affecting your child; requires that you be fully informed of every decision, the alternatives considered, and the reasons for them; and requires your approval of your child's initial special program. You have the right to inspect all of your child's education records, including those concerning his or her identification, evaluation, and placement.[6]

You also have the right to bring anyone you choose to any meeting concerning your child's education. This might include a lawyer, a friend or relative, a community advocate, or any other person who can help. (A list of people who might be able to represent or refer you to other assistance in your community is contained in section 6.1 of this handbook.)

Poor and minority students have been *misclassified* as mentally retarded by many school districts. Be sure the evaluation process gets at all your child's special needs. Be sure the program you agree to provides all the services your child needs. Do not let your child be dumped in an inappropriate class because of racial or cultural discrimination in your school district.

[5]Under the laws, the term "parent" means a parent, guardian, foster parent, person acting as the child's parent, or "surrogate parent" appointed by the state if a child's parents are unknown or unavailable. The state itself cannot be considered a parent, even if a child is a ward of the state. All "parents" are responsible for protecting their child's educational rights.

[6]This right is also protected under the Federal Family Educational Rights and Privacy Act of 1974, 20 United States Code §1232g.

4.1 How is Your Child Selected for Evaluation?

The responsibility for identifying which children need special attention and help is shared by a lot of people and institutions. Parents, state agencies, school administrators, teachers, social workers, doctors, and community workers should all be involved in getting children the help they need.

States and local school districts are required to prepare plans detailing exactly how they will go about locating children with special needs. Different states have used different methods. Newspapers, television and radio announcements, pamphlets, brochures, mobile units, counseling sessions sponsored by mental health centers, and public health and welfare agencies have been required by various states to alert parents to their rights and to the availability of services.

As a parent, you are the most likely source of referrals. You will probably notice sooner than anyone else that your child has a special problem, especially if the problem isn't obvious or severe. If your child seems to have trouble understanding or keeping up with schoolwork, often complains of headaches, has difficulty speaking, says the television looks blurry or the sound is never loud enough, these may be clues he or she needs extra help.

Children themselves are sometimes afraid to tell their teachers or even their parents that something is bothering them. So if *you* think your child might have a handicap that is interfering with his or her ability to learn *in or out of school*, ask for an evaluation by the school. The evaluation will determine what your child's particular strengths are and in which areas he or she needs special help.

4.2 Whom Do You Contact?

The first step is to call the principal of your local school and the Special Education Director of your school district. (You can find out who the Special Education Director is from the principal's office.) When you call, give your child's name and birthday, and ask for an evaluation to be scheduled as soon as possible. Follow up your call with a letter to both people and be sure to send a copy of the letter to the State Director of Special Education.[7]

Keep written records: Your own personal file on your child should contain copies of all your letters to and from officials, dates and topics of all conversations and meetings with of-

[7]See list of State Directors of Special Education in section 6.5 of this handbook.

ficials, and your own observations about your child's behavior, needs, strengths, and problems. All of this will help you when crucial decisions are made.[1]

4.3 What are your Rights when the School Recommends an Evaluation?

If school officials think that your child needs to be evaluated or placed in a different educational program, they are required to follow certain procedures. They must first notify you, explaining:

- What they propose to do—which tests they want to give, which experts will be involved, and what kind of placement they anticipate.
- Why they think it is necessary—which existing tests, what behavior, or which records support their view.
- What options they considered and why they selected or rejected them.
- Any other reasons for recommending a change in placement or program.

It is illegal for anyone to remove your child from the regular school program without an evaluation, without your being fully informed, and without your consent or a final decision by a hearing officer or court.

4.4 Who Participates in the Evaluation Process?

The "educational team" selected to evaluate your child must include people who know your child well (including you), people you select, people who know how to evaluate the information resulting from the various tests, people who specialize in your child's particular disability, and people familiar with service and treatment alternatives.

The team is likely to be composed of:

- A special education teacher or specialist with knowledge of your child's particular disability. (This is a requirement.)
- The school psychologist (if there is one)
- A school administrator
- A doctor familiar with your child's medical history
- A representative of a private school if it seems likely that your child will be placed in a private facility (This is a requirement.)
- A social worker
- Other teachers who know the child's performance
- Parents

Part of this team will later be involved in helping develop an IEP—individualized education program—for your child.

4.5 What are the Evaluation Procedures?

A variety of tests and other procedures which are racially and culturally non-discriminatory must be used to get a complete picture of your child's educational needs. *Your child cannot be evaluated on the basis of any single test, incident, or discussion.* Data on health, vision, hearing, social skills, emotional status, general intelligence, academic performance, and physical coordination must all be combined to make up the IEP. This information is obtained from:

- Diagnostic tests
- Aptitude, achievement, or "IQ" tests
- Extensive talks with parents and teachers about your child's performance and development in *and* out of school
- Psychological testing of behavior and functioning
- Observation of your child in school and play settings
- Medical examinations

Assessments must take into account any special conditions such as your child's inability to speak English or his or her particular handicap. (For example, schools are not allowed to give oral aptitude or achievement tests to deaf children.)

The right to understand extends to parents, too. If their primary language is not English, the school must arrange for an interpreter.

Whatever tests are used, it's important to know about all facets of your child's development— including physical, self-care and communication abilities, and social and emotional maturity. Insist that the evaluation is thorough and that the IEP developed is not a routine form—*all children with the same handicap do not need the same educational program. The IEP must be specific to your child's needs.*

[1]Highlighted text from *Report from Closer Look*

4.6 What is an IEP?

An IEP—individualized education program—is the written result of your child's evaluation. It is the basis of your child's entire learning program. He or she cannot, in fact, be placed in a special education program without such a written program plan.

The IEP's two major purposes are: (1) to set out learning goals for your child's achievement; and (2) to set out services the school district is then *required* to provide to help your child meet these learning goals.

The IEP must contain information on:

- Your child's present level of performance
- Your child's annual and short-term learning goals—in other words, how much he or she is expected to learn over certain periods of time
- What special education and other services will be provided to accomplish the goals
- How much your child will be able to participate in the regular school program—when, where, and how much he or she will be with non-handicapped children
- When special services will begin and how long each service or special program will be offered
- When and how your child's performance and the effectiveness of the plan will be evaluated

All of this information is designed to let you know exactly what changes in behavior and development to expect, and how each program, service or teacher will help your child reach his or her potential. The IEP should give you a clear idea of the progress your child is expected to make under that particular plan.

You have a right to your own copy of the IEP. Be sure to request one so that you can assess your child's progress, hold the school to its promises, remember what was decided, and place your child properly if he or she has to switch schools.

4.7 How is the IEP Developed?

Your school is required to meet with you, a teacher, an administrator, and another representative of the educational team to discuss the results of your child's evaluation and consider what special services—if any—are needed. It is important also to have an experienced community or parent advocate or Legal Services attorney attend the IEP meetings with you. He or she should be able to help you in making certain that:

- The school has a complete picture of your child's abilities and special needs.
- The services to be provided by the school are specifically geared toward your child's learning goals.
- Your child will be progressing in the program selected and not merely repeating things he or she can already do.

Note: The services described in the IEP are legally binding and must be fully carried out by your school district. So it is essential to put *everything* your child needs carefully down in writing in the IEP. If a special service is unavailable right now, ask the school to specify when they will provide it and what will be done in the meantime. Your consent is required to put the IEP into action. So if you're not satisfied with it, don't agree or sign.

The IEP development meeting must be held within 30 days of an evaluation and special needs finding, and scheduled at a mutually convenient time and place. If you cannot attend the meeting, you are entitled to: a full report of the proceedings; individual or group conferences with school administrators, teachers, and evaluators; and all records.

Again, keep notes on all phone calls, letters, conversations, and meetings concerning your child.

The law calls for public agencies to make repeated efforts through phone calls and letters to notify you about meetings and get your views on the issues to be discussed. Special arrangements must be made to communicate with parents who may not speak English or may be handicapped themselves.

4.8 How Can Parents Contribute to the IEP?*

For many parents, IEP conferences may be the first time they've been at meetings with school officials and professionals—and they may feel unsure of themselves. It helps to remember that you, as a parent, have a unique understanding of your

*This section drawn mainly from *Report from Closer Look*

child—and a point of view that must be clearly heard. It takes a mix of ideas, sometimes real conflict, to come up with a plan that's worth trying. Nobody "knows it all."

If you don't understand what the professionals are saying, ask questions. (Don't be afraid to ask what you think may be a "dumb question." That's probably just the thing others want explained, too—but are too intimidated.) Be sure that everything is translated into plain, understandable language.

The goal of IEP development is to figure out the most appropriate services that can be brought together to help a child learn what he or she is ready to learn, the way he or she learns best. It's important that parents really are equal partners with educators in exchanging opinions and evaluating what is proposed. This takes preparation—advocacy groups in every state should develop training programs for parents that get down to the nuts and bolts of school conference participation. This also means training experienced parent advocates to accompany parents to IEP meetings, when necessary.

In preparing for meetings, review your child's school records (see section 5.3) and your state and local plans for special education services, describing the services offered in your school district (see section 1.1).

Once again, if you're not sure of what the professionals are saying, ask questions. Your understanding of your child's diagnosis will be one of the most valuable tools in your ability to judge the value of a program—and to stand up for an appropriate one. You can bring tape recorders to conferences to help you remember what was said. You can visit classrooms and talk to teachers and other parents of handicapped children. Then make up your mind.

4.9 Where is your Child Placed During the Evaluation / IEP / Hearing Process?

Unless you and the school agree to a temporary program change, your child must remain in his or her current educational program. If your child isn't in school, he or she must be placed in the public school program—with your consent—until a new placement decision is reached.

4.10 What is the Schedule for Placement?

The law calls for your child's IEP to begin immediately after you consent and expressly forbids long delays in implementing the individualized education program.

Every school district—no matter how poor or small—is obligated to provide the services specified in the IEP. Even if the state does not receive P.L. 94-142 funds, Section 504 requires local school districts receiving federal funds of any kind to provide an appropriate education to all handicapped children within their jurisdiction. And presently, nearly every school district in the country receives some kind of federal funds. Your State Department of Education (see section 6.5 of handbook) is responsible for providing educational services to your child during any period the school district is dragging its feet on implementation.

4.11 What Provisions are there for Subsequent Evaluations?

The law is specific about the need for continuing attention to your child's needs as he or she develops. You may request a review or revision of the IEP at any time. But at least once a year— request or not—a meeting must be scheduled with parents to review your child's IEP. A full re-evaluation and new IEP are called for every three years, and more frequently if requested by parents or teachers. If you feel your child's needs have changed or he or she has achieved the original IEP goals, ask school officials to begin a review of his or her current placement. It may well be that your child can be returned to the regular school class or placed in a program more suitable to his or her current abilities.

The old way was to put children into special education programs and forget about them. The law now requires that a review—with you participating—must take place at least once a year. But don't wait a year. It's necessary to keep a dialogue between school and home going, to observe what's really happening. Be alert and sensitive to how your child is doing. Talk over problems with teachers. Ask them to try changing approaches or returning your child to the regular class if it seems to make sense![10]

[10] Highlighted text mainly from *Report from Closer Look*

5. Your Rights when you Disagree with the School

Despite all the protections built into the law to ensure a fair, careful and thoughtful evaluation of your child's special needs and school placement, the process may not work the way it is supposed to. If you are dissatisfied with the outcome, don't settle for it.

You have the right to challenge the school's decision if you think:

- The evaluation was inadequate.
- Your views were ignored or unfairly represented by other educational team members.
- The IEP developed for your child is not responsive to his or her individual abilities and needs.
- The services the school is offering are not what you expected or wanted.
- Promised services have been excessively delayed, denied, or provided in unnecessarily segregated settings.
- Your child is showing no progress, or insufficient progress in the educational program in which he or she has been placed.
- Your child has been placed in a separate program, inadequate to his or her needs, because of racial or cultural discrimination.

5.1 Which Approach is Best?

If possible, first try to settle the issue by talking to officials at the local level—the district director of special education, teachers, the school principal, etc. Keep notes of conversations and school officials' responses to your requests. If your local school officials are uncooperative, there are five courses of action available under the law: (1) an independent evaluation; (2) a hearing before a neutral hearing officer; (3) an administrative appeal; (4) a complaint to the federal Office for Civil Rights; and (5) a lawsuit.

If your efforts to persuade the local school system to comply with the law have failed, try to contact a community advocate, Legal Services attorney, or other attorney for help in deciding whether to request a hearing, file a complaint with the federal government, or bring a lawsuit (see section 6.1). Officials of your school district are responsible for providing you with information about the hearings and state-level appeal procedures. So if you do not have access to a community advocate or attorney, you can and should proceed with the hearing process yourself.

You should also file a complaint with the federal Office for Civil Rights. (The procedure is explained more fully below.) If you have legal counsel, you should discuss all possible actions *before* starting out, since a choice of one course of action may legally affect your ability to proceed with other courses.

5.2 Independent Evaluations and Hearings

Your choice of which step to take first depends on what troubles you about the evaluation. For instance, you may think the entire diagnosis of your child's handicap is wrong—that the behavior or performance is caused by different reasons than the ones described by the evaluators. Or you may believe that *your child isn't handicapped at all*—that he or she has been classified as mentally retarded, for instance, simply to get him or her out of a particular classroom, or because of racial or cultural discrimination. Or you may feel your child has a real problem that the evaluators didn't see or diagnose—maybe because there is no program presently offered to deal with that specific problem.

Whatever the cause of your concern—if you want an expert to take a whole new look at your child—request an independent evaluation first. Later, if you wish, you can request a hearing to present the new evidence.

Your other immediate alternative is to request a hearing before a neutral hearing officer. A hearing is the better first step when you agree with the diagnosis of your child's abilities and needs, but disagree with the special education services offered by the school to meet those needs. (You may believe, for instance, that your child has been put in a certain classroom just because of available space and not because it fits his or her needs.) Here, you should consult with a special education professional outside the school who might be helpful in deciding what services your child should have. In this case—when you want a different kind of placement for your child—request a hearing. The hearing must be provided at public expense.

5.3 How Should You Prepare?

Planning is necessary whether you choose an independent evaluation or a hearing first. In getting

ready, it is best to have the help of someone who knows something about the rights of children and who is not as emotionally involved as you are in preparing for the hearing. This person can help you see little things you may overlook, or may see the overall issue more clearly. Legal Services offices generally have people who can perform this function, or there may be a community advocacy group or parent group which can help. The "Resources" section 6.1 of this handbook lists names of appropriate advocates you can contact in each state for help or referrals.

Get all the local help you can from:

- Community advocates or Legal Services attorneys familiar with hearing procedures (see section 6.1 for names of appropriate people in your state)
- Special education teachers or specialists from your local college or community mental health center knowledgeable about special education programs
- Other parents of handicapped children
- Parent or professional organizations concerned with the special needs of handicapped children
- Friendly teachers familiar with your child

In addition request copies of all your child's records.[11] If there are statements or scores in them that are inaccurate, misleading, or unfair, they should be questioned and corrected. Then organize whatever school documents, health records, or notes on meetings with school personnel seem relevant. Don't forget the IEP, if there is one, and a copy of your school district's plans for special education services. The plans may reveal gaps, not only in services promised by the school district, but in services the school district is *required* to provide under federal law.

If you are not already a member of an organization composed of parents of handicapped persons, join one. Your single voice is important—but the voices of people who have banded together are far more effective. Experienced parents can help others who may be just starting out. Find out if a coalition of organizations exists in your area, and go to their meetings. If one does not exist, think about starting one yourself.[12]

[11] "You are entitled under the Federal Family Educational Rights and Privacy Act (the "Buckley Amendment", 20 United States Code §1232g) to your child's records. A handbook on parents' and students' rights to school records is available from the Children's Defense Fund.

[12] Highlighted text from *Report from Closer Look*.

5.4 How Can You Get an Independent Evaluation?

If you want your child re-evaluated by experts outside the school system, then the school must provide you with names of other professionals in the community. Again, consult individuals and organizations to find an appropriate examiner and arrange for a new evaluation. You should also check with specialists at your local college or university, your local public health office,[13] and the regional mental health center for free independent evaluations. The persons conducting these independent evaluations must be at least as qualified as the "experts" who participated in the original evaluation. (For example, if one of the experts was a psychologist, you might want to hear the views of another psychologist.) In addition, all of the other requirements called for in the initial school district evaluation must be met, such as convenience of location and participation of a variety of professionals and others concerned with your child's education.

Who pays any costs of the new evaluation? This is tricky. The responsibility for paying for the independent evaluation varies according to who asks for it, when it takes place, and what the outcome is. Usually, when you and always when hearing officer requests an independent evaluation, it is provided at public expense. However, *if* the school challenges your request by seeking a hearing first, and if the hearing decision backs up the school's initial evaluation, then you must bear the cost, if any, of the independent evaluation. No matter who ends up paying for the new evaluation, any information obtained from the new evaluation may still be used in a hearing.

5.5 How Can You Get a Hearing?

The first formal step is to notify school officials and the State Director of Special Education (see list of names and addresses in section 6.5) that you are requesting a hearing on your child's placement. In writing, if possible, simply inform the officials about your complaint (that is, the IEP is unsatisfactory or the school hasn't provided the services agreed upon earlier). If you can, name the people involved in the original decision in your letter. Keep a copy of this letter and any response.

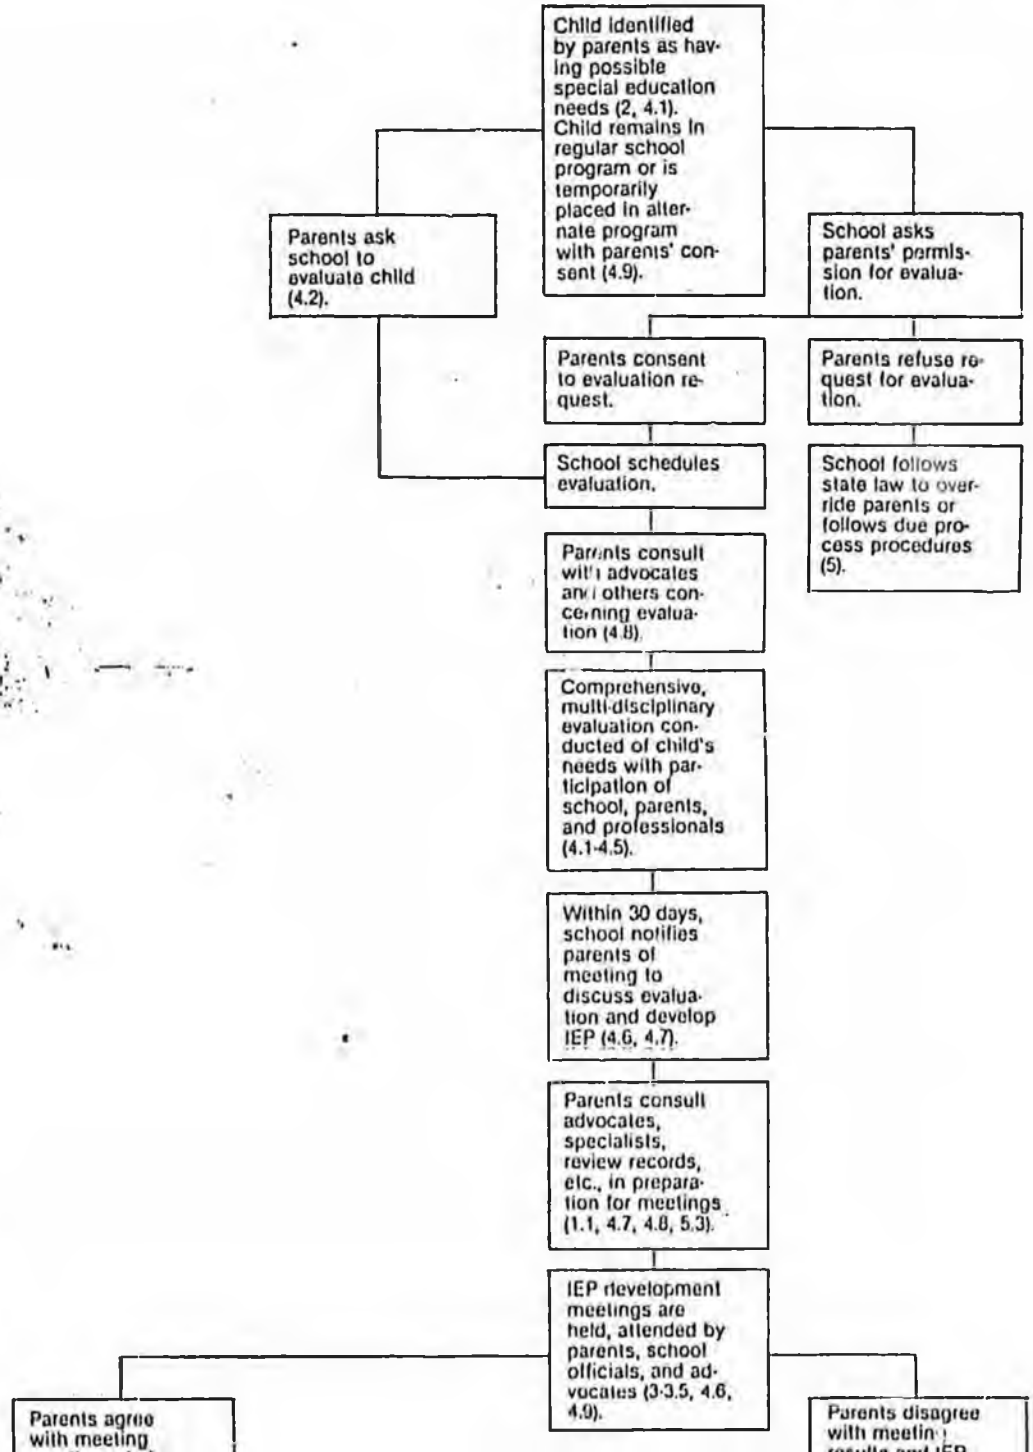
The hearing process must be completed within *45 days* of the time your letter is sent or the problem is pointed out to the school officials.

[13] Ask about the availability of EPSDT for free medical screening. EPSDT is the Early and Periodic Screening, Diagnosis, and Treatment Program of Medicaid.

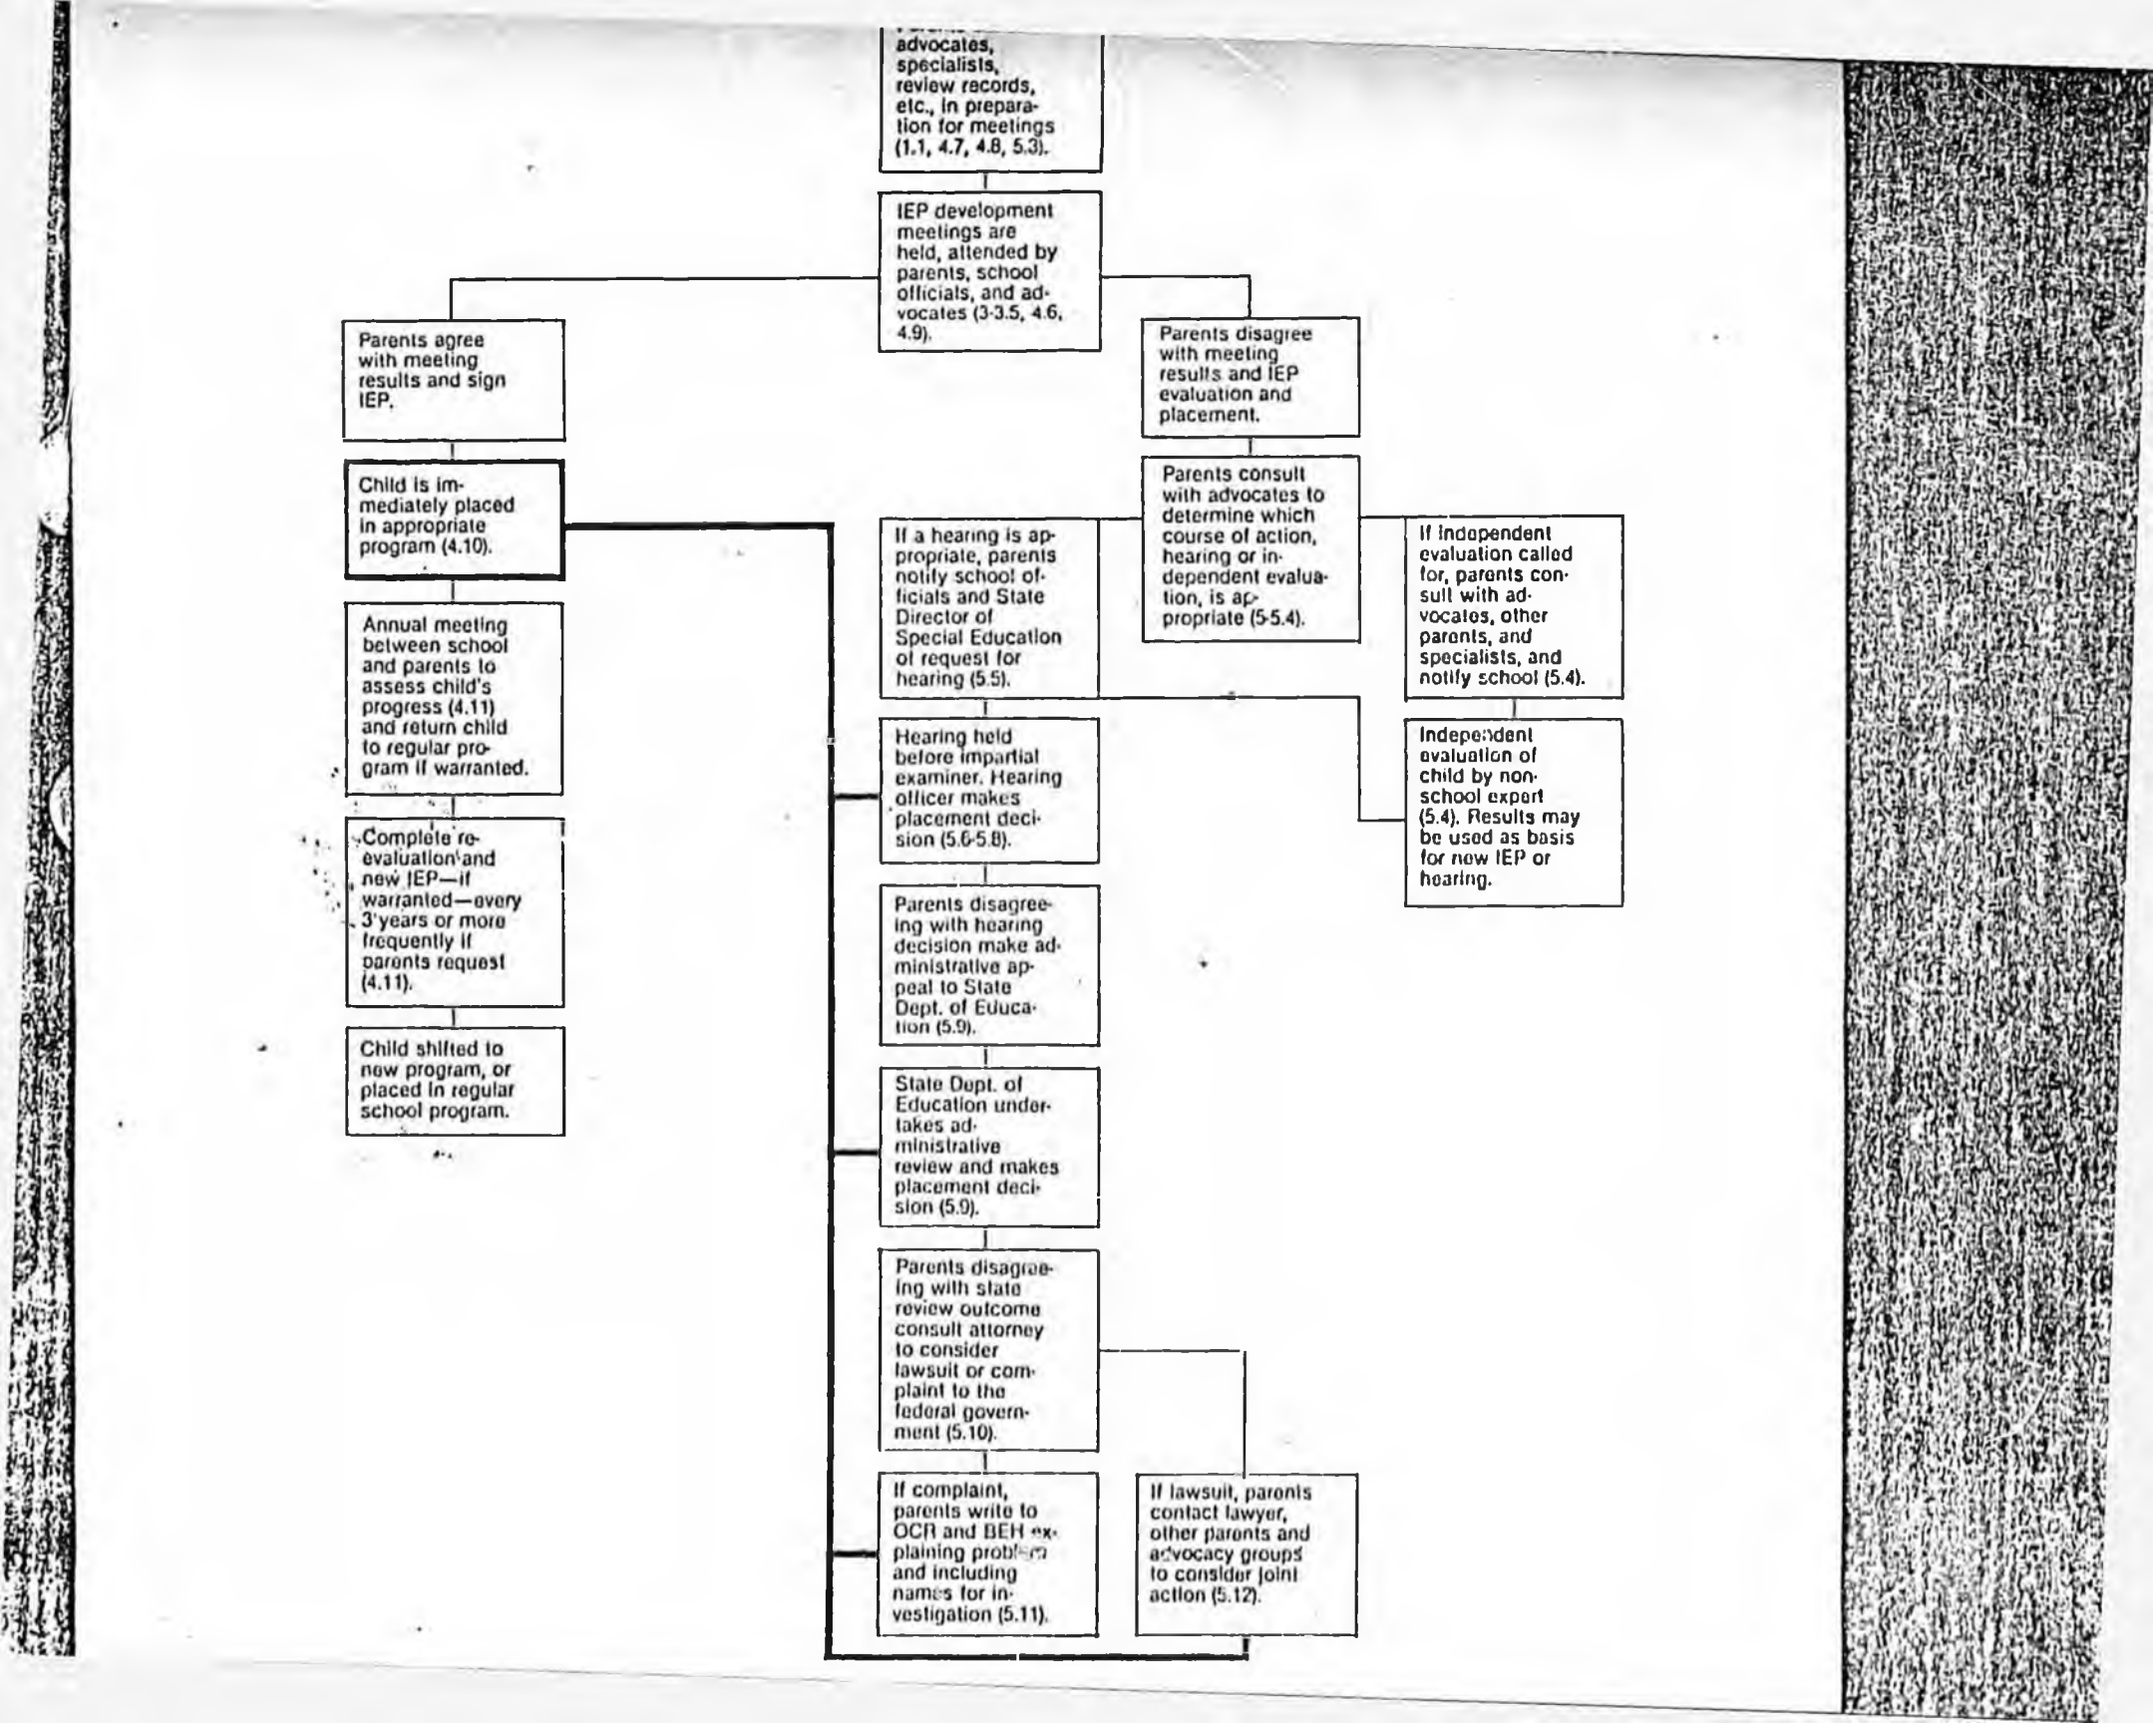
5.6 What Happens at the Hearing?

The purpose of the hearing is to explain to an impartial hearing officer what is wrong with what the school is doing and to present evidence concerning the kind of program your child should be getting. Simply criticizing the school's program is not enough. If you want the hearing officer to order the school to provide your child with a specific program or with specific services, you must persuade him or her by presenting evidence of your child's particular needs. This is where advocates and the persons who did your child's independent evaluation can be most helpful. They can help you explain why a particular program or service is essential for your child.

Parents have the following rights at a hearing:



- You can bring anyone—including a lawyer, community advocate, or special education professional—who can help represent you and your child. (See section 6.1 for addresses of groups which can help in your state.) It's an advantage to have the independent evaluator at the hearing if his or her findings agree with your own views.
- You can present information about your child's needs, including the results of an independent evaluation, if there has been one.
- You can require particular school officials to attend the hearing and you can question them.
- You can prevent the introduction of any records or evidence that has not been made available to you at least five days before the hearing.
- You can open the hearing to the public.
- Your child can be present.



The school district is responsible for arranging for the hearing, and must let parents know beforehand what legal and other services are available to help in the hearing. In addition, it must be held at a convenient time and place. The hearing is conducted by a hearing officer.

5.7 Who is the Hearing Officer?

Each public agency is required to keep a list of persons who can serve as hearing officers, along with statements concerning each person's qualifications. The hearing officer must be totally impartial. He or she cannot work for the school district or any other agency responsible for educating or caring for your child, and cannot have any personal or professional interest that would

Evaluation, Placement and Due Process Under PL 94-142 and Section 504

advocates, specialists, review records, etc., in preparation for meetings (1.1, 4.7, 4.8, 5.3).
IEP development meetings are held, attended by parents, school officials, and advocates (3-3.5, 4.6, 4.9).
Parents agree with meeting results and sign IEP.
Parents disagree with meeting results and IEP evaluation and placement.
Child is immediately placed in appropriate program (4.10).
Parents consult with advocates to determine which course of action, hearing or independent evaluation, is appropriate (5-5.4).
If a hearing is appropriate, parents notify school officials and State Director of Special Education of request for hearing (5.5).
If independent evaluation called for, parents consult with advocates, other parents, and specialists, and notify school (5.4).
Annual meeting between school and parents to assess child's progress (4.11) and return child to regular program if warranted.
Hearing held before impartial examiner. Hearing officer makes placement decision (5.6-5.8).
Independent evaluation of child by non-school expert (5.4). Results may be used as basis for new IEP or hearing.
Complete re-evaluation and new IEP—if warranted—every 3 years or more frequently if parents request (4.11).
Parents disagreeing with hearing decision make administrative appeal to State Dept. of Education (5.9).
Child shifted to new program, or placed in regular school program.
State Dept. of Education undertakes administrative review and makes placement decision (5.9).
Parents disagreeing with state review outcome consult attorney to consider lawsuit or complaint to the federal government (5.10).
If complaint, parents write to OCR and BEH explaining problems and including names for investigation (5.11).
If lawsuit, parents contact lawyer, other parents and advocacy groups to consider joint action (5.12).

conflict with objectivity in deciding the case. (For example, he or she can't be a school board member, own the private school contemplated for your child, or stand to benefit in any way from the outcome.)

5.8 What is the Result of a Hearing?

On the basis of information presented at the hearing, the hearing officer will decide what he or she thinks is the most appropriate placement for your child. The hearing officer is *not* limited merely to accepting or rejecting the school's program, but is supposed to order the school to provide whatever services are necessary for your child, even if the school district does not presently provide such services. The hearing officer can require the district to start a new program or pay for your child to go to a private program providing the necessary services. The decisions of hearing officers are final and must be obeyed by school districts, subject only to appeal to the State Department of Education or the courts.

Within 45 days of the date you first requested a hearing, a written copy of the officer's decision *must* be provided to you. You are also entitled to a written transcript or a tape recording of the hearing proceedings if you wish.

5.9 What is an Administrative Appeal?

If you disagree with the hearing officer's decision, the last opportunity you have to challenge your child's evaluation, IEP, or program before filing a complaint or going to court is an administrative appeal. This appeal is a request to the State Department of Education to review the entire hearing process to make sure your legal rights were protected, all appropriate information was considered and the proper decision was made. The appeals officer may request additional information or meet with you and others concerned with the decision. If more evidence is presented, all the rights described above for the hearing will apply. *An administrative appeal is not possible if the initial hearing was conducted by the State Department of Education.*

If the State Department of Education Agency undertakes an administrative review of the case, they must complete their work and mail copies of their decision to all parties concerned within 30 days. Again, that decision is final unless you want to challenge it through a state or federal lawsuit.

5.10 Complaints to the Federal Government

If there are systematic violations of the law in your state or school district that affect a number of children—such as school board members serving as hearing officers, routine exclusions of children from school, inadequate evaluations based primarily on IQ tests, inaccessible buildings, or unnecessarily segregated facilities—you should consider filing a complaint with the Federal Office for Civil Rights (OCR)—the civil rights/Section 504 enforcement agency for the U.S. Department of Health, Education and Welfare—or the Bureau of Education for the Handicapped (BEH)—the HEW agency responsible for enforcing P.L. 94-142. A complaint with either of these agencies should result in a federal investigation of your charges. Federal agency action can affect *all* of the federal funds received by a school district, if the district refuses to comply with Section 504.

Be aware that once you file a complaint with the federal government, you may have to wait until the federal agency has completed any action it will take before you can file a lawsuit.

To file a complaint, write a letter to OCR and BEH clearly stating the problem and including as much information as you can about the situation (see addresses in section 6.4). Name all the people involved in the complaint so that OCR and BEH can interview them when they make their investigation. In your letter, you can ask OCR and BEH to keep all of the information you are providing confidential. Send a copy of the letter to your State Department of Education Special Education Office and to your Senators and Congresspersons.

Even though the federal agencies may be slow to respond to your complaint, filing a complaint with the federal government can be used to put political as well as legal pressure on school districts, so it is good to distribute copies of your complaint to important political people in your state.

5.11 Lawsuits

If you have been unsuccessful in the hearing and appeal process and have not been able to get the school to provide the services you think your child needs, you should seek help from the state or federal courts. You are able to challenge in court any unlawful aspect of the evaluation, placement and hearing process, as well as the school's failure to provide your child with appropriate special education services in proper school settings. A lawsuit can result in a direct order being issued, requiring public officials to obey the law and provide you the services, evaluation or procedures to which you are entitled.

Note: You do not have to go through the hearing and appeal process before going to court if the process is illegal or unfair and you can show that it would be useless to you to do so—for example, because the hearing officers are school board members or the school district has repeatedly ignored hearing officer orders.

In addition, you should consider challenging major violations of the law (that is, school system-wide or state-wide violations that affect a number of children—such as those discussed in section 5.10) by filing a "class action" suit in state or federal court. In this type of suit, you represent all other parents and children facing the same illegal actions you are facing. You should try to get other parents, parent coalitions, and community groups who share your interests to join with you.

Don't be put off by the idea of going to court. Lawsuits are often the only way to ensure compliance with new laws and are a powerful way of working within the system for the best interests of the public. More and more individual parents and parent groups are filing suits to protect their children's rights. And officials tend to treat you a lot more seriously when they know you are willing to rely on more than talk to accomplish your goals.

To file a lawsuit, you must first contact a lawyer to represent you. Legal Services, private attorneys, Developmental Disabilities Protection and Advocacy offices (there is one in each state—see section 6.1) or parent coalitions should be able to help you find an attorney to represent you. In many cases, attorneys can have their legal fees paid by the defendant (school officials), if they win or favorably settle the case, under the Civil Rights Attorneys' Fees Awards Act of 1976.[14] You should recommend that your attorney contact one of the National Advocacy Groups listed in section 6.2 of this booklet for detailed information about the federal laws, special education cases, and other legal assistance.

[14] 42 United States Code §1988

6. Resources

The following local, state, and national oganizations should be useful to you in obtaining appropriate educational programs for your child. These lists are by no means complete. There are undoubtedly many other advocacy and information resource groups that can provide similar technical assistance and services. It's a good idea first to consult with groups with whom you normally work—such as Headstart, Legal Services, your church, etc.—and then move on to the organizations listed here for additional assistance.

Another valuable resource are the state and local guides to specific education programs and procedures. More and more states are producing free brochures and manuals to let parents in the state know exactly what their rights are and how to work their way through the special education process. Your State Special Education Department (see section 6.5) should be able to send you copies or direct you to organizations that can. It's helpful to enclose a stamped, self-addressed envelope with your request.

If no one in your state has produced a guide to educational rights, your State Department of Education might be willing to provide the money to a parent or advocacy group to do it. Consider taking on the job. It's one of the most useful services a group could perform for the parents of handicapped children.

Comm
~~SPONSOR~~ SUBSTITUTE FOR HOUSE BILL NO. 257

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to certain limitations and exclusions in health insurance policies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. COVERAGE WHEN ALASKA AREA NATIVE HEALTH SERVICE BENEFITS AVAILABLE. An individual or group health insurance policy that provides coverage on an expense incurred basis or an individual or group service or indemnity type contract issued by a nonprofit corporation may not exclude or limit coverage for the reason that the covered person is eligible to receive health care benefits provided by the Alaska Area Native Health Service.

* Sec. 2. This Act takes effect January 1, 1984, and applies to all policies issued or renewed on or after that date.

Subject: HJR 35.

Dear Representative Ward:

The Alaska State Hospital Association wishes to indicate our support for House Joint Resolution 35.

We believe that the use of health insurance by those who are entitled to services provided by the Alaska Native Health Service would be in the public's best interest. That additional influx of funds would allow the Alaska Native Health Service to continue to provide needed services in the face of federal budget reductions.

The Alaska State Hospital Association believes that the concepts in HJR 35 are necessary if an adequate health care delivery system is to continue in Alaska. We believe it merits legislative support.

Sincerely,

Dennis L. DeWitt
President

Subject: HB 257.

Dear Representative Ward:

The Alaska State Hospital Association wishes to offer our support to the concepts found in House Bill 257.

We believe that it is imperative that the Alaska Native Hospitals be able to collect third party payments for services they provide. With the impending reductions in federal funds, all potential sources of revenue must be pursued by the ANS facilities if they are to remain viable and up to the standard of quality Alaskans have the right to demand. While some may scoff at HB 257, we suggest that is how most forward looking proposals are treated. Without this gradual movement away from depending on federal funding, health services to Alaskan Natives will soon only be a memory.

The Alaska State Hospital Association commends your willingness to address this critical issue in such a meaningful fashion.

Sincerely,

Dennis L. DeWitt
President

From: Dave Palmer, House HESS
Re. HB 257

I have talked with Don Koch, Chief of Market Surveillance in the Department of Commerce about this bill. He, in turn talked with Dr. Rabeau at the Dept of Health and Social Services, Public Health division. Dr. Rabeau has extensive experience with the Alaska Area Native Health Service. Mr. Koch explained so problems with HB 257, as written and suggested as substitute that will accomplish your goal without adversely affecting several insurance programs.

The bill as written would require primary payments by insurance companies even though the insured person is covered by another policy. Problems arise with worker's compensation, medicare, the U.S. Longshoremen's Act, to name a few. A person with coverage under, say worker's compensation, would be paid once by his private coverage, and again by the worker's compensation. This double payment has been upheld by a New York court when an exclusion to double payment was omitted.

The question is whether a person has incurred a "legal obligation to pay" for care. If there is a legal obligation to pay, then the insurance company may not discriminate in its payment. Although this is the case now, Mr. Koch suggests that your bill could be changed to make that policy clearer than present statute. It is the "legal obligation to pay" that must control, and that is the topic of HJR 35.

Another problem with the bill as written is that it will jeopardize a group insurance program developed by the North Slope Borough to provide supplemental coverage for all of the Borough residents. To supplement the coverage accorded the Natives there, the Borough bought a group policy to cover costs of services not provided by the AANHS. If this policy is required to pay for costs provided by the Federal government on a primary basis, the liability will increase dramatically, as will the premium. The city of Kake is proposing to develop a similar program.

The argument that employers or persons are paying for coverage that they do not receive does not hold if the premium is based on actuarial studies. The increase in liability by adding primary coverage for those covered by any state or federal program will surely increase rates.

There are some insurance contracts that are guaranteed renewable, which will not be affected by this bill. There will be inequities in coverage between those policies and others that are affected.

STAFF REPORT

HB 257, LIMITATIONS AND EXCLUSIONS IN HEALTH INSURANCE POLICIES

HOUSE HESS COMMITTEE

MARCH 24, 1983

Dave Palmer

HB 257 provides that health insurers may not exclude or limit coverage for persons who receive benefits under a state or federal act, including the Alaska Area Native Health Service.

This has the effect of making health insurers the primary party responsible to pay for costs that are covered by both a private insurance policy and a state or federal program.

The purpose of the bill is to prevent insurance companies from refusing payments to persons who receive care from a government program if that person has paid for insurance that duplicated the coverage afforded by the government program.

The effect of this bill reaches far beyond the intent, in the opinion of Don Koch, Chief of Market Surveillance in the Department of Commerce. By including all state and federal programs, health insurance companies are now made to become the primary party responsible to pay for costs incurred through programs like Worker's compensation, social security, the Longshoremen's Act, and medicare. A New York case held that double payments were not prevented when an exclusion such as would be eliminated by HB 257 was not present.

If a person incurs a legal obligation to pay for services, an insurance company may not refuse to pay for costs that are covered in a valid policy, regardless of the agency providing the care. The Department suggests that HB 257 could be changed to make that existing policy very clear in the statute. It is the question of whether a person should be reimbursed for costs that they have no obligation to pay that creates confusion.

As written, HB 257 may jeopardize a group insurance program developed by the North Slope Borough to provide supplemental coverage for all of the Borough residents. To supplement coverage accorded to the Natives there, the Borough bought a group policy to cover the cost of care not provided by the Alaska Area Native Health Service. HB 257 would make that policy the primary policy, not the supplemental policy that could cover just those costs not covered by the Federal program. Adding that liability to the program would cause significant premium changes.

Some insurance contracts are written to guarantee renewal. These contracts will not be covered by HB 257, if passed. b

An individual or group health insurance policy that provides coverage on an expense incurred basis or an individual or group service or indemnity type contract issued by a nonprofit corporation may not limit or exclude coverage provided in or by a state or federal facility if the person covered is legally obligated to pay for those services and the policy or contract would provide coverage if THOSE services were rendered in other than a state or federal facility.

TO: All Legislators

FROM: Representative Jerry Ward JW

SUBJ: Measures Relating to Native Health Care Insurance

I have attached for your information copies of a bill and a resolution I have filed today. Each deals with a problem arising from the way that insurance companies deal with our Native Health system.

Many of the Natives eligible for care in the Alaska Area Native Health Service are also covered by a health insurance policy of some kind. At this time, the Federal Government will not accept payment for services rendered to covered Natives. The effect of this is to increase the cost of Native health care to the public while reducing the cost to the insurers. Since this is a policy of the Federal Government, the resolution introduced today requests that the U.S. Congress adopt legislation requiring payment for health services to the extent covered by insurance policies. At the same time, the resolution requests that any money collected from Alaska patients be dedicated to the Alaska Area Native Health Service.

A second problem is dealt with by the bill introduced today. Most insurance policies written today contain a clause preventing payment of benefits if State or Federal benefits are available. The policy covering us as legislators contains this provision. This is a great arrangement for the insurance company but a disservice to the Alaska Native who pays just as much for his or her policy but does not receive the same benefits. The bill before you will prevent this practice.

In view of the crisis we currently face in Native health care, these two measures should be passed as quickly as possible to provide an infusion of cash payments into the system to help replace Federal money being withdrawn.

Attachment

Mental and Nervous Disorders

Physician's services for Mental and Nervous Disorders will be covered as follows:

- 50 percent of eligible Physician's expenses, received in the Hospital or Physician's office. The maximum amount is $2,500 for each covered Member in any one Benefit Year. Services must be provided by a physician or licensed psychologist; and

- if you are confined to a Hospital the benefit paid will be the same as those stated on page 6 under COVERED MEDICAL EXPENSES.

MEDICAL EXPENSES NOT COVERED

Limitations and Exclusions

The State's Medical Plan does not cover any condition, ailment or injury for which you receive:

- benefits from your employer's liability plan or federal or state Workers' Compensation or similar law;

- benefits available under any federal or state act, even though you or your dependents waive rights to such benefits.

Services provided in the following facilities are not covered:

- an institution which is primarily a rest home, home for the aged, nursing home, skilled nursing facility, convalescent home or any facility of like character;

Mike Coughlin - Dept of Admin
Retirement & benefits

Ward - Jeff Bush - Dept of Law

Pays taxes to Fed -

HOUSE BILL NO. 257

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to certain limitations and exclusions in health insurance policies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. COVERAGE WHEN STATE OR FEDERAL BENEFITS AVAILABLE. An individual or group health insurance policy that provides coverage on an expense incurred basis or an individual or group service or indemnity type contract issued by a nonprofit corporation may not exclude or limit coverage for the reason that the covered person is eligible to receive benefits under a state or federal act, including benefits provided by the Alaska Area Native Health Service.

* Sec. 2. This Act takes effect January 1, 1984.

HB

260

SUMMARY: HB 260 "An Act relating to the administration of the University of Alaska"

Enclosed is a sectional analysis prepared by Legal Services Counsel, Keith Levy.

In general, this legislation proposes the following changes:

1). Restructuring the administration in that it requires the Board of Regents to devise and use formula funding in requesting and allocating general funds.

2). Board of Regents will be required to report to the Legislature as in current law (14.40.190 enclosed) but will additionally be required to report a listing of teachers, faculty members, and holders of academic rank as well as the number of credit hours.

3). Board of Regents will be required to submit a disclosure of true operating costs per administrative unit.

4). Salary levels shall be set at no more than 45% above national averages.

SUBJECT: Administration of the university (HB 260)

TO: Representative John Lindauer

FROM: Keith B. Levy KBL
Legislative Counsel

The following is a sectional analysis of HB260, relating to the administration of the University of Alaska.

Section 1 adds a new paragraph to AS 14.40.170 to require the Board of Regents to set up and make use of a formula funding process for requesting and allocating money from the general fund. It requires the board to base the formula on the number of full-time equivalent students. It also requires the board to use the regional cost-of-living differentials between different geographic service areas which the state uses for other state employees.

Section 2 amends AS 14.40.190 to require the Board of Regents to report in writing to the legislature at the beginning of each regular session, in addition to information it was already required to report, the following: the number of credit hours generated by and the full-time equivalent number of students served by each administrative unit; and the total earnings reported for federal income tax purposes, the job description and title, the highest academic degree, the major publications and published research, and the total years of teaching experience for each teacher, faculty member, and holder of academic rank in the university.

Section 3 adds a new section, AS 14.40.172. Subsection (a) requires the Board of Regents to establish at least three geographic service areas for the university and two for the community colleges. It requires university budget requests to be made separately by administrative units which conform to these geographic service areas.

Subsection (b) provides for costs of services shared by different administrative units to be paid out of the budgets for units using those services.

Subsection (c) permits administrative units to decline to use shared services and instead use their share of the funds allocated for those services to obtain those services independently.

Section 4 adds a new section, AS 14.40.235. Subsection (a) prohibits the board from approving a pay scale for which the ratio between the compensation for university faculty and community college faculty varies from the national average. It also prohibits the board from compensating teachers and faculty members at a salary which is more than 45 percent above the national average for a comparable position.

Subsection (b) prohibits the board from awarding pay increases to teachers and faculty members for degrees and courses they have completed which are outside the academic discipline taught by the particular teacher or faculty member.

Subsection (c) prohibits the board from awarding or allowing retention of tenure by an employee who does not teach a minimum of student credit hours equivalent to six full-time equivalent students. Research courses, readings courses, and thesis supervision may not be applied to this minimum number of credit hours for purposes of tenure. Similarly, tenure may not be received or retained by an employee who does not teach an average of at least one course per semester or who is employed for two consecutive years without producing annual student credit hours equivalent to six or more full-time equivalent students.

Subsection (c) also provides that an employee who teaches less than two regular classes per semester may only be paid the equivalent of nine months teaching salary for every eleven months of full-time employment.

Subsection (d) requires the Board of Regents to establish a procedure to ensure that an employee whose tenure is denied or revoked under this section receives due process of law in the form of reasonable notice and the opportunity for a hearing.

Section 5 adds a new section, AS 14.40.265. This section provides that course credit may only be administered and granted by the administrative unit responsible for the geographic area in which the credit is earned.

Section 6 adds a new paragraph to AS 14.60.010 defining the terms "major publications" and "major published research" which are used in AS 14.40.190, sec. 2 of the bill. The terms are defined as publications that are published by a person other than the author or the author's employee.

HB 260

Ron Fipps - Yes on formula funding

Bob Baldwin - ~~maybe~~ but three more comprehensive elements, so no.

used in this subsection means a portion of the University of Alaska designated as a "campus" by the Board of Regents. (§ 37-10-3 ACLA 1949; am § 3 ch 80 SLA 1973; am § 2 ch 13 SLA 1977)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 14.40.160. Board meetings public; meeting notice; public facilities. (a) The provision of AS 44.62.310 apply to meetings of the Board of Regents. All meetings of the board, its committees or subcommittees, are open to the public and press except as otherwise provided in AS 44.62.310(c). The findings of an executive session shall be made a part of the record of the proceedings of the Board of Regents. All records of the meetings and proceedings shall be open to inspection by the public and the press at reasonable times.

(b) The Board of Regents may determine the time and place of its meetings. However, 30 days notice is required for all regular meetings and 10 days notice is required for special meetings of the Board of Regents, its committees or subcommittees called under the bylaws or rules of procedure of the Board of Regents. Emergency meetings may be called without notice.

(c) The Board of Regents shall provide adequate facilities for members of the public to attend the meetings of the board, its committees or subcommittees. (§ 37-10-5 ACLA 1949; am § 1 ch 100 SLA 1972; am § 30 ch 59 SLA 1982)

Effect of amendments. — The 1982 amendment substituted "Board of Regents" for "board" three times in subsection (b).

Legislative history reports. — For report on ch. 100, SLA 1972 (CSHB 605 am), see 1972 House Journal, p. 643.

Sec. 14.40.170. Duties of Board of Regents. (a) The Board of Regents shall

(1) appoint the president of the university by a majority vote of the whole board, and the president may attend meetings of the board;

(2) fix the compensation of the president of the university, all heads of departments, professors, teachers, instructors and other officers;

(3) confer such appropriate degrees as it may determine and prescribe;

(4) have the care, control and management of all the real and personal property of the university;

(5) keep a correct and easily understood record of the minutes of every meeting and all acts done by it in pursuance of its duties;

(6) under procedures to be established by the commissioner of administration, and in accordance with existing procedures for other state agencies, have the care, control, and management of all money of the university and keep a complete record of all money received and disbursed.

ACTION NARRATIVE

TAPE 28
Recording
Number 0001

Co-Chair Fritz called the meeting to order at 1:05 p.m. Representatives M.W. Miller, Davis and Koponen were present. Representatives Tischer and Goll arrived at 1:12 p.m. Co-Chair Fritz announced the committee calendar and invited the sponsor of HB 219 to testify.

Number 0028

Rep. Lindauer, District 10, introduced a sponsor substitute for HB 219; stated that the bill makes only one change which allows the Governor to appoint Citizen Advisory Board members. Rep. Lindauer contended that local citizens have little input into higher education, and that HB 219 would give Advisory Board members greater stature.

Number 0122

Rep. Lindauer stated that HB 219 also mandates that the Board of Regents explain any decisions which disregard Advisory Board recommendations.

Number 0144

In response to questions from the committee, the sponsor argued that the Advisory Boards already exist; consequently, the only change under HB 219 would be that the Governor instead of the University would appoint the board members.

Number 0213

Rep. Miller questioned the make up of the proposed Fairbanks Citizens Advisory Board and the contradictory fiscal notes submitted by the University of Alaska and the Postsecondary Education Commission.

Number 0250

Discussion about terms of office for Advisory Board members.

Number 0278

Rep. Tischer suggested adding a sunset provision in order to facilitate regular review of the effectiveness of Citizen Advisory Boards. Rep. Lindauer agreed to the need for such a provision; said that SSHB 219 provides for such a review.

Number 0294

Rep. Goll questioned the discrepancies between the fiscal notes submitted by the Postsecondary Education Commission and the University. Rep. Lindauer contended that HB 219 would encure no costs, and argued that the University's fiscal note for $141,900 was mischievous.

Number 0351 — Rep. Lindauer stressed that the sole intent of HB 219 is to allow the Governor to appoint the board members in order to give more stature to local citizens.

Number 0370 — Rep. Koponen suggested that a fiscal note from the Department of Administration would be more accurate as it would be the department involved.

Number 0414 — Discussion about Local Citizen Advisory Board powers and the provision in HB 219 that would require the Board of Regents to wait 60 days before implementing a decision if the LCAB wished to make a recommendation regarding the decision.

Number 0450 — Rep. Davis expressed concern that the 60-day clause might unnecessarily delay Board of Regent decisions. Rep. Lindauer agreed and suggested shortening the 60-day provision in a committee substitute for HB 219.

Number 0466 — Rep. Tischer argued that shortening the 60-day provision might reduce the impact of advisory boards and thus erase the effectiveness of the bill.

Number 0510 — Rep. Lindauer also agreed with Rep. Tischer's concerns and suggested limiting the provision to a more reasonable amount of time, perhaps 7 - 14 days.

Number 0539 — Bob Baldwin, UAA Citizens Advisory Committee, stated that the committee would not support HB 219 as worded; expressed the committee's concern that HB 219 would place citizen advisory boards in a responsive, confrontative position with the Board of Regents instead their current originating position. Mr. Baldwin contended that the committee agreed with the intent to give more clout to LCAB's but argued that HB 219 was not the best means to accomplish that end.

Number 0610 — Mr. Baldwin suggested that the committee's position might change if the wording regarding responding to Board of Regents' decision were altered.

Number 0621 — Rep. Tischer questioned Mr. Baldwin about the meaning of "originating position". Discussion followed.

Number 0670

In response to questions from Rep. Goll, Mr. Baldwin stated the committee's concern that the Governor's appointments would become political thereby minimizing the input of ordinary citizens, and that HB 219 would decrease the number of members permitted on Local Citizen Advisory Boards.

Number 0701

Ed Isenson, UAA Citizens Advisory Committee, agreed with the intent of HB 219 to encourage strong local representative and participation. Mr. Isenson also commented on HB 260, stating that the bill included some constructive features to strengthen the University of Alaska. Mr. Isenson concluded that both bills would have positive effects for students and the community.

Number 0742

In response to questioning from Rep. Tischer, the witness agreed to the benefits of 20 member advisory boards but stated that the proposed decrease was not a primary consideration in regards to HB 219.

Number 0777

Dr. Jay Barton, President, University of Alaska, presented an overview of Board of Regent activities and duties; described recent measures to increase the authority of citizen advisory boards.

Number 0819

Dr. Barton argued that HB 219 would also establish attendance areas and lead to greater inefficiency.

Number 0860

Dr. Barton said the problem concerns how to get everyone involved and still get something done.

Number 0877

Dr. Barton also argued that HB 219 would violate the intent of the state constitution to allow the Board of Regents to govern the University of Alaska. Dr. Barton concluded that HB 219 was unnecessary, inappropriate, would lead to increased regionalism and decrease efficiency. and could in fact be unconstitutional.

Number 0920

Dr. Barton responded to Rep. Tischer's suggestion that the Board of Regents was not responsive to the advisory boards by citing the great amount of communication which exists and the impossibility of granting everybody's wishes.

Number 0957 — Dr. Barton stated that trying to make limited resources cover everybody's requests had led to conflicts, but that the Board of Regents has already accomplished more to alleviate those problems than HB 219 ever could.

Number 0980 — Rep. Goll commented that perhaps HB 219 resulted from recent negative press on University of Alaska academic standards and financial matters.

Number 0993 — Dr. Barton cited the recent shift of emphasis from access to efficiency with regards to higher education in Alaska, and responded that the University received a clean bill of health in the past 3 audits.

Number 1040 — Dr. Barton agreed to the need for quality control in regards to academic standards. Dr. Barton further explained that some U of A programs are very strong and competitive with lower '48 programs, while other areas are not as stable as of yet.

Number 1060 — Stan Howitt, UAA Citizens Advisory Committee, stated that HB 219 is unnecessary because the Board of Regents already responds well to the Citizens Advisory Board. Mr. Howitt asserted that the fight now is with the Legislature. Mr. Howitt spoke against dividing the advisory boards into 3 geographical areas and said that appointment by the Governor seemed bureaucratic.

Number 1134 — Rep. Davis requested information on the duties, functioning, and number of LCAB's.

Number 1148 — Co-Chair Fritz announced that he would entertain a motion to move HB 219 out of committee.

Number 1150 — Rep. Davis suggested holding HB 219 until the receipt of the requested information from Dr. Barton.

Number 1166 — Rep. Tischer requested clarification from Rep. Davis about his recommendation.

Number 1170 — Rep. Davis moved to table HB 219 until receipt of further information from Dr. Barton.

Number 1190	Co-Chair Fritz called for a vote on the previous question. The motion passed by a vote of 4 to 2.
Number 1193	Co-Chair Fritz presented HB 260 for committee consideration.
Number 1199	Ron Phipps, Director of Academic Planning and Research, Postsecondary Education Commission, focused his comments on Page 1, Lines 11 - 15 of HB 260; stated that the committee approved of the proposed funding formula and therefore endorsed that section of HB 260.
Number 1215	Rep. Tischer requested a description of the formula and proof of its effectiveness. Mr. Phipps explained 3 allocations for faculty, support and travel are added together to arrive at the total sum for each community college. Mr. Phipps stated that the formula was compared to actual costs over a 3-year period and reviewed by an outside consultant who is a national expert and knowledgeable about Alaska.
Number 1248	Bob Baldwin, UAA Citizens Advisory Committee, called HB 260 a reorganization plan and argued that reorganization should be done only through a comprehensive process, not piecemeal legislation. Mr. Baldwin also suggested soliciting greater public input.
Number 1287	Co-Chair Fritz adjourned the meeting at 2:58 p.m.

te President Jay Kerttula, D-Palmer, and Sen. au, said the department's cost figure is irrele-

ation, payments would be made from 12.5 per- Fund earnings — specifically 25 percent of the for dividends.

calculated at $42 million in fiscal 1984, were not e demands of the bonus program, the size of in- ments would decrease.

f the administration estimate as to the number of qualified applicants holds true, bonus payments would fall by about 20 percent in fiscal 1984.

However, he and the committee doubt the accuracy of the figure on grounds it was derived from the number of seniors who qualified for 1982 Permanent Fund dividends.

The retroactive payments are among the demands of 67-year-old Rodney Vest of Anchorage, who filed suit on grounds the residency requirement was discriminatory.

Last summer, the Legislative Council, advised by the attorney general's office that the state would lose the suit, agreed to address the issue, including the question of retroactive payments, this session.

However, at the suggestion of Sen. Joe Josephson, D-Anchorage, the finance panel decided the state has legal grounds to refuse to make retroactive payments.

Teacher training plan criticized

ANCHORAGE (AP) — The former director of a Nome-based Eskimo teacher training program says in the past 18 months, nearly $600,000 has been spent on five students.

And Jim Greig, a philosophy professor who has taught in universities around the world, claims he was fired for complaining publicly about how much money is being spent on the Eskimo Teacher Education Program (ETEP).

But Native and education officials involved in ETEP say Greig was not on the job long enough to make an accurate assessment, and that he didn't comprehend its special needs and goals.

"What Jim does not understand is the need for Eskimo teachers and the cost of education in rural Alaska," says Caleb Pungowiyi, president of Kawarek Inc., a non-profit Native corporation.

"There is no doubt that the program is expensive," Pungowiyi agrees, but he says the payoff will be in 10 years rather than within the next two years.

Mike Metty, president of Northwest Community College which coordinates ETEP with a cross-cultural education program based at the University of Alaska-Fairbanks, says the goal is to develop a pool of young people who could one day become certified teachers.

"There was no premise that the program was going to produce 40 teachers in four years," Metty says. "We hope to get 30 or 40 teachers over a decade."

Greig, who was hired in January, says although 27 people are registered this semester, the majority are students "in name only." He says they do not attend classes or complete assignments regularly and collectively have earned only 16 credit hours this semester.

Metty acknolwedges that enrollment fluctuates.

"Right now, we know we're going to lose students on St. Lawrence Island because whaling has started," he says. Education in rural Alaska is unlike education anywhere else because of the demanding way of life, Metty says.

But Greig estimates the cost of one teaching degree earned through ETEP will be $800,000.

"Everybody realizes it isn't working and they don't know what to do," he says.

But when he voiced his concerns to Pungowiyi and the Kawerak board of directors in April, he soon found himself out of job.

"Obviously, I am being fired for telling the truth," Greig says. He maintains facts about the success rate of the program have been hidden deliberately so ETEP will be allowed to continue.

"There are a few people out there who understand how the system works, and are milking it for all it's worth," Greig says. "Eight-hundred-thousand- dollar degrees are not in the best interests of the students — their interests lie in the efficient use of the $598,000 poured into ETEP each year."

Greig contends the money would be much better spent giving Eskimo students university scholarships, but Pungowiyi says Eskimos who enroll in urban colleges have a high dropout rate.

MEMORANDUM

TO: House Health, Education and Social Services

FROM: Representative John Lindauer John L.

RE: House Bill #260: "An Act relating to the administration of the University of Alaska."

The intent of HB 260 is to provide for the more efficient use of state monies.

Section one of HB 260 insures the Board of Regents will give consideration to students and regional cost-of-living differences by requiring the Regents to devise and use formula funding in the requesting and allocating of general funds. The formula would include the number of full-time equivalent students (FTE students) and the regional cost-of-living differentials used by the state for other state employees.

Section two adds two additional items that the university must annually report to the legislature. The two additional items to be reported are:

1) The number of credit hours generated and the number of FTE students produced by each administrative unit of the University.

2) A listing of the teachers, faculty members, and holders of academic rank.

Section three requires that the Regents disclose the true cost of operating each administrative unit. It requires the costs associated with the sharing of services between administrative units be assigned to those units.

Section four specifies the salaries and tenure status of teachers and professors. Salary levels would be nomore than 45% above nationally reported salary averages. This section would also insure that tenure as a teacher or professor would only be granted and maintained by those employees who actually teach or profess.

Sherman Carter

Representative Mae Tischer, Co-chairman
Health, Education & Social Services Committee
Pouch V
Juneau, AK 99811

Dear Representatives Fritz and Tischer:

President Jay Barton, who is now off campus on university business, asked me to send this letter to you with the attached fiscal notes and related papers.

I understand that your committee is scheduled to have hearings on House Bills 219 and 260 on 11 April. The university recommends against enactment of those two bills for reasons explained in the attachments.

I am also including information on House Bills 95 and 96 which were referred to your committee. That legislation, too, would have a significant adverse impact on the university as explained in papers below. Copies of the four house bills are attached for convenient reference.

Your interest in and support of the University of Alaska are appreciated.

Sincerely,

Sherman Carter

Copy to Sponsor
Copy to Requestor (if different from Sponsor)

3/8/83

March 31, 1983

HB260
ANALYSIS

DIRECT COSTS

There are no direct costs associated with House Bill 260.

INDIRECT COSTS

A. While no direct costs are associated with the implementation of the proposed legislation, since all the additional requirements will involve the participation of many university employees to accomplish, there are some indirect costs. For example, the additional effort required to report a variety of statistics about the university's faculty may require the addition of some personnel and/or recordkeeping ability at smaller units of the university.

B. Section 3 of House Bill 260 requires that separate budgets be developed by each administrative unit. At present this function is centrally controlled by the university Statewide Services & Programs administrative unit. Depending upon how reimbursement is handled, the requirements of Section 3 may lead to duplication in the budget development process which would probably generate additional costs to the state.

Attachment to accompany fiscal note on HB 260 prepared by University of Alaska, 3/31/83

AGENCY COMMENTS

Article 7, Section 3 of the constitution of the state of Alaska specifies that the University of Alaska shall be governed by a Board of Regents. Title 14, Chapter 40, Section 170 of the Alaska Statutes assigns certain duties to the Board of Regents. The University believes that the Board of Regents has the authority to govern the University; the present proposed legislation in House Bill 260 would infringe on that responsibility. For example, AS.14.40.170(2) specifically states that the Board of Regents should "fix the compensation of the President of the University, all heads of departments, professors, teachers, instructors, and other officers." Section 4 of HB260 in effect sets the maximum salary that could be offered a faculty member and sets the criteria upon which pay increases are determined. This provision infringes on the rights of the regents to govern the University, as do all sections of the proposed legislation.

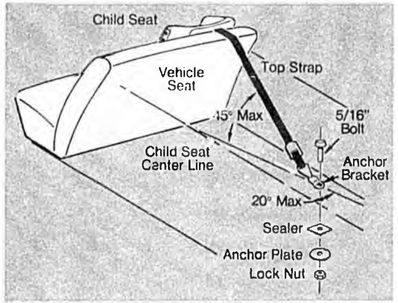
Further, the restrictions and artificial limitations to be imposed on individual faculty salaries, while perhaps being generous for most, may have a deleterious effect on the University and the state in a few cases by preventing the employment of outstanding national scholars and leaders in certain fields of research important to Alaska. The provisions relating to tenure in HB260 essentially destroys the land grant concept of higher education at the University of Alaska by discouraging the employment and retention of research and extension faculty. Tenure is a guarantee against capricious dismissal because of the statement of an alternate and sometimes unpopular view. The University is the one place where a diversity of views and opinions need to be aired and discussed, and solutions appropriate to a particular problem found. The attachment of tenure to classroom instruction only does violence to the concept of academic freedom in a modern land grant university.

HB

262

FOR VANS, HATCHBACKS, STATION WAGONS AND UTILITY TRUCKS

Select a suitable anchor bracket mounting location on the floor of the vehicle. The location must be:



A. On a flat metal surface which is a welded-in integral part of the vehicle body. DO NOT attach anchor bracket assembly to folding seat back panels or movable load floors, filler panels, spare tire covers, or any screw-on panels.

B. In a position clear of fuel tank, fuel lines, brake lines, exhaust systems, etc.

C. In a position where the angle between the Child Seat top strap and the load floor does not exceed 45° (horizontal angle).

D. As close to the centerline of the Child Seat as possible, but in no case must the angle between the Child Seat centerline and top strap exceed 20° (side to side angle).

NOTE: If conditions A, B, C, or D cannot be met, do not use the Child Seat in that seating position. Move the Child Seat to another seating position which satisfies conditions A, B, C, or D.

Drill a 5/16" diameter hole through the floor at the selected location.

Assemble and securely tighten the bolt, anchor bracket, anchor plate, (2-½" O.D. washer) and the lock nut to the floor using a suitable sealer around the hole. If the hole has been drilled through the floor to the outside of the vehicle, make certain that the hole is properly sealed to prevent exhaust fumes from entering the vehicle.

Child Restraint Systems For Your Automobile

ALASKA CHILD PASSENGER SAFETY ASSOCIATION
P.O. Box 10-245
Anchorage, Alaska 99510

Why are child restraints needed?
What kind of restraint systems are available?
How do I select the best restraint for my child?
What is the proper way to use child restraints?
Where can they be purchased?

This booklet answers these questions. The rest is up to parents—to select and obtain the proper restraint, and then to USE IT PROPERLY according to directions.

Why Child Restraints Are Needed

After the critical early weeks of life for the newborn baby, automobile crashes are the leading cause of death for American children. In 1978 alone, 669 children under the age of 5 were killed while riding in cars. Tens of thousands more were seriously injured. The tragedy is that most of those deaths and injuries could have been avoided if parents had taken the time to buckle their children into a proper child restraint system.

To understand why restraints are so important, one must first understand what happens in a crash, or in a sudden panic stop. When a car hits another object and stops suddenly, or when a sudden hard braking action brings it to a fast stop, all occupants in the car continue to move forward at the same speed the car was travelling, until something stops them. Too frequently, that "something" is the steering column, the dash board, the windshield, or some other part of the interior of the car. It is this second collision that causes injuries and death.

In the case of small children, if they are not restrained they literally become flying missiles. It happens so fast, and with such force—even in low speed crashes—that neither the parent nor the child can prevent the child from a violent impact with other passengers or with some hard surface within the car.

The solution to the problem of the second collision is a restraint system. For adults, that means a safety belt, which holds you safely in your seat, away from the car interior. The belt's webbing and the sturdy adult pelvis and rib cage absorb the forces of the collision. But for young children under 5, child restraints are the best solution.

Children need to have the crash forces spread more evenly over their fragile bodies, and that's what child restraints do. They are fastened to the car by the safety belt already in your car, and in a crash they protect children from colliding with the car's interior.

Of course, if no child restraint is available, it is much better to buckle children into regular safety belts than to let them ride free, loose, and unprotected.

Some parents think they can protect infants and young children from being injured by holding them in their laps. They cannot. In a 30 mph crash, for example, a child may be thrown forward with a force equal to 30 times its own weight. If you are wearing a safety belt, the child can be torn from your arms and hurled into the dash or the windshield. If you're not wearing a safety belt, both you and your child will fly forward, with the probability that your child may be crushed between you and the dash. HOLDING YOUR CHILD IN YOUR LAP IS NOT SAFE.

Unfortunately, our studies show that most parents do not provide their children with the protection restraints can offer. A recent survey found that only 5 percent of young children were using child restraints.

Whether adults do or do not use safety belts available in cars is a conscious choice. Small children cannot decide for themselves to buckle up. They depend on their parents to protect them from harm, and make that decision for them.

Fortunately, effective child restraint systems that have been crash tested and meet government standards are available. The remainder of this brochure describes the kinds of restraints that are available and how they should be used.

Some Rules To Remember

1. Children under 5, or weighing less than 40 pounds, should ride in a child restraint.
2. The safest place in the car for a child is in the back seat.
3. If no child restraint is available, children should use the car safety belt. This is much safer than riding unrestrained.
4. Adults should not hold children on their lap while riding in either the front or back seat. They may cause more injuries by crushing their children against the dash with their own body, or the child may be torn from their arms and thrown against the hard interior of the car. If in the back seat, the child may be torn from their arms and thrown into the front area of the car, possibly against the hard interior or into another passenger.
5. Children should not ride in the luggage compartment of a station wagon or hatchback.
6. Hatchbacks should always be kept closed when children are riding in the back seat. If they are left open, the children could be ejected from the car in an accident. Open hatchbacks or tail gate windows also increase the levels of carbon monoxide inside the car from exhaust fumes.

Fringe Benefits

Some days, it seems like there's nothing harder than driving with small kids in the car. Between trying to keep them contented and trying to keep them still, it's almost impossible to keep your mind on the road. That's where child restraints are really helpful. They act just like a good babysitter, keeping your children entertained and under control.

Child restraints can make the ride more fun for children. They're comfortable to ride in, and many of them are designed so they give kids the extra boost they need to see out the windows and feel more a part of what's going on. They are also a very nice place to sleep.

All in all, child restraints are a pretty good deal for everyone. They let you concentrate on driving, while keeping the kids happy and protected.

Types of Restraints Available And How To Use Them

FOR THE INFANT . . . FROM BIRTH TO ABOUT 9-12 MONTHS OF AGE

Infant carriers or convertible child safety seats are the only types of child restraints recommended for use by babies. In these restraint systems, the baby faces backwards, in a semi-reclining position. In an accident, the baby's sturdy back absorbs the crash forces rather than its delicate chest and abdomen. The carrier is lined with soft padding, has an internal safety harness to keep the baby in the restraint, and is anchored to the car by the vehicle's safety belt.

The time to start using the infant carrier is on the baby's very first ride home from the hospital. Parents should anticipate the need for an infant carrier before the baby is born, and buy one early as an essential part of the layette. For newborn babies, a rolled-up receiving blanket placed around the head and shoulders will give their head additional support.

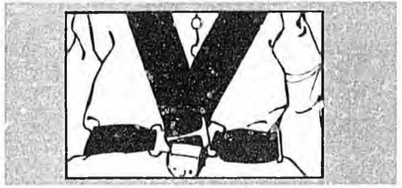
Babies should ride in the infant carrier until they can sit up by themselves without support. This usually occurs between 9 and 12 months, or when they weigh about 20 pounds.

There are basically two kinds of infant carriers. The first is designed for infants only. Babies outgrow this kind of seat and must move up to a child safety seat. The second is a convertible carrier. When babies get too big for the infant position, the convertible carriers can be changed into child safety seats which toddlers can continue to use until they're old enough to

wear regular safety belts. More about convertible carriers later.

WARNING: Do not use flimsy, light weight, plastic feeder seats and car beds that are designed only for household use, and not for transporting an infant in an automobile.

FOR THE TODDLER . . . 1-4 YEARS OLD

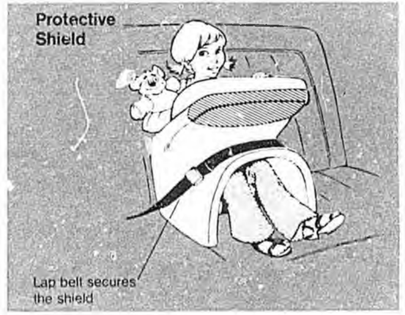


Three types of restraint systems are recommended. They include the child safety seat, the protective shield, and the safety harness.

Child Safety Seat

This restraint system is designed for children who can sit up without support. It faces forward and is anchored by the vehicle's lap belt, which is either fastened around the front of the seat, or threaded through the back of the frame.

It has a safety harness with two shoulder straps, a lap belt, and a crotch strap. This five-point harness spreads the crash forces over the child's shoulders and hips. The crotch strap keeps the hip straps from riding up into the child's delicate abdomen.

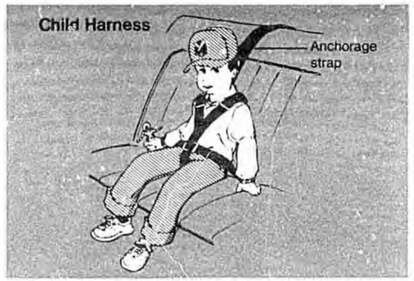


Some child safety seats also have a "top tether strap" that ties the top of the restraint to the structure of the car. A top tether strap is usually required on child safety seats which have been raised several inches so that the children riding in them can see out the windows. When included, the top tether provides additional crash protection, particularly in side collisions. (See the section on anchoring the top tether strap for detailed instructions on fastening the tether strap.)

Protective Shield

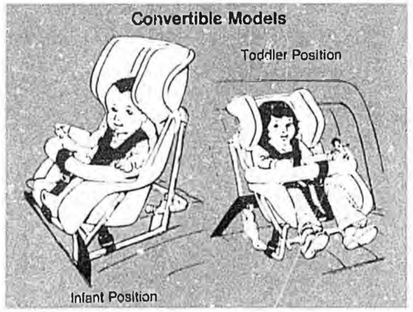
This type of child restraint fits over the front of the child's lap and chest, and is designed to catch and cushion the child in a crash.

It is a C-shaped shell with energy-absorbing padding on the upper part of the shield. The shield is anchored to the car by the lap belt which fastens around the front of the shield. In an accident, the shield spreads the crash forces evenly over the child's head and upper body.



The shield restraint has several advantages over other types of child restraints. It doesn't use a harness, and it doesn't use a top tether strap.

However, the shield generally doesn't provide as much protection in side collisions, and, therefore, should be used in the center seating positions. The shield is also easier to get into and out of, so it may require greater attention to make sure your child stays in the restraint when you're driving.



Child Harness System

This restraint consists of a 5-point safety harness with a top tether anchorage strap. It is designed for children who can sit up without support. It faces forward, and is anchored to the car by the vehicle's lap belt and a top tether strap. The vehicle lap belt threads through a loop of the harness behind the child. The safety harness does not provide side impact protection, and should, whenever possible, be used in the center of the rear seat.

The Convertible Seats

Some infant carriers are simply converted safety seats. Changing them from infant carrier to child seat is a fairly simple operation. You move the safety harness from the lower shoulder strap slots to the upper slots; you adjust the tubular frame from the reclining position to the upright position; you turn the seat around so that the child is facing front, and you re-buckle the car safety belt through the seat frame according to the manufacturer's instructions.

Some Reminders

- Be sure to read, follow, and keep the manufacturer's instructions.
- Be sure to attach the child restraint properly to the car with the vehicle's lap belt. On some child safety seats, the lap belt goes through the metal frame of the seat; while in others, it goes around the top of the seat and over the child's lap.
- Be sure to attach the top tether strap, if one is included, for full protection. In order to be effective, the tether strap must be attached securely to either the rear seat belt, the rear shelf, or some other metal anchor point. (See the section on anchoring the tether strap).
- Be sure to properly secure your child in the restraint. Buckle all five parts of the harness together and be sure the harness is not too loose.

Restraint Systems For The Older Child

Regular Vehicle Lap Belts

Children over the age of 4 or 5 and weighing about 40 pounds can be restrained by use of the vehicle lap belt, with the child sitting up-right against the back of the seat. The lap belt should be adjusted snugly so that it will not ride up across the child's abdomen. Again, the safest position is in the rear seat, with the center seating position being safer than the side positions.

Three-Point Restraint System

Depending on the weight and height of the child, the three-point adult belt system may be used. Such use, however, requires a proper fit of the shoulder portion of the belt. That is, it must be positioned firmly across the chest and shoulder and not cutting across the neck, face, or head.

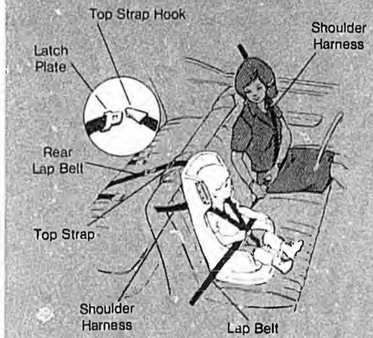
If the three-point belt system must be used and a proper fit of the shoulder belt is not possible, the shoulder belt should be tucked in behind the child, never under the arm or across the chest.

How To Select The Best Restraint For Your Child

A federal law, Federal Motor Vehicle Safety Standard No. 213-80, requires child restraint systems to meet certain strength and performance standards. Not included under the standard are those flimsy, light weight, plastic child feeder seats used in the home, *which are not intended for car use.*

All auto child restraints manufactured after Jan. 1981 must pass tests which show that they can provide adequate protection for children in actual crashes. Look for a label on the restraint which says "dynamically tested."

There are many different places where you can buy child restraints. They include:



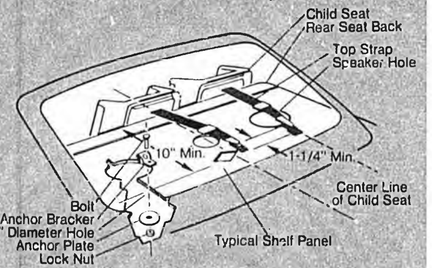
- Retail outlets, including department stores
- Discount centers
- Juvenile furniture and baby needs stores
- Some car dealers
- Some hospital gift shops
- Catalog sales available from large retailers
- Automotive retail and supply dealers

Before you buy a new restraint, try it out in your car. Some restraints don't fit into some cars. There are enough restraints on the market, though, that you should be able to find one that's just right for your car, your child, and your budget.

Some communities have rental or recycling programs where you can rent an infant or child safety seat for a short period of time, instead of buying one. In other programs, your outgrown child restraint can be recycled and rented for another young child to use. Contact your local highway safety or health department to determine is such a program exists in your area.

Anchoring The Top Tether Strap

While the following instructions may be appropriate for many cars, the automobile manufacturer should be able to tell you the best place to anchor a tether strap in your car. We recommend that you contact the manufacturer for this information. You can get the address from your local automobile dealer.



USAGE INSTRUCTIONS
FOR FRONT SEAT INSTALLATIONS

Latch the top strap hook onto the rear seat lap belt latch plate located most directly behind the child seat and SECURELY TIGHTEN THE TOP STRAP. If there is no lap belt latch plate within 10" of being directly behind the child seat, do not use the child seat in that position.

USAGE INSTRUCTIONS
FOR REAR SEAT INSTALLATIONS

Select a suitable anchor bracket mounting location on the filler panel. The location must be:

A. In solid metal at least 1-¼" away from any large holes in the metal portion of the filler panel. (speaker holes, defogger holes, etc.)
B. Far enough behind the child seat to allow the top strap to be securely tightened. (Approximately ten (10) inches or more behind the child seat back.)
C. As close to the centerline of the Child Seat as possible, but in no case more than two inches to the outside or six inches to the inside of the Child Seat centerline. If this condition can not be met, then do not use the Child Seat in that position.

From inside your car's trunk, drill a 5/16" diameter hole up through the metal filler and trim panel at the selected mounting location. Care must be taken not to hit the rear window with the tip of the drill as this could cause the rear window to shatter.

Assemble and securely tighten the bolt, anchor bracket, anchor plate (2-½" O.D. washer) and the lock nut to the metal filler panel and trim as shown.

Alaska Statutes

Title 28. Motor Vehicles.

NOTES TO DECISIONS

Stated in Buckalew v. Holloway, Sup. Ct. Op. No. 1988 (File No. 4058), 604 P.2d 240 (1979).

Chapter 01. Scope and Interpretation of Title.

Sec. 28.01.010. Provisions uniform throughout state.

NOTES TO DECISIONS

Similarity to Uniform Vehicle Code. — Subsection (a) is similar in substance and purpose to the provisions of § 15-101 of the Uniform Vehicle Code Annotated adopted by the National Committee on Uniform Traffic Laws and Ordinances in 1962. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Under the express terms of subsection (a) it is clear that inconsistency is the standard that governs the validity of a local ordinance regulating the operation of a motor vehicle. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Nature of inconsistency. — When the question of inconsistency between a local ordinance and state law under subsection (a) is raised, the issue is not whether there is a mere discrepancy between the state law and local ordinance; rather, the inquiry must focus on whether any discrepancy in the ordinance impedes or frustrates policy expressed by state law. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

The saving provisions of subsection (b) by their express terms, require a twofold showing to be made before an ordinance inconsistent under subsection (a) can be upheld. First, it is incumbent upon the municipality to demonstrate the existence of a "specific local requirement." Second, the municipality must show that its ordinance was "necessary," in other words, that the specific local problem could not be addressed in a manner consistent with the provisions of this title. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Posting of state-wide speed limits not required. — Although subsection (d) of this section states that a municipality shall erect signs, the effectiveness of the 30 mile per hour limit set by the state in the Alaska Administrative Code is not conditioned upon the posting of signs. Bailey v. Lenord, Sup. Ct. Op. No. 2308 (File No. 4696), 625 P.2d 849 (1981).

Ordinance held inconsistent. — See Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Jury instructions. — Although a city ordinance set the speed limit on the streets

in question at 20 miles per hour, the trial court did not err in instructing the jury that the applicable speed limit was the state-wide limit of 30 miles per hour since the city did not post speed limit signs as required by the Alaska Administrative Code. Bailey v. Lenord, Sup. Ct. Op. No. 2308 (File No. 4696), 625 P.2d 849 (1981).

Cited in Anderson v. Municipality of Anchorage, Ct. App. Op. No. 89 (File No. 5318), 645 P.2d 205 (1982).

Chapter 05. Administration.

Article 1. Powers and Duties of Department of Public Safety.

Section

11. Duty of commissioner to adopt regulations

Sec. 28.05.011. Duty of commissioner to adopt regulations. The commissioner shall, unless otherwise provided by statute, adopt regulations in compliance with the Administrative Procedure Act (AS 44.62) necessary to carry out the provisions of this title and other statutes the administration of which is vested in the department. The regulations shall include, but not be limited to:

(1) rules of the road relating to the driving, stopping, standing, parking and other conduct of vehicles, to pedestrians and to official traffic control devices;

(2) minimum equipment for vehicles, including, but not limited to, minimum standards of compliance to be met by manufacturers and vehicle sales and repairs businesses;

(3) inspection of vehicles, and the removal of vehicles from areas of public use when they are found to be in a defective or unsafe condition;

(4) registration, titling, transfer and abandonment of vehicles;

(5) licensing of drivers of vehicles;

(6) financial responsibility relating to vehicles;

(7) management of records of the department required for the administration of this title and regulations adopted under this title, including provisions for insuring the accuracy of information contained in automated and manual information retrieval systems;

(8) Repealed by § 3 ch 77 SLA 1982, effective July 1, 1982;

(9) definitions of words and phrases used in this title and in regulations adopted under this title unless otherwise provided by statute;

(10) registration of motor vehicle, trailer, and semi-trailer dealers; and

(11) certification and regulation of junk yards. (§ 6 ch 178 SLA 1978; am § 3 ch 77 SLA 1982)

Effect of amendments. — The 1982 amendment, effective July 1, 1982, repealed paragraph (8) as set out in the main pamphlet. For present provisions covering the subject matter of the repealed paragraph, see AS 44.33.020 (25).

3/8/83

House Bill No. 262

"An act relating to the use of child safety devices in motor vehicles; providing for a child safety device loan program; and providing for an effective date."

BACKGROUND INFORMATION:

More Alaskan children are killed or injured in car accidents than any other single disease or type of accident. The Alaskan accidental mortality rate for children ages 1-4 years is 105% higher than the rest of United States; and 40% of these deaths are due to car accidents. National statistics have shown that the majority of deaths and injuries to children resulting from car accidents could be prevented if parents would "buckle up" their children.

POSITION:

Because children can't protect themselves, the Department fully supports mandatory child restraint laws. The Department believes that this bill is enhanced by its support for community education programs and car seat loaner programs.

Since the focus of this law is to encourage utilization of approved child restaints, the Department recommends that there be a designated minimum fine; and that the fine be sufficiently high enough to encourage violaters to purchase a car seat rather than pay the fine.

Tennessee

Compiler's Notes. For table of U.S. decennial population of Tennessee counties, see the supplement to volume 16 (tables).

Amendments. The 1982 amendment added subsection (c).

Effective Dates. Acts 1982 (Adj.S.), ch. 850, § 4. April 22, 1982.

Section to Section References. This section is referred to in § 55-9-402.

55-9-214. Safety belts and child passenger restraint systems required — Violations — Penalties. — (a) It shall be unlawful for any person to buy, sell, lease, trade or transfer from or to Tennessee residents, at retail, an automobile which is manufactured or assembled commencing with the 1964 models, unless such automobile is equipped with safety belts installed for use in the left front and right front seats thereof. All such safety belts shall be of such type and be installed in a manner approved by the department of safety of the state of Tennessee. The department shall establish specifications and requirements of approved types of safety belts and attachments. The department will accept, as approved, all seat belt installations and the belt and anchor meeting the specifications of the Society of Automotive Engineers. Provided that in no event shall failure to wear seat belts be considered as contributory negligence, nor shall such failure to wear said seat belt be considered in mitigation of damages on the trial of any civil action.

(b) Effective January 1, 1978, every parent or legal guardian of a child under the age of four (4) years residing in this state shall be responsible, when transporting his child in a motor vehicle owned by that parent or guardian operated on the roadways, streets or highways of this state, for providing for the protection of his child and properly using a child passenger restraint system meeting federal motor vehicle safety standards; provided, however, nothing in this section shall restrict a mother from removing the child from such system and holding the child when the mother is nursing the child, or attending to its other physiological needs. Provided that the term "motor vehicle" as used in this paragraph shall not apply to recreational vehicles of the truck or van type. Provided further that the term "motor vehicle" as used in this paragraph shall not apply to trucks having a tonnage rating of one (1) ton or more. Provided that in no event shall failure to wear a child passenger restraint system be considered as contributory negligence, nor shall such failure to wear said child passenger restraint system be admissible as evidence in the trial of any civil action.

(c) Violation of any provision of this section is hereby declared a misdemeanor and anyone convicted of any such violation shall be fined not less than twenty-five dollars ($25.00) nor more than fifty dollars ($50.00) for each violation of subsection (a) of this section and not less than two dollars ($2.00) nor more than ten dollars ($10.00) for each violation of subsection (b) of this section. Provided, however, that no court costs shall be imposed or assessed against anyone convicted of a violation of this section. [Acts 1963, ch. 102, §§ 1, 2; 1977, ch. 114, §§ 1, 2; T.C.A., § 59-930; Acts 1981, ch. 86, §§ 1, 2.]

Amendments. The 1981 amendment deleted the words "or assuring that such child is held in the arms of an older person riding as a passenger in the motor vehicle" at the end of the first sentence of subsection (b), added at the end of the first sentence of subsection (b) the proviso beginning "provided, however," and ending with "other physiological needs", and added the second sentence of subsection (c).

Alaska Statutes

Title 28. Motor Vehicles.

NOTES TO DECISIONS

Stated in Buckalew v. Holloway, Sup. Ct. Op. No. 1988 (File No. 4058), 604 P.2d 240 (1979).

Chapter 01. Scope and Interpretation of Title.

Sec. 28.01.010. Provisions uniform throughout state.

NOTES TO DECISIONS

Similarity to Uniform Vehicle Code. — Subsection (a) is similar in substance and purpose to the provisions of § 15-101 of the Uniform Vehicle Code Annotated adopted by the National Committee on Uniform Traffic Laws and Ordinances in 1962. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Under the express terms of subsection (a) it is clear that inconsistency is the standard that governs the validity of a local ordinance regulating the operation of a motor vehicle. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Nature of inconsistency. — When the question of inconsistency between a local ordinance and state law under subsection (a) is raised, the issue is not whether there is a mere discrepancy between the state law and local ordinance; rather, the inquiry must focus on whether any discrepancy in the ordinance impedes or frustrates policy expressed by state law. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

The saving provisions of subsection (b) by their express terms, require a twofold showing to be made before an ordinance inconsistent under subsection (a) can be upheld. First, it is incumbent upon the municipality to demonstrate the existence of a "specific local requirement." Second, the municipality must show that its ordinance was "necessary," in other words, that the specific local problem could not be addressed in a manner consistent with the provisions of this title. Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Posting of state-wide speed limits not required. — Although subsection (d) of this section states that a municipality shall erect signs, the effectiveness of the 30 mile per hour limit set by the state in the Alaska Administrative Code is not conditioned upon the posting of signs. Bailey v. Lenord, Sup. Ct. Op. No. 2308 (File No. 4696), 625 P.2d 849 (1981).

Ordinance held inconsistent. — See Simpson v. Municipality of Anchorage, Ct. App. Op. No. 57 (File Nos. 4945, 4946, 5288), 635 P.2d 1197 (1981).

Jury instructions. — Although a city ordinance set the speed limit on the streets

in question at 20 miles per hour, the trial court did not err in instructing the jury that the applicable speed limit was the state-wide limit of 30 miles per hour since the city did not post speed limit signs as required by the Alaska Administrative Code. Bailey v. Leonard, Sup. Ct. Op. No. 2308 (File No. 4696), 625 P.2d 849 (1981).

Cited in Anderson v. Municipality of Anchorage, Ct. App. Op. No. 89 (File No. 5318), 645 P.2d 205 (1982).

Chapter 05. Administration.

Article 1. Powers and Duties of Department of Public Safety.

Section

11. Duty of commissioner to adopt regulations

Sec. 28.05.011. Duty of commissioner to adopt regulations. The commissioner shall, unless otherwise provided by statute, adopt regulations in compliance with the Administrative Procedure Act (AS 44.62) necessary to carry out the provisions of this title and other statutes the administration of which is vested in the department. The regulations shall include, but not be limited to:

(1) rules of the road relating to the driving, stopping, standing, parking and other conduct of vehicles, to pedestrians and to official traffic control devices;

(2) minimum equipment for vehicles, including, but not limited to, minimum standards of compliance to be met by manufacturers and vehicle sales and repairs businesses;

(3) inspection of vehicles, and the removal of vehicles from areas of public use when they are found to be in a defective or unsafe condition;

(4) registration, titling, transfer and abandonment of vehicles;

(5) licensing of drivers of vehicles;

(6) financial responsibility relating to vehicles;

(7) management of records of the department required for the administration of this title and regulations adopted under this title, including provisions for insuring the accuracy of information contained in automated and manual information retrieval systems;

(8) Repealed by § 3 ch 77 SLA 1982, effective July 1, 1982;

(9) definitions of words and phrases used in this title and in regulations adopted under this title unless otherwise provided by statute;

(10) registration of motor vehicle, trailer, and semi-trailer dealers; and

(11) certification and regulation of junk yards. (§ 6 ch 178 SLA 1978; am § 3 ch 77 SLA 1982)

Effect of amendments. — The 1982 amendment, effective July 1, 1982, repealed paragraph (8) as set out in the main pamphlet. For present provisions covering the subject matter of the repealed paragraph, see AS 44.33.020 (25).

M E M O R A N D U M

TO: House H.E.S.S. Committee

FROM: Linda Otey, Committee Aide

SUBJ: HB 262 "An act relating to child safety devices for motor vehicles: providing a child safety device loan program and providing for an effective date."

DATE: April 28, 1983

This legislation is similar to CSSB 163 currently in Senate Judiciary. CSSB 163 contains provisions for exemptions of commercial vehicles as well as a 30 day time frame for dismissal of the infraction upon proof of purchase or acquisition of an approved safety device or seatbelt. (CSSB 163 attached)

SECTION 1

28.05.095 Child Safety Devices (New section) HB 262 would require the use of child safety devices in motor vehicles in Alaska and would establish a loan program to make the devices available to the public through hospitals and birthing centers.

A person who is convicted of driving without having his child properly secured in a child safety device or seatbelt (depending on age) would be guilty of an infraction. If a person issued proof of having purchased a device within ten days, the court would dismiss the citation.

28.05.096 Child Safety Device Loan Program Established in the Department of Public Safety, Highway Safety Planning Agency directs the head of that agency to:

1. Provide to all hospitals and birthing centers the devices (subject to availability of funds) to be loaned at nominal fees;

2. Advertise the program to the public to educate about risks of injury or death when children are unrestrained; and

3. Police officers would be required to explain and advise (when stopping a driver) of the loan program.

28.05.097 Sale of Child Safety Devices Prohibits sale or installation of devices not in conformity with all federal standards.

SECTION 2

Effective one year after enactment.

HOUSE BILL NO. 262

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to child safety devices for motor vehicles; providing for a child safety device loan program; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.05 is amended by adding new sections to read:

Sec. 28.05.095. CHILD SAFETY DEVICES. (a) A driver may not transport a child in a motor vehicle [other than an emergency vehicle or a bus] unless the driver has provided and properly secured each child

Revisor

(1) less than four years of age in a child safety device approved for infants by the United States Department of Transportation;

(2) between four and six years of age in a child safety device approved for a child of that age and size by the United States Department of Transportation, or in a seatbelt, as is appropriate for the particular child.

Delete

(b) A person convicted of a violation of (a) of this section is guilty of an infraction.

(c) If a person who violates (a) of this section by failing to provide a child safety device or seatbelt files with the court, within 10 days after the issuance of a citation, proof of purchase or acquisition of an approved child safety device or seatbelt, the court shall dismiss the citation.

(d) Evidence of the conviction of a person for a violation of

(a) of this section or evidence of the failure to use a child safety device or seatbelt as required by (a) of this section may be admitted in a civil action as evidence of negligence.

Sec. 28.05.096. CHILD SAFETY DEVICE LOAN PROGRAM. (a) There is established a child safety device loan program in the Department of Public Safety, highway safety planning agency.

(b) The director of the highway safety planning agency shall

(1) provide to every hospital and birthing center in the state, subject to the availability of funds, child safety devices to be loaned to the public at nominal fees;

(2) disseminate materials, printed advertisements, and radio and television messages

(A) to educate the public about the risks of injury to and death of unrestrained infants and children in motor vehicles;

(B) to explain to the public the provisions of AS 28.-05.095.

(c) A peace officer who stops a driver for an alleged violation of AS 28.05.095 shall advise the driver of the loan program.

Sec. 28.05.097. SALE OF CHILD SAFETY DEVICES. A person may not sell, offer for sale, or install in any motor vehicle a child safety device not conforming to all applicable federal standards for the device on the date of the sale or installation.

* Sec. 2. This Act takes effect one year after enactment.

IN THE SENATE BY THE TRANSPORTATION COMMITTEE

CS FOR SENATE BILL NO. 163 (Transportation)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the use of child safety devices in motor vehicles; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 28.05 is amended by adding new sections to read:

Sec. 28.05.095. CHILD SAFETY DEVICES. (a) Except as provided in (b) of this section, a driver may not transport a child in a motor vehicle unless the driver has provided and properly secured each child

(1) less than four years of age in a child safety device meeting the standards of the United States Department of Transportation for a child safety device for infants;

(2) between four and six years of age in a child safety device approved for a child of that age and size by the United States Department of Transportation, or in a seatbelt, as is appropriate for the particular child.

(b) This section does not apply to

(1) a mass transit vehicle, a school bus, an emergency vehicle, or a taxicab or other commercial vehicle;

(2) a motor vehicle designed for and used primarily off the highway;

(3) a child or class of children exempted by regulation under AS 28.05.096;

(4) a child riding as a passenger in a motor vehicle in

or seatbelt and has forfeited the bail required by the citation; or

(3) provided the proof required by this subsection on a prior occasion.

* Sec. 2. This Act takes effect one year after enactment.

Honorable Mae M. Tischer, Co-Chairman
House, Education & Social Services Committee
Pouch V
State Capitol
Juneau, AK 99811

Re: House Bill 262 - Child safety devices for motor vehicles

Dear Representative Tischer:

You have information and statistics relative to the above-referenced bill so you should already be aware of the significant threat to young children posed by riding unrestrained in automobiles. It is our understanding that the main opposition to this bill is that "we do not need another law forcing people to protect themselves."

As concerned citizens, we would like to point out to you that we do not consider this a proposed requirement for people to protect themselves. This bill provides for the protection of small children who are unable to make decisions for themselves concerning their safety. There is a big difference. Since auto accidents are the leading cause of death for children, it is apparent that at present children are not being adequately protected in car travel. They should not be the victims of their parents' negligence.

We ask that you share this letter with the H&SS Committee and do all that you can to facilitate passage of this bill.

Sincerely,

Karen M. Crist

Dear Robin:

I appreciate your taking the time to inquire about my reasons for opposing SB 163. As my aide mentioned in her telephone conversation with you earlier, I share your concern regarding the number of children's deaths that could have been prevented through proper use of child restraint devices. I find it appalling that some parents thoughtlessly allow their children to ride in motor vehicles without adequate protection; however, our reaction to this problem appears to be different.

At face value, HB 262 and SB 163 would seem to correct the problem; in reality each of these bills would probably make some headway but in turn they would also create additional problems. For example, in order to determine if people were in compliance with the law, police officers would have to stop cars without "probable cause', meaning no observable violation of the law, such as a missing headlight, speeding, etc., had been noted. If the police were authorized to do this it would probably violate our consititutional rights; yet if they don't have this authority there really is no way to enforce the law. In short, a catch twenty-two.

I believe a better responce to this dilemma would be for "concerned citizens" to work to make car seats available for loan through hospitals, doctors' offices, day care centers, etc., and attempt to make the public aware of the very real danger of not using safety devices for their children.

You also asked if a bill had been introduced which would provide infant seats on a loan basis to use in transporting babies home from the hospital. That provision is included in HB 262 and I have enclosed a copy of the bill for your review.

Thanks again for responding to my newsletter. I really appreciate your input and hope you will continue to inform me of your views regarding subjects of concern or of special interest to you.

Sincerely,

Mae

Representative Mae Tischer
District 11

P.S. I'm sorry to have missed your call Robin. It would have been great to talk to you. Give my best to your Dad.

MEMORANDUM State of Alaska

TO: Kevin K. Bruce, Special Assistant
Office of the Governor

DATE: December 21, 1982

FILE NO:

TELEPHONE NO: 465-4371

FROM: Charles A. Smith, Director
Highway Safety Planning Agency
Department of Public Safety

SUBJECT: Letter from Dr. Lillibridge
Re: Mandatory Child Restraint Use Legislation

We appreciate the opportunity to comment on Dr. Lillibridge's letter and to better acquaint you with issues with which you may not be familiar.

Dr. Lillibridge has nearly single-handedly brought the issue of mandatory child restraint usage to the attention of the public and the legislature. He is a dedicated physician and a champion of the welfare of Alaska's children. Highway Safety endorses Dr. Lillibridge's position and has supported his efforts to promote child restraint use. We are in total agreement with him that mandatory use legislation will have an impact that no other countermeasure can be hoped to equal.

The statewide traffic records system is in such disarray that we are unable to cite reliable traffic data here to support our position, but at the national level, anywhere from 800 to 1,000 children under 5 are killed every year in highway accidents. Perhaps even more dismaying are those children who are not killed outright but whose lives are damaged by permanently disabling and disfiguring injuries. As many as 90% of the fatalities and 70% of the severe injuries could be prevented by the proper use of child restraint devices.

At present, there are child restraint loaner programs active in Juneau, Sitka and Anchorage. These programs lend automobile restraints to parents of infants for a nominal fee, usually $5.00, until the child reaches 20 pounds at, approximately, one year. The fee is waived in cases of extreme hardship. The source of funds for all three programs is the Federal Highway Safety Act of 1966, Section 402. The Highway Safety Planning Agency administers these funds for the State of Alaska. The Anchorage program, though funded through the "402" program, is administered through the Commissioner of Indian Affairs' highway safety program and is restricted to participation by Native Americans.

Recently, the Alaska Child Passenger Safety Association was formed and is in the process of incorporating. The ACPSA hopes to organize various groups around the State into one cohesive unit in order to better direct and intensify efforts on behalf of child passenger protection.

Other Alaskan organizations supporting these activities include the Alaska Chapter of the American Academy of Pediatrics (Dr. Lillibridge's group), the Alaska Medical Society, the Alaska Medical Auxiliary and the Alaska Nurses' Association. All the hospitals in the Anchorage area have representatives at the ACPSA meetings, and Bartlett Memorial is the agent for lending infant seats to newborns locally.

On December 10 and 11, public hearings on this subject were conducted in Anchorage and Fairbanks by Senate HESS. Attached is a list of those who were in attendance.

Under the 1983 Highway Safety Plan, this agency awarded a grant to the Municipality of Anchorage in excess of $43,000 to develop a comprehensive education program on safety belt and child restraint use that we hope to be able to implement statewide after completion with a minimum of tailoring for various locales. In addition, we are co-sponsoring, with the Division of Public Health, a statewide teleconference in March to encourage the use of child restraints and to explain the possible consequences of failing to use the devices.

In summary, this agency supports Dr. Lillibridge's stance and applauds his efforts and the efforts of all those who are actively seeking child restraint legislation. We urge the Governor to give every consideration to sponsoring this legislation himself.

HIGHWAY SAFETY

December 1982

Mr Sheffield, please help us! We little children are being killed and maimed by our parents. They won't buckle us up when we ride in the car. We are too little to do it ourselves. Our parents think they own us. When they stop the car quickly to avoid an accident, we smash our faces on the dashboard. It's not fair! Our right to live and to have an intact face is ignored by our parents.

Our friends, the pediatricians, in 22 other states have already persuaded their legislatures to pass mandatory child auto restraint laws. Please read the enclosed "Elements Desired for Legislation" drawn from the best of other state's experience. Our own Alaska State Troopers have helped draw up these "elements," also.

The programs do work - documentation enclosed.

Please help us!

Sincerely
the little children of Alaska

ALASKA
CHILD PASSENGER SAFETY ASSOCIATION

Fatal motor accident analysis.(1)

Washington State 1970-1979

39,500 accidents in which children were passengers.

6,300 were restrained; 2 killed. Death rate 0.0317%

33,200 were not restrained; 146 killed. Death rate 0.4397%

The death rate for unrestrained children was 13-fold increased over restrained children.

Twenty per cent of the unrestrained children were being held on an adult's lap but were killed. Nine out of every ten adults holding the child were not killed.

If all of the children had been properly restrained, how many would have died? Twelve, instead of 148.

One hundred thirty six children died needlessly because they were not properly restrained.

Profile of an accident.

The "typical" child who was killed would be a one year old male infant riding in the front seat of a passenger car without a restraint. The driver of the car was the mother, who was also not wearing a seat belt. The accident occurred between 8 a.m. and 3 p.m. within a few miles of home. The mother had not been drinking an alcoholic beverage. There were no defects in the family car that contributed to the accident. The accident occurred during daylight hours on a state route. The weather was clear or overcast and the surface was dry. In summary, the fatal accident involving a young child in Washington State usually occurred under ordinary conditions.(1)

(1) "Fatal Motor Vehicle Accidents of Child Passengers from Birth through 4 Years of Age in Washington State" by Robert G. Scherz, Pediatrics, Vol. 68(4), October 1981, pg. 572-575.

CHILD PASSENGER SAFETY ASSOCIATION

Elements Desirable for Legislation

Every driver (parent, car pool driver, people from out of state. It is not the responsibility of the car rental agency, or taxicab driver, bus driver, etc.).

Transporting a child.

Under age five.

Any child unable to sit unaided shall be properly restrained in a child restraint system which meets the federally approved standards prescribed in 49 CFR 571.213. (This covers infants without specifying a specific age or level of development or weight. This is to make it easy for the enforcing officers to make that judgment).

Child must be properly secured according to the manufacturer's recommendation.

Any child who is able to sit unaided but under the age of five and transported in the front seat must be properly restrained in a child restraint system which meets the federal standards prescribed in 49 CFR 571.213.

Any child who is able to sit unaided but under the age of five transported in the rear seat must be properly restrained in a child restraint system which meets the federal standards prescribed in 49 CFR 571.213.

Children shall be carried only in seats intended for passengers.

Within the State of Alaska (statute not limited just to streets, highways, roads, byways, but off-road use as well, which is even more dangerous).

Infractions do not constitute contributory negligence. Infractions are not admissible as evidence.

Seats must be properly installed.

People violating this statute are guilty of an infraction and assessed two points per occurrence (not per child).

Violators of this section shall be fined not to exceed $60. A person found in violation of this section may, instead of paying the fine, submit proof of purchase subsequent to the violation or rental for not less than one year of an approved infant or child restraint system to the court. This shall be acceptable only for the first violation and if the acquisition of the restraint was subsequent to the violation. This option applies only to the first offense.

Exemptions to this statute include mass transit vehicles, school bus, taxi.

Children unable to use safety belts or child passenger restraints because of physical or mental handicaps. In this instance they shall be secured in their own specially designed apparatus.

Motorcycle, moped, other vehicles not required to be equipped with seat belts. Transport in a vehicle in which all seat belts are occupied but extra passengers are being carried. Emergency vehicles during an emergency.

DOCUMENTATION OF EFFECTIVENESS

TENNESSEE

User Rates for Children Under Four

1977 pre-law	9%
1978 (with law)	20%
1980 (with law)	29%

Deaths

The Honorable Betty Cato
Pouch Y
Juneau, AK 99811

Dear Representative Cato:

Would it be possible for you to invite the legislators or their aids to meet directly with Christy Hughes while she is here in Alaska for the statewide teleconference on child passenger safety?

Have you listened to the tapes or read the transcript of Senator Charlie Parr's hearing on this issue, which was held in December 1982 in Anchorage and in Fairbanks? A lot of important data and background information was presented at those hearings. The broad based support from the state troopers, the Academy of Pediatrics, the Medical Society, and the public health nurses is reflected in that report.

How can we get a bill presented? The elements which the Academy of Pediatrics at a national level, and the Alaska State Troopers feel would be important are included in that hearing.

There appears to be a great deal of support among the public for this legislation. How can we get it accomplished?

Senator Pat Rodey has indicated that he is interested. I have received letters from 43 senators and legislators this August which indicate their understanding of the magnitude of the problem.

Would you please telephone me at the office on

my private line (561-1186) at your earliest convenience so that we may discuss this further.

Sincerely yours,

C B Lillibridge III

In support of Senate Bill 163
and House Bill 262

WHY DOES ALASKA NEED TOUGH CHILD PASSENGER SAFETY LEGISLATION?

1. THE GREATEST KILLER of KIDS is the CAR/TRUCK

   a. More children are killed by motor vehicles than by the next two greatest killers combined--more than birth defects, congenital heart lesions, brain malformations, leukemia, cancer, etc. together.

   b. Children under age 6 are PHYSICALLY more susceptible to HEAD INJURY. Twenty-five percent of children's weight is in their head (compared to 9 percent for adults). When the vehicle slows suddenly, the child is thrown HEADFIRST into the dashboard like an arrow. The child's SKULL is more FRAGILE, and BRAIN DAMAGE occurs more easily.

2. WOULD INTENSE EDUCATION ACHIEVE GOOD RESULTS?

   a. No. Several other states have spent hundreds of thousands of dollars on TV, newspaper, pediatric office teaching, etc. with NO MEASURABLE DIFFERENCE IN USAGE or death rate, because young people (parents) naively believe accidents always happen only to other people.

3. WOULD A TOUGH LAW INCREASE USAGE and SAVE LIVES?

		Pre-Law	With Law
Yes.	Massachusetts Usage:	14%	70%

		Pre-Law	With Law
Yes.	Tennessee:	12 deaths/year	1 death/year

   Yes. Washington: Death rate over 10 years and 39,600 accidents is 13 times greater for children riding loose than restrained.

The mother had not been drinking an alcoholic beverage. There were no defects in the family car that contributed to the accident. The accident occurred during daylight hours on a state route. The weather was clear or overcast and the surface was dry. In summary, the fatal accident involving a young child in Washington State usually occurred under ordinary conditions. (1)

CHILD PASSENGER SAFETY ASSOCIATION

Elements Desirable for Legislation

Every driver (parent, car pool driver, people from out of state. It is not the responsibility of the car rental agency, or taxicab driver, bus driver, etc.).

Transporting a child.

Under age five.

Any child unable to sit unaided shall be properly restrained in a child restraint system which meets the federally approved standards prescribed in 49 CFR 571.213. (This covers infants without specifying a specific age or level of development or weight. This is to make it easy for the enforcing officers to make that judgment).

Child must be properly secured according to the manufacturer's recommendation.

Any child who is able to sit unaided but under the age of five and transported in the front seat must be properly restrained in a child restraint system which meets the federal standards prescribed in 49 CFR 571.213.

Any child who is able to sit unaided but under the age of five transported in the rear seat must be properly restrained in a child restraint system which meets the federal standards prescribed in 49 CFR 571.213.

Children shall be carried only in seats intended for passengers.

Within the State of Alaska (statute not limited just to streets, highways, roads, byways, but off-road use as well, which is even more dangerous).

Infractions do not constitute contributory negligence. Infractions are not admissible as evidence.

Seats must be properly installed.

People violating this statute are guilty of an infraction and assessed two points per occurrence (not per child).

Violators of this section shall be fined not to exceed $60. A person found in violation of this section may, instead of paying the fine, submit proof of purchase subsequent to the violation or rental for not less than one year of an approved infant or child restraint system to the court. This shall be acceptable only for the first violation and if the acquisition of the restraint was subsequent to the violation. This option applies only to the first offense.

Exemptions to this statute include mass transit vehicles, school bus, taxi.

Children unable to use safety belts or child passenger restraints because of physical or mental handicaps. In this instance they shall be secured in their own specially designed apparatus.

Motorcycle, moped, other vehicles not required to be equipped with seat belts. Transport in a vehicle in which all seat belts are occupied but extra passengers are being carried. Emergency vehicles during an emergency.

the only secure place

for a child in a car is in a crash-tested safety seat…and that's a fact!

Where you can buy child safety seats:

Regular or discount department stores Juvenile furniture or baby needs shops Some new car dealers Some hospital gift shops Automobile parts and accessory dealers Catalog sales through major retailers

&facts

myth: A child riding in a car is safest in its mother's arms.

fact: In a sudden stop or crash, momentum will cause a 20 pound baby to weigh 400 pounds or more. You can't hold back that much weight. And if you're not wearing a seat belt, your body could crush a child against the dashboard.

myth: Regular seat belts are effective for protecting children.

fact: Children need restraints designed especially for them, because of their delicate bone structure. Fortunately, effective, crash-tested child restraining systems are available. Some models are safer than others, so buy carefully and make sure to follow enclosed instructions for attachment. If a safety seat is not available, however, be sure to use the car's regular safety belt system. Your child's safety depends on it.

myth: Childhood diseases pose a greater threat to my child's health than car accidents.

fact: Car accidents are the leading cause of death for children under five. Almost 1,000 children die each year and thousands more are seriously injured, some permanently. One survey showed that a large majority of those killed or injured in crashes could have been saved if they had been properly secured in a safety seat. It's ironic that so many parents who protect their children with inoculations and worry about every little sniffle or fever, still fail to protect them from the greatest threat to children's health – car accidents.

myth: In a serious car accident nothing will really protect a child.

fact: Elana Nailor of Falls Church, Virginia, was hit by another driver and rolled her car over three times. She was hospitalized and the car totaled. But her younger passenger, secured in a child safety seat, did not receive a scratch. Hundreds of incidents like this have demonstrated the effectiveness of child safety seats in serious car accidents. These reports are evidence that car seats really work to protect children in crashes – but they must be used, and used correctly.

myth: I cannot get my child to ride in a safety seat.

fact: Since safety seats elevate children from the car's regular seat, children in safety seats have a better view of their surroundings. One study showed that children riding in safety seats were better behaved and more contented than children who were allowed to roam around the car.

But it may take some persistence. You're best able to understand the risks involved when a child is not properly belted in. Your child's safety and your own peace of mind are at stake. You can set an example by always wearing your own seatbelt.

myth: I don't need to put my child in a safety seat for short trips.

fact: Most accidents happen within 25 miles of home. Even at low speeds a sudden stop or "fender-bender" can cause severe injury to a child who is not properly belted in. Placing your child in a safety seat every time can save a lot of heartbreak.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 262

"An act relating to the use of child safety devices in motor vehicles; providing for a child safety device loan program; and providing for an effective date."

BACKGROUND INFORMATION:

More Alaskan children are killed or injured in car accidents than any other single disease or type of accident. The Alaskan accidental mortality rate for children ages 1-4 years is 105% higher than the rest of United States; and 40% of these deaths are due to car accidents. National statistics have shown that the majority of deaths and injuries to children resulting from car accidents could be prevented if parents would "buckle up" their children.

POSITION:

Because children can't protect themselves, the Department fully supports mandatory child restraint laws. The Department believes that this bill is enhanced by its support for community education programs and car seat loaner programs.

Since the focus of this law is to encourage utilization of approved child restaints, the Department recommends that there be a designated minimum fine; and that the fine be sufficiently high enough to encourage violaters to purchase a car seat rather than pay the fine.

The Department is opposed to the exclusion of taxicabs and commercial vehicles because this action weakens the protection of children. Taxicabs are used primarily for short city driving. Most injuries to children in cars occur in short stop-and-go driving. In addition, the Department is opposed to allowing children who are not family members to ride in a vehicle that does not have enough seat belts. This action will allow the transporting of large numbers of children in car pools. Under this provision, five or more children could be legally crowded into one vehicle.

CHILD PASSENGER SAFETY ASSOCIATION

Fatal motor accident analysis. (1)

Washington State 1970-1979

39,500 accidents in which children were passengers.

6,300 were restrained; 2 killed. Death rate 0.0317%

33,200 were not restrained; 146 killed. Death rate 0.4397%

The death rate for unrestrained children was 13-fold increased over restrained children.

Twenty per cent of the unrestrained children were being held on an adult's lap but were killed. Nine out of every ten adults holding the child were not killed.

If all of the children had been properly restrained, how many would have died? Twelve, instead of 148.

One hundred thirty six children died needlessly because they were not properly restrained.

Profile of an accident.

The "typical" child who was killed would be a one year old male infant riding in the front seat of a passenger car without a restraint. The driver of the car was the mother, who was also not wearing a seat belt. The accident occurred between 8 a.m. and 3 p.m. within a few miles of home. The mother had not been drinking an alcoholic beverage. There were no defects in the family car that contributed to the accident. The accident occurred during daylight hours on a state route. The weather was clear or overcast and the surface was dry. In summary, the fatal accident involving a young child in Washington State usually occurred under ordinary conditions. (1)

The Honorable Betty Cato
Pouch Y
Juneau, AK 99811

Dear Representative Cato:

Would it be possible for you to invite the legislators or their aids to meet directly with Christy Hughes while she is here in Alaska for the statewide teleconference on child passenger safety?

Have you listened to the tapes or read the transcript of Senator Charlie Parr's hearing on this issue, which was held in December 1982 in Anchorage and in Fairbanks? A lot of important data and background information was presented at those hearings. The broad based support from the state troopers, the Academy of Pediatrics, the Medical Society, and the public health nurses is reflected in that report.

How can we get a bill presented? The elements which the Academy of Pediatrics at a national level, and the Alaska State Troopers feel would be important are included in that hearing.

There appears to be a great deal of support among the public for this legislation. How can we get it accomplished?

Senator Pat Rodey has indicated that he is interested. I have received letters from 43 senators and legislators this August which indicate their understanding of the magnitude of the problem.

Would you please telephone me at the office on

my private line (561-1186) at your earliest convenience so that we may discuss this further.

Sincerely yours,

Clinton B. Lillibridge, M.D.
State Chairman

Fatal Motor Vehicle Accidents of Child Passengers from Birth Through 4 Years of Age in Washington State

Robert G. Scherz, MD

From the Mary Bridge Children's Health Center, Tacoma, Washington

ABSTRACT. During the decade beginning Jan 1, 1970 and ending Dec 31, 1979, approximately 39,500 child passengers aged 0 to 4 years were in motor vehicle accidents reported and investigated in the State of Washington; 148 (0.4%) of the children were killed outright or subsequently died. Of the 39,500 children, approximately 6,300, or 16%, were wearing some type of safety restraint and only two, or 1:3,150, were killed. On the other hand, 33,200 were not wearing restraints and 146, or 1:227, were killed. If these ratios are extrapolated, one might conclude that if all the children had been wearing restraints, there would have been 93% fewer deaths. A detailed analysis was performed on 39 fatalities for the years 1977, 1978, and 1979. Fatal accidents involving young children in Washington State usually occurred under ordinary circumstances on dry roads at low speeds during daylight hours and were unrelated to alcohol usage. *Pediatrics* 68: 572-575, 1981; *motor vehicle accidents, child restraints.*

Motor vehicle accidents are the leading cause of accidental death of young children in the United States. In the 1970s, 16,820 children 0 to 4 years of age were killed in motor vehicle-related accidents.[1] The data in this article were tabulated from reports and investigations generated by the Washington State Patrol for motor vehicle accidents involving children in Washington State from 1970 through 1979.

During the last ten years, from Jan 1, 1970 through Dec 31, 1979, 148 children 0 to 4 years of age received fatal injuries as passengers in motor vehicles in Washington State. Although the exact number of child passengers involved in the accidents is not known, data collected by the Washington State Patrol indicate that the number of child passengers from birth through 4 years of age in investigated accidents was approximately 39,500 during that period.[2-5]

Review of data collected from the Washington State Seat Belt study suggests that the cumulative number of children aged 0 to 4 years wearing some sort of restraint at the time of the accident was approximately 6,300 or 16% of the passengers. Approximately 33,200 were not wearing a restraint. During the last ten years, only two of the children wearing a restraint were killed (ratio of fatal injuries to total passengers 1:3,150). On the other hand, there were 146 children aged 0 to 4 years not restrained who were killed (ratio of fatal injuries to total passengers 1:227). If all of them had worn restraints, there might have been 93% fewer deaths.

MATERIALS AND METHODS

Investigation of motor vehicle accidents in Washington State is required for all injury-producing accidents and for accidents that entail property damage of $300 or more. The report form includes information relative to the use of seat belts by the driver and all other passengers. Prior to 1979, the report form did not differentiate between seat belt, seat belt and shoulder belt, and child restraint. The reports did not indicate whether the restraints were used properly or whether a child was restrained properly within the seat. The author reviewed all computer printouts relating to the use of seat restraints by children for the period 1970 through 1979.

To gain additional insight into characteristic features of the accidents that result in fatalities, the State of Washington Uniformed Police Traffic Collision Reports of 39 fatalities of children under age 5 years (that occurred during the years 1977, 1978, and 1979) were reviewed in detail.

Received for publication July 21, 1980, accepted Feb 11, 1981.

PROFILE OF FATAL ACCIDENTS

The profile for the "typical" child who was killed is as follows. The child was a 1-year-old male infant riding in the front seat of a passenger car without a restraint. The driver of the car was the mother who was not wearing a seat belt. The accident occurred between 8 AM and 3 PM within a few miles of home. The mother had not been drinking an alcoholic beverage. There were no defects in the family car that contributed to the accident. The accident occurred during daylight hours on a state route. The weather was clear or overcast, and the surface was dry (Tables 1 to 4).

The fatal accident involving a young child in Washington State usually occurred under ordinary conditions.

This profile is different from the general configuration for fatal accidents in the State of Washington during 1978.[5] For instance, during 1978, 27% of the drivers of motor vehicles involved in fatal accidents in Washington State were women; however, in fatal accidents relating to children in this study, 65% of the drivers were women, and 60% of the women were mothers. In general, 22% of the drivers involved in motor vehicle accidents wore restraints; however, in this study only 10% of the drivers of the motor vehicles involved in fatal accidents were wearing a restraint of some kind. In general, 41% of the fatal accidents in the state occurred during daylight hours; however, 75% of the child-related accidents were during daylight hours. In general, 27% of the fatal accidents occurred on state routes; however, in the child-related fatalities, 62% were on state routes. Of all fatal accidents in 1978, 48% included at least one driver who had been drinking and 38% of the drivers were driving while intoxicated. In 29% of the accidents in which children were fatally injured, one of the drivers had been drinking; in only 12% of the accidents, the driver of the car in which the child was killed had been drinking (Table 4).

FATALITIES OF YOUNG CHILDREN WEARING RESTRAINTS

Two of 39 children in this study were killed while wearing a restraint of some type. Actually, these were the only two children aged 0 to 4 years reported by the Washington State Patrol who were wearing restraints and were involved in fatal accidents during the ten years from January 1970 through December 1979.

The first case involved a 1-year-old child in a

restraint that was not defined, and it is not known whether or not it was an approved child restraint system. In the second fatality, the 2-year-old child was not wearing an approved restraint system, but rather a lap belt with a pillow between the belt and his abdomen. It is conceivable that if the child had been in a child restraint device with a shell-like protection on the sides, he might not have been fatality injured.

The proper use of approved crash-tested car seats provides the best currently available protection for infants and young children in motor vehicles.[7] However, in order to provide adequate protection, it is essential that they be installed and used according to manufacturers' instructions.[8]

LAP PASSENGER

Another interesting observation was that eight of 39 fatalities occurred when the child was held in the lap of another passenger. In seven of eight instances, the person holding the child survived, and in one instance the grandmother and the child she was holding were killed. Five of the eight children who were crushed were less than 1 year of age. In fact, five of 14 infants less than age 1 year were killed by being crushed by the person on whose lap they were sitting at the time of the crash. The bias in mortality in this survey was toward the infant in that 20 of 39 children killed were 1 year of age and younger (Table 1). The lap position appears to be an important factor in this bias. The increased risk of death with decreasing age of the child is compatible with observations by Baker,[9] who reported extremely high death rates in the first year of life, especially for children less than 6 months of age.

This study supports the concept that on-lap travel places the child at increased risk of being injured or killed. In a large observational survey, Williams[10] found 145 of 344 (42%) infants less than 1 year of age traveling on a lap.

ADDITIONAL OBSERVATIONS

In the investigated accidents only one of the motor vehicles involved in a fatal accident had a defect that contributed to the accident. The accidents were more likely to occur during the week than on the weekend (29/39) and during daylight hours (28/39). The weather was clear or cloudy and the road surface was usually dry (30/39). The location was usually a state route (26/39); the least common site for a fatality was an interstate highway (2/39).

Of the children involved in the car accidents, 64% were retained within the motor vehicle; however, 36% were ejected from the motor vehicle or fell out: nine from the front seat, four from the back seat, and one child's position at the time of the accident was unknown. Of the children killed, 28 were riding in the front seat; ten were in the back seat, and one child's position was not stated. Although fewer children in the rear seat were killed in motor vehicle accidents, it is apparent that riding unrestrained in the back seat does not assure survival (Table 3).

DISCUSSION AND COMMENT

This survey indicates that the restraint of young children in motor vehicles may be accompanied by a significant reduction in their fatal injuries. In Washington State during the last ten years, no child passengers less than 1 year of age who were restrained at the time of the accident have died. Furthermore, no children aged 0 to 4 years who were restrained in the back seat of a vehicle have died. The Washington Seat Belt Study did not provide information about the type of restraint used. Undoubtedly a variety of restraints were used; however, the types of restraints were not well documented and therefore could not be determined by review of the data.

Programs aimed to increase usage of restraint systems for young children should be directed at parents who are most often the operators of the motor vehicles involved in fatal accidents (Table 4). It should be emphasized to them that accidents fatal to young infant/child passengers usually occur in circumstances in which the family automobile is used for ordinary travel near home. Preferred infant/child automobile restraints for children who weigh 18 kg (40 lb) or less are those that meet or exceed the critical elements of the National Highway Traffic Safety Administration's 1978 proposed revision to the Federal Motor Vehicle Safety Standard 213. The revision went into effect Jan 1, 1981.[11] The restraint selected should perform satisfactory in dynamic tests or simulated crash tests.[12]

Children who weigh less than 9 kg or who are less than 9 to 11 months old should be strapped into a carrier that is then belted to the vehicle. The infant rides in a semireclining position, facing the rear of the vehicle. Infants and toddlers aged more than 9 to 11 months or weighing more than 9 kg should ride in an approved automotive safety seat. Current lists of approved automotive seats and infant carriers may be obtained from a variety of organizations such as the American Academy of Pediatrics, Physicians for Automotive Safety, and Action for Child Transportation Safety.

For children who weigh more than 18 kg (40 lb), the standard seat belt is adequate as a primary protection device. The should belt should be used when the child is large enough for it to fit properly over the shoulder and chest. If the shoulder belt

crosses the face or neck, it should be placed behind the child.

Beginning in the 1980s, according to the National Highway Traffic Safety Administration, a branch of the Department of Transportation, newly manufactured cars sold in the United States will be required to have built-in passenger restraints, either air bags or seat belts, that do not have to be buckled. However, the passive restraint systems were devised primarily for front seat occupants who are of adult size. Passive restraints in lieu of child restraint systems designed specifically for young children should not be relied on for protection.[13]

Therefore, it is imperative that the pediatrician accept the responsibility for helping to educate parents to obtain and use available and proven child passenger restraints; in this way the number one cause of disabling injury and death to infants and children may be prevented.

Children Killed in Falls from Motor Vehicles

Allan F. Williams, PhD

From the Insurance Institute for Highway Safety, Washington, DC

ABSTRACT. In 1978 in the United States, 38 children aged 5 years or younger were killed when they fell from the passenger compartments of moving motor vehicles not involved in crashes. Twenty-eight children (74%) were boys. Eighteen (47%) were 2 years old; 35 (92%) were aged 1 to 3 years. Thirty-six children fell out through doors, one fell out of a window, and one fell through a hole in the floor. Sixteen falls occurred when the driver was making a turn or going around a curve, nine when someone opened the door, seven when the driver was proceeding straight ahead, five when the driver was backing out of a driveway, and one when the driver was swerving. All 38 children killed in falls from vehicles were unrestrained. Use of seat belts or child restraint systems would prevent falls even if doors came open, as well as providing protection in crashes. A recent study has shown that pediatricians, by routinely counseling parents to restrain children in cars, can have some effect in increasing child restraint use. Pediatricians should also encourage parents to transport children in rear seats and to check at the start of trips to ensure that all doors are completely closed and locked. *Pediatrics* 68:576–578, 1981; *motor vehicles, falls, injuries.*

In 1978, 345 deaths in the United States resulted from people falling or jumping from moving motor vehicles not involved in crashes.[1] These cases were identified through the Fatal Accident Reporting System.[2] Information on the cases was obtained from the Fatal Accident Reporting System file and from police reports.

Of the 345 people killed in falls and jumps, 201 had been traveling on motor vehicle exteriors and the other 144 had been in passenger compartments. Only five of the 201 falls or jumps from vehicle exteriors involved children aged 5 years or younger. However, a large percentage of people who fell from passenger compartments were children of these ages. Of the 144 people who fell or jumped from passenger compartments, no children aged 5 years or younger were included in the 40 who jumped, but 38 (48%) of the 79 who fell were in this age group. For 25 people, including six children aged 5 years and younger, it was not known whether they fell or jumped. This paper presents information on the 38 incidents in which children were killed in falls from the passenger compartments of moving vehicles.

Of the 38 children 28 (74%) were male; 18 (47%) of the children were 2 years old; and 35 of 38 incidents involved children who were aged 1 to 3 years.

It should be noted that very few children older than age 5 were killed in falls from passenger compartments in 1978. Only three of the other 41 people killed in falls were aged 6 to 14.

Information on seating position in the vehicle was known for 35 of 38 children: 27 (77%) were in front seats and eight (23%) were in rear seats.

The Table summarizes actions that preceded falls from passenger compartments. Sixteen (42%) of the falls occurred when the drivers were making turns or going around curves, so that there was lateral inertial loading of the door that opened. In all but one of 14 cases in which seating position was known, the child was located next to the door that came open. Ten children were in the right front seat of vehicles being steered to the left; two were in the right rear seat of vehicles turning left; one was in the left rear seat of a vehicle making a right turn; and in one case the driver's door opened during a right turn and a child in the right front seat fell out. In many of these incidents it is likely that in addition to the lateral inertial loading, the door was also loaded by the child as the car turned. However, in only one case was there indication of this in the police reports. In another case, it was noted that the child had been playing with the door; in a third case, the door reportedly was not closed.

Nine children fell out of doors that were opened by someone. In six cases, the child who fell opened the door, but in three cases the doors were opened

TABLE. Actions That Preceded Children Falling from Passenger Compartments

Action	N (%)
Vehicle turning corner or going around curve	16 (42)
Someone opened the door	9 (24)
Vehicle proceeding straight ahead	7 (18)
Vehicle backing from driveway	5 (13)
Vehicle swerving	1 (3)
Total	38 (100)

by someone else. In one such case, a 4-year-old child in the rear seat opened the door and a 2-year-old child fell out. In another case, the driver opened the door to scare a pursuing dog, and his 3-year-old daughter went out the door. In the third case, a car that had been parked in a parking lot began to move backwards. A bystander opened the door and applied the brakes, and the lone occupant of the car, a 3-year-old boy, fell out and was killed.

In seven instances, children fell from vehicles that were being driven straight ahead on the road. One child went out a window, another through a hole in the floor. In the other five incidents, it was reported only that the door "came open." One of these doors was found to be defective.

Five falls occurred when the driver was backing out of a driveway at the start of a trip. It is likely in these cases that doors had not been closed completely. In one case, it was noted in the police report that the child was leaning against the door.

One incident occurred when the brakes failed and the driver attempted to stop the car by driving over a curb and up an embankment. The driver fell out as the car swerved, and the child subsequently fell.

COMMENT

Preventing doors from opening through changes in vehicle designs and vehicle inspection programs have been discussed elsewhere.[1] Pediatricians can do the following to increase the protection of children in cars.

1. Encourage parents to ensure that all children they transport are restrained by vehicle seat belts or properly used child restraints. All 38 children killed in falls from vehicles were unrestrained. Use of seat belts and child restraint systems is effective in providing protection against crash injuries. Their use would also prevent falls from noncrashing vehicles, even if doors came open. Restraints provide other benefits as well. They are important in preventing noncrash injuries that occur when children fall *within* vehicles during swerves and sudden turns, or when they strike the dashboard in sudden stops.[3] Children traveling in restraint systems have been shown to be better behaved and more manageable than unrestrained children,[4] and restraints prevent crashes that occur when the driver is distracted by the child's movement or actual physical interference with the driver or with vehicle controls.[5]

Surveys have shown that very few children traveling in vehicles are restrained[6] and that very few pediatricians counsel parents to use restraints when transporting their children.[7] There is now scientific evidence that pediatricians can have some effect in increasing the use of child restraints[8]; they should routinely encourage parents to protect their children in cars and instruction should be provided. Pediatricians should also support child restraint laws, which have been shown to be somewhat effective in increasing child restraint use.[9,10]

2. Encourage parents to transport children in rear seats. Children restrained in rear seats are provided the greatest crash protection.[11] When vehicles are in motion, children in rear seats are more difficult for drivers to supervise than are those in front. However, restraints greatly reduce the necessity for close supervision of children, and many automobiles do not have rear doors. Children in front seats apparently have a higher risk of falling from vehicles. More than 75% of the fatal falls in the present study involved children in front seats, whereas observational surveys have indicated that the majority of children aged 1 to 3 years travel in rear seats.[6,12]

3. Encourage parents transporting children to check at the start of trips to make certain that all doors are completely closed and locked. This is important when the children being transported are aged 1 to 3 years, and especially for 2-year-old children, and boys. Fatal falls from passenger compartments predominantly involved boys; they are probably more active and exploratory in vehicles than girls.

Motor vehicle travel results in more deaths to children than any single disease. Adoption of these three practices would greatly reduce this toll.

A NEW BREED OF NURSES NEEDS TO BRING NURSING BACK TO THE BEDSIDE

What are we offered today by the aggressive new breed of leaders and educators in nursing? An angry, dwindling profession, failing with increasing frequency to meet the needs of patients and physicians and in the process making themselves and everyone else miserable. The idealistic young people who come into the profession to actually nurse patients are sometimes made to feel like Aunt Jemimas, become discouraged and leave, or, if they remain, are denied status, promotions and raises.

The "new model" nursing leaders and educators pursue higher status, higher incomes, more respect and recognition—as indeed most of us do. There's nothing wrong with that. What is damaging is the mode of attack.

By striving to capture some independent middle ground between classical nursing and medical practice, nursing leaders threaten to make of their professionals neither nurses nor physicians, fit only to cause trouble: trouble for people who really want to nurse, trouble for physicians and administrators who can't get the help they need and, most of all, trouble for patients, who often cannot get timely medicines and competent ministrations without hiring a private-duty nurse. And even then competence is far from assured.

Many nursing leaders and educators seem intent on abandoning a badly needed profession in the search for a new category of health-care professional that no one has asked for and hardly anyone needs. They have not merely neglected and downgraded classical, basic nursing; they have also sought to restrict entry into the profession by raising the standards of accreditation of schools of nursing and of licensure of individuals in many instances beyond what is necessary for the basic skills that are in such short supply.

In short, they want not only to take nursing away from the bedside but also to see that no one else steps in to take their place. And all this is done, predictably, "to improve patient care"—the patient is being abandoned for his own benefit.

The manifold discontents consequent upon such policies and actions are blamed—where else?—on The Doctors, those overpaid, arrogant, narcissistic chauvinists who stand between the new breed of nurses and the fulfillment of their goals, which I take to include something akin to professional equality with physicians, patient care to be decided by consensus and rendered by—who? Indeed, the more adamantine members of the new breed will forthrightly state that their real mission is to protect patients from physicians, along with, if I have scanned their literature fairly, a great deal of gratuitous psychologizing and administrative theory.

No wonder nursing is a troubled profession. Small wonder that doctors and administrators are getting upset and that patients are confused. One can only hope that common sense and the plain need for basic nursing will somehow bring us back to calm reality and some measure of comity.

Nursing is a noble profession, and an essential one. Nurses deserve decent salaries and more realistic pay structures, along with status, recognition and security. If we do our best to provide these things, and if the more strident leaders of the new breed of nurses will quiet down and let doctors doctor and nurses nurse, we'll all be a lot better off, especially patients.

CHILD SAFETY IN AUTOMOBILES: MANDATORY RESTRAINT-USE LAWS

Automobile safety is an issue of long-standing concern, but only recently has special attention been focused on the safety needs of young children, to whom cars pose one of the largest public health threats in the country.[1] This threat would be greatly diminished if each pre-school aged child were properly secured in a child restraint device (CRD) each time he or she traveled in a motor vehicle.

A CRD is a car seat, padded shell, or harness which is designed to protect infants and young children in the event of an accident, and which is usually secured in place by a vehicle's existing lap belts.[2] These devices are fairly inexpensive and readily available, yet they are rarely used. In fact, a leading study found that less than ten percent of children transported in motor vehicles were adequately protected against the possibility of injury.[3]

A growing awareness of this public health problem has resulted in passage of legislation mandating the use of CRDs in two states[4] and proposed legislation in twenty-eight others.[5] This Comment will examine the laws mandating the use of CRDs and the legal issues which may arise from them. The efficacy of the various statutes will be analyzed as well as their constitutional validity under state police powers. An evaluation of the potential impact of CRD laws on auto-

2. Some CRDs are designed solely for use by infants while others protect only toddlers capable of sitting alone. Many restraint devices are convertible and can be used from birth until the child weighs more than forty to fifty pounds, at four or five years of age. For a complete description and evaluation of many of the CRDs marketed today, *see* MICHIGAN'S MOTOR VEHICLE OCCUPANT PROTECTION PROGRAM, MICHIGAN TRAFFIC SAFETY INFORMATION COUNCIL, A DETAILED REVIEW OF CURRENTLY MARKETED INFANT AND CHILD RESTRAINTS (1979), *Child Restraint Systems*, 42 CONSUMER REPORTS 314 (1977).

3. *See* Williams, *Observed Child Restraint Use in Automobiles*, 130 AM. J. DISEASES OF CHILDREN 1311 (1976).

4. CRD-use laws are in effect in Tennessee and Rhode Island. See notes 33 and 41 *infra*.

5. Child restraint bills have been proposed in the following states: Alabama, Arizona, California, Colorado, Connecticut, Delaware, Hawaii, Illinois, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, South Dakota, Virginia, Washington, West Virginia, and Wisconsin. *See* ACTION FOR CHILD TRANSPORTATION SAFETY, SUMMARY OF PROPOSED CHILD RESTRAINT LEGISLATION AND ALTERNATIVE MODEL LAWS (1979, updated May, 1980) [hereinafter cited as ACTS].

mobile accident litigation will follow. Before turning to those issues, however, the problem to which CRD laws are addressed will be more fully described.

THE PROBLEM

Motor vehicle accidents cause death and injury to more children than any other single cause, including childhood diseases.[6] In 1979 alone, 1159 children under the age of five died, and at least fifty times that number were injured, in such accidents in the United States.[7] Colorado contributed fourteen fatalities and 835 recorded injuries to that toll.[8] These high numbers are due primarily to two factors: the physical characteristics of young children and the positions they usually occupy as unrestrained passengers in motor vehicles.

The unique center of gravity and small size of young children make them particularly vulnerable to serious injuries in automobile crashes.[9] A child's head makes up a great proportion of his overall body weight, and this, coupled with an inability to brace himself with his short arms and legs, greatly increases the likelihood that he will be propelled head-first in the direction of any impact point. The result is a high incidence of head injuries and related deaths among accident victims in this age group.[10] In fact, such injuries can occur even in the absence of an actual accident when an unsecured child is thrown against the automobile's interior by a sudden swerve or application of the brakes.[11] Larger and heavier passengers, on the other hand, are less likely to be shifted by abrupt driving maneuvers.

The physical characteristics of very young children also tend to

---

6. Automobile accidents are the leading cause of death and serious injury for all children beyond one month of age. *See* Shelness & Charles, *Children as Passengers in Automobiles. The Neglected Minority on the Nation's Highways*, 56 PEDIATRICS 271 (1975).

7. DEPARTMENT OF TRANSPORTATION, NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION (NHTSA), HIGHWAY SAFETY 1979: REPORT ON ACTIVITIES UNDER THE HIGHWAY SAFETY ACT OF 1966 (1980). This report contains only death statistics. Injury statistics are not published but are kept on file by NHTSA. The National Electronic Injury Surveillance System file kept at NHTSA shows that 60,400 pre-schoolers injured by motor vehicles were transported to emergency rooms in 1979. Telephone interview with Grace Hazzard, data retrieval specialist, National Center for Statistics and Analysis, NHTSA, Sept. 16, 1980.

and the forward-moving weight of the person holding him.[18] This same crushing action can occur when a seatbelt is fastened around both the adult and the child on his lap. In a collision, the weight of the adult is forced against the child penned in the seatbelt with him, and the probability of serious abdominal injury to the child is greatly increased.[19]

The final variation of on-lap travel is a seatbelted adult holding an unrestrained child on his lap. In this position, the adult does not crush the child in an accident, but is powerless in most cases to prevent other harm to the child, for even the smallest infant weighs the equivalent of several hundred pounds at the instant of impact, and is likely to be torn from even the strongest of human arms.[20] In short, holding a child can never be an adequate safety alternative to the use of an appropriate restraint device.

The need for CRDs will not be obviated by the automatic restraint systems which federal legislation will require on all new cars by 1984.[21] While manufacturers will be able to satisfy the requirements by providing either automatic seatbelts or airbags in their vehicles, neither option is fully adequate for child safety needs. Automatic seatbelts designed for average sized adults will not offer even minimal protection to infants. Airbags, on the other hand, will diminish the threat to children riding in the front seat, but present legislation does not require airbag installation for the protection of rear seat passengers, a class composed largely of children.[22] Furthermore, airbags will provide little protection in side- and rear-impact collisions and rollovers.[23]

Finally, unlike a CRD, an airbag would not play a role in preventing the occurrence of an accident. A study conducted at the University of North Carolina concluded that more than two hundred

---

19. *Id.* at 4.

20. The force that a child will exert upon impact can be roughly calculated by multiplying the child's weight and the vehicle's speed together. For instance, a fifteen pound infant will exert a force of three hundred pounds in a twenty mile per hour collision. *See* HHS, *An Evaluation of Adult Clasping Strength for Restraining Lap-Held Infants*, discussed in HHS STATUS REPORT 6 (Mar. 19, 1979).

21. Automatic restraint systems are being phased in over several years with large cars being targeted first. All new cars will have to meet the requirement by the 1984 model year. 49 C.F.R. § 571.208 (1979).

22. One survey found that about seventy percent of the nearly 9000 children observed in motor vehicles were riding in the back seat. Riesinger & Williams, *Evaluation of Programs Designed to Increase the Protection of Children in Cars*, 62 PEDIATRICS 280, 286 (1978).

23. *See* Comment, *Occupant Protection in Automobiles*, 27 AM. U. L. REV. 635 (1978) for a thorough discussion of automatic restraint systems.

of that state's traffic accidents in 1977 were caused by unrestrained children who had distracted the driver of the vehicle in which they were riding. Children who fell off the seat or interfered with the operation of the motor vehicle were, in many instances, found to have been the direct cause of a crash.[24]

All of the problems discussed above would be greatly alleviated by the use of CRDs. Experts in the field generally agree that the number of children killed and injured in automobile accidents would be minimized—some claim by as much as ninety percent—if CRDs were consistently and properly used.[25] Yet recent data shows that only seven percent of the children riding on the nation's roads are adequately secured for protection against possible harm.[26] Parents who wear their own seatbelts while transporting their children have been found to use child restraints more than any other group. Yet even in that situation, only twenty-two percent of the passenger children were secured by a CRD or seatbelt.[27] The great number of children harmed, coupled with the low voluntary usage rate of adequate restraints, has led to a growing interest in a statutory solution to this public health problem.

THE STATUTES

The field of automobile safety is one which legislators enter with trepidation. Traditional public hostility toward regulation of individual driving habits has led to a reluctance to impose safety requirements on individual drivers. Public sentiment was so strong against the federally mandated seatbelt-ignition interlock system,[28] for example, that Congress was forced to repeal the measure less than a

---

24. This study was summarized in MICHIGAN ASSOCIATION FOR TRAFFIC SAFETY, FORMATS, *Child Passenger Safety News* (Feb. 1980)

25. A study of crashes done in Washington state by Dr. Robert G. Scherz, for example, concludes that "[t]he difference between deaths and disabling injuries between the restrained and unrestrained pre-school children was highly significant. If all of the children in the 0-5 age group had been restrained at the time of the accident, then the . . . deaths may have been reduced from 124 to 13 (down 90%) and disabling injuries reduced from 716 to 238."

Alter, *supra* note 9, at 10.

The reduction in injuries in the Washington study is about 33%, a rate very similar to that obtained by analyzing accidents involving children under fifteen years of age in North Carolina. The North Carolina study found that "[u]se of restraints reduced the injury rate by 39% in the front seat and by 31% in back." Williams & Zador, *supra* note 16, at 10.

26. Williams, *supra* note 3.

27. *Id.* at 1114.

28. The seatbelt-ignition interlock system prevented a vehicle's engine from being started until seatbelts were buckled. An annoying buzzer sounded if seatbelts were unfastened while the seat was occupied.

year after it went into effect.[29] This public hostility explains the absence of mandatory seatbelt-use laws in any of the states.

The somewhat warmer reception given to CRD-use laws in state legislatures is undoubtedly due to the age of those who would benefit from such legislation. Because infants and young children are completely dependent on others for their well-being, state law has historically provided for their health and safety when those charged with their care fail adequately to do so.[30] The effectiveness and practicality of extending state protection to children as automobile passengers will be evaluated by examining the various CRD statutes which have been proposed.

The Existing Laws

Two states have succeeded in passing CRD legislation: Tennessee[31] and Rhode Island.[32] The pioneering Tennessee statute, which went into effect at the beginning of 1978, requires that all children under the age of four be secured in a CRD when riding in a vehicle owned and operated by their parents.[33] Exemptions are allowed for children riding on other passengers' laps, and for children riding in recreational vans and certain trucks.[34] The penalty for breaking this law is a moderate fine; and proof of the violation cannot be raised in civil suits for negligence.[35]

30. See text accompanying notes 83-92 *infra*.
31. TENN. CODE ANN. § 55-9-214(b) (1980).
32. R. I. GEN. LAWS § 31-22-22 (1980).
33. TENN. CODE ANN. § 55-9-214 (1980):

(b) Effective January 1, 1978, every parent or legal guardian of a child under the age of four (4) years residing in this state shall be responsible, when transporting his child in a motor vehicle owned by that parent or guardian operated on the roadways, streets or highways of this state, for providing for the protection of his child and properly using a child passenger restraint system meeting federal motor vehicle safety standards, or assuring that such child is held in the arms of an older person riding as a passenger in the motor vehicle. Provided that the term "motor vehicle" as used in this paragraph shall not apply to recreational vehicles of the truck or van type. Provided further that the term "motor vehicle" as used in this paragraph shall not apply to trucks having a tonnage rating of one (1) ton or more. Provided that in no event shall failure to wear a child passenger restraint system be considered as contributory negligence, nor shall such failure to wear said child passenger restraint system be admissible as evidence in the trial of any civil action.

(c) Violation of any provision of this section is hereby declared a misdemeanor and anyone convicted of any such violation shall be fined . . . not less than two dollars ($2.00) nor more than ten dollars ($10.00) for each violation of subsection (b) of this section.

34. *Id.*
35. *Id.*

From a safety standpoint, the most controversial provision of this law is the so-called "babes-in-arms" exemption.[36] Holding a child in a passenger's arms has been shown to be an entirely inadequate substitute for the use of a restraint,[37] and there is hope among the original sponsors of the Tennessee law that this exemption will be repealed at some future date.[38] Unfortunately, similar provisions were included in bills introduced in four other states.[39]

A second aspect of the Tennessee law which may lessen its effectiveness is that it applies only to parents who are transporting their own children. Although the majority of children less than four years old are likely to be driven by a parent whenever they ride in a vehicle, the provision may nevertheless lead to enforcement problems. Since most children carry no identification, the temptation for any parent or guardian to simply assert that he is, for example, the child's uncle or babysitter when stopped for a possible violation is evident. A police officer faced with such a statement would in many cases lack probable cause to go forward and issue a citation.[40]

Tennessee's final exempting provision, which excludes trucks and vans from the law's application, was probably viewed as a practical necessity because of the limited seating which is available in those vehicles. The addition of a further provision requiring that restraints be used if seating were available would strengthen the protective purpose of the law while still acknowledging these practical concerns.

A CRD-use law with quite different provisions went into effect in Rhode Island in July of 1980.[41] Unlike the Tennessee statute, this

---

36. The exemption allowed for children who ride on another passenger's lap was added as an amendment by one of the bill's opponents. He argued that the happiest day of his daughter's life was when she brought her new baby home from the hospital in her arms and that the law would deny this pleasure to other new mothers. It was feared that the law would not be passed if the exemption were removed. R. Sanders, *Effective Interaction With State Legislatures* (paper presented at the Child Passenger Safety Conference, U. of Tenn. Transp. Center, May 10, 1978, available from Action for Child Transportation Safety).

37. See text accompanying notes 17-20 *supra*.

38. Sanders, *supra* note 36.

39. This language was included in bills introduced in Illinois, Louisiana, New Hampshire, and New Jersey, none of which passed. ACTS, *supra* note 5.

40. Probable cause exists when the facts and circumstances within the officer's knowledge are sufficient in themselves to warrant a belief by a man of reasonable caution that an offense has been committed. Brinegar v. United States, 338 U.S. 160, 175-76 (1949). More than mere suspicion is required. Henry v. United States, 361 U.S. 98, 101 (1959).

41. R. I. GEN. LAWS § 31-22-22 (1980):

> Child Passenger Restraint Systems. Any person transporting a child three (3) years of age or under in the front seat of a motor vehicle operated on the roadways, streets or highways of this state, will provide for the protection of the child and

law applies to all persons driving in Rhode Island and therefore avoids the potential enforcement problems posed by a "parents-only" provision. The unique feature of Rhode Island's law is that it requires CRD use by children under the age of four only while they are riding in the front seat of a vehicle.[42] The law thus addresses the most hazardous practices of unrestrained, or on-lap, front seat travel, but fails to provide protection for the majority of child passengers: those who ride in the back seat.[43] A more stringent bill, to be introduced in the South Dakota legislature,[44] would provide the added protection. That bill would require that children ride in the back seat *and* be secured in the vehicle's available seatbelts whenever possible. Should it be necessary for a child to be transported in the front seat, a restraint device appropriate for the child's age and size, such as is required in Rhode Island, would have to be used.

Pending Legislation: Some Further Options

The majority of CRD legislation introduced in other states is similar to the Tennessee law, but without the "babes-in-arms" exemption.[45] These statutes typically would require that a parent who is driving his own vehicle must have his young children secured in CRDs. The protected class of children is most often limited to those younger than four years, or alternatively, to those who weigh less than forty pounds.[46] These age and weight limitations provide convenient lines for the legislators to draw, since they encompass the class

---

properly use a child passenger restraint system approved by the United States Department of Transportation under Federal Standard 213, provided that in no event [shall] failure to wear a child passenger restraint system be considered as contributory negligence, nor [shall] such failure to wear said child passenger restraint system be admissible as evidence in the trial of any civil action.

Any person deemed to be in violation of this section shall be issued a citation with a fine of fifteen ($15.00) dollars and it will be recorded on said person's driving record within the rules and regulations governing Section 31-43.

42. *Id.*

43. While one study found that a "back seat location reduced the injury rate by 28% among unrestrained child passengers and by 18% among restrained children," it further concluded that restrained children are safer than those who are unrestrained, regardless of their position in a vehicle. Williams & Zador, *supra* note 16, at 71.

44. The South Dakota proposal is described in ACTS, *supra* note 5.

45. Arizona H.B. 2418 (defeated in committee), Colorado H.B. 1440 (defeated in the House); Michigan substitute for H.B. 5327, Minnesota H.B. 156 and S.B. 274; Nebraska Leg. B. 79; North Carolina H.B. 1018 (defeated); North Dakota H.B. 1490 (defeated); Oregon H.B. 2667 (defeated in the House); Washington H.B. 199 and S.B. 2895 (withdrawn by sponsors); Wisconsin Asmb. B. 747. The sponsors of many of the defeated bills plan to reintroduce their respective proposals. ACTS, *supra* note 5.

46. *Id.*

of passengers for whom CRDs are typically designed.[47] Also, by drafting legislation concerned with CRD use only, legislators can minimize the political and public opposition which would accompany a more far-reaching restraint-use law.

The four year age limit is not universal, however. California has a bill pending which would encourage the use of appropriate restraint systems for all children under the age of sixteen.[48] This bill is designed primarily to educate the public and would allow law enforcement officers to issue verbal hazard warnings, but not citations, to non-complying motorists. Other age variations are found in the South Dakota legislation mentioned above,[49] which would apply to children up to thirteen years of age, and in a Maryland bill which would require restraint use for the protection of children who are less than eight.[50]

Proposed CRD laws also vary in their determination of who will be responsible for complying with their respective terms. As noted, the majority would hold only parents or legal guardians liable for the failure to use restraint devices. Statutes with broader coverage usually are written to apply to all resident drivers,[51] or to the drivers of all vehicles which are registered in the enacting state.[52] One novel variation is the New York proposal,[53] which would impose a penalty on both the driver of a vehicle in which an unrestrained child was riding, and the vehicle owner who knowingly permitted a child to be transported in that manner.

Other provisions which may be incorporated into some proposed statutes include a ban on carrying passengers in the cargo areas of hatchbacks, station wagons, and pickup trucks,[54] and on the practice of buckling one seatbelt around two people.[55] One exemption under consideration in some states allows children with medical problems

51. *See, e.g.*, Maryland H.B. 33, ACTS, *supra* note 5.
52. *See, e.g.*, Colorado H.B. 1440, ACTS, *supra* note 5.
53. New York S.B. 2623, ACTS, *supra* note 5.
54. *See, e.g.*, Massachusetts S.B. 1269 which would prohibit the carrying of passengers in open trucks. ACTS, *supra* note 5. This particular provision has been enacted by city ordinance in Ogden, Utah. This five year old law forbids persons from riding in any portion of a motor vehicle not designed or intended for use by passengers. It further makes it illegal to operate a motor vehicle while any person is standing on the vehicle's seats. MICHIGAN ASSOCIATION FOR TRAFFIC SAFETY, FORMATS, *Child Passenger Safety News* 4 (Apr. 1980).
55. *See, e.g.*, Maryland H.B. 33; Washington H.B. 199 and S.B. 2895, ACTS, *supra* note 5.

which may make the use of a CRD impossible, to travel without being secured in such a device.[56] To avoid possible abuse of this provision, a doctor's certificate of exemption would be required by some statutes.[57]

In combining any of these provisions into a workable child restraint law, the interest in maximizing safety should be balanced against considerations of fairness and practicality. The statutes must be flexible. For example, a large family that can afford only a small car with inadequate seating for all family members should not be subject to a penalty each time they venture onto the public roads. A law which requires the use of CRDs for available seating and which further requires all unrestrained children to ride in the back seat might best accomodate both safety concerns and tight family budgets.

Flexibility and compromise is also necessary in striking a reasonable balance between the strictness of a restraint law's provisions and the determination of who will be subject to the law's terms. For example, a requirement that CRDs be obtained and used would be less controversial under a law that applies only to parents and legal guardians, rather than to all in-state drivers. Conversely, statutes which apply to all drivers might require only that the vehicle's available seatbelts be used for the protection of children. Under a law of the latter type, parents could still be encouraged to obtain CRDs by other means, such as by allowing a tax credit as an incentive for their purchase. The tax credit incentive is presently under consideration in some states.[58]

Costs and Enforcement

The burden which would be imposed on members of the public by requiring them to obtain CRDs should not be viewed as an insurmountable problem. The cost of these devices, generally between twenty and forty-five dollars,[59] is not unreasonable when it is consid-

---

56. Members of Action for Child Transportation Safety find exemptions for "physical or medical" reasons unacceptable and argue that children unable to sit in the typical car seat style CRD — because of a bulky cast or perhaps some birth defect — are nevertheless entitled to protection. They suggest larger shield or harness type restraints as alternatives. ACTS, *supra* note 5. *See also* L. Schneider, J. Melvin, C. E. Cassidy, *Impact Sled Test Evaluation of Restraint Systems Used in Transportation of Handicapped Children* (paper presented to the Society of Automotive Engineers, Detroit 1979) discussed in HHS STATUS REPORT 5 (Mar. 19, 1979)

57. *See, e.g.*, Colorado H.B. 1440; Massachusetts S.B. 1097, ACTS, *supra* note 5.

58. *See, e.g.*, Michigan S.B. 394, ACTS, *supra* note 5.

59. See note 2 *supra*.

ered that a CRD provides up to four years of protection and that each CRD can be re-used by several children. The price of the device could simply be considered, along with license plates, safety inspections, and insurance, as one of the costs of owning and operating a motor vehicle.

On the other hand, CRD legislation would probably receive greater public acceptance if it were accompanied by programs designed to minimize the cost of compliance. Legislative efforts toward this end could include the tax credit mentioned above and, possibly, Medicaid coverage of CRD purchases for the poor. It has been suggested that Medicaid payments for CRDs could be justified under the same theory that applies to childhood vaccinations—that such devices constitute effective preventive medicine.[60]

As an alternative to government help, many innovative private programs offer means of keeping compliance costs down. Examples include CRD rental programs which have been successfully established in several parts of the country, as well as programs which offer used restraint devices for sale at minimal cost.[61] A different approach has been implemented by one insurance company which provides CRDs to its insured families without charge, thereby spreading the cost of the devices among all of its policy holders.[62] Thus, several possibilities exist in both the government and private sectors which could minimize the financial burden imposed by CRD-use laws.

A final concern about the practicality of these statutes centers on the enforcement problems that they may present, although these problems appear to be no greater than those which accompany many other traffic regulations. As in the case of driving without a valid license, which is against the law[63] but usually goes undetected, CRD violations might often be found only after the driver of the car is stopped for another infraction. More likely, an officer would simply

---

60. Action for Child Transportation Safety is among those groups exploring the possibility of Medicaid payments for CRD purchases. Allowing such payments was urged by the safety coordinator of a pediatric preventive medicine program in testimony before the House Commerce Subcommittee on Oversight and Investigation. HHS STATUS REPORT 7 (May 17, 1979).

61. Several such programs are described in *Child Passenger Safety News*, *supra* note 24.

62. Robert E. Vanderbeek, president of the League General Insurance Companies of Southfield, Michigan told the House Commerce Subcommittee on Oversight and Investigation that "[t]he program . . . makes economic sense and we believe will be cost effective — it will pay for itself through reduced claims." HHS STATUS REPORT 6 (May 17, 1979).

63. *See, e.g.*, COLO. REV. STAT. § 42-2-101 (1973).

notice a child standing on the seat of a vehicle or riding on another person's lap and then pull that vehicle over in order to issue a ticket to the driver. Children traveling in dangerous positions are often visible to other motorists on the road and no extraordinary surveillance techniques would be needed by police charged with halting that practice.

The Police Power

Each state possesses authority to pass laws which protect the health, safety, or welfare of the public.[64] This authority is an inherent aspect of the state's sovereignty and is known as its police power.[65] In determining the validity of any legislation passed pursuant to this power, courts typically employ a two-step analysis. Such a law will be upheld if it furthers a legitimate state objective and if the means employed to attain it are reasonably related to that end.[66]

A Legitimate Objective

An appropriate state objective has been held to be any one which promotes or protects the public welfare.[67] This definition is elastic enough to encompass the wide variety of laws which are enacted in response to changing public needs. The shift from an agrarian to an industrial society, for example, created the need for regulations such as workmen's safety, pure food, and urban housing and sanitation laws.[68] More recently, the public welfare concept has been expanded to include rent control laws,[69] anti-deceptive credit practice laws,[70] and anti-billboard and landmark preservation statutes

64 *See* Berman v. Parker, 348 U.S. 26, 32 (1954); East New York Bank v. Hahn, 326 U.S. 230, 232 (1945); Nebbia v. New York, 291 U.S. 502, 523 (1934); License Cases, 46 U.S. (5 How.) 504, 583 (1847).

65. The term "police power" appears to have been first used by Justice Marshall in Brown v. Maryland, 25 U.S. (12 Wh.) 419, 433 (1827). It is a residuary power, one which was retained by the states after certain enumerated powers had been transferred to the new federal government.

66. "To justify the state in . . . interposing its authority in behalf of the public, it must appear, first, that the interests of the public . . . require such interference, and, second, that the means are reasonably necessary for the accomplishment of the purpose, and not unduly oppressive upon individuals." Goldblatt v. Hempstead, 369 U.S. 590, 594-95 (1962) *quoting* Lawton v. Steele, 152 U.S. 133, 137 (1894).

67. *See, e.g.*, In re Interrogatories of the Governor, 97 Colo. 587, 595, 52 P.2d 663, 667 (1935) which notes that this power is as "broad as the public welfare."

68. *See* Morissette v. United States, 342 U.S. 246, 253-54 (1952).

69. Hutton Park Gardens v. West Orange Town Council, 68 N.J. 543, 350 A.2d 1 (1975).

designed to protect the aesthetic features of an area.[71]

Regulations such as these can be viewed as an attempt to redress an unequal balance of power. When members of the public are faced with some threat with which they cannot deal on an individual level, the constitutional niche known as the police power has enabled the state to attempt to protect their well-being by regulating the conduct of those who do have the power and ability to mitigate the potential harm. Thus, the acts of the employer, the manufacturer, and the polluter may be regulated for the benefit of the worker, the consumer, and the public at large.

The CRD statutes fit easily into this pattern. In passing these laws, states are seeking to protect a particularly powerless class of people by regulating the behavior of those in the best position to minimize the risk to that class. Insofar as they seek to promote safety, these statutes are at the core of the police power doctrine.[72]

Highway Regulations. Specifically, CRD legislation is addressed to the problem of highway safety, an area in which the states have extensively exercised their rule-making powers.[73] Since the arrival of the automobile, both drivers and vehicles have been subjected to a variety of statutory requirements designed to protect the driving and riding public. In evaluating the validity of CRD laws as highway safety regulations, a useful analogy can be drawn from the motorcycle helmet laws which, like CRD laws, mandated the use of specialized equipment.

The controversial helmet laws, which swept the country approximately a decade ago, were sustained as valid police power legislation by the overwhelming majority of courts which faced the issue.[74] The Colorado Supreme Court's discussion in the case of *Love v. Bell*[75] is typical of many of these opinions. As with most of the courts across the country which addressed the problem, the Colorado

74. Helmet statutes were struck down in only two of the thirty-three states in which they were challenged: Illinois, People v. Fries, 42 Ill.2d 446, 250 N.E.2d 149 (1969) and Michigan, American Motorcycle Association v. Davids, 11 Mich. App. 351, 158 N.W.2d 72 (1968). The Michigan Supreme Court upheld a very similar municipal law several years later in City of Adrian v. Poucher, 398 Mich. 316, 247 N.W.2d 798 (1976). The helmet cases are collected in 32 A.L.R.3d 1270.

75. 171 Colo. 27, 465 P.2d 118 (1970).

court studiously avoided the most salient issue which grew out of the helmet legislation, the issue of whether mandatory self-protection and of regulating a person for his own good was a valid state objective.[76] Instead, the court sought to find some benefit which the helmet statutes provided to other highway users in order to sustain the law. It found one such benefit in the economic area, noting the "laws may be passed within the police power to protect the public from financial loss."[77] In drawing upon a record which showed a higher frequency of serious head injuries and deaths among bare-headed riders than among those who wore helmets, the court ruled that the law protected the public's financial health since it prevented motorists involved in accidents with motorcycles "from being required to respond in damages more heavily than might be the case if the motorcycle driver and passenger were wearing helmets."[78] Other courts also employed the "financial health" argument and cited increased public medical and welfare costs which would have to be paid to disabled cyclists, as well as higher insurance rates.[79]

Most of the helmet law opinions did not rest solely on this economic protection analysis, but also sought some connection between helmets and the public's physical well-being. Many courts found such a connection in the "flying debris" theory, which is based upon the hypothesis that an unprotected cyclist might be struck in the head by loose gravel or other objects thrown up by passing vehicles, thereby causing the cyclist to lose control and possibly cause an accident.[80] The courts were unswayed by the argument that such a chain of events had never been known to have occurred.

If CRDs are substituted for helmets in the analysis above, the reasoning employed in the typical helmet case not only remains valid but is, in fact, strengthened. As with helmets, CRDs offer the potential for mitigating physical, and therefore, financial damages resulting from highway accidents. More importantly, a CRD law would not leave a court having to strain for a "loose gravel" rationale in

---

76. Few courts were willing to ground their opinions on the self-protecting aspect of helmet legislation. Two cases which did discuss this issue were People v. Carmichael, 56 Misc. 2d 388, 288 N.Y.S.2d 931 (1968) (state has an interest in preserving strong, healthy citizens) and State v. Mele, 103 N.J. Super. 353, 247 A.2d 176 (1968) (state has an interest in protecting people from their own carelessness).

searching for a connection between the regulation and the physical safety of non-regulated members of the public. In contrast to the helmet law discussions on this point, the potential beneficiaries of CRD legislation are not hypothetical, their existence is clearly documented in the "0-4 years" column of each state's accident reports.

The mandatory helmet statutes are perhaps on the periphery of valid police legislation. They raise the difficult problem of the extent to which an individual can be regulated for his own good. Shifting political attitudes on just this point have resulted in the repeal of helmet laws in twenty-eight of the forty-nine states which originally enacted them.[81] The notion of protecting a person against himself is not a factor in CRD legislation, however, for in requiring the use of child restraints the state is attempting to protect those too young to make rational choices in their own best interest. In this vein, it is interesting to note that of those states which repealed helmet laws, nearly two-thirds reenacted such legislation applicable only to minors.[82]

Parens Patriae. The state's interest in the well-being of its youth is of ancient origin. Plato believed that the good of the state as a whole justified the regulation of child-rearing practices.[83] His pupil, Aristotle, differed on this point, suggesting that regulations were necessary only to protect the interests of the individual child.[84] These two theories have survived to the present and are often meshed with a third concern, an interest in preserving the family structure as the basic unit in society.[85]

---

81. California is the only state never to have enacted helmet legislation. A summary of the recent status of helmet laws in this country, including dates of enactment, repeal and pending legislation is compiled in HHS STATUS REPORT 5-8 (Apr. 30, 1979).

82. *Id.*

84. ARISTOTLE, POLITICS 32-33 discussed in Kleinfeld, *The Balance of Power Among Infants, Their Parents and the State*, 4 FAM. L. Q. 410, 411-12 (1970).

85. See text accompanying notes 105-08, *infra*. An example of the interweaving of these ideals is the preamble to the Colorado Children's Code, COLO. REV. STAT. § 19-1-102 (1973): The general assembly declares that the purposes of this title are:

> (a) To secure for each child subject to these provisions such care and guidance, preferably in his own home, as will best serve his welfare and the interests of society;
>
> (b) To preserve and strengthen family ties whenever possible, including improvement of home environment;
>
> (c) To remove a child from the custody of his parents only when his welfare and safety or the protection of the public would otherwise be endangered; and
>
> (d) To secure for any child removed from the custody of his parents the necessary

The Platonic theory was mentioned more often in early cases dealing with child-related legislation than it is today. For instance, in sustaining the state's compulsory schooling law, the Colorado Supreme Court in 1927 stated flatly that "[t]he state, for its own protection, may require children to be educated. This needs no citation."[86] This "good-of-the-state" approach is also reflected in statutory provisions, such as those which override parental objections to immunization whenever a community is threatened with an epidemic.[87]

Statutes usually demonstrate a more Aristotelian concern for the welfare of individual children, rather than for the state as a whole. Examples are child abuse laws,[88] child labor laws,[89] and those mandating specific medical procedures to prevent blindness[90] and mental retardation[91] in newborns. The "child protection" rationale is also cited frequently by state courts since the United States Supreme Court has stated that "[t]he well-being of its children is of course a subject within the State's constitutional power to regulate. . . ."[92]

Although CRD legislation arguably benefits the state as a whole by preserving the health of future productive citizens and by reducing the number of those who might require long-term public aid because of automobile injuries, its primary purpose is to prevent needless harm from being inflicted upon young children. This latter goal is an entirely appropriate one, as has previously been shown. The question that remains is whether requiring individual drivers to obtain and use child restraints is a reasonable method of attaining that objective.

Reasonable Means

The legislature is given wide discretion in implementing its goals, and a presumption of validity attaches to each statute it enacts.[93] In order to rebut this presumption, an opponent must prove that a law, when applied, violates some provision of the state or federal constitution,[94] or that the law does not reasonably relate to the state's objective in passing it.[95] The question of its "reasonableness" is, in fact, the central issue in any challenge to a police power regulation.[96]

Most statutes promulgated under the police power seek to protect public welfare by regulating conduct in the manufacturing and professional sectors. Individual behavior may also legitimately be regulated so long as the burden imposed does not infringe on a fundamental right.[97] A mere showing "that in its operation a police measure may increase their labor, decrease the value of their property or otherwise inconvenience individuals" will not suffice to render a law void.[98] Securing a child in a CRD before each automobile trip may at times be inconvenient, but the question of concern to a reviewing court would be whether a law mandating that action infringes upon a fundamental right.

An opponent of CRD legislation could claim that any one of several rights are infringed upon by such a law: the right to parental autonomy[99] and privacy;[100] the right to equal protection under the

97. Fundamental rights are those rights "implicit in the concept of ordered liberty." Palko v. Connecticut, 302 U.S. 319, 325 (1937).

98. In re Interrogatories of the Governor, 97 Colo. 587, 596, 52 P.2d 663, 667 (1935). One example of a law which puts the burden of compliance on individuals is COLO. REV. STAT. § 33-31-105 (1973 & Supp. 1979). This law makes it the duty of a boat owner or operator — not of the boat manufacturer — to provide an adequate life preserver for each person on board.

99. Parental rights are afforded constitutional protection against unwarranted or unreasonable interference by the state. Planned Parenthood v. Danforth, 428 U.S. 52, 73 (1976); Wisconsin v. Yoder, 406 U.S. 205 (1972); Meyer v. Nebraska, 262 U.S. 390 (1923). *See also* Smith v. Organization of Foster Families, 431 U.S. 816, 842-44 (1977); Ginsberg v. New York, 390 U.S. 629, 639 (1968).

law;[101] and the right to free and unrestricted travel between the states.[102] The last claim can be quickly dispensed with by once again analogizing to the helmet cases, which consistently held that the right to travel was not unreasonably restricted by requiring motorcyclists to obtain and use a relatively inexpensive piece of safety equipment.[103] This right was not infringed even though the helmet statutes were written to apply to all, and not just resident, motorcyclists travelling on the enacting state's roads.[104] The CRD laws are not as broad as the helmet statutes since they typically apply only to resident parents or to those driving vehicles registered in the enacting state. Non-resident tourists therefore would not be subject to the law's provisions.

Parental Autonomy and Privacy. The allocation of power between parent and state in making decisions concerning the best interests of the child is always a sensitive issue. Supreme Court cases have "consistently recognized that the parents' claim to authority in their own household to direct the rearing of their children is basic in the structure of our society."[105] Indeed, the integrity of the family unit has found protection in the Due Process[106] and Equal Protection[107] Clauses of the fourteenth amendment and in the ninth amendment.[108]

Despite this high regard for the family unit, laws which restrict parental autonomy in order to further the welfare of children are usually sustained. Such laws are struck down only if they are arbitrary and capricious. For example, a law attempting to promote good citizenship by banning the teaching of foreign languages in elementary schools was struck down in *Meyer v. Nebraska* on these grounds.[109] Similarly, if the state's objective in passing the law is not sufficiently compelling to overcome a parental objection based on a

109. 262 U.S. 390 (1923).

freedom of religion claim it will be held void.[110]

CRD statutes could not be invalidated under either theory. These laws are narrowly drawn, requiring the use of an effective, readily available device designed specifically for the purpose of protecting children in motor vehicles, and are therefore not vulnerable to charges of arbitrariness or caprice. Nor could these laws, which are essentially traffic safety regulations, conceivably be subject to any objections based on religious grounds. In short, the statement that it is "fundamental . . . that parental rights must yield to the interest and welfare of the child"[111] would appear to be particularly uncontroversial when applied to the issue of highway safety.

Parental rights are based to a large extent on the broader claim of a right to privacy—the "right to be let alone."[112] This broader right itself is not unreasonably infringed upon by traffic regulations, as aptly pointed out by the Wisconsin Supreme Court:

> There is no place where any such right to be let alone would be less assertible than on a modern highway. . . . When one ventures onto such a highway, he must be expected and required to conform to public safety regulations and controls, including some that would neither have been necessary nor reasonable in the era of horse-drawn vehicles.[113]

Equal Protection. CRD statutes distinguish between children less than four years old and all other highway users. If a court were convinced that no rational basis existed for this distinction, it could void such legislation on the ground that it denies the public equal protection under the law. A statutory discrimination will not be invalidated, however, if any state of facts reasonably can be conceived to justify it.[114]

When reviewing CRD legislation, a court could rely on several supporting factors to sustain the legislature's classification. A court could find that members of the statutorily created class of children four years of age or younger face a greater risk of injury or death than do others in accident situations, are incapable of making ra-

114. Dandridge v. Williams, 397 U.S. 471, 485 (1970), *rehearing denied*, 398 U.S. 914 (1970).

tional choices to further their self-preservation, and are not afforded the same degree of protection by existing safety belts as are older passengers for whom such belts are designed.[115] Furthermore, although all legislatively imposed age restrictions are arbitrary to some extent, the class delineated by CRD legislation is not unreasonable since it corresponds to that class for which CRDs are designed and manufactured.[116] These factors could support a finding that a state of facts sufficient to justify the statutory distinction exists.

Finally, it should be noted that although all automobile passengers could benefit by mandatory seatbelt laws, the fact that such laws have not been enacted is insufficient to void CRD laws under the Equal Protection Clause. A law will not be invalidated for violating that Clause merely because the legislature has not "comprehensively remedied all problems at once—it is entitled to proceed one step at a time."[117]

In sum, CRD legislation is valid under both the "ends" and the "means" prongs of the police powers analysis. The state is operating in traditional areas when it seeks further highway and child safety, and no fundamental rights are threatened when the state mandates the use of appropriate equipment in attempting to attain that safety objective.

Civil Proceedings

Aside from the constitutional issues, the legal ramifications which could attend CRD legislation in certain civil cases remain to be examined.[118] Although the only two CRD laws currently in force expressly provide that a breach of their respective terms may not be

117. Bushnell v. Sapp, 194 Colo. 273, 280, 571 P.2d 1100, 1104 (1977).

118. CRD statutes could also have an impact on certain criminal proceedings, particularly vehicular homicide and vehicular assault cases. Drunk driving typically is a misdemeanor, but if death to another results, it may be filed as vehicular homicide, a felony. If a drunk driver collides with a vehicle in which an unsecured child is riding and the collision results in the death of that child, a decision to file a felony charge against the drunk driver may pose problems. In Colorado, for example, such a charge can be brought only against a person whose wrongful acts were the "sole proximate cause" of a highway death. Goodell v. People, 137 Colo. 507, 509, 327 P.2d 279, 280 (1958). If the child would not have died had he been properly secured in a CRD, then the failure to use that device would be another proximate cause of his death. Hence, felony charges could not be lodged against the drunk motorist.

The problem is not merely a speculative one, for prosecutors in Michigan have contacted state highway officials to seek advice on this particular issue. Telephone interview with David Shinn, Driver and Vehicle Admin., Mich. Dep't of State, July 1980.

raised in any civil action,[119] future enacting states may pass such laws without this limitation. The discussion below evaluates the impact which a CRD statute without a "no liability" clause could have in negligence lawsuits.

Civil Liability

Negligence per se. In the absence of CRD legislation, a suit for negligence brought on behalf of a child injured in an automobile accident against the child's driver would face serious obstacles. Typically, in order to support a negligence claim, the burden is on the plaintiff to establish by a preponderance of the evidence that the defendant owed him a certain standard of care, that the standard was breached, and that the breach was a cause of the harm suffered.[120] Without a CRD law in force the plaintiff's burden on the question of "standard of care" would be substantial. He would have to assume the burden of educating and persuading six or twelve peers from the community on the practicality and wisdom of CRDs. The fact that the community as a whole has shown little inclination to use child restraints indicates the size of the plaintiff's task in proving this element of the case.

Were a CRD-use law in existence, however, the mere fact of its enactment would greatly lessen the plaintiff's burden. In passing that law, the legislature would have established in specific language the appropriate standard of care which was owed by the defendant, and that question would be removed from the jury's consideration.[121] In other words, the plaintiff could show that the defendant acted negligently simply by showing that the defendant breached the statute. The only further burden the plaintiff would have in this negligence per se claim would be to show a causal link between the harm suffered and the negligent act or omission.[122]

As previously shown,[123] proof of causation should not be difficult, particularly if the child's injuries resulted from his ejection from the vehicle, or from his collision with some portion of its inte-

tempts to shift some of the responsibility for the harm done to the injured child to that third party, but no doctrine would provide this original defendant with complete immunity from liability. Contributory or comparative negligence statutes which limit or totally bar the payment of compensation to a plaintiff would be inapplicable to CRD related lawsuits. Those statutes apply only when the plaintiff has been shown to have contributed to his injuries by his own careless actions.[130] A pre-school aged child is, in many states, legally incapable of negligence,[131] and his failure to look out for his own safety cannot be raised as a defense in any suit in which that child is a plaintiff.[132]

Nor can the defendant obtain complete immunity from liability by claiming contributory negligence due to the carelessness of a plaintiff child's parents. The "doctrine that the negligence of the parents of a child of tender years shall be imputed to the child" was dismissed in one early case as "not only unsound, but absurd and inhuman,"[133] and that doctrine is universally rejected today.

The child's driver, on the other hand, stands a better chance of claiming immunity if he is brought into the negligence case as a third party defendant. If he is unrelated to the plaintiff he can seek to avoid liability under any guest statutes which exist in that state. These laws, which are no longer as prevalent as they once were, prevent a person from suing his "host" driver for any injuries sustained while riding as a non-paying passenger in that driver's vehicle.[134] The laws have been justified in part by an "assumption of the risk" type of theory and for that reason have often been held inapplicable to young children.[135] The child's driver has a much better chance of claiming immunity, and therefore of imposing the full cost of compensating the child on any other defendants, if he is the plaintiff

135. *See, e.g.*, Burhans v. Witbeck, 375 Mich. 253, 134 N.W.2d 225 (1965); Wood v. Morris, 109 Ga. App. 148, 135 S.E.2d 484 (1964); Green v. Jones, 136 Colo. 512, 319 P.2d 1082 (1957).

such lawsuits will tend to preserve family harmony.[142] In any CRD related action, the plaintiff would necessarily be a very young child, incapable of maliciously plaguing his parents with lawsuits. The decision to bring a suit on his behalf will most likely be made by the child's parents, with an awareness that their liability insurer will be the true defendant. Under those circumstances, commencing an action is not evidence of a family's internal strife, but rather of the "provident management of its affairs."[143]

The invalidity of the first two arguments, which ignore the existence of liability insurance, must be conceded before credence can be given to the third argument: allowing children to sue their parents will lead to widespread collusion and fraud against insurance companies.[144] A trust in the jury system and its ability to distinguish between valid and fraudulent claims is the first step which must be taken to reject the argument. The courts have consistently reaffirmed that trust and have relied on juries to prevent injustice to insurance companies in automobile cases between husbands and wives[145] and between close friends.[146] No readily apparent reason exists for refusing to extend that trust to cases involving a parent and child.[147] Indeed, an attempt by a parent to defraud an insurance company in a case which centered on the lack of CRD use would be quite difficult. Because of his age, the plaintiff could not be an active participant in the scheme and could not be counted on to convincingly fake a nonexistent harm.

The strongest reason for abrogating parental immunity, at least under the limited circumstances of a CRD law, is largely unrelated

---

142. The family harmony argument originated in Roller v. Roller, 37 Wash. 242, 79 P. 788 (1905), a much maligned case in which a daughter was prevented from bringing a civil action for rape against her father based on the family harmony theory.

143. Badigan v. Badigan, 9 N.Y.2d 472, 479, 174 N.E.2d 718, 723, 215 N.Y.S.2d 35, 41 (1961) (Fuld, J., dissenting).

144. *See* Windauer v. O'Connor, 13 Ariz. App. 442, 477 P.2d 1157 (1971), *modified*, 107 Ariz. 267, 485 P.2d 561 (1971); Breinmeckle v. Kilpatrick, 336 S.W.2d 68 (Mo. 1960); Small v. Rockfield, 66 N.J. 231, 330 A.2d 335 (1974).

145. *See, e.g.*, Rains v. Rains, 97 Colo. 19, 46 P.2d 740 (1935) (abolished interspousal immunity in the context of an automobile negligence case).

146. *See, e.g.*, Johnson v. Hassett, 217 N.W.2d 771 (N.D. 1974) in which the court noted the "good sense of the juries" as a protection against fraud in the absense of a guest statute.

147. In abrogating parental immunity, one court stated: "Even assuming that a few fraudulent and collusive claims will slip through judges and juries (and there is no impirical [*sic*] evidence that the assumption is valid) we believe that this price would not be too great since the alternative is to continue a prophylactic rule which indiscriminately bars all claims." France v. A.P.A. Transp. Corp., 56 N.J. 500, 505, 267 A.2d 490, 493 (1970).

House Hells: 1:35
Tischer, Kop, Herman, Fritz

HB 262:
Tischer - Yield to Rep. Clocksin.

Clocksin - 4 prts
1) Prohibit w/o Restraint - pg 1 - thru l 28
2) Allow - evidence of failure to use Restraint - Comparative negligence. Rules of Ct. open as to whether this info can be used as evidence.
3) Est. of loan program - an expansion of existing program under Public Safety. Bartlett provides loaner program. hospitals & health centers
4) Prohibition of Sale of device which does not meet Fed. standards.

Senate Version: amendments to improve bill.

M. Miller - % Fiscal for loan program - Where are funds coming from?
Clocksin - Approp in Budget to carry on existing program. Fed $ also provided. Amer - Volunteer efforts.
M. Miller - Supports bill.
Tischer - Intent? - provide safety for child - goal? Mandatory - used w/o exception - how much are seats? Clocksin - $40?
- U.S. Standards - clocksin - could provide - that will resist severe blow - not collapsable.
- Why look @ statutes to mandate if the program is effective. Ques. Law in citing a parent.
Herman - Requirement?
Clocksin - 2 proposed amendments 1) Off-road vehicles

2) exemption to allow for more children than car seats or space available.

Tischer gave Robin Hartlieb's testimony: Rec'd corres. in favor of bill.
- Additional drive for public awareness

Carolyn Crouch: In Support of HB 262. Involved for 3 yrs. 1st in NC. 1982 law - automobile accidents are #1 killer of children. Similated to child immunizations. Raised 10,000 from private sector - $3,000 matched = 500 seats for County Medical Society. $15 deposit - return $10/1978 Tennessee law - now 22 states comply.

Peggy Wilson - NC Child Passenger Safety Assoc.
Supports bill.

Tischer - Six kids - all still living - w/o mandatory legislation. Making it a crime for a parent in not looking out for their youngster.

Clodfelter - Legis makes it an infraction. Fine of up to $300 - no jail time.

Dr. Littlebridge tape: 39,000 tk's under 5 yrs.
Survey - prior to mandatory statute laws - not effective than Education Programs only.
Law should not be necessary & - can't be effective & it is necessary. 60 serious injuries annually.
Loaner Programs - Already established - Jaycees, Silk, Rk, Shelby

Tischer - Position on bill as written.
Davis - Clodfelter Amendments.

Motion by Miller:

Pg. 1 of HB 262 -- delete pg. 1 l 11-28 pg.
Insert from CSSB 163. Trans - l 11
thru of l 3 on pg 3 -
leaves (d) changes to new section.
in place

Tischer - Object to examine bill.

Doll - hand holding child - & use ~~child~~ Seat belts if in someone elses car -

Clocker - Under 4 - Seatbelt not safer - stroller ban

Clocker - SB 163 only addresses 1st part of HB 262. Amendments to 163 are improvements. Other 3 parts are not addressed at all in ~~the~~ Senate Version.

Pg 1 - l 15-17 of SB 163 - Change in wording - Fel's set standards

Staff - to put versions together - w/ any additions to hear on Monday

- Amendment on ~~Floor~~ to make CS. - CS passes by Monday.

Compiler's Notes. For table of U.S. decennial population of Tennessee counties, see the supplement to volume 16 (tables).

Amendments. The 1982 amendment added subsection (c).

Effective Dates. Acts 1982 (Adj.S.), ch. 850, § 4. April 22, 1982.

Section to Section References. This section is referred to in § 55-9-402.

55-9-214. Safety belts and child passenger restraint systems required — Violations — Penalties. — (a) It shall be unlawful for any person to buy, sell, lease, trade or transfer from or to Tennessee residents, at retail, an automobile which is manufactured or assembled commencing with the 1964 models, unless such automobile is equipped with safety belts installed for use in the left front and right front seats thereof. All such safety belts shall be of such type and be installed in a manner approved by the department of safety of the state of Tennessee. The department shall establish specifications and requirements of approved types of safety belts and attachments. The department will accept, as approved, all seat belt installations and the belt and anchor meeting the specifications of the Society of Automotive Engineers. Provided that in no event shall failure to wear seat belts be considered as contributory negligence, nor shall such failure to wear said seat belt be considered in mitigation of damages on the trial of any civil action.

(b) Effective January 1, 1978, every parent or legal guardian of a child under the age of four (4) years residing in this state shall be responsible, when transporting his child in a motor vehicle owned by that parent or guardian operated on the roadways, streets or highways of this state, for providing for the protection of his child and properly using a child passenger restraint system meeting federal motor vehicle safety standards; provided, however, nothing in this section shall restrict a mother from removing the child from such system and holding the child when the mother is nursing the child, or attending to its other physiological needs. Provided that the term "motor vehicle" as used in this paragraph shall not apply to recreational vehicles of the truck or van type. Provided further that the term "motor vehicle" as used in this paragraph shall not apply to trucks having a tonnage rating of one (1) ton or more. Provided that in no event shall failure to wear a child passenger restraint system be considered as contributory negligence, nor shall such failure to wear said child passenger restraint system be admissible as evidence in the trial of any civil action.

(c) Violation of any provision of this section is hereby declared a misdemeanor and anyone convicted of any such violation shall be fined not less than twenty-five dollars ($25.00) nor more than fifty dollars ($50.00) for each violation of subsection (a) of this section and not less than two dollars ($2.00) nor more than ten dollars ($10.00) for each violation of subsection (b) of this section. Provided, however, that no court costs shall be imposed or assessed against anyone convicted of a violation of this section. [Acts 1963, ch. 102, §§ 1, 2; 1977, ch. 114, §§ 1, 2; T.C.A., § 59-930; Acts 1981, ch. 86, §§ 1, 2.]

Amendments. The 1981 amendment deleted the words "or assuring that such child is held in the arms of an older person riding as a passenger in the motor vehicle" at the end of the first sentence of subsection (b), added at the end of the first sentence of subsection (b) the proviso beginning "provided, however," and ending with "other physiological needs", and added the second sentence of subsection (c).

(X) no Provision for hand holding children

(X) no Provision for seat belt for under 4 yrs.

want no "mandatory" misdemeanor

Section 1 of this bill adds a new subsection to the current Unlawful Exploitation of a Minor statute, making it a class B felony for a parent or guardian to knowingly allow his child to participate in sexual activities which will be used to produce a pornographic film, TV show, photograph, etc. Since in most cases a parent who would knowingly allow his child to engage in such activity would also be involved in "inducing or employing" the child to perform these acts (conduct which is already covered under existing law), it is expected that there would be only a few additional prosecutions under this portion of the bill. These few new cases could probably be handled by the present prosecution staff.

Section 2 of the bill makes it a class C felony for a person to knowingly sell or distribute pornographic material which visually depicts children engaged in sexual behavior. The bill could result in a large number of additional criminal prosecutions, as the sale or distribution of pornographic material of any sort is not now a criminal offense in this state. It is anticipated that enforcement of the new law would require the addition of two new prosecutors and one new secretary statewide. This estimate is based on the number of establishments in this state which are known to sell pornographic material, the complexity of legal issues that are involved in these types of cases, and the knowledge that con-

victions under similar statutes in other states are almost always appealed on constitutional grounds to the highest appellate court in the state, and frequently to the United States Supreme Court.

Fiscal Analysis - SSHB 270

The impact of HB 270 is expected to result in the addition of two Attorney IV positions (SR 24) and one Legal Secretary position (SR 10).

The first year of this analysis will cover 10 months of FY 84, allowing 2 months for these three positions to be established. The costs beyond FY 84 have been projected on a 12 month basis and include a 6% annual inflation factor.

1st Year (10 months)

	AIV(PFT)	AIV(PFT)	L/SI(PFT)	TOTAL
Personal Services	53.7	53.7	23.4	130.1

JUSTIFICATION

To accommodate the addition of new felony statutes for the prosecution of those who knowingly sell or distribute pornographic material which visually depicts children engaged in sexual behavior, the Department of Law is requesting two new attorney positions and a new secretary position. This is one of two attorney positions which will be responsible for the enforcement of the new felony statutes statewide, including the pursuit of the many cases which will undoubtedly be appealed on constitutional grounds to the state's highest court and to the U.S. Supreme Court. These cases will involve complex legal issues which have been previously unaddressed by Alaska's criminal code.

JUSTIFICATION

This position is required to provide support for the two new attorney positions. This secretary will be responsible for the preparation of a large volume of court documents generated by the appeal of cases dealing with the constitutionality of Alaska's statutes on child pornography. The allocation of a single secretary to serve two full time attorneys is the minimum amount of support needed to meet the workload anticipated and is within the normal ratio of attorneys to secretaries for the Department of Law.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

Sponsor Substitute for House Bill No. 270

"An Act relating to child pornography."

House Bill No. 270 raises the penalty for exploitation of a minor from a Class C felony to a Class B felony in AS 11.41.455. House Bill No. 270 also adds a new section, Sec. 11.61.125, to Alaska State Statutes which makes distribution of child pornography a Class C felony. The Department estimates that one additional medium security bed will be necessary to house offenders convicted of unlawful exploitation of a minor and/or distribution of child pornography.

3/8/83

IV. ANALYSIS

A. Assumptions

Based on conversations with Department of Law staff, it is assumed that there will be one additional Class B felony conviction and four Class C felony convictions per year. It is assumed all will be first time offenders. Therefore it is estimated that 50% of the Class B and 20% of the Class C felony offenders will receive terms of confinement. This will result in approximately 1.5 person years per year of jail time will be served.

It is further assumed that the distributors of child pornography will remove these materials from their visible stock and convictions for distribution of child pornography will decrease from the original estimate of four per year.

Therefore, it is estimated that one additional medium security bed will be required if this proposed legislation is enacted.

B. Program Summary

1. Positions - An average of one position is required for every 2½ beds. Since only one bed is requested in the fiscal note, no positions are identified as being needed.

2. Other expenditures

a. Contractual Services
Medical care and counseling services $2400

b. Commodities
Food and clothing $2500

c. Grants
Inmate gratuities for kitchen, janitorial or other assigned tasks $200.

C. Impact

There will be no significant economic on local government as a result of passage of this bill.

STAFF REPORT

HB 270 RELATING TO CHILD PORNOGRAPHY

MARCH 30, 1983

Dave Palmer

Section 1.
11.41.455 (a) Unlawful exploitation of a minor--defines the crime. This is the existing statute. No change.

(b) This new subsection provides that those adults who have custody of a minor who knowingly permit the exploitation in (a) are guilty of exploitation.

(c) Both offenses are a class B felony.

11.61.125 (a) This new section makes distribution or intent to distribute child pornography a crime.

(b) certain exemptions are allowed for employees of a theater.

(c) Distribution of child pornography is a class C felony.

The SSHB 270 deletes the definition of "obscene". A memo from legal services cites a US Supreme Court case that allows penalization for the production of child pornography and the distribution of material depicting children engaged in sexual conduct without requiring that the material be legally obscene.

Additional amendments are proposed by the sponsor. He requests they be incorporated into the bill as a committee substitute. The proposed changes are attached to this report

Two fiscal notes are attached. a zero note from the Department of Public Safety, and a $185.6 fiscal note from the Department of Law.

ADDITIONAL AMMENDMENTS
FOR HOUSE BILL 270

1. Raising age covered from 16 to 18:

Sec. 11.41.455 (a) (Line 14 and 15, Page 1)
(b) (Line 26, Page 1)

Rationale:

a. Enforcement of this law is predicated on proving to the court that the persons featured in these pornographic materials is under a certain age. When a victim cannot be positively identified (as in cases where materials are imported from outside Alaska and the child is not physically present) it is very difficult to prove beyond the standard reasonable doubt that a child who has reached the puberty stage of development is under 16 from physical appearance alone. Using 18, it would be much easier to prove when dealing with victims are actually between 13 and 16. This is the age bracket most encountered in the experience of the Anchorage Police Department according to Police Chief Porter.

b. Under existing law a person under the age of 18 is treated generally as subject to the juvenile system of justice as opposed to the adult system. It is only logical that we apply the same maturity standard when that same person is the victim under the law.

c. January 26, 1983 Senator Specter introduced similar legislation in Washington, D.C. and the Bill being reviewed by Judiciary uses the age of 18 as its criteria. Should this Bill pass, Alaska State Statutes would conform to the Federal standard.

2. Addition to include "Simulated" sexual acts:

Amend to read in Sec. 11.41.455, Line 16 page 1:

"in the following actual or simulated conduct:"

Rationale:

The deplorable intent is the same whether the sexual acts involved in the exploitation of these children are actual or simulated. We also want to avoid the technicality of having to prove whether the acts were actually performed or only simulated.

3. Change this exploitation of a minor from a Class B Felony to a Class A Felony, and distribution of the materials from a Class C Felony to a Class B Felony.

Rationale:

a. Experience of experts shows that the "damage" to these victims is of major proportions. These are not minor crimes. Aside from the actual physical injury caused to many of these victims, the psychological damage is often extensive. There is also the continuing threat of having those acts depicted in these pornographic materials publically and graphically exposed throughout the victim's lifetime. There also seems to be a heavy causational effect to the child's subsequent hard delinquency. In addition there seems to be a likelihood that these victims can continue the abuse on their own children.

POSITION PAPER/Department of Health & Social Se

POSITION PAPER
HOUSE BILL NO. 270

"An Act relating to child pornography."

House Bill 270 amends the criminal code by adding three major provisions to the laws dealing with child pornography:

1. The parent, legal guardian or person having custody or control of a child under 16 years of age under this Bill commits the crime of unlawful exploitation of a minor if he permits the child to engage in unlawful sexual conduct for commercial purposes;

2. The Bill defines "obscene", which previously had been up to the discretion of the courts to define;

3. The Bill adds a new section which makes the distribution of child pornography materials illegal.

BACKGROUND

The extent to which Alaskan youth are victims of child pornography is unknown, although recent investigations by the Anchorage Crime Commission indicate there may be as many as 30 child slavery and pornography rings in Alaska, with networks to the lower 48 and overseas. Anchorage law enforcement officials believe the problem to be worse in Alaska than in other parts of the country due to criminals being drawn to Alaska by its wealth, by the heavy drug and alcohol abuse, the young and mobile Alaskan population and the overloaded law enforcement and court systems. In a case currently before the courts in Anchorage, one individual is charged with 29 counts of sex crimes against juveniles, including the making of pornographic movies.

It is estimated that at least half the youths in McLaughlin have been sexually abused, and some private residential facilities would estimate that closer to 85% - 95% of the youth served have been victims of sexual abuse. Many youth who have been sexually abused at home, runaway and end up being victimized by individuals who lure them into prostitution, child pornography and other illegal activities.

POSTION PAPER/Department of Health & Social Servic

POSITION

The Department of Health and Social Services supports House Bill 270, which considerably strengthens the statutes regarding child pornography. By making it illegal for the person who has the legal custody or control of the child, whether the parent or not, to permit the child to engage in child pornography for commercial purposes, it recognizes the responsibility of parents and custodians to provide protection for children in their care. Secondly, by extending criminal liability to the distributor of child pornography, this bill recognizes that without promotion and marketing of the child pornography materials, there would be no financial motive for the sexual exploitation of children.

IN THE HOUSE

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 270

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to child pornography."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 11.41.455 is repealed and reenacted to read:

Sec. 11.41.455. UNLAWFUL EXPLOITATION OF A MINOR. (a) A person commits the crime of unlawful exploitation of a minor if, in this state and with the intent of producing a live performance, film, photograph, negative, slide, book, newspaper, or magazine that visually depicts the conduct listed below, the person knowingly induces or employs a child under ~~16~~ 18 years of age to engage in, or photographs, films, or televises a child under ~~16~~ 18 years of age engaged in the following conduct: actual or simulated

(1) sexual penetration;

(2) the lewd touching of another person's genitals, anus, or female breast;

(3) the lewd touching by another person of the child's genitals, anus, or female breast;

(4) masturbation;

(5) bestiality; or

(6) the lewd exhibition of the child's genitals.

(b) A parent, legal guardian, or person having custody or control of a child under ~~16~~ 18 years of age commits the crime of unlawful exploitation of a minor if, in this state, the person permits the child to engage in conduct described in (a) of this section knowing that the conduct is intended to be used in producing a live

performance, film, photograph, negative, slide, book, newspaper, or magazine that visually depicts such conduct.

(c) Unlawful exploitation of a minor is a class B felony.

* Sec. 2. AS 11.61 is amended by adding a new section to read:

Sec. 11.61.125. DISTRIBUTION OF CHILD PORNOGRAPHY. (a) A person commits the crime of distribution of child pornography if the person ~~sends or causes to be sent, or~~ brings or causes to be brought, into this state for sale or distribution, or in this state possesses, prepares, publishes, or prints with intent to distribute, sell, or exhibit to others for commercial consideration, any matter which visually depicts conduct described under AS 11.41.455(a), knowing that the production of the matter involves the use of a ~~minor or a person who reasonably appears to be a minor~~ child under 18 engaged in such conduct.

(b) This section does not apply to acts that are an integral part of the exhibition or performance of a motion picture when the acts are done within the scope of employment by a motion picture operator or projectionist employed by the owner or manager of a theater or other place for the showing of motion pictures, unless the motion picture operator or projectionist

(1) has a financial interest in the theater or place in which employed; or

(2) caused the performance or motion picture to be performed or exhibited without the consent of the manager or owner of the theater or other place of showing.

(c) Distribution of child pornography is a class C felony.

March 14, 1983

MEMORANDUM

TO: All House Members

FROM: John J. Liska, Representative - District 15

SUBJECT: Child Pornography Legislation

Enclosed is a draft of a Bill I have introduced regarding child pornography. In recent months there have been many newspaper articles regarding this issue. Having had my staff research this subject, we have found that there is no statute that covers the sale or distribution of pornography involving children. Nor is there any statute covering parental consent of the use of their children in pornographic materials.

This Bill addresses all of the above. Your support for this Bill is needed to curb these atrocities.

STATE OF ALASKA

M E M O R A N D U M March 17, 1983

SUBJECT: Child pornography
(HB 270)

TO: Representative John Liska

FROM: James H. Lear
Legislative Counsel JHL

In response to your request, I drafted HB 270 relating to child pornography. Monday afternoon, Mike Gay requested that I redo the bill to define the word "obscene". He indicated that it would have to be done by 9:00 yesterday morning. With just a short amount of time to fulfill this request, I inserted sec. 2 that would add a new paragraph to AS 11.41.470 (definitions) that would define "obscene" to mean

> ". . . conduct that, taken as a whole and applying to contemporary community standards,
>
> (A) appeals to the prurient interest in sex;
>
> (B) is patently offensive; and
>
> (C) lacks serious literary, artistic, political, or scientific value."

This definition sets out the standard established by the United States Supreme Court in Miller v. California, 413 U.S. 15, 37 L.Ed.2d 419, 93 S.Ct. 2607 (1973).

You should be advised that the standard set forth in Miller for determining obscenity may be relaxed by the states in prohibiting child pornography. Unfortunately, I was not aware of the July, 1982, case of New York v. Ferber, ___ U.S. ___, 73 L.Ed.2d 1113, 102 S.Ct. 3348, in which the United States Supreme Court drew the distinction between child pornography and other forms of obscenity.

I will outline the critical points made in New York v. Ferber, supra, and summarize your alternatives with HB 270.

At issue in New York v. Ferber is the constitutionality of a New York criminal statute which prohibits persons from knowingly promoting sexual performances by children under the age of 16 by distributing material which depicts such performances.

The decision highlights the fact that the federal government and 47 states have sought to combat the problem of child pornography with statutes specifically directed at the production of child pornography. At least half of such statutes do not require that the materials produced be legally obscene (i.e., that apply the Miller standard). Thirty-five states and the United States Congress have also passed legislation prohibiting the distribution of such materials. Twenty states prohibit the distribution of material depicting children engaged in sexual conduct without requiring that the material be legally obscene.

The heart of the New York v. Ferber case is a pronouncement by the United States Supreme Court that it is permissible for a state to penalize the production of child pornography and the distribution of material depicting children engaged in sexual conduct without requiring that the material be legally obscene.

Here is how the Court arrived at that decision. The Court stated the issue as follows:

> To prevent the abuse of children who are made to engage in sexual conduct for commercial purposes, could the New York State Legislature, consistent with the first amendment, prohibit the dissemination of material which shows children engaged in sexual conduct, regardless of whether such material is obscene?

The Supreme Court indicated that this case constitutes its first examination of a statute directed at and limited to depictions of sexual activity involving children. The Court then began with the question of whether a state has somewhat more freedom in proscribing works which portray sexual acts or lewd exhibitions of genitalia by children. The Court reviewed the position taken in Miller, supra, that the

> . . . states have a legitimate interest in prohibiting dissemination or exhibition of obscene material when the mode of dissemination carries with it a significant

danger of offending the sensibilities of unwilling recipients or of exposure to juveniles.

Miller v. California, 413 U.S., at 19.

The Miller standard, like its predecessors, was an accommodation between the states' interests in protecting the "sensibilities of unwilling recipients" from exposure to pornographic material and the dangers of censureship inherent in unabashedly content based laws. Like obscenity statutes, laws directed at the dissemination of child pornography run the risk of suppressing protected expression by allowing the hand of the censor to become unduly heavy. For the following reasons, the Court was persuaded that the states are entitled to greater leeway in the regulation of pornographic depictions of children.

(1) It is evident beyond the need for elaboration that a state's interest in "safeguarding the physical and psychological well-being of a minor" is compelling.

(2) The distribution of photographs of and films depicting sexual activity by juveniles is intrinsically related to the sexual abuse of children.

(3) The advertising and selling of child pornography provides an economic motive for and is thus an integral part of the production of such materials, an activity illegal throughout the nation.

(4) The value of permitting live performances and photographic reproductions of children engaged in lewd sexual conduct is exceeding modest, if not deminimus.

(5) Recognizing and classifying child pornography as a category of material outside the protection of the First Amendment is not incompatible with the Court's earlier decisions.

The Court reiterated that the test for child pornography is separate from the obscenity standard enunciated in Miller, but may be compared to it for purposes of clarity. The Miller formulation is adjusted in the following respects:

(1) A trier of fact need not find that the material appeals to the prurient interest of the average person;

(2) It is not required that sexual conduct portrayed be done so in a patently offensive manner; and

(3) The material at issue need not be considered as a whole.

The Court did indicate, however, that there are limits on the category of child pornography which, like obscenity, is unprotected by the First Amendment. As with all legislation in this sensitive area, the conduct to be prohibited must be adequately defined by the applicable state law, as written or authoritatively construed. Here the nature of the harm to be combatted requires that the state offense be limited to works that visually depict sexual conduct by children below a specified age. The category of "sexual conduct" proscribed must also be suitably limited and described.

The Supreme Court proceeded to analyze the New York statute observing that the forbidden acts to be depicted are listed with sufficient precision and represent the kind of conduct, that, if it were the theme of a work, could render it legally obscene: "Actual or simulated sexual intercourse, deviate sexual intercourse, sexual bestiality, masturbation, sado-masochistic abuse, or lewd exhibition of the genitals". The Court gave special emphasis to the fact that the term "lewd exhibition of the genitals" is not unknown to the Court in this area and, indeed, was given in Miller as an example of a permissible regulation.

The Supreme Court made it perfectly clear that a state is not barred by the First Amendment from prohibiting the dissemination of material which shows children engaged in sexual conduct, regardless of whether such material is obscene.

The Court further clarified its position with regard to child pornography by dismissing the claim that the New York statute is unconstitutionally overbroad because it would forbid the distribution of material with serious literary, scientific or educational value or material which does not threaten the harm sought to be combatted by the state. The Court held this to be the paradigmatic case of a state statute whose legitimate reach dwarfs its arguably impermissible applications. The Court seriously doubted that those arguably impermissible applications of the statute amount to more than a tiny fraction of the materials within the statute's reach.

The Supreme Court refused to assume that the New York Courts will widen the possibly invalid reach of the statute by giving an expansive construction to the proscription on "lewd exhibitions of the genitals". Whatever overbreadth might exist should be cured through case by case analysis of the fact situations to which its sanctions, assertedly, may not be applied.

Now, how does this decision effect HB 270?

It means that HB 270 could be amended to delete the definition of "obscene" set out in sec. 2 of the bill, since it is permissible for the state to enforce AS 11.41.455 and AS 11.61.125 without a court finding that a depicted touching or exhibition is obscene. I would suggest, however, inserting the word "visually" before the word "depicts" on page 1, line 13, and on page 2, line 18; and changing the word "obscene" to "lewd" on page 1, lines 18, 20, and 24.

The suggested changes to HB 270 would give the state much greater latitude in enforcing the child pornography laws and still be within the constitutional guidelines set forth by the United States Supreme Court.

HOUSE BILL NO. 270

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to child pornography."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 11.41.455 is repealed and reenacted to read:

Sec. 11.41.455. UNLAWFUL EXPLOITATION OF A MINOR. (a) A person commits the crime of unlawful exploitation of a minor if, in this state and with the intent of producing for any commercial purpose a live performance, film, photograph, negative, slide, book, newspaper, or magazine that depicts the conduct listed below, the person knowingly induces or employs a child under 16 years of age to engage in, or photographs, films, or televises a child under 16 years of age engaged in the following conduct:

(1) sexual penetration;

(2) the obscene touching of another person's genitals, anus, or female breast;

(3) the obscene touching by another person of the child's genitals, anus, or female breast;

(4) masturbation;

(5) bestiality; or

(6) the obscene exhibition of the child's genitals.

NEW (b) A parent, legal guardian, or person having custody or control of a child under 16 years of age commits the crime of unlawful exploitation of a minor if, in this state, the person permits the child to engage in conduct described in (a) of this section knowing that the conduct is intended to be used in producing for a commercial

purpose a live performance, film, photograph, negative, slide, book, newspaper, or magazine.

SAME→ (c) Unlawful exploitation of a minor is a class B felony.

* Sec. 2. AS 11.41.470 is amended by adding a new paragraph to read:

(4) "obscene" means, conduct that, taken as a whole and NEW applying contemporary community standards,

(A) appeals to the prurient interest in sex;

(B) is patently offensive; and

(C) lacks serious literary, artistic, political, or scientific value.

* Sec. 3. AS 11.61 is amended by adding a new section to read:

Sec. 11.61.125. DISTRIBUTION OF CHILD PORNOGRAPHY. (a) A person commits the crime of distribution of child pornography if the person sends or causes to be sent, or brings or causes to be brought, into this state for sale or distribution, or in this state possesses, prepares, publishes, or prints with intent to distribute, sell, or exhibit to others for commercial consideration, any visual or printed matter which depicts conduct described under AS 11.41.455(a), knowing that the production of the matter involves the use of a minor engaged in such conduct.

(b) This section does not apply to acts that are an integral part of the exhibition or performance of a motion picture when the acts are done within the scope of employment by a motion picture operator or projectionist employed by the owner or manager of a theater or other place for the showing of motion pictures, unless the motion picture operator or projectionist

(1) has a financial interest in the theater or place in which employed; or

(2) caused the performance or motion picture to be

performed or exhibited without the consent of the manager or owner of the theater or other place of showing.

(c) Distribution of child pornography is a class C felony.

Staff Report
HB 275 Relating to Prison Facilities
Dave Palmer
April 18, 1983

HB 275 mandates that after July 1, 1983, all newly maximum security prisons be constructed in the vicinity of Palmer, Wasilla and Sutton.

The position paper from Department of Health and Social Services adamantly opposes the bill, and requests that the decision on correctional facility locations be based on criminal justice criteria.

The fiscal note is zero based on lack of information.

Next referral is to Judiciary Committee

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

House Bill No. 275

"An Act relating to the establishment of prison factilities."

House Bill No. 275 modifies AS 33.30.020 by making that section subject to the provisions of AS 33.30.025 which is entitled Location of Facilities. AS 33.30.025 requires that after July 1, 1983, the Commissioner shall locate all newly constructed maximum security prison facilities within the vicinity of Palmer, Wasilla, and Sutton.

The Department of Health and Social Services and the Division of Adult Corrections totally opposes the concept of predetermined building sites for prison facilities. It is imperative that such decisions be made by professional correctional practitioners and based on sound criminal justice criteria for site location to ensure that the prison facilities meet standards for programming, security, and safety.

IV. ANALYSIS

No specific additional costs can be identified related to the requirement to locate all newly constructed maximum security prison facilities within the vicinity of Palmer, Wasilla, and Sutton.

POSITION PAPER/Department of Health & Social Service

POSITION PAPER

House Bill No. 275

"An Act relating to the establishment of prison factilities."

House Bill No. 275 modifies AS 33.30.020 by making that section subject to the provisions of AS 33.30.025 which is entitled Location of Facilities. AS 33.30.025 requires that after July 1, 1983, the Commissioner shall locate all newly constructed maximum security prison facilities within the vicinity of Palmer, Wasilla, and Sutton.

The Department of Health and Social Services and the Division of Adult Corrections totally opposes the concept of predetermined building sites for prison facilities. It is imperative that such decisions be made by professional correctional practitioners and based on sound criminal justice criteria for site location to ensure that the prison facilities meet standards for programming, security, and safety.

1:05 p.m.

Members Present: Rep. Tischer, Co-Chair
Rep. Fritz, Co-Chair
Rep. M.W. Miller, Vice-Chair
Rep. Davis
Rep. Koponen
Rep. Goll
Rep. Herrmann

COMMITTEE CALENDAR

HB 275: "An Act relating to the establishment of prison facilities."

HB 217: "An Act relating to the establishment of prison facilities."

HB 219: "An Act relating to Local Citizen Advisory Boards of the University of Alaska."

WITNESS REGISTER

Rep. Larson
District 16-B
State Capitol Building
Pouch V
Juneau, Alaska 99811
465-3727
Position Statement: Supported locating the next maximum security prison in the Palmer, Wasilla or Sutton area; described the advantages of the area such as easy access, already established recreation, medical and social service facilities; said he was amenable to changing the intent of the bill to locate all maximum security prisons in the designated area to that of locating the next facility in the Sutton area.

Rep. Lacher
District 16-A
State Capitol Building
Pouch V
Juneau, Alaska 99811
465-4894
Position Statement: Pointed out the planning which has occurred for many years for a maximum security prison in the Palmer, Wasilla, Sutton area; said

that the prison was always intended for that area and only recently the site decision had become a political football.

Roger Lang
Department of Health & Social Services
Division of Corrections
Juneau, Alaska 99811
465-3376
Position Statement: Testified against HB 275 and HB 217; stated that the Division is opposed to any specific naming of an area where prison facilities may be constructed; stated that the usual process in site determination begins with an appropriation from the Legislature followed by the decision regarding the site location.

Davis Gray
Palmer Chamber of Commerce
Palmer, Alaska
Position Statement: Supported comments made by Representatives Larson and Lacher; acknowledged the effort and time spent planning for a prison in the Palmer area; commented that competition for a prison site was new and not very productive.

Sen. Gilman
State Capitol Building
Pouch V
Juneau, Alaska 99811
465-4935
Position Statement: Commented that HB 217 was drafted because the Seward community was concerned it would not be considered with other communities for the next maximum security site location; stated that the location decision should be left to Corrections to decide based on their own goals and objectives not by the Legislature.

Willard Dunham
Co-Chair
Seward Citizens Task Force
Seward, Alaska
Position Statement: Described the background behind Seward's proposal for a maximum security prison site; commented on the suitability of the location for a security institution and the availability of private industries and educational facilities for prison industry programs; referred to the need for a prison in Seward due to the high unemployment rate.

Louis Bencardino
Seward Administration
Seward, Alaska
224-3331
Position Statement: Showed the committee a drawing of the proposed site in Seward; described the proposed prison industry programs; stated that Seward has offered to build the prison for the State; said he trusted Roger Endell to pick the site best suited for the state's needs.

Belle Blue
(Betty Breck)
Juneau, Alaska 99801
586-4103
Position Statement: Urged the committee to address the sociological conditions which lead to crime instead of spending more and more money on building new prisons.

ACTION NARRATIVE

TAPE#31
Recording
Number 0001 Co-Chair Tischer called the meeting to order at 1:05 p.m. Representatives Fritz, Miller, Davis, Herrmann, Koponen and Goll were present. Co-Chair Tischer announced the

committee calendar and the Chair's intent to move all three bills out of committee.

Number 0047 — Rep. Davis welcomed Rep. Herrmann, who is filling in for Rep. Cato, to the committee.

Number 0067 — Rep. Larson, sponsor of HB 275, commented on the history of corrections related activity in the Palmer, Sutton and Wasilla areas; described the medical, social, and family services already available in the area for prisoners, prison employees, and their respective families. Rep. Larson acknowledged the decline of oil revenues, but stated that the courts mandated that Alaska bring maximum security back to Alaska. Rep. Larson argued that HB 275 would help mitigate extra costs by offering the State the lowest costs of all proposed sites in terms of construction and operation.

Number 0148 — Rep. Larson encouraged the committee to make a decision after looking at future revenues and State responsibilities with regards to prisoners now in the lower '48.

Number 0167 — Rep. Tischer commented on the strong impact of the mandate to center all maximum security prisons in one area.

Number 0181 — Rep. Larson said he would welcome a committee substitute to change lines 10 - 20 to read; "the commissioner locate a newly constructed maximum security prison facility within the vicinity of Palmer, Wasilla, or Sutton".

Rep. Larson said that the reason for mandating that all maximum security prisons be built in one area was to conserve resources by concentrating building, capitol, and facilities in one location.

Number 0203 — Rep. Davis pointed out Roger Endell's, Division of Corrections, recommendation to spread maximum security sites throughout the state.

Number 0220 — Rep. Larson spoke about the desirability of concentrating future sites around food, recreation and housing facilities which are already available.

Number 0234 — Rep. Tischer asked about the impact of HB

275 on the Mat-Su Community. Rep. Larson responded that initially people would need education in order to work with the prisoners, but then the prison would provide approximately 250 jobs for the community and increase sales for local businesses. Rep. Larson also stated that the growth impact would be within the borough's ability to provide services.

Number 0286 — Rep. Davis said he had difficulty locking in all prisons to one area; asked if Rep. Larson would object to changing "all" to "a" maximum security prison and "shall locate" to "may locate". Rep. Larson said that would be satisfactory.

Number 0300 — Co-Chair Tischer asked the committee to stand at ease per the request of Rep. Lacher.

Number 0302 — Rep. Larson said he was amenable to a committee substitute which would change line 19 to read; "the commissioner shall locate a newly constructed maximum security prison facility within the vicinity of Palmer, Wasilla, or Sutton".

Number 0328 — Rep. Goll suggested adding the word "next" before "maximum security prison facility". Rep. Larson agreed to the suggestion.

Number 0347 — Rep. Tischer directed HESS staff to write a committee substitute with the suggested changes for HB 275.

Number 0366 — Rep. Larson said he would approve any wording which would mandate that the next maximum security prison be located in the Sutton area.

Number 0375 — Rep. Lacher, co-sponsor of HB 275, stated that HB 275 was introduced because planning had centered on a maximum security site in Sutton for many years, but then with the change in Administration, the location of the next maximum security site was questionable and subject to competition from other communities. Rep. Lacher argued that the site is badly needed and should be located close to Anchorage.

Number 0413 — Rep. Goll asked why there was a delay in building the prison at Sutton if all the

plans were already made. Rep. Lacher said she believed that the prison is not built yet because it is being used as a political football.

Number 0426 — Roger Lang, Division of Adult Corrections, stated that the Division is opposed to any specific naming of an area where a prison facility must be constructed. Mr. Lang contended that site considerations should be studied by the Division, not decided by the Legislature.

Number 0449 — Rep. Goll questioned Mr. Lang about the status of the Division's decision. Mr. Lang said the Division has considered 7 proposals thus far.

Number 0459 — Rep. Fritz commented that the decision could not be reached before establishing the Department.

0488 — Rep. Koponen asked the witness what criteria the Division would use to determine the next prison site, for example how many prisoners would it need to house? Mr. Lang responded that the Division is considering a 300 bed maximum security facility with the possibility for an additional 100 beds, and said that currently 200 maximum security prisoners are housed out of Alaska.

Number 0514 — Rep. Davis asked how many prisoners would qualify for the maximum security site. Mr. Lang answered that approximately 250 maximum security inmates located in and out of state would qualify. Rep. Davis stated an interest in receiving more information on the criteria which would determine the location of the next site.

Number 0535 — Rep. Tischer argued that the Division had plenty of time already to provide HESS with that information.

Number 0543 — Rep. Goll pointed out a letter from the Department of Health and Social Services indicating that no decision would be reached until funding for planning was authorized by the Legislature. Rep. Goll commented that the delay was not productive, and admonished the Department to let the Legislature worry about funding after the Department decides on a site.

Number 0566

Davis Grey, Palmer Chamber of Commerce, supported the comments made by Representatives Lacher and Larson, and acknowledged the effort and time spent on planning for a prison in the Palmer area. Mr. Grey said competing for a prison site was new and only lead to more studies and lobbying. Mr. Grey urged the Division to make the decision soon on the basis of site suitability.

Number 0611

Co-Chair Tischer presented HB 217 for committee consideration, and pointed out that HB 217 also mandates that all maximum security prison facilities shall be located within the vicinity of Seward.

Number 0633

Senator Gilman, District D, stated that he was not speaking for Rep. Cato, the bill's sponsor, and agreed to the similarity between HB 217 and HB 275. Sen. Gilman explained that Rep. Cato drafted HB 217 because the Seward community was concerned that they would not be one of the communities considered for the next maximum security site. Sen. Gilman contended that the site location should be left to Corrections to decide on the basis of their goals and objectives, not by the Legislature.

Number 0663

Mr. Dunham, Co-Chair Seward Citizens Task Force, stated that Seward submitted a proposal for a maximum security prison site under the Hammond Administration after the Anchorage and Sutton communities indicated they did not want the prison. Mr. Dunham asserted that Seward offers the most economic alternative for the state and described the location of the proposed prison site. Mr. Dunham explained that the proximity of the site to vo-tech programs, industrial sites, the University of Alaska, and the Institute of Marine Sciences would be conducive to prison industries.

Number 0718

Mr. Dunham said he would like to know what is required for the prison site now, and stressed the high unemployment rate in Seward.

Number 0743

Louis Bencardino, Seward Administration, showed the committee a sketch of the proposed prison site and its surroundings.

Mr. Bencardino said that authorities have made arrangements with private industry for prison industries, and have offered to build the prison for the state. The witness also pointed out that Seward has a port which is two days closer than Anchorage to the Lower '48. Mr. Bencardino agreed that some of the other proposed prison sites have merit, and said he trusted Roger Endell to pick out the best site. Mr. Bencardino supported letting the Division judge the various proposals.

Number 0799

Rep. Fritz asked the witness what prison industries Seward had in mind. Mr. Bencardino listed the fishing industry, fabrication industry, and bottom fishing processing plant.

Number 0822

Rep. Tischer questioned why efforts had been concentrated on maximum security prisons when medium security prisons are also overcrowded. Mr. Bencardino said the community would rather have a maximum security facility and asserted that the proposed location was well suited for maximum security facilities.

Number 0848

Roger Lang, Division of Adult Corrections, stated that his testimony for HB 217 was the same as that for HB 275. Mr. Lang contended that HB 217 was also to site specific.

Number 0854

Rep. Tischer asked Mr. Lang what was holding up the Division's decision. Mr. Lang responded that last year's budget included a request for a maximum security facility which was tentatively set for the Palmer/Wasilla area. The request was part of a bond package which was vetoed by Governor Hammond. Mr. Lang stated that the FY '84 request for a maximum security facility did not specify the Palmer area.

Number 0888

Rep. Fritz repeated that the delay was due to the fact that the Governor had not signed the bill to make the Division of Adult Corrections into a Department. Rep. Tischer retorted that prisons were built under the Division in the past.

Number 0897

Mr. Lang stated that decisions are usually not made by the Division until an appropriation is made by the Legislature.

Number 0914 — Rep. Goll suggested the Division make a site decision soon regardless of past policy in order that the Legislature could appropriate money.

Number 0929 — Rep. Davis reminded the committee that the final decision would now rest with the Commissioner of the Department of Health and Social Services.

Number 0950 — Belle Blue, Juneau citizen, agreed that the increase in crime warranted attention for new prison sites, but indicated that the roots of crime are sociological. Ms. Blue recommended that the committee address conditions in society, such as unemployment, which lead to crime.

Number 0970 — Co-Chair requested the witness to confine her remarks to the bill at hand.

Number 0977 — Co-Chair Tischer asked the committee if there was further discussion before she entertained a motion to move a committee substitute for HB 275.

Number 0992 — Rep. Larson repeated his suggestions for amended wording on Lines 19 and 20; "the commissioner shall locate the next maximum security prison facility within the vicinity of Palmer, Wasilla or Sutton".

Number 1000 — Rep. Miller argued that the committee should also add Haines, Seward, Cordova, etc. after Sutton because they too have valid concerns. Rep. Miller said he had a problem with passing out two bills which directly conflict with each other.

Number 1010 — Rep. Larson disagreed with adding the other communities because they had not introduced a bill and done as much back-up work as the Palmer community had. Rep. Larson suggested letting HB 275 answer the immediate need for a prison and then looking at the other sites.

Number 1015 — Rep. Tischer stated that because of the immediate crisis with regards to prison overcrowding, it was the Chair's intent to bring up both bills for discussion before the public, and to help Roger Endell get on with his job as head of Corrections.

Number 1050 — Rep. Tischer asked for a motion to amend HB 275 at the wishes of the sponsor. Belle Blue requested permission to testify. Rep. Tischer denied permission.

Number 1054 — Rep. Fritz contended that the committee should listen to the witness. Co-Chair Tischer called an at ease.

Number 1060 — Belle Blue stated basic objection to giving large amounts of money to prison facilities instead of other programs to reduce crime. Ms. Blue argued that crime is only a symptom of more basic sociological problems.

Number 1088 — Rep. Davis thanked the witness for her testimony and then stated that he would either pass one bill out or the other and that he personally would vote "no recommendation" on both bills.

Number 1095 — Discussion regarding past policy for determining prison sites.

Number 1109 — Rep. Koponen indicated that the Legislature does have the authority to make the final decision, but questioned if the Legislature had the right criteria upon which to base its decision.

Number 1129 — Rep. Fritz predicted that the final decision would be very political, and commented that the committee could just as well add the names of other communities onto either HB 275 or HB 217.

Number 1141 — Rep. Miller suggested naming a deadline for the Division to decide on a site.

Number 1149 — Rep. Goll stated that the House and Senate leadership should direct the Division to decide on a site before the Legislature appropriates money.

Number 1167 — Rep. Davis asserted that passing either bill out of committee could raise false hopes for either Seward or the Palmer area.

Number 1178 — Rep. Tischer said she had no intention of calling for a "do pass" and told Rep. Davis that he was free to vote however he wanted. Co-Chair Tischer then called for a motion.

Number 1191 — Rep. Miller moved to draft a committee

substitute for HB 275 with the suggested language changes to Section 2, and then made a motion to move CSHB 275 out of committee with individual recommendations.

Number 1202 — Co-Chair Tischer called for a vote on the first motion. The committee voted unanimously to replace HB 275 with CSHB 275. Co-Chair Tischer called the previous question on the second motion.

Number 1215 — Rep. Goll pointed out that committee members had the option not to sign if they did not support the bill, and did not want it to leave committee.

Number 1225 — Co-Chair Tischer called for a vote on the second motion. The committee voted unanimously against moving HB 275 out of committee.

Number 1227 — Rep. Miller moved to make the same changes to Section 2 of HB 217. Co-Chair Tischer called for a vote on the motion. The motion passed by a 6 to 1 vote.

Number 1240 — Rep. Miller moved to pass CSHB 217 out of committee. Co-Chair Tischer called for a vote. The motion to move CSHB 217 failed unanimously.

Number 1246 — Co-Chair Tischer presented SSHB 219 for committee consideration, stated her intent to move the bill out of committee, and asked for a motion to that effect.

Number 1252 — Rep. Goll so moved. Rep. Davis objected. Rep. Goll withdrew his motion.

Number 1260 — Rep. Fritz moved to pass SSHB 219 out of committee with individual recommendations. The motion passed by vote of 4 to 3.

Number 1275 — Co-Chair Tischer adjourned the meeting at 3:02 p.m.

Introduced: 3/18/83
Referred: Health, Education and

IN THE HOUSE BY LARSON AND LACHER

HOUSE BILL NO. 275

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the establishment of prison facilities."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 33.30.020 is amended to read:

Sec. 33.30.020. COMMISSIONER TO ESTABLISH AND ADMINISTER PRISON FACILITIES. Subject to the provisions of AS 33.30.025, the [THE] commissioner shall establish prison facilities and classify the prisoners in prison facilities. The commissioner shall provide for the safety, subsistence, proper government, and discipline of prisoners. The commissioner shall establish programs for the treatment, care, rehabilitation and reformation of prisoners.

* Sec. 2. AS 33.30 is amended by adding a new section to read:

Sec. 33.30.025. LOCATION OF FACILITIES. After July 1, 1983, the commissioner shall locate ~~all newly constructed~~ the next maximum security prison facilities within the vicinity of Palmer, Wasilla, and Sutton.

M E M O R A N D U M

TO: Representative Tischer

FROM: Representative Lacher

SUBJECT: HB 275

I request that your Committee seriously consider reestablishing the Palmer/Sutton area as the state's number one site choice for the new maximum security prison.

Enclosed is a copy of a recent cost-benefit report on locating the state maximum security facility in the Mat-Su valley versus other proposed state locations. Please examine the conclusions on page 12 of this report and take these into consideration in your review of this issue.

I would like to take this opportunity to remind you that the previous Administration selected the Palmer/Sutton site location, five years ago, for very good reasons. The factors which led to the selection of the Palmer/Sutton site have not changed in the brief period of time that has lapsed in the recent administrative change. I therefore urge you to seriously reconsider the selection of the Palmer/Sutton site as the state's location site for the new maximum security prison.

Some of the factors which led to the original selection of the Palmer/Sutton site are:

1) The Mat-Su area is well known in the State for the significantly lower costs in construction. This lower overall cost factor, in construction, is due to the Mat-Su proximity to efficient transportation, an immediately available work force, readily available construction industries and supplies, and other locational factors that directly effect the overall cost of construction.

2) The Palmer/Sutton area has several suitable sites for such a facility which already provide the necessary utility facilities that a maximum security prison would require. These in place utility facilities would, therefore, also significantly reduce overall construction costs.

3) The Palmer/Sutton area offers a site location that is semi-isolated from a population center while at the same time remaining accessible to necessary public support facilities, (e.g., Anchorage Superior Court, Mat-Su and Native hospitals, libraries, etc.).

4) A qualified and available work force is to be found in the Mat-Su area, once the facility is in place.

5) Several acceptable sites are located on State lands within the Palmer/Sutton area, eliminating the cost of land acquisition.

6) The governing bodies of the Mat-Su Borough and the two major cities in the District, Palmer and Wasilla, have endorsed resolutions, with public support, for the location of the maximum security prison in the Palmer/Sutton area.

I would appreciate the serious reconsideration, by the House HESS Committee, of the Palmer/Sutton area for site selection for the new maximum security prison.

BENEFIT / COST ANALYSIS OF ALTERNATIVE SITE SELECTIONS OF THE STATE OF ALASKA MAXIMUM SECURITY PRISON

EXECUTIVE SUMMARY

Consideration for locating a long-term correctional facility should include three major categories at the very least. First is the economics from the State agency's point of view (operating efficiency). Second is the impact of the facility (short and long term) on the local community, in terms of employment, housing, support services demanded, and risk. Third is the impact of location on the prisoner population and their needs for visitation by family, attorneys, and parole boards.

Location of the facility in question in the Mat-Su Borough is seen as providing optimum siting for any facility which is not placed in Anchorage itself. In comparison with other locations under consideration: its proximity to Anchorage (the location where 44% of the convicted felons we currently send to the Lower 48 were arrested) is ideal – about 50 miles; it has suitable land available, in several locations; its state payrates and construction/facility maintenance costs are lower than the Seward/Whittier/Valdez alternatives; it has a labor force available for construction/operation with high unemployment; there is unoccupied housing available; and there would be no further costly delays to construction (estimated at up to a year for a possible increase in cost of $4-5 million) due to planning for a new site. Over a 20-year period, costs in the Seward area would amount to more than $21,500,000 higher than in Palmer, while a similar forecast for Valdez is more than $50,000,000 higher than Palmer.

Community support for a Prison in the Matanuska-Susitna Borough is widespread and concerns over housing and social impacts can be easily addressed and mitigated.

(3)

INTRODUCTION

This report presents a brief explanation of a decision to site the South Central Regional Long Term Facility in the Matanuska-Susitna Borough. (The facility will henceforth be referred to as the Prison). Sources for the information include the Alaska Department of Transportation and Public Facilities, the Alaska Department of Health and Social Services, the Mat-Su Borough Comprehensive Plan (Draft), the site-evalution done by TRA/Farr et al in September, 1982, and the Alaska Court System 1982 Annual Report.

The three major areas of concern when locating a Prison are:

1) the economics/logistics/regulatory compliance from the operating agency's point of view;

2) the impact on the community which is proximate to the Prison; and

3) the impact on the prisoner population of the location, i.e. expense and difficulty of visits by relatives and attorneys and visits to parole boards and courts.

Each of these areas will be discussed in detail in the following report.

(4)

AGENCY CONSIDERATIONS

The agency in question is the Alaska Department of Health and Social Services, Division of Corrections. It is responsible for the confinement of felons and others at the direction of the Court System. The facility in question would house convicted felons with relatively long sentences who are currently confined in the Lower 48 via the Federal Bureau of Prisons. There are currently around 200 of these prisoners, and the number is constantly increasing. The State has agreed to provide confinement facilities for its prisoners by 1987, hence the need for a maximum security prison in Alaska. A 1981 Facilities Profile projected 1982 sentenced felons to be 720 rising to 1176 by 1986. Current trends suggest that these figures are well below actual figures and thus conservative.

General requirements for the facility are determined by criteria of the American Correctional Association Standard 4147 and include location within 50 miles of a population centered over 10,000 with access to hospital, courts, and public transportation. This standard is not to be taken lightly. Service support both from the judicial system and logistical support systems rise in cost the further a facility is located from a population center. Examples include care for serious medical problems, psychiatric service support, support from the legal community, goods and services support for operation and maintenance, educational support services, etc. Siting criteria, developed by the Criminal Justice Planning Agency include: the size of the site should be 75-100 acres with 55 acres developable for the facility and a buffer space (developable means less than a 20% slope with drained soils, not on a flood plain, and suitable for sewage disposal and construction; and State ownership of the land. The Sutton site originally chosen for the Prison has 640 acres with more than enough developable land; access to the Glenn Highway is acceptable for the Prison's purposes; it is State owned and roughly 50 miles from Anchorage with local health care, services, and public transportation.

The economics of the Prison analysis includes construction, maintenance, and operation. In comparison with other sites, both construction and operation costs are significantly lower: construction in Seward would be

approximately 10% higher with maintenance estimated to be 5% higher, while payroll costs would be about 4% higher (State employees get a two-step increase to work in Seward). This would amount to $4-5 million in construction, about $100,000 in annual maintenance, and approximately $225,000 in salaries. Construction in Valdez would be 20% higher with maintenance 6% lower (though on a higher base cost), while payroll costs would be 16% higher (State employees get a five-step increase to work in Valdez). This would amount to $7-8 million in construction, roughly $500,000 in annual maintenance, and an estimated $900,000 in salaries. In other words, start-up costs are $4-8 million higher and yearly costs are $325,000 - $1,400,000 higher in other locations. In addition, there would be delays in project commencement if current site studies had to be abandoned; unofficial State estimates put this delay at up to a year, with attendant increases in final cost of construction as well as loss of the use of a facility for that year. The placement of any multi-million dollar State facility would require a thorough site evaluation and review. The costs of studies completed to date would have to be written off and repeated. In addition, the loss of time could jeopardize the agreement to transfer prisoners held in federal facilities by 1987, and certainly raise the cost of construction $4-5 million due to the inflationary impact of delay.

Finally the siting of any facility should consider sharing facilities already owned by the State. The Palmer Correctional Facility could readily share much of its services, such as dieticians,counselors, security and maintenance people, storage facilities, etc. Ancillary services, such as staff recreation and transportation can also be shared.

Table 1 shows approximate costs due to re-siting.

(6)

TABLE 1

SITE EXAMPLES – 20 YEAR COST DIFFERENTIALS (1)

	Palmer	Seward	Valdez	
Construction	$ 0	$ 4,500,000	$ 7,500,000	
Delay	0	4,500,000	4,500,000	
Payroll (2)	0	4,500,000	18,000,000	
Maintenance (2)	0	2,000,000	10,000,000	
Travel (2)	0	6,000,000	10,000,000	(est.)
TOTAL	$ 0	$21,500,000	$50,000,000	

(1) Table is designed to demonstrate relative cost differences among three sites which serve as examples for a variety of Southcentral locations in relationship to their proximity to Anchorage.

(2) 20-year costs above Palmer/Sutton site in 1982 dollars.

COMMUNITY IMPACT

Impact on the local community of a Prison includes the economic impact due to employment in construction and operation of the Prison, demand for housing and support of the staff, demand for public services, environmental impact, and risk of escaped felons.

The economic impact would be mostly positive, dominated by increased employment and economic growth through provision of services to the Prison. The Borough has a history of unemployment rates higher than either Anchorage or the State as a whole, running from 11-17%, hence would be able to absorb increased labor requirements happily. It currently has a labor force of around 11,000 with almost 2,000 unemployed and an unemployment rate of 17.6% (February 1983). This is up from 15.7% a year ago. It has a resident population which includes skills necessary to operate a confinement facility (there currently exists a similar low-risk facility in Sutton). We feel that it could easily absorb the additional requirement for labor and staff. In addition, the Matanuska-Susitna Borough is the only labor market in Alaska which can effectively draw from other areas on a regular year-round basis. Its proximity to Anchorage, particularly Eagle River/Chugiak area provides the site with a potential labor market area of 108,000. This capacity compares to Valdez, with a February, 1983, labor force estimate of 3,035 and Seward with 1,671. The Mat-Su labor market area is 3.6 - 6.6 times larger without drawing upon the larger Anchorage market. Currently, about 2,500 people commute between Mat-Su and Anchorage daily for employment. This level is similar to the entire labor market of the other sites considered here.

Land and housing is available freely, with over 800,000 acres of privately held land in the Borough and almost 1,000 vacant housing units. There is a 25-bed hospital, three health care centers, and two mental health centers, so medical support is available. With retail sales over $50 million a year, the local economy can easily support the additional requirements of the Prison for supplies and routine services; utilities currently are available at the site due to the Palmer Correctional Facility.

The environmental impact is considered nil and the risk of escaped felons is already being borne due to existing facility.

LEVELS OF COMMUNITY SUPPORT
PALMER/SUTTON PRISON SITE

Examination of agencies, government bodies and other organizations in the Mat-Su Borough indicates that the level of community support for locating the prison in Palmer/Sutton is very strong. Appendix B depicts the historical development of community action since late 1981. The information was gathered through interviews conducted in the public and private sectors in the communities of Palmer, Wasilla and Sutton. Local government officials in Palmer and Wasilla, and Borough officials have unanimously supported the proposal of the construction of a maximum security facitlity at Sutton since its inception. Both the Wasilla and Palmer Chambers of Commerce have also passed resolutions in its favor; and the Palmer Chamber is in the process of raising $10,000 to finance a lobbying effort in Juneau. It is of interest to note that the Palmer Chamber has been relatively inactive in recent years; however, the Sutton siting issue has generated tremendous interest and involvement by the business sector of this organization. The Chamber of Commerce funds are being matched by both the City and Borough governments.

The Palmer Elks have a very special interest in the Sutton siting. This organization owns the 640 acres which adjoin the proposed site. The Palmer Elks Club in conjunction with the State Elks Association, are in the process of drawing up plans to develop this land into a youth camp with special focus on handicapped children. The State Association has unanimously supported the recreation siting with the full understanding of the State's proposal to build the maximum security facility on the adjoining land.

The only concern appears to be with some of the people living in the Sutton area. Press coverage of the original State public hearings regarding the siting of the proposed facility indicated that community opinion was against the siting. However, interviews conducted of Mat-Su residents revealed several concerned families who had formed a rather "vocal minority." One interviewee indicated that the minority was, in fact, intimidating, and some of these residents are also on the Sutton Community Council, a newly recognized council whose origins are through the Alpine Civic Club. The

(10)

Alpine Civic Club did conduct a very questionable telephone survey in December, 1982 to ascertain the public opinion of the proposed siting at Sutton. Most of the interviewers were known to be against the siting.

One key difficulty in assessing community opinion is that no real information dissemination regarding the impact of the site selection as well as the costs/benefits had been made available to the local community at the time of these surveys. It is the belief of resident and local government officials living in the area that opposition has arisen largely out of fear and misunderstanding of the impact of such a siting. In fact, following a joint open meeting between the Palmer Chamber of Commerce and the Sutton Community Council on March 23, one Borough Assemblyman now plans to request the Borough Planning Department to assist the Sutton community in a needs assessment and impact analysis. One major concern of this group is impacts on the local housing market. In actuality, the site is located four miles south of Sutton and six miles north of Palmer. Such impact would be more likely to occur in the larger community of Palmer and areas south, with its more accommodating infrastructure.

(11)

PRISONER IMPACT

In the case of prisoner impact, the location of the Prison is of lesser importance than it would be with pre-trial or low-risk facilities, since they have fewer occasions to travel to court or to otherwise leave the Prison. There are, however, costs associated with visits by others to them: social visits by family and friends become more difficult as the proximity of the Prison to population centers becomes greater. Similarly, visits by parole boards become more expensive and difficult with increasing distance from Anchorage.

It is difficult to calculate the costs associated with increasing the distance travelled by those wishing to visit the Prison. Hertz recently estimated the cost of ownership/use of a vehicle to be over 40 cents per mile nationally, so such costs could be appreciable when applied to State parole board members travelling to visit a felon. To illustrate the impact, if we assume that each of the projected prisoners would average 24 annual contacts involving personal, legal, other professional, or transport of prisoner to Anchorage for legal, medical, or other reasons, then: in 1982 dollars, the Seward site would add $6 million in travel costs over 20 operational years and while Valdez would add $30 million. This does not consider overnight accommodations which are increasingly likely the further the site is from Anchorage.

A centrally located site in South Central Alaska is critical to minimize problems for families and professional personnel. A 1981 Profile of Prisoners housed through the Federal Bureau of Prisons in the Lower 48 showed that 44% of the prisoners had been arrested in Anchorage, and 27% in Fairbanks. Over 70% of those visiting prisoners would be able to drive easily to the Sutton site and the balance would be travelling through Anchorage to get to the Prison. Appendix A to this report provides further data on the prison population housed in the Lower 48.

(12)

CONCLUSION

Two things stand out after a review of the data on the proposed Prison. They are: 1) that such a facility should be located as close to Anchorage as possible; and 2) that such a facility is greatly needed.

LOCATION

Factors affecting the operating agency indicate that agency costs will be minimized with placement in the Matanuska-Susitna Borough, and that operating criteria will be met with prison location at the Palmer/Sutton site.

Factors affecting the local community indicate that the Prison would be a welcome addition, reducing unemployment and increasing the economic base. Public support in the Matanuska-Susitna Borough is widespread, and opposition is centered on issues easily mitigated.

Factors affecting the Prison population indicate a preference for the Mat-Su location, in terms of reasonable access to personal, legal, and other support systems.

FACILITY NEED

The combination of a large prison population housed outside the State through the Federal Bureau of Prisons with a rapidly increasing need for confinement space results in a fairly desperate requirement for this Prison. Conservative estimates of correctional facilities needs by fiscal year 1986 show that total required bed space will only be met through the construction of at least 300 prison bed spaces.

APPENDIX A

DATA FROM AUGUST 10, 1981 PROFILE OF PRISONERS HOUSED THROUGH THE FEDERAL BUREAU OF PRISONS IN THE L-48

Alaska Resident Time Before Crime

Time	Number	Percent
Less than 6 mo.	17	10
6-12 mo.	17	10
1.1.9 yr.	12	6
2-2.9 yr.	5	3
More than 3 yrs.	123	71

AGE

Age	Number	Percent
Under 20	1	.5
20-30	86	49
31-40	59	34
41-50	19	11
Over 50d	9	5

Place	Number	Percent
Anchorage	76	44
Fairbanks	46	27
Juneau	11	7
Ketchican	3	2
Bethel	9	6
Bush	23	14

OTHER

43% had no prior convictions.

20% had college plus some graduate school.

93% had over two (2) years remaining before release, compared to 36% of instate.

(15)

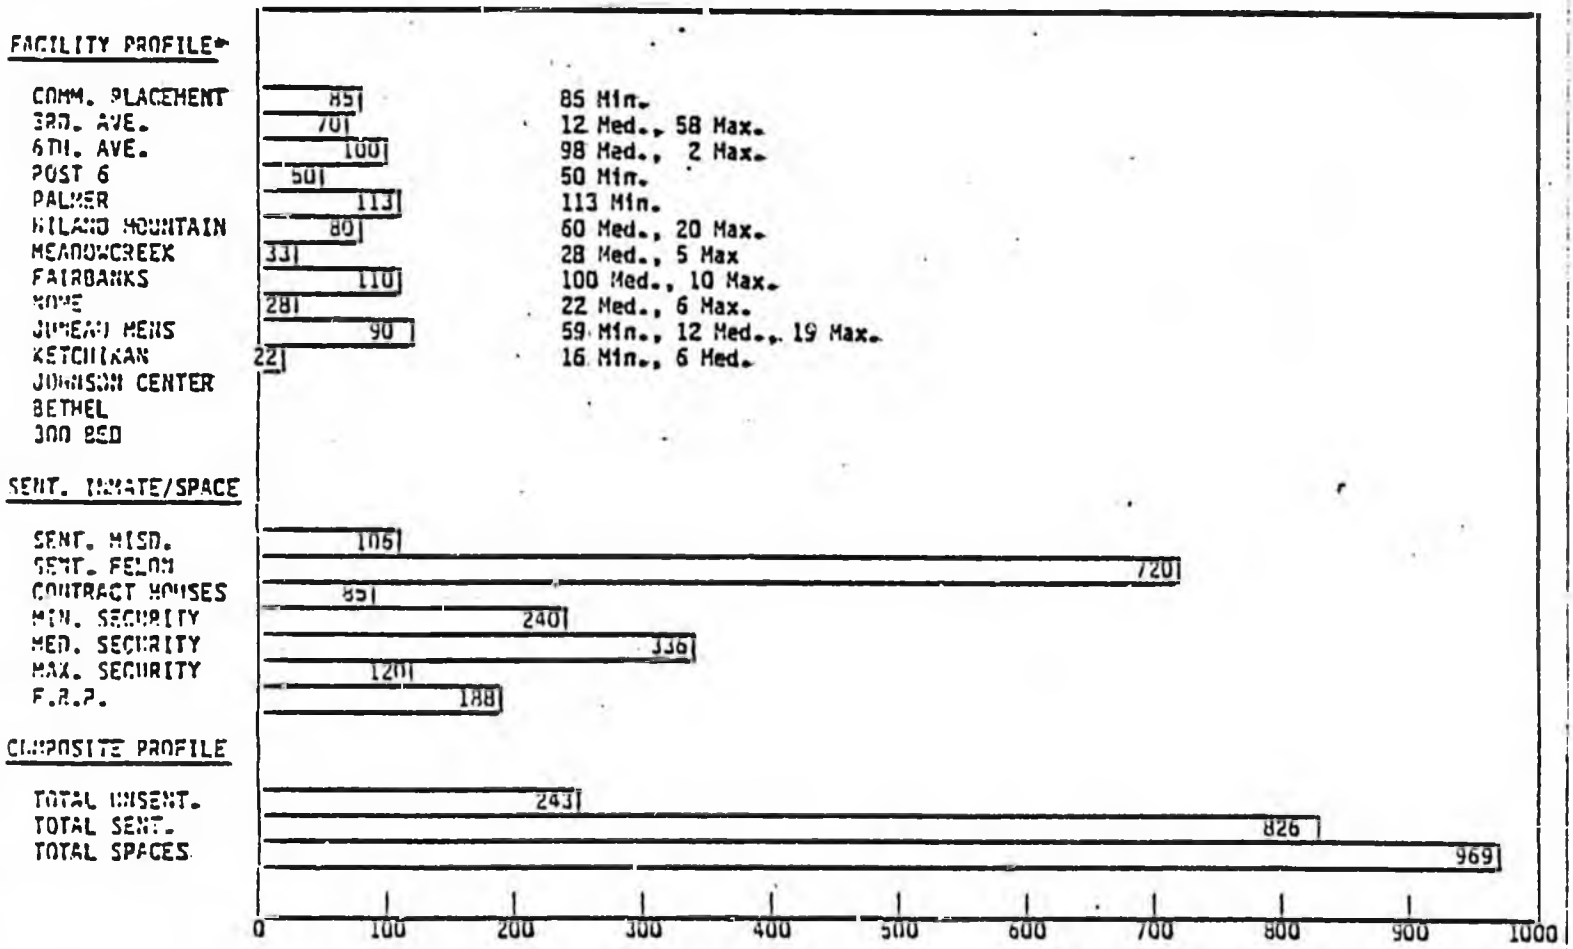
APPENDIX B

CHRONOLOGY OF COMMUNITY SUPPORT

DATE	ORGANIZATION	ACTION
Nov. 11, 1981	Palmer City Council	Held public hearing and unanimously passed resolution supporting the location of the new State prison in Sutton.
Jan. 1982	Mayor of Palmer	Attended Alaska Conference of Mayors in Juneau; met with Health and Social Services personnel to inquire about the prison and to inform the Department of the City of Palmer's support for the Sutton site.
First Quarter 1982	Wasilla City Council	Discussed and supported the siting of the proposed State prison at Sutton.
March 1982	Palmer Chamber of Commerce	Passed resolution stating their support for the location of the Prison at Sutton.
Mid-winter	Elks	By unanimous vote, at the Elks mid-winter meeting in Petersburg, the organization decided to proceed with plans to build a youth camp on the 640 acres adjacent to the proposed prison site, presently owned by the Elks. The camp will be for all children with special focus on the handicapped.
Nov. 1982	Palmer Chamber of Commerce	Passed second resolution stating support of the Sutton site for the new Administration.
Dec. 1-13	Alpine Civic Club	Conducted telephone survey of Alpine Club membership assessing the level of community support for locating the Prison at Sutton.

(16)

Dec. 7, 1982	Mat-Su Borough Assembly	Passed a resolution urging the State of Alaska to locate the Prison at Sutton.
Dec. 14, 1982	Palmer City Council	Held a second public hearing and passed a second resolution reaffirming the facility at Sutton.
Jan. 23-25, 1983	Mayor of Palmer	Attended the Alaska Conference of Mayors in Juneau. Contacted Senator Kerttula and Representatives Larson and Lacher, to engage their support.
Mar. 15, 1983	Mat-Su Borough Assembly	Appropriated $7,000 toward cost benefit study and lobbying effort to support the location of the State prison in Sutton.
	Joint meeting of Palmer Chamber, Mat-Su Borough, and Palmer City Council	Joint meeting to work on conveying desire to have prison at Sutton site. Turned over lobbying effort to the Palmer Chamber of Commerce.
Mar. 22, 1983	Wasilla Chamber of Commerce	Went on record supporting the location of the prison at Sutton.
	Palmer City Council	Appropriated $10,000 to support the lobbying effort with the Mat-Su Borough and the Palmer Chamber of Commerce funds to be used followed by a dollar-for-dollar pro rata share between the City of Palmer and the Mat-Su Borough after deducting the costs of the cost/benefit study.
Mar. 23, 1983	Joint open meeting between the Palmer Chamber of Commerce and the Sutton Community Council	Discussed local community concerns regarding the prison site selection.



(17)

	Mat-Su Borough Assembly	Appropriated an additional $3,000 to support a joint lobbying effort and cost/benefit study with the City of Palmer and the Palmer Chamber of Commerce.
Mar. 24, 1983	Palmer Chamber of Commerce	Chamber issues emergency letter to raise $10,000 for a major lobbying effort to support the location of the new State prison at Sutton.
Mar. 28, 1983	Wasilla City Council	Passed resolution supporting siting of the Prison at Sutton.
Apr. 1983 (1st week)	Sutton Community Council	Full membership meeting to discuss siting of Prison.
May, 1983	Elks State Association Meeting	Program for development of youth camp will be presented.

SUBJECT: Location of a State of Alaska Maximum Security Prison in the Matanuska-Susitna Borough

The attached report, "Benefit-Cost Analysis of Alternative Site Selections of the State of Alaska Maximum Security Prison", highlights the logical choice for locating such a penal facility at the Palmer Correctional Facility in Sutton.

The paper, researched and written by Richard L. Ender, Ph.D. and Charles R. Gant, M.A., demonstrates the need for a maximum security facility in Southcentral Alaska and shows the broad based public support for locating such a facility in Mat-Su.

I would like to recommend that your committee take this report into account when it considers location of maximum security prison facilities in southcentral Alaska.

Thank you for your time in consideration of this matter.

Re: Summary/ SSHB 292 "An Act relating to tuberculosis screening of school employees"

This legislation cross references HB 291 and the requirements therein. The Sponsor Substitute changes the wording so that the Dept. of Education would not be directly responsible for performing the T.B. screening of school employees.

The original bill read: "The Department shall annually test all employees of public and private elementary and secondary schools...". The Sponsor Substitute requires school districts to annually obtain from each employee proof that the test has been performed. An employee who refuses or fails to be tested would be suspended from employment until the employee had been tested. The Department could by regulation provide for reasonable exceptions to the new requirement.

No effective date provided. (becomes law 90 days after Govenor's signature).

Sec. 14.07.010. Department of Education. The Department of Education includes the commissioner of education, the state Board of Education, and the staff necessary to carry out the functions of the department. (§ 1 ch 98 SLA 1966)

NOTES TO DECISIONS

Quoted in Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

Cited in Tun[illegible] v. Municipality of Anchorage School Dist., Sup. Ct. Op. No. 2160 (File Nos. 4796, 4797, 4826), 617 P.2d 490 (1980).

Sec. 14.07.020. Duties of the department. The department shall

(1) exercise general supervision over the public schools of the state except the University of Alaska;

(2) study the conditions and needs of the public schools of the state and adopt or recommend plans for the improvement of the public schools;

(3) provide advisory and consultative services to all public school governing bodies and personnel;

(4) prescribe by regulation a minimum course of study for the public schools;

(5) establish, in coordination with the Department of Health and Social Services, a program for the continuing education of children who are held in detention facilities in the state during the period of detention;

(6) accredit those public schools which meet accreditation standards prescribed by regulation by the department; these regulations shall be adopted by the department and presented to the legislature during the first 10 days of any regular session, and become effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house;

(7) prescribe by regulation, after consultation with the Department of Health and Social Services, standards that will assure healthful and safe conditions in the public and private schools of the state; the standards for private schools may not be more stringent than those for public schools;

(8) in cooperation with the Department of Health and Social Services, exercise general supervision over public and private pre-elementary schools and over the educational component of nurseries as defined in AS 47.35.080(4); pre-elementary schools in this paragraph means schools for children ages three through five years when the schools' primary function is educational;

(9) provide accredited elementary and secondary correspondence study programs available to any Alaskan through a centralized office of correspondence study;

(10) accredit private elementary and secondary schools which request accreditation and which meet accreditation standards prescribed by regulation by the department;

(11) review plans for construction of new public elementary and secondary schools and for additions to and major rehabilitation of existing public elementary and secondary schools and, in accordance with regulations adopted by the department, determine and approve the extent of eligibility for state aid of a school construction project begun after July 1, 1978; for the purposes of this paragraph, "plans" include educational specifications, schematic designs, and final contract documents;

(12) provide educational opportunities in the areas of vocational education and training, basic education, and fire-service training to individuals over 16 years of age who are no longer attending school;

(13) administer the grants awarded under AS 14.11.020. (§ 1 ch 98 SLA 1966; am § 2 ch 69 SLA 1971; am § 6 ch 104 SLA 1971; am § 1 ch 190 SLA 1975; am § 6 ch 50 SLA 1977; am §§ 1-3 ch 126 SLA 1978; am § 10 ch 147 SLA 1978; am § 1 ch 86 SLA 1979; am § 24 ch 59 SLA 1982; §§ 1, 2 ch 92 SLA 1982)

Revisor's notes. — A reference to AS 14.11.020 was substituted for a reference to AS 14.07.190 in paragraph (13) by the revisor of statutes under AS 01.05.031 to conform to the renumbering of that section.

Effect of amendments. — The first 1978 amendment deleted "private, and denominational" preceding "schools" near the beginning of paragraph (6), inserted "and private" preceding "schools" in paragraph (7), added the language beginning "the standards for private schools" to the end of paragraph (7), and added paragraph (10).

The second 1978 amendment added paragraph (11).

The 1979 amendment added paragraph (12).

The first 1982 amendment substituted "of" for "and" preceding "new public elementary" in paragraph (11).

The second 1982 amendment substituted "'plans' include" for "a 'plan' includes" in paragraph (11), inserted "and approve" and "the" preceding "purposes of this paragraph" in that same paragraph, and added paragraph (13).

HOUSE BILL 291

MY NAME IS JIM FARMER, AIDE TO REPRESENTATIVE HURLBERT.

THIS LEGISLATION WAS INTRODUCED BY REQUEST.

IN YOUR PACKET IS A LETTER AND RESOLUTION FROM THE CITY OF GALENA OUTLINING THEIR PROBLEM. I'M HAPPY TO SAY THE INFECTED PERSON WAS FINALLY PERSUADED TO ENTER A COURSE OF TREATMENT, BUT THIS DOES NOT RELIEVE THE UNDERLYING PROBLEM OF SEGREGATING THE INFECTED FROM THE UNINFECTED. AS THE POSITION PAPER FROM DEPARTMENT OF HEALTH AND SOCIAL SERVICES SHOWS THE INCIDENCE OF NEW ACTIVE TB CASES IN ALASKA APPEARS TO BE CLIMBING. THE ONE INDIVIDUAL IN GALENA CAUSED ABOUT 39 OTHER PEOPLE TO NEED EXAMINATION OR TREATMENT.

MOST OF YOU MAY REMEMBER OR MAY HAVE HEARD OF THE MASSIVE PROBLEM ALASKA HAD IN THE PAST WITH TUBERCULOSIS. WE CANNOT ALLOW THIS TO HAPPEN AGAIN.

THIS LEGISLATION WILL HELP ENSURE THE MEDICAL PEOPLE A TOOL THAT MAY BE NEEDED TO SLOW OR REDUCE THE INCIDENCE OF TB WITHIN THE STATE.

THANK YOU.

5/18/83

SPONSOR SUBSTITUTE HOUSE BILL 292

MY NAME IS JIM FARMER, AIDE TO REPRESENTATIVE HURLBERT.

THIS LEGISLATION WAS INTRODUCED BY REQUEST.

IT WAS FELT THAT DUE TO THE CONTINUING INCREASE IN IN INCIDENCE OF TUBERCULOSIS WITHIN THE STATE THAT WE SHOULD DO OUR BEST TO INSURE THE PROTECTION OF OUR MOST VALUABLE ASSET, OUR CHILDREN.

CHILDREN ARE AT HIGH RISK FOR TB AND PEOPLE WHO, THROUGH THEIR JOBS, ARE AROUND THEM A LOT SHOULD BE CHECKED OFTEN FOR EXPOSURE TO THIS UNNEEDED BURDEN.

THIS WILL PROVIDE NEEDED PROTECTION.

THANK YOU.

House HE&S

5/18/83 - Mtg.
— Rep. Hurlbert's Aide Jim Farmer - Statement on HB 191 - Intro by request.
DR. Frith - who reg these bills -
Farmer - from City of Salem per resolution

Goll - Sec 2 Approp. - goes to Frith —
Frith - Yes - annual check appropriate.

DR. Rabeau - Very little to add -
1) TB on the increase
2) Alk had highest rate of TB - worldwide
a) people forget - diagnosis slips by.
b) increase in population
291 - 1st case in # of yrs - persuasion don't work for treatment & quarantine.
Frith - Immigrants from far East — ?
Rabeau - Fluoricide, they're screened - Lowe 48 - cases sited. TB remains hidden
Fischer - TB testing - ?
Roberts - K - 3 - 5 - 7 - 12 - new Entry into schools - 5th in school ages — checked
Fisher - pg 1 & 10 — Constitutional ?

Analysis

In 1983, there are approximately 16,500 public school employees in the State. The number of private school employees is not systematically reported. The following assumptions have been made:

1. The number of private school employees is 1,500 in 1983.

2. The growth rate in school employment will be 3% per year.

3. The proportion of employees requiring chest x-rays is 5%.

4. 60% of employees will be located in areas where x-ray facilities operated by a municipality are available. Cost per film is estimated to be $15.00 in 1984 and is inflated at 5% per year.

5. 40% of employees will be located in areas where x-ray service will have to be purchased from the private sector at a cost of $25.00 per film and inflating at a rate of 5% per year.

6. Costs of skin testing will be negligible since school district nurses or Division of Public Health nurses will provide the services.

HOUSE LABOR AND COMMERCE COMMITTEE

March 4, 1983

Representative Joe Hayes, Speaker of House
Alaska House of Representatives
Pouch V,
Juneau, Alaska 99811

Re: Alaska State Medical Board

Dear Mr. Speaker:

Pursuant to AS 44.66.050(a) the House Labor and Commerce Committee has held hearings regarding the above referred Board. Under AS 44.66.050(e) the Committee recommends adoption of the attached Committee Bill continuing the Board. The Legislative Budget & Audit Committee report outlined some concerns that have been reviewed by the Alaska State Medical Board. The Labor & Commerce Committee is satisfied that those concerns are being addressed in an expeditious manner.

The Committee believes the Alaska State Medical Board should be reestablished. The Alaska State Medical Board regulates the practices of medicine, osteopathy, and acupuncture by physicians, osteopaths, physician assistants, paramedics, and podiatrists. By establishing minimum educational and experience requirements and actively investigating complaints from the public and other practitioners, the Alaska State Medical Board provides a

needed public service. Specifically, the findings of the Committee of the public need for the Board as required under AS 44.66.050(c) are as follows:

AS 44.66.050(c) " A determination as to whether a board or commission or agency program has demonstrated a public need for its continued existence shall take into consideration the following factors:"

(1) the extent to which the board, commission or program has operated in the public interest;

The Alaska State Medical Board provides for examinations twice a year and has held an average of 4 meetings a year in various locations throughout the State.

2) the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters;

The Alaska State Medical Board has been impeded in its operation by the lack of statutory authority to address licensing and business practice(s) violations. Also, the Division of Occupational Licensing has been unable to provide support necessary to the Board and the Courts are not placing emphasis on the findings of the Board developed through the hearing process.

(3) the extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest;

The Alaska State Medical Board has recommended and strongly supported legislation to correct these problem areas.

(4) the extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided;

The Alaska State Medical Board has encouraged interested persons to report by advertising and requesting public input on proposed regulation changes.

(5) the extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions;

The Division of Occupational Licensing places advertisements of the Alaska State Medical Board's meetings and examinations.

(6) the efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved;

While there have been no consumer complaints filed with the Ombudsman or the Attorney General's Office regarding the Alaska State Medical Board, there is no provision for consumer complaints in AS 08.64.

(7) the extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public;

The Alaska State Medical Board has issued 349 licenses, temporary permits, locum tenens permits, physician assistant authorizations, and paramedic authorizations since July 1981. The Board has a liberal policy of licensing by endorsing physicians from other states. The Alaska State Medical Board requires the FLEX exam and of completed internship or residency which serves to protect the public.

(8) the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest; and

The Committee believes the Alaska State Medical Board to be in compliance with applicable law and regulation.

(9) the extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

The Committee believes adoption of the proposed legislation would better serve to protect the interests of the public.

Pursuant to AS 44.66.050(d) the Committee recommends the following:

(d) As to each board, commission, or agency program assigned to it for purposes of review, the committee of reference shall, not later than the 60th day of the legislative session, submit a report to the presiding

officer of the house. The report shall contain a summary of the findings of the committee as to the compliance of the board, commission or program with the factors enumerated in (c) of this section, together with a summary or recommendations of the committee as to each of the following:

(1) an identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address;

The Alaska State Medical Board regulates the medical practice of physicians, osteopaths, physician assistants, podiatrists, and acupuncturists.

(2) a statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments;

The objective of the Alaska State Medical Board is to ensure that the public is provided safe and effective medical care by qualified health care professionals.

(3) an identification of any other programs having similar, conflicting or duplicate objectives;

The Committee found no other program having similar, conflicting or duplicate objectives.

(4) an assessment of alternative methods of achieving the purposes of the program;

The Committee could find no viable alternative method of achieving the purposes of the Alaska State Medical Board.

(5) an assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level;

The Committee believes the consequence of eliminating the Alaska State Medical Board or funding its activities at a lower level would be an unnecessary exposure to potential improper medical care.

(6) a justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts; and

The critical necessity for proper medical treatment is the primary justification for the continuation of the Alaska State Medical Board.

(7) any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest.

The Alaska State Medical Board should be given legislative support in addressing the concerns outlined by the Legislative Budget and Audit report.

Respectfully submitted:

STATE OF HAWAII NATUROPATHIC LAW

CHAPTER 455
NATUROPATHY

SECTION

455-1 DEFINED
455-2 APPLICATION FOR EXAMINATION; FEE
455-3 QUALIFICATIONS OF APPLICANTS
455-4 STATE BOARD OF EXAMINERS IN NATUROPATHY
455-5 ORGANIZATION OF THE BOARD
455-6 POWERS AND AUTHORITY OF THE BOARD
455-7 EXAMINATIONS
455-8 LICENSE TO PRACTICE; BIENNIAL REGISTRATION
455-9 PENALTY

§455-1 Defined. For the purpose of this chapter the practice of naturopathy means the scientific application of air, light, sunshine, water, earth, cold and heat, electricity, hygiene and dietetics, bio-chemic system, psychotherapy, mechanical movements, manipulations, and appliances, specifically to eliminate toxic conditions from the human body and to promote the quality, quantity and flow of the vital fluids without the use of drugs, aiding nature with natural and

congenial agents or means either tangible or intangible to restore and maintain normal functioning; provided, that the practice of naturopathy shall not include the Hawaiian art of lomilomi or massage. [L 1925, c 77, pt of §1; RL 1935, §1300; RL 1945, §2651; RL 1955, §66-1]

§455-2 Application for examination; fee. Any person desiring to practice naturopathy shall apply in writing to the state board of examiners in naturopathy upon a blank form prepared and furnished by the board and shall include in the application such facts concerning the applicant as the board shall require. Each application shall be filed by the applicant and sworn to before an officer authorized to administer oaths. At the time of the application each applicant shall pay an examination fee of $50 [75] to the department of regulatory agencies which shall not be refunded if the applicant fails to pass the examination.

No person shall be licensed to practice naturopathy unless he has been duly examined and has passed such examination. [L 1925, c 77, pt of §1; RL 1935, §1301; am L 1937, c 221, §1; RL 1945, §2652; RL 1955, §66-2; am L 1957, c 316, §6; am L Sp 1959 2d, c 1, §15; am L 1963, c 114, §3; HRS §455-2; am L 1969, c 106, §1]

For additional licensing requirements, see L 1975, c 118, §35, appended as note to HRS §436-4.

Revision Note

Fee as modified by administrative action pursuant to §92-28 is shown in brackets.

§455-3 Qualifications of applicants. No application shall be received unless the applicant has resided in the State for not less than one year immediately preceding the date of application. Each applicant shall be a graduate of a high school. Each applicant shall, in addition, have had a two year liberal arts and science course from an accredited college or university and be a graduate of a legally chartered school, university, or college of naturopathy which requires a course of resident instruction of at least four years of nine months each of actual attendance, and includes in its course of study the subjects hereinafter listed for the minimum hours hereinafter listed:

Anatomy	650
Histology and embryology	130
Chemistry and toxicology	250
Physiology	300
Bacteriology	130
Hygiene and sanitation	130
Pathology	350
Diagnosis	600
Naturopathic theory and practice	900
Obstetric. ·d gynecology	260
Jurisprudence	50
Clinical practice	400
Biochemistry and dietetics	240
Therapeutics	130
Total	4520

Each applicant shall ve ttended such school, university, or college for at least ninety per cent of the . ours required. The addition of two years of liberal arts and science course shall not apply to persons who, on May 9, 1949, were

lawfully licensed to practice naturopathy in the State or to persons holding diplomas or attending legally chartered naturopathic schools, universities, or colleges on such date. [L 1925, c 77, pt of §1; RL 1935, §1302; am L 1935, c 221, §2; RL 1945, §2653; am L 1949, c 214, §1; RL 1955, §66-3]

Hawaii Bar Journal

For discussion of residence qualification, see The New Resident: Hawaii's Second-Class Citizen, Steven K. Christensen, 5 HBJ 77.

§455-4 State board of examiners in naturopathy. The governor shall appoint in the manner prescribed by section 26-34 the state board of examiners in naturopathy, consisting of three members. Each member shall serve until his successor is appointed and qualified. All members of the board shall, before appointment, have been licensed to practice naturopathy in the State under the laws thereof in force at the date of the issuance of the license. [L 1937, c 221, §3; RL 1945, §2654; RL 1955, §66-4; am L Sp 1959 2d, c 1, §5]

Cross References

Boards, generally, see §26-34 and notes thereto.
Departmental administration, see §§26-9 and 26-35.

§455-5 Organization of the board. The board of examiners in naturopathy may elect a president, a vice-president, and a secretary who shall each serve one year or until a successor is elected. The board may make such rules as it deems expedient to carry this chapter into effect. Two members of the board constitute a quorum for the transaction of business. The board shall serve without pay, provided, that the expenses of conducting examinations shall be paid out of the office expenses of the department of regulatory agencies upon vouchers signed by a majority of the board. [L 1937, c 221, §4; RL 1945, §2655; RL 1955, §66-5; am L Sp 1959 2d, c 1, §15; am L 1963, c 114, §3]

Cross References

Rulemaking, see chapter 91.

§455-6 Powers and authority of the board. The state board of examiners in naturopathy may:

(1) Adopt and use a seal to be affixed to all official acts of the board;
(2) Make rules and regulations to determine the means, terms, translations, and definitions relating to the practice of naturopathy in the State;
(3) Revoke or suspend any license issued to any person to practice naturopathy upon any of the following causes:
    (A) Procuring or aiding or abetting in the procuring of a criminal abortion;
    (B) Obtaining of or any attempt to obtain a license to practice naturopathy through fraud, misrepresentation, bribery, or deceit;
    (C) Continued practice by a person knowingly having an infectious or contagious disease;

(D) Advertising by means of knowingly false or deceptive statements;

(E) Advertising, practicing, or attempting to practice under a name other than one's own;

(F) Habitual drunkenness, or addiction to the use of morphine, cocaine, or other habit-forming drugs;

(G) Professional misconduct, gross carelessness, neglect, or manifest incapacity; any one or more of the causes having been proved to the satisfaction of the board.

The board may not suspend or revoke a license, however, for any of these causes unless the person accused has been given at least twenty days' notice, in writing, and a public hearing in conformity with chapter 91.

The board may compel the attendance of witnesses and the production of relevant books and papers for the investigation of matters that may come before them and the presiding officer of the board may administer the requisite oaths.

In case any license is revoked for any of the causes named in this section, the holder thereof shall be immediately notified of the revocation, in writing, by the board. Licenses to practice naturopathy may be restored by the board. [L 1949, c 214, §2; RL 1955, §66-6; am L Sp 1959 2d, c 1, §19; HRS §455-6; am L 1969, c 106, §2; am L 1974, c 205, §2(16)]

§455-7 Examinations. The state board of examiners in naturopathy shall conduct examinations at such times and places as it deems best, in the following subjects: anatomy; histology and embryology; chemistry and toxicology; physiology; bacteriology; hygiene and sanitation; pathology; diagnosis or analysis, including clinical, physical, x-ray, symptomatology, dermatology, and mental diseases; naturopathic theory and practice; obstetrics and gynecology; jurisprudence; clinical practice; biochemistry; therapeutics, including physiotherapy, hydrotherapy, electrotherapy, heliotherapy, phytotherapy, orthopaedics; and such other subjects as the board may require. The examination shall be conducted in writing, but it may be supplemented by oral examinations, and by demonstrations or other practical tests as the board may require. If the applicant receives a general average of seventy-five per cent and does not fall below sixty per cent in more than two branches of the examination, he shall be considered as having passed the examination. [L 1937, c 221, §5; RL 1945, §2656; RL 1955, §66-7; am L Sp 1959 2d, c 1, §19; HRS §455-7, am L 1969, c 106, §3]

Cross References

Disposal of examination papers, see §94-5.

§455-8 License to practice; biennial registration. Licenses to practice naturopathy shall be issued by the board in such form as the board determines, to those who qualify according to this chapter. Naturopathy physicians licensed under this chapter shall observe and be subject to all state regulations relative to reporting births and deaths and all matters pertaining to the public health with equal rights and obligations as physicians, surgeons, and practitioners of other schools of medicine. Every person holding a license to practice in the State shall reregister with the state board of examiners in naturopathy on or before December 31 of each odd-numbered year and shall pay a reregistration fee of $15. The failure to so reregister and pay the reregistration fee constitutes a forfeiture of

license; provided that the license shall be reinstated upon written application therefor together with payment of all delinquent fees and the sum of $75. [L 1925, c 77, pt of §1; RL 1935, §1303; am L 1937, c 221, §6; RL 1945, §2657; RL 1955, §66-8; am L 1957, c 316, §7; am L Sp 1959 2d, c 1, §19; HRS §455-8; am L 1969, c 106, §4; am L 1975, c 118, §18]

§455-9 **Penalty.** Any person except a licensed naturopath who practices or attempts to practice naturopathy, or any person who buys, sells, or fraudulently obtains any diploma or license to practice naturopathy whether recorded or not, or any person who uses the title "natureopath", "naturopath", or "N.D.", or any word or title to induce the belief that he is engaged in the practice of naturopathy without complying with this chapter, or any person who violates this chapter, shall be fined not more than $200, or imprisoned not more than one year, or both. [L 1925, c 77, pt of §1; RL 1935, §1304; RL 1945, §2658; RL 1955, §66-9]

NATUROPATHIC MEDICINE;

AN ALTERNATIVE FOR THE PREVENTION AND TREATMENT OF DISEASE

Are you aware that there exists in this country a medical profession that treats the CAUSE of disease and places emphasis upon the restoring and maintaining of health?

Naturopathy is a distinct system of healing based upon its own philosophy of health and disease. It may be defined as an art, science, philosophy, and practice following definite physical, chemical, biological, mental, and spiritual laws for the restoration and maintenance of health and the correction of bodily disorders without the use of drugs or surgery. For relief and cure it makes use of Nature's most beneficent forces and agencies on the theory that under the normal conditions of natural living the body is a self-recuperating organism.

A more complete explanation of Naturopathic Medicine is contained in the United States Department of Labor, "Dictionary of Occupational Titles," second edition, March, 1955. It states:

"Doctor, Naturopathic, *Naturopathic Physician:* A healer; diagnoses, treats and cares for patients, using a system of practice that bases its treatment of all physiological functions and abnormal conditions on natural laws governing the body; utilizing physiological, psychological, and mechanical methods, such as air, water, light, heat, earth, phytotherapy, food and herb therapy, psychotherapy, electrotherapy, physiotherapy, minor and orificial surgery, mechanotherapy, naturopathic corrections and manipulation, and all natural methods or modalities, together with natural medicines, natural processed foods, and herbs and nature's remedies. Naturopathy excludes use of major surgery, X-ray and radium for therapeutic purposes, and drugs."

While Naturopathic Physicians are concerned with the immediate causative factors of an illness, equal consideration or treatment is given to the basic, underlying causal factors or circumstances so frequent in many disorders. Particular emphasis is placed on the maintenance of health (or prevention of disease) through *health education* in nutrition, mental hygiene, physical fitness and other aspects of bodily care.

Naturopathic Physicians treat any and all conditions that come within the realm of *general practice.* (Cardiovascular problems, neurological, musculo-skeletal, and orthopedic diseases; gastro-intestinal, genito-urinary, respiratory and dermatological problems are treated frequently as are pediatric or geriatric illnesses.) Naturopathic Physicians cooperate freely with any licensed doctor in the healing profession, when such cooperation is in the best interests of the patient.

Naturopathic services should not be considered ancillary or paramedical in relation to the medical profession.

Naturopathic Physicians have met a standard of qualification that compares favorably with graduates of other medical schools and they are equally scientifically oriented to perform and interpret diagnostic procedures.

The name "Naturopathy" is of comparatively recent date, but its philosophy and practices can be traced to antiquity. It does not discard a method because it is old, neither does it embrace a technique because it is new. Its methods and techniques have been tested upon the anvil of time and experience and proven effective.

In consideration of the above, it must be emphasized that Naturopathic Medicine is very much in favor of all modern, scientific advancement and techniques, (many of which have verified naturopathic concepts and principles) which extend the life and health of the human body providing such scientific endeavors do not violate natural or biological law.

New concepts of micro-biology, neurophysiology, physio-therapeutics and psycho-therapeutics have been incorporated into daily practice. Indeed, there is a tendency for many doctors of other healing professions to employ various aspects of contemporary Naturopathic Medicine.

The Naturopathic Physician familiarizes himself with what constitutes natural living learns to detect by diagnostic signs how, when and where departure from the normal or natural has taken place, and then applies his knowledge and skill, aided by the various kinds of Naturopathic treatments, to help bring about a return to the normal and natural. In reality Nature heals and cures. The Naturopathic Physician merely interprets Nature's laws for the patient and lends intelligent assistance.

● ● ●

THE PHILOSOPHY OF NATUROPATHIC MEDICINE

In simple terms, the philosophy of Naturopathic Medicine is based upon the premise that man is a part of his environment as well as being influenced by it and therefore, the health of his body and mind is governed by natural or biological (physiological) laws, which apply to all living organisms. The science of physiology has revealed these laws of nutrition, oxygenation, elimination, circulation, excretion, etc. that man must live in accord with. Disease is altered physiology (or pathology) and results when man does not live in accord with or actually violates natural or biological laws. In treating disease, Naturopathic Physicians utilize "physiological therapeutics" and thereby restore health.

A few moments of reflection will reveal a clear differentiation from the profession of orthodox medicine, surgery and chiropractic.

THE SCIENCE OF NATUROPATHIC MEDICINE

The science of Naturopathic Medicine is essentially the thorough study *of all the basic sciences* (anatomy, physiology, pathology, biochemistry, bacteriology, hygiene and sanitation), and the scientific manifestations and modern-day verifications of its philosophical principles, in an accredited naturopathic college. In addition, the subjects of diagnosis (physical, clinical, symptomatological, X-ray and laboratory), and the subjects of Natural Medicine (natural therapeutics embracing nutrition, phytobotanical therapy, physical and physio-therapy, soft-tissue and osseous manipulation, psychotherapy, natural childbirth, homeopathy, etc.) are studied extensively. The curriculum also includes the specified subjects of pediatrics orthopedics, obstetrics and gynecology, jurisprudence, dermatology, endocrinology, abnormal psychology and toxicology.

● ● ●

THE ART OF NATUROPATHIC MEDICINE

The art or practice of Naturopathic Medicine consists essentially of applying the philosophy and science to the actual sick patient–first in an approved supervised internship program and then in actual practice after qualifying for licensure.

To insure standardization and competency in practice, particular emphasis is placed upon instruction in the art of diagnosis, including recognized laboratory procedures and utilization of all the latest scientific methods of investigation, specifically to search out the underlying causative factors of disease. Thus, adequate provision is made for the establishment of an accurate regime of treatment for the reduction or elimination of the etiological, pathological and symptomatic manifestations of disease.

The specific treatment of illnesses, injuries and reversible pathologies by Naturopathic Medicine embraces the psychological (emotional), nutritional, biochemical, neurological and physical fields of practice. These methods are correlated and administered in combination to produce the desired biological response or therapeutic effect.

● ● ●

SOCIOLOGICAL RECOGNITION OF NATUROPATHIC MEDICINE

Naturopathic Medicine is practiced throughout the world. In England and other countries of the Commonwealth, professional associations of Naturopathic Physicians have been in existence for many years Many European countries grant to Naturopathic Physicians recognition equal to that of all major healing professions. Germany has some 4,000 naturopathic practitioners. Recognition of the professional status of Naturopathic Medicine in the United States has existed for many years. Naturopathic Medicine is recognized in the states of Arizona, Connecticut, District of Columbia, Florida Hawaii, Oregon, Utah, and Washington.

HISTORY OF NATUROPATHY

Many of the methods of treatment which the Naturopathic Physician employs have been in use since the time before history began. Sunshine, fresh air, heat, exercise, water, clay and mud baths, etc. served as agencies of cure long before man knew how to treat himself scientifically. We see a similar situation among the animals now.

In early historical times, massage, manipulation of a crude type, rules of diet and hygiene inculcated by religions doctrines were added. The Greeks contributed athletics and physical culture, while the Romans made extensive use of baths of all kinds.

During medieval times the Church fostered the various healing arts among which the methods of Natural Healing were outstanding. After the Renaissance, the Nature-Cure movement continued to develop in Central Europe, where it received considerable impetus.

In the latter part of the nineteenth century such men as Priesnitz, Rickli, Kuhne, Bilz, Schuessler, Father Kneipp, Just, Lahmann, Ehret, and others, made important contributions to the Natural Healing Art. They did much to popularize the work which was now called Naturopathy; the term originates from the incorporation of natural healing methods into the already existing practice of Homeopathy in Central Europe.

In this country, Benjamin Franklin and other early pioneers did much to advance the cause of Nature-Cure. Later, Naturopathy was brought over from Europe by Lust, Lindlahr, Carey, and others. Additions to the method of the Natural Healing Art were now being made very rapidly.

MEMORANDUM

TO: Representative Furnace

FROM: Jay Livey
Legislative Analyst

RE: Regulation of Naturopaths in Other States
Research Request 84-055

Steve Levi of your staff asked that we compare the regulation and licensure of naturopaths in other states with the approach proposed by CSHB 374. There are currently six states, Washington, Arizona, Oregon, Hawaii, Nevada, and Connecticut, that license naturopaths. We were able to contact or obtain licensing laws for all of these states. The comparisons of the laws includes the following information:

- the entity responsible for the regulation;
- requirements for licensure as a naturopath;
- scope of naturopathic practice; and
- reciprocity arrangements with other states.

Responsibility for Naturopathic Regulation

CSHB 347 puts the responsibility for the regulation of naturopaths in Alaska within the authority of the Department of Commerce and Economic Development. The department would have the authority to evaluate the qualifications of applicants, prepare and administer examinations to applicants and revoke and suspend licenses for cause. The State of Washington uses a similar structure, giving these powers to the Department of Licensing.

In four states, Hawaii, Oregon, Nevada and Arizona, the authority to administer the licensure law is given to a Board of Naturopathic Examiners. These boards may discipline licensed naturopaths through revocation or suspension of licenses, establish and administer licensure examinations, evaluate the qualifications of applicants and generally administer the licensure law. Three of these states, Hawaii, Arizona

and Oregon, have a three-member board composed of licensed naturopaths. Nevada has a five-member Board of Examiners of which three members are required to be naturopaths; one member is required to be a physician and one member must be a layperson.

Connecticut has a structure that divides the licensing authority between a Board of Examiners and the Department of Health Services. The board, composed of 2 licensed naturopaths and one layperson, has the authority to discipline licensed naturopaths according to procedures established by the law and administrative code. The board is also responsible for developing the licensure examination. The Department of Health Services administers the licensure statute, and has final responsibility for licensing naturopaths under the statute.

Requirements for Licensure

In summary, to be licensed as a naturopathic physician in any of these states, the applicant must be a high school graduate, have graduated from an approved school of Naturopathy and pass an examination administered by either a state department or state board of examiners. As proposed in the Alaska law, Hawaii, Oregon and Connecticut require that applicants complete additional college work at an approved school. We also found the the standards used by the states to define approved schools of naturopathy were fairly similar to those proposed in the Alaska law. All states require a mix of classroom and clinical study, a course of study that occurs over four years and a minimum number of hours required for graduation. Each state's requirements are summarized below.

Alaska. To be eligible for a license as a naturopath in Alaska, CSHB 347 would require the applicant to be a high school graduate or equivalent, and to have completed two years of postsecondary education at an accredited college of liberal arts and sciences, have successfully completed an examination given by the Department of Commerce and Economic Development and not to have been licensed to practice naturopathic medicine in another state if the license has been revoked or suspended for disciplinary reasons. In addition, the applicant must have graduated from a legally chartered school of naturopathic medicine or a school of naturopathic medicine that meets specific curriculum requirements including a course of study of at least 4,000 hours of which 1,500 must be clinical.

Hawaii. In Hawaii, to be licensed as a naturopathic physician, an applicant must reside in the state for one year prior to application, be a high school graduate, have had two years liberal arts education at an accedited college and be a graduate of a legally chartered school of naturopathic medicine that meets specific curriculum requirements found in the law. In addition, the applicant must pass an examination prepared and administered by the Board of Naturopathic Examiners.

Arizona. Arizona law requires an applicant for a naturopathic license to be a high school graduate or the equivalent and to have graduated from a school of drugless therapeutics, approved by the Board of Naturopathic Examiners. The school must meet specific curriculum requirements specified in the law and provide a total of at least 4,500 hours of instruction. The applicant must also pass an examination prepared by the Board of Examiners.

Connecticut. Connecticut law requires an applicant for a naturpathic license to be a high school graduate, to have completed 64 weeks of study at a college or scientific school approved by the Board of Naturopathic Examiners and to have graduated from a legally chartered, reputable school or college of naturopathy approved by the board. To be approved, the school of naturopathy, must require a course of resident instruction of at least four years, with each year consisting of thirty-six weeks of actual attendance. The applicant must also successfully pass an examination given by the Department of Health Services.

Oregon. Minimum requirements to be eligible for a license of naturopathy in Oregon include a high school diploma, two years satisfactory study in an accredited college of liberal arts and sciences and graduation from a college of naturopathy approved by the Board of Naturopathic Examiners. To be accredited, the college of Naturopathy must provide at least 4,000 lecture or recitation hours. Applicants are also required to pass an examination administered by the board.

Washington. Washington requires applicants for a naturopathic license to be graduates of a school of naturopathic medicine approved by the Director of Licensing and to pass an examination prepared amd administered by the Director of Licensing. To be approved, the school must require a high school diploma as a condition of admission.

Nevada. To be licensed as a naturopath in Nevada, the applicant must be 21 years of age or older, a citizen of the United States or be legally entitled to work and live here, a graduate of a school of naturopathic medicine that is approved by the Board of Naturopathic Examiners and must have successfully completed an examination administered by the board.

Scope of Practice

The scope of naturopathic practice allowed by the proposed Alaska law is similar to the scope of practice allowed in Oregon, Arizona, and Connecticut. These states all allow naturopaths to perform childbirth, draw blood for diagnosis purposes, sign birth and death certificates and perform minor surgeries.

However, the states of Washington and Nevada restrict the scope of naturopathic practice more than the proposed Alaska law. These states do not allow naturopaths to perform surgeries of any kind or perform natural childbirth (except in Washington if a licensed midwife is present). Naturopaths in Nevada must work under the supervision of a physician; however, they are allowed to draw blood for diagnosis.

Alaska. The proposed Alaska law would allow naturopaths to perform physical exams, write prescriptions for noncontrolled substances, sign birth and death certificates, diagnose disease according to training, treat patients by stimulating normal functions of tissues and organs sensitized by disease, draw blood for laboratory purposes, use electrical or other methods for repair and care of superficial lacerations and abrasions, and practice natural childbirth in obsetrics. According to the proposed law, a naturopath may not perform surgery except as related to childbirth, use controlled substances, use radiation therapy or use drugs except antiseptics, local anesthetics, minerals and extracts, compounds or concentrates obtained from plants or animals.

Hawaii. Hawaii's naturopathic licensing law does not specify a scope of allowable practice. However, it does state that "naturopathic physicians licensed under this chapter shall observe and be subject to all state regulations relative to reporting births and deaths and all matters pertaining to the public health with equal rights and obligations as physicians, surgeons, and practitioners of other schools of medicine." Because we were unable to contact representatives of the Hawaii Board of Naturopathic Examiners, we were unable to make specific comparisons to the proposed Alaska law.

Arizona. The Arizona law does not specifically include the scope of services naturopaths can offer. According to Dr. Milburn Shelton, President of the State Naturopathic Licensing Board, the scope of services is determined by the definitions found in the statute.[1] For example, naturopathy means "a system for treating the abnormalities of the human mind and body by the use of drugless and nonsurgical methods including the use of physical, electrical, hygenic, and sanitary measures and all form of physiotherapy."

Nonsurgical is defined to be "a system of treating the abnormalities of the human mind and body without surgical invasion of the human body, but does not preclude the use of acupuncture, electrical or other methods for the repair and care of incident and superficial lacerations and abrasions, benign superficial lesions and the removal of foreign bodies

---

[1]Dr. Milburne Shelton, President of the Arizona Board of Naturopathic Examiners, (602) 937-9125.

located in superficial structures, and the use of standard clincal procedures in connection therewith." This definition allows procedures that are similar to ones allowed in the proposed Alaska law.

Dr. Shelton stated that naturopaths in Arizona could also perform physical examinations, prescribe substances authorized in the statutes, sign both birth and death certificates, treat patients with acupuncture, draw blood for laboratory purposes and practice natural childbirth. He also noted that naturopaths in Arizona are prohibited from performing the activities also prohibited in CSHB 347.

Connecticut. As with Arizona, the Connecticut law is not very specific concerning the scope of practice naturopaths are allowed to perform. However, according to Dr. Charles Soderstrom, President of the Board of Naturopathic Examiners, the scope of practice is very similar to the proposed Alaska law.[2] He noted that Connecticut naturopaths can perform minor surgery, practice natural childbirth, sign both birth and death certificates, draw blood for laboratory tests, and perform diagnosis. However, as in the proposed Alaska law, naturopaths may not perform major surgery, use controlled substances, or use radiation therapy.

Oregon. The Oregon statutes allow naturopaths to "treat the human body by use of drugless methods, which has for its object the maintaining of the body in, or of restoring it to, a state of normal health." Although the full scope of allowed services is not detailed in the statute, it does specifically mention that antiseptics and anesthetics can be administered, birth and death certificates can be signed and minor surgery (as defined in the statute) can be performed.[3] Specific prohibitions mentioned in the law include the practice of optometry, performing chiropractic adjustments and prescribing drugs.

Washington. The Washington licensing law does not specifically detail the scope of naturopathic practice. According to Yvonne Braeme, Executive Secretary to the Drugless Examining Committee, the existing law in Washington, which was adopted in 1919, is outdated.[4] However, she did note that naturopathic practice in Washington may be more restricted than that proposed by the Alaska law. In Washington, naturopaths are

---

[2]Dr. Charles Soderstrom, President, Connecticut Board of Naturopathic Examiners, (203) 633-5330.

[3]Minor surgery as defined in the Oregon law is very similar to the scope of services detailed in the proposed Alaska statute.

[4]Ms. Yvonne Braeme, Executive Secretary, Washington State Board of Drugless Medicine, (206) 753-3576.

not allowed to sign birth and death certificates, draw blood for laboratory uses, perform natural childbirth without the presence of a licensed midwife, do surgeries of any kind or prescribe medicine.

Nevada. Of all the states that we contacted, Nevada had the most restrictive law concerning naturopaths. In Nevada, naturopaths are required to work under the supervision of a licensed physician and are not authorized to "perform those functions and duties specifically delegated by law to physicians, dentists, nurses, osteopaths, chiropractors, practitioners of traditional oriental medicine, podiatrists, optometrists, hearing aid specialists or physical therapists."

Specifically, naturopaths may not use x-ray or radium treatments, perform major or minor surgery, perform obstetrics, prescribe drugs or draw blood for any reason other than diagnosis. Naturopaths may sign birth and death certificates if they are co-signed by the supervising physician.

Reciprocity in Licensing

Reciprocity refers to the granting of a license by one state based on the fact that a license has been granted to the applicant by another state that has similar licensing requirements. The proposed Alaska law gives this power to the Department of Commerce and Economic Development assuming that the law in the state in which the applicant currently has a license is equivalent to the requirements of Alaska law.

Currently, the states of Arizona and Oregon have the power in their statutes to grant naturopathic licenses based on reciprocity agreements. The states of Nevada, Washington, Connecticut and Hawaii do not allow reciprocity.

I hope that this information is helpful to you. If you would like copies of the naturopathic regulations from other states or require additional research, please let me know.

JL

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 347 (HESS)

"An Act relating to the licensing of naturopaths; and providing for an effective date".

The committee substitute addresses the objections raised by the Department of Health Services and Social Services in its position paper on the original bill. The Department would like to offer two additional suggestions.

Modification of the language of 08.45.010 (4) is recommended as follows: "(4) provide for temporary permits to engage in the practice of naturopathy for persons who meet the requirements of AS 08.45.110 (1),(2),(3),(5) and (6). Temporary permits are valid until certification of the results of the next examination given under AS 08.45.120." Such language would make more specific the requirements for temporary licensure.

It is assumed that all three conditions listed under Section 08.45.130 must be met before an license by endorsement can be issued. If there is any question, insertion of the word "and" after 08.45.130 (1) would clarify the matter.

The bill would require the Division of Occupational Licensing to evaluate qualifications of applicants, establish educational requirements, evaluate schools and conduct examinations for licensure. This Department and, presumably, professional groups in the State would be available to assist as required in the discharge of these duties.

With the recommended changes, the Department of Health and Social Services has no objection to the passage of this bill.

NATUROPATHIC MEDICINE

Naturopathic Medicine is a distinct system of healing, a philosophy, science, art and practice which seeks to promote health through education and the rational use of natural agents and processes. As a separate profession, naturopathic medicine in North America traces its origins to Dr. Benedict Lust. Late in the nineteenth century, Lust came to the United States from Germany to practice and teach Hydrotherapy and "Nature-Cure" techniques popularized by Preissnitz, Kneipp and others in Europe. A committee of these practicioners met in 1900 and determined that the practice incorporate all natural methods of healing, including such elements as botanical medicines, homeopathy, nutritional therapy, medical electricity, psychology, and the emerging manipulative therapies. They called their profession "Naturopathy", a term first used by Dr. John H. Scheel, a German Homeopath. The American School of Naturopathy in New York City, founded by Dr. Benedict Lust, graduated its first class in 1902.

Although the name "naturopathic" is of relatively recent origin, the philosophical basis and many of the methods of naturopathic medicine are ancient. The modern naturopathic physician is a true heir to the Hippocratic tradition in Medicine.

PHILOSOPHY

The human body possesses enormous power to heal itself through mechanisms of homeostasis - restoring balance in structure and function and adapting to environmental changes. This vital force, the "vis medicatrix naturae", is the foundation of naturopathic philosophy and practice. The naturopathic physician uses those therapeutic substances and techniques which act in harmony with the body's self-healing processes and avoids treatments which are designed to counteract or supervene them.. Ideally, naturopathic methods are applied as a means of assisting and augmenting this "healing power of nature". A cornerstone of natural therapy is cleansing, detoxification and regeneration.

Naturopathic medicine is a wholistic approach to health. By taking into consideration heredity, biochemical, emotional, environmental and psychological factors, disease manifestations are thus acknowledged from a polycausal perspective. Disease as a process rather than disease as an entity is empahsized and an understanding of the individual as an expression of the dynamic process of life is developed.

SCIENCE

The science of naturopathic medicine is a comprehensive body of knowledge derived from traditional and contemporary sources. It is a record of observation and research in diverse cultures and throughout history. Included in this science are the disciplines common to all healing arts; a thorough study of the human organism, how it iss influenced by all aspects of its environment, and techniques of discovering the nature of the disease process. Naturopathic physicians apply the latest research in all branches of medical science and technology to their field, from discoveries of new facts about human physiology, biochemistry and nutrition to the most modern diagnostic tools and techniques.

Beyond these conventional studies, naturopathic medical science also embraces other diagnostic and proven therapeutic techniques which reflect its philosophical principles.

ART

The art of naturopathic medicine is essentially the application of philosophy and science to the individual. The naturopathic physician develops an ability to gain insight into the causes and effects of personal health problems and to use his or her own knowledge and skill to assist patients in finding solutions. Only in the role of teacher - the literal meaning of "doctor" - can a physician practice truly preventative medicine. In helping people to understand how the choices they make about their lives have an effect on their health, naturopathic physicians provide health education. The ultimate role of the physician is to provide each patient with the tools to achieve the highest possible level of health and the encouragement to use these tools.

PRACTICE

The naturopathic physician is trained as a general practitioner, able to provide a wide range of individual, family and community health services to persons of all ages.

Naturopathic treatment of illnesses, injuries, and reversible pathologies embraces the psychological and emotional, nutritional, biochemical, neurological, and physical therapeutic modes. These methods are administered in combination to produce a maximal desired response or therapeutic effect.

The therapies employed by the naturopathic physician include, but are not limited to the following:

1. CHINESE MEDICINE AND ACUPUNCTURE are concerned with the basic concepts of balance in and correct mobilization of the body's internal energy flow.

2. HOMEOPATHY utilizes th natural law of similars (like cures like) in treating highly personalized "symptom pictures" displayed by patients, a health profile that is derived from extensive life histories and life style analysis.

3. PHYSICAL MEDICINE explores the physiological effects and therapeutic use of heat, light, water, electricity, and sound.

4. NUTRITION focuses on diet and the uses of food stuffs, including vitamins, to correct nutritional deficiencies or imbalancees as well as dietary therapies for specific metabolic conditions.

5. BOTANICAL MEDICINE involves a detailed survey of plants and plant knowledge, integrating traditional herbal knowledge with modern pharmacological research.

In all cases, the naturopathic physician emphasizes the patient's responsibility towards his/her own health and well-being.

BECOMING A NATUROPATHIC PHYSICIAN

The first step in becoming a naturopathic physician is application to an established college of naturopathic medicine. The National College of Naturopathic Medicine is a four-year, N.D. degree-granting institution located in Portland, Oregon. The Admissions Office will be able to provide you with more information about NCNM's curriculum and specific admissions procedures.

The four years at The National College of Naturopathic Medicine are spent in a thorough study of the basic medical sciences, followed by two years of work in the clinical sciences. During the latter, students see patients in the Outpatient Clinic, and develop more specialized expertise in therapeutic modalities. The clinical science years are an important transitional period in the development of the student to a practicing naturopathic physician. In addition, NCNM's new curriculum allows a student to concentrate in certain areas of interest including those listed above. Because of extensive contact with patients under the supervision of a licensed naturopathic physician, and the flexibility that permits students to develop specialized skills and knowledge, the clinical years are generally viewed as the most rewarding and exciting--when being a naturopathic physician becomes a reality.

Upon graduation, most naturopathic physicians set up a private, general practice, though some physicians, by choice, limit their practice to certain classes of problems or therapeutic modalities. Since naturopathic medicine is a

re-emerging profession, most physicians need to be "trail blazers" to some degree by establishing themselves independently in a community which may have little understanding of what a naturopathic physician is and what he does. This provides both a personal and a professional challenge, a challenge that is consistently met with enthusiasm.

Opportunities for post-graduate study or specialty training are presently limited. Only a few clinical residencies are available to graduates of NCNM. In the future, when the profession of naturopathic medicine grows and prospers as is inevitable, inpatient hospitals and other long-term care facilities will allow for even greater exposure to a variety of patients and ailments as well as greater opportunity for specialization at a post-graduate level.

In the words of John B. Bastyr, N.D., President Emeritus of NCNM, "It takes a special kind of person to meet the challenges of naturopathic education and practice--one who is dedicated to the service of others through healing and health education, remembering always that he or she is merely a channel for the healing power of nature." If you are such an individual, we would encourage you to pursue a career in naturopathic medicine at NCNM, and again to quote Dr. Bastyr, "brightly light the path to tomorrow's health care."

Clinic of Natural Medicine

Patton D. Pettijohn, N.D.
Naturopathic Physician

Dear Legislator,

I strongly urge you to support house bill 347 as passed by the H.E.S.S. committee.

You should be aware that because Alaska is without a separate licensing law for naturopathic physicians that the division of occupational licensing is attempting to force naturopaths to stop diagnosing and treating the sick in any way. Enclosed you will find a recent cease and desist order. The contents do not represent complaints from the patients but from the division.

It is very important that you study the training naturopaths receive from naturopathic colleges. House bill 347 clearly defines naturopathic practice as taught in naturopathic colleges. It seems the opposition to this bill argue that the proposed legislation allows naturopaths too broad a scope of practice. This is a false statement. I would like to point out that naturopathic colleges have always taught the subjects listed in this bill. Also house bill 347 was patterned after Oregon's naturopathic licensing law which has been in effect for the last fifty-seven years. As a naturopath, I have been trained as a primary care practitioner. I see no reason why Alaska legislators should object to supporting a law that represents naturopathic practice in its entirety. Please evaluate for yourself the training that naturopathic colleges provide.

It is important for you to support a licensing law that best represents the the naturopathic profession based on facts and training. Please remember that the opposition to house bill 347 generally support Milo Fritz's substitute bill which was written by a medical doctor. Should the medical profession be allowed to arbitrarily define and restrict the scope of naturopathic practice?

I have been trained, tested and licensed in Oregon to use X-ray equipment for diagnosic purposes, to practice as a primary birth attendant including the use

of related minor surgery, and to prescribe natural plant drugs. Some plants have classified as drugs but this is no reason to prevent naturopaths from using them. We went to school for four years so that we would have the expertise necessary to safely prescribe them. Podiatrists and dentists are not medical doctors either but are allowed to prescribe drugs relating to their field of expertise and training. Naturopaths are only asking for the right to prescribe as trained which include natural plant,animal, and mineral substances, antiseptics and local anesthetics necessary for minor surgery.

Please don't let pressure from the medical profession convince you to support legislation that would strip away part of naturopathic practice. Professional training should be the issue. Please investigate naturopathic training for yourself and support legislation that best represents that training.

Sincerely,

Patton D. Pettijohn N.D.

HESS -
Copy received

Dear Mac Fisher,

I am writting to you in hopes you will consider our proposal for a Sheltered Workshop and Residential Care Home for the Retarded and Handicapped in this Area. This is so desperately needed here. There is nothing at all here after High school. I understand they are putting some in Nursing Homes, for lack of openings in the few places there is. This is no place for these people. They need to be needed, like all of us, and have a purpose in life. They are capable of doing so many wonderful things if they could have the training.

We have been told there are 250 people in this area that would

use this program. Can you imagine? This is a figure put out by Voc Rehab and people Count, a group that is helping the parents to get this started.

Please will you consider this proposal very carefully. We will always be greatful.

Sincerely,
Orrin and Adelaide Moore

Ms. Rose Ringstad
502 Monroe Street
Fairbanks, Alaska 99701

Dear Ms. Ringstad:

Thank you for your comments on the Salvation Army request for the care of victims of domestic violence and sexual abuse.

I have supported legislation this session to increase penalties for sexual abuse and distribution and manufacture of child pornography.

I know that Salvation Army performs good services to a variety of people. I am not familiar with the grant request mentioned in your letter. If the request is for a grant through a state department, that department will have authority to allocate funds. If the grant is directly through the legislature, of course I will be involved.

With declining revenues, I am generally supporting the administration's cuts in social program funding. A small cut now is a signal that government funds may not always be available.

Sincerely,

Mae Tischer

MT/cw

502 Monroe Street
Fairbanks, Alaska 99701
April 12, 1983

Dear Rep. Fischer,

Life involves emotions. Without emotions of hate, envy, jealousy, rage, insensitivity, low self-esteem, super-ego, inability to cope, frustration, insecurity, desperation there would be no domestic violence. Without emotions of love, compassion, understanding, need for sharing and need to share, desire to help, concern, sympathy, empathy there would be no Council on Domestic Violence to aid victims. A decision will be made soon regarding the care of victims of Domestic Violence and Sexual Abuse in the Fairbanks area. I am hopeful that the present recipients of a State Grant will not be granted a new contract for F/Y 1984. There will be a facility for caring for victims of domestic violence and sexual abuse in Fairbanks.

The Salvation Army has prepared a grant request to care for victims of domestic violence and sexual abuse. The Salvation Army has had a long history of helping persons who need a temporary support system. I strongly endorse the Salvation Army as a provider of services for the Council on Domestic Violence in the Fairbanks area.

The group who has received state funding for aid to victims of Domestic Violence and Sexual Abuse has demonstrated a complete disregard for accountability and responsibility.

> When a Conditional Use Permit was requested, an area which was to be used as an apartment by an employee (a disallowed use) was not so noted on the required floor plan and not shown to the Borough Building Inspector.
>
> The Conditional Use Permit which was granted over objections by families in the area specified that the facility would be used as a group home. Actually, a far greater percent of time and space was devoted to administration, a counseling office and public relations activity. Assistant Borough Attorney Terrence Thorgaard stated on February 26, 1982: "In this light, the 'home' probably cannot be overemphasized. Activities that are not incidental to a 'home' environment are not appropriate. These include 'out-patient' counseling and other uses that more properly should be characterized as 'office' or 'clinic'; both inappropriate to and, therefore, prohibited in the R-2 zone."

The requirement that a parking area be provided was ignored until shortly before requesting renewal of the CUP, one year later. On the narrow streets of Slaterville, this created a problem.

The group applied for and was granted state funding (this was never awarded, however, due to the controversy surrounding the organization) in the amount of $208,000.00 for purchase of property at 302 Charles Street. Testimony by the owner indicated that his investment in the property was approximately $115,000.00. This building was sold to the present owner by two realtors who were the President and a member of the Board of Directors of Wicca. They were aware of the cost of the building but apparently deemed a large profit to the purchaser for a one-year waiting period was acceptable when requesting a State appropriation of $208,000.00.

Systematic, consistent embezzling of funds by the bookkeeper of Wicca went unnoticed by the Director of Wicca and the Wicca Board of Directors over a period of three years. State funds were received and state funds were used but how these funds were used or by whom these funds were used did not seem to be overly important. A total of $141,000.00 was embezzled before the loss was noticed.

Recruitment notices for job openings by the Wicca organization do not list any minimum educational requirements for the Positions of Advocate, Legal Advocate, Child Advocate or Shelter Services Coordinator. One year of experience is listed as a qualification.

The above-listed variances from normal, responsible business practice show a lack of respect in the use of public funds and in conforming with public policy. The group should not be given any more public funds. I realize that thorough checking of all monies given out by the State as grants would not be economically feasible but I believe that grantees who have demonstrated this degree of irresponsibility in following established norms of operation should not be allowed to continue.

I request your support of the grant request by the Salvation Army for the care of the victims of domestic violence and sexual abuse.

Sincerely,

Rose Kingstad

Soldotna, Alaska 99669

Dear Ms. Davis:

Thank you for your comment on the need for a sheltered workshop for the handicapped. Those who attend or operate them appear to be pleased with the results. However, due to revenue declines, the Administration and the Legislature is faced with reducing spending in all areas.

While several programs within the Department of Health and Social Services perform useful tasks, I am inclined to agree with the Administration's reduction in funding levels. I believe, as I think you do, that programs that can develop into self-supporting operations are best. With the initial realization that government support may not be available, I expect more programs will take on that attitude.

Good luck in your efforts.

Sincerely,

Mae Tischer

Dear Ms. Tischer,

the organization "People Count Inc." have submitted to Sen. Paul Fischer and Rep. Hugh Malone, a proposel requesting funds for a Sheltered work-shop and live in facility for the adult handicapped of the Kenai Penensula.

Speaking as the mother of a 24 year old C.P. victim, this is desperately needed in our area.

I understand that many of these programs are being Cut. But feel this one is unique, in as much as we hope to get our handicapped set up in a business in which they would be able to support themselves.

As President of the adult handicapped Parent Group, we are asking for your Support.

Sincerely

Joan W. Davis

Jan.20,1984

Rep.Mae Tischer,Chair
Health,Education and Social Services
Committee
Anchorage,AK

Dear Representative Tischer:

Following are my preliminary views on HB225 and HB347 given as an individual and not as Chairman of the State Medical Board.In fact,I would respectfully request that final action be dferred on the bills until the State Medical Board has a chance to consider them at their February 23d and 24th meeting.

A subcommittee of the State Medical Board has been meeting with members of the Board of Optometry,other optometrists and representatives of the Department of Health and Social Services regarding the substance of HB225.The Medical Board as a whole was to meet with the optometrists at our last meeting in December,but the optometrists were unable to attend.My understanding is that the subcommittee could support the use of drugs for diagnosis but not for treatment which should be reserved for physicians.

I have some serious reservations on HB347.I think that surgical proceduresas outlined in 08.45.150(5) should not be given until one can be sure that the surgical training of naturopaths is equivalent to that of physicians performing the same kinds of surgery.I also have a problem with the definitions of naturopathy and naturopathic medicine in 08.45.205 considering the discussion of the use of mechanical and electrical treatment.I think a permanent exemption of exisiting practitioners from the examination is an overuse of "grandfather" privileges.

I also have a basic doubt that legislation for naturopaths is needed at all.The evident lack of a national exam would tend to support this.Given the limited health services implied in the proposed bill,I believe public awareness of the naturopathic profession and its services could serve better and cheaper than this bill.

I'm sorry other commitments make it impossible to attend the hearings in person and hope this letter will receive your consideration.

Sincerely,

Hubert J. Gellert

HUBERT J. GELLERT

Clinic of Natural Medicine

Patton D. Pettijohn, N.D.
Naturopathic Physician

Oct. 8,1982

Dear Candidate:

I am polling all the legislative candidates reguarding their personal views towards licensing practitioners of naturopathic healing.

Licensing procedures for naturopathic physicians would insure the rights of many Alaskans to choose for themselves, because of preference, what type of health care service they use. This legislation would also serve to protect the public interest by making sure that those who practice as naturopaths in Alaska are qualified to do so.

Enclosed, are both a pamphlet concerning our education and a copy of sample legislation that was introduced last legislative session.

I would appreciate a response to the following questions:

1.) Would you support legislation similar to Senate Bill 274 which would insure Alaskans the right to use naturopathic services if it is their desire to do so?

2.) Would you be willing to co-sponser legislation similar to Senate Bill 274?

Many of my patients and other interested Alaskans are interested in knowing which of the candidates would support such legislation. I feel using nutrition against disease is gaining substantial scientific and public support and the many possible side effects of drugs has oriented many people to a more natural health care approach.

Please feel free to contact me if you have any questions reguarding naturopathic medicine.

Sincerely,

Patton Pettijohn N.D.

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SENATE BILL NO. 274 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic healing; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) practice of naturopathy or naturopathic medicine (AS 08.45).

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS AND NATUROPATHIC PHYSICIANS.

ARTICLE 1. REGULATION OF NATUROPATHY.

Sec. 08.45.010. DUTIES AND POWERS. The Department of Commerce and Economic Development shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter;

(3) license naturopathic physicians in accordance with AS 08.45.100 - 08.45.160; and

(4) provide for temporary permits for persons who are apparently qualified to engage in naturopathic medicine to engage in the practice of naturopathic medicine until certification of the results of the next examination given under AS 08.45.120.

ARTICLE 2. LICENSING OF NATUROPATHIC PHYSICIANS.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage

suggest deleting ⊛ — + instead put in licensing by reciprocity only" means licensing based on a licensing from another state, until there is enough Naturopaths to set up a board

in the practice of naturopathy or naturopathic medicine unless he first obtains a license as provided in this chapter.

⊛Sec. 08.45.110. LICENSURE AS A NATUROPATHIC PHYSICIAN. To be eligible for a license as a naturopathic physician, an applicant shall

(1) hold a high school diploma or the equivalent;

(2) have completed two years of postsecondary education at an accredited college of liberal arts or sciences;

(3) have attended at least 90 percent of the hours required for graduation and graduated from a legally chartered school or college of naturopathic medicine that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of instruction totaling 4,500 hours or more; the course of instruction shall include:

(A) anatomy and physiology;

(B) histology and embryology;

(C) microbiology;

(D) pathology;

(E) immunology;

(F) public health;

(G) toxicology;

(H) physical, clinical, x-ray and symptomatology diagnosis;

(I) first aid and emergency medicine;

(J) obstetrics and gynecology;

(K) orthopedics;

(L) minor surgery;

(M) proctology;

(N) otolaryngology;

(O) physiotherapy;

(P) manipulative techniques;

(Q) dietetics and clinical nutrition;

(R) herbology;

(S) naturopathic theory and practice;

(T) naturopathic therapeutics;

(U) clinical practice; and

(V) jurisprudence;

(4) successfully complete an examination given by the department;

(5) not have a license to practice naturopathic medicine in another state, province, or territory, which is suspended or revoked for disciplinary reasons;

(6) be a United States citizen or lawfully admitted to permanent residence in this country; and

(7) be of good moral character.

Sec. 08.45.120. EXAMINATION. (a) An examination for licensing as a naturopathic physician shall be held at a time and place and shall be conducted as determined by the department. The examination shall be limited to the subjects listed in AS 08.45.110(3), each of which shall constitute a separate examination section. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the department may require.

(b) To pass the examination an applicant shall receive an overall average of 75 percent and may not receive less than 70 percent in more than two sections.

Sec. 08.45.130. ENDORSEMENT. The department may license a person as a naturopathic physician if the person is currently licensed as a

naturopathic physician in another state or in a province of Canada and

(1) that state or province maintains professional licensing standards equivalent to those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license in this state; and

(3) the person demonstrates to the satisfaction of the department qualifications at least equal to those required of persons licensed under this chapter.

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The department may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) engages in unprofessional conduct;

(4) impersonates another physician;

(5) practices under an assumed name; or

(6) is convicted of a crime involving moral turpitude.

Sec. 08.45.150. FEES. The following fees are imposed under this chapter:

(1) application for examination .....$ 25

(2) application for reexamination 10

(3) license issuance or biennial renewal 100

(4) issuance of temporary permit 25

Sec. 08.45.160. NATURE OF NATUROPATHIC PRACTICE. A naturopathic physician in the course of the practice of naturopathic medicine

(1) may perform physical examinations, write prescriptions for substances authorized in this chapter, and sign birth and death

certificates;

(2) may use systems of diagnosis for which he has been trained under AS 08.45.110(3);

(3) may treat patients by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies, including acupuncture, that are effective in stimulating normal function of tissues and organs sensitized by disease;

(4) may

(A) draw blood for laboratory purposes, and use electrical or other methods for the repair and care of superficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in superficial structures;

(B) practice natural childbirth in obstetrics, including related minor surgical procedures;

(5) may not

(A) perform surgery except as provided under (4)(B) of this section;

(B) use controlled substances as defined in AS 11.81.-900(b)(6) including cannabis;

(C) use radiation therapy; and

(D) use drugs except antiseptics, local anesthetics, minerals and their extracts. and compounds or concentrates obtained from plants or animals.

Sec. 08.45.170. CONTINUING EDUCATION. (a) The department may prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the department evidence of completion of con-

tinuing education requirements.

(c) The department may exempt a licensee from the continuing education requirement under (b) of this section upon an application of the licensee setting out extenuating circumstances. A licensee may not receive more than one exemption under this subsection in a five-year period.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND ABBREVIATIONS. (a) A person licensed under this chapter may use the following titles: "Doctor of Naturopathy" or its abbreviation, "N.D.", "Naturopath", or "Naturopathic Physician". A person licensed under this chapter may not use his title in a manner that suggests that he practices a form of medicine or a healing art other than naturopathy.

(b) A person may not use a title or abbreviation listed in (a) of this section unless he is licensed under this chapter.

Sec. 08.45.205. VIOLATIONS. (a) It is unlawful for a person to

(1) fraudulently obtain or furnish a license, renewal, or record required by this chapter;

(2) wilfully violate a provision of this chapter or a regulation adopted under this chapter.

(b) A person who violates this section is guilty of a class B misdemeanor.

Sec. 08.45.210. PRACTICING WITHOUT A LICENSE. A person who practices naturopathy or naturopathic medicine without first obtaining a license is guilty of a class A misdemeanor.

Sec. 08.45.220. DEFINITIONS. In this chapter

(1) "department" means the Department of Commerce and Economic Development;

(2) "naturopathy" and "naturopathic medicine" means the

treatment of the human body through the use of natural agencies, forces, processes, and products, with emphasis on the response of the individual to the disease rather than its treatment in isolation;

(3) "unprofessional conduct" means

(A) the habitual overuse of alcoholic beverages or cannabis or the unlawful use of controlled substances as defined in AS 11.81.900(b)(6); or

(B) conviction of an offense that is a crime of moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

* Sec. 3. LICENSING OF PRACTITIONERS OF NATUROPATHY OR NATUROPATHIC MEDICINE WITHOUT EXAMINATION. The commissioner of commerce and economic development shall license all persons who, on the effective date of this Act, meet the qualifications of AS 08.45.110(1) - (7) and who apply for licensure under AS 08.45 not later than June 30, 1983.

* Sec. 4. This Act takes effect July 1, 1982.

THE PLOWBOY INTERVIEW

ANDREW SAUL:
YOU CAN BE YOUR OWN DOCTOR

"If we learn more than the doctor in areas of value to our health, it is our duty to apply this knowledge to the betterment of ourselves and our families. We need total health more than medically approved health."

So says 28-year-old Andrew Saul in the opening chapter of his manual Doctor Yourself. *Saul is, it seems, engaged in a struggle to expand the frontiers of the medical self-care movement . . . taking the radical view—even in the eyes of some longtime self-help advocates—that a person who lives a truly healthful life should almost never* need *the services of medical professionals. In the process of spreading his message, Dr. Saul (he's not an M.D., but rather a doctor of naturopathy, a title recognized in several states and widely accepted in Europe) managed to become the first person certified by New York State to teach naturopathic healing and health-maintaining techniques . . . established the Ashwins Health Institute in Hamlin, New York . . . set up a charity vitamin dispensary for the poor in nearby Rochester . . . and published a shopper's guide to healthful supermarket foods, a how-to manual aimed at helping people through their first body-cleansing fast, and the book* Doctor Yourself. *Along with all that, he has still found time to teach classes at the State University of New York at Brockport, bombard local newspapers with alternative medical information, and generally make every effort to bring his message of natural health care to as many people as he possibly can.*

In fact, Andrew Saul first came to MOM's attention while he was teaching a series of courses at last summer's Community of Homesteaders' Good Life Get-Together in Naples, New York. Once the MOTHER staffer who visited the festival saw that Dr. Saul's presentations were progressively better *attended as the days went on, he sat in on one himself . . . and quickly became convinced that the outspoken naturopath's ideas merited sharing with our readers.*

So MOTHER sent Bruce Woods to visit Dr. Saul at the Ashwins Health Institute for an in-depth discussion. Mind you, by presenting their conversation (in edited form), we are not necessarily endorsing *Dr. Saul's ideas, and—more important—we're certainly not trying to convince anyone to avoid traditional medical care. However, we did indeed find Saul's words to be a stimulating challenge to our own ideas of self-health responsibility. And by sharing his thoughts and providing access information on pertinent books and medical studies, we hope to help you, our readers, to be better able to make wise decisions on questions pertaining to your own health and that of your families. After all, there are not many* other *situations in which finding the right answer can be so vital.*

PLOWBOY: Dr. Saul, you've made a name for yourself in the field of alternative medicine at a fairly tender age. That leads me to believe that your interest in medical alternatives goes back a goodly number of years.

SAUL: Well, in essence, I was drawn into natural healing because I found that regular healing didn't work. And I suppose the *seeds* of that realization were sown when I was a child. Like everybody else, I had the usual injections, and then I went overseas and had more shots, and I ate meals based on the so-called four basic food groups (again like everybody else), and I got *sick* like everybody else. Not all the time, of course, but often enough.

Now, my "conversion", if you can call it that, was a very slow process . . . I more or less backed into the alternative health field. You see, I was still intending to go into traditional medicine when naturopathic healing was introduced to me by Professor John Mosher at SUNY at Brockport, where I was enrolled in a premed program. Dr. Mosher challenged me on one simple point. He said, "If you really want to help people, why don't you at least *investigate* the natural healing techniques as well as those of conventional medicine. Let the merits of each system tell you which is best." So I began looking into the subject, and the book that turned me around was Aubrey Westlake's *The Pattern of Health.* It's a rather unspectacular-looking paperback, but it's probably the most important volume I've read in the last 12 years. Westlake was an experienced English M.D. who had also backed into natural healing, so I could easily relate to what he had experienced. Briefly, he felt that, after 40 years as a physician, he'd spent too much of his time just bailing out leaking boats. He was frustrated by his inability to get down to causes . . . to promote self-help and to effect practical, deep-down cures. *The Pattern of Health* is the story of his discovery of alternative healing techniques. That book inspired me to read more on the subject, and one thing led to another. I soon started using basic naturopathic methods myself—such as fasting, switching to a vegetarian diet, and taking vitamin supplements—and I actually started feeling better.

PLOWBOY: Were there any *other* experiences that contributed to your disillusionment with standard medicine?

SAUL: Well, when I observed my first surgeries, I found that I wasn't particularly enamored with the idea of cutting out someone's adrenal glands, or otherwise "invading" the person's body, in the hopes of achieving a desired end, one that often wouldn't come about. But the conflict between my medical career and my "sideline" research into alternatives really became intense while I was studying in Boston.

PLOWBOY: Was that at Brigham Hospital?

SAUL: The Peter Bent Brigham Hospital, yes. Now don't get me wrong: That institution's staff members are very good at crisis medicine. But as far as knowing what kind of *diet* will help a person back to health . . . well, let's just say that I was amazed to see people who had diverticulitis or who'd just had a colostomy getting white bread, soda pop, overcooked vegetables, tiny little salads, slabs of overcooked meat, and *no* vitamin supplements at all. These were individuals who had been through grueling surgery—sometimes people who were dying—and this lack of nutritional care nailed home the point that orthodox medicine is sometimes wrong. Those who practice it often *don't* know what they are doing.

However, I also had to beg n to ask myself whether I really knew what I hoped to be doing. And that concern led me to a great source of information. I started reading reprints produced by the Lee Foundation for Nutritional Research and found it to be an excellent outlet for good, hard medical and nutritional information. Better still, these reprinted articles are right out of the mainline medical journals . . . including *Clinical Physiology*, the *Journal of Applied Nutrition*, the *Journal of the American Medical Association*, and the rest. The foundation has simply reprinted features that describe instances in which drugs do not work, and others that demonstrate how vitamins and foods can cure real diseases.

And that was what I needed to see . . . reports by *doctors* who'd worked with medical alternatives. At that point there was no turning back for me, because I was faced with overwhelming evidence . . . data provided by medical doctors, by researchers, by Ph.D.'s, and by leaders in their fields. I'd discovered a tremendous amount of material and I'd begun to see that nature cure was *not* just a questionable method of treating the common cold, but that it could also be used for cancer, encephalitis, meningitis, pneumonia, polio, diverticulitis, and other terrifying diseases.

PLOWBOY: Yet although you received your doctorate in naturopathy in 1976, you weren't able to actually *use* it until 1980.

SAUL: Yes, I was able to open the Ashwins Health Institute only after an uphill battle. Professor Mosher, an accountant named Keith

(continued on next page)

(continued from preceding page)

Taylor, and I began the process by filing for nonprofit corporate status. To do so, we had to obtain the approval of the state attorney general. And, as you probably know, natural healing is not yet considered legitimate medicine in New York State (but it is accepted in some others . . . including Oregon, Washington, and California).

At any rate, the attorney general approved us without question, and our next step was to approach the New York State Education Department, which actually licenses physicians in New York. We assured that organization that we weren't going to practice medicine or grant M.D. diplomas. So the Education Department approved us in short order, at which point we had to get an OK from the county supreme court. Once that was obtained, the state granted us, after some months, our nonprofit status. *Then* we asked the Internal Revenue Service to verify and underline what the state had done, *and* to grant us a tax exemption so that our donors' contributions would not have to be split with the government and could be applied, in total, to the services that we hoped to provide . . . the charitable vitamin dispensary that we now run, for instance.

This application turned into yet another round of forms and letters. Eventually, however, the IRS granted us tax-exempt status. I do believe that the whole process was worthwhile, though, because when a client or student comes to see me, he or she wants to be assured of dealing with a recognized and reputable professional. I'm always careful to point out that I'm certified by the state of New York to teach what I'm teaching.

> *A person really* can *choose to get well or to stay sick . . . and it's shocking to me that many people choose illness.*

PLOWBOY: This would probably be a good time to give a working definition of naturopathy.

SAUL: Well, first of all, naturopathy could also be called *nature cure*, *natural healing*, or even *natural therapeutics*. Nature cure is very different from standard—or *allopathic*—medicine, because a naturopath does not use drugs and doesn't perform surgery.

Now the first question one might ask upon hearing that is "Well, then, what on earth *do* you do?"

To answer that, I have to admit that there are a number of naturopathic approaches. Natural healing is a highly diverse field. However, rather than limit myself to any one of these schools of thought, I believe in using sort of a team approach . . . that is, employing many such methods in concert. I'm interested in results rather than "pet" theories. All I want to see is people getting better, and any technique that they can use to get results is fine with me.

Furthermore, nature cure almost always is safer than allopathic medicine. After all, a healthful diet is probably the keystone to *any* form of naturopathic therapy. And there are no unpleasant side effects of eating right.

PLOWBOY: It would seem that you're saying the patient bears the responsibility for his or her own health, then.

SAUL: Exactly. A person really *can* choose to get well or to stay sick . . . and it's shocking to me that many people choose illness. I often tell folks that everybody has the *right* to be sick. And I'm not being flippant when I say that! If a person really wants to get well, he or she won't mind making a change of lifestyle . . . or taking *whatever* course of action will help him or her get better.

If an individual wants to get well enough, or perhaps I should say if a person wants to get well, *enough* . . . he or she will be willing to take such steps. In fact, my most successful students often tend to be just a bit desperate and discouraged . . . and that combination can sometimes yield remarkable results. Many people do their best work when their backs are against the wall.

PLOWBOY: Why is it that nature cure has such a limited acceptance in this country? Isn't it far more generally recognized overseas?

SAUL: Naturopathy is downright *mainstream* in many other countries. In Germany, for example, naturopathic healers are abundant. Furthermore, there *was* a time when nature cure practitioners were far more common in the U.S. In Florida, for instance, two sister bills were passed in 1927: the Naturopathic Practice Act and the Medical Practice Act. In those days, naturopaths and medical doctors often worked side by side. But by 1959, the nature cure practitioners were no longer being licensed, while, of course, the M.D.'s are to this day.

The official reason for such "precautionary" restrictions is to protect people from quack therapies. And many individuals *have* been taken in by treatments that are statistically invalid. Unfortunately, orthodox medicine leads the league in the use of statistically invalid approaches to human illness. One has only to read Ivan Illich's *Medical Nemesis* to verify that medicine not only is without statistical significance in many cases, but also is sometimes definitely harmful. One out of five people admitted to a typical research hospital today will acquire an iatrogenic—or doctor-caused—disease.

PLOWBOY: Can you cite some well-documented clinical evidence of the effectiveness of nature cure?

SAUL: Yes, a great deal of it. You have only to go to the *Journal of Applied Nutrition*, to the *Journal of the Franklin Institute*, to *Clinical Physiology*, to *The Lancet*, or to any of the many excellent British and German journals to find that such techniques are well established. For instance, in 1950 Dr. Benjamin P. Sandler, a United States Navy physician, then at the Mayo Clinic, treated tuberculosis—and did so more effectively than anyone *else* at that clinic at the time—using nothing but a high-protein, low-carbohydrate diet.

Then too, Dr. William J. McCormick of Toronto, Canada has—since 1946, at least—been using high doses of vitamin C (ascorbic acid) to treat herniated or ruptured disks, as well as a variety of infectious childhood illnesses. Or how about Dr. Frederick Robert Klenner of Reidsville, North Carolina? For 45 years he's been using vitamin C as an antibiotic, an antitoxin, and an antihistamine. He's employed it, with success, against polio, meningitis, tetanus, encephalitis, and a number of other serious diseases. This man is giving *injections* of vitamin C, and reported—in *A Physician's Handbook on Orthomolecular Medicine*—that vitamin C is the most useful therapeutic substance available to the doctor.

Klenner suggests that when an M.D. admits a patient to the hospital, the first thing he or she should do is to administer vitamin C while deciding what other course of action to take. In many cases, the physician won't *have* to do anything else . . . because the vitamin C therapy will cure the condition. Why, high doses of vitamin C can even be a beautiful treatment for infected cows. I worked on a dairy farm for a while before I started practicing, and helped inject dozens of a million or more units of antibiotics to cows with mastitis. Yet if farmers would give their milking stock 20,000 to 30,000 milligrams of vitamin C and eight ounces of cider vinegar a day, the animals wouldn't have mastitis problems.

Colds, cancer, bronchitis, pneumonia, herpes, meningitis, encephalitis . . . how, people ask, can one vitamin cure so many different illnesses? The answer is that the *lack* of one vitamin can *cause* many different illnesses.

PLOWBOY: Hold on there. Are you saying that you know of people who've achieved a complete and total remission of *genital herpes* as a result of vitamin therapy?

SAUL: Yes, that's the proper term for it . . . complete and total remission. The specific form of vitamin C used was calcium ascorbate, in conjunction with sizable doses of L-lysine, a magnesium supplement, and a vegetarian diet. The amount of calcium ascorbate may exceed 40,000 milligrams daily. And yet, proportionate to body weight, that's no more vitamin C than a sick rat would manufacture!

PLOWBOY: Right. Rats, goats, and many other animals produce vitamin C in their bodies, and the amount varies with the creature's health.

SAUL: Yes, a healthy rat may manufacture the equivalent of a human dose of 6 grams a day. A sick rat—or goat—will manufacture a good deal more.

Vitamin C is inexpensive . . . has broad-spectrum utility . . . is effective . . . *and* is safe. Yet it gets absolutely no significant attention from the medical community. Perhaps that's because physicians don't believe that anything cheap, safe, and generic *could* work.

PLOWBOY: And, of course, it's also available without a prescription.

SAUL: That's precisely why vitamin C appeals to *me*, because I'm trying to promote *radical* wellness self-reliance. By that I don't mean that people should just learn when to go to the doctor or how to avoid mixing their medicines. Such concepts are little more than grade

school-level medical self-reliance. I want people not only to know what type of approach might help them, but also to be able to take the appropriate action and get results, totally on their own. People no longer *have* to suffer.

PLOWBOY: And it was to spread the word about such health care that you came out with your self-published book, *Doctor Yourself* . . . which I believe you've called a "health homesteader's handbook".

SAUL: The purpose of *Doctor Yourself* is to describe—in simple, practical, immediately useful terms—12 ways people can improve their own health.

PLOWBOY: But how do you convince them that they have the *capability* of managing their own health?

SAUL: The book addresses that fear right off. The first chapter explains that it's easy—and safe—to be your own doctor . . . *if* you know how. The *absence* of knowledge is what should be feared.

PLOWBOY: Well, how can a person obtain the necessary knowledge? What sorts of materials are available to the public?

SAUL: *Doctor Yourself* lists about 140 readily available books and articles, and that's by no means intended to be a complete bibliography. However, the Lee Foundation for Nutritional Research should be the *first* source a person investigates. *[EDITOR'S NOTE: See the access list accompanying this interview.]* I'd even go so far as to suggest that anyone interested in self-care get one copy of every reprint and book the foundation publishes. These would prove to the person, as much as anything *can* be proved by written material, that "real" doctors do cure diseases with nutrition . . . with fasting . . . with vitamins . . . and with minerals.

Then again, people can simply go to their local libraries, and even to *medical* libraries—no one's going to throw them out—and research any disease that they'd like to understand. I'd also suggest visiting a pharmacy, borrowing the establishment's copy of the *Physician's Desk Reference for Prescription Drugs*, and reading enough of it to appreciate how dangerous many drugs are and how little is known about the majority of them. Yet another valuable source of information is the *Merck Manual*. It's a 2,400-page medical text, and it sells for about $12. That's almost like getting four years of medical education for $12!

PLOWBOY: It sounds like quite a bargain.

SAUL: Yes. This is a book that practically every physician has on his or her desk, and one that every health homesteader should have, too. Now, you might well ask, do I really believe people are going to go through this volume and learn everything they need to know? Certainly not. In fact, I think much of the information in the *Merck Manual* concerns ways of approaching illness that I'd disagree with. But the book does at least correctly describe symptoms and conventional treatments. It will let a reader know what the *medical* approach to a specific problem would be.

I also highly recommend *Dr. Schuessler's Biochemistry* by J.B. Chapman, M.D. The 108-page book lists the 12 Schuessler cell salts and tells exactly how to use them . . . it's doubly cross-referenced . . . and it's probably the most valuable single medical book for the home I've ever seen. *[EDITOR'S NOTE: The 12 Schuessler cell salts were categorized, in 1873, by the German biochemist whose name they bear. Many naturopaths believe they can be used to relieve disease by restoring the minerals missing in the affected tissue.]*

The next book that belongs in the health homesteader's library is *Boericke's Materia Medica*, ninth edition, by William Boericke. This 1,000-page volume, a detailed presentation of homeopathic theory and treatment, will set you back about $20.

The possible additions to this list are, of course, about as numerous as the world's diseases. But it's safe to say that you could make a good "tool kit" with six or seven books . . . six or eight herbs . . . a very big bottle of vitamin C . . . some good multiple vitamins (everyone should, I think, take a high-potency natural multiple vitamin a day) . . . and a few other basics.

PLOWBOY: So the tools and the information needed for medical self-reliance probably are more accessible than most people believe. But aren't there some legal implications yet down one's own doctoring?

SAUL: First of all, it's completely lawful to doctor yourself. The Constitution provides for that. You may also treat your immediate family (if you—and they—wish). Should you start prescribing for friends or a neighbor, though, you'd be venturing into legal corridors. And if you *charge* for treating a neighbor or friend, you are definitely asking for trouble.

Then again, though, I don't *treat* anybody. And I don't diagnose, prescribe, or operate. Instead, I *teach* people how to diagnose and how to treat themselves to get specific results. They may use that education or not . . . it's up to them.

PLOWBOY: I've read that you're opposed to vaccination.

SAUL: Slow down a second. I do counsel people frequently on the pros and cons of vaccination. But I never tell anyone *not* to get shots or *to* get shots. I simply point out the alternatives that are available. Our four-year-old daughter has never had an injection, and our son is no longer getting them, yet both youngsters—lifelong vegetarians—are at least as healthy as the other children in the neighborhood.

PLOWBOY: Even though they're exposed to the many contagious illnesses children encounter in school?

SAUL: Yes. And if you're initially put off by this idea, remember that the unvaccinated child poses absolutely no threat at all to the other children, because the others *have* had their shots. So the only possible complaint can be one of neglect, with the argument that says, "If you don't allow vaccinations, you're injuring that child." But that just isn't necessarily a true statement. The fact of the matter is that many injections—including the diphtheria, pertussis, and tetanus shots—are not without risks of their own. What's more, many vaccines may not be all they're cracked up to be. For instance, there was a medical doctor up in Canada who treated polio with iodine supplements in the 1950's. The method is called iodine prophylaxis, and the effectiveness of his treatments suggests that the popularization of iodized salt has had more to do with the elimination of polio in America than the polio vaccine!

Now I am not saying that there's no statistical significance to results with the Salk vaccine. But I also believe that, on a scale of 1 to 10, it definitely ranks below 2. Whereas I think vitamin C, a vegetarian diet, and iodine will actually prevent polio *more* effectively. Once again, all of the evidence supporting this theory can be found in articles available from the Lee Foundation.

PLOWBOY: Let's say an individual who's reading this interview decides, "Well, this Dr. Saul seems to make some sense, and I know I haven't been taking care of myself as well as I could." Then . . .

SAUL: What should he or she do?

PLOWBOY: Yes. And—to be more explicit—if someone isn't ready to jump into a major lifestyle change with both feet, what initial steps might give him or her enough immediate results to provide encouragement?

(continued on next page)

DR. SAUL'S "OPTIMAL HEALTH REQUIREMENTS" (OHR) FOR VITAMINS COMPARED WITH THE U.S. RECOMMENDED DAILY ALLOWANCE (RDA)

	U.S. RDA	OHR
VITAMIN A	5,000 IU	20,000 IU
B VITAMIN COMPLEX		
Thiamine (B-1)	1.5 mg	75 mg
Riboflavin (B-2)	1.7 mg	75 mg
Niacinamide (B-3)	20 mg	250 mg
Pyridoxine (B-6)	2.0 mg	75 mg
Cobalamin (B-12)	6 mcg	125 mcg
Biotin (B-7)	0.3 mg	0.7 mg
Pantothenic Acid	10 mg	150 mg
Folic Acid	0.4 mg	0.8 mg
VITAMIN C	60 mg	4,000 mg
VITAMIN D	400 IU	500 IU
VITAMIN E	30 IU	600 IU

EDITOR'S NOTE: Dr. Saul informed us of a good source of vitamin C although he was careful to point out that in reason necessarily recommending the other products sold through this outlet. It seems that Bronson Pharmaceutical (Dept. PMEN, 4526 Rinetti Lane, La Canada, California 91011) sells ascorbic acid vitamin C powder for $15.50 a kilogram, postpaid in the U.S.

(continued from preceding page)

SAUL: Well, the very first thing I recommend is that people stop eating meat.

PLOWBOY: Whoops!

SAUL: I know, I lose a lot of people on this point. But I'm not out to make friends . . . I'm out to tell people what I believe is the *truth*.

Unfortunately, a lot of my students kind of run into a brick wall right there. They are just not *willing* to give up the hot dogs and hamburgers in order to get rid of—say—their arthritis. Well, if they're not ready to drop meat, they should no longer look at themselves as victims of this demon arthritis, but rather as victims of their own stubbornness. This is why motivation is so important. Natural healing works . . . but only if *you* do.

You know, I was in a class once, and I mentioned that rats make their own vitamin C, and someone asked, "Does that mean rats are a good source of vitamin C?" I replied, "Sure, if you eat your rats *raw*. Once you cook the meat, the vitamin C content is almost nil."

I think that's why traditional Eskimos tend to be healthy . . . because they eat raw meat. If they tried to subsist on *cooked* meat, they'd all be seriously vitamin-deficient. People who do eat meat, then, probably should do so the way that true carnivorous or omnivorous creatures do: Eat the whole animal . . . skin, bones, blood, intestines, brains, eyes . . . *everything*.

> *". . . the popularization of iodized salt [may have] had more to do with the elimination of polio in America than the polio vaccine!"*

PLOWBOY: Would that actually provide a balanced . . .

SAUL: It'd be a *perfect* diet. If you completely consume a raw, freshly killed animal, you'll get everything you need . . . all the vitamins, all the minerals, everything. But that's repugnant to us, because, you see, we're *not* meat eaters by nature.

However, to return to my subject, people who do stop eating meat typically find that—for instance—their hay fever isn't as bad, their allergies aren't as severe, or their skin doesn't break out as much. This is due, in part, to the fact that these "new" vegetarians are avoiding all of the chemicals that find their way into meat: the hormones, the antibiotic residues, the colorings, and the preservatives.

On top of all that, when people stop eating meat, they spend less on food. I save $20 a week simply as a result of being a vegetarian. Now that's $80 a month tax free . . . without having to go out and earn it. I'm all for that!

PLOWBOY: There are, of course, any number of arguments as to whether humans are by nature, omnivorous or vegetarian . . . and there are also any number of people who'll give you very convincing evidence pointing one way or the other. However, I suspect that the key here is the *quality* of the meat that people can get nowadays.

SAUL: Look, I'm not telling people that they *have* to stop eating meat. I'm saying that if I were they, *I'd* stop eating meat right away. If they do so, regardless of the validity of one or another of the arguments about mankind's nature, I believe they'll get results. They'll feel better, they'll have fewer illnesses. That's *my* real reason for not eating meat, because a vegetarian diet *works*.

That should hardly come as a surprise. After all, when you buy a cut of beef, for example, you're getting the dead muscle tissue of an animal that's been raised in a highly confined environment *and* on a very limited diet.

PLOWBOY: That environment was probably quite stressful, too.

SAUL: The meat could contain lead if the animal was grazed near an interstate highway, or be doped with antibiotics or other chemical residues. And, on humanitarian grounds, some farming conditions are deplorable . . . those typical of many veal-raising operations, for instance.

PLOWBOY: We recently did an interview with Dr. Michael Fox of the Humane Society of the U.S., and he touched on that. *[EDITOR'S NOTE: See MOTHER NO. 79.]* In fact, he cited evidence that human diseases are developing resistance to antibiotics as a result of the large quantities of these substances that are given to animals.

SAUL: Worse yet, we're actually starting to see humans contracting diseases as a consequence of eating animals that have been fed "kill-floor scraps", or—as they're commonly called—"meat by-products". Think of it this way: A steer goes to market, and the muscle meat by no means make up the whole animal . . . there's also a lot of waste that is processed into meat by-products. And these substances sometimes include the entire *bodies* of animals that are cancerous or have other diseases that make them unfit for human food. Well, according to a report by Dr. P.F. McGargle—a veterinary surgeon who did meat inspection—published in *Preventive Medicine Forum*, countries in which these ground-up animal by-products are used in livestock food have an unusually high incidence of human cancer. Childhood cancer, in particular, is much higher in countries that use kill-floor scraps when producing feed for hogs, chickens, and turkeys.

Now if you organically raise your own livestock, or if you're a hunter and you get wild game . . . surely that animal had a better chance to get a balanced diet rich in minerals and vitamins—and lived a better life—than did a steer confined to an intensive feedlot. Even so, I still think we should eat the whole animal—*raw*—if we're going to call ourselves omnivorous.

PLOWBOY: What actions *other* than adopting a vegetarian diet would you recommend?

SAUL: If a person is not on insulin or any medication that requires eating, I'd suggest a short fast (four to six days) to rid the body of the toxins accumulated over years of unhealthful living. Fasting, by the way, is also a commonly used naturopathic treatment for certain illnesses.

PLOWBOY: Do you have any tips that might help a first-timer get through a fast? A lot of people are really intimidated by that idea.

SAUL: We have a little brochure called "Techniques for Successful Fasting" that many individuals have found helpful. Basically, it makes the following recommendations: [1] Go into the fast with a positive attitude. Some folks think they're surely going to die if they stop eating. Of course, that's not true, unless they have a health problem such as diabetes and *can't* fast. [2] They should attempt a 50-50 juice/water fast . . . consuming half fruit juice and half water, either mixed together or in alternation.

PLOWBOY: In any amounts that they feel comfortable with?

SAUL: Yes . . . *any* amounts. [3] They should continue their vitamin supplements while fasting. Now some naturopaths say you don't need these "boosters" while fasting—or, indeed, at all, *if* you're eating a healthful diet—but my feeling is that in real life, with its stresses of jobs and kids and traffic jams, you'll find it worthwhile to take vitamins every day.

[4] The next tip is to have a nightly enema during the fast—or any day that you don't have a bowel movement naturally—to rinse out the wastes that accumulate in the bowel and are not being eliminated. Otherwise, toxins will remain in your body when your fast is over. Now I lose a lot of individuals when I recommend that nightly enema, but, again, I'm not out to win buddies.

[5] And the last piece of advice is to come off the fast slowly and gradually. If you fast for four days, take a day or two to come off it. If you fast for six days, take at least two days.

PLOWBOY: Just how does one come off a fast gradually?

SAUL: Stick to fruit salads, vegetable broths, and such . . . and eat half of what you want but do so twice as often as you normally would. If you try all these steps, you'll almost certainly succeed. Most people who have fasted and hated it were on a water fast with no vitamins and no enema.

PLOWBOY: If people do manage to give up eating meat and make their way through the first fast, what should they then consume on a day-to-day basis? What do you feel would be healthful?

SAUL: A two-thirds raw food diet. Or what I prefer to call a two-thirds salad diet. I recommend, for example, an all-fruit breakfast, with some cheese or yogurt, and an all-salad lunch. Try to use sprouts instead of lettuce . . . sprouts are a complete protein while lettuce is not. Then, for supper, eat any meatless menu that you like . . .

(continued on page 22)

(continued from page 20)
going very light on sweeteners and very light on eggs. I also recommend drinking three glasses of raw fruit or vegetable juice a day . . . preferably before meals.

PLOWBOY: What about breads?

SAUL: Whole grain breads can be a very valuable part of any diet. There *are* other ways to get your grains, though. Sprouting your wheat, for instance, is a superb way of getting complete protein.

And this brings us to an opportunity to exercise some real dietary economy. If people want to save money and still feel that they're getting enough protein, they should be sure to have a cereal bowl full of sprouted grain or beans a day. You can grow a whole jarful of sprouts for pennies. In fact, you could *live* on an all-sprout diet for less than $3.50 a week!

> *If you completely consume a raw, freshly killed animal, you'll get everything you need . . . all the vitamins, all the minerals, everything.*

There are people right now who are starving to death in America—many of them are elderly—because they can't live on the $10-$12 a week that they can spend on food. If these people were to eat, say, a diet consisting of half sprouted wheat and half sprouted alfalfa, lentils, mung beans, sunflower seeds, or chick-peas, they would get all of the protein they need . . . all of the vitamins . . . *and* all of the minerals. Then, if a person had just a little additional money, he or she could supplement that all-sprout diet with a daily eggnog . . . the latter being simply a glass of raw milk and a raw egg *yolk* only, with maybe a little sweetener added. That would provide an excellent poverty-level diet. Now I am *not* suggesting that we should all eat that way. I'm saying if I had only $4.00 a week, I could be very healthy on that amount of money.

PLOWBOY: And very bored, perhaps.

SAUL: Very bored, but also very *alive*. You know, it doesn't *cost* much to get good nutrition, but we neglect our need for it. I wonder how many nursing homes even give a high-potency natural multiple vitamin every day?

And simple, easily available vitamins can actually fight drug addiction! I've written to Nancy Reagan and expressed my support for her fight against drug abuse in children. And I told her that our work at the Ashwins Health Institute—in particular our vitamin dispensary that serves the poor in Rochester—has shown us that substance abuse trails off when individuals get adequate vitamin supplements . . . especially B vitamins and vitamin C in substantial quantities. I suggested to Mrs. Reagan that she help develop a national vitamin supplementation program. Unfortunately, all I got in reply was a polite letter from her press secretary.

Yet I've talked to people at St. Joseph's House of Hospitality in Rochester who often seemed to be so drunk they couldn't stand up without my holding them. We get such alcoholics on vitamin C and B complex, though, and those individuals can get *off* the booze. And that means a lot.

More amazing still, in Scotland it's been discovered that people who—in the course of treatment for cancer—were given morphine, or even heroin, can be injected intravenously with ten grams of vitamin C a day, and break the addiction in less than ten days . . . with *no* withdrawal symptoms, maintenance drugs, or side effects!

PLOWBOY: Hasn't it been said that almost 90% of *all* North Americans don't get enough vitamin C?

SAUL: Yes. William J. McCormick, the Toronto, Canada M.D. I mentioned before, did tests on several thousand individuals. He did find that 90% of them were vitamin C-deficient.

That may sound like a shocking statistic, but look at our nearest animal cousin, the gorilla. It's a vegetarian animal . . . one that's anatomically very similar to human beings and one which gets over *six thousand* milligrams of vitamin C a day in its normal diet. Yet the government's telling us that we need (according to the RDA) about one one-hundredth of that amount. Now somebody's wrong, and I'll side with the gorilla and against the government.

Of course, that common human deficiency is very [illegible] find that people simply get [illegible] when they take vitamin C [illegible] and controlled experiments aside, it all comes down to what [illegible] individual is willing to do. If any reader of this interview wants to conduct a safe experiment, all the person has to do is start taking the amount of vitamin C that I recommend and see if he or she feels better after a few weeks. *[EDITOR'S NOTE: See the accompanying chart.]* The proof is in the pudding. You can't argue with that any more than you should ignore Ivan Illich's disclosure that survival rates for the most common types of cancer—those that make up 90% of all cases—have remained virtually unchanged for the past 25 years.

PLOWBOY: Are you saying that all of our new chemotherapeutic drugs have made no progress in treating these cancers?

SAUL: Very little. Let me point out—as Linus Pauling has noted—that the medical establishment has double standards when it comes to vitamins and medicines. A drug may not work all the time, and may even have dangerous side effects, but still be considered a worthwhile risk for a possible success. Whereas if a vitamin doesn't work all the time, but is totally safe, most physicians won't even *try* it.

PLOWBOY: Are there any other easy self-help courses of action that you'd recommend?

SAUL: Well, for one, there's the "spontaneous release by positioning" technique (as developed by Lawrence Hugh Jones, D.O.), which is a method—a first aid technique—for adjusting a person's spine. *[EDITOR'S NOTE: We'll describe this method in detail in our next issue.]*

PLOWBOY: You seem to be sowing a number of self-help seeds, Dr. Saul. What do you hope will result from such work?

SAUL: Most of all, I'd like to see people stop living *with* their illnesses and start living *without* them. I dream of a nationwide system of neighborhood health cooperatives, which will make individuals so self-reliant that they can simply bypass the professionals. And I mean bypass the naturopath *as well as* the medical doctor. Now if someone has a broken leg or is bitten by a rabid dog, for heaven's sake, they'd still have to seek medical help. The secret is not to *never* go to a doctor . . . the secret is to rarely *need* to go.

PLOWBOY: So you believe that every illness is a result of unhealthful living.

SAUL: Basically, yes.

PLOWBOY: How does naturopathic theory explain the existence of contagious diseases?

SAUL: I could probably fill your magazine responding to that question, but I'll try to be brief. First of all, there is no absolute proof that germs are the *primary* cause of any illness. Yes, germs are found at the scene of illness. But then, detectives are found at the scene of a crime, and that fact doesn't mean that they committed it.

PLOWBOY: OK.

SAUL: In fact, many medical doctors have, during the last 150 years, gone on record as saying that they believe the germ theory isn't valid. It certainly doesn't seem to explain cancer very well . . . or heart disease . . . or mental illness . . . or diabetes. At least 20 billion dollars' worth of cancer research hasn't been able to defeat malignancy, or we'd all be vaccinated for it, you can be sure of that.

That's the first basic point. The second is that if we go back to Robert Koch, who formulated Koch's postulates—upon which the germ theory is based—we find that there's a logical flaw in that argument. The first postulate says that you can isolate the germ in a sick animal. The second postulate says you can culture that germ and then—here's the third postulate—inject that cultured germ into a healthy animal and produce the symptoms characteristic of the illness. The fourth postulate states you can then remove the germ from the newly sick animal . . . and it will be the *same* germ, thus proving that the microorganisms caused the disease.

Now that sounds ironclad. But—as Andrew Weil, M.D. points out in his book *The Natural Mind*—there's a flaw in postulate three. How is the germ presented to the animal? By bypassing all of the body's defense systems, since it's injected directly into the bloodstream!

The naturopath claims that disease resistance is the *main* story! It *allows* germs to become a factor.

PLOWBOY: Are you saying, then, that someone who leads a healthful life would be less likely to contract a contagious disease?

SAUL: Absolutely. They'd be less likely to catch it, and if they *did* it would be less severe. Here's a simple example. Our children had been playing with the neighbor's kids just before those children's chicken pox became visible, at the most contagious stage of that disease. A few days later, the other kids had chicken pox. But our youngsters developed only five or six spots apiece. We upped their vitamin C and that was the end of that.

PLOWBOY: That sounds analogous to the increased disease and bug-attack resistance shown by healthy, organically grown plants.

SAUL: Certainly. And you can apply that same line of comparison when considering the laboratory animals used in medical research. Think about the white rats—generation after generation after generation of them—that are fed only commercial rat food. That diet can't possibly contain *every* natural factor . . . it can only contain what we humans think rats need for a healthy life. OK?

So all of these rats get the same diet . . . one that quite possibly is deficient, and certainly is given in excess. We introduce germs to these animals and they drop dead. When I was in Australia, I studied with Professor S.A. Barnett of the Australian National University in Canberra. He asserted that if those same experiments were conducted with London sewer rats, the results would be quite different, because those rodents wouldn't be so quick to die. Not only do London sewer rats have a more broadly based diet . . . they're also, of course, constantly exposed to germs. There simply wouldn't *be* any rodents if the population wasn't able to resist illness. Again, resistance is the question . . . not germs.

And people can *build* resistance by getting plenty of rest . . . plenty of exercise . . . and the right kind of diet. We also need vitamin supplements, especially vitamin C. If folks follow these simple rules, though, germs will really become more or less irrelevant. This sort of natural disease prevention is always to be preferred to medical inoculation and such. If it's a toss-up, go with nature. Nature has had thousands of years to work out the enzyme/vitamin/elimination/nutrition structures of the body. Nature has had a *lot* of experience.

The medical establishment, for all its good intentions, has had considerably less experience.

You know, when the signers of the Declaration of Independence were sitting down at the table, one of the gentlemen present was Dr. Benjamin Rush, surgeon general of the Continental army. When they sat down to sign the Declaration—to more or less create this country—Dr. Rush said the following: "The Constitution of this republic should make special provision for medical freedom, as well as religious freedom. To restrict the art of healing to one class of men, and to deny equal privileges to others, will constitute the bastille of medical science. All such laws are un-American and despotic."

And this, of course, is the real crux. Medicine is not a science . . . it's an art. And that's why people should be *encouraged* to be their own doctors . . . because it's an art form, for which you need no degree, and which generally requires no training that you can't pick up on your own.

Just remember this basic point: Our *internal* environment is the primary influence on our health! We're talking about inner-space ecology. We're talking about interior homesteading. And the rewards of naturopathic living can be enormous. To sit down to a simple, healthful meal with healthy children and to be able to know that your basic bodily equipment is functioning as well as possible, should, I think, be a more important aspect of self-reliance than solar heating!

PLOWBOY: One of the first rules of a self-reliant lifestyle is that you must take care of your tools . . . and you're talking about the most precious tool we have.

SAUL: Exactly. This body is the only one we're going to get, so we owe it to ourselves to be careful with it. And I think that we can get better health care by doing the job ourselves than we can by contracting it out.

Of course, if you are going to doctor yourself, it's vitally important that you take the time, do the reading, and put enough energy into it to do a good job. I don't want people going out half-baked after reading one book and thinking they're experts.

But make no mistake, naturopathic remedies *do* work. If a dedicated person goes into the field to prove nature cure wrong, he or she will wind up proving it right. The truth will stand on its own. The folks with *real* problems are those who can't be bothered to look into natural healing at all. The people who are indifferent. The people who don't care.

Our hospitals and nursing homes are filled to *capacity* with those people!

EDITOR'S NOTE: People interested in obtaining more information about Dr. Saul and the Ashwins Health Institute can [1] mail a self-addressed, stamped envelope—along with a dollar or two to cover expenses—to the Ashwins Health Institute, Dept. BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SENATE BILL NO. 274 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic healing; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) practice of naturopathy or naturopathic medicine (AS 08.45).

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS AND NATUROPATHIC PHYSICIANS.

ARTICLE 1. REGULATION OF NATUROPATHY.

Sec. 08.45.010. DUTIES AND POWERS. The Department of Commerce and Economic Development shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter;

(3) license naturopathic physicians in accordance with AS 08.45.100 - 08.45.160; and

(4) provide for temporary permits for persons who are apparently qualified to engage in naturopathic medicine to engage in the practice of naturopathic medicine until certification of the results of the next examination given under AS 08.45.120.

ARTICLE 2. LICENSING OF NATUROPATHIC PHYSICIANS.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage

suggested deleting ⊗ on + instead put in "licensing by reciprocity only" means licensing based on a licensing from another state, until there is enough Naturopaths to set up a Board

in the practice of naturopathy or naturopathic medicine unless he first obtains a license as provided in this chapter.

⊗ Sec. 08.45.110. LICENSURE AS A NATUROPATHIC PHYSICIAN. To be eligible for a license as a naturopathic physician, an applicant shall

(1) hold a high school diploma or the equivalent;

(2) have completed two years of postsecondary education at an accredited college of liberal arts or sciences;

(3) have attended at least 90 percent of the hours required for graduation and graduated from a legally chartered school or college of naturopathic medicine that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of instruction totaling 4,500 hours or more; the course of instruction shall include:

(A) anatomy and physiology;

(B) histology and embryology;

(C) microbiology;

(D) pathology;

(E) immunology;

(F) public health;

(G) toxicology;

(H) physical, clinical, x-ray and symptomatology diagnosis;

(I) first aid and emergency medicine;

(J) obstetrics and gynecology;

(K) orthopedics;

(L) minor surgery;

(M) proctology;

(N) otolaryngology;

(O) physiotherapy;

(P) manipulative techniques;

(Q) dietetics and clinical nutrition;

(R) herbology;

(S) naturopathic theory and practice;

(T) naturopathic therapeutics;

(U) clinical practice; and

(V) jurisprudence;

(4) successfully complete an examination given by the department;

(5) not have a license to practice naturopathic medicine in another state, province, or territory, which is suspended or revoked for disciplinary reasons;

(6) be a United States citizen or lawfully admitted to permanent residence in this country; and

(7) be of good moral character.

Sec. 08.45.120. EXAMINATION. (a) An examination for licensing as a naturopathic physician shall be held at a time and place and shall be conducted as determined by the department. The examination shall be limited to the subjects listed in AS 08.45.110(3), each of which shall constitute a separate examination section. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the department may require.

(b) To pass the examination an applicant shall receive an overall average of 75 percent and may not receive less than 70 percent in more than two sections.

Sec. 08.45.130. ENDORSEMENT. The department may license a person as a naturopathic physician if the person is currently licensed as a

naturopathic physician in another state or in a province of Canada and

(1) that state or province maintains professional licensing standards equivalent to those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license in this state; and

(3) the person demonstrates to the satisfaction of the department qualifications at least equal to those required of persons licensed under this chapter.

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The department may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) engages in unprofessional conduct;

(4) impersonates another physician;

(5) practices under an assumed name; or

(6) is convicted of a crime involving moral turpitude.

Sec. 08.45.150. FEES. The following fees are imposed under this chapter:

(1) application for examination .....$ 25

(2) application for reexamination 10

(3) license issuance or biennial renewal 100

(4) issuance of temporary permit 25

Sec. 08.45.160. NATURE OF NATUROPATHIC PRACTICE. A naturopathic physician in the course of the practice of naturopathic medicine

(1) may perform physical examinations, write prescriptions for substances authorized in this chapter, and sign birth and death

certificates;

(2) may use systems of diagnosis for which he has been trained under AS 08.45.110(3);

(3) may treat patients by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies, including acupuncture, that are effective in stimulating normal function of tissues and organs sensitized by disease;

(4) may

(A) draw blood for laboratory purposes, and use electrical or other methods for the repair and care of superficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in superficial structures;

(B) practice natural childbirth in obstetrics, including related minor surgical procedures;

(5) may not

(A) perform surgery except as provided under (4)(B) of this section;

(B) use controlled substances as defined in AS 11.81.-900(b)(6) including cannabis;

(C) use radiation therapy; and

(D) use drugs except antiseptics, local anesthetics, minerals and their extracts, and compounds or concentrates obtained from plants or animals.

Sec. 08.45.170. CONTINUING EDUCATION. (a) The department may prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the department evidence of completion of con-

tinuing education requirements.

(c) The department may exempt a licensee from the continuing education requirement under (b) of this section upon an application of the licensee setting out extenuating circumstances. A licensee may not receive more than one exemption under this subsection in a five-year period.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND ABBREVIATIONS. (a) A person licensed under this chapter may use the following titles: "Doctor of Naturopathy" or its abbreviation, "N.D.", "Naturopath", or "Naturopathic Physician". A person licensed under this chapter may not use his title in a manner that suggests that he practices a form of medicine or a healing art other than naturopathy.

(b) A person may not use a title or abbreviation listed in (a) of this section unless he is licensed under this chapter.

Sec. 08.45.205. VIOLATIONS. (a) It is unlawful for a person to

(1) fraudulently obtain or furnish a license, renewal, or record required by this chapter;

(2) wilfully violate a provision of this chapter or a regulation adopted under this chapter.

(b) A person who violates this section is guilty of a class B misdemeanor.

Sec. 08.45.210. PRACTICING WITHOUT A LICENSE. A person who practices naturopathy or naturopathic medicine without first obtaining a license is guilty of a class A misdemeanor.

Sec. 08.45.220. DEFINITIONS. In this chapter

(1) "department" means the Department of Commerce and Economic Development;

(2) "naturopathy" and "naturopathic medicine" means the

treatment of the human body through the use of natural agencies, forces, processes, and products, with emphasis on the response of the individual to the disease rather than its treatment in isolation;

(3) "unprofessional conduct" means

(A) the habitual overuse of alcoholic beverages or cannabis or the unlawful use of controlled substances as defined in AS 11.81.900(b)(6); or

(B) conviction of an offense that is a crime of moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

* Sec. 3. LICENSING OF PRACTITIONERS OF NATUROPATHY OR NATUROPATHIC MEDICINE WITHOUT EXAMINATION. The commissioner of commerce and economic development shall license all persons who, on the effective date of this Act, meet the qualifications of AS 08.45.110(1) - (7) and who apply for licensure under AS 08.45 not later than June 30, 1983.

* Sec. 4. This Act takes effect July 1, 1982.

Oregon Board of Naturopathic Examiners

Procedures for Colleges Applying for Approval under ORS 685.060

Naturopathic colleges seeking approval by the Board of Naturopathic Examiners in order that graduates may be eligible to take the licensing examinations should submit the following information to document compliance with the standards of OAR . Four(4) copies of all materials are required.

1) Current institutional catalog, brochures, and other information provided to students and the public.

2) Institutional self-evaluation for accreditation, if any.

3) Statements or documents described below, corresponding to sections of rule , Standards. Reference may be made to the appropriate sections of 1) and 2) above.

   1) Objectives. List the objectives of the college.

   2) Organization. Submit copies of Articles of Incorporation, By-laws, and the names of all Directors or Trustees.

   3) Administration. Submit resumes of all administrators, organization chart and position descriptions.

   4) Financial Condition. Submit current audited financial statement, current budget and projected budget for t he next fiscal period.

   5) Records and Educatior l Credentials. Describe record-keeping policies and procedures, submit sample degree and transcript.

   6) Catalog. Indicate the location of each required item in the catalcg.

   7) Admissions. Describe the admissions policies, requirements and procedures. List the names of the Admissions Committee members. Submit a copy of the application form(s) used.

   8) Attendance. Describe the college's attendance policy.

   9) Curriculum. Submit a synopsis of the curriculum showing the number of clock hours for each course. Submit a course outline for each course.

   10) Academic Standards. Describe how students are evaluated and the standards by which they are evaluated. Provide representative tests.

11) Faculty. Submit resume for each member of the faculty as described. Provide a narrative description on faculty participation in other areas specified. Submit copies of policies on hiring, compensation, etc. as listed.

12) Library. Submit all information as listed in Standards.

13) Clinical Training. Provide a narrative description of clinic facilities, major equipment, details of clinic procedures, rules of conduct, resumes of clinic staff, and any other pertinent data on the student's clinical experience.

14) Physical Plant. Describe in detail the college's physical plant and equipment.

15) Cancellation and Refund Policy. Submit a copy of the college's policy on refund of tuition and fees.

The following information should be made available to the Board's inspection committee during its visit.

a) Minutes of all board of control meetings
b) Administrative reports to the board of control
c) Minutes of faculty meetings
d) Student personnel records and financial accounts

850-10-220

SCOPE AND PURPOSE

(1) ORS 685.060 requires that one of the minimum educational requirements for licensure to practice naturopathic medicine in Oregon is graduation from a naturopathic school or college approved by the State Board of Naturopathic Examiners which teaches adequate courses in all subjects necessary to the practice of naturopathic medicine. The statute also specifies required subjects and subjects which the Board may not require, and permits the Board to require other subjects at its discretion.

(2) The purpose of these rules is to provide a set of standards and procedure by which schools of naturopathic medicine may obtain approval by the Board of Naturopathic Examiners in order that graduates of those schools may be permitted to take examinations for license.

850-10-221

EXERCISE OF BOARD AUTHORITY

(1) The Board may grant provisional approval to a naturopathic college which has been in continuous operation for at least one year. Provisional approval may be for a period not to exceed two and one half years and may not be renewed or extended. Provisional approval shall not imply nor assure eventual approval under ORS 685.060.

(a) In order to obtain provisional approval, a naturopathic college must demonstrate compliance with, or adequate planning and resources to achieve compliance with, the standards of Rule 850-10-224, 1 through 17.

(b) The procedures for application, examination, review, and revocation of provisional approval shall be the same as those specified for approval in Rules 850-10-224, 850-10-225 and 850-10-226.

(2) After initial approval by the Board, periodic reports may be required. Failure to conform to established standards may result in loss of approval. No school shall receive approval for a period longer than five years. Prior to the expiration of the period of approval, the school must apply to the Board for renewal of approval. The Board shall review the application and make a final decision of approval or disapproval in not more than 11 months.

(3) If a naturopathic college fails to maintain the required standards or fails to report significant institutional changes within 90 days of the change including changes in location, the Board may revoke its approval subject to rule 850-10-225. The Board may make periodic contact and/or send a representative or evaluation committee to an institution to gather information as authorized under rule . All costs of an evaluation shall be borne by the institution requesting approval.

850-10-222

ELIGIBILITY

(1) In order to apply for provisional approval, a naturopathic college must have been in continuous operation for a period of at least one year.

(2) In order to apply for full approval, a naturopathic college must have been in continuous operation for a period of at least three years.

850-10-223

APPLICATION PROCEDURE

Naturopathic colleges making application shall do so on a form or in a manner specified by the Board which shall be designed to meet the standards of rule 850-10-224.

850-10-224

STANDARDS

The following standards shall be used by the Board in considering a naturopathic college's application for approval:

(1) Objectives. The objectives of the institution shall be clearly stated and address the preparation for the naturopathic physician to provide patient care. The implementation for the objectives should be apparent in the administration of the institution, individual course objectives, and in the total program leading to the N.D. degree.

(2) Organization. The institution shall be incorporated under the laws of the state of its residence as an education corporation. Control shall be vested in a board of directors composed of naturopathic physicians and others. Under no circumstances shall more than one-third of the directors have administrative or instructional positions in the college. The directors must demonstrate collective responsibility in their: Knowledge of, and policy decisions consistent with, the Articles of Incorporation or Charter, By-laws, and objectives of the college; support of college programs and active participation in college governance; selection and oversight of the chief Administrative Officer.

(3) Administration. The education and experience of directors, administrators, supervisors, and instructors should be sufficient to insure that the student will receive educational services concistent with institutional objects. The administration of the institution shall be such that the lines of authority are clearly drawn. The institution shall present with its application a catalog and a brief, narrative explanation of how the administration of the institution is, or is to be, organized and how the administrative responsibility for each of the following is or is to be managed:

(a) Faculty and staff recruitment

(b) Personnel records management

(c) Faculty pay scale and policies

(d) Standards and practices relating to evaluation, improvement of instruction, promotion, retention, and tenure

(e) Admissions policies including procedures used to solicit students

(f) Development and administration of policies governing rejection and retention of students, job placement, and student counseling and advising services

(g) Curriculum requirements

(h) Tuition and fee policies

(i) Financial management policies

(4) Financial condition. The institution shall demonstrate its financial stability by submitting annual certified audits, reports, or other appropriate evidence. Board may require posting of an adequate bond.

(5) Records. The institution shall maintain an adequately detailed system of records for each student beginning with application credentials through the entire period of attendance. The records, including matriculation, attendance, grades, disciplinary action and financial accounts, shall be the permanent property of the institution to be safeguarded from all hazards and not to be loaned or destroyed.

(6) Educational Credentials

(a) Upon satisfactory completion of the educational program and the payment of all tuition and fees owed by the student to the college, the student shall receive a degree from the college indicating that the course of study has been satisfactorily completed by the student.

(b) In addition, for each student who graduates or withdraws, the college shall prepare, permanently file, and make available a transcript that specified all courses completed, provided that all tuition and fees owed by

the student have been paid. Each course entry shall include a title, the number of credits awarded, and a grade. The transcript shall separately identify all credits awarded by transfer, or examination.

(c) Upon request, all student records and transcripts shall be made available to the Naturopathic Board of Examiners.

(7) Catalog. The institution shall publish a current catalog at least every two years containing the following information:

(a) Name and address of the school

(b) Date of publication

(c) Admission requirements and procedures

(d) A statement of tuition and other fees or charges for which a student is responsible and a statement on refund policies

(e) A school calendar designating the beginning and ending dates of each term, vacation periods, holidays, and other dates of significance to students

(f) Objectives of the institution

(g) A list of trustees (directors), administrative officers and faculty members including titles and academic qualifications

(h) A statement of policy about standards of progress required of students, including the grading system, minimum satisfactory grades, conditions for interruption for unsatisfactory progress, probation, and re-entry, if any

(i) A description of each course indicating the number of hours and course content, and its place in the total program

(j) A description of facilities and major equipment, including library laboratory and clinical training facilities

(k) Statements on the nature and availability of student financial assistance, counseling, housing, and placement services if any.

(l) A statement indicating whether the school is recognized by other agencies or associations for the licensing or certification of naturopathic physicians.

(m) Any other material facts concerning the school or instruction which are reasonably likely to affect the decision of the potential student.

(8) Admission Policies and Procedures. The college shall have admission rules that include the following:

(a) All candidates must furnish proof of having at least two years (60 semester/90 quarter hours or equivalent) credit at an accredited institution with includes at least 30 quarter (20 semester) hours of biology and chemistry.

(b) Official transcripts of undergraduate credit must be sent directly from the undergraduate college to the naturopathic college.

(c) No student shall be admitted without a review of his/her psychological, moral, and professional attitudes by an Admissions Committee of at least three members.

(d) No applicant will be barred from admission because of sex, race, color religion, age, physical handicap, or national or ethnic origin.

(e) Applicants for admission with advanced standing shall be required to furnish evidence:

1. That they can meet the same entrance requirements as candidates for the first-year class
2. That courses equivalent in content and quality to those given in the admitting college in the year(s) preceeding that to which admission is desired have been satisfactorily completed.
3. That the work was done at a recognized school acceptable to the Naturopathic College.
4. The candidate has a letter of reference from the Dean of the college from which transfer is made.

(9) Attendance. The college shall have a stated policy relative to attendance. Students shall be required to spend the last year of the course in residence in the college which confers the degree.

(10) Curriculum. The curriculum of the college shall be designed and presented to meet or exceed the statutory requirements of length and content. The following standards are intended not as an exact description of a college's curriculum, but rather as guidelines for the typical acceptable program. It is expected that the actual program taught by each college will be prepared by the academic departments of the institution to meet the needs of their students and will exceed the outline present here. This policy has been adopted to preserve the autonomy and uniqueness of each naturopathic institution, and to encourage innovative and experimental programs enhancing the quality of naturopathic education.

(a) Basic Science

Anatomy (Includes Histology and Embryology - 350 hours
Physiology .....250 hours
Pathology.....125 hours
Biochemistry.....125 hours
Public Health (Includes Public Health,
genetics, microbiology, immunology.....175 hours
Naturopathic Philosophy.....100 hours
Pharmacology .....100 hours

(b) Clinical Sciences

I. Diagnostic Courses

Physical diagnosis..... 75 hours
Clinical diagnosis.....100 hours
Laboratory diagnosis..... 50 hours
Radiological diagnosis..... 50 hours

II. Therapeutic Courses

Materia Medica (Botanical medicine).....150 hours
Homeotherapeutics, Emergency Drugs)
Nutrition.....125 hours
Physical Medicine.....150 hours
Psychological Medicine..... 75 hours

III. Specialty Courses

Organ Systems (Cardiology, Dermatology, Endocrinology, EENT, Gastroenterology	175 hours
Human Development (Gynecology, Obstetrics Pediatrics, Geriatrics	75 hours
Acupuncture	25 hours
Jurisprudence	25 hours
Medical Emergencies	50 hours
Office Procedures	50 hours
Minor Surgery	50 hours

IV. Clinical Externship/Preceptorship.....1100 hours

(11) Academic Standards. The institution must regularly evaluate the quality of its instruction and have a clearly defined set of standards of competence required of its students. Promotion to each successive phase of the program and graduation shall be dependent on mastery of the knowledge and skills presented in the program.

(12) Faculty. Faculty members shall be qualified by training and experience to give effective instruction in the subject(s) taught; advanced degrees in their respective disciplines are expected. The faculty should participate in development and evaluation of curriculum, instructional methods and facilities; student discipline, welfare, and counseling; establishment of administrative and educational policies; scholarly and professional growth. Provisions shall be made to allow and encourage faculty involvement in these non-instructional functions. The college shall not discriminate on the basis of sex, race, age, color, religion, or national or ethnic origin in the recruitment and hiring of faculty. The college shall have stated policies on faculty hiring, compensation, fringe benefits, tenure, retirement, firing, grievance and appeals procedures. The college shall submit to the Board for each faculty member a resume which includes the following information.

(a) Academic rank or title

(b) Degree(s) held, the institution(s) that conferred the degree(s), the date(s) thereof, and whether earned or honorary.

(c) Other qualifying training or experience.

(d) Name and course number of each course taught

(e) Other non-instructional responsibilities, if any, and the proportion of the faculty member's time devoted to them.

(f) The length of time associated with the college.

(13) Library. The library shall be staffed, equipped and organized to adequately support the instruction, and research of students and faculty. The college shall submit information about the library to include:

(a) Financial support

(b) Circulation

(c) Number of volumes exclusive of documents

(d) List of periodicals

(e) List of reference books

(f) List of other instructional media

(g) List of special collections

(h) Staff and operating hours

(i) Arrangements for student and faculty access to library facilities at other institutions.

(14) Clinical Training. The clinical facilities shall be adequate in size, number and resources to provide all aspects of naturopathic diagnosis and treatment. There shall be properly equipped rooms for consultation, physical examination, and therapy, and a pharmacy, laboratory, and radiological equipment. A licensed and adequately experienced naturopathic physician must be present in the clinic at all times which the clinic is open and in direct supervision of diagnosis and treatment of patients by students. The ratio of adequately prepared students to clinical staff shall be such that patient care and student experience are optimized while the competence of the student is evaluated.

(15) Physical Plant, Materials and Equipment. The college shall own or enjoy the full use of buildings and equipment adequate to accommodate the instruction of its students, and administrative and faculty offices. There shall be adequate facilities for the safekeeping of valuable records. The plant and grounds, equipment and facilities shall be maintained in an efficient, sanitary, and presentable condition. All laws relating to safety and sanitation and other regulations concerning public buildings shall be observed. There shall be sufficient personnel employed to carry out proper maintenance.

(16) Cancellation and Refund Policy. The college shall maintain a fair and equitable policy in reference to refund of the unused portion of tuition fees and other charges in the event a student fails to enter the course, or withdraws at any time prior to completion of the course. Such a policy shall be in keeping with generally accepted practices of institutions of higher education.

(17) Other information. The applicant college shall provide any other information about the institution and its programs required by the Board.

850-10-225

REVIEW PROCEDURES

(1) The Board may send a representative or an examining or evaluation committee to inspect any institution requesting approval under ORS 685.060. Such inspections may be at any reasonable time during the normal operating hours of the college. The report of the representative or committee and the college's response shall be submitted as part of the documentation necessary for Board action on the college's application.

(2) In lieu of a review in accordance with part of the standards used by the Board as listed in OAR 850-10-224 the Board may acknowledge the adequacy of

accrediation by the Council on Naturopathic Medical Education, Inc., or other accrediting agency acceptable to the Board.

(3) Final action for approval by the Board will be held open to the public and the applicant college shall be invited to attend.

850-10-226

Revocation of Approval

Approval obtained under ORS 685.060 may be revoked for proper cause by the Board at its discretion, after a hearing. Such hearing shall be held in accordance to Model Rules of Procedure applicable to contested cases.

REMARKS BY REPRESENTATIVE MAE TISCHER

HOUSE BILL 347 MARCH 6, 1984

THANK YOU, MR. CHAIRMAN.

FOR THE RECORD, I AM REPRESENTATIVE MAE TISCHER, CHAIRMAN OF THE HOUSE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE. I AM CO-SPONSOR OF THE BILL BEFORE YOU TODAY, HOUSE BILL 347, "AN ACT RELATING TO THE PRACTICE OF NATUROPATHY."

I AM HERE TODAY TO CLEAR UP A FEW OF THE MISCONCEPTIONS SURROUNDING THIS BILL.

CRITICS OF HB 347 WILL TELL YOU IN JUST A FEW MINUTES THAT THEY DON'T WANT TO STOP THE PRACTICE OF NATUROPATHY -- THAT THEY ONLY WANT TO STOP NATUROPATHS FROM "PRACTICING MEDICINE." I MUST REJECT THIS ARGUMENT FOR TWO REASONS: FIRST, THE BILL BEFORE YOU DOES NOT ALLOW NATUROPATHS TO DO ANYTHING THAT THEY ARE NOT TRAINED TO DO IN LICENSED AND APPROVED SCHOOLS; AND SECOND, THIS BILL HAS NOTHING TO DO WITH "PRACTICING MEDICINE" -- ONLY WITH PROVIDING AN

ALTERNATIVE METHOD OF HEALTH CARE WITHIN CAREFUL LIMITS OF TRAINING, AND PROFESSIONAL REVIEW. NATUROPATHS ARE NOT DOCTORS; THEY CAN'T FIX A RUPTURED APPENDIX. HOWEVER, THEY CAN PROVIDE A SPECIALIZED HEALTH CARE SERVICE TO A SPECIALIZED GROUP OF PATIENTS WHO SPECIFICALLY SEEK THEM OUT. THIS BRINGS ME TO THE BASIC REASON I SUPPORT HB 347.

I BELIEVE THAT EACH INDIVIDUAL HAS THE RIGHT TO SEEK THE KIND OF HEALTH CARE THAT HE THINKS BEST, AND THAT NO BUREAUCRAT, HOWEVER WELL INTENTIONED, HAS THE AUTHOPITY TO STOP THE EXERCISE OF THAT RIGHT. HOUSE BILL 347 ONLY SEEKS TO GUARANTEE THAT ALASKANS WHO WANT TO DO SO MAY HAVE ACCESS TO THE NATUROPATHIC METHOD OF HEALING -- WITHIN ITS <u>FULL</u> SCOPE OF PRACTICE. THE BILL SIMPLY REQUIRES THE INDIVIDUAL TO BE RESPONSIBLE FOR SELECTING THE METHOD OF TREATMENT THAT HE WANTS AND THE EXTENT TO WHICH HE WILL RELY UPON THAT METHOD. IN ORDER TO PROVIDE A GENERAL ASSURANCE TO THE CONSUMER THAT ANYONE WHO CALLS HIMSELF A L[illegible]NSED NATUROPATH

HAS IN FACT MET SOME CRITERIA TO EARN THAT LICENSURE, THE STATE REQUIRES EACH LICENSED NATUROPATH TO COMPLY WITH RIGOROUS STANDARDS: ADEQUATE TRAINING IN DESIGNATED SUBJECTS (INCLUDING 1500 HOURS OF CLINICAL TRAINING), AND DEMONSTRATED PROFICIENCY IN RELATED SUBJECT AREAS ON A STANDARDIZED TEST. THE BILL THEN STIPULATES THAT PRACTITIONERS OF NATUROPATHY MUST IDENTIFY THEMSELVES CLEARLY AS SUCH. WITH THESE PRECAUTIONS IN THE BILL, I FAIL TO SEE ANY VALID CRITICISM OF THE MAIN THRUST OF THIS LEGISLATION. ANY ARGUMENT AGAINST THIS BILL, I FEEL, ONLY CHALLENGES THE INTELLIGENCE AND JUDGEMENT OF INDIVIDUAL ALASKANS.

WHEN LISTENING TO THIS LINE REASONING, I CANNOT HELP BUT WONDER WHAT THESE BUREAUCRATS THINK OF THE AVERAGE PERSON. I GET THE IMPRESSION THAT THE BUREAUCRATS BELIEVE WE ARE ALL A BUNCH OF DUNCES INCAPABLE OF MAKING ANY DECISIONS FOR OURSELVES -- THAT NO MATTER HOW MUCH WE TRUST OUR NATUROPATH AND THE PRACTICE OF NATUROPATHY, WE STILL MAY NOT GET ACCESS

TO HIS SEPVICES, EXCEPT WITHIN STRICT LIMITATIONS WHICH THEY SET FOR US. I FOR ONE AM INSULTED BY THIS KIND OF "BIG-BROTHERISH" MENTALITY.

I APPRECIATE THIS OPPORTUNITY TO APPEAR BEFORE THE HOUSE LABOR AND COMMERCE COMMITTEE TO EXPRESS MY CONTINUING SUPPORT FOR HOUSE BILL 347. I URGE YOUR EXPEDITIOUS AND FAVORABLE CONSIDERATION OF THIS IMPORTANT LEGISLATION. THANK YOU.

OREGON EDUCATIONAL COORDINATING COMMISSION
PROPOSED AMENDMENTS TO OREGON ADMINISTRATIVE RULES
CHAPTER 583, DIVISION 30

NOTE: Matter underlined is new; matter [*italic and bracketed*] is existing language to be omitted.

STANDARDS AND PROCEDURES FOR APPROVAL OF DEGREE REQUIREMENTS IN CERTAIN OREGON PRIVATE AND ALL OUT-OF-STATE INSTITUTIONS

Scope and Purpose

583-30-005 (1) ORS 348.835 provides that certain Oregon private and all out-of-state institutions of learning shall not confer or offer to confer any degree in recognition of the attainment or proficiency of a person without first having submitted the requirements for the degree to the Oregon Educational Coordinating Commission and having obtained the Commission's approval. This applies to each degree program at each location proposed by an institution.

(2) The purpose of this rule is to provide standards and procedures for submission of requirements and for Commission review and approval of the same, and to assure that institutions covered by this rule meet minimum standards of quality in their operation and conferral of degrees. It is also the purpose of these rules to help prevent deception of the public resulting from the conferring and use of fraudulent or substandard degrees. Regulation of degree requirements as evidence of academic achievement is in the public interest.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Exemptions

583-30-010 This rule shall not apply to:

(1) Any school or institution of learing which has been established and conducted within Oregon, and has conferred degrees for a period of 15 years prior to March 4, 1935;

(2) Any school conducted under the public educational system of the State of Oregon;

(3) Any Oregon school which is a member in good standing of the Northwest Association of Schools and Colleges;

[*(4) Any school which confers degrees only for proficiency in any system or method of healing;*]

[*(5) Any school now conferring the degree of doctor of optometry;*]

(4)[*(6)*] Schools of theology operating on a post-baccalaureate degree level.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Definitions as Used in OAR 583-30-005 to 583-30-045

583-30-015 (1) "Institution of Learning" or "Institution" means post-secondary educational institution subject to this rule.

(2) "Degree" means any academic or honorary title of designation, mark, appelation, series of letters or words, such as, but not limited to, associate, bachelor, master, doctor, or fellow which signifies, purports, or is generally taken to signify satisfactory completion of the requirements of an academic program of study beyond the secondary school level or a recognized title conferred for meritorious recognition which may be used for any purpose whatsoever. "Degree" does not include certificate, diploma, license, report, document, or title which signifies satisfactory completion of requirements of a non-degree program.

(3) "Confer" includes awarding, granting, bestowing, or giving of a degree.

(4) "Good Standing" means full accreditation with the Northwest Association of Schools and Colleges.

(5) "Commission" means the Oregon Educational [illegible]

(6) "Out-of-State" or "Foreign" educational institution means either a public or private institution which is not an Oregon school.

(7) "Attainment" or "Proficiency" means the completion and mastery of a program or field of study or competence in the skills generally required in the profession or field of study.

(8) "Advertising" means any form of public notice used in school recruiting and promotional activities, however disseminated including, but not limited to, catalogues and other school publications, signs, mailing pieces, radio or television advertisement, and audiovisual material.

(9) "Oregon School" means any school or institution of learning which initially establishes operations solely in oregon and Continuously maintains its main headquarters in Oregon.

(10) "Part-time faculty" means teaching staff employed by an institution less than full-time throughout the academic year.

(11) "Credit for prior learning" means credit which is awarded for learning which is not sponsored by an institution and occurs prior to matriculation.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Exercise of Commission Authority

583-30-020 (1) After initial approval by the Commission for an institution to grant a certain degree (or degrees), periodic reports may be required. Failure to conform to the established standards may result in loss of Commission approval. No institution shall receive approval for a period longer than five years. Prior to the expiration of the five-year period, or any lesser period designated by the Commission at the time of approval, the institution must initiate the reevaluation process by making application to the Commission for renewal of its authority. The Commission upon review and evaluation of the application shall make a final decision of approval or disapproval in not less than two nor more than 11 months.

(2) If any institution of learning fails to maintain the required standards or fails to report significant institutional changes within 90 days of the change including the offering of approved degree programs at new locations either within Oregon or elsewhere, the Commission may revoke its approval subject to rule 583-30-045 of these rules. The Commission may make periodic contact and/or send a representative or qualified examining or evaluation committee to an institution to gather information as authorized under rule 583-30-040. All costs of an evaluation shall be borne by the institution requesting approval.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Eligibility to Apply

583-30-025 In order to make application for the review of its degree-granting authority, an institution subject to this rule must have a representative in Oregon residence and a headquarters with a physical location and address in Oregon and identify its agent for the transaction of business with the Commission; or, if a foreign or out-of-state institution, it must designate a responsible agent within the State of Oregon and provide his/her name, address, and telephone number.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Application Procedure

583-30-030 Institutions making application shall do so on a form provided by the Commission, which shall be designed to meet the standards in rule 583-30-035.

Stat. Auth.: ORS Ch. 348

Standards

583-30-035 The following standards shall be used by the Commission in determining the completeness of an application and in its review of the degree-granting authority of an institution:

(1) Objectives. The objectives of the institution shall be clearly stated; they should make evident the ends which the institution hopes to achieve; and their implementation should be obvious in the administration of the institution, individual course objectives, and the total program which has been planned for students.

(2) Curriculum and Academic Standards. The institution shall make known the standards of excellence, mastery, and competence for its programs and courses of study and shall validate the effectiveness of its instruction by evaluating the proficiency of its students in their particular field of study before the granting of degrees. Special training for a given profession or vocation shall be sufficient in extent and quality to insure that recipients of the degree can perform acceptably the duties of the particular profession or vocation involved.

(3) Administration. The education and experience of directors, administrators, supervisors, and instructors should be sufficient to insure that the student will receive educational services consistent with institutional objectives. The administration of the institution shall be such that the lines of authority are clearly drawn. The institution shall present with its application a catalog and a brief, narrative explanation of how the administration of the institution is or is to be organized and how the administrative responsibility for each of the following is or is to be managed:

(a) Faculty and staff recruitment;

(b) Personnel records management;

(c) Faculty pay scale and policies;

(d) Standards and practices relating to evaluation, improvement of instruction, promotion, retention, and tenure;

(e) Admissions policies including procedures used to solicit students;

(f) Development and administration of policies governing rejection and retention of students, job placement, and student counseling and advising services;

(g) Curriculum requirements;

(h) Tuition and fee policies; and

(i) Financial management policies.

(4) Faculty. Faculty members of any institution conferring degrees shall be qualified by training and experience to give effective instruction in the particular fields involved. There shall be submitted to the Commission a resume for each faculty member participating in a program in Oregon, including the following information:

(a) Academic rank or title;

(b) Degree or degrees held, the institution(s) that conferred the degree(s), the dates(s) thereof, and whether earned or honorary;

(c) The faculty members' assignments by course number and title and the number of students involved in each course;

(d) Where faculty members have responsibilities for other than teaching, the nature of these responsibilities and the proportion of the faculty member's time required for them;

(e) Full-time equivalency; and

(f) The length of time each faculty member has been with the institution. Institutions which primarily employ part-time faculty must show how the following are provided:

(a) Faculty participation in the development of curriculum to afford continuity and stability in the educational program.

(b) Opportunity for counseling and informal association between students and faculty.

(5) Student Recruitment, Selection, and Retention. Recruitment and selection policies and practices shall be such as to assure that the personal goals and abilities of prospective students are compatible with the institution's purpose and academic standards and that student retention practices are consistent with the institution's objectives. The data submitted to the Commission shall include the following:

(a) A statement of the institution's recruitment, selection, and retention policies;

(b) The number of applicants for admission, number admitted, and the number enrolled during the past year, the attrition rate compared to the total school enrollment, and the reasons for student leaving if known; and

(c) The distribution of students in each of the various years in school and in each degree program.

(6) Financial Condition:

(a) The institution shall demonstrate to the satisfaction of the Commission its financial solvency and stability by submitting certified audit reports, the posting of an adequate bond, or other appropriate evidence.

(b) The potential of a proposed program for retaining students over time will be a factor in assessing projected financial stability.

(7) Physical Plant, Materials, and Equipment. Instructional space, equipment, laboratories, recreational facilities, gymnasiums, health centers, and instructional materials shall be adequate to achieve all institutional and program objectives. Institutions without the educational resources of a traditional campus and out-of-state domiciled institutions shall furnish evidence that provisions are made for faculty and student access to all necessary teaching and learning resources.

(8) Library Resources:

(a) The library resources shall be adequate to support the instruction, research, and services pertinent to the institution's goals and courses of study. Evidence for evaluation shall include:

(A) Financial support;

(B) Circulation;

(C) Number of volumes exclusive of documents;

(D) list of periodicals;

(E) List of reference books;

(F) List of instructional media available; and

(G) List of special collections.

(b) Institutions that do not maintain an on-site library shall furnish evidence that provisions have been made for faculty and student access to adequate library services.

(9) Entrance Requirements. Entrance requirements for post-secondary degree studies shall include graduation from a secondary school or its equivalent or such other requirements as are generally employed by institutions offering similar degrees.

(10) Educational Credentials:

(a) Upon satisfactory completion of educational or training and the payment of all tuition and fees owed by the student to the institution, the student shall be given appropriate educational credentials by the institution indicating that the course or courses of instruction or study have been satisfactorily completed by the student.

(b) In addition, for each student who graduates or withdraws, the institution shall prepare, permanently file, and make available a transcript that specifies all courses completed, provided that all tuition and fees owed by the student to the institution have been paid. Each course entry shall include a title, the number of credits awarded, and a grade. The transcript shall separately identify all credits awarded by transfer and for prior learning experience, correspondence courses, and credit by examination.

(11) Records:

(a) In addition to the transcript requirement provided for under section (10), the institution shall maintain adequate records to document the performance and progress of each student. The records and accounts pertaining to each period of

enrollment of each student shall be kept intact and in good condition by the educational institution for a period of at least three years following the termination of such enrollment period.

(b) The records to be retained shall include, but not necessarily be limited to, any of the following information that does not appear on permanently filed transcripts:

(A) Records and accounts which are evidence of tuition and fees charged to and received from or on behalf of all students.

(B) Records of previous education or training of students at the time of admission and records of credit, if any, granted by the institution at the time of admission.

(C) Records of the student's grades and progress.

(D) Individual instructor's class records.

(E) Records of interruption for unsatisfactory progress or conduct.

(F) Records of re. nds of tuition, fees, and other charges made to the student.

(c) Institutions shall maintain and have available for inspection for a period of three years following their use complete records and copies of all advertising, sales, and enrollment materials used by or on behalf of the institution.

(d) If any educational institution proposes to discontinue its operation, the chief administrative officer of the institution shall file with the Oregon Educational Coordinating Commission the original or legible true copies of all such information as is customarily required by colleges when considering students for transfer or advanced study, including but not necessarily limited to, all records required in section (10) and subsection (a) of this section. In the event it appears to the Commission that any such records of an educational institution discontinuing its operations are in danger of being destroyed, secreted, mislaid, or otherwise made unavailable to the Commission, the Commission may seek a court order to protect and, if necessary, take possession of the records. The Commission shall select at appropriate permanent location for such records.

(12) Advertising:

(a) The institution and its agents shall not utilize advertising of any type which is false or misleading, either by actual statement, omission, or insinuation.

(b) References to accreditation will be limited to accreditation currently held by the school through nationally recognized accrediting agencies as listed by the United States Department of Education.

(c) When an institution advertises that it is accredited it must identify the accrediting agency.

(d) An institution shall have records available to document any statements made through its advertising including salary and placement claims.

(e) An institution shall not advertise that it is in any way licensed, endorsed, recommended, approved, or accredited by the Oregon Educational Coordinating Commission.

(f) The insitution shall provide students and other interested parties with a brochure or catalog. The brochure or catalog must be revised and published at least every two years.

The following may be included in the brochure or catalog: "This institution has met the requirements of the Oregon Educational Coordinating Commission to grant degrees."

If any of the following items of information are not included in the catalog or brochure, it shall refer to other specific documents containing the omitted information:

(A) Name and address of the school;

(B) Date of publication;

(C) Admission requirements and procedures;

(D) A statement of tuition and other student charges related to enrollment such as deposits, fees, books and supplies, tools and equipment, and other charges for which a student may be responsible. This information may be presented as an addendum or insert to the main publication;

(E) A description of the extent and nature of part-time or full-time job placement assistance, if any, available to students or graduates;

(F) Specifics describing the availability of student housing, counseling and other student services, if any;

(G) A school calendar including beginning and ending dates of classes and programs, holidays, and other dates of importance;

(H) A statement of the objectives of the institution;

(I) A list of all institutional administrators and faculty members, including their titles and academic qualifications;

(J) A statement of institutional policy relative to standards of progress required of the student. This policy shall describe the grading system of the school, the minimum grades considered satisfactory, conditions for interruption for unsatisfactory grades or progress, a description of the probationary period, if any, and conditions for re-entrance for those students dismissed for unsatisfactory progress. A statement shall be made regarding progress records kept by the institution and furnished to the student;

(K) A statement of institutional cancellation and refund policy;

(L) A description of the available space, facilities and equipment;

(M) A description of the objectives, requirements, and length of each program offered.

(N) For each program or field of study that prepares students for a licensed or certified occupation, a statement that indicates whether or not the appropriate agency or association recognizes the program for purposes of licensing or certification in that occupation. For all such programs, this information must be provided at the beginning of each program description in the catalog, brochure, and supplementary publications.

(O) Policy and procedures relative to the granting of credit for prior learning if offered.

(P) A statement explaining the arrangements, or lack thereof, for transfer of the institution's credits to other institutions.

(Q) A description of the types of financial assistance available to students enrolled in the institution.

(R) Any other material facts concerning the school and the instruction which are reasonably likely to affect the decision of the potential student;

(13) Credit for Prior Learning:

(a) Institutions awarding credit for prior learning shall have clearly state policies relating to administrative responsibility, student eligibility, means of assessment, recording of results and transcripts, storage of documentation, student fees and maximum number of credits allowable.

(b) Credit for prior learning normally should be awarded in subject matter fields in which the institution offers comparable courses or curriculum and has available faculty expertise or where nationally validated examinations or other procedures for establishing credit equivalency can be relied upon. However, credit may be accepted when appropriately evaluated through contractual or other means.

(c) Systematic and rigorous procedures for assessing prior learning shall be used. They shall insure that learning is carefully articulated, documented, and measured in the context of the role of the institution and the educational objective of the student. Requirements must be specific that each student must demonstrate the learning achieved before credit is awarded.

(14) Requirements for all Associate, Baccalaureate and graduate degrees shall provide for an appropriate balance of credits between those earned in the major discipline and in general education. These requirements shall be in keeping with those generally employed by institutions offering similar degrees.

(15) Cancellation and Refund Policy. The institution shall maintain a fair and equitable policy in reference to refund of the unused portion of tuition fees and other charges in the event the student fails to enter the course, or withdraws at any time prior to completion of the course. Such a policy shall be in keeping with generally accepted practices of institutions of higher education.

(16) Other Information. The applicant shall provide any other information about the institution and its programs required by the Commission.

Hist: ECC 22, f. & ef. 12-22-75; ECC 2-1980, f. & ef. 4-14-80

Review Procedures

583-30-040 (1) The Commission may send a representative or an examining or evaluation committee to inspect any institution of learning subject to ORS 348.835. The examining committee shall be comprised minimally of a Commission staff reviewer, or a designee; an institutional representative of a college accredited by the Northwest Association of Schools and Colleges; and a third party drawn from the general professional field of the institution undergoing review. In those instances in which a representative of the Commission or an examining committee has been assigned to inspect an institution, the representative's or committee's report shall be submitted as part of the documentation necessary for Commission action.

(2) In lieu of a review in accordance with part of the standards used by the Commission as listed in OAR 583-30-035, the Commission may acknowledge the adequacy of accreditation by an association recognized by the United States Department of Education.

(3) Final action for approval by the Commission will be held open to the public and the applicant institution shall be invited to attend.

Stat. Auth.: ORS Ch. 348
Hist: ECC 22, f. & ef. 12-22-75; ECC 26, f. & ef. 6-8-77; ECC 2-1980, f. & ef. 4-14-80

Revocation of Approval

583-30-045 Approval obtained under ORS 348.835 may be revoked for proper cause by the Commission at its discretion, after a hearing. Such hearing shall be held only after the institution of learning involved has been given 20 days' notice in writing of the time and place of such hearing.

WE PETITION YOU

AS OUR LEGISLATOR TO RECOGNIZE BY LAW, THE NATUROPATHIC PROFESSION. WE FEEL IT IS OUR CONSTITUTIONAL RIGHT TO BE ABLE TO MAKE OUR OWN CHOICE IN SELECTING THE TYPE OF DOCTOR AND THE TYPE OF TREATMENT FOR US OR OUR FAMILY. WE WOULD PREFER TO BE ABLE TO CHOOSE BECAUSE OF AVAILABILITY, FROM ALL OF THE DIFFERENT TYPES OF TREATMENT AND ESPECIALLY AT TIMES, THE NATURAL METHOD OR NATUROPATHIC SYSTEM. WE THE UNDERSIGNED HAVE USED OR WOULD LIKE TO USE NATUROPATHIC SERVICES. WOULD YOU ACT IN OUR BEHALF TO ASSURE US OF OUR CONTINUED FREEDOM OF CHOICE?

WE PETITION YOU
AS OUR LEGISLATOR TO RECOGNIZE BY LAW, THE NATUROPATHIC PROFESSION. WE FEEL IT IS OUR CONSTITUTIONAL RIGHT TO BE ABLE TO MAKE OUR OWN CHOICE IN SELECTING THE TYPE OF DOCTOR AND THE TYPE OF TREATMENT FOR US OR OUR FAMILY. WE WOULD PREFER TO BE ABLE TO CHOOSE BECAUSE OF AVAILABILITY, FROM ALL OF THE DIFFERENT TYPES OF TREATMENT AND ESPECIALLY AT TIMES, THE NATURAL METHOD OR NATUROPATHIC SERVICES. WOULD YOU ACT IN OUR BEHALF TO ASSURE US OF OUR CONTINUED FREEDOM OF CHOICE?

COMMITTEE ON TOURISM, PROFESSIONS AND OCCUPATIONS
HOUSE OF REPRESENTATIVES AMENDMENTS TO H.B. 2202
(Reference to printed bill)

Strike everything after the enacting clause and insert:

"Section 1. Legislative intent

Since naturopathy is a health care system of diagnosing, treating and preventing disease, illness or injury of the human mind and body, it has a direct relationship with the public health. It is essential that the legislature regulate the practice of the profession of naturopathy to safeguard the public health, safety and welfare. It is also a matter of public interest and concern that the practice of the profession of naturopathy merit and receive the confidence of the public and that only qualified persons be permitted to engage in the practice of the profession of naturopathy.

Sec. 2. Repeal

Title 32, chapter 14, Arizona Revised Statutes, is repealed.

Sec. 3. Title 32, Arizona Revised Statutes, is amended by adding a new chapter 14, to read:

CHAPTER 14

NATUROPATHIC PHYSICIANS

ARTICLE 1. NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS

32-1501. Definitions

IN THIS CHAPTER, UNLESS THE CONTEXT OTHERWISE REQUIRES:

1. "BOARD" MEANS THE STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS.

2. "COMPLETED APPLICATION" MEANS AN APPLICATION FOR A REGULAR OR TEMPORARY LICENSE TO PRACTICE NATUROPATHY OR A NATUROPATHIC SPECIALTY WHICH, IN THE OPINION OF THE BOARD, APPEARS ON ITS FACE TO SHOW THAT THE APPLICANT POSSESSES ALL OF THE REQUIREMENTS FOR THE CATEGORY OF LICENSE

APPLIED FOR EXCEPT FOR THE PHYSICAL EXAMINATION OR MENTAL EVALUATION WHICH MAY BE REQUIRED BY THE BOARD AND THE EXAMINATION APPLICABLE TO THE CATEGORY OF APPLICATION CONCERNED.

3. "DIAGNOSING" INCLUDES PHYSICAL, CLINICAL, X-RAY AND LABORATORY EXAMINATIONS, AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD, TO DETERMINE THE NATURE OF A PERSON'S CONDITION.

4. "DOCTOR OF NATUROPATHIC MEDICINE" MEANS A NATURAL PERSON LICENSED UNDER THIS CHAPTER.

5. "DRUGS" MEANS PREPARATIONS AND SUBSTANCES, OTHER THAN FOOD AND WATER:

(a) RECOGNIZED, OR FOR WHICH STANDARDS OR SPECIFICATIONS ARE PRESCRIBED, IN THE LATEST REVISION OF THE PHARMACOPOEIA OF THE UNITED STATES, THE LATEST REVISION OF THE NATIONAL FORMULARY OR ANY CURRENT SUPPLEMENT TO EITHER OF THEM.

(b) USED OR INTENDED TO BE USED FOR THE DIAGNOSIS, CURE, TREATMENT, MITIGATION OR PREVENTION OF DISEASES OR ABNORMALITIES OF MAN.

DRUGS DO NOT INCLUDE BARIUM SULFATE USED FOR DIAGNOSTIC PURPOSES, ANTISEPTICS, LOCAL ANESTHETICS OR NONPOISONOUS PLANT SUBSTANCES OR OTHER EXTRACTED, COMPOUNDED OR CONCENTRATED SUBSTANCES OBTAINED FROM AN ANIMAL, A PLANT OR A MINERAL ORIGIN USED OR INTENDED TO BE USED IN THE TREATMENT OR PREVENTION OF DISEASES OR ABNORMALITIES OF MAN BY A NATUROPATHIC PHYSICIAN FOR WHICH STANDARDS OR SPECIFICATIONS ARE PROVIDED BY FEDERAL OR STATE LAWS.

6. "LOCAL ANESTHETIC" MEANS AN AGENT USED TO ABOLISH THE SENSATION OF PAIN WHOSE ACTION IS LIMITED TO AN AREA OF THE BODY AROUND THE SITE OF ITS APPLICATION.

7. "MINOR SURGERY" MEANS MINOR SURGERY AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD, INCLUDING:

(a) THE USE OF ELECTRICAL OR OTHER METHODS FOR SURGICAL REPAIR AND CARE INCIDENT TO SURGICAL REPAIR OF MINOR PROCEDURES, SUPERFICIAL LACERATIONS, LESIONS AND ABRASIONS.

(b) THE CLAMPING AND SEVERING OF UMBILICAL CORDS.

(c) THE REMOVAL OF FOREIGN BODIES LOCATED IN SUPERFICIAL STRUCTURES.

(d) THE USE OF ANTISEPTICS, SANITARY MEASURES AND LOCAL ANESTHETICS IN CONNECTION WITH PROCEDURES SET FORTH IN THIS PARAGRAPH.

MINOR SURGERY DOES NOT INCLUDE ABORTIONS BY NATUROPATHIC PHYSICIANS.

8. "NATURAL THERAPEUTIC METHODS" MEANS PROCEDURES, DEVICES AND METHODS FOR TREATING THE HUMAN MIND AND BODY WITHOUT DRUGS AS DEFINED IN PARAGRAPH 5.

9. "NATUROPATHIC SPECIALTY" MEANS ANY FIELD OF NATUROPATHIC PRACTICE WHICH, IN THE JUDGMENT OF THE BOARD, REQUIRES EDUCATIONAL BACKGROUND AND DEMONSTRATED PROFICIENCY IN ADDITION TO THE GENERAL QUALIFICATIONS REQUIRED FOR LICENSING AS A NATUROPATHIC PHYSICIAN.

10. "NATUROPATHY" MEANS A HEALTH CARE SYSTEM OF DIAGNOSING, TREATING AND PREVENTING DISEASE, ILLNESS OR INJURY OF THE HUMAN MIND AND BODY BY THE USE OF NATURAL THERAPEUTIC METHODS, PHYSIOTHERAPY AND MINOR SURGERY AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD.

11. "PHYSIOTHERAPY" INCLUDES ALL FORMS OF PHYSIOLOGICAL THERAPEUTICS AS TAUGHT IN NATUROPATHIC SCHOOLS AND COLLEGES APPROVED BY THE BOARD.

12. "UNPROFESSIONAL CONDUCT" INCLUDES THE FOLLOWING ACTS:

(a) INTENTIONAL BETRAYAL OF A PROFESSIONAL SECRET OR INTENTIONAL VIOLATION OF A PRIVILEGED COMMUNICATION EXCEPT AS EITHER OF THESE MAY OTHERWISE BE REQUIRED BY LAW. THIS SUBDIVISION DOES NOT PREVENT MEMBERS OF THE BOARD FROM THE FULL AND FREE EXCHANGE OF INFORMATION WITH THE LICENSING AND DISCIPLINARY BOARDS OF OTHER STATES OR COUNTRIES OR WITH THE ARIZONA NATUROPATHIC MEDICAL ASSOCIATION, INC., OR ANY OF ITS COMPONENT SOCIETIES OR WITH THE NATUROPATHIC MEDICAL SOCIETIES OF OTHER STATES, COUNTIES OR COUNTRIES.

(b) ANY DISHONORABLE CONDUCT REFLECTING UNFAVORABLY ON THE PROFESSION.

(c) COMMISSION OF A FELONY, WHETHER OR NOT INVOLVING MORAL TURPITUDE, OR A MISDEMEANOR INVOLVING MORAL TURPITUDE. IN EITHER CASE CONVICTION BY ANY COURT OF COMPETENT JURISDICTION IS CONCLUSIVE EVIDENCE THEREOF.

(d) HABITUAL INTEMPERANCE IN THE USE OF ALCOHOL.

(e) HABITUAL USE OF NARCOTIC OR HYPNOTIC DRUGS, OR BOTH.

(f) GROSS MALPRACTICE, REPEATED MALPRACTICE OR ANY MALPRACTICE RESULTING IN THE DEATH OF A PATIENT.

(g) IMPERSONATION OF ANOTHER DOCTOR OF NATUROPATHIC MEDICINE OR ANY OTHER PRACTITIONER OF THE HEALING ARTS.

(h) ACTING OR ASSUMING TO ACT AS A MEMBER OF THE BOARD IF SUCH IS NOT THE FACT.

(i) PROCURING OR ATTEMPTING TO PROCURE A LICENSE TO PRACTICE NATUROPATHY BY FRAUD, MISREPRESENTATION OR KNOWINGLY TAKING ADVANTAGE OF THE MISTAKE OF ANOTHER.

(j) HAVING PROFESSIONAL CONNECTION WITH OR LENDING ONE'S NAME TO AN ILLEGAL PRACTITIONER OF NATUROPATHY OR ANY OF THE OTHER HEALING ARTS.

(k) REPRESENTING THAT A MANIFESTLY INCURABLE DISEASE, INJURY, AILMENT OR INFIRMITY CAN BE PERMANENTLY CURED, OR THAT A CURABLE DISEASE, INJURY, AILMENT OR INFIRMITY CAN BE CURED WITHIN A STATED TIME, IF SUCH IS NOT THE FACT.

(l) OFFERING, UNDERTAKING OR AGREEING TO CURE OR TREAT A DISEASE, INJURY, AILMENT OR INFIRMITY BY A SECRET MEANS, METHOD, DEVICE OR INSTRUMENTALITY.

(m) REFUSING TO DIVULGE TO THE BOARD UPON DEMAND THE MEANS, METHOD, DEVICE OR INSTRUMENTALITY USED IN THE TREATMENT OF A DISEASE, INJURY, AILMENT OR INFIRMITY.

(n) GIVING OR RECEIVING, OR AIDING OR ABETTING THE GIVING OR RECEIVING OF, REBATES, EITHER DIRECTLY OR INDIRECTLY.

(o) KNOWINGLY MAKING ANY FALSE OR FRAUDULENT STATEMENT, WRITTEN OR ORAL, IN CONNECTION WITH THE PRACTICE OF NATUROPATHY EXCEPT AS NECESSARY FOR ACCEPTED THERAPEUTIC PURPOSES.

(p) IMMORALITY OR MISCONDUCT THAT TENDS TO DISCREDIT THE NATUROPATHIC PROFESSION.

(q) REFUSAL, REVOCATION OR SUSPENSION OF LICENSE BY ANY OTHER STATE OR COUNTRY, UNLESS IT CAN BE SHOWN THAT SUCH WAS NOT OCCASIONED BY REASONS WHICH RELATE TO THE ABILITY TO SAFELY AND SKILLFULLY PRACTICE NATUROPATHY OR TO ANY ACT OF UNPROFESSIONAL CONDUCT IN THIS PARAGRAPH.

(r) ANY CONDUCT OR PRACTICE CONTRARY TO RECOGNIZED STANDARDS OF ETHICS OF THE NATUROPATHIC PROFESSION OR ANY CONDUCT OR PRACTICE WHICH DOES

OR MIGHT CONSTITUTE A DANGER TO THE HEALTH, WELFARE OR SAFETY OF THE PATIENT OR THE PUBLIC, OR ANY CONDUCT, PRACTICE OR CONDITION WHICH DOES OR MIGHT IMPAIR THE ABILITY TO SAFELY AND SKILLFULLY PRACTICE NATUROPATHY.

(s) FAILURE TO OBSERVE ANY STATE, COUNTY OR MUNICIPAL LAW RELATING TO PUBLIC HEALTH AS A PHYSICIAN IN THIS STATE.

(t) VIOLATING OR ATTEMPTING TO VIOLATE, DIRECTLY OR INDIRECTLY, OR ASSISTING IN OR ABETTING THE VIOLATION OF, OR CONSPIRING TO VIOLATE ANY OF THE PROVISIONS OF THIS CHAPTER.

32-1502. Naturopathic physicians board of examiners; appointment; qualifications; term of office; immunity

A. THERE IS ESTABLISHED A STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS CONSISTING OF THE FOLLOWING EIGHT MEMBERS:

1. FOUR NATUROPATHIC PHYSICIAN MEMBERS APPOINTED BY THE GOVERNOR. EACH NATUROPATHIC PHYSICIAN MEMBER SHALL BE:

(a) A RESIDENT OF THIS STATE FOR FIVE YEARS IMMEDIATELY PRECEDING HIS APPOINTMENT.

(b) A DOCTOR OF NATUROPATHIC MEDICINE WITH A DEGREE FROM A NATUROPATHIC SCHOOL OR COLLEGE APPROVED BY THE BOARD WHO HAS ENGAGED IN THE FULL-TIME PRACTICE OF NATUROPATHY FOR FIVE YEARS IMMEDIATELY PRECEDING HIS APPOINTMENT.

2. TWO PUBLIC MEMBERS APPOINTED BY THE GOVERNOR. EACH PUBLIC MEMBER SHALL:

(a) BE A RESIDENT OF THIS STATE FOR FIVE YEARS IMMEDIATELY PRECEDING HIS APPOINTMENT.

(b) NOT BE CONNECTED, IN ANY MANNER, WITH OR HAVE ANY INTEREST IN A SCHOOL OF MEDICINE, HEALTH CARE INSTITUTION OR ANY PERSON PRACTICING ANY FORM OF HEALING OR TREATMENT OF BODILY OR MENTAL AILMENTS.

(c) DEMONSTRATE AN INTEREST IN THE HEALTH PROBLEMS IN THIS STATE.

3. THE CHAIRMAN OF THE STATE BOARD OF MEDICAL EXAMINERS WHO SHALL SERVE AS AN EX OFFICIO MEMBER OR ANOTHER PROFESSIONAL MEMBER OF THE STATE BOARD OF MEDICAL EXAMINERS DESIGNATED BY THE CHAIRMAN TO SERVE ON THE STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS IN HIS PLACE.

4. THE PRESIDENT OF THE STATE BOARD OF NURSING WHO SHALL SERVE AS AN EX OFFICIO MEMBER OR ANOTHER PROFESSIONAL MEMBER OF THE STATE BOARD OF NURSING DESIGNATED BY THE PRESIDENT TO SERVE ON THE STATE NATUROPATHIC PHYSICIANS BOARD OF EXAMINERS IN HIS PLACE.

B. THE TERM OF OFFICE OF THE NATUROPATHIC PHYSICIAN MEMBERS AND THE PUBLIC MEMBERS IS FIVE YEARS TO BEGIN AND END ON JUNE 30. EACH NATUROPATHIC PHYSICIAN MEMBER AND EACH PUBLIC MEMBER CONTINUE TO HOLD OFFICE UNTIL THE APPOINTMENT AND QUALIFICATION OF THEIR SUCCESSORS, SUBJECT TO THE FOLLOWING EXCEPTIONS:

1. A MEMBER OF THE BOARD, AFTER NOTICE AND A HEARING BEFORE THE GOVERNOR, MAY BE REMOVED FROM OFFICE AND HIS TERM ENDS IF THE GOVERNOR FINDS THE MEMBER NEGLECTED ANY DUTY IMPOSED BY LAW OR WAS GUILTY OF MALFEASANCE, MISFEASANCE OR DISHONORABLE CONDUCT.

2. THE TERM OF ANY MEMBER AUTOMATICALLY ENDS ON HIS DEATH, RESIGNATION OR PERMANENT REMOVAL FROM THIS STATE OR REMOVAL FROM THIS STATE FOR A PERIOD OF MORE THAN SIX MONTHS.

C. MEMBERS OF THE BOARD ARE IMMUNE FROM PERSONAL LIABILITY WITH RESPECT TO ACTS DONE AND ACTIONS TAKEN IN GOOD FAITH WITHIN THE SCOPE OF THEIR AUTHORITY.

32-1503. Organization; meetings; compensation

A. THE BOARD SHALL ANNUALLY ELECT, FROM AMONG ITS MEMBERSHIP, A CHAIRMAN, A VICE-CHAIRMAN AND A SECRETARY-TREASURER, WHO SHALL HOLD THEIR RESPECTIVE OFFICES AT THE PLEASURE OF THE BOARD.

B. THE BOARD SHALL HOLD A REGULAR MEETING AT LEAST SEMIANNUALLY ON A DATE AND AT A TIME AND PLACE IT DESIGNATES. IN ADDITION, THE BOARD MAY HOLD SPECIAL MEETINGS IT DEEMS NECESSARY.

C. A MAJORITY OF THE MEMBERS OF THE BOARD CONSTITUTES A QUORUM AND A MAJORITY VOTE OF A QUORUM PRESENT AT ANY MEETING GOVERNS ALL ACTIONS TAKEN BY THE BOARD, EXCEPT THAT LICENSES SHALL BE ISSUED UNDER THIS CHAPTER ONLY ON THE VOTE OF THE MAJORITY OF THE FULL BOARD.

D. MEMBERS OF THE BOARD ARE ELIGIBLE TO RECEIVE COMPENSATION AS DETERMINED UNDER SECTION 38-611 FOR EACH DAY OF ACTUAL SERVICE IN THE BUSINESS OF THE BOARD. THE BOARD MAY PAY COMPENSATION IN AN AMOUNT AS DETERMINED UNDER SECTION 38-611 TO THE SECRETARY-TREASURER IF HE SERVES AS

THE ADMINISTRATIVE HEAD OF THE BOARD ASSUMING THE DUTIES OF AN EXECUTIVE SECRETARY.

32-1504. Powers and duties

A. THE BOARD SHALL:

1. ADMINISTER AND ENFORCE ALL PROVISIONS OF THIS CHAPTER AND ALL RULES AND REGULATIONS ADOPTED BY THE BOARD UNDER THE AUTHORITY GRANTED BY THIS CHAPTER.

2. COLLECT ALL FEES PROVIDED FOR BY THIS CHAPTER AND MAKE DISPOSITIONS OF THEM AS PROVIDED FOR IN SECTION 32-1505.

3. MAINTAIN AN ACCURATE ACCOUNT OF ALL RECEIPTS, EXPENDITURES AND REFUNDS GRANTED UNDER THIS CHAPTER.

4. MAINTAIN A RECORD OF ITS ACTS AND PROCEEDINGS, INCLUDING THE ISSUANCE, REFUSAL, RENEWAL, SUSPENSION OR REVOCATION OF LICENSES.

5. MAINTAIN A ROSTER OF ALL DOCTORS OF NATUROPATHIC MEDICINE LICENSED UNDER THIS CHAPTER WHICH INDICATES:

(a) THE NAME OF THE LICENSEE.

(b) HIS CURRENT PROFESSIONAL OFFICE ADDRESS.

(c) THE DATE OF ISSUANCE AND THE NUMBER OF HIS LICENSE.

(d) WHETHER THE LICENSE IS IN GOOD STANDING.

6. KEEP ALL APPLICATIONS FOR LICENSURE AS A PERMANENT RECORD.

7. MAINTAIN A PERMANENT RECORD OF THE RESULTS OF ALL EXAMINATIONS IT GIVES.

8. KEEP ALL EXAMINATION RECORDS INCLUDING WRITTEN EXAMINATION RECORDS AND TAPE RECORDINGS OF THE QUESTIONS AND ANSWERS IN ORAL EXAMINATIONS FOR ONE YEAR.

9. KEEP THE RECORDS OF THE BOARD OPEN TO PUBLIC INSPECTION AT ALL REASONABLE TIMES.

10. ADOPT AND USE A SEAL, THE IMPRINT OF WHICH, TOGETHER WITH THE SIGNATURES OF THE CHAIRMAN OR VICE-CHAIRMAN AND THE SECRETARY-TREASURER OF THE BOARD, SHALL EVIDENCE ITS OFFICIAL ACTS.

11. COMPENSATE ITS EXECUTIVE SECRETARY, OTHER PERMANENT AND TEMPORARY PERSONNEL AND COMMISSIONERS ON EXAMINATIONS AS DETERMINED UNDER SECTION 38-611.

B. THE BOARD MAY:

1. MAKE AND ADOPT RULES AND REGULATIONS WHICH ARE NECESSARY OR PROPER FOR THE ADMINISTRATION OF THIS CHAPTER.

2. MAKE AND ADOPT RULES AND REGULATIONS PRESCRIBING CONTINUING EDUCATION REQUIREMENTS FOR THE RENEWAL OF LICENSES ISSUED UNDER THIS CHAPTER.

3. EMPLOY AN EXECUTIVE SECRETARY AND OTHER PERMANENT OR TEMPORARY PERSONNEL IT DEEMS NECESSARY TO CARRY OUT THE PURPOSES OF THIS CHAPTER AND DESIGNATE THEIR DUTIES.

4. APPOINT DOCTORS OF NATUROPATHIC MEDICINE AS COMMISSIONERS ON EXAMINATIONS TO GIVE ANY PART OR ALL OF ANY EXAMINATION PROVIDED FOR UNDER THIS CHAPTER.

5. REQUIRE A BOND, IN AN AMOUNT IT DETERMINES AS APPROPRIATE, FOR THE FAITHFUL DISCHARGE OF THE DUTIES OF ITS EMPLOYEES.

32-1505. Naturopathic physicians board fund

A. ALL MONIES FROM WHATEVER SOURCE WHICH COME INTO THE POSSESSION OF THE BOARD SHALL BE PAID TO THE SECRETARY-TREASURER WHO SHALL, BEFORE THE END OF EACH CALENDAR MONTH, DEPOSIT THEM WITH THE STATE TREASURER WHO SHALL DEPOSIT TEN PER CENT OF SUCH MONIES IN THE STATE GENERAL FUND AND TRANSFER THE REMAINING NINETY PER CENT TO THE NATUROPATHIC PHYSICIANS BOARD FUND.

B. MONIES DEPOSITED IN THE NATUROPATHIC PHYSICIANS BOARD FUND ARE SUBJECT TO SECTION 35-143.01.

ARTICLE 2. LICENSING

32-1521. Persons and acts not affected by this chapter

THIS CHAPTER DOES NOT APPLY TO:

1. THE PRACTICE OF ANY OTHER METHOD, SYSTEM OR SCIENCE OF HEALING BY A PERSON LICENSED UNDER THE LAWS OF THIS STATE.

2. ANY STUDENT OF NATUROPATHY IN THE COURSE OF TAKING AN APPROVED INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM IF THE STUDENT COMPLIES WITH THE APPLICABLE REGISTRATION PROVISIONS OF THIS CHAPTER AND PAYS THE REQUIRED FEES.

3. ANY PERSON ACTING AT THE DIRECTION OR UNDER THE SUPERVISION OF A DOCTOR OF NATUROPATHIC MEDICINE SO LONG AS HE IS ACTING IN A CUSTOMARY CAPACITY, NOT IN VIOLATION OF ANY STATUTE AND DOES NOT HOLD HIMSELF OUT TO THE PUBLIC GENERALLY AS BEING AUTHORIZED TO PRACTICE NATUROPATHY.

4. ANY OUT-OF-STATE NATUROPATHIC PHYSICIAN LICENSED BY ANOTHER STATE OR COUNTRY, IF IN CONSULTATION REQUESTED BY A DOCTOR OF NATUROPATHIC MEDICINE.

32-1522. Qualifications for license

A. TO BE ELIGIBLE FOR A LICENSE TO PRACTICE NATUROPATHY OR A NATUROPATHIC SPECIALTY, THE APPLICANT SHALL:

1. HAVE A HIGH SCHOOL DIPLOMA OR THE EQUIVALENT OF A HIGH SCHOOL DIPLOMA.

2. HAVE AT LEAST SIXTY SEMESTER UNITS OF CREDIT IN LIBERAL ARTS AND SCIENCES FROM AN ACCREDITED COLLEGE OR UNIVERSITY.

3. BE A GRADUATE OF A SCHOOL OF NATUROPATHIC MEDICINE APPROVED BY THE BOARD.

4. HAVE SATISFACTORILY COMPLETED AN INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM IN NATUROPATHIC MEDICINE APPROVED BY THE BOARD.

5. POSSESS A GOOD MORAL AND PROFESSIONAL REPUTATION.

6. BE PHYSICALLY AND MENTALLY ABLE TO SAFELY ENGAGE IN THE PRACTICE OF NATUROPATHY AND SUBMIT TO A PHYSICAL EXAMINATION, MENTAL EVALUATION OR INTERVIEW, OR ANY COMBINATION THEREOF, DEEMED PROPER BY THE BOARD.

7. NOT BE GUILTY OF ANY ACT OF UNPROFESSIONAL CONDUCT OR ANY OTHER CONDUCT WHICH WOULD BE GROUNDS FOR REFUSAL, SUSPENSION OR REVOCATION OF A LICENSE UNDER THIS CHAPTER.

8. NOT HAVE HAD A LICENSE TO PRACTICE NATUROPATHY REFUSED, REVOKED OR SUSPENDED BY ANY OTHER STATE OR COUNTRY FOR REASONS WHICH RELATE TO HIS ABILITY TO SKILLFULLY AND SAFELY PRACTICE NATUROPATHY.

9. FILE THE APPLICATION, PAY THE FEES PROVIDED FOR IN SECTION 32-1529 AND PASS THE EXAMINATION PROVIDED FOR IN SECTION 32-1526.

B. THE BOARD MAY:

1. REQUIRE AN APPLICANT TO SUBMIT CREDENTIALS OR OTHER WRITTEN OR ORAL PROOF.

2. MAKE INVESTIGATIONS IT DEEMS PROPER TO ADEQUATELY ADVISE ITSELF WITH RESPECT TO THE QUALIFICATIONS OF AN APPLICANT.

32-1523. Qualifications for license by reciprocity

TO BE ELIGIBLE FOR A LICENSE TO PRACTICE NATUROPATHY BY RECIPROCITY, THE APPLICANT SHALL:

1. QUALIFY UNDER SECTION 32-1522 EXCEPT FOR PASSING THE WRITTEN EXAMINATION PROVIDED FOR IN SECTION 32-1526.

2. BE LICENSED TO PRACTICE NATUROPATHY BY ANOTHER STATE AFTER PASSING A WRITTEN EXAMINATION, IF THAT STATE ACCORDS LIKE PRIVILEGES TO HOLDERS OF LICENSES ISSUED BY THIS STATE.

3. BE ACTIVELY ENGAGED, FOR THREE YEARS IMMEDIATELY PRECEDING HIS APPLICATION, IN ONE OR MORE OF THE FOLLOWING:

(a) THE ACTIVE PRACTICE OF NATUROPATHY.

(b) AN INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM APPROVED BY THE BOARD.

(c) POSTGRADUATE TRAINING DEEMED BY THE BOARD TO BE EQUIVALENT TO AN APPROVED CLINICAL TRAINING PROGRAM.

(d) THE STUDY OF NATUROPATHY AT A SCHOOL OF NATUROPATHIC MEDICINE APPROVED BY THE BOARD.

4. PASS AN ORAL EXAMINATION PROVIDED FOR IN SECTION 32-1526.

32-1524. Temporary licenses

A. TO BE ELIGIBLE FOR A TEMPORARY LICENSE TO PRACTICE NATUROPATHY, AN APPLICANT SHALL QUALIFY UNDER SECTION 32-1522 EXCEPT FOR PASSING THE WRITTEN EXAMINATION PROVIDED FOR IN SECTION 32-1526.

B. TEMPORARY LICENSES SHALL BE ISSUED FOR A TERM OF SIX MONTHS AND MAY BE RENEWED ONLY ONCE.

C. A TEMPORARY LICENSE EXPIRES ON THE OCCURRENCE OF ONE OF THE FOLLOWING EVENTS:

1. THE EXPIRATION OF THE TERM FOR WHICH THE TEMPORARY LICENSE OR RENEWAL WAS ISSUED.

2. ISSUANCE OF A REGULAR LICENSE TO PRACTICE NATUROPATHY.

3. SUSPENSION OR REVOCATION OF THE TEMPORARY LICENSE.

D. THE HOLDER OF A TEMPORARY LICENSE SHALL PRACTICE WITH A NATUROPATHIC PHYSICIAN LICENSED UNDER THIS CHAPTER AND SHALL NOT OPEN AN OFFICE OR PRACTICE WITHOUT THE SUPERVISION AND DIRECTION OF A NATUROPATHIC PHYSICIAN LICENSED UNDER THIS CHAPTER.

32-1525. Application; hearing on deficiencies in application; interview; withdrawal

A. EACH APPLICANT SHALL FILE A VERIFIED COMPLETED APPLICATION IN THE FORM AND STYLE REQUIRED AND SUPPLIED BY THE BOARD ACCOMPANIED BY THE APPROPRIATE APPLICATION FEE PRESCRIBED IN SECTION 32-1529.

B. THE APPLICATION SHALL BE DESIGNED TO REQUIRE THE SUBMISSION OF EVIDENCE, CREDENTIALS AND OTHER PROOF NECESSARY TO SATISFY THE BOARD THAT IT MEETS THE REQUIREMENTS OF A COMPLETED APPLICATION.

C. THE APPLICATION SHALL CONTAIN THE OATH OF THE APPLICANT THAT:

1. ALL INFORMATION CONTAINED IN THE APPLICATION AND EVIDENCE SUBMITTED WITH IT ARE TRUE AND CORRECT.

2. THE CREDENTIALS SUBMITTED WERE NOT PROCURED BY FRAUD OR MISREPRESENTATION OR ANY MISTAKE OF WHICH THE APPLICANT IS AWARE.

3. THE APPLICANT IS THE LAWFUL HOLDER OF THE CREDENTIALS.

D. ALL APPLICATIONS SUBMITTED TO THE BOARD AND ANY ATTENDANT EVIDENCE, CREDENTIALS OR OTHER PROOF SUBMITTED WITH AN APPLICATION ARE THE PROPERTY OF THE BOARD AND PART OF THE PERMANENT RECORD OF THE BOARD AND SHALL NOT BE RETURNED TO A WITHDRAWING APPLICANT.

E. THE BOARD SHALL PROMPTLY INFORM AN APPLICANT, IN WRITING, OF THE DEFICIENCIES, IF ANY, IN HIS APPLICATION WHICH PREVENT IT FROM BEING A COMPLETED APPLICATION.

F. ANY APPLICANT WHO DISAGREES WITH THE STATEMENT OF DEFICIENCIES AND WHO BELIEVES HE HAS FILED A COMPLETED APPLICATION MAY REQUEST AND ON REQUEST SHALL BE GRANTED A HEARING. THE HEARING SHALL NOT BE HELD LESS THAN THIRTY DAYS AFTER THE RECEIPT OF THE REQUEST BUT SHALL BE HELD AT THE FIRST MEETING OF THE BOARD THEREAFTER. AT THE HEARING THE BURDEN OF PROOF IS ON THE APPLICANT TO SHOW THAT HE HAS FILED A COMPLETED APPLICATION.

G. THE BOARD MAY INTERVIEW THE APPLICANT TO DETERMINE WHETHER THE APPLICATION IS SUFFICIENT OR WHETHER THE APPLICANT OTHERWISE QUALIFIES FOR LICENSURE.

H. APPLICATIONS ARE CONSIDERED WITHDRAWN ON ANY OF THE FOLLOWING CONDITIONS:

1. REQUEST OF THE APPLICANT.

2. FAILURE OF THE APPLICANT TO APPEAR FOR AN INTERVIEW WITH THE BOARD EXCEPT FOR GOOD CAUSE BEING SHOWN.

3. FAILURE TO SUBMIT A COMPLETED APPLICATION WITHIN ONE YEAR FROM THE DATE OF THE MAILING BY THE BOARD OF A STATEMENT TO HIM OF THE DEFICIENCIES IN HIS APPLICATION UNDER SUBSECTION E OF THIS SECTION.

4. FAILURE TO SHOW, AT THE HEARING PROVIDED FOR IN SUBSECTION F OF THIS SECTION, THAT DEFICIENCIES DO NOT EXIST.

5. FAILURE TO SHOW, WITHIN ONE YEAR FROM THE INTERVIEW PROVIDED FOR IN SUBSECTION G OF THIS SECTION, THAT HIS COMPLETED APPLICATION IS TRUE AND CORRECT.

32-1526. Examinations

A. EXAMINATIONS REQUIRED UNDER SECTIONS 32-1522 AND 32-1523 SHALL BE CONDUCTED AT A TIME AND PLACE DESIGNATED BY THE BOARD BUT NO LESS FREQUENTLY THAN SEMIANNUALLY. THE APPLICANTS TO BE EXAMINED SHALL HAVE FIRST FILED A COMPLETED APPLICATION FOUND TO BE TRUE AND CORRECT AND SHALL BE GIVEN AT LEAST THIRTY DAYS' WRITTEN NOTICE OF THE TIME AND PLACE AT WHICH THE EXAMINATION SHALL BE GIVEN.

B. THE EXAMINATION REQUIRED UNDER SECTION 32-1522 SHALL BE WRITTEN BUT MAY ALSO INCLUDE ORAL, CLINICAL OR LABORATORY SECTIONS, OR ANY COMBINATION OF ORAL, CLINICAL OR LABORATORY SECTIONS.

C. THE EXAMINATION REQUIRED UNDER SECTION 32-1523 SHALL BE ORAL AND MAY INCLUDE CLINICAL OR LABORATORY SECTIONS, OR BOTH.

D. EXAMINATIONS FOR LICENSURE UNDER THIS CHAPTER SHALL:

1. BE IN ENGLISH.

2. BE PRACTICAL IN CHARACTER.

3. BE DESIGNED TO ASCERTAIN THE APPLICANT'S KNOWLEDGE OF NATUROPATHY AND HIS FITNESS TO PRACTICE NATUROPATHY.

4. INCLUDE ALL SUBJECTS WHICH ARE GENERALLY ACCEPTED AS NECESSARY TO A THOROUGH KNOWLEDGE OF THE PRACTICE OF NATUROPATHY.

E. THE BOARD SHALL PRESCRIBE RULES AND REGULATIONS FOR CONDUCTING EXAMINATIONS AND SET PASSING GRADES.

F. THE BOARD SHALL REVIEW THE EXAMINATION OF ANY APPLICANT ON THE APPLICANT'S REQUEST. A GRADE ON AN EXAMINATION REVIEWED BY THE BOARD MAY BE CHANGED ONLY BY THE MAJORITY VOTE OF THE MEMBERS OF THE BOARD. AN APPLICANT FAILING TO PASS AN EXAMINATION MAY BE REEXAMINED WITHIN ONE YEAR WITHOUT PAYMENT OF ADDITIONAL FEES.

G. IN A WRITTEN EXAMINATION, APPLICANTS SHALL BE DESIGNATED BY NUMBERS ONLY, AND THE CORRESPONDING NAMES SHALL BE KEPT SECRET UNTIL AFTER THE GRADING OF THE EXAMINATIONS.

H. IN ANY ORAL EXAMINATION (IN THE ORAL SECTION OF ANY EXAMINATION, A TAPE RECORDING SHALL BE MADE OF ALL QUESTIONS AND ANSWERS.

32-1527. License; issuance; registration; reregistration; cancellation; waiver of fees; registration of exempt persons

A. THE BOARD SHALL ISSUE LICENSES TO APPLICANTS WHO ARE QUALIFIED UNDER THIS CHAPTER.

B. EACH PERSON LICENSED UNDER THIS CHAPTER SHALL REGISTER HIS LICENSE AND PAY THE REGISTRATION FEE PRESCRIBED IN SECTION 32-1529.

C. EACH PERSON HOLDING A REGULAR LICENSE TO PRACTICE NATUROPATHY IN THIS STATE SHALL ANNUALLY REGISTER HIS LICENSE ON OR BEFORE JANUARY 1 OF EACH YEAR BY SUPPLYING THE BOARD WITH INFORMATION IT DEEMS NECESSARY AND PAYING THE ANNUAL REGISTRATION FEE PRESCRIBED IN SECTION 32-1529. IF A LICENSEE FAILS TO REGISTER HIS LICENSE ON OR BEFORE FEBRUARY 1 OF EACH YEAR, HE SHALL PAY THE PENALTY FEE FOR LATE REGISTRATION PRESCRIBED IN SECTION 32-1529. FAILURE TO REGISTER A LICENSE ON OR BEFORE MARCH 1 OF EACH YEAR, WITHOUT ADEQUATE CAUSE SHOWN, IS GROUNDS FOR PROBATION, SUSPENSION OR REVOCATION OF A LICENSE UNDER SECTION 32-1551.

D. A LICENSEE IN GOOD STANDING AND WHOSE LICENSE IS CURRENT MAY, AT ANY TIME, REQUEST AND SHALL BE GRANTED CANCELLATION OF HIS LICENSE.

E. THE BOARD MAY WAIVE THE ANNUAL REGISTRATION FEE IF A LICENSEE PRESENTS EVIDENCE SATISFACTORY TO THE BOARD THAT HE HAS PERMANENTLY RETIRED FROM THE PRACTICE OF NATUROPATHY AND HAS PAID ALL FEES REQUIRED UNDER THIS CHAPTER PRIOR TO WAIVER.

F. IF A RETIRED LICENSEE WHO HAS HAD HIS ANNUAL REGISTRATION FEE WAIVED BY THE BOARD ENGAGES IN THE PRACTICE OF NATUROPATHY HE IS SUBJECT TO THE SAME PENALTIES AS ARE IMPOSED UNDER THIS CHAPTER ON A PERSON WHO PRACTICES NATUROPATHY WITHOUT A LICENSE AND WITHOUT BEING EXEMPT FROM LICENSURE.

G. THE BOARD MAY REINSTATE A RETIRED LICENSEE TO ACTIVE PRACTICE ON PAYMENT OF THE ANNUAL REGISTRATION FEE AND PRESENTATION OF EVIDENCE SATISFACTORY TO THE BOARD THAT HE IS PHYSICALLY AND MENTALLY ABLE TO SAFELY ENGAGE IN THE PRACTICE OF NATUROPATHY AND STILL POSSESSES THE PROFESSIONAL KNOWLEDGE REQUIRED TO ENGAGE IN THE PRACTICE OF NATUROPATHY. THE BOARD MAY

REQUIRE A PHYSICAL EXAMINATION OR A MENTAL EVALUATION AND AN EXAMINATION OF NATUROPATHIC KNOWLEDGE AS IT DEEMS NECESSARY TO DETERMINE THESE QUALIFICATIONS.

H. TO QUALIFY FOR THE EXEMPTION IN SECTION 32-1521, PARAGRAPH 2, NATUROPATHIC STUDENTS SHALL:

1. REGISTER WITH THE BOARD FOR EACH YEAR OF THEIR INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING PROGRAM.

2. SUPPLY THE BOARD WITH WRITTEN PROOF THE BOARD DEEMS NECESSARY TO SATISFY ITSELF THAT THE REQUIREMENTS FOR THE EXEMPTION ARE MET.

3. PAY THE REGISTRATION FEE PRESCRIBED IN SECTION 32-1529.

32-1528. Directory; change of address

A. THE BOARD SHALL ANNUALLY COMPILE AND PUBLISH A DIRECTORY WHICH CONTAINS:

1. THE NAMES, ADDRESSES AND FIELDS OF PRACTICE OF ALL PERSONS HOLDING REGULAR LICENSES ISSUED UNDER THIS CHAPTER.

2. THE NAMES AND ADDRESSES OF THE OFFICERS AND MEMBERS OF THE BOARD.

3. THE RULES OF THE BOARD.

4. A COPY OF THIS CHAPTER.

5. SUPPLEMENTARY INFORMATION THE BOARD DEEMS OF INTEREST AND IMPORTANCE TO DOCTORS OF NATUROPATHIC MEDICINE.

B. EACH PERSON LICENSED UNDER THIS CHAPTER SHALL PROMPTLY AND IN WRITING INFORM THE BOARD OF HIS RESIDENCE AND OFFICE ADDRESSES AND EACH CHANGE OF HIS RESIDENCE AND OFFICE ADDRESSES.

C. A COPY OF THE DIRECTORY SHALL BE GIVEN FREE OF CHARGE TO EACH PERSON LICENSED UNDER THIS CHAPTER AT THE TIME OF INITIAL LICENSURE AND AT THE TIME OF EACH ANNUAL REGISTRATION OF LICENSE. ADDITIONAL COPIES SHALL BE AVAILABLE FOR PURCHASE AT A COST PRESCRIBED IN SECTION 32-1529.

32-1529. Fees

THE BOARD SHALL CHARGE THE FOLLOWING FEES:

1. FOR APPLICATION FOR A LICENSE TO PRACTICE NATUROPATHY OR A NATUROPATHIC SPECIALTY UNDER SECTION 32-1522, A FEE NOT TO EXCEED FOUR HUNDRED DOLLARS.

2. FOR APPLICATION FOR A LICENSE TO PRACTICE NATUROPATHY BY RECIPROCITY UNDER SECTION 32-1523, A FEE NOT TO EXCEED FOUR HUNDRED DOLLARS.

3. FOR APPLICATION FOR A TEMPORARY LICENSE TO PRACTICE NATUROPATHY UNDER SECTION 32-1524, TWO HUNDRED DOLLARS FOR THE INITIAL TERM AND ONE HUNDRED DOLLARS FOR THE RENEWAL TERM.

4. FOR ISSUANCE OF A DUPLICATE LICENSE, ONE HUNDRED DOLLARS.

5. FOR ENDORSEMENT OF AN ARIZONA LICENSE FOR THE PURPOSE OF APPLYING FOR A LICENSE IN ANOTHER STATE, FIFTY DOLLARS.

6. FOR INITIAL REGISTRATION OF LICENSE, FIFTY DOLLARS.

7. FOR ANNUAL REGISTRATION, A UNIFORM FEE OF ONE HUNDRED DOLLARS OR MORE BUT NOT TO EXCEED FOUR HUNDRED DOLLARS TO BE ANNUALLY DETERMINED BY THE BOARD AS NECESSARY TO PROVIDE FUNDS TO CONDUCT ITS BUSINESS.

8. FOR LATE REGISTRATION, A PENALTY OF TWO HUNDRED DOLLARS.

9. FOR ANNUAL REGISTRATION FOR INTERNSHIP, PRECEPTORSHIP OR CLINICAL TRAINING, ONE HUNDRED DOLLARS.

10. FOR THE SALE OF COPIES OF THE ANNUAL NATUROPATHIC DIRECTORY WHICH ARE NOT DISTRIBUTED FREE OF CHARGE UNDER SECTION 32-1528, A FEE NOT TO EXCEED TWENTY-FIVE DOLLARS.

11. FOR SERVICES NOT REQUIRED TO BE PROVIDED BY THIS CHAPTER BUT WHICH THE BOARD DEEMS APPROPRIATE TO CARRY OUT THE INTENT AND PURPOSE OF THIS CHAPTER, A FEE NOT TO EXCEED THE COSTS OF RENDERING THE SERVICES.

ARTICLE 3. REGULATION

32-1551. Grounds for probation, suspension, revocation or refusal to issue license; notice; hearing; appeal

A. THE BOARD ON ITS OWN MOTION MAY INVESTIGATE ANY INFORMATION WHICH APPEARS TO SHOW GROUNDS FOR PROBATION, SUSPENSION, REVOCATION OR REFUSAL TO ISSUE A LICENSE FOR UNPROFESSIONAL CONDUCT. ANY NATUROPATHIC PHYSICIAN OR HEALTH CARE INSTITUTION AS DEFINED IN SECTION 36-401 SHALL, AND ANY OTHER PERSON MAY, REPORT TO THE BOARD ANY INFORMATION THE PERSON MAY HAVE WHICH APPEARS TO SHOW GROUNDS FOR PROBATION, SUSPENSION, REVOCATION OR REFUSAL TO ISSUE A LICENSE. ANY PERSON WHO REPORTS OR PROVIDES INFORMATION TO THE BOARD IN GOOD FAITH IS NOT SUBJECT TO AN ACTION

FOR CIVIL DAMAGES AS A RESULT, AND THE PERSON'S NAME SHALL NOT BE DISCLOSED UNLESS THE PERSON'S TESTIMONY IS ESSENTIAL TO THE DISCIPLINARY PROCEEDINGS CONDUCTED UNDER THIS SECTION. ANY HEALTH CARE INSTITUTION WHICH FAILS TO REPORT AS REQUIRED BY THIS SECTION SHALL BE REPORTED BY THE BOARD TO THE INSTITUTION'S LICENSING AGENCY.

B. IF, IN THE OPINION OF THE BOARD, IT APPEARS THE CHARGE IS OF SUCH MAGNITUDE AS TO WARRANT SUSPENSION OR REVOCATION OF A NATUROPATHIC PHYSICIAN'S LICENSE THE BOARD SHALL SERVE ON THE PHYSICIAN A SUMMONS AND A COMPLAINT FULLY SETTING FORTH THE CONDUCT OR INABILITY CONCERNED AND SETTING THE TIME AND PLACE FOR A HEARING TO BE HELD BEFORE THE BOARD. THE HEARING SHALL NOT BE HELD LESS THAN THIRTY DAYS FROM SERVICE OF THE SUMMONS AND COMPLAINT.

C. IF THE PHYSICIAN WISHES TO BE PRESENT AT THE HEARING IN PERSON OR BY REPRESENTATION, OR BOTH, HE SHALL FILE WITH THE BOARD HIS ANSWER TO THE CHARGES IN THE COMPLAINT. THE ANSWER SHALL BE IN WRITING, VERIFIED UNDER OATH AND FILED WITHIN TWENTY DAYS AFTER SERVICE OF THE SUMMONS AND COMPLAINT.

D. IF THE PHYSICIAN COMPLIES WITH SUBSECTION C, HE MAY BE PRESENT AT THE HEARING WITH COUNSEL AND WITNESSES.

E. THE BOARD SHALL ISSUE SUBPOENAS FOR WITNESSES IT DEEMS NECESSARY AND FOR WITNESSES THE PHYSICIAN REQUESTS. ANY PERSON REFUSING TO OBEY A SUBPOENA SHALL BE CERTIFIED BY THE BOARD TO THE SUPERIOR COURT IN THE COUNTY IN WHICH SERVICE WAS MADE, AND PROCEEDINGS SHALL BE HAD AS FOR CONTEMPT.

F. SERVICE OF THE SUMMONS AND COMPLAINT SHALL BE AS PROVIDED FOR SERVICE OF THE SUMMONS AND COMPLAINT IN CIVIL CASES.

G. SERVICE OF SUBPOENAS FOR WITNESSES SHALL BE AS PROVIDED BY LAW FOR THE SERVICE OF SUBPOENAS GENERALLY.

H. THE BOARD MAY ADMINISTER THE OATH TO ALL WITNESSES AND SHALL KEEP A WRITTEN TRANSCRIPT OF ALL ORAL TESTIMONY SUBMITTED AT THE HEARING AND THE ORIGINAL OR A COPY OF ALL OTHER EVIDENCE SUBMITTED. THE BOARD MAY WAIVE THE TECHNICAL RULES OF EVIDENCE AT ANY HEARING CONDUCTED UNDER THIS SECTION.

I. IF THE BOARD FINDS, AFTER A HEARING CONDUCTED UNDER THIS SECTION, THAT SUFFICIENT GROUNDS EXIST TO MERIT PROBATION, SUSPENSION, REVOCATION OR DENIAL OF A LICENSE, THE BOARD SHALL TAKE THE APPROPRIATE ACTION.

J. COPIES OF THE WRITTEN TRANSCRIPT AND ALL OTHER EVIDENCE SUBMITTED SHALL BE AVAILABLE AT THE PHYSICIAN'S EXPENSE TO ANY PHYSICIAN APPEALING A DECISION OF THE BOARD AND WITHOUT CHARGE TO THE COURT IN WHICH AN APPEAL IS TAKEN.

K. AN APPEAL TO THE SUPERIOR COURT OF MARICOPA COUNTY MAY BE TAKEN FROM DECISIONS OF THE BOARD PURSUANT TO TITLE 12, CHAPTER 7, ARTICLE 6.

32-1552. Reinstatement of a suspended license; reissuance of a revoked license

A. A PHYSICIAN WHOSE LICENSE TO PRACTICE NATUROPATHY HAS BEEN SUSPENDED FOR AN INDEFINITE PERIOD OF TIME, OR REVOKED, MAY APPLY TO THE BOARD FOR THE TERMINATION OF THE SUSPENSION OR REISSUANCE OF THE REVOKED LICENSE UNDER THE FOLLOWING TERMS AND CONDITIONS:

1. THE APPLICATION SHALL BE SUBMITTED IN WRITING, VERIFIED UNDER OATH AND SHALL CONTAIN OR HAVE ATTACHED TO IT SUBSTANTIAL EVIDENCE SHOWING THAT THE BASIS FOR SUSPENSION OR REVOCATION HAS BEEN REMOVED AND THAT THE TERMINATION OF SUSPENSION OR REISSUANCE OF THE REVOKED LICENSE WILL NOT CONSTITUTE A THREAT TO THE PUBLIC HEALTH OR SAFETY.

2. IF IT IS AN APPLICATION FOR THE TERMINATION OF A SUSPENSION FOR AN INDEFINITE PERIOD, THE APPLICANT HAS NOT APPLIED FOR TERMINATION MORE FREQUENTLY THAN ONCE IN ANY SIX MONTH PERIOD.

3. IF IT IS AN APPLICATION FOR THE REISSUANCE OF A REVOKED LICENSE, THE APPLICANT HAS NOT APPLIED FOR REISSUANCE MORE FREQUENTLY THAN ONCE IN ANY TWENTY-FOUR MONTH PERIOD.

B. THE BOARD MAY INTERVIEW AN APPLICANT UNDER SUBSECTION A.

C. THE BOARD SHALL MAKE ITS DETERMINATION ON EACH APPLICATION AS IT DEEMS CONSISTENT WITH THE PUBLIC HEALTH AND SAFETY AND JUST IN THE CIRCUMSTANCES.

32-1553. Insurers to report malpractice claims and actions

A. ANY INSURER PROVIDING PROFESSIONAL LIABILITY INSURANCE TO A NATUROPATHIC PHYSICIAN LICENSED BY THE BOARD SHALL REPORT TO THE BOARD,

WITHIN THIRTY DAYS OF ITS RECEIPT, ANY WRITTEN OR ORAL CLAIM OR ACTION FOR DAMAGES FOR PERSONAL INJURIES CLAIMED TO HAVE BEEN CAUSED BY AN ERROR, OMISSION OR NEGLIGENCE IN THE PERFORMANCE OF THE INSURED'S PROFESSIONAL SERVICES, OR BASED ON A CLAIMED PERFORMANCE OF PROFESSIONAL SERVICES WITHOUT CONSENT OR BASED UPON BREACH OF CONTRACT FOR PROFESSIONAL SERVICES BY A NATUROPATHIC PHYSICIAN.

B. REPORTS REQUIRED BY SUBSECTION A SHALL CONTAIN:

1. THE NAME AND ADDRESS OF THE INSURED.

2. THE INSURED'S POLICY NUMBER.

3. THE DATE OF THE OCCURRENCE WHICH CREATED THE CLAIM.

4. THE DATE OF CLAIM IF SUIT IS NOT SIMULTANEOUSLY FILED.

5. THE DATE SUIT IS FILED.

6. A SUMMARY OF THE OCCURRENCE WHICH CREATED THE CLAIM AS STATED BY THE CLAIMANT.

7. SUCH OTHER REASONABLE INFORMATION RELATED TO THE CLAIM AS THE BOARD MAY REQUIRE.

C. EVERY INSURER REQUIRED TO REPORT TO THE BOARD UNDER THIS SECTION SHALL ALSO BE REQUIRED TO ADVISE THE BOARD OF ANY SETTLEMENTS OR JUDGMENTS AGAINST A NATUROPATHIC PHYSICIAN WITHIN THIRTY DAYS AFTER THE SETTLEMENT OR JUDGMENT OF ANY TRIAL COURT.

D. THE BOARD SHALL MAINTAIN THE REPORTS FILED IN ACCORDANCE WITH THIS SECTION AS CONFIDENTIAL RECORDS. STATISTICAL DATA DERIVED FROM THESE REPORTS SHALL BE RELEASED ONLY FOR BONA FIDE RESEARCH OR EDUCATIONAL PURPOSES.

E. THE BOARD SHALL INSTITUTE PROCEDURES FOR AN ANNUAL REVIEW OF ALL RECORDS KEPT IN ACCORDANCE WITH THIS CHAPTER IN ORDER TO DETERMINE WHETHER IT IS NECESSARY FOR THE BOARD TO TAKE REHABILITATIVE OR DISCIPLINARY MEASURES PRIOR TO THE RENEWAL OF A NATUROPATHIC PHYSICIAN'S LICENSE TO PRACTICE.

F. THE BOARD SHALL ANNUALLY REPORT TO THE DIRECTOR OF INSURANCE THE FOLLOWING STATISTICAL INFORMATION REPORTED BY INSURERS:

1. THE NUMBER OF CLAIMS.

2. THE DATES OF THE ACTS OR OMISSIONS WHICH FORM THE BASIS OF CLAIMS.

3. THE FINAL DISPOSITION OF CLAIMS.

G. THERE IS NO LIABILITY ON THE PART OF AND NO CAUSE OF ACTION ARISES AGAINST ANY INSURER REPORTING OR ITS AGENTS OR EMPLOYEES, OR THE BOARD OR ITS REPRESENTATIVES, FOR ANY ACTION TAKEN BY THEM IN GOOD FAITH UNDER THIS SECTION.

32-1554. Observance of public health laws and regulations

NATUROPATHIC PHYSICIANS LICENSED UNDER THIS CHAPTER SHALL OBSERVE AND ARE SUBJECT TO ALL STATE, COUNTY AND MUNICIPAL LAWS AND REGULATIONS RELATING TO PHYSICIANS AND TO PUBLIC HEALTH AS REQUIRED FOR PHYSICIANS OF OTHER SCHOOLS OF HEALING.

32-1555. Unlawful acts

IT IS UNLAWFUL FOR ANY PERSON:

1. TO PRACTICE, ATTEMPT TO PRACTICE OR CLAIM TO PRACTICE NATUROPATHY OR ANY BRANCH OF NATUROPATHY WITHOUT COMPLYING WITH THIS CHAPTER.

2. NOT LICENSED UNDER THIS CHAPTER TO USE THE DESIGNATION "DOCTOR OF NATUROPATHIC MEDICINE", "DOCTOR OF NATUROPATHY", "NATUROPATH", "NATUROPATHIC PHYSICIAN" OR THE USE OF ANY OTHER WORDS, INITIALS, SYMBOLS OR COMBINATION THEREOF WHICH WOULD LEAD THE PUBLIC TO BELIEVE SUCH PERSON WAS LICENSED TO PRACTICE AS A NATUROPATHIC PHYSICIAN.

3. TO SELL OR FRAUDULENTLY OBTAIN OR FURNISH ANY NATUROPATHIC DEGREE OR DIPLOMA.

4. TO OPERATE A SCHOOL, COLLEGE OR EDUCATIONAL INSTITUTION GRANTING A DEGREE, DIPLOMA OR CERTIFICATE IN NATUROPATHY UNLESS IT HAS BEEN APPROVED BY THE BOARD.

5. TO REPRESENT THAT A SCHOOL, COLLEGE OR EDUCATIONAL INSTITUTION GRANTING A DEGREE, DIPLOMA OR CERTIFICATE IN NATUROPATHY IS APPROVED BY THE BOARD IF THE SCHOOL, COLLEGE OR EDUCATIONAL INSTITUTION HAS NOT BEEN APPROVED BY THE BOARD.

6. TO SECURE OR ATTEMPT TO SECURE A LICENSE TO PRACTICE NATUROPATHY UNDER THIS CHAPTER BY FRAUD OR DECEIT.

32-1556. Prosecution for violations

THE COUNTY ATTORNEY OF EACH COUNTY OR THE ATTORNEY GENERAL SHALL PROSECUTE ALL PERSONS CHARGED WITH VIOLATING THIS CHAPTER, BUT THE BOARD

MAY RETAIN ITS OWN ATTORNEY OR INVESTIGATORS TO AID IN PROSECUTING A VIOLATOR. IF THE BOARD OBTAINS INVESTIGATORS OR LEGAL ASSISTANCE TO PROSECUTE OR AID IN THE PROSECUTION FOR A VIOLATION OF THIS CHAPTER, PAYMENT FOR THESE SERVICES SHALL BE MADE FROM THE NATUROPATHIC PHYSICIANS BOARD FUND.

32-1557. Violation; classification

A PERSON WHO VIOLATES ANY PROVISION OF THIS CHAPTER IS GUILTY OF A CLASS 5 FELONY.

32-1558. Injunction

A. AN INJUNCTION MAY BE ISSUED TO ENJOIN THE PRACTICE OF NATUROPATHY BY EITHER OF THE FOLLOWING CLASSES OF PERSONS:

1. ONE NOT LICENSED TO PRACTICE NATUROPATHY NOR EXEMPT FROM THE LICENSING REQUIREMENT UNDER THIS CHAPTER.

2. A NATUROPATH WHOSE CONTINUED PRACTICE WILL OR MAY CAUSE IRREPARABLE DAMAGE TO THE PUBLIC HEALTH AND SAFETY.

B. IN A PETITION FOR INJUNCTION UNDER SUBSECTION A, PARAGRAPH 1 IT IS SUFFICIENT TO CHARGE THAT THE RESPONDENT ON A DAY CERTAIN IN A NAMED COUNTY ENGAGED IN THE PRACTICE OF NATUROPATHY WITHOUT A LICENSE AND WITHOUT BEING EXEMPT FROM THE LICENSING REQUIREMENT UNDER THIS CHAPTER. FOR THE PURPOSE OF THIS SUBSECTION DAMAGE OR INJURY AS A RESULT OF SUCH PRACTICE IS PRESUMED.

C. A PETITION FOR INJUNCTION SHALL BE FILED IN THE NAME OF THIS STATE BY THE BOARD OR AT THE REQUEST OF THE ATTORNEY GENERAL IN THE COUNTY WHERE THE RESPONDENT RESIDES OR MAY BE FOUND.

D. ISSUANCE OF AN INJUNCTION DOES NOT RELIEVE THE RESPONDENT FROM BEING SUBJECT TO ANY OTHER PROCEEDINGS UNDER LAW PROVIDED FOR IN THIS CHAPTER OR OTHERWISE. VIOLATION OF AN INJUNCTION SHALL BE PUNISHED AS FOR CONTEMPT OF COURT.

E. IN ALL OTHER RESPECTS INJUNCTION PROCEEDINGS UNDER THIS SECTION SHALL BE CONDUCTED IN THE SAME MANNER AS OTHER INJUNCTIONS.

Sec. 4. Section 41-2362, Arizona Revised Statutes, is amended to read:

41-2362. Schedule for termination July 1, 1982

The following agencies shall terminate on July 1, 1982:

Sec. 11.71.140.

Schedule IA.

(a) A substance shall be placed in schedule IA if it is found under AS 11.71.120(c) to have the highest degree of danger or probable danger to a person or the public.

(b) Schedule IA includes, unless specifically excepted or listed in another schedule, any of the following substances whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(1) opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

(A) raw opium;

(B) opium extracts;

(C) opium fluid extracts;

(D) powdered opium;

(E) granulated opium;

(F) tincture of opium;

(G) codeine;

(H) ethylmorphine;

(I) etorphine hydrochloride;

(J) hydrocodone;

(K) hydromorphone;

(L) metopon;

(M) morphine;

(N) oxycodone;

(O) oxymorphine;

(P) thebaine;

(2) any salt, compound, derivative, or preparation of a substance included in (b)(1) of this section which is chemically equivalent or identical to any of the substances referred to in (b)(1) of this section; however, these substances do not include the isoquinoline alkaloids of opium;

(3) opium poppy and poppy straw;

(4) concentrate of poppy straw which is the crude extract of poppy straw in either liquid, solid, or powder form which contains the phenanthrine alkaloids of the opium poppy.

(c) Schedule IA includes, unless specifically excepted or unless listed in another schedule, any of the following opiates,

including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers, whenever the existence of these isomers, esters, ethers, and salts is possible within the specific chemical designation, dextrorphan excepted:

(1) acetylmethadol;

(2) allylprodine;

(3) alphacetylmethadol;

(4) alphameprodine;

(5) alphamethadol;

(6) alphaprodine;

(7) anileridine;

(8) benzethidine;

(9) betacetylmethadol;

(10) betameprodine;

(11) betamethadol;

(12) betaprodine;

(13) bezitramide;

(14) clonitazene;

(15) dextromoramide;

(16) diampromide;

(17) diethylthiambutene;

(18) difenoxin;

(19) dihydrocodeine;

(20) dimenoxadol;

(21) dimepheptanol;

(22) dimethylthiambutene;

(23) dioxaphetyl butyrate;

(24) diphenoxylate;

(25) dipipanone;

(26) ethylmethythiamutene;

(27) etonitazene;

(28) etoxeridine;

(29) fentanyl;

(30) furethidine;

(31) hydroxpethidine;

(32) isomethadone;

(33) ketobemidone;

(34) levomethorphan;

(35) levomoramide;

(36) levorphanol;

(37) levophenacylmorphan;

(38) meperidine, also known as pethidine;

(39) metazocine;

(40) methadone;

(41) methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane;

(42) moramide-intermediate, 2-methyl-3-morpholino-1, 1-diphenyl-propane-carboxylic acid;

(43) morpheridine;

(44) noracymethadol;

(45) norlevorphanol;

(46) normethadone;

(47) norpipanone;

(48) pethidine, also known as merperidine;

(49) pethidine-intermediate-A, 4-cyano-1-methyl-4-phenyl piperidine;

(50) pethidine-intermediate-B, ethyl-4-phenylpiperidine-4-carbox-ylate;

(51) pethidine-intermediate-C, 1-methyl-4-phenylpiperidine- 4-carboxylic acid;

(52) phenadoxone;

(53) phenampromide;

(54) phenazocine;

(55) phenomorphan;

(56) phenoperidine;

(57) piminodine;

(58) piritramide;

(59) propheptazine;

(60) properidine;

(61) propiram;

(62) racemethorphan;

(63) racemoramide;

(64) racemorphan;

(65) trimeperidine.

(d) Schedule IA includes, unless specifically excepted or unless listed in another schedule, any of the following opium derivatives, their salts, isomers, and salts of isomers whenever

the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) acetorphine;

(2) acetyldihydrocodeine;

(3) benzylmorphine;

(4) codeine methylbromide;

(5) codeine-n-oxide;

(6) cyprenorphine;

(7) desomorphine;

(8) dihydromorphine;

(9) drotebanol;

(10) etorphine, except hydrochloride salt;

(11) heroin;

(12) hydromorphinol;

(13) methyldesorphine;

(14) methyldihydromorphine;

(15) morphine methylbromide;

(16) morphine methylsulfonate;

(17) morphine-n-oxide;

(18) myrophine;

(19) nicocodeine;

(20) nicomorphine;

(21) normorphine;

(22) pholcodine;

(23) thebacon.

Sec. 11.71.150. SCHEDULE IIA.

(a) A substance shall be placed in schedule IIA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public which is less than substances listed in schedule IA, but higher than substances listed in schedule IIIA.

(b) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following hallucinogenic substances, or which contains any of its salts, isomers, whether optical, position, or geometric, or salts of isomers whenever the existence of these salts, isomers, or salts of isomers is possible within the specific chemical designation:

(1) 4-bromo-2, 5-dimethoxy-amphetamine, also known as 4-bromo-2, 5-dimethoxy-a-methylphenethylamine and 4-bromo-2, DMA;

(2) 2,5-dimethoxyamphetamine, also known as 2,5-dimethoxy-a-methylphenethylamine and 2,5-DMA;

(3) 4-methoxyamphetamine, also known as 4-methoxy-a-methylphenethylamine and paramethoxyamphetamine, PMA;

(4) 5-methoxy-3,4-methylenedioxy-amphetamine;

(5) 4-methyl-2,5-dimethoxy-amphetamine, also known as 4-methyl-2,5-dimethoxy-a-methylphenethylamine;

(6) 3,4-methylenedioxy amphetamine;

(7) 3,4,5-trimethoxy amphetamine;

(8) bufotenine, also known as 3-(B-dimethylaminoethyl)-5-hydroxyindole, 3-(2-dimethylaminoethyl)-5-indolol, N, N-dimethylserotonin; 5-hydroxy-N, N-dimethyltryptamine, and mappine;

(9) diethyltryptamine, also known as N, N-diethyltryptamine and DET;

(10) dimethyltryptamine, also known as DMT;

(11) ibogaine, also known as 7-ethyl-6, 6B, 7, 8, 9, 10, 12, 13-octahydro-2-methoxy-6, 9-methano-5H-pyrido ~~[1',2':1,2] azepino [5,4-b] indole~~ (16,26:1,2) azepino (5,4.b) indole and tabernanthe iboga;

(12) lysergic acid diethylamide, also known as LSD;

(13) mescaline;

(14) n-ethyl-3-piperidyl benzilate;

(15) n-methyl-3-piperidyl benzilate;

(16) peyote;

(17) analogs of phencyclidine (PCP), including:

(A) ethylamine analog, also known by some trade or other names as follows: N-ethyl-1-phenylcyclohexylamine (1-phenylcyclohexyl)ethylamine, N-(1-phenylcyclohexyl)ethylamine, cyclohexamine, PCE;

(B) pyrrolidine analog, also known by some trade or other names as follows: 1-(1-phenylcyclohexyl)-pyrrolidine, PCPY, PHP;

(C) thiophene analog, also known as 1-[1-(2-thienyl) cyclohexyl] piperidine and 2-thienylanalog of phencyclidine, TPCP, and TCP;

(18) psilocybine;

(19) psilocyn.

(c) Schedule IIA includes cocaine or coca leaves, and any salt, compound, derivative, mixture, isomer, ester, ether, or preparation of cocaine or coca leaves produced directly or indirectly by extraction from coca leaves, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, including the isomers, salts, and salts of isomers of cocaine and other derivatives of coca leaves whenever the existence of these esters, ethers, isomers or salts is possible, but does not include decocainized coca leaves or extractions of coca leaves which do not contain cocaine or ecgonine.

(d) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system, including their salts, isomers, and salts of isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) amobarbital;

(2) mandrix or mandrax;

(3) mecloqualone;

(4) methaqualone;

(5) pentobarbital;

(6) phencyclidine, also known as PCP;

(7) secobarbital.

(e) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the nervous system:

(1) amphetamine, its salts, optical isomers, and salts of its optical isomers;

(2) methamphetamine, its salts, isomers, and salts of its isomers;

(3) methylphenidate;

(4) phenmetrazine and its salts.

(f) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, mixture, or preparation which contains any quantity of the following substances:

(1) immediate precursor to amphetamine and methamphetamine: phenylacetone also known as phenyl-2-propanone; P2P; benzyl methyl ketone; methyl benzyl ketone;

(2) immediate precursors to phencyclidine, also known as PCP:

(A) 1-phencylclohexylamine;

(B) 1-piperidinocyclohexanecarbonitrile, also known as PCC.

Sec. 11.71.160. SCHEDULE IIIA.

(a) A substance shall be placed in schedule IIIA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public less than the substances listed in schedule IIA but higher than substances listed in schedule IVA.

(b) Schedule IIIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including their salts, isomers whether optical,

position, or geometric, and salts of these isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) benzphetamine;

(2) chlorphentermine;

(3) clortermine;

(4) mazindol;

(5) phendimetrazine;

(6) any compound, mixture, or preparation in dosage unit form containing any stimulant substance listed in schedule IIA, which compound, mixture, or preparation was listed on August 25, 1971, as an excepted compound under 21 C.F.R. sec. 1308.32, and any other drug of the quantitive composition shown in that list for those substances, or which is the same except that it contains a lesser quantity of any controlled substance.

(c) Schedule IIIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system:

(1) amobarbital, secobarbital, or pentobarbital or any salt of these substances, combined with one or more other active medicinal ingredients which are not listed in any other schedule;

(2) amobarbital, secobarbital, or pentobarbital or any salt of these substances, approved by the federal Food and Drug Administration for marketing only as a suppository;

(3) any substance which contains any quantity of a derivative of barbituric acid or any salt of barbituric acid;

(4) chlorhexadol;

(5) glutethimide;

(6) lysergic acid;

(7) lysergic acid amide;

(8) methyprylon;

(9) sulfondiethylmethane;

(10) sulfonethylmethane;

(11) sulfonmethane.

(d) Schedule IIIA includes nalorphine.

(e) Schedule IIIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing any of the following narcotic drugs or their salts calculated as the free anhydrous base or alkaloid, in the following quantities:

(1) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium;

(2) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(3) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium;

(4) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(5) not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(6) not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(7) not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(8) not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(f) Schedule IIIA includes

(1) hashish;

(2) hash oil or hashish oil; and

(3) tetrahydrocannabinols.

Sec. 11.71.170. SCHEDULE IVA.

(a) A substance shall be placed in schedule IVA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public which is less than the substances listed in schedule IIIA, but higher than the substances listed in schedule VA.

(b) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances, including their salts, isomers and salts of isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) barbital;

(2) chloral betaine;

(3) chloral hydrate;

(4) chlordiazepoxide;

(5) clonazepam;

(6) clorazepate;

(7) diazepam;

(8) ethclorvynol;

(9) ethinamate;

(10) flurazepam;

(11) lorazepan;

(12) mebutamate;

(13) meprobamate;

(14) methohexital;

(15) methylphenobarbital, also known as mephobarbital;

(16) oxazepam;

(17) paraldehyde;

(18) petrichloral;

(19) phenobarbital;

(20) prazepam.

(c) Schedule IVA includes any material, compound, mixture or preparation which contains any quantity of the following

substance, including its salts, isomers whether optical, position, or geometric, and salts of these isomers, whenever the existence of these salts, isomers, and salts of isomers is possible: fenfluramine.

(d) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including their salts, isomers whether optical, position, or geometric, and salts of these isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) diethylpropion;

(2) phentermine;

(3) pemoline, including organometallic complexes and chelates of this substance.

(e) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing not more than 1 milligram of difenoxin and not less than 25 micrograms of atropine sulfate per dosage unit, or their salts calculated as the free anhydrous base or alkaloid.

(f) Schedule IVA includes, unless specifically excepted or unless listed in another schedule, any material, compound,

mixture or preparation which contains any quantity of the following substances, including their salts:

(1) dextropropoxyphene (alpha-(+)-4-dimethylamino-1,2-dephenyl3-methyl-2-propionoxybutane);

(2) pentazocine;

(3) propoxphene.

Sec. 11.71.180. SCHEDULE VA.

(a) A substance shall be placed in schedule VA if it is found under AS 11.71.120(c) to have a degree of danger or probable danger to a person or the public which is less than substances listed in schedule IVA, but higher than substances listed in schedule VIA.

(b) Schedule VA includes any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs or their salts, calculated as the free anhydrous base or alkaloid, in limited quantities as specified in (1) - (6) of this subsection, which includes one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by schedule IA substances alone:

(1) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;

(2) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;

(3) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;

(4) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;

(5) not more than 100 milligrams of opium per 100 milliliters or per 100 grams;

(6) not more than 0.5 milligrams of difenoxin and not less than 25 micrograms of atropine sulfate per dosage unit.

(c) Schedule VA includes loperamide.

Sec. 11.71.190. SCHEDULE VIA.

(a) A substance shall be placed in schedule VIA if it is found under AS 11.71.120(c) to have the lowest degree of danger or probable danger to a person or the public.

(b) Marijuana is a schedule VIA controlled substance.

RE: House Bill 347

Dear Mrs. Tischer:

I had looked forward to meeting you again yesterday--we first met at the U of AK-Anchorage campus in the fall of '82 and talked for some time. I remember being impressed by your large family and the fact that you homesteaded in Alaska. We now have three children and have been here almost three years.

It was a new experience for me to testify before your committee yesterday--I've never been involved in a teleconference before. In fact, I've never been interested so deeply in an issue as I am in HB 347.

Before taking my family to a Naturopath, I did much research on the subject. In doing this, I discovered many things, among them the fact that Naturopathy has been around for nearly 200 years, that the Queen of England's personal physician is a Homeopath (one of the things Naturopaths practice), and that around the turn of the century there were 22 Naturopathic medical schools in the U.S. Today there are three. The reason for Naturopathy's decline? Apparently, there is not enough money in its practice. The "drugs" (called "remedies") prescribed by Naturopaths are readily available by simple means, although they must be prepared under rigid conditions in Homeopathic pharmacies. One can see why the drug companies which find allopathic medicine (the way most medicine is practiced today) so lucrative, cannot support Naturopathy.

Naturopaths practice a kind of medicine outside the experience or understanding of most M.D.s. In the first place, Naturopaths attempt to prevent disease by diet and exercise. Secondly, they treat the whole person by encouraging the body to heal itself, not by suppressive or allopathic drugs which cause the body to become dependent on, often addicted to, those very drugs.

If Naturopaths are not provided with separate licensing from M.D.s in Alaska, they will be faced with a Catch 22 situation. Without licensing they cannot practice medicine as they were trained, but there will be no provision for licensing them. Aside from my personal bias towards Naturopathy, I feel the issue of choice is or should be the priority here. Whether one feels Naturopathy is "right" or "wrong" for them, it does exist and (evidently) needs to be legislated.

UNTRUE!

As brought out by Dr. Jasper, even Nurse Practitioners and Certified Nurse Midwives are allowed to prescribe and do minor surgery. Therefore, I feel the physicians who testified are speaking from ignorance of the training and ideals of Naturopathy and are trying to relegate Naturopaths to second-class citizens. The bill should be passed as it is and give Naturopaths the right to practice as they were trained--to be conscientious, caring physicians in the prevention and treatment disease.

I used Dr. Pettijohn as backup for the home delivery of my youngest, Megan, one year ago by a lay midwife. Dr. Jasper is our family doctor and has seen us through ear infections, impetigo and Megan's pneumonia--all without antibiotics or suppressive drug therapy. I feel very strongly that both doctors should be allowed to continue helping people like us who want <u>true</u> "traditional medicine."

Sincerely,

Sherry Arrick

Reference: Conversation Leading to Medicaid Paying for Spondylosis

To: Governor, Legislators, Congresspersons, and Others Concerned

Dear Governor Bill Sheffield:

Congratulations of your being our new Alaskan Governor!

I remember when you could not continue to campaign a term ago because your late wife was not well, and you so loyally stayed with her until her transition to "beyond." Each time I saw this episode on T-V, my emotional tears came forth, but today I simply pray she is in the arms of the Lord Jesus Christ.

I remember more recently your passing out campaign buttons, cards, and balloons at the Anchorage Bus Accomodation Center. A little grubby Alaskan native boy of about 3½ or 4 years of age, wanted a yellow inflated one, rolled his eyes toward his mother but she was also too bashful to venture forth to get one for him. I led the youngster forward to get one from you and as he twirled his finger in his mouth, you looked at him, knelt down, looked into his brown eyes and gave him his heart's desire.

Most recently, I remember sitting on a table on the edge of the T-V cameras in the Captain Cook ballroom, and after hours of political fellowship, you emerged victorious as our Governor Sheffield.

The first time I remember your paying for New Year's novelties for your parties, a few years ago or rather many years ago, and you were a busy busy man then.

I listened to your addressing the legislators and the Alaskans. The address was typically Sheffield, very well researched and to the point. My only comment is that at the beginning or at the end a Bob Hope sort of pun could have been effective, like "Old Alaskans never die, because they have to divi up their ends." Another one close to this is, "Strange Alaskans never die, they just divi up the closei ends of Old Alaska." Or the worst, "Divi, Divi, Divi up my end, before I get to heaven, because strange things are being done, in the Land of the Midnight Sun."

Going back to the time before the boy with the balloon incident, I buttonholed you with the concern regarding Medicaid helping us victimized with spinal problems, foot problems,etc., and you put a notation on a little note pad. You also mentioned that your brother went to a chiropractor for his spinal adjustments.

I hate to enclose all the following reports on my spondylosis, because it seems so hopeless, and it was until I saw a video educational program at Dr. Kenneth Ketz's office, and with adjustments, prescribed exercises, and care I could be 50% better in 2½ years. This was early last summer. Now, in mid-winter I am better, stronger and whatever it takes, I still care about others, and take care of myself. That is the purpose of this letter, so others, like unwed mothers who have help in raising their children on Medicaid, so too, we who have been victimized by injuries upon injuries through no fault of our own can have badly needed adjustments for our spine.

Believe it or not, due to extreme pain, I became a Born-Again Christian one year ago in April. I had rebelled during my teens toward formal ritualistic religion, and then returned after thirty-some years to the foot of the cross of the Lord Jesus Christ. Finding this new way has not been my cure-all for pain, but my spiritual world began, and a new charisma of living began also. I am going to send forth each day a prayer for your strenght, for your peace of mind, and for making the right decisions along the way through our Lord Jesus Christ.

Theologically and Teleologically yours,

deAnn Brezina

(Ms) deAnn Brezina

Copies of actual letters on file will be presented to those concerned.
1/27/83

Synopsis of Spondylosis (deAnn Brezina) for Medicaid payments

1. Was abused as child plus had malnutrition. Foster home at age 11.

2. Had severe rheumatic fever at age 12 with weakness in muscles of body.

3. Had a form of rheumatoid arithitis, and treated with gold-sodium-thiosulfate shots during late teens. Also removal of tonsils, appendix, and medication for infections, reoccuring infections, allergies, anemia.

4. Was an abused wife from an alcholic husband during the 50's. Had two children, divorced.

5. Was an abused wife again during the early 60's. One miscarriage. Divorced.

6. Remarried in 1965. Had one child in 1967.
In 1965 a chair was pulled out by a fisherman in Kodiak, and thus started a lifelong injury and pain. Had three changes of attornies because of their one heart attack, and the others died.

7. 1973-Back injury occured over marital argument of a package of cigarettes and I had not provoked argument. Divorce preparation and trial until conclusion in 1977, or 1978.

8. 1974-A double whiplash injury caused by Robert Rice, a then real estate salesman who was drinking during the day.

9. 1975-Dec. Accident caused by Gary Sloan, who was driving a vehicle whose trailor unsnapped, headed for my engine, threw me into a spin on the icy road, and injured my spinal vertebrae, head and neck. If Medicaid would have covered chiropractic adjustments I would have been on the road to recovery instead of in constant pain for years to come. Also, on two crutches for several years before being on one crutch.

10. From about 1969, was also under the psychiatrist's care, and was given pain pills from time to time. ASKED FOR FEDERAL DISABILITY DETERMINATION 2 APPEALS TO DATE. NO DISABILITY PAYMENTS FORTHCOMING AT THIS TIME

11. Also under care of Dr. wWickman from 1974 until 1981.

12 Changed to Dr. George Gates because there was no progress, no information, and more pain in my spine than I could bear.

13. Under Dr. Gates treatment, I discovered that the word SPONDYLOSIS was my cause of pain. Dr. Aaron Wolf then told me it was a DEGENERATIVE DISK DISEASE, and Dr. wWickman should have shared this information with me.

14. I did as much research as possible, and decided that I had to get help-NOW!

15. On Medicaid forms I was refused the neck and lower back traction units that Dr. Gates prescribed. Also, orthpedic shoes. DENIED. Clinirol (spelling ?) medication made me gain weight with extra milk or protein prescribed with it. DR. WOLF REFUSED PRESCRIPTIONS FOR ANY MORE PAIN PILL

16. I then went to Dr. Scott V. Linder, M. D., explained my problems to him, and enclosed is the recommended letter. However, Medicaid payments are not forthcoming for my chiropractic adjustments.

17. Have been to Dr. Kenneth Ketz's Chiropractic Clinic since last summer and have found more relief than before. Can become better by 50% in 2½ years with adjustments, excercises and sleeping on rolled towels.

18. Asking your help, Legislators, and others concerned, to allow chiropractors and podiatrists (also I have bunions) to be paid under Medicaid. MY DISABILITY PAYMENTS HAVE NOT BEEN FORTHCOMING.

Hello Representative Tischer -

My family and I attented the Arch. tele conference on HB 347. We appreciated your sense of concern, humor and truth. We are in strong support of the bill and are extremely concerned about the passage. I've written every Representative and Senator and would like to understand what else can be done - a letter to Editor of local papers? What can be done to influence Senator Don Bennett (if he is the one who is holding the strong opposition position?) to accept HB 347. I honestly believe that we should have the constitutional right to choose the treatment we want and Naturopaths should have the Right to provide that treatment. By licensing the field of Naturopathy you protect everyone involved both provider & providee. Other states have originated appropriate forms of accrediting Naturopaths - these people are highly trained in a very different discipline than A.M.A. based medical care, no less better because of their preventive approach. The A.M.A. types provide background well versed in surgery and pharmaceuticals.

an example I read somewhere compared A.M.A types as having less than 1% of their total schooling devoted to nutrition. Whereas Naturopaths devote 30% of their total training believe in building the bodys systems up via vitamins, diet, exercise and herbal or natural extracts. these approaches are so very different, they are opposite sides of the same coin. The people who favor the Natural approach arent necessarily opposed to using both kinds of care as the situation dictates. In fact, the Amer. Naturopaths frequently refer people to local M.d.s for treatment there seems to be an openess on their part to cooperate but not on the A.M.A. society's part. What can be done to set up the necessary board to appease the A.M.A. Society? You know I could tell you were interested in natural childbirth. I would like to share my experience with you. My daughter, Yarrow Raven, was born at Dr. Hansens birthing Center in the providence Professional bldg. He was not there at all, but his licensed nurse midwife, Verona Gentry, was in charge along with

nurse practioner Owen Wolverton. they had a relaxed home type setting, complete with rocking chairs and Kitchen, bathtub ect. this was my first birth and I had wanted to do it at home, but not knowing what it would be like, I opted for the "safety" of being very close to the hospital. as it went, I birthed with a labour of 6 hrs. and needed no intervention, ie, medication to stop pain, routine cutting of vaginal opening to prevent tears (episiotomys), pitocin to help speed labour and expel placenta. We prepared ourselves for this birth with exercise, reading everything we could get our hands on, and talking to midwifes. an organization called B.A.B.E (Better Alcestan birth experiences) has very good information on what local OB-Gyn's will and will not do for patients. they sent out a 30-40 question-ere and got very negative responses. these OB's are so in demand, that they don't have to do anything your way. An example is that I thought that I wouldn't want to lie down and be cut open, but would rather squat down and be rubbed with Vitamin E oil to help stretch the vaginal tissue naturally and in rythum with my body.

Most OBs just weren't interested in this type of non-interventional approach. They want to "do" the birthing procedure and take it away from the mother. Our Midwife Verna, asked David how involved he wanted to be in the birthing and he said, "as much as I can" So she gowned and gloved him and he caught the baby and she suctioned out mucus. Then we did not cut cord until it stopped pulsing, thereby allowing baby maximum storage of blood & nutrients & oxygen before cutting cord. David did that also, and put baby dry on baby. We were, in this setting, given choices and control within safety of situation.

Abel - It's a law that a pediatrician must sign baby out of birthing center, and our choice was the Children's Clinic. They have five Doctors and they rotate, so we did not get the Dr. we had liked. This particular Dr. (Dr. Roberts) was anti-midwife birthing even under the auspices of a highly trained OB like Dr. Hanson. Dr. R. read us the riot act, wanted me in Providence Hosp

immediately and just totally ignored our wishes in the situation and laid his hostility on a otherwise, fantastic experience. I was so in love with my baby, husband, both attendents, that I could not relate to this ugly, ugly scene. Dr. Roberts, in punishment, made me come into the office on a Sunday (this day off) and be checked there even though he knew that both Gwen & Verona would be coming to check me via home visit Sunday morn & eve. They also called to check and know I had 2 L.P.N. friends at home with me. When Yarrow developed jaundice, which is common, Dr. Roberts wanted her in hospital immediately and no nursing. He would not give orders for me to feed baby so nurses didn't want me bothering them. I was crushed - how could this man do this to an innocent couple. Well, I have since learned that (and this is really the whole point of this story) Dr. Bauer has done extensive research into biliruben jaundice in newborns and he says that my treatment was totally in error and that Dr. Roberts acted extremely conservatively - to the point

of denying me that bonding time with my newborn. Now- just look at the difference of attitude and treatment within the field of pediatrics in Anchorage!! During Teleconference, the endocrinologist Dr Bronner, SP? was very biased, showing a double standard, between Naturopath "misdiagnosing and physician misdiagnosing. How do we know the patients in question had waited so long after Nat. treatment before seeing Dr. Bronner, that it might not, infact, be a whole new situation/problem? Certainly the Doctors I have seen in Anch. have tremendous differences in opinion of treatment: One or more than one did one treatment on me and another totally something else- and wops head over first M.D.'s course of action. So really, md.'s should not cast stones on Naturo paths misdiagnosing when they are so unclear themselves. Please let me know how I can help the 349 pass.

thank for your time.

Blessings Kathleen Winters

DRAFT

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 347 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) regulation of naturopathy or naturopathic medicine under AS 08.45.

* Sec. 2. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS.

ARTICLE 1. REGULATION OF NATUROPATHY.

Sec. 08.45.010. DUTIES AND POWERS. The department shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter;

(3) license naturopaths and renew licenses in accordance with AS 08.45.100 - 08.45.170; and

(4) provide for temporary permits to engage in the practice of naturopathic medicine for persons who are apparently qualified that are valid until certification of the results of the next examination given under AS 08.45.120.

ARTICLE 2. LICENSING OF NATUROPATHS.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage in the practice of naturopathy or naturopathic medicine unless that

person has a valid license or temporary permit under this chapter.

Sec. 08.45.110. LICENSURE AS A NATUROPATH. To be eligible for a license as a naturopath, an applicant shall

(1) hold a high school diploma or the equivalent;

(2) have completed two years of postsecondary education at an accredited college of liberal arts or sciences;

(3) have graduated from a legally chartered school or college of naturopathic medicine that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of instruction totaling 4,000 hours or more; the course of instruction shall include:

[1500 hours of clinical experience to be included in the 4000 hours]

(A) anatomy, physiology, histology, and embryology;

(B) microbiology;

(C) pathology;

(D) immunology;

(E) public health;

(F) physical, clinical, and x-ray diagnosis;

(G) first aid and emergency medicine;

(H) obstetrics and gynecology;

(I) orthopedics;

(J) minor surgery and proctology;

(K) otolaryngology;

(L) physiotherapy and manipulative techniques;

(M) dietetics and clinical nutrition;

(N) botanical medicine;

(O) naturopathic theory, therapeutics and clinical practice;

(P) jurisprudence;

(4) successfully complete an examination given by the department;

(5) not have a license to practice naturopathic medicine in another state, province, or territory, that is suspended or revoked for disciplinary reasons;

(6) be a United States citizen or lawfully admitted to permanent residence in this country; and

(7) be of good moral character.

Sec. 08.45.120. EXAMINATION. (a) An examination for licensing as a naturopath shall be held at a time and place and shall be conducted as determined by the department. The examination shall be limited to the subjects listed in AS 08.45.110(3), each of which shall constitute a separate examination section. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the department may require.

(b) To pass the examination an applicant shall receive an overall average of 75 percent and may not receive less than 70 percent in more than two sections.

Sec. 08.45.130. ENDORSEMENT. The department may license a person as a naturopath if the person is currently licensed as a naturopath in another state or in a province of Canada and

(1) that state or province maintains professional licensing standards equivalent or higher than those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license in this state; and

(3) the person demonstrates to the satisfaction of the department qualifications at least equal to those required of persons licensed under this chapter.

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The department may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) habitually overuses alcoholic beverages;

(4) unlawfully uses a controlled substance as defined in AS 11.81.900(b)(6);

(5) impersonates another physician;

(6) practices under an assumed name; or

(7) is convicted of a crime involving moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

Sec. 08.45.150. FEES. The following fees are imposed under this chapter:

(1) application for examination	$ 50
(2) application for reexamination	10
(3) license issuance or biennial renewal	200
(4) issuance of temporary permit	50

Sec. 08.45.160. SCOPE OF NATUROPATHIC PRACTICE. (a) A naturopath in the course of the practice of naturopathic medicine may

(1) perform physical examinations, write prescriptions for substances authorized in this chapter, and sign birth and death certificates;

(2) use systems of diagnosis for which the naturopathic physician has been trained under AS 08.45.110(3);

(3) treat patients by physiological, nutritional,

psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies, including acupuncture, that are effective in stimulating normal function of tissues and organs sensitized by disease;

(4) draw blood for laboratory purposes, and use electrical or other methods for the repair and care of superficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in superficial structures; and

(5) practice natural childbirth in obstetrics, including related minor surgical procedures.

(b) A naturopath may not

(1) perform surgery except as provided under (a)(5) of this section;

(2) use controlled substances as defined in AS 11.81.-900(b)(6);

(3) use radiation therapy; or

(4) use drugs except antiseptics, local anesthetics, minerals and extracts, compounds or concentrates obtained from plants or animals.

Sec. 08.45.170. CONTINUING EDUCATION. (a) The department may prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the department evidence of completion of continuing education requirements.

(c) The department may exempt a licensee from the continuing education requirement under (b) of this section upon an application of the licensee setting out extenuating circumstances. A licensee may not receive more than one exemption under this subsection in a five-

year period.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. TITLES AND ABBREVIATIONS. (a) A person licensed under this chapter may use the following titles: "Naturopath", "Doctor of Naturopathy" or its abbreviation, "N.D.". A person licensed under this chapter may not use a title in a manner that suggests that the person practices a form of medicine or a healing art other than naturopathy.

(b) A person may not use a title or abbreviation listed in (a) of this section unless the person is licensed under this chapter.

Sec. 08.45.205. VIOLATIONS. (a) A person is guilty of a class B misdemeanor if the person

(1) fraudulently obtains or furnishes a temporary permit, license, renewal, or record required by this chapter;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter.

(b) A person who practices naturopathy or naturopathic medicine without a valid temporary permit or license issued under this chapter is guilty of a class A misdemeanor.

Sec. 08.45.220. DEFINITIONS. In this chapter

(1) "department" means the Department of Commerce and Economic Development;

(2) "naturopathy" and "naturopathic medicine" means a system of healing the human body that includes diagnosis and treatment through the use of natural agencies, forces, processes, and products with emphasis on the response of the individual to the disease rather than its treatment in isolation.

* Sec. 3. AS 08.01.010(24) is repealed and reenacted to read:

(24) Naturopathic Medicine Board (AS 08.45.020)

* Sec. 4. AS 08.03.010(c) is amended by adding a new paragraph to read:

(21) Naturopathic Medicine Board (AS 08.45.020) -- June 30, 1990.

* Sec. 5. AS 08.45 is amended by adding new sections to read:

Sec. 08.45.020. CREATION AND MEMBERSHIP OF THE BOARD. There is established the Naturopathic Medicine Board consisting of

(1) two naturopaths licensed under this chapter;

(2) two doctors licensed under AS 08.64; and

(3) one public member.

Sec. 08.45.030. TERM OF OFFICE. Members of the board serve staggered terms of three years. A member may be appointed to serve no more than two consecutive full terms.

Sec. 08.45.040. POWERS AND DUTIES. (a) The board shall

(1) evaluate the qualifications of applicants for licenses under this chapter;

(2) conduct hearings and keep records necessary to carry out the purposes of this chapter;

(3) direct the department to license naturopaths and renew licenses in accordance with AS 08.45.100 - 08.45.170; and

(4) provide for temporary permits to engage in the practice of naturopathic medicine for persons who are apparently qualified that are valid until certification of the results of the next examination given under AS 08.45.120.

(b) The board may adopt regulations to carry out the provisions of this chapter.

* Sec. 6. AS 08.45.120(a) is amended to read:

(a) An examination for licensing as a naturopath shall be held at a time and place and shall be conducted as determined by the board [DEPARTMENT]. The examination shall be limited to the subjects listed

in AS 08.45.110(3), each of which shall constitute a separate examination section. The examination shall be objective and in writing, but may be supplemented by oral examinations, and by demonstrations or other practical tests as the board [DEPARTMENT] may require.

* Sec. 7. AS 08.45.130 is amended to read:

Sec. 08.45.130. ENDORSEMENT. The board [DEPARTMENT] may provide for the licensure of [LICENSE] a person as a naturopath if the person is currently licensed as a naturopath in another state or in a province of Canada and

(1) that state or province maintains professional licensing standards equivalent or higher than those in this chapter;

(2) that state or province extends the same licensing privilege to those holding a license in this state; and

(3) the person demonstrates to the satisfaction of the board [DEPARTMENT] qualifications at least equal to those required of persons licensed under this chapter.

* Sec. 8. AS 08.45.140 is amended to read:

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The board [DEPARTMENT] may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter;

(3) habitually overuses alcoholic beverages;

(4) unlawfully uses a controlled substance as defined in AS 11.81.900(b)(6);

(5) impersonates another physician;

(6) practices under an assumed name; or

(7) is convicted of a crime involving moral turpitude, including murder, sexual assault, robbery, kidnapping, incest, arson, burglary, theft, and forgery.

* Sec. 9. AS 08.45.140 is amended by adding a new subsection to read:

(b) The board shall notify the department of any action taken under (a) of this section.

* Sec. 10. AS 08.45.170 is amended to read:

Sec. 08.45.170. CONTINUING EDUCATION. (a) The board [DEPARTMENT] may prescribe by regulation continuing education requirements for persons licensed under this chapter.

(b) Before a license issued under this chapter may be renewed, the licensee shall submit to the board [DEPARTMENT] evidence of completion of continuing education requirements.

(c) The board [DEPARTMENT] may exempt a licensee from the continuing education requirement under (b) of this section upon an application of the licensee setting out extenuating circumstances. A licensee may not receive more than one exemption under this subsection in a five-year period.

* Sec. 11. AS 08.45.220 is amended by adding a new paragraph to read:

(3) "board" means the Naturopathic Medicine Board.

* Sec. 12. AS 44.62.330(a) is amended by adding a new paragraph to read:

(53) Naturopathic Medicine Board (AS 08.45.020).

* Sec. 13. AS 08.45.010 is repealed.

* Sec. 14. LICENSING OF PRACTITIONERS OF NATUROPATHY OR NATUROPATHIC MEDICINE WITHOUT EXAMINATION. The commissioner of commerce and economic development shall license all persons who, on the effective date of sec. 2 of this Act, meet the qualifications of AS 08.45.110(1) - (3) and (5) - (7) and who apply for licensure under AS 08.45 not later than June 30, 1985.

* Sec. 15. Notwithstanding AS 08.45.030 as enacted in sec. 5 of this Act, the first members of the Naturopathic Medicine Board shall be appointed for the following terms: one member shall serve a one-year term; two members shall serve two-year terms; and two members shall serve three-year terms.

* Sec. 16. Sections 1, 2, and 14 of this Act take effect July 1, 1984.

* Sec. 17. Sections 3 - 13 and 15 of this Act take effect July 1, 1986.

I WOULD LIKE TO EXPRESS MY SUPPORT FOR H.B. 347 INTRODUCED BY REPRESENTATIVES ABOOD, MARTIN AND TISCHER. IT IS AN IMPORTANT PIECE OF LEGISLATION WHICH CAN DIRECTLY AFFECT THE HEALTH AND WELL-BEING OF MANY PEOPLE THROUGHOUT ALASKA. I URGE PASSAGE OF THIS BILL FOR THE FOLLOWING REASONS:

1. ALONG WITH MANY OTHERS, I AM VERY DISSATISFIED WITH THE MEDICAL COMMUNITY. STANDARD MEDICAL TREATMENT IS CHARACTERIZED BY AN INSENSITIVITY TO THE PATIENT'S HUMANITY AND REAL NEEDS, AN ORIENTATION TOWARDS DRUGS AND SURGERY AND THE TREATMENT OF SYMPTOMS RATHER THAN THE CURE OF THE UNDERLYING CONDITIONS, AND A GENERAL ELITIST ATTITUDE TOWARDS HEALTH CARE. NATUROPATHS, HOWEVER, ATTEMPT TO UNDERSTAND THE LIVES OF THEIR PATIENTS SO THEY MIGHT CURE THEM IN THE GENTLEST, MOST NON-INVASIVE MANNER POSSIBLE AND TO THEN TEACH THEM HOW TO REMAIN HEALTHY.

2. THERE IS GROWING EVIDENCE THAT MANY METHODS AND TREATMENTS USED BY M.D.'S HAVE NEVER BEEN HONESTLY EFFECTIVE AND THAT THERE IS A GROWING, AND ALREADY HIGH, RATE OF CONDITIONS CAUSED BY INAPPROPRIATE OR IMPROPERLY HANDLED TREATMENTS. AT THE SAME TIME THERE IS GROWING EVIDENCE OF THE EFFICACY AND SUPERIORITY OF NATUROPATHY IN MANY ILLNESSES AND CONDITIONS.

3. IT IS THE RIGHT AND DUTY OF ALL PEOPLE TO CHOOSE THE BEST POSSIBLE HEALTH CARE FOR THEMSELVES AND THEIR FAMILIES. IF NATUROPATHS ARE NOT ALLOWED TO PRACTICE IN ALASKA, MANY PEOPLE WILL BE DENIED THIS OPPORTUNITY.

4. THE PUBLIC ALONG WITH CHIROPRACTERS AND MANY OTHER ALTERNATIVE HEALTH CARE PRACTITIONERS WANT NATUROPATHY MADE LEGAL. ONLY M.D.'S, NATUROPATHS DIRECT COMPETITORS, OPPOSE THIS. PLEASE HELP PASS H.B. 347.

SINCERELY
David A. Crewdson

Dear Rep. Tischer and Committee Members of HESS,

I attended the teleconference hearing on The House Bill 347, Jan. 21, 1984. in Anchorage. I did not chose to testify at that time. Instead I am writing now in behalf of my family, friends and myself. I also wish to thank Rep. Tischer for her open ear and her concerned, relevant questions. My family and I wish this to be our written testimony to support House Bill 347.

My entire family for nearly 3 years has used the services of a Naturopath; Dr. Pitty John. We have been more than satisfied - I think the appropriate word would be healed. My mothers healing of Uterine cancer, My Grandmother's healing of breast cancer. I shudder to think of the horrors these two women may now have been experiancing had there been no alternative route to the radical surgery; radiation and Chemotherpy treatments. The side affects which many of us are painfully aware of.

There have been many other cases of persons in our family being healed of illnesses and disorders through the means of Naturopathy. I guess the main point to Naturopathy has opened a door for all of us to experiance that we have the power to be healthy,

happy human beings.

That the Attorney General can so easily deny us of these services is a direct depriyation of our God-given and constitutional rights. Any tampering with or 'watering down' of House Bill 347 is also a denial of our rights. And the fact that a bill licensing Natropaths has not been given proper and adequate consideration in the past and is still being further delayed is an insult and affront to our rights, causing one to wonder as to the true nature of the citizens representation in our Goverment. We ask the legislature to please listen to the public, the consumer in this matter and, not the fear promoting Medical community.

Thank you,

OREGON LAW
Relating to Naturopathic Medicine

The practice of naturopathic medicine was first recognized in Oregon law in 1927 and by the United States Congress in 1931.

Oregon Revised Statutes, Chapter 685 (revised 1977), 685.101—685.990, provides the licensing authority for Naturopathic Physicians in the state of Oregon:

Chapter 685

Naturopaths

GENERAL PROVISIONS

685.010 Definitions
685.020 Licensee required to practice naturopathy; title and abbreviations usable by licentiates
685.030 Application of chapter
685.040 Application of health laws
685.050 Execution of birth and death certificates

LICENSING

685.060 Minimum educational requirements for license
685.070 Aplication for examination; license fee
685.080 Examination of applicants; issuing license
685.085 Reciprocal license
685.090 Recording license with county clerk
685.100 Annual renewal of license
685.102 Continuing education course required; exemptions
685.104 Effect of failure to comply with ORS 685.102; reissuance of registration
685.106 Approval of continuing education programs
685.110 Denial or revocation of license by board
685.125 License denial or revocation procedure; promulgation and review of rules and orders.

STATE BOARD

685.160 Naturopathic Board of Examiners; appointment; confirmation
685.170 Officers of board
685.190 Compensation and expenses of board members; compensation of secretary
685.201 Disposition of receipts

ENFORCEMENT

685.210 Enforcement; employing attorney; jurisdiction

PENALTIES

685.990 Penalties

Note: Section 41, chapter 842, Oregon Laws 1977, is operative July 1, 1986, and provides:

Sec. 41. ORS 685.010, 685.020, 685,030, 685.040, 685,050, 685.060, 685.070, 685.080, 685.085, 685.090, 685.100, 685.102, 685.104, 685.106, 685.110, 685.125, 685.160, 685.170, 685.190, 685.201, 685.210 and 685.990 relating to naturopaths are repealed.

GENERAL PROVISIONS

685.010 Definitions. As used in this chapter.

(1) "Board"means the Naturopathic Board of Examiners.

(2) "Drugs" means all medicines and preparations and all substances, except non-poisonous plant substances, food and water, used or intended to be used for the diagnosis, cure, treatment, mitigation or prevention of diseases or abnormalities of man, which are recognized in the latest editions of the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia, official National Formulary, or any supplement to any of them, or otherwise established as drugs.

(3) "Minor surgery" means the use of electrical or other methods for the surgical repair and care incident thereto of supperficial lacerations and abrasions, benign superficial lesions, and the removal of foreign bodies located in the superficial structures; and the use of antiseptics and local anesthetics in connection therewith.

(4) "Naturopathy," which includes physiotherapy and minor surgery, is defined as a system of treating the human body by use of drugless methods, which has for its object the maintaining of the body in, or of restoring it to, a state of normal health.
[Amended by 1953 c.557 §4]

685.020 License required to practice naturopathy; title and abbreviations usable by licentiates. (1) No person shall practice, attempt to practice, or claim to practice naturopathy in this state without first complying with the provisions of this chapter.

(2) Licentiates under this chapter may use any or all of the following terms: "Doctor of Naturopathy" or its abbreviation, "N.D.," "Naturopath" or "Naturopathic Physician." However, none of these terms, or any combination of them, shall be so used as to convey the idea that the physician who uses them practices anything other than drugless therapy.

685.030 Application of chapter. Nothing in this chapter shall be construed to:

(1) Apply to any physician and surgeon, osteopath or chiropractor, or to any Christian Scientist or other person who by religious or

spiritual means endeavors to prevent or cure disease or suffering in accord with the tenets of any church.

(2) Authorize licentiates to practice optometry or administer chiropractic adjustments, or any system or method of treatment not authorized in this chapter, or to administer or write prescriptions for or dispense drugs, or do major surgery.

(3) Prevent one licensed under this chapter from the administration of the anesthetics or antiseptics authorized in subsection (3) of ORS 685.010 or the use of radiopaque substances administered by mouth or rectum necessary for Roentgen diagnostic purposes.

(4) Authorize the administration of any substance by the penetration of the skin or mucous membrane of the human body for a therapeutic purpose.

[Amended by 1953 c.557 §4]

685.040 Application of health laws. Licentiates under this chapter shall observe and are subject to all state, county and municipal laws and regulations relating to public health.

685.050 Execution of birth and death certificates. Licentiates under this chapter are authorized to sign birth and death certificates. Such certificates so signed shall be accepted as fulfilling all the requirements of the laws dealing with such certificates.

LICENSING

685.060 Minimum educational requirements for license. (1) The minimum educational requirements for license under the provisions of this chapter shall be:

(a) A high school education, as shown by diploma or certificate of graduation from a standard high school, or the equivalent of such an education, which shall be certified by a Superintendent of Public Instruction; and

(b) At least two years' satisfactory liberal arts and sciences study, or either, in a college or university accredited by either the Northwest Association of Secondary and Higher Schools or a like regional association or in a college or university in Oregon approved for granting degrees by the Oregon State Board of Education as evidenced by certificate or transcript of credits from the college or university; and

(c) Graduation from a naturopathic school or college approved by the State Board of Naturopathic Examiners and which requires for graduation a period of actual attendance of four years of at least nine months each, and teaching adequate courses in all subjects necessary to the practice of naturopathy.

(2) The studies required of the applicant for a license to practice naturopathy in this state shall include anatomy, histology, embryology, physiology, chemistry, pathology, bacteriology, public health and hygiene, toxicology, obstetrics and gynecology, diagnosis, theory, practice and philosophy of naturopathy, electrotherapy, hydrotherapy, physiotherapy, clinics, eye-ear-nose-throat, minor surgery, first aid, herbology, proctology, dietetics, jurisprudence, and such other naturopathic subjects as the board may require, except materia medica, pharmacology and major surgery, with a total of not less than 4,000 lecture or recitation hours.

[Amended by 1953 c.557 §4, 1969 c.381 §5]

685.070 Application for examination; license fee. Any person who wishes to practice naturopathy in this state shall make application to the board for an examination for a license to practice naturopathy. The application shall be filed with the board not less than 10 days before the date of the examination upon blanks provided by the board. All persons licensed under this chapter shall pay to the board a license fee of $25, $10 of which must accompany the application for examination. The balance shall be paid when the applicant has been granted a license. Under no condition will the application fee of $10 be returned to the applicant. Affidavits of two reputable citizens of the state attesting the good moral character of the applicant shall be filed with the application for examination.

685.080 Examination of applicants; issuing license. (1) For the purpose of determining the qualifications of applicants for license under this

chapter, the board shall hold meetings and conduct examinations of applicants for licenses at such time and places and under such rules and regulations as a majority of the board may determine. The time and place of holding such an examination shall be published at least 30 days prior to the date of the examination.

(2) At the time and place the board has previously designated, the applicant shall appear before the board to be examined as to his fitness to practice naturopathy. The examination shall be in writing and embrace and be restricted to the subjects listed in ORS 685.060.

(3) If the applicant answers correctly 75 percent of the questions asked on each of the subjects of the examination, the board shall issue to such applicant a license to practice naturopathy. If however, an applicant fails to pass an examination, the applicant shall, without losing credits for subjects passed and without paying another fee, be permitted, within one year from date of failure to pass, to take another examination at the convenience of the board, but the applicant shall, not less than 10 days before the date of the examination, notify the board of his intention to take the examination.

685.085 Reciprocal license. A person licensed to practice naturopathy under the laws of another state who demonstrates to the satisfaction of the board that he possesses qualifications at least equal to those required of persons eligible for licensing under this chapter, may be issued a license to practice in this state without written examination upon payment of the license fee required under ORS 685.100.
[1973 c.469 §2]

685.090 Recording license with county clerk. Before engaging in practice in any part of the state, the holder of a license under this chapter shall present such a license, or a certified copy, for record to the county clerk of the county in which the holder of the license resides. A county clerk is entitled to collect a fee of $ for recording the license or for making a certified copy of it. Annually, on January 1, county clerks shall, when requested by the board, furnish the board with a list of such licenses on record in their respective counties.

685.100 Annual renewal of license. (1) On or before January 1 of each year, every person holding a license under this chapter shall apply to the board for a certificate of annual registration and at the time of applying shall pay to the board an annual registration fee not to exceed $75, as determined by the board and approved by the Executive Department. A person holding a license under this chapter who is at least 70 years of age and retired from the practice of naturopathy shall apply to the board for a certificate of annual registration and at the time of applying shall pay to the board an annual registration fee not to exceed $30, as determined by the board and approved by the Executive Department. The application shall be made upon a blank form furnished by the board, and shall contain such information as may be necessary to enable the board to identify the applicant for registration and the licensee to be what he claims to be in the application.

(2) Upon receipt of an application for annual registration, accompanied by the annual registration fee, the board shall issue to the applicant a certificate of annual registration. The certificate shall, at all times, be displayed in the office of the person to whom it was issued unless the person is retired from the practice of naturopathy and does not maintain an office.

(3) The failure, neglect or refusal of any person holding a license under this chapter, to pay the annual registration fee as required by subsection (1) of this section shall, after 30 days from January 1 of each year, automatically revoke his license. A revoked license shall not be restored except upon written application therefor and the payment of a restoration fee of $25 for each year the license remains revoked, which is in addition to the annual registration fee for each year the registration fee remains unpaid. An applicant for the restoration of a license so revoked shall not be required to submit to any examination as to his qualification to practice under this chapter. However, the board may deny the restoration of any license for which the required registration fees have not been paid during the years for which they are due if it finds that grounds for refusal to grant or for revocation of the license exist under ORS 685.110.

(4) On or before December 1 of each year the secretary of the board shall notify each person holding a license under this chapter that the annual registration application and fee are due on or before January 1 following.

[Amended by 1967 c.44 §2; 1969 c.26 §2; 1969 c.381 §6; 1973 c.182 §5]

685.102 Continuing education course required; exemptions. (1) Except as provided in subsection (2) of this section, each person holding a license under this chapter shall submit at the time he submits the annual registration fee, evidence satisfactory to the board of his successful completion of an approved program of continuing education in naturopathy, completed in the calendar year preceding the date on which the evidence is submitted.

(2) The board may exempt any person holding a license under this chapter from the requirements of subsection (1) of this section upon an application by him showing evidence satisfactory to the board that he is unable to comply with the requirements because of physical or mental condition or because of other unusual or extenuating circumstances. However, no person shall be exempted from the requirements of subsection (1) of this section more than once in any five-year period.

(3) Notwithstanding subsection (2) of this section, a person holding a license under this chapter may be exempted from the requirements of subsection (1) of this section upon an application by him showing evidence satisfactory to the board that he is or will be in the next calendar year at least 70 years of age and is retired or will retire in the next calendar year from the practice of naturopathy.

(4) A person who is exempted from the requirements of subsection (1) of this section shall not practice naturopathy. A violation of this subsection is grounds for suspension or revocation of the license of the person granted the exemption by the board.

[1969 c.381 §2; 1973 c.829 §67]

685.104 Effect of failure to comply with ORS 685.102; reissuance of registration. (1) The board shall refuse to issue the certificate of annual registration to any person holding a license under this chapter who fails to submit with his annual registration fee proof required under ORS 685.102, unless it has exempted the person from the requirements of subsection (1) of ORS 685.102. The board shall return the annual registration fee to the person.

(2) After January 1 of any year, the board may issue a certificate of annual registration to any holder of a license under this chapter who had been refused such certificate under subsection (1) of this section upon submission of the evidence required under subsection fees for each year the registration fee remains unpaid and a restoration fee of $25 for each year the license remains revoked.

(3) If the person completes an approved program after January 1 to meet the requirementof ORS 685.102 for the year beginning January 1, such completion does not meet the requirements of ORS 685.102 for the subsequent year.

[1969 c.381 §3; 1973 c.182 §6]

685.106 Approval of continuing education programs. (1) The board may offer a program of continuing education in naturopathy to meet the requirements of ORS 685.102. The board may also approve a program to be presented by persons reasonably qualified to do so.

(2) Any person seeking approval of a program of continuing education in naturopathy, to be offered to assist persons holding licenses under this chapter to comply with the requirements of subsection (1) of ORS 685.102, shall submit to the board, at such time as the board may require, copies of courses of study to be offered and proof of such other qualifications as the board may require. Approval granted to any program of continuing education shall be reviewed periodically and approval may be withdrawn from any program that fails to meet the requirements of the board.

(3) Any program of continuing education in naturopathy offered or approved under this section shall consist of at least 20 hours of study covering new, review, experimental, research and specialty subjects in the field of naturopathy.

[1969 c.381 §4]

685.110 Denial or revocation of license by board. The board may refuse to grant or may suspend or revoke a license to practice naturopathy in this state for any of the following reasons:

(1) The use of fraud or deception in securing a license.

(2) The impersonation of another physician.

(3) Practicing naturopathy under an assumed name.

(4) The procuring, aiding or abetting in procuring an abortion; provided, that for the purpose of this subsection an abortion means the removal from the womb of a woman the product of conception at any time prior to delivery of the child; provided further, that nothing in this chapter shall be construed to authorize any licentiate under this chapter to perform an abortion.

(5) The conviction of a crime involving moral turpitude.

(6) Any other reason that renders the applicant or licentiate unfit to perform the duties of a naturopathic physician.

[Amended by 1953 c.555 §2, 1971 c.734 §132]

685.120 [Repealed by 1971 c.734 §21]

685.125 License denial or revocation procedure; promulgation and review of rules and orders. (1) Where the board proposes to refuse to issue or renew a license, or proposes to revoke or suspend a license, opportunity for hearing shall be accorded as provided in ORS 183.310 to 183.500.

(2) Promulgation of rules, conduct of hearings, issuance of orders and judicial review of rules and orders shall be as provided in ORS 183.310 to 183.500.

[1971 c.734 §134]

STATE BOARD

685.160 Naturopathic Board of Examiners; appointment; confirmation. (1) There hereby is created the Naturopathic Board of Examiners in the Health Division. The board shall consist of three members appointed by the Governor for terms of three years commencing July 1, and until their successors are appointed and qualified. A majority of the members of the board constitutes a quorum. The Governor shall fill all vacancies in the membership of the board. All appointments of members of the board by the Governor are subject to confirmation by the Senate in the manner provided in ORS 171.560 and 171.570. No person shall be appointed to membership on the board, who is not a citizen of the State of Oregon, or who has not been in continuous practice of naturopathy in this state for five years immediately prior to the date of appointment, or who is interested financially in any medical or drugless school or college, or who is connected, directly or indirectly, with the dispensing, prescribing or sale of pharmaceutic drugs.

(2) The board shall carry into effect the provisions of this chapter and is authorized to issue licenses to practice naturopathy in this state. The possession of a common seal by the board hereby is authorized.

[Amended by 1971 c.650 §34, 1973 c.792 §40]

685.170 Officers of board. Annually the board shall elect one of its members president and one of its members secretary, who severally shall have power during their terms of office to summon witnesses, administer oaths and to take testimony and affidavits, certifying thereto, under their hand and the seal of the board. The secretary of the board shall keep a record of all actions of the board, including a detailed register of applicants for license. The board in lieu of electing one of its members as secretary, may employ or appoint a person to act as secretary to the board who shall perform such duties and functions as may be prescribed by the board.

[Amended by 1973 c.829 §68]

685.180 [Repealed by 1973 c.829 §71]

685.190 Compensation and expenses of board members; compensation of secretary. (1) A member is entitled to compensation and expenses as provided in ORS 292.495.

(2) The board may fix the compensation of the secretary subject to ORS 240.245. Such compensation shall not prohibit the secretary from receiving reimbursement for actual and necessary travel and other expenses incurred in the performance of his official duties.

[Amended by 1967 c.44 §3, 1969 c.314 §86]

685.200 [Amended by 1967 c.637 §32, repealed by 1973 c.427 §28 (685.201 enacted in lieu of 685.200)]

685.201 Disposition of receipts. All moneys received by the Health Division under this chapter shall be paid into the General Fund in the State Treasury and placed to the credit of the Health Division Account and such moneys hereby are appropriated continuously and shall be used only for the administration and enforcement of this chapter.

[1973 c.427 §25 (enacted in lieu of 685.200)]

ENFORCEMENT

685.210 Enforcement; employing attorney; jurisdiction. (1) The district attorneys of the state shall prosecute all persons charged with violation of any of the provisions of this chapter. However, the board shall have power to retain its own attorney to prosecute or assist in prosecuting any person so charged and to pay such attorney such sums as may be just for such services from the Naturopathic Fund.

(2) Justice courts, municipal courts and circuit courts have concurrent jurisdiction for the prosecution of offenses under this chapter.

PENALTIES

685.990 Penalties. Violation of any provision of this chapter is punishable, upon conviction, by a fine of not less than $50 nor more than $500.

December 28,1983

Dear Legislator:

As a long term Alaska resident and a third year student at Naturopathic Medical School I wish to encourage you to support Hb 347 in any way possible to facilitate its prompt passage.

Naturopathy is a distinct branch of medical practice in which doctors learn all current medical theory and technique and vary only in the emphasis and interpretation of the causes of susceptibility to disease and the best methods of treating it. A primary emphasis is placed on maintaining health and proper immunocompetency rather than waiting until drastic measures are required.

The bill as written provides for the right of Naturopaths to practice fully within the scope of our training, which is essential if the patient is to be guaranteed their right tochoose their mode of health care. One shortcoming of the bill as written is that injection of vitamins and other natural substances is not listed under the scope of practice. Such injections are extremely useful in a naturopathic practice.

In closing I would like to say that I fully support the passage of this bill and hope that you will as well. I further hope that you will not permit the bill to be watered down or restricted due to pressure from groups who would hope to limit the freedom of choice in medical care for Alaskan residents.

Thank you for your time and attention to this matter.

Sincerely

Paul Reilly

Re: Your letter January 30th
HB 347

Dear Niilo:

Thank you for informing me on the above bill relating to licensure of Naturopathic Physicians. I am presently licensed in the states of Oregon, Washington and Utah as a Naturopathic Physician and in the states of Oregon and Washington a Naturopathic Physician is licensed to practice Obstetrics and Minor Surgery.

To answer your questions:

1. The patients of a physician of an unlicensed Healing Art would not be reimbursed for medical services that they have paid and consequently they would suffer a hardship. The unlicensed doctor would also have more difficulty seeking financing to build or enlarge a clinic for the practice of Naturopathic medicine and his patients would not be covered under Medicare.

2. I feel this is in conflict in the basic bill presented by the Department of Commerce and the bill by Martin, et al. I feel that minor surgery, which is taught in Naturopathic schools of Medicine, should be a part of the bill.

3. Besides the doctors that you mentioned in your letter I know of three other Naturopathic Physicians in Alaska. They are: Frank G. Spaulding of Fairbanks, Dr. Donald L. Hammond of Juneau and myself. The three of us have also been members of the faculty of the National College of Naturopathic Medicine which is located in Portland, Oregon.

4 The fees in Sec. 08.45.150 are not realistic and I feel that the application for examination fee should be $250 and the annual renewal fee $400. I remember when other professional groups were licensed their fees did not cover the total

cost of Board administration and that it appears that the cost of $50,000 a year is excessive.

5. Naturopathic Medicine is a distinct and separate profession and like the other professions there is an overlapping of skills and areas of practice. A Dentist may use a local anesthetic in his practice and an Osteopath, Medical Doctor and a Naturopathic Physician may also use a local anesthetic in their practice of Obstetrics. Similarly all three may prescribe exercise and diets.

I appreciate the opportunity to be of assistance and if I can be or any further assistance please let me know.

Sincerely,

Dr. D. E. Hampton, D.C., N.D.

SUBJECT: Regulation of Naturopaths
(CSHB 347 (HESS))

TO: Representative Niilo Koponen

FROM: Tamara Brandt Cook
Deputy Director
Division of Legal Services

TBC

Here is a draft of CSHB 347 (HESS) incorporating the changes that you requested, with one exception. Under Section 08.45.160(b)(2) you asked me to add "drugs" to the prohibition against the use of controlled substances and this I was not able to do in a way that would lead to a sensible or desirable result.

Under this draft that paragraph prohibits a naturopath from prescribing or using ". . .controlled substances as defined in AS 11.81.900(b)(6). . . ." The referenced section in turn refers to another section, AS 11.71.900(4) that includes drugs within the definition of controlled substances:

> "controlled substance" means a drug, substance, or immediate precursor included in the schedules set out in AS 11.71.140 - 11.71.190;" (Emphasis added)

By using the term "controlled substance" in this draft, drugs of a type that are regulated under state law have been included, from those deemed most dangerous (schedule IA drugs) to those deemed least dangerous (schedule VIA drugs). In view of the very comprehensive definition of controlled substance, I fear that adding the word "drugs" to the prohibition would have the result of precluding the use by a naturopath of many items available to every other person without a prescription, like aspirin or common over-the-counter cold remedies.

For you information I am including a copy of all of the types of drugs that are controlled substances and, consequently, already covered by this draft. If I can be of further assistance, please let me know.

SUBJECT: Naturopaths
(CSHB 347(HESS) and CSHB 347 (L&C))

TO: Representative John Cowdery
Chairman, House Labor and Commerce

FROM: Tamara Brandt Cook TBC
Deputy Director
Division of Legal Services

You have asked for a comparison between CSHB 347(HESS) and a draft CSHB 347(L&C) dated 2/29/84, both dealing with the licensing of naturopaths. A major difference between the two versions is that the draft provides for the creation of a Board of Naturopathic Examiners. After the first eight licenses are issued, the board will take over the duties of the Department of Commerce and Economic Development relating to the regulation of naturopaths. (See Sec. 08.45.040 of the draft.) Provision is made for appointment of members of the board and term of office under Sec. 08.45.010 and 08.45.030. Under *Sec. 4, some of the first members are appointed for shorter terms than generally provided for, so that the offices will become vacant at staggered intervals. Under the HESS CS the department regulates naturopathy and that version contains none of the provisions mentioned above relating to a regulatory board for that occupation.

Additional differences between the two versions follow by underlined section numbers that refer to CSHB 347(HESS). The appropriate section number from the draft version is supplied in parenthesis for your convenience if it differs from the underlined section number.

* Sec. 1. Regulation of naturopathy is added to the list of occupations subject to the general provisions of AS 08.01. Essentially the same provision is contained in the draft. (* Sec. 1)

Sec. 08.45.010. General duties of the department relating to the regulation of naturopathy are set out. The draft does not contain (4) dealing with temporary permits, however, that subject is dealt with elsewhere in the draft. The draft contains additional material in (b) authorizing the department to establish educational requirements that are additional to the requirements set out by statute and to identify schools that provide courses of study that satisfy the requirements. (Sec. 08.45.090.)

Sec. 08.45.100 Similar in both versions.

Sec. 08.45.110 The education requirements under the HESS CS are completion of high school, two years of postsecondary education, and graduation from a legally chartered school of naturopathic medicine with a course of instruction that includes particular itemized subjects. The draft requires a bachelor's degree, and graduation from a school of naturopathy approved by the department, with no itemized subjects set out. Both versions require 4,000 hours of study and certain clinical experience. A requirement for licensure that is in the HESS CS but no in the draft is that the person be of good moral character. A requirement that is in the draft but not in the HESS CS is that the person complete a one-year internship.

Sec. 08.45.120 The HESS CS limits the examination to the subjects of study previously itemized in the bill. The draft authorizes an applicant who fails the examination to be re-examined. With the exception of these items, the provision is similar in both versions.

Sec. 08.45.130 The HESS CS allows the department to license a person who is currently licensed in another state or in Canada if the jurisdiction maintains licensing standards equivalent or higher than those in this bill and extends the same licensing privilege to Alaskans. The person must demonstrate qualifications at least equal to those required of persons licensed under this bill. The draft authorized the department to issue a temporary permit to a person under the same circumstances. The permit is valid until the next examination is given. The draft also authorizes the department to issue a temporary permit to an intern that is valid for one year.

Sec. 08.45.140 The HESS CS provides reasons for the denial, suspension or revocation of a license. The draft provides

reasons for disciplinary sanctions that are modeled on similar provisions applicable to other medical occupations. (Sec. 08.45.210)

Sec. 08.45.150 Similar in both versions.

Sec. 08.45.160 Material contained on (a)(1), (4), and (5) of the HESS CS does not appear in the draft. There are some additional minor differences between the two versions.

Sec. 08.45.170 The HESS CS authorizes the department to prescribe continuing education requirements and the draft requires the department to do so.

Sec. 08.45.200 Similar in both versions.

Sec. 08.45.205 Similar in both versions, although fraudulently obtaining or furnishing a license or record is specifically dealt with in the HESS CS and not in the draft. (Sec. 08.45.220)

Sec. 08.45.220 Minor differences in the definition of "naturopathy". (Sec. 08.45.900)

* Sec. 3 The HESS CS requires the commissioner of commerce and economic development to license persons who have not been examined, but meet the other requirements for licensure on the effective date of this Act and who apply for a license by June 30, 1985. The draft requires the commissioner to issue a temporary permit under similar circumstances and the permit is valid only until the first examination is offered.

* Sec. 4 The HESS CS takes effect July 1, 1984. The draft takes effect January 1, 1985.

Alaska State Legislature

REP. MAE TISCHER
CHAIRMAN

POUCH V
STATE CAPITAL
JUNEAU, ALASKA 99811
(907) 465-3777

House of Representatives
HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

MEMORANDUM

TO: Representative Mae Tischer
FROM: Bill Lovell, HESS Committee Staff
DATE: February 10, 1984

RE: Comparison of proposed CSHB 347 (HESS) and HB 347

For your information, I have compared the proposed HESS Committee Substitute for House Bill 347, "[a]n Act relating to the licensing of practitioners of naturopathic medicine; and providing for an effective date," to the bill as originally introduced.

Section 1 of the proposed HESS Committee Substitute is unchanged from the original bill.

Section 2 of the proposed HESS Committee Substitute changes three provisions of the original bill:

Page 2, line 12, inserted "of which at least 1,500 hours is clinical experience." The effect of this amendment is the addition of a requirement that, of the 4,000 hours of approved training required to be a licensed naturopath, at least 1,500 hours must be clinical training.

Page 4, lines 19 - 22, deleted fee schedule amounts contained in original bill (indicated in brackets below) and inserted new amounts (underscored below):

(1) application for examination.....$ 50 [25]
(2) application for reexamination..... 10 [10]
(3) license issuance or biennial renewal.. 200 [100]
(4) issuance of temporary permit..... 50 [25]

The effect of this amendment is the provision of additional means to cope with any anticipated fiscal impact. This amendment would also ostensibly reduce misuse of the licensing system by requiring greater financial investment.

Page 4, line 29, inserted "under AS 08.45.110 (3)" after the words "physician has been trained." The effect of this amendment is to add further clarification of the authorization to use diagnostic

methods as it relates to appropriate preparatory training. AS 08.45.110 (3) is the new section created in CSHB 347 (HESS) outlining training requirements.

Section 3 of the proposed HESS Committee Substitute is unchanged from the original bill.

Section 4 of the proposed HESS Committee Substitute changes the effective date of the bill from July 1, 1983, to July 1, 1984.

FISCAL ANALYSIS

CS HB 347

Assumptions:

This bill creates a new five member board. This will impose a fiscal impact on operating expenses for board travel and for additional support staff that will be required to implement the provisions of the bill.

Support staff travel will be required to attend the board meetings to administer examinations, assist the board in conducting board meetings, and assist the board in developing regulations to implement the provisions of the bill.

The bill does provide fees for application for examination and for license issuance. It is anticipated that in FY '85 a total of 5 persons would be licensed under the provisions of this bill for a total revenue of $1,250.00. It is anticipated that one additional person would be licensed under this bill each suceeding fiscal year thereafter.

The revenue generated from the licensing provisions of this bill would be minimal and would not off-set the operating costs of the board and support staff functions.

The bill is silent on the number of meetings the board shall conduct each year, however the bill does specify that the board shall conduct examinations for licensing of naturopath at least twice each year. It is anticipated that the board would hold two such board meetings in order to meet this mandatory examination criteria.

The bill is silent on the issue of geographic area of residence for the five board members to be appointed. In the absence of specific guidelines, it is anticipated that two of the members would be appointed from the Interior Region, one from South Eastern Region and two from the South Central Region.

Based on this anticipation, and the unknown factors of where the board would want to hold the two annual meetings, the fiscal note was prepared with a single figure for transportation and perdiem. If meetings are rotated around the state, as most boards do, the cost factor would even out enentually.

CS HOUSE BILL NO. 347

Clinic of Natural Medicine

Patton D. Pettijohn, N.D.
Naturopathic Physician

Oct. 8,1982

Dear Candidate:

I am polling all the legislative candidates reguarding their personal views towards licensing practitioners of naturopathic healing.

Licensing procedures for naturopathic physicians would insure the rights of many Alaskans to choose for themselves, because of preference, what type of health care service they use. This legislation would also serve to protect the public interest by making sure that those who practice as naturopaths in Alaska are qualified to do so.

Enclosed, are both a pamphlet concerning our education and a copy of a sample legislation that was introduced last legislative session.

I would appreciate a response to the following questions:

1.) Would you support legislation similar to Senate Bill 274 which would insure Alaskans the right to use naturopathic services if it is their desire to do so?

2.) Would you be willing to co-sponser legislation similar to Senate Bill 274?

Many of my patients and other interested Alaskans are interested in knowing which of the candidates would support such legislation. I feel using nutrition against disease is gaining substantial scientific and public support and the many possible side effects of drugs has oriented many people to a more natural health care approach.

Please feel free to contact me if you have any questions reguarding naturopathic medicine.

Sincerely,

Patton Pettijohn N.D.

FILE
HB 347

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
Title: relating to licensing practitioners of naturopathic medicine.	Title: Same.	Title: changed to read: "An Act relating to the licensing of naturopaths"	Same as L&C CS.	Same as L&C CS.
Section 1: adds regulation of naturopathy or naturopathic medicine to AS 08.45	Section 1: Same.	Section 1: changed to "regulation of naturopaths" (rather than regulation of naturopathy or naturopathic medicine).	Same as L&C CS.	Same as L&C CS.
Section 2: Creates a new Chapter 45, "Naturopaths".	Section 2: Chapter title remains the same.	Section 2: Chapter title remains unchanged.	Section 2: Chapter title remains unchanged.	Section 2: Chapter title remains unchanged.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
Article 1: "Regulation of Naturopathy" This section details the duties and powers of the department to evaluate qualifications of applicants for licenses; conduct hearings; license naturopaths and renew licenses; and provide for temporary permits to persons apparently qualified to practice until certification of the results of the next examination.	Article 1: Remains the same.	Article 1: Entirely new Article 1, entitled "Board of Naturopathic Examiners". (The previous subject of this chapter, "Regulation of Naturopathy", is moved to Article 2.) 08.45.010: creates a Board of Naturopathic Examiners consisting of three licensed naturopaths, one doctor and one public member. 08.45.030: states that members shall serve staggered three-year terms, and that a member may be appointed to no more than two consecutive full terms. 08.45.040: these new sections (08.45.010-040) will come into effect after the first eight licenses are issued under this chapter, after which the board shall exercise the powers and duties of the department under this chapter.	Article 1: Same as L&C CS.	Article 1: Unchanged except for: 08.45.010: same as L&C CS, except that reference is made to three "naturopathic physicians", instead of three naturopaths. Balance of Article 1 is the same as L&C CS.

HB 347 (as introduced)

Article 2:
Licensing of Naturopaths

08.45.100 Requires a person to have a license or permit before being allowed to practice naturopathy or naturopathic medicine.

HB 347 (HESS)

Article 2:
Same.

08.45.100:
same.

HB 347 (L&C)

Article 2:

"Regulation of Naturopathy". Subsections (a)(1)-(3) correspond exactly to previous Article 1, subsections (1)-(3) (which state that the department will evaluate qualifications of applicants, conduct hearings, and license naturopaths and renew licenses).

Subsection (b) states that the department may establish educational requirements for licensure in addition to requirements under AS 08.45.110(2) that are equivalent to or higher than requirements in other states that license naturopaths, and identify schools that provide courses of study that satisfy the requirements.

Deleted from the previous article dealing with regulation is former Article 1, subsection (4), which provided for temporary permits to engage in the practice of naturopathy.

08.45.100: Same, except reference to "naturopathic medicine" is deleted.

HB 347 (Proposed Compromise)

Article 2

Same as L&C CS.

HB 347 (Naturopath Proposal)

New Article 2 (previous Article 2 is now Article 3, see below).

Article 2: Council of Naturopathic Advisors.

Sec. 08.45.050 Creation and Membership of Council: establishes a council of three naturopathic physicians licensed to and actively practicing in the state, to serve without pay.

08.45.060 Term of Office: members will serve staggered 3 year terms. A member may be appointed to no more than 2 consecutive full year terms.

08.45.070 Duties and Purpose: the council will advise the department, and help develop educational standards and criteria, examinations, and other regulations. Council will serve as a peer review board to hear and make recommendations to the department in cases involving naturopaths subject to or considered for disciplinary sanctions.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
---	---	---	---	New Article 3 corresponds to former Article 2: 08.45.090 is same as L&C CS, except for a new subsection (a)(4), Temporary Permits: persons who meet the requirements for licensure shall be eligible for temporary permits until the results of the next examination given; or persons working as interns supervised by a naturopath who holds a license or permit, shall be given permits until the completion of their 1 year internship if they meet all other requirements for licensure. (b) remains the same as the L&C CS. 08.45.100: Same as L&C CS.

08.45.110 Sets out requirements for eligibility to be licensed, which include: a high school diploma; two years of postsecondary education; graduation from a college of naturopathic medicine which requires for graduation completion of a course of resident instruction of at least nine months actual attendance in each of four years and successful completion of a course of instruction totaling 4,000 hours or more. (The required courses of instruction are set out in the statute.) Requires successful completion of an examination given by the department, not have a license anywhere else that is suspended or revoked; be a citizen or person lawfully admitted to the country; and be of good moral character.	08.45.110: Same, except that under subsection (3), after "completion of a course of instruction totaling 4,000 hours or more", requirement is added: "of which at least 1,500 hours is clinical experience".	08.45.110: Previous subsections (1) and (2) are deleted and replaced by a new subsection (1), which states an applicant shall "hold a bachelor's degree from an accredited college of liberal arts or sciences". Previous (3) is now (2), in which references to "naturopathic medicine" are deleted; the school of naturopathy must be approved by the department; and the list of courses of instruction is deleted. Previous (4) is now (3). Previous (5) is now (4). Previous (6) is now (5). Previous (7) is deleted (be of good moral character). New (6) requires that, upon graduating from a school of naturopathy, a one-year internship with a licensed naturopath must be completed.	08.45.110: Same as L&C CS, except in (2), where the Commission on Postsecondary Education would approve schools of naturopathy, rather than the department.	08.45.110: Same as L&C CS.

08.45.120 Authorizes the department to hold examinations for licensing, which examinations shall be limited to the subjects listed in 08.45.110(3). Exam will be in writing, but may be supplemented by oral examination. Applicant must receive an overall average of 75% and no less than 70% in more than two sections.	08.45.120: Same.	08.45.120: (a) adds that examinations will be held at least twice each year. Deletes sentence limiting examination to the subjects listed in 08.45.110(3). (b) adds that an applicant may apply to be reexamined if the applicant fails the examination.	Same as L&C CS.	08.45.120: Same as L&C CS.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
08.45.130 This section sets up a reciprocal arrangement; it allows the department to license without examination a person currently licensed in another state or in a province of Canada if the state's or province's licensing standards are equivalent or higher than those in this chapter; the state or province offers reciprocity to those licensed in Alaska; and the person demonstrates satisfactorily to the department qualifications equal to those licensed under this chapter.	08.45.130: Same.	08.45.130: Title is changed from "Endorsement" to "Temporary Permit". A new (a) is created, which encompasses the previous language of this entire section with the following changes: Rather than licensing a person who meets the following qualifications, the department may issue a temporary permit to practice naturopathy. New (1), (1)(a) and (1)(b) correspond to previous introductory language, (1) and (2), with the addition of the word "territory". Previous (3) now appears as (a)(1)(C). A new subsection (a)(2) is added, which reads, "qualifies for a license under AS 08.45.110(1)-(5) and is working as an intern supervised by a naturopath with a license or temporary permit issued under this chapter." A new subsection (b) is added, which says that a temporary permit is valid under the date on which the results of the next examination offered are	Same as L&C CS.	08.45.130: Entirely <u>different</u> section entitled, "Licensure by Credentials": The department may license a person as a naturopath if the person is currently licensed by examination as a naturopath in another state or in a province of Canada and 1) that state or province maintains professional licensing standards equal to or higher than those in this chapter; 2) extends the same licensing privilege to those holding a license in this state; and, 3) the person demonstrates to the department's satisfaction qualifications at least equal to those required of persons licensed under this chapter.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
		released, and that a temporary permit is valid for one year.		
08.45.140 The department may deny, suspend or revoke the license of a person or applications who: obtains license by fraud or deceit; wilfully violates a provision of the chapter; is an alcoholic; abuses controlled substances; impersonates another physician; practices under an assumed name; or is convicted of a crime involving moral turpitude.	08.45.140: Same.	08.45.140: Title is changed to "License Renewal", and provides that a license expires unless renewed every four years. A section similar to previous 08.45.140 can now be found under 08.45.210.	08.45.140: Same as L&C CS.	08.45.140: Same as L&C CS.
08.45.150 Sets up fees: $25 for examination, $10 for reexamination; $100 for license or biennial renewal; $25 for temporary permit.	08.45.150: fees are changed as follows: examination, $50; license or biennial renewal, $200; temporary permit, $50. The $10 reexamination fee remains the same.	08.45.150: Same as HESS committee substitute.	08.45.150: Same as HESS CS.	08.45.150: Same as L&C CS.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
08.45.160 Details scope of naturopathic practice. a) A naturopath may: 1) perform physical examinations; write prescriptions for substances authorized; sign birth and death certificates; 2) use systems of diagnosis for which naturopathic physician has been trained; 3) treat patients by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies, including acupuncture; 4) draw blood for laboratory purposes and use electrical and other methods for repair and care of superficial lacerations and abrasions, benign superficial lesions, and removal of foreign bodies located in superficial structures; 5) practice natural childbirth in obstetrics, including related minor surgical procedures.	08.45.160: Remains the same except under subsection (2), where a statute reference is added, so that the section now reads, "use systems of diagnosis for which the naturopathic physician has been trained under AS 08.45.110(3)".	08.45.160: Changes words "naturopathic medicine" to "naturopathy". Deletes previous (1), which allowed naturopaths to perform physical exams, write prescriptions and sign birth and death certificates. Previous (2) is new (1); statute reference is deleted. Previous (3) is new (2); deleted from list of authorized practices is treating patients by psychological and electrical means, or with acupuncture. Previous (4) is deleted (which authorized drawing blood and repairing lacerations and abrasions and removal foreign bodies). Previous (5) is deleted (authorizing practicing natural childbirth in obstetrics, including related minor surgical procedures).	08.45.160: Same as L&C CS, except adds a new subsection (a)(3), which authorizes naturopaths to practice natural childbirth in obstetrics.	08.45.160: Added to the L&C CS are the following provisions: (a)(1): a naturopath may also draw blood for laboratory purposes and use x-ray equipment for diagnostic purposes. (a)(1): add repair and care of superficial lacerations and lesions to scope of naturopath's practice, and delete accupressure.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
b) Naturopath may not: 1) perform surgery except as provided in this chapter; 2) use controlled substances; 3) use radiation therapy; 4) use drugs except antiseptics, local anesthetics, minerals and extracts, compounds or concentrates obtained from plants or animals.	(b) remains the same.	(b) (1) New language prohibits any surgery; (2) cannot use or prescribe controlled substances; (3) previous subsection banned use of radiation therapy; new language bans use of x-ray equipment, radium or irradiation for diagnosis or therapy. Previous (4) is deleted.	(b) same as L&C CS	Same as L&C CS, except (b)(3): a naturopath may not use x-ray equipment for therapeutic purposes or radiation therapy.
08.45.170 The department may prescribe continuing education requirements. Before a license may be renewed, the licensee shall submit evidence of completion of continuing education requirements to the department. The department may exempt a licensee from the continuing education requirement in extenuating circumstances. No more than one exemption in a five year period.	08.45.170: Same.	08.45.170: Same. Minor language change in subsection (b), which does not change the effect.	08.45.170: Same as L&C CS.	08.45.170: (a) change word "persons" licensed to "physicians" licensed. Balance of this section remains the same as L&C CS.
Article 3. General Provisions	No change in title of Article 3.	No change in title of Article 3.	No change in title of Article 3.	Previous Article 3 is now Article 4 (General Provisions).

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
08.45.200 Titles and Abbreviations: a) authorized titles are: Naturopath, Doctor of Naturopathy, or N.D. May not use a title that suggested a form of medicine or healing art other than naturopathy. b) may not use a title or abbreviation listed herein unless licensed under this chapter.	08.45.200: Same.	08.45.200: Same, except that provisions now apply to those holding permits under this chapter, as well as those licensed under the chapter.	08.45.200: Same as L&C CS.	08.45.200: Same as L&C CS, except that "Naturopathic Physician" is added to the list of authorized titles.
08.45.205 a) Defines as a Class B misdemeanor: fraudulently obtaining a permit, license, renewal or required record; or wilfully violating a provision of law or a regulation. b) Defines as a Class A misdemeanor practicing naturopathy or naturopathic medicine without a permit or license.	08.45.205: Same.	08.45.205 is deleted; similar provisions now appear at 08.45.220.	----------	----------

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
----------	----------	08.45.210: New section entitled, Imposition of Disciplinary Sanctions: Provides that after a hearing, the Department may limit, deny, suspend or revoke a license or temporary permit, or censure a licensee or permittee if the person 1) secured the license/permit through deceit, fraud or intentional misrepresentation; 2) engaged in deceit, fraud, misrepresentation in the course of providing professional services; 3) advertised services in a false or misleading manner; 4) has been convicted of a felony or other crime that affects ability to practice competently; 5) fails to comply with this chapter or a regulation adopted; 6) continues to practice after becoming unfit due to a) professional incompetence, b) addiction or severe dependency on alcohol or other drugs, or c) physical or mental disability; or 7) engages in lewd or immoral conduct in connection with delivery of service to a patient.	08.45.210: Same as L&C CS.	08.45.210: Same as L&C CS.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
08.45.220 defines department as C&ED; and naturopathy and naturopathic medicine as "a system of healing the human body that includes diagnosis and treatment through the use of natural agencies, forces, processes, and products with emphasis on the response of the individual to the disease rather than its treatment in isolation".	08.45.220: Same.	08.45.220: Title is changed from "Definitions" to "Violations". a) except as provided in (b) herein, it is a class B misdemeanor to intentionally violate a provision of this chapter or a regulation adopted; b) a person practicing naturopathy without a valid license or permit is guilty of a Class A misdemeanor.	08.45.220: Same as L&C CS.	08.45.220: Same as L&C CS.
----------	----------	08.45.900 New section entitled "Definitions". 1) definition of "department" remains C&ED. 2) definition of naturopathy is redefined to "a system of human health care that promotes good health through the prevention and treatment of illness by the use of educational, physical, nutritional, botanical, hygienic and other methods, and without the use of prescription drugs, surgery, x-ray equipment or radium therapy". (Compare to definition under 08.45.270, above, under HB 347 column.)	08.45.900: Same as L&C CS.	08.45.900: definition of department is same as L&C CS. Definition of naturopathy and naturopathic is expanded to include assisting in childbirth; after "without the use of prescription drugs" is added "except for that which is allowed by 08.45.160(1) and (2); and reference to x-ray equipment is deleted.

HB 347 (as introduced)	HB 347 (HESS)	HB 347 (L&C)	HB 347 (Proposed Compromise)	HB 347 (Naturopath Proposal)
Section 3 Licensing of Practitioners of Naturopathy or Naturopathic Medicine Without Examination: States that the commissioner shall license all persons who meet the qualifications of 08.45.110(1)-(3) and (5)-(7) who apply for license no later than 6/30/84.	Section 3: Same, except last date on which a person may apply for licensure is extended one year to 6/30/85.	Section 3: Title is changed to: Temporary Permits for Practitioners of Naturopathy. States that a) the Department shall issue a temporary permit to practice naturopathy to a person who is 1) practicing naturopathy in the state; 2) meets the qualifications of 08.45.110 or 08.45.130(a)(2), except of 08.45.110(3) and 3) applies for the permit; and, b) a temporary permit issued under this section is valid until the date on which the results of the first examination offered are released.	Section 3: Title changed to: Licensing of Practitioners of Naturopathy or Naturopathic Medicine Without Examination Or Internship. States that the department shall license a person who (a) on the effect date of this Act, (1) is residing and practicing naturopathy in the state; 2) is licensed by examination to practice naturopathy in another state, territory or province; 3) has graduated from a school of naturopathy that has as a requirement for graduation successful completion of a course of resident instruction of at least nine months actual attendance in each of 4 years and successful completion of a course of study totaling at least 4,000 hours; and b) applies for licensure under AS 08.45 no later than 6/30/85.	Section 3: Same as proposed "Compromise" CS.
Section 4: Effective date is 7/1/83.	Section 4: Effective date is extended one year to 7/1/84. Dear Mrs. Tisher:

Freedom of Choice is one of the basic principles of life in the United States and is accentuated even more and demanded more by Alaskans. We pride ourselves on our independence, varied lifestyles, pioneer spirit, and our freedom to choose where and how we live.

In Alaska we are able to choose between several different types of health care - Chiropractic, Naturopathy, and Medical. We are in jeopardy of loosing one of these choices. As legislators we need your help in supporting the continued licensing of naturopaths in the State of Alaska. Please vote yes on House Bill #347 and help preserve our freedom of choice. Why would we deny ourselves the privilege?

Thank you,

Dear Rep. Tischer and committee,

I was at the teleconference on Jan 21, 1984 on the licencing of Naturopathic Physicians, Bill 347. Because of time I was unable to stay to testify. But I would like to go on record as a supporter of naturopathy.

My daughter was born at home and I would never trade that experiance. I have been to birthsat home and in hospital and the home births get so much more care and attention. Twice the doctor was not even present for the baby's birth in the hospital. I myself would feel very apprehensive to go to a hospital to have another child.

I have been an Alaskan all my life and am a registered voter. I feel it is my right to be able to choose the form of medical care I want for my family, and to have that type of reliable care licenced by this state.

Please put your support behind Bill 347. Thank you for your time.

Sincerely,
Taffy Oscola

POSITION PAPER

HOUSE BILL NO. 352

"An Act relating to the definition of death; and providing for an effective date."

BACKGROUND

A Uniform Definition of Death has been endorsed by the National Conference of Commissioners on Uniform State Laws, the American Medical Association, the American Bar Association, the President's Commission for the Study of Ethical Problems in Medical and Biomedical and Behavioral Research as well as by the American Academy of Neurology and the American Electroencephalographic Society. The Uniform Definition is as follows:

> "An individual who has sustained either (1) irreversible cessation of circulatory and respiratory functions, or (2) irreversible cessation of all functions of the entire brain, including the brain stem, is dead. A determination of death must be made in accordance with accepted medical standards."

According to information received from the Commissioners on Uniform State Laws, 19 states have now adopted this definition, up from two states in 1981.

DISCUSSION

The definition proposed in this Bill, differs from the Uniform Definition in several respects:

1. In the Bill, "person" is substituted for "individual". The Uniform Definition purposely included the term "individual" to conform to the standard designation of a human being. The term "person" was not used because it is sometimes used by the law to include a corporation. Although that particular confusion would be unlikely to arise, the narrower term "individual" is more precise and thus avoids possibility of confusion.

2. In the Bill, the phrase "medically and legally dead" is used. The Uniform Definition prefers the phrase "is dead" since the broader provisions were considered to be misleading. The President's Commission stated, "A law setting a general standard without explicit limitations would be assumed to apply for all legal purposes; to say so in the statute, however, only raises needless questions (e.g., what does 'all legal purposes' leave out? For example, proceedings in equity?)"[1]

[1] Defining Death. Medical, Legal and Ethical Issues in the Determination of Death. President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. Pg. 79. Government Printing Office, Washington, D.C., 1981.

3. The Bill sets the standard for establishing death as "ordinary standards of medical practice", while the Uniform Definition adopts "accepted medical standards". This difference is probably not important.

4. The Bill adds a provision that death may be pronounced "before artificial means of maintaining respiratory and cardiac function are terminated." The Uniform Definition avoids the necessity for such a provision by simply stating that an individual "is dead" when either "irreversible cessation of circulatory and respiratory function or irreversible cessation of all functions of the entire brain, including the brain stem" has occurred. When either of these circumstances prevails, the appropriateness of stopping medical intervention is apparent.

POSITION

While the Department considers the definition proposed in the Bill to be better than the current statutory definition, it would prefer that the Uniform Definition of Death be adopted.

sec. 1 of this Act, is in addition to liability for an award of reasonable attorneys' fees which may be made to the prevailing party in a civil action under Rule 82 of the Rules of Civil Procedure."

Sec. 09.65.120. Definition of death. A person is considered medically and legally dead if, in the opinion of a medical doctor licensed or exempt from licensing under AS 08.64.010 — 08.64.380, based on ordinary standards of medical practice, there is no spontaneous respiratory or cardiac function and there is no expectation of recovery of spontaneous respiratory or cardiac function or, in the case when respiratory and cardiac functions are maintained by artificial means, a person is considered medically and legally dead, if, in the opinion of a medical doctor licensed or exempt from licensing under AS 08.64.010 — 08.64.380, based on ordinary standards of medical practice, there is no spontaneous brain function. Death may be pronounced in this circumstance before artificial means of maintaining respiratory and cardiac function are terminated. (§ 1 ch 8 SLA 1974)

Sec. 09.65.130. Representation of child. (a) The court may, upon the motion of either party or upon its own motion, appoint an attorney to represent the minor with respect to his custody, support, and visitation or in any other legal proceeding involving his welfare. When custody, support, or visitation are at issue in a divorce, it is the responsibility of the parties or their counsel to notify the court that those matters are at issue. Upon notification, the court shall determine whether the child should have legal representation or other services and shall make a finding on the record before trial. The court shall enter an order for costs, fees, and disbursements in favor of the child's attorney and may further order that other services be provided for the protection of the child.

(b) If custody, support, or visitation is an issue, the order for costs, fees, and disbursements shall be made against either or both parents, except that, if one of the parties responsible for the costs is indigent, the costs, fees, and disbursements for that party shall be borne by the state. If either or both parents are only temporarily without funds, as determined by the court, the court may advance payment for legal representation or other services rendered to the child; however, no repayment may be required for those who are receiving legal services for the indigent. The attorney general is responsible for enforcing collections owed the court, and repayment shall be made directly to the court under the provisions of rules governing the administration of the courts. The court shall, if possible, avoid assigning costs to only one party by ordering that costs of the child's legal representation or other services be paid from proceeds derived from a sale of property belonging to both parties, before a division of property is made.

(c) Instead of, or in addition to, appointment of an attorney under (a) of this section, the court may, upon the motion of either party or upon

Dear Legislators and State Agencies:

The Bristol Bay Borough is pleased to submit our capital project needs for your review and consideration.

The Borough takes a great deal of pride in this submission as it represents the efforts of all of our commissions, as well as input from the communities within the Borough.

As in the past, the established priorities are based on need as determined by the public and the governing body.

Each project is extensively evaluated to take into consideration operation and maintenance costs, compared to our short as well as long term financial capabilities.

We spend the funds we receive in the manner we indicate and in the time frame allocated.

You can be assured, funds allocated to the Bristol Bay Borough will be wisely and prudently spend, not only for our Borough but for our region and the State of Alaska.

Sincerely,

Jim D. Clark

RESOLUTION NO. 83-27

A RESOLUTION ESTABLISHING THE BOROUGH'S LEGISLATIVE DOCKET FOR FY 85.

THE BOROUGH OF BRISTOL BAY HEREBY RESOLVES:

WHEREAS, important items which affect the lives of citizens in Bristol Bay Borough are introduced and debated each year in the legislature, and

WHEREAS, the Borough's limited tax base makes it necessary to get assistance from the State of Alaska for the provision of basic governmental services.

NOW THEREFORE BE IT RESOLVED, that the Borough Assembly adopts the attached Legislative Docket as representing the needs and concerns of the citizens of Bristol Bay Borough.

Passed this 19th day of December, 1983.

Jim D. Clark
Mayor

ATTEST:

Betty L. Thompson
Borough Clerk

EMPLOYMENT

The Bristol Bay Borough uses a combination of contractor services and force account work.

All of our contract services with the exception on engineering was performed by local contractors utilizing local labor. All of the force account work was performed by local people.

In the past two construction seasons, the Borough has expended in excess of two million dollars in capital projects utilizing a combination of grant, legislative appropriations and local funds. Since all of the employees involved in these construction projects were local residents, the economic benefits were shared throughout the communities of the Borough and provided employment opportunities for many residents which previously were not afforded the opportunities of employment in the locations in which they live.

1

PHASE II - DOCK IMPROVEMENTS

PUBLIC DOCK FACILITY

INTRODUCTION

The public dock facility has been designated as a four stage project. Construction of the primary facility, excavation of approximately 120,000 cubic yards of material adjacent to the dock, construction of primary facilities and finally, utilities and support facilities.

Preliminary statistics from our first year's operation, which are included in this report, indicate a tremendous success.

To further enhance the future capabilities of the dock facility, the Borough currently has an economic feasibility study in the process which will assist us in the determination of future private sector development in areas adjacent to our dock.

Finally, if our first year's operation is any indication of future year's, it would appear this facility will be self-supporting in the aspect that revenues derived from the operation will support the operation and maintenance costs and will not add to the tax burden of the residents or cause potential future requests of the legislature for operational funds.

PHASE III FISCAL YEAR 1985 REQUEST

The funds requested for fiscal year 1985 entails the construction of a river retainment wall and a large utility building.

UTILITY BUILDING

This building will be a 100' x 120' multi-purpose structure that will be used on a year-round basis.

In the summer operational season the building will be used as a freight storage and operations facility. During the winter months it will be used as an equipment storage and maintenance facility and will also house the Borough Department of Public Works.

By utilizing this facility on a multi-purpose year-round basis, we will be afforded the opportunity to have year-round security, provide a location for equipment storage and repair and provide an operational base for our Department of Public Works.

From the utilization standpoint, there will be no period of the year this building will be sitting idle.

RETAINMENT WALL

This bulkhead or retainment wall will be constructed on the river bank for three purposes. It will allow us to reclaim and use additional land to be included as part of the dock staging area, prevent erosion and provide an area for the mooring of fishing vessels and small pleasure crafts.

The retainment wall is extremely important from the erosion control aspect since erosion of soil along our rivers can create environmental problems for migrating salmon, which are the economic mainstay of our region.

CONCLUSION

Utilizing local, state and federal funds the Borough has constructed a public dock facility since 1981.

We began construction of the base facility in early 1982. Since that time, with the assistance of a legislative appropriation we were able to begin the development of the staging area.

As agreed by the stipulations of a "Bid Ready" early appropriation construction bill, we removed 95% of the material in the staging area.

In addition, we were awarded funds in the general appropriation for dock development which we utilized in the installation of an industrial and fire protection well with capabilities of providing water to large vessels. We also installed our electrical system, a launching area for our fire boat and a security fence surrounding the dock area.

With additional assistance we can construct Phase III of our construction program with the assurance the project will be started and completed within the specified time limitations and be utilized in the manner for which the funds were designated.

PUBLIC DOCK

COST SUMMARY

UTILITY BUILDING		
120' x 100' x 22' Garco steel building		$ 85,000
Material and equipment		309,000
Excavation and landscaping		17,000
Construction labor		69,000
Administration and overhead		30,000
Shipping cost based on F.O.B. Naknek		-0-
	TOTAL	$510,000
RETAINMENT WALL		
Material and equipment		$ 52,392
Excavation and landscaping		72,600
Construction labor		78,608
Administration and overhead		24,000
Shipping cost		12,400
	TOTAL	$240,000
TOTAL LEGISLATIVE REQUEST		$750,000

COST ANALYSIS

UTILITY BUILDING

The proposed Garco Steel Building will be assembled on a heavily reinforced concrete pad, capable of withstanding the weight of large and heavy dock equipment. In addition, a floor and ceiling hoist will be installed to repair the heavy equipment. This will require specialized reinforcement within the structure.

Building Package	$ 85,000
Heavy Duty Reinforced Concrete	77,000
Urethane Foam Insulation	72,000
Building Construction	69,000
Electrical and Plumbing	35,000
Heating System	15,000
Office and Parts Storage Areas	32,000
Sewage Disposal System	6,000
Water Supply	6,000
Excavation and Landscaping	17,000
Parking Area	3,000
Fuel Tanks and Pumps	3,000
Overhead and Floor Hoists	55,000
Administration and Overhead	30,000
TOTAL	$510,000

COST ANALYSIS - Continued

RETAINMENT WALL

49 Timber piles @ $222.00 per unit	$ 10,878
4,608 Lineal feet of 4" x 12" pressure treated timbers	14,561
3/4' 38,000 minimum breaking strength wire rope and fittings	21,903
MC 10 x 28.5 channel steel	4,500
Trevira 1127 filter fabric	550
Excavation, settin of piles and pile trench	70,000
Landscaping	2,600
Construction labor including: Operators, capenters and laborers	78,608
Administration and overhead	24,000
Shipping costs	12,400
TOTAL	$240,000

SCHOOL IMPROVEMENTS

SCHOOL IMPROVEMENTS

INTRODUCTION

Bristol Bay Borough High School is in need of immediate remodeling and reorganization of the school facility. Initially built in 1968 to accomodate a complete K-12 educational program, the building has since been modified to facilitate a comprehensive high school program. Throughout the modification the school has evolved from an "open-space" design to a "self-contained" classroom design. During the fifteen years since original construction, the facility needs have grown beyond the capacity of the initial structure. Therefore, the following remodeling/construction plan is jointly submitted by Bristol Bay Borough School District and Bristol Bay Borough to effectively resolve critical facility deficiencies in Bristol Bay High School.

DESCRIPTION OF NEEDS

A description of critical needs include but are not limited to the following:

1. Health and Life Safety Needs

    a. Unsanitary health conditions in locker-room areas.
    b. Home Economics area does not meet emergency codes as established by the state fire marshall's office.
    c. Inadequate storage areas force equipment storage in crowded hallways.
    d. Ventilation system does not adequately provide circulated air into academic areas.
    e. Plumbing system requires extensive repair and replacement due to increased use and severe mineral deposits in fresh water source.

2. Unhoused Students

    a. Due to increased enrollment the elementary school is one classroom short. This deficiency would be rectified with construction of additional classrooms to accommodate a 6-8 grade middle school program.
    b. Academic programs are restricted or eliminated due to lack of adequate space, e.g., computing, arts and electronics.

3. Protection of Structure

    a. Exterior walls are not adequately insulated and most interior walls are made of temporary non-sound proof and non-fire retardent material.

THE PLAN

This proposed remodeling/construction project is part of a long range facility master plan with previous capital projects funded via local bonding effort. The plan was developed to provide maximum benefit to students and residents served by the District. Significant effort has been made to provide a plan that meets educational needs while providing improved educational and community services to district residents.

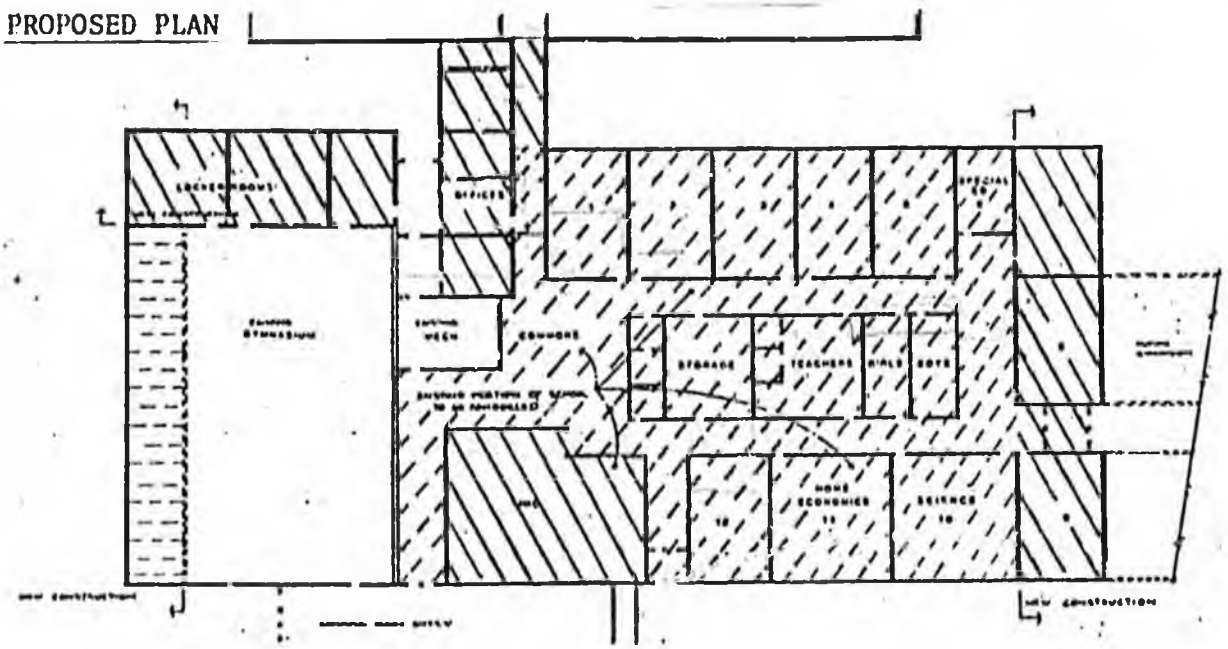
This entire capital project is supported by a recently completed feasibility study and estimated expense is $5,193,000 for the total project.

COST SUMMARY

PHASED PRIORITY AND ESTIMATED EXPENSE

1. Classroom addition, Instructional media center, Locker rooms and Offices.

Area - Estimated expense: $1,777,500 plus 10% for each year delayed.



2. Remodel academic area

Area - Estimated expense: $2,875,000 plus 10% for each year delayed.

3. Gymnasium extension

Area - Estimated expense: $ 540,500 plus 10% for each year delayed.

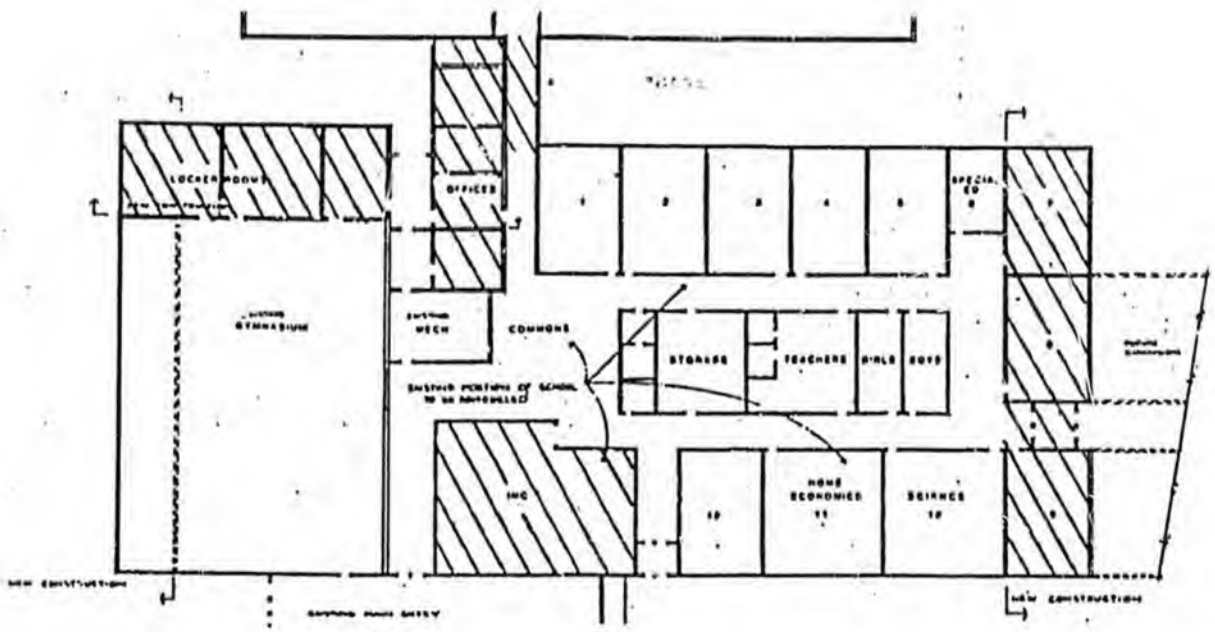
PROPOSED PLAN

PHASE BREAKDOWN

The following capital project is proposed jointly by Bristol Bay Borough School District and Bristol Bay Borough for remodeling the high school in Naknek, Alaska. Total estimated expense for the entire project, assuming total funds are available, is $5,193,000.

Even though this proposal is submitted as a total project, the plan is illustrated in a phased approach to resolve critical facility deficiencies while keeping estimated expenses at a reasonable level.

PHASE I



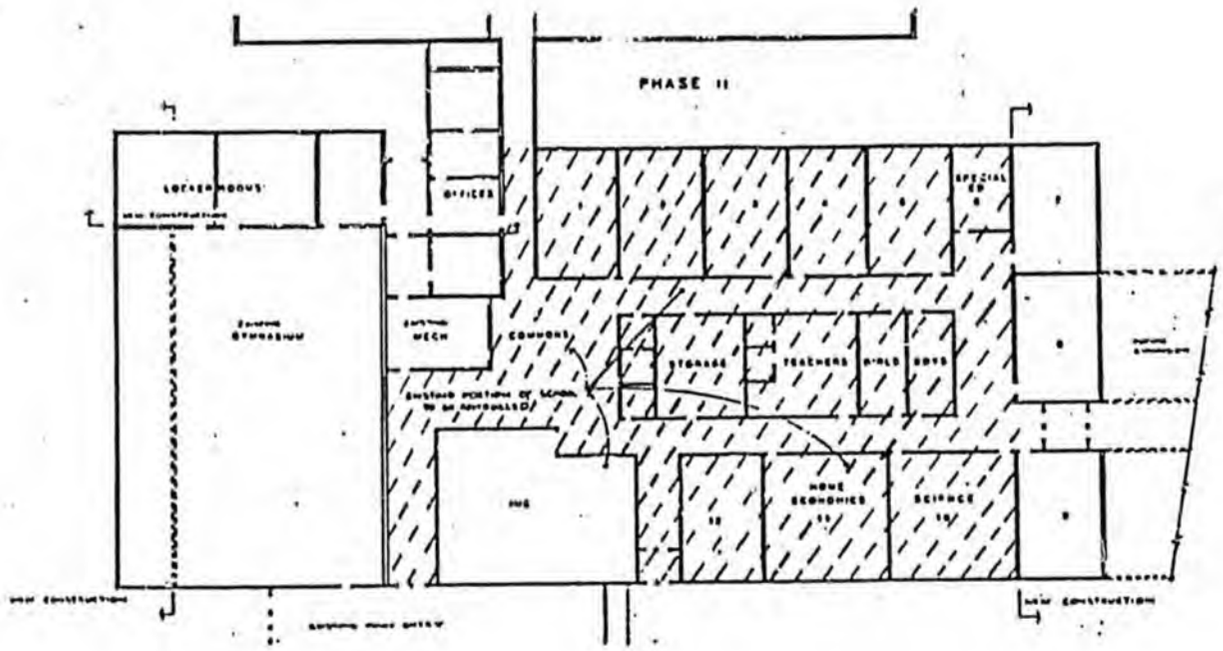
CLASSROOM ADDITION, IMC - LOCKER ROOM AREA AND OFFICES

This phase would result in the construction of three new classrooms, an Instructional Media Center (IMC), locker rooms with P.E. storage and an administrative office area. When completed this phase would: alleviate current shortage of appropriate classroom space; create an IMC that is appropriately designed for a learning and resource center; have a sanitary and efficiently maintained locker with appropriate equipment storage adjacent to the gymnasium; and an office area appropriate for district administrative functions.

All construction would include stub-outs, etc., necessary for future expansion with design and finish of each area to coincide with that proposed for the remodeled academic area.

TOTAL PHASE I ESTIMATED EXPENSE: $1,777,500

PROPOSED PLAN - PHASE I  AREA



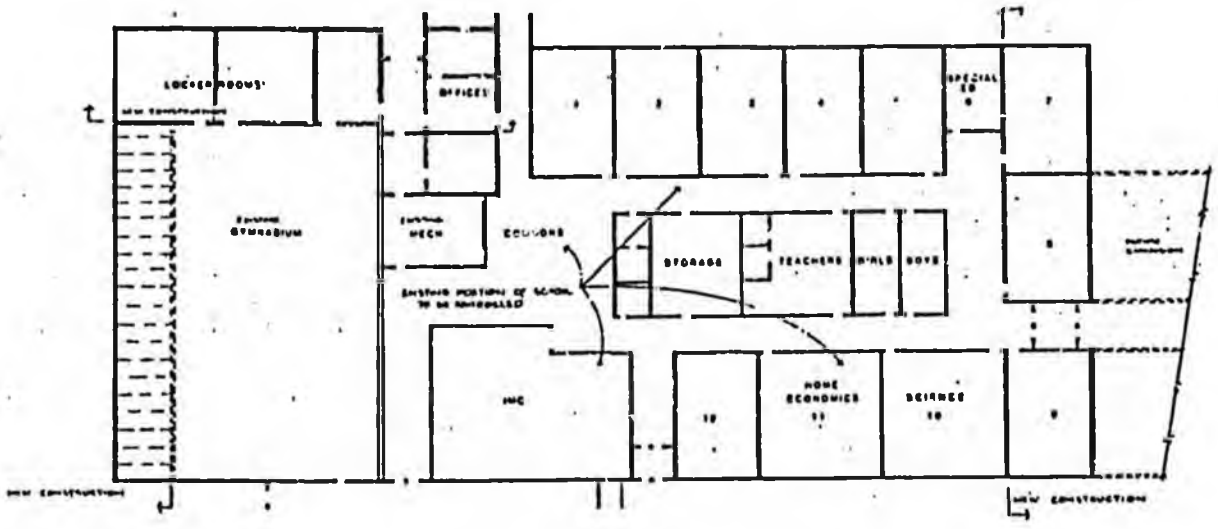
PHASE II

REMODEL ACADEMIC AREA

This phase would result in a completely remodeled academic area. When completed the remodeled area would: provide ample classroom space for a comprehensive secondary program; meet current fire and building codes; have efficient heating systems and insulation installed; and provide sufficient storage space for supplies and equipment. Completed design and finish of each area would coincide with that proposed in Phase I of this plan.

TOTAL PHASE II ESTIMATED EXPENSE: $2,875,000

PROPOSED PLAN - PHASE II ▨ AREA



PHASE III

GYMNASIUM EXTENSION

This phase would result in construction of a sixteen foot addition to the full length of the gymnasium. The gym floor would be resurfaced and remarked and new spectator seating would be installed. This phase would also allow for more effective use of the gymnasium area with two cross-court activities occurring simultaneously. For activities requiring full floor length, the activity would be a safe distance away from the seating area allowing safe spectator movement while the activity is in progress.

TOTAL PHASE III ESTIMATED EXPENSE: $540,500

PROPOSED PLAN - PHASE III  AREA

COST ANALYSIS

PHASE I - ESTIMATED EXPENSE

Classroom addition - $150 per sq. ft. $150 x 3,000 sq. ft.	$ $450,000
Locker room & P.E. storage - $250 per sq. ft. $250 x 2,060 sq. ft.	515,000
Remodel IMC area - $150 per sq. ft. $150 x 2,400 sq. ft.	360,000
District office area - $150 per sq. ft. $150 x 1,470 sq. ft.	220,500
Engineering, architectural, work of art and administration fees - 15% of construction costs	232,000
TOTAL PHASE I EXPENSES	$1,777,500

Estimated 10% annual increase for inflation and mobilization of material and personnel for each year project is delayed.

PHASE II - ESTIMATED EXPENSE

Academic area remodeling - $125 per sq. ft. $125 x 20,000 sq. ft.	$2,500,000
Engineering, architectural, work of art and administrative fees - 15% of construction costs	375,000
TOTAL PHASE II EXPENSES	$2,875,000

Estimated 10% annual increase for inflation and mobilization of material and personnel for each year project is delayed.

PHASE III - ESTIMATED EXPENSE

Gymnasium extension - $200 per sq. ft. $200 x 1,600 sq. ft.	$ 320,000
Resurfaced - remarked floor and seating	150,000
Engineering, architectural, work of art and administrative fees - 15% of construction costs	70,000
TOTAL PHASE III EXPENSES	$ 540,500

Estimated 10% annual increase for inflation and mobilization of material and personnel for each year project is delayed.

TOTAL PROJECT ESTIMATED EXPENSE	$5,193,000

DISTRICT CONTRIBUTION

In an effort to expedite planning and organization of this capital project the school district can provide $200,000. These funds could be used to initiate immediate development of project specifications and start the architectural drawings and engineering plans.

COST JUSTIFICATION

Expense estimates have been confirmed with John Kumin, architect of Kumin and Associates. Estimates are also supported by a recently completed feasibility study. Therefore, it is felt that estimated expenses are reasonable and rational for the plan as proposed.

3

PHASE II SOLID WASTE PROGRAM

SOLID WASTE

INTRODUCTION

For the past two years the Borough has made a concerted effort to upgrade our solid waste facilities in both Naknek-King Salmon and South Naknek.

With the assistance of a legislative appropriation in Fiscal Year 1984, the Borough developed a solid waste plan and began implementation of that plan.

In the Naknek-King Salmon facility, we cleaned up the entire area, eliminated the dumping of solid waste into a ground water lake, established dumping times and basic regulations, drilled a well for testing and domestic use, developed an approved solid waste cell, acquired the property at the solid waste site and submitted an application for a solid waste permit, which was subsequently approved.

In South Naknek, we began developing the new solid waste site, purchased a piece of equipment to excavate and cover the solid waste on a regular basis, acquired the land for the new disposal site and cleaned up the existing site. We will also submit an application for a solid waste permit as soon as the final land acquisition papers have been processed.

In short, we have come a long way in developing a sound, safe and sanitary solid waste program.

THE PLAN

Since our solid waste program is a phased program, the previous information represents Phase I. Phase II of the program, for which we are seeking assistance, consists of additional development of both sites.

NAKNEK-KING SALMON

To fulfill the requirements indicated by the Department of Environmental Conservation, we plan to continue with our Phase II solid waste program. This will entail pumping and diking a protion of the ground water lake, the development and construction of additional solid waste disposal cells and the construction of a portable unloading ramp and used oil storage tank. We will complete the Phase I portion of the bale-compactor building, which at this stage will consist of the attendants' quarters and equipment storage area, develop and fence an area for heavy metal objects such as wrecked or abandoned automobiles and appliances and construct a bear-proof fence around the perimeter of the solid waste site.

SOUTH-NAKNEK

It is anticipated we can complete the South Naknek solid waste facility as part of the Phase II program. South Naknek Village and its industry cannot generate enough solid waste to warrant a baler-compactor unit at this time. Therefore, it is anticipated a sanitary land fill can be successfully operated for a number of years.

With this idea in mind, we plan to abandon this present location, fill and grade as necessary and relocate to the new site. Prior to the actual relocation, we will develop the new area to the Department of Environmental Conservation's standards, construct an attendant and equipment storage building, fence the perimeter of the disposal area with a bear-proof fence, construct a portable unloading ramp and drill a well.

CONCLUSION

We consider our solid waste program one of the more progressive in our region. We submitted a solid waste grant application to the Department of Environmental Conservation in early 1982, but never reached a priority high enough to receive funding in spite of the fact that our solid waste problem was just as dramatic as other communities within the State.

We did, however, proceed with our program and have expended a great deal of local funds in addition to the funds received from the legislature.

Since we have limited financial resources, it is imperative that we receive funding for this program if we are to fulfill our commitment to the Department of Environmental Conservation and provide safe and sanitary solid waste sites for the residents of the Borough.

BRISTOL BAY BOROUGH
SANITARY LAND FILL

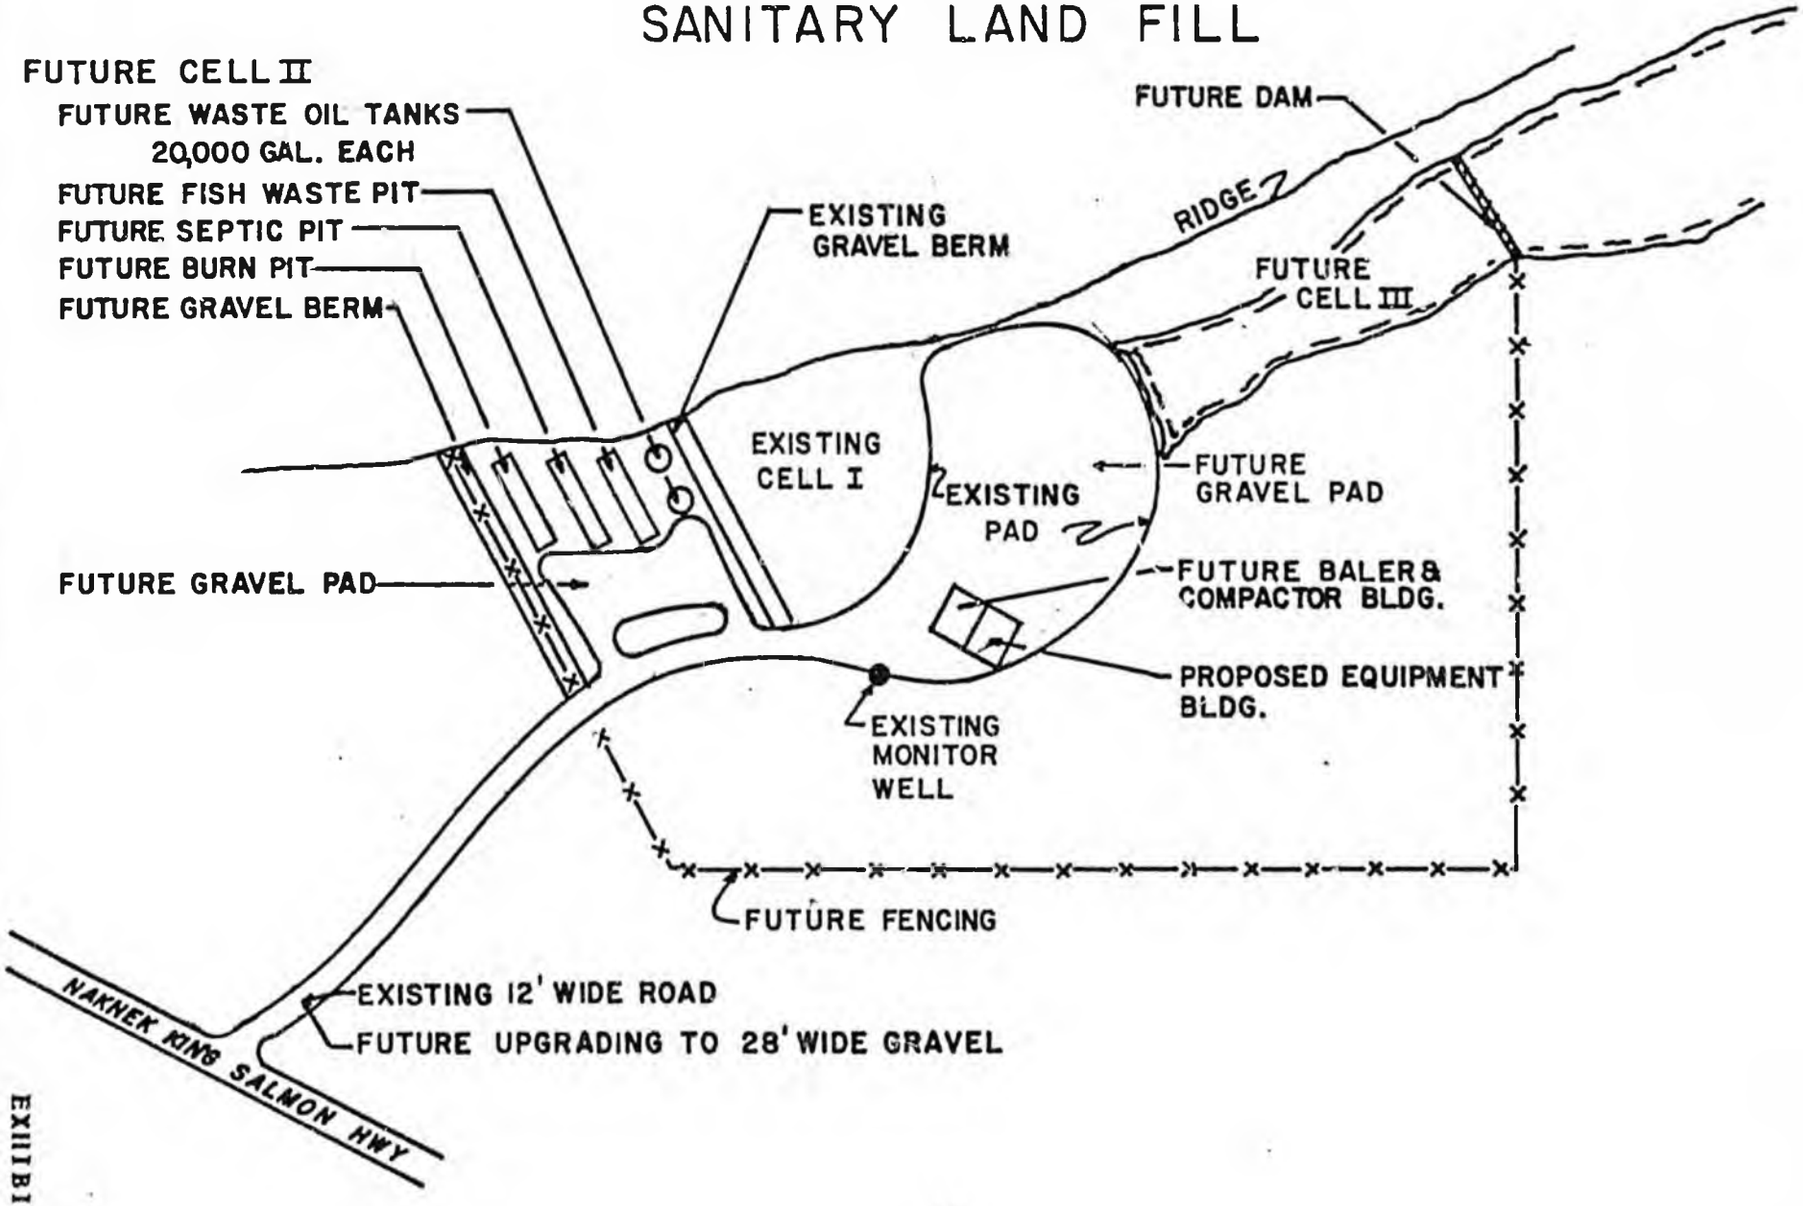


EXHIBIT C

PREPARED BY: RALPH MANCUSO & ASSOC. BOX 181, NAKNEK AK. 99633 DEC. '83

COST SUMMARY

NAKNEK LANDFILL

Concrete floor slab for utility building	$ 18,000
Retainment wall	10,000
Roads and parking aprons	25,000
Dam drain pond	65,000
Waste oil storage facility	45,000
Construction of solid waste cell	29,500
Septic discharge cell	8,000
Waste oil heating system	20,000
3 phase electrical power and poles	14,500
Bear proof fence	40,000
Construction labor	25,000
Anministration and overhead	30,000
TOTAL	$330,000

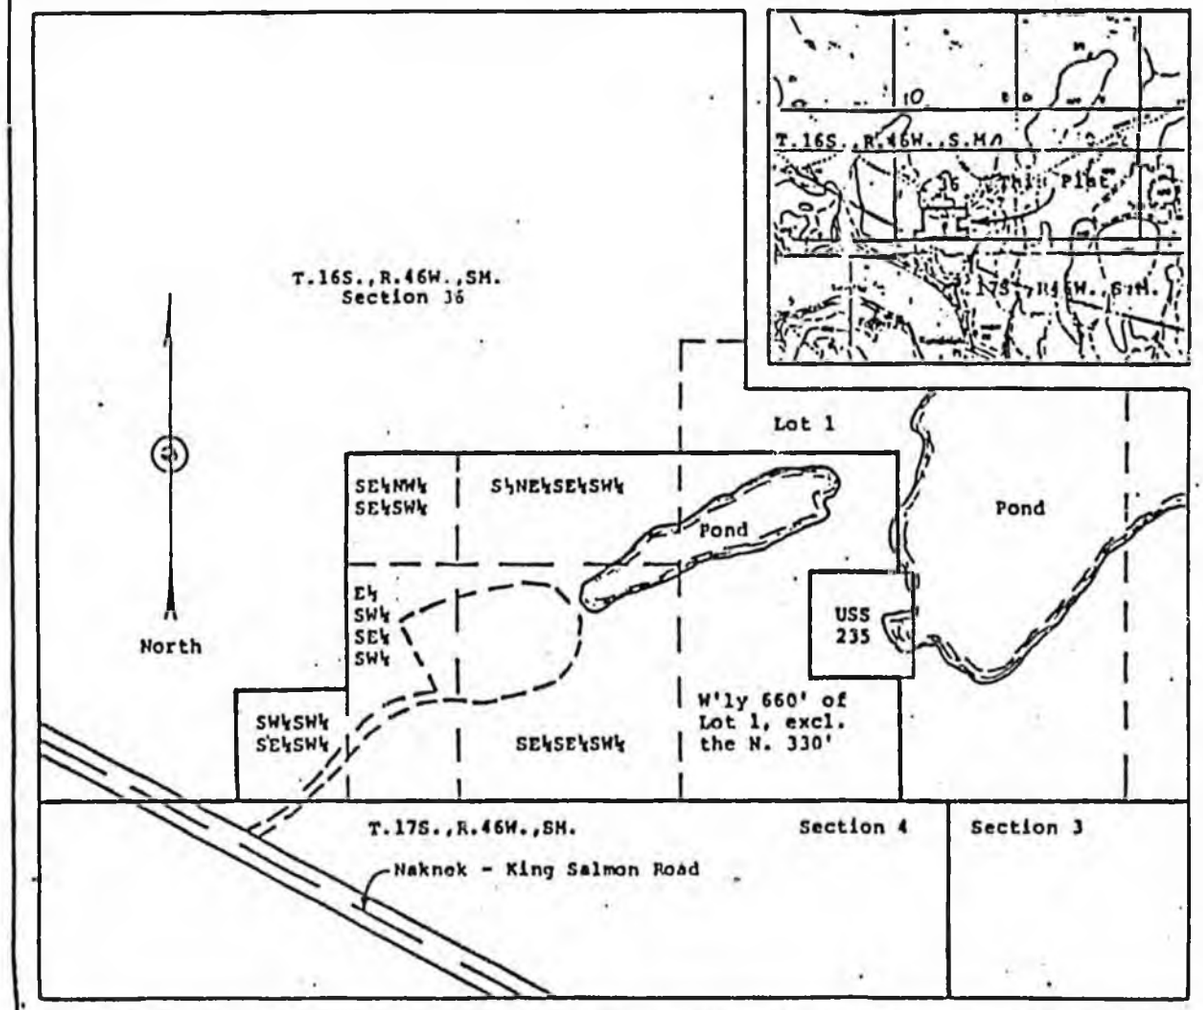
SOUTH NAKNEK LANDFILL

Construct attendant and equipment storage building	$ 12,000
Roads and parking area for new site	18,000
Retainer and bulkhead construction material	10,000
Construct solid waste cell	20,000
Abandon, drain and fill existing site	20,000
Construct septic discharge cell	8,000
Fuel storage tank	4,500
Electrical power and poles	1,500
Bear proof fence	40,000
Construction labor	20,000
Administration and overhead	16,000
TOTAL	$170,000
TOTAL LEGISLATIVE REQUEST	$500,000

COST ANALYSIS

NAKNEK LANDFILL

The total 40' x 50' heavy duty reinforced concrete floor will be constructed for both Phase II & III of the office, equipment storage facility.	$ 18,000
The bulkhead unloading ramp will consist of heavy 4" x 6" planks and beams.	10,000
The road must be constructed within the landfill area and parking or unloading areas provided.	25,000
The current dumping pond will be drained, diked and excavated to provide for landfill cells, which will require a great deal of pumping and excavation.	65,000
The waste oil storage facility will consist of a bermed area for fire prevention, two (2) 20,000 gallon storage tanks and specialized plumbing to pump the oil to the heating system.	45,000
Two (2) 80,000 square foot containment areas consisting of a fifteen foot high berm will be constructed, which will contain the solid waste disposal cells.	25,000
There will be a specialized septic discharge disposal cell.	8,000
A waste oil heating system will be installed to heat the building complex. The system will require specialized burners and boiler to utilize waste oil as a fuel source.	20,000
Three phase electrical power will be necessary to operate the entire system when it is complete.	16,000
2,000 linear feet of bear proof fence will be required to fence the perimeter of the solid waste disposal site @ $20.00 per foot.	40,000
Construction labor	25,000
Administration and overhead	33,000
TOTAL	$330,000



COST ANALYSIS

SOUTH NAKNEK LANDFILL

Construction of roads and unloading areas at the new location	$ 18,000
Construct attendant and equipment storage building	12,000
Portable unloading ramp similar to the Naknek facility	10,000
Construction of solid waste retainment area and disposal cells	20,000
Abandon, drain pond, fill and landscape existing area	20,000
Construct septic discharge cell	8,000
Fuel storage tank	4,500
Install electrical power supply and transmission poles	1,500
2,000 linear feet of bear proof fence	40,000
Construction labor	20,000
Administration and overhead	16,000
TOTAL	$170,000

EMERGENCY POWER GENERATOR

EMERGENCY POWER GENERATOR

INTRODUCTION

For the past three years, the Borough has attempted to obtain a government surplus or a used electrical power generator.

After a great deal of time and expense, we found the generators available to us were either too large or small or used to the extent that a major overhaul would be necessary.

The concensus of the community is that an emergency generator is a necessity, particularly considering our remote location. In the event of a disaster or a major power outage, the communities of King Salmon, Naknek and South Naknek could suffer far more than a simple inconvenience. We have no primary electrical power source other than Naknek Electric Association and no way to relay power in the event this power source is seriously impaired or destroyed.

In addition, both the school and health clinic are heated by a waste heat system provided by Naknek Electric Association and in the event Naknek Electric is destroyed we would have no means to heat these facilities. The emergency generator could provide electric heat to both.

COST SUMMARY

EMERGENCY GENERATOR

250 KW Generator	$ 48,000
Generator building	25,000
Equipment and material	77,000
Construction labor	15,000
Engineering	15,000
Administration and overhead	20,000
TOTAL LEGISLATIVE REQUEST	$200,000

COST ANALYSIS

EMERGENCY GENERATOR

The philosophy behind the emergency generator is two-fold. By utilizing a primary source generator rather than an auxilary source we can also provide a heating source to both the school and the health clinic. The costs derived include the modification of existing system to conform to the emergency system.

250 KW primary power generator	$ 48,000
Generator building	25,000
Electrical heating system for the clinic	1,500
Switching and mechanical gear	35,000
Heat exchangers	8,000
Pump controls and sensors	10,000
Modification of school heating system to include 4" insulated pipe	14,000
Underground power lines to the school and the clinic	2,500
Electrical service modification	2,000
Electrical heating system for the school	1,500
1,000 gallon fuel storage tank	2,500
Construction labor	15,000
Engineering	15,000
Administration and overhead	20,000
TOTAL	$200,000

SOURCE OF ESTIMATES:

Dryden and LaRue Engineers Anchorage, Ak

COMMUNITY CENTER

AND

WATER SAFETY FACILITY

FEASIBILITY STUDY

COMMUNITY CENTER AND WATER SAFETY FACILITY

INTRODUCTION

Historically, rural communities in Alaska have had a sad lack of community facilities. In modern times when survival is not as difficult and the people do not have to work as hard just to stay alive, this lack is even more apparent.

The end result of the lack of anything to do has created severe social problems such as alcoholism, crime and severe depression.

What we can do as a local government is to provide a facility and activities as an alternative to occupy the peoples' minds, energy and time.

A Borough-wide survey conducted by the Borough Parks and Recreation Commission during the winter of 1982 indicated the number one priority among the Borough residents for recreation was an indoor recreation facility. To honor this request, the Borough requests your consideration in assisting us to develop and construct such a facility.

Two of the needs within this facility are a water safety facility and a senior citizens' center.

WATER SAFETY FACILITY

The need for a water safety facility is not a new idea in the Bristol Bay Borough as both school and community have repeatedly expressed concern regarding residents inability to swim, ignorance of boat and water safety principles and lack of appropriate leisure time activities. Several attempts have been made to establish a swimming program despite the lack of facilities. A state program utilizing a temporary "above-ground" tank was installed several years ago to help teach basic swimming and drown proofing. Unfortunately, funding is no longer available for the program. There were numerous other difficulties with the outdoor tank and it was finally abandoned due to inefficiencies, leaving only a greater awareness of the need for water safety training.

While interest in the construction of swimming pools is being expressed throughout the state, certain regions can identify a much greater need than others. Such is true in the Bristol Bay Borough where the prime occupation of residents is closely related to the sea. In 1980, the State Department of Health and Social Services documented deaths attributed to drowning from 1975 forward. (Source: Annerud, Nels. Deaths due to Drowning, unpublished, 1981) The report indicates an escalating number of deaths per year in fishing and fishing-related occupations. The state has averaged 100 deaths per year over a five year period. Of even greater significance, the greatest number of these deaths are reported to be in the southcentral region. Finally, most of these deaths are tied to the "ocean" or "ocean-bay".

The escalating number of deaths continue in the Bristol Bay region. According to the September 1981 edition of the Bristol Bay Times (Vol. II, No. 7), 12 persons drowned in the region last summer. Statistics such as these graphically represent the problem and obviously support the continued community pressure to initiate a water safety program. It is the community's desire to see a sound educational program which will drastically reduce the number of lives needlessly lost to the sea.

WATER SAFETY FACILITY - Continued

A second and somewhat less critical need within the Borough could also be successfully addressed with the addition of a water safety facility. Naknek, South Naknek and King Salmon offer few recreation and leisure-time activities for their residents. The geographic isolation and severe weather conditions further hamper both physical and psychological well being. It is a secondary goal of the school board to offer improved activities which not only provide an outlet for excess energies, but foster physical fitness and well being as well. The installation of a water safety facility would contribute substantially in this effort.

The decision to include a state approved water safety facility in the overall master plan was made following extensive school and community planning meetings. As an integral part of the planning process, a questionaire was circulated throughout the Borough soliciting written comments about school facilities needs. The results supported the response found in public meetings and that was the need for a swimming pool was of foremost importance. (Source: Survey and Analysis of School Facilities Needs in the Bristol Bay Borough School District - South East Regional Resource Center, Juneau, Alaska, September 1982)

SENIOR CITIZENS CENTER

The need for Senior Citizens' facilities throughout the state has increased over the years with the increase in the number of senior citizens.

It behooves us to provide services for the comfort of these valuable members of the community. We need to establish a means for these people to have the companionship of other persons in their age group. Society has the tendency to ignore our seniors and they are frequently left behind in the fast lane life style we have created for ourselves.

THE PLAN

We plan to develop a site plan based on community input to determine exactly the types of facilities to be considered.

As stated preliminary indications are that there is a need for a water safety facility and a senior citizens' center. Additionally it is indicated game and meeting rooms are high priorities along with other types of recreational facilities.

The total cost of these facilities is estimated to be approximately $4,000,000.

We plan to develop these facilities over a four or five year period of time, starting with a basic facility and adding to the facility based on need and the availability of funds.

COST SUMMARY

1. Facility & Site Development Planning

ESTIMATED COST $100,000

PUBLIC FACILITIES

ITINERANT PARK

KING SALMON BOAT RAMP

SOUTH NAKNEK BOAT RAMP

PUBLIC FACILITIES

INTRODUCTION

The Borough is planning three outdoor public facilities for Fiscal Year 1985. One is an itinerant and community park in Naknek and two boat ramps to be located in King Salmon and South Naknek.

NAKNEK ITINERANT AND COMMUNITY PARK

In the summer during fishing season, the Borough has a large influx of itinerant cannery workers and other fish industry oriented workers, plus tourists and other persons seeking employment.

The canneries provide housing for their seasonal employees and a limited number of tourist accomodations. However, there are a great number of individuals who do not have a place to stay.

Since the land around the village is primarily in private ownership, there is no area for these persons to so much as pitch a tent.

Each year the Borough law enforcement officers receive numerous complaints about trespassing and the airport manager must devote a great deal of his time evicting persons camped on areas adjacent to the air strip.

To compound matters there is very little wood available for fire wood. Consequently, persons stealing wood from private wood piles is not uncommon.

In addition to the problems generated by the itinerants, there are no organized picnic or outdoor recreation areas in the village in which residents can have a family or group get together.

THE PLAN - NAKNEK ITINERANT PARK

The Borough has already acquired the property to locate this facility. The plan is to build a 40' x 20' central pavillion to house six barbeque pits and picnic tables, a restroom and shower facility, two small 10' x 20' shelters, gravel pads for tent locations, foot paths, a well and sewage disposal system.

During the period it is not used as a camping facility, the local residents can use it as a community park.

BOAT RAMPS

The idea of boat ramps in King Salmon and South Naknek has been a public request for many years. The only public boat ramp in the area is in Naknek and there is a critical need for such facilities in South Naknek and King Salmon also.

King Salmon is the hub of the tourist trade in our region and many sport fishermen fish the Naknek River in this vicinity. The present boat ramp is used by commercial fishermen and they have in the past dominated the facility.

In addition to small boats that could be using the boat ramp, there also appears to be a demand for a float plane haul out area, as many of the Alaskan sportsmen fly in from other areas throughout Alaska to take advantage of the sport fishing in our area.

In South Naknek we have a different situation. Since we do not have a bridge to span the river, we are forced to transport heavy equipment and supplies across the river via scow or landing craft. This is a tricky situation since the landing craft or scow must beach on the river bank in strategic locations, based on the volume of the tide in the river.

A boat ramp and a small dock could provide a safe and adequate loading and unloading facility.

THE PLAN - KING SALMON

The Borough has obtained a long term public use lease from the Department of Transportation and Public Facilities to acquire the property where the present boat ramp is located.

Our plan is to construct a skid proof concrete launching pad, repair the existing small dock and develop a parking area.

An additional commitment to the public, utilizing this facility, is to provide a means to launch and tie up to the dock. We plan to provide attendant service to control the launching and parking procedure.

THE PLAN - SOUTH NAKNEK

We intend to construct a facility in South Naknek, similar to King Salmon.

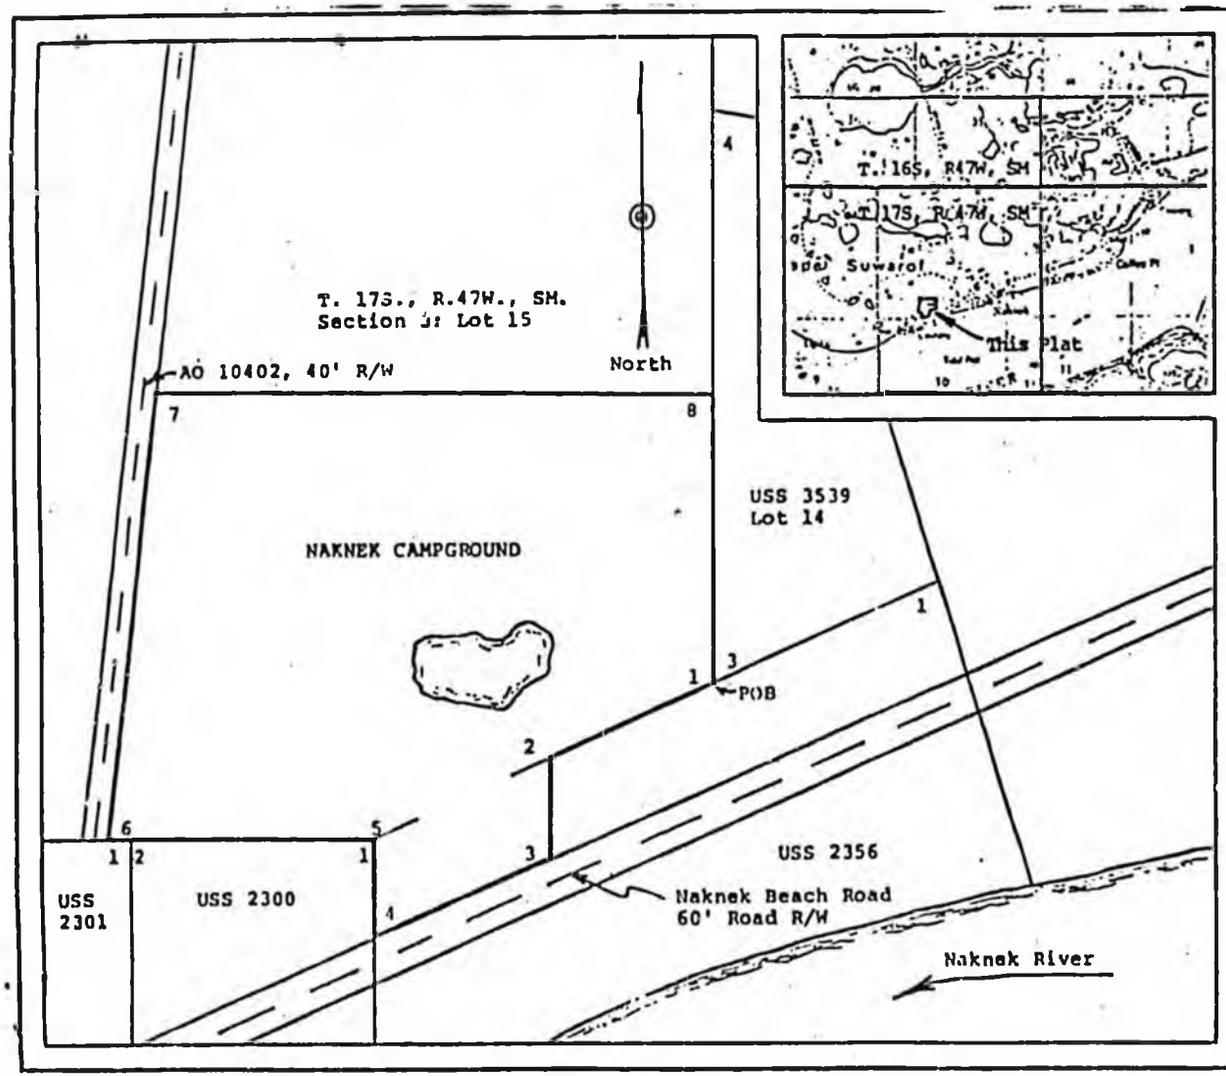
This facility will be designed primarily for industrial use, but can also be used as a tourist facility.

The legislature appropriated $75,000 for a beach access road in Fiscal Year 1984. Our plan therefore, is to be able to provide a dock facility in concert with the access road which will provide us the necessary ramp and dock with access to it.

COST SUMMARY

ITINERANT AND COMMUNITY PARK

40' x 20' Central pavillion	$ 35,000
Restroom shower complex	50,000
(2) 10' x 20' Shelters	15,000
(15) Gravel tent pads	5,000
Foot paths	3,000
30' x 60' Parking lot	5,000
Well	15,000
Sewage disposal system	5,000
Electrical power supply	2,000
Administration and overhead	15,000
TOTAL LEGISLATIVE REQUEST	$150,000



COST ANALYSIS

ITINERANT AND COMMUNITY PARK

The proposed park area consists of 14.5 acres with a small lake in the middle of the park.

Since the area is considered semi-wet tundra, it will be necessary to construct gravel pads and trails to provide a dry area to camp. This cost is reflected in the overall construction of this facility.

Pavillion: 40' x 20' with steel posts, girders and roof. Concrete footings and set on gravel pad. Six (6) tables and six (6) grills.	$ 45,000
Restroom and showers: 20' x 20' metal building with two (2) toilets and two (2) showers each side. The toilets - stainless steel with push button flush. Handrails as required for the handicapped. Small stainless sink on each side. Stainless steel mirror on each side. Overhead lighting.	50,000
Two (2) small steel shelters: 10' x 20' each on gravel pads. Two (2) tables and two (2) grills for each.	20,000
Gravel pads: Ten (10) to fifteen (15) pads, each one to be 10' x 15'. Gravel to be one inch deep.	5,000
Foot paths: Approximately 2,000 linear feet of path, 4' wide and 1' deep.	3,000
Parking lot: 30' x 60' and 18" deep	5,000
Well and sewage disposal	20,000
Electrical power to restroom for lighting and hot water and one (1) yard light.	2,000
TOTAL	$150,000

EMERGENCY WARNING SYSTEM

EMERGENCY WARNING SYSTEM

INTRODUCTION

Due to an expanding population and the development of new areas, the Borough's emergency warning system has become obsolete.

We currently have emergency warning systems in the three villages within the Borough. However, the effective range of these devices are less than 50% and during adverse weather conditions, the effective range may drop to 25% efficiency.

This is a serious problem particularly in the event of a national emergency or natural disaster where it may be necessary to notify the public of the danger.

To compound this problem, the only radio broadcasting station is located in Dillingham 60 miles away, and if this station was disabled, the Borough would be hard pressed to notify residents of any impending danger.

THE PLAN

The Borough recently had our alarm system evaluated by a firm who specializes in community alarm systems.

Based on this evaluation, the recommendations were to relocate two sirens, replace two sirens and install two new sirens in areas currently not covered by the existing system.

Based on the afore mentioned evaluation, we have submitted a grant application to the Federal Emergency Management Agency for a grant to provide funds for 50% of the cost. The request for this item represents the 50% matching funds.

COST SUMMARY

EMERGENCY WARNING SYSTEM

Based on the cost of two new sirens and the relocation or removal of four sirens.

Equipment		$ 28,767
Additional parts		750
Freight		750
Installation labor		15,000

BRISTOL BAY BOROUGH

EXISTING & PROPOSED SIREN RANGES

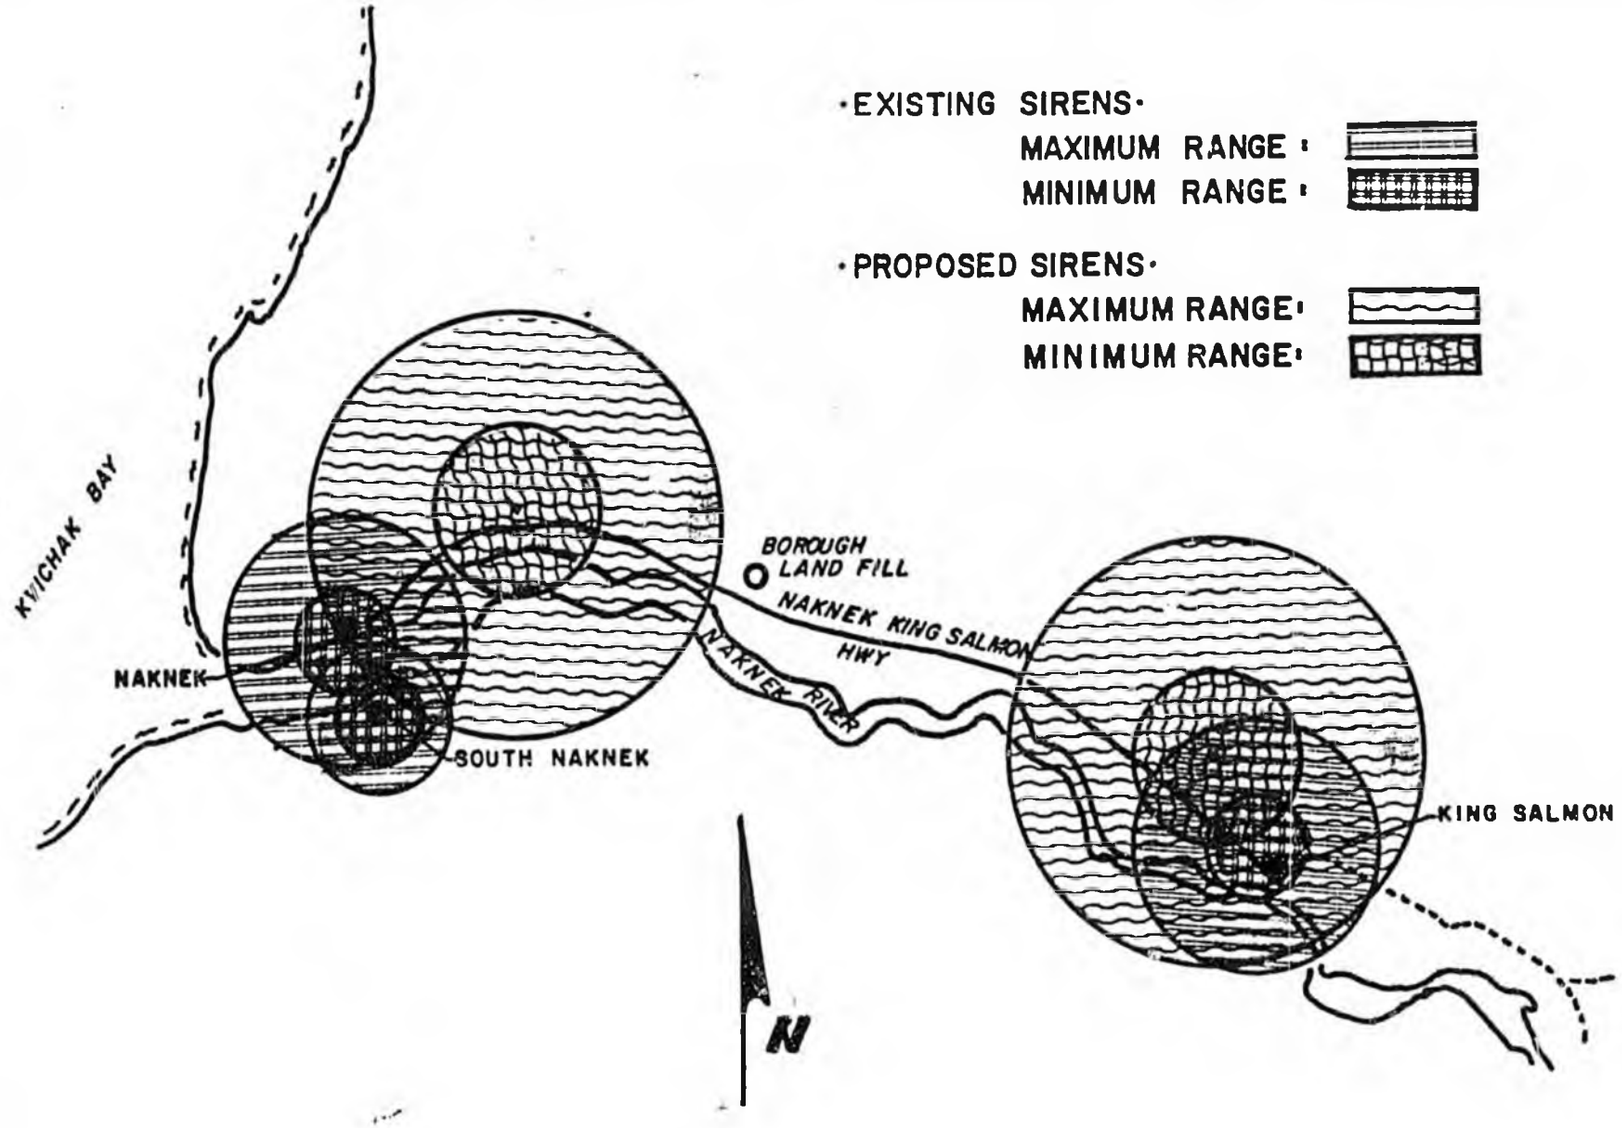

EXHIBIT G

PREPARED BY: RALPH MANCUSO & ASSOC. BOX 181, NAKNEK AK. 99633

NOV, 1983

LEGISLATIVE CONCERNS

FISCAL YEAR 1985

TRANSPORTATION

1. NAKNEK - KING SALMON HIGHWAY

Over the past several years, the Naknek - King Salmon Highway had deteriorated to the point it was almost impassable in sections. However, in the spring of 1983 the local Department of Transportation and Public Facilities upgraded the highway considerably. It is our understanding funds have been allocated for engineering to do major renovation of this highway in the near future. The Borough appreciates the efforts of the Department of Transportation and Public Facilities for their consideration and we support a timely completion of this project for the safety of our residents.

2. KING SALMON AIRPORT TAXIWAY

During the summer months during the height of the commercial fishing and tourist season the airport taxiways are congested to the point a thirty or forty minute wait is not unusual. Therefore, the Borough supports legislation for continuous airport improvements and that such improvements be designated a high priority on the Department of Transportation and Public Facilities' appropriations for capital projects list.

3. SOUTH NAKNEK RUNWAY IMPROVEMENTS

South Naknek's runway is the only year-round transportation link to the outside world and therefore a very important facility in the community. However, the runway is relatively short and has only one approach, thereby limiting its availability to only certain weather conditions. Therefore, the Borough requests the Legislature to place lengthening the existing runway and building a cross-runway as high priorties on the DOT/PFs' appropriation for capital projects.

4. NAKNEK RIVER BRIDGE

South Naknek is separated from the other two communities in the Borough by the Naknek River. This geographic barrier causes a hardship on the people on both sides of the river and a costly duplication of government services. Since South Naknek is the terrestrial link to the Alaska Peninsula, eventually if the petroleum industry is to flourish, a bridge could provide a motor link to the modern airport facilities in King Salmon. Also such a bridge would enhance the tourist industry. They could take advantage of the scenic beauties of the Alaska Peninsula. There are also a number of villages on the peninsula that could benefit from the existence of a Trans-Peninsula road.

From the standpoint of duplication of Borough services, to adequately serve the village of South Naknek, the Borough must provide and maintain expensive road maintenance equipment on both sides of the river. Also since there is not a middle or senior high school in South Naknek, students must be transported daily to and from school via aircraft. All of this duplication is extremely expensive to the taxpayers and the cost of a bridge could be amortized in a few short years.

5. PEDERSON POINT BEACH ROAD

Pederson Point is an area approximately three miles from Naknek which is populated with numerous fishing cabins and a cannery. During the summer several hundred people live around Pederson Point. However, it has no road access. Therefore, the Borough requests the Legislature place the construction of a road from Naknek to Pederson Point as a high priority on the DOT/PFs' appropriation for capital projects.

PUBLIC SAFETY

1. DISTRICT ATTORNEY

The Bristol Bay Borough has passed a resolution in support of establishing a permanent office and staff in the Bristol Bay area.

Crime, alcohol and drug related offenses have increased throughout the region and the area would be best served by a regional office of the District Attorney to prosecute crimes within this region in an expeditious manner, acceptable to the communities' needs and desires.

Therefore, the Borough supports legislative action to establish an office and position in the Bristol Bay region as well as other communities in House District 26.

2. SOCIAL WORKER

The Borough urges the Department of Health and Social Services to provide a full time social worker within the Borough to deal with social problems on a daily basis or as needed.

3. APSIN COMPUTER TERMINAL

The Borough urges the Department of Public Safety to install an APSIN computer terminal in the Borough public safety facilities to be utilized by our police department and the state troopers located within this area.

The Borough would consider sharing the operational and maintenance costs associated with this installation and its utilization.

4. ALL TERRAIN VEHICLES

The Borough urges the Department of Public Safety to implement on a state-wide basis a program developing the safe usage of ATV's. In conjunction with this, the Borough urges that these programs take into consideration the legal ramifications of their operation and safety.

EDUCATION

1. FUNDING FOR DEBT SERVICE

The Borough urges the Legislature to continue to assist municipalities in the retirement of bonds for school construction at a minimum level of 90% of the debt service amount.

2. RURAL EDUCATION

The Borough urges the state to adequately fund Rural Education programs for the Bristol Bay area to meet the communitie's needs from a stand point of trades and advanced education.

TELECOMMUNICATIONS

1. TELEVISION AND RADIO

The Borough urges the Legislature to expand the Division of Telecommunications' budget and thereby their capability to provide more television channels and radio programing to bush communities like the Borough.

NATURAL RESOURCES

1. FISHING

An important factor in the economic development and prosperity of the Borough is the diversification of its fishing industry. Many local fishermen have entered the herring fisheries to supplement their earnings from the salmon fisheries. The development of the herring fishery in Bristol Bay would help create a more stable economic base and present alternate income sources. Therefore, the Borough urges the Legislature to take every necessary step to assure a market for the Bristol Bay herring fishery.

MEMORANDUM

TO: Representative Mike Davis, Member
House Committee on Health, Education
and Social Services

FROM: Representative Adelheid Herrmann

DATE: March 2, 1984

SUBJECT: SSHB 353 -- Special appropriations for rural school design and construction.

Yesterday, you requested th : the Department of Education's FY 85 CIP Priority rating be provided with respect to the schools contained in the above bill. They are:

Section 1. Dillingham elementary school ($2,800,000)
DOE #98 ($2,300,000)

Section 2. Bristol Bay Consolidated High School ($1,800,000)
DOE #32 ($1,777,500)

Section 3. Unalaska Vocational Education Facility ($1,803,000)
DOE #55 (same) -- this rating was prior to the voc-ed building burning down

Section 4. Clark's Point K-12 ($4,430,000)
DOE REAA #9 ($4,500,000)

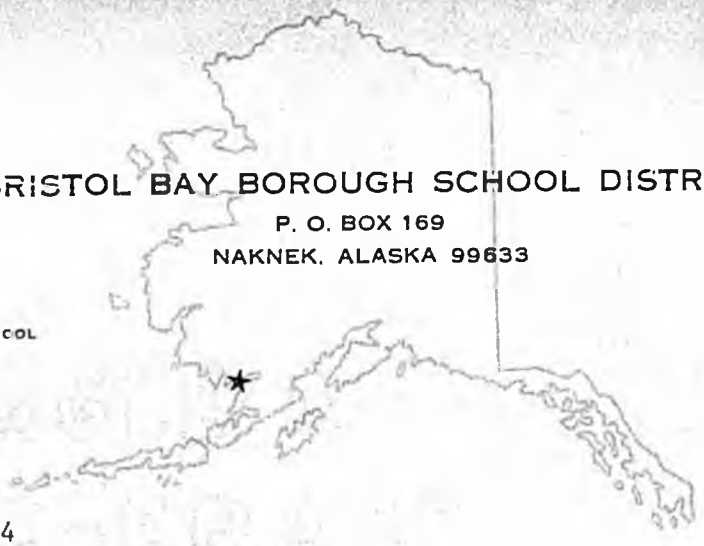
Section 5. King Cove High School ($3,200,000)
DOE #101 ($2,900,000)

Section 6. Manakotak K-12 ($3,500,000)
DOE REAA #32 ($4,500,000)

Section 7. False Pass Elementary School ($2,774,700)
DOE REAA #26 ($3,564,800)

Section 8. St George High School ($1,066,200)
DOE REAA #73 ($2,372,100)

Section 9. St. Paul High School ($4,602,256)
DOE REAA #15 ($8,082,300)



I double-checked with the Department of Education to see if they had any particular comments on the legislation that I could forward to the Committee, as the Department staff was unable to attend the hearing. I was informed that the only position that the Department takes with regard to capital projects was the formulation of the CIP priority list.

Comparing the submissions to DOE with the figures contained in my bill, you will find that the overall costs of the projects have been reduced by approximately $5,803,540. Considering the DOE prioritization process is a statewide compilation, I did not ask that these projects be reprioritized in light of the new submissions.

I am hopeful that this information is helpful to you. If you have any other comments or questions, please let me know.

February 13, 1984

The Honorable Mae Tischer
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Ms. Tischer,

As you are aware, a teleconference on school capital funding is scheduled for Monday, February 20, 1984, and the Board of Education for Bristol Bay Borough School District is currently making arrangements to personally appear at the hearing.

The District is in need of $1.8 million to finance the first phase of a construction/remodeling project for Bristol Bay High School. Initially built in 1968 to accommodate a complete K-12 educational program, the school has since been modified to facilitate a comprehensive high school program. Throughout the modification the high school has evolved from an "open-space" design to a "self contained" classroom design. During the sixteen years since original construction, facility needs have grown beyond the capacity of the original structure. Therefore the District is requesting funds necessary to remedy critical building deficiencies. Identified needs that require immediate attention include: health & life safety, unhoused students, and protection of structure.

Your support for capital funding sufficient to meet these needs would be most appreciated.

I am looking forward to meeting with you and sharing my concerns at the upcoming hearing.

Thank you for your attention and support.

Best regards,

Harry W. Masinton

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making special appropriations to the Department of Education and for payment as grants for rural school design and construction; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $2,800,000 is appropriated from the general fund for payment as a grant to the City of Dillingham for the design and construction of an addition to the Dillingham elementary school.

* Sec. 2. The sum of $1,800,000 is appropriated from the general fund for payment as a grant to the Bristol Bay Borough for design and construction of improvements to the Bristol Bay Consolidated High School.

* Sec. 3. The sum of $1,803,000 is appropriated from the general fund for payment as a grant to the City of Unalaska for design and construction of a vocational education facility.

* Sec. 4. The sum of $4,430,000 is appropriated from the general fund to the Department of Education for the design and construction of a new school at Clark's Point.

* Sec. 5. The sum of $3,200,000 is appropriated from the general fund for payment as a grant to the City of King Cove for the design and construction of an addition to the King Cove school.

* Sec. 6. The sum of $3,500,000 is appropriated from the general fund to the Department of Education for the design and construction of a school addition at Manakotak.

* Sec. 7. The sum of $2,774,700 is appropriated from the general fund

to the Department of Education for the design and construction of a school addition at False Pass.

* Sec. 8. The sum of $1,066,200 is appropriated from the general fund to the Department of Education for the design and construction of improvements and an addition to the school at St. George.

* Sec. 9. The sum of $4,602,256 is appropriated from the general fund to the Department of Education for the design and construction of improvements and an addition to the school at St. Paul.

* Sec. 10. The appropriations made by secs. 1 - 3 and 5 of this Act shall be disbursed in accordance with AS 37.05.315.

* Sec. 11. The appropriations made by secs. 4 and 6 - 9 of this Act are for capital projects and are subject to AS 37.25.020.

* Sec. 12. This Act takes effect July 1, 1984.

RE: SSHB 353 -- special appropriations for rural school design and construction

It has been called to our attention that several of the references in the bill do not clearly identify which level of school will be modified, improved, etc. The following reference may be helpful to you when reviewing the bill.

Section 1. Dillingham Elementary School.

Section 2. Bristol Bay Consolidated High School.

Section 3. Unalaska vocational education facility: Middle and High Schools

Section 4. Clark's Point: K-12.

Section 5. King Cove High School.

Section 6. Manakotak: K-12.

Section 7. False Pass: Elementary School.
Need to amend language to refelct relocation in lieu of "addition"

Section 8. St. George: High School.

Section 9. St. Paul: High School.

HB 353

MEMORANDUM

TO: Representative Mae Tischer, Chair
and Members, House Committee on
Health, Education and Social Services

FROM: Representative Adelheid Herrmann

DATE: February 27, 1984

SUBJECT: HB 353/SSHB 353 - An Act making special appropriations to the Department of Education and for payments as grants for rural school design and construction; and providing for an effective date.

I am attaching some information for your review which I hope will be of assistance while you consider the above legislation. The following material is enclosed:

1. The school/school district name and superintendent who will be testifying on the project.

2. A quick reference of community-school/school district-project and requested appropriation.

3. A section-by-section comparison of HB 353 and SSHB 353 which provides a brief explanation of the project.

4. Background information submitted to me by the schools/school districts on behalf of their requested proposals.

If you have any questions on the enclosed information, please let me know and I will get back to you.

MEMORANDUM

TO: Representative Mae Tischer, Chair
and Members, House Committee on
Health, Education and Social Services

FROM: Representative Adelheid Herrmann

DATE: February 27, 1984

SUBJECT: SSHB 353 - Special Appropriations to the Department of Education and for payment as grants for rural school design and construction; and providing for an effective date.

On Wednesday, February 29th, the House HESS committee will be sponsoring, at my request, a teleconference on this bill. The following are expected to testify at this time:

Aleutian Region School District -- Dick Bowers, Superintendent

Bristol Bay Borough Schools -- Harry Masinton, Superintendent

Dillingham City Schools -- LeRoy Owens, Superintendent

King Cove City Schools -- Ben Kirker, Superintendent

Pribilof School District -- Leland Dishman, Superintendent

Southwest Region Schools -- Peter Flisock, Superintendent

Unalaska City Schools -- Bob Denny, Superintendent

These individuals, and some School Board Members, will be available to answer any questions that you may have on their respective requests. I am enclosing some background material on their proposed projects for your reference. If you have any particular concerns that you would like for me to answer, please let me know.

Thank you for your attention to this request.

REPRESENTATIVE ADELHEID HERRMANN

SSHB 353 -- Special Appropriations to the Department of Education and for payment as grants for rural school design and construction; and providing for an effective date.

The following is a brief outline by Section of the community listed and the responsible entity charged with jurisdiction of school modifications.

Section 1. Dillingham -- Dillingham City Schools -- elementary school addition: $2,800,000.

Section 2. Naknek -- Bristol Bay Borough -- Bristol Bay Consolidated High School improvements: $1,800,000.

Section 3. Unalaska -- Unalaska City Schools -- vocational-education facility: $1,803,000.

Section 4. Clark's Point -- Southwest Region Schools -- new school for Clark's Point: $4,430,000.

Section 5. King Cove -- King Cove City Schools -- school addition: $3,200,000.

Section 6. Manakotak -- Southwest Region Schools -- school addition for Manakotak: $3,500,000.

Section 7. False Pass -- Aleutian Region School District -- school addition for False Pass (Tobeluk Decree): 2,774,700.

Section 8. St. George -- Pribilof Islands School District -- school addition for St. George: $1,066,200

Section 9. St. Paul -- Pribilof Islands School District -- school improvements/addition at St. Paul: $4,602,256.

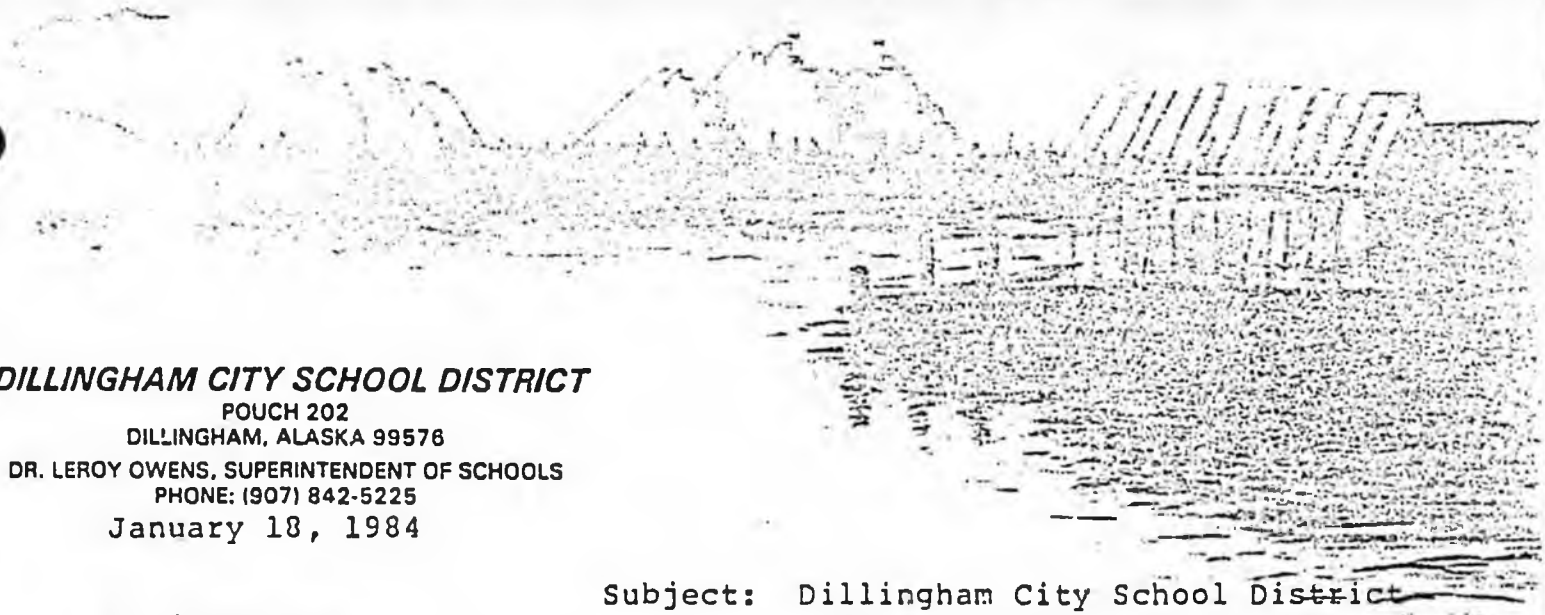
Section 10. Appropriations for municipalities.

Section 11. Appropriations for unincorporated communities.

Section 12. Effective date.

JR/s

REPRESENTATIVE ADELHEID HERRMANN
HB 353/SSHB 353



SECTION	PROJECT	HB 353	SSHB 353	RATIONALE
1	Dillingham elementary school addition	$ 6,000,000	$ 2,800,000	SSHB 353 deleted the reference to middle school and accepted the reduced figure which would take care of the immediate concern of alleviating the over-crowding of classrooms; returning the 6th grade class back to the elementary school. Classes are now being conducted in the hallways and stage area -- the latter to be modified as a music classroom.
2	Bristol Bay Consolidated High School -- Naknek	1,800,000	1,800,000	Phase I of a 3 Phase project. This would allow for classroom addition, Instructional Media Center, locker rooms/storage and an administrative office area. The construction would allow for future expansion.
3	Unalaska vocational-education facility	2,500,000	1,803,000	In the city's five-year plan, the vocational-education has been presented in two phases. This amount represents the initial phase which are mechanics, metals and general shops; art classroom, office and storage area.
4	Clark's Point: new school	4,430,000	4,430,000	The current building was built in 1946 and requires extensive upgrading to meet fire and building code standards. It is also undersized for program and enrollment demands. While a higher figure of $5,475,000 has been recommended, the lower amount will go a long way in making the necessary changes.
5	Levelock vocational-education facility	5,200,000	-0-	Deleted in SSHB 353. $2,035,000 was appropriated to this project last year.
	King Cove school addition	2,900,000 Section 8	3,200,000	HB 353 has this project in the amount of $2,900,000 which has been revised upward to $3,200,000 in SSHB 353. This change is a result of modifications to the overall scope of the project, including elimination of certain spaces, omission of the remodel portion and a decrease in the overall square footage.

SECTION	PROJECT	HB 353	SSHB 353	RATIONALE
6	Akutan: new school	$ 2,258,000	$ -0-	Deleted in SSHB 353. The Governor has it in his budget at $667,000. Tobeluk Consent Decree (Molly Hootch)
	Manakotak school addition	3,500,000 Section 9	3,500,000	Additional classroom space is needed and the building requires remodeling upgrade and a lunch room/kitchen facility.
7	Adak middle/high school improvements	993,500	-0-	Deleted in SSHB 353. As the Adak school serves the military, the state has been reluctant to fund any facility located on federal property.
	False Pass school addition **relocation**	2,774,700 Section 10	2,774,700	Although a higher cost estimate ($3,564,750), the lower figure has been maintained in this submission. Although the Governor has submitted $785,000 in his budget as a result of the Tobeluk Consent Decree, it is felt that more money is needed in order to accommodate the growing enrollment at False Pass. Due to an oversight, the language should be amended to reflect relocation instead of addition to school.
8	King Cove school addition	2,900,000	3,200,000 Section 5	See Section 5 for comment.
	St. George school improvements and addition	-0-	1,066,200	The School District has restructured the plan to reflect the minimum amount necessary to make needed changes. This phase includes remodeling of existing area.
9	Manakotak school addition	3,500,000	3,500,000 Section 6	See Section 6 for comment.
	St. Paul school improvements and addition	-0-	4,602,256	The School District has restructured the plan to reflect the minimum amount necessary to make needed changes. This phase is comprised of a combination of remodeling and new construction, including soil testing and land survey.

SECTION	PROJECT	HB 353	SSHB 353	RATIONALE
10	False Pass school addition	$ 2,774,700	$ 2,774,700 Section 7	See Section 7 for comment.

The remaining sections have been modified to reflect funding source.

The effective date clause has been changed to July 1, 1984.

DILLINGHAM CITY SCHOOL DISTRICT

Subject: Dillingham City School District
Elementary/Office Facility
Capital Construction Project
Submitted to 1984 Legislature

Legislators
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Legislators:

Enclosed is a presentation of the Dillingham City School District Capital Construction Request to the 1984 Legislature. Included are excerpts from the District's Long Range Plan as well as statistics gathered to indicate expected growth of the school population for the next 10 years. Even the most conservative projection more than justifies the enclosed elementary addition and office facility. This plan is intended to meet the elementary population growth expected in the next five years. The District projects the building of a middle school structure that could extend the usability and the adequacy of the proposed elementary space for several more years. Including the central office facility in the capital construction request provides a means for the City to locate its school offices in functional proximity to its schools and to allow for the renovation of the old district office (an old condemned school) for other badly needed community functions. Thus, the projected cost of $4,200,000 will provide the community with much needed student space, while allowing the community to organize its functions of city government as well as school operation in a logical and cost-effective manner.

This proposal has the whole-hearted support of the entire community, and is the top priority of both the City Council and School District Board. Although Dillingham has many critical needs for public projects, it has a deep commitment to its children and has placed their education as the highest priority for its legislative capital construction request.

This proposal, then, is presented with the combined support and effort of the entire Dillingham community. We submit it for your consideration and support.

Sincerely,

LeRoy Owens, Superintendent, for
Dillingham City School Board and Dillingham City Council

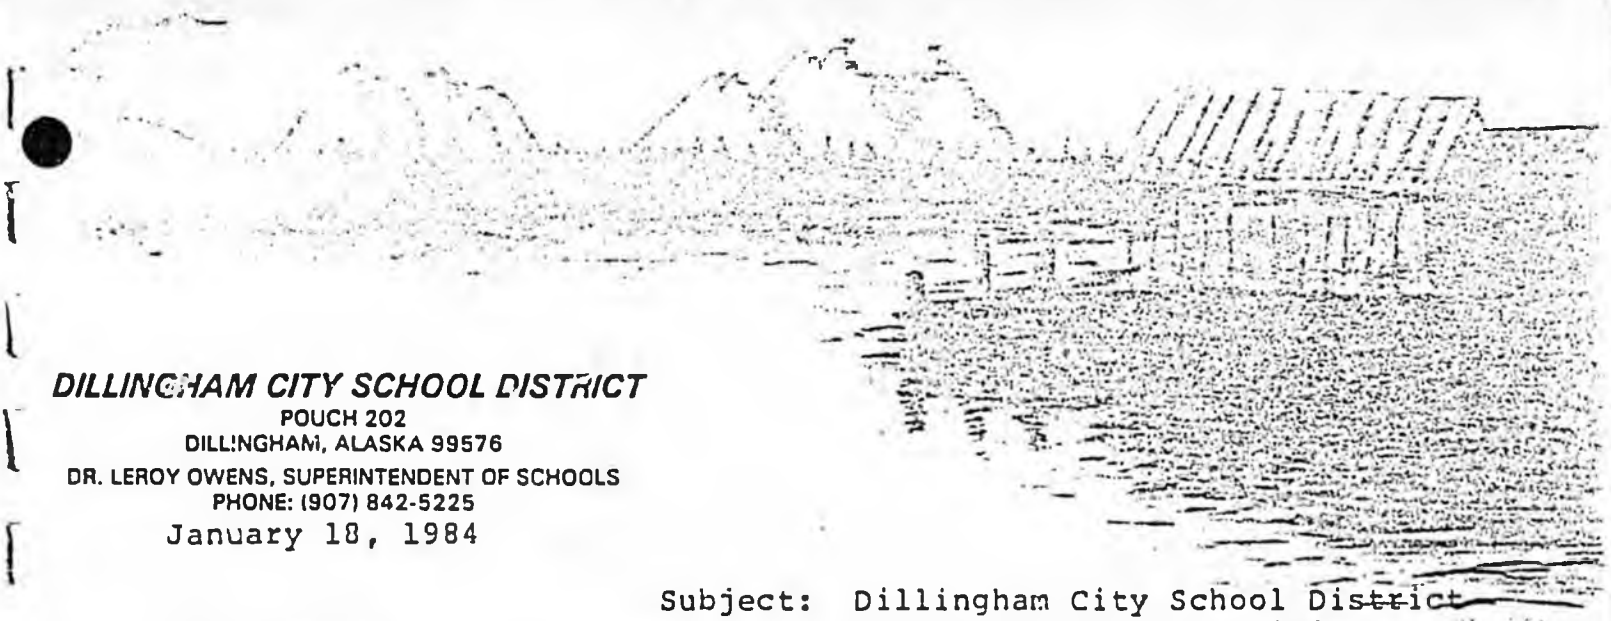
February 8, 1984

Representative Adelheid Herrmann
Alaska State Legislature
Pouch V
Juneau, Alaska 99811



Dear Representative Herrmann:

Attached is a copy of the completed schematic drawings and backup material in support of the Dillingham City School District and City of Dillingham top priority for capital improvement funding from the 1984 legislature.

Note that the school district originally requested $ 2,000,000 to complete the first phase of a long range plan that includes waste heat recovery funding, middle school facilities construction, a life safety pool facility, and upgrading of school facilities to include music and drama, practice and performance areas as well as improved and expanded outside playground areas.

The attached elementary and central office facilities plan projects a potential cost of $4,200,000, if all items included in the proposal were to be completed. The City Council and School Board feel that they can complete Phase I of the long range program within the $2,000,000 amount originally proposed. We realize that completing items like central kitchen, site and playground development and some other items may not be completed within this amount, but can be requested in subsequent proposals in future years.

It is important to note that along with the $2,000,000 top priority proposal of the elementary/central office facility, the school district also has a waste heat recovery item in the amount of $600,000 that received favorable placement on the Governor's budget list. The success with our past heat recovery project in our elementary school has pointed up the great advantage in using this approach to energy savings. With this in mind, the heat recovery proposal makes a lot of sense to us.

INTRODUCTION

This document is a presentation of the schematic design for an addition to the Dillingham Elementary School and a new central office building for the Dillingham City School District.

The City of Dillingham is located on the Nushagak River in northern Bristol Bay. The present population is about 60% white and 40% Native. The economy is based on commercial fishing and fish processing, and since 1960 Dillingham has grown rapidly as the fishery has expanded. Dillingham is the largest town in the Bristol Bay area, the only first class city, and is the economic and service center of the region.

The rapid growth of the past few years has created severe overcrowding in the elementary school. The addition will accommodate the additional children. A new kindergarten classroom will be provided, as well as a multi-purpose room, music areas, and four classrooms for the upper grades.

The new central office building will house school district personnel, whose present offices are being pre-empted by City government. The building will also include a central kitchen to provide hot lunches for elementary, middle school, and high school children.

Existing building utilities consist of an oil fired boiler system, hydronic distribution, and a mechanical ventilation system. Waste heat from nearby Nushagak Electric supplies the elementary school's heating requirements. It is expected that the waste heat system will continue to be used with the new addition. The addition will include remote fan rooms for ventilation at the kindergarten wing.

The enlarged school will serve a projected enrollment of approximately 300 students. The facility is also programmed for community use: evening education, aerobic exercise, recreation, festivals, meetings, and small theatrical productions.

The documents contained in this report have been organized into sections corresponding to individual architectural/engineering disciplines and other pertinent subject areas.

1.0 Scope of Work

1.1 The basic scope of work at this phase of design is defined below. Should the project construction cost estimate change during subsequent design phase the scope of work will change also.

1.2 The existing Elementary School building consists of 25,250 square feet of floor area on the main level. The addition consists of 11,850 square feet of floor area added to the east and west ends of the existing structure. A potential for 4,000 square feet will be provided for storage above the new classrooms in the attic space. Some of this area may also be used for remote fan rooms.

2.0 Basis of Design

2.1 Architectural:

2.1.1 General: The new school structure is a concrete slab on grade, wood frame building of one story providing an educational program area for primary elementary school students. The school is designed in separate zones as follows: Four classrooms added to the southeast corner of the building for upper grades, 4 and up. Added to the west end of the building is a multi-purpose room, music room, and kindergarten areas. A storeroom for the gynasium and instructional materials is also incorporated. Providing of the additions in this fashion uses a minimum of available site area leaving as much site as possible for exterior play yards. It is a compact arrangement with minimum exterior wall construction versus a enclosed floor area. It is anticipated that the existing boiler room and mechanical room will provide support for the additions. However remote ventilation equipment will be located above the ceiling in the two areas of the addition.

The location of the new kindergarten addition allows for direct exterior access to their play area. The addition of the four classrooms on the southeast will require removal of an existing covered entry structure. This structure has not proven useful and has become an operating liability. The recontouring of the site near the main entry will remove the outdoor stair hazard and will give children a pleasant pedestrian approach to the school's front door.

2.1.2 The Building Site and Master Plan:

1. Location: The project is an addition to the existing elementary school. The proposed new roof design shall attempt to minimize problems from drifting snow entering the attic at the north eave and snow building up on the lee side of roof area.

2. Master Plan: The addition is sited and designed to allow for possible future expansion on the east end. The addition is also been considered in light of a master plan prepared earlier by the architect which depicted an overall plan for the School District showing a central kitchen, and central office facility extending into Middle School area and a future swimming pool.

3. Utilities: The building is sited near a waste heat line that is supplied by Nushagak

Electric's generating facility. Thid waste heat system will continue to supply heating for the school and the new additions. On-site oil storage for the buildings boilers will be maintained.

2.1.3 Building Technologies, Assemblies:

1. Floors: Hallways and classrooms to receive carpeting. Multi-purpose Room and wet areas in classrooms shall receive resilient vinyl tile. Entrance ramp and vestibules to have sealed concrete.

2. Wall Assemblies: Conventional wall assemblies are proposed utilizing painted gypsum board for fire protection. The heavy vapor barrier, wood studs, plywood sheathing for structural shear on the exterior, building paper and plywood siding to match the existing building will be provided.

3. Roof Assembly: The roof assembly consists of manufactured wood trusses, plywood deck with corrugated metal roofing to match the existing building in profile and color. This system will incorporate fiberglas batt insulation between the trusses with a vapor barrier attached to the furring below with gypsum wallboard forming a fire resistant skin beneath.

4. Windows: The existing window system is a double glaze aluminum frame set into decorative wood mullions at 6'0" on center. The Additions will employ similar matching window details with aluminum thermalbreak sash, insulating 1" glass, with some small operable windows. The architects will investigate available glazing systems to assure that a unit with minimum air infiltration will be selected.

5. Exterior Door Assemblies: Exterior door assemblies will have double steel doors with glazing panels with a possiblity of some of

the existing building exterior doors to be reused. Other exterior doors shall be painted steel.

6. Interior Door Assemblies: Interior doors will be hollow metal frames and of a 3' width unless design dictates specific needs for a wider door.

7. Interior Finishes: Interior finishes will generally adhere to the existing building's system of smooth texture gypsum wallboard and carpeting along the wainscot of the corridors and coat storage areas. Carpeting will be supplied for corridors and classroom floor areas with some classroom areas receiving a resilient vinyl flooring as shown on the floor plans.

8. Toilet Rooms: Floors shall be ceramic tile with ceramic tile base and walls. Fixture partitions shall be painted steel.

STRUCTURAL NARRATIVE

GENERAL

The scope of work under this section is to provide the structural design for the expansion of the Dillingham Elementary School in accordance with all applicable State and local building and fire codes.

STANDARD

All materials and methods shall conform to the latest rules, regulations, and/or specifications of the following authorities:

American Society for Testing Materials (ASTM)
American Concrete Institute (ACI)
American Institute of Steel Construction (AISC)
American Welding Society (AWS)
National Board of Fire Underwriters (NBFU)
American Institute of Timber Construction (AITC)
Uniform Building Code (1982)
American Plywood Association (APA)

STRUCTURAL FEATURES:

1. General:

   The existing structure is cut into a sloping site. The natural grade on the uphill side of the building is several feet above the finish floor level of the building. The classroom expansion will be constructed on this uphill side of the existing building, therefore the use of concrete retaining walls is anticipated. Also, the removal of earth and recontouring will be needed to keep the exterior grades around the classroom expansion to a desirable level.

   The new structure will be tied into and act as a unit with the existing structure in the event of seismic or wind action. The framing and foundation materials will be identical to the existing building to insure that the structures act with the same rigidity.

2. Foundation:

   The foundation of the structure will consist of concrete strip and spread footings to distribute loads to the soils. We anticipate some soil testing beneath the new construction and recommendations from a Geotechnical Engineer on allowable foundation loads will be forthcoming from the School District during prior to the next phase of design.

The first floor will consist of a concrete slab on grade. Concrete retaining walls, both cantilevered and buttressed will be utilized where the floor level is below the exterior grade.

3. Framing System:

Roof and mezzanine loads will be supported by load bearing, wood framed walls and where required, glu-laminated beams and columns. Plywood sheathing with the appropriate nailing patterns will be utilized to resist wall shears caused by lateral loading.

4. Mezzanine Floor System:

Mezzanine floors will required for additional mechanical space and may also be utilized as storage areas. Both mechanical equipment and storage items require a very strong floor system. Primary floor framing will span between load bearing walls. Plywood floors will serve as a diaphragm to transfer seismic and wind loads to the shear walls.

5. Roof:

Roof loads shall be carried by wood/metal open web joists spanning between load-bearing walls. Lateral loads at the roof line shall be carried by the plywood deck acting as a diaphragm to distribute lateral loads the shear walls. Special attention will be given to snow loadings and the potential for drifting on lower roof surfaces.

DESIGN LIVE LOADS

1. Roof, Snow Loads: 35 psf plus drifting

2. Floor:

Classrooms	100 psf
Corridors and Stairs	100 psf
Mezzanines and Storage	125 psf

3. Wind: UBC, 100 mph

4. Seismic: UBC, Zone 2

Design loads may be modified as site information is collected.

MECHANICAL NARRATIVE

GENERAL

The proposed project is an ±11,000 ft² addition and ±1300 ft² remodel to the existing elementary school building located in Dillingham, Alaska. The addition will house classrooms, toilets, storage, music room, multi-purpose room and an expansion of the mechanical room. New systems and materials will match existing and be compatible to ease maintenance and operations.

MECHANICAL SPACE REQUIREMENTS

Additional space requirements for new mechanical equipment as well as the need to relocate existing boilers for code required clearances require approximately 300 ft² of additional mechanical space in the existing boiler room/fan room, and a new 400 ft² fan room in the attic space of the new addition.

CODES AND STANDARDS

Mechanical systems will be designed to comply with all current codes and standards including:

Uniform Building Code (UBC), 1982 Edition
Uniform Mechanical Code (UMC), 1982 Edition
Uniform Plumbing Code (UPC), 1982 Edition
Uniform Fire Code (UFC), 1982 Edition

HEATING AND VENTILATION SYSTEMS

1. General:

   Heating will be accomplished by perimeter finned tube radiation with fan coil units in entries. Ventilation will be provided by new air handlers designed to supply a minimum 5 cfm/person outside air, 15 cfm/person total air. Toilets will be exhausted at the rated of 8 air changes/HR. Space air temperatures will be maintained at 70°F (adjustable). During periods of non-use, i.e., nights and weekends, ventilation will be shut down by timers.

2. Heating:

   Two additional circulating loops with pumps will be added to the existing boilers. The added load will reduce the effect of the boiler so that both boilers will have to be operated in cold weather to maintain 70°F, although one boiler alone will prevent freezing in the building upon failure.

3. Heat Recovery:

The existing heat recovery equipment will be expanded as necessary to take full use of available waste heat. All new heating units will be designed to operate effectively with the low grade waste heat. The domestic hot water system will be connected to the heat recovery system.

4. Air Distribution:

Two new fans will provide ventilation. One will serve the southeast addition, one will serve the southwest addition. Fans will be operated by 7-day time clocks. Supply air will be routed through ceiling spaces. Fan rooms will be located above the prospective additions.

5. Exhaust Air Systems:

Toilet room exhaust will discharge to the outdoors through the roof.

6. Humidification:

No humidification system will be provided.

WATER AND SEWER

1. Cold Water:

The existing cold water main is sufficient in size for the new additions. New branch lines will be connected to the existing main inside the building.

2. Sewage:

Two new 4" sewer lines will be installed for the new plumbing fixtures, one for each addition, all connecting to the 6" main on the building exterior.

3. Domestic Hot Water:

Additional hot water requirements can be satisfied by connecting the domestic hot water system to the heat recovery system, to provide back-up for the existing hot water heaters, and to reduce overall fuel consumption.

ROOF DRAINS

No roof drains will be provided. Natural runoff from sloping roofs is the condition for the building additions.

FIRE DETECTION AND PROTECTION SYSTEMS

The existing sprinkler riser is of sufficient capacity to incorporate the addition. New branch lines to the additions will be provided.

A smoke detector system will be provided on each air handling system. Fire dampers will be used on duct penetrations through fire rated partitions.

ELECTRICAL NARRATIVE

SERVICE

The existing 120/208V, 30, 4W utility service from a pole-mounted transformer on the site form an aerial service from the existing power line and will be enlarged to handle the new addition. The existing main switchboard will be used to provide all power requirements for addition. Switchboard is rated 800A, and the existing 600A main breaker will be resized to 800A.

SECONDARY DISTRIBUTION AND BRANCH WIRING

The necessary service equipment is located in the mechanical room, with necessary main devices. Branch circuit panelboards are in the same vicinity, with insulated copper conductors in conduit to the various items of utilization equipment, such as lighting, convenience outlets, and motors. All wiring devices shall be heavy duty, specification grade, of nylon or other high abuse material.

EMERGENCY LIGHTING

Emergency lighting will be provided from existing emergency generator and located to properly illuminate the exitways. Consideration shall be given to self illuminated exit signs requiring no external hookup.

STANDBY POWER

A 30KW, 102/208V, 3Ø diesel-driven engine generator set has been provided to power the entire facility in the event of a utility power failure. This will be accomplished automatically with the necessary transfer switches and interlocks with utility power to prevent coincident power supply to the facility.

LIGHTING

Flourescent fixtures will be utilized as much as possible with industrial type or open strips in utility spaces, and architectural up-lights to match the existing classrooms and corridors. Fixture type will be coordinated with the anticipated ceiling material and the interior design concept of the facility. IES recommended criteria will be utilized in all areas, and it is anticipated that if budget allows, additional lightin may be added to existing classrooms where needed. Necessary site lighting for adequate exterior security lighting will be provided to suit the site extension.

TELEPHONE SYSTEM

Space will be provided for telephone system. A conduit-only system will be provided within the school addition to various phone locations as determined by the Architect.

FIRE ALARM SYSTEM

A fire alarm system is installed in this occupancy. A complete supervised, closed circuit, zoned initiating circuits with battery standby has been provided. Existing system will be intertied with the new fire alarm system.

CLOCKS

Battery operated clocks will be provided in the classrooms.

INTERCOM SYSTEM

An intercom system has been provided for administrative to classroom communication and public address. New intercom systems will be intertied with the existing system.

MISCELLANEOUS SYSTEM

Receptacles and special purpose outlets will be provided as required for necessary equipment.

GROUNDING SYSTEM

Each dry type transformer within the addition shall be grounded, by conductors, to building ground. All branch circuits will have a metallic grounding conductor.

1.0 Scope of Work

1.1 The scope of work at this phase of design is defined below. Should the project construction cost estimate change during subsequent design phases the scope of work will change also.

1.2 The central office and kitchen building consists of 5,525 square feet of office space on the main level. The lower level consists of 5,525 square feet of kitchen and storage space. These areas include such functional requirements as mechanical rooms, toilet, and stairs.

2.0 Basis of Design

2.1 Architectural:

2.1.1 General: The new central office structure is a two story, concrete slab on grade, wood frame building. One floor is organized to accommodate the administrative offices, the other floor accomodates a central kitchen and storage functions. The office area will provide offices for the superintendent, assistant superintendent, business manager, maintenance supervisor, and a conference room. Workspaces for bookkeeper, payroll clerk, accounts payable clerk, secretaries and receptionist are provided adjacent to the offices. Rooms for mail sorting, office supplies, and a computer are provided. Restrooms and a public waiting area comprise the remainder of functions of the upper floor. The lower floor provides a truck loading dock set into the sloping grade of the site. This dock serves both to receive district supplies as well as distribution of meals as produced by the kitchen. The kitchen is provided with a hot cart parking area with cooler and freezers adjacent. Storage and boiler room complete the functions accommodated on this level. Access to the office level will be from the parking area common to the high school with vehicular access to the loading provided by a new roadway as defined in the Master Plan document.

2.1.2 The Building Site and Master Plan:

1. Location: The project is located to the south of the elementary school on adjacent property. This provides convenient transfer of meals while assuring that the identity of administrative functions remain separate from the elementary and high schools.

2. Master Plan: The building is sited to allow expansion and yet remain compatible with the possible future construction of a middle school and swimming pool facility. Additionally the sloping site has been used to reduce effects from vehicle traffic into and from the kitchen remaining separate from the schools arrival-delivery and parking areas. This eliminates student walkways conflicting with truck traffic.

3. Utilities: This project has the potential of being connected to the waste heat line but will be provided with oil storage tank for the buildings boilers. Telephone, power, water, and sewer are available close by but

may require extensions of existing service lines.

2.1.3 Building Technologies, Assemblies:

1. Floors: Flooring in first floor storage areas shall be hardened concrete with sealer. Floors in the food handling and kitchen areas shall receive a non-skid quarry tile. Floors in the office areas shall be carpeted. Toilet rooms shall receive ceramic tile floors and base.

2. Wall Assemblies: Exterior wall construction in retaining condition will be concrete with insulation and damp proofing applied to the exterior. Walls above grade shall be of wood framing, plywood sheathed with an infiltration barrier and horizontal cedar siding applied to the exterior. Interior components of the wall assembly shall consist of fiberglass insulation, vapor barrier and gypsum wallboard. Toilet room areas shall have water resistant gypsum wallboard as back up for ceramic tile wall finish. Interior partition assemblies shall be wood studs, sound board, and gypsum wallboard with paint and wall fabric finishes.

3. Roof Assembly: The roof assembly consists of wooden roof trusses spanning between primary beams. Gypsum wallboard applied over a vapor barrier serves as interior finish. Fiberglass insulation, vented at the perimeter, and a plywood deck with a metal roof comprise the exterior materials, in an assembly known as a cold roof i.e., no direct thermal conductivity to the roof surface continuous with the insulation layer.

4. Windows: The window system shall be a double glazed, thermal break, aluminum frame system with operable casement units provided with a system of fixed mullion glazing. Glazing shall be clear float glass in 1" dimension with 1/2" insulating airspace between panes.

5. Exterior Door Assemblies: Exterior door assemblies will be painted steel frames with painted steel doors with tempered glass vision inserts at entrances. Loading dock

shall have sectional upward acting insulated steel door.

6. Interior Door Assemblies: Interior door assemblies shall be hollow metal frames of 3' width with rotary cut red oak doors in office areas. High frequency doors in kitchen shall have spring return hinges and suitable stainless steel protective plates attached to wear zones.

7. Interior Finishes: Interior walls in office space shall be painted with accent walls given application of wall fabric. Kitchen walls to receive semigloss enamel paint system. Floors in office areas shall be carpeted. Toilet room finishes shall be ceramic tile floors and walls, stainless steel fittings and partitions. Kitchen finishes shall be stainless steel and quarry tile.

STRUCTURAL NARRATIVE

GENERAL

The scope of work under this section is to provide the structural design for the construction of the Dillingham City School District Office and Kitchen Building in accordance with all applicable State and local building and fire codes.

STANDARDS

All materials and methods shall conform to the latest rules, regulations and/or specifications of the following authorities:

American Society for Testing Materials (ASTM)
American Concrete Institute (ACI)
American Institute of Steel Construction (AISC)
American Welding Society (AWS)
National Board of Fire Underwriters (NBFU)
American Institute of Timber Construction (AITC)
Uniform Building Code (1982)
American Plywood Association (APA)

STRUCTURAL FEATURES:

1. General:

   The structure as proposed will have a full basement which will be daylighted on the west side to allow for an at-grade loading dock. The second floor will consist of school district central office space and conference areas. An open ceiling is anticipated which will include skylights.

2. Foundation:

   The foundation of the structure will consist of concrete strip and spread footings to distribute loads to the soils. Allowable soil loads would determined by a soils investigation and recommendations by a Geotechnical Engineer. The basement walls of the structure will be cast-in-place reinforced concrete. The concrete walls will have the required strength to resist the lateral soil pressures against them and the durability needed around the loading dock area.

3. Framing System:

   Roof and main floor loads will be supported by load bearing, wood framed walls and where required, glu-laminated beams and columns.

Plywood sheathing with the appropriate nailing patterns will be utilized to resist wall shears caused by lateral loading.

4. Floor Framing:

The main floor will consist of plywood on wood truss framing members. The location of bearing walls and columns in the basement will dictate the depth and spacing of the trusses. A good stiff floor is important in an office environment and will be provided through proper thickness of the plywood and selection of trusses. The floor diaphragm will also resist lateral loading from wind and seismic events.

5. Roof:

The roof system will be a heavy timber system composed of the heavy timber glu-lam beams and a tongue and groove decking. It is anticipated that the tongue and groove planks will be exposed to the inside, and the insulation will be on the exterior. The beams will carry the roof loads to posts located within bearing walls. The decking will serve a diaphragm to carry lateral loads to the shear walls.

DESIGN LIVE LOADS

1.	Roof, Snow Load:	35 psf plus drifting
2.	Floor:	
	Office Areas	50 psf
	Corridors and Stairs	100 psf
	Mezzanines and Storage	125 psf
3.	Wind:	UBC, 100 mph
4.	Seismic:	UBC, Zone 2

Design loads may be modified as site information is collected.

MECHANICAL NARRATIVE

GENERAL

The proposed project is a new ±8900 ft² two story building located in Dillingham, Alaska. The lower level will be kitchen, storage, and mechanical room and the upper level contains office areas, restrooms, and mechanical room.

MECHANICAL SPACE REQUIREMENTS

Mechanical space requirements for a building of this type will approximate 400 square feet. Housed in the lower mechanical room will be two boilers, circulating pumps, domestic hot water heater and storage tank. The upper level mechanical room will house the ventilation fan for the building area. Space in both mechanical rooms will be available for electrical equipment.

CODES AND STANDARDS

Mechanical systems will be designed to comply with all applicable codes and standards, latest adopted editions including:

Uniform Building Code (UBC), 1982 Edition
Uniform Mechanical Code (UMC), 1982 Edition
Uniform Plumbing Code (UPC), 1982 Edition
Uniform Fire Code (UFC), 1982 Edition

HEATING AND VENTILATION SYSTEMS

1. General:

   Temperatures and supply and exhaust air change rates will be maintained at the following levels:

Office areas:	72 degrees F (adj)	4 AC/HR
Conference room:	72 degrees F (adj)	8 AC/HR
Toilets:	70 degrees F (adj)	8 AC/HR
Storage:	68 degrees F (adj)	2 AC/HR
Kitchen:	70 degrees F (adj)	Make-up Air

2. Air Distribution:

   The ductwork will be routed through the lower ceiling spaces for both levels. The fan will have a outside air connector for fresh/cooling air. A seven day time clock will cycle fan off during non-use periods.

3. Heating:

Perimeter baseboard with individual room zones will provide heating. Glycol will be used.. Fan coil units in entries and near loading dock will provide quick pick-up heating to offset periodic large infiltration rates. One of the two boilers will provide 100% standby capacity. Main circulation pumps will be shut off automatically when outside air temperature is 60°F (adj) or above.

4. Exhaust Air System:

Toilet areas will be exhausted direclty to the outdoors. The kitchen range exhaust will be through the roof, with a roof mounted exhaust fan. The ductwork will extend from the kitchen to the roof in a properly designed 1 HR shaft.

WATER AND SEWAGE SERVICE

A new 4" sewer and 4" cold water service will be required. The water line will connect to the existing 6" transite main serving the grade school. New services will be coordinated with local authorities.

PLUMBING SYSTEM

Toilet fixtures will be wall hung flush valve type for reliability and sanitation. Kitchen waste line will have back flow prevention to eliminate any potential sewage in kitchen area. A grease trap will be provided. The cold water main will be 2".

DOMESTIC HOT WATER

A large storage hot water heater will be provided to accommodate dishwashing. A supply temperature of 140°F will be available for dishwasher. A separate oil fired hot water heater will be used.

FIRE DETECTION AND PROTECTION SYSTEMS

An automatic wet sprinkler system will be provided, with fire department connection, using a 4" main riser. Each room or area will be served by heat sensitive heads.

A smoke detector system will be provided on the air handling unit. All ductwork will have fire dampers when penetrating fire separation walls.

An Ansul fire extinguishing system will be provided for the kitchen hood.

ELECTRICAL NARRATIVE

SERVICE

A new utility service from a pole-mounted transformer on the site from an aerial service from the existing power line will be coordinated with the City when specific requirements have been determined. Depending on installed equipment, the service may be single or three phase, with an initial capacity of approximately 45 KVA. Building service ground will be provided by connection of service entrance equipment tc three driven ground rods.

SECONDARY DISTRIBUTION AND BRANCH WIRING

The necessary service equipment is anticipated to be located in the mechanical room, with necessary main devices. Branch circuit panelboards will probably be in the same vicinity, with insulated copper conductors in conduit to the various items of utilization equipment, such as lighting, convenience outlets, and motors.

EMERGENCY LIGHTING

Emergency lighting will be provided from battery units located to properly illuminate the exitways. Consideration shall be given to self illuminated exit signs requiring no external hookup and egress lighting accomplished by battery operated flourescent lamps in 2'x4' fixtures.

STANDBY POWER

A diesel-driven engine generator set will be provided to power the entire facility in the event of a utility power failure. This will be accomplished automatically with the necessary transfer switches and interlocks with utility power to prevent coincident power supply to the facility.

LIGHTING

Flourescent fixtures will be utilized as much as possible with industrial type or open strips in utility spaces, and 2'x4' lay-in type flourescent fixtures utilizing energy-saving ballasts and lamps in offices and corridors. Fixture type will be coordinated with the anticipated ceiling material and the interior design concept of the facility. IES recommended criteria will be utilized in all areas. Necessary site lighting for adequate exterior security lighting will be provided to suit the site selected.

TELEPHONE SYSTEM

Space will be provided for telephone service. The service will be coordinated with the utility company to provide an underground or overhead supply as determined necessary. A conduit-only system will be provided within the facility to various phone locations as determined by the Architect.

FIRE ALARM SYSTEM

A fire alarm system is required for this occupancy. With the sprinkler system, the manual system will give an additional degree of protection for early warning.

INTERCOM SYSTEM

An intercom system will use the telephone system for distribution. Intercom equipment will allow direct 2-way communications, all-call, and emergency call capabilities.

MISCELLANEOUS SYSTEMS

Receptacles and special purpose outlets will be provided as required for necessary equipment. All wiring devices shall be heavy duty, specification grade, of nylon or other high abuse material.

GROUNDING SYSTEM

Each dry type transformer within the facility will be grounded, by conductors, to building ground. All branch circuits will have a metallic grounding conductor. Plumbing and heating piping will be electrically bonded to building grounding system.
