Telephone Interview Questions

(Judicial Conduct Commission Confirmee's)

1) Do you feel that you understand the role you would play as a Judicial Conduct Commissioner?

2) Are you willing to put in the amount of time required to do the job without renumeration?

3) Why do you want to serve on the Commission?

4) Do you have any suggestions/plans, etc. for the Commission?

5) What specific qualifications do you possess for the Commission?

6) Have you held any public offices in the past?

7) What is your party/political affiliation?

8) Do you feel any conflict of interest between a role as a Commissioner and your private life?

9) Any other statements for the Committee members to consider?

MEMBERS:
REP. JOHN LISKA, VICE CHAIRMAN; REP. RAMONA BARNES, EMERITUS;
REP. JOE HAYES; REP. HUGH MALONE; REP. DON CLOCKSIN; REP. RON WENDTE

Committee on Judiciary

Bruce Bookman

(Judicial Conduct Commission Confirmee's)

279- 8561

1) Yes, since I have served on the Judicial Qualifications Commission for the past year I feel I understand the role of a Commissioner.

2) Yes, have done it in the past and am willing to put in the time in the future.

3) I feel a responsibility to serve the public in the role of an attorney. Have worked with charities in past and want to continue in this role as a professional.

4) I think the Commission should increase its role and become more publicly active. The role of the executive director, which is the only paid position, should be expanded and defined so that he may have the power to investigate, not just sit through claims brought against judges.

5) Served on the Commission last year.

6) No, have never held public office.

7) Registered independent, previously a democrat.

8) No conflict of interest at present; if something should come up I would disqualify myself.

9) I have a good idea of the role of the Judicial Conduct Commission and would like to serve on it in the future.

Chairman, Narcotic Drug Treatment Center, Methadone Maintenance Clinic, 1974 to 1977.
Director, Anchorage Child Abuse Board, Inc., 1972-1976.

Section 2. Supreme Court.

(a)

NOTES TO DECISIONS

Cited in Johnson v. State, Ct. App. No. 006 (File No. 4462), 631 P.2d 508 (1981).

Section 3. Superior Court.

NOTES TO DECISIONS

Jurisdiction generally. — The question of a court's jurisdiction goes to its power to hear and adjudicate the subject matter in a given case. K.C.M. v. State, Sup. Ct. Op. No. 2326 (File No. 4764), 627 P.2d 607 (1981).

Where a court is one of general jurisdiction, such as a superior court, it has traditionally been regarded as having the power to hear all controversies which may be brought before a court within a legal bounds of rights or remedies, except insofar as has been expressly and unequivocally denied by the state's constitution or statutes. K.C.M. v. State, Sup. Ct. Op. No. 2326 (File No. 4764), 627 P.2d 607 (1981).

Order for sterilization of mental incompetent. — A superior court, as a court of general jurisdiction, does have, as part of its inherent parens patriae authority, the power to entertain and act upon a petition seeking an order authorizing the sterilization of a mental incompetent. K.C.M. v. State, Sup. Ct. Op. No. 2326 (File No. 4764), 627 P.2d 607 (1981).

(Proposed Amendment)

Section 10. Commission on Judicial Conduct. The Commission on Judicial Conduct shall consist of nine members, as follows: three persons who are justices or judges of state courts, elected by the justices and judges of state courts; three members who have practiced law in this state for ten years, appointed by the governor from nominations made by the governing body of the organized bar and subject to confirmation by a majority of the members of the legislature in joint session; and three persons who are not judges, retired judges, or members of the state bar, appointed by the governor and subject to confirmation by a majority of the members of the legislature in joint session. In addition to being subject to impeachment under Section 12 of this article, a justice or judge may be disqualified from acting as such and may be suspended, removed from office, retired, or censured by the supreme court upon the recommendation of the commission. The powers and duties of the commission and the bases for judicial disqualification shall be established by law.

Editor's notes. — This amendment was proposed by Legislative Resolve No. 36, SLA 1981, and will be voted upon at the next general election to be held in November, 1982.

Cross references. — For provisions on the powers and duties of the Commission on Judicial Qualifications, see AS

Section 8. Judicial Council. The judicial council shall consist of seven members. Three attorney members shall be appointed for six-year terms by the governing body of the organized state bar. Three non-attorney members shall be appointed for six-year terms by the governor subject to confirmation by a majority of the members of the legislature in joint session. Vacancies shall be filled for the unexpired term in like manner. Appointments shall be made with due consideration to area representation and without regard to political affiliation. The chief justice of the supreme court shall be ex-officio the seventh member and chairman of the judicial council. No member of the judicial council, except the chief justice, may hold any other office or position of profit under the United States or the State. The judicial council shall act by concurrence of four or more members and according to rules which it adopts.

"Term". — With the exception of Alaska Const., art. IV, §§ 4 and 13, wherever "term" or "service at the pleasure of" appears in the constitutional text originally adopted, the reference is to a period of service for a particular office. Buckalew v. Holloway, Sup. Ct. Op. No. 1938 (File No. 4058), 604 P.2d 240 (1979).

Meaning of phrase "position of profit". — See Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

And its intent. — The term "position of profit" was intended to prohibit all other salaried non-temporary employment under the United States or the State of Alaska. Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

Quoted in Delahay v. State, Sup. Ct. Op. No. 648 (File No. 1252), 476 P.2d 908 (1970).

Section 9. Additional Duties. The judicial council shall conduct studies for improvement of the administration of justice, and make reports and recommendations to the supreme court and to the legislature at intervals of not more than two years. The judicial council shall perform other duties assigned by law.

old law

Section 10. Commission on Judicial Qualifications. The Commission on Judicial Qualifications shall consist of nine members, as follows: one justice of the supreme court, elected by the justices of the supreme court; three judges of the superior court, elected by the judges of the superior court; one judge of the district court, elected by the judges of the district court; two members who have practiced law in this state for ten years, appointed by the governing body of the organized bar; and two persons who are not judges, retired judges, or members of the state bar, appointed by the governor and subject to confirmation by a majority of the members of the legislature in joint session. In addition to being subject to impeachment under section 12 of this article, a justice or judge may be disqualified from acting as such and may be suspended, removed from office, retired, or censured by the supreme court upon the recommendation of the commission. The powers and duties of the commission and the bases for judicial disqualification shall be established by law. [Amendment approved August 27, 1968]

Committee on Judiciary

Marcus Clapp

(Judicial Conduct Commission Confirmee's)

479-3161

1) Yes, have served on the Judicial Council for three years and a partner has been on the Commission in the past, so have a very good idea of the responsibilities involved.

2) Yes, the amount of time spent with the Judicial Council will easily shift to the Judicial Conduct Commission.

3) I am not very active with Bar association activities and have preferred to devote my time to important functions such as the Judicial Council and this. Supervising the way judges are retained and disaplined, is a very valuable thing to do.

4) No, not at the present, but plan to start research on the Commission very soon.

5) Have been in almost exclusive trial practice for over 16 years. So I have a very good understanding of the demands upon a judge and how a judge should act/react and his general demeanor. Also, the work on the Judicial Council has provided valuable experience.

6) No elective office, but public office through the Judicial Council.

7) No political affiliations at all- very apolitical person.

8) No conflict of interest; work on Judicial Council has kept everything up front and above board.

9) No additional statement.

Juneau, Alaska 99811

RE: Marcus R. Clapp's Nomination to the Commission on Judicial Conduct

Dear Ms. Derfener:

I was asked to submit a resume to the Governor for his consideration of my nomination by the Alaska Bar Association to the Commission on Judicial Conduct. I do not have a resume because it has been over fifteen years since I have applied for a job and I simply have not kept copies of the very old resumes. I will set forth concisely, however, my background in this letter and request that it suffice in place of a formal resume. I hope this doesn't cause any inconvenience but since the request is on quite short notice I felt this was the fastest way to comply.

Professional Experience

I have been with Hughes, Thorsness, Gantz, Powell & Brundin for fifteen years. It is the only job I have ever held in Alaska. I have been a partner in the firm for thirteen years and am presently the senior partner in the Fairbanks office. For the past twelve years I have attempted to limit my practice to the area of litigation mostly from the defense side.

Prior to coming to Alaska I was employed for one year as law clerk to Judge James D. Hathaway, Chief Judge of the Court of Appeals of the State of Arizona. This was from May of 1967 to June of 1968.

I was employed as a law clerk part time for attorney John William Johnson in Tucson, Arizona from December of 1966 through May of 1968.

I was a summer law clerk for the Scottsdale, Arizona law firm of Bottsford & Shumway in 1966.

Professional Achievements

I hold an "av" rating in Martindale-Hubbell which is voted on by my fellow lawyers and is the highest rating awarded by this publication which is the only publication that rates lawyers in the United States and Canada and is widely accepted by the Bar in general.

I was appointed by Governor Hammond and served three years on the Judicial Council from 1979 through mid-1982.

Throughout the last fifteen years I have served on various committees of both the State and local Bar associations. I am presently active in the torts section of the State Bar Association.

Education

Juris doctor degree 1967 from the University of Arizona Law School.

B.A. degree, Cum Laude, 1965 Arizona State University - English Major.

Personal

Date of birth February 11, 1942, Phoenix, Arizona.

Married to Judy with two daughters, Kimberly 13 and Kara 12.

Lay Leader First United Methodist Church, 1982 to present.

Coach in both girls basketball and softball for the last four years.

The powers and duties of the commission and the bases for judicial disqualification shall be established by law.

Editor's notes. — This amendment was proposed by Legislative Resolve No. 36, SLA 1981, and will be voted upon at the next general election to be held in November, 1982.

Cross references. — For provisions on the powers and duties of the Commission on Judicial Qualifications, see AS

Section 8. Judicial Council. The judicial council shall consist of seven members. Three attorney members shall be appointed for six-year terms by the governing body of the organized state bar. Three non-attorney members shall be appointed for six-year terms by the governor subject to confirmation by a majority of the members of the legislature in joint session. Vacancies shall be filled for the unexpired term in like manner. Appointments shall be made with due consideration to area representation and without regard to political affiliation. The chief justice of the supreme court shall be ex-officio the seventh member and chairman of the judicial council. No member of the judicial council, except the chief justice, may hold any other office or position of profit under the United States or the State. The judicial council shall act by concurrence of four or more members and according to rules which it adopts.

"Term". -- With the exception of Alaska Const., art. IV, §§ 4 and 13, wherever "term" or "service at the pleasure of" appears in the constitutional text originally adopted, the reference is to a period of service for a particular office. Buckalew v. Holloway, Sup. Ct. Op. No. 1988 (File No. 4058), 604 P.2d 240 (1979).

Meaning of phrase "position of profit". — See Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

And its intent. — The term "position of profit" was intended to prohibit all other salaried non-temporary employment under the United States or the State of Alaska. Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

Quoted in Delahay v. State, Sup. Ct. Op. No. 648 (File No. 1252), 476 P.2d 90 (1970).

Section 9. Additional Duties. The judicial council shall conduct studies for improvement of the administration of justice, and make reports and recommendations to the supreme court and to the legislature at intervals of not more than two years. The judicial council shall perform other duties assigned by law.

old law

Section 10. Commission on Judicial Qualifications. The Commission on Judicial Qualifications shall consist of nine members, as follows: one justice of the supreme court, elected by the justices of the supreme court; three judges of the superior court, elected by the judges of the superior court; one judge of the district court, elected by the judges of the district court; two members who have practiced law in this state for ten years, appointed by the governing body of the organized bar; and two persons who are not judges, retired judges, or members of the state bar, appointed by the governor and subject to confirmation by a majority of the members of the legislature in joint session. In addition to being subject to impeachment under section 12 of this article, a justice or judge may be disqualified from acting as such and may be suspended, removed from office, retired, or censured by the supreme court upon the recommendation of the commission. The powers and duties of the commission and the bases for judicial disqualification shall be established by law. [Amendment approved August 27, 1968]

Dear Ms. Stevenson:

At your request, I am submitting the following resume:

Michael M. Holmes was born in Seattle, Washington on April 6, 1934. He was admitted to the Bar in the State of Washington in 1959 and to the Bar in the State of Alaska in 1962. He has been a resident of Juneau, Alaska since 1960. Mr. Holmes graduated from The University of Washington (BA 1956) and The University of Washington School of Law (LLB 1959). He was an assistant attorney general from 1960 to 1963 and Deputy Attorney General from 1963 to 1966. He was a member of the Alaska Judicial Council from 1973 to 1980 and was a member of the Alaska Bar Association Board of Governors from 1963 to 1964. He served on the Judicial Qualifications Commission from April 1981 until December 1982. He is the senior partner in the law firm of Faulkner, Banfield, Doogan & Holmes (established 1934, offices in Juneau and Anchorage). He is a member of the Alaska Bar Association and the Juneau Bar Association and is Fellow of The American Bar Association. He is married and has three teenage children. He is Vice President of Gastineau Channel Little League.

I hope this summary will be sufficient.

Yours very truly,

Michael M. Holmes

Section 2. Supreme Court.

(a)

NOTES TO DECISIONS

Cited in Johnson v. State, Ct. App. Op. No. 006 (File No. 4462), 631 P.2d 508 (1981).

Section 3. Superior Court.

NOTES TO DECISIONS

Jurisdiction generally. — The question of a court's jurisdiction goes to its power to hear and adjudicate the subject matter in a given case. K.C.M. v. State, Sup. Ct. Op. No. 2326 (File No. 4764), 627 P.2d 607 (1981).

Where a court is one of general jurisdiction, such as a superior court, it has traditionally been regarded as having the power to hear all controversies which may be brought before a court within a legal bounds of rights or remedies, except insofar as has been expressly and unequivocally denied by the state's constitution or statutes. K.C.M. v. State, Sup. Ct. Op. No. 2326 (File No. 4764), 627 P.2d 607 (1981).

Order for sterilization of mental incompetent. — A superior court, as a court of general jurisdiction, does have, as part of its inherent parens patriae authority, the power to entertain and act upon a petition seeking an order authorizing the sterilization of a mental incompetent. K.C.M. v. State, Sup. Ct. Op. No. 2326 (File No. 4764), 627 P.2d 607 (1981).

(Proposed Amendment)

Section 10. Commission on Judicial Conduct. The Commission on Judicial Conduct shall consist of nine members, as follows: three persons who are justices or judges of state courts, elected by the justices and judges of state courts; three members who have practiced law in this state for ten years, appointed by the governor from nominations made by the governing body of the organized bar and subject to confirmation by a majority of the members of the legislature in joint session; and three persons who are not judges, retired judges, or members of the state bar, appointed by the governor and subject to confirmation by a majority of the members of the legislature in joint session. In addition to being subject to impeachment under Section 12 of this article, a justice or judge may be disqualified from acting as such and may be suspended, removed from office, retired, or censured by the supreme court upon the recommendation of the commission. The powers and duties of the commission and the bases for judicial disqualification shall be established by law.

Editor's notes. — This amendment was proposed by Legislative Resolve No. 36, SLA 1981, and will be voted upon at the next general election to be held in November, 1982.

Cross references. — For provisions on the powers and duties of the Commission on Judicial Qualifications, see AS

Section 8. Judicial Council. The judicial council shall consist of seven members. Three attorney members shall be appointed for six-year terms by the governing body of the organized state bar. Three non-attorney members shall be appointed for six-year terms by the governor subject to confirmation by a majority of the members of the legislature in joint session. Vacancies shall be filled for the unexpired term in like manner. Appointments shall be made with due consideration to area representation and without regard to political affiliation. The chief justice of the supreme court shall be ex-officio the seventh member and chairman of the judicial council. No member of the judicial council, except the chief justice, may hold any other office or position of profit under the United States or the State. The judicial council shall act by concurrence of four or more members and according to rules which it adopts.

"Term". — With the exception of Alaska Const., art. IV, §§ 4 and 13, wherever "term" or "service at the pleasure of" appears in the constitutional text originally adopted, the reference is to a period of service for a particular office. Buckalew v. Holloway, Sup. Ct. Op. No. 1988 (File No. 4058), 604 P.2d 240 (1979).

Meaning of phrase "position of profit". — See Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

And its intent. — The term "position of profit" was intended to prohibit all other salaried non-temporary employment under the United States or the State of Alaska. Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

Quoted in Delahay v. State, Sup. Ct. Op. No. 648 (File No. 1252), 476 P.2d 908 (1970).

Section 9. Additional Duties. The judicial council shall conduct studies for improvement of the administration of justice, and make reports and recommendations to the supreme court and to the legislature at intervals of not more than two years. The judicial council shall perform other duties assigned by law.

Section 10. Commission on Judicial Qualifications. The Commission on Judicial Qualifications shall consist of nine members, as follows: one justice of the supreme court, elected by the justices of the supreme court; three judges of the superior court, elected by the judges of the superior court; one judge of the district court, elected by the judges of the district court; two members who have practiced law in this state for ten years, appointed by the governing body of the organized bar; and two persons who are not judges, retired judges, or members of the state bar, appointed by the governor and subject to confirmation by a majority of the members of the legislature in joint session. In addition to being subject to impeachment under section 12 of this article, a justice or judge may be disqualified from acting as such and may be suspended, removed from office, retired, or censured by the supreme court upon the recommendation of the commission. The powers and duties of the commission and the bases for judicial disqualification shall be established by law. [Amendment approved August 27, 1968]

Dear Charlie:

Thank you for providing me the opportunity to give my highest personal and professional recommendation on the appointment of Georgianna Lincoln to the Commission on Judicial Conduct.

I have personally known Georgianna for over 20 years. During that time I have watched her grow and mature into one of Fairbanks' finest talents. She relentlessly pursues the facts and always goes the extra yard when challenged by an issue of a cause. I have never known her to shirk responsibility, in fact, she embraces it with vigor.

Georgianna is very active on a political and community level and contiues to prove herself a leader. I recommend her for confirmation without hesitation.

Sincerely,

Bettye

Dear Representative Bussell:

It pleases me to recommend Georgianna Lincoln to your committee for her appointment to the Commission on Judicial Conduct.

Georgianna and I worked together for the Fairbanks Native Association in the management of health and social programs related to that area. I found her to be talented and well versed on the subject. Georgianna has had a wide range of experience from aboriginal land claims, human services, housing assistance, village government, education and vocational training.

Because of her wide range of experience, I have no doubts that she is an excellent candidate for Commission on Judicial Conduct.

Sincerely,

Al Adams

Representative Charlie Bussell
Chairman, House Judiciary Committee
Alaska State Legislature

Dear Representative Bussell:

I would highly recommend that Georgianna Lincoln receive a favorable evaluation by the House Judiciary Committee concerning her confirmation for appointment to the Commission on Judicial Conduct.

I have known Ms. Lincoln for many years, both personally and professionally. She has worked for both the Fairbanks Native Association and the Tanana Chiefs Conference, and has been very active as a volunteer in civic affairs in Fairbanks and interior Alaska. Ms. Lincoln's professional and volunteer activities have given her an intimate knowledge of the court system, the State legislature, and health and social services agencies within the State.

I urge you to give favorable consideration to Georgianna Lincoln's appointment to the Commission on Judicial Conduct. Her experience and the dedication with which she approaches any task would be an asset to the Commission. Please let me know if I can provide any further information.

Sincerely,

Frank R. Ferguson

Dear Mr. Bussell:

I am pleased to have the opportunity to provide a reference for Ms. Renee Murray, recently appointed to the Alaska Judicial Council. I have been professionally acquainted with Ms. Murray since 1975, and have found her to be an outstanding individual, and an extremely competent professional. As you may be aware, a significant portion of her professional experience is related to the adjudication process.

Ms. Murray has lived in Alaska for 30 years, and has resided and worked in the Fairbanks, Anchorage, and Southeast areas of the State, and is well versed in the varied problems in rural and urban communities. Her professionalism and committment to community service organizations and projects has gained her unanimous respect from her collegues and friends alike.

I am a strong supporter of citizen involvement at all levels of state government, and therefore share your concern in ensuring that appointed nominees be suitable for their positions. I am confident that Ms. Murray is highly qualified and extremely suitable for the position to which she has been nominated. I strongly recommend Ms. Murray's confirmation for appointment to th Alaska Judicial Council.

Again, thank you for the opportunity to provide a reference for Ms. Murray. If I can be of further assistance, please contact me at 276-7943.

Sincerely,

Virginia M. Collins,
President, Collins & Associates

Re: Ms. Renee Murray

Dear Chairman Bussell:

Thank you for your letter of April 15, 1984 requesting information pertaining to Ms. Murray, a nominee to the Alaska Judicial Council.

Renee is a personal friend as well as a business acquaintance of many years. She is well known to many attorneys through her work in securing payment to persons injured in industrial situations as well as general civil litigation. That experience has also given her close contact with the court system and the legal services delivery mechanisms of our society. She is an excellent administrator and particularly knowledgeable in the risk management and self-insurance field for businesses as well as subdivisions of the state government. It is in this context that our law firm most often has the benefit of her experience and judgments.

Renee has a particular faculty for making right decisions promptly. I am sure you know she is a leader in the responsible implementation of women's rights and her efforts there are most beneficial since she is neither doctrinaire nor fanatical.

We think she is an excellent member of the Alaska Judicial Council and are pleased to recommend her to you for confirmation by the legislature.

Sincerely,

BISS AND HOLMES

Re: Alaska Judicial Council/Renee Murray

Dear Charlie:

This will acknowledge receipt of your letter concerning Governor Sheffield's appointment of Renee Murray to the Alaska Judicial Council. I have known her for several years both professionally and personally. I have no reservations in urging her confirmation.

She has had a lot of contact over the years with attorneys throughout the state. She has a fairly good idea of which ones are good, and which ones are not. She has the background and temperament to weed out those who are unqualified in applying for the judiciary.

Her experience, plus her position as a nonlawyer member of the committee, I think will allow her to judge the candidates on their merits rather than on their popularity.

Very truly yours,

BISS & HOLMES

Re: Qualifications Of Renee Murray For Service On Alaska Judicial Council

Dear Representative Bussell:

Thank you for your letter of April 15, 1984, inquiring about the qualifications of Renee Murray to serve on the Alaska Judicial Council. I have known Ms. Murray in a professional capacity for a number of years. Her employment as an insurance adjuster handling personal injury claims has allowed her to become quite familiar with the Alaska judicial process. I have always found her to be very hard working, intelligent, and extremely articulate when expressing her views.

Because of her knowledge and interest in the quality of the Alaska judicial system and because of the other qualificiations which I have mentioned above, I would recommend Renee Murray highly and without reservation for a position on the Judicial Council.

Very truly yours,

FAULKNER, BANFIELD,
DOOGAN & HOLMES

February 14, 1984

Dear Rep. Bussell

I wish to protest the appointment of Renee Murray to a seat on the Alaska Judicial Council. This is in no way meant to reflect on the capability of Ms Murray, whom I have never met, or know nothing about.

In making the protest I am referring solely to Article IV Section 8 of the Alaska Constitution (The Judiciary), which says, in part, "Appointments shall be made with due consideration to area representation, etc——"

Area representation has been given by all previous governors, and in so doing the intent of the article was followed.

I would respectfully request that this fact be presented to the Judiciary Committee when the subject of appointments is taken up. Thank you.

Very sincerely yours,

John B. Pugh

1) Yes, have met with someone on the Board - know that it's a public member, representing the consumer, as opposed to a member of the Bar.

2) Yes, have spent many, many hours voluntary groups in the past, so am prepared to do so now.

3) Am an active person in the community, and am interested in the position.

4) No, have no specific plans/suggestions, just to bring a different perspective into the position.

5) Organizational, managerial, budget skills.

6) No public offices in the past.

7) Registered active Democrat.

8) No conflict, have minimum contact with the legal profession.

9) Whatever project I get involved in I go all out and am willing to do so on this Board appointment.

Rep. Charlie Bussell
Chairman, Judiciary Committee
Room 126, Capitol Building
Juneau, AK 99811

Dear Charlie,,

Enclosed is a copy of Governor Sheffield's letter of May 23, 1983 submitting the name of Glenda Straube for appointment to the Alaska Bar Association Board of Governors. Please review this appointment and hold confirmation hearings as necessary.

Very truly yours,

Joe L. Hayes
SPEAKER OF THE HOUSE

Enclosure

JLH:jvd

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

MAY 23 1983

May 23, 1983

The Honorable Joe Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Mr. Speaker:

Pursuant to applicable law, I submit the following names for legislative confirmation of appointment to the positions noted:

BOARDS AND COMMISSIONS
(with terms)

Guide Licensing and Control board
Poldine Carlo, Fairbanks, 05/20/83 - 06/15/85

State Commission for Human Rights
Jacqueline Lindauer, Anchorage, 05/20/83 - 01/31/88

Alaska Bar Association Board of Governors
Glenda Straube, Fairbanks, 05/20/83 - 06/30/86

Real Estate Commission
Jon Ribacchi, Anchorage, 05/20/83 - 01/31/87
LaVerne Collins, Anchorage, 05/20/83 - 01/31/84

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

Glenda J. Straube
P. O. Box 81958
Fairbanks, Alaska 99708
456-6000/456-1132

ORGANIZATIONAL AND LEADERSHIP SKILLS:

Worked independently, representing a state legislator in his absence. Responsible for supervision of staff.

Supervised 8-10 clerks, parts clerks and warehouse workers in capacity as warehouse foreman at large pipeline camp (Galbraith). Responsible for purchase of equipment and supplies valued at $1.5 Million.

Incorporated goals, objectives and responsibilities to be accomplished within legislative committee framework. Organized, set direction and maintained cohesiveness within legislative committee of nine inter-related consultant studies.

Planned, organized and facilitated arts festivals and events with an attendance of 5,000 and a two day budget of $30,000. Supervised volunteer staff of 100. Consistently updated format through utilizing participant and staff feedback and resources as they became available.

Prepared grant proposals, administered grants and maintained oversight of CETA employees.

COMMUNICATION SKILLS:

Acted as legislative liaison to the University of Alaska providing improved communications and cooperation.

Effectively solved legislator's constituent problems with state agencies in a positive manner.

Acted as public relations person by actively seeking and maintaining contacts with a wide variety of agencies, businesses, individuals and interest groups. Represented groups and individuals through various use of media: TV, radio and newspaper.

RESEARCH SKILLS:

Researched and analyzed financial needs of the University of Alaska. Prepared legislative fiscal reports and recommendations concerning UA's $185+ million budget.

Researched historical data and provided an overall view of background information pertinent to legislative committee work.

FINANCIAL SKILLS:

Operated as financial consultant for individuals, non-profit corporations, single proprietorships, partnerships and small corporations.

Operated as full-charge bookkeeper, prepared financial statements and tax forms for profit and non-profit entities.

Actively raised funds for non-profit groups through private and public sources.

Glenda J. Straube

WORK HISTORY:

3/81 to present. Realtor with ERA Meyeres Real Estate. During 1982, my annual sales exceeded $1.8 million.

12/76 to present. Self-employed as organizational and financial consultant. Within this time period, I worked for the legislature (off and on) as needed as an aide to ex-Rep. Brian Rogers and the House Finance Committee. Since becoming a Realtor, this work has been done strictly on an 'occasional' basis.

1/74 to 12/76. Worked as truck driver, surveyor and warehouse foreman for several pipeline contractors. Warehouse foreman for Arctic Constructors.

9/70 to 3/72. Administrative Assistant. Western Washington State College, Bellingham, Washington.

EDUCATION:

University of Alaska (1979-1981)
10 credits towards a degree in Business Administration. 3.7 Average. I plan on taking six credits next semester.

Copley High School, Akron, Ohio (1968 Graduate)
Graduated in top 3% of class. Offered several scholarships to colleges but unable to accept them due to death in family and subsequent responsibilities.

Much of my education has been self-taught or acquired through thousands of hours of volunteer work.

VOLUNTEER WORK:

Solstice, Inc. (non-profit arts organization), 1975-present. Past officer and present member.

Minority Business Enterprises (non-profit, state-funded org.), 1981-1982. I was asked to serve as Board Member to help save the failing organization.

Women in Crisis-Counseling and Assistance, (non-profit, state funded) 1980-1982. Past officer and present member. Averaged 40-100 hours per month during crisis situations.

College Community Center, past officer and past member.

Campaign Worker: Croft for Governor
Rodey for Senate
Brian Rogers for State House
Cowper for Governor
Sheffield for Governor
many other local, statewide and federal candidate

PERSONAL:

Age: 32, Excellent health. Avid reader and musician.

Article 2. The Board of Governors and Officers.

Section
30. Governance of the Alaska Bar
40. Board of Governors of the Alaska Bar
50. Selection of the board
60. Election of officers
70. Vacancies on the board
75. Meetings of the board
80. Powers of board
85. Annual report to legislature
90. Power of the bar to make or change bylaws and regulations
100. Administrative Procedure Act
110 — 120. [Repealed]

Sec. 08.08.030. Governance of the Alaska Bar. The Alaska Bar is governed by the Board of Governors of the Alaska Bar. The board has the powers and duties conferred by this chapter and by the Alaska Bar Rules. Members of the board shall receive no salary. (§ 6 ch 196 SLA 1955; am § 3 ch 181 SLA 1976)

Sec. 08.08.040. Board of Governors of the Alaska Bar. (a) There is created a Board of Governors of the Alaska Bar to be elected under bylaws and regulations adopted by the board.

(b) The board consists of nine active members elected by the active members of the Alaska Bar and three persons appointed by the governor who are not attorneys. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960; am § 4 ch 181 SLA 1976; am § 2 ch 52 SLA 1981)

Effect of amendments. — The 1981 amendment substituted "created" for "hereby constituted" and substituted "adopted" for "promulgated" in subsection (a). In subsection (b), the amendment added "and three persons appointed by the governor who are not attorneys."

Sec. 08.08.050. Selection of the board. (a) Two members of the board shall be elected by and from among the members of the association resident in the first judicial district; four members of the board shall be elected by and from among the members of the association resident in the third judicial district; two members by and from among the members of the association resident in the combined area of the second and fourth judicial districts; and one member at large from the entire state. Three members who are not attorneys shall be appointed by the governor and are subject to confirmation by the legislature in joint session.

(b) Members of the Board of Governors shall hold office for three years and until their successors are elected or appointed and qualified.

(c) Four board members shall be selected on the following triennial rotation:

(1) in the first year, one member from the first judicial district, one member from the combined area of the second and fourth judicial districts, one member from the third judicial district, and one appointed member;

(2) in the second year, one member at large, two members from the third judicial district, and one appointed member; and

(3) in the third year, one member from the combined area of the second and fourth judicial districts, one member from the third judicial district, one member from the first judicial district, and one appointed member. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960; am §§ 1, 2 ch 9 SLA 1971; am §§ 3 -- 5 ch 52 SLA 1981)

Effect of amendments. — The 1981 amendment added the second sentence of subsection (a). The amendment also added "or appointed" preceding "and qualified" in subsection (b) and rewrote subsection (c).

Editor's notes. — Section 14, ch. 52, SLA 1981, provides: "The governor shall appoint the initial non-attorney members to the Board of Governors for the following terms: one member for a three-year term; one member for a two-year term; and one member for a one-year term."

Sec. 08.08.060. Election of officers. The active members of the Alaska Bar who are in actual attendance at the association's annual convention shall elect by a majority vote during the convention the association's officers from the membership of the Board of Governors. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960)

Sec. 08.08.070. Vacancies on the board. (a) The board shall fill a vacancy in the elected membership of the board until the next annual election.

(b) The governor shall appoint a member to fill a vacancy in the appointed membership of the board for the unexpired term. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960; am § 6 ch 52 SLA 1981)

Effect of amendments. — The 1981 amendment rewrote this section.

Sec. 08.08.075. Meetings of the board. AS 44.62.310 and 44.62.312 apply to the meetings of the board. Members of the Alaska Bar and the public shall be given 30 days notice of meetings of the board except for emergency meetings. Meetings of the board shall take place in the state. (§ 7 ch 52 SLA 1981)

Sec. 08.08.080. Powers of board. (a) Except as may be otherwise provided in this chapter or the Alaska Bar Rules, the board may approve and recommend to the state supreme court rules

(1) concerning admission, discipline, licensing, continuing legal education, and defining the practice of law;

(2) providing for continuing legal education and for certification of a continuing legal education program;

(3) establishing a program for the certification of attorneys as specialists.

(b) The board may adopt bylaws and regulations consistent with this chapter and the Alaska Bar Rules

(1) concerning membership and the classification of membership in the Alaska Bar;

(2) fixing the annual membership fees;

(3) concerning annual and special meetings.

(c) Consistent with this chapter and the Alaska Bar Rules, the board may

(1) provide for employees of the Alaska Bar, the time, place and method of their selection, and their respective powers, duties, terms of office, and compensation;

(2) establish, collect, deposit, invest, and disburse membership and admission fees, penalties, and other funds;

(3) sue in the name of the Alaska Bar in a court of competent jurisdiction to enjoin a person from doing an act constituting a violation of this chapter;

(4) provide for all other matters affecting in any way the organization and functioning of the Alaska Bar. (§ 7 ch 196 SLA 1955; am §§ 2, 3 ch 178 SLA 1960; am § 5 ch 181 SLA 1976; am § 8 ch 52 SLA 1981)

Cross references. — See Alaska Bar Rules adopted by the Alaska supreme court.

Effect of amendments. — The 1981 amendment rewrote this section.

NOTES TO DECISIONS

Final power and authority to determine standards for admission to the practice of law in Alaska resides in the supreme court, which has the inherent power to intercede at any time in admission matters. In re Luna, Sup. Ct. Op. No. 1503 (File No. 2789), 569 P.2d 789 (1977).

Practice of law not defined. — There is no rule defining the practice of law. Nor is there a statute defining the term except in the context of the requirements of active practice of law as a qualification for justices. In re Robson, Sup. Ct. Op. No. 1573 (File No. 3448), 575 P.2d 771 (1978). See also In re Babcock, Sup. Ct. Op. No. 178 (File No. 408), 387 P.2d 694 (1963), decided prior to the 1976 and 1981 amendments to this section.

For case construing board's power to define the practice of law prior to the 1976 amendment of this section, see In re Moody, Sup. Ct. Op. No. 1065 (File No. 2035), 524 P.2d 1261 (1974).

A superior court law clerk should be regarded as practicing law for the purposes of membership classification. In Moody, Sup. Ct. Op. No. 1065 (File No. 2035), 524 P.2d 1261 (1974).

Activities constituted practice of law in violation of supreme court's suspension order. — Where a person held himself out as a lawyer; performed legal services and gave legal advice in setting up a prepaid legal service plan, completing and filing necessary forms; signed a letter of the type usually written by an attorney with "attorney at law" printed aside his name; permitted another person to refer to

ALASKA BOARD OF GOVERNORS--This statute only amended in 1981, creating a 12-man board in place of a 9-man board, with three new ones to be lay members appointed by the governor. (The other nine, all attorneys, are elected at annual bar convention--this year June 9 & 10--and will take office, any new ones, June 11).

*Lay Members:

KAREN SLACK, Anchorage, Term expires 1984 (probably June 30th). She has just resigned, by letter, and in same, asks governor to appoint as quickly as possible...may be an appointment coming through forher

LeROY COOK, Fairbanks, term expires June 30, 1983...expected to resign, as Hammond appointed him in last days of Hammond regime. His name is NOT going to Sheffield, according to Randy Burns, executive director of Alaska Bar Ass'n. in ANchorage...andof course, he has not been confirmed by any House Judiciary Committee...since it's a new administration, suppose Sheffield will nominate a replacement when he gets around to it.

LEW M. WILLIAMS, Ketchikan, just appointed by Governor, not yet confirmed, term expires in 1985 (June 30th).

** Attorney Members:

President, Andrew J. Kleinfeldt, Fairbanks, term expires 1984

President-Elect, Mary K. Hughes, ANchorage, " " 1984

Vice President, Harold M. Brown, Ketchikan, " " 1984

Secretary, Ms. Niesje Steinkruger, Fairbanks, " " 1985

Treasurer, Ronald W. Lorensen, Juneau (AG office)" " 1985

State-wide representative,
William P. Bryson, ANchorage, term expires 1983

Bruce E. Gagnon, Anchorage, term expires 1985

Karen L. Hunt, Anchorage, (past Pres.) term expires 1983

Hugh G. (Jerry) Wade, ANchorage, term expires 1983

CONFIRMA-
TION

LEW
WILLIAMS

PIONEER PRINTING CO.

KETCHIKAN DAILY NEWS
SOUTHEASTERN LOG

April 19, 1984

Rep. Charles Bussell, Chairman
House Committee on Judiciary
Pouch V
Juneau, Alaska 99811

Dear Rep. Bussell:

In response to your request for five professional references (I presume you mean lawyers) who may be able to advise you on my qualifications to serve as a laymember on the Board of Governors of the Alaska Bar Association, I am submitting the following names.

You mentioned that time is a pressing factor so I haven't contacted these people to be sure they are available. If they are, I'm sure they'll give you an accurate assessment.

Superior Court Judge Thomas Stewart (retired), Juneau, 586-1220.

Fred O. Eastaugh of Robertson, Monagle, Eastaugh & Bradley with offices in Juneau, 586-3340.

Michael Holmes of Faulkner, Banfield, Doogan and Holmes at their Juneau office, 586-2210. I served four years on the Alaska Judicial Council with Holmes.

Bruce Botelho, an attorney with the Department of Revenue, 465-2300. He was a scoutmaster in Ketchikan before he went to law school and I was community scout chairman.

William Council, a private attorney in Juneau, 586-1786. Council was stationed in Ketchikan as an attorney for a state agency for several years.

I've given you all Juneau names to make your job of checking easier. If some of the above are not available, feel free to check with Norman Banfield, 586-2210, James Bradley, 586-3340, or James Clark, 586-3340, all practicing attorneys in Juneau; or with John Dimond, 364-3325, a retired supreme court justice, in Juneau.

As you are aware, I'm appointed to the Board of Governors of the Alaska Bar Association to represent the public. The best interests of the public sometimes differ from those of the legal profession. So you might find it more useful to check with other people who have served with me as a public member on the Alaska Judicial Council, the Governor's Commission on the Administration of Justice or the Citizens' Advisory Commission on Federal Areas.

P.O. BOX 7900, 501 DOCK STREET, KETCHIKAN, ALASKA 99901 (907)225-3157

Those include Ken Brady of Ken Brady Construction Co., 243-4604 in Anchorage; Paul Gavora of Gavora, Inc., 452-6422, in Fairbanks, owner of Marketbasket food stores; Robert Moss, a Homer fisherman still serving on the Judicial Council; Warren Olson, SRA Box 82A, Anchorage; Phil Holdsworth, 586-1383, Juneau; James A. Williams (no relation) PO Box 1260, Anchorage; or Gail (Mrs. Mark) Rowland, 272-6284, Anchorage.

In presenting these names, I presume you'd prefer that I refrain from submitting the names of attorneys practicing in the Department of Law, serving on the Board of Governors, or the names of active judges and justices, or the names of lawyer-legislators, or lawyers in Ketchikan.

I will be happy to provide you with any further information you desire.

Thank you for the courtesy of giving me this chance to submit further material to support my appointment

Sincerely yours,

Lew M. Williams, Jr.
publisher

Telephone Interview Questions

(Confirmee for the Board of Governor's Alaska Bar Association)

1) Do you feel that you understand the role you would play on the Board of the Governor's of the Alaska Bar?

2) Are you willing to put in the amount of time required to do the job without renumeration?

3) Why do you want to serve on the Board?

4) Do you have any suggestions/plans, etc. for the Board?

5) What specific qualifications do you posses for the Board of the Governor's Bar Association?

6) Have you held any public offices in the past?

7) What is your party/political affiliation?

8) Do you feel any conflict of interest between a role as a Board Member and your private life?

9) Any other statements for the Committee members to consider?

MEMBERS:
REP. JOHN LISKA, VICE CHAIRMAN; REP. RAMONA BARNES, EMERITUS;

Lew M. Williams, Jr.

(Confirmee for the Board of the Governor's Alaska Bar Association)

225-3157

1) Have served on the Board since 6-30-82, so have good idea of the role of the public member to the Bar Association's Board of Governors.

2) Yes, have served on many boards/commissions in the past, so I understand the amunt of time necessary to do the job. Since the kids are gone, I have time to devote to this appointment.

3) This is interesting work and since I have no vested interests I can take a look at the situation from detached position. The background and knowledge gained from working on the Judicial Council and Governors Advisory council on the Administration of Justice makes an interest in an appointment to the Board a natural.

4) The Board and Bar Association needs to be more receptive to the public. The services and alternatives available to the public needs to be publicized and the public needs to be made aware of thieir existance.

5) Past work on the Jucicial Council and the Governors Council on the Administration of Justice combined with 37 years of owning a newspaper gives a general knowledge of the needs of the people in this area.

6) Yes, School Board-Wrangel-1960

-City Council

-Mayor-Petersburg-1960

7) Registered Democrat since 1946

8) No conflict of interest - any work on the newspaper is completely seperate from work on the Board. The editor (Not owner) of the newspaper does any controversial editorials, etc.

LLEWELLYN (LEW) WILLIAMS, JR., 56, is publisher and part owner of the Ketchikan Daily News. His wife, Dorothy, who came to Alaska 28 years ago as a school teacher, is co-publisher, business manager and the other owner of the newspaper.

Prior to moving to Ketchikan in 1966, the Williams owned and operated the Petersburg Press for ten years. During their time in Petersburg, Williams served five years as mayor. They were the first newspaper owners in Alaska to convert their publication to the offset form of printing. All Alaska newspapers now are produced by offset.

Before buying the Petersburg paper, the Williams lived in Wrangell where Williams ran the Wrangell Sentinel for his parents while his father served as secretary of Alaska. Williams also served on the school board in Wrangell.

Three of Alaska's four governors since statehood have appointed Williams to state boards. Gov. William Egan appointed him to the Alaska Judicial Council on which he served four years. Gov. Walter Hickel appointed him chairman of the Jones Act Relief Task Force. Gov. Jay Hammond appointed him to the Governor's Commission on the Administration of Justice, on which he still serves. And Lt. Gov. Terry Miller appointed him to serve on the Alaska lands Blue Ribbon Task Force.

Williams was one of the organizers of the Southeastern Conference and its first secretary. It is an organization of Southeast Alaska communities and chambers of commerce. He was an organizer of the Alaska Publishers' Association in 1963 and of the new Alaska Newspaper Association in 1980.

The Ketchikan Daily News has won over two dozen professional awards since the Williams became sole owners in 1976, including awards for editorials written by Williams, The National Newspaper

Foundation has designated the Ketchikan Daily News as a National Blue Ribbon Newspaper.

Williams has served on numerous civic committees in Wrangell, Petersburg and Ketchikan. He was a volunteer fireman in Wrangell and Petersburg and served as secretary of the Petersburg advisory committee to the Alaska Department of Fish and Game. He is holder of the Silver Beaver award for his work with the Boy Scouts of America. He is a past officer of the Elks lodge, the American Legion, Rotary, the chambers of commerce in Wrangell, Petersburg and Ketchikan and the Alaska State Chamber of Commerce.

Two of the Williams three children are reporters for newspapers in Washington state. The other is a computer operator for a printing and office supply firm in Missouri.

Williams was awarded an honorary doctor of humanities degree by the University of Alaska, Juneau in 1981.

BIOGRAPHY: MARCH 15, 1981

Optional add:

Williams was born in Spokane, Wash. He began his newspaper career in 1936 as a paper carrier for the Juneau Empire. He attended schools in Tacoma, Juneau and Wrangell, graduating from Wrangell High School in 1942. He attended prep school in Washington, D.C., then served three years in the U.S. Army in World War II. He was discharged honorably as a sergeant in the parachute troops.

Except for a year at business college in Berkeley, California in 1950, he has been active in the newspaper business in Alaska since World War II. In addition to newspaper activities in Wrangell, Petersburg and Ketchikan, Williams ran the Alaska Sunday Press in Juneau for its owners for six months and he and his wife owned the Sitka Sentinel for four years.

NOTES TO DECISIONS

Quoted in In re Petition of Moody, Sup. Ct. Op. No. 1065 (File No. 2035), 524 P.2d 1261 (1974).

Article 2. The Board of Governors and Officers.

Section
30. Governance of the Alaska Bar
40. Board of Governors of the Alaska Bar
50. Selection of the board
60. Election of officers
70. Vacancies on the board
75. Meetings of the board
80. Powers of board
85. Annual report to legislature
90. Power of the bar to make or change bylaws and regulations
100. Administrative Procedure Act
110 — 120. [Repealed]

Sec. 08.08.030. Governance of the Alaska Bar. The Alaska Bar is governed by the Board of Governors of the Alaska Bar. The board has the powers and duties conferred by this chapter and by the Alaska Bar Rules. Members of the board shall receive no salary. (§ 6 ch 196 SLA 1955; am § 3 ch 181 SLA 1976)

Sec. 08.08.040. Board of Governors of the Alaska Bar. (a) There is created a Board of Governors of the Alaska Bar to be elected under bylaws and regulations adopted by the board.

(b) The board consists of nine active members elected by the active members of the Alaska Bar and three persons appointed by the governor who are not attorneys. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960; am § 4 ch 181 SLA 1976; am § 2 ch 52 SLA 1981)

Effect of amendments. — The 1981 amendment substituted "created" for "hereby constituted" and substituted "adopted" for "promulgated" in subsection (a). In subsection (b), the amendment added "and three persons appointed by the governor who are not attorneys."

Sec. 08.08.050. Selection of the board. (a) Two members of the board shall be elected by and from among the members of the association resident in the first judicial district; four members of the board shall be elected by and from among the members of the association resident in the third judicial district; two members by and from among the members of the association resident in the combined area of the second and fourth judicial districts; and one member at large from the entire state. Three members who are not attorneys shall be appointed by the governor and are subject to confirmation by the legislature in joint session.

(b) Members of the Board of Governors shall hold office for three years and until their successors are elected or appointed and qualified.

(c) Four board members shall be selected on the following triennial rotation:

(1) in the first year, one member from the first judicial district, one member from the combined area of the second and fourth judicial districts, one member from the third judicial district, and one appointed member;

(2) in the second year, one member at large, two members from the third judicial district, and one appointed member; and

(3) in the third year, one member from the combined area of the second and fourth judicial districts, one member from the third judicial district, one member from the first judicial district, and one appointed member. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960; am §§ 1, 2 ch 9 SLA 1971; am §§ 3 — 5 ch 52 SLA 1981)

Effect of amendments. — The 1981 amendment added the second sentence of subsection (a). The amendment also added "or appointed" preceding "and qualified" in subsection (b) and rewrote subsection (c).

Editor's notes. — Section 14, ch. 52, SLA 1981, provides: "The governor shall appoint the initial non-attorney members to the Board of Governors for the following terms: one member for a three-year term; one member for a two-year term; and one member for a one-year term."

Sec. 08.08.060. Election of officers. The active members of the Alaska Bar who are in actual attendance at the association's annual convention shall elect by a majority vote during the convention the association's officers from the membership of the Board of Governors. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960)

Sec. 08.08.070. Vacancies on the board. (a) The board shall fill a vacancy in the elected membership of the board until the next annual election.

(b) The governor shall appoint a member to fill a vacancy in the appointed membership of the board for the unexpired term. (§ 5 ch 196 SLA 1955; am § 1 ch 178 SLA 1960; am § 6 ch 52 SLA 1981)

Effect of amendments. — The 1981 amendment rewrote this section.

Sec. 08.08.075. Meetings of the board. AS 44.62.310 and 44.62.312 apply to the meetings of the board. Members of the Alaska Bar and the public shall be given 30 days notice of meetings of the board except for emergency meetings. Meetings of the board shall take place in the state. (§ 7 ch 52 SLA 1981)

Sec. 08.08.080. Powers of board. (a) Except as may be otherwise provided in this chapter or the Alaska Bar Rules, the board may approve and recommend to the state supreme court rules

(1) concerning admission, discipline, licensing, continuing legal education, and defining the practice of law;

(2) providing for continuing legal education and for certification of a continuing legal education program;

(3) establishing a program for the certification of attorneys as specialists.

(b) The board may adopt bylaws and regulations consistent with this chapter and the Alaska Bar Rules

(1) concerning membership and the classification of membership in the Alaska Bar;

(2) fixing the annual membership fees;

(3) concerning annual and special meetings.

(c) Consistent with this chapter and the Alaska Bar Rules, the board may

(1) provide for employees of the Alaska Bar, the time, place and method of their selection, and their respective powers, duties, terms of office, and compensation;

(2) establish, collect, deposit, invest, and disburse membership and admission fees, penalties, and other funds;

(3) sue in the name of the Alaska Bar in a court of competent jurisdiction to enjoin a person from doing an act constituting a violation of this chapter;

(4) provide for all other matters affecting in any way the organization and functioning of the Alaska Bar. (§ 7 ch 196 SLA 1955; am §§ 2, 3 ch 178 SLA 1960; am § 5 ch 181 SLA 1976; am § 8 ch 52 SLA 1981)

Cross references. — See Alaska Bar Rules adopted by the Alaska supreme court.

Effect of amendments. — The 1981 amendment rewrote this section.

NOTES TO DECISIONS

Final power and authority to determine standards for admission to the practice of law in Alaska resides in the supreme court, which has the inherent power to intercede at any time in admission matters. In re Luna, Sup. Ct. Op. No. 1503 (File No. 27[illegible]), 569 P.2d 789 (1977).

Practice of law not defined. — There is no rule defining the practice of law. Nor is there a statute defining the term except in the context of the requirements of active practice of law as a qualification for justices. In re Robson, Sup. Ct. Op. No. 1573 (File No. 3448), 575 P.2d 771 (1978). See also In re Babcock, Sup. Ct. Op. No. 178 (File No. 408), 387 P.2d 691 (1963), decided prior to the 1976 and 1981 amendments to this section.

For case construing board's power to define the practice of law prior to the 1976 amendment of this section, see In re Moody, Sup. Ct. Op. No. 1065 (File No. 2035), 524 P.2d 1261 (1974).

A superior court law clerk should be regarded as practicing law for the purposes of membership classification. In Moody, Sup. Ct. Op. No. 1065 (File No. 2035), 524 P.2d 1261 (1974).

Activities constituted practice of law in violation of supreme court's suspension order. — Where a person held himself out as a lawyer; performed legal services and gave legal advice in setting up a prepaid legal service plan, completing and filing necessary forms; signed a letter of the type usually written by an attorney with "attorney at law" printed aside his name; permitted another person to refer to

CHARLIE--for now we have only one to confirm, may not get another soon--Joe

ALASKA BOARD OF GOVERNORS--This statute only amended in 1981, creating a 12-man board in place of a 9-man board, with three new ones to be lay members appointed by the governor. (The other nine, all attorneys, are elected at annual bar convention--this year June 9 & 10--and will take office, any new ones, June 11).

*Lay Members:

KAREN SLACK, Anchorage, Term expires 1984 (probably June 30th). She has just resigned, by letter, and in same, asks governor to appoint as quickly as possible...may be an appointment coming through forher.

LeROY COOK, Fairbanks, term expires June 30, 1983...expected to resign, as Hammond appointed him in last days of Hammond regime. His name is NOT going to Sheffield, according to Randy Burns, executive director of Alaska Bar Ass'n. in ANchorage...andof course, he has not been confirmed by any House Judiciary Committee...since it's a new administration, suppose Sheffield will nominate a replacement when he gets around to it.

LEW M. WILLIAMS, Ketchikan, just appointed by Governor, not yet confirmed, term expires in 1985 (June 30th).

** Attorney Members:

President, Andrew J. Kleinfeldt, Fairbanks, term expires 1984

President-Elect, Mary K. Hughes, ANchorage, " " 1984

Vice President, Harold M. Brown, Ketchikan, " " 1984

Secretary, Ms. Niesje Steinkruger, Fairbanks, " " 1985

Treasurer, Ronald W. Lorensen, Juneau (AG office)" " 1985

State-wide representative,
William P. Bryson, ANchorage, term expires 1983

Bruce E. Gagnon, Anchorage, term expires 1985

Karen L. Hunt, Anchorage, (past Pres.) term expires 1983

Hugh G. (Jerry) Wade, ANchorage, term expires 1983

POSITION PAPER/Department of Health & Social Servi

POSITION PAPER

EXECUTIVE ORDER 54

Executive Order 54 would establish a Department of Corrections. Departmentalization of Corrections would (1) ensure that Corrections is in fact a full partner in the criminal justice system; (2) enable the needs and problems of Corrections to be routinely presented to the Governor; (3) enable the agency to actively and effectively support its budget request throughout the administrative and legislative process; (4) provide continual professional guidance based on sound correctional experience, training, and management expertise in correctional systems from top departmental administrators; and (5) streamline the organizational structure for more effective correctional management.

Within the Alaska criminal justice system, a Department of Corrections would exceed the Judicial Branch and Department of Law, both in number of employees and in size of budget. Corrections is exceeded in size only by the Department of Public Safety. All criminal justice system agencies, including the Division of Adult Corrections, are budgeted together in the Administration of Justice category for appropriations. Corrections is in practice and responsibility a full partner in the criminal justice system. However, Public Safety and the court system organization are such that administrative heads are selected due to a refined knowledge in their specialized fields. The Director of the Division of Adult Corrections possesses that expertise; however, those in the DHSS Commissioner's Office must advocate for a broad range of human services, including Corrections. For the benefit of the criminal justice system, the increasing complexity of corrections makes it important that top administrators be expert corrections practitioners; they should not have their attention segmented to the other human service needs.

While, generally, Corrections and other divisions would be likely to benefit from the result of this departmentalization, the effect of separation would not be entirely beneficial to components of Department of Health and Social Services. The dual constitutional mandate for protection of the public and rehabilitation of the offender makes it essential that a human service emphasis be included among the highest Corrections' goals and objectives. Since most of the State's social and human support services are available from agencies within the Department of Health and Social Services, there is some cause to continue Corrections as a component agency within this department. While needed Department of Corrections' services could be secured from Department of Health and Social Services' agencies by negotiated agreement, there is great value in providing these services within the departmental planning and policy development structure in order to most effectively integrate social and human support services within the State. Creation of a separate department would not entirely relieve other Department of Health and Social Services' divisions and agencies from Corrections' demands for services since the need will continue to exist and the demand will simply be made by a separate department rather than by another division within this same department.

In terms of administrative support, the creation of a Department of Corrections could be beneficial to both the criminal justice component of DHSS, as well as to the remaining divisions and offices of the Department. The

POSITION PAPER/Department of Health & Social Servi

urgency and nature of Corrections' issues require increasingly larger portion of the efforts and attention of top DHSS administrators. Not only are the other human service programs impacted by more top administrative time being directed to corrections' issues, but also by an increasing portion of the Department's fiscal resources being committed to address Corrections' urgent needs. It must be remembered that the basic human services programs are not incidental, but rather are vital programs impacting every Alaskan. It is not likely that the demands of Corrections will slow significantly in future years. Each new institution will require a large number of new employees and pending litigation offers the prospect for committing the state to continued policy and program development, extensive renovation of existing facilities, and the need for even more fiscal resources to support expanded operations.

The Department of Health and Social Services believes the creation of a Department of Corrections would allow increased focus on the critical problems inherent in the operation of programs for adult offenders, would increase the effectiveness of the criminal justice system as a whole, and would be generally beneficial to the operation of other offices and divisions within DHSS. The Department supports the approval of Executive Order 54.

Estelle says working with youth answer to rising prison population

By DAN HILL
Staff Writer

Texas Department of Corrections Director W.J. Estelle challenged a crowd gathered at the monthly Chamber of Commerce First Friday luncheon, to "do something" about the rising prison population, by working with young people in their own community to keep them out of the criminal justice system.

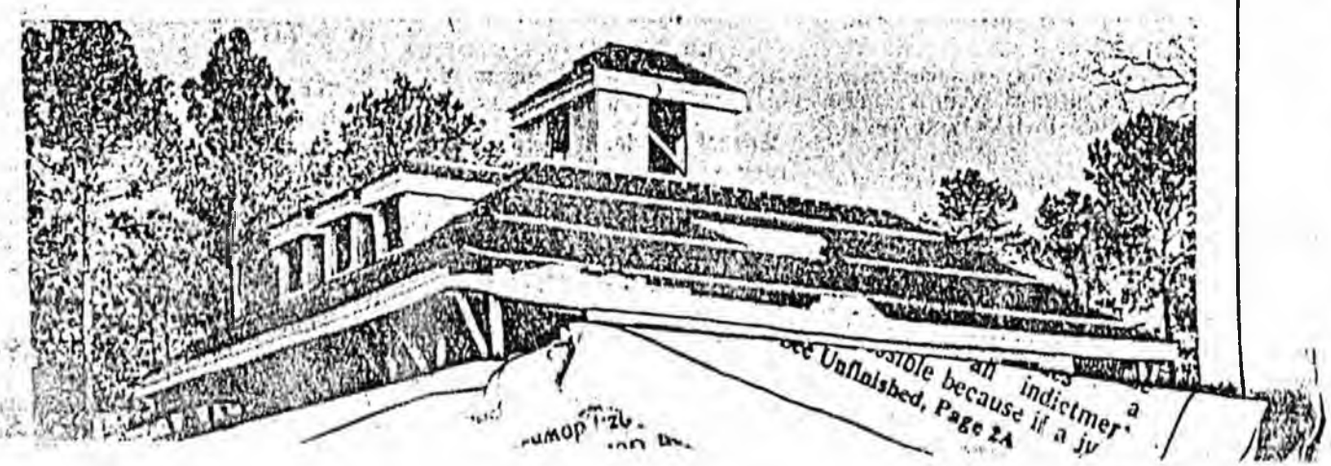
"We've all got to stop and re-evaluate our priorities," Estelle said. "They don't just turn 18 years old, and suddenly turn criminal, they grow up that way."

Estelle said it was every individual's responsibility to take care of the children in his own home and community, and take enough interest in them to let them know that there are alternatives to crime.

"You and I have taken that interest in our own children, most of us have anyway, but there are many others who have not, and that's why our prisons are full," Estelle said.

Estelle added that working on the problem of keeping individuals out of trouble is something that's going to take a lot of work.

"The real heroes in the criminal justice system are those who are spending their valuable time working with troubled youth, and even bigger heroes are those that totally get involved with our young people before they get in trouble, giving them something wholesome to do, to keep them out of trouble in the first place."



Estelle said that the time has come for action and for a commitment to the children and youth, and that it had to start on the neighborhood and community level.

"We've got to come to the understanding that we've got to solve the problem ourselves, and you can start by controlling what goes on within a one-mile radius of where you work and live," he said.

Estelle said that everyone understands that you have to pay taxes to have good schools, and he

Abortion

Continued from Page 1A

abortion," Taylor said.

"Some people (in Planned Parenthood) are very well-meaning," Martin said, and do not know Planned Parenthood includes abortions in their counseling.

Taylor said Planned Parenthood does not actually perform abortions but provides "referral listings of places they can have it done."

The organization will recommend to the woman that she not have an abortion after the first trimester of pregnancy, Taylor said.

Planned Parenthood serves a need in Angelina County, Prince said. About 3,800 people in the county received services from it last year.

"We'll have to make a decision that is best for the majority. We can't satisfy everybody," he added.

Planned Parenthood in Lufkin will receive $2,500 from United Way this year, according to Prince, less than one percent of the $285,000 distributed by United Way in the county. That is about two percent of Planned Parenthood's total budget.

The Right to Life board is trying to incorporate for two reasons. Members want to become a tax-exempt charitable organization and to be more credible. "In the eyes of the public, you're more credible if you have an organization with structure," Martin said.

Right to Life also plans to form a political action committee. During elections the committee will publish a list of candidates and their positions on abortion, Martin said.

Eventually, the board would like to provide a counseling service for women on abortion alternatives. "If you take a stand against something, you have to provide viable options," Martin said.

Until then, they will work closely with Birthright, a national counseling service with an office in Nacogdoches.

Mrs. Karen Castillo, director of Birthright there, said the service provides counseling on alternatives such as adoption and maternity homes.

Although most people involved

CRIME: punishment vs. prevention

Crime wins hands down as the political issue most likely to appear in every campaign. The anti-crime bandwagon is one nearly every candidate is ready to ride—waving slogans and solutions: capital punishment, tougher laws, stiffer penalties, more police, more jails, and more money.

Alaskan candidates were no exception this fall. They called for stronger anti-crime measures, although six new jails are in the works for Anchorage and the state's new criminal code is putting people behind bars at an extraordinary rate.

More jails and police may make the populace sleep a little sounder, but those who study crime, criminals and the justice system seem to agree that although these measures will cost a lot of money, they won't work.

"What we need to look at is alternatives to the use of law," said John Angell, director of Justice Center at the University of Alaska, Anchorage. "The only thing the law can do is administer retribution, and retribution doesn't seem very effective.

"We appear to be dealing with crime and corrections using the common sense of people who have not studied the problem, and the result is public policy that is not consistent with research findings on how to deal with the problem.

"The common sense solution to crime may be to build more prisons so you can lock more people up for longer periods of time, but it's the common sense of people who haven't studied the problem.

"Common sense, for example, tells you that conspicuous police patrols will control crime. It was tried and studied and it didn't change the incidence of crime," said Angell.

"We know that increasing the harshness of the criminal code will increase prison populations, but there has never been any research to show that tougher laws lead to a decrease in crime rates."

After Alaska's new criminal code was developed, modified by the legislature, and enacted in 1980, the prison population grew 28.3 percent in one year—the highest jump in the nation next to Mississippi's (28.8 percent).

"Alaska may soon be leading the pack in the proportion of its citizens behind bars, but that doesn't mean there will be less crime," Angell said.

Roger Endell, corrections specialist at the Justice Center, concurred. "Crime prevention strategy is the only strategy that makes sense in the light of what we now know.

"In Anchorage there are many calls for increasing the number of police officers: more police, more arrests, more people in the justice system, more people in jail. But we don't hear the question, *What do we get for all this?* Public policy should be newsworthy. We ought to be looking at the why.

"The policy decisions that are made are not always consistent with the recommendations of professionals and the best information we have on what is effective.

"Instead, society tends to fund projects and then, after the fact, try to evaluate the results. We need to design the evaluation into our justice projects. Funds should be provided to evaluate the effect of the public policy before it is put into effect.

"The legislature adopted a new criminal code that has resulted in the jailing of many more people, which is very costly, but it doesn't mean we now have a society. The probable impact of the code wasn't studied before it was adopted," said Endell.

Angell pointed out that justice-related policies are often formulated from recommendations of citizen's crime commissions that are popular in most cities and states.

"No one would think of appointing a citizen's committee of non-engineers to figure out how to get to the moon, and the problems associated with crime are infinitely more complex," he said.

"Unfortunately, people recognize the value of research for technology, but there seems to be no strong feeling that we should put money into research related to social problems. In the justice area, people are willing to spend money for things they can see, like police and jails, but not for understanding the problem.

"Politicians have made putting more police on the street a priority issue, although it's never been shown that this will cut crime. And there is no evidence that enacting the death penality reduces violent crime. The homicide rate in North Carolina went up after the death penalty was imposed. It may be that the death penality in some way legitimizes the violence by formalizing the punishment that will be inflicted."

The popular anti-crime measures often advocated in public will have no effect on that half of all criminal acts which are never reported to authorities. They are also unlikey to affect the "white-collar" crimes committed by people of a higher socio-economic status than the majority of people who end up in jail.

"Punative laws have the largest impact with people who have something to loose—status, reputation, money—and there are many people who don't have these things," Endell said.

"We have to get away from the punishment model, because research clearly indicates that punishment has no effect on the crime rate."

If common sense and punishment don't work, how can we have a safer society?

The first step advocated at the Justice Center was meeting the need to obtain a clear picture of what crimes are being committed, where, when and by whom. The second was the urgent need to develop alternatives to the punishment model, and the third was to improve what happens to people who are put in jail.

"One thing we're aware of is the need for a statewide system for collecting adequate data," Angell said. "People talk about rising crime rates, but we really don't know if life in Alaska is more hazardous today. We need to improve our record keeping system. And because 50 percent of all crimes are unreported, we need to carry out vicitimization studies."

Rather than counting the number of known crimes, vicitimization studies are

designed to find out how many people have been the victim of a criminal act.

The major source of data used to capture the trend and distribution of crime in the state is the Uniform Crime Reporting (UCR) Program. Data is collected by law enforcement agencies as crimes are reported. Seven offense categories representing the most common local problems, are defined as Crime Index Offenses: murder, forcible rape, robbery and aggravated assault make up the violent crimes; burglary, larceny-theft and motor vehicle theft make up the property crimes. They are serious because of their nature and the frequency with which they occur.

The UCR program was established in 1930 by the International Association of Chiefs of Police to provide crime statistics through which the nature and scope of the nation's crime problem could be understood. The Federal Bureau of Investigation took over the responsibility of receiving, tabulating and publishing the crime statistics, which are voluntarily submitted by police agencies. They are published each year as *Crime in the United States*.

There are several problems with the UCR program, according to *Crime in Alaska*, the state report prepared by the Office of Justice Assistance of the state Department of Law.

"The population bases which are used in computing crime rates are sometimes only estimates. This is especially true in non-census years. Also, crime may be either undiscovered and therefore unreported, or, as recent victimization surveys have indicated, unreported even though discovered.

"Despite these problems, UCR statistics do represent the basis for public awareness of crime and are the major source for a statistical understanding of the national crime problem. It is more reasonable to improve the existing program than to scrap it in favor of a new collection system which might prove more fallible," the report states.

A basic measurement in crime statistics is the crime index rate, defined as the number of incidents per 100,000 inhabitants. Because it relates the incidence of crime to the total population, it provides a means of comparing current and historical data for the state and allows Alaskan statistics to be compared with nationwide data.

During 1981, the Crime Index rate for Alaska was 5,949 per 100,000 persons, which represented a one-half percent increase over the 5,918 rate for 1980 and was slightly higher than the nationwide rate.

"It is important to understand how statistics are accumulated and what they represent," Endell said. In Alaska, the incidence of violent crime seems to be disproportionately high in smaller communities, but is under-reported. Non-violent crimes, white-collar crimes and corporate crimes are also likely to be unknown.

It is important to realize that crime statistics can be manipulated by changing the way things are classified," Endell said. "In Oakland, there was a very high burglary rate, which included all parking meter break-ins. Removing parking meter break-ins from the burglary catagory resulted in a two-thirds drop in the burglary rate in one year."

Endell said that in another city, the crime statistics showed a large drop in the number of drug-related offenses in one year. A law enforcement official was called to Washington to be commended for this success in combating crime. However, it was actually caused by a money-saving cutback in the number of law enforcement agency clerks, which reduced the quality of record keeping and resulted in the apparent victory in the war against crime.

Endell described our current corrections system as an economic drain which has done little more than create warehouses of crime.

"One-half to two-thirds of the prison population is receiving far more custody than required, and the greater the degree of custody, the greater the cost," he said. "We need to look at alternative programs and facilities."

He said the concept of requiring offenders to make restitution for their crimes is a reasonable one that should be politically appealing.

"We could institute programs through which non-violent inmates earn their way out of prison by working in public service jobs, such as construction of public projects in rural areas; or through employment in prison industries. The state has an obligation to provide inmates with legitimate work opportunities for which a legitimate wage is paid."

Under a restitution program, a person found guilty of a crime would be evaluated in terms of the threat he or she posed to society, and an evaluation would be made of the monetary restitution appropriate for the crime committed.

The criminal code would include a provision under which the court could choose to order restitution and the inmate would be assigned to work through which he or she could earn an eventual release from custody.

"We need to shift our focus from catching and convicting criminals to preventing criminal behavior," Endell said. "But we also need to improve what we're doing in corrections. It's a question of whether a person comes out of jail better or more bitter."

Another development which may lead to more effective policies is the bio-environmental approach to understanding and control of criminal behavior. Bio-environmental criminology uses genetics, biochemistry, psychology and sociology to explore questions about the early detection of deviancy and the environmental aspects of crime.

"There is no one cure-all for the problem of crime, but there is no magic in time-only punishment either," Endell said.

It may be impossible to have a society that is completely free of fear, but our justice system seems to hold much room for improvement in the effort to reduce both crime, and the fear of crime.

At the Justice Center, this kind of understanding and impact is the goal.

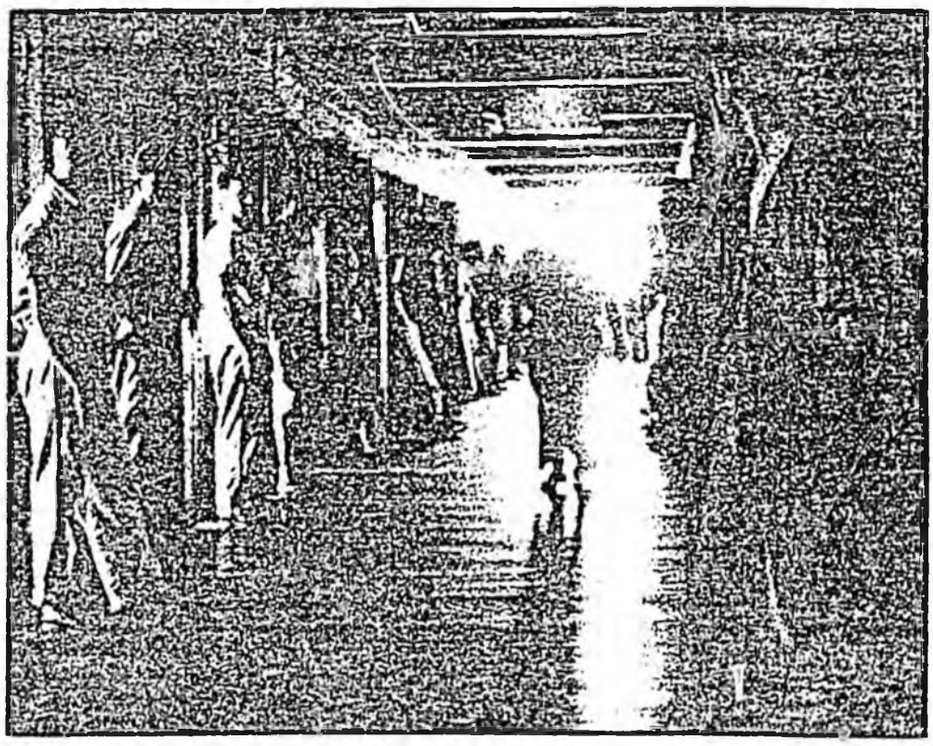
Overcrowding Forces States to Re-Examine Sentencing Philosophy

Keeping the Lid on Prisons

By David Rankin
National Law Journal Staff Reporter



THE ENTHUSIASM of state lawmakers for a tougher response to crime is beginning to be tempered by the cold, hard fact that prison beds are a scarce commodity.

In a handful of states, the lack of space for prisoners has already caused legislators to change their minds about who should go to prison and how long they should stay there.

And, in some states, lawmakers are having these decisions made for them. At the end of last year, 31 states were under court order to reduce overcrowding and, in instances where a state has been slow to respond to judicial pressure, judges have even ordered the early release of prisoners.

Even in the states that are willing to bite the bullet and construct more prisons — and many are — the overcrowding problem is frequently so massive that the new supply of beds cannot keep up with the demand. In fact, a report prepared for the National Institute of Justice estimates that, at a cost of $32,000 to $40,000 per

but it is a practical approach to the problem.

and prisons that are horrendously overcrowded — and getting more so all the time — have begun to alter their thinking about who should be imprisoned, and for how long.

"What appears to be happening is that people who work in the [corrections] system are realizing that prisons are a scarce resource," said Deborah Jackson of Abt Associates, a consulting firm based in Cambridge, Mass., which is studying prison overcrowding for the National Institute of Justice, a federal agency. "It is very expensive to incarcerate people and very expensive to build prisons," she added. "Ten or 15 years ago, I don't think that was widely accepted."

"There are states where they are really beginning to look at what they are doing" with regard to incarceration policies, particularly "states that can't afford to keep on building [prisons]," echoed Gerald Kaufman, head of the Prison Overcrowding Project. The project, based in Philadelphia, is working with "decision-makers" in four states to develop strategies for controlling prison population size.

Ideally, taking into account the availability of prison beds may not be the best way to decide who goes to prison and how long they stay there, but it is a practical, rational approach to the overcrowding problem, said Diane Steelman of the National Council on Crime and Delinquency.

Those states that are giving serious consideration to overcrowding when setting criminal justice policies — and they are in the minority — have responded to the problem in a variety of ways.

A few of them are attacking the problem head-on, either by deciding to send fewer offenders to prison or by reducing their sentences. Others have decided to push prisoners out "the back door" — release them earlier

legislators have focused their attention on releasing prisoners sooner to relieve congestion. The state has adopted a systematic plan for the early parole of non-dangerous prisoners when the inmate population reaches capacity.

Not all states, however, have pulled back from the idea of "getting tough" on crime after considering the costs involved. In Pennsylvania, Gov. Richard Thornburgh simultaneously proposed mandatory minimum sentences and appropriation of $102 million for new prison construction. The legislature approved both plans.

Following is a closer look at what some of these states have done — or not done — because of prison overcrowding.

South Carolina

When South Carolina legislators proposed stiffer penalties for habitual criminal offenders, including a mandatory life sentence for anyone convicted of three property offenses, they gave minimal consideration to the effect longer prison terms would have on the state's miserably overcrowded prison system, which is currently at 140 percent of capacity.

But William D. Leeke, commissioner of the state Department of Corrections, made it impossible for the legislators to ignore the bill's potential impact. His staff developed data which demonstrated that, if employed to the maximum extent possible, the proposed longer sentences would create a demand for as many as 3,748 new prison beds by 1998.

Considering construction costs of $40,000 per bed and $5,000 in annual operating costs for each prisoner, the total bill through 1998 could be as much as $387.1 million, corrections officials estimated.

The legislators ultimately passed a property offenders — to receive prison sentences.

The emphasis on violent crimes made the guidelines "very easy to sell politically," said Ms. Knapp, and they were approved by the legislature in 1980.

Michigan

In 1978, Michigan voters approved a referendum abolishing the accumulation of "good time" — reduction of sentences for good behavior — for prisoners convicted of a felony. This measure, combined with the voters' rejection of a proposal to raise the state income tax to build more prisons, was a major contributor to prison overcrowding. That situation, in turn, led to passage of the Prison Overcrowding Emergency Powers Act.

The law, which took effect in January 1981, provides a mechanism for reducing the inmate population whenever it exceeds the state prison system's design capacity of 13,047 for 30 consecutive days.

When state prison officials inform the governor that this has occurred the governor "triggers" the emergency powers act and orders the officials to subtract 90 days from the minimum sentence of all inmates convicted of non-violent offenses.

This creates a pool of prisoners who are eligible for parole sooner than expected. But the prisoners' records are still scrutinized by the parole board, and only those who meet the board's qualifications are released.

The net effect is that prisoners who would have been paroled anyway are released up to 90 days ahead of time, said state corrections commission spokesman Calvin Goddard. "If you are not eligible for parole, you are not going to get out," he said. "That is the safeguard as far as the community is concerned."

that many plus an additional 500 to relieve present overcrowding, according to Mr. Miller.

Mr. Blumstein, a professor at Carnegie-Mellon University in Pittsburgh who once taught Mr. Miller, said Pennsylvania initially considered mandating minimum sentences for a broader range of offenses but decided that would be too expensive. "I think it would be irresponsible not to [make such calculations] at a time when prisons are overflowing," he said.

• • •

That, however, is precisely what most states have been doing. And Mr. Blumstein, along with many other corrections experts, believes that will continue to be the rule rather than the exception.

The prison overcrowding problem, according to these experts, should be prodding state officials into a fundamental rethinking of their criminal justice systems, but that is unlikely to happen.

At best, more states are going to adopt the "Michigan plan" for their own use, which will ease overcrowding without addressing the underlying causes. "We are going to see more and more relief valves," said Allen F. Breed, director of the National Institute of Corrections, a prison reform group based in Washington.

Mr. Breed also predicts a "rebirth of parole" in states that have abolished the practice or curbed it by instituting mandatory sentences. Most experts, however, expect the well-established trend toward tough, mandatory sentences to continue.

"The pressure on the states to continue as they are, because of the popularity of the political position [of being tough on crime] is enormous," Ms. Steelman said. "I think very often the pressure will be [on legislators] to say: 'This will cost a lot down the pik. We will get to that later.' "

Can Early Release Plans Keep the Lid on Prison?

Continued from page 1

new prison bed, between $8 billion and $10 billion in new prison construction is needed merely to meet the current demand for space in state and federal institutions.

And the space problem is getting worse. According to the latest federal Bureau of Justice Statistics data, the nation's prison population this year is growing at an annual rate of 14.3 percent, the biggest spurt ever. A major contributor to this population explosion, according to the bureau, is the abolishment of parole in four states, and the implementation in a number of states of mandatory and determinate sentencing laws.

These laws have generally been passed without an analysis of their impact on a state's prison population, according to corrections experts. Instead, legislators are merely pushing more people into state prisons — and making sure they stay there longer — without providing state corrections officials with the funding they need to absorb the flood of new arrivals.

The result, noted one prison reformer, has been "more and more bodies and less and less space."

A Change in Thinking

"Pushing tougher sentences can be viewed as the legislative version of the free lunch," said Alfred Blumstein, an expert in prison demographics and chairman of the Pennsylvania Commission on Crime and Delinquency.

Recently, however, some states faced with the twin problems of recession-induced fiscal restraints than their sentences would normally permit.

State officials in some states have gone on record in favor of alternatives to incarceration.

Earlier this year, Georgia Gov. George Busbee wrote a letter to state judges asking them to consider alternatives to incarceration, such as victim restitution and "intensive probation," for non-violent offenders. And in Nevada, which claims the highest incarceration rate of any state, some legislators' support for alternatives was spurred by the State Department of Prisons' request for $70 million in new prison construction.

Similarly, in South Carolina, legislators decided against passing a tougher sentencing law after learning they would need to undertake an exorbitantly expensive prison construction program to accommodate the growth in inmate population that would result.

Utilizing a unique approach, Minnesota has altered its sentencing guidelines with an eye toward the available number of prison beds. The guidelines are designed to reduce the prison population slightly.

And in Michigan, where the state prison system has been found to be unconstitutionally overcrowded, the "watered-down version" of the bill earlier this year that has had little impact on the state prison population, according to state officials.

"We weren't arguing that the legislature shouldn't incarcerate [habitual offenders] for long periods of time," said Mr. Lecke. "Our argument was: where are you going to put these people? . . . Don't put an impossible burden on the corrections system until you know you can pay for it."

Minnesota

When the Minnesota legislature established a Sentencing Guidelines Commission in 1978, it asked the commission to take current "correctional resources" into consideration when developing new guidelines. The commission staff, interpreting this broadly, responded by proposing guidelines that were designed so that the average projected prison population would be 95 percent of capacity.

The result, according to Mr. Blumstein, is "a very good illustration of establishing a sentencing policy that tries to be responsible in terms of its impact."

The commission also sought to give less weight to an offender's past crime's than the earlier sentencing guidelines. Previously, property offenders with moderate criminal histories were likely to receive prison sentences, but first offenders, even if convicted of "a fairly serious crime," were rarely sent to prison, said Kay A. Knapp, commission director.

Consequently, the new guidelines call for a greater proportion of violent offenders — and a lesser number of

Taking into account the availability of prison beds may not be the best way to decide who goes to prison and how long they stay there.

A "prison overcrowding emergency" has been declared three times since the law was passed, enabling the early release of about 2,300 inmates.

Four other states — Connecticut, Georgia, Iowa and New Jersey — have adopted similar laws, according to the National Institute of Corrections.

The so-called Michigan plan, said Ms. Steelman, "is terrific. I wish all these states would adopt it. What they have done is provide a rational and orderly way to deal with prison overcrowding."

Even when states have the money for prison construction, it takes four or five years to build a prison, she said. In the meantime, "the only logical way to deal with excess people is to let them out."

Pennsylvania

Governor Thornburgh, a former U.S. attorney in Pittsburgh, has earned a reputation for being tough on crime. So it was no surprise when he pushed the legislature to pass a tough new mandatory sentencing law that calls for a minimum of five years' imprisonment for those who are repeat violent offenders, those who commit violent crimes on public transportation and those who commit violent crimes with a firearm.

But, unlike most politicians, Mr. Thornburgh also asked for $102 million for new prison construction to handle the expanded inmate population the tougher sentences are expected to produce.

"We knew if we were going to put people away, we had to know where we were going to put them" said Harold D. Miller, an aide to the governor who helped develop the new corrections program. The state, estimating that the new sentencing laws will create a demand for a minimum of 1,880 new beds, has decided to build that many plus additional

State given time to reduce jail crowding

ANCHORAGE (AP) — The state has been given more time to reduce the inmate population of the crowded Sixth Avenue jail.

Superior Court Judge Victor Carlson said Friday he is convinced "the executive branch of government,. at its highest levels, is making an effort to deal with the problem."

Carlson cited recent legislative approval of a request from Gov. Jay Hammond to add 70 new prison guards to the state system.

Assistant Attorney General Mike Stark asked for additional time to complete the hiring and training of a staff for the recently renovated 45-bed wing at Post Six, known formerly as the Ridgeview Correctional Center.

The wing is to be used to handle the overflow from the Sixth Avenue facility where the population fluctuates between 120 and 150, although the design capacity of the jail is 100.

A pre-trial detention center is under construction on Post Road, just east of the downtown area, and is expected to be completed by December. Until then, prisoners awaiting trial will continue to be mixed with convicted prisoners.

Tim Stearns, an attorney for a group of inmates who sued the state in 1977 over jail conditions, objected to the 30-day extension granted by Carlson.

"If corrections had wished to comply with the court order, it would have been complied with by now," Stearns said. "I don't think a delay in moving the people from Sixth Avenue is going to help that institution or the other institutions."

While Carlson gave the state until March 15 to get the Sixth Avenue population down to 100, he ordered an April 12 court appearance to prove that the state has complied with a 1979 order mandating general improvements at the jail.

Among other things, prisoners complain about cold food, a lack of linens and toiletries, and having to sleep on the floor without mattresses.

Court upholds 'emergency aid doctrine'

Associated Press

The state Court of Appeals has ruled that police acting in response to an immediate life-saving emergency legally can enter a private home without permission and gather incriminating evidence without a warrant.

The court issued that decision Thursday in upholding the conviction of David Gallmeyer of Wrangell on a charge of being a felon in possession of a firearm.

Police were called to the Gallmeyer home on April 12, 1978, by his wife, Linda. She told them by telephone that her husband had pushed her out of the house after a fight, and she asked their help in getting her 15-month-old baby out of the house.

While officers were en route, Gallmeyer placed the baby on the porch. When they arrived, Mrs. Gallmeyer told them her husband was intoxicated and had several guns in the house.

One of the responding officers decided he should talk with Gallmeyer to make certain he was calm before any attempt was made to remove the baby.

The officer called to Gallmeyer, then entered the home without permission. Once inside, he saw that Gallmeyer had a gun stuck in the waistband of his trousers. He grabbed it, and Gallmeyer was charged with being in possession of a firearm while intoxicated.

Police subsequently discovered that Gallmeyer was a convicted felon, and he was charged with and convicted of being a felon in possession of a firearm.

In upholding the conviction, the Court of Appeals said the "emergency aid doctrine" justified the warrantless entry of the home because police held a reasonable belief that a life-threatening emergency existed.

Overcrowded Sixth Avenue Jail hits deadline today

By SHEILA TOOMEY
Daily News reporter

A court-ordered deadline for reduction of the population at the overcrowded Sixth Avenue Jail expires today and a Superior Court Judge is expected to rule this afternoon on a state request that the deadline be extended to March 15.

Dec. 17, Judge Victor Carlson found the state in contempt of a 1979 court order and gave corrections officials 60 days to reduce the number of prisoners at Sixth Avenue to no more than 100. The jail population Thursday was 140, but was expected to fall to the high 120's today due to scheduled releases, according to Superintendent Russ Moody. An additional 45 pre-trial prisoners are being houseing in a wing at Post Six (formerly Ridgeview(, he said.

Prisoner affadavits filed in Superior Court Thursday, in preparation for today's hearing, complain of inadequate sanitary facilities, a lack of towels and sheets and inmates being forced to sleep on the floor because of a bed shortage.

The Legislature approved the hiring of 70 new corrections officiers last week, according to Assistant Attorney General Mike Stark. The requested deadline extension will give the Division of Corrections enough time to hire and train the personnel needed to staff another 45 beds at Post Six by March 15, Stark said. Moddy plans to transfer inmates with low security classifications to the Post Six facility as soon as it is staffed, he said.

Today's hearing is the altest in a battle that began in 1977 when a group of prisoners filed suit against the state demanding that prison conditions be improved. In 1979, Judge James Singleton ordered seven pages worth of improvements including areas such as food, medical care, clothing, exercise, plumbing, bedding, censorship of outgoing mail and telephone access. "With the aparent exception of mail censorship, defendants continue to be in violation of the above provisions of (Judge Singleton's) order," charged lawyer Tim Stearns, who represents the inmates.

The Sixth Avenue Jail houses arrested men awaiting trail and some convicted felons awaiting sentencing. The building is old, with poor plumbing and a faulty heating system. It consists mostly of dormitories holding up to 32 prisoners each. "We are overcrowded and understaffed," Moody said Thursday. "All things considered, and by comparison to any other institution like ours, I think we're doing very good.

Stearns charged that most of the violations at sixth avenue ar enot directly related to overcrowding.

Anchorage Times

Court to study jail conditions

Overcrowding at Anchorage's Sixth Avenue jail is scheduled to come under court scrutiny again today when the state asks for more time to relieve the overcrowded conditions.

In December, Superior Court Judge Victor Carlson gave corrections officials 60 days to reduce number of prisoners at the jail to no more than 100. On Thursday, the jail population was about 140.

But state officials, who hired 70 new correctional officers last week, say they need an extension until March 15.

Carslon will hear arguments in the case this afternoon.

33 indictments of false native dental care

ANCHORAGE (AP) — A Delta Junction dentist has been indicted on 33 counts of fraud for allegedly cheating the government by submitting claims for care never provided natives in rural Alaska, U.S. Attorney Michael Spaan says.

The indictments against James Goodman, 32, were returned Wednesday.

According to Spaan, the dentist was under contract with the U.S. Public Health Service to provide the care.

Jail given another month to cut population

By SHEILA TOOMEY
Daily News reporter

State corrections officials won a one-month reprieve in Superior Court Friday when Judge Victor Carlson gave them until March 15 to reduce the prisoner population at the Sixth Avenue Jail to no more than 100 inmates.

Assistant Attorney General Mike Stark asked for the additional time to permit the hiring and training of guards for a new 45-bed wing at Post Six, formerly Ridgeview Correctional Center. The recently renovated wing is intended to house the overflow from the crowded Sixth Avenue Facility.

Noting recent legislative approval of a request from Gov. Jay Hammond for 70 new prison guards, Carlson said he is convinced "the executive branch of government, at its highest levels, is making an effort to deal with the problem."

The inmate population at Sixth Avenue fluctuates between about 120 and 150 prisoners awaiting trials or sentencing. A new pre-trial jail is now under construction on Post Road, east of downtown. It is scheduled to open in December.

While he agreed to a 30-day extension, Carlson ordered the state to appear in court April 12 prepared to prove that it has complied with a 1979 court order mandating seven pages of general improvements in jail conditions. Carlson also ordered Sixth Avenue supervisor Russ Moody to report to him by Monday on the current availability of blankets, towels, sheets, toothbrushes and soap in the jail.

The judge instructed Moody to take the temperature of food served to inmates over the weekend in order to test inmate charges that jail food is usually served cold.

In December, Carlson gave the state until Feb. 19 to comply with the requirements of the 1979 court order.

Tim Stearns, an attorney representing a group of inmates who filed suit against the state in 1977, argued against any extension. "If corrections had wished to comply with the court order, it would have been complied with by now," Stearns said. "I don't think a delay in moving the people from Sixth Avenue is going to help that institution or the other institutions."

Stearns said he believes Moody's personal efforts to improve jail conditions are not being supported by his superiors. Affidavits from inmates, filed with the court Thursday, charge that prisoners often have to sleep on the floor without blankets or sheets. They also complain about the alleged lack of medical care and physical exercise.

Carlson agreed that he, too, was concerned about the possibly explosive situation in the overcrowded jail.

Assistant Attorney General Stalk called the complaints "a long recipe list," with some charges false, some exaggerated and some true."

Fairview halfway house approved

By LARRY CAMPBELL
Daily News reporter

Fairview residents turned out in force Monday night to argue against allowing a halfway house for recently discharged mental patients to be located in their neighborhood.

But the Anchorage Planning and Zoning Commission, by a 5-1 vote, approved a permit allowing the center to remain in operation.

Residents' comments — heavily weighted against what mental health experts call a "transitional living center" — came during a public hearing before the commission. The commission earlier had approved a permit for the facility, which has been operating in a limited capacity since November, but a technical gaff required the issue to be considered again.

Fairview Community Council officials and area residents said they feel the neighborhood's opinions were ignored. The hearing was held at the Fairview Community Center.

Gordon Glaser, president of the Fairview Community Council, told

See Back Page, FAIRVIEW

Fairview residents oppose halfway house, but permit is approved

Continued from Page A-1

commissioners the prior decision on the halfway house violated the neighborhood's sense of involvement with the planning and implementation of the project.

"Community involvement and fear in this community are linked," Glaser said.

Glaser emphasized the involvement of Fairview residents with other community programs such as S.T.A.R. (Stand Together Against Rape) and the AWAIC (Abused Women's Aide in Crisis) shelter. Both programs are located in the Fairview area.

"We are participating wholeheartedly in programs like these," Glaser said. But with the halfway house, "nobody seemed to bother to ask us."

Dr. Gary Vreeman, director of the Anchorage Community Mental Health Center, testified that the halfway house is needed, and that the Fairview area is an ideal location for the facility because it is located close to public transportation, shopping centers, recreational facilities and a Post Office.

Vreeman tried to allay fears expressed by some residents that the halfway house might bring patients with violent tendencies into the neighborhood.

"People with a mental illness are typically withdrawn," Vreeman said. "A center like this helps to make them feel they are not failures."

He said the center's screening procedures for accepting residents to the facility eliminates patients with histories of violence, sexual aberration or alcohol or drug abuse.

But most of the Fairview residents who spoke at the hearing were unconvinced.

"They never consulted us and we are bitterly against this halfway house," said Helen Mason, secretary of the community council. "This isn't a good place to be if you don't get community cooperation."

Mason also spoke of concerns felt by a number of residents that the Fairview area already was inundated with social service facilities, such as those mentioned by Glaser.

The halfway house was originally granted a permit in November to operate as a quasi-institutional facility designed to assist newly released mental patients from Alaska Psychiatric Institute and other mental institutions in re-entering society.

Residents receive basic training in housekeeping, cooking, shopping and other self-support skills. Eventually, halfway house residents who successfully complete the program will leave the center and live on their own.

Eight patients had already moved into the six-plex at 921 E. 10th Ave. when community residents appealed the commission's earlier permit approval. When it was learned that a malfunctioning tape recorder made it impossible to provide a verbatim transcript of the earlier proceeding, a new permit and hearing process was begun.

In the interim, the halfway house was prevented from accepting 10 more residents.

Overhaul of prisons advised

By HAL SPENCER
The Associated Press

JUNEAU — Gov. Bill Sheffield should create a separate department for Alaska's beleaguered prison system, build more jails including a maximum security prison and put prisoners to work, a task force said Monday.

The task force, headed by Roger Endell, a University of Alaska, Anchorage, professor, also recommended that the state launch alcohol and drug abuse programs in jails, keep a number of violent offenders in the Federal Bureau of Prisons system and close no existing correctional facilities, with the exception of the Anchorage Careage House, until replacement facilities are found.

The Careage House should be used as the Division of Corrections headquarters, the task force said.

The task force also recommended that jail construction be viewed as a high priority among all units of state government, that corrections be managed on a decentralized, regional basis and that corrections staff be well trained.

The recommendations were among 35 presented to the governor, who said the suggestions "will be highly valuable to the administration as we prepare the state budget and possible bills for introduction to the 1983 Legislature."

Sheffield appointed the panel in mid-December with instructions that it forge solutions to Alaska's growing corrections crisis — a crisis most evident in the state's overcrowded jails.

But Sheffield had no immediate reaction to the specific proposals, and his office said he would have none pending further study.

No cost figures were attached to the task force's recommendations. Independent work now being done by various state agencies will develop the potential costs of the recommendations, according to John Greely, Sheffield's deputy press secretary.

Task force recommends overhaul of state corrections system

Continued from Page A-1

"It is clear that there is a crisis in corrections," the task force said. "It is also clear that with sound, long-term and professional management, most of the current problems can and will be resolved."

The Division of Corrections, currently within the Department of Health and Social Services, should be elevated to cabinet-level status, the task force said.

Citing what it called a "crisis in correctional management," the panel said, "We have found unanimous agreement from virtually all persons interviewed, from all regions of the state, and from segments of the criminal justice system — police, courts, corrections, law — and from the citizen sector that departmental status is not only justified but necessary."

The task force said the department should be created in a "quick and clean" fashion through executive decree.

"The division has been managed by four different directors in the past six-year period," the panel said. "The most recent director as well as the current director were both hired by the previous administration to move the Division of Corrections toward a more stable management situation. Their task was made more difficult because of their lack of knowledge of the unique problems and potential advantages of Alaska corrections."

The Division of Corrections is currently headed by Robert Hatrak, who could not be reached for comment on the study Monday.

The panel also said a commissioner of corrections should be appointed as soon as possible. A deputy commissioner and four regional directors should be appointed by the commissioner, the task force said.

"In regard to the need for a maximum security facility in Alaska, the task force received clear and compelling testimony from state and local police, the court system" and others that the state needs such a facility.

The group also urged that "new site acquisitions, construction additions and building renovations be completed expeditiously as the highest priority through the channels of state government while minimizing both hindrances and costs."

The task force said the Department of Transportation and Public Facilities "should recognize prison construction as a high priority. Building supplies and prisoner labor should be used in building renovations and in the construction of non-secure buildings."

"The prisoner population should be put to work," the panel said.

The task force said corrections "must be given the resources to provide meaningful work opportunities for the offender population," listing as examples clearing land, rehabilitating streams and maintaining parks.

Recognizing that alcohol and drug abuse help to swell jail populations, the task force said the state, in cooperation with local governments, should provide prisoners with substance abuse programs. "There is a crucial need for a comprehensive approach to the problem of substance abuse," the panel said.

The task force said corrections "must be given the resources to provide meaningful work opportunities for the offender population," listing as examples clearing land, rehabilitating streams and maintaining parks.

Recognizing that alcohol and drug abuse help to swell jail populations, the task force said the state, in cooperation with local governments, should provide prisoners with substance abuse programs. "There is a crucial need for a comprehensive approach to the problem of substance abuse," the panel said.

State chief will support KILA home

NEWS MINER 3-4-83

By SCOTT YATES
Staff Writer

Deciding there had been "adequate public dialogue" a state corrections official said he will recommend that the state sign an agreement with KILA Inc. to run a 56-bed halfway house near Ester.

Walt Jones, assistant director of corrections, made the announcement near the end of a KILA board of director's meeting which saw 42 Ester residents show up to express their concern over the facility. Although the halfway house has been occupied by 21 persons since Feb. 26 under an existing agreement with the state, a contract amendment has not yet been signed to take into account the expanded capacity.

Rep. Mike Davis, who listened to the meeting over a teleconference hookup, said he did not think a KILA board of directors meeting constituted an adequate public hearing.

He was surprised to learn that the facility has been occupied despite earlier objections by Ester residents.

Leaders of the Ester opposition meanwhile said they will continue to wage their fight against the halfway house. Mark Davis said this morning he's "almost positive" that residents will go to court.

"The people of Ester were denied due process."

Apologies notwithstanding, residents remained unsatisfied with the explanations of KILA board President John Link Thursday night. Explaining that he was out of town when the controversy surfaced, Link said, "From what I can reconstruct, I think we are all suffering from the disability of not knowing what's going on."

Link told the group that he never considered the halfway house part of Ester and he accepted blame for not talking with residents.

"We never for a minute thought the people of Ester would raise a fuss. Believe me, if we had, we would have been out at the community center. Whatever blame there is rests on my shoulders. You have our apology."

After presenting a brief history of KILA, which means "friendly spirit" in Inupiat, Executive Director Frank Gold sat silently through most of the proceedings while Link and Jones were bombarded with questions.

Residents were told that security at the facility relies primarily on an

(See HOME, page 5)

HOME . . .

(Continued from page 1)

alarm system. Doors are wired to a central switchboard which lights if they are opened. Two teams of six supervisors each will work at the halfway house and at least two people will be awake at all times. The personnel will not, however, be responsible for restraining individuals. If someone leaves, state troopers will be called to apprehend them.

"Before we get excited about that, let me tell you the type of person lodged there is not the type who would go into a community, either Fairbanks or Ester and raise havoc," Link said.

Jones added that the prisoners are screened and only those posing the lowest risk possible will be considered.

"They have to show they can function in that environment. Everyone who is eligible doesn't go through a halfway house," Jones said.

Jones said that of 314 people who went through halfway houses during the past year, 265 completed the program successfully, that is, they didn't violate any rules which caused them to be sent back to jail.

Jones explained that those who fail the program usually commit infractions like drinking or returning late.

Armed with the contract between the state and KILA, residents asked who is ultimately responsible for the prisoners and any damage they might cause. A clause in the contract says the state is held harmless, but there was a difference of opinion whether that would hold up in court. Several members of the audience asked that the attorney general make a determination as to responsibility.

Link said during the meeting that KILA had spent $30,000 of its own, funds getting the building opened. He indicated the mortgage came due Thursday and was now deliquent because the state contract hadn't been signed.

New prisons chief scraps Woronzof jail

By TOM KIZZIA
Daily News reporter

1/7/83

The new head of Alaska's prison system said Thursday he wants to set aside plans for a new prison at Point Woronzof and find a way to solve overcrowding problems without immediate construction of a new jail in Anchorage.

Roger Endell, a university professor and former Alaska corrections official, was named Thursday to replace Robert Hatrak as chief of corrections. A spokesman for Gov. Bill Sheffield said the change was made to bring "fresh ideas and fresh leaders" to the prison system.

The new approach was immediately evident. A plan outlined Thursday by Endell would do away with the proposed jail at Point Woronzof, west of Anchorage International Airport. Former Gov. Jay Hammond and Mayor Tony Knowles agreed last November to build a new prison there.

Endell's plan also would close the controversial Cartage House jail in the middle of a Tudor Road residential neighborhood. Endell said he wants to convert it to a Southcentral headquarters for corrections within weeks after he begins his job Monday.

As an alternative, Endell wants to purchase and remodel as jails existing facilities in the Matanuska-Susitna and Kenai Peninsula boroughs. He also wants to keep open the Ridgeview Correctional Center, which the Hammond administration had declared decrepit and wanted to close.

Endell said his plan would be a cheaper and quicker way to relieve overcrowding in Alaska's prisons. It also would do away with the long-standing problem of finding a new prison site in Anchorage.

The Point Woronzof site would require a lengthy permit process by the municipality, and a costly extension of utilities, Endell said.

A likely alternative site appears to be a former missile base at Goose Bay, on the

See Back Page, CORRECTIONS

Corrections chief decides against Point Woronzof jail

Continued from Page A-1

north side of Knik Arm. Allen Korhonen, acting commissioner of the Department of Health and Social Services, said Thursday that corrections officials favored it as a site for a medium-security prison and planned to tour the base next week.

Other sites under discussion include the Wildwood Center in Kenai, a former radar base on Ohlson Mountain in Homer, and sites in Seward and Palmer.

Under the Hammond administration, corrections officials had argued that a medium-security prison was essential in Anchorage.

Medium-security prisons for 100 inmates at any two of the new locations possibly could be erected in a year, using modular materials, Endell said. These sites could also be used for maximum-security prisoners, according to Endell, who said the state may reconsider its earlier decision to build a single, 300-bed prison for its biggest security risks.

Endell said he favored small, regional facilities and said problems could develop if all the most difficult prisoners were housed together.

The need for minimum-security space in Anchorage can be met by keeping the Ridgeview and Third Avenue jails open, Endell said. The state had previously planned to close them after a new pretrial facility on Post Road opens sometime this spring.

Endell, who was head of a special Sheffield administration task force on corrections, is inheriting most of the same problems faced by Hatrak, who was on the job only nine months.

The task force report appeared to give more attention to concrete solutions to overcrowding than to rehabilitation programs. But it could be called only a moderate shift of emphasis from his predecessor's reliance on "community-based" programs such as halfway houses.

"He's a professional corrections administrator," Endell said of Hatrak, who was not criticized by name in the task force report. "A number of the problems in corrections he obviously inherited."

The task force was critical of the high turnover in corrections management. The next director, the task force said, should be someone already familiar with the state's jails.

The job description fits 42-year-old Endell well. A resident of the state for more than two decades, he served as assistant superintendent of the Juneau Correctional Center from 1971-73, the Third Avenue Jail in Anchorage from 1973-74, and the Eagle River Correctional Center from 1974-76.

He was most recently an associate professor of justice at the University of Alaska, Anchorage, Justice Center. A Sheffield spokesman said Endell has written extensively about the penal systems in the Soviet Union and Finland.

The Endell task force recommended that corrections be removed from the Department of Health and Social Services and placed in a new Department of Corrections. Endell said Thursday he expected the new department would be created soon, with him as commissioner, but he was not sure whether it would be created by the legislature or by executive decree.

Let convicts do jobs for the city

Petty criminals may spend time behind a broom instead of behind bars under a promising state-municipal proposal that could spruce up the city while easing overcrowding in local jails. Still in the discussion stages, the proposal would put selected individuals convicted of misdemeanors to work sweeping bike trails, clearing roadside rubbish or even shelving library books instead of cooling their heels in already overcrowded jails.

Under the program, individuals convicted of such non-violent crimes as shoplifting, writing bad checks and littering could be assigned community service instead of jail time or a suspended sentence. Predetermined guidelines would screen out offenders inappropriate for the program, which could put up to 2,500 to work for the community at a cost of $150,000.

The local proposal dovetails appropriately with a report released Monday by the Governor's Task Force on Corrections. The report recommends community services opportunities as a method of acquiring eight-hour-a-day work habits and law-abiding skills. The report emphasizes the need for such programs now. We agree.

Although community service is not a new idea — the state Pretrail Intervention Program already coordinates community service projects with local non-profit agencies — the public works aspect of this proposal makes it especially attractive at a time of dwindling dollars and overcrowded prisons. It costs money to incarcerate a person; idle hours in overcrowded conditions do not make that money well spent.

Although a rough draft of the proposal is still a month off, we think this expanded local intervention program has merit — especially in light of the city's budget crunch and the state's jail crunch. If properly implemented, it's a program that could benefit the city — which is raising taxes to help fund basic capital projects maintenance — the jails, and even the petty offenders who could be channeled through the system in a productive, positive manner.

Welcome mat

NEW STATE JAILS and maybe a maximum security prison or two will be hot topics on the political scene during the coming legislative session. Let's hope the legislators will not overlook offers from communities that want this kind of business.

Seward, for one, has invited state officials to consider their port city as the site of a new jail or prison. For one thing, it would be good for the community's economy, bringing a new and steady payroll to town along with considerable construction dollars. For another, new detention facilities have to go *someplace*, and Seward would be fulfilling a civic duty by providing the site and the support required.

The Kenai Native Association has proposed converting the old Wildwood military station near Soldotna, which it now owns, into a minimum security prison. The Kenai Peninsula Borough gave it a strong endorsement and state officials, we're happy to say, apparently have responded favorably. Opposition, however, has surfaced in the form of an editorial in the Peninsula Clarion that took issue with Wildwood as a site. It said "putting a prison in the midst of a community is dubious public policy," and suggested better options should be available.

SEWARD AND KENAI are possibilities, obviously. Another smaller cities, looking for a steady addition to the local economic base, likewise might be receptive to the prospect of playing host to a state jail or prison.

But there still seems to be a lack of enthusiasm among those in the corrections system to give serious consideration to outlying areas.

The attention always seems to have been focused on Anchorage. Detention facilities here are more convenient for the lawyers, the judges, the convicts and the state employees in the system.

And if those are the primary criteria, it's no wonder there hasn't been much serious discussion of sites beyond the confines of urban and suburban Anchorage.

But with the stated interest from Seward and the Kenai Native Association, there is reason to think the prospect of finding new locations is not as gloom-and-doom as officials would have people believe.

Oops

AN EDITORIAL in these columns the other day said nice things about Sen. Don Gilman's efforts to learn more about what's going on in Anchorage, since he now represents the south end of town even though he lives in Kenai.

The same opinion piece expressed the hope that Sen.-elect Paul Fischer of Kasilof, who represents the same district with Mr. Gilman, would follow suit.

Well, it turns out that Mr. Fischer was in attendance at the now-famous secret meeting this week when the municipality presented the mayor's $196-million "wish list" to area legislators.

The mix-up came because it was inaccurately reported that the Fischer who was present was Sen. Vic, not Sen. Paul. Whoever did the reporting got the two confused.

IT HAS BEEN suggested that surplus pipeline camps be used and that's a worthy idea.

A former congressman from the East captured headlines earlier this year by proposing the use of an uninhabited Aleutian Island as a federal prison. That's not necessarily a hair-brained idea.

No matter what solution is found eventually, there's no doubt the problem will be a big ticket item for the new administration and the legislature to address. But it is not a problem that can't be solved — with enough thought (and probably a lot of dollars).

State may need to double space 3-4-83

Prisons said to be 'busting at seams'

By DAVID RAMSEUR
News-Miner Bureau

JUNEAU—Alaska may have to double its prison space to nearly 2,000 beds within four years at a cost of perhaps $130,000 a bed, if the state is to keep up with the skyrocketing number of persons convicted of crimes.

That's one of the findings of a newly released report by the research arm of the state House of Representatives.

The 60-page report says the state's prison population is expected to exceed 2,000 by 1987, compared to the current inmate population of nearly 1,300.

The current rate means that one out of every 400 Alaskans is in prison, which is significantly higher than the national average of one in every 600 persons.

Release of the report comes on the heels of considerable state activity on prison issues. Gov. Bill Sheffield recently proposed creating a separate state Department of Corrections.

His capital budget submitted to the Legislature calls for the construction of a new $45 million, 302-bed maximum security prison.

And lawmakers are considering a multitude of measures to tighten state criminal laws on everything from sexual assault to drunk driving. Many of those revisions will result in more inmates who would require additional prison space.

The House Research Agency report, authored by Betty Barton and Jon Sherwood, says the crime rate is partly responsible for the growing need for prisons.

In 1980, Alaska's crime rate was less than one percent lower than the national rate. In that year, Alaska ranked 14 among the states for its crime rate. Between 1980 and 1981, Alaska's violent crime rate—murder, assault, rape and robbery—increased 27 percent.

The report points to several reasons for that increase. Among them: an increase in the population of young adult males who are responsible for a large percentage of crime; poor economic conditions; and social problems such as alcohol abuse.

Other factors will affect a growing prison population in Alaska, says the study. One of the most important is a 1981 class action suit filed by an inmate which requires the state to relieve over-crowding and improve prison conditions.

The report outlines several courses state officials can take on corrections issues. Those include:

- Increasing prison bed space, which appears to be the most popular among the Sheffield administration and key legislators.
- Modifying state laws that determine who goes to prison and for how long.
- Strengthening prison management through reorganization.
- Improving communications and

(See PRISONS, page 5)

PRISONS . . .

(Continued from page 1)

decision-making in criminal justice agencies.

Some state officials, such as those in former Gov. Jay Hammond's think-tank agency, say building more prisons without looking at other problems is an incorrect solution to a skyrocketing prison population.

But "locking them up and throwing away the key" appears a popular notion with this Legislature and administration.

The report reaches no conclusions about the dilemma other than to suggest any answer will be costly.

"The rate of increase in prison populations—at least in the immediate future—is expected to grow," concludes the report.

"In light of this, it is becoming increasingly important that government become more efficient in its management of offender populations and its use of existing facilities."

More than $133 million is budgeted for this year for the administration of justice, an increase over 1982 of nearly 30 percent.

Sheffield has proposed an $83.9 million prison building program for next year which includes an 80-bed Fairbanks pre-trial facility and 32 additional beds for the youth wing in Fairbanks.

Prison staffing fortified

by Jeff Berliner 4/28/83
Times Writer

Fourteen new corrections staffers begin work at the Lemer prison today and 40 guards remain on mandatory overtime in the wake of two escapes last week.

An emergency situation continues at the prison, said superintendent Stanley Zaborac.

"Prison policies and procedures have been modified to limit the freedom of inmates to move from their living areas to other areas of the institution," Zaborac said today.

"Correctional officers are working 12-hour shifts and we're bringing people in on their days off," Zaborac said. Each guard is averaging one day of overtime per week, Zaborac said.

Zaborac has asked the legislature to declare the situation an emergency and approve a supplemental budget to pay for the 14 new staff members and overtime for the entire 54-person corrections staff.

Funding to complete a fence around the medium security wing of the prison also is in the request. One hundred of the prison's 242 inmates are in medium security. The minimum security section houses 142 prisoners. The prison is designed to hold 206 men.

Although all 14 people hired by Zaborac are termed temporary, he said he is seeking additional money to make them a permanent part of the staff.

The need for more staff is so critical, Zaborac said, that the new officers will receive an abbreviated training course: they'll complete 16 hours of classroom training today and then spend the weekend under the tutelage of experienced staff before being put on their own Monday.

Although the state of emergency continues at the prison, Zaborac said the facility is more secure than it has been in the past.

Five inmates escaped in two separate incidents. All five were recaptured and have been charged with escape.

Report on prisons deserves attention

No pricetag has been attached yet, but the ideas collected in a single report by a special task force on state prisons represent an apparent consensus on Alaska's corrections needs. Expect state policy to begin to coalesce around the major conclusions.

The major themes: construction of more jails and a maximum security prison; elevation of the Division of Corrections to department status; and creation of "meaningful work opportunities" for prisoners. Other important aims: establishing drug and alcohol abuse programs in Alaska prisons, decentralization and regionalization of prison administration, an end to persistent "crisis in correctional management," and greater stability at the head of the system.

There are weaknesses in the report — chiefly the shorthanded consideration of alternatives to incarceration, in a state that imprisons more of its citizens than it can handle — but the conclusions and recommendations will be useful as Gov. Sheffield and the legislature begin coping with current stresses in the system. What's important about this effort is that it gives added currency to important ideas about prison management.

The most intriguing is the idea of putting prisoners to work — for both themselves and the society. Meaningful labor long has been the missing component in prisons whose stated aims included "rehabilitation." But rehabilitation is an elusive goal when enforced idleness — not to mention boredom, substance abuse, overcrowding and actual or potential violence — is the major fact of prison life. Assuming proper security safeguards can be arranged, prisoners put to work clearing land, rehabilitating streams or maintaining parks, to name a few tasks, could both spend their time usefully and repay their debt to society in a constructive way.

Substance abuse, too, deserves serious attention. It has become almost cliche for prison studies to point out the impact of alcohol and drug abuse on prison populations, and the overwhelming need for prisoners to cope with their compulsions before re-entering society. What the task force report accomplishes is to add that perspective to the public agenda — to encourage a response from the political system on what should be a mainstay of prison programs in Alaska.

In all, the task force has produced a useful report. The conclusions are neither startling nor revolutionary — but they deserve attention in Alaska's halls of power in the months and years to come.

Corrections director searches out site for prison

2/13/83

By RONNIE CHAPPELL
Daily News correspondent

KENAI — Corrections Director Roger Endell has crisscrossed the Kenai Peninsula since taking office earlier this year, making stops in Homer, Kenai and Seward. Next week, he returns to visit Nikiski.

The reason for all of this travel is simple. He's got 1,500 prisoners on his hands right now and there's space for only 900 in the state's existing prisons. He is looking for places to build new prisons, and he is looking for communities that want them.

According to Endell, there are two such communities on the Peninsula.

People in Seward are actively encouraging the state to build a new $40 million, 300-man maximum-security prison there. Endell said earlier this week that plans to develop a 220-man medium-security prison near Kenai have won the endorsement of the local City Council.

A decision on the maximum-security prison — and where to put it — will be made by the legislature this year.

The state had planned to build the new facility near Palmer, but that changed late last year when the Seward City Council contacted the Division of Corrections.

Endell described Seward's business and government leadership as "outright enthusiastic" over the prospect of becoming the home of the state's first penitentiary. "They are in an excellent position to be a contender" for the prison, he said.

The medium-security prison would be developed at Wildwood, an old Air Force Base that is owned by the Kenai Native Association. The Native corporation has offered to lease a three-story, concrete barracks building, garage and gymnasium to the state.

Endell is enthusiastic about

See Page B-2, CORRECTIONS

Corrections director on a search for site for state prison

Continued from Page B-1

the Wildwood site. "It has the highest potential of any existing site" now being considered for use as a corrections facility, he said.

Once the state has completed its evaluation of the buildings offered by the Native corporation, Endell said he plans to move quickly to close negotiations on the acquisition.

"We're close to an agreement now," he said. "In the next couple of weeks we hope to sit down and finalize it."

According to Endell, the state is looking for a long-term lease with the option to purchase at a fixed price.

The Native corporation has offered to lease the state three buildings for 20 years for $600,000 a year. The corporation would like to retain title to the property, said corporation President George Miller, but is willing to consider a sale if the state insists.

The value of that transaction to the Native corporation could increase substantially in coming weeks as the state is now talking about acquring seven buildings instead of three, Miller said.

A movie theater, medical clinic, bowling alley and grocery store with ample cold storage space are all adjacent to the concrete barracks building that would form the heart of the new prison.

If the Native corporation and the state conclude an agreement later this month, the new prison could be up and running by early fall, Endell said.

A "nucleus staff" will be dispatched to Kenai immediately to oversee renovation of the physical plant, begin program development, establish contact with local businesses and begin the process of screening and hiring 40 to 70 new employees.

Endell estimated it will cost about $1 million to convert the old Air Force base into a prison. A sprinkler system will have to be installed in the barracks building. Wooden doors will be replaced with metal ones and existing windows will be replaced with secure ones.

Control rooms and an electronic security system also will be installed.

The perimeter of the 10-acre prison will be surrounded by two security fences that are 20 feet apart. Both will be 18 feet high and topped with razor ribbon. An observation tower will be constructed on top of the three-story barracks building.

The proposed prison has not earned the support of everyone in the community. More than 250 Central Peninsula residents signed a petition opposing the Wildwood site.

In response to that opposition, the borough assembly rescinded a resolution endorsing the idea. In its place it enacted a measure calling on the Division of Corrections to hold public hearings on the Peninsula before reaching a final decision on the Wildwood site.

Endell said he is satisfying that request by meeting with city councils and chambers of commerce in Seward, Homer, Kenai and Nikiski.

Endell assures those he talks with the state will not locate a prison in a community where there is strong public oppostion, and he said he hasn't seen strong opposition on the Peninsula.

Assemblyman Kenn Stephens, who fought the prison, agrees opposition to the proposal has cooled.

"People have calmed down," Stephens said. "Folks aren't complaining on Soundoff (a radio call-in show broadcast by a Kenai radio station), and I haven't gotten any phone calls on it at all."

"The state's got its mind set, and people are resigned to the fact that there's going to be something there."

to create corrections department

By HAL SPENCER 1/21/83
The Associated Press

JUNEAU — The problems facing Alaska's prison system are firmly rooted in poor management — a situation that would change with creation of a corrections department, Roger Endell, state corrections chief, said Wednesday.

A corrections commissioner, who would oversee the department, could "pick up the phone and hire people, and more significantly, can pick up the phone and fire them," Endell told a joint meeting of the House and Senate health, education and social services committees.

Endell, whose corrections division is now within the Department of Health and Social Services, said that under the current situation, management officials, with the exception of the corrections director, are classified employees who cannot be easily dismissed.

The joint committee met to consider Gov. Bill Sheffield's Executive Order 54, which calls for creation of a corrections department. The move was recommended by a corrections task force, of which Endell was chairman.

The lawmakers deferred action, agreeing to meet as separate committees to take a closer look at the projected cost of the department.

Endell was able to provide only the "bottom-line" figures — about $250,000 for the rest of fiscal 1983, ending June 30, and almost $1 million for fiscal 1984.

"I can't believe it would be that high," said Sen. Rick Halford, R-Chugiak.

Endell said the department would have six management level employees and "support staff." The six would include a commissioner, two deputy commissioners working in Juneau and Anchorage respectively, and three regional directors overseeing correctional facilities in Southcentral, Southeast and the Bush respectively.

Endell urges prison industry

by Steve Rinehart 1/29/83
for The Times

Homer — Prison industry — everything from growing potatoes to building campsites — could help the corrections system pay its bills while teaching inmates better skills, said new state corrections chief Roger Endell.

While inmates can't be forced to earn their keep, he said, "my attitude is they will have to earn their privileges."

"I'm not advocating a return to the ball and chain," Endell said in a speech here this week. "It will be the inmates' choice. But those who chose not to work would be 'warehoused,' with space to sleep and little else."

Endell was in Homer to address the Homer Chamber of Commerce. Ohlson Mountain, a former military installation near Homer, is being considered as a site for a new medium-security prison.

Endell, who was appointed director of corrections by Gov. Bill Sheffield, said it has been his experience that most inmates prefer to work, gain some skills, and make some money.

Legally, inmates can be paid up to half the minimum wage, he continued, although they can also be charged for some services and forced to use a portion of their wages for family support.

Among suggestions Endell offered were that inmates do park and recreation work in remote locations. Trails, recreation cabins and fire pits could all be built by inmates.

There are many prison industries which would not compete with private enterprise, he said. For example, inmates could grow potatoes in the Palmer area since local growers can't meet consumer demand.

Currently, Endell said, the state contracts with a Canadian firm to do the laundry for the state ferry system. Juneau inmates could do the job as well and for less cost, he said.

As for the traditional prison industry — stamping license plates — Endell said he has been told there aren't enough vehicles in Alaska to make the business pay. However, he said, the state has sign-making equipment in storage, which could easily be put to use by prisoners making road and street signs for state and local governments.

Inmate labor could also be used to renovate prison sites, Endell said, thus lessening the high cost of needed improvements in the prison system.

Jail overcrowded — now

By CHRIS JARVIS 1/26/83
Empire Staff Reporter

Although Gov. Bill Sheffield has proposed a $81.8 million appropriation for construction of new jails, that doesn't help the overcrowding now being experienced at the Southeast Regional Correctional Institute at Lemon Creek.

Officials there are hoping a new maximum security wing now under construction will house prisoners by fall, easing some of the crowded conditions.

The rated capacity at Lemon Creek is 111 beds with 18 extra beds for those being held before arraignment and people serving weekend sentences. Monday night, however, 146 people were housed at Lemon Creek, Jail Superintendent Bill Huston said today.

While no major disturbances have occurred at the jail because of the overcrowding, Huston said a series of "small things you just don't put your finger on" often lead to troubles.

"The emotional level increases when you have this many people being held against their will," he said.

"Some discipline problems crop up when you have a lot of bodies," he said. For an example he cited a prisoner turning over a table in the mess hall out of frustration caused by tensions from overcrowding.

With only 45,000 square feet of living space, problems are bound to happen, Huston said. Until the new 58-bed maximum security unit is opened and other facilities are built in the state, there is potential for problems.

The Lemon Creek construction project started this fall and should be ready for occupancy by the fall of 1983, Huston said.

Eventually, Huston would like to convert the 24 and 22 bed dormatories now at the jail into single and double bed cells.

When you have 24 people living together in the same room during a long period of time, problems and tensions often come to the surface, Huston said.

The jail also needs additional space for activities, Huston said. But until the need for beds is lessened, none of the existing living space will be eliminated, he said.

Another problem facing jail administrators is the inability to plan ahead, especially on weekends when bookings increase because of arrests made by Juneau Police and Alaska State Troopers.

Noting that troopers and police have the option to not jail people arrested for traffic and other offenses, Huston said he is unwilling to second guess their actions.

"It's easy to sit back and say how Roger Staubach should have thrown that ball, but it's different when you're out there," he said referring to decisions police and troopers must make in the field.

"They not only are responsible for public safety but for the safety of the person too," Huston said.

Because police and troopers seldom want to make crack downs public before carrying them out, and unlike the Lower 48 where short term prisoners are housed in city and county jails, Lemon Creek must house long term prisoners as well as make room for those prisoners arrested or there for weekends or awaiting trial.

late hopes to construct new minimum security prisons by January

3-4-83

TOM KIZZIA
RONNIE CHAPPELL
News reporters

The state has proposed to vert three surplus federal s into medium-security sons in an attempt to elim- te prison overcrowding by uary.

n a plan ordered by Supe- r Court Judge Douglas Ser- ely as part of a settlement a class action lawsuit over son conditions, Director of rrections Roger Endell also poses to build a 250-bed son m scratch at Point ronzof in Anchorage, as ll as a maximum-security son at an undetermined ation.

The plan calls for the state increase the number of misdemeanants diverted from jail to community programs, and proposes to increase the number of "soft beds" used primarily by offenders with chronic alcohol problems.

Endell said that Alaska currently has 1,445 inmates — 431 more than it has room for.

The state could move 220 inmates into a former milli- tary base at Wildwood near Kenai in six to nine months, the plan says. In addition, the state has proposed to convert a former missile base at Goose Bay on the north side of Knik Arm into a jail for 200 inmates by fall of 1984, and a federal communications site at Chiniak, 49 miles by road from Kodiak, into a jail for 130 to 150 inmates, per- haps in early 1984.

However, at a public hear- ing in Kenai Thursday night, Endell said that a final deci- sion on whether to put a prison at Wildwood has not been made.

"It's a plan, that's all," he said, adding that the state has not yet negotiated an agree- ment with the owners of the base, Kenai Native Associa- tion.

Endell said the state would not develop the Wildwood site if residents oppose it. "If you don't want us here, we'll fold up our tents and go some- where else," he to a crowd of about 150 attending the hearing.

About half of those testify- ing at the hearing opposed putting a prison at Wildwood. Petitions containing the names of 400 people in opposi- tion were presented to Endell.

Others, however, testified in favor of the prison, and the Kenai Chamber of Commerce and Kenai Peninsula Fire Chiefs' Association gave En- dell resolutions supporting it.

Endell said the Goose Bay site is owned by the federal government, while the other two sites are now in private hands.

With these three sites in hand, the plan would scrap plans to expand an $11.7 mil- lion pre-trial facility in Fair- banks and a $9 million pre- trial facility in Juneau.

The plan does not outline the costs of the three pro- posed prisons, but said they would result in "tremendous cost savings."

The legislature would have to approve $45 million to build a maximum-security prison for 300 to 400 prison- ers. Sites under consideration are Palmer, Seward, Kenai and Haines.

The state would also have to come up with $35 million to build a new jail in Anchor- age to hold sentenced prison- ers waiting for a permanent assignment to prison. This new facility would allow the state to retire the existing Third Avenue and Sixth Ave- nue jails.

The state is seeking $5.6 million to finish a 50- to 80- bed Nome Regional Correc- tional Center, and plans to add a new 50-bed jail in Be- thel with existing funds.

Endell said lack of funding from the legislature, plus "poor management practices" by previous administrations, has contributed to the over- crowding problem.

Endell said factors that have led to overcrowding in- clude a stronger criminal code, fewer releases by the Board of Parole, tougher sen- tencing, and an increase in the number of police and prosecutors.

"Getting tough is admira- ble, but it is also tremendous- ly expensive. It is now time to pay the bill," he said.

Remote prison sites

THE MENTION of putting state prisons in remote areas brings cries of horror from the lawyers, the courts — and the prisoners.

They are quick to say that soners need easy access to their lawyers and to the court- rooms. They also say the pris- oners need to be close to law libraries, psychiatrists and counselors.

A re-orientation of that kind of thinking could be in order.

It's true that these services and various aids to prisoner welfare are mandated by the legislature and the courts.

But there's no reason why the lawyers and doctors and books and counselors can't be taken to the prisoners when they're needed, rather than having the prisoners them- selves in the center of things.

Selecting prison sites for the convenience of the prison- ers doesn't make much sense, particularly the long-term pri- soners. This is especially true when it's so difficult to get residents of a community to accept a prison as a neighbor.

There are excep- Pri- soners on trial or aw- ting sentence or whose terms are measured in days, not mo- hs or years, for instance, rea- y do need to be close to the lawyers and the courtrooms. But the ones with lengthy terms don't.

Alaska is a land of remote places. It should be easy to find sites for prisons.

Governor names Endell prisons chief

by Jeff Berliner
Times Writer

1/4/83

Director of Corrections Robert Hatrak resigned Wednesday at the request of Gov. Bill Sheffield, and was immediately replaced by University of Alaska professor Roger Endell.

Endell, 42, headed a Sheffield-appointed corrections task force that offered policy recommendations radically opposed to those followed by Hatrack.

Endell, a 22-year Alaska resident and a 1966 graduate of UA-Fairbanks, has been an associate professor of justice at the University of Alaska for six years. For six years before that, he served as an assistant superintendent at state prisons in Anchorage, Eagle River, and Juneau.

Hatrak's nine-month stint as prisons chief was marred by accusations of conflict of interest, charges that he had improperly let corrections contracts, and questions about his past.

While prison superintendent at New Jersey's Rahway State Prison, he was the object of a criminal investigation in New Jersey and later fired. Then, as Multnomah County (Ore.) correction director, a Portland grand jury recommended that he be fired from the job.

Endell said today that the Division of Corrections will steer state corrections in a different direction than it was going under Hatrak.

Endell will take over the helm Monday. His first task will be "getting the division reorganized and set up as a department, assuming the governor agrees it will go to department status," he said.

The task force headed by Endell recommended that the Division of Corrections be taken out of the Department of Health and Social Services and that it be elevated to department status run by a commissioner who answers to the governor.

Prisoners will be moved out of the controversial Carenge House — the nursing home turned prison which caused a storm of protest from the mayor and neighbors of the Tudor and Lake Otis facility — and the building will be transformed into the state corrections headquarters, Endell said today.

The efforts of Hatrak and assistant attorney general Mike Stark to settle an inmate lawsuit will be dropped, Endell said, indicating he'll work with the new attorney general to fight the inmate's suit over prison conditions. That was another task force recommendation.

"Serious prison overcrowding has to receive the constant attention of the director," Endell said.

But Endell said he thinks the problem can be solved at a lot less expense than proposed by the Hammond administration, notably Hatrak and acting commissioner of health and social services Allen Korhonen.

Without naming a dollar amount, Endell said, "I'm hoping we can do it for less."

Endell said he has ideas for coming up with as many as 400 new prison beds without "building concrete structures from the ground up."

He said the "very serious problems facing corrections are solvable" but will require "cooperation between the judicial, legislative and executive branches."

The corrections system has "a lot of catching up to," Endell said, so that the state prison system can handle all the people being funneled into it by the courts and as a result of new laws passed by the Legislature.

The task force report showed "very clearly there were substantial problems in management," Endell said, noting that the report stopped short of singling out Hatrak by name.

Endell said he will meet with the prison superintendents at the outset and anticipates none of the in-fighting and management problems which marked Hatrak's tenure as prison chief.

The "crisis in correctional management" can be solved with "sound, long-term and professional management," Endell's task force wrote, noting that the department has had four directors in six years.

But Endell called his appointment as the fifth director "a positive sign," proving that qualified Alaskans are available (a reference to selecting the last two directors from out of state), and because he already has a good working relationship with corrections.

"I know most of the people. I know most of their strengths and weaknesses," he said.

Endell said there may be a shake-up within corrections as a result of task force recommendations to establish regional corrections centers in Fairbanks, Juneau and the Bush. Attrition, through retirements of superintendents, may also clear some positions.

Endell candidly acknowledged Hatrak's problems but called him "a professional."

"He's had some tough experiences," Endell said of Hatrak. "He tried to do an admirable job. He's had some difficulties. But when he was appointed, the man knew he might be out of a job with the change in administrations."

Hatrak said today he was not told why he was losing his job — only that "my resignation would be accepted."

Hatrak, 45, was given the news Wednesday by acting commissioner of health and social services Korhonen.

Calls to Korhonen were returned by the governor's office and Sheffield spokesman Pete Spivey said the change was prompted by the governor's "desire to change leaders."

"The division of corrections has obviously gone through a lot of turmoil and I assume Hatrak's part of it," Spivey said.

The main finding of the task force, Sprivey said, was that "the division has not had very much strong leadership."

Hatrak said he had no warning of the sudden change.

"The governor has the right and perogative to field his own team. And he's probably better off fielding his own team. I feel strongly about that. It's his choice."

Hatrak said corrections problems promise to be a big issue in the Legislature in the coming session and "corrections needs to go into this with as strong a position as possible."

Endell

EO 54 - Sheffield
HB 103 - Fritz

"Creating a Department of Corrections"

"An Act establishing a Department of Corrections and transferring certain functions of the Department of Health and Social Services to the Department of Corrections; and providing for an effective date."

BACKGROUND INFORMATION:

Executive Order 54 establishes a Department of Corrections, replacing the Division of Corrections currently operating correctional institutions and programs under the Department of Health and Social Services. Adult penal institutions, the correctional industries program and probation and parole is proposed to be placed in the new department's jurisdiction. Juvenile corrections remain the responsibility of the Department of Health and Social Services. Responsibilities for the transportation of prisoners and mentally ill offenders are not addressed.

The "TASK FORCE ON CORRECTIONS STATUS REPORT" was submitted to Governor William Sheffield in December/January, 1982-1983. A summary document of the impact of those thirty four (34) recommendations relative to EO 54 and HB 103 is attached here. As of this date Corrections is reporting that they are currently complying with fifteen (15) of the recommendations; they have future plans to deal with eight (8) of them; eleven (11) of the recommendations they agree with but at the present time have no plans with compliance.

Staff requested "organizational development" information in order to compare staffing levels and requirements of three phases : (a) Pre-transitional Management Team; (b) Transitional Management Team; (c) Operational Department of Corrections.

Staff additionally requested fiscal information relative to previous administrative levels of function and organization within the Division of Corrections as a comparison with the proposed elevation to departmental status and the accompanying fiscal impact that it would address.

As additional support to EO 54, the Division of Corrections through the Department of Health and Social Services has submitted their position paper, attached here for review.

The Committee presently has copies of the "Population Managment Plan" which addresses some of the concerns and issues relative to the Executive Order and House Bill before them. Submission to the Committee of the "Mini Corrections Master Plan" has been requested and it appears as though that will be available some time on or about the fifteenth of the month of March, 1983.

Although the "TASK FORCE ON CORRECTIONS STATUS REPORT" addresses both the problem of juvenile corrections and the transportation of prisoners , these are questions that the committee still has to address to future testimonial before them.

IMPACT:

Sectional Analysis done by staff of HESS is attached.

FISCAL NOTE:

Attached

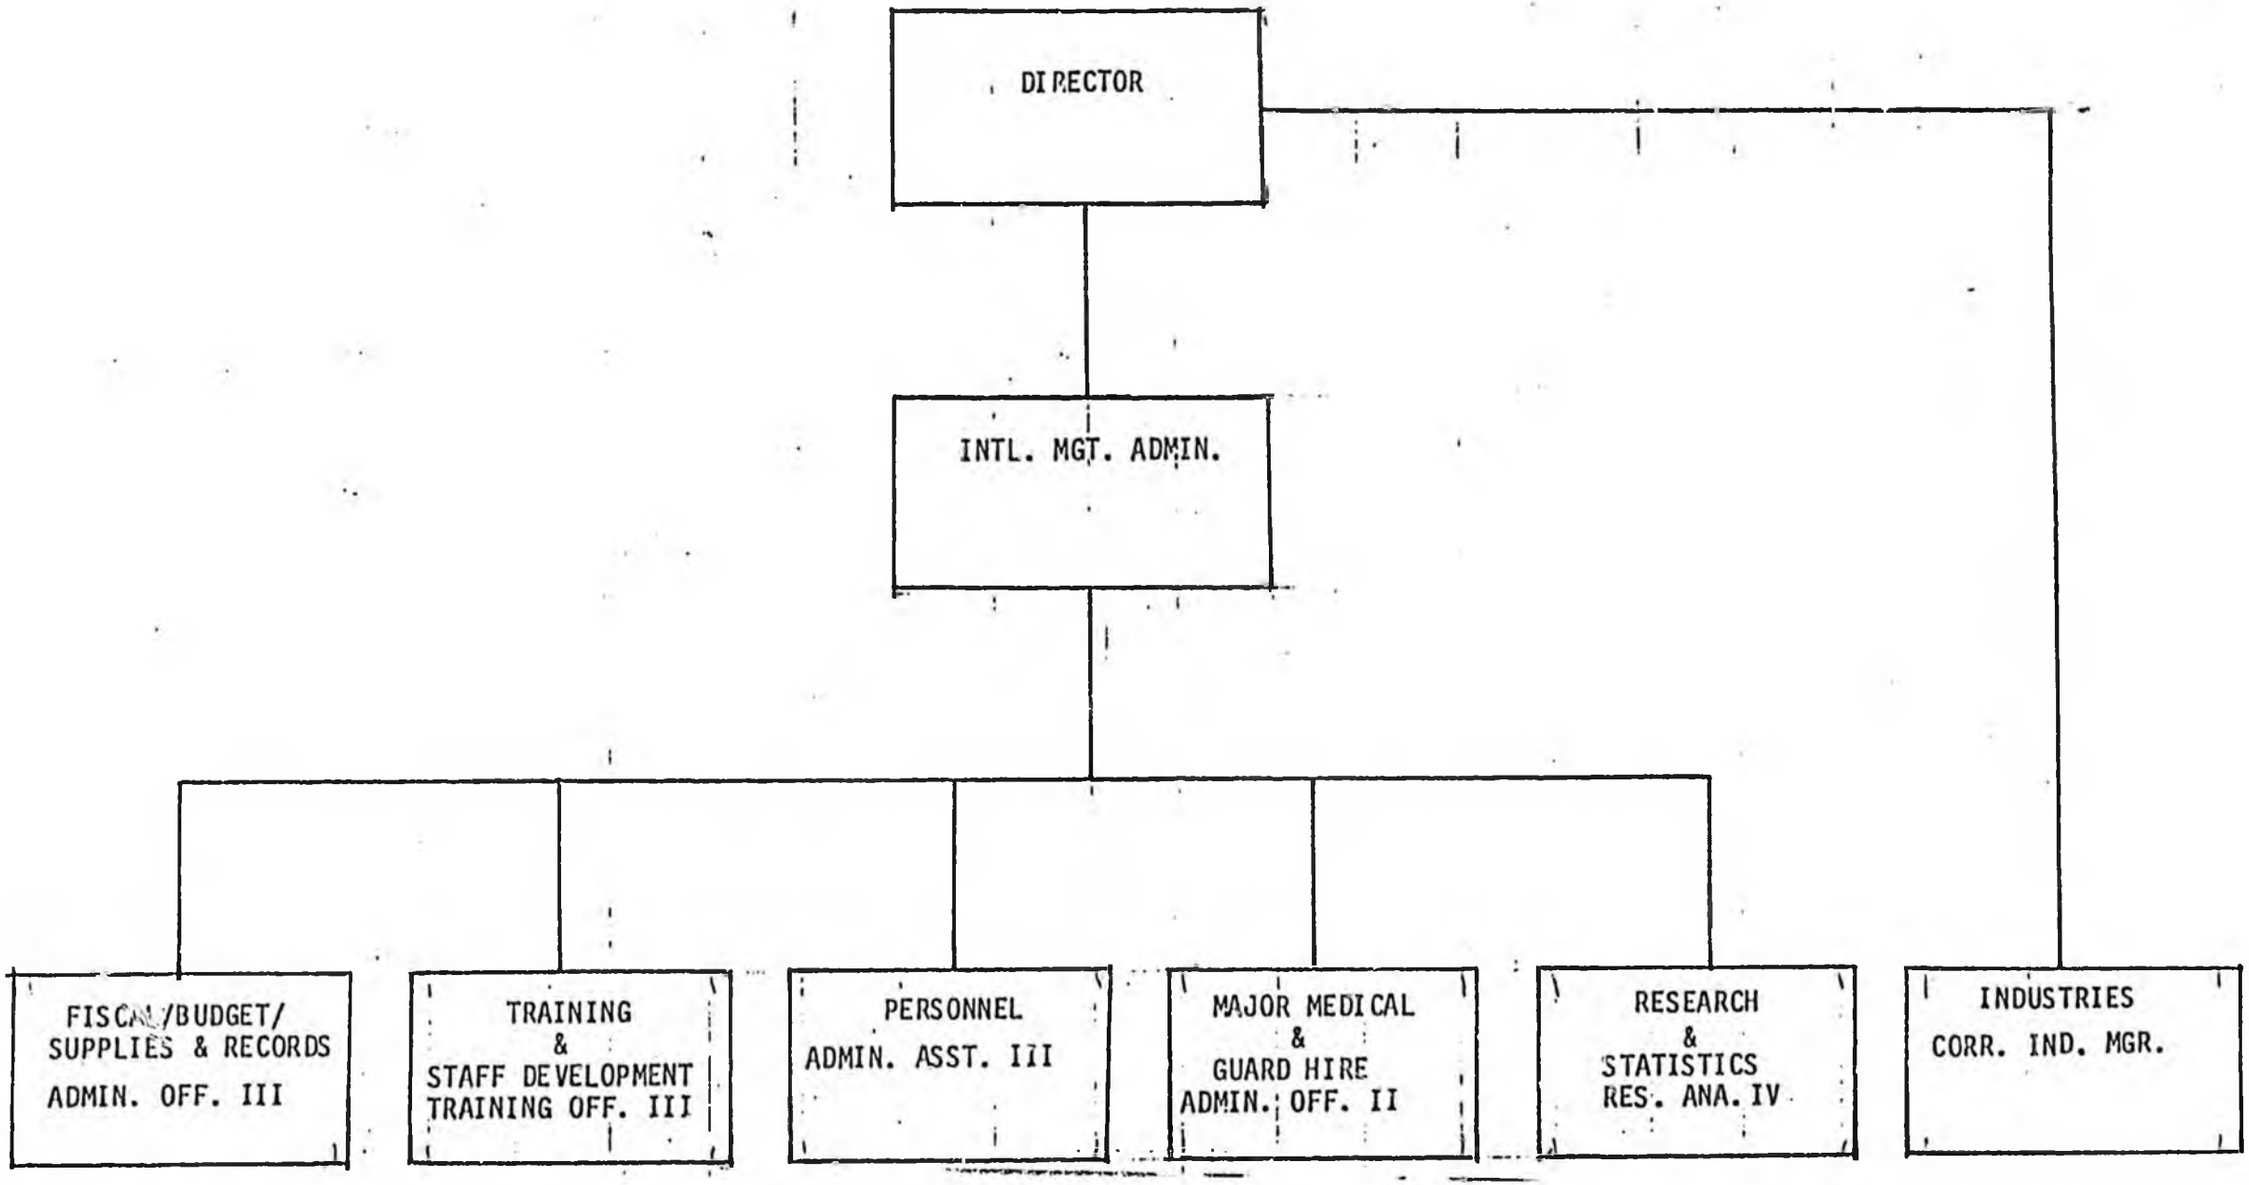
B. FUTURE



NUMBER	TEXT
(4 & 5)	The Third Avenue and 6th & C correctional centers in Anchorage should be utilized to hold short term offenders and those incarcerated for alcohol related offenses.
(7)	Hiland Mountain correctional center near Eagle River must be permitted to return to its original mission.
(9)	Sentenced adult female housing space at Meadow Creek (Eagle River) should be added as necessary with much less expensive architecture than past practice.
(14)	The state should continue to maintain a number of dangerously violent Alaska offenders within the Federal Bureau of Prisons' system.
(21)	All jail contracts should be managed by the Department of Corrections.
(31)	All youth correctional functions should be organized as a separate division within the Department of Corrections when reorganization is completed and functional.
(32)	The prisoner population of the State of Alaska should be put to work.

C. AGREE

NUMBER	TEXT
(10)	The type and methods of construction of the two institutions at Palmer should be copied elsewhere as needed in the State.
(16)	Correctional construction should be recognized as a high priority among all units of state government.
(22)	A well trained correctional staff is mandatory and critical to efficient management.
(23)	The Division of Corrections should be moved quickly and decisively in toto by immediate executive order to Departmental status.
(24)	A Commissioner of Corrections should be appointed by the Governor as soon as possible.
(25)	A cabinet level body should be directed to coordinate policy and law implementation for the effective administration of justice.
(26)	Management personnel of the agencies of justice (state and local) should coordinate the activities of these agencies at the local and regional level.
(28)	Municipalities should not be made responsible for the costs of pre-trial incarceration of offenders held on state criminal charges, but municipal-state coordination is essential.
(29)	The state should move immediately to address the law, policies and procedures with regard to public drunkenness and drunk driving.
(30)	The State Office of Alcoholism and Drug Abuse should provide comprehensive program services to correctional populations in cooperation with local municipalities.
(33)	Offender education and recreational programs should be made available to prison populations during the non-work hours of those prisoners.
(35)	Corrections should provide the opportunity to every offender the resources of a halfway house program for those about to be released -- corrections must correct.

POSITION PAPER/Department of Health & Social Services

urgency and nature of Corrections' issues require an increasingly larger portion of the efforts and attention of top DHSS administrators. Not only are the other human service programs impacted by more top administrative time being directed to corrections' issues, but also by an increasing portion of the Department's fiscal resources being committed to address Corrections' urgent needs. It must be remembered that the basic human services programs are not incidental, but rather are vital programs impacting every Alaskan. It is not likely that the demands of Corrections will slow significantly in future years. Each new institution will require a large number of new employees and pending litigation offers the prospect for committing the state to continued policy and program development, extensive renovation of existing facilities, and the need for even more fiscal resources to support expanded operations.

The Department of Health and Social Services believes the creation of a Department of Corrections would allow increased focus on the critical problems inherent in the operation of programs for adult offenders, would increase the effectiveness of the criminal justice system as a whole, and would be generally beneficial to the operation of other offices and divisions within DHSS. The Department supports the approval of Executive Order 54.

MEMO TO: Health, Education and Social Services Committee
FROM: Dave Palmer
SUBJECT: Executive Order 54 and HB 103
DATE: January 25, 1983

HB 103	11.71.305	Places rehabilitation of persons convicted of personal use of controlled substances with the Dept. of Corrections instead of the Dept. of Health and Social Services.
HB 103	12.55.025	Transfers authority from DHSS to DOC for determining which facility is to be used for those people imprisoned and not on bail.
EO 54		not addressed.
HB 103	12.55.055	Changes jurisdiction of prisoners performing community work from DHSS to DOC.
EO 54	"	Same
HB 103	12.55.185	Repeals the definition of the division of corrections within DHSS.
EO 54	"	Same
HB 103	12.70.220 (c)	Changes from DHSS to DOC authority to comment on extraditions. (Should probably refer to §(b) also).
EO 54	"	Same
HB 103	33.05.080	Changes definition from DHSS to DOC in Title 33, Probation, Prisons, and Prisoners.
EO 54	"	Same
HB 103	33.15.260	Substitutes Commissioner of DOC for Commissioner of DHSS in definitions of Title 33.
EO 54	"	Same
HB 103	33.30.130	Transfers authority from Dept. of Public Safety to DOC for transportation of persons pending arraignment or commitment.
EO 54	"	Not changed

HB 103	33.30.900	Changes reference from commissioner of DHSS to commissioner of DOC in Title 33.
EO 54	"	Not Changed
HB 103	33.32.070	Changes from DHSS to DOC in reference to Correctional Industries Program.
EO 54		
HB 103	33.35.010	Reference to Commissioner of DHSS is changed to Commissioner of DOC pertaining to the Agreement on Detainers.
EO 54	"	Referenced, but not changed
HB 103	33.35.040	Same as 33.35.010.
EO 54	"	Same
HB 103	33.36.040	Authorizes commissioner of DOC, not commissioner of DHSS to implement interstate corrections compact.
HB 103	33.36.100	Changes reference from DHSS to DOC pertaining to the Western Interstate Corrections Compact.
EO 54	"	Same
HB 103	41.20.110 (b)	Changes reference from Commissioner, DHSS to Commissioner, DOC for volunteer trail work by prisoners.
EO 54	"	Not Addressed
HB 103	44.17.005	Adds Dept.of Corrections to list of State of Alaska departments.
EO 54	"	Same
HB 103	44.29.020 (9)	Excludes administration of correctional institutions from DHSS duties (leaves probation and parole, however).
HB 103	44.29.020 (17)	repeals probation and parole from DHSS duties.
EO 54	44.29.020 (17)	same as above, but creates 44.28.010 to add probation, parole, and adult penal institutions to DOC.

HB103	47.08.050 (8)	Changes authority from DHSS to DOC for medical services for people in custody.
EO 54	"	Not addressed
HB 103	47.17.020 (a)	Changes reference from division of corrections to department of corrections relating to child abuse cases.
EO 54		Not addressed

JAN 27 '83

M E M O R A N D U M

January 26, 1983

SUBJECT: Department of Corrections
(HB 103)

TO: Representative Milo Fritz

FROM: LHA Linn H. Asper
Legislative Counsel

In preparing a Senate duplicate of HB 103 we have determined that an additional section should be added to your bill to delete a reference to the division of corrections that I missed when I prepared the draft of HB 103. This could be added in a committee substitute by the Health, Education and Social Services committee. The proposed addition is as follows:

Page 4, after line 1, insert a new section to read:

* Sec. 9. AS 33.15.010 is amended to read:

Sec. 33.15.010. STATE BOARD OF PAROLE. There is in the department a board of parole consisting of five members to be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. One of the members, who shall be chairman of the board, shall be a person with training or experience in the field of probation and parole, [AND THAT MEMBER MAY BE AN OFFICIAL OR EMPLOYEE OF THE DEPARTMENT] but that member may not be an official or employee of the department [DIVISION OF CORRECTIONS]. The term of each of the other four members of the board is four years and until a successor is appointed and qualified. Successors are appointed in the same manner as provided for the board members first appointed. A vacancy shall be filled for the unexpired term.

Renumber succeeding bill sections accordingly.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Functions of the department of corrections under HB 103 are essentially identical to Executive Order 54. This note is based on the fiscal note prepared for EO 54 and preceeds the Dept. of Health and Social Services note, which is not expected to arrive for the hearing.

IV. DATE February 9,1983 PREPARED BY Dave Palmer

MEMORANDUM

March 7,.1983

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Mark K. Johnson
Staff Counsel, Rep. Flood

SUBJECT: Executive Order 54 and HB 103: Creating a Dept. of Corrections

---

As you may know, before coming to the legislature, I worked for the Department of Health & Social Services amd was directly involved in preparing the operating budget for the Division of Corrections. I continue to be in touch, on a personal level, with several members of the staff of that agency.

On at least two separate occasions, agency personnel have indicated to me that the fiscal note prepared in support of Executive Order 54 is inadequate and would not provide sufficient funds to cover the expenses of departmentalization.

Thus, funds for supply and personnel functions in the new department do not exist.

One area that might deserve the attention of the committee is the resources that are being given up by the Department of Health & Social Services in the administrative area. Corrections represents a major portion of the work load on the Division of Administrative Services and the Division of Management & Budget of the present department. Will the separation of Corrections result in transfers of appropriate personnel and funds?? The answer to this question is probably not. The creation of the new Department of Corrections is seen privately by some members of the Department of Health & Social Services as an opportunity to reduce their workload without related reductions in staff.

I would be pleased to discuss this matter further with you if you desire.

MJS/gb-32

Enclosure

3-C7LH

Issues Remaining in Cleary v. Beirne

1. Sufficient clothing for exercise and recreation

2. Recreation - 7 hours per week for Nome - need staff

*3. Visitation - a. increase hours - Proposed final provided for 30 hours per week re institution with 100 or more prisoners
27 hours per week re institution with 50-100 prisoners
24 hours per week re institution with 50 or more prisoners
(Now only 6 hours per week at most institutions)

b. Contact Visiting (1 hour per week) requires more staff

4. Safety - a. pre-hire psychological screening for staff having regular contact with prisoners

b. Refuse admission re prisioners with substantial mental problems until seen by medical personnel.

c. Crisis intervention counseling on 24 hour basis - training & staff

d. Space for counseling and education etc. re minimize competing interests for existing space.

*5. Staff Training - a. Should include negotiation, conciliation and non-physical confrontation techniques and prisoners rights and expanded curriculm.

b. (1) Prior to beginning work for staff
(2) Refresher training

c. Transportation - Public Safety now does most prisoner transp.

*6. Overcrowding - a. re required NOW to house sentenced felons and pretrial detainees separately

b. Expand alternatives to incarceration

*7. Rehabilitation/Treatment - a. Diagnostic and aptitude tests for prisoners

b. Expanded programs? - e.g. basic life skills, family counseling, stress reduction, employment skills, employment for prisoners and staff to supervise prisoners outside institutions.

c. Space for programs

8. Release support - programs re released prisoners (i.e. probation and parole)

*9. Increased Staffing - Ault report and Hutto report. (Consultants which state that institutions are overcrowded and understaffed)

*10. Health Care - a. Space and equipment in facilities

b. Availability of trained mental health professionals

c. Psychiatric facility and staff for acute and subacute case, short-term and long-term recuperative care.

d. Compliance with ACA standards for medical care (i.e. all mandatory standards and sufficient no of essential and important standards for ACA accreditation.

e. $ and staff re medical care (Consultant report recommendations).

11. Transportation - re prisoners to health related appts.

MEMORANDUM State of Alaska

TO: Roger V. Endell
Director
Division of Adult Corrections

DATE: March 7, 1983

FILE NO:

TELEPHONE NO:

FROM: for Ted Corey
Assistant Director
Division of Adult Corrections

SUBJECT: South Central Population

The following information describes South Central institutional populations, operating capacities, action being taken, and future recommended action.

Institution Maximum Operating Capacities:

Sixth Avenue: 90 - The count of 90 must be maintained to allow a 10 bed buffer for booking.

Third Avenue: 65 Sentenced - Classification Center.

Hiland Mountain: 160 - Ten (10) beds are reserved for segregation.

Meadow Creek: 30 - Three (3) beds reserved for segregation.

Ridgeview: 66 Sentenced misdemeanants.

Palmer: 230 - The population is broken down as follows: 130 Minimum, 100 Medium. There are four (4) Maximum Security beds maintained at Palmer Medium for segregation. When future inmate housing comes on line, the capacity of the minimum custody institution should be reduced to 106 and the Medium facility to 95 for a total of 201.

Cook Inlet: 186 bed operating capacity with 12 bed maximum security unit reserved for segregation.

The total operating capacity of Anchorage area institutions is 827. On 03/05/83, the count was 857. Institutions counts on 03/05/83 were as follows:

Sixth Avenue: 95 - Five (5) prisoners over the operating capacity.

Third Avenue: 65 - At operating capacity.

Ridgeview: 120 - 54 prisoners over the operating capacity of 66 sentenced offenders.

Meadow Creek: 33 - Three (3) prisoners over the operating capacity.

Hiland Mountain: 240 - 80 prisoners over the operating capacity.

Palmer Medium: 100 - At operating capacity.

Palmer Minimum: 130 - At operating capacity.

Cook Inlet: 74 - 112 prisoners under operating capacity. The new facility is scheduled for full capacity operation by 03/14/83. This will result in a projected operation count including intake projections of 887 prisoners in the Anchorage area institutions by 03/14/83. The above indictates a shortage of 60 beds with all institutions operating at capacity on 03/14/83.

In order to provide emergency housing for the 60 bed projected shortage, institutions in the Anchorage area will maintain the following capacities until additional funds and prisoner housing are identified.

Sixth Avenue: 80 - Reserving 20 beds for felony women and misdemeanant booking.

Third Avenue: 65 - Sentenced felons.

Ridgeview: 66 - Sentenced Misdemeanants.

Cook Inlet: 186 bed operating capacity. The holding cells in the booking area will have to provide felony intake housing with the 12 bed maximum unit reserved for segregation.

Hiland Mountain: 195 bed operating capacity.

Palmer Medium: 100 bed operating capacity.

Palmer Minimum: 130 bed operating capacity.

Meadow Creek: 33 sentenced women operating capacity.

Glennwood Center (Contract): 50 beds for work release offenders.

Effective 03/14/83, institutions in the Anchorage area will operate at the the new emergency capacities as noted above which results in a total Anchorage area prisoner bed capacity of 905.

It is evident that the above action will not relieve the rapid increase in prisoner intake. Felony daily booking have increased from 8 to a daily average of 16. Misdemeanant bookings are averaging 22 daily. The prisoner count in the Anchorage area is rising rapidly. In the first five days of March, the prisoner count increased by a net gain of 36 over prisoners released.

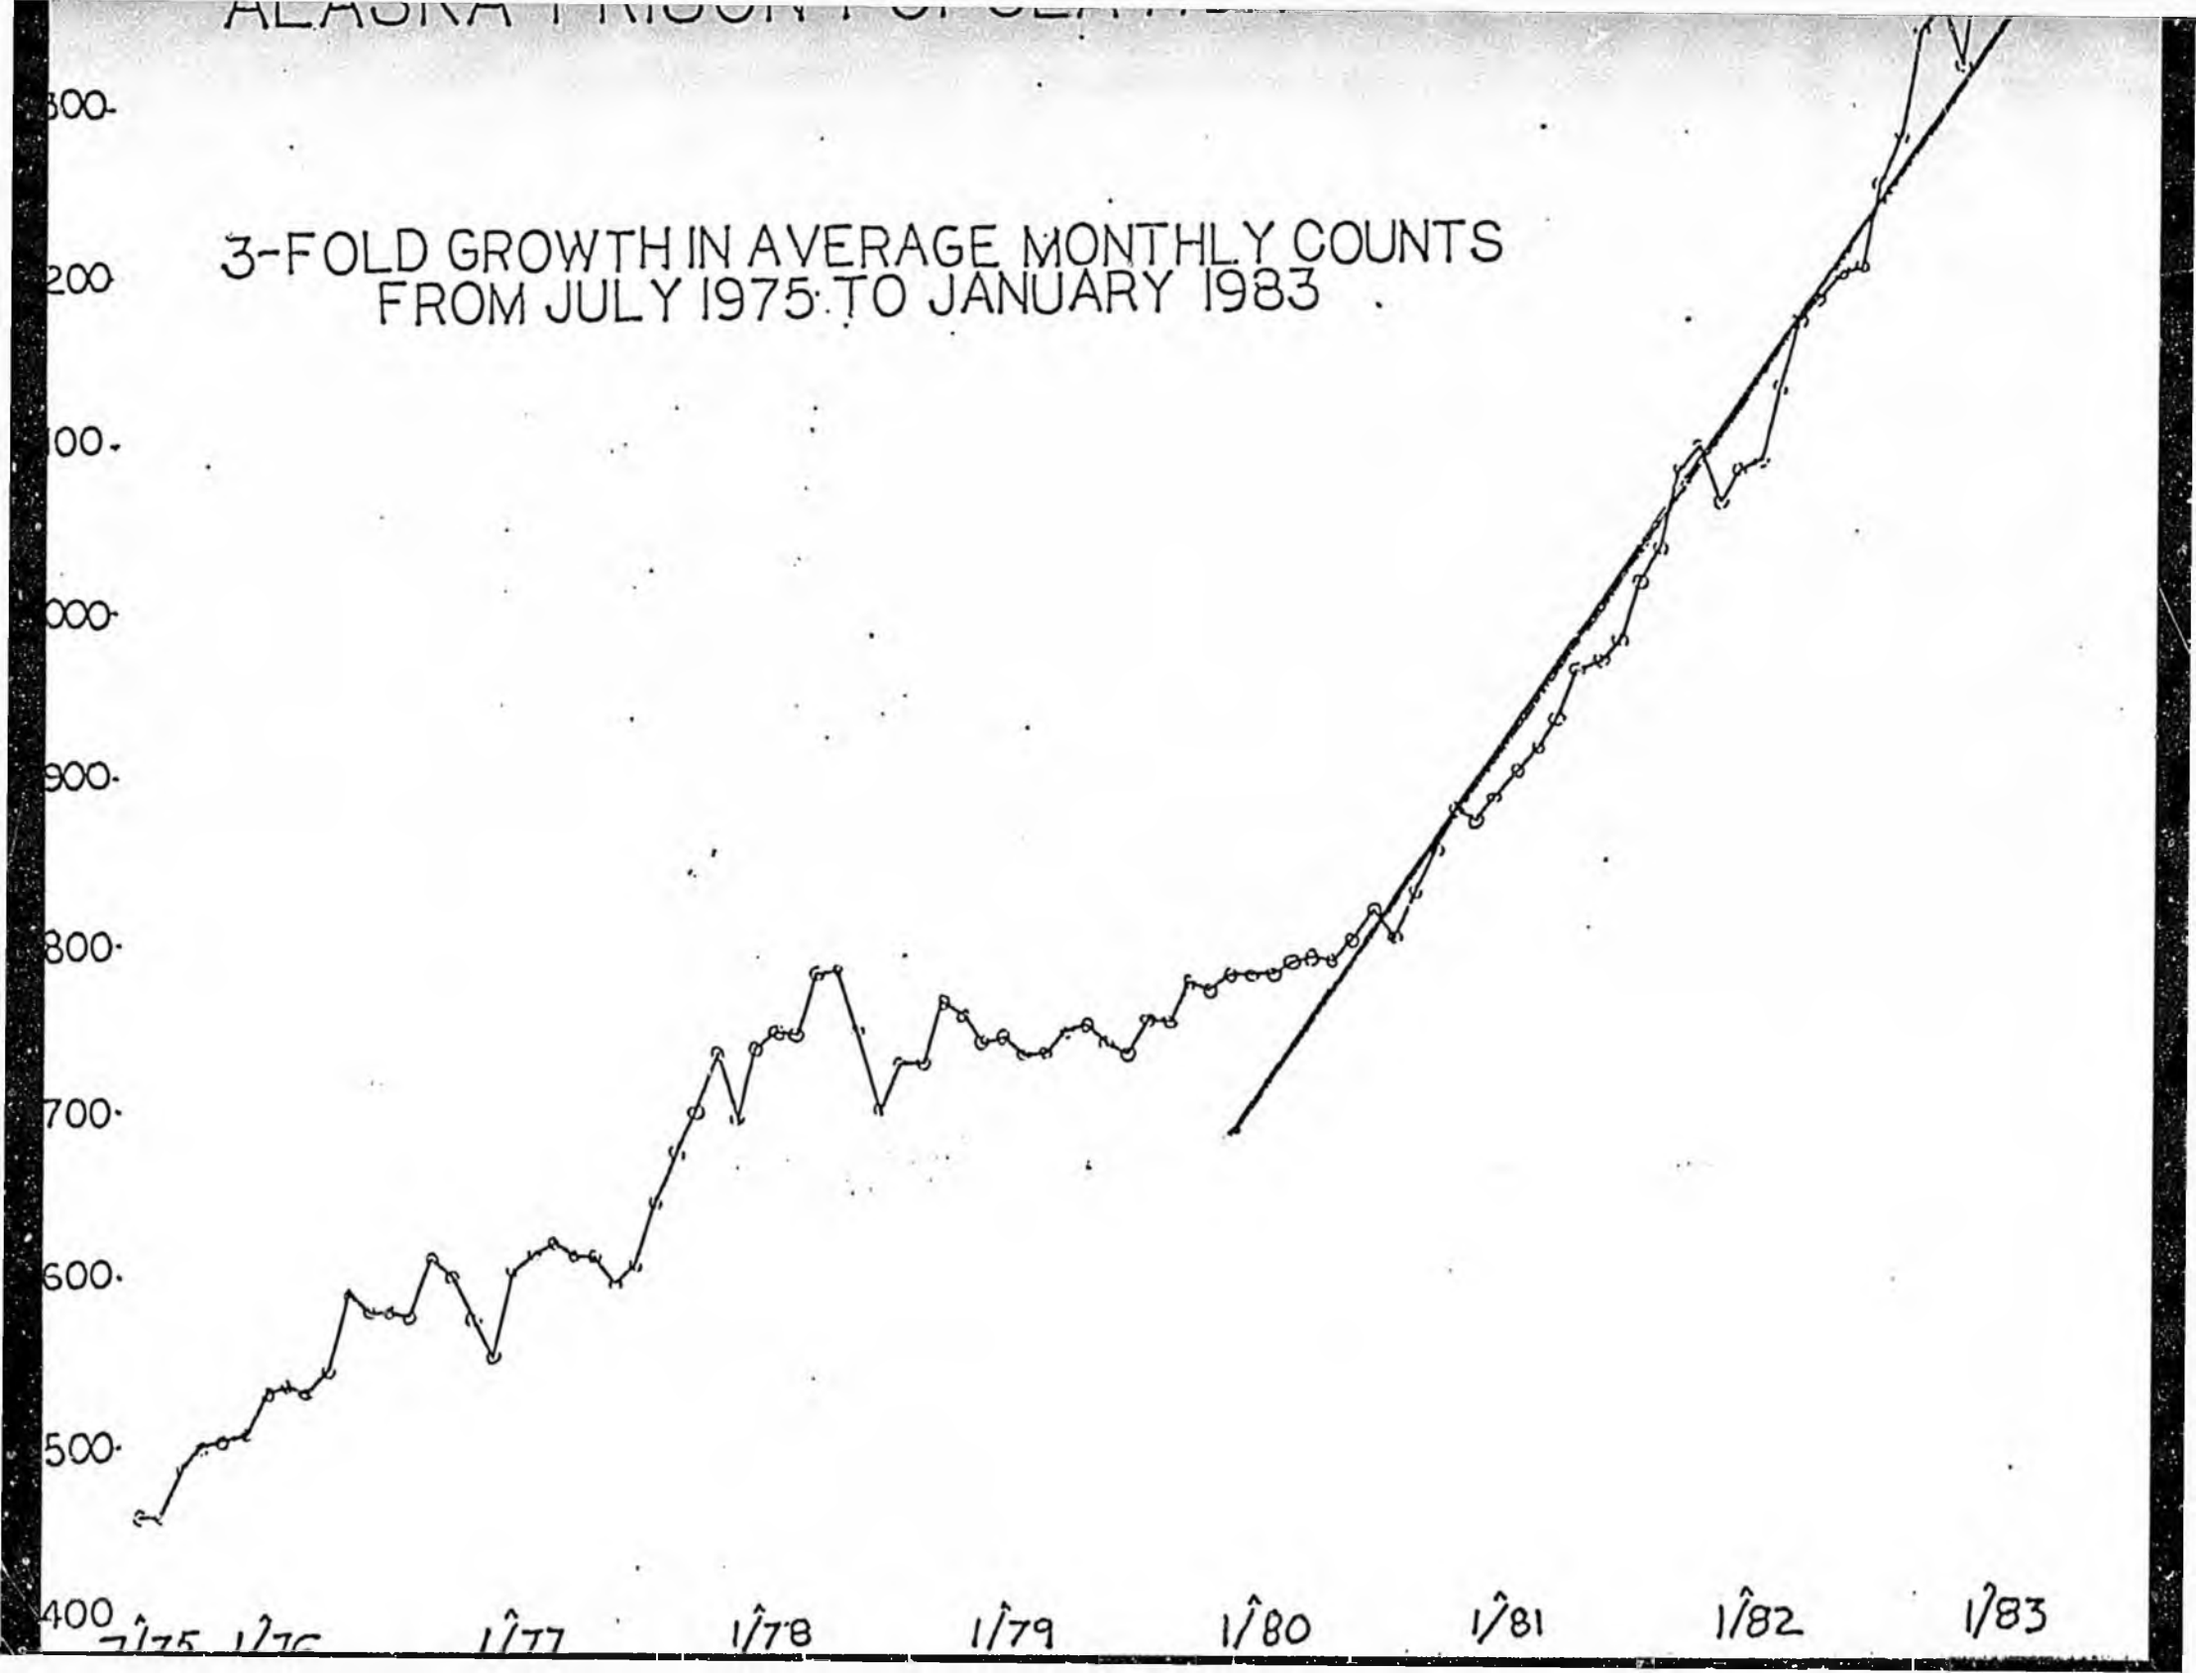
It is my intent to continue double bunking the new Cook Inlet Institution resulting in an operating capacity of 240 with the 12 bed unit reserved for segregation bringing the institutions total bed count to 152, which is 36 beds over the maximum design capacity of 216. This action will require additional fire exits.

The Anchorage area prisoner population increased from 742 on 02/01/83 to 790 on 02/28/83. This is a net gain of 48 prisoners in one month. My projections indicate at that there will be a shortage of 200 prisoner beds by June of 1983 in the Anchorage area. With Anchorage area institutions operating at and over their maximum capacity, it will be necessary to bring additional staff and prisoner housing on line as soon as possible.

TC:dw

ANCHORAGE AREA SUMMARY
Division of Adult Corrections

On Saturday, March 5, 1983:



867 in custody in Anchorage Bowl
744 operating capacity (w/74 at CIPT)
113 more inmates than beds.

	Actual Count	3-5 Maximum Operating Cap.	Immediate Revisions
Hiland Mtn.	240	160	
Palmer	230	230	
Ridgeview	120	95	66
3rd Avenue	65	65	
Meadow Creek	33	30	
C.I.P.T.	74	74	200
6th Avenue	95	90	
	857	744	841

Action: Moving minimum of 110 additional inmates this week to C.I.P.T. In order to staff C.I.P.T., must close half of Ridgeview and move staff and 60 inmates to C.I.P.T. Another 20 inmates will transfer from Hiland Mountain Correctional Center. During the week 40 inmates will transfer from Sixth Avenue to C.I.P.T.

Staffing:
1. Move some from Ridgeview to C.I.P.T.
2. Voluntary overtime pool of correctional officers.
3. Potential raid of Academy trainees.

Summary: Even by adding 97 beds to operating capacity, we still are short 16 beds from last week's actual Anchorage area count. In the last 5 days there has been a net increase of 36 inmates in Anchorage, and an average of 40 bookings per day. There has been a statewide increase in the past two months of 120, to a total of 1,432 inmates.

EO 54

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 17, 1983

The Honorable Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 23, of the Alaska Constitution, and in accordance with AS 24.30.130(b), I am transmitting an executive order which creates a Department of Corrections. The new department is being created from the division of corrections which is currently located in the Department of Health and Social Services. This is similar to Executive Order No. 39's 1977 creation of the Department of Transportation and Public Facilities out of the former Department of Highways and Department of Public Works.

This Order's sec. 28 creates the new department. Section 29 then states that the commissioner is the principal executive officer and sets out some basic duties and powers. Section 29's AS 44.28.020 is based on AS 44.29.020(9) (amended in sec. 30 of the Order) and AS 44.29.020(17) (repealed in sec. 31), pertaining to the Department of Health and Social Services. Similarly, the new AS 44.28.030 is based on AS 18.-05.040(15).

Art. I, sec. 12, of the Alaska Constitution mandates that penal administration be based on protection of the public and reformation of the offender. Given the unprecedented increases in the prison population in the state, I believe that elevating the division of corrections to departmental status is necessary to achieve these twin goals and is in the best interests of efficient administration.

The problem of increasing crime in Alaska and how best to deal with those who are convicted of violations of the criminal law was the focus of a recent inquiry by a corrections task force that I created. In its January 3, 1983 report, the task force recommended the immediate elevation of the division of corrections to departmental status. According to members of the task force, this recommendation is strongly supported by all segments of the criminal justice system.

The Order does not transfer the responsibility for juvenile corrections matters and for offenders who are found guilty but mentally ill or not guilty by reason of insanity under AS 12.47.

Also, some responsibilities of the commissioner of public safety, principally the transportation of prisoners, have not been addressed in this Order. The decision on whether or when to transfer these responsibilities to the new commissioner of corrections will depend on such factors as the level of increased training that must occur before the new department can effectively and safely assume these responsibilities.

The phrase "Repealed effective July 1, 1987," which appears in brackets and capital letters in the AS 33.32 (correctional industries) headings for the sections being amended in secs. 15, 17, 19, 20, and 24 of this Order, appears in this Order because it appears in those headings in The Michie Company's publication of the statutes. That language is not being deleted, and the amendments made by this Order do not affect that statutory termination date of the correctional industries program. See sec. 7, ch. 53, SLA 1982.

Sincerely,

Bill Sheffield

Bill Sheffield
Governor

SUBJECT: Landlords and tenants
(CSSSHB 1 (Judiciary))

TO: Representative Mitchell E. Abood, Jr.

FROM: Tamara Brandt Cook
Legislative Counsel TBC

Here is the sectional analysis of CSSSHB 1 (Judiciary) that you requested.

Section 1. This is a new provision authorizing enforcement of a judgment for the restitution of real property obtained in an action for forcible entry or detention. No other order to enforce the judgment may be required.

Section 2. Continued possession of a dwelling after expiration of a periodic tenancy is added to the list of cases that constitute unlawful holding by force for purposes of the article dealing with forcible entry and detainer. Under the Uniform Residential Landlord and Tenant Act a landlord is authorized to bring an action for possession.

Section 3. If the tenant terminates a rental agreement under the Uniform Residential Landlord and Tenant Act, fails to provide the proper notice of termination, and the failure to provide notice is wilful or not in good faith, the landlord may recover as punitive damages one and one-half times the actual damages. Failure to provide notice of termination is presumed to be wilful and not in good faith.

Section 4. In the case of a month-to-month tenancy, either party may terminate the rental agreement by providing at least 30 days notice. Under existing law the notice must be given at least 30 days before the rental due date indicated in the notice, so a tenancy must be terminated on a rental due date rather than at any time during the rental period.

Section 5. This authorizes a landlord to bring an action for recovery of actual damages in the subsection that provides for punitive damages. Under another section, AS 34.-03.270, it is clear that a landlord may bring an action for actual damages for breach of a rental agreement.

Section 6. This adds terminating the rental agreement or providing notice of termination to the list of retaliatory actions that a landlord may not take when a tenant attempts to enforce certain rights.

Section 7. A landlord is presumed to have acted in retaliation if the landlord takes certain actions within 60 days after a tenant attempts to secure rights.

TBC:ljb
11/008

An Overview of
Committee Substitute for Sponsor Substitute for HOUSE BILL NO. 1 (L&C)
"AN ACT RELATING TO LANDLORDS AND TENANTS"

The Alaska Statutes governing Landlords/Tenants, (Title 34- Property), has not been clear in defining certain areas of concern to both the landlord and the tenant. Whether oral or written, both the landlord and tenant hold certain unalienable rights in the property they own as a landlord or rent as a tenant. With the 0% to 4% vacancy rate in most of Alaska, and because over 35% of the population in Alaska rent their dwellings, it is necessary to update the laws to answer the needs of the landlord and tenant. The following is a summary of CSSSHB 1, and how it answers some of these needs.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 09.45.090 is amended by adding a new paragraph to read:

(4) when, after a notice to terminate the tenancy as provided in AS 34.03.290 with reference to termination of a periodic tenancy, a person continues in possession of a dwelling unit after expiration of the time for determining the tenancy.

This new paragraph is being added to stipulate a "periodic tenancy" termination. AS 09.45.090 (3) cites termination of an "estate at will" tenancy, which can be defined as a tenancy that transpires on a day to day basis or an indefinite term at the will of the lessor. In this case, the tenant has no say in the matter of how long the tenancy will last. The landlord may, at any time, terminate the tenancy and the tenant has no right to a notice. (This type of tenancy was developed in a few hundred years ago in England, and rarely applies "modern day" tenancy.) For this reason, it is necessary to add Paragraph 4, as periodic tenancy, (month to month), is not referenced in the present context.

Section 2. AS 34.03.270 (b) was added by the Labor and Commerce Committee to more specifically clarify AS 34.03.290 (c), to read:

(b) If the rental agreement is terminated by the tenant and the tenant fails to provide the notice required under AS 34.03.290 (a) or (b), the landlord may recover an amount not to exceed one and one-half times the actual damages.

If the tenant decides to cancel his rental agreement, but does not notify the landlord, the landlord may collect one and one-half times the damages incurred, (i.e. rent). The tenant is obligated to give the landlord written notice of his intention to vacate the premises 45 days before termination, (See AS 34.03.290 (b)). If it is a case where the tenant remains in possession of the dwelling past the termination date

without the landlord's permission, then the landlord is entitled to one and one-half times the damages PLUS the actual damages, (2½X the actual damages), as compensation. (See AS 34.03.290 (c)).

Section 3. AS 34.03.290 (b) is amended to read:

(b) The landlord or the tenant may terminate a month to month tenancy by a written notice given to the other at least 45 [30] days before the termination [RENTAL DUE] date specified in the notice.

This amendment provides a more equitable time frame to tenants and landlords. The vacancy rate for apartments at the present time in the Anchorage, Fairbanks, Ketchikan and Juneau markets ranges from 0% to 4%. Because of this tight rental market, it is sometimes quite difficult for low income families, minorities, pet owners, families with children, and the elderly, (to name a few), to find adequate and habitable housing. General termination, (30 days), on the part of the landlord, in a time of a severe housing crunch does not always give the tenant sufficient notice to find other adequate housing. Also, in the case of a condo conversion, this gives the tenant sufficient notice to vacate or purchase their unit. In a future situation where the rental market is not so tight, this 45 day notice allows the landlord adequate time to make necessary repairs and alterations, as well as locate a new tenant.

"Rental due date" refers to Sec. 34.03.020 (c) which is the date on the same day each month that rent is to be paid. The landlord or the tenant may wish to give notice of termination on either side of the "rental due date", and replacing "rental due" with "termination" date provides for either time frame. It does not restrict either party to the exact day the rent is due when giving a termination notice.

The question arises, "What if the tenant gives notice on, say March 19?" This means that the termination date would be May 2nd. Therefore, the tenant would be obligated to pay the landlord for rent through March, all of April, (and two days in May, which would be prorated). The landlord would not lose any rental income even though the termination date falls after the "rental due date". By the time the 45 day period is up, the landlord has had adequate time to find a new tenant and the tenant has been given a more equitable amount of time to find a new dwelling.

(It should also be noted here that an increase in rent may also constitute a form of termination, as well as new rules put into effect by the landlord, i.e. no pets, adults only, etc. This is, in effect, terminating the rental agreement then in existance and offering a new rental agreement at different terms. If the tenant does not accept the "new terms", then he must vacate 45 days after the receipt of notice of substantial or material changes from the landlord. If the tenant does not respond to the landlord's notice of substantial or material changes, at the end of the 45 day period, the new rental agreement takes effect.)

Section 4. AS 34.03.290 (c) is amended to read:

(c) If the tenant remains in possession without the landlord's consent after expiration of the term of the rental agreement or after its termination, the landlord may bring an action for possession and recovery of actual damages. If [IF] the tenant's holdover is wilful [and] or not in good faith the landlord, in addition, may recover an amount not to exceed one and one-half times the actual damages. If the landlord consents to the tenant's continued occupancy, AS 34.20.020 applies.

An improper hold-over by a tenant has caused landlords financial hardships. If a tenant continues to occupy the dwelling after his tenancy expires, he has caused the owner loss of income needed to make mortgage payments, as well as loss of time to make necessary repairs, alterations, etc., before renting the unit to the next party. Alaska law allows landlords to sue for damages, but the time, effort and money involved is not always feasible to pursue.

The new clause noted above provides for recovery of actual damages, (i.e. lost rent income, lost time needed to make necessary repairs, etc.), as well as one and one-half times the actual damages as compensation to the landlord. This deters the tenant from staying on past termination or the expiration of the rental agreement and in effect is incentive to the individual(s) to vacate the premises. (Also see AS 34.03.270 (b)).

Section 5. AS 34.03.310 is amended by adding a new subsection to read:

(f) A landlord is presumed to have violated (a) of this section if the landlord increases rent, decreases service, or brings or threatens to bring an action for possession within 60 days after a tenant has engaged in an action listed under (a)(1) - (4).

This new subsection protects the tenant from landlords who abuse the right to access or evict the tenant for retaliatory reasons. The tenant has a right to his/her privacy, and the landlord must give "reasonable" notice to the tenant before entering the premises, (See AS 34.03.010). This new subsection also provides that the tenant may not be evicted because they have made a complaint using the proper procedures, (See AS 34.03.140), i.e. complained to a government agency regarding unfair rent hikes, or requesting that certain necessary repairs be made to the premises or common area. Sixty days is a sufficient amount of time to correct a problem or answer a complaint. After the 60 day period has expired, the tenant should refer to AS 34.03.160 and the landlord should refer to AS 34.03.220 for remedies to their problem(s).

NOTE: SSHB 1 TESTIMONY GIVEN BY BARBARA EICHNER TO LABOR AND COMMERCE COMMITTEE ON 2/10/83. THE BILL HAS BEEN UPDATED BY THE LABOR AND COMMERCE COMMITTEE --- BARBARA EICHNER WILL SPEAK TO THESE CHANGES AT THE JUDICIARY MEETING 2/25/83.

Testimony on House Bill 1
Barbara G. Eichner
District Home Economist - Cooperative Extension Service
February 10, 1983

Good morning and thank you for providing the opportunity for me to testify on one of the most important bills before the 1983 legislature.

This is Barbara Eichner speaking. I am district home economist for the Cooperative Extension Service in Anchorage. Briefly, our agency is the non-credit educational arm of the land-grant university in every state, which includes the University of Alaska. Our job is to disseminate practical information to consumers on a wide variety of topics such as gardening. nutrition, agriculture and housing.

Three years ago because of a fluke answer to a consumer newspaper column, the Cooperative Extension Service was propelled to the forefront as the only impartial agency or organization who would and could answer landlord-tenant questions quickly, simply and at no charge. I am not an attorney and I do not give legal advice. All I can do is give people an idea of their rights and responsibilities under the law and yet despite that, over 4000 landlords and tenants have sought my advice through telephone counseling and seminars. In addition, over 14,000 copies of our landlord-tenant handbooks have been distributed statewide and 9 hours of radio and television time have been used to discuss landlord-tenant issues. In short, the concerns relating to rental housing are numerous and the effect of inadequate assistance is widespread. People in Bethel, Kodiak, Nome, Dutch Harbor and North Pole all want the same thing according to my statistics - available and affordable housing managed in a business-like manner. People in 26 Alaskan communities have all said the same thing - change the law.

You all know the history of rental housing in the boom and bust economy of Alaska's towns and villages. In good times housing has responded well to the laws of supply and demand. In poor times, landlords and tenants alike have asked for help in keeping housing available, affordable and soundly managed. Despite the steady growth of Alaska's overall economy, the supply of rental housing in the last 3 years has remained the same while the population increased. Anchorage alone has experienced a rental vacancy rate of less than 1% for almost 2 years. Newspaper headlines like "Tenants Feel Pinch of Escalating Rents", "Anchorage Renters May Form Union" and "Man Sues Landlady for $2.8 million" only underscore the tension prevalent in the rental market.

Continued...

The stories that didn't capture headline attention are the sometimes unbelievable but everyday problems the Extension Service has faced such as:

- the tenant who hasn't had heat for 6 months and whose landlord says if she doesn't like it she can move
- the landlord who is left with a $3000 outstanding bill in damages and back rent when the tenant moves out in the middle of the night
- the tenant whose rent has been raised $350 in just one month
- the landlord who needs to evict 8 people who are living in a one-bedroom apartment
- the tenant who was physically assaulted by his landlord, and
- the landlord who must replace a whole bedroom wall section because the permeating odor of a previous tenant's pet snake that crawled into the wall and died. (Yes, it is a true story).

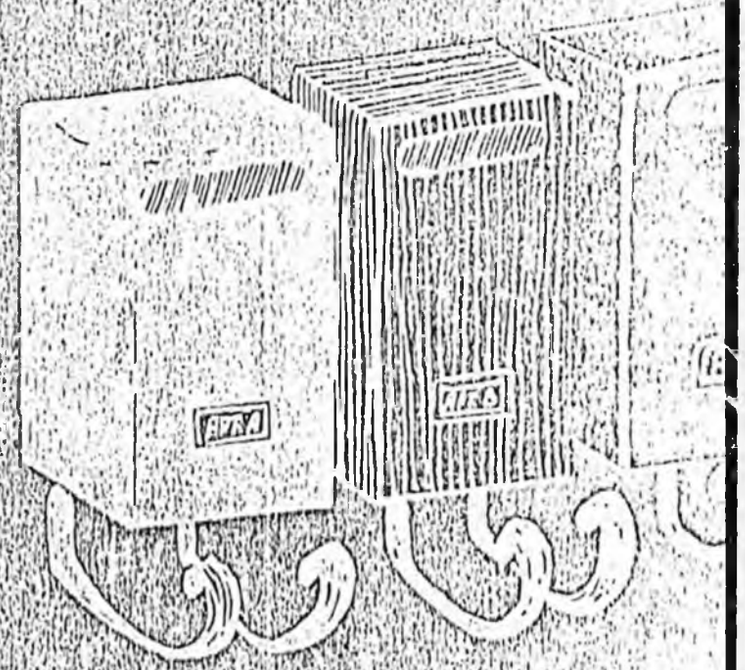
If consumers are to act as responsible citizens in the marketplace, then our laws must reflect the needs of our citizens. It really doesn't matter whether you are a landlord or a tenant, the fact is that Alaska's Uniform Residential Landlord and Tenant Act is out-of-date and unclear. Many issues such as those just named, are not addressed at all.

In the three years that I have dealt with rental housing questions, the problems that have loomed largest include evictions, improper holdover, lack of written rental agreements, abuse of the right to access, retaliation, security deposits and forceable entry and detainer without due process.

I am pleased to see that House Bill 1 makes an effort to address four of these issues.

Section 1 and Section 3 make it clearer for landlords in knowing when they can prosecute for improper possession. Far too many tenants have told me that they feel landlords are obliged to house them until it is convenient for them to move. Not only has this attitude complicated the rights of landlords to negotiate new deals with new tenants, it has been held with little consequence or risk.

I believe Section 2 will be a welcome relief to both landlords and tenants in outlining a clearer way of determining when a tenant will move. The 45-day proviso is a compromise on just-cause eviction which is fairer to landlords. At the same time, I don't know how many landlords and tenants have been stuck with nearly 60 days notice when they have accidentally missed a rental due date. Almost everyone should be able to count 45 calendar days.



Continued...

And finally, in Section 4, I believe it is appropriate to shift the burden of proof for retalitory measures to the landlord without sticking them with an enforced lease behind which unsavory tenants could hide. Retalitory action is clearly illegal in our current statute but my experience indicates that it is practically impossible for tenants to prove. Landlords, by virtue of their position, have the greater power here and therefore I believe should have the greater burden. It is a question of social equity for tenants who see themselves as helpless victims and should create no hardship for the vast majority of our landlords who are straight-forward business people.

Housing issues have deep psychological roots. The fiber of the good life in this country appears to weigh heavily on access to shelter. We must give consumers the tools with which to manage their own affairs at a satisfactory level. Even though there are many issues yet to address, House Bill 1 has taken an equitable stance on at least 4 of these and I urge your serious consideration of this proposed legislation.

Thank you.

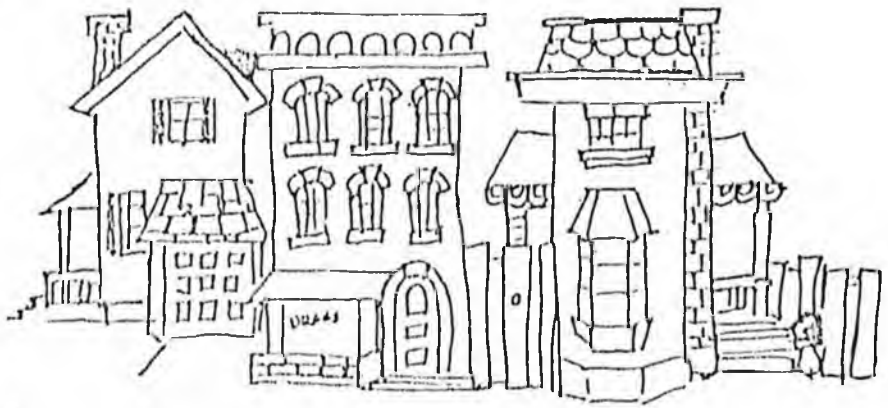
INTRODUCTION

In 1974, the Alaska Legislature passed the Uniform Residential Landlord and Tenant Act (A.S. 34.03.010-.380). The purpose of the Act was to simplify, clarify and modernize Alaskan laws relating to the rental of dwellings. It was also intended to encourage both landlords and tenants to maintain and improve the quality of housing.



While the law does not cover every problem a landlord or tenant may have, it was written to protect the rights of both parties.

In addition to the Uniform Residential Landlord and Tenant Act, other laws which have application to the rental of dwellings include:

1. Alaska Statute 09.45.060-.160
   Procedure for Recovering Possession
2. Alaska Statute 34.06.010-.060
   Emergency Residential Rent Regulation and Control

This booklet was prepared directly from A.S. 34.03.010-.380. Where appropriate, we have cited the actual portion of the law that pertains so that if you need to go to court, you can either use this booklet or can refer directly back to the law. The reference will be the letters "A.S." (short for Alaska Statute) followed by some numbers (these are the title, chapter and article numbers of the law respectively), for example: (A.S. 34.03.330).

You can get a copy of the actual law at your nearest courthouse, public library or magistrate's office.

who is covered

A dwelling, in this law, is a structure or part of a structure used as a home, residence or sleeping place by one or more persons, including the rental of mobile home space.

If you rent a house, apartment, mobile home, mobile home space, condominium, townhouse or duplex, this law applies to you!

the law **does not** cover:

1. residency in an institution (school dorm, jail, hospital, nursing home, etc.);
2. hotels, motels and other transient housing;
3. condominiums occupied by the owner;
4. occupancy under a contract of sale;
5. occupancy of a dwelling owned by a fraternal or social organization of which you are a member;
6. live-in employment (apartment managers, housekeepers, etc.),
7. occupancy when the premises are used primarily for agricultural purposes.

terminology

In this booklet, several terms are used that mean the same thing.

Landlord means the owner or manager or rental agent for the dwelling.

Dwelling, unit, property and premises means the rental unit, whether it is a home, apartment, mobile home, etc.

Tenant means any of the people who rent a dwelling.

Other technical definitions may be found in A.S. 34.03.360—Definitions.

written notices

Putting things in writing does not mean the landlord and tenant are enemies or do not trust each other. It is simply a good way to do business. Oral agreements are legal; however, under the law, a written notice or agreement may be your only protection if something goes wrong. Some people hesitate to put agreements in writing because they don't know what to say. There are examples of various notices in the back of this booklet that may help.

Here are some things that should definitely be in writing:

1. receipts for payments of any kind;
2. promises to fix things;
3. rental agreements;
4. eviction or moving notices;
5. notices of repairs needed;
6. details of what needs to be done to get back a deposit.

It cannot be emphasized strongly enough how important this is: GET IT IN WRITING!

BEFORE YOU MOVE IN

rental agreements

Rental agreements may be either written or oral, but written is best. If any disagreement occurs later, both tenants and landlords will have evidence to back their claims.

If a tenant signs a rental agreement, moves in and begins paying rent, the agreement is still legal even if the landlord didn't sign the agreement.

If the landlord shows the tenant a rental agreement to which the tenant agrees, moves in and begins paying rent, the agreement is still legal even if the tenant did not sign it. It is critical that tenants and landlords review and discuss any rental agreements and rules before anyone moves in or money changes hands.

A lease is a rental agreement that tells how long the tenant will stay (usually four, six or twelve months). If there is a lease, the landlord cannot raise the rent or evict the tenant unless promises in the lease are broken. If there is a lease but the tenant must move, the tenant is still responsible for the rent for the rest of the lease period, unless the dwelling can be re-rented.

Here are some things which should appear in a rental agreement:

1. name and address of the owner and his/her manager or agent as well as the tenant's name and address;
2. the amount of rent, when it is due, where and how it is to be paid;
3. if this is a month-to-month agreement or lease with time limits;
4. when the rent will be considered overdue and what penalty will be levied;
5. what is included in the rent (heat, lights, water, etc.) and what is provided (driveway, garage, furnishings, kitchen appliances, snow removal, storage, laundry, etc.);
6. total number of full-time occupants and pets allowed;
7. a list of prohibited equipment (snowmobiles, motorcycles, musical equipment, etc.);
8. the amount and type of deposit (cleaning, security, pets, etc.) and what has to be done to get it back;
9. a list of landlord and tenant repair and maintenance duties;

Rental agreements cannot:

1. force a tenant to waive any legal rights,
2. excuse the landlord from any legal responsibilities,
3. let the landlord sue the tenant without notice,
4. require the tenant to pay the landlord's attorney fees should you go to court;
5. allow the landlord to take a tenant's personal belongings (A.S. 34.03.040).

DO NOT SIGN A RENTAL AGREEMENT THAT HAS ILLEGAL WORDING.

If the rental agreement contains any of the things listed below, they should be removed before signing:

1. agreeing to let the landlord come into the dwelling whenever he/she wants;
2. agreeing to immediate eviction for nonpayment of rent;
3. agreeing that the tenant will make all repairs;
4. excusing the landlord from liability in case of accidents due to his/her neglect;
5. giving up rights to the deposit.

change your mind?

Once an agreement to rent a place has been made, and all or part of the deposit and rent has been paid and then a tenant doesn't move in, he/she may not be able to have all his/her money returned. If this happens on a month-to-month agreement (written or oral), the tenant may have to pay for one month's rent or rent on a day-to-day basis until someone else rents the place, whichever is less. If a lease was signed, the tenant may owe rent until the place is re-rented or the lease period ends, whichever is less.

EXCEPTION: If the landlord lied about the place or deceived the tenant by not telling about important problems (for instance, no heat, the building is condemned, etc.) the tenant should get all the money back. In addition, the tenant could sue for fraud. If this situation comes up, see a lawyer.

illegal discrimination

It is illegal for landlords to refuse to rent to someone because of sex, age, race, religion, national origin, color, marital status, pregnancy or changes in marital status, unless the housing is specially designated for "singles only" in advance.

It is unlikely that a landlord will openly refuse to rent to someone for an illegal reason. There are some indications that a landlord may be practicing discrimination in renting when:

- the apartment the tenant called about is "suddenly" taken when the landlord sees the tenant.
- a place the tenant was told is "rented" remains vacant.
- the rent or deposit is much higher than advertised or charged for similar units.
- rules will be different for one tenant than for others in the same apartment house or court. (For example, others have pets, but you cannot. A landlord may decide to allow no more pets, but he/she must stick to the new rules as far as new tenants are concerned.)
- the tenant is not referred to a listing in a real estate office that fits his/her needs.
- a house or apartment in the tenant's area is rented with the intention of forcing others to leave (block-busting).
- an advertisement indicates a preference based upon race, color, religion, sex, age, marital status or national origin.

Everyone should have a free choice about where to live, and there are legal methods of fighting discriminatory practices. If you feel you have been discriminated against and want to do something about it, you can complain to the State Human Rights Commission. The Commission's investigation costs you nothing.

For more help on illegal discrimination, contact the Human Rights Commission in your town or:

State Human Rights Commission

Anchorage, Alaska 99501
phone: 276-7474

disclosure

The law says that someone must be responsible for such things as decisions about maintenance, repairs, collecting rent and receiving notices from tenants or from the court. It is a requirement that when a tenant moves in, he/she must be told in writing the name and address of the owner (or who the owner wants his/her agent to be). This information must be kept up-to-date.

If this information is not provided, whoever made the rental agreement or receives the rent becomes the legally responsible person. Then, when the tenant is required to give a written notice or wants to sue, he/she should:

1. contact the owner or his/her agent, or
2. if that information was never officially given to the tenant, contact the person who made the original agreement or takes the rent. (A.S. 34.03.080)

deposits

Deposits are often collected for pets, children, cleaning or security before a tenant moves in. Sometimes the tenant will be asked to pay the last month's rent, too. The total amount collected for all deposits and pre-paid rent, except the first month's rent, cannot exceed two month's rent. (A.S. 34.03.070)

Deposits and pre-paid rent along with first month's rent can make total move-in costs high. Here are some examples of how these move-in costs might be set:

Legal Examples		Illegal Examples	
#1:	$ 375 first month's rent	#1:	$ 375 first month's rent
	$ 375 last month's rent		$ 375 last month's rent
	$ 175 security deposit		$ 400 security deposit
	$1125 total to move in		$1150 total to move in
#2:	$ 325 first month's rent	#2:	$ 325 first month's rent
	$ 150 cleaning deposit		$ 300 cleaning deposit
	$ 175 security deposit		$ 200 security deposit
	$ 325 last month's rent		$ 325 last month's rent
	$ 975 total to move in		$1150 total to move in

The deposit and any pre-paid rent must be deposited in a trust account in a bank, savings and loan association or with a licensed escrow agent. Exceptions are made for rural Alaska, if it is impractical to bank the money. When the deposit is collected, be sure to get a receipt. Also, it is a good idea to have the landlord write on the receipt the amount paid for each type of deposit and what has to be done to get the deposit back. (Always get and keep records for any money paid.)

If the tenant is renting a unit and the building is sold, there is often confusion as to which person, the old or new landlord, is responsible for the deposit and pre-paid rent money. The original landlord who accepted the money is the person responsible for returning the money to the tenant UNLESS the new owner receives the money from the old landlord and agrees to the responsibility of taking care of it.

When a tenant finds out the building is being sold, he/she should find out whether the old or new landlord will hold the deposit money. If the old landlord keeps the deposit, the tenant should get in writing the name of the bank where the deposit is kept and the new address of the old landlord.

inspections

While the law does not specify that an inspection must be done, it is a good idea for the landlord and tenant to inspect the dwelling together before anyone moves in. Make a list of items needing repair and the date the work should be completed (10 days is standard). Make another list of damage that will not be changed or repaired. Both the landlord and the tenant should sign and date these lists. Each of you should keep a copy. These lists will be handy when the tenant is ready to move out.

WHILE RENTING

paying rent/rent increases

The landlord is not required to ask tenants each month for their rent before they are "required" to pay it. If a time and place for payment of rent was not agreed upon when the tenant moved in, it is assumed that the rent will be collected at the dwelling.

If the tenant rents monthly, the rent is due every 30 days, unless otherwise agreed. So, if the tenant moves in on the 8th, the rent is due on or before the 8th of every month.

If there is a signed lease, rent may not be increased during the lease period. Other rent increases may be levied as the landlord sees fit; however, the law is unclear regarding the notice period which the landlord is required to give.

The general interpretation is that a rent increase is either:

1. a termination by the landlord of the tenancy at the old rental rate and an offer to renew it at a higher rate or
2. a modification of a rule or regulation.

In either case, tenants should be given a written notice 30 days before the next rental due date. If the tenant does not agree with the rent increase or cannot pay, he/she may give notice to move. Since the law is not clear, landlords and tenants should seek legal advice if they are unsure about a proposed rent increase. (A.S. 34.03.290b and A.S. 34.03.130b)

rules and regulations

Almost every landlord has rules and regulations. Often these are not mentioned until after a tenant moves in or until the rule

has been broken. To avoid problems, the law requires the landlord to show his/her rules and regulations to the tenant before the tenant commits himself to a rental agreement (oral or written). The tenant may discover that he/she does not agree with them and decide not to move in. The rules and regulations must be reasonable and specific, or under the law, the landlord will not be able to enforce them.

Remember that once the tenant has seen the rules and moved in, he/she is agreeing to live by these rules. A copy must be posted by the landlord someplace at the dwelling where it can be easily seen.

Rules must apply to all tenants equally and fairly. Rules and regulations cannot be changed without first giving tenants reasonable notice. If tenants do not agree to the change, and it changes the original rental agreement a great deal, they may move after giving at least 30 days notice or they may refuse to accept the rule. Landlords may evict tenants who refuse to abide by a reasonable rule change. If the change does not apply to all tenants in the building equally, an eviction based on a tenant's breaking of a rule may be illegal. (A.S. 34.03.130)

subleasing

When a lease is signed, the tenant is promising to stay for a certain length of time (usually four, six or twelve months). The tenant is telling the landlord that each and every month, whether the tenant still lives in the apartment or not, he/she will be responsible for paying the rent. Unless the landlord signs a paper saying it's okay with him/her for someone else to move in if the tenant moves out, the tenant cannot just have someone else "take over" the place.

There are usually only two ways to get out of a lease:

1. If the landlord breaks his/her part of the bargain (what's written in the lease), the tenant can move after giving 30 days written notice.
2. Get the landlord to agree to let the tenant sublease the place. Under the law the landlord has a right to ask for certain information about the new tenants. The landlord can reject the new tenants only for certain reasons, and cannot unreasonably prevent subleasing.

The information the landlord can ask for IN WRITING about the new tenant includes:

1. name, age and present address;
2. occupation, present employment and name and address of employer;
3. marital status;
4. how many people will live in the apartment;
5. two credit references;
6. names and addresses of all landlords of this person for the last three years.

Once this information has been given to the landlord, he/she has 14 days to answer the request. No answer within 14 days is considered the same as consent, so go ahead and sublease. If the answer is "no", the landlord must give written reasons for the decision.

The only legal reasons for refusing to allow a sublease are:

1. bad credit record;
2. too many people;
3. too many children;
4. unwillingness of new tenant to accept rental agreement;
5. pets not acceptable;
6. proposed business activity;
7. bad report from former landlord.

If the landlord says "no" to the suggested new tenant, but doesn't give reasons in the list of acceptable rejection reasons, the law says the old tenant can go ahead and sublease or move out; however, to move out without subleasing, a thirty day WRITTEN notice must be given to the landlord. (A.S. 34.03.070)

privacy

A common problem landlords and tenants have is that of the tenant's right to privacy. Many landlords feel they can come and go from their property whenever they please. Some tenants feel they never have to let a landlord come in.

To clear up the confusion, the law says a landlord must give a tenant 24 hours notice that he/she would like to come for the purpose of making repairs, maintenance, an inspection or showing the place. The landlord may enter only with the tenant's consent and only at reasonable times.

TWO EXCEPTIONS: No such notice is required if it is not possible to contact the tenant by ordinary means within 24 hours, or if there is an emergency (smoke, water, explosion, etc.).

Landlords cannot abuse their right to request entry or harass tenants, and tenants cannot unreasonably keep a landlord from entering.

If a tenant has a nosey landlord who believes he/she can come and go as he/she pleases, it might be a good idea to get a copy of the law to show him/her the section called ACCESS (34.03.140). If the landlord comes in and will not leave, call the police.

When a landlord does abuse his/her right to enter (by coming in without the tenant's permission, or when the tenant is gone or repeatedly without need), the tenant can ask a court to demand that the landlord stop (called an injunction). The tenant may also sue for actual damages or one month's rent, whichever is greater, court costs and attorney fees. If the tenant wishes to move because the landlord has abused the access privilege, a 10-day written notice is required.

If the tenant unreasonably refuses to allow the landlord in, the landlord can get an injunction. The landlord may also sue for actual damages or one month's rent, whichever is greater, or evict the tenant with a 10-day written notice.

absence/abandonment

Tenants must tell their landlord every time they plan to be gone for more than seven days. If the tenant plans to be gone only 2 or 3 days, then finds that for whatever reason he/she will actually be gone more than a week, they must notify the landlord as soon as possible.

This is to help protect the property from pipes freezing up, etc. While the tenant is gone, the landlord may go into the place only if there is an emergency or with 24 hours notice.

A landlord may assume the dwelling has been abandoned when:

1. the tenant is behind in rent, and
2. the tenant has been gone for more than 7 straight days and
3. the tenant did not notify the landlord that he/she would be gone.

The landlord may then enter the dwelling, store the tenant's belongings and re-rent the place. He must attempt to send the tenant a notice telling where the belongings are being kept and asking the tenant to remove his/her property within 15 days. The notice must also tell whether the landlord is going to have a public sale to get rid of the belongings or is going to throw or give them away, if

they are not picked up within 15 days. A tenant's belongings cannot be thrown or given away unless they can be considered to have no value or are food. (A.S. 34.03.230 and 34.03.260)

fire/casualty damage:

If the dwelling is damaged by a fire or other casualty (earthquake, flood, etc.), depending on the amount of damage, there are a couple of things the tenant can do.

1. Partial damage: When only a part of the dwelling is damaged and it is lawful for the tenant to stay (the place isn't condemned), move out of the damaged part. The rent can be reduced to an amount which reflects the fair value of the undamaged part of the dwelling.
2. Total destruction: If the tenant can no longer live in the place, he/she can move out, notify the landlord and stop paying rent. The rental agreement and responsibility to pay rent ends when the tenant moves.

After the tenant moves, the landlord must return any deposits and/or pre-paid rent to the tenant. Rent paid for the time the tenant didn't live in the dwelling must be returned (counted from the day of the casualty and including the day of the casualty) to the tenant. (A.S. 34.03.200)

housing codes

The primary objective of codes is the protection of the health and safety of the people who live in houses and apartments. A minimum standard of maintenance is set, making the landlord (not his tenants) responsible for keeping rental property in decent shape. (The section of this booklet called LANDLORD DUTIES explains what the landlord is expected to repair and maintain.)

The law protects tenants who use their right to report code violations. If they call to complain and ask for an inspection, the landlord cannot take revenge by evicting or harassing the tenant. Alaska has a statewide fire code but does not have a statewide housing code.

The following places do have local housing codes. Report substandard conditions to:

Anchorage - New Construction – Building Safety Division (264-6533)
" - Existing Housing – Health & Environmental Protection (264-4666)

Fairbanks - Fairbanks Building Official (452-1881)
Juneau - Juneau-Douglas Borough Housing Inspector (586-3300)
Ketchikan - City Building Inspector (225-3111)
Kodiak - City Building Inspector (486-5731)

condemned

Buildings inspected and found to be very unsafe may be condemned. The housing inspector will tell the landlord that he/she must repair the problems or he/she will be taken to court. If the problems are so serious that the inspector feels the building is beyond repair, the inspector will order that it be torn down.

The tenant may come home one day and find a sign posted on the building saying that the place is unsafe for anyone to live there. Tenants should immediately find out when the inspector and landlord expect all the tenants to move. They should also see an attorney before paying any more rent.

landlord duties

These are the things tenants can expect their landlords to do:

1. make all repairs to keep the dwelling in a livable condition;
2. keep all common areas (stairs, halls, yard, garbage area, etc.) clean and safe;
3. keep in safe and working condition all electrical, plumbing, toilet ventilating (fans, windows), air conditioning, kitchen and other appliances or facilities supplied by him/her;
4. provide garbage cans and arrange for removal service;
5. supply running water and reasonable amounts of hot water and heat at all times, unless there is a severe energy shortage or the furnace or hot water heater is in the complete control of the tenant (as in a house);
6. if requested by the tenant, supply locks and keys. If the lock can be easily broken, it does not provide enough protection. A tenant can demand that a proper lock be put on the door.

This is a check list of the main things the landlord should repair and maintain:

- doors, windows, roof, floors, walls, and ceilings that leak or have holes;
- plumbing fixtures (must work, not leak and provide a reasonable amount of running, hot and cold water at a reasonable water pressure level);
- a working and safe stove and oven;
- a reliable heating system which provides heat to all rooms in a reasonable amount;
- a safe electrical system (no loose or exposed wires, sockets that do not spark and enough power so the system does not blow fuses when used normally);
- windows (or fans) that provide fresh air when wanted;
- enough garbage cans to provide an adequate and safe trash removal service;
- extermination service if roaches, rats, mice or other pests infest the building, apartment or property;
- proper maintenance of vacuum cleaners, washing machines, dish washers, etc. supplied by the landlord (when not abused or broken by the tenant).

If the dwelling is in an isolated area where public sewer or water service is not available, the landlord does not have to provide those services; however, if the landlord privately provides these services at the beginning of the rental agreement, he/she must maintain the services. If there is a serious problem with something mentioned above that is not the tenant's fault, the law provides remedies for the tenant. The landlord must be given a reasonable chance to fix the problem first, but if he/she won't fix it, here is what the tenant can do:

1. MOVE. The tenant gives the landlord a written notice describing the problem and saying that if the problem is not fixed within 10 days, he/she will move within 20 days. If the problem is fixed within 10 days, but the tenant still wants to move, a regular 30-day notice is required.

2. EMERGENCY REPAIR AND DEDUCT. If heat, water, sewer or other essential service breaks down, the tenant may get the problem fixed and deduct the actual and reasonable expenses from the next month's rent. The tenant must give the landlord a written notice that this is what he/she plans to do, and if the problem is major, the tenant must provide the landlord with a copy of the estimated repair costs. However, once written notice is given, the tenant may immediately go ahead with repairs. If the cost is very great, it is advisable to contact a lawyer before proceeding with repairs. If the problem cannot be fixed right away and it

makes the dwelling unlivable, the tenant can give the landlord written notice that he/she is moving into substitute housing. The tenant is excused from paying rent until the problem is cured and may charge the landlord for the cost in excess of rent of staying in a hotel or other substitute housing until the problem is fixed. (A.S. 34.03.180)

3. SUE FOR DAMAGES. If the tenant or his family have suffered because the landlord failed to fix something, the tenant can sue. If the total amount is less than $2,000, the tenant may sue in the state small claim court. For larger claims, the tenant should see a lawyer.

4. WITHHOLD RENT. In some cases where the problem is really serious, it may reduce the value of the dwelling. If this happens, tenants may give written notice to their landlord that they refuse to pay a part of their rent until the problem is fixed. However, landlords and tenants may not agree on what is a serious problem, so it is wise to see a lawyer before using this remedy.

If the tenant notified the landlord in writing of a problem, and the landlord fixed it within the time allowed, but through the landlord's negligence, virtually the same thing happens again within 6 months, the tenant may terminate the rental agreement with a 10-day written notice. The notice must specify the problem and the date of termination.

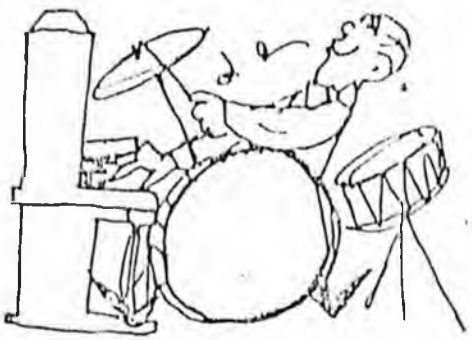
handyman agreements

In the renting of a house or duplex, the landlord and tenant may agree IN WRITING that the tenant will be responsible for (4), (5) and (6) of the LANDLORD DUTIES. Also, if it is done in good faith, the landlord and tenant of any dwelling may agree that the tenant will do specific repairs, remodeling or maintenance jobs in exchange for payment or reduction of rent, etc. The landlord cannot force a tenant to agree to this kind of arrangement to get out of his/her obligations as a landlord. It must be

made IN WRITING, signed by both parties and cannot be on the same paper as the rental agreement. Also, this agreement cannot be made if it will reduce or endanger the services to the other tenants. (A.S. 34.03.100)

tenant duties

These are the duties tenants must perform to keep their part of the rental bargain:



1. pay rent on time;
2. keep the place clean;
3. use the facilities properly (sinks, toilet, kitchen appliances, etc.);
4. do not disturb the neighbors;
5. do what is required by the lease; rental agreement or landlord's posted rules;
6. replace or fix anything damaged or broken because of an accident or carelessness;
7. do not destroy, damage or deface any part of the property.

If tenants do not uphold their end of the bargain, the landlord may be able to evict them. Eviction notices must be in writing and be specific about the problem in question. If the tenants were notified of a problem and remedied the problem within the time allowed, but the problem occurs again within 6 months, the landlord may evict the tenant using a 10-day written notice. The notice must specify the problem and the date of termination.

eviction

Landlords may evict tenants:

1. for failure to pay rent when it is due;
2. when the tenant has broken an important part of the rental agreement.

Many people think that tenants cannot be evicted in the winter in Alaska or if they have small children. This is not true.

A 10-day written notice is required when a landlord is evicting because the tenant is behind in his/her rent. If the rent is paid before the 10 days are up, the tenant may stay. The notice must tell tenants they have the choice of paying or moving. Ten days notice is also required when the landlord is evicting because the tenant has refused reasonable requests to enter the dwelling or has broken the rental agreement more than once in a 6-month period.

A 20-day written notice is required when the landlord is evicting because the tenant has broken an important part of the rental agreement, such as using the place illegally, etc. If the tenant fails to maintain the rental unit with the result that the health and safety of others are endangered, the landlord may deliver a written notice to correct the problem within 10 days of the receipt of the notice, or the tenant will have to move within 20 days. If the problem is corrected, the tenant may stay.

A 30-day written notice is required when the landlord wishes to evict for general reasons. This notice must be delivered 30 days before the next rental due date.

Eviction notices must be in writing, and the landlord cannot harass the tenant by:

- shutting off utilities
- changing the locks
- taking the tenant's belongings

If the tenant refuses to move at the end of the notice period (10, 20 or 30 days) the landlord must go to court to evict. The court calls most eviction suits "Forcible Entry and Detainer" (F.E.D.) cases. Here is how F.E.D. works:

The landlord files his/her claim with the court. The tenant will receive a complaint and summons to appear in court and give his/her side of the story. The trial will be scheduled 2-4 days after the summons is served. Tenants must act quickly if they don't want to be evicted. See a lawyer.

Tenants may have legal defenses or claims against the landlord which could prevent an eviction. Again, see a lawyer. If the tenant loses at the trial, the judge will sign an order telling the State Troopers to remove the tenant from the dwelling. The tenant may also have to pay the landlord's attorney fees, but if the tenant prevails, the landlord may have to pay the tenant's attorney fees. F.E.D. cases are usually handled by district court. For more information on evictions, read A.S. 09.45.060-.160, Forcible Entry and

Detainer. Information on preparing an eviction suit may be found in the Alaska Rules of Court, volume 2 - Civil Rules (read rules 1-5, 10, 76 and 85). The Rules of Court are available at the Alaska Law Library or your local magistrate's office.

retaliation

IF THE TENANT

1. complains to the landlord about repairs or failing to make repairs; OR
2. uses his/her rights under the Alaska Landlord-Tenant Law; OR
3. joins a tenant union or organization, OR
4. complains to a government agency about code violations or rent eviction controls:

THEN, THE LANDLORD CANNOT

1. raise the rent; OR
2. decrease services (such as shutting off utilities, etc.), OR
3. evict the tenant.

If the tenants feel illegal retaliation has occurred against them, they can move out or stay and sue for as much as 1½ times their actual damages.

An eviction is not considered illegal retaliation, if it is done because:

- the tenant is behind in the rent;
- the landlord must make repairs to meet code requirements or big changes that require a vacant dwelling;
- the tenant is using the place for illegal purposes;
- the landlord wants to use the place for something other than a rental dwelling for at least 6 months, or for personal purposes; .
- the property is being sold.

Rent increases are not considered illegal retaliation if the landlord can show:

- a sizeable increase in taxes or cost of maintaining the property (not including the cost of repairing something because of a tenant's complaint);
- that similar dwellings are being rented for a higher rate, and in fact, the landlord has been undercharging;
- that the cost of major improvements made to the property are being passed on to all tenants fairly and equally. (A.S. 34.03.310)

MOVING OUT

proper notice

When a tenant wants to move, the law requires that he/she give a written notice 30 days before the next rental due date. For example, if rent is due on the 8th of each month and the tenant decides on January 20 that he/she wants to move, the soonest he/she could get out of the obligation would be March 8, providing the tenant gives a written notice on or before February 8.

Tenants not giving proper written notice will be held responsible for rent up to that 30-day period or until the place is re-rented, whichever is less.

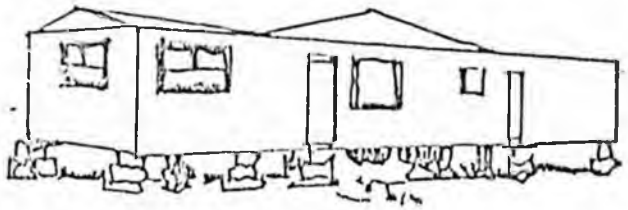
This does not include tenants who are moving because of serious problems which the landlord has not fixed (see the section under LANDLORD DUTIES).

cleaning and damages

Tenants should clean the dwelling completely before moving, including the refrigerator, bathtub, toilet and oven. Other cleaning responsibilities may have been spelled out in the rental agreement, lease or landlord's posted rules.

When the place has been cleaned, the tenant and landlord should inspect the place together, using the damage list prepared when the tenant first moved in as a guide. Tenants cannot be charged for ordinary wear and tear. But, since landlords and tenants sometimes disagree on what "ordinary wear and tear" is, here are some guidelines:

1. A family with children or pets will wear things out faster —this type of wear is the landlord's responsibility.
2. If something cannot be cleaned because of the landlord's act or negligence, it is the landlord's responsibility (non-washable paint on the walls, water leaks staining the walls, etc.).
3. Shampooing carpets and painting walls are usually considered landlord responsibilities, as these items are bound to get dirty through normal useage. Holes in the carpet or writing on the walls, however, are not normal wear and tear and are the tenant's responsibility to repair.



Damages caused by the tenant are the tenant's responsibility, even if they were caused by an accident. The damage deposit can be kept by the landlord in the amount needed to make repairs. If the tenant has purposely destroyed the landlord's property (throwing a rock through the window, writing on the walls, smashing furniture, etc.) the tenant may be guilty of a misdemeanor and face up to one year in prison, a $500 fine or both and will still have to pay for the damage.

deposit return

The deposit must be returned to the tenant within 14 days after he/she moves, or he/she must be sent a written notice from the landlord telling why any or all of the deposit is being kept. If the tenant feels deposit money is being unfairly kept, he/she can sue for up to twice the amount wrongfully kept.

Deposits may be kept only if the tenant:

- causes damage;
- owes back rent;
- doesn't leave the place as clean as it was when he/she moved in (other than ordinary wear and tear that cannot be removed by cleaning);
- does not comply with previously agreed upon requirements of deposit return as specified in the lease, rental agreement or landlord's posted rules. (A.S. 34.03.070b)

SPECIAL RULES FOR MOBILE HOMES

rental agreements

Rental agreements between mobile home park operators and mobile home park tenants may not:

1. prohibit the tenant from selling his mobile home (unless the mobile home is in violation of laws or ordinances, the proposed buyer doesn't agree with the terms of the existing rental agreement or the buyer does not have sufficient financial responsibility, and the park operator notifies the tenant of his/her objection in writing 30 days in advance);
2. require the tenant to provide permanent improvements to park property (the tenant may be required to maintain existing conditions);
3. require the tenant or prospective buyer to pay a fee to sell or transfer the mobile home (unless services were actually performed by the park operator to assist the sale or transfer, and the tenant was notified in writing of these charges before he/she moved into the park), or
4. require a fee to set up a mobile home in the park or to move an existing home out of the park (unless services were actually performed by the park, and the tenant was notified in writing of the charges before he/she moved into the park).

capital improvements

Mobile home park operators must give prospective tenants a list of all capital improvements that will be required (skirting, utility hookups, tie-downs, etc.) before the tenant moves in. Even though park operators may specify the type of equipment, tenants cannot be required to buy their equipment from the park operator.

eviction

Mobile home park tenants may be evicted only if:

1. they are behind in the space rent; or
2. they are violating a law or ordinance, and the violation endangers the health, safety or welfare of others in the park; or
3. the tenant has substantially violated a reasonable park rule as set out in the initial rental agreement or added later for all tenants, or
4. there is to be a change in the use of the land on which the park is located. When there is to be a change in the use of the mobile home park land, landlords or park operators must give tenants a 90-day written notice, unless a longer period was specified in a previously signed lease.

For all other evictions, the same notices are required as for other types of tenants. (A.S. 34.03.040c, 34.03.080d, 34.03.130c and 34.03.225)

RENT CONTROL

During the pipeline boom of the early 1970's, several Alaskan cities experienced a severe housing shortage, and the legislature passed an emergency rent control law. (A.S. 34.06.010-.060)

When emergency rent control is in force, the rules regarding rent increases and evictions change; however, the law expired in 1977, and if an emergency situation occurred again, a new law would have to be passed by the legislature.

THERE IS NO RENT CONTROL IN ALASKA AT THE CURRENT TIME.

COMMON RENTAL PROBLEMS

Problem	Remedy
1. No written notice	1. Written notices are required in many sections of the law; re-read this bulletin carefully to see when to use a written notice.
2. Landlord tells a tenant to move immediately or cuts off essential services without warning	2. Evictions are controlled by specific sections of the law. Tenants do not have to move if these rules are not followed and may sue for 1½ times actual damages.
3. Tenant refuses to move after receiving an eviction notice	3. The landlord should go to court for an E.E.D. order; the State Troopers will carry out the order. In addition, the landlord may sue for 1½ times the actual damages. See the section—EVICTIONS.
4. Deposit is not returned	4. Tenants may sue for twice the amount kept; re-read the section —DEPOSIT RETURN.
5. Tenant is habitually late with rent or repeatedly breaks rules	5. Late rent and other problems repeated within a 6-month period may be grounds for eviction; re-read section on EVICTIONS or see a lawyer.

SETTLING DISPUTES

When landlords and tenants disagree, sometimes tempers flare, and things may be said and/or done which are wholly outside the law. Sometimes the disagreement becomes just plain petty and small. It will only complicate matters if either party takes the issue to court.

If there is disagreement on any issue, remember that the court looks favorably on "good faith" action; that is, action taken in an honest, forthright manner. Try to remain calm. Gather your facts and PUT THEM IN WRITING. Be sure to pay attention to sections of the law that require written notices and that specify the number of days allowed for landlords or tenants to remedy disagreeable situations. Present your problem to the other party in writing, clearly stating what you want to change and what you will do if the situation doesn't change. The forms in the back of this booklet may help.

Generally speaking, the rental of dwellings is a business, and as in any other business, both parties should conduct themselves in a fair, honest manner. There are not many agencies that will mediate landlord/tenant disputes, and problems are frequently not serious enough to require a lawyer or go to court. Most landlord/tenant problems could be settled by both parties acting "in good faith".

If serions problems do arise, it is always advisable to see a lawyer. But first, give the other person a chance by trying to work it out togethrer.

WHERE TO GO FOR HELP

Both landlords and tenants can get help from the following agencies:

1. For copies of this publication and general assistance, contact the Cooperative Extension Service.

Anchorage	277-1488
Bethel	543-2503
Fairbanks	456-6885
Homer	255-8176
Juneau	586-7103
Ketchikan	225-3290
Nome	443-2320
Palmer	745-3360
Soldotna	262-5824

2. To file a complaint on false advertising, chronic misuse of deposit money or fraud, see the Consumer Protection Section, Alaska Department of Law.

Anchorage	420 L Street, Suite 100 Anchorage 99501 279-0428
Fairbanks	604 Barnette, Room 228 Fairbanks 99701 456-8588
Juneau	Pouch K, State Capital Juneau 99811 465-3692
Ketchikan	415 Main Street, Room 304 Ketchikan 99901 225-6120

3. Persons with low incomes may call Alaska Legal Services for attorney help. If your landlord tries to evict you, be sure you mention this when you call.

Anchorage	272-9431
Barrow	852-2300
Bethel	543-2237
Copper Center	822-3497
Dillingham	842-5653
Fairbanks	456-5401
Juneau	586-6425
Ketchikan	225-6420
Kodiak	486-4178
Kotzebue	442-3398
Nome	443-2951

4. If you need a lawyer but don't qualify for Alaska Legal Services, see the low-cost legal clinics in your town or call the statewide Lawyer Referral Service at 272-0352 in Anchorage. They may be able to refer you to a lawyer in your town.

5. For complaints against state government officials, contact the State Ombudsman Office.

Anchorage	840 K Street Anchorage 99501 276-4011
Fairbanks	613 Cushman Fairbanks 99701 452-4001
Juneau	525 Village Street Juneau 99811 465-4970

6. For complaints against Municipality of Anchorage employees, contact the Municipal Ombudsman Office at 264-4461.

7. To file a claim for damages of $2,000 or less, see the Alaska Court System and ask for their publication, "Alaska Small Claim Handbook".

SAMPLE FORMS

The following notices were prepared as samples of what is necessary. These samples may not apply in all situations, but could be helpful.

NOTICE OF EVICTION FOR NON-PAYMENT OF RENT

_____
(Date)

TO: _____
(Tenant)

_____

_____
(Address)

You are notified that you owe rent in the amount of $_____. If you do not pay this rent within TEN DAYS of the day you receive this notice, your tenancy is terminated and you must move. You must pay your rent in cash, money order or certified check.

If you have not paid the rent or moved within TEN DAYS, a lawsuit will be filed to evict you. If you pay your rent on or before the TEN DAY period, you may stay.

Signed,

_____
(Landlord)

Receipt:

I received this notice on the _____ day of _____ 19____ at _____ am/pm.

_____
(Tenant)

KEEP A COPY OF THIS NOTICE

NOTICE OF TERMINATION OF TENANCY (BY TENANT)

_____
(Date)

TO: _____
(Landlord)

_____

_____
(Address)

You are notified that I am terminating this tenancy effective on the rent due date which occurs at least 30 days from the date you receive this notice. My rent is due on the _____ of each month, so I will be gone by the _____ day of _____, 19__.

Please send my security deposit of $_____, or an explanation of how it was used, to _____
(address)

within 14 days of the date I move.

Signed,

_____
(Tenant)

_____

_____
(Address)

Receipt:

I received this notice on the _____ day of _____ 19____ at _____ am/pm.

Committee Substitute for Sponsor Substitute for House Bill No. 1 (L&C)
"AN ACT RELATING TO LANDLORDS AND TENANTS" ABOOD TESTIMONY BEFORE
JUDICIARY COMMITTEE 2/25/83

The Alaska Statutes governing Landlords and tenants is not entirely clear in defining certain areas of concern to both the landlord and the tenant. Both the landlord and the tenant hold certain unalienable rights in the property they own as a landlord or rent as a tenant. With the 0% to 4% vacancy rate in most of Alaska, and because over 35% of the population in Alaska rent their dwellings, it is necessary to update the laws to answer the needs of the landlord and tenant. I introduced House Bill No. 1 to answer some of these needs. I feel that it is fair and equitable to both parties.

Referring to Section 1. of CSSSHB 1, the landlord's rights are more clearly defined in relation to termination of a "periodic tenancy" held by a tenant. As the law stands now, it refers only to a lease or agreement, (a predetermined period of time) or an "estate at will", (for which the tenant is at the mercy of the landlord, and has no say in how long the tenancy will last). A "periodic tenancy" refers to a month to month period of time. Unlike a lease or agreement, it can be indefinite, and a good majority of rental arrangements today are based on a periodic tenancy. By inserting this new paragraph, it assists the landlord in enforcing his rights, should any conflicts arise due to termination.

Section 2 of CSSSHB 1 was added by the Labor and Commerce Committee to further clarify AS 34.03.290 (c) relating to the 45 day notice. If the tenant fails to give notice of termination, then the landlord is entitled to an amount not to exceed one and one-half times the actual damages.

Section 3 provides for a 45 day notice. I feel that this is a more equitable time frame to both tenants and landlords. Due to the tight rental market in Alaska at the present time, it is quite difficult to find adequate housing, especially for those families with children or pets, not to mention the elderly and minorities. General termination, (30 days), on the part of the landlord in a time of a severe housing crunch does not always give the tenant sufficient time to find suitable housing. A 45 day notice would also be beneficial to the landlord, in as much as it gives him time to locate a new tenant, and gives him an adequate time frame to make necessary repairs and alterations before the new tenant moves in. Also, in the case of condo conversion, this gives the tenant sufficient notice to vacate or purchase their unit.

"Rental due date" refers to the date on the same day each month that rent is to be paid. The landlord may wish to give notice of termination to the tenant before the "rental due date", and replacing "rental due date" with the word "termination" date provides for either time frame. It does not restrict either party to the exact date the rent is due when giving a termination notice. The question arises, "What if the tenant

gives notice on, say May 17th?" This means that the termination date would be July 2nd. Therefore, the tenant would be obligated to pay the landlord for rent through May, all of June, (and two days in July, which would be prorated). The landlord would not lose any rental income even though the termination date falls after the "rental due date". By the time the 45 day period is up, the landlord has had adequate time to find a new tenant and the tenant has been given a more equitable amount of time to find a new dwelling.

The new clause in Section 4 provides for recovery of "actual damages", as well as one and one-half times the actual damages as compensation to the landlord. This deters the tenant from staying on past termination or the expiration of the rental agreement and in effect, is incentive to the tenant to vacate the premises.

An improper hold-over by a tenant has caused landlords financial difficulties. If a tenant continues to occupy a dwelling after his tenancy expires, he is causing the landlord loss of potential income needed to make mortgage payments, as well as the loss of time to make necessary repairs before renting the unit to the next party. Alaska law allows landlords to sue for damages, but the time, effort and money involved is not always feasible to pursue.

Section 5 was included in this bill to protect the tenant from landlords who abuse the right to access or evict the tenant for retaliatory reasons. The tenant has a right to his/her privacy, and the landlord must give "reasonable" notice to the tenant before entering the property. This new subsection also provides that the tenant may not be evicted because they have made a complaint, (for just causes), against the landlord, as long as they abide by the laws governing landlords and tenants. Sixty days is a sufficient amount of time to correct a problem or answer a complaint.

This bill is intented to update the present laws governing both the landlord and tenant. I feel that it provides both parties with fair and equal provisions to answer some of the overwhelming problems that have arisen over the past several years, due to the increase of the Alaskan population.

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 1 (L&C)

"An Act relating to landlords and tenants."

OFFERED TO JUDICIARY
COMMITTEE 3/14/83

We have reworked HB 1 to reflect some of the changes recommended in the Judiciary meeting of February 25th.

The Bill has been re-drafted to reflect the three amendments and the sections have been renumbered to correspond to the Amendments. Also, note Page 2, Line 15 of the re-draft "AS 34.20.020" should be "AS 34.03.020".

Please refer to the re-draft of HB 1:
(Amendment No. 1)
New Section 1 - AS 09.45.085 is amended by adding a new paragraph to read:

ENFORCEMENT. A judgement for the restitution of real property rendered in an action for forcible entry or detention may be enforced by the plaintiff without futher judicial action and the plaintiff may not be required to obtain a writ of assistance or other order to enforce the judgment.

This Amendment is offered to assist the plaintiff in settling his case. As it stands now, if a landlord (for example), wins his suit against the tenant who is holding over without the landlord's permission needs to first receive a judgment from the court, and then go to the Court or State Troopers to file an additional form or forms to enforce the judgment. In some cases, a delay in action results in the tenant disappearing before the correct forms can be served upon him, and would alievate the additional costs of filing additional forms.

Section 3 - Page 1, Line 16 through 23 - (Amendment No. 2)

"AS 34.03 is amended by adding a new section to read:

Sec. 34.03.025. CHANGES IN TERMS AND CONDITIONS OF RENTAL AGREEMENTS. The landlord and tenant may change the terms and conditions of a rental agreement if the changes are not prohibited by law. Unless both the landlord and tenant agree to a change in a rental agreement, the agreement remains in effect under its original terms and conditions, including provisions relating to rent and the rights and obligations of the parties, until the agreement is terminated under AS 34.03.290 or other law.

I offered this as Amendment No. 1 to the Judiciary committee on February 25. In order to correspond to the Bill Sections, I am now offering this as Amendment No. 2. This is simply in place of the Letter of Intent by the Labor & Commerce Committee to define AS 34.03.290 (b) in detail regarding the 45 day notice as it applies to a rental increase. It gives further clarification to what transpires if a landlord or tenant makes substantial or material changes to a rental agreement. It does not change the bill, but defines AS 34.03.290 (b). If the landlord (for example), gives a tenant a notice of rental increase, and the tenant does not approve of the increase, then the tenant can give his notice as defined in AS 34.03.290 (b).

(Amendment No. 3)

(See Page 1, Line 26 and 27, and Page 2, Line 1,2 and 3)

Section 4 (was Section 2) AS 34.03.270 is amended by adding a new subsection to read:

(b) If the rental agreement is terminated by the tenant [and] , and the failure to provide the notice is wilful or not in good faith, the landlord may recover an amount not to exceed one and one-half times the actual damages. Failure by the tenant to provide the notice required under AS 34.03.290 (a) or (b) is presumed to be wilful and not in good faith.

These changes are offered as Amendment No. 3. The key word here is "presumed". The burden of proof lies with the tenant to prove that his intentions were in good faith. This shortens the judicial process in some circumstances. It is up to the tenant to explain why he did not give notice or had a good reason for not giving notice, (i.e. an emergency operation, a death in the family, etc.). Until that time, the court presumes that the tenant failed to give notice and the landlord can proceed with recovery of the premises.

(Introduced to Judiciary Committee
February 25, 1983)

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 1 (L&C)

For an Act entitled: "An Act relating to landlords and tenants."

Attached is an updated copy of CSSSHB 1 as of March 14, 1983.

Three Amendments are also attached to the bill , and the bill has been re-drafted to include these amendments.

Note that the Sections have been renumbered to correspond to the Amendments. Also note Page 2, Line 15, "AS 34.20.020" should read "AS 34.03.020". This has been changed accordingly.

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 1 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to landlords and tenants."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 09.45.085 is amended by adding a new paragraph to read:

ENFORCEMENT. A judgment for the restitution of real property rendered in an action for forcible entry or detention may be enforced by the plaintiff without further judicial action and the plaintiff may not be required to obtain a writ of assistance or other order to enforce the judgment.

*Section 2. [1] AS 09.45.090 is amended by adding a new paragraph to read:

(4) when, after a notice to terminate the tenancy as provided in AS 34.03.290 with reference to termination of a periodic tenancy, a person continues in possession of a dwelling unit after expiration of the time for determining the tenancy.

*Section 3. AS 34.03 is amended by adding a new section to read:

Sec. 34.03.025. CHANGES IN TERMS AND CONDITIONS OF RENTAL AGREEMENTS. The landlord and tenant may change the terms and conditions of a rental agreement if the changes are not prohibited by law. Unless both the landlord and the tenant agree to a change in a rental agreement, the agreement remains in effect under its original terms and conditions, including provisions relating to rent and the rights and obligations of the parties, until the agreement is terminated under AS 34.03.290 or other law.

*Sec. 4. [2] AS 34.03.270 is amended by adding a new subsection to read:

(b) If the rental agreement is terminated by the tenant [and], the tenant fails to provide the notice required under AS 34.03.290 (a) or (b), and the failure to provide the notice is wilful or not in good faith, the landlord may recover an

an amount not to exceed one and one-half times the actual damages. Failure by the tenant to provide the notice required under AS 34.03.290 (a) or (b) is presumed to be wilful and not in good faith.

*Sec. 5. [3] / AS 34.03.290 (b) is amended to read:

(b) The landlord or the tenant may terminate a month to month tenancy by a written notice given to the other at least 45 [30] days before the termination [RENTAL DUE] date specified in the notice.

* Sec. 6. [4] / AS 34.03.290 (c) is amended to read:

(c) If the tenant remains in possession without the landlord's consent after expiration of the term of the rental agreement or after its termination, the landlord may bring an action for possession and recovery of actual damages. If [IF] the tenant's holdover is wilful or [AND] not in good faith the landlord, in addition, may recover an amount not to exceed one and one-half times the actual damages. If the landlord consents to the tenant's continued occupancy, AS 34.03.020 [AS 34.20.020] applies.

*Sec. 7. [5] / AS 34.03.310 is amended by adding a new subsection to read:

(f) a landlord is presumed to have violated (a) of this section if the landlord increases rent, decreases service, or brings or threatens to bring an action for possession within 60 days after a tenant has engaged in an action listed under (a)(1)- (4).

LETTER OF INTENT FOR
CSSS FOR HB 1 (L & C)

The Legislature recognizes that an increase in rent by the landlord may constitute a form of termination, in that it terminates the rental agreement then in existence and offers a new rental agreement at different terms. The tenant, however, should be given ample time to locate a new dwelling and to move. Upon receipt of a notice of rent increase a tenant should have the full 45 days to vacate provided under this bill if he chooses no to accept the higher rent. The tenant would be under the obligation to inform the landlord of his intention to vacate within the 45 day period if the tenant does not intend to pay the higher rent.

HB2

A BILL

To establish minimum mandatory sentences for the use of armor-piercing handgun ammunition during the course of a violent crime.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that title 18, United States Code, is amended by adding a new section 929 as follows:

Sec. 929. Use of restricted ammunition.

"(a) Whoever, during and in relation to the commission of a crime of violence for which he may be prosecuted in a court of the United States, including a felony which provides for an enhanced punishment if committed by the use of a dangerous weapon or device, uses or carries any handgun loaded with armor-piercing ammunition as defined herein, shall, in addition to the punishment provided for the commission of such felony, be sentenced to a term of imprisonment for not less than five years. Notwithstanding any other provision of law, the court shall not suspend the sentence of any person convicted of a violation of this subsection nor place him on probation, nor shall the term of imprisonment run concurrently with any other term of imprisonment including that imposed for the felony in which the armor-piercing handgun ammunition was being used or carried. No person sentenced under this subsection shall be eligible for parole.

"(b) For purposes of this section:

(1) 'handgund' means any firearm, including a pistol or revolver, originally designed to be fired by the use of a single hand;

(2) 'armor-piercing ammunition' means ammunition which, when or if fired from any handgun used or carried in violation of subsection (a), under the test procedure of the National Institute of Law Enforcement and Criminal Justice Standard for the Ballistics Resistance of Police Body Armor promulgated December, 1978, is determined to be capable of penetrating bullet-resistant apparel or body armor meeting the requirements of Type IIA of Standard NILECJ-STD-0101.01 as formulated by the United States Department of Justice and published in December of 1978; and

(3) 'crime of violence' means (i) an offense, other than a misdemeanor that consists solely of damage to property and that does not place another person in danger of death or serious bodily injury, that has as an element of the offense the use, attempted use, or threatened use of physical force against the person or property of another; or (ii) any other offense that is a felony and that, by its nature, involves a substantial risk that physical force against the person or property of another may be used in the course of committing the offense.

NATIONAL RIFLE ASSOCIATION OF AMERICA
INSTITUTE FOR LEGISLATIVE ACTION
1600 RHODE ISLAND AVENUE, N.W.
WASHINGTON, D.C. 20036

KTW BULLET FACT SHEET

Recently there has been a great deal of controversy regarding bullets which are capable of penetrating most soft body armor ("bullet-proof vests").

Such projectiles are not novel. The French army used a copper alloy bullet at the turn of the century. Specifically armor-piercing bullets (with a steel core) have been made since the First World War, and our government has sold large quantities to civilians as surplus. Many if not most handgun ammunition incorporates a copper alloy jacket around the bullet; such jacketed handgun bullets have been specially designed to increase the penetration since the 1930's, when police began to demand bullets useful against criminals using vehicles.

The KTW projectile is one example of a large class of projectiles which can be used to defeat body armor. It is the National Rifle Association's understanding that although KTW projectiles have been available for over ten years, no policeman has ever had one fired at him, nor has NRA been able to locate any other case of criminal misuse. The KTW ammunition is expensive (about $1.50 per round), only a small proportion of licensed dealers stock it, and the manufacturer will distribute only to dealers who sign a contract agreeing to sell only to law enforcement personnel. The media's effort to generate a controversy over this ammunition has thus served to advertise a form of ammunition which has not been misused in ten years of availability.

Attempts to ban ammunition of this type pose a serious concern in that definition of "ammunition of this type" is a complex and subjective matter. Assuming that a ban would be objective, (not limited to "bullets made by KTW") it would have to be keyed to some index of penetration. The problem is that there is no simple dividing line between bullets that will defeat body armor and bullets that will not. Any index eliminating most bullets with a sufficient penetration would also eliminate practically all bullets used by sportsmen for hunting: deer, antelope, elk, etc.

Body armor comes in many types and grades. Many manufacturers produce five or more grades, which offer increasing protection at the price of higher cost and weight. The best grades (with this steel inserts) will stop KTW bullets. The lower grades are insufficient to stop many ordinary types of pistol ammunition. Only a few very heavy and very expensive vests will stop ordinary rifles using hunting ammunition. Most vests are supplied with a chart showing what types of ammunition they will stop and will not stop. Some types of ammunition may be stopped if fired from a firearm with a short barrel but not one with a longer one which develops more power. Even with the same type of ammunition and the same firearm, some brands may be stopped while others, loaded to higher power, will not be. (For example, a model X Second Chance vest will stop 9mm rounds made by Federal or Winchester, but not

European military surplus rounds; it will stop most .357 magnum rounds if fired from a 4 1/2 inch barrel, and none of them if fired from a 6 inch barrel). Additionally, penetration is dramatically increased if the vest is wet, is backed by a hard surface (reportedly, even a simple lead .38 will penetrate a vest backed by wood during testing), or if the vest is struck at certain angles.

The result of all this is that bullets cannot be neatly divided into classes which will or will not penetrate body armor. Any attempt to objectively define such runs a risk of outlawing many types of ammunition now used by sportsmen, including:

(1) Most ammunition for hunting rifles. Due to its much greater power and velocity, this will penetrate almost all soft body armor except the heavy "SWAT" team vests. The government has, incidentally, classified many traditional rifle rounds (including the venerable .30-30) as "handgun ammunition" for Gun Control Act purposes, since there are some handguns chambered for such.

(2) Many full-metal jacketed bullets for handguns, now used by target shooters and other sportsmen, which are covered by a copper-alloy jacket, do not deform upon impact, and have higher penetration. Most automatic pistol ammunition is jacketed to prevent jamming.

(3) Certain handgun loads designed for big-game shooting and therefore loaded for deep penetration (using jacketed bullets or lead bullets cast for special hardness).

(4) Most military surplus ammunition used by shooters preparing for matches requiring such, or for reasons of economy.

Given that the proponents of such a system of grading have not come forward with a single example where this ammunition has been criminally abused, that its cost, restricted availability and (prior to the recent media coverage) limited advertising must make such abuse a rarity, there seems little reason to focus additional public attention on such ammunition, much less start people thinking on other ways to defeat such armor or circumvent its protection.

*Prepared by the Institute for Legislative Action on January 21, 1982

KTW ISSUE BRIEF

What is the KTW bullet that has stirred up such a storm of controversy and legislative action? Why has such a furor erupted over a bullet which has never been criminally misused? How has the media been able to label this the "cop-killer bullet" when no police officer has ever even had one fired at him? Where is the justification for this media campaign highlighting the vulnerability of police "bullet proof" vests?

The KTW bullet, a bronze, teflon coated round, is one example of a large class of projectiles known as metal or armor-piercing ammunition. In January of this year, NBC television aired a dramatic and rather misleading demonstration of the penetration ability of the KTW through the equivalent of four police Kevlar vests and several Los Angeles city telephone directories.

No effort was made to follow the established scientific ballistic testing procedures prescribed by the U.S. Department of Justice's National Institute of Law Enforcement and Criminal Justice to conduct standard ballistics resistance tests. Neither did the demonstration allow for the increased bullet penetration which occurs when the armor is backed by a rigid object. If NBC had checked the NILECJ standards, they would have known that an accurate ballistics test must be run by using ballistics clay or modeling clay to simulate the interaction between the armor, the bullet and the resilient human body.

Particularly distressing is the fact that NBC did not inform the viewers that different types of bullet resistant vests are available for different threat levels. Although it is true that some soft body armor cannot protect against all types of ammunition, the episode failed to mention that armor is commercially available and used by police which can defeat the KTW metal -piercing bullet.

In addition, NBC implied that the KTW is widely available to citizens. This simply is not true. The KTW is limited strictly to police and military use only. Very few dealers carry the bullet and these must agree to sell only to law enforcement and military.

The KTW bullets used in the NBC demonstration were obtained by a former F.B.I. agent who posed as a California drug enforcement agent. He had to call both the manufacturer and distributor of KTW before he located a firearms dealer who carried these in the state of California. In order to purchase the rounds, he had the dealer send the bullets directly to the headquarters of the California Narcotics Authority!

Minimum equirement police soft body armor already protects against 95 percent of the firearms which could threaten law enforcement officers during daily police operations. Armor which is designed to defeat armor-piercing and high velocity bullets is commercially produced and is widely available.

It is simply incongrous to propose a ban on a single type of armor-piercing ammunition, replete with all the inherent problems of enforcement, definition and overwhelming expense, for an apparently non-existent problem.

Is the KTW bullet truly a public menace?

-- No police officer has ever been shot with a KTW.

-- No criminal misuse of this ammunition has ever been documented since the bullet was developed twelve years ago.

-- The ammunition is restricted by the manufacturer and dealers to military and law enforcement use only.

-- The police already have soft body armor which is capable of protecting them against the KTW.

According to a recent statement made by Richard C. Davis, President of Second Chance Body Armor, Inc., one of the oldest and most prestigious armor manufacturers, "Up until the recent outburst of KTW publicity there were only a relative handful of 'gun expert' type people who knew about the existence of armor piercing handgun ammunition.

"I am probably in a position to be more sensitive than anyone to reports of KTW of other armor piercing ammo being used by criminals -- up until now, it just hasn't happened."

"The nice thing about armor piercing rounds is that because they do not expand, they generally cause far less damage than lead or hollow point style bullets. My general feeling is that there is approximately a hundred times greater chance of the policemen being killed by a head shot due to this vest publicity than there is by a criminal seeking out exotic armor piercing ammunition and then deliberately shooting a policeman with it. (emphasis added) If a pure and simple killing of a policeman is the desired effect, this can be much more easily accomplished with a high-powered rifle from a distance, or with a sawed off shotgun in the face from close range. It has been our experience that the vast majority of cop killings are the unplanned result of a small time criminal being suddenly confronted with capture. What we call: 'The cornered rat syndrome.'"

The focus on the KTW ammunition misunderstands both the design intent and capabilities of the soft body armor, as well as the actual threat this bullet poses for police.

HD2"

LAW ENFORCEMENT STANDARDS PROGRAM

NILECJ STANDARD FOR THE BALLISTIC RESISTANCE OF POLICE BODY ARMOR

A Voluntary National Standard Promulgated by the National Institute of Law Enforcement and Criminal Justice.

ACKNOWLEDGMENTS

This standard was formulated by the Law Enforcement Standards Laboratory of the National Bureau of Standards under the direction of Ronald C. Dobbyn, Manager, Protective Equipment Program, and Jacob J. Diamond, Chief of LESL. The technical research was performed by Nicholas J. Calvano, project leader, and other personnel of the NBS Center for Consumer Product Technology. The standard has been reviewed and approved by the National Advisory Committee for Law Enforcement Equipment and Technology of the International Association of Chiefs of Police and adopted by them as an IACP standard.

FOREWORD

Following a Congressional mandate[1] to develop new and improved techniques, systems, and equipment to strengthen law enforcement and criminal justice, the National Institute of Law Enforcement and Criminal Justice (NILECJ) has established the Law Enforcement Standards Laboratory (LESL) at the National Bureau of Standards. LESL's function is to conduct research that will assist law enforcement and criminal justice agencies in the selection and procurement of quality equipment.

In response to priorities established by NILECJ, LESL is: (1) Subjecting existing equipment to laboratory testing and evaluation and (2) conducting research leading to the development of several series of documents, including national voluntary equipment standards, user guides and technical reports.

This document, NILECJ-STD-0101.01, Ballistic Resistance of Police Body Armor, is a law enforcement equipment standard developed by LESL and approved and issued by NILECJ. Additional standards as well as other documents are being issued under the LESL program in the areas of protective equipment, communications equipment, security systems, weapons, emergency equipment, investigative aids, vehicles and clothing.

This equipment standard is a technical document consisting of performance and other requirements together with a description of test methods. Equipment which can meet these requirements is of superior quality and is suited to the needs of law enforcement agencies. Purchasers can use the test methods described in this standard to determine firsthand whether a particular equipment item meets the requirements of the standard, or they may have the tests conducted on their behalf by a qualified testing laboratory. Law enforcement personnel may also reference this standard in purchase documents and require that any equipment offered for purchase meet its requirements and that this compliance be either guaranteed by the vendor or attested to by an independent testing laboratory.

The necessarily technical nature of this NILECJ standard, and its special focus as a procurement aid, make it of limited use to those who seek general guidance concerning body armor. The User Guide Series is designed to fill that need. We plan to issue guides to various items of law enforcement equipment as soon as possible, within the constraints of available funding and the overall NILECJ program.

The user guides being issued are highly readable and tutorial in nature in contrast to the standards, which are highly technical and intended for laboratory use by technical personnel. The guides provide, in non-technical language, information for purchasing agents and other interested persons concerning the capabilities of equipment currently available. They may then select equipment appropriate to the performance required by their agency. Recommendations for the development of particular guides should be sent to us.

---

[1]Section 402(b) of the Omnibus Crime Control and Safe Streets Act of 1968, as amended.

NILECJ standards are subjected to continuing review. Technical comments and recommended revisions are invited from all interested parties. Suggestions should be addressed to the Program Manager for Standards, National Institute of Law Enforcement and Criminal Justice, Law Enforcement Assistance Administration, U.S. Department of Justice, Washington, D.C. 20531.

National Institute of Law
Enforcement and Criminal
Justice

NILECJ STANDARD FOR THE BALLISTIC RESISTANCE OF POLICE BODY ARMOR

1. PURPOSE

The purpose of this standard is to establish minimum performance requirements and methods of test for the ballistic resistance of police body armor. This standard is a revision of NILECJ-STD-0101.00, dated March 1972 [2].

2. SCOPE AND CLASSIFICATION

2.1 Discussion

This standard is applicable to armors intended to protect the torso against gunfire. Many different types of armor are now available; they range in ballistic resistance from those designed to protect against small caliber handguns to those designed to protect against high-powered rifles.

Personal protective armor manufacturers make a great variety of armors, many to special order, but production is currently concentrated in six classes designed to resist the following threats:

- 22 LRHV, 40 gr RN lead (1050 ± 40 fps); 38 Spec., 158 gr RN lead (850 ± 50 fps); and 12 gauge #4 shot.
- 357 Mag., 158 gr JSP (1250 ± 50 fps); and 9 mm, 124 gr FMJ (1090 ± 75 fps).
- 357 Mag., 158 gr JSP (1395 ± 20 fps); and 9 mm, 124 gr FMJ (1175 ± 75 fps).
- 44 Mag., 240 gr JSP (1425 ± 50 fps).
- 30 Carbine, 110 gr M-1 (1950 ± 50 fps); and 12 gauge rifled slug (1600 ± 50 fps).
- 30-06 rifle, 166 gr AP M-2 (2750 ± 50 fps).

The ballistic threat posed by a bullet depends, among other things, on its composition, shape, caliber, mass, and impact velocity. Because of the wide variety of cartridges available in a given caliber, and because of the existence of hand loads, armors that will defeat a standard test round may not defeat other loadings in the same caliber. For example, an armor that prevents penetration by a 357 Magnum test round may or may not defeat a 357 Magnum round with higher velocity. In general, an armor that defeats a given lead-core round will not resist penetration by an identical round with an armor-piercing core. The test ammunitions specified in this standard represent common threats to law enforcement officers.

2.2 Classification

Police body armors covered by this standard are classified into five types, by level of performance. Table 1 summarizes the protection they afford.

TABLE 1. *Protection Afforded by Police Body Armor*

(4) Rounds up to 8.0 g (124 gr) with velocities up to 358 ± 15 m (1175 ± 50 ft) per second.

2.2.1 Type I (22 LR—38 Special)

This armor protects against the standard test rounds as defined in paragraph 5.1.1. It also provides protection against lesser threats such as 12 gauge No. 4 lead shot and most handgun rounds in calibers 25 and 32.

2.2.2. Type II-A (Lower Velocity 357 Magnum—9mm)

This armor protects against the standard test rounds as defined in paragraph 5.1.2. It also provides protection against lesser threats such as 12 gauge 00 buckshot, 45 Auto., 22 caliber Long Rifle High Velocity (rifle), High Velocity 38 Special and some other factory loads in caliber 357 Magnum and 9 mm, as well as the threats mentioned in paragraph 2.2.1.

2.2.3 Type II (Higher Velocity 357 Magnum—9 mm)

This armor protects against the standard test rounds as defined in paragraph 5.1.3. It also provides protection against lesser threats such as 12 gauge 00 buckshot, 45 Auto., 22 caliber Long Rifle High Velocity (rifle), High Velocity 38 Special and most other factory loads in caliber 357 Magnum and 9 mm, as well as the threats mentioned in paragraph 2.2.1 and 2.2.2.

2.2.4 Type III (High-Powered Rifle)

This armor protects against the standard test round as defined in paragraph 5.1.4. It also provides protection against lesser threats such as 223 Remington (5.56 mm FMJ), 30 Carbine FMJ, and 12 gauge rifled slug, as well as the threats mentioned in paragraphs 2.2.1, 2.2.2 and 2.2.3.

2.2.5 Type IV (Armor Piercing Rifle)

This armor protects against the standard test round as defined in paragraph 5.1.5. It also provides at least single hit protection against the threats mentioned in paragraphs 2.2.1, 2.2.2, 2.2.3 and 2.2.4.

2.2.6 Special Type

A purchaser having a special requirement for a level of protection other than one of the above standards should specify the exact test rounds to be used, and indicate that this standard shall govern in all other respects.

2.3 Configuration

Police body armor is offered in a variety of configurations. All makes and models offer protection for the torso front. Many models also cover the back, and some offer additional protection. Police body armor may be specified to contain armor parts to cover the:

(a) torso front, or front and sides
(b) torso back, or back and sides
(c) groin,
(d) coccyx (end of the spine)

or any practical combination of these, as required.

3. DEFINITIONS

3.1 Angle of Incidence

The angle between the line of flight of the bullet and the perpendicular to the plane tangent to the point of impact (see figure 1).

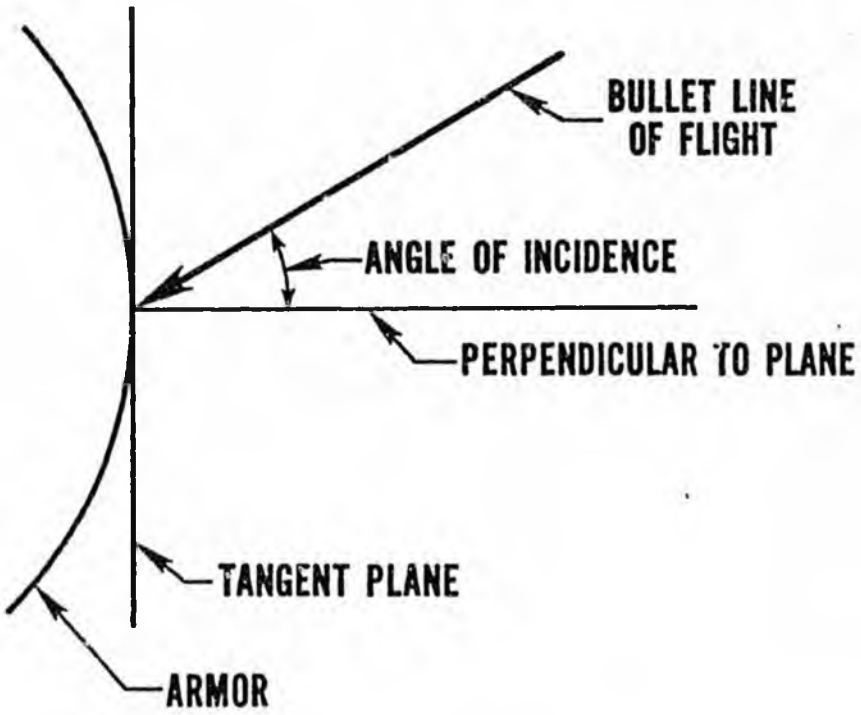

FIGURE 1. *Angle of incidence.*

3.2 Backing Material

A block of non-hardening, oil-base modeling clay, 45 cm by 45 cm by 10 cm thick (18 by 18 by 4 in), placed in contact with the back of the armor test specimen during ballistic testing.

3.3 Deformation

The maximum momentary displacement of the back surface of the armor test specimen caused by a fair hit that does not penetrate the armor.

3.4 Fair Hit

A bullet that impacts the armor at an angle of incidence no greater than 5 degrees, no closer to the edge of the armor part or to a prior hit than 5 cm (2 in), and at an acceptable velocity as defined in this standard. A bullet that impacts too close to the edge or a prior hit and/or at too high a velocity, but does not penetrate, shall be considered a fair hit for the determination of penetration but not deformation.

3.5 Full Metal Jacketed Bullet (FMJ)

A bullet made of lead completely covered, except for the base, with copper alloy (approximately 90 copper-10 zinc).

3.6 Jacketed Soft Point (JSP)

A bullet made of lead completely covered, except for the point, with copper alloy (approximately 90 copper-10 zinc).

3.7 Lead Bullet

A bullet made of lead alloyed with hardening agents.

3.8 Penetration

Complete perforation of an armor test sample by a test bullet or by a fragment of the bullet or armor, as evidenced by the presence of that bullet or a fragment in the backing material, or by a hole which passes through the backing material.

3.9 Strike Face

The surface of an armor designated by the manufacturer as the face that should be worn away from the body.

4. REQUIREMENTS

4.1 Sampling for Test

Two complete armors, selected at random, shall constitute a test sample. A maximum of two additional type I, II-A and II armors may be required for retesting.

4.2 Test Sequence

Armors shall be examined to determine compliance with the requirements of paragraphs 4.3 and 4.4, and shall then be tested for compliance with the requirements of paragraph 4.5.

4.3 Workmanship

Each armor shall be free from wrinkles, blisters, cracks or fabric tears, crazing, chipped or sharp corners and other evidences of inferior workmanship.

4.4 Labeling

Each armor shall be clearly and durably marked to provide the following information:

a) name, logo or other identification of the manufacturer
b) type of body armor, according to section 2 of this standard
c) size
d) lot number
e) month and year of manufacture
f) strike face, if any
g) cleaning instructions for the ballistic material and for the armor carrier, if any

Items d and e may be incorporated into a single number, e.g., a serial number.

4.5 Ballistic Penetration and Deformation

One complete armor shall be tested for resistance to ballistic penetration and ballistic deformation in accordance with paragraph 5.2. A second armor shall be so tested after wet conditioning in accordance with paragraph 5.1.8. Penetration by any fair hit, or deformation to a depth greater than 44 mm (1.73 in), in either test, shall constitute failure. The detailed requirements are summarized in table 2.

TABLE 2. *Test Summary*

	Test Variables				Performance Requirements		
Armor Type	Test Ammunition	Nominal Bullet Mass	Suggested Barrel Length	Required Bullet Velocity	Required Fair Hits Per Armor Part	Permitted Penetrations	Maximum Depth of Deformation
I	22 LRHV Lead	2.6 grams 40 grains	15 to 16.5 cm 6 to 6.5 in	320 ± 12 m/s 1050 ± 40 ft/s	5[a]	0	44 mm 1.73 in
	38 Special RN Lead	10.2 grams 158 grains	15 to 16.5 cm 6 to 6.5 in	259 ± 15 m/s 850 ± 50 ft/s	5[a]	0	44 mm 1.73 in
II-A	357 Magnum JSP	10.2 grams 158 grains	10 to 12 cm 4 to 4.75 in	381 ± 15 m/s 1250 ± 50 ft/s	5[a]	0	44 mm 1.73 in
	9 mm FMJ	8.0 grams 124 grains	10 to 12 cm 4 to 4.75 in	332 ± 15 m/s 1090 ± 50 ft/s	5[a]	0	44 mm 1.73 in
II	357 Magnum JSP	10.2 grams 158 grains	15 to 16.5 cm 6 to 6.5 in	425 ± 15 m/s 1395 ± 50 ft/s	5[a]	0	44 mm 1.73 in
	9 mm FMJ	8.0 grams 124 grains	10 to 12 cm 4 to 4.75 in	358 ± 15 m/s 1175 ± 50 ft/s	5[a]	0	44 mm 1.73 in
III	7.62 mm (308 Winchester) FMJ	9.7 grams 150 grains	56 cm 22 in	873 ± 46 m/s 2863 ± 151 ft/s	5[a]	0	44 mm 1.73
IV	30-06 AP	10.8 grams 166 grains	56 cm 22 in	838 ± 15 m/s 2750 ± 50 ft/s	1	0	44 mm 1.73 in

[a] Armor parts covering the torso front and torso back, with or without side coverage, shall each be impacted with the indicated number of fair hits. Armor parts covering the groin and coccyx shall each be impacted with 3 fair hits. The deformations due to the first two fair hits shall be measured to determine compliance.

Abbreviations: AP—Armor Piercing
FMJ—Full Metal Jacketed
JSP—Jacketed Soft Point
LRHV—Long Rifle High Velocity
RN—Round Nose

At the option of the tester, a type I, II-A or II armor part which has successfully withstood 5 fair hits with one test ammunition may thereupon be tested with the second test ammunition. However, if failure occurs with the second test ammunition a retest shall be conducted. A second specimen of that armor part shall be tested with the second test ammunition and the results of that test shall govern.

5. TEST METHODS

5.1 Test Equipment

It should be noted that hand-loaded ammunition may be required to achieve some of the bullet velocities required in the following paragraphs.

5.1.1 Type I Test Weapons and Ammunition

5.1.1.1 22 LR

The test weapon may be a 22 caliber handgun or test barrel. The use of a handgun with a 15 to 16.5 cm (6 to 6.5 in) barrel is suggested. Test bullets shall be 22 Long Rifle High Velocity lead, with nominal masses of 2.6 grams (40 grains) and measured velocities of 320 ± 12 meters (1,050 ± 40 feet) per second.

5.1.1.2 38 Special

The test weapon may be a 38 Special handgun or test barrel. The use of a handgun with a 15 to 16.5 cm (6 to 6.5 in) barrel is suggested. Test bullets shall be 38 Special round-nose lead, with nominal masses of 10.2 grams (158 grains) and measured velocities of 259 ± 15 meters (850 ± 50 feet) per second.

5.1.2 Type II–A Test Weapons and Ammunition

5.1.2.1 Lower Velocity 357 Magnum

The test weapon may be a 357 Magnum handgun or test barrel. The use of a handgun with a 10 to 12 cm (4 to 4.75 in) barrel is suggested. Test bullets shall be 357 Magnum jacketed soft point, with nominal masses of 10.2 grams (158 grains) and measured velocities of 381 ± 15 meters (1250 ± 50 feet) per second.

5.1.2.2 Lower Velocity 9 mm

The test weapon may be a 9 mm handgun or test barrel. The use of a handgun with a 10 to 12 cm (4 to 4.75 in) barrel is suggested. Test bullets shall be 9 mm full metal jacketed, with nominal masses of 8.0 grams (124 grains) and measured velocities of 332 ± 15 meters (1090 ± 50 feet) per second.

5.1.3 Type II Test Weapons and Ammunition

5.1.3.1 Higher Velocity 357 Magnum

The test weapon may be a 357 Magnum handgun or test barrel. The use of a handgun with a 15 to 16.5 cm (6 to 6.5 in) barrel is suggested. Test bullets shall be 357 Magnum jacketed soft point, with nominal masses of 10.2 grams (158 grains) and measured velocities of 425 ± 15 meters (1395 ± 50 feet) per second.

5.1.3.2 Higher Velocity 9 mm

The test weapon may be a 9 mm handgun or test barrel. The use of a handgun with a 10 to 12 cm (4 to 4.75 in) barrel is suggested. Test bullets shall be 9 mm full metal jacketed, with nominal masses of 8.0 grams (124 grains) and measured velocities of 358 ± 15 meters (1175 ± 50 feet) per second.

5.1.4 Type III Test Weapon and Ammunition

The test weapon may be a rifle or a test barrel chambered for 7.62 mm (308 Winchester) ammunition. The use of a rifle with a barrel length of 56 cm (22 in) is suggested. Test bullets shall be 7.62 mm full metal jacketed (U.S. military designation M80), with nominal masses of 9.7 grams (150 grains) and measured velocities of 873 ± 46 meters ($2{,}863 \pm 151$ feet) per second.

5.1.5 Type IV Test Weapon and Ammunition

The test weapon may be a rifle or a test barrel chambered for caliber 30–06 ammunition. The use of a rifle with a barrel length of 56 cm (22 in) is suggested. Test bullets shall be caliber 30–06 armor piercing (U.S. military designation APM2), with nominal masses of 10.8 grams (166 grains) and measured velocities of 838 ± 15 meters ($2{,}750 \pm 50$ feet) per second.

5.1.6 Chronograph

The chronograph shall have a precision of one microsecond and an accuracy of two microseconds. Its triggering devices shall be of either the photoelectric or conductive screen type.

5.1.7 Armor Backing Material

The armor backing material shall be conditioned by being kept for at least three hours at a temperature between 15 and 30°C (59 and 86°F), and shall be worked thoroughly to eliminate any voids. Its consistency shall be such that a depression of 25 ± 3 mm (1 ± 0.1 in) in depth is obtained when a 1 kg (2.2 lb) cylindrical steel mass, 45 mm (1.75 in) in diameter and having a hemispherical striking end, is dropped from a height of 2 meters (6.5 feet) onto one of its square faces. Three drop tests shall be made, and the center of each impact site shall be at least 75 mm (3 in) from a previous impact site and from any edge. A guide tube or other means may be used as required to assure that the striking end of the cylindrical mass impacts the backing material squarely. The backing material may be maintained at any temperature in the above range that will give it the required consistency.

A backing material found to be suitable is Roma Plastilina No. 1 modeling clay, available from Sculpture House, 304 West 42nd Street, New York, NY 10036, and other artist supply centers.

5.1.8 Wet Armor Conditioning

One complete armor shall be conditioned by subjecting both sides of each armor part to a water spray under the following conditions:

The spray nozzles shall be of such size and so spaced that 10 ± 2 liters (2.5 ± 0.5 gallons) of water per hour falls uniformly distributed on each 0.1 m^2 (1 ft^2) of spray booth floor area, and so located that the droplets are falling from gravitational force only, when they strike the armor surface.

Each surface of each armor part shall be sprayed for 3 minutes. Ballistic testing shall begin immediately after the armor is removed from the spray. The maximum time the armor may be out of the spray shall not exceed 10 minutes. After 10 minutes of testing, the armor shall be returned to the spray environment for an additional 3 minute spray on each surface.

5.2 Test Procedure

Set up the test equipment as shown in figure 2. Firmly clamp the appropriate test weapon, with barrel horizontal, in such a manner that alignment of the weapon is not altered when it is discharged.

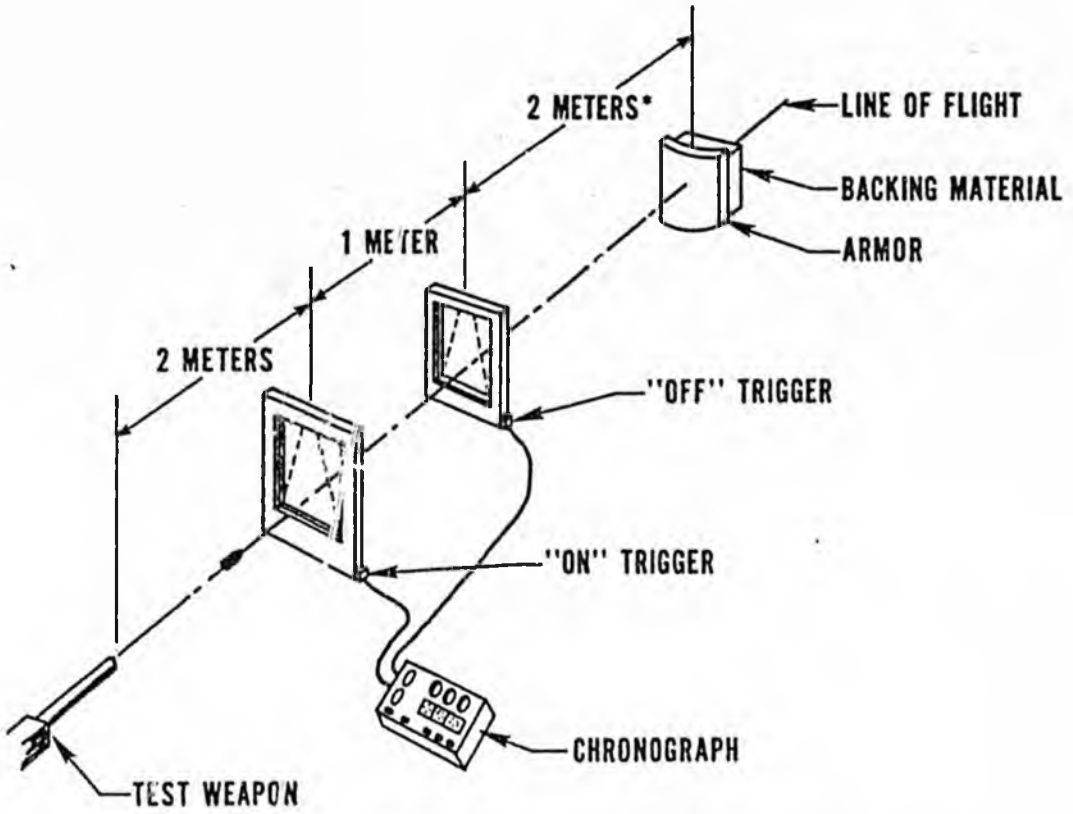

FIGURE 2. *Ballistic test setup.*

Allow all electronic equipment to warm up for 30 minutes or until stability is achieved, whichever time is greater. During testing, maintain the ambient temperature at 20–28°C (68–82°F) and the relative humidity at 30 to 70 percent.

Condition the armor test backing material and test it for consistency in accordance with paragraph 5.1.7. Reshape and smooth the backing material to its defined dimensions, and maintain it at the temperature required to maintain the required consistency.

Place the chronograph triggering screens two and three meters (6.6 and 9.8 feet), respectively, from the muzzle of the test weapon and arrange them so that they define planes perpendicular to the line of flight of the bullet. Measure the distance between the triggering planes with an accuracy of one millimeter (0.04 in).

Position a sheet of cardboard five meters (16 feet) from the muzzle of the test weapon if type I, II-A or II armor is being tested; position it 15 meters (50 feet) away if type III or IV armor is being tested. Fire a pre-test round through the cardboard to determine the line of flight and point of impact of the bullet; alternatively, use an aiming light or other suitable means.

Place one of the square faces of the armor backing material in intimate contact with the back face of the armor specimen under test and secure it with tape, the armor straps or

other means which will not interfere with the test. Place this assembly in back of the sheet of cardboard with the armor front face perpendicular to the line of flight of the bullet so that the desired point of impact touches the bullet hole made by the pre-test round, and then remove the cardboard.

Fire a test round at the armor. Record the time of flight of the bullet between the two triggering screens, as determined by the chronograph, and calculate the bullet velocity. Examine the armor and the backing material to determine whether penetration occurred when a bullet made a fair hit.

If no penetration occurred, measure and record the depth of the depression made in the armor backing material; do so for the first two (only) fair hits made with each test ammunition on each armor part.

If no failure occurred, reposition the armor so as to space additional impacts evenly over its surface or position another armor specimen (as required) and repeat the procedure with additional test rounds until the required number of fair hits (see table 2) has been obtained on each armor part. To minimize the concomitant bunching of ballistic material in soft armors, place each successive fair hit as far as possible from the center of each armor part. Reposition the backing material (as required) to avoid any overlap of depressions. If there are seams in the ballistic material, place the required number of fair hits so as to include impacts directly on those seams.

If no failure occurred, test the second complete armor, which had been preconditioned in accordance with paragraph 5.1.8.

BEFORE

THE

SUBCOMMITTEE ON CRIME
COMMITTEE ON THE JUDICIARY
HOUSE OF REPRESENTATIVES

CONCERNING

ARMOR-PIERCING BULLETS

ON

MAY 12, 1982

ARMOR-PIERCING AMMUNITION
ENHANCED PUNISHMENT LEGISLATION

This legislation would provide for enhanced punishment of individuals committing violent crimes, when, at the time of the crime, the individual used or carried a handgun loaded with armor-piercing ammunition.

This legislation is designed to provide some additional deterrent effect against the use of handgun ammunition capable of defeating police body armor.

The legislation closely parallels an approach to this problem endorsed the the U.S. Department of Justice and approved by the United States Senate. While federal legislation containing this provision of law was not enacted during the 97th Congress, it is believed that the approach presented represents the best available balancing of the rights of handgun owners and the need to protect law enforcement officers.

The bill would provide that enhanced punishment would be in addition to other terms of imprisonment and not run concurrently with any other terms of imprisonment. The enhanced punishment may not be suspended or reduced, nor are individuals sentenced under this proposed provision eligible for parole.

Recognizing the legitimate uses of some handguns and ammunition that can penetrate body-armor, this legislation does not prohibit the sale, possession, or legal use of those kinds of ammunition. The legislation should, however, provide a significant inducement for individuals not to commit violent crimes with such weapons.

The attached statement by Rudolph Giuliani, Associate Attorney General, U.S. Department of Justice, which was presented to Congress earlier this year, provides an excellent discussion of the history of the problem and possible responses.

In 1971, a Justice Department employee working with the Department's technology development program became aware of a new synthetic fiber, marketed under the trademark name "Kevlar." This new fiber was originally developed for use as a replacement for steel cords in automobile tires. Recognizing the potential of this fiber, the Department of Justice pioneered the development of a prototype vest made from Kevlar and, following extensive laboratory work, tested this vest in fifteen cities. Results exceeded expectations. In addition to offering exceptional ballistics resistance, the new vests were light, flexible and could be worn unobtrusively under normal street clothes and uniforms.

By 1975, dozens of manufacturers had entered the body armor market producing a wide range of soft, lightweight body armor. Because few state or local agencies had the resources to test such body armor, the Department of Justice, as part of its Law Enforcement Technology Assessment Program, developed a body armor standard published in December of 1978. This standard establishes procedures for testing body armor and creates five different armor categories: Type I, Type IIA, Type II, Type III and Type IV. These body armor categories protect against increasing threat levels. For example, the Type I armor is the lightest weight providing protection against designated handgun ammunition when fired from a distance of five meters under specified conditions; the Type IV armor is the heaviest providing protection against designated armor-piercing rifle ammunition. Types I, IIA and II armor are varieties of soft body armor; Types III and IV incorporate metallic or ceramic materials and are

Mr. Chairman and Members of the Subcommittee:

I appreciate this opportunity to appear today to describe the threat posed to law enforcement and other officials -- including the President -- by the availability of handgun ammunition capable of penetrating soft body armor. As this Subcommittee is probably aware, the Department of Justice developed the body armor used today by an estimated 50% of the nation's law enforcement officials and it is largely through the efforts of the Department and the International Association of Chiefs of Police that soft body armor is so widely used. This Subcommittee has previously received testimony to the effect that the use of soft body armor has saved the lives of an estimated 400 police officers during the past seven years. We are, therefore, deeply concerned over the availability of ammunition capable of defeating soft body armor and have devoted substantial efforts in recent months to developing an appropriate and workable legislative remedy to the problem.

Before proceeding to our specific legislative recommendation, let me take a few moments to put the issue in perspective. Toward this end, I would like to discuss briefly the development of modern body armor and our reaction to the recent threat to persons who rely upon body armor for protection.

Personal body armor available during the earlier part of the century was inappropriate for normal police work. Early garments were so heavy and awkward that police officers avoided wearing them. In addition to their bulk and weight, such garments inhibited movements necessary for self-defense. Heat buildup was another problem adding to wearer discomfort.

normally used by special weapons teams in sniper or seige situations. We have brought with us today examples of different types of armor and will discuss these varieties of armor in detail at the conclusion of my statement if the Subcommittee so desires.

Extensive testing was performed by the Department of Justice during the course of developing this armor standard. Moreover, other entities, particularly the Department of the Army, have carried out numerous tests to determine the penetration potential of various classes of firearms and ammunition as well as the capabilities of various categories of bullet-resistant body armor. The Department of Justice has also tested a wide range of handgun ammunition in connection with efforts to assist law enforcement agencies in selecting the most effective possible ammunition for police use.

In short, our technicians have known from the beginning that soft body armor, like all other forms of armor, can be pierced by particular types of rounds. As noted above, the standards used for testing different classes of body armor require that the armor be able to withstand specific types of bullets posing particular threat levels in order to receive a rating. It is for this reason that body armor is referred to by technicians as "bullet-resistant" or "ballistics-resistant" apparel. The fact that body armor is more commonly referred to by the public as "bullet-proof" has created the mistaken impression that body armor can or should be able to stop any bullet. Rather, soft body armor is designed to stop the most common threats that police officers face.

With this background, experts were not at all surprised by a network News program earlier this year on the KTW bullet and its ability to penetrate multiple thicknesses of soft body armor. Our technicians were, however, deeply disturbed that such information was so widely distributed to the public, in essence creating a shopping list for professional criminals.

The concern of the experts over the publicity surrounding the KTW bullet is two-fold. First, we fear that publicity surrounding the availability of ammunition capable of defecting body armor will encourage assassins and other criminals to search out these particularly dangerous classes of ammunition to use in their endeavors. Although our technicians have known about the KTW bullet for many years, this and other forms of armor-piercing ammunition were not felt to constitute a substantial threat because most criminals are not so sophisticated as to realize that the protection afforded by body armor is limited and that there are varieties of ammunition commonly available which will penetrate body armor. In the past, the conclusion that armor-piercing rounds posed only a minimum threat was difficult to fault as we are unaware of any instance in which an armor-clad police officer has been shot with armor-piercing handgun ammunition. Now, however, the publicity surrounding the KTW bullet has, in our view, increased the likelihood of such attacks.

Our second concern over the publicity is that it will, we believe, encourage a fatalistic attitude among police officers resulting in reduced use of body armor. In this regard, although the new soft body armor is comfortable to wear by comparison with

and we believe it is contrary to the public interest to publicize such dangerous ammunition.

Penetration capacity is, of course, a matter of basic physics. There are two major factors which determine penetration capability. First is the surface area over which the force is distributed; a bullet which expands upon impact spreads its force over a larger area than one which retains its shape. Therefore, a projectile composed of a hard substance normally has greater penetration potential than a soft projectile which mushrooms upon impact. The second major factor in penetration is velocity; the higher the velocity of a bullet, the greater its penetration capability. Thus high-power rifles, because of the incredible velocities they produce, have greater penetration power than handguns. Soft body armor is designed primarily to protect against handgun bullets. This reflects the fact that handguns are the weapons of choice of criminals representing -- according to one survey -- 83% of firearms seized by police. Moreover, handguns represent a greater threat to law enforcement officials than long guns because they are easily concealable. We have, therefore, focused our attention on armor-piercing <u>handgun</u> ammunition.

One of the first actions taken by the Department of Justice in response to the publicity surrounding the KTW bullet was to arrange for a demonstration to verify that the information furnished by our technicians was indeed correct. In February, a variety of handgun bullets were tested against a Type II vest at the FBI firing range in Quantico, Virginia. That demonstration corroborated the

earlier types of armor, it is a constant problem for police administrators to insure that body armor issued to officers is indeed worn. Too often, officers to whom body armor was issued have been killed or severely wounded because the armor was left in a dressing room locker or the trunk of a squad car. Continuing publicity about the availability of armor-piercing handgun ammunition, together with the complete absence of any effective statutory safeguards, will, we fear, cause some police officers to decide that it is useless to wear their armor when ammunition is available on the streets that will defeat the armor. This potential indirect effect of armor-piercing handgun ammunition could result in more deaths and crippling injuries than the actual use of armor-piercing bullets against officers wearing body armor. In short, we believe it is important to let the law enforcement officers of the nation know that measures are being taken to prevent the criminal use of armor-piercing ammunition. Legislation in this area would, we believe, have the effect of encouraging law enforcement officers to wear body armor issued to them.

Again, because we feel that publicity surrounding armor-piercing ammunition has the effect of increasing the risk to those who use body armor, I will carefully avoid any discussion of specific handgun rounds capable of pentrating armor. I appreciate the cooperation of the Subcommittee in agreeing not to disclose the identity of particular armor-piercing ammunition. Suffice it to say that there are a number of handgun bullets capable of penetrating body armor in addition to the KTW which has received so much publicity

information furnished by technicians -- a number of the bullets tested, in addition to the KTW, defeated the body armor. The armor used in that demonstration has been submitted to the Subcommittee for inspection and we will, of course, be pleased to furnish additional information regarding the February demonstration so long as we can do so without publicly disclosing the varieties of bullets which defeated the armor.

Based upon this and other information, we commenced development of a legislative response to the problem of armor-piercing bullets. Because an early discussion draft of a proposed armor-piercing bullet bill was somehow disclosed to the media and published in a firearms publication, it is no secret that our initial proposals in this area were very similar to H.R. 5437 introduced by Representative Biaggi. As the Treasury Department indicated in its testimony before this Subcommittee earlier this year, however, our continuing study of this issue revealed that there are serious flaws in the broad ban on armor-piercing handgun ammunition proposed in early Department legislative proposals and in H.R. 5437.

First, to date we have been unable to describe armor-piercing handgun ammunition in a way which reaches all rounds capable of defeating soft body armor without including a number of popular handgun bullets which have long been widely used for legitimate sporting and recreational purposes. The simple fact is that some bullets with a legitimate use will defeat soft body armor. Moreover, in certain handgun calibers, the effect of a ban on armor-piercing bullets would effectively deprive firearms owners of the use of

their weapons by rendering illegal all presently available commercially manufactured ammunition.

Given the fact that we are aware of no instance in which an armor-clad law enforcement official has been attacked with armor-piercing handgun ammunition, we cannot justify legislation banning all ammunition capable of penetrating the type of soft body armor worn by law enforcement officials. Put simply, we cannot recommend legislation so seriously disrupting the firearms and ammunition industry and so clearly impinging upon the interests of legitimate gun owners where the basis is solely a potential rather than a demonstrated threat. Furthermore, I should note that the Department of the Treasury has negotiated agreements with several ammunition manufacturers which will reduce the potential that handgun bullets designed for penetration will be available to anyone other than law enforcement and military agencies. Treasury reports that ammunition manufacturers are sensitive to the problem and have responded in a responsible manner to our requests for limitations on armor-piercing bullets.

A second serious problem with H.R. 5437 is that it would produce unjust results. This difficulty arises from the fact that ammunition performs differently depending upon the type of firearm from which it is fired. A particular round fired from a revolver with a four-inch barrel, for example, might not penetrate body armor whereas the same ammunition, if fired from a revolver with a six-inch barrel might defeat the same armor. This is because increased barrel length affects projectile velocity thus enhancing penetration power. We believe, therefore, that it would be impossible to justify,

for example, imposition of a minimum mandatory prison sentence under H.R. 5437 when it could be demonstrated that the ammunition, although classified as "armor-piercing" under the definition in the bill, would in fact not penetrate soft body armor when fired from the handgun possessed by the defendant at the time of the underlying criminal offense.

In addition to these difficulties, there are others which have been discussed by the Department of Treasury which I will not dwell on today including the cost of testing all commercially available ammunition, the problem posed by ammunition which can be fired interchangeably from either handguns or long guns and so forth. Suffice it to say that we do not believe the ban proposals presently before the Subcommittee are appropriate.

Nevertheless, we see no legitimate reason for private use or possession of handgun bullets, such as the KTW, that are designed specifically for the purpose of armor penetration. Therefore, we will continue to work with the Department of the Treasury and with the Subcommittee to develop a workable definition of such bullets. Our clear objective is to prevent criminals from having access to handgun bullets designed specifically to penetrate armor. In the meantime, however, we believe that immediate action in this area is needed and have submitted to the Subcommittee a draft bill designed to fill the existing gap in federal law. We believe this stopgap proposal would provide a meaningful disincentive to use of armor-piercing bullets during the course of federal crimes. Our proposal would establish a minimum, mandatory prison sentence of five years for the use of armor-piercing handgun ammunition during

the course of a federal crime of violence. By contrast with other similar proposals, our bill would provide for imposition of this minimum mandatory sentence only where it can be proved that the ammunition would penetrate Type IIA body armor -- the most popular armor for law enforcement use -- when fired from the firearm in the possession of the defendant. This approach avoids the anomaly described above where a person could be subjected to enhanced sentencing even though a bullet classified as "armor-piercing" would not, in fact, penetrate body armor if fired from his weapon.

Our proposal covers only federal crimes committed with armor-piercing handgun ammunition as we believe that the state interest in prosecuting perpetrators of state offenses outweighs the federal interest. If our bill is enacted by the Congress, we will notify the 50 states and urge enactment of similar state laws to protect state and local law enforcement officials.

We believe that this legislation would provide a significant deterrent to the use of armor-piercing handgun ammunition and that, where such ammunition is used during the course of a federal crime, would insure that the offender is imprisoned for a lengthy period thereby incapacitating that individual from the further commission of such offenses. In this regard, our proposal makes clear that the minimum mandatory sentence is to be served consecutively with the sentence imposed for the underlying crime of violence, that the sentence is not subject to probation or suspension, and that a person so sentenced is not eligible for parole.

Finally, we recommend against the enactment of the various proposals before the Subcommittee to authorize detailed testing of

handgun ammunition and body armor. Although we do not have solid test data on every one of the hundreds of different types of handgun ammunition manufactured here and abroad in recent years, we do have extensive information on bullet characteristics and armor capabilities and do not feel that further elaborate testing such as that proposed in H.R. 2280 is necessary. Rather, we believe we have sufficient information upon which to base legislation along the lines of our proposal.

Mr. Chairman, we believe that handgun ammunition designed to penetrate armor must be kept out of the hands of criminals and we look forward to working with your Subcommittee toward that end. We also believe that the legislation we have proposed today -- although modest by comparison with some other bills -- would fill a gap in existing law by recognizing that certain types of handgun ammunition are particularly dangerous and that the commission of a crime involving such ammunition should result in harsher penalties than would otherwise be applicable. In essence, our proposal recognizes varying ammunition threat levels in determining sentencing just as do existing laws which provide for enhanced sentencing for use of a firearm during the course of a felony. This legislation would provide new and needed protection for law enforcement officials and others who use soft body armor. We will appreciate your attention to this proposal. Of course, we will be pleased to work closely with you and your staff in refining this proposal should you feel that further adjustments are needed.

The Honorable Joe L. Hayes
625 W. 5th Ave., Suite 1
Anchorage, AK 99501

Dear Mr. Hayes:

Thank you for your inquiry into the KTW projectile. This matter has received a great deal of national attention.

These cartridges are available in Alaska. Due to national publicity on their ability to penetrate soft body armour, we in the law enforcement profession are concerned.

It is not practical to wear a vest which would stop these projectiles. We, therefore, would support any legislation prohibiting the sale and possession of KTW bullets.

Again, thank you for your interest.

Sincerely,

T R Anderson

INTRODUCTION AND SUMMARY

INTRODUCTION

Since about 1975, law enforcement officers have been using protective body armor of the "soft" or "lightweight" variety to an increasing extent. This type of body armor, unlike the heavy flak jackets worn by the military and by special police units on dangerous tactical assignments, is designed to be lightweight and soft enough to be worn comfortably under law enforcement officers' uniforms or under plain clothes officers' outer garments.

This type of soft or lightweight body armor has been developed to the extent that it quite effectively "defeats" (stops the penetration of) many types of handgun bullets and some rifle bullets. It is the purpose of this report to analyze the characteristics of bullets which are most likely to defeat soft, lightweight body armor. The following section discusses various types of bullets and the purposes for which bullets are designed. The third section discusses recent law enforcement officer fatalities and the related use of soft body armor. The fourth section discusses recent developments in, and characteristics of, soft body armor. The last section presents a brief analysis of bullet characteristics, particularly those that can defeat currently available soft body armor.

SUMMARY

Existing, commercially available soft, lightweight body armor apparently can effectively stop most of the handgun bullets which pose a threat to law enforcement officers today. However, there is a class of handgun [illegible] that can penetrate

such armor. These types of bullets are: generally constructed of steel-jacketed lead or hard metal alloys; often pointed in shape rather than being flat, rounded, or hollow-pointed; and generally high velocity. Smaller handgun and rifle bullets (for example, .22 caliber) with the above characteristics are generally more effective in penetrating soft body armor than larger bullets (for example, .45 caliber) with the same characteristics.

BULLETS

TYPES

There are many ways to classify the various types of bullets that have been or are in use. 1/ For purposes of this analysis, bullets will be discussed according to the following characteristics:

- For use mainly in handguns, rifles, or machine guns, or in more than one type of weapon;
- Velocity (low, for example, 730 feet per second, to high, for example, 1800 feet per second);
- Caliber (small, for example, .22 caliber, to large, for example, .45 caliber);
- "Hardness" (soft nosed lead bullet, or partially jacketed, to full metal jacketed (with copper or steel) to hard metal alloy bullet); and
- Shape (round or hollow point to pointed nose).

Sometimes bullets are classified according to either their "stopping power"—their ability to knock down or disable a human being—or their "armor- or metal-piercing" ability. These two types of characteristics, however, may be somewhat mutually exclusive. For example, one bullet designed for high "stopping power" is the .357 caliber magnum hollow point bullet. Upon impact, this bullet expands (because of its hollow point) and converts a large percentage of its (high) velocity to kinetic energy within the wounded body—thus knocking down, stopping, or disabling the person.

1/ There may be as many as 10,000 different bullets that have been manufactured since the development of the bullet cartridge around the time of the U.S. Civil War.

This type of bullet, however, may be effectively stopped by soft body armor without body penetration and hence without wounding, except for "blunt trauma". 1/ On the other hand, an armor-piercing bullet which will penetrate soft body armor may, because it is hard and retains its shape, pass through a body with relatively little damage if it does not hit a bone, other hard substance, or vital organ. Obviously, bullet wounding capabilities are not completely predictable because of the exceedingly complex structure of the human body, and even the relatively less devastating bullets can and often do kill. In fact, more law enforcement officers were killed with .38 caliber weapons in 1976 through 1980 2/ than with any other weapon, mainly because these weapons are in more common use than other, more devastating bullets like the various magnum and armor-piercing bullets.

PURPOSES

It can be seen from the above discussion that many, if not most, bullet characteristics derive from the purpose or purposes which the ammunition designers had in mind. Thus, expanding bullets, particularly hollow point bullets, were designed for the purpose of more effectively transmitting kinetic energy to the wounded body than do ordinary bullets.

1/ Blunt trauma is injury caused by bullets which do not penetrate armor. It is injury caused by the force of the blow itself, as when a person is hit in the chest by a hard swung baseball bat.

2/ Federal Bureau of Investigation. Law Enforcement Officers Killed 19,6. Washington, U.S. Department of Justice, 1976. p. 24.
Also for 1977, p. 13; 1978, p. 13; 1979, p. 13; and 1980, p. 12.

Protective body armor, including the soft or lightweight variety, has been and is being designed to defeat many types of bullets, including many of the relatively more devastating (high velocity, hollow point) bullets. However, certain types of high velocity bullets made entirely of hard metal alloys, or which are fully covered with steel jackets, can defeat the currently available soft body armor. Thus, certain bullets of the armor- or metal-piercing variety, whether or not designated as such by bullet manufacturers, pose a threat to existing body armor which can effectively defeat most "ordinary" bullet threats.

LAW ENFORCEMENT OFFICER FATALITIES

CURRENT STATISTICS

A number of law enforcement officers are killed and wounded each year by handguns, rifles, shotguns, and other weapons. Recent statistics from the Federal Bureau of Investigation (FBI) indicate that this number, while still large, has decreased rather significantly from 1974 and 1975 to 1976. The following table shows statistics for law enforcement officers killed by firearms and other weapons for this period:

Law Enforcement Officers Killed, by Type of Weapon

WEAPON USED	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980	TOTAL

Source: Federal Bureau of Investigation. Law Enforcement Officers Killed 1980. - Washington, U.S. Department of Justice, 1980. p. 11.

There reportedly is a consensus that at least 400 U.S. law enforcement officers have been protected from death or injury through the use of bulletproof vests from 1975 to the present. 1/ Although such a consensus cannot be confirmed with existing data, it is interesting that the approximately 20 percent decrease in firearm-related deaths indicated in the above table since 1974 could be accounted for partially by increased use of soft body armor by law enforcement officers.

The following table shows the size of bullets and types of firearms which caused the deaths of the 95 law enforcement officers in 1980. The handgun bullets shown in that table are all of a class which can be defeated by existing soft body armor unless they are of the hard metal alloy or steel-jacketed, armor-piercing variety. Soft body armor cannot defeat high velocity, metal jacketed rifle bullets either, some of which may be represented in the "rifle" column of the table.

OFFICER FATALITIES WHILE WEARING ARMOR

In 1980, the first year such data were collected uniformly by the FBI, 14 law enforcement officers in the United States were killed in the line of duty while wearing protective vests. 2/ Seven of the officers were shot

in the head and five received fatal gunshot wounds to areas of the upper torso not protected by the vests. One officer was struck by a vehicle. The remaining officer was shot in the back with a bullet that penetrated his vest, but this was a .30-06 caliber rifle bullet fired from about 50 yards away. Soft body armor is not designed to prevent the penetration of most rifle bullets, such as .30-06 caliber bullets. 1/

BODY ARMOR

RECENT DEVELOPMENTS

Since at least the early 1970s, there has been considerable interest among law enforcement support agencies in developing effective soft body armor that would be comfortable and unobtrusive enough to be worn continuously by law enforcement officers while on duty. Organizations like the National Institute of Law Enforcement and Criminal Justice (NILECJ) of the Law Enforcement Assistance Administration (LEAA) of the U.S. Department of Justice, and the International Association of Chiefs of Police, have sponsored several studies of soft body armor. 1/ Research programs on soft body armor and weapons threats have been administered and carried out by the Law Enforcement Standards Laboratory of the National Bureau of Standards, Department of Commerce; Edgewood Arsenal, Aberdeen Proving Grounds, Department of the Army; the FBI Quantico Test Base; and several private weapons testing laboratories. About 25 to 30 manufacturers of soft body armor are now producing units commercially for sale to an increasing number of U.S. law enforcement organizations.

1/ For example, Montanarelli, Nicholas, Clarence E. Hawkins, and Lester D. Snubin. Body Armor: Lightweight Body Armor for Law Enforcement Officers. Washington, U.S. Department of Justice, LEAA, NILECJ, May 1976. p. 113; Goldfarb, Michael A. et al. Body Armor: Medical Assessment. Washington, U.S. Department of Justice, LEAA NILECJ, May 1976. p. 30; National Institute of Law Enforcement and Criminal Justice. NILECJ Standard for the Ballistic Resistance of Policy Body Armor. Washington, U.S. Department of Justice, LEAA, NILECJ, December 1978. p. 10; and International Association of Chiefs of Police. Policy Armor Testing and Summary of Performance Testing Data. Gaithersburg, Maryland, International Association of Chiefs of Police, December 1978. p. 23.

COMMERCIALLY AVAILABLE SOFT BODY ARMOR

Most, if not all, soft body armor commercially available today is made of differing numbers of layers of Kevlar, a synthetic (aramid) fiber produced by the Du Pont Company. In addition to the number of layers of Kevlar used, the weaving and other processes used in the production of the final protective vest affects the strength of the product.

In the early 1970s, protective body armor generally was classified as to whether it was made of 7, 12, 16, 24, or other numbers of layers of Kevlar. Currently, manufacturers and police departments often designate certain threats (types of bullets) that the vests are to protect against, regardless of the numbers of layers of Kevlar involved.

In 1982 it is estimated that approximately half (about 250,000) of the Nation's law enforcement officers own or have access to soft body armor. 1/

1/ Conversations with a Department of Justice official and a representative of the International Association of Chiefs of Police on March 24, 1982.

The state of the art of protective body armor, which today is largely based upon the use of Kevlar, involves a trade off between the thickness of the protective vest versus the types of bullets which the vest can defeat. Certain commercially available bullets, like .357 caliber magnum hard metal alloy bullets, and some foreign-made nine millimeter steel jacketed bullets, can defeat commercially available soft body armor.

PROTECTION AVAILABLE

A side-by-side comparison of the handgun weapons used to fatally injure law enforcement officers in 1980 (shown above and repeated for convenience here) and handgun bullets required to be defeated by soft body armor in the equipment purchase specifications of a number of U.S. cities indicates that currently available soft body armor apparently can protect against the large majority of bullet threats facing law enforcement officers today.

Handgun Weapons Used to Fatally Injure Law Enforcement Officers in 1978	Deaths in 1980 From Weapons in Column One	Handgun Bullets Required to be Defeated by Representative Police Department Soft Body Armor Specifications 1/

1/ From 1979 soft body armor specifications of Milwaukie, Oregon (M); Nashville, Tenn. (N); and San Diego, Calif. (S). The San Diego specification has apparently been adopted by about 40 other U.S. cities.

While most commonly used bullets apparently can be defeated by existing soft body armor, there is a class of bullets which can defeat it. This subject is discussed in the following paragraphs.

POSSIBLE REMAINING THREATS

Bullet Characteristics

Although a number of bullets can be defeated by currently available soft body armor, a number of threats remain. Most, if not all, types of metal- or armor-piercing bullets will apparently defeat existing soft body armor, whether these bullets are hard, metal alloy bullets, or lead bullets which are steel jacketed. Other types of non-armor- or metal-piercing bullets which might defeat soft body armor are bullets which are small caliber (for example, .22 caliber) or high velocity (particularly magnum) bullets. Bullets which combine these latter two characteristics (small caliber plus high velocity) are more likely to defeat some types of soft body armor (depending upon its thickness and construction) even if these bullets are not of hard metal alloy or steel jacketed construction. Thus, there currently exist several specific bullets, and a class of bullets having certain characteristics, that can, or could be designed to, defeat currently available soft body armor.

Blunt Trauma

Even if bullets do not penetrate soft body armor, lethal wounds could be caused by "blunt trauma." This type of wounding effect can be described as being similar to being hit on the body by a hard swung baseball bat. Because this phenomenon currently does not appear to be a

major wounding cause, it is not discussed further here. However, it is conceivable that, were higher powered bullets used or developed to defeat soft body armor, blunt trauma effects might be a major cause of concern to body armor researchers, developers, and manufacturers, as well as medical practitioners.

BODY-ARMOR DEFEATING BULLETS: THREAT CHARACTERISTICS

This section describes some bullet characteristics that are important to a consideration of what types of bullets can defeat, or can be designed to defeat, existing soft body armor.

VELOCITY

Handgun bullets typically range in muzzle velocities from about 730 feet per second (fps) (low velocity) to over 1,800 fps (high velocity), depending upon the powder charge of the cartridge and the length of the handgun barrel. Eleven hundred fps (roughly the speed of sound in air) may be a convenient point to differentiate between low and high velocity bullets, although it is unlikely that a consensus could be obtained that significantly different wounding effects occur above and below this velocity for a given type of bullet.

It is clear, however, that high velocity bullets are more likely to defeat soft body armor than low velocity bullets, all other characteristics remaining constant.

CALIBER AND WEIGHT

Caliber measures the diameter of bullets, that is, a .45 caliber bullet has a diameter of .45 inch. Caliber is thus a measure of size. A .45 caliber bullet is considerably larger than a .22 caliber bullet. The most common police bullet, and the most common bullet causing police fatalities, is the .38 caliber, intermediate in size between the .22 caliber and the .45 caliber.

Weights of bullets are measured in grains. The larger the caliber, the more a bullet weighs, given a constant shape.

The smaller caliber bullets, for example, the .22 caliber, are more likely to penetrate the commercially available body armor than larger caliber bullets, other bullet characteristics remaining constant.

SHAPE AND HARDNESS

Bullets are produced in several shapes--including round or ball nosed, flat-nosed, pointed, and hollow pointed. Round, flat-nosed (some of which are called wadcutters or semi-wadcutters) and hollow point bullets are often constructed as lead or semi-jacketed bullets which expand upon contact. The hollow point bullets are generally the most effective of these "expanding" bullets. Pointed bullets generally are constructed of lead with metal jackets, which are usually of copper. If such bullets are jacketed with steel, they generally have armor- or metal-piercing capabilities. Another class of bullets is constructed of hard metal alloys and are also armor- or metal-piercing bullets.

Thus, the harder and more pointed a bullet is, the more likely it is to penetrate commercially available body armor, other bullet characteristics remaining constant.

SUMMARY OF BULLET THREAT CHARACTERISTICS

Given the characteristics of the most successful, currently available soft body armor, bullet threat characteristics can be summarized in the following way:

Bullet Characteristics	Lowest Level of Threat	Highest Level of Threat
Velocity	Low velocity	High velocity
Caliber, weight	Large caliber, heavy	Small caliber, light
Shape	Round or flat nose, hollow point	Pointed
"Hardness"	Lead, or copper semi-jacketed lead	Full steel jacketed lead, or hard metal alloy bullet

Thus, the bullet type with the highest probability of penetrating soft body armor, and with a proven capability of penetrating many layers of existing soft body armor, is a high velocity, small caliber, pointed, steel jacketed lead or metal alloy bullet. Such bullets may be handgun bullets, rifle bullets, or bullets which can be used in either handguns or rifles.

POSSIBLE RAMIFICATIONS OF "PERFECT" BODY ARMOR

Commercially available soft body armor is not perfect, that is, it can be defeated by certain bullets of the hard metal alloy or steel-jacketed armor- or metal-piercing types. Assuming that "perfect" body armor could be developed to meet current threat conditions, there is at least one positive and one negative ramification of such a development:

Possible Positive Ramification

Decreased wounding and death of law enforcement officers under current conditions, that is, continued use by criminals of existing types of bullets which, to a considerable extent, can be defeated by existing soft, light-weight body armor.

Possible Negative Ramification

An "arms and ammunition race" by the criminal segment of society for even more powerful bullets and other weapons to defeat existing armor, and increased use by criminals of such armor. This possible negative ramification could be precluded to some extent by controlling, by law and enforcement, the manufacture, distribution, sale, possession, and international trade of all bullets of the armor- or metal-piercing type and, perhaps body armor.

Mr. Francis C. Allan
President
The Alaska Cartridge Club
S.R.A. Box 4247
Anchorage, Ak. 99502

Dear Mr. Allan,

Thank you for your letter regarding the draft legislation concerning armor-piercing ammunition. I read the language of the legislation you sent, and I agree it is far too loosely worded to accomplish what the authors hope to.

As a result, I plan to oppose and will work to defeat any such legislation. The language is not the only reason I will oppose it. Now that armor-piercing ammunition has been developed, no act of Congress is going to prevent a person with criminal intentions from acquiring and using it. It is the same principle that applies to gun control. No matter what laws are passed, a criminally minded person will acquire a gun and ammunition. Therefore, only the legitimate and honest gun users will be hurt. Like you, I want to assist law enforcement officers, but it appears to me someone is going to have to invent another vest to stop these bullets.

Thank you for bringing this to my attention, and please inform your organization that I will oppose this legislation.

Best wishes,

Sincerely,

Don Young

T H E
ALASKA CARTRIDGE CLUB

S.R.A. Box 4247, Anchorage. Alaska 99502

A Division of
THE ALASKA GUN COLLECTORS ASSOCIATION, INC.

Senator Ted Stevens
U S Senate
Washington, D.C. 20510

21 June 1982

Dear Senator Stevens,

Attached to this letter is a copy of draft legislation, S929 (Title 18 USC), which deals with the restriction of manufacture, importation and even possession of armor-piercing handgun ammunition which the Alaska Cartridge Club vehemently opposes. The subject was brought up by a television segment of the NBC-TV Magazine program which dealt with the ability of the "KTW" brand of ammunition to penetrate bullet-proof clothing. While the laudable intent of the proposed legislation is to protect law enforcement officers who wear such clothing on duty, it is so badly worded that it creates problems rather than solves them.

The language in the bill is all-inclusive and would certainly be detrimental to the hobby that is enjoyed by our organization. The term "armor-piercing" is not even properly defined. It is stated that ammunition will be classified after testing only. No guidelines of any value are given to the testing agency. It might be determined that any fully-jacketed bullet would be considered armor-piercing. Additionally, "body armor" is also not defined. Certainly, there are different grades of this material, some of which can be penetrated by normal "off-the-shelf" handgun ammunition at close range.

A section of the bill that we fully support is paragraph (b), which deals with the use of this type of ammunition by a criminal and the additional felony charge that would be brought as a result of its use. Regrettably, this is the only section that appears to be beneficial. The other sections will not help law enforcement officers to any measurable degree. Several brands of armor-piercing ammunition have been available for so many years that it would be nearly impossible to end their circulation. The "KTW" brand has been available for fifteen years, long before the protective clothing was in general use.

To illustrate the potential for abuse of this poorly-worded legislation, take my own situation as an example. I collect two types of ammunition, one of which is 9mm Luger (Parabellum) pistol ammunition. In my collection of more than four hundred examples, I have <u>one</u> round of KTW armor-piercing ammunition. Under this legislation, if I were to be caught with this one round in my possession, I could be fined $250,000 even though I do not own a 9mm handgun in which it could be fired!

I have also enclosed with this letter an article that I wrote on KTW ammunition for our newsletter. It appeared in our May 1981 issue--long before the current flap over armor-piercing ammunition. It provides an indication of the interest on the part of the serious collector in these cartridges, irrespective of their high penetrability.

I request that you or your staff look into the wording of this legislation, and, if it cannot be clarified or altered to make provision for legitimate collectors, that the proposed legislation be defeated. If we felt that the legislation would provide a degree of safety for peace officers, we would be willing to accept the negative impact on our hobby. However, this legislation simply does not provide the protection desired. Its only accomplishment is to restrict the activities of lawful citizens.

Our organization will be looking forward to hearing from you concerning this legislation and your intentions toward it. Thank you for your attention to this matter.

Sincerely,

Frank Allan

July 12, 1982

Mr. Francis C. Allan, Pres.
Alaska Cartridge Club
SRA Box 4247
Anchorge, Alaska 99502

Dear Mr. Allan:

This is in response to your letter expressing your opposition to legislation to restrict the distribution and use of armor-piercing handgun ammunition.

Two bills are pending in the Senate Judiciary Committee which deal with this issue. They are S. 2017, introduced by Senator Hawkins, and S. 2128 introduced by Senator Moynihan. S. 2017 would require the Secretary of the Treasury to conduct a study of handgun bullets to determine which have the capacity to penetrate bulletproof vests. S. 2128 would limit the vailability and use of handgun bullets that are capable of penetrating certain body armor.

I have noted your comments about the lack of a proper definition of "armor-piercing." You may be assured that I will have your concerns in mind as I review these two bills. At the same time, I think it is important to review S. 2017 and S. 2128 to see if they are necessary in order to ensure the safety of our law enforcement officials.

Thank you for bringing your concerns to my attention. If you have further comments I would appreciate hearing from you.

Sincerely,

Frank H. Murkowski
United States Senator

AMENDMENT NO. --- Calendar No. ---

Purpose: To establish minimum mandatory sentences for the use of armor-piercing handgun ammunition during the course of a violent crime.

IN THE SENATE OF THE UNITED STATES--97th Cong., 2d Sess.

S. 2572

To strengthen law enforcement in the areas of violent crime and drug trafficking, and for other purposes.

Referred to the Committee on _____ and ordered to be printed

Ordered to lie on the table and to be printed

At the end of the bill add the following:

Part P

Sec. 924. (a) Chapter 44 of title 18, United States Code, is amended by adding at the end thereof the following:

''§ 929. Use of restricted ammunition

''(a) Whoever, during and in relation to the commission of a crime of violence for which he may be prosecuted in a court of the United States, including a felony which provides for an enhanced punishment if committed by the use of a dangerous weapon or device, uses or carries any handgun loaded with armor-piercing ammunition as defined in subsection (b), shall, in addition to the punishment provided for the commission of such felony, be sentenced to a term of imprisonment for not less than five years. Notwithstanding any other provision of law, the court shall not suspend the sentence of any person convicted of a violation of this subsection, nor place him on probation, nor shall the term of imprisonment run concurrently with any other term of imprisonment including that imposed for the felony in which the armor-piercing handgun ammunition was used or carried. No person sentenced under this subsection shall be eligible for

parole.

''(b) For purposes of this section--

''(1) 'handgun' means any firearm, including a pistol or revolver, originally designed to be fired by the use of a single hand;

''(2) 'armor-piercing ammunition' means ammunition which, when or if fired from any handgun used or carried in violaiton of subsection (a), under the test procedure of the National Institute of Law Enforcement and Crimial Justice Standard for the Ballistics Resistance of Police Body Armor promulgated December, 1978, is determined to be capable of penetrating bullet-resistant apparal or body armor meeting the requirements of Type IIA of Standard NILECJ-STD-0101.01 as formulated by the United States Department of Justice and published in December of 1978; and

''(3) 'crime of violence' means--

''(i) an offense, other than a misdemeanor that consists solely of damage to property and that does not place another person in danger of death or serious bodily injury, that has as an element of the offense the use, attempted use, or threatened use of physical force against the person or property of another; or

''(ii) any other offense that is a felony and that, by its nature, involves a substantial risk that physical force against the person or property of another may be used in the course of committing the offense.''.

(b) The table of sections for chapter 44 of title 18, United States Code, is amended by adding at the end thereof the following:

''929. Use of restricted ammunition.''.

HB 2--Re: Penalties for useof Restricted Ammunition -- Hayes, Flood, Lindauer
in commission of a Crime

1. This adds to AS 12.55.125, dealing with sentences of imprisonment for felonies

   (If, in commission of a felony, convict uses handgun loaded with armor-piercing ammo, convict to be sentenced to no less than 5 years in addition to other sentence for commission of the felony itself....i.e. 5 years in addition for use of the described ammo in the handgun).

2. This is similar to bills introduced in U.S. Senate.

3. Reference to AS 12.55.080 and 12.55.085 refers to statutes that deal with probation and SUspended Imposition of Sentence, respectively.

   (j)(3) in this bill bars probation being granted or the handing down of a suspended imposition of sentence if such ammo is used in the handgun. Prescribed minimum term can't be reduced, and no convict would be eligible for parole.

IMPACT:

WITNESSES:

CHANGES:

COMMENTS: If enacted, this likely would be challenged in courts as too severe, in light of the convict being sentenced on the felony-in-chief and again having 5 years added for type of ammunition used.

Should such an act be struck down by courts, it might be construed as rewarding a convict for his efficiency in using this described kind of ammunition.

This bill requires that a person who uses or carries a handgun loaded with armor-piercing ammunition during the commission of a crime of violence be sentenced to five years imprisonment in addition to the seven, ten or fifteen year presumptive term he would receive for possessing a handgun during the commission of the crime. It is not expected to require the commitment of additional prosecution staff or resources. Proof of the type of ammunition a defendant carried in his gun should not unduly complicate or prolong the trial on the underlying offense.

Drunken driving: a reckoning looms

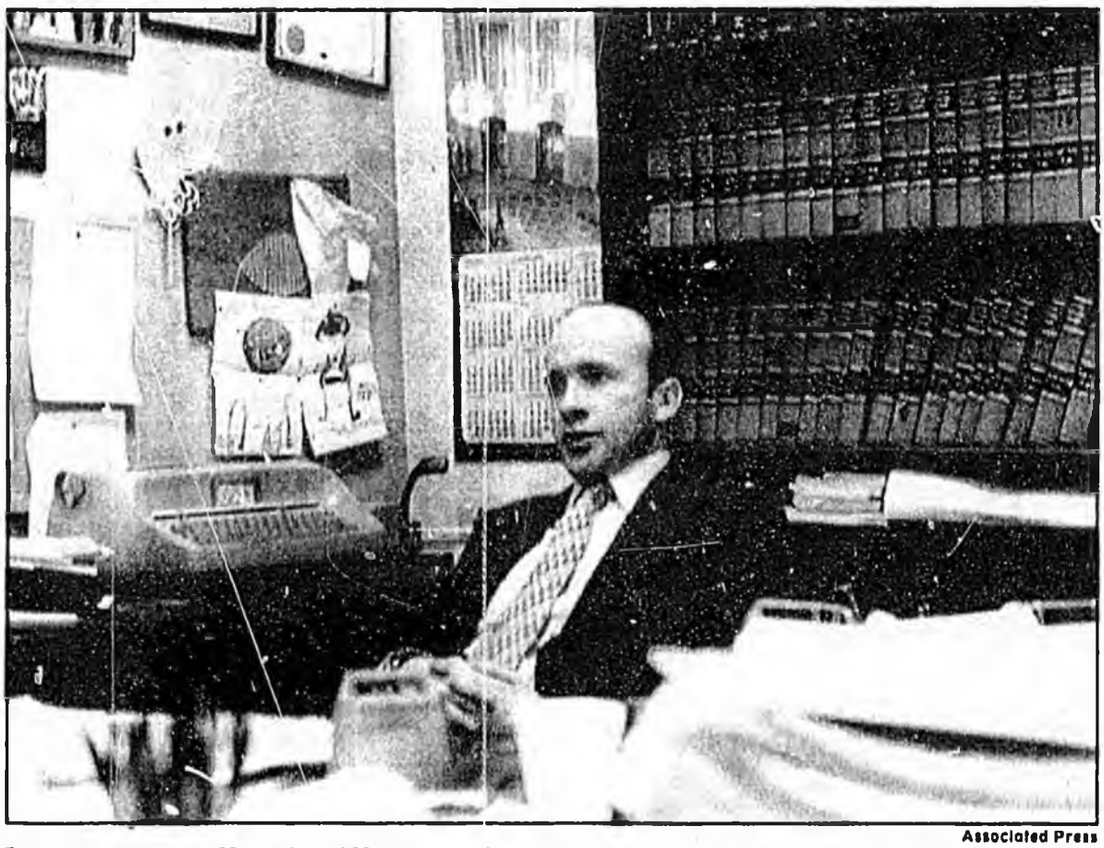
1/18/83

A community reckoning is building on the issue of drunken driving — and none too soon. The trick now is to channel Alaska's energies appropriately.

Last week District Court Judge Elaine Andrews issued an appeal from the bench concerning the lack of treatment programs for repeat drunken driving offenders. Later she ordered the first confiscation of an offender's vehicle under Anchorage's new drunken driving ordinance.

The very next day, a local businessman with a history of drunken driving offenses was involved in an accident that killed the other driver. And this week more facts — painful facts — began to emerge about the incident:

- the man faced a pending charge for driving while drunk and an arrest warrant for failing to appear;
- hospital tests after the accident showed that he had a blood alcohol count more than three times higher than the legal standard for drunken driving — a count that would render most individuals unconscious;
- the man's wife, aware of the warrant and believing him to be drunk behind the wheel, had phoned police that day to ask that he be picked up;
- even after being involved in a serious accident and receiving hospital treatment the man went free until his wife once more called police to ask why he had not been apprehended on the outstanding warrant; and
- for more than a year — during which the man was involved in a minor accident, told police he was "totally smashed" at the time, and received a 30-day suspended sentence and $200 fine — the man's wife had sought help for his drinking problem. "He's an alcoholic," she said Wednesday. "He needs the kind of help you can't get at home or from friends."



What is pertinent about this tragedy is the contradictions it reveals: the awful need for community action against drunken driving, yet the crying lack of appropriate treatment options; the public demand — and it is swelling — for effective protection, yet the official difficulties in making sanctions stick; the realization that mayhem is at risk *every* time a drunken driver takes the wheel, yet an ingrown tendency — in society as well as its institutions — to treat the matter lightly until that mayhem occurs.

In the aftermath of a growing consensus on the seriousness of drunken driving there is no room for scapegoating or blindness. The test of appropriate policy now must be to overcome those contradictions: to provide mandatory treatment options that can — not always, but often — keep the offender from repeating the crime; to remove dangerous implements — moving vehicles — from known dangerous hands; to take the offense itself — not just violent outcomes — as seriously as the community demands.

Judge Andrews struck an important blow in ordering confiscation of the vehicle of a multiple repeat offender. The sentence is a demonstration both that the law can work and that society is not powerless to protect itself. Confiscating a vehicle deprives the offender of the means of destruction even as it imposes a real penalty against unacceptable behavior. Yet that is not society's only possible response.

The Senate State Affairs Committee, chaired by Sen. Vic Fischer, D-Anchorage, will hold public hearings Saturday on three major bills related to issues of drunken driving and alcohol abuse. One bill would raise the drinking age from 19 to 21; another would stiffen penalties — including making provision for vehicle confiscation statewide; a third would deal with possible curfews for drivers under age 18.

The hearings begin at 9 a.m. in Anchorage Assembly chambers, 3500 East Tudor Road. A community concerned with the proposed legislation, other potential remedies, and the gathering storm over atrocities on its roads and highways, should be there to speak its piece.

Associated Press

District Judge James Hornaday of Homer says the state needs to enact tougher laws against drunken drivers

Judge urges tougher drunken driving laws

by Ralph Nichols
Times Writer

A District Court judge under fire for the tough sentences he gives drunken drivers told the Senate State Affairs Committee the legislature must increase the minimum penalties for that crime.

Judge James Hornaday of Homer told the committee Monday during a statewide teleconference hearing chaired by Sen. Vic Fischer, D-Anchorage, that the sentencing of drunken drivers can't be left to judges alone.

"Drunk driver cases are the most serious problem facing the Alaska court system today," Hornaday said.

"You must take discretion away from the judges because experience has shown the judges will generally only impose the statutory minimums," he said.

Hornaday has been transferred to Anchorage effective June 1 by presiding Superior Court Judge Mark Rowland because he is frequently disqualified by defense attorneys from hearing cases.

Many of those cases involve drunken drivers. Hornaday is known for sentencing first-time offenders to more than the mandatory 72 hours in jail.

The minimum sentence doesn't have to be the average sentence, he told the lawmakers. "In Maine, we are told, judges are giving on the average four times the minimum jail time."

Speaking in support of bills to toughten drunken driving laws, Hornaday called for an increase in the mandatory jail sentences faced by persons convicted of driving while intoxicated and driving with a suspended license.

Hornaday said the legislature should consider adopting:

- Forfeiture of the driver's vehicle upon his second drunk driving conviction, or his first conviction if a person is injured.
- Longer mandatory driver's license revocations.
- Required mandatory community work by convicted drunken drivers.
- Raising the drinking age and earlier bar-closing hours.
- Mandatory alcohol abuse programs in jails for all second-time offenders.

The judge also advocated creation of a state task force on drunken driving to address the problem.

"Over half of all the jury trials in the (state) are drunk driving cases. More are arrested for drunk driving than any other offense. Over two-thirds of the traffic fatalities involve drinking," he said.

Noting the Alaska Supreme Court has affirmed a 90-day jail sentence for a first-time deer poaching conviction, Hornaday asked the committee, "Why is it that hardly anyone bats an eye over these sentences, and yet there is such an uproar about sentencing above the bare minimum for drunk driving?"

He added that people argue "you shouldn't put drunk drivers in jail because you are just overcrowding the jails with non-criminals.

"Well, maybe we ought to be concerned about the overcroweded hospitals, and overcrowded wheelchairs and overcrowded cemeteries caused by drunk drivers."

Hornaday last week filed suit in U.S. District Court and state Superior Court, charging Rowland lacked the authority to transfer him and charging the action violated his civil rights.

Hornaday also challenged the constitutionality of pre-emptory challenges with no reason stated, saying they violate a judge's right to the due process of law.

McCarthy murder trial postponed

The trial of Louis Hastings, accused of murdering six McCarthy residents, has been postponed until July and will likely be postponed again. Defense attorney John Salemi told Superior Court Judge Ralph Moody Wednesday that he will need until late August to prepare Hasting's defense.

From Daily News staff reports

police report

Bullet hits assemblyman's home

Police pulled a .22-caliber bullet from the outside of Assemblyman Fred Chiei's South Anchorage home Monday after random shots were apparently fired by teen-agers from the Oceanview beach late that morning. The slug was embedded backwards in an outside corner of the Chiei home, indicating it probably ricocheted from another spot and was not fired directly at the assemblyman's home. A neighbor told police she saw two teens earlier that morning on the beach with a small caliber rifle, but they were too far away for her to identify. No injuries were reported.

Man charged with assault

An Anchorage man who allegedly threatened his ex-girlfriend's new boyfriend with a gun was arrested by Anchorage police. Chapaula Ayers, 25, of Anchorage was charged with third-degree assault and held in lieu of $1,000. According to police reports, Ayers was talking with his ex-girlfriend in a parked car when another man ordered him out of the vehicle. Ayers then allegedly chased the man with a handgun and fired one shot into the ground.

Drunken driving charged in accident

A man who allegedly struck a woman with his car as she walked down the road has been charged with drunken driving by Alaska State Troopers. The woman, who suffered minor injuries, told troopers she was hit Saturday night while walking along the Alyeska Highway. At Mile 112 of the Seward Highway, troopers stopped and arrested Timothy R. Mountfort, 23, of Fort Richardson. Mountfort was charged with driving while intoxicated and released.

From Daily News staff reports

4/29/83 Times

Courtroom drama

A DRUNK DRIVER who was responsible for the death of a child last June in Eagle River was sentenced to prison sentence in Superior Court here this week, despite testimony from numerous witnesses as to her good character and upstanding citizenship.

The judge gave her five years in prison and an additional five years of probation.

HE ALSO told the woman he wished he could put a photo of the mangled child she killed on the wall of her cell as a daily reminder of why she is sitting in prison.

At one point in the sentencing, the judge clapped his hands together to demonstrate how the drunk woman's car smashed into the victim.

THE COURTROOM scene, witnessed by the family of the dead child and many members of the Mothers Against Drunk Driving (MADD) organization, was filled with emotion and drama.

It wouldn't be a bad idea for attendance at these sentencings to be part of the rehabilitation process for those convicted drunk drivers who were fortunate enough not to have killed someone.

Lawmakers disregard MADD

I am very mad and so are the members of MADD.

When we were in Juneau the end of January, we received very warm welcomes and we were told to keep up the good work. We really felt we were doing some good on the laws about drunk drivers. Now, we know we are not very experienced in the field of lobbying, but all our hard work is coming from our honest-to-goodness hearts.

We really want to save people from the drunk drivers. I am now beginning to believe that in order to really get anything done, you have to have *lots* of money to pass around.

Unfortunately, I do feel that if some of our lawmakers lost a loved one or had been involved themselves as a victim, we would get a lot more done. I hope nothing like this does happen, but it does strike one out of two families.

The accident on March 17th really got to us. If this person would have been taken care of on his first offense, two people would not be dead today. Since our first visit to Juneau, there has been one 20-year-old boy killed; one 17-year-old badly hurt; one 9-year-old with two broken legs; two separate accidents with no injuries, but demolished cars. These are to just mention a few. This is senseless.

We need help to get through to these lawmakers.

I wonder how many people realize that if the excise tax is raised the money would go for rehabilitation, education and awareness. MADD is 100 percent for this program. We still maintain that if people know they will get a stiff sentence on their first offense, there would be many people who would be afraid to drive drunk and take the chance. They wouldn't take a second chance which unlike the victims in many cases, do not get a second chance.

It has been said that we in MADD want to put everyone in jail. This is not true; we want to make people aware that if they do drink and drive then they deserve to be put in jail and fined.

We want to stop this slaughter on the highways!

— *June Gerrish, president*

Obituaries

THEODORE HUGO GOODMAN

Memorial services for Theodore "Ted" H. Goodman, 40, will be at 1 p.m. today at the Witzleben Funeral Home and Crematory, Sixth Avenue Chapel with the Rev. Bob Thwing of St. Mary's Episcopal Church officiating. A private graveside service was conducted yesterday at the Anchorage Municipal Cemetery. His body was found April 15 and his death is under investigation by the Alaska State Troopers. Born Jan. 28, 1943, in [illegible]n, West Germany, he had liv[illegible] Alaska for 10 years and was working with a privately owned jewelry business. He was a veteran of the U.S. Army. He is survived by his mother, Benita Gutmann of Bonn, West Germany; one brother and one sister; and his companion, Dorothy Kabaker of Anchorage.

JOHN ROBERT VOSGIEN

Private services for John R. Vosgien, 37, will be later this week in Kodiak. He died May 5 in Kodiak. Born Nov. 22, 1945, in Seattle, Wash., he had lived in Alaska 34 years and was a laborer on Kodiak Island. He is survived by his father, Arthur L. Vosgien of Snohomish, Wash.; two sisters, Cathy Magnusen of Kodiak and Patricia Wilson of Redding, Calif.; and his brother, David Vosgien of Kodiak. Local arrangements by Witzleben Funeral Home and Crematory, Sixth Avenue Chapel.

ROBBIE JANE CHISM

Funeral arrangements for Robbie J. Chism, 31, are pending at Witzleben Funeral Home and Crematory, Sixth Avenue Chapel. She died May 11 at Providence Hospital. Born June 22, 1951, in Corpus Christi, Texas, she had lived in Anchorage for the last 17 years. She is survived by her husband, Clifton Chism of

DEBORAH L. SCARDINA

Funeral services will be held next week in Blaine, Wash., for Deborah L. Scardina, 29. She died May 12 at her Anchorge residence. Born April 26, 1954, in Long Beach, Calif., she had lived in Alaska for 2½ years. She leaves her mother and step-father, Mr. and Mrs. Robert Hansen of Blaine, Wash.; her brother, Michael Lebecki of Texas; her father, Thomas Labecki of San Francisco, Calif.; and her maternal grandmother, Florence King of Bellingham, Wash. Burial will be at the Enterprise Cemetery in Ferndale, Wash. Arrangements by Evergreen Memorial Chapel.

THOMAS SIDNEY BENTLEY

Services for Thomas S. Bentley, 83, who died Wednesday at his residence, will be held Saturday, 2 p.m., at Evergreen Memorial Chapel. Officiating will be Bishop William Parks of the Church of Jesus Christ of Latter-day Saints, Anchorage Third Ward. A visitation will be held at 1 p.m. He has been an Anchorage resident for 1½ years. Born July 30, 1899, in Providence, R.I., he lived most of his life in Dracut, Mass., where he attended school.He worked in the knitting industry in Lowell, Mass., prior to moving to Ossining, N.Y., where he was foreman of the knit shop at Sing Sing prison, from which he retired. He leaves his sister, Irene Stuart of Norwich, Conn.; four children, Barbara Kemp of Aiken, S.C., Rosemary Poussard of Anchorage, Thomas Bentley of Wappingers Falls, N.Y. and Rita Rice of Wichita, Kans.; eight grandchildren and three great-grandchildren. Burial will be at Angelus Memorial Park on Klatt Road following the funeral. Funeral arrangements by Evergreen Memorial Chapel.

Mr. Charles Bussell, Chairman
House Judiciary Committee
State of Alaska
Pouch V
Juneau, Alaska 99811

Dear Mr. Bussell:

My son died on April 4, 1983, as a result of an auto accident caused by a drunken driver. I urge you to support the proposed new laws raising the drinking age from 19 to 21, and providing stiff penalties for persons convicted of drunken driving.

A drunk behind the wheel of a vehicle is a disaster waiting to happen and stiff penalties are needed to stop this. Drunk driving laws and penalties should be set up to follow laws related to carrying and/or using dangerous weapons. Penalties for causing injuries should be stricter than the laws governing illegal hunting and fishing; right now they are not.

Drunk drivers should be required to --

(a) Permanently forfeit their vehicle upon the second conviction, or first conviction if another person is injured,

(b) Pay fines big enough to cover the cost of alcohol treatment,

(c) Have licenses revoked for a year or more.

Additionally, the laws should --

(a) Provide minimum penalties to take some discretion away from judges, and

(b) in the event of a death, jail terms should equal those which apply to murder.

At hearings conducted by Senator Fisher on April 9, 1983, impressive statistical evidence of the reduction in auto accidents associated with raising the legal drinking age to 21 was presented by Dr. Kelso. These data cannot be ignored and should be sufficient justification for raising the legal drinking age.

Concurrent with a stricter drunk driving law should be the provision of resources to the court system for judges and clerical staff, and for additional jail facilities. Better enforcement of the laws must be provided as a deterent. One method for improving enforcement is use of roadblocks. This approach may require added State Troopers; if so, funds should be appropriated.

I am circulating this letter among a substantial number of friends and co-workers; some are residents of your election district. I plan to circulate your reply to them also.

Sincerely,

Stuart Bigler

Drag racers and drunk drivers

Dear Editor:

My son is gone. Never again will he come through the front door and say "Hi Mom," nor will he even call me on the phone to see how I am.

He was run down by a car on one of Anchorages' busiest streets. He was hit with enough force to demolish his car which was impelled 300 feet from the initial point of impact. His near lifeless body had to be removed from the passenger side of the wreckage because access from the driver's side was impossible.

Fourteen hours after the accident my husband and I were taken into the operating room to see our child whose condition was so critical he could not be moved. I truly hope none of you will ever have to know the agony of holding your child's hand while being told there is no brain activity and literally no hope for him to survive.

Night after night our streets are used as drag strips and raceways with little if anything being done to prevent it. If you drive in Anchorage after 9 p.m., you are taking your life in your own hands!

Until, and only until, the public outcry against this carnage perpetrated by drunk drivers reaches monolithic proportions and our legislators in Juneau react responsibly to enact adequate legislation, deaths like my son's will continue to happen.

Help me save the children I have left. Help save your children, your spouse — it can happen to you! Write your legislators and tell them you want tougher laws and most of all tell them you want them enforced. Join M.A.D.D. and get involved before you lose a loved one.

We are a close family. We loved this child so deeply. The loss of our son, our brother, has left such an emptiness that we will never, ever be whole again.

I can only say the words aloud that my child is gone but my mind won't believe it. Every night I sit and wait for him to come home again. I love him so much.

Thelma Sinnett
Anchorage
Mother of Robert Sean Sinnett

A-8 The Anchorage Times, Friday, April 8, 1983

'Stop the mayhem,' says Sen. Fischer

A public hearing on three drunk driving bills now awaiting action in the legislature is scheduled for Saturday morning at the Anchorage Assembly chambers at 3500 Tudor Road.

The meeting is scheduled to run from 9 a.m. to 4 p.m.

The hearings are being hosted by the State Senate Affairs Committee, which is chaired by Sen. Vic Fischer, D-Anchorage.

"We have got to act now to stop the mayhem being caused by drunk drivers in Alaska," Fischer said. "We must stop drunks from driving and drivers from drinking."

The three bills now pending before the senate committee are:

- Senate Bill 61 which would increase the penalties for those convicted of drunk driving and authorize confiscation of vehicles driven by drunks.
- House Bill 17 which would raise the legal drinking age in Alaska from 19 years to 21 years. This has already been approved by the House and is awaiting Senate action.
- Senate Bill 226 which would limit the driving hours for persons under 18 years old on weekends. This bill was introduced last week by Fischer, who said he did so because other states that have established such driving curfews have seen "dramatic decreases in the number of auto accidents involving young people."

VIC FISCHER
Says act now to end mayhem

"In tackling drunk driving problems, the Senate State Affairs Committee will take a look at every possible measure that could be applied in Alaska," Fischer said. "No single, simplistic solution will eliminate the problem. We must carefully examine all potentially effective measures."

Fischer praised District Court Judge Elaine Andrews for her recent order to confiscate the car driven by a man who had five earlier drunken driving convictions and two license revocations.

"It's about time we took such drastic action," he said.

People who want to testify at Saturday's hearing should call the Anchorage Legislative Information Office at 278-3668.

An Open Letter To: Senator Patrick Rodey
Senator Arliss Sturgulewski

Representative Charlie Bussell
Representative John Lindauer

I'm a wife, mother and I'm M.A.D.D.!

In my 37 years I've lived all over the world and I can honestly say I have never lived anywhere where I've feared more for my life and the lives of my loved ones than I do in Anchorage.

Anchorage has few major arteries and many of the existing roadways are in extremely poor condition. Driving, even in good weather, is for the most part hazardous. Add to this the drunken driver and you've got a lethal situation.

Our first week in Anchorage my daughter and I were witness to the death of a woman at the hands of an inebriated lady driving a large van. She ran a red light at a high rate of speed and broadsided the victim who was driving a small foreign car. I understand the deceased woman had a young daughter who was orphaned by this incident.

Since that first week there seems to be at least one, often more, fatal accident every week. Most of them are alcohol related. I've noticed that many of the drunk drivers involved are awaiting trial on previous alcohol related charges.

On a daily basis the News lists the judgments meted out by our courts against the drunken driver. I am sickened by their light fines and even lighter jail sentences. Why aren't the penalties for this type of crime more prohibitive???

Were I to get drunk, shoot and kill a perfect stranger I would have committed a serious crime and would be punished accordingly (I trust). However, if I get drunk and run someone down with my car it's not a crime, it's an accident and I'll probably get no more than a "hand slapping". I can't see the difference. An innocent victim is dead because of my inability to control my own actions. A car is every bit as much a lethal weapon as a handgun!

My little girl is 11 years old, in 7th grade, a cheerleader, a member of the National Junior Honor Society and, in general, an outstanding little person with lots of potential. If current penalties are not touchened and drunk drivers made painfully aware that they will not be tolerated by society, I'm afraid my daughter will never get the chance to grow into the fine young woman she appears destined to become. I find that thought unbearable.

I feel certain that if our elected legislators don't soon do something to rectify this intolerable situation the people will get angry enough to elect others who will. The hazard is real and getting more serious daily. It demands prompt attention.

Why do so many people have to die before our elected officials take this seriously? Drunk drivers commit violent crimes and kill many completely innocent people. Wake up, it may be your spouse or children next.

Thanks for listening.

Sincerely,

Dianne Cunningham

District Court
State of Alaska
THIRD JUDICIAL DISTRICT
941 FOURTH AVENUE
ANCHORAGE, ALASKA
99501

CHAMBERS OF
ELAINE ANDREWS, JUDGE

(907) 264-0663

March 31, 1983

Representative Charlie Bussell
Chairman, House Judiciary Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Bussell:

I am writing to express some court related concerns over House Bill No. 6, a bill pertaining to criminal penalties for driving while intoxicated and driving while license suspended.

At the outset it is important to understand not only the intended impact of legislation that raises or establishes a mandatory minimum penalty, but also the predictable, but unintentioned, consequences. Certainly deterrence of the illegal conduct is a paramount goal. However, there are obstacles toward reaching that goal. Substantial mandatory minimum penalties can cause prosecutors to review cases more severely than they might otherwise, leading to reduced charging. Jurors, who quickly become educated in such matters, are reluctant to convict in cases where they know significant mandatory penalties will be imposed. Further, defendants who face loss of freedom, and financial security through loss of employment, will litigate these cases to the fullest, taxing the already understaffed prosecutorial and defense agencies, not to mention the court which is struggling to process the skyrocketing caseload.

Larger considerations aside, I discern several critical problems with the proposed legislation.

1. **AS 28.15.181(c) - Driving While License Suspended Penalty Prerequisite**

   It will require significant time on behalf of the prosecutor and the court to obtain information about "essentially similar" past convictions. Hearings will have to be held to determine what is a "substantially similar" offense. I would

estimate that at least 10-20% of the cases which involve Alaska's highly transient population would require such hearings.

2. **AS 28.15.291 - Driving While License Suspended Mandatory Penalties**

(a) There are essentially two ways that a driver's license can be revoked. The first is a court ordered revocation or suspension. This occurs usually at sentencing after the defendant is convicted of reckless driving or driving while intoxicated. The judge personally advises the defendant that his license is revoked and that mandatory penalties will be imposed if he drives.

The second method of revocation is an administrative revocation which occurs if the defendant has accumulated too many points on his license or if he is the registered owner of a car involved in a property damage accident of at least $500. These "administrative" suspensions are determined by hearing officers. Usually the driver is notified through the mail that his license will be suspended. The vast majority of administrative suspension charges coming before the court are due to the defendant's failure to comply with the SR-22 financial responsibility requirements.

Under the proposed legislation the type of suspension, whether court ordered or administrative is irrelevant. The defendants are treated as equally culpable. One defendant is likely a DWI offender who has been ordered not to drive. The other defendant may have a blameless record but be fiscally irresponsible as to a single accident. Mandatory minimum penalties may be wise as to the first offender but not as to the fiscally irresponsible offender. Financial responsibility should be approached through compulsory insurance or some more realistic and less costly avenue.

(b) Any kind of mandatory fine legislation is not a cost effective approach to punishment. Oftentimes the court and related enforcement agencies spend five or ten times the amount of the fine trying to collect it. If a person is arrested for failure to pay a fine and he agrees to pay the fine then the court must release the offender from custody. The "bench-warrant-release-for-payment" merry-go-round is a losing proposition. Fines should be left to the discretion of the court which can fashion other means, such as community service, to equally penalize indigent defendants.

(c) I assume that throughout the legislation language referring to "minimum sentence served" properly credits goodtime as required by statute.

3. **AS 28.35.030(a)(2) - Chemical Tests**

The language should be amended to reflect that the chemical test may be within four hours of the defendant's operation of the vehicle but that the test must show .10 or more at the time of operation. There have been a surprising number of cases in which the defendant claimed to be driving sober, slid off the road, walked to the bar, drank to intoxication and was arrested for DWI hours after the car was abandoned. The Municipality of Anchorage proposed a similar ordinance in the past and much litigation was generated over simiarly vague language.

4. **AS 28.35.031 - Immediate Operator License Revocation**

This proposed legislation creates absolutely nightmarish consequences for the court, prosecution and police. A court review to be scheduled within seven days of arrest would require the establishment of a sub-bureaucracy to coordinate court scheduling, witness subpoenas, proper notice to necessary parties, etc. The current court calendar could not accommodate such hearings. A new judicial officer, an in-court clerk to record proceedings, and clerical staff, not to mention hearing room, which we do not have, would be required.

5. **AS 28.35.032(a)(b)(d)(g)**

Does a person who refuses a breathalyzer test but agrees to a blood test, which would accomplish the same result, suffer the same consequences as the person who refuses all chemical tests?

6. **AS 28.05.045 - Impoundment of Vehicles**

A cursory review of the entire scheme of impound legislation suggest some problems in the proposed legislation.

What does impoundment of a vehicle accomplish that confiscation of license plates would not? An offender intent on driving will beg, borrow or otherwise obtain a car to drive. A borrowed car driven by a license-suspended driver is much more difficult to detect than a car driven down the road without license plates.

Although not directly a court concern, the problems of storage, insurance and potential civil liability for both proper and improper impoundment are enormous.

Court involvement in the proposed forfeiture legislation is significant. At minimum, in Anchorage, a judge and support staff would be required. Further the court is not the moving party in the forfeiture and therefore has no responsibility to ascertain parties who may have ownership or security interests in the vehicle in order to notify them of the forfeiture action. That burden is upon the prosecution.

My review of the legislation has been at best, brief. I urge you to carefully consider the total impact of the proposed legislation. The impact on the Anchorage district court, which is struggling to meet an increasing caseload, will be severe if this legislation is passed without adequate attention to the needs of the court which must faithfully and fully carry out the legislature's dictates.

I will be pleased to respond to any questions you may have and assist you in any manner you deem appropriate.

Sincerely,

Elaine M. Andrews

Alaska Native Health Board

1689 C STREET, SUITE 230, ANCHORAGE ALASKA 99501 PHONE (907) 276 8989

Reference #A83-0335

March 29, 1983

Representative Charles Bussell
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Bussell:

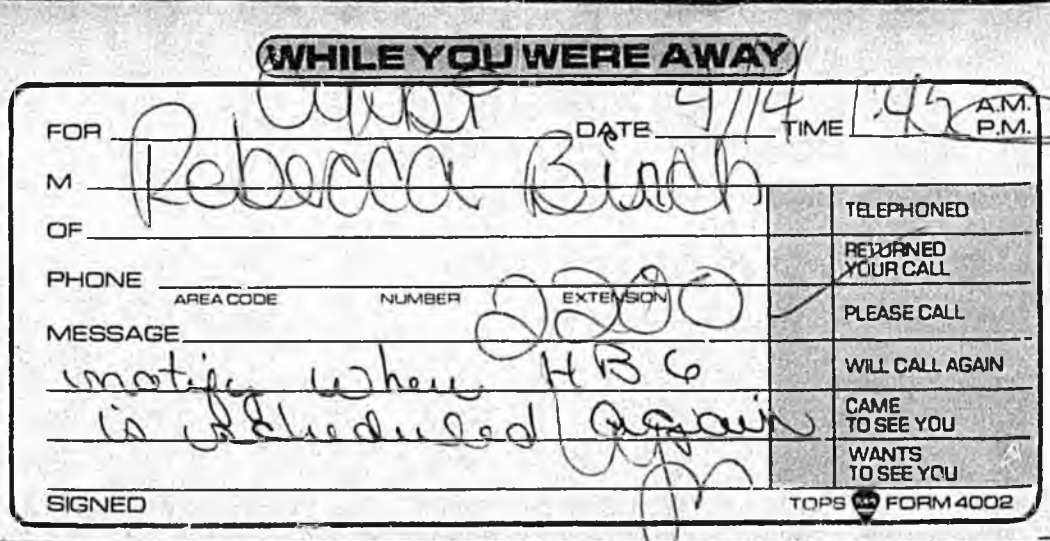
The Alaska Native Health Board wishes to go on record as endorsing the following pieces of legislation proposed this session:

H.B. 6 "An Act Relating to Driving a Motor Vehicle"
The ANHB favors the inclusion of a section in the examination given to applicants for a driver's license to test the applicant's knowledge of the effects of alcohol and drugs on drivers, the dangers of driving under the influence of alcohol or drugs, and the applicant's knowledge of the laws relating to driving while intoxicated. The ANHB also favors stricter penalties for intoxicated while driving offenses and refusals to submit to chemical tests of breath.

H.B. 10 "An Act Relating to Imitation Controlled Substances"
The ANHB favors legislation which would make it unlawful for a person to manufacture, distribute, or possess with intent to distribute, an imitation controlled substance, except as provided in AS 17.14.040.

H.B. 17 "An Act Relating to Age Limit Under Title 4, Alcoholic Beverages"
The ANHB endorses restoration of the legal minimum age for drinking alcoholic beverages in Alaska to age 21.

Your consideration in supporting and insuring passage of the above legislation will be very much appreciated. Thank you in advance.



Sincerely,

Bonnie Gabaldon VH

CSHB 6 (Judiciary)
Fiscal Note
Analysis

The committee substitute has eliminated impoundment of vehicles and retained modified and less restrictive provisions for forfeiture of vehicles. Likewise, the requirement to notify every person who has an ownership or security interest in vehicle within five days has been changed to simply notice prior to any hearing that would determine the disposition of any forfeited vehicle. Because of these changes, the fiscal impact on the department will be reduced. The requirement for court forfeiture hearings, however, still remains and the state must provide motions and answer intervenors' motions in order to invoke forfeiture. Consequently, the department's original estimate of four attorneys, and two clerical staff is being reduced to two attorneys and two clerical staff.

Fiscal Analysis - CSHB 6

The impact of CSHB 6 is expected to result in the addition of one Attorney IV position (SR 24) and one Attorney III position (SR 22). In addition to these attorney positions, two secretarial positions will provide support for the Anchorage and Fairbanks attorneys.

The first year of this analysis will cover 10 months of FY 84, allowing 2 months for these four positions to be established. The costs beyond FY 84 have been projected on a 12 month basis and include a 6% annual inflation factor.

JUSTIFICATION

This is one of two attorney positions required by the Department of Law in order to absorb the significant increase in workload which will result from new legislation authorizing the forfeiture of motor vehicles driven by persons arrested for driving while intoxicated. The new legislation requires a court hearing when a forfeiture is contested by the vehicle owner, or by someone who has a financial interest in the vehicle. It is anticipated that many of these hearings will involve representatives from banks or financing companies who retain a financial interest in the vehicle.

This is one of two secretary positions required to provide secretarial support for the two new attorney positions assigned to Anchorage and Fairbanks. This particular secretarial position will serve the needs of the new attorney assigned to Anchorage. Included in the duties of this position will be the responsibility of coordinating the activities of the Civil Division attorneys handling the forfeiture action with the attorneys and support staff of the criminal division who originally prosecuted the intoxicated operator of the motor vehicle.

Liquor store held liable for crash injuries

Associated Press Times 3-5-83

A liquor store that sells alcohol to a minor may be liable for injuries suffered by the minor even though the buyer broke the law by making the purchase, the Alaska Supreme Court has ruled.

The ruling came in a lawsuit filed by the estates of Randy Hanson and Elizabeth Morris. The two minors were killed in an automobile crash on Dec. 31, 1977.

Hanson had bought a fifth of tequila at the Pines Liquor Store in Anchorage earlier that night. He shared the bottle with the four other minors in a car including driver David Anderson.

Hanson and Morris were killed when Anderson made an illegal left turn and collided with another car, the Supreme Court noted.

The court said that under an Alaska statute in effect at the time but repealed in 1980, the liquor store was responsible for injuries to customers served in violation of the law.

That Hanson broke the law by making the purchase and by later serving Anderson does not relieve the liquor store of liability, the court held.

HB 46

The constitutional breath test

By G. Kent Edwards

OUR COURTS are at it again! Creating more constitutional rights out of thin air. This time the air is the alcoholic breath of accused drunk drivers.

Judge Beverly Cutler and our appellate court have decided that the state should buy new breath-testing equipment capable of saving a sample of defendant's breath for possible future testing by the defendant. It seems that our current Breathalyzers don't have all the features that modern technology makes possible.

She thinks that the benefits of those additional features justify their acquisition. Judges Bryner, Singleton and Coats agreed. Of course, everyone is entitled to his opinion.

UNFORTUNATELY, the judges have characterized their opinion as being everyone's constitutional right, thereby depriving the other branches of our government from reaching their own opinions on the subject.

The decision has caused evidence in several hundred criminal cases to be suppressed. Not because the evidence was gathered illegally. Not because the evidence was unreliable. Not because the defendants were unable to cross-examine those who gathered the evidence. No, in the words of Judge Cutler, the evidence was suppressed "to remedy the careless disregard shown by prosecution to promptly fulfill the duties of investigating, developing, purchasing and implementing a breath sample saving system. The state and city should have done this immediately upon learning of the technology."

HER COMPLAINT is that the police did not take rapid enough steps to acquire necessary materials to enable the saving of defendant's breath for later testing by the defendant in the event the defendant wanted to have it tested. Alaska's Breathalyzer used up the entire sample in the course of the test.

The system Judge Cutler seemingly prefers isn't even foolproof. In fact, in the words of the court, it is a "proposed system" for which Alaska "lacks expertise" to use at this time. "It needs retesting with live subjects to assure its viability".

What so-called constitutional rights are being violated? The defendant's right to cross-examine "tests." Cross-examining the operator of the test apparently is not good enough! How could we have been so shortsighted for so many years? Machines don't talk, you say? Shows what little you know about the law and what can be done with a little extra "breath" in the hands of an aggressive, imaginative defense attorneys and judges.

AS ONE MIGHT expect in a decision this controversial, Judge Cutler had a difficult time determining whether she had in fact discovered a new constitutional right. First she said she did, but a few months later she decided that she had not, only to change her mind a second time. During this period she was receiving evidence as to such things as whether saving breath samples was technologically possible, the extent of its cost and the amount of effort being taken by government officials to improve the new system. Conflicting evidence kept causing the scale to tip differently each time. Surely the existence or non-existence of our constitutional rights are not so precariously balanced.

Not too surprising, the courts' opinions were completely devoid of any finding that the taking and saving of a separate breath sample for use by a defendant has ever, even once, helped show that a defendant was not drunk or that it is probable that a second test would result in such a conclusion. But then, such things are not supposedly relevant when dealing with constitution rights.

It is one thing to save evidence favorable to the defendant; it is another to require that evidence be created for the defendant with equipment that doesn't exist in the state.

Where is the line to be drawn? Must all tests leave a part of the evidence unspoiled for subsequent viewing by defendant's experts? Cut a fiber in half before testing and give one to the defendants; otherwise, a mass murderer such as Atlanta's Wayne Williams goes free? Do not use chemicals on a crucial blood stain? Do not deplete all of the confiscated narcotic in a test to determine its identity?

Must police chemists be constantly on top of the latest advances in the state of the art of a particular testing apparatus? Are they now placed in a situation where, unless they have the most advanced systems for making tests without destroying all of the evidence being tested, they could be jeopardizing the prosecution of a criminal case?

If it doesn't make sense to you, don't worry; you are in good company.

G. Kent Edwards was attorney general for the state of Alaska from 1968 to 1970. From 1971 to 1977 he was U.S. attorney for Alaska. Edwards, a Republican, is now in private practice.

Tough drunk driving bill clears House, 33-4

By The Associated Press

JUNEAU—The House on Thursday approved on a 33-4 vote a measure to substantially toughen the drunken driving laws in Alaska.

Rep. Mitch Abood, R-Anchorage, opened defense of his bill (HB6) by saying, "Politics has no place or home in this bill."

But it was politics as the proposed amendments—ranging from mandating alcohol rehabilitation to reducing the time a drunken driving conviction affects later convictions—were pressed by Assistant Minority Leader Don Clocksin, D-Anchorage.

Abood said he didn't want the issues addressed by the amendments in the bill because they would defeat the bill's purpose: to get the drunk drivers off the street.

While Clocksin's eight amendments were defeated, a fellow minority Democrat, Rep. Peter Goll of Haines, raised a question that may bring the issue back to the House floor today.

Goll and others pointed out the bill says that after one or more convictions a person could forfeit his vehicle. Goll said he was unsure if that was what was intended. Abood said the possibility of vehicle forfeiture would deter repeat offenders.

Other provisions of the bill would mandate more jail time and large monetary penalties for second and third drunk driving offenses.

A first-time offender also would lose license privileges for 30 days, and could have limited driving rights for 60 days. Current law allows a judge to give a limited license for 60 days, if the license isn't revoked for 30 days.

A second offense would mandate a one-year license revocation, while a third conviction would result in a 10-year license loss.

The first-time offender would face a minimum fine of at least $

REP. MITCH ABOOD
Off the street

second offense means a $500 fine, and a third offense $1,000. Current law mandates a maximum fine of $1,000.

The measure follows current statutes of 72 hours jail time for a first offense, but increases from 10 to 29 days the timme a person convicted for a second offense would have to spend in jail. A third offense mandates at least 30 days in jail.

But the recommendation must first be accepted by House Finance Chairman Al Adams, D-Kotzebue, and agreed to by the full Finance Committee.

Meanwhile, a letter of intent to be placed in the House-proposed operating budget mandates that the division look at cheaper alternatives to provide service.

The finance committee, at the urging of Rep. John Lindauer, R-Anchorage, earlier had deleted $1.45 million from the telecommunications budget. Deputy Commissioner of Administration Julianna Guy told Rep. Jim Duncan, D-Juneau, that the action could have cut service to rural communities and possibly meant the end of the Alaska Television Project.

Duncan contended the cuts would have possibly sliced live programming, such as "Monday Night Football." Guy said the Legislature would have to decide which villages wouldn't have programming.

She said the state would have to seek lower tariffs charged by Alascom to plug the deficit and provide Alaska with television service. Duncan said that proposal would be com-

plicated by the fact the tariffs are set by the Federal Communications Commission.

Alaska State Legislature
HOUSE OF REPRESENTATIVES

REPRESENTATIVE
CHARLIE BUSSELL
CHAIRMAN

Committee on Judiciary

May 2, 1983

Ms. June Gerrish
MADD - Mothers Against Drunk Drivers
5800 Glenn Highway
Anchorage, Alaska 99504

Dear Ms. Gerrish:

The House Judiciary Committee passed HB 6, the "drunk driving" bill, out of Committee on Friday, April 29, 1983. I think it is an excellent and comprehensive item of legislation.

The Committee put considerable thought and effort into its creation and fine-tuning. Representative Mitch Abood's staff, the Committee staff, and the bill drafters for the Legislative Affairs Agency and the Department of Law worked very hard and diligently expending many long hours on this bill.

The Committee really appreciates the way the original sponsor, Rep. Abood of Anchorage, spent so much time working with the bill and with us. Rep. Abood testified before the Committee each time the bill was scheduled for hearing. He "rode herd" on the bill from its inception to the final product that passed out of the Committee.

I sincerely hope that this bill will not be substantially altered or amended in a way that weakens or destroys it.

The bill provides for seizure of a driver's license upon arrest as well as increased penalties upon conviction. While the minimum of 72 hours in jail is mandated for a first offense in keeping with the existing law, a second offense requires a minimum of no less than 20 days in jail and the third offense would result in at least 30 days in jail and a 10-year license revocation.

Charlie — see page 457 "EMERITUS" Websters New World Dictionary - "retired from active service, USUALLY FOR AGE, But retaining one's rank or title"
I guess this is appropreate —

MEMBERS:
REP. JOHN LISKA, VICE CHAIRMAN; REP. RAMONA BARNES, EMERITUS;
REP. JOE HAYES; REP. HUGH MALONE; REP. DON CLOCKSIN; REP. BEN WENDTE

Rep Mitch Abood, OMNIPOTENT

Fines based on the number of absence of prior convictions, carry mandatory minimums of $250 for a first offense, $500 for the second offense and not less than $1,000 for a third offense. Courts will be required, under the proposed bill, to consider prior offenses over the preceding 15 years in this or another jurisdiction, rather than going back only five years under the existing law to find prior convictions.

The bill also maintains as a crime the refusal to submit to a chemical test following arrest, as does existing law, except penalties are more stringent under the new bill.

In addition, law enforcement officers are authorized to require a breath test on the spot when the driver is first stopped. Refusal to submit to a preliminary breath test, prior to arrest, is classed as an infraction in the measure.

The House Judiciary Committee moved HB 17, the bill to raise the drinking age to 21, on the House Finance Committee back in February. The Chief Prosecutor of the State, Dan Hickey, testified before that group and the Finance Committee Substitute substantially weakened the bill. One wonders if Mr. Hickey initiated the amendments to that bill.

It is known that HB 6, the so-called "drunk driving bill," was not classed as one of the Chief Prosecutor's priorities when we were waiting for suggestions from the Department of Law. It is to be hoped that HB 6 will receive swift action in the House Finance Committee and not be weakened in the same manner HB 17 was. In fact, one wonders who is running the apparently leaderless Department of Law during this part of the Sheffield administration.

The Governor, afterall, during his campaign told folks he was in favor of raising the drinking age to 21. Recently, he said he was not in favor of this. A crystal ball would be helpful, maybe, to see what his views are on driving while intoxicated.

Very truly yours,

Representative Charlie Bussell
Chairman, Committee on Judiciary

Drunken driving laws fail, judge says

by Ralph Nichols
Times Writer

The legislature is to blame for repeat drunken driving offenders on Alaska highways, an angry District Court judge charged Tuesday.

Judge Elaine Andrews said lawmakers have failed to provide adequate alcohol abuse treatment programs for jailed drunken drivers.

"If they want drunk drivers off the road, they should do something," the judge said from the bench.

The judge became upset when she learned that Bernard Johnson, who is serving an 18-month sentence, is not receiving court-ordered treatment for alcohol abuse because no programs are available.

Johnson, 51, is in jail on three drunken driving convictions. He has 10 prior convictions for the same offense.

State dollars "obviously (are) not being spent at the preventive or treatment ends of the problem," Andrews said. "There is no place for treatment for people convicted of driving while intoxicated."

The current system does little more than steer repeat offenders through a "revolving door," Andrews continued.

They are sentenced, "warehoused in jail without treatment, and then released," she said. Because they haven't been cured, they will probably drive drunk again.

"Maybe," Andrews added, "someone ought to let the legislature know the burden is on them" to do more than just punish drunken drivers by funding alcohol treatment programs for repeat offenders serving extended sentences.

"My hands are tied," she said.

Andrews noted that Johnson — and others like him — can receive alcohol abuse treatment for only 30 days while incarcerated. "And I'm not going to let him out of jail" just because there is no treatment available, she said.

Assistant District Attorney Jim Wolf told the court this problem "is on the conscience of the legislature."

Andrews said later her main concern is that "there has to be some responsible program to address the serious issue of repeat offenders."

While increased penalties for drunken drivers, which the legislature has approved, "are reasonable . . . there also has to be prevention and treatment, she said.

"If the legislature wants people warehoused for the maximum time, then it should just do what is being done now, but if it wants to address the problem, then it has to spend the money" for treatment programs, Andrews said.

Andrews added that "the court system has done all it can do. Johnson will have been in custody without treatment for one and a half years when he is released from jail."

SUBJECT: Driving a motor vehicle while intoxicated (CSHB 6 (Judiciary))

TO: Representative Mitchell E. Abood, Jr.

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

Here is the sectional analysis of the draft of CSHB 6 (Judiciary) that you requested. It only highlights the major changes to existing law.

Section 1 adds new requirements for a driver's license application examination: (1) that the applicant know the effects of alcohol and drugs on drivers and the related dangers of driving under their influence; and (2) that the applicant know the laws relating to driving while intoxicated.

Section 2 authorizes, on refusal to submit to a chemical test of breath or if a test indicates an alcohol concentration of .08 or more, the seizure of the driver's license by the law enforcement officer and revocation of the license by the Department of Public Safety. The officer reads the driver a notice and gives him a copy of the notice. The notice explains the revocation procedure and the right of court review. The notice itself is a temporary driver's license that expires in seven days unless the driver initiates court proceedings to rescind the revocation of license. The revocation periods are the same as those imposed by a court after conviction of the same offenses under Sec. 5 of this draft. A revocation or suspension action is stayed if the person initiates a court action to rescind the Department of Public Safety's action. Procedures for court review of an administrative revocation are set out.

Section 3 adds a new basis for the immediate revocation of a driver's license by a court: the refusal to submit to a chemical test of breath.

Section 4 extends the period limited license privileges from 30 to 60 days for offenses that are grounds for immediate revocation of a license. This does not apply to driving while intoxicated or refusal to submit to a chemical test of breath. Adds a requirement that a prior offense must occur within 15 years before longer periods of license revocation will be imposed.

Section 5 requires a court convicting a person of driving while intoxicated or refusal to submit to a chemical test of breath to revoke the person's driver's license. The period of revocation depends upon whether the person has been previously convicted in this or another jurisdiction of either offense within the preceding 15 years. If the person has not been previously convicted, the period of revocation is 90 days. If the person has been convicted once, the period is one year. If the person has been convicted more than once, the period of revocation is 10 years. Under existing law the court shall revoke the license of a person for not less than 30 days for the first conviction and may grant the persor limited license privileges. The court shall revoke the license for not less than one year for a second conviction and may not grant limited license privileges. The court shall revoke the license for not less than three years for a third or subsequent conviction and may not grant limited license privileges.

Section 6 allows a court to grant limited license privileges for the final 60 days a license is revoked for driving while intoxicated or refusal to submit to a chemical test if the person has not been previously convicted.

Section 7 removes the reference to a person convicted of driving a motor vehicle while intoxicated with reference to limited license privileges, since periods of revocation are established under Sec. 5 of this bill.

Section 8 removes the references to the issuance of a new driver's licenses for persons convicted of driving a motor vehicle while intoxicated after a limited license period has expired.

Section 9 limits the penalties imposed under existing law for driving while a license is canceled, suspended, revoked or in violation of limitation to situations involving loss of driving privileges for reasons other than driving while intoxicated or refusal to submit to a chemical test.

Section 10 provides a minimum penalty of 30 days imprisonment and a fine of $500 for driving when driving privileges have been revoked for driving while intoxicated or refusal to submit to a chemical test if the person has been convicted only once. If the person has been convicted more than once of driving while intoxicated or refusal to submit to a chemical test and drives while driving privileges have been revoked, the minimum penalty is 90 days imprisonment and a fine of $1,000.

Section 11 decreases the level of alcohol in a person's blood from 0.10 to 0.08 percent or more by weight and from 100 to 80 milligrams per 100 milliliters for the purpose of determining whether the person is under the influence of intoxicating liquors. Decreases the level of alcohol in a person's breath from 0.10 to 0.08 per 210 liters for the same purpose.

Section 12 changes the penalties for conviction of driving while intoxicated. If a person has not been previously convicted within the preceding 15 years of driving while intoxicated or refusal to submit to a chemical test, the minimum sentence of imprisonment is 72 hours, and a fine of not less than $250 imposed. If a person has been previously convicted once, the minimum sentence of imprisonment is not less than 20 consecutive days and a fine of not less than $500 is imposed. If a person has been previously convicted more than once, the minimum sentence of imprisonment is 30 days and a fine of not less than $1,000 is imposed. The five-year period used for calculating the number of convictions required to increase the penalty has been eliminated, so that all previous convictions occurring within the preceding 15 years are considered. A conviction in this or another jurisdiction, if the elements are substantially similar, is counted for purposes of determining enhanced penalties. The provision for suspension of sentence after the minimum sentence is served has been eliminated. The vehicle used in commission of the offense may be forfeited.

Section 13 requires a person involved in an accident or who commits a traffic offense while driving to submit to a

preliminary breath test that may be used by an officer in determining whether to arrest the person for driving while intoxicated. Refusal to submit to the test is a violation punishable by a fine.

Section 14 makes it clear that refusing to submit to a chemical test after being arrested constitutes the crime of refusing to submit to a chemical test. Refusing to submit to the preliminary breath test provided for in Sec. 13 of this bill is a separate offense.

Section 15 provides new penalties for refusal to submit to a chemical test which are similar to the fines and terms of imprisonment imposed for driving while intoxicated under this bill.

Section 16 provides that the levels of alcohol concentration in a person's blood or breath are decreased to conform to Sec. 11 of this bill.

Section 17 provides that the levels of alcohol concentration in a person's blood or breath are decreased to conform to Secs. 11 and 15 of this bill.

Section 18 removes provisions allowing the district court to find extenuating circumstances and to modify or nullify the suspension or revocation of a driver's license or permit for refusing to submit to a chemical test of breath.

Section 19 adds new sections providing for the forfeiture of a motor vehicle used in the commission of an offense under AS 28.35.030 (Operating a Vehicle, Aircraft or Watercraft While Intoxicated), and also for the forfeiture of a motor vehicle used in the commission of an offense under AS 28.35.032 (Refusal to Submit to a chemical Test of Breath). In addition, provision is made for the remission of forfeitures, a procedure to allow a person with ownership or security interests in a forfeited motor vehicle to claim the vehicle or interest in the vehicle through court proceedings. A municipality is granted authority to provide for impoundment and forfeiture of a motor vehicle in similar circumstances.

Section 20 repeals provisions that have been replaced by other provisions throughout this bill.

REPRESENTATIVE ABOOD's COMMENTS

ON HOUSE BILL #6

(before the Judiciary Committee,
March 15, 1983)

House Bill # 6, under the title "An Act relating to driving a motor vehicle," has a rather innocuous sound as to meaning. But I want to point out some of the meaning of that.

I would like to quote Mr. Leo Walsh, President of the West Anchorage High School student body, from a statement he made to me by phone March 14, 1983. Mr. Walsh says:

> "Individually, as a senior in high school, if the drinking age were raised to 21 from the present age of 19, it wouldn't make that much of a difference in my attitude towards alchoholic beverages. I have been taught to deal with it in a responsible manner."

That is a profound statement when dealing with responsible drinkers and irresponsible drinkers, regardless of age.

That is the whole point of House Bill # 6; the tough sentences, fines, impoundments, and confiscations of vehicles are all <u>tools</u> to eliminate the drunk driver from our highways.

I won't quote statistics, because I am sure you are all aware of them. But one fact in particular that I will bring you back to is the reason for the formation of M.A.D.D.(Mothers Against Drunkers) in Alaska, which is the deaths of the Gerrish children

This individual tragedy was <u>enough</u> to prompt the people of this State, (as well as similar tragedies in other states) to finally say "THAT IS <u>ENOUGH</u>!! WE NO LONGER CAN TOLERATE THE TAKING OF LIVES AND PROPERTY BY THE

IRRESPONSIBLE, DRUNKEN DRIVER!!

That is why House Bill # 6 has such rigid and tough clauses against drunken driving. To the responsible driver and drinker, it will really not make any difference; because of the sense of responsibility that he has toward his family, friends, and associates.

To the irresponsible driver and drinker, it will mean longer jail sentences, heavier fines, empoundment of his vehicle (or the friend's vehicle that he was driving), confiscation of the vehicle, possible loss of employment, and embarrassment to his loved ones.

But more than that, this legislation will take him off the streets if he considers the penalities and punishment of driving while intoxicated. This is the sole thrust and effort of House Bill #6.

Mr. Chairman, in conclusion I believe it is the duty of this Committee, the Court system, and especially those people who think nothing of driving while intoxicated, to take this law seriously; to realize that not just the legislature, or the Court system, but all citizens of our State cannot and will not tolerate any more deaths, injuries, property damage, and pain.

Mr. Chairman, thank you for the opportunity to present the people's case against drunk driving to this Committee. I urge you to act promptly, for each day we delay may mean another life.

Drunk Driving Penalties In Other Countries

For those who think that the new DUI laws recently passed in many states are far too harsh, we advise those people to take a look at how other nations around the world are dealing with the problem of the drinking driver. In some of the following cases you'll find that a few of these countries don't have near the drunk driving problem that now exists here in the United States. The apparent reason for this lack of a high number of DUI cases in these other countries would seem to be directly attributable to the no nonsense, rountinely dealt, strict punishments handed out by the courts in these foreign countries. This information has been drawn from newspaper accounts and statistics supplied to MADD by members. Any incorrect statements are attributable to the sources, not the writers.

West Germany • If a suspected drunk driver tests out at 0.8 mills of alcohol in the bloodstream, his license is automatically suspended for a minimum of three months, with a maximum of one year in prison or a fine. The police also use roadblock checkpoints to randomly test drivers for alcohol consumption.

Norway • In Norway, it's a mandatory, minimum sentence of three weeks in jail for any driver caught with a blood-alcohol level of .5 per mil or more. That means that five drops of alcohol per 1000 drops of blood. A fine may be added scaled to income. Suspended sentences are extraordinary. On the first offense you lose your license for at least one year. On the second offense within five years, you lose your license for life.

Israel • The problem of the drinking driver on the roadways in Israel is virtually non-existant, due largely to the two-year prison term that awaits convicted drunken drivers. In 1980, an Israeli Embassy spokesman was quoted as saying that there is about one drunk driving case in Israel a year.

Soviet Union • First offenders are banned from the roadways for six months. In one instance, the drunk driver who killed six and injured five more during a drive through northern Moscow was sentenced to death.

Great Britain • Those convicted face automatic license suspension for one year. In addition, if the case is aggravated, lifetime banishment from the roadways is possible. Other sentencing possibilities include six months in jail, up to an $1800 fine, and assignment to gardening, garbage collection, and other community service.

Egypt • Like most Moslem countries, alcohol usage is prohibited, drunken driving cases are rare.

India • Arrests are rare, but penalties are severe. Those convicted face six months in prison, $112 fine, or both.

South Korea • Just an arrest results in an automatic two month license suspension, with a conviciton meaning a jail sentence of up to one year and a fine of $700.

Japan • First offenders can face up to four months in jail and a $200 fine. Licenses are also revoked and can be returned only upon successful completion of a driving test one year later.

Chile • Those convicted face from 61 to 541 days in jail. If someone has been injured the minimum prison sentence is 18 months.

Federal Legislative Victory

The U.S. Congress has joined the fight to rid our roadways of the drunken driving menace. On September 29, the House of Representatives unanimously passed the legislation which contained the provisions of H.R. 6170, also known as the Howard-Barnes bill. On October 21, the Senate also unanimously passed the legislation. On October 25, President Reagan signed this welcome provision into law.

Essentially, this new law will provide important federal aid in the form of incentive grants to those states setting up comprehensive, community-based drunk driver control programs. Another attractive feature of the Howard-Barnes legislation is that it will provide the incentive grants out of funds which are already budgeted, thus the federal debt will not be increased because of this program.

A special thanks is in order to the President, Congressmen Howard and Barnes, and the individuals and groups responsible for the passage of this essential new measure.

SUBJECT: Driving while intoxicated
(HB 6) (CSHB 6)

TO: Representative Mitchell E. Abood, Jr.

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked me to indicate the changes contained in the draft CSHB 6 as compared to HB 6. I have done this in the form of a sectional analysis of CSHB 6 and the section numbers contained in the headings refer to CSHB 6.

Section 1. This is the same as sec. 1 of HB 6.

Section 2. This is the same as sec. 2 of HB 6.

Section 3. The language "arising out of the operation of a type of motor vehicle for which a driver's license is required" is inserted into subsection (c). The change limits the application of provisions dealing with revocation of a driver's license to situations involving the use of a vehicle, such as an automobile, for which a driver's license is required. The crime of driving while intoxicated under AS 28.35.030 can be committed by a person driving any type of motor vehicle, defined under AS 28.35.260(7) to mean any self-propelled vehicle, or an aircraft or watercraft. Without the added language a person convicted of driving while intoxicated in a case involving an airplane or boat would, under the strict terms of the provision, loose his license to drive an automobile, a somewhat puzzling result. This, however, is the situation under existing AS 28.15.-181(c) which requires revocation of a driver's license, for an automobile, for the crime of driving while intoxicated despite the fact that the crime may have involved a vehicle of a type for which no driver's license is required, such as an airplane or boat.

Section 4. This is the same as sec. 4 of HB 6.

Section 5. This is the same as sec. 5 of HB 6.

Section 6. This prohibits driving while a driver's license is cancelled, suspended, revoked or in violation of a limitation placed on the license whether the curtailment of the privilege to drive occurred in this state or another jurisdiction. The change was adopted by the House Community and Regional Affairs Committee as Amendment No. 2. The minimum term of imprisonment for driving without a license has been increased from 14 to 90 days in subsection (a) pursuant to Amendment No. 5 adopted by the House Community and Regional Affairs Committee. In subsection (b) the notice given by the department to a person whose license is curtailed of the consequences of driving without a license is altered to reflect the new 90-day imprisonment provision.

Section 7. This is the same as sec. 7 of HB 6.

Section 8. At the bottom of page 5 and the top of page 6, the language "if the offense arises out of driving a type of motor vehicle for which a driver's license is required" is inserted, since this provision has to do with revocation of a driver's license and impoundment and forfeiture of a motor vehicle. The reason for the change is the same as that indicated under sec. 3. In addition, this makes it clear that the impoundment and forfeiture provisions are to be applied to vehicles for which a driver's license is required such as automobiles, but not to other vehicles such as boats or planes.

Section 9. This contains the material from sec. 13 of HB 6. It was moved to a new section number at the request of the revisor of statutes, who has authority in any case to renumber sections. The language "to a person driving a motor vehicle of a type for which a driver's license is required" has been inserted in subsection (b) and (c)(1), so that the provisions dealing with administrative revocation of a driver's license apply only if a person is driving a vehicle such as an automobile. A chemical test under the implied consent statute can be given to a person driving any type of motor vehicle, including an aircraft or watercraft. Without this change, a driver's license, for an automobile, could be revoked on the basis of a test given in conjunction with the operation of a plane or boat. Under paragraphs (1), (2) and (4), the provision for suspension and for refusal to issue an original license have been included as possible department actions along with the provision for

revocation now contained in HB 6. In subsection (3) the word "suspension" is used in connection with curtailment of the privilege to drive for a limited period of time. The word "revocation" is used to refer only to permanent denial of the privilege to drive. Under existing statutes these terms are used interchangeably. The first sentence in (e) is inserted pursuant to Amendment No. 1 adopted by the House Community and Regional Affairs Committee.

Section 10. This contains material found in sec. 9 of HB 6. As in the previous section, limiting language is inserted so that provisions dealing with curtailment of a driver's license apply only if a person is arrested while driving a vehicle such as an automobile, for which a driver's license is required. Under paragraphs (1), (2), and (4), the provision for suspension and for refusal to issue an original license have been included as possible department actions along with the provision for revocation now contained in HB 6.

Section 11. This contains material found in sec. 10 of HB 6. Limiting language is inserted so that provisions dealing with curtailment of a driver's license apply only if a person refusing to submit to a chemical test was arrested while driving a vehicle, such as an automobile, for which a driver's license is required.

Section 12. This contains material found in sec. 11 of HB 6. The word "suspension" is used in connection with curtailment of the privilege to drive for a limited period of time. The word "revocation" is used to refer only to permanent denial of the privilege to drive.

Section 13. This contains material found in sec. 12 of HB 6.

Section 14. This contains material found in sec. 14 of HB 6. "Suspension" is used in connection with curtailment of the privilege to drive for a limited period of time. "Revocation" refers to permanent denial of the privilege to drive.

Section 15. The language "of a type for which a driver's license is required" is inserted in (a) to limit this section to impoundment of vehicles, such as automobiles for which a driver's license is required. An offense under AS 28.35.030 may involve other types of motor vehicles, such

as airplanes. Without this change these might also be impounded.

Section 16. The language "arising out of driving a motor vehicle of a type for which a driver's license is required" is added to Sec. 28.35.037(a) to limit forfeiture to vehicles such as automobiles or motorcycles. An offense under AS 28.35.030 or AS 28.35.032 may involve other types of motor vehicles, such as airplanes or boats for which no driver's license is issued. Without this change these might also be forfeited. Paragraph (3) is added to Sec. 28.35.038(b) and in (c) "may" is changed to "shall" pursuant to Amendment No. 4 adopted by the House Community and Regional Affairs Committee.

Section 17. This is the same as sec. 17 of HB 6.

MEMORANDUM February 21, 1983

SUBJECT: Revocation of driver's license
(Work Order No. 13-0480)

TO: Representative Mitchell E. Abood, Jr.

FROM: Tamara Brandt Cook
Legislative Counsel

TBC

You have asked whether the state may permanently revoke a person's driver's license after more than two convictions for driving while intoxicated or refusal to submit to a chemical sobriety test. It is my conclusion that the state may permanently revoke a person's license under those circumstances.

The state legislature under its police power has full authority to control and regulate the licensing of drivers, since driving involves danger to the public and requires a degree of knowledge on which others must rely. The state may prescribe the qualifications of persons who are eligible to be licensed and may establish the terms on which the right to a license depends. Since a license to drive is not deemed to be a vested right, the license is subject to suspension or revocation as may be provided by statute. The legislature has full authority to prescribe the conditions under which a license will be revoked when the public interest requires. Corpus Juris Secundum, Motor Vehicles, secs. 146, 154, 164; Breeze v. Goldberg, 595 S.W.2d 318 (Mo. 1980).

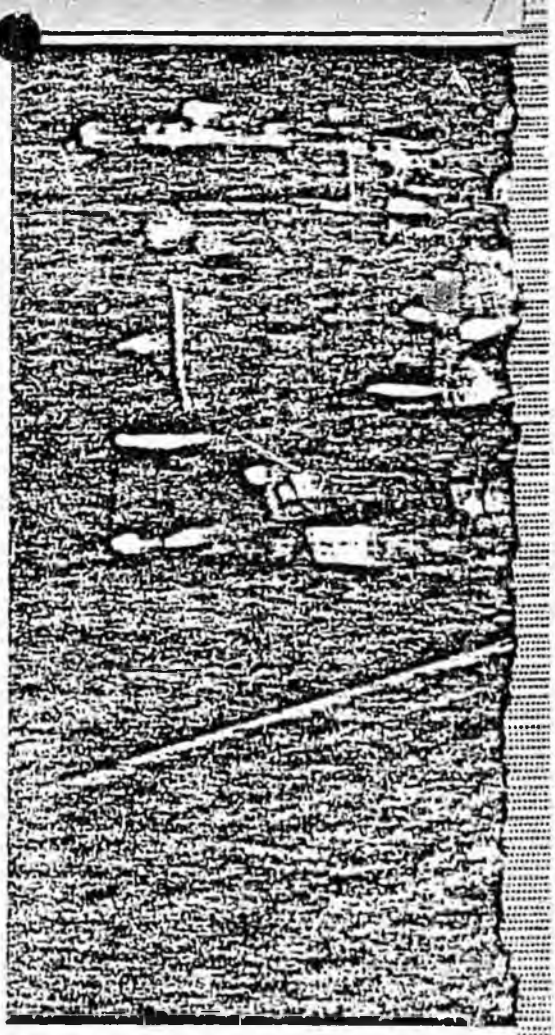
It is generally held that revocation of a license is not a penalty and that its purpose is not to punish but to protect the public from a dangerous driver. Consequently, it is not an unconstitutional infringement of the right to travel to deny a person the privilege to drive, since there is no right to travel by a specific method. State v. Scheffel, 514 P.2d 1052 (Wash. 1973), appeal dismissed, 94 S.Ct. 1984, 416 U.S. 964 (1974).

The legislature has full authority to designate the agency through which a license will be revoked. The discretionary power vested in administrative officers in suspending or revoking a license has been held to be in the nature of an administrative or executive function. Statutes authorizing administrative revocation of licenses have been held not to be invalid as a delegation of legislative power or judicial authority to the executive branch. Daneault v. Clark, 309 A.2d 884 (N.H. 1973). Violations of traffic laws, including driving while intoxicated, have been held to constitute grounds for administrative revocation of a license whether or not there has been a conviction for the offense. Severson v. Stoppel 152 N.W.2d 281 (Iowa 1967); State v. Scheffel, supra. A prior valid conviction is essential for revocation only if the statute expressly requires. Corpus Juris Secundum, Motor Vehicles, sec. 164.5.

The fact that no accident or tragedy resulted from the misconduct of a driver does not mitigate the offense or bar revocation of a license. Commonwealth ex rel Lamb v. Hill, 82 S.E.2d 473 (Va. 1954). A license may be revoked for refusal to take a chemical sobriety test. (See 88 A.L.R.2d 1064.) A license may also be revoked for convictions in other states, and the period of denial of the privilege to drive may be increased depending on the number of times a person is convicted. Carter v. State, 625 P.2d 313 (Alaska 1981); Danks v. State, 619 P.2d 720 (Alaska 1980); (see 87 A.L.R.2d 1019).

It is recognized that a driver's license may be revoked permanently and that an agency may refuse to ever grant a license to an unfit driver. Carmichael v. Scheidt, 106 S.E.2d 685 (North Carolina 1959) (involving permanent revocation upon third conviction of driving while intoxicated where one conviction occurred out-of-state); State v. Crotinger, 62 N.E.2d 494 (Ohio 1945) (involving permanent revocation for failure to stop even though the offense was a misdemeanor); MacKinnon v. Ferber, 84 A.2d 647 (New Jersey 1951) (upholding denial of a new license by the agency after a second conviction of driving while intoxicated where the second conviction occurred ten years after the first conviction and the court failed to order permanent revocation); Gullard v. State, 497 P.2d 93 (Alaska 1972) (upholding revocation for driving while intoxicated for one year and noting that the person must reapply for a license and that the Department of Public Safety must

independently evaluate the acceptability of relicensing him).



If I can be of further assistance in this matter, please let me know.

Cindy Ferguson with twins Tony and Tommy, D.C. crash: 'Socially accepted murder'

The War Against Drunk Drivers

The horror of those seconds will forever haunt Cindy Ferguson. She was driving her three sons—the identical twins Tommy and Tony and her baby, Lee—to a party, when suddenly her Vega was smashed from behind. A tremendous explosion hurled her, Tony and Lee onto the street. Cindy raced back to the car and pulled Tommy's burning body from the wreck, throwing herself on him to smother the flames. A friend, Steve Willoughby, remained trapped inside, screaming, a halo of fire encircling his face. As Cindy lay there on top of her son, the other driver approached her. But when she pleaded for help, he staggered away.

Willoughby, 20, and Lee Ferguson, two, died on that Memphis street. Tommy, five, was in critical condition for six months with burns over 65 percent of his body. He has lost almost all use of his kidneys and most of his hearing. He has had 100 operations already and faces 14 years of reconstructive surgery.

The other driver suffered a broken nose. Despite at least seven drunk-driving arrests in four years, he had never spent a day in jail. His 5- to 10-year sentence for second-degree murder provided little solace for Mrs. Ferguson. But her nightmare was primarily responsible for Tennessee passing one of the toughest drunk-driving laws in the nation—despite concerns that it would overcrowd the courts and prisons. "I was more concerned," said state Sen. Curtis Person, its sponsor, "about the overcrowding of hospitals, morgues and cemeteries."

Drunk driving is a national epidemic, what one reformer calls America's "socially accepted form of murder" (chart, page 37). More Americans have died at the hands of drunk drivers during the past two years than were killed in Vietnam; on average, about three Americans are killed and 80 are injured by drunk drivers every hour of every day. The drunken slaughter over the past decade is a staggering one-quarter of a million Americans—the entire population of Rochester, N.Y. Safety experts say that one out of two Americans will be victimized by a drunk driver in his lifetime, hardly surprising when the National Highway Traffic Safety Administration (NHTSA) contends that up to 10 percent of all drivers on weekend nights are legally intoxicated.

But finally, outraged Americans are trying to put an end to the carnage. In a major break with past public policy, which concentrated on highway-safety conditions and protective devices such as air bags, a coast-to-coast crusade aims at getting drunk driv-

Thomas Sexton III, 15: *Killed instantly when a drunk driver broadsided the car in which he was a passenger. His killer was sentenced to two years' probation, fined $200 and lost his license for 16 months.*

Paul Lawler, 15: *Crushed against a wall when a drunk drove off the highway. His killer was on probation after three prior drunk-driving convictions and is eligible for parole in July after serving two years.*

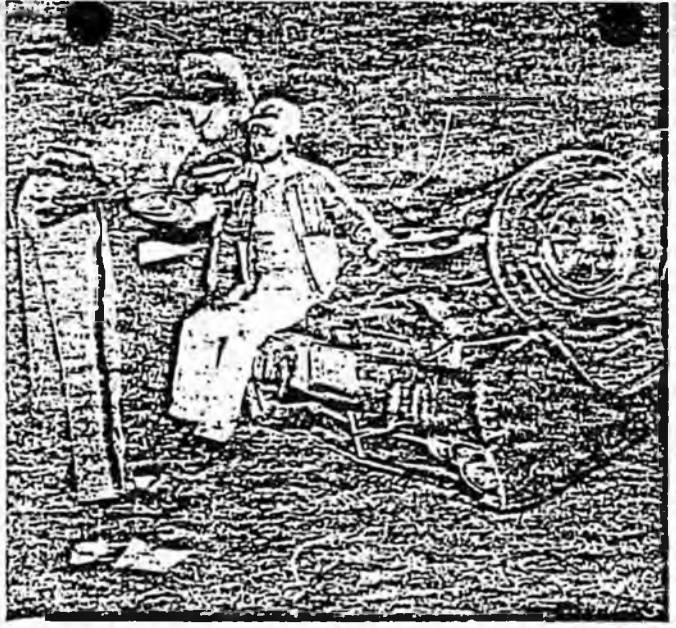
ers themselves off the roads. A recent Gallup poll indicated that fully 77 percent of all Americans support mandatory prison sentences even for first-time offenders. President Reagan has declared the campaign a national priority, and Congress is considering bills that would award money to states that crack down.

'Failed Experiment': Already 27 state legislatures this year have passed their own versions of the toughest drunk-driving bill in the nation, and more legislation is pending in others. Twenty states have boosted the legal drinking age, reversing a Vietnam-era trend toward lower drinking ages that made alcohol-related crashes by far the single biggest killer of Americans between the ages of 16 and 24. In New Jersey the average number of persons killed annually by 18- to 20-year-old drivers climbed by 176 percent after the state lowered its drinking age to 18. "Statistics have shown us that kids can't handle alcohol," says New Jersey state Sen. C. Louis Bassano, sponsor of a bill to raise the drinking age to 21. "It's an experiment that has failed."

Liquor is so integrated into the nation's social and economic fabric that until recently, drinking and driving was an almost untouchable political issue. But the drunk driver who kills isn't usually the social drinker who has had one beer too many (box, page 36). The NHTSA reports that the average blood alcohol concentration of a drinking driver killed in a crash is .20—twice the rate for legal intoxication in most states. Still, judges, juries, prosecutors and legislators, most of whom drink socially, have tended to view the drunk driver with "there but for the grace of God, go I" sympathy (page 38). The result: loopholed laws that have been cumbersome to enforce, wholesale plea bargaining (California charged only 5,000 people with reckless driving in 1978, but permitted 80,000 drivers to plead guilty to it) and judgments of the lecture-and-slap-on-the-wrist variety (Idaho arrested 1,800 persons for drunk driving last year, convicted one-third of them and jailed just two). Explains NHTSA administrator Raymond Peck, "The well-scrubbed father of four standing before the judge doesn't look anything like the falling-down drunk that was pulled out of the wreck."

Time Bombs: America's tacit acceptance of drinking and driving has the effect of loosing time bombs on the nation's highways. An example was a Georgia man who, after his 13th conviction for driving while drunk, was sentenced to just one year in

Cari Lightner, 13:
Killed when a drunk driver struck her as she walked to a church carnival. Her killer, on bail after a drunk-driving arrest and with two prior convictions, was paroled after serving 19 months.



David Gunderman, 4:
Run over as he stood on the sidewalk waiting for an ice cream. His killer, who had eight prior convictions ranging from hit and run to drunk driving, was sentenced to five years in prison.

prison. Thus, he was drunk and on the road again 20 months later when he crashed and killed himself. Or consider the case of William Rowan. Rowan was once sentenced to 45 days in jail, a mild penance for a California driving record that carried six convictions for drunk or reckless driving, two for hit and run. Last March, after leaving a downtown Santa Ana bar, Rowan drove onto a sidewalk, killing four-year-old David Gunderman, who was waiting for the ice-cream man. After hitting the child, Rowan slumped in his seat and lit a cigar. Police measured his blood alcohol content at .27.

Campaigns against drunk driving have always had sobering truths on their side; what they lacked was a real constituency. All that may have changed one spring afternoon in 1980, when 13-year-old Cari Lightner of Fair Oaks, Calif., was struck from behind and killed by a hit-and-run driver as she walked to a church carnival. Cari's mother was stunned to learn that the driver, a 47-year-old man who had two previous drunk-driving convictions and was out on bail on a third arrest, had spent only two days in jail previously and was unlikely to wind up there for killing Cari. Candy Lightner quit her real-estate job and launched Mothers Against Drunk Drivers (MADD), giving the public outcry against drunk driving the constituency it has always needed—the victims.

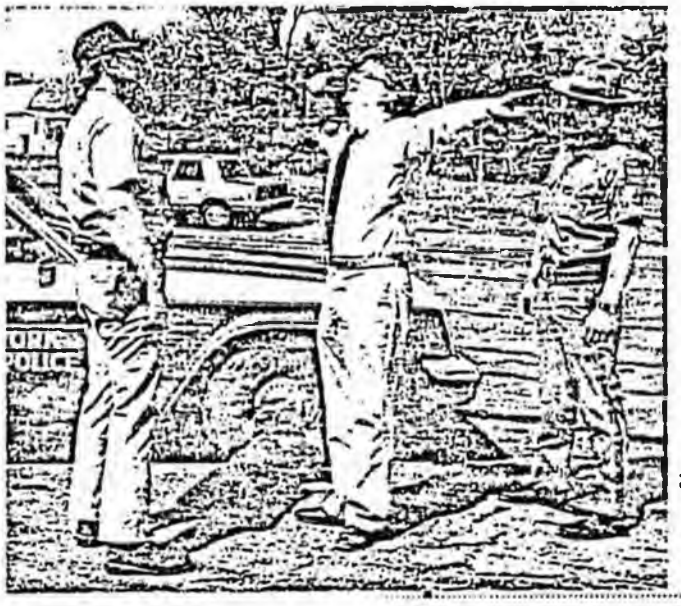
Photos © P. F. Bentley—Photoreporters

Victim in New York: One out of every two Americans

In the past, says Edward Kunec, a NASA official who joined MADD in Virginia after drunk driver last summer, "people who had these tragedies closeted themselves and said it was fate or the will of the Lord. Now people are coming out of the closet—and they are angry." In just two years, MADD has grown to 83 chapters in 29 states. Remove Intoxicated Drivers-USA (RID), founded in New York under similarly tragic circumstances, went national last year and now boasts 55 chapters in 29 states. The anger that is the movement's glue has made these organizations aggressively self-righteous and militant. "You can't be too strident," explains RID national coordinator Doris Aiken. "I don't know how you can tell someone nicely that they are incompetent to drive." Aiken warns those who view this campaign as a fad that will soon fade: "The pendulum will not swing back. There is an endless supply of victims."

The legal system often transforms the victims' grief into outrage. Paul Lawler, 15, died five days after a van barreled off a Massachusetts highway and into a restaurant entrance, pinning him against the restaurant wall. The drunk at the wheel was on probation for his third drunk-driving con-

Driving While Intoxicated

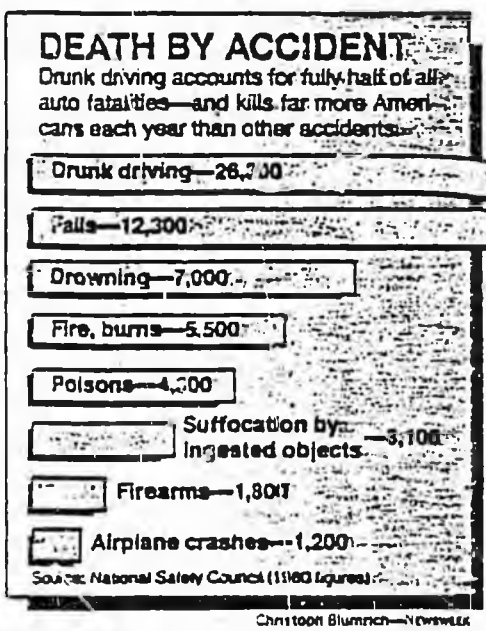


Many social drinkers think their driving remains unimpaired after a couple of cocktails. NEWSWEEK's *Ron Givens tested that thesis under the supervision of New York state police. His report:*

There was something absurd about drinking on an abandoned Schenectady airport runway while surrounded by police, but I wanted to find out how alcohol affected my driving skills. So I drank my gin and tonic next to an unmarked trooper car. As my bartender, Sgt. Henry Michelin, put it: "Just like the neighborhood bar—someplace to lean and drink."

An average male guinea pig—5 feet 10, 170 pounds—I had arranged to take on a difficult state-police driving course both sober and drunk. I supplied the gin and tonic, the state police provided a car. The course requires precise maneuvering around hard rubber cones—forward and backward. Scoring combines the time taken to complete the course with a five-second penalty for each mistake—such as flattening a cone. And a passing tally for troopers is 2 minutes 17 seconds. My blood alcohol level was measured by a preliminary-breath-test (PBT) device the size of a cigarette pack.

After eight practice runs through the course, I had whittled my time down from 3 minutes 10 seconds to a passing score, and it was time to begin drinking. My first gin and tonic—containing three ounces of 80-proof booze—placed my blood alcohol level 45 minutes later at .07 (70 milligrams of alcohol per decaliter of blood), high enough in New York to be charged with driving while impaired by alcohol. At this point I was slightly lightheaded, but I didn't feel uncoordinated. My driving score told a different story. Not only did I add 1 minute 12 seconds to my previous, sober record, but my score was 19 seconds over my very first attempt.



Givens flunks the touch-your-nose test: Only time helps

Wretched: During my first post-drink attempt, I unconsciously tried to compensate for my condition through caution—a tactic that experts say is common among drunk drivers. In my case it didn't work: it took me longer and I made many more mistakes. This drop-off in performance was intensified by two more drinks, each containing one ounce of gin, which put my blood alcohol level at .11, or enough to be charged with driving while intoxicated or driving with a blood alcohol level of .10 or more. Now I could easily tell that I was uncoordinated. I stumbled slightly when I walked and I flunked the touch-your-nose-with-your-finger test. My driving ability plummeted from poor to wretched. My score—4 minutes 26 seconds—was almost double my final sober result. "You have no business being in an automobile out

viction. He was sentenced to four and a half years in prison—including the then maximum of two and a half years for vehicular homicide—and is eligible for parole next July, just two years after the accident. "I was under the impression anyone arrested for this kind of thing would have the book thrown at him," says Paul's mother, Carol Lawler, who now heads the Greater Boston chapter of MADD. "I didn't know vehicular homicide was a misdemeanor."

Mark and Bonnie Schuett turned the death of their four-year-old daughter, Kelly, who was killed as she walked near her home in quiet Ixonia, Wis., into a statewide *cause célèbre*. The driver, a 29-year-old man with a prior drunk-driving arrest, pleaded no contest to driving while intoxicated and was given a suspended five-day jail sentence and fined $284. His license was revoked for a year—but was actually restored after 90 days because he took treatment at an alcohol-abuse center. "This man got away with hitting and killing my child," says Mrs. Schuett. "Her life means more than a $284 fine." As a result of the Schuetts' lobbying effort, a new Wisconsin law went into effect last May that permits the state to suspend the license of anyone arrested for an alcohol-related driving offense—even before a trial. "Maybe we've saved somebody else's life," says Mrs. Schuett. "But I'm still angry."

Guilt: If anger fuels the movement, guilt is its motor oil. Thomas and Dorothy Sexton recall going to court to witness the trial of the man whose blood alcohol content was .26 when he killed the Sextons' 15-year-old son, Tom. They saw a car thief sentenced to two years in jail, while their son's killer—who pleaded guilty to homicide by a motor vehicle—was sentenced to two years' probation and fined $200. "We painfully relate our experience and say, 'If you don't want that to happen to you, let's do something'," says Sexton, a U.S. Department of Agriculture scientist who is now active in Maryland's MADD chapter. "I'm convinced if I had been involved in something like this five years ago, Tom would be alive today."

The movement's approach to the drunk-driving problem is essentially punitive. While legislation varies from state to state, it usually makes driving with .10 blood alcohol content (three beers or glasses of wine or shots of whisky consumed by a 150-pound man in two hours) a crime. In addition, many of the new laws make prison mandatory, if not for the first offense, certainly for the second. They often increase penalties for drivers who refuse the blood alcohol test and require that all convictions—regardless of the court disposition—be listed on a driver's record.

Many states are delighted by the preliminary results of the new laws. In Maryland, drunk-driving arrests by state police have gone up 45 percent and highway fatalities down almost 20 percent since its law went into effect. Maine, which last year began mandatory jail sentences for first-time offenders, has experienced a 47 percent reduction in alcohol-related fatalities. Oregon has had the most experience—its crackdown began in 1971—and the most success. During the '70s, highway fatalities dropped 6 percent and Oregon's fatality rate declined 35 percent despite the presence of 46 percent more drivers and 62 percent more vehicles on the road.

Success may be due to more than tough laws. Oregon has coupled its legal effort with a media campaign that urges Oregonians to report drunk drivers to a special telephone hot line. One hot-line spokesman is Donny Durrant, a former logger who had lost his license four times for drunk driving before he drove off the road at 85 mph and broke his neck. Durrant, now a quadriplegic, says in a TV message: "I wish someone had gotten me off the road before I had the accident which drastically changed my life."

Other states are backing their legislation with a variety of programs. South Dakota places highway signs reading, "X marks the spot . . . THINK!" at the almost 600 locations where drivers have lost their lives since 1979. Some states have considered efforts to stigmatize the drunk driver publicly. One Pennsylvania legislator proposed a special red license plate for all drivers convicted of driving while intoxicated—a modern-day scarlet letter. Local police in both Maryland and Massachusetts have gone so far as to use roadblocks, called "sobriety checkpoints," to deter and detect drunk drivers, though the Massachusetts effort has been ruled unconstitutional by a state court. Many states, however, complain that the new laws overtax their increasingly limited resources. Maine was the only state to include in its crackdown legislative package a new tax on liquor, which is expected to produce $2 million to $3 million annually that will be earmarked for treatment and prevention of alcohol problems.

Court Watch: The anti-drunk-driving campaigners are pressuring the courts as well as the legislators. One such group keeps constant watch in North Carolina's Forsyth County District Traffic Court. "People walk up to us and tell us things have changed," says Sandra Nicastro, one of the group's court fixtures. "Lawyers have told their clients, 'I don't think I can get you off this time because that lady's sitting there listening'." Some judges need little encouragement to get tough. Maine judges have meted out an average jail sentence of eight days to drunk drivers under the state's new laws—four times the permitted minimum. And a Mecklenburg County, N.C., judge may have set a new standard when he sentenced a drunk driver, who had eight prior arrests but had caused no injuries, to three years in jail.

Many safety experts insist crusaders should be focusing on automobiles and highways, not on drivers. H. Laurence Ross, a sociology professor at State Univer-

on the road," said Sergeant Michelin.

While impairment due to alcohol varies from person to person and even, depending on circumstances, for the same individual, experts say that driving skills are significantly diminished at a blood alcohol level of .10. That's why many states have adopted .10 as the limit for determining when someone has been driving while intoxicated. However, Robert Pandina, acting director of the Center of Alcohol Studies at New Jersey's Rutgers University, argues that there is impairment at lower levels as well. Pandina explains that the .10 standard is "a kind of compromise that recognizes that this is a drinking society."

Wide Awake: Contrary to old wives and drinking buddies, nothing will temper the effects of alcohol except the passage of time—about two hours for every ounce consumed. Food slows the release of alcohol into the bloodstream without blunting its effect, and exercise and coffee will only produce a "wide-awake drunk"—someone alert enough to spot trouble but unable to do anything about it. That was clear enough to me as I rode with Sergeant Michelin back to town; my slow-motion brain couldn't keep up with the rush-hour traffic on the highway. I couldn't help remembering the times when I had been this drunk and driven, and the thought scared the hell out of me.

sity of New York at Buffalo, who has studied crackdowns on drunk driving, says deterrence only works for the short term when the problem is treated as a moral one rather than a safety question. In a new book, he writes: "A vehicle and highway that are safe for an alcohol-influenced driver are also safe for a driver who has a heart attack, who dozes off, who drops a lighted cigarette on his lap, who fails to see a stop sign. . . ."

Others are convinced that the lock-'em-up approach is meaningless unless it's combined with therapy. "I don't think the tougher laws will stop the hard-core alcoholics," says Col. Tom Anderson, director of the state police in Alaska, which has had a mandatory prison law since 1978. "It's a mess," agrees Arthur Snowden II, director of the state's court system. "We're just putting people in high-priced jails . . . just taking them off the street is not going to solve the problem." But Maryland district court Judge David Bates thinks he knows the solution. Bates gives drunk drivers the maximum permissible sentence, then waives it if they are willing to enter an appropriate education or treatment program. While it is hard to measure the success of Bates's approach because probationary sentences weren't included on drivers' records until last year, Bates says only 149 of the 5,697 drivers referred to the program dropped out or had their probation revoked.

But putting drunks behind bars does take

How Drunks Get Off

Defense attorney Randy Taylor parades around the courtroom, his arms pinned behind him by handcuffs. After several minutes of histrionic discomfort he compels the cop on the witness stand to remove the cuffs and place them on the defendant, a man charged with driving while intoxicated (DWI). Then Taylor seizes his client and bullies him about. Wasn't that how the police acted when they arrested him? he asks the witness. Finally, the Dallas lawyer shoves his client into a chair and barrels up to the cop: "Isn't it true you said, 'Shut up, you s.o.b.!' and kicked him in the leg?" And Taylor wins an acquittal.

"That's the way you get your client off," Taylor says. "The single most important factor in the typical DWI case is trying to make the jury put themselves in the place of the defendant." Taylor knows few restraints. On one occasion, after pleading his woman client guilty of DWI, he implored the jury, "The government wolves are really howling for blood tonight, waiting to put this poor little girl in jail for 30 days, taking her away from her husband." Then he put the cuffs on her, and she broke down and wept, attesting to the humiliation she had suffered. Despite a prior DWI conviction just 30 days before this arrest, she was sentenced to only three days in jail. Another time Taylor concluded his summation by stage-whispering to his client's four children, "Kids, I've done everything I can for your daddy." Pointing to the jury, he said, "Now it's up to these folks here." The defendant, who Taylor admits was probably guilty, was acquitted in 15 minutes.

'Hitting that child with your car must have really jolted you. Keep your driver's license and get yourself a couple more drinks'

The concept of "there but for the grace of God go I" has been the cornerstone of DWI legal defense ever since drunks started stepping on the gas. While the appeal is emotional, its foundation is solidly statistical: a recent Gallup poll reveals that four out of 10 Americans admit to having driven after drinking. But the extraordinary public campaign against drunk driving is having its impact even on jurors who may understand—from personal experience—the drunk driver's plight. The Texas Criminal Defense Lawyers Project recently has sponsored two special programs on DWI defense. Its program notes read: "The public has come to view DWI as a pernicious force in their communities and are demanding stiffer penalties . . . this institute is designed to teach you how to effectively represent your client . . ." Among the tactics garnered from the program and talks with top defense attorneys:

■ **Challenge the evidence.** Breath-analysis tests should not be accepted as gospel. Force the prosecution to prove that the testing machine was in good working order, that its chemicals had been tested and that its operator had proper qualifications. The tests aren't foolproof. Some people such as diabetics, who have certain chemicals in their breath, or denture wearers, who trap alcohol fumes along their gums, trigger false positive readings. If a blood sample was taken, make sure to request it; if it no longer exists, claim that it was purposely destroyed.

■ **Track down witnesses.** Find people who were with the defendant before he got behind the wheel and get them to testify about how sober he was. Attorney F. Lee Bailey's acquittal on DWI charges in California stemmed partly from testimony about his sober behavior on the evening of his arrest by people who were at the restaurant where Bailey dined.

■ **Get the insurance company involved.** Insurers tend to see cases as business problems, not moral issues, and are often anxious to settle damage matters expeditiously. Don't assume that the victim's families want vengeance; often they just want the case to go away too.

■ **Visit the scene of the arrest.** Since it can take up to six months between the arrest and the trial, the arresting officers can often be tripped up on details about the location. "If they [make mistakes]," says Taylor, "I can argue, 'Well, if you can't remember this, why can you remember anything else better?' "

■ **Try to talk with the police—and hope you fail.** When the police won't cooperate, argue that the witness is hostile, biased and has an ax to grind.

■ **Carefully consider the choice between judge and jury.** Taylor opts for a jury 95 percent of the time. He says, "I can manipulate the jury's minds more than I can a trial judge who's been on the bench 15 years and seen all my tricks." But cases that revolve around complex points of law may best be left to a judge.

The courtrooms are the ultimate battleground in the war on drunk driving. And to win the war, reformers must find ways to force jurors and judges to sympathize with the victims of drunk drivers, instead of the defendants.

FACTS ON ALCOHOL AND HIGHWAY SAFETY

The Problem

Overview:

Drunk driving continues to be one of our nation's most serious public health and safety problems. Some 50 percent of all drivers killed each year have blood alcohol concentrations in excess of the legal limit, 0.10 percent. In single vehicle fatal crashes, where it is more certain who is at fault, upwards of 65 percent of those drivers who die were legally drunk. Over the past 10 years, the proportion of highway deaths involving alcohol has averaged a tragic 25,000 per year. Thus, a staggering one quarter of a million Americans have lost their lives in alcohol-related crashes in the last decade.

The cost of drunk driving has a high economic cost to this country as well. A conservative estimate of the total economic cost of drunk driving is put at 24 billion.

Alcohol and Crashes:

Alcohol is a major contributing factor to fatal (and serious injury) automobile crashes. According to a 1978 review of the literature, approximately 60 percent of fatal crashes involved a driver who had been drinking. Between 40 and 55 percent of such crashes involved a driver who had a blood alcohol concentration (BAC) greater than .10 percent (w/v).

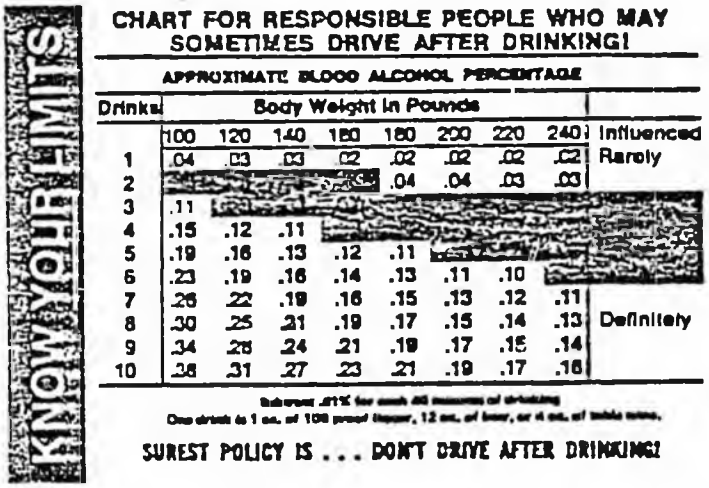
With regard to alcohol and responsibility for fatal crashes, the drinking driver problem is even more significant. In one study drivers judged to be at fault in fatal crashes were six times more likely to have had BAC's greater than .10 percent (w/v) alcohol in their blood than drivers judged not at fault for their crashes (60 percent vs. 10 percent).

This strong relationship between crash responsibility and high alcohol levels is shown further in single vehicle crashes, where responsibility is apparent, and where between 60 and 75 percent (60-75%) of dead drivers have BACs greater than .10 percent (w/v).

The Driver Population:

What the high BAC figures in crashes suggest is that the majority of alcohol related fatal crashes are caused by heavy (problem) drinkers. Some portion of the approximately 15 percent of fatal crashes which involve drivers who have been drinking, but who do not have BACs greater than .10 percent, may be caused by less heavy, less chronic, "social" drinkers.

The majority of drivers are either abstainers or light to moderate (social) drinkers. Even quite liberal estimates suggest that only about 10 to 15 percent of the nation's drivers would be classified as being heavy (problem) drinkers.



Arrested Drunk Drivers:

The average proportion of licenses drivers arrested for drunk driving over a one-year period is estimated to be one percent (1%). This translates to approximately 1.3 million of approximately 130 million licensed drivers.

On a nightly basis, between one in five hundred (1/500) and one in two thousand (1/2000) drivers on the road with a BAC greater than .10 percent (w/v) are arrested for drunk driving. These estimates come from a number of roadside surveys conducted in conjunction with the Alcohol Safety Action Projects (ASAPs) funded by the NHTSA in the 1970's and from the Grand Rapids data reported by Borkenstein and others.

The average BAC of these drinking drivers is approximately .20 percent, double the level for persumed intoxication. Estimating an average period of alcohol consumption at 4-5 hours, this means that the average fatally injured drinking driver had about 15 drinks prior to becoming involved in the crash.

Blood Alcohol and Body Weight

Past Approaches and Current Activities

Federal Action:

Over the last 12 years, the National Highway Traffic Safety Administration (NHTSA), an Agency within the U.S. Department of Transportation, has worked with the States to reduce alcohol related deaths on the highway. NHTSA initiated 35 Alcohol Safety Action Projects (ASAPs) throughout the country from 1971-1976 which resulted in the development of a coordinated systematic approach to deal with drunk driving.

In 12 of the 35 ASAPs, a statistically significant reduction in fatal crashes at night was achieved. Individual projects were able to double, and even triple driving while intoxicated arrests, using such new technology as roadside breath testing. Court procedures were streamlined to handle large caseloads. Roughly a quarter-of-a-million drinking drivers were referred for treatment.

Before the passage of the Highway Safety Act of 1966, few States specified a presumptive level of driving while intoxicated. The Federal standard for alcohol safety prescribed the 0.10 percent blood level that legally defines the legal intoxication limit. Now all the States have laws defining driving under the influence at the 0.10 percent level. The majority of the States now have made some improvements in their law enforcement, court, rehabilitation, and educational efforts.

State Action

Under the Section 402 grant program established by the Highway Safety Act the States are increasing the proportion of funds allocated to alcohol programs. In FY 1982 approximately 35 percent of 402 funds ($27.8 of 78.6 million) were allocated to drunk driving programs (with an added 30 percent spent on alcohol enforcement activities under Police Traffic Services).

Responding to citizen interest, 21 States and a number of local jurisdictions have established special drunk driving task forces to revitalize State/local programs.

Fifteen States have raised the minimum legal drinking age to reduce alcohol related crashes among youth. Other States such as Maryland have introduced legislation to raise the drinking age during 1982.

Sixteen States have adopted statutes allowing preliminary roadside breath testing to assist officers in establishing probable cause for drunk driving arrests.

Twenty-one States have established illegal per se statutes designed to simplify and streamline the prosecution of drunk drivers by making it illegal simply to operate a motor vehicle with an illegal blood alcohol concentration (above 0.10%).

S. J. Res. 241

Ninety-seventh Congress of the United States of Ameri

AT THE SECOND SESSION

Begun and held at the City of Washington on Monday, the twenty-fifth day of January, one thousand nine hundred and eighty-two

Joint Resolution

To provide for the designation of the week of December 12, 1982, through December 18, 1982, as "National Drunk and Drugged Driving Awareness Week".

Whereas traffic accidents cause more violent deaths in the United States than any other cause, over fifty thousand in 1980;

Whereas traffic accidents also play a substantial role in serious injuries in this country;

Whereas between 40 and 55 per centum of drivers who are fatally injured have alcohol concentrations in their blood above the legal limit and this figure rises to 55 to 65 per centum in single vehicle crashes;

Whereas the total societal cost of drunk driving has been estimated anywhere from $5,000,000,000 to $25,000,000,000 a year, which does not include the human suffering that can never be measured;

Whereas there are increasing reports of driving after drug use and accidents involving drivers who have used marihuana or other illegal drugs;

Whereas more research is needed on the effects of drugs on driving ability and their impact on the incidence of traffic accidents, either alone or in combination with alcohol;

Whereas an increased public awareness of the gravity of the problem of drugged driving may warn drug users to refrain from driving and may stimulate interest in increased research on the effects of drugs on driving ability and the incidence of traffic accidents;

Whereas the public, particularly through the work of citizens groups such as Mothers Against Drunk Driving (MADD) and Remove Intoxicated Drivers (RID), is demanding a solution to the problem of drunk driving;

Whereas the President has appointed a Commission on Drunk Driving to heighten public awareness and stimulate the pursuit of solutions;

Whereas many States have appointed task forces to examine the existing drunk driving program and make recommendations for a renewed, comprehensive approach;

Whereas an increase in the national awareness of the problem of drunk and drugged driving may help to sustain current efforts to develop comprehensive solutions at the State and local levels; and

Whereas the Christmas and New Year's holiday period, with more drivers on the roads and an increased number of social functions, is a particularly appropriate time to focus national attention on this critical problem: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of December 12, 1982, through December 18, 1982, is designated as "National Drunk and Drugged Driving Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate activities.

Speaker of the House of Representatives.

Vice President of the United States and President of the Senate.

DRUNK DRIVING FACTS

- A blood alcohol concentration (BAC) of .10 percent or greater is the level at which a driver is considered legally intoxicated in most states.

- Approximately 55 percent of fatal crashes involve a driver who has been drinking.

- In single vehicle crashes, where responsibility is apparent, between 60 and 75 percent of dead drivers have BACs greater than .10 percent.

- The average BAC of drivers arrested for drunk driving is approximately .20 percent, double the level for presumed intoxication.

- Over the past 10 years, the proportion of highway deaths involving alcohol has averaged 25,000 per year; one quarter of a million Americans have lost their lives in alcohol-related crashes in the last decade.

- A conservative estimate of the total economic cost of drunk driving is put at between five and six billion dollars a year.

ACCIDENTS IN ALASKA

In 1975, alcohol-related highway accidents cost $19.5 million.

In 1977, 62 Alaskans died in alcohol-related highway accidents. About 80% of highway fatalities in Anchorage are alcohol-related.

OMVI ARRESTS IN ALASKA

The drivers being arrested are very heavy drinkers - had to have had ten drinks in an hour to reach the blood alcohol levels recorded. Most have so much alcohol in their system that they are still drunk when they go to work the next day.

Most people never drink enough to reach the illegal BAC level. Most people arrested for OMVI regularly drink large amounts.

At most one out of four arrested for OMVI are "normal" drinkers who have had too much just this night. The rest are used to drinking and driving - in fact one out of three people arrested for OMVI has previously been convicted.

Few of the arrests for OMVI are borderline cases - the average blood alcohol concentration is twice the level proscribed by law.

REASONS FOR RECOMMENDED STATUTORY CHANGES SB 608, 609, 610

PARTLY DONE a. Clean up statutes so that courts can spend time on real evidence instead of legal technicalities.

PRESENT b. OMVI arrests are expected to increase by as much as 50% in the near future.

PARTLY DONE c. Either help the courts by changing the statutes or by providing money for more courtrooms, judges, prosecutors.

d. OMVI arrests - largest single category of arrests and court caseload - 22% of all adult arrests; 28% of caseload of the misdemeanor courts; 50% of the trial time spent by the courts.

e. Changes will not stop drinking-driving but will help us handle the problem through the courts.

BEING WORKED ON f. We have definite evidence that the people who refuse breath-tests tend to be the most drunken and the most dangerous drivers - really experienced drinkers (average BAC: 0.27%). We are not helping them by keeping it easy to avoid the evidence of their dangerousness.

g. Using the traditional psychomotor tests, even experienced police are right only one out of two times about how drunk a person is - blood alcohol concentration (BAC) is objective and fair evidence, rather than just an opinion.

SB 551, 552

REASON FOR ALCOHOL SCREENING

KELSO'S JOB IN A STATEWIDE BASIS

a. Trying to separate the people out so that we can do what's right by the person who just has an attitude probelm, by the bad drivers, and by the alcoholics.

b. Trying to get an early identification of problem drinkers so that they can be encouraged to get help before they are far gone.

c. Trying to standardize court practices throughout the state.

PROBLEM DRINKING DRIVERS

1. The Problem Drinking Driver is someone who *regularly* drives while seriously impaired.

2. In the typical jurisdiction, about two-thirds of persons arrested for DWI are identifiable as Problem Drinkers, either clearly or marginally.

3. Problem Drinking Drivers usually have a high BAC (0.15 percent or above) when arrested. Of course, the BAC on any occasion may be lower.

4. Drivers with a high BAC (0.10 percent or above) are likely to be involved in at least

   - Twice as many crashes
   - Twice as many property damage crashes
   - Five times as many personal injury crashes
   - Twelve times as many fatal crashes
   - Twice as many traffic violations
   - Three times as many license suspensions

   as the average driver.

5. Social Drinkers rarely achieve the high BAC (0.10 percent or above) which problem drinkers achieve very often.

6. A person can learn to "drive while drunk" i.e., to compensate partially for the impairment caused by alcohol up to a point. The learning takes a lot of practice.

   Social Drinkers don't get that much practice. They are likely to judge themselves "too drunk to drive," or to drive very badly at lower BACs.

   Therefore, a person who drives reasonably well at a high BAC, or who can drive at all at a very high BAC (0.20 percent or above), is likely to be a Problem Drinker.

7. Problem Drinking Drivers tend to lead troubled lives, as is shown in:

   - The probability of their having previous and subsequent DWI arrests.
   - The frequency of their contacts with social agencies.
   - Their emotional profiles.
   - The frequency of their family and economic problems.

   This makes it possible to identify them by record checks and personality tests.

REALISTIC EXPECTATIONS

Problem Drinkers:

Regardless of what we do with problem drinkers, approximately 1 of 5 will be re-arrested for a drinking-driving offense within one year, 2 of 5 in three years.

Social Drinkers:

Without rehabilitation, 3 of 10 social drinkers will be re-arrested within three years. However, only 2 of 10 entering rehabilitation of some type will be re-arrested.

OVERALL STATEWIDE PROBLEM ANALYSIS

TRAFFIC RECORDS

Because of the problems described in the following paragraphs and the fact that current data is unavailable, there were no attempts made to perform a statistical analysis of the old data. This analysis has been performed on available data in past years and would only be redundant. Therefore, with the exception of the narrative in the traffic records section, the Overall Statewide Problem Analysis remains unchanged from the FY1982 highway safety plan. No further attempt to perform problem identification through statistical analysis will be done until current and accurate data becomes available.

The Alaska traffic records system continues to be plagued with many of the same problems that have prevented timely and accurate retrieval of accident data for the past few years. Excessive delays are still experienced in all aspects of the collection, entry, editing and retrieval of the accident and driver license data. Even though the driver license system is an automated on-line system, accurate statistical data for calendar year 1981 are not available at this time. Errors in data collection, as well as in the data entry, continue to contribute to the excessive delays in obtaining accident data.

Because of the changing philosophical views within the department, all attempts to utilize the "DART" traffic records software package have been abandoned. There is presently no individual within the department available that can utilize this system and at this time no efforts to revitalize the system are planned.

Even though a project was implemented in the department to alleviate many of the problems of the traffic records system, no progress of any consequence can be expected. The fact that the system spans two departments, neither of which has total responsibility, only complicates all efforts to upgrade the system. As the accident system remains a low priority within the department, we do not anticipate any improvement to the system during FY1983.

Because of these problems and the lack of reliable traffic data, emphasis will be placed on working with the Department of Public Safety to develop a more responsive outlook towards the traffic records system. This will include suggestions to move the responsibility of data entry from DOT/PF to the Department of Public Safety and to assign the system responsibilities to an individual in the department capable of overseeing and maintaining the system needs. With a commitment from the Department, traffic data and problem identification could be eliminated as a major obstacle in the preparation of the annual highway safety plan.

STATE ACCIDENT ANALYSIS

YEAR	INJURY ACCIDENTS	FATALITIES	TOTAL ACCIDENTS	M.D.R.(1)	PROPERTY DAMAGE ($)
1976	5,765	124	18,154	4.1	20,220,195
1977	5,085	136	15,086	4.5	20,348,441
1978	4,822	127	12,962	4.5	18,775,536
1979	4,560	90	13,521	3.2	19,365,424
1980	4,993	88	13,165	3.3	20,793,029

(1) Mileage Death Rate

1981 DATA NOT AVAILABLE AT THIS TIME

As shown by the preceding table, the total accident picture for Alaska in 1980 was one of increased risk to the motorist when compared to 1979. Accidents increased from 45 per 1,000 licensed drivers in 1979 to 48 per 1,000 licensed drivers in 1980. The mileage death rate increased from 3.2 per hundred million miles traveled in 1979 to 3.3 in 1980. The death rate per 1,000 motor vehicle accidents increased from 6.66 in 1979 to 6.68 in 1980.

Overall, there were more accidents per driver and per miles traveled than in 1979, with greater accident severity causing a higher injury and fatality rate. As a public health concern, the motor vehicle death rate per 100,000 population increased from 21.78 in 1979 to 21.97 in 1980 while the motor vehicle injury rate increased from 1,103.6 per 100,000 population in 1979 to 1,246.8 per 100,000 population in 1980.

STATE TRAFFIC ANALYSIS

YEAR	POPULATION	LICENSED DRIVERS	VEHICLES (1) REGISTERED	MILES (2) TRAVELED
1976	413,289	216,079	259,615	30.67
1977	411,211	294,926	283,973	30.34
1978	416,500	283,733	276,918	28.22
1979	413,200	299,818	262,549	27.90
1980	400,481	272,472	257,491	26.58

(1) Excludes trailers, commercial trailers and snowmachines.

(2) Represented as 100 million vehicle miles traveled.

As shown by the above table, Alaska's population remained stable through 1976-1979, with the exception of 1978 when it reached its highest level. The state experienced a 4% decline in population between 1978 and 1980.

The number of licensed drivers increased significantly in 1977, 36%, followed by another increase in 1979, but declined in 1980.

The number of vehicles registered shows a steady decrease since 1977, with a similar trend occurring in miles traveled since 1976.

LICENSED DRIVERS BY AGE AND SEX (1980)

The following table displays licensed drivers by age and sex. As is obvious, the majority of drivers licensed in Alaska (56.3%) are under 35 years of age. Thirty-one percent of all licensed drivers are young (under 35) males: the group most at risk in highway traffic accidents.

AGE	MALE	%(1)	FEMALE	%(1)	TOTAL	%(2)
14-18	8,367	60.6	5,431	39.4	13,798	5.1
19-24	25,822	55.0	21,111	45.0	46,933	17.2
25-29	25,395	53.3	22,282	46.7	47,677	17.5
30-34	24,950	55.4	20,121.	44.6	45,071	16.5
35-39	18,681	55.9	14,753	44.1	33,434	12.3
40-44	13,721	57.4	10,164	42.6	23,885	8.8
45-49	10,588	58.2	7,610	41.8	18,198	6.7
50-54	9,114	59.3	6,252	40.7	15,366	5.6
55-59	7,211	59.3	4,943	40.7	12,154	4.5
60-64	4,922	60.2	3,254	39.8	8,176.	3.0
65-69	2,772	61.5	1,738	38.5	4,510	1.7
70 +	2,093	65.1	1,120	34.9	3,213	1.2
Unknown	34	59.6	23	40.4	57	
TOTAL	153,670	56.4	118,802	43.6	272,472	100.0

(1) Percentage of that age group.
(2) Percentage of total licensed drivers.

MOTOR VEHICLE TRAFFIC FATALITY ACCIDENTS

During the years 1976-1978 the rate of alcohol-related fatal accidents occurring in the state appears to have remained fairly constant: approximately one-half of all fatal accidents were alcohol-related. A departure from this trend was reported in 1979 when the rate of alcohol involvement increased to 70% in fatal accidents.

There is some indication that improved reporting of alcohol involvement contributed to this apparent increase. However, alcohol involvement in highway crashes is the state's most serious and enduring problem and has been assigned the highest priority for treatment in the FY1983 highway safety program.

ALCOHOL

The following table reflects the distribution of alcohol/driver by age group. Accidents in which alcohol involvement was not stated or was unknown have been removed from the calculations.

AGE	NUMBER OF ALCOHOL ACCIDENTS	PERCENT INVOLVEMENT	PERCENTAGE OF LICENSED DRIVERS
15-18	220	11.3	3.4
19-29	922	47.2	36.5
30-39	407	20.9	27.8
40-49	238	12.2	15.2
50-59	134	6.9	10.3
60 +	31	1.6	2.5

During 1979, alcohol was indicated in 1,952 traffic accidents. Drivers aged 19-29 were the most frequent offenders: 47.2% of the alcohol-related accidents involved drivers in this age group who had beer drinking or who were suspected of drinking.

Drivers between the ages of 15 to 18, inclusive, who make up only 3.4% of the licensed driver population, accounted for 11.3% of the alcohol-related accidents, or more than 3 times their distribution in the general driver population.

Alcohol was a factor in 70% of the fatal accidents that occurred during 1979. Further analysis is not possible because of contradictory bivariate data, although there is some indication that young drivers are, again, over-represented. Inexperienced both in driving and in drinking, the young driver also has a predilection for high speeds, and the combination is lethal.

Alcohol enforcement and diversion to treatment and/or education of the drinking driver will remain the highest priority for Alaska's highway safety program.

SPEED RELATED

The number of speed-related fatalities declined from 80 in 1978 to 61 in 1979. Although the number of fatalities that were speed-related declined, the rate of speed involvement has remained constant at 27%. Speed as a contributing factor in injury accidents declined from 21% in 1978 to 16% in 1979.

DRIVER ONLY	FATAL ACCIDENT	FATALITIES	ALCOHOL ACCIDENTS	ALCOHOL FATALITIES

20	1	1	1	1

	PRESENT LAW	HB 6
	1st offense: Ineligible for a driver's license or permit for a three months' period unless the court finds hardship and nullifies or modifies the suspension or revocation. If has prior DWI conviction, period of revocation or suspension is one year. First offense also carries minimum 72 consecutive hours' imprisonment. (AS 28.35.032)	1st offense: Driver's license seized if driving a motor vehicle. License is revoked or suspended for 90 days, unless has a prior DWI conviction. In that case, suspension or revocation is for one year. Vehicle impounded for 15 days. 72 consecutive hours imprisonment plus fine: $250 minimum; $500 maximum. (AS 28.35.032, secs. 9 - 12)
REFUSAL TO SUBMIT TO CHEMICAL TEST OF BREATH	2nd offense: If has prior conviction for either DWI or refusal to submit to a chemical test of breath, suspension or revocation of license is for one year. A conviction for DWI or for refusal to submit to a chemical test of of breath within previous five years yields a sentence of ten consecutive days' imprisonment. However, if the prior convictions for DWI or for refusal to submit to a chemical test of breath were within one year of this second conviction for refusal to submit to a chemical test of breath, imprisonment is for 20 days. The ten-day and 20-day sentences are both minimums. (AS 28.35.032)	2nd offense: If has either a prior DWI conviction or conviction for refusal to submit to a chemical test of breath, suspension or revocation is for one year. Second conviction for refusal to submit to a chemical test of breath or first such conviction of a person with a prior DWI conviction: minimum of 20 consecutive days imprisonment and a fine of $500 minimum; $1000 maximum. Driver's license seized if driving a motor vehicle. Vehicle impounded for 90 days and may be forfeited. (AS 28.35.032, secs. 9 - 12)
	Conviction under AS 28.35.032 also requires participation in a program of alcohol education or rehabilitation for term the court finds appropriate.	3rd or Subsequent offense: If for refusal to submit to a chemical test of breath or DWI in any combination, suspension or revocation of the driver's license is permanent. 30 consecutive days' imprisonment plus a fine of $1000 minimum and $2000 maximum. Same license seizure as for first offense. Vehicle impoundment and forfeiture provisions the same as for the second offense. (AS 28.35.032, secs. 9 - 12)

		Alcohol program participation requirements are unchanged.
		The five-year period for calculation of the number of offenses a person has committed, for the purposes of determining a penalty, has been eliminated for this offense.
		Note provisions for seizure of driver's license in sec. 13 in addition to provisions for refusal to submit to a chemical test of breath as trigger for seizure (above).

	PRESENT LAW	HB 6
	1st conviction for DWI: 72 consecutive hours imprisonment (AS 28.35.030). Driver's license revoked for 30 days minimum, or limited license and revocation for 60 days minimum. (AS 28.15.181)	1st conviction for DWI or refusal to submit to a chemical test of breath: revocation of driver's license for 90 days minimum (sec. 3). Fine: $250 minimum, $500 maximum (sec. 8) in addition to jail time.
DWI	2nd conviction for DWI or for refusal to submit to a chemical test of breath: Driver's license revoked and limited license may not be granted for one year minimum (AS 28.15.181). If within five years of a conviction for DWI or for refusal to submit to a chemical test of breath, ten consecutive days minimum imprisonment, unless within one year of a previous conviction, then 20 days. Court may order participation in alcohol education or rehabilitation program (AS 28.35.030). Subsequent convictions treated by the same provisions except that limited driver's license privileges may not be granted for at three years upon a third or subsequent conviction. Sentence may be suspended after the minimum sentence has been served.	2nd conviction, DWI or refusal to submit to a chemical test of test of breath (or equivalent elsewhere): One year minimum driver's license revocation (sec. 3); 20 consecutive days minimum 20 consecutive days minimum imprisonment and a fine of $500 minimum and $1000 maximum (sec. 8). 3rd or subsequent conviction for DWI or refusal to submit to a chemical test of breath (or equivalent elsewhere) in any combination of three or more: permanent revocation of driver's license (sec. 3). 30 consecutive days minimum imprisonment and a fine of $1000 minimum and $2500 maximum (sec. 8). No change in provision on alcohol education and rehabilitation assignments by court. --- Limited license privileges are removed for all DWI offenders.

PRESENT LAW	HB 6
DRIVING WITH LICENSE CANCELED, SUSPENDED, REVOKED, VIOLATION LIMITATION: Ten days' imprisonment minimum. Suspension of sentence after minimum sentence served is possible.	14 consecutive days, plus fines: $500 minimum and $1000 maximum. No suspension of sentence.

PRESENT LAW	HB 6
IMPOUNDMENT No present provision.	Upon probable cause of peace officer that vehicle used in DWI offense. Unless released, impoundment is for 15 days if no prior convictions for DWI or for refusal to submit to a chemical test of breath. If a prior conviction in Alaska or elsewhere for either, impoundment is for 90 days.

PRESENT LAW	HB 6
FORFEITURE No present provision.	If a prior conviction in Alaska or elsewhere for DWI or for refusal to submit to a chemical test of breath (or equivalent elsewhere), vehicle may be forfeited.

MEMORANDUM

January 31, 1983

SUBJECT: Drunk Driving -- HB 6
(Work Order No. 13-0676)

TO: Representative Mitchell E. Abood, Jr.

FROM: Russ Josephson
Legislative Counsel

Following is the sectional analysis of HB 6 which you requested:

Section 1 amends AS 28.15.081(a) by adding the new requirements for the driver's license and application examination: (1) that the applicant know the effects of alcohol and drugs on drivers and the related dangers of driving under their influence; and (2) that the applicant know the laws relating to driving while intoxicated.

Section 2 amends AS 28.15.181(a) by adding a new basis for the immediate suspension or revocation of a driver's license: the refusal to submit to a chemical test of breath under AS 28.35.032, Refusal to Submit to Chemical Test.

Section 3 amends AS 28.15.181(c) by repealing and reenacting it. Please refer to the accompanying penalties chart for comparison between the current law and HB 6.

Section 4 amends AS 28.15.201(b)(1) by removing the reference to the revocation of the license of a person convicted of operating or driving a motor vehicle while intoxicated. The revocation of the license of such a person is handled in Sec. 3 of this bill.

Section 5 amends AS 28.15.201(c) by removing the references to the issuance of a new driver's licenses for persons convicted of operating or driving a motor vehicle while intoxicated, after a limited license period has expired because, under Sec. 3 of this bill no limited license privileges may be granted.

Section 6 amends AS 28.15.291 by changing the penalty for violation of the prohibition against driving while a license is canceled, suspended, or revoked, or in violation of a limitation on the license. The penalty is increased from 10 days to 14 consecutive days and a fine of $500 - $1000 is added. In addition, the provision allowing the sentence to be suspended after the defendant has been imprisoned for no less than the minimum period has been removed.

Section 7 amends AS 28.35.030(a)(2), the "DWI" section by inserting the language to indicate that the alcohol levels referred to in the existing statute are to be determined by a chemical test given within four hours after the alleged offense was committed. Note that the broader term "a chemical test" is used here, not "a chemical test of breath".

Section 8 amends the "DWI" section further by changing the penalties for conviction. In addition, the five-year period used for calculating the numbers of convictions on a person's record has been eliminated, thus making all convictions count. The section also has been amended by the use of new language that indicates that a conviction under another law or ordinance, in this or another jurisdiction, is counted as a conviction in Alaska for purposes of determining how many convictions a person has and thus for determining what the penalty should be, if the elements of the law or ordinance are substantially similar. The effect of this amendment is to close a "loophole" if there were minor differences between the law under which a prior conviction had been obtained and the law under which a subsequent conviction was obtained. Also, the provision for suspension of sentence after the minimum sentence is served has been eliminated, as it was in Sec. 6. A person with multiple convictions for driving while intoxicated or for refusal to submit to a chemical test of breath, or for a combination of those two offenses (or another law or ordinance with substantially similar elements), may have the vehicle used in the commission of the latest offense impounded and forfeited.

Section 9 amends AS 28.35.032(a) by adding to the existing language on the refusal to submit to a chemical test of breath a new provision for the seizure of the driver's license by the law enforcement officer after reading the driver a notice and delivering the driver a copy of the notice. The notice explains the revocation procedure and

the right of court review. The notice is a temporary driver's license, as well.

Section 10 amends AS 28.35.032(b) to provide that the notice of revocation or suspension of a driver's license, as now required, indicate that the action will be effective after the temporary driver's license provided for in Sec. 9 has expired. Also, the section is amended to stay the revocation or suspension action if the person initiates a court action to rescind the Department of Public Safety's action. The three months' suspension or revocation period is eliminated from this section. Some additional technical changes were also made in this section.

Section 11 amends AS 28.35.032(d) to provide new penalties for the refusal to submit to a chemical test of breath under the implied consent statute. The penalties parallel those for conviction for "DWI" in several ways, including the calculation of the number of offenses. Provision is made for permanent suspension or revocation of the driver's license or the nonresident privilege to drive, and for the denial of an original license -- if multiple offenses are involved.

Section 12 amends AS 28.35.032(g) adding fines to the penalties for refusal to submit to a chemical test of breath, eliminates the five-year period used in calculating numbers of convictions, and increases the penalties for convictions. The sentence for multiple conviction cases may not be suspended under the amendments of this section.

Section 13 adds new subsections to AS 28.35.033, Chemical Analysis of Blood. This section provides for driver's license seizure if a chemical test produces results specified in subsection (a)(2). The procedure is the same as that in Sec. 9. In addition, the new language limits the court proceeding in which the driver's action to rescind the suspension of revocation of the driver's license is heard to two issues: (1) whether or not the arrest for driving while intoxicated was valid; and (2) whether the chemical test produced the results specified in subsection (a)(2). The penalties for administrative suspension or revocation for "DWI" or refusal to submit to a chemical test of breath are also set forth.

Section 14 amends AS 28.35.034. The section, formerly named "Period of Revocation", is renamed "Surrender of License or

Permit". The section is amended by the removal of the provisions allowing the district court to find extenuating circumstances and to modify or nullify the suspension or revocation of a driver's license or permit for refusing to submit to a chemical test of breath. Additional minor technical changes also were made.

Section 15 adds new sections to AS 28.35 for the impoundment and forfeiture of automobiles used in the commission of an offense under AS 28.35.030 (Operating a Vehicle, Aircraft or Watercraft While Intoxicated), and also for an offense under AS 28.35.032(f) (Refusal to Submit to a chemical Test of Breath) in the case of the forfeiture. In addition, provision is made for the remission of forfeitures, a procedure to allow persons with ownership or security interests in a forfeited motor vehicle to claim the vehicle through court proceedings.

Section 16 repeals AS 28.35.211(a)(4), a provision concerning suspension, revocation, or limitation of licenses for three months. The repealed provision has been replaced by other provisions throughout this bill.

Drunk drivers may lose their cars, licenses

By GREG GADBERRY
Daily News reporter

NEWS 2-3-83 1A 2

Daily News file photo /Paul Brown

State Rep. Mitch Abood is shown here participating in a demonstration in the affects of alcohol on drivers held in Anchorage in January. Abood backs a bill that would stiffen penalties for drunk drivers.

If Rep. Mitch Abood has his way, drunken drivers in Alaska will face not only jail time and fines but the permanent loss of their driver's licenses and their automobiles.

Those provisions are part of a comprehensive drunken driving bill written by Abood that drew strong support on Wednesday during a teleconference of the House State Affairs Committee.

"We have lived with this threat to our lives and our property for too long," the Anchorage Republican said.

The proposal mandates that police immediately seize the driver's licenses of anyone shown by breath tests to be driving legally drunk. Drivers who refuse to take breath-alcohol tests after arrest also would have their license taken under the bill.

The proposal would have police issue suspects a temporary seven-day license after their normal driver's license was taken away.

1 of 2

News 2-3-83 2082

Drunk drivers may forfeit vehicles and licenses, serve longer jail terms if bill approved

Continued from Page A-1

Drunk drivers could appeal the license seizures to District Court judges. But unless the judge ruled the confiscation was unfair, the temporary license would expire after a week and the suspect would be unable to drive pending the outcome of the case.

Under present law, the state can suspend a driver's license if a person refuses a breathalyzer test, but that suspension is not immediate. Drivers who do take the test and are found to be drunk may have their licenses suspended at the discretion of the judge.

The Abood bill also requires longer license revocations for convicted drunken drivers.

Following a first conviction, drivers would lose their licenses for 90 days, three times the term now imposed on first-time offenders.

Current laws allow first-time offenders to get special licenses with which to drive to work. The Abood bill would prohibit such licenses.

Under the Abood proposal, second offenders would have their licenses pulled for a year, the same time provided now.

However, those with three or more convictions would lose their licenses for good. Current law allows judges to pull a license for three years on a third conviction.

According to Anchorage Municipal Prosecutor Allen Bailey, no other state has the power to permanently revoke a driver's license.

Advocates admit the license suspension issue will draw plenty of legal fire, but they contend the most controversial part of the Abood bill is the section requiring confiscation of the vehicles of drunken drivers.

People facing first convictions under the Abood bill would lose their cars for 15 days. Drunken drivers with two or more convictions would have their cars impounded for 90 days.

The bill also gives to judges the power to permanently confiscate vehicles if the driver has two or more convictions.

Current state statutes allow police to impound drunken drivers' vehicles if they are left in roadways and are a danger to traffic. But those laws do not impose specific time limits for impounding drunken drivers' vehicles.

There also is no provision under current law allowing for permanent confiscation of vehicles for drunken driving charges.

"That's really a giant step," Bailey said. "I don't think any state has that."

Abood's bill requires that those who refuse breathalyzer tests after arrest face fines and jail terms identical to those given drivers proved drunk by breath testers.

Under the bill, jail time for a first conviction is 72 hours in jail, identical to current law. The fine would range from $250 to $500.

Second offenders, however, would pay $500 to $1,000 and would remain behind bars for 20 consecutive days. That jail term is double what most second drunken driving convictions now receive.

A person convicted of a three or more offenses would serve at least 30 days.

"We are extremely enthusiastic," said Charles Landers, vice president of Mothers against Drunk Drivers. "This bill addresses many of the issues we think should be changed."

June Gerrish: Deaths 'aren't fair.' Photo by Mark Kelley

Getting MADD about drunken driving

Group asks Legislature for stiffer DWI penalties

By CHRIS JARVIS
Empire Staff Reporter

She's MADD about drunken drivers, and she wants the Alaska Legislature to do something about it.

June Gerrish knows all too well the pain than goes with drunken driving-caused accidents. In December 1981, two of her grandchildren, 13-year-old Scott Gerrish and his 10-year-old brother Wesley, were run down and killed by a car driven by a drunken driver as they walked along a road in Girdwood, a quiet ski-resort town south of Anchorage.

The driver, Patrick Clemans, was last week sentenced to two concurrent eight-year terms and two years of probation by Anchorage Superior Judge Seaborn Buckalew.

Gerrish said today she was pleased with the sentence, noting it might serve as a warning to others of what can happen when driving while drunken and how serious the courts treat the crime.

And though last week's sentencing "took a lot weight off our minds," she said she is not done with her fight against drunken driving.

It is a fight that goes far beyond the boundary of the state's largest city. This week a Juneau man who recently pleaded no contest to a negligent homicide charge in the drunken-driving death of another 25-year-old man last June was again arrested, this time accused of drunken driving.

Some people withdraw from their anger and outrage, but Gerrish is doing something about hers. She founded the Alaska chapter of Mothers Against Drunk Drivers, a national group of citizens waging an all-out war against drunken driving.

The Alaska Chapter of MADD, started in September, now has about 300 members and will soon have chapters in Juneau, Valdez, Seward, Palmer and Fairbanks.

Now she has brought her fight to the Legislature and the House State Affairs Committee, which on Wednesday will hear her side of the growing drunken-driving tragedy in Alaska.

"We're not against drinking, but when they get in their cars, that's our business," Gerrish said.

Of her own experience, Gerrish said she never will forget the deaths of her grandchildren and the pain it erected.

"It's not fair," she said. "There are two kinds of death."

"The first, like the death of an old or very sick person, you can understand .... You're still hurt, but you know why," she said.

"But this was senseless; this was stupid," she said. "That's what makes me mad; I don't know why."

"We can never have another Christmas, we can never have birthdays," she said of her tight-knit family.

Her son, an Anchorage paramedic, had trouble returning to work following the death of his sons, Gerrish said. One of the first calls he received when he returned to work was to treat a 13-year-old boy who had been hit by a car, she said.

"He had trouble being in the same emergency room" under the same circumstances, she said.

While it supports raising the drinking age to 21, MADD is even more vocal about two other bills now under consideration in the House.

The first, introduced by House Speaker Joe Hayes, R-Anchorage, would require proof of liability insurance before a car can be registered in the state "so that innocent victims of motor vehicle accidents may be recompensed for the injury and financial loss inflicted upon them."

The other bill supported by MADD was introduced by Rep. Mitch Abood, R-Anchorage. It would increase penalties for repeated convictions for driving while intoxicated, refusal to take a breathalyzer test and driving while a license is suspended or revoked.

For example, the minimum sentence for someone convicted of driving while his driver's license is revoked following a conviction for driving while intoxicated would be 14 days in jail and a $500 fine.

In Alaska, Gerrish said, people don't have much trouble coming up with the money to pay fines, so she wants the fines increased to make more of an impression on drunken drivers.

Other changes the bill makes are a minimum jail term for those who refuse, a second time, to undergo a breatalyzer test. A second conviction would increase the sentence to no less than 20 days in jail and a fine of at least $500.

A second conviction for driving while intoxicated would result in a sentence of at least 20 days in jail and a fine of at least $500.

A third conviction would result in a sentence of no less than 30 days in jail and a fine of at least $1,000.

The bill also would allow a police officer to notify the driver at the time of arrest that he faces license revocation.

The revocation, could be appealed to the court within seven days. If not appealed, the revocation stands.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

CS for House Bill No. 6 (Judiciary)

"An Act relating to driving a motor vehicle."

House Bill No. 6 amended would increase the penalties for alcohol related driving offenses. Specifically:

Section 11 AS 28.15.291 sets the penalty for first offense driving with a suspended license as the result of a conviction of driving a motor vehicle while intoxicated at 30 days. The penalty for second or third offense driving with a suspended license as the result of a conviction of driving a motor vehicle while intoxicated would be 90 days.

Section 13 AS 28.35.030 (c) raises the penalty for second offense operating a motor vehicle while intoxicated to 20 consecutive days. The penalty for a third conviction would be raised to 30 consecutive days.

Section 16 AS 28.35.032 (g) sets the penalty for second offense of refusing to submit to chemical test at 20 days; third offense 30 days.

If CS for House Bill No. 6 is enacted, the increases in penalties set out in Sections 11, 13, and 16 would result in the need for 22 additional minimum security beds.

IV. ANALYSIS:

A. Assumptions

1. Bed Impact

The passage of this bill will result in the need for 22 additional minimum security beds within the Alaska correctional system. The sections of the bill which affect increased inmate population projections are:

a. Section 11

Statistics furnished by the Department of Public Safety show 181 persons were convicted in 1982 for driving with a suspended or revoked license where the original offense resulting in the loss of license was driving while intoxicated (DWI) or implied consent (refusal to take a breathalyzer test). For purposes of this fiscal note, that number was used for calculating the increased person days of incarceration resulting from increased sentences to 30 or 90 days. It was assumed that 80% of the offenders would have been convicted only once in the previous 15 years and 20% convicted more than once in the previous 15 years.

The following calculations also consider that the offender would have been given a minimum sentence of 10 days previously, and it is assumed that every offender will earn all good time for which they are eligible. Therefore, 145 offenders would serve an additional 15 days and 36 offenders would serve an additional 60 days. This results in the need for an additional 11.88 beds.

b. Section 13

This section of the bill increases the minimum sentence for second time drunk drivers from 10 days to 20 days and third and subsequent time drunk drivers from 10 days to 30 days. It is estimated that would be 450 repeat offenders affected by this legislation, 425 second offenders and 25 third offenders. The additional sentence length to be served, assuming all good time will be earned is 12 days for second time offenders and 20 days for third offenders. This increased sentence length results in the need for 9 additional minimum security beds.

c. Section 16

This section provides new penalties for refusal to take a chemical test similar to the sentences to be imposed for driving while intoxicated. Statistical data for this offense was not available. Therefore, it was assumed that 20 individuals would be convicted with one

prior and 7 individuals would be convicted with 2 or more prior offenses. This would result in the need for 1.1 additional beds.

d. The summary of a, b, and c above is 21.98 beds, which were rounded to 22 beds.

2. All persons convicted would receive the minimum sentence and all persons would earn all good time for which they would be eligible.

3. Inflation of 6% per year was used for the entire period of the fiscal note.

4. The new beds would not be available for occupancy until July 1, 1985. This will result in further overcrowding of the existing facilities for two years.

5. One additional position is needed for every 2.5 prison beds. Therefore, 9 correctional officers are needed to provide the security and supervision of the inmates. These positions would be requested for FY 1986.

B. Program Summary:

1. Positions

1 - Correctional Officer III
8 - Correctional Officers II

These positions are needed to provide for the security of the institution where the beds will be constructed and for the supervision of the additional 22 persons (full-time equivalents) within the Alaska corrections system.

2. Other Expenditures

The fiscal impact will be experienced as soon as the bill becomes law. Therefore, the incremental costs directly related to inmate care are identified in FY 1984. Position costs and costs related to building operations are not included until FY 1986.

a. Travel - $2000. Inmate transportation to point of arrest when released from custody.

b. Contractual - $39,600. Medical expenses for 22 full-time equivalent inmates at $1800 per inmate per year.

c. Commodities - $68,600. Food, clothing, bedding, etc. for 8,085 inmate days at $8.48 per day.

d. Grants - $6,900. Inmate gratuities paid for persons working in the kitchen, or janitorial/maintenance crews, etc.

e. Capital Expenditures

22 beds @ $130,000 per bed = $2,860,000

D. Economic Impact:

Passage of this bill should not significantly impact the State's economy.

E. Impact on Local Governments:

There would be no fiscal impact on local governments unless they changed local ordinances related to DWI to include the same penalties contained in this bill. The fiscal impact would occur for local government units who contract with the State for the care of prisoners for local offenses.

IV. ANALYSIS:

A. Assumptions

1. Bed Impact

The passage of this bill will result in the need for 22 additional minimum security beds within the Alaska correctional system. The sections of the bill which affect increased inmate population projections are:

a. Section 11

Statistics furnished by the Department of Public Safety show 181 persons were convicted in 1982 for driving with a suspended or revoked license where the original offense resulting in the loss of license was driving while intoxicated (DWI) or implied consent (refusal to take a breathalyzer test). For purposes of this fiscal note, that number was used for calculating the increased person days of incarceration resulting from increased sentences to 30 or 90 days. It was assumed that 80% of the offenders would have been convicted only once in the previous 15 years and 20% convicted more than once in the previous 15 years.

The following calculations also consider that the offender would have been given a minimum sentence of 10 days previously, and it is assumed that every offender will earn all good time for which they are eligible. Therefore, 145 offenders would serve an additional 15 days and 36 offenders would serve an additional 60 days. This results in the need for an additional 11.88 beds.

b. Section 13

This section of the bill increases the minimum sentence for second time drunk drivers from 10 days to 20 days and third and subsequent time drunk drivers from 10 days to 30 days. It is estimated that would be 450 repeat offenders affected by this legislation, 425 second offenders and 25 third offenders. The additional sentence length to be served, assuming all good time will be earned is 12 days for second time offenders and 20 days for third offenders. This increased sentence length results in the need for 9 additional minimum security beds.

c. Section 16

This section provides new penalties for refusal to take a chemical test similar to the sentences to be imposed for driving while intoxicated. Statistical data for this offense was not available. Therefore, it was assumed that 20 individuals would be convicted with one

prior and 7 individuals would be convicted with 2 or more prior offenses. This would result in the need for 1.1 additional beds.

d. The summary of a, b, and c above is 21.98 beds, which were rounded to 22 beds.

2. All persons convicted would receive the minimum sentence and all persons would earn all good time for which they would be eligible.

3. Inflation of 6% per year was used for the entire period of the fiscal note.

4. The new beds would not be available for occupancy until July 1, 1985. This will result in further overcrowding of the existing facilities for two years.

5. One additional position is needed for every 2.5 prison beds. Therefore, 9 correctional officers are needed to provide the security and supervision of the inmates. These positions would be requested for FY 86.

B. Program Summary:

1. Positions

1 - Correctional Officer III
8 - Correctional Officer II's

These positions are needed to provide for the security of the institution where the beds will be constructed and for the supervision of the additional 22 persons (full-time equivalents) within the Alaska corrections system.

2. Other Expenditures

The fiscal impact will be experienced as soon as the bill becomes law. Therefore, the incremental costs directly related to inmate care are identified in FY 84. Position costs and costs related to building operations are not included until FY 86.

a. Travel - $2000. Inmate transportation to point of arrest when released from custody.

b. Contractual - $39,600. Medical expenses for 22 full-time equivalent inmates at $1800 per inmate per year.

c. Commodities - $68,600. Food, clothing, bedding, etc. for 8,085 inmate days at $8.48 per day.

d. Grants - $6,900. Inmate gratuities paid for persons working in the kitchen, or janitorial/maintenance crews, etc.

e. Capital Expenditures

22 beds @ $130,000 per bed = $2,860,000

D. Economic Impact:

Passage of this bill should not significantly impact the State's economy.

E. Impact on Local Governments:

There would be no fiscal impact on local governments unless they changed local ordinances related to DWI to include the same penalties contained in this bill. The fiscal impact would occur for local government units who contract with the State for the care of prisoners for local offenses.

Committee on Judiciary

May 11, 1983

The Honorable Elaine Andrews
District Court Judge
Third Judicial District
941 Fourth Avenue
Anchorage, Alaska 99501

Dear Judge Andrews:

I have been in receipt of your letter for three weeks now, relative to HB 6, or more properly, for the Committee Substitute (Judiciary) for HB 6. I have held up answering your letter until today in order to report to you any possible alterations by other committees.

Yesterday, the measure was considered by and passed out of the Finance Committee. In the normal course of scheduling, it will soon go the the House floor (from the Rules Committee) where it may well be subject to amendments prior to final passage.

You, of course, are aware that Committee Counsel, Judge Brewer, Retired, has had considerable experience with Driving While Intoxicated cases and related matters as to licensing. (Indeed, he may at one time have heard more DWI cases than any other judicial officer in the State, with more years on the bench). He exerted a great deal of effort and had considerable input into the Judiciary Committee's version, working with the staff of Representative Mitch Abood, the bill's sponsor; with the Department of Law and the Legislative Affairs Agency, which drafted the several versions of the bill.

Your concerns were most carefully considered by him and generally, I think, he agrees with your points of view. I cannot, of course, comment on what you "assume" the legislation means as to credit for jailed offenders' good time. That matter is up to the administration of the Department of Health, Education and Social Services, or, as it may become in the future, the Department of Corrections, to calculate.

Of course, your letter was written based on the original version. It underwent substantial changes in the fine-tuning of it. Please note, however, the final version

MEMBERS:
REP. JOHN LISKA, VICE CHAIRMAN; REP. RAMONA BARNES, EMERITUS;
REP. JOE HAYES; REP. HUGH MALONE; REP. DON CLOCKSIN; REP. RON WENDTE

deletes the impoundment of vehicles provision, no doubt much to the relief of you and your colleagues. Forfeiture of vehicles and remission of them are retained, though. I would be nearly impossible to set up two differing methods of punishment for those ordered by a court not to drive compared with those whose licenses have been administratively suspended because of financial responsibility. It would appear anomalous to tell motorists that court orders mean what they say, but that administrative regulations do not. A ban on driving, afterall, remains a ban on driving whether decreed by a court or by the Division of Motor Vehicles.

I am aware that courts generally do not look with favor upon legislatively mandated minimum sentences or fines. Constituents tell me, however, that the tendency is to impose only the mandatory minimum sentences, seldom going above or beyond them. Members of the public take a dim view of what they refer to as "leniency" of the courts. Since they believe penalties meted out are not severe enough, the aim of the legislation is to elevate the floor of the penalties by legislative action. Discretion by courts is essential, but the public seems to be saying, "Let's establish a bottom line, and court discretion can come into play after reaching that point."

There is little point in further analysis for as earlier indicated the measure is subject to amendments on the floor of the House. Further, the Court system will have its own analysis and interpretation of the final version, should it be enacted.

Another attempt for protection of citizens on the highway is manifested by the mandatory insurance for motorists bill, HB 7, but I will refrain from commenting further on that measure just now.

Thank you for involving yourself in the legislative process.

Very truly yours,

Representative Charlie Bussell
Chairman, Committee on Judiciary

May 7, 1983

¥a¥

Dear ¥s¥:

The House Judiciary Committee passed HB 6, the "drunk driving" bill, out of Committee on Friday, April 29, 1983. I think it is an excellent and comprehensive item of legislation.

The Committee put considerable thought and effort into its creation and fine-tuning. Representative Mitch Abood's staff, the Committee staff, and the bill drafters for the Legislative Affairs Agency and the Department of Law worked very hard and diligently expending many long hours on this bill.

The Committee really appreciates the way the original sponsor, Rep. Abood of Anchorage, spent so much time working with the bill and with us. Rep. Abood testified before the Committee each time the bill was scheduled for hearing. He "rode herd" on the bill from its inception to the final product that passed out of the Committee.

I sincerely hope that this bill will not be substantially altered or amended in a way that weakens or destroys it.

The bill provides for seizure of a driver's license upon arrest as well as increased penalties upon conviction. While the minimum of 72 hours in jail is mandated for a first offense in keeping with the existing law, a second offense requires a minimum of no less than 20 days in jail and the third offense would result in at least 30 days in jail and a 10-year license revocation.

Fines based on the number of absence of prior convictions, carry mandatory minimums of $250 for a first offense, $500 for the second offense and not less than $1,000 for a third offense. Courts will be required, under the proposed bill, to consider prior offenses over the preceding 15 years in this or another jurisdiction, rather than going back only five years under the existing law to find prior convictions.

The bill also maintains as a crime the refusal to submit to a chemical test following arrest, as does existing law, except penalties are more stringent under the new bill.

In addition, law enforcement officers are authorized to require a breath test on the spot when the driver is first stopped. Refusal to submit to a preliminary breath test, prior to arrest, is classed as an infraction in the measure.

The House Judiciary Committee moved HB 17, the bill to raise the drinking age to 21, on the House Finance Committee back in February. The Chief Prosecutor of the State, Dan Hickey, testified before that group and the Finance Committee Substitute substantially weakened the bill. One wonders if Mr. Hickey initiated the amendments to that bill.

It is know that HB 6, the so-called "drunk driving bill", was not classed as one of the Chief Prosecutor's priorities when we were waiting for suggestions from the Department of Law. It is to be hoped that HB 6 will receive swift action in the House Finance Committee and not be weakened in the same manner HB 17 was. In fact, one wonders who is running the apparently leaderless Department of Law during this part of the Sheffield administration.

The Governor, afterall, during his campaign told folks he was in favor of raising the drinking age to 21. Recently, he said he was not in favor of this. A crystal ball would be helpful, maybe, to see what his views are on driving while intoxicated.

Very truly yours,

Representative Charlie Bussell
Chairman, Committee on Judiciary

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES
RESEARCH AGENCY

Pouch Y, State Capitol
Juneau, Alaska 99811
(907) 465-3991

January 29, 1981

MEMORANDUM

TO: Representative Mitch Hood
Attention: Carol Horos

FROM: Christine Johnson, Research Staff

SUBJECT: Research Request No. 82-5
Drunk Driving Statistics

Carol Horos of your staff has asked for the following information regarding drunk driving:

(1) statewide data on the number of arrests and convictions for drunk driving for a sufficient number of years to show the current trend;

(2) statewide data on the number of arrests and convictions for other traffic violations where the driver was also intoxicated;

(3) a comparison between the incidence of drunk driving in Alaska and the national rate.

As we have explained to Ms. Horos, the second category of data required a special computer run by the Alaska Court System, and we have not yet received the information. We will forward it to you as soon as it arrives.

Arrests

Table I on the following page shows the number of arrests for drunk driving during 1978, 1979, and 1980. This data indicates that arrests for drunk driving are declining. Data for 1980 shows a 21% decrease in the number of arrests for this offense over the arrests reported in 1978. This decline may be related to the stiffer penalties for drunk driving which went into effect in the fall of 1978.

TABLE I
Statewide Arrests for Drunk Driving
1978 - 1980

	1978	1979	1980
Number of Arrests	3,765	3,006	2,575
Rate of Arrest per 100,000 people	815.3	750.5	643.0

Source: House Research Agency, January 1982, from data provided by the Criminal Justice Planning Agency, Alaska Department of Law, Crime in Alaska - 1980.

Table II below compares Alaska's 1980 arrest rate for drunk driving with the national rate for that year. The data indicates that the state's arrest rate for drunk driving is only slightly higher than the national rate.

TABLE II
State and National Arrest Rates for Drunk Driving - 1980
(Rate per 100,000 people)

Alaska Arrest Rate	National Arrest Rate
643.0	626.3

Source: House Research Agency, January 1982, from data provided in Crime in Alaska - 1980, and Federal Bureau of Investigation, U.S. Department of Justice, Crime in the United State, September 1981.

Convictions

Table III on the following pages shows both the number of cases involving drunk driving which were filed with the Alaska Court System during the three year period and the number of convictions which resulted. This information provides the best indication of the conviction rate for drunk drivers, as the data regarding arrests comes from another source and is not comparable to the Court's statistics on convictions.

Between 1978 and 1980, approximately 75% of the individuals charged with drunk driving were convicted. The conviction rate declined slightly in 1980, but no downward trend can logically be inferred from this information.

TABLE III
Drunk Driving Cases Filed with the Alaska Court System and Rate of Conviction
1978 - 1980

	1978	1979	1980
No. of Cases Filed	3,681	3,545	3,096
No. of Convictions	2,765	2,691	2,224
Conviction Rate	75%	76%	72%

Source: Alaska Court System.

We were unable to locate any information on the national conviction rate for drunk drivers. We did learn from the State Highway Safety Planning Commission that nationwide 50% of all fatal accidents in 1979 involved a drunk driver. This figure was closer to 75% for Alaska.

We hope this information is of use to you. Again, we will deliver the other material you requested as soon as it arrives. If we can provide any further assistance, please don't hesitate to contact us.

February 4, 1982

TO: Representative Mitch Abood
Attention: Carol Horos

FROM: Christine Johnson, Research Staff

SUBJECT: Research Request No. 82-5
Arrests and Convictions for Drunk Driving: Additional Information

This memorandum should fulfill your request for data regarding arrests and convictions for driving while intoxicated (DWI). We have been waiting for a computer run from the Court System in order to respond to your question regarding the number of other traffic violations committed by drunk drivers.

Unfortunately, we have found that the Court System's data will only partially answer your question. On the Court's computer system, cases involving multiple offenses are listed by the primary, or the most serious, offense; the number of other lesser offenses is noted, but these offenses are not specifically named. Consequently ,while the data indicates the number of cases where an individual was charged with DWI and other lesser offenses, it does not show the number of people charged with drunk driving and other more serious violations.

The Court System's data for 1980 is summarized on the table on the following page. This information indicates that drunk drivers were responsible for a minimum of 236 other traffic offenses in 1980. Ninety percent of these drivers were ultimately convicted of drunk driving. Eighty-nine percent of those convicted served time in jail, 77% were fined, and 69% were both fined and jailed.

We hope this information is of use to you. We sincerely apologize for the delay in delivering it, but tabulating the data from the Court System took significantly longer than we anticipated. If we can provide any further information, please don't hesitate to contact us.

MEMORANDUM

TO: Representative Mitch Abood
Attention: Carol Horos

FROM: Christine Johnson, Research Staff

RE: Research Request No. 82-63
Drunk Driving Statistics

Attached please find several charts which should at least partially address your questions regarding (1) the recidivism rate for drunk drivers; and (2) the number of other offenses which drunk drivers commit. Major findings from the data are summarized below:

- In the last five fiscal years, approximately 16,700 individuals were booked into Alaska correctional facilities on charges of drunk driving. Of these, 7,100 or 42% had been booked for drunk driving on at least one other occasion since 1972.

- Between FY 77 and FY 80, the percentage of drunk drivers who were repeat offenders increased steadily from 33% to 48%. The percentage of repeat offenders declined slightly in FY 81 to 44%; however, it is impossible to say whether this represents a one-time fluctuation or the beginnings of a downward trend.

- Over the five-year period, drunk drivers were charged with a total of 2,500 other offenses, including 1,500 other traffic violations. Forty-nine percent of these other offenses were attributed to drivers who had been picked up for drunk driving on at least one other occasion.

We can provide a more detailed breakdown of this data by geographic location, and by age, sex, or race of the offender, if you desire. Please call if you have any questions.

RE: Drunk Driving Incentive Grants Regulations; Presidential Drunk Driving Commission Recommendations

DATE: February 9, 1983

Enclosed is a summary of the Final Rule for the Incentive Grant Criteria for Alcohol Traffic Safety programs that were published in the Federal Register February 7, 1983 page 5545.

Also enclosed are some of the recommendations made by the Presidential Commission on Drunk Driving in its interim report. The recommendations included are those that would require state legislative action.

RECOMMENDATIONS THAT WOULD REQUIRE STATE
LEGISLATION FROM THE INTERIM REPORT TO THE NATION
FROM THE PRESIDENTIAL COMMISSION ON DRUNK DRIVING

1.1 Program Financing

Legislation should be enacted at State and local levels which creates a dedicated funding source which includes offender fines and fees for increased efforts in the enforcement, prosecution, adjudication, sanctioning, and education and treatment of driving under the influence (DUI) offenders.

1.2 Task Forces

State and local governments should create Task Forces of governmental and non-governmental leaders to increase public awareness of the problem, to more effectively apply driving under the influence laws, and to involve governmental and non-governmental leaders in action programs.

1.8 Improved Roadway Delineation and Signing

States should give increased attention to improvements in roadway markings, signing, and roadside hazard visibility as important countermeasures to alcohol-related highway crashes.

2.2 Implied Consent

Each state should establish an implied consent statute providing that all drivers are deemed to have given their consent to tests of blood, breath or urine to determine their alcohol or drug concentration. The statute should provide:

(1) License suspensions sufficiently severe to discourage drivers from refusing the test.
(2) Introduction of evidence of the test refusal into driving under the influence prosecutions.
(3) That offenders not be required to be taken to a police facility and placed under formal arrest prior to test administration.
(4) That offenders who are unconscious or otherwise incapable of refusal are deemed to have given their consent to a test, the results of which are admissible in any trial or proceeding.
(5) That an individual's right to consult his attorney not be permitted to unreasonably delay administration of the test.
(6) That results of preliminary breath test devices are admissible in DUI trial proceedings.
(7) That refusals in sister States result in license suspensions in the State of driver residence.

2.3 Preliminary Breath Testing

States should enact a statute allowing the use of Preliminary Breath Test (PBT) devices by police officers.

2.5 Mandatory BAC Test

States should require mandatory alcohol and other drug testing of all drivers involved in a fatal or serious personal injury crash.

2.6 Booking Procedures

Laws, policies, and procedures should be adopted to expedite arrest, booking and charging procedures.

2.7 Uniform Traffic Ticket
State and local governments should adopt a statewide uniform traffic ticket system.

3.2 Definition of BAC
States should enact a definition of "Breath Alcohol Concentration" and make it illegal to drive or be in control of a motor vehicle with a Breath Alcohol Concentration above that defined level.

3.3 0.08 Presumptive Level of Under the Influence
Legislation should be enacted which provides that a person with an alcohol concentration of 0.08 is presumed to be driving under the influence.

3.4 0.10 Illegal Per Se
Legislation should be enacted making it illegal per se for a person with an alcohol concentration of 0.10 or higher within three hours of arrest to drive or be in actual physical control of a motor vehicle.

4.1 Mandatory Sentencing
The sentences recommended herein upon conviction of a driving under the influence offense should be mandatory and not subject to suspension or probation. Specifically the recommendations are that:

(1) All states establish mandatory substantial minimum fines for driving under the influence offenders, with correspondingly higher mandatory minimum fines for repeat offenders.
(2) Any person convicted of a first violation of driving under the influence should receive a mandatory minimum jail sentence of 48 consecutive hours, or license suspension for a mandatory period of not less than 90 days plus a mandatory assignment of 100 hours of community service.
(3) Any person convicted of a second violation of driving under the influence within five years should receive a mandatory minimum jail sentence of 10 days, and license revocation for not less than 1 year.
(4) Any person convicted of a third or subsequent violation of driving under the influence within five years should receive a mandatory minimum jail sentence of 120 days and license revocation for not less than three years.

4.5 Felony
Causing death or serious bodily injury to others while driving under the influence should be classified a felony.

4.6 License Violation
States should enact a statute requiring mandatory jail sentence of at least 30 days for any person convicted of driving with a suspended or revoked license or in violation of a restriction due to a driving under the influence conviction.

4.8 Victim Restitution
Any person convicted for driving under the influence should pay restitution.

4.9 Victim Assistance
State and local governments should provide assistance to victims of driving under the influence offenders.

4.10 Victim Impact Statements
State and local governments or courts by rule should require victim impact statements (including oral or written statements by victims or survivors) prior to sentencing in all cases where death or serious injury results from a DUI offense.

5.1 Administrative Per Se License Suspension
States should enact legislation to require prompt suspension of the license of drivers charged with driving under the influence, upon finding that the driver had a BAC of 0.10 in a legally requested and properly administered test. The prompt suspension should also extend to those who refuse the test, as well as those who are driving on a restricted license. Such suspension may be carried out by the court upon arraignment, or by the administrative agency charged with license administration. There should be reciprocity among States to assure a driver's license suspension by the home State if the driver meets these conditions in another State.

5.2 Driver License Compact
Each State should adopt the Driver License Compact and the one license/one record policy while also utilizing the National Driver Register.

5.4 Provisional License for Young Drivers
States should adopt laws providing a provisional license for young novice drivers which would be withdrawn for a driving under the influence conviction or an implied consent refusal.

6.1 Minimum Legal Drinking Age
States should immediately adopt 21 years as the minimum legal drinking age for all alcoholic beverages.

6.2 Dram Shop Laws
States should enact dram shop laws establishing liability against any person who sells or serves alcoholic beverages to an individual who is visibly intoxicated.

6.3 Alcohol Beverage Consumption in Motor Vehicles
State and local governments should prohibit consumption of alcoholic beverages in a motor vehicle and prohibit the possession of open alcoholic beverage containers in the passenger compartment of motor vehicles.

10.4 Administrative
(1) State standards, criteria and review procedures should be established for alcohol education schools, treatment and rehabilitation services, and community service programs. A State agency should be assigned responsibility to certify to the courts the alcohol education and treatment and rehabilitation programs that meet established criteria and standards. This same agency should make efforts to draw upon and involve appropriate existing programs, e.g., employee assistance programs.

(2) States should develop and implement an on-going statewide evaluation system to assure program quality and effectiveness.

(3) Defendants should be assessed fees for education or treatment and rehabilitation services at a level sufficient to cover the costs.

HIGHLIGHTS
FINAL RULE: INCENTIVE GRANT CRITERIA FOR ALCOHOL TRAFFIC SAFETY PROGRAMS

DEPARTMENT OF TRANSPORTATION
National Highway Traffic Safety Administration
23 CFR Part 1209
pursuant to
P.L. 97-364

FOUR BASIC GRANT CRITERIA (for 30% of 402 apportionment)

No. 1: Prompt License Suspension

The first criterion established by Congress for basic grant eligibility requires:

> The prompt suspension, for a period not less than ninety days in the case of a first offender and not less than one year in the case of any repeat offender, of the driver's license of any individual who a law enforcement officer has probable cause under State law to believe has committed an alcohol-related traffic offense, and (i) to whom is administered one or more chemical tests to determine whether the individual was intoxicated while operating the motor vehicle and who is determined, as a result of such tests to be intoxicated, or (ii) who refuses to submit to such a test as proposed by the officer.

- "prompt"
  - -- license suspension within an average of 45 days from time of arrest;
  - -- but, States reaching average of 90 days from time of arrest may qualify if they submit a plan showing how they will reduce the average to 45 days;
  - -- in order to be eligible for each of the supplemental criteria, a State must have a license suspension system in which average time to suspend a license does not exceed 45 days.
- "suspension" for 90 days on first offense
  - -- full suspension for 30 days and use of a restricted provisional or conditional license for the remaining 60 days;
  - -- no restricted or limited licenses for second offenders or persons refusing to take BAC test;

No. 2: Mandatory Sentence

The second criterion established by Congress for basic grant eligibility requires:

A mandatory sentence, which shall not be subject to suspension or probation, of (i) imprisonment for not less than 48 consecutive hours, or (ii) not less than ten days of community service, of any person convicted of driving while intoxicated more than once in any five-year period.

- "imprisonment" includes confinement not only in jails or prisons, but also in such places as minimum security facilities or in-patient rehabilitation/treatment centers.

- copies of existing legislation/regulations on mandatory sentences adequate to demonstrate compliance. Statistically valid samples can suffice for data on average sentence imposed on repeat offenders. Only data on general types of confinement (jail, treatment centers) to be required, not confinement used for each individual.

No. 3: Illegal Per Se Laws

The third criterion established by Congress for basic grant eligibility requires States to have a law that:

Provides that any person with a blood alcohol concentration of 0.10 percent or greater when driving a motor vehicle shall be deemed to be driving while intoxicated.

- .10% as presumptive level, rather than illegal per se, does not comply

No. 4: Increased Enforcement/Public Information Efforts

The fourth and final criterion established by Congress for basic grant eligibility requires:

Increased efforts or resources dedicated to the enforcement of alcohol-related traffic laws and increased efforts to inform the public of such enforcement.

- States will determine which indicators are most appropriate to demonstrate increased efforts

- Demonstration of increased levels of effort made through comparison of F.Y. 1982 (or later years) with prior preceding year or average of State efforts over 3 years preceding year in which State first applies for a grant.

SUPPLEMENTAL GRANT CRITERIA (for up to 20% of 402 apportionment)

- States required to adopt minimum of eight (8) criteria of their choosing out of 21 possible criteria, for full 20% grant
- Adoption of minimum of four (4) criteria of a State's choosing, will qualify a State for 10% grant
- To be eligible for supplemental grant for second and third year, States must adopt two (2) more criteria each year and demonstrate increased performance in criteria adopted in prior year or years
- States not required to adopt more than fifteen (15) of supplemental criteria, but will have to show increased performance in previously adopted criteria
- Prior adoption of criteria will be recognized, no matter when adopted, as long as States can demonstrate active implementation of the criteria during past four years.

List of 21 Possible Criteria:

1. Raise drinking age to 21 for all alcoholic beverages, immediately, or over three year period.
2. Explanation of program coordination among different State agencies involved in alcohol traffic safety programs (no requirement for single State Coordinator)
3. Setting of minimum standards for rehabilitation and treatment programs.
4. Establishment of a State task force; (county, city or regional task forces encouraged, but not required -- if local task forces not used, must show that local community interests are represented on the State task force.)
5. A statewide driver record system operated so conviction information is recorded within 30 days of conviction, license sanction or completion of appeals process.
6. Locally coordinated programs in cities, counties, or regions; communities decide themselves on specific geographic area to be involved in program.
7. Prevention and education program aimed at changing the societal norm relative to drunk driving (to include kindergarten through twelfth grade education program, and involvement of private sector and parents)

8. Pre- or post-screening (based, at a minimum, on BAC level at time of arrest, prior alcohol-related convictions, and a self-administered questionnaire)

9. An evaluation system that determines the effectiveness of individual program countermeasures and overall program effectiveness

10. Self sufficient programs; compliance demonstrated by providing a plan showing how program will become self sufficient.

11. Use of roadside sobriety checks

12. A citizen reporting program; compliance demonstrated by providing information on the degree of participation, e.g., number of citizen reports and resulting arrests based on statistically valid samples.

13. Enactment of a BAC of 0.08 percent as presumptive evidence

14. Uniform licensing procedures; full participation in the National Driver Register and the Driver's License Compact, and use of a one-license, one-record policy

15. Use of preliminary breath tests (PET's)

16. Adoption of the requirement that no alcohol-related charge be reduced to a non-alcohol-related offense or probation without judgment being entered and without written declaration of why the action is in the interest of justice. The law must also provide that if charge is reduced, driver's record must say reduced charge is alcohol-related

17. Establishment of a victim assistance program and use of victim impact statements and victim restitution.

18. Impoundment of the vehicle or confiscation of the vehicle's tags

19. Allowing the arresting officer to choose the specific type of chemical test to use

20. Enactment of dram shop liability laws (or upholding of common law dram shop liability in State's highest court)

21. Adoption of new, unique and innovative alcohol traffic safety programs

Public Law 97-364
97th Congress

An Act

To amend title 23, United States Code, to encourage the establishment by States of effective alcohol traffic safety programs and to require the Secretary of Transportation to administer a national driver register to assist State driver licensing officials in electronically exchanging information regarding the motor vehicle driving records of certain individuals.

TITLE I—ALCOHOL TRAFFIC SAFETY PROGRAMS

SEC. 101. (a) Chapter 4 of title 23, United States Code, is amended by adding at the end thereof the following new section:

"§ 408. Alcohol traffic safety programs

408.

"(a) Subject to the provisions of this section, the Secretary shall make basic and supplemental grants to those States which adopt and implement effective programs to reduce traffic safety problems resulting from persons driving while under the influence of alcohol. Such grants may only be used by recipient States to implement and enforce such programs.

"(b) No grant may be made to a State under this section in any fiscal year unless such State enters into such agreements with the Secretary as the Secretary may require to ensure that such State will maintain its aggregate expenditures from all other sources for alcohol traffic safety programs at or above the average level of such expenditures in its two fiscal years preceding the date of enactment of this section.

share
da.

"(c) No State may receive grants under this section in more than three fiscal years. The Federal share payable for any grant under this section shall not exceed—

"(1) in the first fiscal year the State receives a grant under this section, 75 per centum of the cost of implementing and enforcing in such fiscal year the alcohol traffic safety program adopted by the State pursuant to subsection (a);

"(2) in the second fiscal year the State receives a grant under this section, 50 per centum of the cost of implementing and enforcing in such fiscal year such program; and

"(3) in the third fiscal year the State receives a grant under this section, 25 per centum of the cost of implementing and enforcing in such fiscal year such program.

"(d)(1) Subject to subsection (c), the amount of a basic grant made under this section for any fiscal year to any State which is eligible for such a grant under subsection (e)(1) shall equal 30 per centum of the amount apportioned to such State for fiscal year 1983 under section 402 of this title.

402.

"(2) Subject to subsection (c), the amount of a supplemental grant made under this section for any fiscal year to any State which is eligible for such a grant under subsection (e)(2) shall not exceed 20 per centum of the amount apportioned to such State for fiscal year 1983 under section 402 of this title. Such supplemental grant shall be in addition to any basic grant received by such State.

23 USC 402.

State eligibility.

"(e)(1) For purposes of this section, a State is eligible for a basic grant if such State provides—

"(A) for the prompt suspension, for a period not less than ninety days in the case of a first offender and not less than one year in the case of any repeat offender, of the driver's license of any individual who a law enforcement officer has probable cause under State law to believe has committed an alcohol-related traffic offense, and (i) to whom is administered one or more chemical tests to determine whether the individual was intoxicated while operating the motor vehicle and who is determined, as a result of such tests, to be intoxicated, or (ii) who refuses to submit to such a test as proposed by the officer;

"(B) for a mandatory sentence, which shall not be subject to suspension or probation, of (i) imprisonment for not less than forty-eight consecutive hours, or (ii) not less than ten days of community service, of any person convicted of driving while intoxicated more than once in any five-year period;

"(C) that any person with a blood alcohol concentration of 0.10 percent or greater when driving a motor vehicle shall be deemed to be driving while intoxicated; and

"(D) for increased efforts or resources dedicated to the enforcement of alcohol-related traffic laws and increased efforts to inform the public of such enforcement.

"(2) For purposes of this section, a State is eligible for a supplemental grant if such State is eligible for a basic grant and in addition provides for some or all of the criteria established by the Secretary under subsection (f).

Effective
program
criteria.

"(f) The Secretary shall, by rule, establish criteria for effective programs to reduce traffic safety problems resulting from persons driving while under the influence of alcohol, which criteria shall be in addition to those required for a basic grant under subsection (e)(1). The Secretary shall establish such criteria in cooperation with the States and political subdivisions thereof, appropriate Federal departments and agencies, and such other public and nonprofit organizations as the Secretary may deem appropriate. Such criteria may include, but need not be limited to, requirements—

"(1) for the establishment and maintenance of a statewide driver recordkeeping system from which repeat offenders may be identified and which is accessible in a prompt and timely manner to the courts and to the public;

"(2) for the creation and operation of rehabilitation and treatment programs for those arrested and convicted of driving while intoxicated;

"(3) for the impoundment of any vehicle operated on a State road by any individual whose driver's license is suspended or revoked for an alcohol-related driving offense;

"(4) for the establishment in each major political subdivision of a State of locally coordinated alcohol traffic safety programs which are administered by local officials and are financially self-sufficient;

"(5) for the grant of presentence screening authority to the courts;

"(6) for the setting of the minimum drinking age in such State at twenty-one years of age;

"(7) for the consideration of and, where consistent with other provisions of State law and constitution the adoption of, recommendations that the Presidential Commission on Drunk Driving may issue during the period in which rules are being made to carry out this section.

Appropriation authorization.

"(g) There is hereby authorized to be appropriated to carry out this section, out of the Highway Trust Fund, $25,000,000 for the fiscal year ending September 30, 1983, and $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, and September 30, 1985. All provisions of chapter 1 of this title that are applicable to Federal-aid primary highway funds, other than provisions relating to the apportionment formula and provisions limiting the expenditures of such funds to Federal-aid systems, shall apply to the funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section. Sums authorized by this subsection shall not be subject to any obligation limitation for State and community highway safety programs.".

23 USC 101 *et seq.*

(b) The analysis for chapter 4 of title 23, United States Code, is amended by adding at the end thereof the following:

"408. Alcohol traffic safety programs.".

Regulations, publication in Federal Register.
23 USC 408 note.

(c) The Secretary of Transportation shall issue and publish in the Federal Register proposed regulations to implement section 408 of title 23, United States Code, not later than November 1, 1982. The Secretary shall allow public comment and hold public hearings on the proposed regulations to encourage maximum citizen participation. The final regulations shall be issued, published in the Federal Register, and transmitted to Congress before February 1, 1983. To the extent such regulations relate to the making of basic grants under such section 408, such regulations shall become effective on the date on which they are published in the Federal Register. To the extent such regulations relate to the making of supplemental grants under such section 408, such regulations shall become effective April 1, 1983, unless before such date either House of Congress by resolution disapproves such regulations to such extent. If such regulations are so disapproved by either House of Congress, the Secretary shall not obligate for such supplemental grants any amount authorized to carry out such section 408 for the fiscal year ending September 30, 1983, or any subsequent fiscal year, unless specifically authorized to do so by a statute enacted after the date of enactment of this Act.

Ante, p. 1738.
Disapproval by Congress.

TITLE II—NATIONAL DRIVER REGISTER

National Driver Register Act of 1982.

SHORT TITLE

23 USC 401 note.

SEC. 201. This title may be cited as the "National Driver Register Act of 1982".

DEFINITIONS

23 USC 401 note.

SEC. 202. For purposes of this title, the term—

(1) "alcohol" has the meaning given such term by the Secretary of Transportation under regulations prescribed by the Secretary;

(2) "chief driver licensing official" means the official in each State who is authorized to (A) maintain any record regarding any motor vehicle operator's license issued by such State; and (B) grant, deny, revoke, suspend, or cancel any motor vehicle operator's license issued by such State;

(3) "controlled substance" has the meaning given such term in section 102(6) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802(6));

(4) "highway" means any road or street;

(5) "motor vehicle" means any vehicle, machine, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway, except that such term does not include any vehicle, machine, tractor, trailer, or semitrailer operated exclusively on a rail or rails;

(6) "motor vehicle operator's license" means any license issued by a State which authorizes an individual to operate a motor vehicle on a highway;

(7) "participating State" means any State which has notified the Secretary of its participation in the Register system, pursuant to section 204 of this title;

(8) "Register" and "Register system" mean the National Driver Register established under section 203 of this title;

(9) "Secretary" means the Secretary of Transportation;

(10) "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States; and

(11) "State of record" means any State which has transmitted to the Secretary, pursuant to section 205 of this title, any report regarding any individual who is the subject of a request for information made under section 206 of this title.

ESTABLISHMENT OF REGISTER

SEC. 203. (a) The Secretary shall, as soon as practicable after the date of enactment of this title, establish and thereafter maintain a Register, to be known as the National Driver Register, to assist chief driver licensing officials of participating States in exchanging information regarding the motor vehicle driving records of individuals. The Register shall contain an index of the information that is reported to the Secretary under section 205 of this title, and shall be designed to enable the Secretary, either electronically or, until such time as all States are capable of participating electronically, through the United States mails, to—

23 USC 40

Informati index.

(1) receive information submitted under section 205(a) of this title by the chief driver licensing official of any State of record;

(2) receive any request for information made by the chief driver licensing official of any participating State under section 206 of this title;

(3) refer such request to the chief driver licensing official of any State of record; and

(4) relay without interception of the actual information to the chief driver licensing official of a participating State any information provided by any chief driver licensing official of a State of record in response to such request.

(b) The Secretary shall not be responsible for the accuracy of any information relayed to the chief driver licensing official of any participating State, except that the Secretary shall maintain the Register in a manner that ensures against any inadvertent alteration of information during any relay.

Final rule.

(c)(1) The Secretary shall, within eighteen months after the date of enactment of this title, promulgate a final rule which provides for procedures for the orderly transition from the system regarding the motor vehicle driving records of individuals provided in Public Law 86-660 (74 Stat. 526) to the Register established under subsection (a) of this section.

23 USC 313 note.

(2) The Secretary shall not maintain in the Register any report or information which was compiled under the provisions of Public Law 86-660 (74 Stat. 526) and was transferred to the Register after (A) the date the State of record removes it from the State's file; (B) seven years after the date such report or information is entered into the Register; or (C) the date of establishment of a fully electronic Register system, whichever is earlier. Such report or information shall be disposed of in accordance with the provisions of chapter 33 of title 44, United States Code.

44 USC 3301 *et seq.*

Erroneous information.

(3) If the chief driver licensing official of any participating State finds that information which has been transmitted for inclusion in the Register under this section is erroneous or relates to a conviction of a traffic offense which is subsequently reversed, such official shall immediately notify the Secretary of the error. The Secretary shall provide for the immediate deletion from the Register of such material.

(d) The Secretary shall assign to the administration of this title such personnel as may be necessary to ensure the effective functioning of the Register system.

(e) The Secretary may prescribe such regulations as may be necessary to carry out the provisions of this title.

STATE PARTICIPATION

23 USC 401 note.

SEC. 204. (a) Any State may become a participating State under this title by notifying the Secretary of its intention to be bound by the provisions of section 205 of this title.

Status termination.

(b) Any participating State may terminate its status as a participating State under this title by notifying the Secretary of its withdrawal from participation in the Register system.

(c) Any notification made by a State under subsection (a) or (b) of this section shall be made in such form, and according to such procedures, as the Secretary shall establish by regulation.

REPORTS BY CHIEF DRIVER LICENSING OFFICIALS

23 USC 401 note.

SEC. 205. (a) The chief driver licensing official in each participating State shall, as soon as practicable after the date of enactment of this title, transmit to the Secretary a report containing the information required in subsection (b) of this section regarding any individual—

(1) who is denied a motor vehicle operator's license by such State for cause;

(2) whose motor vehicle operator's license is canceled, revoked, or suspended by such State, for cause; or

(3) who is convicted under the laws of such State of the following motor vehicle-related offenses or comparable offenses—

(A) operation of a motor vehicle while under the influence of, or impaired by, alcohol or a controlled substance;

(B) a traffic violation arising in connection with a fatal traffic accident, reckless driving, or racing on the highways;

(C) failure to render aid or provide identification when involved in an accident which results in a fatality or personal injury; or

(D) perjury or the knowledgeable making of a false affidavit or statement to officials in connection with activities governed by a law or regulation relating to the operation of a motor vehicle.

Required information.

(b) Any report regarding an individual which is transmitted by a chief driver licensing official pursuant to subsection (a) of this section shall contain—

(1) the legal name, date of birth (including day, month, and year), sex, and (at the Secretary's discretion) the height, weight, eye and hair color of such individual;

(2) the name of the State transmitting such information; and

(3) the social security account number, if used by the reporting State for driver record or motor vehicle license purposes, and the motor vehicle operator's license number of such individual (if that number is different from the operator's social security account number);

except that any report concerning an occurrence specified in subsection (a) (1), (2), or (3) of this section which occurs during the two-year period preceding the date on which such State becomes a participating State shall be sufficient if it contains all such information as is available to the chief driver licensing official on such date.

(c) Any report required to be transmitted by a chief driver licensing official of a State under subsection (a) of this section shall be transmitted to the Secretary—

(1) not later than thirty-one days after receipt by a State motor vehicle department of any information specified in subsection (b) (1), (2), or (3) of this section which is the subject of such report, if the date of such occurrence is after the date on which such State becomes a participating State; or

(2) not later than the expiration of the six-month period following the date on which such State becomes a participating State, if such report concerns an occurrence specified in subsection (a) (1), (2), or (3) of this section that occurs during the two-year period preceding such date.

(d) Nothing in this section shall be construed to require any State to report any information concerning any occurrence which occurs before the two-year period preceding the date on which the State becomes a participating State.

ACCESSIBILITY OF REGISTER INFORMATION

23 USC 401 n

SEC. 206. (a)(1) For purposes of fulfilling his duties with respect to driver licensing, driver improvement, or highway safety, the chief driver licensing official of any participating State may, on and after the date of enactment of this title, request the Secretary to refer electronically or through the United States mails any request for

information regarding the motor vehicle driving record of any individual to the chief driver licensing official of any State of record.

(2) The Secretary shall electronically or through the United States mails relay to any chief driver licensing official of a participating State who requests information under paragraph (1) of this subsection any information received from the chief driver licensing official of any State of record regarding an individual in accordance with paragraph (1) of this subsection, except that the Secretary may refuse to relay any information to any such official who is the chief driver licensing official of a participating State which is not in compliance with the provisions of section 205 of this title.

(b)(1) The Chairman of the National Transportation Safety Board and the Administrator of the Federal Highway Administration, for purposes of requesting information regarding any individual who is the subject of any accident investigation conducted by the Board or Bureau of Motor Carrier Safety, may request the chief driver licensing official of a State to obtain information under subsection (a) of this section regarding such individual. The Chairman and Administrator may receive any such information.

s by
als
oyers.

(2) Any individual who is employed as a driver of [illegible] vehicle or who seeks employment as a driver of a motor v[illegible], request the chief driver licensing official of the State in w[illegible] individual is employed or seeks employment to transmit information under subsection (a) of this section to his employer or prospective employer. An employer or prospective employer may receive such information regarding any such individual, and shall make that information available to the affected individual. There shall be no access to information in the Register under this paragraph if such information was entered in the Register more than three years before the date of such request.

(3) Any individual, in order (A) to determine whether the Register is providing any data regarding him or the accuracy of any such data; or (B) to obtain a certified copy of data provided through the Register regarding him, may request the chief driver licensing official of a State to obtain information regarding him under subsection (a) of this section.

(4) Any request made under this subsection shall be made in such form, and according to such procedures, as the Secretary shall establish by regulation.

(c) Any request for, or receipt of, information by means of the Register shall be subject to the provisions of sections 552 and 552a of title 5, United States Code, and any other applicable Federal and State law, except that—

(1) the Secretary shall not relay, or otherwise transmit, information specified in section 205(b) (1) or (3) of this title to any person not authorized by this section to receive such information;

(2) any request for, or receipt of, information by any chief driver licensing official, or by any person authorized by subsection (b) of this section to request and receive information, shall be considered to be a routine use for purposes of section 552a(b) of title 5, United States Code; and

(3) any receipt of information by any person authorized by this section to receive information shall be considered to be a disclosure for purposes of section 552a(c) of title 5, United States Code, except that the Secretary shall not be required to retain the accounting made under paragraph (1) of such section for more than a seven-year period after the date of such disclosure.

PILOT TEST PROGRAM

SEC. 207. (a) The Secretary shall design, within eighteen months after the date of enactment of this title, and implement, within two years after the date of enactment of this title, a pilot test program for the purpose of demonstrating the potential effectiveness of a system for electronic referral and relay of information regarding the motor vehicle driving records of individuals. 23 USC 401 note.

(b) The Secretary shall solicit the participation of States which are interested in participating in such program and shall, within thirty months after the date of enactment of this title, select four States to participate in the program.

(c)(1) The Secretary shall select States in accordance with the provisions of subsection (b) of this section from among States which have in effect, on the date of selection, an intrastate online driver licensing system capable of electronically transmitting information regarding the motor vehicle driving records of individuals.

(2) The Secretary shall select only those States which indicate a willingness to participate in a comprehensive mechanical and programmatic evaluation of systems for the electronic transfer of information.

(3) The Secretary shall ensure that the selection made pursuant to subsection (b) of this section is representative of varying geographical and population characteristics of the Nation.

(4) No State shall participate in the program unless it agrees to assist in providing information to other States regarding the electronic transfer of the motor vehicle driving records of individuals.

(d) Within two years after the date of enactment of this title, the Secretary shall begin the pilot program authorized by subsection (a) of this section. Such program shall continue for a period of one year. In carrying out the program, the Secretary shall utilize different computer technologies and equipment in order to determine which technology and equipment is most effective for the electronic transfer of the motor vehicle driving records of individuals. The Secretary shall determine which systems and devices will best interconnect with systems and devices used in the States which are participating in the pilot program, as well as those used in other States. Computer technologies and equipment.

(e) Any equipment or device which is provided to a State for use in the pilot program conducted under this section may, in the discretion of the Secretary, remain with the State following the conclusion of the pilot program.

(f) Not later than one year after the conclusion of the pilot program, the Secretary shall submit to the Congress a report on the program. Such report shall include an evaluation of the technology utilized during the program, together with an explanation of the nature and degree of State participation in the program. The report shall also contain an evaluation of achievements of the pilot program, as well as a projection of accomplishments which might result from the acquisition of electronic transfer equipment and methods by States other than those which participated in the pilot program. Report to Congress.

CRIMINAL PENALTIES

23 USC 401 note.

SEC. 208. (a) Any person, other than an individual described in section 206(b)(4) of this title, who receives under section 206 of this title information specified in section 205(b) (1) or (3) of this title (the disclosure of which is not authorized by section 206 of this title), and who, knowing that disclosure of such information is not authorized, willfully discloses such information, shall be fined not more than $10,000 or imprisoned for not more than one year, or both.

(b) Any person who knowingly and willfully requests or under false pretenses obtains information specified in section 205(b) (1) or (3) of this title from any person who receives such information under section 206 of this title shall be fined not more than $10,000 or imprisoned for not more than one year, or both.

ADVISORY COMMITTEE

23 USC 401 note.

SEC. 209. (a) There hereby is established a National Driver Register Advisory Committee, which shall advise the Secretary concerning the efficiency of the maintenance and operation of the Register, and the effectiveness of the Register in assisting States in exchanging information regarding motor vehicle driving records.

Membership.

(b) The Advisory Committee shall consist of fifteen members, appointed by the Secretary, as follows:

(1) three members from among individuals who are specially qualified to serve on the Advisory Committee by virtue of their education, training, or experience, and who are not employees of the Federal Government or of any State; and

(2) three members from among groups outside the Government which represent the interests of bus and trucking organizations, enforcement officials, labor, or safety organizations; and

(3) nine members, geographically representative of the participating States, from among individuals who are chief driver licensing officials of participating States.

Office terms.

(c)(1) Except as provided in paragraph (2) and paragraph (3), each member of the Advisory Committee shall be appointed for a term of three years.

(2) Of the members first appointed—

(A) one of the members described in subsection (b)(1) and one of the members described in subsection (b)(2) and three of the members described in subsection (b)(3) shall be appointed for a term of one year;

(B) one of the members described in subsection (b)(1) and one of the members described in subsection (b)(2) and three of the members described in subsection (b)(3) shall be appointed for a term of two years; and

(C) one of the members described in subsection (b)(1) and one of the members described in subsection (b)(2) and three of the members described in subsection (b)(3) shall be appointed for a term of three years;

as designated by the Secretary at the time of appointment.

Vacancies.

(3) Any vacancy in the Advisory Committee shall be filled in the same manner as original appointments. Any member appointed to fill any vacancy shall serve for the remainder of the term for which his predecessor was appointed. Any member may serve after the expiration of his term until his successor has taken office.

Compensation.

(d) The members of the Advisory Committee shall serve without compensation, but the Secretary is authorized to reimburse such members for all reasonable travel expenses incurred by them in attending the meetings of the Advisory Committee.

(e)(1) The Advisory Committee shall meet not less than once each year.

(2) The Advisory Committee shall elect a Chairman and a Vice Chairman from among the members of the Advisory Committee.

Quorum.

(3) Eight members of the Advisory Committee shall constitute a quorum.

(4) The Advisory Committee shall meet at the call of the Chairman or a majority of the members of the Advisory Committee.

(f) The Advisory Committee may receive from the Secretary such personnel, penalty mail privileges, and similar services, as the Secretary considers necessary to assist it in performing its duties and functions under this section.

Report.

(g) Not less than once each year, the Advisory Committee shall prepare and submit to the Secretary a report concerning the efficiency of the maintenance and operation of the Register, and the effectiveness of the Register in assisting States in exchanging information regarding motor vehicle driving records. Such report shall include any recommendations of the Advisory Committee for changes in the Register system.

(h) The Advisory Committee shall be exempt from the requirements of section 10(e), section 10(f), and section 14 of the Federal Advisory Committee Act (5 U.S.C. Appendix).

REPORT BY SECRETARY

Submitta Congress 23 USC 4

SEC. 210. Not later than the expiration of the four-year period following the date of enactment of this title, the Secretary shall prepare and submit to the Congress a comprehensive report setting forth the extent and level of participation in the Register system, and the effectiveness of such system in the identification of unsafe drivers. Such report shall include any recommendations of the Secretary concerning the desirability of extending the authorization of appropriations for this title beyond the period of authorization provided in section 211 of this title.

AUTHORIZATION OF APPROPRIATIONS

23 USC 4

SEC. 211. (a) There are authorized to be appropriated for fiscal years beginning after September 30, 1982, for expenses incurred in the establishment of the Register system under this title not to exceed $2,000,000.

(b) There are authorized to be appropriated to carry out the provisions of this title and the provisions of Public Law 86-660 (74

23 USC 313 note.

Stat. 526) not to exceed $1,000,000 for fiscal year 1983, not to exceed $1,300,000 for fiscal year 1984, not to exceed $1,600,000 for fiscal year 1985, not to exceed $1,600,000 for fiscal year 1986, and not to exceed $1,600,000 for fiscal year 1987.

(c) Funds authorized under this section shall remain available until expended.

Approved October 25, 1982.

AUGUST 1981
FINAL REPORT

Prepared for:

U.S. DEPARTMENT OF TRANSPORTATION
National Highway Traffic Safety Administration
Washington, D.C. 20590

FOREWORD

The objectives of this project are to provide the National Highway Traffic Safety Administration (NHTSA) with: (1) an in-depth national state-of-the-art review and evaluation of two major driving while under the influence (DWI) countermeasure laws, "Illegal Per Se" (IPS) and "Preliminary Breath Test" (PBT), and (2) provide recommendations on model legislation, model jury instructions, and improvements in application by enforcement, prosecution and judicial bodies. The project will enable the NHTSA to assist the states in improving highway safety through the use of these laws for DWI enforcement and adjudication.

This document contains an executive summary and nine sections, plus an appendix.

Section 1 describes the rationale for implementation of Illegal Per Se and Preliminary Breath Test statutes, and the methodology utilized in conducting this study.

Section 2 presents the results of a survey of all states which have enacted a Preliminary Breath Test law.

Section 3 presents the results of a survey of all states that have enacted an Illegal Per Se law.

Section 4 describes the efforts to date of those states that have attempted but failed to pass either IPS or PBT laws.

Section 5 contains a series of in-depth studies of six states which have either a PBT or IPS law or both, and one state which has neither type of law.

Section 6 presents a summary of the statistical data collected during the study that demonstrates the effect IPS-PBT laws have on DWI arrests and prosecutions.

Section 7 contains proposed IPS and PBT statutes which were developed from examples of the most successful IPS-PBT laws now in use, with modifications suggested by legal and traffic safety authorities.

Section 8 contains proposed jury instructions to accompany the IPS and PBT statutes in Section 7. The jury instructions were derived from samples of jury instructions used by courts in seven different states with IPS or PBT laws.

Section 9 is a report of a NHTSA sponsored workshop on IPS/PBT and describes the findings and conclusions of sixteen national authorities on the utilization of PBT-IPS laws.

This study was designed by Donald Macdonald, J.D., and Marvin Wagner, L.L.M., who served as co-principal investigators for this study and contributed to all sections of the report. Mr. Macdonald is a senior project manager with

Science Applications, Inc. and has directed many projects dealing with the enforcement and adjudication of traffic safety laws. Marvin Wagner is a legal analyst and writer on a wide range of legal issues related to alcohol and highway safety and the adjudication of traffic offenses. The sections containing interviews with prosecutors and the suggested IPS-PBT statutes and jury instructions were provided by James P. Manak, J.D., director of the legal publications section of the Northwestern Traffic Institute, and James T. Reilly, J.D., a staff attorney with the National District Attorneys Association. Legal research, analysis, and interviews with state and local highway safety law enforcement officials, legislators, judges, prosecutors, and defense attorneys were provided by William Devlin, J.D.; Gary Gable, J.D.; and Frank Montecalvo, J.D., all of whom are members of the SAI legal system analysis staff, with extensive experience in conducting traffic safety related legal research and legislative analysis.

Special thanks are offered to Professor Robert Borkenstein, nationally known forensic expert on medico-legal problems and inventor of the Breathalyzer; to Professor Robert Force of Tulane University School of Law, a nationally recognized authority on constitutional law; to Professor James Starrs of the George Washington University National Law Center, an expert on the law and forensic science; and to Professor Andre Moenssens of the University of Richmond, T. C. Williams School of Law, an expert on constitutional law, each of whom provided a critique of this study.

Special recognition is also extended to those highway traffic safety and legal experts who attended the special workshop conducted to review the results of this study. The authors are pleased to express their appreciation for the assistance provided by the Contract Technical Manager, Mr. Phillip Dozier, and to the Chief of the Adjudication Branch of the Driver Licensing and Adjudication Division of NHTSA, Mr. George Brandt.

EXECUTIVE SUMMARY

Testimony of law enforcement personnel, prosecutors, the defense bar, and the judiciary that has been collated in the course of this research project indicates that prosecution of driving while intoxicated offenses (DWI) can be improved by modification of present statutes, especially by the adoption and utilization of Illegal Per Se (IPS) and Preliminary Breath Test (PBT) laws. Fifteen states now have an IPS statute in effect, and Illinois passed an IPS bill in July 1981. California legislators expect to see one enacted in 1981. Seven other states have introduced IPS legislation, but the chances of passage in the near future are uncertain. Fourteen states now have a PBT statute. Eleven states are using some form of PBT without a statute. One additional state expects to pass a new PBT law in 1981.

Sections 7 and 8 of this report contain a model IPS and PBT statute, a supporting rationale for each, and sample jury instructions for use with each statute. Both statutes and the jury instructions were drawn up with careful consideration of the existing statutory forms that have proven most successful, and IPS conforms closely to the latest recommendations from the National Commission on Uniform Traffic Laws and Ordinances. There is currently no UVC section dealing with PBT.

IPS LAWS

An Illegal Per Se statute (IPS) is a law which creates an absolute or strict liability upon a motorist who drives a vehicle on any public highway with a BAC of .10 percent or higher. This type of statute, which is widely used throughout most of the industrialized world, removes the "presumption of intoxication" found in most statutes, and places an "absolute" or "strict liability" upon the motorist when he/she drives after reaching the illegal blood alcohol concentration.

With respect to IPS statutes, surveys of prosecutors and judges in states using these types of statutes attribute to them an increase in guilty pleas. Some of the jurisdictions surveyed have enacted anti-plea bargaining statutes in DWI cases, but even without such statutes guilty pleas are higher because IPS is a difficult charge to defend against at trial. Other prosecutors report speedier settlement of cases under IPS resulting from a stronger plea negotiation posture. Some initial increase in the number of cases being tried was noted after the adoption of IPS statutes, but after the laws were tested in trials, the number of guilty pleas and convictions at trial sharply increased.

Despite the fact that a trial where only IPS was charged would be less costly, prosecutors surveyed preferred to charge both IPS and the traditional DWI offense. This is done in part to protect the case in the event the chemical test is challenged successfully, and in part to provide the opportunity to introduce testimony regarding defendant's demeanor at the time of arrest. In some jurisdictions, prosecutors are reluctant to try a case based strictly on an IPS violation. This was due to the belief that at least some juries will not convict without evidence of physiological impairment, other than that provided by the chemical tests.

The information gathered during this project supports the conclusion that an IPS provision is an effective tool in the enforcement of drunk driving laws.

The research reported upon here indicates that IPS:

1. Has increased the number of guilty pleas by an estimated average, for all jurisdictions, of 12 percent. Alabama reported a 40 percent reduction for the first six month period after its IPS law became effective, which was August 1980;

2. Has reduced the number of DWI charges that are negotiated down to a lesser charge by an estimated average of 16 percent;

3. Has increased the number of convictions for DWI by an estimated average of 9 percent, and this does not include convictions through pleas of guilty to a lesser offense, that probably would not have been obtained without the IPS statute. Alabama reported a 51 percent increase in DWI convictions for the first six month period after its IPS law became effective;

4. Has reduced overall cost of prosecuting DWI defendants by reducing the number of trials in many jurisdictions;

5. By reducing the number of elements of the offense to be proven, IPS facilitates prosecution of the impaired driver;

6. Has assisted law enforcement in making more impaired driver arrests. In those jurisdictions where external evidence in the form of outward signs of impairment was required before prosecutors would press the DWI charge, law enforcement officers were hesitant to arrest, even though a .10 percent BAC was suspected. Under IPS, evidence of gross psychomotor impairment is less important in making the decision to arrest;

7. Has facilitated the prosecution of those drinking drivers that show few indicia of physical impairment, even with high BACs. Outward signs of impairment need not be discussed in an IPS trial;

8. Has contributed to lowering the average BAC of those convicted of DWI-IPS;

9. The purely objective .10 percent BAC, as a basis for an arrest is more easily understood by the defendant than is the law enforcement officer's judgement, based upon demeanor, that the driver is impaired.

There are no offsetting disadvantages of IPS to report. The foregoing issues are addressed in Sections 1, 3, 5, and 6 of this report.

Penalties

Penalty provisions in IPS and DUI statutes varied greatly among the jurisdictions, as did actual charging and sentencing policies of prosecutors and judges. Mandatory jail penalties were often suggested by prosecutors as an effective deterrent to recidivism, but this view was not shared by the majority of the judges or law enforcement persons that were interviewed.

Administrative Adjudication of First Offense DWI

A number of the judges and prosecutors who were interviewed suggested that first offense DWI should be removed from the courts and placed in an administrative forum, which would emphasize treatment rather than punishment.

Training of Prosecutors

Typically, DWI cases are assigned to entry level staff members or are prosecuted by the least experienced of the assistant prosecutors. Formal training is non-existent or unstructured, with "on-the-job experience" the most common method. Statewide training through a prosecutor association is available in some jurisdictions. Often there is no syllabus or manual of effective techniques that should be employed. All agreed that training modules consisting of courses, manuals, and audio-visual materials would be helpful.

Training of Law Enforcement Officers

It was noted by prosecutors that the use of IPS provisions under DWI statutes can lead to over-reliance by the police on alcohol testing. Cases are weakened if the police officers fail to systematically note the steps leading up to testing and the general indicia of impairment. When the broadest possible investigatory approaches are used by the police, they result in stronger cases and more guilty pleas. Police personnel reported that some juries can be convinced by impersonal chemical test results, but other juries seem to require assurance that the defendant exhibited some outward signs of impairment, particularly in the BAC range of .10 percent to .15 percent.

Recommendations

Traffic safety officials in every state should organize like-minded persons in the legislature, the press, law enforcement, and the general public, to obtain passage of an Illegal Per Se law. DWI prosecutions should probably continue to be based on charges of both IPS and DWI, in order to encourage guilty pleas and to permit the introduction of all the available evidence at trial; however, IPS gives the prosecutor a more cost-effective opportunity to prove DWI, and with a lesser burden, by solely charging IPS when defendant has a BAC reading of .10%. Additional work must be done in some states to reinforce, in the minds of the judiciary, who in turn must convey to the jury, via the jury instructions, the fact that motorists with BACs in the range of .10% to .13% are in fact illegal and dangerous to themselves and others, irrespective of the presence or absence of other indicia of impairment.

The information gathered during this project supports the conclusion that an IPS provision is an effective tool in the enforcement of drunk driving laws.

The research reported upon here indicates that IPS:

1. Has increased the number of guilty pleas by an estimated average, for all jurisdictions, of 12 percent. Alabama reported a 40 percent reduction for the first six month period after its IPS law became effective, which was August 1980;

2. Has reduced the number of DWI charges that are negotiated down to a lesser charge by an estimated average of 16 percent;

3. Has increased the number of convictions for DWI by an estimated average of 9 percent, and this does not include convictions through pleas of guilty to a lesser offense, that probably would not have been obtained without the IPS statute. Alabama reported a 51 percent increase in DWI convictions for the first six month period after its IPS law became effective;

4. Has reduced overall cost of prosecuting DWI defendants by reducing the number of trials in many jurisdictions;

5. By reducing the number of elements of the offense to be proven, IPS facilitates prosecution of the impaired driver;

6. Has assisted law enforcement in making more impaired driver arrests. In those jurisdictions where external evidence in the form of outward signs of impairment was required before prosecutors would press the DWI charge, law enforcement officers were hesitant to arrest, even though a .10 percent BAC was suspected. Under IPS, evidence of gross psychomotor impairment is less important in making the decision to arrest;

7. Has facilitated the prosecution of those drinking drivers that show few indicia of physical impairment, even with high BACs. Outward signs of impairment need not be discussed in an IPS trial;

8. Has contributed to lowering the average BAC of those convicted of DWI-IPS;

9. The purely objective .10 percent BAC, as a basis for an arrest is more easily understood by the defendant than is the law enforcement officer's judgement, based upon demeanor, that the driver is impaired.

There are no offsetting disadvantages of IPS to report. The foregoing issues are addressed in Sections 1, 3, 5, and 6 of this report.

The problems noted with PBT include:

- The "false positives" and "false negatives" occur with some frequency when the PBT is the older "baggie" type test. New sophisticated PBT devices have been developed which are highly reliable and cost-effective when purchased and used in volume, and several of these devices meet NHTSA's standards for evidential alcohol testing equipment.

- Over-reliance by police on test results, to the detriment of careful observation of other indicia of DWI.

- Equipment maintenance problems (particularly with earlier models of the PBT devices).

- The possibility that a medium (but legal) BAC will mask drug use that is responsible for erratic driving.

- High cost to equip a complete state with modern, direct readout devices.

- Possible constitutional constraints on their use to establish probable cause.

The foregoing issues are addressed in Sections 1, 2, 4, and 5.

The emphasis of future PBT research should be in improving the accuracy and dependability of the equipment so as to permit admissibility of PBT results in court. The United States Supreme Court has not as yet ruled on whether a PBT can be taken with less than probable cause. The recent case law implies that such a test would be valid under the balancing theory that is an important part of the "Terry" test. Here, a balancing of the considerable public interest in improved traffic safety, against the minimal intrusion upon the motorist imposed by the modern pocket-sized portable PBT instrument, will likely be held constitutional. All of the cases brought before the state's highest courts dealing with the use of a PBT have upheld its use. The admissibility of either the PBT results or the refusal of a PBT would be of substantial assistance in DWI enforcement.

The future of PBT as a deterrent to drunk driving, particularly in those states with an IPS law, is promising. With or without a passive testing device, an expansion of the Prouse and Prichard decisions regarding random (non-discretionary) roadblocks, at which PBTs are administered on the basis of a reasonable and articulable suspicion of an illegally high BAC, has the potential for significantly increasing the public's perception of the probability of being apprehended for DWI. Authorities generally agree that the fear of apprehension is presently very low among persons who drink and drive.

2. SURVEY OF ALL STATES THAT HAVE PRELIMINARY BREATH TEST (PBT) LAWS

Introduction

As used in this report, the term "preliminary breath test" is defined to mean a pre-arrest breath test. Usually, but not always, the purpose of a preliminary breath test is to assist in establishing probable cause upon which a police officer may base his arrest.

A preliminary breath test is regarded as a valuable law enforcement tool in that:

a) It enables the officer in the field to make a quick and simple determination of whether a person is impaired or intoxicated in those marginal BAC cases, and those stops of impaired persons that have learned the appropriate responses to psychomotor tests;

b) It may indicate that an impaired person, with low BAC, is under the influence of drugs;

c) It can indicate that a person who appears to be intoxicated may be suffering from an illness, such as a diabetic reaction;

d) It can prove that a motorist is not impaired, and can thus be released at the scene and not suffer the indignities and inconvenience of an arrest; and

e) It engenders an awareness by the general public of higher probability of apprehension on the highway of impaired or intoxicated drivers.

A preliminary breath test is a valuable and reasonable use of police authority to determine the fact (or lack) of driver impairment. Considering the government's interest in highway safety (50 percent of all highway fatalities are alcohol-related) and the relatively low (possibly de minimus) intrusion occasioned by a PBT, the laws allowing a PBT have been consistenly upheld by the state courts.

An effective law enforcement campaign, which includes the systematic use of a PBT in traffic stops, can substantially raise the public's awareness of the probability of apprehension on the highways and, therefore, reduce significantly the annual number of drinking-driving accidents.

The typical PBT statute enables police officers to use this new investigative technique, prescribes conditions under which it may be used, determines the methodology to be employed, imposes a duty upon motorists to cooperate with the police in its use, provides sanctions for breach of this duty, and prescribes if and how the results obtained will be used in court. The statute, both on its face and as it is actually used, must meet all requirements imposed by the U.S. and State Constitutions. If there are ambiguities in the statute, the courts will interpret these ambiguities in favor of the defendant whenever possible. If this is not possible, the courts will render the statute unconstitutional. See U.S. v. Simms 508 F. Supp 1179 (1979).

Constitutional Issues Involved in Use of PBT

When a law enforcement officer makes a stop and requests the vehicle operator to submit to a PBT, a constitutional issue may arise in that the Fourth Amendment of the U. S. Constitution (applied to the states via the Fourteenth Amendment) guarantees to individuals the right to be free from unreasonable searches and seizures. The stopping of the individual would be a seizure of the person, and the administration of an active (as opposed to passive) type of preliminary breath test may be a search within the context of the Fourth Amendment. There is a school of thought that this test is not a "search" to which the Fourth Amendment constraints would be applicable. It has been stated that the sampling of "deep lung air" which is the subject of the search, is not sufficiently "intrusive" using the modern PBT devices, to constitute a search. Some analogies of this activity include voice exemplars, handwriting samples, removal of cordite from under fingernails, swabs of grease from hands, etc., which have been held as not being constitutionally protected searches. Should the test be accepted as a search, in order for the search and/or seizure to be valid, it must either be consented to by the individual searched, or be pursuant to a warrant, incident to an arrest, or involve exigent circumstances (immediate loss of evanescent evidence). Probable cause must be present in the last three situations.

In the case of Terry v. Ohio, 392 U.S. 1 (1968), however, the Supreme Court upheld the seizure and search of a person based on something less than probable cause (i.e., a "reasonable suspicion"). The court weighed the government's need for the search to protect the life of the officer, against the intrusiveness of the search iteself (here, a "pat-down" for weapons), and concluded that the search and seizure was not unreasonable in light of the Fourth Amendment. While it is apparent that a request for a PBT is not the same as a "pat down" to protect the life of the officer, the Terry balancing test has been subsequently applied to a variety of situations totally unrelated to the safety of the officer, and these include airport and international border searches.

Three recent State Supreme Court cases have substantial bearing on the issue of the requirements of "probable cause" for the arrest of a suspected DWI prior to a request to submit to a PBT. In the first case, Asbridge v. N. Dakota State Highway Commissioner, 291 N.W. 2d 739 (N.D. Sup Ct), reported on June 10, 1980, the court indicated that the defendant's failure of an on-site chemical screening test (PBT) was one of the elements in establishing "reasonable grounds" or probable cause for DWI arrest. It stated: "Similar in purpose to the various field sobriety tests, the purpose of an on-site chemical screening test is to insure that sufficient probable cause exists to warrant an arrest." (emphasis supplied)

In Marben v. State, 294 N.W. 2d 697 (Minn. Sup. Ct.), reported on August 20, 1980, Marben claimed that because he was not offered a PBT by the arresting officer prior to placing him under arrest, the arrest was invalid and the Implied Consent Law could not be invoked against him. The Court disagreed with this contention, and said the following:

"Contrary to Marben's assertion, we believe that the Implied Consent Law does not require the administration of a preliminary screening test where the officer ascertains from his own observations that the driver is under the influence of alcohol. Rather, the preliminary screening test appears to be intended to be utilized in situations where the officer, after observing the driver, is unsure whether the driver is under the influence of alcohol. See State v. Grovum, 297 Minn. 66. (emphasis supplied)

In State v. Gerber, 206 Neb. 75, 291 N.W. 2d 403 (1980), in regard to e use of a PBT test, the court said, "It should be kept in mind that the stimony with regard to the preliminary test was offered not for the purpose of tablishing the charge against Gerber, but rather to establish justification for acing Gerber under arrest." In Nebraska, it would appear that the Fourth endment issue is settled until the U.S. Supreme Court speaks.

Several other state high court decisions have been made which specify at the major purpose of a PBT is to assist the police officer in determining ether probable cause exists to warrant an arrest.

In State v. Grovum, 209 N.W. 2d 788, (Sup. Ct. of Minn., 1973) on ge 791, the court held:

"The use of a preliminary screening test for determining possible violations of the driving-while-under-the-influence statute is delineated by the statute and is solely for the purpose of guiding the officer as to whether an arrest should be made." (emphasis supplied)

In State v. Bellino, 390 A 2d 1014 (Sup. Ct., Maine, July 1978) the urt, in dealing with a pre-arrest breath test, stated:

"We take notice that subsection 10-c does not expressly require an arrest as a condition precedent to its application. Rather, it subjects the operator initially to a compulsory investigative process to determine whether the operator has consumed alcohol, this through what may be termed a preliminary unofficial breath test to be used only to establish probable cause for the requirement of an official second chemical test of blood or breath, if the preliminary breath test results are positive." (emphasis supplied)

The state courts have consistently interpreted the PBT laws as thority for field officers to conduct preliminary investigations to determine ther the motorists are in violation of the state's drinking-driving laws.

No direct challenge on constitutional grounds has been made in New York inst the use of PBT's as yet. Some New York lower court decisions have mined these issues.

In People v. Delaney, 83 Misc. 2d 576, 373 N.Y.S. 2d 477 (September 5), in referring to a PBT, this lower court rules, on page 480:

"In the breath test situation, the only reason for asking the motorist to take a breath test is to assist the officer in making a determination as to whether he is going to place the defendant under arrest, and consequently the sole and only function is to incriminate the motorist." (emphasis supplied)

In another lower court New York case, the court specifically applied the Terry doctrine to a PBT. It stated:

"However, if the police officer has no probable cause to make the arrest for driving while intoxicated, he may 'in appropriate circumstances and in an appropriate manner approach a person for purposes of investigating possible criminal behavior even though there is no probable cause to make an arrest,' Terry v. Ohio, supra. There, however, has to be "reasonable suspicion."

"On the other hand, while investigating an accident, the police officer may obtain 'probable cause,' or at least the 'necessary suspicion' to bring the fact situation within the purview of Terry v. Ohio, supra. In that event, the search and seizure of the breath would not be an illegal search and seizure."

"This court believes that a demand for a breath screening test under appropriate circumstances, bears the same relationship to a full scale chemical test as a pat down, to determine if a suspect has a weapon, under the circumstances authorized by Terry v. Ohio, supra, bears to a full scale body search."

Another aspect to be considered is that, with the exception of the State of Nebraska whose penalty for refusal treats the offense as a "misdemeanor," the penalties for refusal of a PBT are generally administrative in nature. Therefore, the constitutional requirements in these instances may be somewhat less stringent than in criminal prosecutions. In Camera v. Municipal Court, 387 U.S. 523, 18 L. EA. 2d 930, 87 S. Ct. 1727, the court stated:

"...this is not to suggest that a health official need show the same kind of proof to a magistrate to obtain a warrant as one must who would search for the fruits or instrumentalities of crime. Where considerations of health and safety are involved, the facts that would justify an inference of 'probable cause' to make an inspection are clearly different from those that would justify such an inference where a criminal investigation has been undertaken."

"The test of 'probable cause' required by the Fourth Amendment can take into account the nature of the search that is being sought."

"The warrant procedure is designed to guarantee that a decision to search private property is justified by a reasonable governmental interest. But reasonableness is still the ultimate standard. If a valid public interest justifies the intrusion contemplated, then there is probable cause to issue a suitably restricted search

warrant ... Such an approach neither endangers time-honored doctrines applicable to criminal investigations, nor makes a nullity of the probable cause requirement in this area. It merely gives full recognition to the compelling public and private interests here at stake, and in so doing, best fulfills the historic purpose behind the constitutional right to be free from unreasonable government invasions of privacy."

The United States Supreme Court has, in many instances, utilized the balancing concept, which is a separate element of the Terry doctrine in other situations where the public interests out-weighed the importance of protecting the individual from minimal search-type instrusions. In Davis v. Mississippi, 394 U.S. 721 L-Ed. 2d 676, 89 S. Ct. 1394, the court held that:

"Detention for fingerprinting may constitute a much less serious intrusion upon personal security than other types of police searches and detentions. Fingerprinting involves none of the probing into an individual's private life and thoughts that marks an interrogation or search."

In Pennsylvania v. Mimms, 4321 U.S. 106, 54 L. Ed. 2d 331, 98 S. Ct. 330, in a police-stop case, the court stated:

"Reasonableness, of course, depends on a balance between the public interest and the individual's right to personal security free from arbitrary interference by law officers."

"Against this important interest, we are asked to weigh the intrusion into the driver's personal liberty occasioned not by the initial stop of the vehicle, which was admittedly justified, but by the owner to get out of the car. We think this additional intrusion can only be described as de minimus."

In a very recent case, U.S. v. Mendenhall, 64 L. Ed. 2d 497, the court held that:

"Terry v. Ohio ... establishes that a reasonable investigative stop does not offend the Fourth Amendment. The reasonableness of a stop turns on the facts and circumstances of each case. In particular, the Court has emphasized (i) the public interest served by the seizure, (ii) the nature and scope of the intrusion, and (iii) the objective facts upon which the law enforcement officer relied, in light of his knowledge and expertise."

Applying the same balancing test to the use of PBTs, the government's need for the stop and search (to remove a potentially dangerous drunk driver, armed in a sense with a motor vehicle) balanced against the intrusiveness of the search (short delay of a "reasonably suspicious" motorist and having him blow into a pocket-sized device) may well result in the search being held to be reasonable and thus constitutional, when this issue does reach the high court.

Statutes authorizing the use of PBTs usually deal with this issue by prescribing the grounds upon which an officer must base his request. Although two states require probable cause (which constitutionally would be sufficient to make an arrest), most request something less stringent, but probably stringent enough to meet the Terry test. Recently the court has settled certain implied consent disputes in Mackey v. Montrym 99 S. Ct. 2612 (1979), and in doing so used an analysis that seems favorable to the validity of PBT laws. Thus, while the constitutionality of PBT laws remains unsettled, the case for validity seems to be strengthened by recent decisions.

Another Supreme Court case, Delaware v. Prouse, 440 U.S. 648 (1979) and a recent Tenth Circuit Court of Appeals decision in U.S. v. Prichard, issued April 1, 1981, are also helpful. In Prichard the court held that a roadblock on an interstate highway with which police attempted, albeit unsuccessfully, to check the license and registration of every motorist that passed by did not run afoul of Delaware v. Prouse. The police began the roadblock by stopping every car, but as soon as 10 cars were backed up, the officer would wave all of them through. Once the area was clear, the officer would reinstate the roadblock and begin this process again. The police later "candidly conceded" that they had planned "to enforce the law" if they observed evidence of other crimes while checking licenses and registration. During the stop of the vehicle at issue in this case, the officer discovered and seized a large quantity of cocaine.

In Prouse the Supreme Court held that random, totally discretionary license checks violated the Fourth Amendment, but at the same time indicated that a roadblock of "all incoming traffic" might withstand constitutional scrutiny. Prichard does not involve the "100% roadblock" referred to in Prouse, the court says, but it was no less reasonable. The police attempted to stop all traffic "insofar as was humanly possible," and their decision to let cars pass through when the traffic backed up was "reasonable and ... non-violative of the rule of Prouse."

The Prouse-Prichard roadblock scenario could be used to stop motor vehicles in a non-discretionary manner, and the observations made by the police officer while collecting information about license and registration could provide the articulable and reasonable suspicion that a DWI-related violation exists, which would then support an involuntary application of a non-passive PBT. This sort of "boot-strapping" would apparently be permissible under Prichard since the police candidly admitted that they planned to charge on any law violations that appeared during the process of the administrative type registration inspection.

In a recent New Jersey Supreme Court case, State v. Coccamo, N.J. Sup. Ct., Morris County, 9/26/80, in approving a roadblock practice to deter drunk drivers, the court cited the Prouse case, and stated:

> "After balancing the State's strong interest in protecting the public from the substantial risk posed by drunk drivers, with the minor inconvenience which may be caused to every fifth motorist and the fleeting, minimal intrusion upon his privacy, the State's action must be considered as a reasonable infringement upon the motorist's expectation of privacy. Nor did the stop become overly intrusive when the defendant was asked to produce his license and registration. When

the initial detention is lawful, as it was here, the police may require the driver to produce his driving credentials."

If a PBT is to be administered with the motorist's consent, such consent must be informed and voluntary. There are occasions on which this may be difficult to prove in court. Some states have attempted to remedy this situation with a statute stating that as a condition to the privilege of driving on the state's highways, the motorist is deemed to have given his consent to such testing. Usually such a statute involves a formal "evidentiary" test rather than a preliminary screening test, but occasionally preliminary tests are also included. Some PBT statutes require that an officer notify the motorist of his right to refuse the test and the consequences of such refusal. Other states require that the motorist be advised that there is no adverse consequence of such refusal, while many states will require license suspension. This is usually connected with the implied consent statute.

Other statutory provisions relate to the admissibility of the evidence in court. If the search is valid (after a legal arrest), there should be no problem, constitutionally speaking, with allowing PBT test results into evidence. Since the "search" issue associated with the PBT situation is unsettled, many states have opted for the safe route by stating that such test results are inadmissible as evidence, but only serve to indicate to the officer whether additional testing is required (i.e., after arrest). It is presumed that should there be an issue of whether the arrest itself was valid, the test results would be admissible for the purpose of establishing probable cause. Most statutes are silent on this, however.

Likewise, most statutes are silent on the issue of admissibility of refusal to take the preliminary breath test. This issue raises a possible problem with the Fifth Amendment right against self-incrimination. It would be constitutional to allow such refusal to be admissible for the purposes of license revocation under an implied consent statute (a non-criminal procedure), but it is questionable as evidence that the driver knew he was guilty of the crime and thus did not submit to the test. Some states do permit into evidence the fact of refusal to take the more formal implied consent test, and the inference to be drawn from this refusal is that the driver knew he was guilty. In Gerber, infra, the court held that the receipt of the PBT in evidence was not prejudicial error and not grounds for reversal.

PBT Test Devices

For those readers who are not familiar with the equipment used to administer pre-arrest (or preliminary) breath tests, the following short descriptions are provided for the two most commonly used PBT devices:

- The "baggy" test is composed of a tube containing a yellow chemical, potassium dichromate, in sulfuric acid, on silica gel crystals and a limiting bag. The subject blows through the tube until the bag on the other end is filled. The yellow color turns to green at the entrance end, and the length of the green change is a rough indicator of the BAC. It is used widely in Europe and in some places in this country. It is disposable, and is used one time only. The length of the green

can be set for any BAC desired as a standard. There is usually nothing to be sent to a laboratory for analysis.

- Electronic pocket-sized portable devices: These hand-held devices use either a fuel cell or an infra-red sensor, and do not require wet chemicals. They give readouts either as pass-fail or in digital BACs. Examples are the Alco-Sensor II and ALERT J3AD.

- Evidentiary instruments in mobile units: These can be used either as PBT devices or as evidentiary test units. These units are large in size. The test procedure takes at least 15 minutes, and requires the suspect to leave his vehicle. Examples include the Breathalyzer and the P.E. Intoximeter.

Each of the above devices are described as "active" as opposed to passive systems in that the subject being tested must cooperate by blowing into the device. A passive system (not available) would detect alcohol in the ambient air in the vicinity of subject's mouth, and would not require the active cooperation of the subject.

These devices are also categorized as screening devices, evidentiary devices, or remote collection devices. Remote collection devices are intended to collect whole breath specimens or the alcohol from a fixed volume of breath for later analysis. Their chief purpose is to provide a specimen to confirm an evidentiary test. Colorado requires this, as do some parts of Arizona. They form no part of preliminary breath testing. Examples are the Intoximeter indium encapsulating units, the Lucky silica gel tubes, and the Breathalyzer calcium sulfate tubes. All these methods require a special breath collection device. They are ancillary to evidential testing.

Several of the newest PBT devices that have undergone extensive testing by the National Highway Traffic Safety Administration have demonstrated the degree of accuracy and reliability that is presently required of instruments in a forensic laboratory, used to produce BACs for evidentiary purposes. In the event that future trial courts demand that an evidential breath test be taken within 30 minutes of the DWI arrest, as is now being suggested by some defense attorneys*, the new generation of PBT devices may suddenly enjoy a much wider market than at present. In states with a PBT law, the officer at the scene can use the first test to make a decision to arrest, and follow this up with a second, post-arrest breath test, under the implied consent statute, which should be admissible at trial.

Currently, fourteen states have statutes which provide for pre-arrest breath testing. These states are listed, and the character of their statutes summarized in Table 2-1. The sections which follow discuss the status of PBT laws in each of these states, and the operational aspects of the law in the

LEGEND

- = cited statute is silent on issue
- *,c = references to COMMENTS column
- cl = ambiguity clarified by case law

Statutory Characteristics

A Grounds for requests:

1. Probable cause (violation involving alcohol)
2. Reason to believe (violation involving alcohol)
3. Reasonable grounds (violation involving alcohol)
4. Suspicion (violation involving alcohol)
5. Any accident
6. Any traffic violation

B Consequences of refusal:

1. Criminal penalty
2. Civil penalty
3. Suspension/revocation of license
4. Fine
5. No penalty
6. Charged with DWI offense
7. Required to take chemical test

C Admissibility of PBT results:

1. Yes - all cases
2. No - all cases
3. Only to justify arrest/implied consent test

D Admissibility of refusal:

1. Yes - all cases
2. No - all cases
3. To justify arrest/implied consent test
4. In license revocation procedures

E Testing methodology:

1. Prescribed
2. None

F Test is required:

1. By motorist's demand
2. At officer's discretion
3. Prior to arrest (at least a request to test)

G Notification of Rights:

1. Refusal and no penalty
2. Refusal with penalty
3. None

states in which interviews of police, prosecutors, defense attorneys, and judges were conducted.

2.1 FLORIDA

2.1.1 Statutory Provisions

Sec. 322.251. Suspension of license; chemical test for intoxication.

1.(b)1. Notwithstanding the provisions of this section, a law enforcement officer, who has reason to believe that a person's ability to operate a motor vehicle is impaired by alcohol and that the person has been operating a motor vehicle during the period of such impai[illegible] may, with the person's consent, give, or the person may demand, a prearrest breath test for the purpose of determining if said person is in violation of Sec. 316.028(1), but the taking of such prearrest breath test shall not be deemed a compliance with the provisions of paragraph (a). The results of any test administered under this section shall not be admissible into evidence in any civil or criminal proceeding. An analysis of a person's breath in order to be considered valid under the provisions of this section, must have been performed according to methods approved by the Division of Health of the Department of Health and Rehabilitative Services. For this purpose, the Division of Health is authorized to approve satisfactory techniques or methods.

2. Prior to administering any prearrest breath test, a law enforcement officer shall advise the motor vehicle operator that he has the right to refuse to take such test, and, prior to administering such test, a law enforcement officer shall obtain the written consent of the motor vehicle operator.

2.1.2 Case Law

The pre-arrest test is to be used when the officer does not have probable cause but does have a reasonable belief that the individual was driving under the influence of alcoholic beverages. Op. Atty. Gen., 075-46, Feb. 20, 1975.

While the above opinion seems to assert a substantive distinction between "probable cause" and "reasonable belief," these terms are most frequently used on an interchangeable basis. It seems clear that the Attorney General endorses a lesser standard than probable cause, and the authors here believe it means simply a reasonable and articulable suspicion.

It is unnecessary under Federal or Florida constitutions or statutes to place driver under arrest prior to administering a blood test to determine if he is intoxicated. State v. Mitchell, 245 So. 76 2d (1971). The court based its decision on Schmerber v. California, 384 U.S. 757 (1966) stating that the relevant act was not arrest of the subject, but whether there was a clear indication of relevance and likely success of a test of the subject's blood for alcohol.

See Section 5.3 for in-depth study of this state's PBT laws.

2.2 INDIANA

2.2.1 Statutory Provisions

Sec. 9-4-4.5-3 (47-2003e). Opportunity to submit to chemical test prior to arrest. -- (a) Any law enforcement officer authorized to enforce the laws of this state regulating the use and operation of vehicles on public highways who has probable cause to believe that any person has committed the offense of operating a vehicle while intoxicated, under IC 9-4-1-54, though not in his presence or view, shall not place such person under arrest for such offense until he has first offered to such person the opportunity to submit to a chemical test; however, it is not necessary to offer such an opportunity to a person who is unconscious. Any such person who agrees to submit to such chemical test shall not be arrested, but shall accompany the officer to the nearest available chemical test device for the purpose of taking such test as a condition of the driving privilege:

(1) If such chemical test results in prima facie evidence that such person is not intoxicated, he shall not be arrested and charged with such offense and he shall be released immediately.

(2) If such chemical test results in relevant evidence, coupled with other evidence, that such person is intoxicated, he may be arrested and charged with such offense.

(3) If such chemical test results in prima facie evidence that such person is intoxicated, he shall be arrested and charged with such offense.

(b) (Redesignated as subdivision (a)(2) by 1978 amendment.)

(c) (Redesignated as subdivision (a)(3) by 1978 amendment.)

(d) If any person shall refuse to submit to such chemical test, pursuant to this chapter, he may be arrested and charged with such offense, and his current driving license shall be delivered to the judge of the court in which such charge is filed, along with a certification of "refusal to submit," to motor vehicles.

See also Sec. 9-4-4.5-3 for definition of "chemical test."

This statute is not restricted to a breath test, but authorizes a pre-arrest test of breath, blood, urine, or other bodily substance for the presence of alcohol.

2.2.2 Case Law

The state must establish a foundation before Breathalyzer results are admissible into evidence. Klebs v. State, 305 N.E. 2d 781 (1974).

The Indiana Court of Appeals, First District, would not construe the language "nearest available test device" so narrowly as to require a law enforcement officer to forego an accurate and approved chemical test (blood test at hospital with analysis at State Police Laboratory) for another, which would have required moving the subject elsewhere or transporting the device to him. The court also held that exigent circumstances (dissipation of alcohol from blood) allow for a sample to be taken without a warrant, consent or arrest. Clark v. State, 372 N.E. 2d 185 (1978).

In Dunham v. State, 375 N.E. 2d 245 (1978), the court held that a certificate of "breath test refused," is admissible in license revocation proceedings.

2.2.3 Problems with Statutory Interpretation

The first sentence of the statute appears to limit pre-arrest testing to those situations where the offense of driving while intoxicated occurred outside the officer's presence or view. This wording is at variance with previous versions of the provision.

Also, it is not clear from the statute that the purpose of delivering the driver's license to the court, along with a certificate of refusal to take a chemical test, is to effectively withdraw the driving privilege, even before the court has acted to suspend the license. Failure to deliver the defendant's license to the court, with the certification, does not preclude the court from suspending the license. Bowlin v. State, 330 N.E. 2d 353 (1975).

2.2.4 Problems with Statutory Application

The Indiana statute, when viewed as another layer of protection of the civil rights of the motorist, works very well. Viewed as a device for simplifying the problem of establishing probable cause, it involves some problems. Since the statute requires probable cause before a pre-arrest test is given, the statute imposes an additional requirement with which the police must comply (in certain circumstances) before placing a person under arrest. Such additional requirement is not necessary to meet constitutional standards.

It is reported that the state police are using PBTs to a limited extent. There has been no objection in court to the use of PBTs in the field to date. The police support the pre-arrest tests and feel that they save time and are especially useful in separating out marginal cases, which probably would not be prosecuted even if an arrest were made.

2.3 MAINE

2.3.1 Statutory Provisions

Chapter 29 Sec. 1312.11C. Every person operating a motor vehicle which has been involved in an accident or which is operated in violation of any of the provisions of this Title shall at the request of a police officer, submit to a breath test to be administered by the police officer. If the test indicates that the operator has consumed alcohol, the police officer may require the operator to submit to a chemical test in the manner set forth in this section.

2.3.2 Case Law

In State v. Bellino, 390 A.2d 1014 (1978), the Supreme Judicial Court of Maine clarified an ambiguity in Section 29-1312, Subsection 10-C (now the current 11C) by stating that since the statute does not expressly require an arrest as a condition precedent to the administration of a preliminary breath test, no arrest is required; and that the purpose of the test is to establish probable cause for requiring an official second chemical test, blood or breath, if the preliminary breath test results are positive.

2.3.3 Problems with Statutory Interpretation

The statute does not specifically state that the test is to be given prior to arrest. This is apparently clarified by the Bellino case, supra, although a preliminary breath test was not an issue in that case.

The statute is silent on the issues of consequences for refusal, admissibility of PBT results, and admissibility of the fact of refusal to take the test.

2.3.4 Problems with Statutory Application

No problems were noted.

2.4 MINNESOTA

2.4.1 Statutory Provisions

Sec. 169.121, Subd 6. When a peace officer has reason to believe from the manner in which a person is driving, operating, or controlling a motor vehicle or has violated subdivision 1, he may require the driver to provide a sample of his breath for a preliminary screening test using a device approved by the commissioner of public safety for this purpose. The results of this preliminary screening test shall be used for the purpose of deciding whether an arrest should be made and whether to require the chemical tests authorized in section 169.123, but shall not be used in any court action except to prove that a chemical test was properly required of a person pursuant to section 169.123, subdivision 2. Following the screening test, additional tests

may be required of the driver pursuant to the provisions of section 169.123.

The driver of a motor vehicle who refuses to furnish a sample of his breath is subject to the provisions of section 169.123 unless in compliance with 169.123, he submits to a blood, breath or urine test to determine the presence of alcohol or a controlled substance.

See also 169.123 subd 2; PBT test refusal is grounds for requiring a chemical test.

2.4.2 Case Law

In State v. Grovum, 209 N.W. 2d 788 (1973), the Supreme Court of Minnesota held that refusal to take preliminary screening test for drugs or alcoholic beverages could not be grounds for revocation of license, but that refusal to take the chemical test provided by the implied consent statute would be grounds for a license suspension, and that such chemical test could be requested prior to an actual arrest if the police already had probable cause.

See Section 5.2 for in-depth study of this state's PBT laws.

2.5 MISSISSIPPI

2.5.1 Statutory Provisions

Sec. 63-11-5. Implied consent to chemical test; warnings; preliminary test.

* * *

The commissioner of public safety and the state board of health are authorized to adopt procedures, rules, and regulations to allow the arresting officer to give a preliminary, unofficial "on-the-spot" test to establish whether or not the breath of the driver is free from any alcoholic content before the official chemical analysis test of his breath is made. However, the failure to give the preliminary test shall in no way affect prosecution under this chapter.

2.5.2 Case Law

None. Law is not used.

2.5.3 Problems with Statutory Interpretation

It is unclear whether this statute was intended to provide for the "unofficial 'on-the-spot'" breath test to be given prior to arrest. The term "arresting officer" is used, implying that an arrest must first be made. This test is planned to be used in instances where the driver is a great distance from a Breathalyzer, and this would let the officer know whether it would be worthwhile to take the driver to the Breathalyzer site or not.

2.5.4 Problem with Statutory Application

This statute has not been used to date because no procedures, rules or regulations have been adopted by the commissioner of public safety or the state board of health allowing for such testing.

2.6 NEBRASKA

2.6.1 Statutory Provisions

Sec. 39.669.08. Drunken driving; implied consent of operator of motor vehicle to submit to chemical test to determine alcoholic content of blood, urine, or breath; when test administered; refusal; penalty.

(3) Any law enforcement officer who has been duly authorized to make arrests for violation of traffic laws of this state or ordinances of any city or village may require any person who operates or has in his actual physical control a motor vehicle upon a public highway in this state to submit to a preliminary test of his breath for alcohol content if the officer has reasonable grounds to believe that such person has alcohol in his body, or has committed a moving traffic violation or has been involved in a traffic accident. Any person who refuses to submit to such preliminary breath test or whose preliminary breath test results indicate an alcohol content of ten-hundredths of one percent or more shall be placed under arrest. Any person who refuses to submit to such preliminary breath test shall be punished by a fine of not less than fifty dollars nor more than one hundred dollars.

(5) Any person who is required to submit to a preliminary breath test, or to a chemical blood, breath or urine test pursuant to this section shall be advised of the consequences of refusing to submit to such test.

See also 39.669.11 regarding admissibility of results.

2.6.2 Case Law

In State v. Gerber, 206 Neb. 75 (1980), the Supreme Court of Nebraska held that before the results of a PBT may be received in evidence, it must be shown that the requirements of Neb. Rev. Stat. Sec. 39-669.11 (Reissue 1978) have been met, including evidence that the method of performing the preliminary test has been approved by the Nebraska Department of Health (N.D.H) and that the person administering and interpreting the test possesses a valid permit issued by the N.D.H. for that purpose.

In State v. Orosco, 199 Neb. 532, 260 N.W.2d 303 (1977), the court held that the offering of a PBT is not a condition precedent to an arrest for any offense arising out of acts alleged to have been committed while the person was driving or in actual physical control of a motor vehicle while under the influence of alcohol. In effect, the court ruled that a driver can be arrested

for DUI without being offered a PBT if the arresting officer already had enough evidence to establish probable cause for arrest.

See Section 5.1 for in-depth study of this state's IPS and PBT laws.

2.7 NEW YORK

2.7.1 Statutory Provisions

Sec. 1193-a. Breath tests for operators of certain motor vehicles. Every person operating a motor vehicle which has been involved in an accident or which is operated in violation of any of the provisions of this chapter shall, at the request of a police officer, submit to a breath test to be administered by the police officer. If such test indicates that such operator has consumed alcohol, the police officer may require such operator to submit to a chemical test in the manner set forth in section eleven hundred ninety-four of this chapter.

2.7.2 Case Law

In People v. Grasser, 393 N.Y.S. 2d 1009 (1977), the Amherst Town Court held that use of PBT under the statute is constitutional, but could be unconstitutional in certain circumstances. This court would require that there would have to be at least a "reasonable suspicion" of the crime of driving while intoxicated. ("Reasonable suspicion" being language from Terry v. Ohio, 392 U.S.1.) The statute on its face is much broader, allowing PBT in cases of any traffic accident or violation.

2.7.3 Problems with Statutory Interpretation

The statute is silent on the issues of admissibility of test results, consequences of refusal, admissibility of refusal, and testing methodology to be used.

2.8 NORTH CAROLINA

2.8.1 Statutory Provisions

Sec. 20-16.3. Preliminary breath test. Any law enforcement officer having reasonable grounds to believe that a person has been driving or operating a vehicle on a highway or public vehicular area while under the influence of intoxicating liquor may, without making an arrest, request that such person submit to a preliminary chemical breath test to be administered by the officer. The results of this test shall not be admissible in evidence and failure to submit to the test shall not constitute a violation of this Chapter. Nothing contained in this section shall be construed to prevent or require a subsequent chemical test pursuant to G.S. 20-16.2. The law-enforcement officer requesting the test shall advise orally and in writing the person to be tested that his failure to take the subsequent chemical test pursuant to G.S. 20-16.2 will not result in a penalty and that such refusal will not require the taking of a chemical test. No device may be used to give a

chemical test under the provisions of this section unless it has been approved as to type and make by the Department of Human Resources.

2.8.2 Case Law

No case law on PBT noted.

2.8.3 Problems with Statutory Interpretation

While the statute does not specifically state that the fact of a refusal to take the PBT is inadmissible in court for any reason, it is clear from reading the statute that this is the case, since the motorist must be advised that no penalty results from his refusal, and that such refusal will not require the taking of a chemical test.

2.8.4 Problems with Statutory Application

It is reported that the state patrol is not using the PBT for two reasons: (1) it is not admissible in court, and (2) twenty minutes are required to administer the test. North Carolina expects to use PBT more in the future, primarily as a device to screen out those persons with low enough BAC readings that they should not be arrested.

2.9 NORTH DAKOTA

2.9.1 Statutory Provisions

Sec. 39-20-14. Screening tests. Any person who operates a motor vehicle upon the public highways of this state shall be deemed to have given consent to submit to an onsite screening test or tests of his breath for the purpose of estimating the alcohol content of his blood upon the request of a law enforcement officer who has reason to believe that such person committed a moving traffic violation or was involved in a traffic accident as a driver, and in conjunction with the violation or the accident the officer has, through his observations, formulated an opinion that such person's body contains alcohol. A person shall not be required to submit to a screening test or tests of his breath while at a hospital as a patient if the medical practitioner in immediate charge of this case is not first notified of the proposal to make the requirement, or objects to the test or tests on the ground that such would be prejudicial to the proper care or treatment of the patient. The screening test or tests shall be performed by an enforcement officer certified as a chemical test operator by the state toxicologist and according to methods and with devices approved by the state toxicologist. The results of such screening test shall be used only for determining whether or not a further test shall be given under the provisions of section 39-20-01. If such person refuses to submit to such screening test or tests, none shall be given, but such refusal shall be sufficient cause to revoke such person's license or permit to drive in the same manner as provided in section 39-30-04, and a hearing as provided in section 39-20-05 and a judicial review as provided in section 39-20-06 shall be available. No provisions of this section

shall supersede any provisions of chapter 39-20, nor shall any provision of chapter 39-20 be construed to supersede this section except as provided herein.

2.9.2 Case Law

No case law located.

2.9.3 Problems with Statutory Interpretation

The statute is silent on the issue of admissibility or refusal to take the test.

2.9.4 Problems with Statutory Application

No problems noted.

2.10 SOUTH DAKOTA

2.10.1 Statutory Provisions

Sec. 32-23-1.2. Submission to breath test required by officer -- Chemical test after positive breath test. -- Every person operating a motor vehicle which has been involved in an accident or which is operated in violation of any of the provisions of this chapter shall, at the request of a law enforcement officer, submit to a breath test to be administered by such officer. If such test indicates that such operator has consumed alcohol, the law enforcement officer may require such operator to submit to a chemical test in the manner set forth in this chapter.

2.10.2 Case Law

No case law noted.

2.10.3 Problems with Statutory Interpretation

The statute is silent on the issue of whether the breath test may be given before arrest. The breath test discussed in the statute appears to be merely for the purpose of determining whether further testing is needed, and is not clearly for the purpose of establishing probable cause.

The statute is also silent on the issues of consequences for refusal of the test, admissibility of such refusal, admissibility of test results and testing methodology.

2.10.4 Problems with Statutory Application

This statute is not viewed by the state patrol as providing for a pre-arrest breath test. If the arrested driver "passes" the breath test, then he/she is charged with something other than driving with a 0.10% blood alcohol level.

2.11 VERMONT (Reported upon because it is described in other literature as having a PBT law)

2.11.1 Statutory Provisions

Sec. 1202. Consent to chemical test -- (a) Any person who operates, attempts to operate or is in actual physical control of any vehicle on a highway in this state is deemed to have given his consent to the taking of a sample of his breath for the purpose of determining the alcoholic content of his blood. If breath testing equipment is not reasonably available or if the person is unable to give a sufficient sample of his breath for testing or if a state police officer or law enforcement officer who has been certified by the Vermont criminal justice training council pursuant to Title 20, section 2358, has reasonable grounds to believe that the person is under the influence of a drug other than or in addition to alcohol, he is deemed to have given his consent to the taking of a sample of his blood for those purposes. If in the officer's opinion a person is incapable of decision or unconscious or dead, it is deemed that his consent is given and a sample of his blood shall be taken. A sample of breath shall be taken only by a law enforcement officer who has been certified by the department of public safety to operate a field sample gathering device for the gas chromatograph intoximeter whenever a state police officer or a law enforcement officer who has been certified by the Vermont criminal justice training council pursuant to Title 20, section 2358, had reasonable grounds to believe that the person was operating, attempting to operate or was in actual physical control of any vehicle while under the influence of intoxicating liquor.

(b) A person who is requested by a law enforcement officer to submit to a chemical test under this section shall have the right to consult an attorney prior to deciding whether or not to submit to the chemical test. The person must decide within a reasonable time, but no later than thirty minutes from the time of the initial attempt to contact the attorney, whether or not to submit to the chemical test. If a person submits to a breath test, he shall have also the right to have a blood test administered at his expense. Arrangements for the blood test shall be made by the person submitting to the breath test, or by his attorney or some other person acting on his behalf except where the person is detained in custody after administration of the breath test, in which case the law enforcement officers having custody of the person shall make arrangements for administration of the blood test upon demand.

Note: This statute is actually Vermont's implied consent law, and the state does not have a separate PBT law.

2.11.2 Case Law

Arrest is not a statutory prerequisite to the admissibility of a chemical breath test analysis under this statute if such a test is administered with the driver's consent. State v. Brown, 125 Vt. 58, 209A 2d 324 (1965).

2.11.3 Problems with Statutory Interpretation

The statute cited does not clearly provide for a preliminary breath test. It is not clear whether such a test is authorized prior to arrest. While the Brown case, supra, indicates that arrest is not necessary when the driver consents to the test, the statute indicates that a total of one test ("a test") may be administered. Therefore, if a test is given pre-arrest, another one may not be required later. This effectively rules out the use of any devices whose reliability is adequate only for screening purposes.

2.11.4 Problems with Statutory Applications

Because the statute does not allow for administration of more than one test, this statute is not used as authority for preliminary breath testing. PBTs, therefore, are generally not used in Vermont.

2.12 VIRGINIA

2.12.1 Statutory Provisions

Sec. 18.2-267. Analysis of breath to determine alcoholic content of blood. -- (a) Any person who is suspected of a violation of Sec. 18.2-266 shall be entitled, if such equipment be available, to have his breath analyzed to determine the probable alcoholic content of his blood. Such breath may be analyzed by any police officer of the State, or of any county, city or town, or by any member of the sheriff's department of any county, in the normal discharge of his duties.

(b) The State Board of Health shall determine the proper method and equipment to be used in analyzing breath samples taken pursuant to this section.

(c) Any person who has been stopped by a police officer of the State, or of any county, city or town, or by any member of the sheriff's department of any county and is suspected by such officer to be guilty of a violation of Sec. 18.2-266, shall have the right to refuse to permit his breath to be so analyzed, and his failure to permit such analysis shall not be evidence in any prosecution under Sec. 18.2-266, provided, however, that nothing in this section shall be construed as limiting in any manner the provisions of Sec. 18.2-268.

(d) Whenever the breath sample so taken and analyzed indicates that there is alcohol present in the blood of the person from whom the breath was taken, the officer may charge such person for the violation of Sec. 18.2-266, or a similar ordinance of a county, city or town wherein the arrest is made. Any person so charged shall then be subject to the provisions of Sec. 18.2-268, or of a similar ordinance of a county, city or town.

(e) The results of such breath analysis shall not be admitted into evidence in any prosecution under Sec. 18.2-266, the purpose of this section being to permit a preliminary analysis of the alcoholic content of the blood of a person suspected of having violated the provisions of Sec. 18.2-266.

(f) Police officers or members of any sheriff's department shall, upon stopping any person suspected of having violated the provisions of Sec. 18.2-266, advise such person of his rights under the provisions of this section.

2.12.2 Case Law

None noted. See Section 5.4 for in-depth study of this state's PBT law.

2.13 WISCONSIN

2.13.1 Statutory Provisions

Sec. 343.305. Revocation of license on refusal to submit to tests.

* * *

(2)(a) If a law enforcement officer has probable cause to believe that a person has violated Sec. 346.63(1) or a local ordinance in conformity therewith, the officer may request the person, prior to arrest and issuance of a citation, to take a preliminary breath test for the purpose specified under sub. (1), using a device approved by the department for the purpose. A person may refuse to take a preliminary breath test without being subject to revocation under sub. (9) if he or she consents, after arrest, to take a test under par. (b). Neither the results of the preliminary breath test nor the fact that it was administered shall be admissible in any action or proceeding in which it is material to prove that the person was under the influence of an intoxicant or a controlled substance.

2.13.2 Case Law

None noted.

2.13.3 Problems with Statutory Interpretation

No problems noted.

2.13.4 Problems with Statutory Application

Wisconsin's PBT statute clearly requires that the police officer have probable cause before administering a PBT to arrest; thus the PBT statute would not be useful in those situations where the officer has only reasonable suspicion that a person has violated the driving-under-the-influence statute. Since the PBT results are inadmissible, and since post-arrest testing does not require a prior PBT, the only purpose a PBT could serve is to determine whether additional testing for blood alcohol level should be pursued.

7.1 A PROPOSED STATUTE FOR ILLEGAL PER SE

Section 1000.00

Driving While Under Influence of Alcohol or Any Other Drugs

(a) A person shall not drive or be in actual physical control of any vehicle while:

1. The alcohol concentration in his blood or breath is 0.10 grams of alcohol per 100 milliliters of blood or 0.10 grams of alcohol per 210 liters of breath, as shown by chemical analysis;

2. Under the influence of alcohol;

3. Under the influence of any drug or combination of drugs to a degree which renders him incapable of safely driving; or

4. Under the combined influence of alcohol and any other drug or drugs to a degree which renders him incapable of safely driving;

(b) The fact that any person charged with violating this section is or has been legally entitled to use alcohol or any other drug shall not constitute a defense against any charge of violating this section.

5. Driving while under the influence of alcohol or any other drugs is a classification of the offense.

Commentary on IPS Statute

The chemical analysis includes wet and physical chemistry.

The rationale for charging under a statute combining IPS with traditional DUI: A majority of prosecutors surveyed by this project preferred to charge both IPS and traditional DUI offenses in order to give the jury the maximum proof of intoxication. Some were reluctant to try a violation of IPS if no other indicia of impairment were present. This was due to previous experience with some juries that will not convict without broader evidence of impairment.

Even in states with IPS statutes, defenses to the illegal BAC, as though it were a presumption, have remained. Despite language in some statutes establishing a strict liability, some courts have held the non-expert testimony can be used in defense of an IPS charge. This judicial gloss obviously acts as a partial bar to the effectiveness of IPS statutes.

IPS is uniformly complimented by prosecutors as an improvement in effective prosecution. It was felt that in time all the courts will accept the concept of IPS without the judicial gloss that gives defendants the opportunity to rebut the statutory prohibition, as though it were a mere presumption.

Therefore, based on the experience of prosecutors and other law enforcement officers, the project has chosen a model law which combines IPS with the standard features of a DUI statute. Our conclusion is that the combination model is the best approach. It gives the prosecutor multiple ways to convict a defendant while charging only one (basic) offense. The jury does not have to be unanimous in finding that a defendant has violated any one of the subdivisions of the statute; they only have to be unanimous that the defendant violated the statute in one of the several ways possible. The jury can actually be split on the individual bases for finding a violation of the statute. In effect, this statute gives the prosecutor multiple opportunities in one charging instrument to convict, and effectively deprives the defendant of the opportunity to focus his defenses on the one issue that might appeal to the sympathy of one or more jurors. Under this type of statute, those jurors who have unarticulated reservations concerning the reliability of evidentiary test results are given ample opportunity to base their conviction upon traditional DUI indicia, while those who favor the use of a per se regulatory format and are impressed by the scientific accuracy and reliability of the testing technology are likewise satisfied with application of the statute. This type of statute spreads the largest net permissible.

7.2 A PROPOSED STATUTE AUTHORIZING PRELIMINARY OR PRE-ARREST BREATH TEST

Section 1001.00

Refusal to Take a Preliminary or Pre-Arrest Breath Test: Authorization and Procedure

Any law enforcement officer who has been duly authorized to make arrests for violation of traffic laws of this state or ordinances of any city, town, or village may require any person who drives or has in his actual physical control a vehicle within this state to submit to a preliminary test of his breath for alcohol content if the officer has an articulable and reasonable suspicion that such person has committed the offense of driving while under the influence of alcohol or any other drugs pursuant to Section 1000.00. Refusal to take the preliminary test of breath shall constitute an infraction punishable by a fine of not more than $50. Such breath analysis must be administered at the scene of the stop. Any breath analysis required under this section must be administered with an instrument and in such a manner approved by the Commissioner of Toxicology or Public Health for that purpose. The results of a preliminary breath analysis may be used for determining whether an arrest should be made. When a driver is actually arrested, provisions of the state's Implied Consent Statute will apply. The preliminary breath test authorized here is in addition to any tests authorized in the Implied Consent Statute.

Commentary on PBT Statute

An articulable and reasonable suspicion may be based upon erratic driving behavior or, upon a stop for any violation, it may be based upon a number of behavioral patterns or other factors, which based upon the officer's experience may indicate impairment, such as the detection of slurred speech or alcoholic breath of the driver.

Because of the high incidence of alcohol involvement in injury and property damage type automobile accidents, it is also reasonable to believe that one or more of the drivers in such accidents are so impaired. The occurrence of an accident may provide sufficient basis for the officer to request a PBT of each involved driver, if only to rule out alcohol as a contributing factor.

The legislature has taken note of the fact that approximately 50 percent of all fatal highway accidents involve drinking drivers, and has resolved that this threat to public safety warrants closer scrutiny of potentially hazardous drivers where there is evidence of drinking sufficient to create an articulable and reasonable suspicion that one or more of the drivers is impaired by alcohol or other drugs.

5

An interim Report to the Nation From the Presidential Commission on Drunk Driving

5.0 LICENSING ADMINISTRATION

Suspension or revocation of driver licenses can be an effective deterrent to driving while under the influence. Studies in California and Washington show that license suspension was more effective than assignment of violators to alcohol education and/or treatment programs. If suspensions are imposed consistently and are highly publicized, this sanction can play an important role in reducing driving under the influence.

Cooperation between the States in sharing information on driver licensing and violations in order to stop those with revoked or suspended licenses from becoming licensed in another State is a necessity. The following recommendations are intended to improve the administration of the licensing process:

RECOMMENDATION

5.1 Administrative Per Se License Suspension

States should enact legislation to require prompt suspension of the license of drivers charged with driving under the influence, upon a finding that the driver had a BAC of 0.10 in a legally requested and properly administered test. The prompt suspension should also extend to those who refuse the test, as well as those who are driving on a restricted license. Such suspension may be carried out by the court upon arraignment, or by the administrative agency charged with license administration. There should be reciprocity among States to assure a driver's license suspension by the home State if the driver meets these conditions in another State.

COMMISSION NOTE

Some States have begun to use innovative methods to establish swift and certain penalties for drunk driving. In Minnesota, West Virginia, Iowa, and Delaware, any driver registering above 0.10 AC has his or her license automatically suspended for 90 days (or more) regardless of the subsequent disposition of his case. If he or she refuses the test, his or her license is suspended for 180 days. This is a swift and certain sanction which significantly adds to the general deterrent effect of the control system. The individual is afforded the opportunity of a hearing within a specified period of time; the facts to be pursued at this hearing relate to whether the individual tested over the legal limit or whether the individual refused the test.

A different approach, used in New York for repeat offenders, provides for an immediate temporary suspension pending disposition of the charges. This system is carried out by the court where there is a finding of probable cause for the arrest and where there is a drunk driving conviction within the past five years. These two approaches also differ in their administration; the New York system is administered by the local criminal courts for the Motor Vehicle Department, while the other States' systems are administered by the State driver licensing agency.

Drunk Driving Penalties In Other Countries

For those who think that the new DUI laws recently passed in many states are far too harsh, we advise those people to take a look at how other nations around the world are dealing with the problem of the drinking driver. In some of the following cases you'll find that a few of these countries don't have near the drunk driving problem that now exists here in the United States. The apparent reason for this lack of a high number of DUI cases in these other countries would seem to be directly attributable to the no nonsense, rountinely dealt, strict punishments handed out by the courts in these foreign countries. This information has been drawn from newspaper accounts and statistics supplied to MADD by members. Any incorrect statements are attributable to the sources, not the writers.

West Germany • If a suspected drunk driver tests out at 0.8 mills of alcohol in the bloodstream, his license is automatically suspended for a minimum of three months, with a maximum of one year in prison or a fine. The police also use roadblock checkpoints to randomly test drivers for alcohol consumption.

Norway • In Norway, it's a mandatory, minimum sentence of three weeks in jail for any driver caught with a blood-alcohol level of .5 per mil or more. That means that five drops of alcohol per 1000 drops of blood. A fine may be added scaled to income. Suspended sentences are extraordinary. On the first offense you lose your license for at least one year. On the second offense within five years, you lose your license for life.

Israel • The problem of the drinking driver on the roadways in Israel is virtually non-existant, due largely to the two-year prison term that awaits convicted drunken drivers. In 1980, an Israeli Embassy spokesman was quoted as saying that there is about one drunk driving case in Israel a year.

Soviet Union • First offenders are banned from the roadways for six months. In one instance, the drunk driver who killed six and injured five more during a drive through northern Moscow was sentenced to death.

Great Britain • Those convicted face automatic license suspension for one year. In addition, if the case is aggravated, lifetime banishment from the roadways is possible. Other sentencing possibilities include six months in jail, up to an $1800 fine, and assignment to gardening, garbage collection, and other community service.

Egypt • Like most Moslem countries, alcohol usage is prohibited, drunken driving cases are rare.

India • Arrests are rare, but penalties are severe. Those convicted face six months in prison, $112 fine, or both.

South Korea • Just an arrest results in an automatic two month license suspension, with a conviciton meaning a jail sentence of up to one year and a fine of $700.

Japan • First offenders can face up to four months in jail and a $200 fine. Licenses are also revoked and can be returned only upon successful completion of a driving test one year later.

Chile • Those convicted face from 61 to 541 days in jail. If someone has been injured the minimum prison sentence is 18 months.

Federal Legislative Victory

The U.S. Congress has joined the fight to rid our roadways of the drunken driving menace. On September 29, the House of Representatives unanimously passed the legislation which contained the provisions of H.R. 6170, also known as the Howard-Barnes bill. On October 21, the Senate also unanimously passed the legislation. On October 25, President Reagan signed this welcome provision into law.

Essentially, this new law will provide important federal aid in the form of incentive grants to those states setting up comprehensive, community-based drunk driver control programs. Another attractive feature of the Howard-Barnes legislation is that it will provide the incentive grants out of funds which are already budgeted, thus the federal debt will not be increased because of this program.

A special thanks is in order to the President, Congressmen Howard and Barnes, and the individuals and groups responsible for the passage of this essential new measure.

MONDAY MORNING REPORT

Volume 6 No. 16 August 30, 1982

DRUNK DRIVING...legislation has been approved by lawmakers in 32 states and Washington, D.C. during 1982, according to a national survey by the Christian Science Monitor.

Although the new laws aimed at reducing the incidence of drunk driving differ from state to state, most of the current legislation has incorporated one or more of the following provisions:

1) Minimum mandatory jail sentences
2) Referral of drunk drivers to education or alcoholism treatment programs
3) Criminal penalties for drunk drivers whose auto crash has resulted in death of another person
4) Suspension or revocation of driving privileges
5) Raising the minimum legal drinking age for all alcoholic beverages (including beer) to 21
6) Making it illegal to operate a motor vehicle with a blood alcohol level of 0.10 percent

The current wave of concern about drunk driving has taken place over the past two years, spurred on by several groups representing the victims of drunk drivers.

MADD (Mothers Against Drunk Drivers) has received national attention and has been particularly effective in California, where a tough new drunk driving law went into effect in January, 1982.

Organization of the new groups and their activist pressure in state legislatures across the U.S. has helped to focus attention on the victims of drunk drivers. In the past, lawmakers, judges, juries and even many law enforcement officials often sympathized with the drunk driver rather than the victims.

Part of the problem was the common belief that people had about drunk drivers..."But for the grace of God, there go I."

The mistaken notion is that most drunk drivers were common, ordinary citizens who perhaps for the first time in their lives had "one drink too many" at a party and then became involved in an auto crash while trying to make it home.

The realization that most drunk drivers are not "first-timers" as far as driving while under the influence of alcohol and most have had far more than "a couple of beers" has helped the general public to realize that tough drunk driving laws pose no threat to most of the driving population.

In a study of 839 drivers involved in fatal auto crashes in Michigan during 1981, the Michigan State Police reported that 289 drivers had not been drinking prior to the crash.

Of the 553 drivers who had been drinking prior to the fatal crash, only 19 percent registered a blood alcohol level of under 0.10 percent.

81 percent of the drunk drivers registered 0.10

ALCOHOL ABUSE AND VIOLENCE IN ALASKA

The mental health of a community or state is measured by many indicators. Some of these are: violent crimes, family violence, child abuse/neglect, and alcohol-related mortality.

violent crimes

- 64% of criminal homicides in 1980 were alcohol-related
- 41% of aggravated assaults were alcohol-related
- 48% of all violent offenders were using alcohol at the time of arrest
- 56% of all violent offenses were alcohol-related
- 72% of rapes - alcohol was used by either offender or victim

family violence

- 45% of all spouse abusers are heavy drinkers
- 90% of women seeking help at AWAIC, a battered women's shelter, were effected by alcohol
- 90% of the clients in Anchorage's Domestic Violence Program for Men report some level of substance abuse
- 90% of abusive parents have been abused or neglected by an alcoholic or drug dependent parent

child abuse/neglect

- estimates suggest that alcohol is a primary factor in as many as one-third of all reported cases of child abuse
- Alaska experiences 4 times as many cases of child abuse/neglect as the national average
- in an informal survey of youth outpatient units of the Behavioral Health Treatment system in Anchorage it was found:
  - -77.8% of the youth had one or more parents with substance abuse problems
  - -40% of the clients had been abused or neglected

Washington Area's War on Drunk Driving Pays Off in a Big Way

Area Traffic Deaths Drop; Arrests Are on Increase

By Blaine Harden
Washington Post Staff Writer

The highly publicized war against drunk driving—waged this past year by mothers, lawmakers, judges, juries and the police—has racked up impressive victories in the Washington area.

Highway deaths in 1982 declined in Virginia, Maryland and the District of Columbia, where laws against driving under the influence of alcohol were toughened. At the same time, arrests of drunk drivers have increased sharply.

In the District this year, 36 people—the lowest figure in at least a decade—had died in traffic accidents as of Tuesday. Alcohol-related deaths in Maryland fell 30 percent while arrests of drunk drivers were up 50 percent. Highway deaths in Virginia declined 14 percent.

During Christmas weekend, as police in all three jurisdictions beefed up patrols, there was one alcohol-related death in the Washington area, compared to seven over the 1981 Christmas weekend.

"The word is out. We are out there to get people and as a result we have reduced fatalities," says Robert M. Goldstein, director of the D.C. police alcohol countermeasures and traffic services.

See ALCOHOL, A7, Col. 1

ALCOHOL, From A1

Throughout the Washington area, there may never have been such a bad year to be drunk at the wheel.

In Northern Virginia, a drunk driver involved in a head-on collision that killed three persons was convicted in September of second-degree murder. The conviction was the first in the state on that serious charge in an alcohol-related traffic case.

In Maryland, a drunk driver involved in a crash that killed five members of a Montgomery County family was sentenced to 15 years in prison.

In the District, police began a first-in-the-nation mandatory breath test for all drivers stopped for moving violations. Any driver who refuses the test can be arrested.

Despite tough new laws and aggressive enforcement, some drivers continue to drink and drive. John T. Hanna, director of the Virginia Department of Transportation Safety, says only one in 2,000 drunk drivers is ever caught. One such driver slipped through the enforcement net last weekend in the Washington area.

Donald W. Jewell, 33, who ran an insect exterminating business, threw a party at his Manassas house on the night before Christmas Eve. Friends who saw him at the party described him as drunk and "having a hard time talking."

In the middle of the party, Jewell stormed outside and drove off in his black 1979 Chevrolet pickup truck. He headed south at 70 miles an hour on a 55-mile-an-hour, two-lane road, police said.

Jewell had a record of drinking and bad driving. In California in 1969 he was convicted of driving under the influence of alcohol. Near Hodges, S.C., in 1975 he ran a stop light and crashed into a car, killing three persons. A blood-alcohol test showed that Jewell was under the influence of alcohol at the time. He was convicted of involuntary manslaughter and sentenced to six years in prison.

Four years later, after he'd moved north to Mathews, Va., Jewell was convicted of breaking and entering and sentenced to five years in prison. From prison, Jewell wrote Circuit Court Judge John DeHardit: "I am an alcoholic and I need and want help with this so I can be a man. I also know that if I don't get help with my drinking I will be back in prison."

About 10:30 p.m. a week ago today, Jewell lost control of his pickup rounding a curve. Police said Jewell tried to pull his truck back on the road but it went into a roll, taking up both lanes of Rte. 234 near Manassas. It stopped rolling when it smashed into a pickup coming from the opposite direction.

"He had the whole highway covered. It looked like a wall coming at me. It scared the daylights out of me. I'm still scared," William E. Parker Jr., 39, the driver of the other pickup, said yesterday.

Parker, who escaped with a strained back from the crash that totaled his pickup said he was lucky.

"When I knew anything, he was rolling at me. If I hadn't got in the ditch, he'd a killed me too," Parker said.

ALASKA COUNCIL ON PREVENTION
OF ALCOHOL AND DRUGS ABUSE, INC.

7521 OLD SEWARD HWY., SUITE A • ANCHORAGE, ALASKA 99502 (907)349-6602

FACTS ABOUT ALCOHOL CONSUMPTION IN ALASKA

--FOR ALL AGE GROUPS

The average yearly intake of alcoholic beverages for all Alaskans (every man, woman, and child) is 33⅓ gallons, a combination of distilled liquor, wine, and beer. This is the equivalent of 4.6 gallons of absolute ethyl alcohol.

In order to consume 4.6 gallons of absolute ethyl alcohol per year, you would have to drink...

53.5 fifths of 86 proof liquor

OR...

153.2 quarts of 12%wine*

OR...

40.9 cases of 5% beer

*Most naturally fermented wines contain 12 to 14% ethyl alcohol. So called "fortified" wines have alcohol added to increase the percentage.

This report was reviewed and critiqued by Mr. Joel A. Watne, Special Assistant Attorney General, State of Minnesota; Mr. Forst Lowery, Alcohol Program Coordinator, Department of Public Safety, State of Minnesota

16. Abstract

This report provides information for use by state legislatures, state governmental agencies, traffic safety organizations and other persons in enacting laws to control driving and drinking on the highways and specifically the type of "administrative per se" law in the State of Minnesota.

The report outlines the legal framework of the "administrative per se" law in the State of Minnesota. It explores the possible legal challenges which defendants might raise against the law. It studies the operational impact the "administrative per se" law has had in Minnesota on other alcohol countermeasures to control the drinking driver. The report concludes the Minnesota "administrative per se" law would withstand the possible legal challenges. It concludes that the enactment of this law has had a positive effect on the attitudes of law enforcement officers and has increased the effort of controlling DWI offenses. The report recommends that other states enact such a law.

PART I

STATEMENT OF PROBLEM

The State of Minnesota has a rather unique law.[1] It has been described as an "administrative per se" drinking-driving statute. In essense it provides as a part of the implied consent law that when a law enforcement officer obtains a chemical test for intoxication from a driver, and the result is 0.10 BAC or more,[2] the officer serves notice to the driver on behalf of the motor vehicle department (Department of Public Safety) of intention to revoke his driver's license for having a BAC of 0.10 or more. The driver is given 30 days in which to request a hearing and if none is requested, then the department revokes for 90 days. If a hearing is held, and the issues are determined against the driver, then his license is revoked for 90 days.[3]

This procedure is <u>additional</u> to the criminal drinking-driving charges of "driving under the influence of alcohol" and "driving with 0.10 BAC or more" which are tried in the court system.[4] Also, Minnesota has an implied consent law similar to other states which provides that upon <u>refusal</u> of a chemical test for intoxication action is taken against the license.[5]

The task of this study was to report on the legal and operational aspects of the "administrative per se" law. They are:

"1. Ascertain to what extent offenders charged with DUI are cited under Minnesota Section 169.123, as opposed to Minnesota Section 169.121, wherein an implied consent BAC test has been administered.

"2. Analyze the constitutional, legal and operational ramifications and potential impediments relative to the application of Minnesota Section 169.123 (special emphasis to be given to Subd. 4, 5 and 6).

"3. Determine, if possible, to what extent law enforcement officers

are using the Subd. 4 provision by submitting to the Commissioner of Public Safety BAC test results of 0.10 percent or more.

"4. Determine what use is being made by the Motor Vehicle Department (Department of Public Safety) of the BAC test results as authorized under Subd. 4. What, if any, are the constitutional, legal and practical problems—how well is it working.

"5. Determine to what extent driver license revocation actions are taken pursuant to Subd. 4 (BAC test results of 0.10 percent or higher) under the following situations:

1) The DUI charge is nolle prossed
2) The DUI case is continued
3) The DUI charge is plea bargained down to a lesser offense
4) The DUI case results in an acquittal.

"6. Based on available data, determine the impact the enactment of Minnesota Section 169.123 (Subd. 4) has had on the number of implied consent refusals.

"7. Determine the extent to which the Commissioner of Public Safety appears through prosecuting attorneys at driver license revocation hearings as provided for in Minnesota Section 169.123 (Subd. 6).

"8. Determine, to the extent practical, the impact of the administrative licensing action on the adjudication process (e.g., conviction rates, sanction involved).

"9. Determine, to the extent practical, the impact of the administrative licensing process on the rate of enforcement and support of police officers."

FOOTNOTES - Part I.

1. Minnesota Statutes Annotated, Sec. 169.123. It is interesting to note that West Virginia enacted a similar provision in 1981. See West Virginia Regular Session 1981, New Laws page 849. It is Sec. 17C-5A-1, effective September 1, 1981.

2. "BAC" is a commonly used term which is defined in Minnesota as "Alcohol Concentration" in Sec. 169.01 as follows:

> "Subd. 61. Alcohol concentration. "Alcohol Concentration" means (a) the number of grams of alcohol per 100 milliliters of blood, or (b) the number of grams of alcohol per 210 liters of breath, or (c) the number of grams of alcohol per 67 milliliters of urine."

3. The term "revocation" is not defined in the Minnesota statutes. However, the Department of Public Safety interprets the action required in the commonly accepted meaning of the term. A revocation means that the driver's license is terminated by formal action of the department and the driver can make application for a new license after the expiration of the time period.

4. The criminal charges are contained in Minnesota Statutes Annotated, Sec. 169.121.

5. The implied consent procedures are contained in Minnesota Statutes Annotated, Sec. 169.123.

PART II

LEGAL ASPECTS

One of the tasks of this study was to: "Analyze the constitutional, legal and operational ramifications and potential impediments relative to the application of Minnesota Section 169.123 (special emphasis to be given to Subd. 4, 5 and 6)."

Consequently, the first step will be to outline the legal framework.

LEGAL FRAMEWORK

The Minnesota "administrative per se" drinking-driving law became effective on July 1, 1976.[1] It is a parallel track to the traditional criminal charges normally placed against a drinking driver, and in many respects the two tracks are independent.

The legal steps in this system are summarized as follows:

1. Contact with Driver: A law enforcement officer comes into contact with a drinking driver in various ways. He may observe the conduct; he may respond to a motor vehicle collision; he may stop a driver for another violation; he may receive information from other citizens who have observed the drinking driver. Whatever the means, the information the officer has must meet the requirements of the U.S. Supreme Court decision in Delaware v. Prouse[2] in which the Court held that the officer must have at least "articulable suspicion" as a basis for the stop, or that a non-discretionary systematic roadblock is being operated.

2. After Stopping the Driver: The officer has several options after stopping the driver. He can:

a. Issue a citation and release the driver if the circumstances warrant.

b. Request a preliminary breath screening test for alcoholic influence provided the officer has "reason to believe" from the manner in which a person is driving, operating, or controlling a motor vehicle, or has driven, operated, or controlled a motor vehicle, that the driver may be violating or has violated the "under the influence" of alcohol or controlled substance or combination thereof, or the "illegal per se" law. (Sec. 169.121(6).)

c. Request a chemical test of blood, breath, or urine to determine the presence of alcohol or a controlled substance provided the officer has "reasonable and probable grounds to believe" the person was driving, operating, or in physical control of a motor vehicle in violation of Sec. 169.121 (criminal charges - see App. I) and one of the following conditions exist:

   1) the person has been lawfully placed under arrest for a violation of Sec. 169.121, or similar municipal ordinance, or
   2) the person has been involved in a motor vehicle accident or collision resulting in property damage, personal injury, or death, or
   3) the person has refused to take the preliminary breath screening test, or
   4) the person took the preliminary breath screening test and the results recorded an alcohol concentration of 0.10 or more. (Sec. 169.123(2).)

d. Release the driver when the preliminary breath screening test indicates the driver is not under the influence and when circumstances

do not warrant other action.

e. Make an arrest for driving under the influence of alcohol or controlled substance. (Sec. 169.121.)

f. Release the driver without arresting or without issuing citation if circumstances warrant.

3. Implied Consent Law - Warning: As noted above in "2.c." the officer may request a chemical test of blood, breath, or urine to determine alcohol concentration or a controlled substance provided the officer has "reasonable and probable cause" and one of four conditions is present. The next step for the officer is to request a chemical test and warn the driver:

a. That if testing is refused, the person's right to drive will be revoked for a period of six months; and

b. That if a test is taken and the results indicate that the person is under the influence of alcohol or a controlled substance, the person will be subject to criminal penalties and the person's right to drive may be revoked for a period of 90 days; and

c. That the person has a right to consult with an attorney but that this right is limited to the extent that it cannot unreasonably delay administration of the test or the person will be deemed to have refused the test; and

d. That after submitting to testing, the person has the right to have additional tests made by a person of his own choosing.[3] (Sec. 169.123(2).)

4. Implied Consent Law - Driver's Choice: After the officer has requested the test and has given the driver the warning, the next step is with the

driver. He can:

a. Refuse to permit chemical testing, and if so, then none shall be given.

b. Submit to a chemical test.

5. Implied Consent Law - Notice of Revocation: If the driver refuses the chemical test or if he submits and the test results are 0.10 or more alcohol concentration—in either event—the officer may serve immediate notice of intention to revoke on behalf of the Commissioner of Public Safety. When he does so, the officer shall take the license or permit of the driver, if any, and issue a temporary license effective for 30 days. If the license or permit is picked up by the officer, it is sent to the Commissioner of Public Safety along with the certification. (Sec. 169.123(5a).) See the form used for this step under Appendix III entitled "Notice of Revocation."

In the event a blood or urine test is given and the results are not immediately available, or for some reason the officer does not serve immediate notice, then the department serves the notice by certified mail.

6. Implied Consent Law - Certification: If the driver refuses the test or if he submits and the results are 0.10 or more alcohol concentration, the officer shall certify to the Commissioner of Public Safety that:

a. The officer had reasonable and probable grounds to believe that the person had been driving, operating, or in physical control of a motor vehicle while under the influence of alcohol or a controlled substance; and that:

b. The driver refused the test; or

c. That the driver submitted to the test and the results were 0.10 or more alcohol concentration.

7. Implied Consent Law - Action by Commissioner of Public Safety: Under the notice of revocation the driver has 30 days within which to request a hearing. If he does not, the order of revocation becomes effective. If the driver requests a hearing it is conducted as follows. (Sec. 169.123(5) and (6).)

8. Implied Consent Law - Hearing: If the driver requests a hearing within 30 days:

a. The hearing shall be before a municipal or county judge in the county where the alleged offense occurred unless there is an agreement that the hearing be in some other county.

b. The hearing shall be to the court and may be conducted at the same time and in the same manner as hearings on pre-trial motions for criminal prosecution under Sec. 169.121 (criminal charges see Appendix I).

c. The hearing shall be recorded.

d. The Commissioner of Public Safety may appear through his own attorney or by agreement with the jurisdiction involved, through the prosecuting authority for that jurisdiction. (Note: Current practice is for an Assistant Attorney General to represent the Commissioner in all such hearings.)

e. The request for the hearing delays the effective date of the revocation until a final judicial determination which results in a decision adverse to the person.

f. If a hearing is requested within the 30 days, the Commissioner shall issue additional temporary licenses until the final determination of whether or not there shall be a revocation. The

additional temporary license is good for 180 days and may be renewed by the Commissioner as necessary.

g. The scope of the hearing shall cover the issues of:

1) whether the officer had reasonable and probable grounds to believe the person was . . . (see 2.c. above for the grounds under which the test can be requested—or Sec. 169.123 (Subd. 2) in Appendix I).

2) whether at the time of the request for a test, the officer warned the person of his rights and consequences of taking or refusing the test (see Sec. 169.123 (Subd. 2) for text of warning in Appendix I).

3) whether the person refused the test or whether the test was taken and the results indicated an alcohol concentration of 0.10 or more and whether the testing method used was valid and reliable, and whether the test results were accurately evaluated.

h. The burden of proof at the hearing is on the state and it must prove the issues by a "fair preponderance of the evidence." (See State v. Halvorson, 181 N.W.2d 473, 477 (Minn.-1970).)

i. The court shall order either that the revocation be rescinded or sustained and forward the order to the Commissioner of Public Safety.

j. If the order of revocation is sustained the court shall also forward the driver's license to the Commissioner if it is not already in the Commissioner's possession. (Sec. 169.123(6).)

k. The driver has the right to be represented by counsel at the hearing.

9. Implied Consent Law - Appeal: If the hearing under the implied consent law goes adversely to the driver, he has the right to appeal to the District Court in the county where the hearing was held. The hearing is on the record and is governed by the same procedure as appeals from misdemeanor convictions. (Sec. 169.123(7).) If the hearing goes adversely to the Commissioner he may also appeal. (See State v. Normandin, 169 N.W.2d 222 (Minn.-1969), holding state can appeal an implied consent hearing decision; and State v. Ogg, 246 N.W.2d 560 (Minn.-1976), outlining procedure for appeal of implied consent hearing by the state.)

10. Implied Consent Law - Other Provisions: In addition to the aspects outlined above, the Minnesota implied consent law also provides that:

a. Police officers who can implement the implied consent provisions are limited to state highway patrol officers, University of Minnesota peace officers, a constable defined in Sec. 367.40, and a police officer of any municipality, including towns defined in Sec. 368.01, or a county law enforcement officer. (Sec. 169.123(1).)

b. A person may decline a blood test and elect to take either a breath or urine test, whichever is available and offered. However, no action can be taken for refusing a blood test unless either a breath or urine test was available and offered. (Sec. 169.123(2).)

c. Notwithstanding the requirement in "b" if there is reasonable and probable grounds to believe there is impairment by a controlled substance which is not subject to testing by blood or breath, a urine test may be required even after the blood or breath test has been administered. (Sec. 169.123(2a).)

d. Only a physician, medical technician, physician's trained mobile

intensive care paramedic, registered nurse, medical technologist, or laboratory assistant acting at the request of a peace officer may withdraw blood. This requirement does not apply to breath or urine. (Sec. 169.123(3).)

e. The person tested has a right to have a person of his own choosing administer a chemical test or tests in addition to any administered at the direction of the officer, provided that the additional test specimen is obtained at the place where the person is in custody, that it is after the test administered by the officer, and that it is at no expense to the state. The failure or inability to obtain the additional test shall not preclude the admissibility of the test by the officer unless the additional test was prevented or denied by the officer. (Sec. 169.123(3).)

f. Upon the request of the person tested, full information concerning the test or tests shall be made available to him. (Sec. 169.123(3).)

g. The physician or other qualified persons named in Sec. 169.123(3) who are authorized to withdraw blood at the request of the officer shall in no manner be liable in any civil or criminal action except for negligence in withdrawing the blood. (Sec. 169.123(3).)

11. Probable Cause and Exigent Circumstances for the Test. While not a part of the implied consent statute in Minnesota, it should be noted that the Minnesota Supreme Court has approved another method of obtaining a chemical test for intoxication. This method is based on constitutional law and since the court found there was no conflict with the statues, officers can obtain a chemical test for intoxication where there is (1) an exigent circumstance that the evidence will be lost (now or never), (2) that the officer had

probable cause to support a formal arrest, (3) and it is a highly unobtrusive search. Further, that a formal arrest should be made whenever the suspect appears capable of understanding and communicating with the arresting officer. If not, then the arrest is not necessary.[4]

This method has been approved by the court where the driver is in the hospital and unable to understand and communicate with the officer and there was probable cause to believe that the driver had killed another person while driving under the influence.

LEGAL CHALLENGES

At least 20 states, including Minnesota have enacted criminal "illegal per se" drinking-driving laws.[5] Since these laws are parallel to the "administrative per se" statute in Minnesota, an examination of appellate court decisions may shed light on possible legal challenges which might be raised against the administrative per se law. Also, other possible legal challenges will be discussed.

Arbitrary and Capricious. In North Carolina and Delaware appellate court decisions have ruled on the question of whether or not the 0.10 BAC was an arbitrary and capricious number. In rejecting this argument the North Carolina Court of Appeals held:

> "First, defendant argues that the new offense of driving when the alcohol in one's blood is 0.10 percent or more by weight is an arbitrary and unconstitutional exercise of the police power of the State because there is no evidence that a driver with 0.10 percent or more of alcohol in his blood is a threat to the health, safety, or welfare of the citizens. We will not discuss the numerous scientific studies which have shown the state of intoxication of persons with various degrees of alcohol in their blood. See, for example, Little, Control of the Drinking Driver: Science Challenges Legal Creativity, 54 A.B.A.J. 555 (June 1968). Suffice to say, from 1963 to 1975 there was a statutory presumption in this State that a person with 0.10 percent or more by weight of alcohol in his blood was under the influence of intoxicating liquor. G.S. 20-138.1(a)

(repealed by the 1973 amendment effective 1 January 1975). Our Supreme Court has held that the results of a breathalyzer test are admissible in evidence, and a test showing 0.10 percent or more by weight of alcohol in a defendant's blood is sufficient to carry the State's case to the jury on the question of whether defendant was under the influence of intoxicating liquor. State v. Cooke, 270 N.C. 644, 155 S.E.2d 165 (1967). We hold that the prohibition against driving upon the public highways when the amount of alcohol in one's blood is 0.10 percent or more by weight contributes in a real and substantial way to the safety of other travelers. The challenged statute is a constitutional exercise of police power by the General Assembly."[6]

Similarily the Supreme Court of Delaware said:

"We are unable to agree with appellant's contention that the new statute is unconstitutional. Its effect is to forbid any person to operate a motor vehicle if his blood contains .1 of one per cent alcohol. It represents a legislative determination that such quantity of alcohol has sufficient adverse effect upon any person to make his driving a definite hazard to himself and others. We cannot say that this determination is unfounded or contrary to the facts; a number of studies and many statistics have recently been published by experts in this field which support that conclusion."[7]

In summary, based on these two decisions, it is not likely the courts would strike down a "per se" provision since the 0.10 BAC is based on a number of scientific studies and is not, consequently, arbitrary or capricious.

Vague and Indefinite. This argument was made in decisions in Utah and Florida. It was contended that because the driver had no way to determine when he was approaching 0.10 BAC without a chemical test the statute violated due process of law. In rejecting this argument the Supreme Court of Florida held:

"Appellant alleges that the statute is vague and indefinite and so violative of due process in two ways. First, Appellant claims that consumers of alcoholic beverages are unable to determine how much alcohol they may consume before their alcohol blood level will make it unlawful for them to drive. An identical argument was made against a Utah statute, substantially similar to the challenged statute, in Greaves v. State, 528 P.2d 805 (Utah 1974). The Utah Supreme Court stated: 'We can see no reason why a person of ordinary intelligence would have any difficulty in understanding that if he has drunk anything containing alcohol, and particularly any substantial amount thereof, he should not attempt to drive or take control of a motor vehicle.' (Id. at 808.)

The above language is the view of this Court and accordingly we reject Appellant's first argument of 'vagueness.'

"Appellant's second 'vagueness' argument is meritorious but the statute's defect is easily cured. Appellant correctly points out that the statute fails to state whether the prohibited percentage of alcohol in the driver's bloodstream is by weight or by volume. We recognize the scientific difference. To determine the legislative intent we turn our attention to Section 322.262(2)(c), Florida Statutes Annotated, which provides as follows:

> 'If there was at that time 0.10 percent or more by weight of alcohol in the person's blood, it shall be prima facie evidence that the person was under the influence of alcoholic beverages to the extent that his normal faculties were impaired. Moreover, such person who has a blood alcohol level of 0.10 percent or above shall be guilty of driving, or being in actual physical control of, a motor vehicle, with an unlawful blood alcohol level.' (Emphasis supplied.)

"Because the above statute and the challenged statute are in pari materia we construe them together and hold that the legislative intent is that the standard of weight be applied in the enforcement of the challenged statute.

"Section 316.028(3), Florida Statutes Annotated, withstands each of Appellant's constitutional attacks." [8]

In summary, based on these two decisions, "per se" provisions are not vague and indefinite.

Equal Protection. In the Watts[9] case the defendant contended that the substantial disparity in punishment between the offense of "under the influence" and the offense of "per se" drinking-driving laws was arbitrary and unreasonable and thus it violated equal protection. The Supreme Court of Missouri concluded:

"Although appellant states his point in constitutional terms, he offers no authority based upon constitutional principles and his ultimate conclusion, not stated in his point, is that the enactment of Section 564.439 repealed, by implication, Section 564.440. He contends that both sections prohibit the same conduct and that the punishment and consequences of conviction under Section 564.440 are so unreasonably different from those under Section 564.439 that the sections are 'irreconcilably repugnant,' and that the later enactment (Sec. 564.439) had the effect of repealing the earlier (Sec. 564.440).

"As appellant acknowledges, a conviction under Sec. 564.440 could occur although a blood alcohol test showed the defendant to have had between 0.05% and 0.09% blood alcohol (Sec. 564.442, subd. 1 (2)) or even in the absence of a blood alcohol test result. Thus,

> the basic premise of appellant's argument on this score fails because Section 564.439 and Section 564.440 do not necessarily deal with the same conduct."[10]

Based on the Watts case the later enactment of a "per se" provision does not repeal the "under the influence" provision since they have different elements. No other decisions on equal protection were found but that constitutional clause has been interpreted to prohibit unequal treatment of persons within the same group or class. However, the legislature has the power to group or classify drivers as long as the classification is based on reasonable grounds. It is not likely that the administrative per se law could be successfully challenged on equal protection grounds.

Procedural Due Process. In Bell v. Burson[11] the U.S. Supreme Court held that deprivation of the continued possession of a driver's license was subject to the due process clause of the 14th Amendment of the U.S. Constitution. The Court said:

> "While '(m)any controversies have raged about . . . the Due Process Clause,' . . . it is fundamental that except in emergency situations (and this is not one) (financial responsibility law) due process requires that when a State seeks to terminate an interest such as that here involved (driver's license) it must afford 'notice and opportunity for hearing appropriate to the nature of the case' before the termination becomes effective." (Italics by the Court.)

Thus it is clear that due process requires notice and opportunity for a hearing appropriate to the nature of the case before the termination of the driver's license becomes effective. It appears there are instances in which the hearing may come after the action against the license, but that issue is not present under the Minnesota implied consent law. The Minnesota law provides for:

1. A hearing on the issues in a municipal or county court and a finding adverse to the driver is required before the Commissioner of Public Safety can revoke the license. (Sec. 169.123(5) and (6).)

2. The notice of opportunity for a hearing is served personally on the driver at the time he refuses or the test results are 0.10 or more. Sec. 169.123(5a). See form used in Appendix III, "Notice of Revocation."

3. There is a right of appeal to the District Court from the hearing before the municipal or county court. (Sec. 169.123(7).)

It appears quite clear that the Minnesota implied consent law procedures fully comply with the requirements of the U.S. Supreme Court in Bell v. Burson.[12]

In 1979, which is after the present implied law was enacted, the Supreme Court of Minnesota concluded in the Wiehle[13] decision that: "The present implied consent law satisfies all constitutional requirements."

Collateral Impact - Administrative Versus Criminal. Under the Minnesota statutes it is a criminal offense to drive, etc., with an alcohol concentration of 0.10 or more. In a parallel track the implied consent law provides for a revocation of the driver's license if the driver submits to a chemical test for intoxication and the results are an alcohol concentration of 0.10 or more. The question arises: if this "issue" of 0.10 or more has been litigated in the criminal trial, what impact does this have under the administrative proceeding and vice versa?

This issue could be raised by double jeopardy, res judicata, collateral estoppel, or collateral attack.

"Double jeopardy" is a constitutional right which prohibits a person from being tried twice for the same crime. The great weight of authority holds this doctrine is not applicable between a criminal conviction and a suspension or revocation of a driver's license growing out of the same event.[14]

"Res judicata" is a rule that a final judgment or decree on the merits is

conclusive of the rights of the parties in later suits on the points and matters determined in the former suit. It is normally applied to civil proceedings but has been applied in criminal cases. Here again the great weight of authority is that res judicata does not prevent the suspension or revocation of a driver's license growing out of the same event.[15]

"Collateral attack" is an attempt to avoid, defeat, or evade another judicial proceeding in an incidental proceeding. An exception is the right to appeal to a higher court in the same case. Here again the great weight of judicial authority is against collateral attack.[16]

"Collateral estoppel" is defined as once a court has litigated and decided an "issue" involving a party the same issue cannot be relitigated in a different case. The U.S. Supreme Court incorporated this doctrine into criminal cases in Ashe v. Swenson.[17] More recently the Court applied collateral estoppel to a case where the defendant was charged with possession of heroin and intent to kill. At his pretrial suppression hearing he attempted to suppress the evidence seized in a search of his house. The trial court ruled the search was legal and allowed the evidence to be admitted at the trial. He was convicted. Later he filed a civil rights action in Federal court against the officers who made the search alleging his 4th Amendment rights had been violated. The trial court held that collateral estoppel prevented him from relitigating the search and seizure question because that issue had already been decided against him in the prior criminal case. In upholding the trial court's ruling the U.S. Supreme Court said:

> "The federal courts have traditionally adhered to the related doctrines of res judicata and collateral estoppel. Under res judicata, a final judgment on the merits of an action precludes the parties or their privies from relitigating issues that were or could have been raised in that action. Cromwell v. County of Sac., 94 U.S. 351, 352, 24 L.Ed 195. Under collateral estoppel, once a court has decided an issue of fact or law necessary to its judgment, that decision may

preclude relitigation of the issue in a suit on a different cause of action involving a party to the first case. . . . As this Court and other courts have often recognized, res judicata and collateral estoppel relieve parties of the cost and vexation of multiple lawsuits, conserve judicial resources, and, by preventing inconsistent decisions, encourage reliance on adjudication.

"In recent years, this Court has reaffirmed the benefits of collateral estoppel in particular, finding the policies underlying it to apply in contexts not formerly recognized at common law. Thus, the Court has eliminated the requirement of mutuality in applying collateral estoppel to bar relitigation of issues decided earlier in federal court suits, Blonder-Tongue Laboratories, Inc. v. University of Illinois, 402 U.S. 313, 91 S.Ct. 1434, 28 L.Ed.2d 788, and has allowed a litigant who was not a party to a federal case to use collateral estoppel 'offensively' in a new federal suit against the party who lost on the decided issue in the first case, Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S.Ct. 645, 58 L.Ed.2d 552. But one general limitation the Court has repeatedly recognized is that the concept of collateral estoppel cannot apply when the party against whom the earlier decision is asserted did not have a 'full and fair opportunity' to litigate that issue in the earlier case."[18]

A Texas U.S. District Court has stated:

"It is well-settled in federal law that the doctrine of collateral estoppel is 'as applicable to decisions of criminal courts as to those of civil jurisdiction.' . . . Thus, a criminal conviction can work an offensive estoppel in a subsequent civil proceeding if the issues for which estoppel is sought were put in issue and directly determined in the prior criminal proceeding." [19]

In regards to collateral estopped there are three requirements:

"The doctrine of collateral estoppel requires (1) that the issue in question be identical to an issue actually litigated in the prior litigation; (2) that the prior litigation have resulted in a final judgment on the merits; and (3) that the party against whom the estoppel is asserted was a party or in privity with a party to the prior adjudication."[20]

Nonetheless there is no judicial requirement that res judicata and collateral estoppel must apply in all situations. As regards an administrative determination, the U.S. Supreme Court has held that:

"When an administrative agency is acting in a judicial capacity and resolves disputed issues of fact properly before it which the parties have had an adequate opportunity to litigate, the courts have not hesitated to apply res judicata to enforce repose." [21]

This holding was cited in a U.S. Court of Appeals case that ultimately disallowed a claim of res judicata as argued by a corporation charged with OSHA violations:

"Finally, we note that even where the technical requirements of res judicata have been established, a court may nonetheless refuse to apply the doctrine. This court does not adhere to a rigid view of the doctrine in the administrative context:

> 'The sound view is therefore to use the doctrine of res judicata when the reasons for it are present in full force, to modify it when modification is needed, and to reject it when the reasons against it outweigh those in its favor.'

Bowen v. United States, 570 F.2d 1311, 1321 (7th Cir. 1978) quoting 2 K. Davis, Administrative Law Treatise 548 (1958). Res judicata must yield on occasion to competing public policies." [22]

A case from the Washington Supreme Court discusses the issues as applied either way—Criminal trial determination's impact on administrative hearing and Administrative hearing determination applied to a criminal trial. The case involved a parolee who was successful in defending against his parole revocation for a narcotics violation at an administrative hearing immediately prior to his criminal trial on the narcotic charge. He attempted to use the "not guilty" finding of the administrative hearing to preclude relitigation of the issue at his criminal trial. The pertinent language from the court is as follows:

"If a Washington state parolee is acquitted in a criminal trial, that acquittal does not bar the state from conducting a parole revocation hearing based upon the same incident. Standlee v. Smith, 83 Wash.2d 405, 518 P.2d 721 (1974). See also Standlee v. Rhay, 403 F.Supp. 1247 (E.D.Wash.-1975), rev'd 557 F.2d 1303 (9th Cir.-1977).

"The Standlee court relied upon 'the rule that a difference in the degree of the burden of proof in the two proceedings precludes application of collateral estoppel.' Standlee v. Smith, supra, 833 Wash.2d at 407, 518 P.2d at 722. The 'beyond a reasonable doubt' standard applies in a criminal case, while a parole revocation hearing is governed by the less exacting 'preponderance of the evidence' standard. Thus, a parolee defendant might be acquitted in a criminal prosecution because the state was unable to meet the burden of proof 'beyond a reasonable doubt', yet the same evidence could, under the lesser standard of proof, support parole revocation. (This is the general rule and it is certainly applicable to DWI/Implied Consent statutes, see Asbridge v. North Dakota State Highway Commission, 291 N.W.2d 739 (N.D.-1980); Marquardt v. Webb, 545 P.2d 769 (Okla.-1976).) . . .

"Collateral estoppel, perhaps more descriptively denoted as issue preclusion, and res judicata are doctrines having a common goal of judicial finality. The principles underlying both doctrines are to prevent relitigation of already determined causes, curtail multiplicity of actions, prevent harassment in the courts, inconvenience to the litigants, and judicial economy.

"Of the two doctrines, res judicata is the more comprehensive because it relates to a prior judgment arising out of the same cause of action between the parties. Collateral estoppel is less encompassing, barring relitigation of a particular issue or determinate fact. Both doctrines require a large measure of identity as to parties. . . .

"As to identity of parties, mutuality of parties is not a limiting ingredient of the collateral estoppel rule imposed by the Fifth and Fourteenth Amendments. It is sufficient that the party against whom the plea of collateral estoppel is asserted was a party or in privity with a party in the prior litigation.

"Here, the prosecutor asserts that the State was not a party at the parole revocation hearing because 'the state' for purposes of parole revocation is not 'the state' for purposes of criminal prosecutions. We find this contention to be without merit. Although the prosecutor was not a participant in the revocation proceeding, an assistant attorney general was. The same sovereign is involved in both instances."

The court then went on to consider whether an administrative determination could be applied to preclude a criminal trial. The court stated:

"Decisions of administrative agencies may be accorded preclusive effect in subsequent litigation. . . . The applicability of collateral estoppel in each case is dependent upon a number of factors, including (1) whether the agency acting within its competence made a factual decision; (2) agency and court procedural differences; and (3) policy considerations. . . .

"Policy arguments have been often the deciding factor when collateral estoppel is based upon prior administrative determination. 2 K. Davis, Administrative Law Treatise, Sec. 18.04 (1958 and Supp. 1970). The doctrine may be qualified or rejected when its application would contravene public policy. . . .

"We believe public policy dictates rejection of collateral estoppel in this instance. Parole revocation is not part of a new criminal prosecution. . . .

"Practical public policy requires that new criminal matters, when charged in the criminal justice system, must be permitted to be there decided, unhampered by any parallel proceedings of the Board of Prison Terms and Paroles. Consequently we hold that the board's parole revocation hearing decision regarding Dupard may not be interposed as a basis for collateral estoppel in his prosecution on new criminal charges. 13

Since public policy considerations are an exception to the application of collateral estoppel, it is important to note that the U.S. Supreme Court has held in a number of cases that highway safety is a compelling public interest. For example in the Mackey case the Court said:

"We have traditionally accorded the states great leeway in adopting summary procedures to protect public health and safety. States surely have at least as much interest in removing drunken drivers from their highways as in summarily seizing mislabeled drugs or destroying spoiled foodstuffs."[24]

In Minnesota, the Supreme Court has held that acquittal of the criminal charge of DWI does not, as a matter of law, dispose of corollary charges under the implied consent law. Furthermore, administrative and criminal proceedings growing out of a DWI case are related only insofar as they generally grow out of the same set of facts. Even though the state is the "party" in both instances, at a criminal trial, the "state" is represented by the county attorney, who is not free to plea bargain away state civil penalties. The civil penalties, i.e., via administrative process, is solely within the jurisdiction of the state's Attorney General and therefore the state could not be estopped from applying a civil sanction even though the county attorney included a "no loss of license" in his plea bargain.[25]

Other issues concerning res judicata, collateral estoppel and collateral attack are:

1. Res judicata is applicable in successive administrative proceedings.[26]
2. A collateral attack on the underlying criminal conviction is generally not permitted at an administrative hearing.[27]
3. As applied to Minnesota, res judicata does apply in administrative hearing and the Supreme Court has admonished state agencies to comply with pertinent statutes and regulations.

"Nevertheless, it should be noted that the practice of the commission in this case is not one to be commended. It appears that, in essence, the commission attempted largely to avoid the difficult legal question here encountered by simply substituting a different set of factual findings for those made in 1963 and 1965. We are in sympathy with relator's assertions that such action was prima facie violative of principles of res judicata--principles which, in spirit at least, apply to adjudications by administrative agencies as well as to those made by the courts. . . . Because of

> the breadth of power which has been delegated to administrative agencies such as the one here involved, it is necessary in the interests of consistency and fairness that such power be exercised only in the manner prescribed by statute and published regulation. Our legislature has set forth specific procedures to be followed relative to providing for notice and hearing for the reopening of compensation awards by the commission."[28]

In conclusion, the great weight of judicial authority continues to hold that a suspension or revocation of a driver's license is not barred by collateral estoppel or res judicata. This was summarized by the annotator in 96 ALR2d 612, 614 as follows:

> "It is generally recognized that state legislatures may, in the exercise of their police powers, enact reasonable regulations for the obtaining of drivers' or operators' licenses and for the revocation or suspension thereof under stated circumstances. However, where those circumstances which were the basis of the revocation or suspension were also the basis of charges in a previous criminal case, it might seem to the layman driver that the state has been allowed to try him twice for the same offense, and his notions of fair play might be injured all the more where the previous criminal prosecution resulted in a determination that he was 'not guilty.' Notwithstanding the notions of fair play entertained by laymen, however, what little authority there is on the subject holds that the later proceeding to revoke or suspend his license, since not intended as a punishment of the driver but designed solely for the protection of the public in the use of the highways, does not in the legal sense subject him to double jeopardy or punishment, nor is a judgment of acquittal in the previous criminal case res judicata on the issue of guilt or innocence in the later proceeding, for, as stated by one court, such judgment does not have any probative value in the subsequent proceeding beyond the mere fact of its rendition, the reason for this being found in the nature of the criminal proceedings and the type of proof required therein, for in a criminal proceeding the guilt of the accused must be established beyond a reasonable doubt, whereas in a civil proceeding to revoke a license it is sufficient if the offense is established by a preponderance of the evidence.
>
> "It should be noted that the result reached in the case of a revocation or suspension of a driver's license is fully in accord with the general rule relating to the effect on administrative proceedings of an acquittal or conviction in criminal proceedings."[29]

Double Punishment. Under the Minnesota law there is a dual track. Under Sec. 169.121 it is a criminal offense for a person to drive, etc., with an alcohol concentration of 0.10 or more. Under the implied consent law a

person can have his driver's license revoked for driving, etc., with an alcohol concentration of 0.10 or more. This second track has been referred to as "administrative per se."

What if a driver is punished with criminal penalties under the first statute and also suffers a revocation of his driver's license under the second law? Does this violate the constitutional prohibitions of double jeopardy and double punishment?

The U.S. Supreme Court has made it clear that the double jeopardy clause of the U.S. Constitution bars double punishment. The Court held in the Pearce[30] case that: "The Constitution was designed as much to prevent the criminal from being twice punished for the same offense as from being twice tried for it."

However, a review of the appellate court decisions indicates there would not be double punishment where one sanction is criminal and the other civil or administrative in nature.[31] For example, in Barnes v. Tofany[32] the defendant was convicted for driving while ability impaired for which he received a mandatory suspension of his driver's license. In addition, acting under a separate statute, the Commissioner of Motor Vehicles, then suspended his driver's license, following an administrative determination that the defendant was grossly negligent. Both suspensions arose out of the same event. The defendant appealed his second suspension on the grounds that this violated his constitutional rights of not being placed in double jeopardy and of double punishment. In upholding both suspensions the New York Court of Appeals said:

> "The constitutional prohibitions against double jeopardy and double punishment do not prevent the Legislature from enacting and and the executive from enforcing, civil as well as criminal sanctions for the same conduct. . . . Therefore, the question before us is really whether the sanction imposed (suspension of an operator's license) is essentially criminal or civil in nature.

"As the Supreme Court noted in Helvering v. Mitchell (303 U.S. 391, 399, 58 S.Ct. 630, 633, 82 L.Ed. 917), 'Remedial sanctions may be of varying types. One which is characteristically free of the punitive criminal element is revocation of a privilege voluntarily granted.' It is apparent that suspension or revocation of the privilege of operating a motor vehicle is essentially civil in nature, having as its aims chastening of the errant motorist, and, more importantly, the protection of the public from such a dangerous individual." * * *

"Each of these proceedings—one, a civil administrative proceeding, and the other, a criminal action—are separate and independent of each other. The outcome of one proceeding is of no consequence in the other. There is no constitutional or statutory prohibition to make the Commissioner's implementation of the statute illegal or unlawful. Since the statute imposed upon the Commissioner a mandatory duty to suspend petitioner's license after conviction, there was no exercise of discretion to be reviewed by the courts below as to the second suspension."[33]

The Supreme Court of Minnesota in the Mulvihill case in 1975 also emphasized this distinction between criminal and civil nature of the two tracks. The court said:

"We feel it important to again emphasize the essential differences between license revocation under Sec. 169.121, subd. 3, and license revocation under Sec. 169.123, subd. 4. The former is automatically imposed as a criminal penalty upon conviction of a Sec. 169.121 violation. It is triggered by the outcome of the criminal proceeding and is imposed through the judicial system. Revocation under this section is for not less than 30 days. On the other hand, revocation under the implied-consent law is essentially civil in nature. State, Department of Public Safety v. House, 291 Minn. 424, 425, 192 N.W.2d 93, 94 (1971). It is imposed administratively by the commissioner of public safety regardless of the outcome of the criminal proceeding arising out of the same incident and is triggered by the refusal to submit to chemical testing."[34]

A related issue is where the criminal charges are dismissed or the defendant is acquitted: Can the motor vehicle department revoke under the implied consent law? This issue was addressed by the Supreme Court of Minnesota in the Styrbicki[35] and Olsen[36] decisions.

In Styrbicki the defendant was found not guilty by a jury on the charge of driving under the influence of alcohol. However, the defendant had refused the chemical test when arrested and on this ground the motor vehicle department moved

to revoke his license. He argued on appeal to the Minnesota Supreme Court that because he was acquitted of the criminal charge, it followed that the arrest was therefore unlawful and thus the officer did not have the required "reasonable and probable grounds" for the implied consent law to revoke his license.

The court rejected this argument and held that the acquittal did not invalidate the arrest. In doing so the court concluded:

> "Other courts have also held that the fact that a person may have been acquitted of the offense of driving while intoxicated does not preclude an administrative hearing to determine if his driving privileges should be withdrawn for his refusal to submit to a chemical test to determine the alcoholic content of his blood."[37]

In the Olsen[38] case the Supreme Court of Minnesota held that where the driving under the influence charge was dismissed when the defendant pled guilty to the reduction of the charge to careless driving it was not a bar to a revocation of his driver's license for a refusal of the chemical test.

Guilty Plea. There is no provision in the Minnesota implied consent statute which ties a conviction of a drinking-driving offense to the refusal. However, the Supreme Court of Minnesota in the Schlief[39] case held that a driver who pleads guilty to the criminal DWI charge cannot be subjected to a revocation of his driver's license for refusing the chemical test. The court stated that it would serve no useful purpose and would be unreasonable.

In a later decision in the Mulvihill[40] case the court laid down the guidelines for the Schlief doctrine. The court held:

> "In order for a defendant to establish reasonable grounds for refusing to submit to chemical testing as otherwise required by statute and avail himself of the doctrine in the Schlief decision, he must do the following: (1) At the time of the refusal, he must intend to plead guilty to a charge of violating Minn.St. 169.121, subd. 1; (2) he must enter a plea of guilty to a charge which subjects him to automatic revocation under Sec. 169.121, subd. 3; and (3) he must plead guilty at the first available opportunity."

The effect of this approach is to put a lever on the defendant who has refused the test. It encourages him to plead guilty because if he does, there is no revocation for refusing the chemical test. Of course, he receives a revocation on the conviction but if he pleads "not" guilty and is convicted he could receive two revocations—one for the conviction and one for the implied consent refusal.[41]

Thus the Schlief-Mulvihill doctrine has a tendency to chill "not" guilty pleas. Such a practice has been held unconstitutional by the U.S. Supreme Court in United States v. Jackson[42] where the court held that due process forbids convicting a defendant on the basis of a coerced guilty plea.

Arizona had a statutory provision which was similar in effect to the Schlief-Mulvihill doctrine. In holding the statute unconstitutional the U.S. District Court said:

> "The effect of subparagraph H. is to needlessly chill the exercise of basic constitutional rights. See United States v. Jackson, supra. The operation of subparagraph H. obviously places the individual charged in a dilemma as to whether to stand on his rights, and thereby lose his driving privileges, or to enter a plea of guilty, without appeal, and thus retain his driving privileges. Thus, subparagraph H. of the statute imposes an impermissible burden upon the exercise of the accused's Fifth Amendment right not to plead guilty, and his Sixth Amendment right to demand a jury trial, and is, therefore, unconstitutional. See United States v. Jackson, supra, and Pope v. United States, 392 U.S. 651, 88 S.Ct. 2145, 20 L.Ed.2d 1317. Moreover, the obvious difference in treatment of the accused under the Arizona statute, which subparagraph H. includes therein, constitutes a violation of the equal protection clause of the Fourteenth Amendment." [43]

Since the Schlief-Mulvihill approach is not the rule around the country, it would not normally pose a problem in other states which adopted the Minnesota implied consent law since this doctrine is in the case law and not the statute.

FOOTNOTES - Part II.

1. Minnesota Laws 1976, Chapter 341, effective July 1, 1976, and codified as Sec. 169.127. However in 1978 this law was repealed and re-enacted as Sec. 169.123 by Minnesota Laws 1978, Chapter 727, effective September 1, 1978, retaining its substantive aspects.

2. Delaware v. Prouse, 440 U.S. 648, 99 S.CT. 1391, 59 L.Ed.2d 660 (1979).

3. The Supreme Court of Minnesota held that where a driver was under arrest for DWI while being transported went into convulsions and was rushed to the hospital unconscious, a blood test could be taken and if the results were 0.10 or over, his license could be revoked under the "administrative per se" law even though no warnings had been given and the driver did not consent. This conclusion was reached on the grounds that the taking of the blood sample was constitutional because there was "an exigency to preserve evidence, probable cause to support formal arrest, and a highly unobtrusive search," citing State v. Oevering, 268 N.W.2d 68 (Minn.-1978). Also, the court concluded that there was no prohibition in the Minnesota implied consent law which precluded the taking of the blood sample. Since the driver's condition precluded him from refusing the test, his consent remained continuous. This continuing consent permitted use of the results of the test in an implied consent proceeding. State v. Wiehle, 287 N.W.2d 416 (Minn.-1979). See also: State v. Hauge, 286 N.W.2d 727 (Minn.-1979), holding to same effect.

PART III

STUDY OF OPERATIONAL IMPACT

In addition to studying the legal and constitutional questions relating to the Minnesota "administrative per se" implied consent law, the questions of—is the law working and how well—are addressed.

There were two principal sources for the responses to the following questions: (1) interviews with a number of state officials in Minnesota who are involved in running the programs under the implied consent law; and (2) statistics from their offices.

The questions to be answered were:

1. "Ascertain to what extent offenders charged with DUI are cited under Minnesota Section 169.123, as opposed to Minnesota Section 169.121, wherein an implied consent BAC test has been administered."

The total number of "arrests" for DWI reported to the Minnesota Criminal Justice Information System in 1980 was 22,788. Also, in 1980 the number of "certificates" from law enforcement officers to the Department of Public Safety that a driver had either refused a chemical test or had submitted and the results were 0.10 alcohol concentration or more totaled 28,429. From the data available it is not possible to determine the number of chemical tests administered in the 22,788 arrests. Under Minnesota law the officer can arrest for DWI without administering any chemical tests.

It is possible for the officer to file a "certificate" of refusal for 0.10 or more with the Department of Public Safety <u>without</u> filing any criminal charges for DWI. Also, there are cases where the driver submitted to the chemical test and the results were less than 0.10 alcohol concentration and thus no

certificate would be sent to the Department of Public Safety yet criminal charges could have been filed. Hence there are several reasons for the number of arrests and number of revocations to differ.

In some of the interviews with Minnesota officials it was reported that the "administrative per se" or implied consent law was popular with law enforcement officers. The number of revocations over arrests appears to support this view.

For further comparison of arrests and certificates see Tables I and IV in Appendix II. Also see Memorandum of Mr. Forst Lowery in Appendix IV explaining differences in the data.

2. "Determine, if possible, to what extent law enforcement officers are using the Subd. 4 provision by submitting to the Commissioner of Public Safety BAC test results of 0.10 percent or more."

The laboratory of the Bureau of Criminal Apprehension in Minnesota performs most of the blood and urine tests in DWI cases, except for St. Paul, Minneapolis, and a few other cities, and receives reports on all the breath tests performed in the state. In 1979 these tests totaled 15,254 where the results were 0.10 or more. In the same year the number of revocations under the implied consent "administrative per se" law was reported as 6,742. On the face of this it would appear that officers were using the law (Subd. 4 of Sec. 169.123) only about half the time.

However, there are some factors which should be noted. The Supreme Court of Minnesota has held that if a driver pleads guilty at the first opportunity to the DWI charge, then his license cannot be revoked under the implied consent law. See the discussion in Part II above of the Schlief-Mulvihill cases under the heading of "Guilty Plea." There is no data available to indicate how much this decreases the number of implied consent revocations.

Another factor impacting on the number of revocations under the implied consent law is that a number of drivers request a hearing. (See Table IX in Appendix II.) As will be noted this number has substantially increased in recent years. Needless to say, when it goes to a hearing the Attorney General does not win them all and this reduces somewhat the number of revocations.

Interviews with Minnesota officials indicate that in their view officers are using this law most of the time. When the factors just discussed are taken into consideration, it would appear that the views of the officials interviewed are supported by the data.

3. "Determine what use is being made by the Motor Vehicle Department of the BAC test results as authorized under Subd. 4. What, if any, are the constitutional, legal and practical problems - how well is it working."

The "certificate" from the officer, that a driver has either refused a chemical test or the results of the test were 0.10 or more, to the Department of Public Safety triggers the action under the implied consent law. The officials interviewed, both in and out of the division in DPS which handles these certificates, reported that the system was working well.

One factor which makes the system work more effectively is that at the time of the refusal or when a breath test is taken and the results are known at the time, the officer serves a "Notice of Revocation" on the driver and picks up the driver's license which is attached to the certificate forwarded to DPS. (See Form in Appendix III.) If it goes to a hearing and the license is not already in the possession of DPS, and the hearing is adverse to the driver, the court picks up the license and sends it to the DPS along with the court's decision. This greatly reduces the administrative problem of notifying the driver of his opportunity for a hearing (which formerly was done by certified mail in all cases) and obtaining possession of the license from the driver.

For the drivers who do not request a hearing, it was reported that there was no significant backlog. However, as will be noted in Table IX in Appendix II, the number of pending cases under the implied consent law is steadily growing. This is due in part to the lack of adequate staff in the Attorney General's Office to handle these cases and at the same time the increase in the number of DWI arrests being made on the street.

4. "Determine to what extent driver license revocation actions are taken pursuant to Subd. 3 (BAC test results of 0.10 percent or higher) under the following situations:

    1) the DUI charge is nolle prossed
    2) the DUI case is continued
    3) the DUI charge is plea bargained down to a lesser offense
    4) the DUI case results in an acquittal."

From the data available in Minnesota, it is very difficult to determine the precise impact the "administrative per se" implied consent law has had on the four areas listed above. In fact, no data was found to determine exactly how many DWI cases were nolle prossed, continued, plea bargained or acquitted on a state wide basis.

However, a general answer can be given by looking at the number of total alcohol-related revocations in Table I (Appendix II). The "administrative per se" law became effective on July 1, 1976. If a comparison is made for 1975 (17,628 revocations) which would be DWI convictions and refusals and 1979 DWI convictions and refusals (18,224 revocations) the impact of revoking under the "administrative per se" law was not negative. It appears the DWI case load has continued to increase since the convictions resulting in revocations has increased. In 1980 there was a significant increase—from 14,797 in 1979 to 17,406 in 1980. It can be concluded that the enactment of the "administrative per se" implied consent law did not decrease the DWI cases in court.

5. "Based on available data, determine the impact the enactment of Minnesota Section 169.123 (Subd. 4) has had on the number of implied consent refusals."

Prior to 1978 the Department of Public Safety did not keep data on the number of revocations for refusal separate from revocations for convictions or for having an alcohol concentration of 0.10 or more. However, the number of revocations for refusals in 1978 was 3,344, in 1979 it was 3,427, and in 1980 it was 3,863. Since this shows a steady increase, it can be concluded that the enactment of the "administrative per se" implied consent law which added revocations for having an alcohol concentration of 0.10 or more had no negative impact. Nor does it appear that this new law greatly increased refusals. (See Table I in Appendix II.)

6. "Determine the extent to which the Commissioner of Public Safety appears through prosecuting attorneys at driver license revocation hearings as provided for in Minnesota Section 169.123 (Subd. 6)."

In the Minnesota law it provides that: "The commissioner of public safety may appear (at the implied consent hearing) through his own attorney or, by agreement with the jurisdiction involved, through the prosecuting authority for that jurisdiction." According to the Minnesota Attorney General's Office no agreements have been entered into with any local jurisdiction to represent the Department of Public Safety at any implied consent hearings.

As will be noted in Table IX in Appendix II the number of pending cases has been steadily growing and to deal with this backlog either the staff in the Attorney General's Office who handles these cases will have to be increased or agreements will have to be made with local prosecutors. The importance of keeping the function in the Attorney General's Office is that it removes any pressure on the local prosecutor concerning the disposition of both the criminal charges and the implied consent revocation proceedings. Also, keeping it

at the state level provides for uniform policies in handling the implied consent cases.

7. "Determine, to the extent practical, the impact of the administrative licensing action on the adjudication process (e.g., conviction rates, sanction involved)."

It is very difficult to determine conviction rates, types of sanctions imposed, and related aspects in DWI cases in the court system. However, one measure that is available is the number of revocations for DWI convictions. These have increased — 15,512 in 1978; 14,797 in 1979; 17,406 in 1980; and 7,861 in the first five months of 1981 (which if the level continues would be about 18,864 in 1981).

Based on the number of revocations for convictions the enactment of the "administrative per se" implied consent law had no negative impact on criminal charges under the DWI statute.

Since the two tracks are separate and the timing is not parallel, the officials interviewed in Minnesota reported they had not observed any impact on conviction rates, sanctions imposed, etc. If anything, tightening the net on drinking drivers has led to increased enforcement activity by law enforcement officers. See especially the 1980 and 1981 revocations in Table I, Appendix II.

8. "Determine, to the extent practical, the impact of the administrative licensing process on the rate of enforcement and support of police officers."

The number of sworn police officers in Minnesota has remained relatively stable in the past few years—going from 5,922 in 1977 to 6,107 in 1980—an increase of only 185 officers. (See Table V in Appendix II.) Such a small increase cannot account for the increase in total number of revocations for alcohol related offenses which went from 17,741 to 30,481 in the same period of time. (See Table I in Appendix II.)

Among the officials interviewed it was reported that the "administrative per se" implied consent law was popular among law enforcement officers. As is true in many jurisdictions the officers express frustration at the courts and their handling of DWI cases. It appears they view the administrative track as providing a method of doing something about the drinking driver regardless of what happens to the criminal charges in court.

PART IV

EXECUTIVE SUMMARY AND CONCLUSIONS

In 1976 the State of Minnesota adopted a rather unique implied consent law. That state already had the traditional implied consent law which provided for revocation of the driver's license if the driver refused to submit to a chemical test for intoxication. What was added was a provision that when the officer requested a chemical test for intoxication under the implied consent law, and the driver submitted, and the results were an alcohol concentration of 0.10 or more, the officer sent a report to the motor vehicle department (Department of Public Safety). Based on the report the DPS could revoke the driver's license for having 0.10 or more. Of course, there is a notice and opportunity for a hearing. However, if the results of the hearing are adverse to the driver, or if he waives his right to a hearing, then the DPS can revoke on the basis of either the refusal to submit or having 0.10 or more. It has been described as an "administrative per se" law.

At the same time, Minnesota has a criminal statute making it a crime to drive, etc., while under the influence of alcohol which is the traditional DWI charge. Also in recent years at least 20 states, including Minnesota, have enacted criminal statutes making it a crime to drive, etc., with an alcohol concentration of 0.10 or more. This charge has been described as an absolute or "illegal per se" law.

The uniqueness of the Minnesota law is the two tracks—one a criminal "per se" law and the other an administrative "per se" law. They are separate tracks with almost no connection between the two. About the only connection are some restrictions on revoking the driver's license for both but that

connection applies in only some circumstances. In the situation where the driver refuses the test and pleads guilty to the criminal charge at the first opportunity, the Minnesota Supreme Court has held his license cannot be revoked for the refusal.

Another situation is where the timing is such that a revocation takes place for the implied consent law and the driver is later convicted of the criminal charge, then the statute prohibits another revocation unless the driver has had a prior revocation within three years. Then the prohibition does not apply.

If the timing is the opposite—the driver is convicted of the criminal charge first and the implied consent revocation happens later, then the Minnesota statute does not bar two revocations.

This study has two principal objectives. First, to study the legal and constitutional aspects and second, to look at the operation of the law and determine whether or not it is working and its impact on other aspects of the system of control on drinking-drivers.

Legal Conclusions. Since a number of states, including Minnesota, have had appellate court challenges to the "illegal per se" law, this was one method of determining possible court challenges to the "administrative per se" law. One possible challenge is that the legislature was arbitrary and capricious when it chose the alcohol concentration of 0.10 or more as an element of the statute. This argument has been rejected by the appellate courts because of the numerous scientific studies which have shown that every person with an alcohol concentration of 0.10 or more is an unsafe driver. Consequently, the legislative determination is based on scientific research.

Another possible legal challenge is that the law is vague and indefinite because the driver cannot tell when he is approaching the 0.10 concentration without a chemical test for intoxication. At least two appellate courts have rejected this argument because any person of ordinary intelligence who has consumed an alcoholic beverage, and particularly a substantial amount, knows that he should not attempt to drive or take control of a vehicle.

A third possible legal challenge is based on due process of law. In the Bell v. Burson case the U.S. Supreme Court held that a driver's license was an "important interest" to which the due process clause of the 14th Amendment attached. Thus a driver is entitled to notice and opportunity to a hearing in most circumstances before any action can be taken against his license. The Minnesota implied consent law complies with these requirements and the Minnesota Supreme Court has upheld its constitutionality.

A fourth possible challenge is "double jeopardy" or "collateral estoppel." Since there is both a criminal charge of driving, etc., with an alcohol concentration of 0.10 or more as well as administrative action for 0.10 or more, do corrective sanctions against the driver under both laws constitute double jeopardy? The appellate court decisions almost unanimously hold there is no double jeopardy between criminal and administrative sanctions. Collateral estoppel means that once an "issue" has been litigated, that "issue" (in this case the issue of 0.10 or more) cannot be litigated again. Normally, collateral estoppel has not been applied by the courts between criminal and administrative proceedings.

In some cases a driver can receive a revocation for being convicted of the criminal charge and also receive a separate revocation (not running concurrently) under the implied consent law. Since double jeopardy also prohibits double punishment does this constitute a violation of double jeopardy? The

answer is no since the appellate courts have regularly held that double jeopardy does not bar both civil or administrative sanctions on one hand and criminal sanctions on the other arising out of the same event.

If another state should enact the Minnesota implied consent law, care should be taken not to add a provision which bars a revocation for refusal if the driver pleads guilty to the criminal charge. While this ruling is not in the Minnesota statute it was imposed by the Minnesota Supreme Court. It has been held unconstitutional in Arizona by the U.S. District Court because it has a tendency to "chill" the defendant's constitutional right to plead not guilty.

Many observers feel that the law should not impose two revocations—one for a conviction and one for the implied consent law. If any state adopts the Minnesota "administrative per se" law, this point should be addressed.

In summary it appears clear that the Minnesota implied consent law with its provisions on "administrative per se" as a parallel track to the criminal drinking-driving charges is legally sound and constitutional.

Operational Conclusions. Based on data from Minnesota, interviews with a number of state officials, and review of the appellate court decisions in Minnesota, it appears the "administrative per se" law is working quite well.

On the national level, Professor Robert F. Borkenstein has estimated that police arrest only about 1 in 2,000 cases of drinking and driving. In Minnesota the Office of Traffic Safety estimates the figure is 1 in 300.

Because of the difficulty in collecting data on every aspect of the system, it is not possible to have precise figures. However, a reduction from about 1 in 2,000 to 1 in 300 is impressive even if only approximately correct.

A review of the number of revocations for alcohol related offenses, both criminal and implied consent in Table I (Appendix II), indicates the system is catching more drinking drivers each year and would tend to support, in part, the estimate of 1 in 300.

The addition of the "administrative per se" law appears to have had no negative impact on the operation of the criminal track for handling drinking drivers. In fact, the increase in the number of revocations for convictions in recent years appears to indicate it has had a "shot in the arm" effect upon the criminal system.

The officials interviewed reported that the "administrative per se" provisions are popular with law enforcement officers. Because of the typical frustration many officers have with the criminal handling of drinking drivers, the "administrative per se" law gives them an out for that frustration.

A factor which has helped make the system work is the notice of revocation and pick up of the driver's license at the time of refusal, or a breath test of 0.10 or more, along with the pick up at the time of the hearing if the decision is against the defendant and the license is not already in the hands of the Department of Public Safety. This greatly reduces the cost and gives personal service of the notice of an opportunity for a hearing which expedites the entire system.

It must be remembered that the so-called political and safety climate in Minnesota has been favorable to the enactment of new legislation in the area of drinking and driving. While the consumption of alcoholic beverages has steadily increased in Minnesota in recent years (see Table VIII in Appendix II) the efforts of the traffic safety community have been fairly well received. This is in contrast to other states where efforts to control the drunk driver have very rough sledding in the state legislatures and any new

legislation is strongly resisted. This factor needs to be kept in mind by any "transplant" of this type of law to another state.

As with any such system, the dedication, experience, and expertise of the officials and public employees operating the system are extremely important. In Minnesota the officials and employees appear to be well motivated and really make the system work.

However, the increasing case load is starting to cause problems and this is particularly a problem in the Office of the Attorney General. The file of pending cases waiting for a hearing under the implied consent law has grown significantly in recent years. It is clear a larger staff is needed for this function.

Overall the conclusion is that Minnesota does a good job in making the "administrative per se" system work and other states should be encouraged to consider adopting similar provisions.

APPENDIX I

TEXT OF RELEVANT MINNESOTA STATUTES

Source: Minnesota Statutes 1980, Embracing laws of a general and permanent nature and certain other laws in force or to be in force after the 1980 Session of the Legislature, Official Publication of the State of Minnesota.

169.121 MOTOR VEHICLE DRIVERS UNDER INFLUENCE OF ALCOHOL OR CONTROLLED SUBSTANCE.

Subdivision 1. It is a misdemeanor for any person to drive, operate or be in physical control of any motor vehicle within this state:

(a) When the person is under the influence of alcohol;

(b) When the person is under the influence of a controlled substance;

(c) When the person is under the influence of a combination of any two or more of the elements named in clauses (a) and (b); or

(d) When the person's alcohol concentration is 0.10 or more.

The provisions of this subdivision apply, but are not limited in application, to any person who drives, operates, or is in physical control of any motor vehicle in the manner prohibited by this subdivision upon the ice of any lake, stream, or river, including but not limited to the ice of any boundary water.

Subd. 2. Upon the trial of any prosecution arising out of acts alleged to have been committed by any person arrested for driving, operating, or being in physical control of a motor vehicle in violation of subdivision 1, the court may admit evidence of the amount of alcohol or a controlled substance in the person's blood, breath, or urine as shown by a medical or chemical analysis thereof, if the test is taken voluntarily or pursuant to section 169.123.

For the purposes of this subdivision:

(a) evidence that there was at the time an alcohol concentration of 0.05 or less is prima facie evidence that the person was not under the influence of alcohol;

(b) evidence that there was at the time an alcohol concentration of more than 0.05 and less than 0.10 is relevant evidence in indicating whether or not the person was under the influence of alcohol.

The foregoing provisions do not limit the introduction of any other competent evidence bearing upon the question whether or not the person was under the influence of alcohol or a controlled substance.

Subd. 3. Every person convicted of a violation of this section or an ordinance in conformity therewith is punishable by imprisonment of not more than 90 days, or by a fine of not more than $500, or both, and his driver's license shall be revoked for not less than 30 days, except that every person who is convicted of a violation of this section or an ordinance in conformity therewith, when the violation is found to be the proximate cause of great bodily harm as defined in section 609.02, subdivision 8, or death to another person, shall be punished by imprisonment for not more than 90 days, or by fine of not more

than $500, or both, and his driver's license shall be revoked for not less than 90 days.

Any person whose license has been revoked pursuant to section 169.123 is not subject to the mandatory revocation provision of this subdivision.

Subd. 4. Every person who is convicted of a violation of this section or an ordinance in conformity therewith within three years of any previous such conviction shall be punished by imprisonment for not more than 90 days, or a fine of not more than $500, or both, and his driver's license shall be revoked for not less than 90 days.

Subd. 5. The court may stay imposition or execution of any sentence authorized by subdivision 3 or 4 on the condition that the convicted person submit to treatment by a public or private institution or a facility providing rehabilitation for chemical dependency licensed by the department of public welfare. A stay of imposition or execution shall be in the manner provided in section 609.135. The court shall report to the commissioner of public safety any stay of imposition or execution of sentence granted under the provisions of this section.

Subd. 6. When a peace officer has reason to believe from the manner in which a person is driving, operating, or controlling a motor vehicle, or has driven, operated, or controlled a motor vehicle, that the driver may be violating or has violated subdivision 1, he may require the driver to provide a sample of his breath for a preliminary screening test using a device approved by the commissioner of public safety for this purpose. The results of this preliminary screening test shall be used for the purpose of deciding whether an arrest should be made and whether to require the chemical tests authorized in section 169.123, but shall not be used in any court action except to prove that a chemical test was properly required of a person pursuant to section 169.123, subdivision 2. Following the screening test additional tests may be required of the driver pursuant to the provisions of section 169.123.

The driver of a motor vehicle who refuses to furnish a sample of his breath is subject to the provisions of section 169.123 unless, in compliance with section 169.123, he submits to a blood, breath or urine test to determine the presence of alcohol or a controlled substance.

Subd. 7. On behalf of the commissioner of public safety a court shall serve notice of revocation on a person convicted of a violation of this section. The court shall take the license or permit of the driver, if any, or obtain a sworn affidavit stating that the license or permit cannot be produced, and send it to the commissioner with a record of the conviction and issue a temporary license effective only for the period during which an appeal from the conviction may be taken. No person who is without driving privileges at the time shall be issued a temporary license and any temporary license issued shall bear the same restrictions and limitations as the driver's license or permit for which it is exchanged.

The commissioner shall issue additional temporary licenses until the final determination of whether there shall be a revocation under this section.

169.122 OPEN BOTTLE LAW, PENALTY.

Subdivision 1. No person shall drink or consume intoxicating liquors or nonintoxicating malt liquors in any motor vehicle when such vehicle is upon a public highway.

Subd. 2. No person shall have in his possession on his person while in a private motor vehicle upon a public highway, any bottle or receptacle containing intoxicating liquor or nonintoxicating malt liquor which has been opened, or the seal broken, or the contents of which have been partially removed.

Subd. 3. It shall be unlawful for the owner of any private motor vehicle or the driver, if the owner be not then present in the motor vehicle, to keep or allow to be kept in a motor vehicle when such vehicle is upon the public highway any bottle or receptacle containing intoxicating liquors or nonintoxicating malt liquors which has been opened, or the seal broken, or the contents of which have been partially removed except when such bottle or receptacle shall be kept in the trunk of the motor vehicle when such vehicle is equipped with a trunk, or kept in some other area of the vehicle not normally occupied by the driver or passengers, if the motor vehicle is not equipped with a trunk. A utility compartment or glove compartment shall be deemed to be within the area occupied by the driver and passengers.

Subd. 4. Whoever violates the provisions of subdivisions 1 to 3 is guilty of a misdemeanor.

History: *1959 c 255 s 1-4*

169.123 CHEMICAL TESTS FOR INTOXICATION.

Subdivision 1. **Peace officer defined.** For purposes of this section and section 169.121, the term peace officer means a state highway patrol officer, university of Minnesota peace officer, a constable as defined in section 367.40, subdivision 3, or police officer of any municipality, including towns having powers under section 368.01, or county.

Subd. 2. **Implied consent; conditions; election as to type of test.** (a) Any person who drives, operates, or is in physical control of a motor vehicle within this state consents, subject to the provisions of this section and section 169.121, to a chemical test of his blood, breath, or urine for the purpose of determining the presence of alcohol or a controlled substance. The test shall be administered at the direction of a peace officer. The test may be required of a person when an officer has reasonable and probable grounds to believe the person was driving, operating, or in physical control of a motor vehicle in violation of section 169.121 and one of the following conditions exist: (1) the person has been lawfully placed under arrest for violation of section 169.121, or an ordinance in conformity therewith; or (2) the person has been involved in a motor vehicle accident or collision resulting in property damage, personal injury, or death; or (3) the person has refused to take the screening test provided for by section 169.121, subdivision 6; or (4) the screening test was administered and recorded an alcohol concentration of 0.10 or more. Any person may decline to take a direct blood test and elect to take either a breath or urine test, whichever is available and offered. No action may be taken against the person for declining to take a direct blood test unless either a breath or urine test was available and offered.

(b) At the time a chemical test specimen is requested, the person shall be informed:

(1) that if testing is refused, the person's right to drive will be revoked for a period of six months; and

(2) that if a test is taken and the results indicate that the person is under the influence of alcohol or a controlled substance, the person will be subject to criminal penalties and the person's right to drive may be revoked for a period of 90 days; and

(3) that the person has a right to consult with an attorney but that this right is limited to the extent that it cannot unreasonably delay administration of the test or the person will be deemed to have refused the test; and

(4) that after submitting to testing, the person has the right to have additional tests made by a person of his own choosing.

Subd. 2a. **Requirement of urine test.** Notwithstanding subdivision 2, if there are reasonable and probable grounds to believe there is impairment by a controlled substance which is not subject to testing by a blood or breath test, a urine test may be required even after a blood or breath test has been administered.

Subd. 3. **Manner of making test; additional tests.** Only a physician, medical technician, physician's trained mobile intensive care paramedic, registered nurse, medical technologist or laboratory assistant acting at the request of a peace officer may withdraw blood for the purpose of determining the presence of alcohol or controlled substance. This limitation does not apply to the taking of a breath or urine specimen. The person tested has the right to have a person of his own choosing administer a chemical test or tests in addition to any administered at the direction of a peace officer; provided, that the additional test specimen on behalf of the person is obtained at the place where the person is in custody, after the test administered at the direction of a peace officer, and at no expense to the state. The failure or inability to obtain an additional test or tests by a person shall not preclude the admission in evidence of the test taken at the direction of a peace officer unless the additional test was prevented or denied by the peace officer. Upon the request of the person who is tested, full information concerning the test or tests taken at the direction of the peace officer shall be made available to him. The physician, medical technician, physician's trained mobile intensive care paramedic, medical technologist, laboratory assistant or registered nurse drawing blood at the request of a peace officer for the purpose of determining alcohol concentration shall in no manner be liable in any civil or criminal action except for negligence in drawing the blood. The person administering a test at the request and direction of a peace officer shall be fully trained in the administration of the tests pursuant to standards promulgated by rule by the commissioner of public safety.

Subd. 4. **Refusal, consent to permit test; revocation of license.** If a person refuses to permit chemical testing, none shall be given, but the peace officer shall report the refusal to the commissioner of public safety and the authority having responsibility for prosecution of misdemeanor offenses for the jurisdiction in which the acts occurred. If a person submits to chemical testing and the test results indicate an alcohol concentration of 0.10 or more, the results of the test shall be reported to the commissioner of public safety and to the authority having responsibility for prosecution of misdemeanor offenses for the jurisdiction in which the acts occurred.

Upon certification by the peace officer that there existed reasonable and probable grounds to believe the person had been driving, operating, or in physical control of a motor vehicle while under the influence of alcohol or a controlled substance and that the person refused to submit to chemical testing, the commissioner of public safety shall revoke the person's license or permit to drive, or his nonresident operating privilege, for a period of six months. Upon certification by the peace officer that there existed reasonable and probable grounds to believe the person had been driving, operating or in physical control of a motor vehicle while under the influence of alcohol or a controlled substance and that the person submitted to chemical testing and the test results indicate an alcohol concentration of 0.10 or more, the commissioner of public safety shall revoke the person's license or permit to drive, or his nonresident operating privilege, for a period of 90 days.

If the person is a resident without a license or permit to operate a motor vehicle in this state, the commissioner of public safety shall deny to the person the issuance of a license or permit for the same period after the date of the alleged violation as provided herein for revocation, subject to review as hereinafter provided.

Subd. 5. **Notice of revocation or determination to deny; request for hearing.** No revocation under subdivision 4 is effective until the commissioner of public safety or a peace officer acting on his behalf notifies the person of the intention to revoke and of revocation and allows the person a 30 day period to request of the commissioner of public safety, in writing, a hearing as herein provided. If no request is filed within the 30 day period the order of revocation becomes effective. If a request for hearing is filed, a revocation is not effective until a final judicial determination resulting in a decision adverse to the person.

Subd. 5a. **Peace officer agent for notice of revocation.** On behalf of the commissioner of public safety a peace officer offering a chemical test or directing the administration of a chemical test may serve immediate notice of intention to revoke and of revocation on a person who refuses to permit chemical testing or on a person who submits to a chemical test the results of which indicate an alcohol concentration of 0.10 or more. The officer shall take the license or permit of the driver, if any, and issue a temporary license effective only for 30 days. The peace officer shall send the person's driver's license to the commissioner of public safety along with the certificate required by subdivision 4.

If the person requests a hearing within the 30 day period, the commissioner shall issue additional temporary licenses until the final determination of whether there shall be a revocation under this section.

Subd. 6. **Hearing.** A hearing under this section shall be before a municipal or county judge, in the county where the alleged offense occurred, unless there is agreement that the hearing may be held in some other county. The hearing shall be to the court and may be conducted at the same time and in the same manner as hearings upon pre-trial motions in the criminal prosecution under section 169.121, if any. The hearing shall be recorded. The commissioner of public safety may appear through his own attorney or, by agreement with the jurisdiction involved, through the prosecuting authority for that jurisdiction.

The scope of the hearing shall cover the issues of: (1) whether the peace officer had reasonable and probable grounds to believe the person was driving, operating, or in physical control of a motor vehicle while under the influence of alcohol or a controlled substance, and whether the person was lawfully placed under arrest for violation of section 169.121, or the person was involved in a motor vehicle accident or collision resulting in property damage, personal injury or death, or the person refused to take a screening test provided for by section 169.121, subdivision 6, or the screening test was administered and recorded an alcohol concentration of 0.10 or more; and (2) whether at the time of the request for the test the peace officer informed the person of his rights and the consequences of taking or refusing the test as required by subdivision 2; and (3) either (a) whether the person refused to permit the test, or (b) whether a test was taken and the test results indicated an alcohol concentration of 0.10 or more, and whether the testing method used was valid and reliable, and whether the test results were accurately evaluated.

It shall be an affirmative defense for the person to prove that his refusal to permit the test was based upon reasonable grounds.

The court shall order either that the revocation be rescinded or sustained and forward the order to the commissioner of public safety. If the revocation is sustained, the court shall also forward the person's driver's license to the commissioner of public safety for his further action if the license is not already in the commissioner's possession.

Subd. 7. **Review by district court.** If the revocation or denial is sustained, the person whose license or permit to drive, or nonresident operating privilege has been revoked or denied, may within 20 days after notice of the determination by the commissioner of public safety file a petition for a hearing of the

matter in the district court in the county where the hearing pursuant to subdivision 6 was held unless there is agreement that the hearing may be held in some other county. The petition shall be filed with the clerk of the court together with proof of service of a copy thereof on the commissioner of public safety. It is the duty of the court to set the matter for hearing on a day certain with reasonable notice thereof to the parties. The hearing shall be on the record and shall be conducted in the same manner provided in sections 487.39 and 484.63 for appeal of misdemeanor convictions.

Subd. 8. **Notice of action to other states.** When it has been finally determined that a nonresident's privilege to operate a motor vehicle in this state has been revoked or denied, the commissioner of public safety shall give information in writing of the action taken to the official in charge of traffic control or public safety of the state of the person's residence and of any state in which he has a license.

Subd. 9. **Limited license.** In any case in which a license has been revoked under this section, the commissioner may issue a limited license to the driver. The commissioner in issuing a limited license may impose the conditions and limitations which in his judgment are necessary to the interests of the public safety and welfare, including re-examination of the driver's qualifications, attendance at a driver improvement clinic, or attendance at counseling sessions. The license may be limited to the operation of particular vehicles and to particular classes and time of operation. The limited license issued by the commissioner shall clearly indicate the limitations imposed and the driver operating under a limited license shall have the license in his possession at all times when operating as a driver. In determining whether to issue a limited license, the commissioner shall consider the number and the seriousness of prior convictions and the entire driving record of the driver.

Subd. 10. **Termination of revocation period.** If the commissioner receives notice of the driver's attendance at a driver improvement clinic, attendance at counseling sessions, or participation in treatment for an alcohol problem the commissioner may, 30 days prior to the time the revocation period would otherwise expire, terminate the revocation period. The commissioner shall not terminate the revocation period under this subdivision for a driver who has had a license revoked under section 169.121 or this section for another incident during the preceding three year period.

169.124 ALCOHOL SAFETY PROGRAM.

Subdivision 1. The county board of every county having a population of more than 10,000 shall and the county board of every county having a population of less than 10,000 may establish an alcohol safety program designed to provide alcohol problem assessment and evaluation of persons convicted of one of the offenses enumerated in section 169.126, subdivision 1.

Subd. 2. The alcohol problem assessment shall be conducted under the direction of the court and by such persons or agencies as the court deems qualified to provide the alcohol problem assessment and assessment report as described in section 169.126. The alcohol problem assessment may be conducted by court services probation officers having the required knowledge and skills in the assessment of alcohol problems, by alcoholism counselors, by persons conducting court sponsored driver improvement clinics if in the judgment of the court such persons have the required knowledge and skills in the assessment of

alcohol problems, by appropriate staff members of public or private alcohol treatment programs and agencies or mental health clinics, by court approved volunteer workers such as members of Alcoholics Anonymous, or by such other qualified persons as the court may direct. The commissioner of public safety shall provide the courts with information and assistance in establishing alcohol problem assessment programs suited to the needs of the area served by each court. The commissioner shall consult with the alcohol and other drug abuse section in the department of public welfare and with local community mental health boards in providing such information and assistance to the courts. The commissioner of public safety shall promulgate rules and standards, consistent with this subdivision, for reimbursement under the provisions of subdivision 3. The promulgation of such rules and standards shall not be subject to chapter 15.

Subd. 3. The cost of alcohol problem assessment outlined in this section shall be borne by the county. Upon application by the county to the commissioner of public safety, the commissioner shall reimburse the county up to 50 percent of the cost of each alcohol problem assessment not to exceed $25 in each case. Payments shall be made annually and prorated if insufficient funds are appropriated.

History: *1976 c 298 s 1; 1978 c 727 s 4*

169.125 COUNTY COOPERATION.

County boards may enter into an agreement to establish a regional alcohol problem assessment alcohol safety program. County boards may contract with other counties and agencies for alcohol problem assessment services.

History: *1976 c 298 s 3; 1978 c 727 s 5*

169.126 ALCOHOL PROBLEM ASSESSMENT

Subdivision 1. An alcohol problem assessment shall be conducted in counties of more than 10,000 population and an assessment report submitted to the court by the county agency administering the alcohol safety counseling program when:

(a) The defendant is convicted of an offense described in section 169.121; or

(b) The defendant is arrested for committing an offense described in section 169.121, is not convicted therefor, but is convicted of another offense arising out of the circumstances surrounding such arrest.

Subd. 2. The assessment report shall contain an evaluation of the convicted defendant concerning his prior traffic record, characteristics and history of alcohol problems, and amenability to rehabilitation through the alcohol safety program. The assessment report shall include a recommendation as to a treatment or rehabilitation program for the defendant. The assessment report shall be classified as private data on individuals as defined in section 15.162, subdivision 5a.

Subd. 3. The assessment report required by this section shall be prepared by a person knowledgeable in diagnosis of chemical dependency.

Subd. 4. The court shall give due consideration to the agency's assessment report.

Subd. 5. Whenever a person is convicted of a second or subsequent offense described in subdivision 1 and the court is either provided with an appropriate treatment or rehabilitation recommendation from sources other than the alcohol problem assessment provided for in this section, or has sufficient knowledge both of the person's need for treatment and an appropriate treatment or rehabilitation plan, and the court finds that requiring an alcohol problem assessment would not substantially aid the court in sentencing, such an alcohol problem assessment need not be conducted.

Subd. 6. This section shall not apply to persons who are not residents of the state of Minnesota at the time of the offense and at the time of the alcohol problem assessment.

History: *1976 c 298 s 4; 1978 c 727 s 6*

169.1261 REINSTATEMENT OF DRIVING PRIVILEGES; NOTICE.

Upon expiration of any period of revocation under section 169.121 or 169.123, the commissioner of public safety shall notify the person of the terms upon which his driving privileges can be reinstated, which terms are: (1) successful completion of a driving test and proof of compliance with any terms of alcohol treatment or counseling previously prescribed, if any; and (2) any other requirements imposed by the commissioner and applicable to that particular case. The commissioner shall also notify the person that if driving is resumed without reinstatement of driving privileges, the person will be subject to criminal penalties.

History: *1978 c 727 s 7*

169.127 [Repealed, 1978 c 727 s 11]

169.128 RULES OF THE COMMISSIONER OF PUBLIC SAFETY.

The commissioner of public safety may promulgate rules to carry out the provisions of sections 169.121 and 169.123. The rules may include forms for notice of intention to revoke, which shall describe clearly the right to a hearing, the procedure for requesting a hearing, and the consequences of failure to request a hearing; forms for revocation and notice of reinstatement of driving privileges as provided in section 169.1261; and forms for temporary licenses.

Rules promulgated pursuant to this section are exempt from the procedure required by sections 15.0411 to 15.052.

History: *1978 c 727 s 8*

169.129 AGGRAVATED VIOLATIONS; PENALTY.

Any person who drives, operates, or is in physical control of a motor vehicle, the operation of which requires a driver's license, within this state in violation of section 169.121 or an ordinance in conformity therewith before his driver's license or driver's privilege has been reinstated following its cancellation, suspension or revocation (1) because he drove, operated, or was in physical control of a motor vehicle while under the influence of alcohol or a controlled substance or while he had an alcohol concentration of 0.10 or more or (2) because he refused to take a test which determines the presence of alcohol or a controlled substance when requested to do so by a proper authority, is guilty of a gross misdemeanor. Jurisdiction over prosecutions under this section is in the district court.

History: *1978 c 727 s 9*

169.13 RECKLESS OR CARELESS DRIVING.

Subdivision 1. Any person who drives any vehicle in such a manner as to indicate either a wilful or a wanton disregard for the safety of persons or property is guilty of reckless driving and such reckless driving is a misdemeanor.

Subd. 2. Any person who shall operate or halt any vehicle upon any street or highway carelessly or heedlessly in disregard of the rights or the safety of others, is guilty of a misdemeanor.

Subd. 3. **Application.** The provisions of this section apply, but are not limited in application, to any person who drives any vehicle in the manner prohibited by this section upon the ice of any lake, stream, or river, including but not limited to the ice of any boundary water.

1981 Legislative Session

Note: The only change in the text of the Minnesota statutes relating to drinking and driving was to prohibit the court from staying the revocation of the driver's license. The text of the change is found in Laws 1981, Chapter 9 as follows:

DRIVER'S LICENSE—REVOCATION—STAY BY COURT

CHAPTER 9

S.F.No. 13

An Act relating to crimes; eliminating the power of a sentencing court to stay the revocation of the driver's licenses of a person convicted of driving, operating or being in physical control of a motor vehicle while under the influence of alcohol or controlled substances or a combination thereof; amending Minnesota Statutes 1980, Sections 169.121, Subdivision 5; and 609.135, Subdivision 1.

Be it enacted by the Legislature of the State of Minnesota:

Section 1. Minnesota Statutes 1980, Section 169.121, Subdivision 5, is amended to read:

Subd. 5. The court may stay imposition or execution of any sentence authorized by subdivision 3 or 4, except the revocation of the driver's license, on the condition that the convicted person submit to treatment by a public or private institution or a facility providing rehabilitation for chemical dependency licensed by the department of public welfare. A stay of imposition or execution shall be in the manner provided in section 609.135. The court shall report to the commissioner of public safety any stay of imposition or execution of sentence granted under the provisions of this section.

Sec. 2. Minnesota Statutes 1980, Section 609.135, Subdivision 1, is amended to read:

Subdivision 1. Except when a sentence of life imprisonment is required by law, or when a person is convicted of one of the crimes specified under section 609.11, subdivision 1, and had in his possession a firearm or used another dangerous weapon, any court, including a justice of the peace to the extent otherwise authorized by law, may stay imposition or execution of sentence and place the defendant on probation with or without supervision and on such terms as the court may prescribe, including restitution when practicable. The court may order the supervision to be under the probation officer of the court, or, if there is none and the conviction is for a felony, by the commissioner of corrections, or in any case by some other suitable and consenting person.

A court may not stay the revocation of the driver's license of a person convicted of violating the provisions of section 169.121.

Sec. 3. Effective date.

This act is effective the day following its final enactment and applies to offenses committed after that date.

Approved March 25, 1981.

Underscoring and strikeouts are as shown in enrolled act.

*** The lower number in 1976 is attributable to the decision of the Minnesota Supreme Court in Prideaux v. Department of Public Safety, 247 N.W.2d 385 (1976), which held that a driver had a right to counsel when submitting to a chemical test for intoxication. It caused the dismissal of a number of pending cases. Also, there was a loss of ASAP money to pay officers for overtime work.

NOTICE OF REVOCATION

You are hereby notified that on the date shown above (*date issued) you were asked to submit to a chemical test to determine the alcohol concentration of your blood pursuant to M.S. 169.123, the Implied Consent Law.

☐ Because you refused to submit to testing, the Commissioner of Public Safety will revoke your driver license and/or driving privileges for six months, unless you request a hearing as indicated on the other side of this notice.

☐ Because you submitted to a breath test which disclosed an alcohol concentration of 0.10 or more, the Commissioner of Public Safety will revoke your driver license and/or driving privileges for 90 days unless you request a hearing as indicated on the other side of this notice. Results of breath test indicated _____ blood alcohol concentration.

This revocation will take effect 30 days after the (*date issued) shown above.

ORDER OF REVOCATION

☑ If the Commissioner of Public Safety does not receive a request for hearing within 30 days or a certificate of conviction reporting plea of guilty to the related charges of violating M.S. 169.121 (DWI), your driver license and/or privilege to drive in this state is hereby REVOKED. THIS IS YOUR OFFICIAL NOTICE OF THE REVOCATION. If a hearing request is received within 30 days, the revocation will be postponed until a final judicial determination resulting in a decision adverse to you.

SURRENDER OF DRIVER LICENSE

By law, the officer is required to take all license certificates in your possession, and if you have a valid license, issue a temporary license effective only for 30 days.

TEMPORARY LICENSE

This entire notice is valid as a temporary license from (*date issued) shown above for 30 days. NOT VALID IF DETACHED. If hearing requested, additional temporary license can only be obtained from Driver Evaluation Section, Driver & Vehicle Services Division. SEE REVERSE SIDE FOR ADDRESS. Temporary license valid only if record so indicates.

Licensee Height: _____ Weight: _____ Class: _____

Restriction: _____

☐ No temporary license issued because _____

AFFIDAVIT OF LOST DRIVER LICENSE

I have lost or destroyed my license. I promise that if it is found I will immediately forward it to the Driver License Office, 108 Transportation Building, St. Paul, Mn. 55155. I fully realize that in making this affidavit, the license certificate is rendered null and void and may not be used for operating a motor vehicle.

Date _____ Signature of Licensee _____

Signed: _____ Signature of Peace Officer

_____ Telephone Number

WHITE COPY TO DRIVER

REQUEST FOR HEARING – PROCEDURES AND INFORMATION

You have the right to request a hearing. Hearing requests must be received within 30 days. Request must be in writing, and directed to the Commissioner of Public Safety, Driver & Vehicle Services Division, 108 Transportation Building, St. Paul, Minnesota 55155. The Hearing would cover the issues of:

a. Whether the peace officer had reasonable and probable grounds to believe that you were driving, operating or in physical control of a motor vehicle while under the influence of alcohol or a controlled substance.

b. Whether you were lawfully placed under arrest for violation of Section 169.121, or were involved in a motor vehicle accident or collision resulting in property damage, personal injury or death, or refused to take screening test provided in Section 169.121, or took screening test and failed.

c. Whether you were advised of your rights and responsibilities under the law.

d. Whether you refused the test, or whether you submitted to testing which was properly conducted and showed an alcohol concentration of 0.10 or more.

GENERAL INFORMATION

If your license is revoked, you may not drive again in Minnesota under any condition including using a driver license from another jurisdiction until you have complied with Minnesota's requirements and received a notice of reinstatement. ANY ADDITIONAL TEMPORARY LICENSES CAN ONLY BE ISSUED BY DRIVER EVALUATION SECTION, DEPARTMENT OF PUBLIC SAFETY.

REINSTATEMENT INFORMATION

You may not drive in Minnesota until:

a. The expiration of the period of time designated on the front side of this notice or expiration of additional period of time as indicated in correspondence from Driver & Vehicle Services Division, and

b. You have successfully completed a re-examination, and paid $2.50 fee if required and

c. Prior to reinstatement of your privilege to drive in the State of Minnesota, you must submit proof of an alcohol problem assessment. This is an assessment interview relative to your use of alcohol. If this assessment was done by the court (termed a presentence investigation) you can submit a copy of that assessment to this office. If no assessment was done by the court, you must schedule an assessment interview with our office.

Assessment Scheduling (612) 296-2040
Assessment Information (612) 296-8599

d. You have made application for and have received new license, and

e. Received a notice of reinstatement.

f. If you are not a resident of Minnesota, you will receive a notice of reinstatement only.

LIMITED LICENSE INFORMATION

If this is the first time your license has been withdrawn, you may be eligible for a limited license.

▶ Any additional information may be obtained by writing Driver Evaluation Section, Driver & Vehicle Services Division, Room 108 Transportation Building, St. Paul, Minnesota 55155 or by telephone at (612) 296-2025.

IMPLIED CONSENT ADVISORY

▶INSTRUCTIONS: To be used to request the test and to record the individual's responses. Complete both sides of this form.

Printed Name of Officer Requesting Test			Badge Number	ICR Number
Date	Time Reading Started	Time Reading Completed	Location Where Advisory Read	

I believe that you have been driving, operating or controlling a motor vehicle while under the influence of alcohol or a controlled substance.

Printed Name of Individual Being Advised

In addition: (X all applicable grounds)

☐ You have been placed under arrest for this offense.

☐ You have been involved in a motor vehicle accident or collision resulting in property damage, personal injury or death.

☐ You have refused to take the preliminary screening test authorized by law and requested of you.

☐ A preliminary screening test has been administered to you, and has shown your alcohol concentration to be .10 or more.

I request that you give a sample of your blood for testing to determine the presence of alcohol or controlled substance. This sample would be taken by a qualified person at:

Hospital or Other Location (PRINT)

If you do not wish to give a blood sample, I request you give a sample of your: ☐ Breath ☐ Urine

The sample would be taken at: Name of Facility (PRINT)

The sample would be taken by: Name of Person Obtaining Sample (PRINT)

If you refuse to provide the test sample, your right to drive will be revoked for six months. If you refuse to answer or make a decision, it will be considered a refusal to take the test.

If you provide the test sample, and if the results indicate that you are under the influence of alcohol or a controlled substance, you will be subject to criminal penalties, and your right to drive may be revoked for 90 days.

If you provide the test sample, you have the right to have additional tests made by a person of your choice. Any additional test must be at your own expense. It must be taken while still in custody. You will be permitted to contact any person you choose to arrange for any additional test.

You have the right to consult with an attorney. If you wish to do so, a telephone will be made available to you. If you are unable to contact an attorney, you must make the decision on your own. You must make your decision within a reasonable time.

APPENDIX IV

Minnesota Drunken Driving Apprehensions, Arrests, Criminal Charges, Convictions and Driver License Revocations - and the differences between them.

by Mr. Forst Lowery, Alcohol Program Coordinator, Office of Traffic Safety, Minnesota Department of Public Safety,
July 31, 1981

Minnesota has a two-track system of acting against drunken drivers. One is the conventional criminal justice procedure in which a driver is arrested, charged with a violation of M.S. 169.121 (drunken driving), and if convicted is penalized by a fine or jail. The other track involves the unique-to-Minnesota law within M.S. 169.123 (implied consent) which provides for administrative revocation of the driver license when a test shows .10 alcohol concentration or higher. Most accused drivers go down both tracks. This results in an extremely high ratio of penalties imposed on apprehended drunken drivers. Indeed, this ratio is the highest in the country.

In discussing this subject, however, some caveats should be noted. The high rate of drunken driving cases resulting in a penalty should not be called a "conviction rate" even though in many ways it is the equivalent.

Likewise, an "apprehension" is not necessarily the same thing as an "arrest". All arrests result from apprehensions, but not all apprehensions result in an arrest. In a similar way, not all arrests result in a criminal charge of drunken driving (169.121) even though the arrested person may be subject to, and receive, penalties under 169.123 for either refusing a test or failing a test.

The statistical information on the following pages describes the driver license revocations resulting from drinking and driving offenses. Notes are to clarify precisely what is conveyed and to warn against misinterpretation.

A. APPREHENSIONS (Minimum number; plus cases described below) 28,429

The figure shown here (28,429) is actually the number of "Peace Officer's Certificates" received by the Department of Public Safety (DPS). These report that a person either (a.) refused to take a test, or (b.) took a test and the result showed .10 alcohol concentration or more. This report is required by M.S. 169.123, often called the Implied Consent Law. In addition to the apprehensions included in the above figure there are some additional drinking driver apprehensions which should be included in order to provide a total, but their actual numbers are unknown. These are made up of those cases in which (a.) a test was not requested but an arrest was made on other evidence, or (b.) a test showed less than .10 but an arrest was made. Both situations are perfectly proper under Minnesota law, but the number of such cases is unknown. They are included, however, within (D.) below, "Drunken Driving Criminal Charges". Items (B.) and (C.) below break out the two variations of the "Peace Officer's Certificate" which make up the 28,429 total figure shown above, (See Figure 1.)

B. REPORTS TO DPS OF REFUSALS TO TAKE TEST 6,649

C. REPORTS TO DPS OF TEST RESULTS SHOWING .10 21,780

D. DRUNKEN DRIVING CRIMINAL CHARGES (M.S. 169.121) 22,788

This figure is the number of "arrests" reported to Minnesota Criminal Justice Information System when a 169.121 charge is placed. All of these cases would be included within the number of "Apprehensions" (item A. above) except those in which a test was not requested or in which a lower than .10 alcohol contentration was shown, as described above. "Apprehensions" includes, however, those cases in which a "Peace Officer's Certificate" was filed but a criminal charge was not, and therefore these cases are not included in the 22,788 figure for item D., Criminal Charges (169.121). (See Figure 1.)

DRIVER LICENSE REVOCATIONS (ALCOHOL)

The three principal kinds of driver license revocations associated with drunken driving are shown below, together with some notes on how they mesh and how they do not overlap except in rare circumstances. They are shown in descending order of their numbers, beginning with conventional revocations resulting from a court conviction. This is not necessarily the chronological order in which action against the driver license is taken, and as we note below, the chronological order of such actions is important.

E. REVOCATIONS FOR CONVICTION OF 169.121 (Minimum 30 days) 17,406

It should be emphasized that this figure does not represent the total number of convictions for drunken driving. It is the number of revocations resulting from a 169.121 conviction. Those persons convicted under 169.121 whose driver license has already been revoked under one of the provisions of 169.123 do not get another revocation and are not included in the 17,406 figure. Further discussion below.

F. REVOCATION FOR TEST RESULT SHOWING .10 (Ninety days) 9,212

G. REVOCATION FOR REFUSING TO TAKE TEST (Six months) 3,863

Note that a person may purge himself or herself of eligibilty for this revocation by pleading guilty to the criminal charge under 169.121 at the first opportunity. Many do. This does not apply if there is first a not-guilty plea, even if there is a subsequent conviction.

H. TOTAL REVOCATIONS FOR CONVICTION OR TEST FAIL (E + F) 26,618

I. TOTAL ALL THREE KINDS ALCOHOL-RELATED REVOCATIONS (E + F + G) 30,481

This figure included an unknown number of revocations for test refusal (G.) where the person was not convicted of 169.121 (E.) Note also that the unknown number of persons charged for 169.121 but not offered a test would increase total number of "Apprehensions" above the minimum figure (28,429) shown in (A.)

RATIOS OF REVOCATIONS TO NUMBER OF CASES

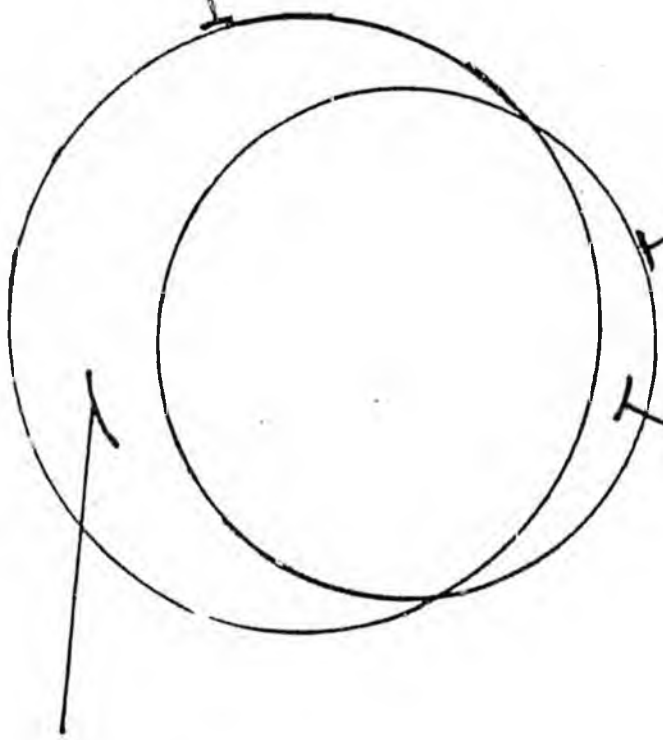
J. APPROX. PERCENT OF APPREHENDED DRIVERS RECEIVING REVOCATION 93.6%

Number of revocations for conviction plus number of revocations for failing test (.10) divided by the minimum number of apprehensions. $(\frac{H}{A})$

K. PERCENT OF KNOWN APPREHENSIONS RESULTING IN A REVOCATION 107.2%

Total of all three kinds of alcohol-related driver license revocations divided by minimum number of apprehensions. $(\frac{I}{A})$

The apparent anomaly of a greater-than-100% figure is the result, again, of there being a somewhat higher number of actual apprehensions than will be shown by "Peace Officer's Certificate" reports. See note under (1.) above. In addition, there may be some cases in which a license may be revoked for conviction under 169.121 while proceedings under 169.123 are still under way. In this kind of case, while Minnesota law says there shall be no mandatory revocation under 169.121 if the license has been revoked under 169.123, the opposite is not true. It is possible to revoke for test refusal if that proceeding should happen to come after revocation for conviction, or even after the conviction revocation period of 30 days, for example, has been completed. This is not likely. Neither is it likely that a person would receive an administrative revocation for failing the test if that person has already



received a revocation for a conviction. These possibilities are described to show that in a two-track system like Minnesota's, with drinking drivers going down both tracks, the problems are with statistical meshing, rather than with actual clashing of the gears. (See Figure 2.)

In point of fact, Minnesota draws a pretty tight net around the drunken drivers who are apprehended and there are not very many holes in that net.

Figure 1.

APPREHENSIONS (Not necessarily with arrest)
("Peace Officer's Certificates" filed with DPS)

28,429

Arrests resulting in criminal charge of DWI

22,788

a. Arrests without a test request,

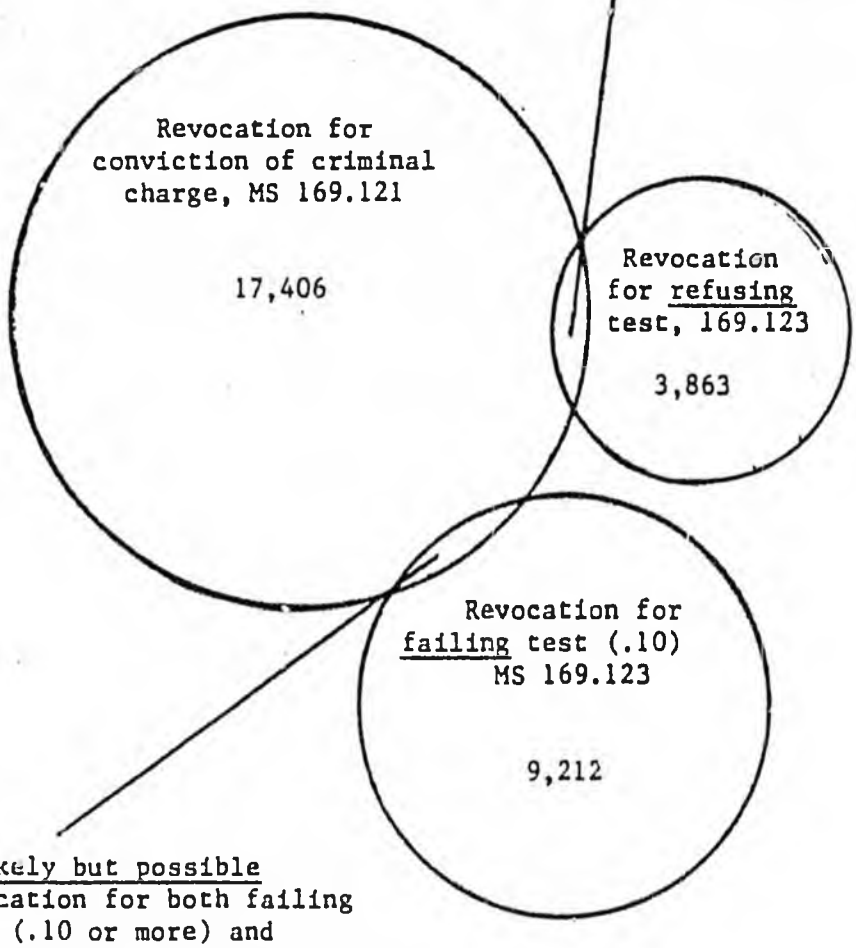
or

b. Arrests when test result was below .10

Numbers unknown

a, Refused test but DWI charge not made,

or



b. Failed test (.10 or more) but DWI charge not made

(Most of both "a" and "b" above are probably accident scene cases, where officer did not witness and probable cause for an arrest was less than the best.

Some of "b" may result from individual prosecutor policy on charging DWI.)

Numbers unknown

The three principal kinds of alcohol-related driver license revocations
1980

Unlikely but possible revocation for both refusal of test and conviction of charge.

Unknown number, if any.

Unlikely but possible revocation for both failing test (.10 or more) and conviction of criminal charge.

Unknown number, if any.

Figure 2.

ACCIDENTS IN ALASKA

In 1975, alcohol-related highway accidents cost $19.5 million.

In 1977, 62 Alaskans died in alcohol-related highway accidents. About 80% of highway fatalities in Anchorage are alcohol-related.

OMVI ARRESTS IN ALASKA

The drivers being arrested are very heavy drinkers - had to have had ten drinks in an hour to reach the blood alcohol levels recorded. Most have so much alcohol in their system that they are still drunk when they go to work the next day.

Most people never drink enough to reach the illegal BAC level. Most people arrested for OMVI regularly drink large amounts.

At most one out of four arrested for OMVI are "normal" drinkers who have had too much just this night. The rest are used to drinking and driving - in fact one out of three people arrested for OMVI has previously been convicted.

Few of the arrests for OMVI are borderline cases - the average blood alcohol concentration is twice the level proscribed by law.

REASONS FOR RECOMMENDED STATUTORY CHANGES SB 608, 609, 610

PARTLY DONE a. Clean up statutes so that courts can spend time on real evidence instead of legal technicalities.

PRESENT b. OMVI arrests are expected to increase by as much as 50% in the near future.

PARTLY DONE c. Either help the courts by changing the statutes or by providing money for more courtrooms, judges, prosecutors.

d. OMVI arrests - largest single category of arrests and court caseload - 22% of all adult arrests; 28% of caseload of the misdemeanor courts; 50% of the trial time spent by the courts.

e. Changes will not stop drinking-driving but will help us handle the problem through the courts.

BEING WORKED ON f. We have definite evidence that the people who refuse breath-tests tend to be the most drunken and the most dangerous drivers - really experienced drinkers (average BAC: 0.27%). We are not helping them by keeping it easy to avoid the evidence of their dangerousness.

g. Using the traditional psychomotor tests, even experienced police are right only one out of two times about how drunk a person is - blood alcohol concentration (BAC) is objective and fair evidence, rather than just an opinion.

SB 551, 552

REASON FOR ALCOHOL SCREENING

KELSO'S JOB ON A STATEWIDE BASIS

a. Trying to separate the people out so that we can do what's right by the person who just has an attitude probelm, by the bad drivers, and by the alcoholics.

b. Trying to get an early identification of problem drinkers so that they can be encouraged to get help before they are far gone.

c. Trying to standardize court practices throughout the state.

PROBLEM DRINKING DRIVERS

1. The Problem Drinking Driver is someone who *regularly* drives while seriously impaired.

2. In the typical jurisdiction, about two-thirds of persons arrested for DWI are identifiable as Problem Drinkers, either clearly or marginally.

3. Problem Drinking Drivers usually have a high BAC (0.15 percent or above) when arrested. Of course, the BAC on any occasion may be lower.

4. Drivers with a high BAC (0.10 percent or above) are likely to be involved in at least

   - Twice as many crashes
   - Twice as many property damage crashes
   - Five times as many personal injury crashes
   - Twelve times as many fatal crashes
   - Twice as many traffic violations
   - Three times as many license suspensions

   as the average driver.

5. Social Drinkers rarely achieve the high BAC (0.10 percent or above) which problem drinkers achieve very often.

6. A person can learn to "drive while drunk" i.e., to compensate partially for the impairment caused by alcohol up to a point. The learning takes a lot of practice.

   Social Drinkers don't get that much practice. They are likely to judge themselves "too drunk to drive," or to drive very badly at lower BACs.

   Therefore, a person who drives reasonably well at a high BAC, or who can drive at all at a very high BAC (0.20 percent or above), is likely to be a Problem Drinker.

7. Problem Drinking Drivers tend to lead troubled lives, as is shown in:

   - The probability of their having previous and subsequent DWI arrests.
   - The frequency of their contacts with social agencies.
   - Their emotional profiles.
   - The frequency of their family and economic problems.

   This makes it possible to identify them by record checks and personality tests.

REALISTIC EXPECTATIONS

Problem Drinkers:

Regardless of what we do with problem drinkers, approximately 1 of 5 will be re-arrested for a drinking-driving offense within one year, 2 of 5 in three years.

Social Drinkers:

Without rehabilitation, 3 of 10 social drinkers will be re-arrested within three years. However, only 2 of 10 entering rehabilitation of some type will be re-arrested.

FACTS ON ALCOHOL AND HIGHWAY SAFETY

The Problem

Overview:

Drunk driving continues to be one of our nation's most serious public health and safety problems. Some 50 percent of all drivers killed each year have blood alcohol concentrations in excess of the legal limit, 0.10 percent. In single vehicle fatal crashes, where it is more certain who is at fault, upwards of 65 percent of those drivers who die were legally drunk. Over the past 10 years, the proportion of highway deaths involving alcohol has averaged a tragic 25,000 per year. Thus, a staggering one quarter of a million Americans have lost their lives in alcohol-related crashes in the last decade.

The cost of drunk driving has a high economic cost to this country as well. A conservative estimate of the total economic cost of drunk driving is put at 24 billion.

Alcohol and Crashes:

Alcohol is a major contributing factor to fatal (and serious injury) automobile crashes. According to a 1978 review of the literature, approximately 60 percent of fatal crashes involved a driver who had been drinking. Between 40 and 55 percent of such crashes involved a driver who had a blood alcohol concentration (BAC) greater than .10 percent (w/v).

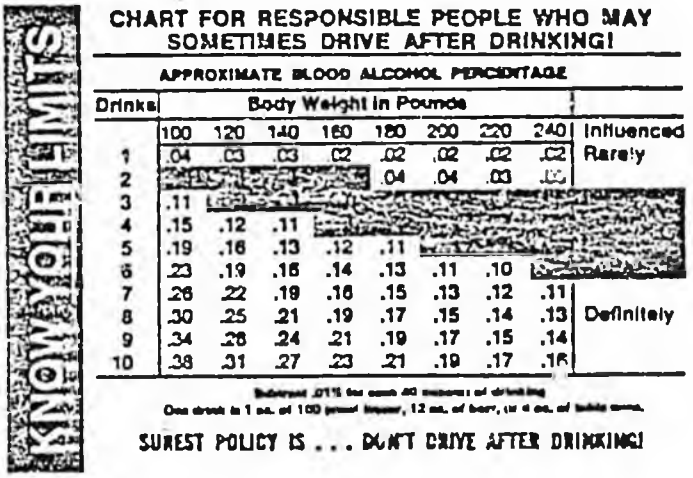
With regard to alcohol and responsibility for fatal crashes, the drinking driver problem is even more significant. In one study drivers judged to be at fault in fatal crashes were six times more likely to have had BAC's greater than .10 percent (w/v) alcohol in their blood than drivers judged not at fault for their crashes (60 percent vs. 10 percent).

This strong relationship between crash responsibility and high alcohol levels is shown further in single vehicle crashes, where responsibility is apparent, and where between 60 and 75 percent (60-75%) of dead drivers have BACs greater than .10 percent (w/v).

The Driver Population:

What the high BAC figures in crashes suggest is that the majority of alcohol related fatal crashes are caused by heavy (problem) drinkers. Some portion of the approximately 15 percent of fatal crashes which involve drivers who have been drinking, but who do not have BACs greater than .10 percent, may be caused by less heavy, less chronic, "social" drinkers.

The majority of drivers are either abstainers or light to moderate (social) drinkers. Even quite liberal estimates suggest that only about 10 to 15 percent of the nation's drivers would be classified as being heavy (problem) drinkers.



Arrested Drunk Drivers:

The average proportion of licenses drivers arrested for drunk driving over a one-year period is estimated to be one percent (1%). This translates to approximately 1.3 million of approximately 130 million licensed drivers.

On a nightly basis, between one in five hundred (1/500) and one in two thousand (1/2000) drivers on the road with a BAC greater than .10 percent (w/v) are arrested for drunk driving. These estimates come from a number of roadside surveys conducted in conjunction with the Alcohol Safety Action Projects (ASAPs) funded by the NHTSA in the 1970's and from the Grand Rapids data reported by Borkenstein and others.

The average BAC of these drinking drivers is approximately .20 percent, double the level for persumed intoxication. Estimating an average period of alcohol consumption at 4-5 hours, this means that the average fatally injured drinking driver had about 15 drinks prior to becoming involved in the crash.

Subtract .01% for each 40 minutes of drinking

One drink is 1 oz. of 100 proof liquor, 12 oz. of beer, or 4 oz. of table wine.

SUREST POLICY IS . . . DON'T DRIVE AFTER DRINKING!

Past Approaches and Current Activities

Federal Action:

Over the last 12 years, the National Highway Traffic Safety Administration (NHTSA), an Agency within the U.S. Department of Transportation, has worked with the States to reduce alcohol related deaths on the highway. NHTSA initiated 35 Alcohol Safety Action Projects (ASAPs) throughout the country from 1971-1976 which resulted in the development of a coordinated systematic approach to deal with drunk driving.

In 12 of the 35 ASAPs, a statistically significant reduction in fatal crashes at night was achieved. Individual projects were able to double, and even triple driving while intoxicated arrests, using such new technology as roadside breath testing. Court procedures were streamlined to handle large caseloads. Roughly a quarter-of-a-million drinking drivers were referred for treatment.

Before the passage of the Highway Safety Act of 1966, few States specified a presumptive level of driving while intoxicated. The Federal standard for alcohol safety prescribed the 0.10 percent blood level that legally defines the legal intoxication limit. Now all the States have laws defining driving under the influence at the 0.10 percent level. The majority of the States now have made some improvements in their law enforcement, court, rehabilitation, and educational efforts.

State Action

Under the Section 402 grant program established by the Highway Safety Act the States are increasing the proportion of funds allocated to alcohol programs. In FY 1982 approximately 35 percent of 402 funds ($27.8 of 78.6 million) were allocated to drunk driving programs (with an added 30 percent spent on alcohol enforcement activities under Police Traffic Services).

Responding to citizen interest, 21 States and a number of local jurisdictions have established special drunk driving task forces to revitalize State/local programs.

Fifteen States have raised the minimum legal drinking age to reduce alcohol related crashes among youth. Other States such as Maryland have introduced legislation to raise the drinking age during 1982.

Sixteen States have adopted statutes allowing preliminary roadside breath testing to assist officers in establishing probable cause for drunk driving arrests.

Twenty-one States have established illegal per se statutes designed to simplify and streamline the prosecution of drunk drivers by making it illegal simply to operate a motor vehicle with an illegal blood alcohol concentration (above 0.10%).

S. J. Res. 241

Ninety-seventh Congress of the United States of Ameri

AT THE SECOND SESSION

Begun and held at the City of Washington on Monday, the twenty-fifth day of January, one thousand nine hundred and eighty-two

Joint Resolution

To provide for the designation of the week of December 12, 1982, through December 18, 1982, as "National Drunk and Drugged Driving Awareness Week".

Whereas traffic accidents cause more violent deaths in the United States than any other cause, over fifty thousand in 1980;

Whereas traffic accidents also play a substantial role in serious injuries in this country;

Whereas between 40 and 55 per centum of drivers who are fatally injured have alcohol concentrations in their blood above the legal limit and this figure rises to 55 to 65 per centum in single vehicle crashes;

Whereas the total societal cost of drunk dri[illegible]has been estimated anywhere from $5,000,000,000 to $25,000,0[illegible]0 a year, which does not include the human suffering that ca[illegible]er be measured;

Whereas there are increasing reports of dri[illegible]ter drug use and accidents involving drivers who have used marihuana or other illegal drugs;

Whereas more research is needed on the effects of drugs on driving ability and their impact on the incidence of traffic accidents, either alone or in combination with alcohol;

Whereas an increased public awareness of the gravity of the problem of drugged driving may warn drug users to refrain from driving and may stimulate interest in increased research on the effects of drugs on driving ability and the incidence of traffic accidents;

Whereas the public, particularly through the work of citizens groups such as Mothers Against Drunk Driving (MADD) and Remove Intoxicated Drivers (RID), is demanding a solution to the problem of drunk driving;

Whereas the President has appointed a Commission on Drunk Driving to heighten public awareness and stimulate the pursuit of solutions;

Whereas many States have appointed task forces to examine the existing drunk driving program and make recommendations for a renewed, comprehensive approach;

Whereas an increase in the national awareness of the problem of drunk and drugged driving may help to sustain current efforts to develop comprehensive solutions at the State and local levels; and

Whereas the Christmas and New Year's holiday period, with more drivers on the roads and an increased number of social functions, is a particularly appropriate time to focus national attention on this critical problem: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of December 12, 1982, through December 18, 1982, is designated as "National Drunk and Drugged Driving Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate activities.

Speaker of the House of Representatives.

Vice President of the United States and President of the Senate.

DRUNK DRIVING FACTS

- A blood alcohol concentration (BAC) of .10 percent or greater is the level at which a driver is considered legally intoxicated in most states.

- Approximately 55 percent of fatal crashes involve a driver who has been drinking.

- In single vehicle crashes, where responsibility is apparent, between 60 and 75 percent of dead drivers have BACs greater than .10 percent.

- The average BAC of drivers arrested for drunk driving is approximately .20 percent, double the level for presumed intoxication.

- Over the past 10 years, the proportion of highway deaths involving alcohol has averaged 25,000 per year; one quarter of a million Americans have lost their lives in alcohol-related crashes in the last decade.

- A conservative estimate of the total economic cost of drunk driving is put at between five and six billion dollars a year.

Post 12/30/82

Nation's War on Drunk Driving Is Paying Off in a Big Way

States Pass Tougher Laws, Step Up Their Enforcement

By Howard Kurtz
Washington Post Staff Writer

From Maine, where tougher penalties have cut the number of car accidents by 41 percent, to Florida, where 30 fewer people are dying each month on the highways, a nationwide campaign is making unprecedented progress against drunken driving.

For the first time in many holiday seasons, the dominant news is not the usual increase in highway deaths, but increasingly successful new laws and enforcement efforts to keep drunk drivers off the road. In the most aggressive jurisdictions, including the Washington area, fewer people are dying in auto accidents.

Legislatures in 18 states, including Maryland and Virginia, passed tougher drunk driving laws this year, and similar bills are pending in 14 states. Maryland and New Jersey joined 23 other states in raising their drinking age to 21 for most alcoholic beverages, reversing the trend of the early 1970s toward a lower drinking age.

A growing number of states are resorting to mandatory jail terms, stiffer fines, more frequent arrests and highway checkpoints. Congress recently voted to provide $125 million in grants to states that act aggressively against drunken drivers.

See DRIVING, A6, Col. 3

Anti-Drunk-Driving Effort Gains

DRIVING, From A1

The crackdown has not been as successful in some places. Minnesota officials, for example, say most offenders know the police do not have enough manpower to arrest more than one drunken driver in 300. Fatalities in California, which initially dropped by 42 percent after stricter penalties were adopted last January, have rebounded almost to 1981 levels.

There were 49,125 traffic deaths in the United States last year, about half related to alcohol. The effort to reduce these casualties has been spurred by the friends and relatives of accident victims and citizens' groups such as Mothers Against Drunk Driving.

Arizona legislators needed no such prodding. They voted overwhelmingly for stricter penalties after one of their colleagues, Sister Clare Dunn, 46, and another nun were killed by a drunken driver. Around the same time, a drunken man in Arizona crashed into a car full of boy scouts, killing several.

Since July, a first conviction for drunken driving in Arizona has cost a minimum of 24 hours in jail, a $250 fine and a 90-day license suspension. A second offense carries at least a 60-day jail term, and a third conviction can bring as much as 2½ years in prison.

In Maine, half of last year's traffic deaths were rural, single-car crashes, which state police spokesman Kirk Moore described as "a person driving down the road and banging into a tree." Four-fifths of the victims had been drinking, and half were men in their twenties.

The state legislature responded in September 1981 by setting a minimum $250 fine and a 45-day license suspension for a first drunken driving offense. If criminal charges are filed, it means at least 48 hours in jail. Refusal to take an alcohol test is punished by a six-month license suspension.

The result: 150 people have been killed in highway crashes this year, compared with 199 in the same period last year.

"It's a very tight law," Moore said. "People have to be prosecuted. You can't plea bargain down to reckless driving. There haven't been more arrests, so it's really the deterrence of the law. People are now thinking twice about having that extra drink."

Maine police have compiled a profile of the typical driver involved in a fatal accident: a single or divorced man in his 20s, a heavy beer drinker, driving an older-model car sometime after 10 p.m. on weekends.

Florida now requires first offenders to perform 50 hours of community service, sometimes in hospital emergency rooms where many accident victims are taken. Along with a 50-percent increase in arrests, these penalties have helped reduce this year's traffic deaths by 12 percent to 2,659, or 371 fewer than in 1981.

Maryland, which recently stopped 1,500 drivers during the first weekend of "sobriety checkpoints," has been the most aggressive enforcer of drunken driving laws. Its police expect to make 32,000 arrests this year for driving while intoxicated, compared with 15,575 in 1980.

While traffic deaths not related to drinking have decreased by only 3 to 4 percent from last year in Maryland, alcohol-related deaths have dropped 29 percent to bring the state's highway death toll down to its lowest level in 19 years. "We know in our hearts and in our statistic books that the crackdown in Maryland is really working," said state police spokesman Bill Clark.

The problem in Minnesota was that a driver whose license was revoked was allowed to stay on the road for a month or more as his case dragged on through appeals. Under a law passed this year, the offender's license is now revoked within seven days.

But public safety official Forst Lowery says the odds are still against the police. "Say a dog brings 300 of his friends into a room, they all dirty the carpet and we only punish one," Lowry said. "We have to make many more arrests before a deterrent is established."

Some officials say the key element is the certainty of punishment. New York, for example, has no mandatory jail term for drunken driving, but a new law requires judges to impose a $350 fine and revoke the offender's license for six months. Fatal night crashes in New York are down 17 percent.

"You can't plead to speeding or bald tires or something anymore," said Marcus Salm, New York's assistant director of highway safety. "We had a lot of guys who would say, 'Look, if you charge me with drunken driving, my wife will leave me and I'll lose my job, and besides, I've got a good lawyer.' "

Still, Salm acknowledged, "There are ways of getting around the mandatory penalties. Judges don't like being told what to do, and they sometimes react by telling the state what to do. They can throw the case out."

Under congressional legislation sponsored by Rep. Michael D. Barnes (D-Md.), each state that makes drunken driving controls a priority is now eligible for an additional 50 percent of its federal highway safety grant. To qualify, a state must take such steps as raising the drinking age to 21, eliminating plea bargaining, setting up highway checkpoints and using preliminary breath tests.

A presidential commission recently urged the states to adopt similar measures. One recommendation, already in effect in many places, is to use a blood alcohol content of .10 as the legal standard of intoxication. For a 160-pound person, this would mean drinking either five beers, five glasses of wine or three shots of whiskey in an hour.

The commission also suggested that money collected in fines be given back to local authorities to finance enforcement and education programs. This is already being done in New York, where Salm said it provides a powerful incentive for county police to join the crackdown.

Staff researcher Carin Pratt contributed to this report.

Washington Area's War on Drunk Driving Pays Off in a Big Way

Area Traffic Deaths Drop; Arrests Are on Increase

By Blaine Harden
Washington Post Staff Writer

The highly publicized war against drunk driving—waged this past year by mothers, lawmakers, judges, juries and the police—has racked up impressive victories in the Washington area.

Highway deaths in 1982 declined in Virginia, Maryland and the District of Columbia, where laws against driving under the influence of alcohol were toughened. At the same time, arrests of drunk drivers have increased sharply.

In the District this year, 36 people—the lowest figure in at least a decade—had died in traffic accidents as of Tuesday. Alcohol-related deaths in Maryland fell 30 percent while arrests of drunk drivers were up 50 percent. Highway deaths in Virginia declined 14 percent.

During Christmas weekend, as police in all three jurisdictions beefed up patrols, there was one alcohol-related death in the Washington area, compared to seven over the 1981 Christmas weekend.

"The word is out. We are out there to get people and as a result we have reduced fatalities," says Robert M. Goldstein, director of the D.C. police alcohol countermeasures and traffic services.

See ALCOHOL, A7, Col. 1

ALCOHOL, From A1

Throughout the Washington area, there may never have been such a bad year to be drunk at the wheel.

In Northern Virginia, a drunk driver involved in a head-on collision that killed three persons was convicted in September of second-degree murder. The conviction was the first in the state on that serious charge in an alcohol-related traffic case.

In Maryland, a drunk driver involved in a crash that killed five members of a Montgomery County family was sentenced to 15 years in prison.

In the District, police began a first-in-the-nation mandatory breath test for all drivers stopped for moving violations. Any driver who refuses the test can be arrested.

Despite tough new laws and aggressive enforcement, some drivers continue to drink and drive. John T. Hanna, director of the Virginia Department of Transportation Safety, says only one in 2,000 drunk drivers is ever caught. One such driver slipped through the enforcement net last weekend in the Washington area.

Donald W. Jewell, 33, who ran an insect exterminating business, threw a party at his Manassas house on the night before Christmas Eve. Friends who saw him at the party described him as drunk and "having a hard time talking."

In the middle of the party, Jewell stormed outside and drove off in his black 1979 Chevrolet pickup truck. He headed south at 70 miles an hour on a 55-mile-an-hour, two-lane road, police said.

Jewell had a record of drinking and bad driving. In California in 1969 he was convicted of driving under the influence of alcohol. Near Hodges, S.C., in 1975 he ran a stop light and crashed into a car, killing three persons. A blood-alcohol test showed that Jewell was under the influence of alcohol at the time. He was convicted of involuntary manslaughter and sentenced to six years in prison.

Four years later, after he'd moved north to Mathews, Va., Jewell was convicted of breaking and entering and sentenced to five years in prison. From prison, Jewell wrote Circuit Court Judge John DeHardit: "I am an alcoholic and I need and want help with this so I can be a man. I also know that if I don't get help with my drinking I will be back in prison."

About 10:30 p.m. a week ago today, Jewell lost control of his pickup rounding a curve. Police said Jewell tried to pull his truck back on the road but it went into a roll, taking up both lanes of Rte. 234 near Manassas. It stopped rolling when it smashed into a pickup coming from the opposite direction.

"He had the whole highway covered. It looked like a wall coming at me. It scared the daylights out of me. I'm still scared," William E. Parker Jr., 39, the driver of the other pickup, said yesterday.

Parker, who escaped with a strained back from the crash that totaled his pickup said he was lucky.

"When I knew anything, he was rolling at me. If I hadn't got in the ditch, he'd a killed me too," Parker said.

CRACKDOWN ON DRUNK DRIVING

...several died of what a medical examiner called "multiple severe injuries."

To head off this kind of driver before an accident can occur, police in Maryland set up "sobriety roadblocks" over the Christmas weekend, and plan to do so again this weekend.

Under a three-month program authorized earlier this month by Maryland Gov. Harry Hughes, the roadblocks are set up to catch drunk drivers who "absolutely don't think they can be caught," said Sgt. Ray Cotton.

"State Police stopped 2,000 cars over the weekend and we arrested four drivers," Cotton said. "We don't consider this a defeat, however. We are making believers out of people. The fact that we aren't arresting that many people is a sign that awareness of drunk driving is working."

In Montgomery County, along a flare-brightened stretch of Montgomery Village Avenue, county police on one recent holiday night checked an estimated 350 drivers between 11 p.m. and 1 a.m. They arrested no one.

"I don't think anybody had visions of locking up hordes of people," said Sgt. Owen J. Lennon, surveying the line of backed-up holiday travelers. "This is primarily a deterrent."

The mood on both sides of the spot check remained friendly. Police officers asked drivers if they had had anything to drink, then told those who said "no" or "just one" to "get home safely and thank you for cooperating."

As the night grew later and colder, some officers became impatient.

One policeman asked a glamorously dressed young woman to pull off the road for a test. "Recite the alphabet," she was told.

"Are you serious? That's what I get for being honest with you guys and telling you I had two drinks," she said, shivering in her strapless, sequined top, and then passed the test.

Maryland police say they can do little about those drivers who choose to avoid roadblocks by turning around and driving away from them.

"As a general rule," says Sgt. Cotton, "we would not approach an individual who turns around from a checkpoint, unless he does it illegally."

When area police do arrest someone for drunk driving, new laws require stiffer penalties.

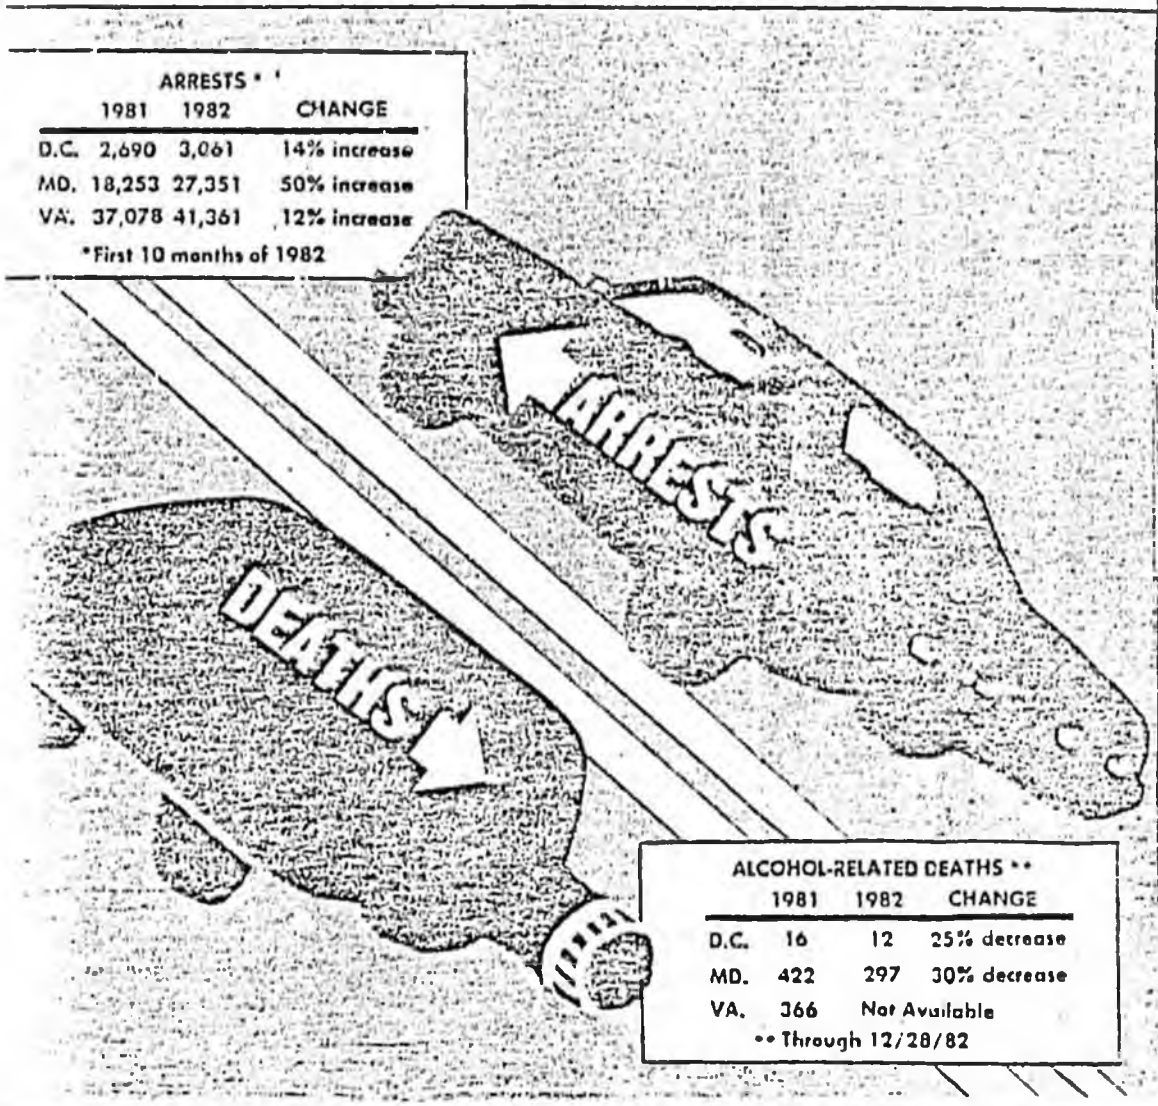
In the District, persons arrested with blood alcohol levels at 0.1 percent or higher can now be convicted of driving while intoxicated even without evidence of impaired driving ability. The law doubles penalties for those who refuse to take breath or blood tests and sharply increases fines for repeat drunk-driving offenders.

In Maryland, where the drinking age this year was raised from 18 to 21, second offenders no longer can avoid conviction by receiving probation. Blood tests are mandatory in fatal accidents, and police can confiscate for 120 days the license plates of any repeat drunk driver.

In Virginia, first offenders can no longer erase their convictions by entering a rehabilitation program. Second offenders face an automatic 48 hours in jail, and a third conviction requires a minimum of one month in jail and possibly lifetime revocation of a driver's license.

The target of this crackdown is drunk driving, not drunks. Accordingly, two local governments, one hospital and one volunteer group have come up with programs that permit tipplers to ride home—in a cab—for free.

Montgomery County's Dial-a-Ride program fielded 50 calls and sent out 45 cabs on Christmas Day. The big night, however, will be New Year's Eve when 400 calls and 300 pick-ups are expected, according to Jerry Freed at Dial-a-Ride.



"We get people trying to make reservations before they go out and drink too much," Freed said. "We make them aware it's for people already in trouble."

Staff writers Alma Guillermoprieto, Rosa Michnya and Joanne Ostrow contributed to this report.

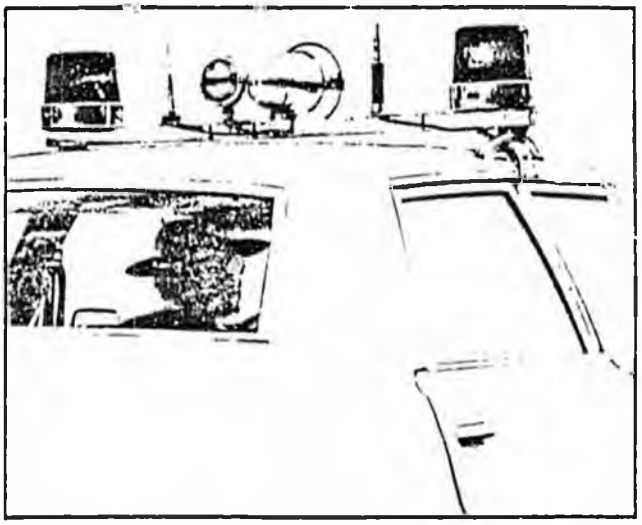
Iowa's tough on drunk drivers.



In order for a tougher drunk driving law to accomplish its purpose, it must not merely punish those arrested, it must deter those who might otherwise drive after drinking. Therefore public service advertising and news media coverage of new laws is extremely important. In Iowa, the Governor's Highway Safety Office hired an advertising agency to create a TV spot on the new law. That 30-second message, which is included in the ACAP video documentary, shows a young man in a small room. He begins talking to the camera:

> "When they stopped me for drunk driving I thought 'No Big Deal.' It was my first time. Well, I lost my driver's license right then and there — gone for at least 120 days. And my insurance company says my rates are going to go up a thousand dollars a year. That's gonna hurt, bad. And now I'm here . . .

The camera pulls back to reveal that the man talking is actually behind bars.

> ". . . for 48 hours. Iowa's new drunk driving law is for real, and it's tough, even if it's your first time."

The exposure given this spot by Iowa's TV stations has insured that virtually every motorist is aware of the new law.

Administrative License Revocation for Drunk Driving

Recommendation for legislative action by the American Council on Alcohol Problems

Administrative Revocation for Drunk Driving

Public indignation continues to grow. Citizens have made it clear to lawmakers and public officials that they are no longer willing to tolerate the highway carnage caused by drunk drivers.

In 1982 this grass roots sentiment, widely expressed across the country, resulted in the appointment of the Presidential Commission on Drunk Driving. The Commission's interim report was issued in December 1982 so that states could act on its recommendations during 1983 legislative sessions.

Those recommendations cover a wide range of topics, including changes in state drunk driving laws. The Commission recommends enactment of a "per se offense" at .10% BAC, and a presumption of guilt at .08% BAC. It also supports raising the drinking age to 21 and adopting a system for administrative revocation of drivers' licenses.

Other recommendations pertain to minimum jail sentences and legal sanctions against drunk driving. Legal penalties, however, require county attorneys willing to prosecute and judges willing to hand down the sentences mandated by the legislatures. Unfortunately, some county attorneys grant deferred prosecution, allowing those apprehended by police to continue driving. Those who are tried and convicted, or who plead guilty, are often given deferred sentences by the judge.

In all but a handful of states, drivers' licenses are only suspended or revoked after court conviction, so those charged with drunk driving may keep their licenses for months after being apprehended. One of the Presidential Commission's recommendations addresses that problem.

Administrative Revocation, pioneered in Minnesota in 1976 and adopted by Iowa in 1982, means that the driver's license is confiscated by the arresting officer on behalf of the Department of Transportation. Hearing officers are empowered to grant work permits in some cases. Under the "implied consent" portion of the law, licenses are revoked for refusal to take the chemical test, as well as for test failure.

Under this "two-track" system the loss of driving privilege extends to all those apprehended with a blood alcohol level of .10%, regardless of court action or lack of it. Administrative Revocation accomplishes the most important task in the fight against drunk driving. It takes drunk drivers off the road immediately, and serves as a strong deterrent to others.

Because, in almost every state, prosecution and sentencing vary considerably from one county to another, Administrative Revocation is the only predictable penalty for drunk driving. The American Council on Alcohol Problems has produced an 18-minute video tape documentary on Administrative Revocation in Iowa. Below are quotations from the video presentation:

"By the time that bill reached the floor of the House it was pretty clear from sentiment in the Capitol that they had to vote out something. They had to do something in the way of legislation on drunk driving that year because of the clear public sentiment favoring that, and the national trend in that direction. . . . There was massive bipartisan sentiment. The first vote in the House was 97-0, and the first vote in the Senate was 45-0."
Don Mason, Attorney
Prosecuting Attorney's Counsel

"I think that the administrative revocation of a drivers' license for all persons above .10 BAC is extremely important. . . . I think it puts the responsibility for putting people back out on the road back where it belongs — that's back with the state agencies. Since they do the issuing of driver's licenses, they should be responsible for who's out on the road. That's not really a judicial responsibility."
Sven Sterner
Governor's Highway Safety Office

"This is the first time in the history of this ASAP program that people have actually, realistically lost their drivers' licenses when they were arrested for OMVI. . . . We're the ones that initiate the revocation. We take the license right on the spot."
Roger Sanders, Patrolman
Alcohol Safety Action Program
Des Moines Police Department

"In the four and a half months since the law took effect there have been 5,685 drivers' licenses revoked in Iowa."
Bill Kendall, Director
Driver Licensing, DOT

"In the first four months that this law has been on the books there have been 59 fewer alcohol-related fatalities. . . . In that period there were 189 total highway fatalities — 29% of that 189 were alcohol-related. Over the same period a year ago, that percentage was 46%. . . . The sanctions that are applied generally — the fine, community service, some hours in jail — do not carry the deterrent effect on the drinking driver that the sure, immediate loss of their license has."
Gordon Sweitzer, Director
Motor Vehicle Division, DOT

"The one advantage we do have in the acronym game in Iowa with MADD and SALD is that we have GLADD. Now we have Good Laws Against the Drunken Driver."
Col. Frank Metzger, Director
Iowa Highway Patrol

States take tougher, quicker action to stop drunken drivers

On-the-spot suspension of licenses, more uniform laws bolster efforts across US

By George B. Merry
Staff writer of The Christian Science Monitor

Boston

Thousands of drunken drivers are now being pulled off the nation's highways — and with fewer questions asked.

• Lawmakers in at least 35 states passed tough new penalty or enforcement measures in 1982.

• Similar or even stricter statutes are pending, or expected to be filed, within the next few weeks in all but three states — Kansas, Kentucky, and Maine.

Particular attention is being focused on recommendations by the President's Commission on Drunk Driving, calling for speedier action. These include provisions that can be administered uniformly around the nation. Penalties currently vary widely from region to region, thus leading many judges and juries to refrain from punishing drunken drivers.

One especially appealing approach involves on-the-spot suspension of drivers' licenses by police. Four states — three in the past year and a half — have moved with considerable success in on-the-spot license revocation of those stopped for driving under the influence of liquor.

Similar instant tough drunk-driver measures begin April 1 in a fifth state, and lawmakers in at least four others are considering following suit with the administrative revocation approach, one of the major recommendations of the presidential commission.

Buoyed by the sharp reduction of liquor-related traffic deaths in his home state of Iowa, William N. Plymat, a member of the presidential panel, which was appointed last spring, is dedicating substantial energies to selling the idea elsewhere.

With administrative revocation, the driver retains the right to appeal, but during that often lengthy process the suspension holds.

The retired insurance executive and former Republican state senator views the threat of immediate, lengthy suspension of a motorist's right to operate a vehicle as an effective curb on drunk driving.

Under the tough Iowa statute, first implemented last July 1, an arresting officer can seize a license if the driver refuses to take a breath test on the scene, or flunks it by having a blood alcohol content of 0.10 percent or more.

Revocation is 120 days for first offenders, 240 days for a second arrest, and one year for the third. Also provided are tougher penalties for drunk driving — $100 fines and the possibility of 30 days in jail now becomes up to $1,000 and one year behind bars.

With administrative revocation, the driver retains the right to appeal the loss of his license, but during that often lengthy judicial process the suspension holds. In hardship cases, temporary permits to operate a vehicle to and from work can be granted, but even stiffer penalties are imposed should the motorist be picked up for drunk driving during the period of revocation.

The new law, during its first six months, cost 7,887 drivers their licenses — 6,383 for four months, 1,077 for eight months, and 427 for a full year, according to James Fetters, the driving improvements manager for Iowa's department of transportation.

During the same period, Iowa's liquor-related road death total was 97, or 59 fewer than during the corresponding period in 1981.

While a number of factors, including faster treatment and improved care of traffic accident victims, contributed to the improvement, safety transportation safety officials attribute the better record substantially to the tougher curbs on drunk driving.

Of the 7,887 license-revoked drivers, 6,693 took the breath test and failed, with an average blood alcohol count of 0.19 percent. The level of intoxication of the remaining 1,194 is unknown, since they refused to submit to the test.

Similar on-site administrative revocations of licenses also appear to be working effectively in Minnesota, Delaware, and West Virginia.

Oklahoma drunk drivers, beginning in April, will be next to face on-the-spot license suspensions for not less than 30 days.

Mr. Plymat, who pledges to continue his crusade in behalf of such measures, is enthusiastic about the prospects for early passage in Utah, where Gov. Scott M. Matheson solidly backs the effort.

Within the past few days a proposed administrative revocation law has been introduced into the California Assembly. Legislative committees in at least two other states — Alaska and North Carolina — also are expected to take up such measures during the next few weeks.

Several papers in Iowa, including the Cedar Rapids Gazette, regularly print the names and addresses of those whose licenses are revoked for drunk driving. Arrests for operating a motor vehicle under the influence of liquor similarly are publicized in a number of other dailies around the US, including the St. Louis Globe Democrat, Plymat notes.

Learning from Iowa

The Monitor's view — Thursday, January 27, 1983

For years states and municipalities have tried just about every legal stratagem to help curb the drunken driving problem in the United States. Yet in many communities judges and juries are loath to impose severe penalties, in part because of a recognition that the drinking driver is often as not in need of special counseling. Now, thanks to the experience of a few states, it is clear that there is one step that could be taken at the state level to quickly reduce liquor-related traffic accidents: swift administrative license revocation — right at the scene of the arrest.

Minnesota pioneered administrative revocation in 1976. Today similar laws are on the books in Iowa, West Virginia, and Delaware. Oklahoma will join the list later this spring. Utah is now considering such a measure. Alaska, California, and North Carolina are also expected to take up the issue this year.

How does it work? Take Iowa, where such a law was enacted after unanimous passage in both houses of the legislature last year. Persons stopped for suspected drunken driving are asked to take a sobriety test on the spot. If they refuse, they face a substantial penalty. If they take the test, and fail, their license is suspended right then and there. Revocation for first offenders is 120 days; for second offenders, 240 days; for subsequent offenders, one year. The driver has the right to appeal the loss of the license or contest the administering of the sobriety test. But during the period of appeal the suspension remains in effect. Exceptions are made for revocation in cases of extreme hardship.

In the six months since the law has been in place in Iowa, close to 8,000 persons have had their licenses suspended for varying periods of time. In the great majority of cases, blood alcohol readings were found to be especially high, indicating that law-enforcement authorities were not abusing their right to stop a motorist for a sobriety check. It might also be noted that the alcohol-related accident rate fell sharply during the same period.

The President's Commission on Drunk Driving endorsed such a proposal in its interim report. The issue is not one of severely penalizing the drinking driver. Indeed, what is good about the revocation concept is that it is uniform, applying equally to all motorists. Under such a law, no motorist apprehended for drinking in one locality would face a punishment more — or less — severe than a motorist in another jurisdiction. The law also puts the responsibility back where it belongs: in the hands of each motorist.

State legislatures meeting this year might well consider Iowa's experience.

POSITION PAPER/Department of Health & Social Service

POSITION PAPER

SCSCS for House Bill No. 6 (Judiciary)

"An Act relating to driving a motor vehicle."

House Bill No. 6 amended would increase the penalties for alcohol related driving offenses. Specifically:

Section 11 AS 28.15.291 sets the penalty for first offense driving with a suspended license as the result of a conviction of driving a motor vehicle while intoxicated at 30 days. The penalty for second or third offense driving with a suspended license as the result of a conviction of driving a motor vehicle while intoxicated would be 90 days.

Section 14 AS 28.35.030 (c) raises the penalty for second offense operating a motor vehicle while intoxicated to 20 consecutive days. The penalty for a third conviction would be raised to 30 consecutive days.

Section 20 AS 28.35.032 (g) sets the penalty for second offense of refusing to submit to chemical test at 20 days; third offense 30 days.

If CS for House Bill No. 6 is enacted, the increases in penalties set out in Sections 11, 14, and 20 would result in the need for 22 additional minimum security beds.

IV. ANALYSIS:

A. Assumptions

1. Bed Impact

The passage of this bill will result in the need for 22 additional minimum security beds within the Alaska correctional system. The sections of the bill which affect increased inmate population projections are:

a. Section 11

Statistics furnished by the Department of Public Safety show 181 persons were convicted in 1982 for driving with a suspended or revoked license where the original offense resulting in the loss of license was driving while intoxicated (DWI) or implied consent (refusal to take a breathalyzer test). For purposes of this fiscal note, that number was used for calculating the increased person days of incarceration resulting from increased sentences to 30 or 90 days. It was assumed that 80% of the offenders would have been convicted only once in the previous 15 years and 20% convicted more than once in the previous 15 years.

The following calculations also consider that the offender would have been given a minimum sentence of 10 days previously, and it is assumed that every offender will earn all good time for which they are eligible. Therefore, 145 offenders would serve an additional 15 days and 36 offenders would serve an additional 60 days. This results in the need for an additional 11.88 beds.

b. Section 14

This section of the bill increases the minimum sentence for second time drunk drivers from 10 days to 20 days and third and subsequent time drunk drivers from 10 days to 30 days. It is estimated that would be 450 repeat offenders affected by this legislation, 425 second offenders and 25 third offenders. The additional sentence length to be served, assuming all good time will be earned is 12 days for second time offenders and 20 days for third offenders. This increased sentence length results in the need for 9 additional minimum security beds.

c. Section 20

This section provides new penalties for refusal to take a chemical test similar to the sentences to be imposed for driving while intoxicated. Statistical data for this offense was not available. Therefore, it was assumed that 20 individuals would be convicted with one

prior and 7 individuals would be convicted with 2 or more prior offenses. This would result in the need for 1.1 additional beds.

d. The summary of a, b, and c above is 21.98 beds, which were rounded to 22 beds.

2. All persons convicted would receive the minimum sentence and all persons would earn all good time for which they would be eligible.

3. Inflation of 6% per year was used for the entire period of the fiscal note.

4. The new beds would not be available for occupancy until July 1, 1985. This will result in further overcrowding of the existing facilities for two years.

5. One additional position is needed for every 2.5 prison beds. Therefore, 9 correctional officers are needed to provide the security and supervision of the inmates. These positions would be requested for FY 86.

B. Program Summary:

1. Positions

1 - Correctional Officer III
8 - Correctional Officer II's

These positions are needed to provide for the security of the institution where the beds will be constructed and for the supervision of the additional 22 persons (full-time equivalents) within the Alaska corrections system.

2. Other Expenditures

The fiscal impact will be experienced as soon as the bill becomes law. Therefore, the incremental costs directly related to inmate care are identified in FY 84. Position costs and costs related to building operations are not incldued until FY 86.

a. Travel - $2000. Inmate transportation to point of arrest when released from custody.

b. Contractual - $39,600. Medical expenses for 22 full-time equivalent inmates at $1800 per inmate per year.

c. Commodities - $68,600. Food, clothing, bedding, etc. for 8,085 inmate days at $8.48 per day.

Grants - $6,900. Inmate gratuities paid for persons working in the kitchen, or janitorial/maintenance crews, etc.

e. Capital Expenditures

22 beds @ $130,000 per bed = $2,860,000

D. Economic Impact:

Passage of this bill should not significantly impact the State's economy.

E. Impact on Local Governments:

There would be no fiscal impact on local governments unless they changed local ordinances related to DWI to include the same penalties contained in this bill. The fiscal impact would occur for local government units who contract with the State for the care of prisoners for local offenses.

ANALYSIS OF C.S.H.B. 6

There are several provisions within this bill which will require a substantial increase in the attorney time necessary to handle DWI and refusal of breathalyzer cases.

First, the increase in mandatory minimum penalties for second and subsequent offenders to 20 and 30 days respectively, as well as the increase in fines, will mean that a much higher number of defendants will exercise their right to a jury trial. Preparation for jury trial requires extensive interviews with the client and prospective witnesses, and the court time for the case is greatly increased, since a DWI change of plea in court may take 15 minutes while a jury trial in such a case usually lasts 1 - 2 days. We handle a high volume of not only State prosecuted DWI's but Municipally prosecuted DWI's as well. This increase in attorney time necessary for handling each drunk-driving case, given our already staggering misdemeanor caseloads, will require two additional attorneys for the Anchorage office, and one for the Fairbanks office.

Second, a drastic increase to a 90-day mandatory penalty for a first offender charged with driving with a suspended license will increase the number of jury trials which this office is required to handle.

Third, provisions in the statute which allow a police officer upon probable cause to seize the defendant's driver's license or impound his vehicle for a substantial period of time at the time of arrest will also require increased attorney time, due to the defendant's right to schedule a court hearing within 7 days to obtain return of his license or vehicle. Although the defendant may not have a right to an attorney to handle the hearing which he initiates to have his car or license returned, he will need an attorney's assistance at that hearing to the extent that it impacts his criminal case. Because anything that the defendant might say at that hearing regarding the facts of his case could be used against him at the subsequent criminal trial, he would need the assistance of counsel at that hearing. The attorney would have to obtain the immunity which would be due the client under the Alaska Supreme Court decision of McCracken v. Corey, as well as limit the scope of cross-examination at the hearing.

Because of the volume of DWI cases handled by this agency and the substantially increased attorney time necessary to comply with the provisions of the Statute, two additional attorneys for Anchorage and one for Fairbanks are requested.

3/8/83

ANALYSIS OF FISCAL IMPACT OF SB 61/HB 6:

The Court System currently disposes of approximately 6,000 DWI cases each year. Presently, 8.6% of these cases are disposed of at trial, or approximately 500 trials per year. This legislation will increase the number of cases proceeding to trial, since individuals faced with stiffer penalties and forfeiture of motor vehicles will be more likely to take their cases to trial than to plead guilty as they have in the past. Assuming that 5% of those individuals presently pleading guilty opted for a trial under the new statutes, the Court System would experience an increase of approximately 250 trials per year.

This legislation provides that individuals issued temporary licenses upon arrest on DWI have seven days in which to schedule a court hearing regarding extension of their temporary license. If 25% of the individuals charged with DWI ask the court for this seven day hearing, the court would experience an increase of approximately 1,500 hearings per year.

Once a motor vehicle has been forfeited to the state, the court must notice any interested party regarding this forfeiture and permit interested parties to submit a petition for remission of interest in the motor vehicle. Each petition filed will require a court hearing. It is estimated that this would lead to approximately 500 hearings per year.

Statewide, the major impact of this legislation would be an increase of approximately 250 DWI trials and 2,000 hearings per year. Along with the judicial manpower required to conduct the trials and hearings, the court needs supporting staff for the judges and clerical staff to process the case files, calendar and notice the participants in hearings, and perform other new clerical functions under this legislation related to impoundment of vehicles and forfeiture of vehicles.

The impact of this legislation will be felt in each court location in the state, though the major impact will be in the larger metropolitan areas. Both Anchorage and Fairbanks currently have a heavy caseload of DWI cases, with Anchorage reporting approximately 30% of the state's caseload and Fairbanks 25% of the caseload. In each of these locations the district courts are working at capacity, and would therefore need increased resouces to handle the projected number of new trials and hearings to be held under this legislation. In each location, the minimal staffing required to implement this legislation would be one district court judge, with a support staff of a secretary and in-court clerk, and two court clerk II positions in the criminal sections to deal with the new clerical demands created by this legislation.

In addition to Anchorage and Fairbanks, both Palmer and Kenai have significant DWI caseloads, with each having nearly 10% of

the state's caseload. While these courts may be able to get by without additional judicial resources, each would need at a minimum one additional court clerk II position.

A detailed breakdown of the cost associated with this legislation is provided below.

FY 84 COST OF IMPLEMENTING HB 6/SB 61

POSITION PAPER

CS for House Bill No. 6 (State Affairs)

"An Act relating to driving a motor vehicle."

House Bill No. 6 amends existing state law by increasing the length of sentence for first offense of driving with license suspended from 10 days to 90 days; second offense of operating a motor vehicle while intoxicated from 10 days to 20 days; third offense of operating a motor vehicle while intoxicated from 10 days to 30 days. It is estimated that the net effect of increasing the penalities for the specified offenses would increase the prison population by 80 beds.

Enactment of this bill would have significant impact upon prison population.

Recommended by: for Roger C. Lange
Roger V. Endell, Director
Division of Adult Corrections

Date: 3/11/83

Approved by: Robert London Smith
Robert London Smith, Ph.D.
Commissioner

Date: 3/14/83

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: Committee Substitute HB 6 (SA) Date on Bill: Not available
Title: "An Act relating to driving a motor vehicle."
Sponsor: Rep. Abood
Requestor: Rep. Abood

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86	FY 87	FY 88
Capital				11,570.0	-0-	-0-		
Operating				549.2	2,006.4	2116.1		
Total			-0-	12,119.2	2.006.4	2116.1		

b. Revenues:

Revenue			-0-	-0-	-0-	-0-		

2. Source of funds to offset fiscal impact of bill:

The funding source has not been identified by the bill sponsor.

3. Assumptions:

The Committee Substitute for House Bill No. 6 increases the mandating jail time for individuals who drive while the operator's license is cancelled, suspended, or revoked. The amendment increases the sentence for that offense from 14 consecutive days to 90 consecutive days.

It is estimated based on statistical data available, that there would be approximately 650 convictions annually for the offenses specified in the amendment. Because of the significant increase in sentence length, it is assumed that 25% of the current offenders would be deterred from driving while their license was cancelled,

Copy to Requestor

2/8/8

3. Assumptions: (continued)

suspended or revoked. Therefore, it would be anticipated that there 487 persons would be convicted of this offense annually.

The current sentence for these offenses results in 8 days served in jail (14 days less good time). Under the new penalty 68 days would be served (90 days less good time). Time served would increase 60 days; therefore, the increased number of beds required to implement this amendment would be:

487 persons x 60 days ÷ 365 days per year

487 x 60 ÷ 365 = 80 new beds

Cost of minimum security beds are estimated to be $130,000 per bed.

Capital costs = 80 x $130,000 = $10,400,000

Additional costs for commodities, contractual services, and inmate gratuities only are included for FY 1984, as the construction could not be reasonably completed until July 1984. At that time, personnel services costs would start for 36 positions.

Costs previously identified for the original bill have been combined with the new costs identified, and are reflected in the total estimated costs.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It does not represent the policy of the Sheffield Administration or the final estimate of fiscal impact.

3/8/83

CS HB 6 (State Affairs)

Assumptions:

Division of Motor Vehicles:

1) Arresting agencies, not DMV, will handle costs of impound & storage if vehicle is released under AS 28.35.036(c) or (d); 2) Alaska Court System will handle "Revenue" fiscal note covering fines and vehicle forfeitures; 3) Hearing officer will cover areas outside Anchorage and Fairbanks quarterly; 4) 96% of defendants who take breath test will have .10% or higher; 5) For 26% of impounds an individual will ask for hearing; and 6) Effective date is July, 1983.

Fiscal Impact:

Division of Alaska State Troopers:

Expenditures	FY 84	FY 85	FY 86
300 Contractual Services	77.5	82.2	87.1

Analysis:

The only impact that is anticipated from this Bill relates to the costs that will be incurred when vehicles are impounded under Section 28.35.036. We have estimated that one thousand vehicles will be impounded, of which five hundred will require towing and storage fees to be paid by the Department due to the person operating the vehicle not being the owner and operating the vehicle without the owner's consent, driver not being charged within the prescribed period, dismissed charge or where the driver is acquitted of the charge. Wrecker fees are estimated at $80.00 per occurrence and a $5.00 per pay storage fee for fifteen days required. Inflation is estimated at 6% for each year after FY 84. No increase in personnel is anticipated.

Division of Motor Vehicles:

EXPENDITURES

	FY 84	FY 85	FY 86
100 Personal Services	53.2	56.4	59.8
200 Travel	3.0	3.2	3.4
300 Contractual	9.6	5.6	5.9
400 Commodities	.2	.2	.2
500 Equipment	3.8	-0-	-0-
TOTAL	69.8	65.4	69.3

ANALYSIS

One Documents Processing Clerk II will be required in Juneau to handle administrative license actions, and related work for individual defendants whose breath results are .10% or higher. Will prepare and mail license actions (of which it is estimated there will be an increase of 2,700 to 3,000 annually, based on 1981 statistics); enter data on computer; prepare certified copies for prosecutors, courts, etc.; process stays; maintain proof of insurance filings; and maintain records. Equipment breakdown for this position is as follows: Typewriter - $1,245; File Cabinet - $291; and Chair - $188.

One Clerk Typist III in Anchorage is proposed to handle data relating to hearings requested by individuals whose vehicle was impounded. Will send hearings notices to those requesting a hearing, maintain current computer records concerning hearings, and maintain tape file for all hearings. Will type hearing transcripts from tape as required for appeals, and other court action. Equipment breakdown for this position is as follows: Typewriter - $1,245; Desk - $446; File Cabinet - $235; and Chair - $163.

Travel is for hearing officer when hearings are outside the Anchorage or Fairbanks areas.

$4,300 of first year contractual is for new testing material and forms, and $5,300 is for postage (all license actions and hearing notices must be sent via certified mail). Remaining years contractual is for postage only.

We basically know what the increased workload will be as a result of increased license actions, and that one clerical position in Juneau will be necessary if we are to process this increase. However, at this point it is only an estimate as to how many defendants and/or vehicle owners will ask for a hearing after impoundment of a motor vehicle. Figures released by the Court System in 1981 reflect a 75% conviction rate between 1978 and 1980 for DWI cases. It is estimated 75% of those not convicted will ask for a hearing in an effort to determine who will pay impound and storage costs; plus 10% of the remaining for other various reasons. If there is this large of an increase in hearings one clerical position will be needed in Anchorage to handle the workload.

5. Amendments Proposed:

A. Sec. 5, Page 3 (AS 28.15.201(c)), change to read as follows:
(c) After the termination of the limitation as shown on the certificate issued under (b) of this section, the license of a person on whom a limitation was imposed will become suspended unless the person has complied with AS 28.20.240. [IS NO LONGER BOUND BY THE LIMITATION AND MAY APPLY FOR A DUPLICATE LICENSE UNDER AS 28.15.141.....]

The reason for this recommended change is because at the present time, and in the proposed new law, it states a person may apply for a duplicate license at the end of the limitation period, which is in conflict with AS 28.20.240. That section reflects the limitation will continue until the individual files proof of insurance. Also under AS 28.20.240, the limitation may continue for the three year period a person is otherwise required to file proof of insurance, thus circumventing the insurance requirement. This amendment would prevent that.

B. Sec. 9, Page 8 (AS 28.35.031(e)), and Sec. 12, Page 11 (AS 28.35.032(d)), change "90 days" to "3 months".

Only reason for this request is that it would be easier for the department to administer.

C. Sec. 14, Page 13 (AS 28.35.034), replace first sentence with language similar to the following. "A person whose license or permit to operate or drive a motor vehicle has been revoked under the provisions of AS 28.35.031 or AS 28.35.032 shall surrender the license or permit to the law enforcement officer who delivers to him a copy of the suspension or revocation notice. The law enforcement officer shall forward the license, and a copy of the revocation notice, to the department."

Reason for this recommendation is so it doesn't conflict with Sec. 9 and 10, which reflect the law enforcement officer shall seize the person's driver's license. It also specifies what the officer is to do with the license.

D. Sec. 9, Page 7, lines 6 thru 10 (AS 28.35.031(c)), and Sec. 11, Page 10, line 1 thru 5 (AS 28.35.032(b)): "the Department of Public Safety shall revoke or suspend [NOTIFY THE PERSON THAT] the person's license or nonresident privilege to drive or operate a motor vehicle in the state. [IS REVOKED OR SUSPENDED, OR THAT NO ORIGINAL LICENSE OR PERMIT WILL BE ISSUED] The revocation is effective upon expiration of the temporary....."

Reason: Allow the notice given by the law enforcement officer as mentioned in Sec. 9 and 10 suffice for notice, and not require additional notice via mail. This would save mailing costs on approximately 4,000 notices annually at current price of $1.55 each, plus clerical time to process.

(continued)

Amendments Proposed (cont')

E. A section of Title 28 not addressed in this bill, however, is related in some ways, is AS 28.15.221(a). May want to look at amending that section by adding "or another law or ordinance with substantially similar elements if committed in another jurisdiction.".

Reason: As presently written an out-of-state violation cannot be included as a violation against an Alaska driver's license, and be counted in the point total. Appears from this bill the intent is to count a DWI conviction in another jurisdiction the same as if it occurred in Alaska. The above change would allow entry of out-of-state DWI, or any other traffic violation, for people who possess an Alaska driver's license, and thus equal treatment for all violations, regardless of where the offense occurred.

POSITION PAPER

House Bill No. 6

"An Act relating to driving a motor vehicle."

House Bill No. 6 amends existing state law by increasing the length of sentence for first offense of driving with license suspended from 10 days to 14 days; second offense of operating a motor vehicle while intoxicated from 10 days to 20 days; third offense of operating a motor vehicle while intoxicated from 10 days to 30 days. It is estimated that the net effect of increasing the penalities for the specified offenses would increase the prison population by nine beds.

This bill would not significantly affect program objectives of the Division of Adult Corrections; however, it would have fiscal impact.

Recommended by: for Roger C. Lange

Roger V. Endell, Director
Division of Adult Corrections

Date: 2/8/83

Approved by: Robert London Smith

Robert London Smith, Ph.D.
Commissioner

Date: 2/9/83

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: House Bill No. 6 Date on Bill: January 17, 1983
Title: "An Act relating to driving a motor vehicle."
Sponsor: Abood, Furnace, Lindauer, Cowdery, and Szymanski
Requestor: State Officers

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86	FY 87	FY 88
Capital				1170.0				
Operating				56.7	59.9	63.4		
Total				1226.7	59.9	63.4		

b. Revenues:

Revenue				-0-	-0-	-0-		

2. Source of funds to offset fiscal impact of bill:

The funding source to implement this bill, if enacted, has not been identified by the author of the bill.

3. Assumptions:

The impact of HB 6 upon the Division of Adult Corrections would be additional bed space for 9 full time equivalent inmates in minimum custody status. These beds would cost $130,000 per bed to construct for a total of $1,170,000.

Costs for inmates food, clothing, etc., for the 3,285 person days were computed by taking current costs with a 6% per year inflation factor. Present costs are $8/day for food and clothing and $7.69/day for medical and counseling. As these inmates would have minimum custody classification, they would be utilized in institutional jobs such as clearing, food service, etc., for which they would be reimbursed.

District Court
State of Alaska
THIRD JUDICIAL DISTRICT
941 FOURTH AVENUE
ANCHORAGE, ALASKA
99501

CHAMBERS OF
ELAINE ANDREWS, JUDGE

(907) 264-0663

March 31, 1983

Representative Charlie Bussell
Chairman, House Judiciary Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Bussell:

I am writing to express some court related concerns over House Bill No. 6, a bill pertaining to criminal penalties for driving while intoxicated and driving while license suspended.

At the outset it is important to understand not only the intended impact of legislation that raises or establishes a mandatory minimum penalty, but also the predictable, but unintentioned, consequences. Certainly deterrence of the illegal conduct is a paramount goal. However, there are obstacles toward reaching that goal. Substantial mandatory minimum penalties can cause prosecutors to review cases more severely than they might otherwise, leading to reduced charging. Jurors, who quickly become educated in such matters, are reluctant to convict in cases where they know significant mandatory penalties will be imposed. Further, defendants who face loss of freedom, and financial security through loss of employment, will litigate these cases to the fullest, taxing the already understaffed prosecutorial and defense agencies, not to mention the court which is struggling to process the skyrocketing caseload.

Larger considerations aside, I discern several critical problems with the proposed legislation.

1. **AS 28.15.181(c) - Driving While License Suspended Penalty Prerequisite**

   It will require significant time on behalf of the prosecutor and the court to obtain information about "essentially similar" past convictions. Hearings will have to be held to determine what is a "substantially similar" offense. I would

estimate that at least 10-20% of the cases which involve Alaska's highly transient population would require such hearings.

2. **AS 28.15.291 - Driving While License Suspended Mandatory Penalties**

(a) There are essentially two ways that a driver's license can be revoked. The first is a court ordered revocation or suspension. This occurs usually at sentencing after the defendant is convicted of reckless driving or driving while intoxicated. The judge personally advises the defendant that his license is revoked and that mandatory penalties will be imposed if he drives.

The second method of revocation is an administrative revocation which occurs if the defendant has accumulated too many points on his license or if he is the registered owner of a car involved in a property damage accident of at least $500. These "administrative" suspensions are determined by hearing officers. Usually the driver is notified through the mail that his license will be suspended. The vast majority of administrative suspension charges coming before the court are due to the defendant's failure to comply with the SR-22 financial responsibility requirements.

Under the proposed legislation the type of suspension, whether court ordered or administrative is irrelevant. The defendants are treated as equally culpable. One defendant is likely a DWI offender who has been ordered not to drive. The other defendant may have a blameless record but be fiscally irresponsible as to a single accident. Mandatory minimum penalties may be wise as to the first offender but not as to the fiscally irresponsible offender. Financial responsibility should be approached through compulsory insurance or some more realistic and less costly avenue.

(b) Any kind of mandatory fine legislation is not a cost effective approach to punishment. Oftentimes the court and related enforcement agencies spend five or ten times the amount of the fine trying to collect it. If a person is arrested for failure to pay a fine and he agrees to pay the fine then the court must release the offender from custody. The "bench-warrant-release-for-payment" merry-go-round is a losing proposition. Fines should be left to the discretion of the court which can fashion other means, such as community service, to equally penalize indigent defendants.

(c) I assume that throughout the legislation language referring to "minimum sentence served" properly credits goodtime as required by statute.

3. **AS 28.35.030(a)(2) - Chemical Tests**

The language should be amended to reflect that the chemical test may be within four hours of the defendant's operation of the vehicle but that the test must show .10 or more at the time of operation. There have been a surprising number of cases in which the defendant claimed to be driving sober, slid off the road, walked to the bar, drank to intoxication and was arrested for DWI hours after the car was abandoned. The Municipality of Anchorage proposed a similar ordinance in the past and much litigation was generated over simiarly vague language.

4. **AS 28.35.031 - Immediate Operator License Revocation**

This proposed legislation creates absolutely nightmarish consequences for the court, prosecution and police. A court review to be scheduled within seven days of arrest would require the establishment of a sub-bureaucracy to coordinate court scheduling, witness subpoenas, proper notice to necessary parties, etc. The current court calendar could not accommodate such hearings. A new judicial officer, an in-court clerk to record proceedings, and clerical staff, not to mention hearing room, which we do not have, would be required.

5. **AS 28.35.032(a)(b)(d)(g)**

Does a person who refuses a breathalyzer test but agrees to a blood test, which would accomplish the same result, suffer the same consequences as the person who refuses all chemical tests?

6. **AS 28.05.045 - Impoundment of Vehicles**

A cursory review of the entire scheme of impound legislation suggest some problems in the proposed legislation.

What does impoundment of a vehicle accomplish that confiscation of license plates would not? An offender intent on driving will beg, borrow or otherwise obtain a car to drive. A borrowed car driven by a license-suspended driver is much more difficult to detect than a car driven down the road without license plates.

Although not directly a court concern, the problems of storage, insurance and potential civil liability for both proper and improper impoundment are enormous.

Court involvement in the proposed forfeiture legislation is significant. At minimum, in Anchorage, a judge and support staff would be required. Further the court is not the moving party in the forfeiture and therefore has no responsibility to ascertain parties who may have ownership or security interests in the vehicle in order to notify them of the forfeiture action. That burden is upon the prosecution.

My review of the legislation has been at best, brief. I urge you to carefully consider the total impact of the proposed legislation. The impact on the Anchorage district court, which is struggling to meet an increasing caseload, will be severe if this legislation is passed without adequate attention to the needs of the court which must faithfully and fully carry out the legislature's dictates.

I will be pleased to respond to any questions you may have and assist you in any manner you deem appropriate.

Sincerely,

Elaine M. Andrews

SUBJECT: Driving a motor vehicle while intoxicated (CSHB 6 (Judiciary))

TO: Representative Mitchell E. Abood, Jr.

FROM: Tamara Brandt Cook
Legislative Counsel
TBC

Here is the sectional analysis of the draft of CSHB 6 (Judiciary) that you requested. It only highlights the major changes to existing law.

Section 1 makes it clear that a judge or employee of the court, in addition to other named persons, may take possession of a title, registration, or license that is revoked, canceled, limited or suspended. This is not a substantive change to existing law.

Section 2 adds new requirements for a driver's license application examination: (1) that the applicant know the effects of alcohol and drugs on drivers and the related dangers of driving under their influence; and (2) that the applicant know the laws relating to driving while intoxicated.

Section 3 authorizes, on refusal to submit to a chemical test of breath or if a test indicates an alcohol concentration of 0.10 or more, the seizure of the driver's license by the law enforcement officer and revocation of the license by the Department of Public Safety. The officer reads the driver a notice and gives him a copy of the notice. The notice explains the revocation procedure and the right of court review. The notice itself is a temporary driver's license that expires in seven days unless the driver initiates court proceedings to rescind the revocation of license. The revocation periods are the same as those imposed by a court after conviction of the same offenses under Sec. 6 of this draft. A revocation is stayed if the person initiates a court action to rescind the Department of

Public Safety's action. Procedures for court review of an administrative revocation are set out.

Section 4 adds a new basis for the immediate revocation of a driver's license by a court: the refusal to submit to a chemical test of breath.

Section 5 extends the period limited license privileges from 30 to 60 days for offenses that are grounds for immediate revocation of a license. This does not apply to driving while intoxicated or refusal to submit to a chemical test of breath. Adds a requirement that a prior offense must occur within 15 years before longer periods of license revocation will be imposed.

Section 6 requires a court convicting a person of driving while intoxicated or refusal to submit to a chemical test of breath to revoke the person's driver's license. The period of revocation depends upon whether the person has been previously convicted in this or another jurisdiction of either offense within the preceding 15 years. If the person has not been previously convicted, the period of revocation is 90 days. If the person has been convicted once, the period is one year. If the person has been convicted more than once, the period of revocation is 10 years. Under existing law the court shall revoke the license of a person for not less than 30 days for the first conviction. The court shall revoke the license for not less than one year for a second conviction. The court shall revoke the license for not less than three years for a third or subsequent conviction.

Section 7 allows a court to grant limited license privileges for the final 60 days a license is revoked for driving while intoxicated or refusal to submit to a chemical test if the person has not been previously convicted. Existing law also provides for limited license privileges only for first offenders.

Section 8 removes the reference to a person convicted of driving a motor vehicle while intoxicated with reference to limited license privileges, since periods of revocation are established under Sec. 6 of this bill.

Section 9 provides that the license of a person on whom a limitation was placed is revoked after the period of limitation until the person provides proof of financial responsibility and receives a new license.

Section 10 limits the penalties imposed under existing law for driving while a license is canceled, suspended, revoked or in violation of limitation to situations involving loss of driving privileges for reasons other than driving while intoxicated or refusal to submit to a chemical test. Those situations are dealt with under Sec. 11 of this bill.

Section 11 provides a minimum penalty of 30 days imprisonment and a fine of $500 for driving when driving privileges have been revoked for driving while intoxicated or refusal to submit to a chemical test if the person has been convicted only once within the previous 15 years. If the person has been convicted more than once of driving while intoxicated or refusal to submit to a chemical test and drives while driving privileges have been revoked, the minimum penalty is 90 days imprisonment and a fine of $1,000.

Section 12 provides that upon expiration of a period of limitation the driver's license remains revoked until the person furnishes proof of financial responsibility. Under existing law the period of limitation continues and the person may continue to drive, subject to the limitation, until proof of financial responsibility is furnished.

Section 13 changes the penalties for conviction of driving while intoxicated. If a person has not been previously convicted within the preceding 15 years of driving while intoxicated or refusal to submit to a chemical test, the minimum sentence of imprisonment is 72 hours, and a fine of not less than $250 imposed. If a person has been previously convicted once, the minimum sentence of imprisonment is not less than 20 consecutive days and a fine of not less than $500 is imposed. If a person has been previously convicted more than once, the minimum sentence of imprisonment is 30 days and a fine of not less than $1,000 is imposed. The five-year period used for calculating the number of convictions required to increase the penalty has been eliminated, so that all previous convictions occurring within the preceding 15 years are considered. A conviction in this or another jurisdiction, if the elements are substantially similar, is counted for purposes of determining enhanced penalties. The provision for suspension of sentence after the minimum sentence is served has been eliminated. The vehicle used in commission of the offense may be forfeited.

Section 14 requires a person involved in an accident or who commits certain serious traffic offenses, or drives in a manner that creates risk to a person or property to submit to a preliminary breath test that may be used by an officer in determining whether to arrest the person. Refusal to submit to the test is a violation punishable by a fine.

Section 15 makes it clear that refusing to submit to a chemical test after being arrested constitutes the crime of refusing to submit to a chemical test. Refusing to submit to the preliminary breath test provided for in Sec. 13 of this bill is a separate offense.

Section 16 provides new penalties for refusal to submit to a chemical test which are similar to the fines and terms of imprisonment imposed for driving while intoxicated under this bill.

Section 17 removes provisions allowing the district court to find extenuating circumstances and to modify or nullify the suspension or revocation of a driver's license or permit for refusing to submit to a chemical test of breath.

Section 18 adds new sections providing for the forfeiture of a motor vehicle used in the commission of an offense under AS 28.35.030 (Operating a Vehicle, Aircraft or Watercraft While Intoxicated), and also for the forfeiture of a motor vehicle used in the commission of an offense under AS 28.-35.032 (Refusal to Submit to a chemical Test of Breath). In addition, provision is made for the remission of forfeitures, a procedure to allow a person with ownership or security interests in a forfeited motor vehicle to claim the vehicle or interest in the vehicle through court proceedings. A municipality is granted authority to provide for impoundment and forfeiture of a motor vehicle in similar circumstances.

Section 19 repeals provisions that have been replaced by other provisions throughout this bill.

Rep. Ron Wendte

FROM: Karla Forsythe, KKF General Counsel, Alaska Court System

DATE: April 29, 1983

SUBJECT: CS for SS for HB 7, "An Act relating to motor vehicles"

The above-entitled act is scheduled for hearing before the House Judiciary Committee on Monday, May 2, 1983.

The court system has several concerns with the proposed legislation, all of a technical nature.

Proposed AS 28.22.500 provides that it is a class B misdeamnor for a person to drive or permit to be driven a vehicle for which a liability policy is not in effect. The enforcement scheme set forth in proposed subsections (b) and (c) raises problems because it inappropriately combines existing procedures for issuance of citations with procedures for submitting proof of compliance with traffic laws, and with procedures for bail forfeiture. Specifically, subsection (b) cross-references AS 28.05.151. That statute authorizes the supreme court to adopt by order a bail forfeiture schedule for those traffic offenses amenable to non-judicial disposition. The rationale behind a bail forfeiture system is that certain minor offenses are adequately punished with a mail-in fine upon a plea of guilty, a procedure which frees the court calendar for judicial disposition of serious offenses. Only minor offenses appear on the traffic bail schedule.

The sentencing procedures set forth in subsections (c) and (d) make it clear that driving without insurance is a major offense. Moreover, since license suspension is required, defendants will be entitled to a jury trial. Use of bail forfeiture procedures does not meet the legislative intent nor the legal requirements for processing a serious offense such as driving without insurance.

The legislation also provides that when proof of insurance is submitted to the court, the charge shall be dismissed. There are several types of offenses under current law for which a charge will be dismissed upon showing proof of compliance. Two examples are driving without a license (AS 28.15.131) and equipment violations (13 AAC 04.008). Proof of compliance (either by showing a driver's license or by showing that the defective equipment has been repaired) shall be given either to the law enforcement agency, or, in the case of a driver's license, to the court.

Requiring that the court alone shall accept proof of compliance adds to the court system a task which duplicates procedures of other agencies in many areas of the state, and adds to the court's clerical burden.

The following language would eliminate the problems created by the existing proposal, while still meeting the legislative intent:

(b) If a peace officer has probable cause to believe a motor vehicle was used in the commission of an offense under (a) of this section, a citation will be issued. The charge will be dismissed if evidence is presented within five days showing insurance policy coverage as required by AS 28.22.010 was in effect at the time the citation was issued.

This language is more workable because it eliminates a reference to the bail forfeiture procedure, and because it allows sufficient flexibility for proof of compliance to be submitted either to a court or to the appropriate enforcement agency, as convenience warrants in different locations throughout the state.

The Department of Law in its fiscal note has estimated that several hundred new prosecutions will be commenced as a result of this legislation. It is difficult to quantify the impact on the court, particularly since the Department of Law believes there will be no fiscal impact on its operations. However, any new hearings will add to the already considerable workload of the district court, particularly in Anchorage, and may require additional judicial and clerical resources, depending on the volume of cases filed.

Finally, proposed AS 28.22.530 requires that if the court orders forfeiture of a vehicle, the court shall within five days provide notice of the forfeiture to all persons with ownership or security interests. Requiring the court to give notice is inconsistent with the court's traditional role as impartial adjudicator, and is a requirement more appropriately placed with the moving party. Should this function remain with the court, additional clerical resources will be required in proportion to the number of forfeitures ordered.

Since the Department of Law has agreed to make a change along these lines to a similarly-worded section of HB 6, an amendment to require the state rather than the court to provide notice appears in order.

If the committee has any questions regarding these comments, or if additional information is needed, the court system will be glad to respond.

ACTION NARRATIVE

TAPE#A, Side A
Recording
Number 0001 Chairman Abood called the meeting to order and indicated the members present.

Number 0047 Chairman Abood said, "the performance requirements stipulated in Mr. Hudson's contract were necessarily broad in nature

and general in tone. The extent of application and even more important the cope of the problems simply were not known at the time.

He said the employment of a Non-Attorney to conduct this search was, "to produce a plain language action plan that can be understood by the common man".

Chairman Abood said, because the question of "constitutionality" required professional counsel from attorneys with experience and knowledge in the complex arena, he felt that House State Affairs should go directly to the attorneys with the most recent experience expertise. Ron Zobel, former Attorney General Avrum Gross and his assistant Susan Burke.

Chairman Abood said that it was invaluable to obtain the perspectives of three persons, who only recently had argued both sides of a major case before the U.S. Supreme Court and more so since that decision centered largely around the use of Durational Residence as a requirement for disbursement of millions of dollars to the Alaska public and felt surely their input was relevant.

Chairman stated it was also deemed necessary to receive input from the general public. Questionnaires were sent to select persons and groups with a vested interest in major programs under study due to the residency question.

Chairman Abood added that with the aid of Attorney Susan Burke, the House State Affairs hoped to present a full picture of what the problem is, what needs fixing, what should be left alone and hopefully, will leave a guide for future Lawmakers to use in determining how to employ the use of, as a requirement, in a manner that should minimize litigation and comply with the U.S. Constitution."

Number 0124

Chairman Abood announced that Susan Burke was present and that she would be the attorney assisting us with residency. He pointed out that she handled the case that went before the U.S. Supreme Court.

Number 0146

Chairman Abood said the use of durational residence as a requirement in Alaska Statutes have been found in 53 separate authorities. Durational residence exists in Statutes pertaining to HOLDING PUBLIC OFFICE, NUMEROUS LOAN PROGRAMS, SOME REGULATORY AND ADVISORY BOARDS AND COMMISSIONS, FOR SOME OCCUPATIONAL LICENSES, TO VOTE IN ALASKA, TO OBTAIN A RESIDENT FISHING AND HUNTING LICENSE, TO SELL ALCOHOLIC BEVERAGES, TO OBTAIN AND GAIN PREFERENCE FOR LOW COST HOUSING, TO PARTICIPATE IN LAND LOTTERIES, TO RECEIVE PARTIAL FORGIVENESS OF DEBT OWED THE STATE FOR LOANS ON LAND PURCHASED AND STUDENT AID GIVEN, TO OBTAIN RESIDENCE IN ONE OF THE FIVE PIONEER'S HOMES AND TO RECEIVE THE LONGEVITY BONUS AND FINALLY THE DIVIDEND FROM THE PERMANENT FUND EARNINGS.

Number 0151

Chairman Abood made note that the length of residency is used throughout the Statutes and vary from 30 days to 30 years. The benefits authorized by these laws represent millions of dollars and affect the lives of thousands of Alaska's citizens.

Number 0168

Chairman Abood said when the ZOBEL v WILLIAMS U.S. Supreme Court decision came down last June 14, 1982, many doubts surfaced over the fate of other state Statutes that used durational residence as a prime requirement.

He added that the House State Affairs Committee had been given the task to review all such Statutes and to recommend changes that are needed to reduce or minimize the states potential liability in these residence based matters.

Number 0172

Chairman Abood said he had contracted the services of Mr. Hudson to assist the committee to determine what statutes use durational residency to develop a methodology, to use as a measure of each statute against the U.S. Constitution; and to recommend action required to bring the laws in conformance with the Constitution of the United States of America.

He said that Attorney Susan Burke had been hired under a separate contract to prepare a draft bill on bona fide residence.

Number 0183

Chairman Abood told committee members that he had not hired Avrum Gross, or Ron or Penny Zobel. He said that Bill Hudson and Susan Burke were the only two hired to assist the committee.

Number 0223

Representatives Shultz and Furnace joined the meeting at 1:30 p.m.

Number 0250

Dove Kull comes to the stand. She said she was an older Alaskan and a member of the Older Alaskan Commission, although she was speaking for herself. She recommended we use the congut housing formula, using 1/4 of your income for payment and work out a formula. She was disappointed that she did not receive the longevity bonus and felt that many older Alaskans were counting on that money. Ms. Kull said that those older Alaskans that lived here earlier had hardships to endure. She told the members of the committee that 60% of the elderly in Alaska are low income or poverty and to keep that in mind when the Longevity and Pioneers' Home Program come up.

Red Swanson, Legislative Committee for the Pioneers of Alaska came to the stand. He said that 2,000 people responded to a survey he sent out and that results of the survey indicated that 99% wanted to go to court over the longevity bonus. He said that his committee was preparing a position paper on the subject. He said they were willing as a committee to work with anyone to protect the rights of older Alaskans.

Number 0394

Chairman Abood instructed Mr. Swanson that if he had an input to bring it to the committee as soon as possible, because time was a factor. He told Mr. Swanson that his committee was not responsible for funding and that the purpose of the hearing today was to define what makes a Pioneer. He suggested that Mr. Swanson meet with Mr. Hudson on his concerns.

Number 0430

Marge Gray of Homer comes on the teleconference network. She asked some questions of the committee. She said that no other state gives to their old timers like Alaska. Chairman Abood agreed that we were the most lenient with our programs to older Alaskans.

Number 0483

Robert Gray of Homer comes on the network. He told the committee that after reviewing the questionnaire it was his assessment that the issue at hand was the time frame requirements be examined and compared with other state laws.

Number 0540

Chairman Abood reviewed the following Durational Residency Requirements with members of the committee:

ACTIONS

1. PUBLIC OFFICERS

(A) FINDINGS: That substantial reason exists to justify the use of longer terms of residence in determining qualifications to hold major Public Office.

RECOMMENDATIONS: Take no action, the Statutes and Constitutional references are likely in compliance with the U.S. Constitution.

2. BOARDS AND COMMISSIONS

(B) FINDINGS: That the durations currently used are inconsistent with the Purpose stated in several of these Statutes and serve no valid public interest. Further that any duration beyond one year could be challenged and may be found invalid.

RECOMMENDATIONS: That you consider repealing the existing durational residence requirements in all of these laws and substitute the Bona Fide residence required to be prepared by Attorney Susan Burke.

That the Statutes be amended to require Bona Fide residence and and a reasonable number of years experience in the two laws relating to the Board of Registration for Architects, Engineers and Land Surveyors and the Guides Licensing and Control Board. Some exceptional experience appears useful and defensible.

Number 0556

Brian Merrit of Wrangell talked about the student loan. He said he felt 2 years for residency should be maintained as it is currently. He said that if we lower it, students from outside will ruin it for other

students who reside here.

Number 0573 — Rep. M.M. Miller arrived at 2:35 p.m.

Number 0600 — Lenore Gunderson of Wrangell said she was the City Clerk. She found fault with the residency requirements and said that she knew of people who are registered voters, vote absentee continually and live outside the state. She felt we should require more proof in residency.

Number 0618 — John Dapcevich, Mayor of Sitka, said he was a strong believer in the State's rights. He talked of the class action suit that our stude[illegible] filed for having to pay high tuition rates for attending school outside of Alaska. He recommended it be referred to the Department of Law.

Number 0645 — Merl Thomas of Fairbanks endorsed Red Swanson's testimony and concurred with Mayor Dapcevich.

Tape A, Side B
Recording
Number 0045 — Chairman Abood referred back to Durational Residency Requirements:

3. OCCUPATIONAL LICENSES

FINDINGS: The courts have already ruled against the use of any duration of residence as a requirement for an attorney's license (NOLL v BAR ASSOCIATION), and only simple resident is permitted. A thorough review of the records indicated little tolerance by the courts in the use of any specific length of residence that might bar the employment of an individual's occupational skill between different states.

RECOMMENDATION: Amend the statutes dealing with the following occupations as listed below. Repeal the present residence requirements and substitute a simple residence in its place.

	TITLE	DURATION (PRESENT)	AUTHORITY
1.	Public Accountant	1 yr	AS 08.04.280
2.	Attorney	Residence	Bar Rule 5(1)(a)

3.	Collection Agencies	1 yr	AS 08.24.110
4.	Morticians	1 yr state appren.	AS 08.42.110
5.	Guides...		
	Master	Residence plus hunting exp.	AS 08.54.100
	Registered	Resident	AS 08.54.110
	Class A Asst.	20 yr exp. in district	AS 08.54.120

6.	Junk Dealer	Resident def.	AS 08.60.030
7.	Real Estate Brokers and Salesman	Resident	AS 08.88.171
8.	Insurance Brokers, Agents & Solicitors	1 yr	AS 21.27.090
			AS 21.06.250
			AS 21.27.220

For other licenses listed under this category such as the Alcoholic Beverage License and the Resident Fish & Game License, he recommended to repeal the present durational residence requirement and subsitute as follows:

1. Alcoholic beverage license - replace with simple residence. There appears to be no reason for duration in the state except to serve as a prohibition in receiving a license.

2. Resident Fish & Game License - he recommended the Committee substitute bona fide residence.

4. PUBLIC RIGHTS & BENEFITS

FINDINGS: The 30-day requirement to vote in Alaska is most probably constitutional and should stand.

That the one year requirement for the following programs appears excessive, especially the Low-Cost Housing Preference program which the courts would likely construe as a "basic necessity of life" wherein no durational residency has been permitted before in the courts.

1. Annulment of Marriage.

2. Low-Cost Housing Preference Program

3. Vocational Substitute Program

4. Industrial Incentive Tax Credits

5. Bounties for Certain Animals

RECOMMENDATION: No change is necessary for AS 15.05.010 (Voting), unless the Committee chooses to substitute simple residence and require 30 days in which to handle the registration process.

That the other laws be modified to simple residence.

That the Legislature consider the repeal of AS 43.26.095 (b)(3) and AS 16.35.130, which are the Industrial Incentive Tax Credit and Bounties for Certain Animals; neither of these programs have been active in years.

Number 0082 — Ellisa Demattio of Anchorage said she didn't like the requirement of having to have an Alaskan diploma to attend school. She was concerned about older Alaskans who did not graduate in the state. Rep. Furnace informed her that it was only proposed to given Alaskan students first, but the proposal was dropped by Sen. Sackett. She felt that 2 year residency requirement should stay as it is currently.

Number 0190 — Edna Hale of Haines said that she has three children that have attended college under the student loan program, because otherwise they would not have been able to go to college. She felt that 1 to 2 year residency requirement was all right.

Number 0204 — Chairman Abood referred back to the Durational Residency Requirements:

5. LAND DISPOSAL PROGRAMS

FINDINGS: The State is awaiting the ruling on the Kenai Borough Land Disposal Program and should probably make no changes pending settlement of the matter.

RECOMMENDATION: That the Committee takes no action until the decision of the court in the Kenai case.

Number 0218

Alaska Linck of Fairbanks said she was a 65 year plus residency of Alaska. She said older Alaskans have very little time left in their lives and found no fault with the past requirements that were challenged in court.

Chairman Abood referred back to the Durational Residency Requirement.

Number 0292

6. SPECIAL OLD AGE PROGRAMS

FINDINGS: The greatest problem with durational residence before the Legislature rests with the twin Pioneer's programs; the Alaska Longevity Bonus Program and the Pioneer's Home Program.

The settlement reached in the Vest case on August 25, 1982 is a mandate to the Legislature to take corrective action immediately. Clearly, with regard to the Longevity Bonus, maintaining the 25 year pre-statehood residency requirement is a lost cause. A one year duration of residence appears to be an acceptable replacement.

Number 0301

Chairman Abood said that mandate for the Legislature to take corrective action or the Courts will. Clearly with regards to the ALB the 25 year durational residence with the requirement that it commence before State hood is lost. A one year duration of resi nce appears to be an acceptable replacement.

With regards to the PIONEERS' HOME PROGRAM, he concurred with the opinion rendered by former Attorney General Wilson Condon that the program is probably defensible with its unique 15 year residency requirement. It is not established as a welfare home and it does not deny anyone needing such care from

receiving it through other programs offered by the State.

Number 0326

Chairman Abood said that fifteen years was reasonable to use as a measure of attachment to the state by citizens who must be 65 years old and the average age of which is 82 years old. The Homes are just that Homes for elderly Alaskans who would likely be forced to leave their state were it not for the Pioneers' Home. He said a measure of attachment and Allegiance for these category folds would not be met with a simple one or two year requirement.

Number 0338

Chairman Abood said he had found that the SPECIAL ASSESSMENT AND FISHING LICENSE EXEMPTIONS ARE probably not well founded and would not stand up under a test.

RECOMMENDATIONS: That you call for the repeal of the 25 year, Pre-Statehood eligibility requirements and substitute the Bona Fide residence requirements in Susan Burke's Bill draft.

That the Legislature consider carefully the future of this important program. I believe there may be other FUNDING SCENARIOS beyond those listed in Jon Tillinghast's report to the Senate Judiciary Committee. I have ideas that may aid in finding a good long term solution. Though it falls outside the terms of my contract, I would be pleased to work with whatever body is designated to handle this problem and opportunity.

Number 0372

Chairman Abood said he recommended no immediate changes to the PIONEERS' HOME Program. Rather the need to develop a fall back plan in case it suffers from some action by the courts similar to the ALB.

That the ASSESSMENT AND FISHING LICENSE exemptions be determined by Bona Fide Residence requirements being developed by Susan Clark.

Number 0363

Jo Jones of Anchorage said he was in support to do something about the need to strengthen our residency requirements, with emphasis on Small Business and employer. He said that it worked in other states so it is possible to work in Alaska.

Chairman Abood referred back to the Durational Residency Requirements:

7. LOAN AND GRANT PROGRAMS (G)

FINDINGS: That there is a great deal of inconsistency in the established requirements for residency in these 41 programs. That many programs require no residency, that one even states that it is open to nonresidents and that I was not able to find documentation to affirm the justification for many of these varying durations of residence.

That the STUDENT LOAN PROGRAM is pending in ANDRESS v BAXTER and should be left alone until the courts are done with the case. However, I will present a separate paper on these issues as relate to the forgiveness clause and application of the low interest provisions. This will be outside of this report.

Number 0413

That THE FISHING LOAN PROGRAMS now probably require excessive, non-defensible durations of residence, but that the one year Bona Fide residence requirement may not provide adequate measure of these MIGRATORY applicants. I tend to agree with the Director of Legislative Legal Council, that a more rational duration would be two years.

Number 0417

Chairman Abood said that the programs listed in No. 4,5,6,7,8 and 10 will and likely be best served to use the Bona Fide Residence Requirement. That residence requirements for REFUND OF POLITICAL CONTRIBUTION AND CHILD CARE EXPENSES most likely fall in SIMPLE RESIDENCE requirement, since they fall under the category of POLITICAL RIGHTS AND BASIC NECESSITIES OF LIFE, and the courts do not support durational residency in these matters...

Number 0425

RECOMMENDATIONS: 1. That no action be taken on the Student Loan programs until courts conclude.

2. That you consider repealing the present 5 year residence requirements in the Fisheries Loan programs and substitute a 2 year residence requirement.

3. That you consider applying a Bona Fide requirement for all other loan programs as a normal course of action, except where the program relates to "Basic Necessities" or "Political Rights".

Number 0438 — Betty Huffman of Fairbanks said she supported Red Swanson's testimony. She wanted to see the residency requirement continued. She said many older Alaskans need longevity bonus' to live in the state.

Number 0460 — Leo Land of Haines felt that you should prove your residency with a birth certificate, letters of affidavits, or church records; rather than with a voter's registration card.

Number 0501 — Bert Sharp of Fairbanks felt that challenging the residency requirement has resulted in the destruction of the fine programs for the Pioneers of Alaska. He said longevity bonus should be top priority with the legislature.

Number 0532 — Bob Anderson of Yakutat concurred with Mayor Dapcevich's testimony. He felt that Pioneer's Home should run 65 years or older and should be a resident of Alaska for 25 years.

Number 0559 — Louis Odsather of Mat Su Valley said that we should establish a residency requirement so that any results will not bankrupt the State.

Number 0690 — William Richardson of Sitka, said he wanted to draw to Susan Burke's attention that the state of Colorado has a 35 year eligibility program requirement.

Number 0616 — Robert Gore of Ketchikan said that Arizona Pioneer Home residency requirement was 30 years. In Montana, Idaho and Utah, it is 20 years. He felt that we should be able to do the same here.

Tape 2, Side A
Recording
Number 0049 — Mr. Perry of Mat Su Valley said he sympathizes with the legislature, but believed that Alaskans who had lived in the territory or state before statehood should have longevity bonus.

Number 0087 — Norma Lundy of Anchorage wanted to know if other members of the Older Alaskans Commission had testified, because she arrived late. Chairman Abood said yes.

Number 0228 — Susan Burke said she viewed her job as advising the legislature if a particular ruling would be held unconstitutional in a court of law.

Number 0294 — There being no further business to come before the committee, Chairman Abood adjourned the meeting at 3:00 p.m.

MANDATORY AUTO INSURANCE: THE OTHER SIDE

by Jeff Day

In the book, "The Invisible Bankers," author Andrew Tobias wrote:

Insurance lobbyists outnumber all others in virtually every state. "Our strength?" pondered one. "It comes from having a group of people who tell a story that is logical and reasonable to a group of people who don't have the slightest idea what you're talking about."

This report is to try and provide the information not often volunteered by the industry in the hopes that those who act on this legislation will begin with at least the slightest idea of what we are talking about and why the sponsors believe a mandatory insurance law is needed.

This report is based on a review of approximately 200 newspaper articles published between 1978 and 1982, industry publications, prior research reports and interviews with insurance and public safety officials conducted in April 1983 in a half dozen states with mandatory laws.

THE INDUSTRY SIDE

The insurance industry has traditionally opposed the imposition of a mandatory insurance law. Yet 32 states have enacted such a law beginning with Massachusettes in 1927. Some of the newest laws are those in Arizona which went into effect January 1, 1983, Nevada, Wyoming and Texas January 1, 1980 and Oregon January 1, 1979.

The opposition from the insurance industry is usually summed up in three broad statements:

1. You can't achieve 100% compliance with the law
2. It's costly to administer
3. It raises insurance premiums

The insurance industry has done an excellent job projecting that message to legislatures that consider such a law. Letters to legislators on the subject are basically no more than a regurgitation of a position paper published several years ago by State Farm, the largest insurance conglomerate in the nation. But that report relies on generalities, quotes that are 20 years old and information which is extremely outdated.

THE ALASKA SITUATION

While definite statistics are impossible to come by, it is estimated the number of unisured drivers in the state is between 11% and 40%. A survey of accidents over a two year period in 1980 and 81 showed that 20% of those involved in an accident were uninsured. Alaska has about 380,000 registered vehicles.

In the 1982 report from the Division of Insurance, Insurance Markey analyst Norm Cheney wrote:

"Even with the inherent inadequacies of this system... we estimate 59.5% were insured (in 1980). We have re-evaluated the data base used in previous reports and find that the statistics for the total number of autos were misstated. We have corrected the deficiencies and now have what we believe to be the most accurate possible estimation of the number of uninsured motorists." (emph added)

That number of uninsured was 40%!

Cheney wrote, "The thought that approximately 40% of Alaskans on the highways are uninsured is unsettling at best. Reasons for the large numbers of uninsured drivers are illusive. There does not appear to be a lack of available markets, and rates, in general, are not excessive."

In October 1980 a newspaper story noted that 40% drove uninsured in Alaska...a 12 % increase over five years. Division of Insurance director Ken Moore was quoted as saying," The horror story isn't over. These figures are not unlike those in other states with no mandatory automobile insurance laws."

Moore also added,"I'm not necessarily opposed to compulsory insurance, but because of the bad record of states with it, it makes me gun shy."

DMV Commissioner William Nix was also quoted in 1980 as saying that states with mandatory insurance only achieved a compliance rate of 90-95%. Remember, this statement was made when Alaska was thought to have a 40% uninsured population.

Nix also stated that he thought Alaska's financial responsibility laws were among the toughest in the nation and that the penalty of a three year license suspension was an "inducement to have people meet their obligations."

With a 40% uninsured population, that evidently wasn't much of an inducement. Nor have financial responsibility laws alone provided inducement in other states. That is why over 30 states have adopted mandatory insurance laws.

Mandatory insurance has been proposed in Alaska before. One of the reasons mandatory insurance failed before is because of the very reason Tobias stated above at the outset of this report.

Road and weather conditions in Alaska tend to make the potential for an accident fairly great. The requirement of insurance is not only intended to keep poor drivers off the road and ensure that drivers at fault compensate victims but also to protect responsible drivers.

There are probably many marginal drivers who would buy insurance if they were forced to. Some accidents don't result from specific negligence. Sliding through an icy interesection in winter is one example. The result can be hundreds or thousands of dollars of damage that the generally good driver would have to pay, in addition to meeting the requirements of our current financial responsibility laws which are aimed are the problem driver.

It makes sense to provide the added incentive this bill will provide to encourage the good driver to buy insurance to protect both himself and others.

LAWS IN OTHER STATES

Insurance laws enacted in other states are basically variations on a theme. When the consumer awareness movement reached a peak in the mid 1970's, no fault insurance became "in." A number of states now have mandatory no fault laws or a combination mandatory no fault/fault requirement. Some states have only mandatory auto liability such as SSHB 7 proposes to enact. There are likely inequities in both fault and no fault insurance. This report does not intend to compare the two but rather to focus on the mandatory requirements in states regardless of the type of insurance.

Massachusettes became the first state to enact a law. It requires proof of insurance at time of registration. It is also mandatory that uninsured and underinsured insurance are carried. In most states it is only mandatory that insurance companies offer this coverage as would be done under HB 7.

New York and North Carolina followed with mandatory laws in 1957. New York added a no fault law in 1974. The New York law requires the insured to have two cards as proof of insurance. One is out in a file when the car is registered. The other must be kept in the vehicle at all times just as the registration is kept in the vehicle.

North Carolina, considered to have one of the most effective laws requires proof of financial responsibility to be shown at time of registration.

Some states tie both the registration and license to proof of insurance. Montana and Louisiana require proof of insurance in this manner.

Several states don't require actual proof of financial responsibility but rather that the applicant sign an affadavit certifying he is insured and will be insured when driving a motor vehicle. Such states also impose rather severe penalties for falsifying the certification in addition to driving without insurance. Arizona and Connecticut are examples of this variation. False certification in Connecticut brings a fine up to $1000 and a jail term up to five years.

Most states also require insurance companies to issue a card which must be kept in a vehicle which states the type and limits of insurance carried.

Overall, the general,procedures of mandatory laws are the same. Proof must be shown at time of registration or licensure. Cards are issued by companies to be kept in cars. The key to the system working is the method of enforcement.

ENFORCEMENT

The most repeated claim by the insurance industry is that the laws cannot be enforced. In one sense that is true. No one claims to have removed 100% of the uninsured from the road. But proponents in states which have enacted such laws knew in advance they would not achieve 100% compliance. However, is has been the potential to dramatically decrease the number of uninsured which prompted the laws. And I have found no example where the law has failed to reduce the number of uninsured motorists.

In states where the law is less successful than in others, it is usually because the enforcement mechanism is not as tight as those with lower uninsured populations.

The major criticism by the industry is that someone will get insurance just long enough to renew the registration and then cancel the insurance and keep the card which is good for a year. To get around that some states have required insurance companies to notify the Department of Motor Vehicles when a policy is cancelled by an insured. DMV must then notify the motorist who is given a chance to prove that insurance is in effect. This has the potential of creating a lot of peperwork depending on limits imposed upon the notification procedure.

Some states began with a law that required notification by companies anytime a policy was cancelled. North Carolina did this and became backlogged by notices. Most states which have tried this ran into the same problems.

To correct the problem, laws were changed to require notification by insurance companies of a cancellation only during the initial six months after a policy was issued. North Carolina has 4.8 million registered vehicles. Jim Stamey of North Carolina's DMV said this change cut the number of persons involved in enforcing the law from over 100 to about 5 troopers and 4 hearing officers. He also added that it's believed if a person is going to cancel, they will do so in that first six months.

Delaware changed it's law in 1979 to require notification by insurance companies only during the first year following issuance of a policy. Insurance Commissioner David Elliott noted,"Now we can concentrate on the first year people who cancel. We think they're the ones trying to beat the system."

New York requires notification of cancellation at anytime. With 6 million cars, the result became a large backlog. A new computer system is now being installed which should help ease this problem. It is interesting to note most states now implementing the law do utilize computers to a large degree which cuts the amount of staff needed and expedites the enforcement process.

Oregon adopted a law with unlimited notification provisions but changed it the following year. Currently a random sampling process is in effect. Each month about 1% of the motorists are checked for proof of insurance. There is no notification by insurance companies required. This process appears to work... so far.

Tony Dilorenzo of Oregon's DMV noted that the law originally cost about $1 million to enforce. The changes he said reduced the cost to about $100,000 for clerks and computer time.

Other states have not had such good luck simply going on a random sampling basis. Nevada easily passed a mandatory law in 1979 but even proponents were worried it would not be effective since it lacked a notification provision. Michigan did not adopt the notification procedures and reports indicate there were problems obtaining as high a level of compliance with the law as other states had achieved. Connecticut had similar problems.

But, in general it appears that those who adopted a notification procedure as proposed in HB 7 achieved the highest compliance rates with the least amount of paper work and cost.

Most states also require a motorist to show proof of insurance when stopped for a traffic violation. This is why the card is important, and it's important to ensure the card is legitimate through enforcement by notification of DMV by insurance companies.

If a policy is cancelled, DMV can flag it on a computer. It is relatively simple, then, when a driver is stopped to verify the legitimacy of the insurance card.

PENALTIES

The penalties for driving without insurance differ. Generally, they include fines and revocation of license and registration.

Michigan and Nevada impose a $100-500 fine. Wyoming has a maximum $750 fine plus revocation of registration. Oregon imposes a fine of $100 unless insurance is obtained within 15 days after a citation is issued. False certification at time of registration will bring a $1000 fine and up to a year in jail. In Connecticut, that offense brings a $1000 fine and up to 5 years in jail.

Georgia provides for a 60 day suspension of a drivers license and registration with a $25 fee to get it back. Louisiana imposes a loss of a license for 6-18 months, a fine of $125 and up to 30 days in jail.

Hawaii imposes fines of at least $100 and impounds the vehicle. Delaware allows 24 hours to prove insurance after a citation and then imposes a fine between $200 and $1000. Conviction results in revocation of driving priveleges until proof of insurance is shown. Indiana imposes a $500 fine and 60 days in jail.

Arizona mandates a $250 fine for the first offense. New Jersey imposes a $200 fine and up to 90 days in jail for the first offense.

In Minnesota a rather comprehensive approach is taken on any offense. As Patrolman Ray Schmidt explained, "We request that the driver park his car. We book the person with no insurance, take him to jail and have the car towed." Eventual penalties are a $500 fine, up to 90 days in jail and revocation of license and registration.

The penalties in these states are typical of those in other states.

EFFECTIVENESS

The insurance industry says compulsory laws have not been effective in removing the uninsured population. The results show just the opposite. In reviewing these statistics, it should be noted that Alaska's uninsured population is estimated to be as high as 40% at the current time.

North Carolina completed a study within the past year. DMV spokesman Jim Stamey said the results showed that 2-3% of the motoring public are uninsured...in a state of over 4 million vehicles.

Stamey said, "We consider the law to be the most effective in the nation."

In Oregon it was estimated 15-20% were uninsured before the law took effect in 1979. The figure after 7 months was 4.5%. DMV Administrator Harold Grover said, "The overall implementation appears to be pretty smooth. It is succeeding better than we expected."

Insurance industry representative Richard Clement even conceded the law was having beneficial effects. He said, "We've always been opposed to compulsory auto insurance. There have been some problems, but, quite frankly, it's gone quite smooth. So far our fears haven't been borne out."

In Louisiana, the administrator of the State Insurance rating commission noted that 65% wrere insured before the law took effect in July 1978. By the day the law became effective 80% were insured and the number was growing.

Minnesota has achieved a 5% uninsured population out of 3 million vehicles.

Before New Jersey adopted it's law in 1973, 7.4% of motorists involved in accident were uninsured. By 1976 the number had declined to 3.7%.

In New York, it was estimated that 10% of motorists were uninsured when the law went into effect in 1957. During early years of enactment that fell to 5%. New York has 6 million vehicles. It's estimated that about 6% are now uninsured. The lack of a computer system and the number of vehicles has made enforcement a problem. But Insurance division spokesman Stan Dorf noted there have been few bills introduced to amend or repeal the program.

Dorf said,"Even if premiums increased slightly as a result of such a law, which I don't believe they should, the program is worth it from a social standpoint."

DMV spokesman Joe Donovan said the current unenforceability of the New York system stems mostly from the number of vehicles. Legislation is now proposed that would require insurance companies to notify DMV only in the first six months after issuance of a policy.

Massachusettes has had some enforcement problems again because of the sheer number of vehicles but the estimated number of uninsured motorists is about 5%.

Montana enacted its law in 1979. The County Commisioner calls it "a good one."

In general, those states which have implemented a mandatory law in some form have achieved about a 95% insured population. And that is the goal many states had in mind when these laws were passed. 95% compliance would be a substantial improvement in Alaska just as it was envisioned to be in other states such as Texas which passed a law because 25-45% were estimated to be uninsured. Washington D.C. considered such a law in 1980 because 40-60% drove uninsured. Nevada passed legislation because 30-40% were uninsured according to Insurance Commissioner Don Heath.

Wyoming's Commissioner, John Langdon said the law was needed because 25-35% were uninsured. Connecticut passed a law in 1973 because 8% were uninsured. Florida considered the law because 45% were uninsured. West Virginia recently enacted mandatory insurance laws. Indiana enacted the law in 1982 because 13% were uninsured.

Arizona was the last state to enact such legislation because 40% were uninsured. Representative Bill English, who sponsored the bill said, " We need to take a firm grip on this. It's totally irresponsible to be driving on the streets without adequate insurance."

The conclusion is that 32 states have enacted such laws to achieve lower percentages of uninsured drivers despite vigorous opposition by the insurance industry. Only 2 have ever been repealed. This attests to the fact that the laws work because even states with enforcement snags don't advocate repeal of the law. The laws do work.

EFFECT ON PREMIUMS

In all the material researched for this report, no statement in fact was found that simply the introduction of compulsory insurance laws directly raised premiums. Even those that acknowledged the possibility that rates might rise slightly, encouraged passage of a mandatory law.

New Jersey assistant Motor Vehicle Director Seymour Blaustein said in 1979, "There's no getting away from the fact that as insurance costs go up, some people are dropping their coverage, but I think we've got good verification procedures that catch a lot of people without insurance."

Nevada Insurance Commissioner Don Heath said, "Rate increases are a reflection of the national economy. The mandatory law should bring a price downtrend for preferred customers."

When Texas adopted the law several years ago, Houston Representative Gene Green commented, "It's estimated insurance rates might go up 5-10% at most. If the insurance companies use this as grounds for raising rates, they're barking up the wrong tree because they have already increased rates every year I've been in the Legislatyre."

Generally, rates rise simply because of inflation. As Richard B. Neiley of the Insurance Company of North America explained, "Insurance rates are future cost projections. The means the insurance cycle is out of phase with the rest of the economy. When prices for general goods and services are rising, insurance rates are often stable. By the time the rate of increase in the price of other goods and services diminishes, data is becoming available showing insurance rates have not kept up with underlying costs. Insurance rates then increase rapidly and profits improve."

It is somewhat ridiculous to compare rate increases and premiums in one state to another. Dozens of considerations go into rate establishment and no state is identical to another. First, a rate has to be determined that will cover potential future losses and expenses and allow for a profit. Consideration is given to the trend in dollar cost per claim, the trend in number of claim payments showing the change, if any, in the number of accidents that occur, expenses and how large a profit margin a company wants.
The industry specifically makes this point:

Rates among the various 50 states can be widely different because of variations in the cost of repairs, medical care, weather patterns, and other geographic and demographic factors such as population density and traffic congestion.

Some states prohibit rating differences on the basis of age, gender, marital status. Assigned risk pools are different in many states in operation. The risk pool is the classification that so called high risk drivers are placed into. This pool is covered by all insurers. Some states subsidize the pool through fee charges on insurance or licenses. Some states have instituted a reinsurance plan which basically mandates companies to write policies at reasonable rates to all drivers again based on surcharges of everyones policies. Technical differences in any number of these areas can be the cause for distinct rate differences between states.

New York Division of Insurance spokesman Stan Dorf said, "Compulsory laws will not raise the premiums as the industry would lead you to believe. There are no more accidents even though more people are insured. It's also logical and proven that if more drivers are insured, the uninsured motorist premiums will, in fact, decrease.

Massachusettes Insurance rating bureau spokesman Howard Mahler noted that premium increases in policies tend to result as a result of inflation rather than a compulsory law. Despite some enforcement problems in that state, Mahler said the Registry of Motor Vehicles has expressed no desire to repeal the law.

COST OF ENFORCEMENT

Just a brief comment on the proposed cost.

Other states which have imposed the law usually note it costs between $1 and 1.5 million to enforce properly. The states saying this are those with 2 million, 4 million, 4.5 million or more vehicles.

Alaska DMV has given us a comparable fiscal note for a state with 380,000 registered vehicles.

It must again be noted that North Carolina has over 4 million vehicles. 4 hearing officers and 5 troopers are needed to enforce the program which has achieved 2-3% uninsured.

There is no dispute the program will cost money. It is hard it believe that enforcement for 380,000 vehicles will cost as much as that in a state with several million..even with a cost of living difference.

DMV spokesman Jim Stamey from North Carolina said in an interview that Alaska was in the best position of any state wishing to enact such a law because of the low population and the computer technology available.

Those states now adopting the law have made good use of computer time to lessen the need for clerical staff. Howard Mahler of Massachusettes encouraged the state to use computers to a great extent if we adopt a program.

MORE ON INDUSTRY OPPOSITION

The research indicates that the insurance companies opposition to mandatory insurance does not really hold up. The law can and has been enforced to an excellent degree in many states. Premiums don't rise simply as a result of a compulsory law. The provisions in this law make it less costly and bureaucratic that laws in other states.

So if these arguments are largely countered, and insurance companies stand to do more business as a result of this law what could be the opposition?

Some potential insight was provided in a statement by Insurance industry representative Richard Clement when he commented on Oregon's law shortly after enactment. He said, "We've always been opposed to compulsory insurance. We're afraid the Legislature is going to get into the business of establishing rates and that the state can form an insurance company."

The insurance industry is not federally regulated. It does not want any regulation. The move to adopt compulsory insurance is likely seen as an intrusion into an industry which wishes to be exempt from all regulation. Past history in other states has shown the need for regulation to maintain realistic rates. And, indeed, there are programs which have been enacted and which could be enacted in Alaska with the result of lower premiums but which would be opposed by the insurance industry.

Perhaps, the other reason the industry opposes mandatory insurance is because it might decrease profits.

It must be noted that, in statistics provided by the Alaska Division of Insurance for 1981, the top 30 companies doing business in the state earned $31.2 million in premiums for automobile liability coverage. Incurred losses totalled $19.6 million for a profit of over $11 million.

According to the July 19, 1982 edition of Best's Insurance Management Report, Alaska had the lowest loss ratio of ANY state for all automobile insurance, 56.1%. Nationally the loss ratio was 70.7%. Basically, this means insurance companies earned greater profits on a comparable amount of business in Alaska than they did outside.

The 1982 report from the Division of Insurance reported:

"We are quite happy with the state of the market in Alaska. Over the past 3 years, we have seen an increase in the number of companies pursuing a share of the market. We now have a very active non standard market helping to make insurance available at competitive prices to those drivers with numerous or serious violations on their driving records."

It might be suggested that more insurers are seeking to enter the Alaska marketplace because the profit margins are higher here. The auto insurance market has consistently been profitable for the past five years.

CONCLUSIONS

Research has indicated that the arguments put forward by the industry are at best, half truths. It does cost money to run an effective program. But it has proven effective in states with uninsured populations both greater and lesser than the uninsured population in Alaska.

Legislation can be passed that will result in a significantly higher number of insured drivers. CSHB 7 would do this. It incorporates notification procedures from other states which have proven effective and cost efficient. It provides strong incentives to buy insurance or find alternative modes of transportation.

Simply requiring insurance after the fact of an accident has not proved sufficient in this or in other states. I also suggest that our current financial responsibility law needs stricter provisions as well. This will be researched and proposed in the near future. In any case, the law as is or even as amended is not a strong enough incentive. Alabama does not have a mandatory law. It does have financial responsibility laws similar to Alaska's. Deputy State Insurance Commissioner Tharpe Forrester noted that 30% do not carry insurance despite the law although, as he said, "We strongly encourage them to carry it."

Research on this subject will continue in an effort to propose additional legislation at a future date which could result in lower premiums. A number of states have passed mandatory laws and then changed other insurance provisions to implement no fault or a reinsurance facility or changes in assigned risk pooling....BUT the mandatory law came FIRST.

That is what is proposed here. A mandatory law would be a significant step forward in attempting to decrease our 40% uninsured population. But it should be considered as one step in a multi faceted approach that should be continually pursued after the law takes effect.

This report will be updated as additional material becomes available.

1982 - STATISTICAL ANALYSIS
PRIVATE PASSENGER AUTOMOBILE INSURANCE

- SUMMARY -

In 1981, the majority of companies writing private passenger automobile liability and physical damage insurance in Alaska garnered a profit. The overall loss ratio for all admitted companies writing private passenger automobile insurance was 56.8%, 4.6% higher than the 52.2% ratio enjoyed in 1980.

According to the July 19, 1982 edition of "Best's Insurance Management Report" Alaska had, for the fourth consecutive year, the lowest loss ratio of any state for all automobile insurance, 56.1%. This includes commercial automobile and private passenger automobile insurance. The loss ratio nationally was 70.7%, 14.6 percentage points higher. A consistently profitable automobile insurance market is something few states have been able to maintain in recent years. We are quite happy with the state of the market in Alaska. Over the past three years, we have seen an increase in the number of companies pursuing a share of the market. We now have a very active non-standard market helping to make insurance available at competitive prices to those drivers with numerous or serious violations on their driving records. Good drivers have many different companies and a wide variation of prices from which to choose. On the negative side, we still find ourselves striving to overcome misconceptions and trepidatious underwriting by many companies. Being the largest of the United States, yet having a population of only just over 400,000 people does cause problems from a statistical credibility standpoint. Too often the negative results from other states have an influence on our market conditions. When profit conditions indicate a need for a company to tighten their underwriting, Alaska has in the past felt first the tightening rope of reduced availability. We sincerely hope that the consistent profitability of the Alaska automobile insurance market will cause the industry to consider us a desirable market in which to do business.

We have again divided this portion of the "Personal Lines Statistical Analysis" into two sections. First, is a review of the private passenger automobile insurance market in Alaska. The second section is a display of the rates charged for five different risks by numerous companies writing private passenger automobile insurance in Alaska.

Exhibit I ranks the 1981 market shares of the 30 leading writers in Alaska by line of automobile insurance and compares those shares to the 1980, 1979 and 1978 figures for those 30 companies.

The first chart of Exhibit I shows us that State Farm Mutual Automobile Insurance Company is the leading writer of private passenger auto liability insurance in this State. During 1981, State Farm Mutual Auto increased its written premium for this line by 7.6% despite dropping its market share by .15% to 22.15%, nearly a full percentage below its 23.1% share in 1979. Ranked number two, Allstate gained an additional .3% of the market and now holds a 20.5% market share, an increase of 2.6% over 1979's 17.9% share. Allstate's premium volume went up 10.1% in 1981. Third place Criterions market share remained about the same, 7.04%, up from 7% in 1980, premium volume was up 9.2%. United Services Automobile Association lost .3% of its share down to 4.19% from 4.5% in 1980, but they increased their premium volume 1.2%. Number five, State Farm Fire and Casualty gained a full percentage point of the market from 2.9% in 1980 to 3.92% in 1981 and had 49.4% more premium than 1980. Elsewhere in the top ten, four companies increased their market share and premium volume. Number seven, Leader National, lost 1.43% of its share down to 3.47% from 4.9%, while writing 22.5% less premium than 1980. The cumulative market share for the top ten is 74.8%, this compares to 74.7% in 1980. The top 30 companies accounted for 98.62% of the market, while the 30 top companies in 1980 had 98.9% of the market. Of the 30 companies, 13 increased their market share, 17 lost share. Written premiums were up for 17 companies and down for 13 companies. For all companies writing private passenger automobile liability in Alaska, written premiums were up 8.4% to $32,408,000 from $29,900,000 in 1980.

Exhibit I, Chart 2 shows that State Farm Mutual Auto has 22.5% of the private passenger auto physical damage market, an increase of .4% from 1980 and 3% from 1979. Written premiums for State Farm Mutual were up 23.1%. Allstate lost about .1% of its share down to 17.73% from 17.8% in 1980, but still up 1% over the 1979 share. Premiums for Allstate increased 10.1% from 1980. Criterion retains third place with a 1% increase in market share, 7.1% compared to 6.1% in 1980, premiums were up 29.6% since 1980. United Services Automobile Association moved into fourth place with a 5.42% share; 1.42% over 1980, premiums were up 50.9%. Foremost dropped to fifth, losing over 1.1% of its share and 15.2% in written premiums. The remainder of the top ten are led by State Farm Fire and Casualty in sixth place which now hold 3.22% of the market; up from 2.0% or 14th place in 1980, premium jumped 9.1% during the year. Nationwide Mutual joined the top ten in 1981 with a .5% increase in share, to 3.0%. The ten top writers account for 3.5% more of the market of 1981, 71.44% opposed to 67.9% in 1980. 95.95% of the private passenger auto physical damage business was written by the 30 companies, up 1.35% over 1980. Fourteen companies gained market share while 16 lost, but 19 increased premium volume and only 11 wrote less premium. Written premium volume for all companies was up 11.6% to $26,896,000.

Chart 3 of the first exhibit displays the market shares of the top 30 companies based on their combined written premiums for liability and physical damage. Again, State Farm Mutual Auto leads with 22.31%, Allstate remains second with a 19.24% share of the market a slight drop from 1980. Of more significance is the fact that Allstate has fallen 3% behind State Farm. In 1978 and 1979, Allstate trailed State Farm by about 4%, closing the gap to 2.2% in 1980 and now falling back to 3%. Criterion has 7.1% of the market up .4% from 1980. United Services Automobile Association is up .45% over 1980 to 4.75%. In 1981, State Farm Fire and Casualty increased it share 1.1% to 3.6%. All of the top ten this year increased their premium volume and only one company from last year dropped out of the top ten, Leader National falling from 5th in 1980, a 3.3% share, to 11th in 1981 with a 2.41% share. Of these 30 writers, 13 companies increased their market share, 15 declined and two remained about the same. Nineteen companies wrote more premium in 1981 and 11 wrote less. Cumulatively, the 30 companies accounted for 96.39% of all private passenger auto premiums, whereas the 30 top writers in 1980 represented 96.6% of the market. Premium volume for all admitted companies writing private passenger automobile insurance in 1981 was $59,304,000 up 10.5% over the 1980 figure of $53,666,000

Exhibit 2, Chart 1 shows us that liability business was not as profitable in 1981 as in years past. The loss ratio for the top 30 writers and the overall market was the same in 1981, 62.8%. This is a substantial increase from the 51.5% loss ratio experienced by the total private passenger auto liability market in 1980. Of the top 30 companies, 10 had better experience, 18 worse and two were new markets in 1981. Eleven of the 18 companies with loss ratios worse than last year had loss ratios in excess of 60%, eight had in excess of 70%, three companies experienced a loss ratio greater than 80%. Eleven of the 30 companies had loss ratios below 50%, seven of these were below 40%.

The second chart of Exhibit 2 shows that the private passenger automobile physical damage market had a good year in 1981. The loss ratio for all companies was 49.5% compared to 53% in 1980. Fifteen of the top 30 companies improved their loss ratios in 1981. Only five of the 30 companies had loss ratios in excess of 60%, eight of the 30 had loss ratios less than 40%.

Chart 3 has the loss ratios for the top 30 writers of both liability and physical damage coverages and again we see generally profitable results. Of the 30 companies, four had loss ratios in excess of 70%, 14 had loss ratios less than 50% and the overall loss ratios for all companies was 56.8%, 4.6% higher than 1980 but still low enough for profit.

The two charts of Exhibit III further illustrate the profitability of the private passenger auto market in Alaska. Here we have the top 30 writers of liability and physical damage auto coverages and their expense exhibits. We have calculated the loss ratios, which should indicate a company's break-even point--permissibe loss ratio (PLR)--(the ratios do not provide for investment income, reserves or the traditional 5% profit percentages). In the liability arena 14 companies had actual

loss ratios that exceeded their PLR, up from seven in 1980. Four of these companies had expense ratios in excess of that normally allowed by this division. An expense factor (including profit) greater than 45% is in most cases considered excessive. Thirteen companies had actual loss ratios 15% below their PLR in 1981 compared to 17 in 1980. The average PLR for the 30 companies was 61.2%. The expense exhibits for physical damage evidenced five companies whose loss ratios exceeded their PLR. Four of these companies had expense ratios in excess of the normally allowed 45%. Twelve companies had actual loss ratios 20% or more below their permissible loss ratios. The average PLR for the 30 companies was 61.9%, compared to actual loss ratios for the 30 companies of 49.5%, leaving 12.4% for incurred but not reported claims and profit requirements.

Writers of private passenger automobile insurance in Alaska have experienced five consecutive years of profitability a condition that's rare in today's automobile market. In many markets in the "Lower 48" states, combined ratios of 100% or more are common. Over the next 12 months we will be urging some companies to lower their rates and/or bring their expenses into line with accepted standards.

Exhibit IV is an illustration of the total private passenger automobiles registered in the State versus the insured car years, a comparison which provides a means of approximating the percent of uninsured motorists in this State. We have reevaluated the data base used in previous reports and find that statistics for the total number of autos were misstated. We have corrected the deficiencies and now have what we believe to be the most accurate possible estimation of the number of uninsured motorists. It is impossible to determine precisely the percentage uninsured. Even with the inherent inadequacies of this system, we can see that the number of insured drivers increased somewhat in 1980, we estimate 59.5% were insured up 1.6% over 1979 and 6.3% over 1978. While this increase is welcome, the thought that approximately 40% of Alaskans on the highways are uninsured is unsettling at best. Reasons for the large numbers of uninsured drivers are illusive. There does not appear to be a lack of available markets, and rates, in general, are not excessive.

Exhibit V concerns the Automobile Insurance Plan (assigned risk plan). Part A shows that in 1980, 2.6% of all insureds in the State were written through the Plan. This is 1% less than in 1979, 3.1% less than in 1978 and 5.2% less than 1977. 6.5% of the insureds countrywide were written through a plan of some sort in 1980, this is compared to 3.9% in 1979, an increase of 67%. In part B we see that the population of the plan continues to decline. At the end of 1980 there were 3,564 insureds in the plan, 24.1% less than in December 1979. 2,627 were in the plan at the end of 1981, a 26.3% drop from 1980 and 70.2% less than the 9,447 at the end of 1977. The depopulation of the plan is continuing in 1982 as shown in part C. Through September of 1982 only 1,009 policies had been assigned, 37.8% less than September 1981. The number of policies assigned each month has declined for 57 straight months. Part D charts the percentage of private passenger automobile liability premiums attributable to the Automobile Insurance Plan. The percentage in 1980 was 4.3%, down 2% from the 6.3% in 1979.

This division remains concerned about the population of the plan. While the population continues to decrease, the division feels that many insureds being placed in the plan could be written by companies on a voluntary basis. In conversations with agents around the State who utilize the plan extensively, we have heard that one of the main reasons for their use of the plan is price. We agree that for some types of risks the plan rates are low in comparison to voluntary market, but these rates are low because the experience of the plan has been favorable. The preponderance of clean risks or certainly risks that would be acceptable to companies on a voluntary basis are, to some degree, responsible for this good experience. The Alaska Automobile Insurance Plan Advisory Committee has been exploring various methods of depopulating the plan. One method receiving consideration is the requirement that agents give insureds a brochure explaining the plan and advising that by shopping, they may find companies willing to write voluntarily at lower rates or with improved coverage and better service.

For several years we have closed this narrative summary with a statement to the effect that the private passenger automobile insurance market in Alaska is profitable; this year is no exception. We are of the opinion that this profitability will continue. While this division continues to push for reduced insurance rates, we are not going to hinder the right of a company to make a reasonable profit. We will continue our efforts to assure that auto insurance rates in Alaska are neither excessive, inadequate nor unfairly discriminatory.

In Memoriam

* SEAN SINNETT *

The members of the Legislature are deeply saddened at the tragic and untimely death of a young third generation Alaskan, Sean Sinnett of Anchorage.

Sean was a bright and enthusiastic young man, filled with vitality. Born in Anchorage, he was a 1980 graduate of East Anchorage High School. He was goalie for the hockey team in 1980 when it won the State Championship. In more recent years he was an employed member of the Teamsters and an avid hot-air balloonist.

It distresses us greatly to learn of this fine young man's death and the tragic circumstances surrounding it. Accidents involving pedestrians seem so needless and preventable. It should sadden every Alaskan to know of the loss of this promising young citizen and renew in each of us a dedication to do whatever we can to make certain that our highways and streets are made safe not only for drivers, but for pedestrians as well.

We wish to extend to Mr. and Mrs. Robert Sinnett, and to Christopher and Teresa our deepest and most heartfelt condolence. We share your loss. Our thoughts are with you at this most difficult time.

SPEAKER OF THE HOUSE

PRESIDENT OF THE SENATE

Date:

Requested by: Senator Kelly, Halford, Stevens

BMF
Bayly, Martin & Fay of Alaska, Inc.

December 20, 1982

Rep. Romona L. Barnes
P. O. Box 3382 Downtown Stat.
Anchorage, AK 99510

Dear Romona:

My wife and I received your questionnaire in the mail this week and would like to respond to one of our concerns, specifically the Mandatory Auto Insurance. As you will see through the balance of this letter, Linda and I have very adamant thoughts in this regard.

During the month of March 1980, Linda was involved in an automobile accident with another party that did not have any liability insurance for his vehicle. As a matter of fact, he did not have any liability insurance for the three vehicles that he owned at that time. Linda was stopped at a red light and the other party rear ended her totaling out her 1976 Toyota 4-door sedan and causing a three day stay in Providence Hospital. As she was a school teacher on School District business, the Workmen's Compensation picked up her medical bills, not her pain and suffering, and as her vehicle was four years old, there was no collision coverage on her insurance policy, only the liability insurance. The other party was driving a 1954 Chevrolet pick-up truck and he did not have the liability insurance nor Physical Damage. His vehicle was not that badly damaged as he drove it away after the accident and he did not receive injuries.

We consulted an attorney after about two weeks of negotiating with the individual, and found out at a later date, that not only did he not have the Automobile Liability Insurance, but also he did not have any monies to make restitution nor did he want to cooperate with us in any way. We were able to obtain a judgement in court against the individual and now have that in our pocket for whatever it is worth. In the meantime, we are out of the $3,000 low book for Linda's car and her pain and suffering.

The individual that struck Linda was later given a ticket for negligent collision and his driver's license was revoked by the State of Alaska. Approximately, three months after the accident the

Pouch 7-502 / Anchorage, Alaska 99510 / (907) 276-5617 (907) 276-5454 / TELEX: 25418
1031 W. Fourth Avenue, Suite 400, Anchorage, Alaska 99501

individual was picked up by the Anchorage City Policy for driving without a license and was given another $25 ticket and spend three days in the city jail. We know, and have seen, the individual driving about Anchorage many, many times and he still does not have a valid drivers license. Of course this revoked driver's license situation does not mean anything to an individual of this caliber. Therefore, we have a law that says that basically an individual must have minimum automobile liability limits or prove that he is financially responsible for those limits and if he does neither of those he will receive a $25 ticket and lose his license. It seems to me that the spirit of the law is well taken, however, the penalty means little or nothing. As a possible solution, I would suggest that the penalty be elevated to say thirty to sixty days mandatory jail sentence for the above situation or mandatory insurance be purchased before license plates or renewal license plates would be distributed. Several states in the lower 48 now have a law that license plates renewal will not be granted without proof of Automobile Liability Insurance and if the insurance is cancelled during the year that the license plates are removed by authorities from the vehicle. Driving without license plates on the vehicle would cause the impounding of the vehicle until the situation is remedied.

I have suggested the above solutions to such people as Dick Randolph and jokingly have been accused of trying to push for another insurance sail, as I am in the insurance brokerage business through Bayly, Martin & Fay of Alaska. Indeed, this is not the case as my specialty is Aviation Liability Insurance, and I would go so far as to say that State Farm and Alstate Insurance write 90% of the automobile insurance in the state of Alaska. Therefore, I am not trying to line my own pockets with Mandatory Auto Insurance.

I sincerely hope that you are able to provide the State of Alaska with your guidance on this subject matter and if you should have any questions or comments, please do not hesitate to call on us.

Sincerely yours,

Jack Good

HB-7

3-13

March 8, 1983

MAR 11 RECD

The Honorable Ramona Barnes
House Judiciary Committee
Pouch V
Juneau, Alaska 99801

Dear Ramona:

Thank you for your letter of the 28th wherein you indicated that you were filing House Bill No. 7, regarding automobile insurance as a condition to register and operate a motor vehicle.

The bill seems to me to be well drafted and to cover every eventuality including the cancellation of insurance as soon as a vehicle is registered. However, one concern I have with the bill concerns its political chances and my suggestion is that you will run into some opposition from representatives of communities which are not tied into the State Highway system or Juneau.

The reason I state this is that in my travels to some bush communities which have roads of a few miles or 15 or 20 miles, I have noted that the vehicles are not licensed, titled or registered and that all manner of people drive them, some with licenses and some without. In my opinion, this is probably a reasonable working relationship because there are so few vehicles. The logic does not work, however, with respect to communities that are inter-connected by the highway system and/or the marine highway system. Perhaps some rider could be put on which would cover this. I think the goal of the bill is excellent and if there is anything I can do to assist in its passage, please advise.

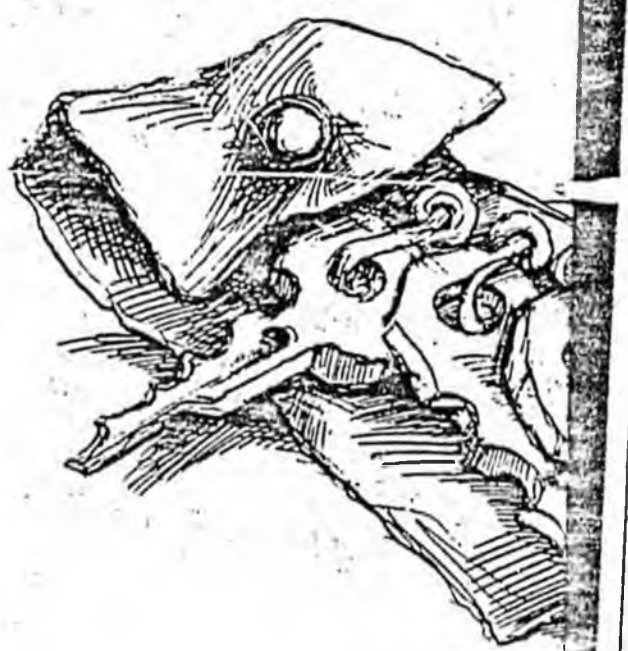
Very truly yours,

Ronald T. West
Attorney at Law

RTW:me

Car insurance is a neces

By KENT LEE WOODMAN



Last year in Juneau I stopped to pay my respects at Rep. Anderson's office. Previously I had correspondance with him on the subject of mandatory auto liability insurance. Rep. Anderson had draft copies of bills to require a minimum level of public liability for all auto operators and for state vehicle inspections and stickers. Neither bill was going anywhere.

Now I recognize that many folks come up here to escape the bureaucracy they had to live with in the South 48, but coming up here and abandoning all responsibility is not finding freedom, it is running from it. I once had freedom defined to me, as the freedom to take on the responsibilities you choose. We should be responsible enough to be certain that our affairs are in order to the point where we can pay for injury and damage to others for our actions. This is normally done by insurance on home and auto. We should be responsible enough to only take motor vehicles on the road which comply with the law and give everyone else a "fighting chance" to live . . . we should do these things, but many of us do not.

As an individual and as a business owner, both with adequate insurance, I am sick to my stomach when time after time one of my vehicles gets hit and the other driver has no insurance, no regular job, no cash reserves and often no license or registration.

We had one of our brand new Datsun diesel pickups smashed out from under my partner by a driver who had no insurance, no license, was drunk as a skunk, and who now lives in the Matanuska Valley where he gold mines and refuses to come to the phone or accept a certified letter. Our insurance paid the major portions, and we paid the $500 deductable. Our insurance carrier is "attempting to recover" both the funds they advanced and the deductable, but who knows when and if that will ever happen?

Recently our new Mazda service diesel was ripped open from end to end by a guy in a Chevy pickup with no insurance, no license, no registration. Same deal again, and another $2,800-plus.

Daily we all see the death-on-wheels that some folks push on to the public highways; no bumpers, broken windshields, missing lights, lights aimed up in your face, no defrosters, ice covered windows and drivers peering out through a postage-stamp sized hole, no brake lights, no turn indicators, bald tires in winter and summer and the whole works.

Estimates have been made that over 60 percent of the driving public in Alaska is not insured. That means that all the premiums required to cover all the accidents and injuries are paid by fewer than half of us who do have the responsiblity to have coverage. What's fair about that? Maybe we should cancel as well and let the rest of the world try to pry money out of us if we cause an accident.

I know that there will be some who will cry, "but what about the folks who cannot *afford* the insurance, cannot *afford* to keep

sary responsibility for all

points of view from our community

compass

"If folks cannot, or will not, develop that sort of old-fashioned responsibility, then I am afraid we must legislate it."

their vehicles up to a safe standard?"

My answer may appear a tad cold on the surface, but think about it: perhaps they should not drive! There is the People Mover Bus system now, the third such system since I've been here and this one is working! There are special concessions made to car-poolers. Remember, the courts have long held that driving an automobile on the public highways is a *privilege, not a right*. When you take your ton of steel out there and aim it at folks, you are supposed to have your act together. If you do not, keep off the track.

You're not supposed to fly airplanes without licenses and medical. You're not supposed to conduct brain surgery or practice law without certain certificates. Why, then, should folks be allowed to go out there and cause more property damage and death each year than all the wars we've ever been in, on the public highway with no such responsibility? If folks cannot, or will not, develop that sort of old-fashioned responsibility, then I am afraid we must legislate it.

It's a manageable program. It's a bill that already has been written once, and there are comment sheets to get it on track. We have seen recently an ordinance that lets the police pick up vehicles driven by drunks; why not the same for those who drive when their licenses have been revoked, those who drive with no public liability and those who drive vehicles with 20 or 30 write-ups?

I recognize that the mandatory vehicle inspection system offers opportunity either for heavier bureaucracy or graft, but it can be made to work ... Hawaii and Texas do it with ease. Sure we have difficulties in the Bush, and making the same rules apply there and here in town, but they can be worked out certainly.

Assistant to the Speaker

Re: Fiscal Note for Department of Public Safety on SSHB 7

There are several misconceptions made in the fiscal note provided for SSHB 7 that this office wishes to respond to. Additionally it is felt, the fiscal note is not an accurate reflection the result of the legislation but, rather, is intended to discourage passage of the bill.

1. This is virtually the same fiscal note that was produced for the original HB 7 despite the fact that numerous changes and revisions were made in the sponsor substitute with a desire of lowering the proposed fiscal impact. It is felt that the changes in SSHB 7 were not taken into consideration in preparation of this fiscal note.

2. The fiscal note assumes an effective date of July 1, 1983. In fact the bill proposes an effective date of July 1, 1984 in order to give the Department sufficient time to prepare to implement this legislation. The fiscal impact in FY 84 should be minimal. This note does not reflect that fact.

3. The fiscal note states that every car stopped in which the driver could not provide proof of insurance would have to be impounded. That is not the case. The legislation gives discretion to a peace officer to impound a car on the spot. It does not mandate impoundment at that time. In fact a provision has been provided to issue a citation which is believed will be the usual course of action in such cases. Impoundment on the spot would only be likely if a peace officer knows he is dealing with a repeat offender or some similar case.
The fiscal note reflects the desire for three state troopers to enforce the impoundment procedures which it feels are mandated. Since the bill does not mandate impoundment, it is felt these troopers are not needed for this activity. This cost should be eliminated from the fiscal note.

It must also be noted that the request for the three troopers includes 25 hours overtime in their proposed salaries without justification from the Department.

The fiscal note assumes a compliance unit of 9 persons will be required all based in Anchorage. If all are based in Anchorage, it is stipulated there must be more space made available. Why must all nine employees be based in Anchorage?

In the justification sections for the Clerk positions there are some misleading statements. The simple check for license and registration with regard to liability insurance should not be a "highly specialized" function as the fiscal note assumes. Micro film and computer technology should make this a relatively simple task along with the resulting form paper work. It is agreed that accuracy will be essential, but the qualifications and justification for this level of clerk service are overstated.

The fiscal note assumes that 10% will try to circumvent the law. While the ten per cent figure may be legitimate, it must be pointed out that some states have stated that only 5% try to circumvent the law. In any case, the legislation does not direct DMV to search all their records and find those who are trying to slip through the cracks. It only directs DMV to take action on those that come to its attention through notification by insurance companies. The assumption must also be made that this law will provide an incentive for many uninsured drivers to get insurance, provide proof to DMV at the time of registration or license renewal or the registration simply will not be renewed. There is no intent for DMV to initiate investiagtions into non insured motorists unless there is a clear action in which a motorist cancels a policy.

The justification for a clerk V position is questionable. These duties could be carried out by the unit supervisor or by one of the other four clerk positions.

In summary, the fiscal note reflects a cost that is similar to programs enacted in other states but which deal with many more vehicles than the number registered in Alaska. There are several wrong or misleading assumptions that have created what is felt to be an inflated fiscal note. These areas should be re-examined and the department should be urged to read the sponsor substitute and understand it to a better degree for preparation of a revised fiscal note.

Re: SSHB 7/ Reply to letter by Michael Thomas

Dear Representative Furnace:

You have received a letter from Michael Thomas who represents the American Insurance Association. He list a number of reasons why this legislation should not be enacted. I wish to offer the following arguments for enactment of the legislation.

First, the insurance industry in general has opposed compulsory insurance, yet it has been enacted in about 2 dozen states. While it has been repealed in a couple and amended in some states, the fact remains...THE MAJORITY OF THOSE STATES WHICH HAVE TRIED THIS APPROACH HAVE KEPT IT. If such laws are so inneffective as the industry would want you to believe, why have most of the states retained these laws?

The arguments say that no law has proved completely effective in accomplishing a 100% insured motoring population. We do not expect 100% compliance. We do expect two accomplishments. It is believed that more people will buy insurance. If we can achieve even 90% compliance, that is a significant improvement over current estimates. Some states have achieved an even higher insured percentage. Two, the bill provides strong disincentives to drive while not insured. It is believed that the possibility of severe penalties will keep a significant portion of uninsured drivers off the road rather than risking loss of driving priveleges or a motor vehicle. The bill is not aimed solely at mandating compliance. It also seeks to provide an incentive for to find alternate transportation for the uninsured.

The letter says that North Carolina has had problems achieving successful results with its law and " has still left many vehicles uninsured." However, in statistics obtained in 1981 it was learned that the prediction was that only 5% evaded the system and were uninsured. And of the accidents occuring in state involving in state drivers, less than one half of one per cent were found to be uninsured. In Alaska, a survey of accidents showed in 1980 and 1981 that about 20% of those people involved in accidents were uninsured. This points out that the North Carolina law has worked and I believe, if we could achieve their success rate, the legislation would have to be considered a success.

Two points need to be made. The letter from the insurance industry is misleading and vague. If there are inaccuracies in this one section, I submit that same vagueness likely persists throughout the letter. Insurance industry publications on this subject argue very effectively but in a very vague manner.

The letter also infers that compulsory insurance doesn't work because states still mandate the offering of uninsured insurance. First, you must realized uninsured or underinsured insurance is not required by any driver. It can be waived by the insured. But it's offering allows a person to take ALL precautions to protect himself.

The letter infers that this law would be easy to avoid and that a motorist will cancel insurance the day after he buys it to comply with the law. While it is recognized a small hard core percentage might do this, once again there are disincentives in the bill that will make people really think about taking the chance of getting caught without insurance. I don't believe there is another states which has proposed as severe penalties as this legislation seeks to do for non compliance. There has not been serious objection to the notification requirments placed on insurance companies by this legislation at this point. North Carolina has reported reduced cost and administrative burden by requiring notification by insurance companies of cancellation only within the first six months of policy issuance. This is what our bill proposes to require.

Nobody is assuming the law will cost nothing to enforce. It will take efficient enforcement and a substantial amount of money. It is not believed it will require what Dept. of Public safety is asking for in a fiscal note.

The bill also infers that premiums will rise dramatically if this program is adopted. First it is obvious premiums will rise if higher minimum liability limits are adopted. The desire to raise the limits may be a bargaining item even though it is not believed rates will increase as substantially as proposed. Whether there may be an increase in premiums simply as a result of mandatory insurance is subject to debate. The removal of the higher minimum limits negates much of the letter's argument, however.

The letter says that study of alternatives has not been undertaken on how to improve current law. A substantial directive has been received from the public for mandatory insurance. The public wants action now..not a study.

Conclusion

No one has ever assumed enactment of this legislation will result in a 100% insured motoring public. But results from other states have shown similar laws do increase the number of insured drivers. A combination of mandatory liability insurance and the offering of uninsured and underinsured insurance coupled with retention of the current financial responsibility law is the most effective way to close loopholes and protect the public.

Other states have encountered probems with the law, but most states that have enacted the law HAVE KEPT IT. Obviously, something beneficial is happening. It is realized there will likely be amendments to this law in the future if adopted. But it is a good starting point. Efforts have been taken to choose the better parts of legislation from many states so that it is effective and cost efficient.

The insurance industry has a very well financed lobbying effort to ward off these laws when the crop up around the nation. I caution the committee not tp be misled by vague facts or misrepresentations in statement. I believe the public has expressed an interest in this legislation and it is the responsibility of the Legislature to represent the public..not the insurance industry.

This office remains open to work with others seriously concerned with addressing this public concern.

Sincerely,

Jeff Day
Assistant to the Speaker

MOTOR VEHICLE SAFETY RESPONSIBILITY ACT

HEADINGS TITLE 28.
Motor Vehicles.
CHAPTER 20.
Motor Vehicle Safety Responsibility Act.

DECLARATION OF PURPOSE.

The legislature is concerned over the rising toll of motor vehicles accidents and the suffering and loss inflicted by them. The legislature determines that it is a matter of grave concern that motorists be financially responsible for their negligent acts so that innocent victims of motor vehicle accidents may be recompensed for the injury and financial loss inflicted upon them. The legislature finds and declares that the public interest can best be served by the requirements that the operator of a motor vehicle involved in an accident respond for damages and show proof of financial ability to respond for damages in future accidents as a prerequisite to his exercise of the privilege of operating a motor vehicle in the state.

HISTORY (Sec. 2 ch 163 SLA 1959)

Sec. 28.20.020.
ADMINISTRATION.

(a) The department shall administer and enforce this chapter and may adopt rules and regulations necessary for its administration.

(b) The department shall receive and consider any pertinent information upon request of persons aggrieved by its orders or acts under this chapter.

(c) The department shall prescribe and provide suitable forms requisite or considered necessary to carry out this chapter.

HISTORY (Sec. 4 ch 163 SLA 1959)

Sec. 28.20.030.
COURT REVIEW.
Repealed by sec. 4 ch 140 SLA 1977.

Sec. 28.20.040.
DEPARTMENT TO FURNISH OPERATING RECORD.
Repealed by sec. 20 ch 241 SLA 1976.

Sec. 28.20.050.
APPLICATION OF CHAPTER.

(a) The provisions of this chapter requiring deposit of security and suspension for failure to deposit security apply to the driver and owner of a vehicle subject to registration under the laws of this state which is involved in any manner in an accident in this state resulting in bodily injury to or death of a person or damage to the property of any one person exceeding $500.

(b) Not less that 20 days after receipt of a report of such accident, the department shall determine the amount of security which it considers sufficient to satisfy any judgments for damages resulting from the accident which may be recovered against each driver or owner. The determination shall not be made with respect to a driver or owner who is exempt from the requirements as to security and suspension.

(c) The department shall determine the amount of security deposit required upon the basis of the reports or other information submitted. If a person involved in an accident as described in this chapter fails to make a report or submit information indicating the extent of his injuries or the damage to his property within 30 days after the accident, and the department does not have sufficient information on which to base an evaluation of injuries or damage, then the department after reasonable notice to the person, if it is possible to give notice, otherwise without notice, shall not require a deposit of security for the benefit or protection of the person.

(d) Within 30 days after receipt of report of an accident and upon determining the amount of security to be required of any person involved in the accident or to be required of the owner of any vehicle involved in the accident, the department shall give to every person written notice of the amount of security required to be deposited by him and stating that an order of suspension will be made upon the expiration of 10 days after the notice is sent unless within that time security is deposited as required. No license may be suspended unless the licensee is afforded a hearing by the department at which it is determined that there is a reasonable possibility of a judgment being rendered holding him liable.

(e) A peace officer investigating an accident that results in bodily injury to or the death of a person or damage to the property of a person exceeding $500 shall inform persons involved in the accident in writing of the requirements of this chapter as they apply to suspension of an operator's license or driving privileges.

HISTORY (Sec. 7 ch 163 SLA 1959; am sec. 1 ch 127 SLA 1972; am sec. 11 ch 144 SLA 1977; am sec. 3 ch 78 SLA 1982)

Sec. 28.20.060.
EXCEPTIONS TO REQUIREMENT OF SECURITY.
The requirements as to security and suspension in this chapter do not apply to

(1) the driver or owner if the owner had in effect at the time of the accident an automobile liability policy or bond with respect to the vehicle involved in the accident, except that a driver is not exempt if at the time of the accident the vehicle was operated without the owner's express or implied permission;

(2) the driver who is not the owner if there was in effect at the time of the accident an automobile liability policy or bond with respect to his driving of vehicles not owned by him;

(3) a driver or owner whose liability for damages resulting from the accident is, in the judgment of the department, covered by another form of liability insurance policy or bond;

(4) a person qualifying as a self-insurer under sec. 400 of this chapter or to a person operating a vehicle for a self-insurer;

(5) the driver or owner of a vehicle involved in an accident in which no injury or damage was caused to the person or property of anyone other than the driver or owner;

(6) the driver or owner of a vehicle which at the time of the accident was parked, unless the vehicle was parked at a place where parking was at the time of the accident prohibited by a law or ordinance;

(7) the owner of a vehicle if at the time of the accident the vehicle was operated without his express or implied permission or was parked by a person operating the vehicle without the permission;

(8) the owner of a vehicle or the driver of a vehicle operating it with permission if at the time of the accident the vehicle was owned or leased to the United States, this state or a political subdivision of this state or a municipality of the state; or

(9) the driver or the owner of a vehicle if at the time of the accident the vehicle was operated by or under the direction of a police officer who, in the performance of his duties, assumed custody of the vehicle.

Sec. 28.20.070.
REQUIREMENTS AS TO POLICY OR BOND.

(a) No policy or bond is effective under sec. 60 of this chapter unless it is issued by an insurance company or surety company authorized to do business in this state, except as provided in (b) of this section, and if the accident resulted in bodily injury or death, unless the policy or bond is subject to a limit, exclusive of interest and costs, of not less than $25,000 because of bodily injury to or death of one person in any one accident and, subject to the same limit for one person, to a limit of not less than $50,000 because of bodily injury to or death of two or more persons in any one accident, and if the accident has resulted in injury to, or destruction of, property to a limit of not less than $10,000 because of injury to or destruction of property of others in any one accident.

(b) No policy or bond is effective under sec. 60 of this chapter with respect to a vehicle not registered in this state or a vehicle which was registered in another jurisdiction at the effective date of the policy or bond or the most recent renewal of it, unless the insurance or surety company issuing the policy or bond is authorized to do business in this state, or if the company is not authorized to do business in this state, unless it executes a power of attorney authorizing the director of the division of insurance to accept service on its behalf of notice or process in an action upon the policy or bond arising out of the accident.

(c) The department may rely upon the information in an accident report as to the existence of insurance or a bond unless the department has reason to believe that the information is erroneous.

HISTORY (Sec. 9 ch 163 SLA 1959; am sec. 1 ch 146 SLA 1966; am sec. 1 ch 20_ SLA 1975; am sec. 12 ch 144 SLA 1977)

Sec. 28.20.080.
FORM AND AMOUNT OF SECURITY.

(a) The security required by this chapter shall be in the form and amount the department requires, but in no case in excess of the limits specified in sec. 70 of this chapter for the acceptable limits of a policy or bond.

(b) Every depositor of security shall designate in writing the person in whose name the deposit is made and may at any time change the designation, but a single deposit of security applies only on behalf of a person required to furnish security because of the same accident.

HISTORY (Sec. 10 ch 163 SLA 1959)

Sec. 28.20.090.
SUSPENSION FOR FAILURE TO DEPOSIT SECURITY.
(a) If a person required to deposit security under this chapter fails to deposit security within 10 days after the department sends notice, the department shall suspend
(1) the license of each driver involved in the accident;
(2) the privilege of operating a vehicle subject to registration if the driver is a nonresident;
(3) the privilege of the owner to operate or permit the operation within this state of a vehicle subject to registration if the owner is a nonresident.
(b) Suspensions shall be made in respect to persons required by the department to deposit security who fail to deposit such security, except as otherwise provided under succeeding sections of this chapter.
HISTORY (Sec. 11 ch 163 SLA 1959) CITATION

Sec. 28.20.100.
RELEASE FROM LIABILITY.
(a) A person is relieved from the requirement for deposit of security for the benefit or protection of another person injured or damaged in the accident if he is released from liability by the other person.
(b) A covenant not to sue relieves the parties to it as to each other from the security requirements of this chapter.
(c) If the department evaluates the injuries or damage to a minor in an amount not more than $500, the department may accept, for the purposes of this chapter only, evidence of a release from liability executed by a natural or legal guardian on behalf of the minor without court approval.
HISTORY (Sec. 12 ch 163 SLA 1959; am sec. 13 ch 144 SLA 1977)

Sec. 28.20.110.
ADJUDICATION OF NONLIABILITY.
A person is relieved from the requirement for deposit of security for a claim for injury or damage arising out of the accident if the person is finally adjudicated not to be liable for the claim. HISTORY (Sec. 13 ch 163 SLA 1959)

HISTORY (Sec. 14 ch 163 SLA 1959; am sec. 4 ch 78 SLA 1982)

Sec. 28.20.120.
AGREEMENTS FOR PAYMENT OF DAMAGES
(a) Two or more persons involved in or affected by an accident as described in AS 28.20.050 may at any time enter into a written agreement for the payment of an agreed amount with respect to their claims because of bodily injury, death, or property damage arising from the accident. The agreement may provide for payment in installments. The parties may file a signed copy of the agreement with the department.
(b) If proof of financial responsibility is provided and to the extent provided by the written agreement filed with it, the department shall not require the deposit of security and shall terminate a previous order of suspension, or if security was deposited, the department shall immediately return the security to the depositor or his personal representative.

(c) If there is a default in a payment under the agreement upon notice of default the department shall take action suspending the license of the person in default as is appropriate in case of failure of the person to deposit security when required under this chapter. (d) The suspension remains in effect and the license may not be restored until

(1) security is deposited as required under this chapter in the amount the department determines; or

(2) when, following default and suspension, the person in default pays the balance of the agreed amount; or

(3) one year elapses following the effective date of the suspension and evidence satisfactory to the department is filed with it that during the period no action at law upon the agreement is pending.

Sec. 28.20.130.
PAYMENT UPON JUDGMENT.
The payment of a judgment arising out of an accident, or the payment upon judgment of an amount equal to the maximum amount which could be required for deposit under this chapter, for the purposes of this chapter, releases the judgment debtor from the liability evidenced by the judgment. HISTORY (Sec. 15 ch 163 SLA 1959; am sec. 12 ch 2 SLA 1964)

Sec. 28.20.140.
TERMINATION OF SECURITY AGREEMENT
If satisfied as to the existence of a fact which under secs. 100 - 130 of this chapter entitles a person to be relieved from the security requirements, the department shall not require the deposit of security and shall terminate a previous order of suspension in respect to the person, and shall immediately return the deposit to the person or his personal representative. HISTORY (Sec. 16 ch 163 SLA 1959)

Sec. 28.20.150.
DURATION OF SUSPENSION.
(a) Unless a suspension is terminated under other provisions of this chapter, an order of suspension by the department remains in effect until terminated and no license may be renewed or issued to a person whose license is suspended until proof of financial responsibility for the future is provided and

(1) the person deposits or there is deposited on his behalf the security required under this chapter; or

(2) three years elapse following the date of suspension.

(b) Repealed by sec. 9 ch 78 SLA 1982.
HISTORY (Sec. 17 ch 163 SLA 1959; am secs. 5, 9 ch 78 SLA 1982)

Sec. 28.20.160.
APPLICATION TO NONRESIDENTS, UNLICENSED DRIVERS, UNREGISTERED VEHICLES AND ACCIDENTS IN OTHER STATES.
(a) If a driver or owner of a vehicle subject to registration under the laws of this state involved in an accident in this state does not have a license or registration in this state, then the driver may not be licensed, nor may the owner register a vehicle in this state until he complies with the requirements of this chapter to the extent necessary if, at the time of the accident, he had held a license or been the owner of a vehicle registered in this state.

(b) When a nonresident's operating privilege is suspended under sec. 90 of this chapter the department shall send a certified copy of the record of the action to the official in charge of the issuance of licenses and registration certificates in the state in which the nonresident resides, if the law of the other state provides for action similar to that provided for in (c) of this section.

(c) Upon receiving certification that the operating privilege of a resident of this state has been suspended or revoked in another state under a law providing for its suspension or revocation for failure to deposit security for the payment of judgments arising out of an accident under circumstances which would require the department to suspend a nonresident's operating privilege if the accident had occurred in this state, the department shall suspend the license of the resident. The suspension continues until the resident furnishes evidence of his compliance with the law of the other state relating to the deposit of security.

HISTORY (Sec. 18 ch 163 SLA 1959)

Sec. 28.20.170.
AUTHORITY OF DEPARTMENT TO DECREASE AMOUNT OF SECURITY. The department may reduce the amount of security ordered within six months after the date of the accident if in its judgment the amount is excessive. If the security originally ordered is on deposit, the excess deposit over the reduced amount ordered shall be returned immediately to the depositor or his personal representative. HISTORY (Sec. 19 ch 163 SLA 1959)

Sec. 28.20.180.
CORRECTION OF ACTION OF DEPARTMENT. If the department takes action or fails to take action under this chapter due to erroneous information or no information, upon receiving correct information within one year after the date of an accident the department shall take appropriate action to carry out the purposes and effect of this chapter. However, this section does not require the department to re-evaluate the amount of a deposit required. HISTORY (Sec. 20 ch 163 SLA 1959)

Sec. 28.20.190.
CUSTODY OF SECURITY. The department shall place security deposited with it in the custody of the Department of Revenue. HISTORY (Sec. 21 ch 163 SLA 1959)

Sec. 28.20.200.
DISPOSITION OF SECURITY.

(a) The security deposited is available only for

(1) the payment of a settlement agreement covering a claim arising out of the accident upon instruction of the person who made the deposit, or

(2) the payment of a judgment given against the person required to make the deposit for damages arising out of the accident in an action at law begun not later than one year after the deposit of security, or within one year after the date of deposit of security following failure to make payments under an agreement to pay.

(b) Every distribution of funds from a security deposit is subject to the limits of the department's evaluation on behalf of a claimant. HISTORY (Sec. 22 ch 163 SLA 1959)

Sec. 28.20.210.
RETURN OF DEPOSIT.

(a) Upon the expiration of two years from the date of deposit of security, the security remaining on deposit shall be returned to the person who made the deposit or his personal representative if an affidavit or other evidence satisfactory to the department is filed with it showing that

(1) no action for damages arising out of the accident for which deposit was made is pending against the person on whose behalf the deposit was made, and

(2) there does not exist any unpaid judgment against the person in an action.

(b) This section does not limit the return of a deposit of security under any other provision of this chapter authorizing return. HISTORY (Sec. 23 ch 163 SLA 1959; am sec. 6 ch 78 SLA 1982)

Sec. 28.20.220.
MATTERS NOT TO BE EVIDENCE IN CIVIL SUITS. The report required after an accident, the action taken by the department under this chapter, the findings, if any, of the department upon which its action is based, and the security filed shall not be referred to, and shall not be evidence of the negligence or due care of either party, at the trial of an action to recover damages. HISTORY (Sec. 24 ch 163 SLA 1959)

Sec. 28.20.230
PROOF OF FINANCIAL RESPONSIBILITY FOR THE FUTURE.

(a) The provisions of this chapter requiring the deposit of proof of financial responsibility for the future apply to persons who are convicted of or forfeit bail for certain offenses under motor vehicle laws or who, by ownership or operation of a vehicle of a type subject to registration under ch. 10 of this title, are involved in an accident in this state which results in bodily injury or death of a person or damage to the property of any one person exceeding $500.

(b) The term "proof of financial responsibility for the future" as used in this chapter means proof of ability to respond in damages for liability, on account of an accident occurring after the effective date of proof, which arises out of the ownership, maintenance or use of a vehicle subject to registration under the laws of this state, in the amount of $25,000 because of bodily injury to or death of one person in any one accident, and, subject to the same limit for one person, in the amount of $50,000 because of bodily injury to or death of two or more persons in any one accident, and in the amount of $10,000 because of injury to or destruction of property of others in any one accident. As used in this chapter the terms "proof of financial responsibility" or "proof" mean proof of financial responsibility for the future.

HISTORY (Sec. 25 ch 163 SLA 1959; am sec. 59 ch 69 SLA 1970; am sec. 2 ch 202 SLA 1975; am sec. 14 ch 144 SLA 1977)

Sec. 28.20.240.
PROOF REQUIRED WHEN USE OF LICENSE IS RESTRICTED.

Whenever under a law of this state the license of a person is suspended, revoked, limited under AS 28.15.201, or canceled for any reason, the department may not issue to that person a new or renewal of license in his name until permitted to do so under the motor vehicle laws of this state. A period of suspension, revocation, limitation, or cancellation under this section continues until proof of financial responsibility for the future is provided.

HISTORY (Sec. 26 ch 163 SLA 1959; am sec. 7 ch 78 SLA 1982)

Sec. 28.20.250.
ACTION IN RESPECT TO UNLICENSED PERSON.

(a) If a person does not have a license, but by final order or judgment is convicted of, or forfeits bail or collateral deposited to secure an appearance for trial for an offense requiring the suspension or revocation of license, or for driving a motor vehicle upon the highways without being licensed to do so, or for driving an unregistered vehicle upon the highways, no license shall be issued to the person unless he gives and thereafter maintains proof of financial responsibility for the future.

(b) Whenever the department suspends or revokes a nonresident's operating privilege for conviction or forfeiture of bail, the privilege remains suspended or revoked unless the person has previously given or immediately gives proof of financial responsibility for the future.

HISTORY (Sec. 27 ch 163 SLA 1959)

Sec. 28.20.260.
WHEN PROOF REQUIRED AFTER ACCIDENTS.

(a) Upon receipt by the department of the report of an accident resulting in bodily injury or death, or property damage to any one person exceeding $500, the department shall suspend the license of the driver of a motor vehicle involved in the accident unless the driver or owner

(1) has previously furnished or immediately furnishes security required by this chapter, or is excepted from furnishing security under sec. 60 of this chapter, and

(2) maintains proof of finan al responsibility for three years following the accident.

(b) This section does not apply to an owner or operator with respect to an accident in which a judgment in his favor is given on a cause of action arising out of the accident which establishes his freedom from fault.

HISTORY (Sec. 28 ch 163 SLA 1959; am sec. 15 ch 144 SLA 1977)

Sec. 28.20.270.
SUSPENSION FOR NONPAYMENT OF JUDGMENTS. Upon receipt of a certified copy of a judgment and a certificate of facts relative to the judgment, the department shall immediately suspend the license or nonresident's operating privilege of a person against whom the judgment is given except as otherwise provided in this chapter. HISTORY (Sec. 29 ch 163 SLA 1959)

Sec. 28.20.280.
WHEN COURTS TO REPORT NONPAYMENT OF JUDGMENTS. If a person fails within 30 days to satisfy a judgment arising out of a motor vehicle accident, the clerk of the court, or the judge if there is no clerk, in which the judgment is given, shall forward to the department a certified copy of the judgment and a certificate of facts relative to the judgment. HISTORY (Sec. 30 ch 163 SLA 1959)

Sec. 28.20.290.
FURTHER ACTION WITH RESPECT TO NONRESIDENTS. If the defendant named in a certified copy of a judgment reported to the department is a nonresident, the department shall send a certified copy of the judgment to the official in charge of the issuance of licenses and registrations of the state of which the defendant is a resident. HISTORY (Sec. 31 ch 163 SLA 1959)

Sec. 28.20.300.
EXCEPTION FOR GOVERNMENT VEHICLES. Sections 260 and 270 of this chapter do not apply to an accident caused by the ownership or operation, with permission, of a vehicle owned or leased to the United States, this state, or a political subdivision or municipality of this state. HISTORY (Sec. 32 ch 163 SLA 1959)

Sec. 28.20.310.
EXCEPTION WHEN CONSENT GRANTED BY JUDGMENT CREDITOR. If the judgment creditor consents in writing in a form prescribed by the department to the issuance of a license or nonresident's operating privilege to the judgment debtor, the department may allow it for six months from the date of such consent and thereafter until the consent is revoked in writing, if the judgment debtor furnishes proof of financial responsibility notwithstanding default in the payment of judgment, or of an installment of the judgment prescribed in sec. 270 of this chapter. HISTORY (Sec. 33 ch 163 SLA 1959) -

Sec. 28.20.320.
EXCEPTIONS WHEN INSURER LIABLE. No license or nonresident's operating privilege shall be suspended under this chapter if the department finds that an insurer is obligated to pay the judgment upon which suspension is based at least to the extent and for the amounts required in this chapter, but has not paid the judgment for any reason. A finding by the department that an insurer is obligated to pay a judgment is not binding upon the insurer and has no legal effect except for the purpose of administering this section. If in a judicial proceeding it is determined by a final judgment, decree or order that an insurer is not obligated to pay a judgment, the department, notwithstanding any contrary finding made by it, shall immediately suspend the license or nonresident's operating privilege of a person against whom the judgment is given, as provided in sec. 270 of this chapter. HISTORY (Sec. 34 ch 163 SLA 1959)

Sec. 28.20.325.
EXCEPTION FOR BUSINESS RELATIONSHIP. If the driver at the time of an accident was driving, in the course and scope of his employment, a vehicle owned, operated or leased by his employer, the security deposit, proof of future responsibility and suspension provisions of this chapter apply to the employer and to the vehicles owned by him or registered under his name and do not apply to the driver. HISTORY (Sec. 1 ch 25 SLA 1966)

Sec. 28.20.330.
SUSPENSION TO CONTINUE UNTIL JUDGMENTS PAID AND PROOF GIVEN.
(a) If a person has an unsatisfied judgment against him requiring suspension under sec. 270 of this chapter, his license or nonresident's operating privilege shall remain suspended and shall not be renewed, nor shall a license or registration be issued in the name of the person, including a person not previously licensed, until the judgment is stayed or satisfied and until the person gives proof of financial responsibility subject to the exceptions in secs. 310 - 320, and 370 of this chapter.
(b) The proof required by (a) of this section shall be maintained during the period the person has a license or nonresident's operating privilege.

HISTORY (Sec. 35 ch 163 SLA 1959)

Sec.28.20.340
LICENSE CANCELLED, SUSPENDED OR REVOKED.
Upon receiving a record of the conviction of a person for driving a vehicle while his license was suspended, the department shall immediately suspend the registration of every vehicle registered in his name until he gives proof of financial responsibility for the future for each vehicle registered in his name. HISTORY (Sec. 36 ch 163 SLA 1959)

Sec. 28.20.360.
PAYMENTS SUFFICIENT TO SATISFY REQUIREMENTS.
(a) For the purpose of this chapter, a judgment is satisfied when
(1) $25,000 is credited upon a judgment given in excess of that amount because of bodily injury to or death of one person as the result of any one accident; or
(2) subject to the limit of $25,000 because of bodily injury to or death of one person, the sum of $50,000 is credited upon a judgment given in excess of that amount because of bodily injury to or death of two or more persons as the result of any one accident; or
(3) $10,000 is credited upon a judgment given in excess of that amount because of injury to or destruction of property of others as a result of any one accident.
(b) However, payments made in settlement of a claim because of bodily injury, death or property damage arising from the accident shall be credited in reduction of the amounts provided for in this section. HISTORY (Sec. 38 ch 163 SLA 1959; am secs. 60, 61 ch 69 SLA 1970; am sec. 3 ch 202 SLA 1975)

Sec. 28.20.370.
INSTALLMENT PAYMENT OF JUDGMENTS; DEFAULT.

(a) A judgment debtor upon due notice to the judgment creditor may apply to the court in which such judgment was rendered for the privilege of paying the judgment in installments and the court, without prejudice at any other legal remedy, may order and fix the amount and time of payment of the installments.

(b) The department shall not suspend a license or nonresident's operating privilege, and shall restore a license or nonresident's operating privilege suspended following nonpayment of a judgment, when the judgment debtor gives proof of financial responsibility and obtains an order permitting the payment of the judgment in installments. (c) If the judgment debtor fails to pay an installment specified by the court order, upon notice of default, the department shall immediately suspend the license or nonresident's operating privilege of the judgment debtor until the judgment is satisfied as provided in this chapter.
HISTORY (Sec. 39 ch 163 SLA 1959) -

Sec. 28.20.380.
REGISTRATION AND OPERATOR'S RIGHTS LIMITED BY EXTENT OF PROOF.

(a) When a certificate is filed showing that a policy is issued covering a motor vehicle owned by the insured, but not insuring the person when operating a motor vehicle not owned by him, the restriction may be removed upon the filing of a certificate showing an operator's policy issued to the person.
(b) If the department receives evidence of the violation of the restriction on the license, it may suspend the license until a certificate is filed showing an operator's policy issued to the holder of the license. HISTORY (Sec. 40 ch 163 SLA 1959)

Sec. 28.20.390.
ALTERNATE METHODS OF GIVING PROOF.
Proof of financial responsibility for a person who is not the owner of a vehicle may be given by filing

(1) a certificate of insurance as provided in secs. 410 or 420 of this chapter;

(2) a bond as provided in sec. 470 of this chapter;

(3) a certificate of deposit of money or securities as provided in sec. 490 of this chapter; or

(4) a certificate of self-insurance as provided in sec. 400 of this chapter, supplemented by an agreement by the self-insurer that, for accidents occurring while the certificate is in force, he will pay th same amount that an insurer would be obligated to pay under an owner'. motor vehicle liability policy if it had issued a policy to the self-insurer.
HISTORY (Sec. 41 ch 163 SLA 1959)

Sec. 28.20.400.
SELF-INSURERS.

(a) A person in whose name more than 25 vehicles are registered in this state may qualify as a self-insurer by obtaining a certificate of self-insurance issued by the department as provided in (b) of this section.

(b) The department may issue a certificate of self-insurance when it is satisfied that the person has and will continue to have ability to pay judgments obtained against him. The certificate may be issued authorizing a person to act as a self-insurer for either property damage or bodily injury, or both, or within the limits the department prescribes.

(c) Upon not less than 10 days' notice and a hearing pursuant to the notice, the department may upon reasonable grounds cancel a certificate of self-insurance. Failure to pay a judgment within 30 days after judgment becomes final is a reasonable ground for the cancellation of a certificate of self-insurance. HISTORY (Sec. 42 ch 163 SLA 1959)

Sec. 28.20.410.
CERTIFICATE OF INSURANCE AS PROOF.

Proof of financial responsibility for the future may be furnished by filing with the department the written certificate of an insurance carrier authorized to do business in this state certifying that there is in effect a motor vehicle liability policy for the benefit of the person required to furnish proof of financial responsibility. The certificate shall give the effective date of the motor vehicle liability policy, which shall be the same as the effective date of the certificate, and shall designate by description or appropriate reference all vehicles covered by it, unless the policy is issued to a person who is not the owner of a motor vehicle.
HISTORY (Sec. 43 ch 163 SLA 1959)

Sec. 28.20.420.
CERTIFICATE FURNISHED BY NONRESIDENT AS PROOF.

(a) A nonresident may give proof of financial responsibility by filing with the department a written certificate of an insurance carrier authorized to transact business in the state in which the vehicle described in the certificate is registered, or if the nonresident does not own a vehicle, then in the state in which the nonresident resides, if the certificate otherwise conforms with this chapter; the department shall accept it upon condition that the insurance carrier complies with (b) and (c) of this section.

(b) The insurance carrier shall execute a power of attorney authorizing the department of accept service on its behalf of notice or process in an action arising out of a motor vehicle accident in this state.

(c) The insurance carrier shall agree in writing that the policy shall conform with the laws of this state relating to the terms of motor vehicle liability policies issued in this state.
HISTORY (Sec. 44 ch 163 SLA 1959; am sec. 44 ch 32 SLA 1971) -

Sec. 28.20.430.
DEFAULT BY NONRESIDENT INSURER.
If an insurance carrier not authorized to transact business in this state, but qualified to furnish proof of financial responsibility in this state, defaults in an undertaking or agreement, the department shall not accept as proof a certificate of the carrier whether previously filed or thereafter tendered as proof, so long as the default continues.
HISTORY (Sec. 45 ch 163 SLA 1959)

Sec. 28.20.440.
MOTOR VEHICLE LIABILITY POLICY.
(a) In this AS 28.20.010 - 28.20.640, "motor vehicle liability policy" means an "owner policy" or an "operator's policy" containing an agreement or endorsement as provided in this section, or certified as provided in AS 28.20.410 or 28.20.420 as proof of financial responsibility for the future, and issued, except as otherwise provided in AS 28.20.420, by an insurance carrier authorized to transact business in this state, to or for the benefit of the person named as insured.
(b) The owner's policy of liability insurance shall
(1) designate by description or appropriate reference all vehicles which it covers;
(2) insure the person named and every other person using the vehicle with the express or implied permission of the named insured, against loss from the liability imposed by law for damages arising out of the ownership, maintenance or use of the vehicle within the United States of America or the Dominion of Canada, subject to limits exclusive of interests and costs, with respect to each vehicle, as follows: $25,000 because of bodily injury to or death of one person in any one accident, and, subject to the same limit for one person, $50,000 because of bodily injury to or death of two or more persons in any one accident, and $10,000 because of injury to or destruction of property of others in any one accident;
(3) contain coverage in the amounts set out in (2) of this subsection for the protection of the persons insured under the policy who are legally entitled to recover damages from owners or operators of uninsured motor vehicles because of bodily injury or death arising out of the ownership, maintenance or use of the uninsured motor vehicle, except that this coverage may be waived in writing by the insured on or before the effective date of the policy.
(c) The operator's policy of liability insurance shall insure the person named as insured against loss from the liability imposed upon him by law for damages arising out of the use by him of any motor vehicle not owned by him, within the same territorial limits and subject to the same limits of liability as are required for an owner's policy of liability insurance. -
(d) The motor vehicle liability policy shall state the name and address of the named insured, the coverage, the premium charges, the policy period and the limits of liability, and shall contain an agreement or an endorsement that insurance is provided in accordance with the coverage defined in AS 28.20.010 - 28.20.640 for bodily injury and death or property damage, or both, and is subject to all the provisic of AS 28.20.010 - 28.20.640.

(e) The motor vehicle liability policy need not insure liability under a workers' compensation law nor liability for damage to property owned by, rented to, in charge of or transported by the insured. (f) Every motor vehicle liability policy is subject to the following provisions but these provisions need not be contained in the policy.

(1) The liability of the insurance carrier becomes absolute whenever injury or damage covered by the policy occurs; the policy may not be cancelled or annulled as to this liability after the occurrence of the injury or damage; no statement made by the insured or on his behalf and no violation of the policy defeats or voids the policy.

(2) The satisfaction by the insured of a judgment for injury or damages is not a condition precedent to the right or duty of the insurance carrier to make payment on account of injury or damage.

(3) The insurance carrier may settle a claim covered by the policy, and if settlement is made in good faith, the amount of settlement is deductible from the limits of liability specified in (b) of this section.

(4) The policy, the written application for the policy, if any, and every rider or endorsement which does not conflict with the provisions of AS 28.20.010 - 28.20.640 constitute the entire contract between the parties.

(g) A policy which grants the coverage required for a motor vehicle liability policy may also grant lawful coverage in excess of or in addition to the coverage specified for a policy and the excess or additional coverage is not subject to the provisions of AS 28.20.010 - 28.20.640. With respect to a policy which grants excess or additional coverage the term "motor vehicle liability policy" applies only to that part of the coverage which is required by this section.

(h) A motor vehicle liability policy may provide that the insured shall reimburse the insurance carrier for any payment the insurance carrier would not have been obligated to make under the terms of the policy except for the provisions of AS 28.20.010 - 28.20.640.

(i) A motor vehicle liability policy may provide for proration of the insurance with other valid and collectible insurance.

(j) The requirements for a motor vehicle liability policy may be fulfilled by the policies of one or more insurance carriers which together meet the requirements.

(k) A binder issued pending the issuance of a motor vehicle liability policy fulfills the requirements for a policy.

HISTORY (Sec. 46 ch 163 SLA 1959; am sec. 2 ch 146 SLA 1966; am sec. 4 ch 202 SLA 1975; am sec. 60 ch 94 SLA 1980)

-

Sec. 28.20.450.

NOTICE OF CANCELLATION OR TERMINATION OF CERTIFIED POLICY. When an insurance carrier certifies a motor vehicle liability policy under sec. 410 or sec. 420 of this chapter the insurance certified may not be cancelled or terminated until at least 10 days after a notice of cancellation or termination of the insurance is filed with the department, except that a policy subsequently procured and certified shall, on the effective date of its certification, terminate for the purpose of this chapter the insurance previously certified for a vehicle designated in both certificates. HISTORY (Sec. 47 ch 163 SLA 1959)

Sec. 28.20.460.
CHAPTER NOT TO AFFECT OTHER POLICIES.

(a) This chapter does not apply to or affect a policy of automobile insurance against liability which may now or hereafter be required by any other law of this state, except that the policy, if it contains an agreement or is endorsed to conform with the requirements of this chapter, may be certified as proof of financial responsibility under this chapter.

(b) This chapter does not apply to or affect a policy insuring solely the insured named in the policy against liability resulting from the maintenance or use by persons in the insured's employ or on his behalf of vehicles not owned by the insured.
HISTORY (Sec. 48 ch 63 SLA 1959)

Sec. 28.20.470.
BOND AS PROOF.
Proof of financial responsibility may be evidenced by the bond of a surety company authorized to transact business in this state. The bond shall be conditioned for payment of the amounts specified in sec. 230 of this chapter. The bond shall be filed with the department and shall not be cancellable except after 10 days' written notice to the department.
HISTORY (Sec. 49 ch 163 SLA 1959)

Sec. 28.20.480.
ACTION ON BOND. If a judgment given against the principal on a bond is not satisfied within 30 days after it becomes final, the judgment creditor may, for his own use and benefit and at his sole expense, bring an action in the name of the state against the company executing the bond. HISTORY (Sec. 50 ch 163 SLA 1959)

Sec. 28.20.490.
MONEY OR SECURITIES AS PROOF.
Proof of financial responsibility may be evidenced by the deposit of $25,000 in cash, or securities which are legal investments for saving banks or trust funds having a market value of $25,000. The department shall not accept a deposit unless accompanied by evidence that there are no unsatisfied judgments of any character against the depositor in the recording district where the depositor resides. HISTORY (Sec. 51 ch 163 SLA 1959; am sec. 15 ch 214 SLA 1975)

Sec. 28.20.500.
OWNER MAY GIVE PROOF FOR OTHERS.

(a) The owner of a motor vehicle may give proof of financial responsibility on behalf of his employee or a member of his immediate family or household. The furnishing of proof in this manner permits the person for whom it is given to operate a motor vehicle covered by the proof. The department shall endorse appropriate restrictions on the face of the license held by a person for whom proof is given by another, or may issue a new license containing these restrictions.

(b) The department, upon receiving satisfactory evidence of the violation of a restriction, may suspend the license until a certificate is filed showing a policy issued to the driver which covers the driver as operator or owner of the vehicle operated in violation of the restriction. -

Sec. 28.20.510.
SUBSTITUTION OF PROOF.
The department shall consent to the cancellation of a bond or certificate of insurance, or the department shall return money or securities to the person entitled to it, upon the substitution and acceptance of other adequate proof of financial responsibility under this chapter.
HISTORY (Sec. 54 ch 163 SLA 1959; am sec. 16 ch 214 SLA 1975)

Sec. 28.20.520.
OTHER PROOF MAY BE REQUIRED.
Whenever proof of financial responsibility filed under this chapter no longer fulfills the purpose for which it is required, the department shall required other proof as required by this chapter and shall suspend the license pending the filing of other proof.
HISTORY (Sec. 55 ch 163 SLA 1959)

Sec. 28.20.530.
APPLICATION OF DEPOSIT. The department shall hold the deposit to satisfy, in accordance with this chapter, any execution on a judgment issued against the person making the deposit for damages, including damages for care and loss of services because of bodily injury to or death of any person, or for damages because of injury to or destruction of property, including the loss of use of it, resulting from the ownership, maintenance, use or operation of a vehicle subject to registration under the laws of this state after the deposit is made. Money or securities deposited are not subject to attachment or execution unless the attachment or execution arises out of a suit for damages specified in this section. HISTORY (Sec. 52 ch 163 SLA 1959; am sec. 17 ch 214 SLA 1975)

Sec. 28.20.540.
DURATION, CANCELLATION AND RETURN OF PROOF.
(a) The department shall, upon request, consent to the immediate cancellation of a bond or certificate of insurance, or shall return to the person entitled to it money or securities deposited as proof of financial responsibility, or shall waive the requirement of filing proof, in any of the following events:

(1) at any time after three years from the date proof is required when, during the three year period preceding the request, the department has not received record of a conviction or a forfeiture of bail which would require or permit the suspension or revocation of the license or registration of the person by or for whom the proof was furnished; or

(2) upon the death of the person on whose behalf the proof was filed or the permanent incapacity of the person to operate a motor vehicle; or

(3) if the person who has given proof surrenders his license to the department.

(b) The department shall not consent to the cancellation of a bond or the return of money or securities if an action for damages upon a liability covered by the proof is pending or a judgment upon the liability is unsatisfied, or if the person who filed the bond or deposited money or securities has within one year immediately preceding the request been involved as a driver or owner in a motor vehicle accident resulting in injury or damage to the person or property of others. An affidavit of the applicant as to the nonexistence of these facts, or that he is released from all of this liability, or has been finally adjudicated not to be liable for the injury or damage is sufficient evidence in the absence of evidence to the contrary in the records of the department.

(c) Whenever a person, whose proof has been cancelled or returned under (a)(3) of this section applies for a license within a period of three years from the date proof was originally required, the application shall be refused unless the applicant reestablishes the proof for the remainder of the three-year period.

HISTORY (Sec. 56 ch 163 SLA 1959; am sec. 18 ch 214 SLA 1975)

Sec. 28.20.550.
TRANSFER OF REGISTRATION TO DEFEAT PURPOSE OF CHAPTER PROHIBITED.

(a) If an owner's registration is suspended under this chapter, the registration shall not be transferred nor the vehicle registered in any other name until the department is satisfied that the transfer of registration is proposed in good faith and not for the purpose or with the effect of defeating the purposes of this chapter.

(b) This section does not affect the rights of a conditional vendor, chattel mortgagee or lessor of the vehicle registered in the name of another as owner who becomes subject to this chapter.

(c) The department shall suspend the registration of a vehicle transferred in violation of this section. HISTORY (Sec. 57 ch 163 SLA 1959)

Sec. 28.20.560.
SURRENDER OF LICENSE AND REGISTRATION, AND FALSE AFFIDAVITS.

(a) A person whose license or registration is suspended under any provision of this chapter, or whose policy of insurance or bond, when required under this chapter, is cancelled or terminated, shall immediately return his license or registration to the department. If a person fails to return the license or registration to the department, the department shall immediately direct a peace officer to obtain possession of it and to return it to the department.

(b) A person who wilfully fails to return a license or registration as required in (a) of this section or who knowingly gives an affidavit required by this chapter which is false is punishable by a fine of not more than $500, or by imprisonment for not more than 30 days, or by both. HISTORY (Sec. 58 ch 163 SLA 1959)

Sec. 28.20.570.
FORGED PROOF.
A person who forges or, without authority, signs any evidence of proof of financial responsibility for the future, or who files or offers for filing evidence of proof of financial responsibility for the future, knowing or having reason to believe that it is forged or signed without authority, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both.
HISTORY (Sec. 59 ch 163 SLA 1959)

Sec. 28.20.580.
ASSIGNED RISK PLANS. After consultation with the insurance companies authorized to issue motor vehicle liability policies in this state, the director of the division of insurance shall approve a reasonable plan, fair to the insurers and equitable to their policyholders, for the apportionment among these companies of applicants for motor vehicles policies and other vehicle coverages who are in good faith entitled to but are unable to procure policies through ordinary methods. When a plan is approved, all the insurance companies shall subscribe to it and participate in it. An applicant for an assigned risk policy, a person insured under an assigned risk plan, and an insurance company affected may appeal to the commissioner of commerce and economic development from a ruling or decision of the authority designated to operate the plan. Failure to adopt an assigned risk plan does not relieve any person from responsibility under this chapter. HISTORY (Sec. 60 ch 163 SLA 1959; am sec. 16 ch 144 SLA 1977)

Sec. 28.20.585.
REINSTATEMENT FEE. If an operator's license is suspended under the provisions of this chapter, the department shall charge a person who applies for reinstatement of the operator's license a reinstatement fee of $50. HISTORY (Sec. 8 ch 78 SLA 1982)

Sec. 28.20.590.
PAST APPLICATION OF CHAPTER. This chapter does not apply to any accident or judgment arising from an accident or violation of the motor vehicle laws of this state, occurring before September 1, 1959. HISTORY (Sec. 61 ch 163 SLA 1959)

Sec. 28.20.600.
CHAPTER DOES NOT PREVENT OTHER PROCESS. This chapter does not prevent the plaintiff in an action from relying for relief upon other processes provided by law. HISTORY (Sec. 62 ch 163 SLA 1959)

Sec.28.20.610
PROVISIONS OF CHAPTER APPLY THROUGHOUT STATE.
The provisions of this chapter apply upon highways and elsewhere throughout the state. HISTORY (Sec. 63 ch 163 SLA 1959)

Sec. 28.20.620.
APPLICATION OF ADMINISTRATIVE PROCEDURE ACT.
Repealed by sec. 4 ch 140 SLA 1977.

Sec. 28.20.630.
DEFINITIONS
In this chapter unless the context otherwise requires
(1) Repealed by sec. 20 ch 214 SLA 1976.
(2) Repealed by sec. 2 ch 135 SLA 1977.
(3) "judgment" means a judgment which is final by expiration without appeal of the time within which an appeal may be taken, or final by affirmation on appeal, given by a court of any state or of the United States, upon a cause of action arising out of the ownership, maintenance, or use of a vehicle of a type subject to registration under the laws of this state, for damages, including damages for care and loss of services, because of bodily injury to or death of a person, or for damages because of injury to or destruction of property, including the loss of use of property, or upon a cause of action on an agreement of settlement for such damages;
(4) Repealed by sec. 2 ch 135 SLA 1977.
(5) Repealed by sec. 20 ch 241 SLA 1976; sec. 2 ch 135 SLA 1977.
(6) Repealed by sec. 2 ch 135 SLA 1977.

SHORT TITLE.
This chapter may be cited as the Motor Vehicle Safety Responsibility Act.
HISTORY (Sec. 1 ch 163 SLA 1959)

END OF DOCUMENT

AGENCY: DEPARTMENT OF PUBLIC SAFETY **CATEGORY:** PUBLIC PROTECTION

PROGRAM: LIFE AND PROPERTY PROTECTION **BRU(S):** DRIVER/VEHICLE SERVICES

The Driver/Vehicle Services BRU is organized into four components: Vehicle Services, Driver Services, Field Services, and Administration. The basic purpose of the Vehicle Services unit is protection of ownership of vehicles by the maintenance of an official single source record of vehicle titles. License plate records also facilitate vehicle recovery when stolen. The purpose of the Driver Services unit is to restrict vehicle operation to those persons who are capable of safe operation by utilizing a system of driver testing, records maintenance, and a "driver improvement" function to identify and help improve or suspend drivers who violate safe driving laws. This unit also provides protection for innocent victims of accidents by suspending those drivers who do not meet their financial responsibilities resulting from an accident. The Field Services Unit operates the system of field offices where the public may obtain their vehicle titles, registrations, and driver licenses.

Driver and vehicle identification information collected is computerized for rapid retrieval by law enforcement agencies during investigation of criminal activities. This information is highly useful in identifying offenders. For instance, FBI statistics show that nationwide, a motor vehicle is involved in 50% of all crimes committed.

The Administration component includes the director's office, central support staff, and the municipal tax unit. The municipal tax unit is funded by charges assessed to municipalities which elect to levy a municipal motor vehicle tax; this tax is collected by the State.

IIR/ACORD develops auto identification card

WHITE PLAINS, NY — Robert E. Merriman, executive vice president of the recently merged IIR/ACORD Corporation, has announced the availability of a uniform automobile insurance identification card effective February 15. Six of the 18 states that require proof of insurance as part of their mandatory automobile insurance laws have approved the ACORD form. Three other states appear to be nearing approving it, and several others have indicated that they are looking favorably upon it.

Those states where the card has been approved include Colorado, Connecticut, Delaware, Montana and Texas. Kansas also has given its approval, but has limited its use to private passenger automobiles.

Companies also are required to print and distribute ID cards of some type in Florida, Georgia, Hawaii, Idaho, Kentucky, Michigan, Nevada, New Jersey, New York, Oklahoma, Pennsylvania, and West Virginia. Some companies also issue ID's on a voluntary basis in states where they are not required. Although the majority of these forms are similar in appearance, each jurisdiction has some unique content or size requirement, necessitating separate forms which will comply with the state's regulation.

Reinsurance arbitration program offered by IAF

NEW YORK — A new arbitration program to help insurers and reinsurers speedily resolve their disputes has been developed by Insurance Arbitration Forums, Inc.

The "Excess/Primary Reinsurance Arbitration" program provides an effective vehicle for the settlement of inter-insurer disputes, according to Bernard L. Hines Jr., executive director of IAF, a non-profit industry organization.

"This program will enable insurers and reinsurers to resolve their disputes more quickly and efficiently," he said.

Prior to the establishment of the IAF program, there were no formal rules to guarantee an objective and prompt settlement of a reinsurance dispute, said Hines.

Now, through IAF's national network, cases involving all types of reinsurance disputes are being handled according to specific arbitration rules, he said. In addition, the entire arbitration process takes only 60 to 90 days.

Under the reinsurance program, disputing parties choose the hearing site and participate in the selection of arbitrators from IAF's group of experienced reinsurance executives.

Filing cost for the program is $250 for each disputing party. The program is voluntary and handled on a per case basis.

MEMORANDUM

TO: Representative Joe Hayes
Attention: Jeff Day

FROM: David Teal
Research Staff

RE: Automobile Liability Insurance
Research Request Number 83-128

Jeff Day, of your staff, asked for information relating to automobile liability insurance. More specifically, he requested the latest estimates of the proportion of uninsured motorists in Alaska, the number of vehicles registered in the state, the number of licensed drivers, and the amount of property damage and personal injury caused by uninsured motorists.

Insured vs. Uninsured Motorists

As you may know, automobile liability insurance policies generally cover some persons not named on the policies; as far as the insurance provider is concerned, the unit of exposure is the vehicle, not the policy-holder or the number of potential operators. This factor makes determining the number of uninsured drivers very difficult and is the reason that data are usually presented in terms of uninsured vehicles rather than uninsured persons.

The Division of Insurance prepared statistics on the number of uninsured vehicles in Alaska, but included several caveats in the analysis. (See Attachment A.) That study used information from several sources and produced two estimates of the number of uninsured vehicles during several years. The estimates are so dissimilar that one must question their value. For example, the estimate of uninsured vehicles in 1980 was 40.5 percent by one method and 11.0 percent by the other method.

A third method, which was used by the Division of Drivers' Services in the Department of Public Safety, is likely to provide a much better estimate of the proportion of motorists in Alaska that are uninsured. The division reviewed records of accidents that occured during January of 1981 and found that 21 percent of motorists involved in accidents were uninsured. A repeat of the study in January of 1982 showed that

20 percent of motorists were uninsured. Applying the 20 percent figure to the vehicle registration statistics presented later in this memorandum produces an estimate of about 100,000 uninsured vehicles in the state. Figures for 1983 have not been compiled.

Liability Limits

Jeff Day noted that liability limits of $100,000 per person (to a maximum of $300,000 per accident) for bodily injury and $50,000 for property damage--traditionally written as 100/300/50--are "standard" and wondered how many insured drivers currently carry less than this amount of liability insurance. I was unable to find any written record of the number of motorists that purchase more insurance than is required by law, but it is worth noting that Alaska currently requires 25/50/10 and that Hawaii is the only state with higher limits than Alaska. (See Attachment B.)

The only way to determine the number of policies written for limits higher than the minimum is to contact the individual insurance companies. A reasonable estimate could be obtained by contacting State Farm, Allstate, Criterion, and United Services. Together, these companies insure about 70 percent of Alaska's motorists.

I was able to contact Allstate and State Farm Insurance Companies, and spokesmen for both said that their most common coverage is 100/300/50. In this sense, the 100/300/50 policy is the industry standard. According to State Farm Insurance, the additional cost of 100/300/50 amounts to only about $20 per year more than the 25/50/10 coverage. The company also pointed out that law suits now commonly exceed Alaska's current minimums.

Damage and Injury Caused by Uninsured Motorists

There are no requirements that records on this subject be maintained. Don Koch, of the Division of Insurance, stated that he wouldn't even be able to "guesstimate" because he felt that much of the damage is unreported and/or uncompensated. A similar opinion was expressed by representatives of the insurance industry.

As you may be aware, uninsured motorist coverage is a mandatory offering in Alaska. This means that insurance companies must offer the coverage and inform clients of its availability. There is no requirement that the coverage be purchased.

Registered Vehicles and Licensed Drivers

According to Sharon Naus, of the Division of Drivers' Services in the Department of Public Safety, there were 316,797 persons holding valid Alaska drivers licenses on January 10, 1983. She also reported that 407,870 vehicles were registered in Alaska in calendar year 1982. The following table shows the number of registered vehicles by vehicle type.

Motor Vehicles Registered in Alaska
Calendar Year 1982

Vehicle Type	Number
Passenger Auomobiles	217,719
Motorcycles	14,504
Commercial Trailers	10,079
Utility Trailers	37,999
Commercial Trucks	19,361
Pick-ups	106,851
Buses	1,357
TOTAL	407,870

ATTACHMENT A

ALASKA DRIVERS
Insured vs. Uninsured

The division's statistical needs respond to rate-making and solvency issues. Nevertheless, it has made an attempt to obtain some feeling as to what portion of the public may be uninsured. Unfortunately, a number of caveats must be placed on this information. The sources for the data used in the calculation come from several areas and in each case, this data is untested and has been subject to some adjustment or assumption which may cast suspicion on its accuracy.

You will note the substantial difference between the two charts. The reason for this difference is attributed to the different interpretation of what constitutes a private passenger type risk. The caveats following each chart detail the source of the numbers.

The data that follows is useful for "guesstimating" the percentage of insured motor venicles in Alaska. It does not relate to insured persons in Alaska. To our knowledge, there is currently no source for arriving at a number of insured persons since a policy, when written, covers some persons not named automatically.

The unit of exposure, as far as the insurer is concerned, is the number of vehicles not the number of potential operators.

Chart 1. (From Division of Insurance 1982 Statistical Analysis)

(1) Year	(2) Registered Autos	(3) Insured Car Years	(4) % Insured	(5) % Uninsured
1975	199,536	117,355	58.8	41.2
1976	221,386	120,964	54.6	45.4
1977	226,389	121,635	53.7	46.3
1978	232,425	123,581	53.2	46.8
1979	229,403	132,391	57.7	42.3
1980	230,040	136,895	59.5	40.5

(1) This column is on a calendar basis.

(2) The number of registered automobiles was obtained from the Division of Planning and Research in the Department of Transportation and Public Facilities of the State of Alaska. The number of auto registrations derives from the following types of license plates:

- Regular
- Personalized
- Call Letter
- Other, including legislator, historic vehicle
- Pickups and vans
- Farm trucks

The numbers have been adjusted to remove duplicate registrations. They to not include unregistered vehicles, nor is there a method to arrive at a reasonable "guesstimate" of that number. Prior to 1977, pickups and vans were included in the freight-light trucks classification. We have made an adjustment to separate the pickups and vans from that classification, based on the relationship during 1977-79 of the pickups and vans classification to the freight-light trucks classification. Official automobiles (State, federal and municipal) are not included. Some fleets of automobiles have been included but are not identifiable by name or number. The chart relates only to private passenger registrations and insurance.

(3) These figures were obtained from the Automobile Insurance Plans Service Office (AIPSO), a licensed rating organization for this State. Included are voluntary and assigned risk nonfleet private passenger vehicles insured. An insured car year is one automobile insured for one year, so that, if a car is insured for six months, that would be 1/2 car year.

(4) = (3) ÷ (2)

(5) = 100% - (4)

Chart 2 (from AIPSO Ins. Facts, 1982)

Year	Registered Autos*	Insured Car Years+	% Insured	% Uninsured
1973	111,455	99,430	89.2	10.8
1974	135,902	99.430	70.2	29.8
1975	141,921	117,355	82.7	17.3
1976	154,093	120,964	78.5	21.5
1977	159,896	121,635	76.1	23.9
1978	162,578	123,619	82.2	17.8
1979	153,402	132,391	86.3	13.7
1980	153,774	136,895	89.0	11.0

* Represents number of passenger car registrations based on data from U.S. DOT, Federal Highway Administration, Highway Statistics Division, Office of Highway Planning. (A) Includes all new and renewal passenger car registrations. (B) Includes passenger car fleet vehicles, taxi cabs, and miscellaneous private passenger-car type vehicles registered as passenger cars. (C) Includes passenger car registrations made throughout the year, although vehicle may have ben registered only a portion of the year. (D) Vehicles registered in one name and later sold and registered in another name count as two registrations, etc.

+ Represents 1/12 of the number of exposure months of liability insurance on vehicles rated as private passenger nonfleet type risks. (A) Includes many pickup trucks insured as passenger car type but not so registered. (B) May include other vehicles insured as passenger car risks, but registered as antiques, station wagons, vanity, press, ham radio, etc. (C) Does not include motorcycles recreational vehicles, nonowner risks, and cars rated in a fleet or self-insured.

ATTACHMENT B

In view of the interest being expressed by a number of persons in reviewing the limits of liability required by the Alaska Safety Responsibility Act (financial responsibility law) the Division of Insurance has updated exhibits originally prepared when the limits were last revised in 1975.

EXHIBIT A reflects the purchasing power or value of the dollar based on the annual average value as measured by consumer prices. The base year utilized is 19[illegible] the year of Alaska Statehood. The indices used were developed by the U. S. Bureau of Labor Statistics. Column (3) shows the limits of liability for bodily injury applicable to the particular year. Column (5) does the same for property damage. The figures for 1982 and 1983 are projections and are not firm.

EXHIBIT B is the same concept as EXHIBIT A except it uses the date of last change of limits as the base year and thus uses a shorter span of years.

EXHIBIT C is an excerpt from the FC&S BULLETINS published by the National Underwriter Company of Cincinnati, Ohio. It depicts the current (as of January 1983) limit of liability for each state of the United States and for each province in Canada.

MEMORANDUM March 6, 1980

TO: Representative Sally Smith

FROM: Peter B. Froehlich

RE: Uninsured Motorists and the Motor Vehicle Safety Responsibility Act (AS 28.20) (Research Request No. 69)

You recently asked this agency to explore possible methods to "tighten up" the Motor Vehicle Safety Responsibility Act (AS 28.20). In the course of our research on the Act, we learned that the Senate Commerce Committee has been studying the same issue. That committee has received a report from Richard Block, former director of the Division of Insurance, addressing amendments to the Act, as well as other approaches to the problem of uninsured motorists in Alaska. Senator Bradley has recently introduced one bill as a result of Mr. Block's report (SB 460 authorizing municipalities to impose mandatory insurance). Another, which will amend and tighten up the Motor Vehicle Safety Responsibility Act is currently being drafted by the Legal Services Division of the Legislative Affairs Agency for the committee.

In light of the existence of Mr. Block's report and the legislation which Senate Commerce Committee intends to introduce amending the Act, you have instructed us that completion of our research pursuant to your request was not necessary. Nonetheless, we offer this memorandum as a brief summary of our work thus far.

* * * * * * * * * * *

The problem at hand is that over 50% of the registered private vehicles in Alaska are completely uninsured. In 1978, according to Division of Insurance statistics, the figure was 49.1%. Although that year is the most recent for which complete data is available, the trend has been an increase in the figure each year.

The answer to the problem is not at all simple, and many possibilities have been suggested. Mandatory insurance appears to be the least popular for several reasons. In the states which have tried it, enforcement and administration has been an expensive burden and insurance rates have often climbed faster than in states without mandatory insurance.

"No fault" insurance is perhaps a more workable solution, but has not been popular with insurance carriers, attorneys and others in Alaska when it has been considered by the legislature in the past.

Amendment of the existing Motor Vehicle Safety Responsibility Act may be the most feasible answer. This approach would take advantage of the main body of an existing chapter of the Alaska Statutes. It would therefore result in less disruption, adjustment and staff increase in the existing bureaucracy which implements the Act. It would be simpler both to legislate and to administer. Because fewer people would be forced by law to buy insurance, individual freedom of choice would be preserved to a greater degree. While all possible problems with uninsured drivers would not be solved, significant improvement could result from amending the Act.

The Motor Vehicle Safety Responsibility Act was enacted in 1959 during the first legislative session after Statehood. The Act deals with two separate subjects: 1) the requirement of deposit of security by uninsured motorists involved in an accident (AS 28.20.050-220); and 2) the requirement of proof of financial responsibility for the future by motorists convicted of certain offenses or involved in an accident (AS 28.20.230-600). The Act has been amended 13 times from 1964 through 1977. However, none of these amendments were really substantive. They merely made minor changes such as raising dollar amounts (e.g., ch 202 SLA 1976 and ch 144 SLA 1977), repealing some sections and subsections (e.g., 53 SLA 1973 and ch 135 SLA 1977), and substituting the Department of Public Safety for the Department of Revenue in the administration of the Act (e.g., ch 214 SLA 1976). Although the Alaska Supreme Court made several specific suggestions for substantive amendments to the Act in Paulson vs. National Indemnity Co. 498 P2 d731 (AK 1972), no remedial action was taken by the legislature. The Act has been significantly interpreted in one other Alaska Supreme Court case, Hart vs. National Indemnity Co. 422 P2 d1015 (AK 1967). It has been cited or applied in at least 9 other cases, including three Alaska Supreme Court cases, two Federal District Court cases, and four Alaska Superior Court cases.

Several amendments to the Act have been suggested either by others contacted during our research or by the research itself. First, of course, are the suggestions of the Alaska Supreme Court in the Paulson decision 498 P2 d731 at 737. These suggestions are directed at tightening the requirements of the second part of the Act for proof of financial responsibility for the future by motorists involved in accidents. The court suggested the repeal of language in AS 28.20.410 and 440 which allows a motorist to satisfy the act by insuring only one of several vehicles he owns.

Two amendments were suggested by Ken Moore, director of the Division of Insurance in a January 24, 1980 letter to Senator Hackney. These amendments would 1) prevent registration of a vehicle or renewal thereof by anyone required under the Act to file proof of responsibility for the future who did not do so; and 2) make any falsification of such proof punishable by a fine or jail sentence. The latter suggested amendment appears to be covered by existing AS 28.20.570. The first suggestion, essentially tightening the relationship between the Act and AS 28.10 (Vehicle Registration) appears to be necessary and desirable; however, it would be susceptible to devious compliance by an individual who obtains an insurance policy, registers his car, and then cancels his policy.

Another possible amendment to tighten the Act would be repealing AS 28.20.260(b) which exempts anyone involved in an accident who establishes his freedom from fault in court from the proof of financial responsibility in the future requirement. The Department of Public Safety in 13 AAC 08.110 has implemented this section by providing that only those who "in the department's opinion" stand a "reasonable possibility" of being held liable in court need provide the required proof. Eliminating the exemption of AS 28.20.250(b) would force more people to prove financial responsibility and save the department from making its finding as to reasonable possibility of liability. However, it would also force innocent parties to accidents to buy what would probably be high risk, high cost "SR 22" insurance.

One last amendment which has been suggested may be the most effective measure. It is a suggestion which apparently arose from Mr. Block's report to the Senate Commerce Committee and will be included in that committee's bill. This approach would follow the example of New Mexico and enact a fairly stiff penalty (fine and/or jail) for any uninsured motorist who is involved in an accident in which he has any fault.

In conclusion, we should note that the whole area of automobile insurance and solutions to the problem of uninsured motorists is very complex, and no perfect solutions seem to be available. If you have any futher questions or desire any additional background information on this matter, please contact us.

A Study of Uninsured Motorists Involved in Reported Automobile Accidents

Overview

A study of the characteristics of uninsured motorists and of the vehicles they drive has been done by the Personal Lines Committee of the All-Industry Research Advisory Council (AIRAC). This study was based on data obtained from official accident report forms filed with motor vehicle departments in seven states--California, Florida, Louisiana, North Carolina, Oregon, Virginia, and West Virginia. It was assumed that a vehicle was uninsured if the accident report did not show the vehicle was insured, or if the driver at the time of the accident was other than the owner and no insurance was shown.

Major findings from this study of uninsured drivers involved in reported accidents were as follows:

1. About 70% of the uninsured motorists in the study were males. In all accidents (including both insured and uninsured), almost 70% of the drivers were males, also. Thus, there does not appear to be any significant difference by sex in the insured population and the uninsured population. It is interesting to note that males, who make up 53% of all licensed drivers, were involved in a disproportionate share of accidents.

2. Uninsured motorists tended to be younger drivers. Some 46% of the uninsured motorists in the study were under age 25 compared with 38% of all drivers involved in accidents and 22% of all licensed drivers in the seven survey states.

3. About 30% of the uninsured motorists were not owners of the vehicles driven in the reported accidents. Younger drivers were less likely than older drivers to be owners (possibly a reflection of young people driving parents' cars).

4. A large proportion of the uninsured vehicles were older models. Some 46% of the uninsured vehicles in the study were 1971 models or older compared with 36% of all cars in operation.

5. A special analysis of the areas of residence of the uninsured motorists examined levels of income and of mobility. This analysis suggested that failure to have auto insurance was not restricted to a limited segment of the population (i.e., the uninsured motorists were not concentrated in any particular types of areas.)

Introduction

Although the magnitude of the problem presented by the uninsured driver to the insured public and to the auto insurance industry is difficult to measure, it has been alleged that the number of uninsured drivers is increasing and that a major reason for car owners driving without insurance is the high cost of such auto insurance. In 1978, the Personal Lines Committee of the All-Industry Research Advisory Council (AIRAC) charged a subcommittee with exploring changes in consumer behavior resulting from increases in auto insurance premium. One project initiated by this subcommittee was a study of the characteristics of uninsured motorists and of the vehicles they drive. This report summarizes the results of that study.

Methodology

Recognizing the limitations of examining aggregate statistics comparing car registrations with insured cars and of surveying consumer attitudes and behavior (possible self-reporting bias), the approach taken in this study was to examine information provided on official accident report forms that described accidents involving private passenger vehicles. Information about uninsured drivers and vehicles was provided by motor vehicle departments in seven states from the reports of accidents that occurred during a one-month period or from reports processed during a one-month period. For the purpose of this study, it was assumed a vehicle was uninsured if the accident report did not show that the vehicle was insured. Also, if the driver was other than the owner and no insurance was shown, it was assumed that there was no insurance applicable. It should be noted that data in this study describing uninsured drivers were based solely on accident reports filed in the seven survey states, and no effort was made in the course of this study to verify the accuracy or completeness of these reports.

Information was obtained from the states of California, Florida, Louisiana, North Carolina, Oregon, Virginia, and West Virginia using survey forms similar to that shown in Appendix A. The following items were collected for each uninsured driver: accident date, accident location (county), residence ZIP code, birthdate, sex, vehicle ownership, vehicle model year, vehicle make, and types of damage. States were selected to take part in this study on the basis of their ability to provide the desired information and their willingness to participate. A list of survey periods is shown in Appendix B for each participating state.

It should be noted that this method did not provide information about uninsured motorists in general, but about uninsured motorists who were involved in accidents reported to their respective state motor vehicle departments. Consequently, comparisons in this report of uninsured motorists with distributions of all drivers involved in accidents are more meaningful than comparisons with all licensed drivers (which are also provided). Because distributions of all drivers involved in accidents were not available for the seven survey states individually, data for 24 states combined were used for comparison purposes. Unfortunately, appropriate distributions of all vehicles involved in accidents by make and by model year were not available.

Summary of Results

Descriptive information was collected for a total of 6,159 uninsured motorists involved in reported accidents in the seven survey states. The number of uninsured motorists and the number of accident reports reviewed during the survey period are shown for each state in Table 1. The largest absolute numbers of uninsured motorists were found in the states of Florida (2,169) and California (1,035). The particularly small number of uninsured motorists in North Carolina (51) was probably a result of the selection criterion used by that state: information was provided only for those cases where action was being taken by the state. It is not recommended that state-to-state comparisons be made of the number of

Table 1

Number of Uninsured Motorists and Number of Accident Reports Reviewed by State

State	Number of Uninsured Motorists Involved In Reported Accidents	Number of Accident Reports Reviewed
California	1,035	47,494
Florida	2,169	6,539
Louisiana	778	24,762
North Carolina	51	Not Available
Oregon	446	10,535
Virginia	773	38,297
West Virginia	907	4,950

uninsured drivers as a percentage of accident reports reviewed because of suspected differences in data collection methods among the participating states. This report focuses on descriptions of uninsured motorists and vehicles rather than on such comparisons of incidence for this reason.

It should be noted that the number of uninsured motorists per state may differ in subsequent tables due to varying amounts of missing data for individual survey items. Tables presented in the remainder of this report are based on valid data only.

Sex and age of uninsured motorists are examined individually in Tables 2 and 3, and Table 4 contains distributions of uninsured motorists by age and sex combined. Similar proportions of uninsureds involved in accidents and of all drivers involved in accidents were males. A disproportionately large number of the uninsured drivers and of all drivers in accidents were found to be males when comparisons were made with the distribution of all licensed drivers in the seven survey states. Almost 70% of all uninsured drivers in the study and of all drivers involved in accidents were males compared with 53% of all licensed drivers in the seven survey states (see Table 2 and Figure 1).

Uninsured motorists tended to be younger drivers as shown in Table 3 and Figure 2. Drivers under age 20 accounted for 20% of the uninsured motorists in the study compared with 18% of all drivers involved in accidents and 8% of all licensed drivers. About 46% of the uninsured motorists were 24 years old or younger compared with 38% of all drivers involved in accidents and 22% of all licensed drivers.

The distributions of uninsured motorists and of all licensed drivers categorized by age and sex are shown in Table 4. A similar distribution for all drivers involved in accidents was not available. Consequently, comparisons with all drivers involved in accidents by age and by sex that are shown in Tables 2 and 3 should be a consideration when interpreting information shown in this table. Young males under age 25 accounted for about one-third of the uninsured motorists for the seven states combined, but only 12% of all licensed drivers were males in this age group. Some 18% of the uninsured motorists and 37% of all licensed drivers in the

seven survey states were females aged 25 or older. Similar observations regarding the age and sex of uninsured motorists could be made for each of the seven participating states individually.

A substantial number of uninsured motorists were not owners of the vehicles involved in the reported accidents. As shown in Table 5, about 30% of all uninsured motorists in the study did not own the vehicles driven, and the percentages of nonownership ranged from a low of 20% in California to a high of 44% in Louisiana. The strong relationship between vehicle ownership and driver age (possibly a reflection of young people driving parents' cars) is apparent in Table 6. Half of the uninsured motorists under age 20 did not own the vehicles which they drove at the time of their accidents compared to 30% of those between the ages of 20 and 24. The percentage of uninsured motorists who were nonowners continued to decrease with increasing age for the other age groups shown in this table.

Distributions of uninsured vehicles by model year and by make are shown in Tables 7 and 8. Uninsured vehicles tended to be somewhat older when comparisons were made with all vehicles in operation (see Table 7 and Figure 3). About 46% of the uninsured vehicles in the study and 36% of all cars in operation were 1971 models or older. This general observation regarding uninsured vehicle age applied to all states in the study except Louisiana where 28% of the uninsured vehicles were reported to be 1971 models or older. Strikingly higher percentages of uninsured vehicles were in this age group in North Carolina (68%--but the sample size was very small) and in Oregon (64%).

There was no apparent relationship between vehicle make and involvement in a reported accident while uninsured. As shown in Table 8, the distribution of uninsured vehicles in the study by make was similar to the distribution of all cars in operation.

Residence areas of the uninsured motorists and of all people in four of the survey states were compared in an effort to determine the extent to which the failure to have auto insurance (and involvement in a reported accident) was restricted to a limited segment of the population.

Tables 9 and 10 contain distributions of income levels and of mobility (i.e., percentages of households with length of residence two years or less) for residence ZIP code areas of the uninsured motorists and comparison distributions for the state populations. This analysis was restricted to the states which supplied ZIP codes for at least 85% of the uninsured motorists and for which there were adequate numbers of uninsureds. There was no consistent pattern appearing in either the income distributions or in the mobility distributions that was present for each of the four states. This suggested that uninsured motorists were not concentrated in any particular types of areas.

Further analyses of accident locations and areas of residence were done in order to discover whether there was a relationship between driving in urban areas and having auto insurance. As shown in Table 11, 32% of the accidents in Florida involving uninsured motorists occurred in Dade County (Miami) while 15% of all vehicles in Florida were registered in that county. Similarly, 39% of the accidents reported in California occurred in Los Angeles County compared to 31% of all registered vehicles (see Table 12). A substantially higher percentage of the uninsured motorists than of the total population in California resided in the city of Los Angeles--13% compared to 8%--as shown in Table 13. These comparisons seem to support a hypothesis that uninsured motorists were more likely to drive or to reside in urban areas. However, accident frequencies are higher in urban areas than in nonurban areas. Thus, since this study was based on uninsured motorists who were involved in reported accidents, these comparisons may reflect, in part, a higher accident frequency in urban areas rather than a characterization of uninsured motorists.

4-year compulsory auto-insurance plan advances

By Joel Nilsson
Republic Staff

A four-year experimental program including compulsory automobile insurance or proof of financial responsibility for all Arizona drivers was approved Thursday by the Senate Commerce and Labor Committee.

The panel revised a House-passed version by placing the provisions into law with an automatic repeal date of Dec. 31, 1986, and establishing a Mandatory Vehicle Insurance Review Commission to gauge the impact of the legislation.

As passed by the House on March 8, the provisions would have been placed in statute with no expiration date. House Bill 2333 was approved by the House on a 46-10 vote.

The committee's 6-1 approval on a bipartisan vote apparently ensures Senate passage of the proposal, which is similar to other measures that have failed repeatedly in the Senate.

Residents would be required to carry auto insurance or other proof of financial responsibility when they register or re-register their vehicles and to sign a sworn statement that the financial responsibility will remain in effect for the entire registration period.

Rep. Bill English, R-Sierra Vista, who has introduced auto-insurance measures in each of the last four years, called the amended version "the most finely tuned measure of its kind in the entire United States."

English estimated that 40 percent of Arizona's motorists, or 600,000 people, do not have vehicle insurance.

Under the legislation, a driver cited in an accident would be required to surrender his license, which would be returned only after demonstrating proof of financial responsibility in court.

The measure would repeal existing financial-responsibility statutes, and the Motor Vehicle Division would be required to verify annually, through random selection, the financial responsibility of owners of up to 10 percent of the state's registered motor vehicles.

Failure to prove financial responsibility would be a Class 1 misdemeanor with a minimum $250 fine for the first offense. Subsequent offenses would carry higher fines, mandatory license suspensions and jail terms.

The proposed commission in the Department of Insurance would monitor the program to ascertain if the number of uninsured motorists declined; enforcement and prosecution problems, if any; and determine whether insurance premiums increased as a result of mandatory auto insurance.

The measure would require that reports by the commission be forwarded to the Legislature annually.

Sen. Peter Kay, R-Phoenix, asked English whether he lacked conviction for compulsory insurance by agreeing to make it a four-year experimental program beginning Dec. 31.

English said he has "total conviction" in the program and said the expiration was "part of the political deal I cut with Senator Corbet," referring to Senate President Leo Corbet, R-Phoenix.

Also adopted by the panel was an amendment that would prohibit "stacking" of underinsured- and uninsured-motorist coverage.

Stacking — allowing damages that exceed policy limits in one category to be paid from the other category — was opposed by insurance companies but defended by David Gage, representing the Arizona Trial Lawyers Association.

Gage contended the anti-stacking provision was "a hidden trap for the unwary" and was "designed to reduce insurance-company payouts."

[illegible] Republic, March 17, 1961

Compulsory auto-insurance bill gets tentative OK in House

By Don Harris
Republic Staff

The Arizona House late Monday tentatively approved a bill calling for mandatory automobile insurance with a provision that could land violators in jail for 48 hours.

The measure, House Bill 2129, also increases the minimum coverage for liability and property damage and sets up procedures for tracking down uninsured motorists.

Another aspect of the bill would declare a driver's license to be suspended or revoked if it were found that the driver lied about having insurance coverage when he registered his vehicle.

House members debated the comprehensive and complex bill for more than an hour before tentatively approving it in a standing vote, 31-6.

The bill is certain to receive close scrutiny in the Senate. Senate President Leo Corbet, R-Phoenix, commented, "All the information we get is that it will raise the price of insurance. We're not interested in doing that. The bill has some good features. We will look at it and try to extract those good portions."

Corbet questioned the constitutionality of sending a motorist to jail for failing to have insurance. He said the U.S. Constitution prohibits jailing a person for failing to pay a debt.

As originally prepared, the measure would have mandated a 48-hour jail term for any uninsured motorist involved in an accident. The amended version that was adopted provides for a hearing procedure in which the two days in jail would not be served until the driver was found guilty by a magistrate.

Rep. Bill English, R-Sierra Vista, chief sponsor of the bill, said a motorist accused of failing to have insurance could attempt to avoid jail by making a plea that he thought, in good faith, he was insured.

English urged passage of the bill, saying it is needed to "help those poor folks who are damaged irreparably" by uninsured motorists.

"We need to take a firm grip on this," he said. "We need to get tough. It is totally irresponsible to be driving on the streets without adequate insurance."

Rep. Rhonda Thomas, R-Phoenix, successfully amended a provision on the minimum allowable coverage. Present standards call for $15,000 liability coverage for injury to one person, $30,000 for injury to two or more, and $10,000 for property damage. The bill proposed to push those to $25,000, $50,000 and $15,000, respectively. Mrs. Thomas' amendment sets the minimums at $20,000, $40,000 and $10,000, respectively.

She charged that, under the original proposal, insurance rates would have increased by about $80 a year, roughly a 10 percent boost. Mrs. Thomas said that under her proposal, rates would go up about 6 percent.

Rep. Clare Dunn, D-Tucson, criticized the provision that calls for a random sampling each year of 10 percent of the licensed drivers to uncover uninsured motorists who lied about their financial responsibility when they registered their vehicles.

If a motorist failed to respond to the survey notice mailed by the Motor Vehicle Division, it would be assumed under the terms of the bill, that the motorist did not have insurance. That would enable the state to revoke the individual's license.

"Get ready for some real havoc in your district," Miss Dunn said, warning that someone on vacation who failed to respond in time would lose his license.

New auto insurance law is tougher, but still has problems

By SUSAN HEADDEN

A 20-year-old driver crosses the center line on a busy street and crashes head-on into another car, killing both its occupants.

The victims are parents and breadwinners. Their family suffers not only personally, but financially, because the motorist who caused the accident is uninsured.

"You could legitimately expect a jury award of about $400,000," said Indianapolis attorney Andrew Young, who handled such a case. "But there's no point. That family will go uncompensated."

IN RECENT years, the risk of causing a serious accident has not been enough to keep an estimated 13 percent of Indiana's registered motorists from driving without insurance. But their habits may change after Jan. 1, when changes in the state's "proof of financial responsibility" law will go into effect.

The changes, adopted by the 1982 General Assembly, will require motorists to show proof of insurance before they register vehicles. Violations will be Class C misdemeanors, carrying penalties of up to $500 and 60 days in jail.

While it stops short of being a compulsory insurance law, the new statute is tougher than its predecessor. The current law requires that proof be shown only after the fact — in the case of an accident in which a driver causes death, personal injury or property damage in excess of $200. Penalties are limited to a two-year suspension of a driver's license.

SUPPORTERS HOPE the new law will provide added protection for all road users. For others affected by it, the law carries various consequences:

Major insurance companies stand to lose money, as well as self-control. The Bureau of Motor Vehicles will gain responsibility and paper work. And agents specializing in writing policies for high-risk motorists are expected to do a land-office business.

According to Rep. Jeffrey F. Espich (R-Uniondale), who sponsored the bill, uninsured drivers account for 20 to 30 percent of Indiana's traffic accidents.

Because many of the uninsured have poor driving records, they often are able to buy insurance only from companies that specialize in high risks and charge correspondingly high prices.

ONE SUCH AGENT, Robert Friedmeyer of All Risk Insurance, reports a surge in inquiries since the law was passed. He expects a boom in his business by the first of the year.

"They put a few little teeth into the law and it will make people think twice about driving without insurance," Friedmeyer said. "So far, people think it's compulsory — and we haven't bothered to enlighten them."

Likewise, larger companies and agents catering to the average risk client will take on more customers. But they're not as pleased as the high risk specialists with the prospects for new business.

Insurance customers, like clients of banks and law firms, come in degrees of desirability. And like the least credit-worthy mortgagee and the lawyer's charity case, there are drivers whom even All Risk won't insure.

FOR THE HEAVY-FOOTED and the accident prone, there is the assigned risk plan — a pool of the highest-risk drivers, whom insurance companies must accept at relatively low rates. Under the new law, the assigned risk pool (now representing 0.2 percent of the driving population) is sure to grow — but it won't bring in any more profits for the insurance companies.

"The assigned risk pool has never been self-supporting," said Charles Van Arsdale, president of the Insurance Institute of Indiana and an opponent of the law. "They have always been a loss factor, and that will be passed on to the normal insured in the way of higher rates."

Expansion of the assigned risk pool is only part of the problem the law poses for the insurance industry.

CRITICS SAY THE new provisions lay the foundation for a compulsory insurance law, wrapped in red tape, that would increase costs for the consumer and the industry.

"The common result," Van Arsdale said, "is a complex bureaucracy and the need for insurance companies to exchange information with the department of motor vehicles. And this will lead to an increase in premiums."

According to opponents and proponents of the new law, the greatest threat to its effectiveness — and to its simplicity — is enforcement.

A committee continues to work out details, but so far all the Bureau of Motor Vehicles plans to do is require that motorists registering vehicles submit a sworn statement saying they have a policy of a given number with a given insurance company.

THE SIGNATURE will get the motorist a license plate, but short of the risks of a perjury conviction, nothing stands to prevent an applicant from making up a policy or from holding one just long enough to register a vehicle and then canceling it.

"They'll see that it's not working," Van Arsdale said. "Then they will start to patch it up, and you will have the workings of a full-blown mandatory insurance bill."

The difference between the new provisions in the Indiana law and mandatory insurance laws — such as the ones in Massachusetts and New Jersey — is that Indiana's calls for a one-time proof of coverage. In the other states, motorists are required to carry proof at all times and may be fined if they are stopped by a policeman and don't have any.

THE LICENSE branches plan to make verification checks of a random sample of applicants, but insufficient money and manpower probably will make careful monitoring impossible, said Michael M. Packard, commissioner of motor vehicles.

Likewise, representatives of insurance companies say costs prohibit their producing identification cards and notifying the appropriate license branch every time a license-holder cancels a policy.

I.D. cards and notification are features of the "full-blown" law that the industry has historically opposed.

"Indiana has some of the lowest insurance rates because we've been able to stay away from (mandatory insurance)," Van Arsdale said. "We like it that way. We don't want policyholders to have to pay through the teeth for those who are irresponsible."

HE SAID THAT insurance companies already offer extra protection for their regular policyholders against drivers who have no coverage.

The coverage, which 99 percent of Indiana drivers buy for about $10 a year, now extends only to property damage in excess of $200. But under terms of a new law (which the industry intended as a substitute for mandatory insurance law and which goes into effect Sept. 1) it will cover personal injury as well.

"We're already paying for them," said Espich of bad-risk motorists. "But with no help from them."

Although the new law remains unattractive to insurance companies concerned with the marketplace, it does require more high-risk motorists to assume responsibility for their actions and to contribute to the costs of ensuring the safety of all motorists.

THE DEGREE of compliance remains to be seen.

Van Arsdale predicted: "The irresponsible people will still be willing to drive without it, and the others, those who can't even afford to buy food, still won't buy insurance."

Espich commented: "I'm satisfied for today. We'll see how it works, then worry about the changes."

Proposals would tighten insurance law

By LYNNE DeLUCIA
Staff Reporter

Lawmakers have mapped out several avenues to close the gap in the state's automobile insurance card law, which provides drivers with an easy method to circumvent the intent of the statute.

The law, approved two years ago by the General Assembly, requires insurance companies to issue insurance identification cards to motor vehicle owners. The cards must be issued when a policy begins or is renewed.

The cards must be presented at the Department of Motor Vehicles in order to register a car. The department will not issue or renew a vehicle registration unless the card is presented.

Failure to carry the proof of insurance card could result in a $500 fine.

The intent of the law was to provide a way to keep uninsured motorists off the road.

But the loophole in the law is simple: drivers make one payment on an insurance policy — just to get the insurance card — then cancel the policy.

When the original law was written, critics told lawmakers that the proposal would be easily foiled. But proponents argued that the majority of residents would be honest enough to maintain their automobile insurance coverage.

It seems lawmakers are miffed that their attempt to guarantee that all motorists have no-fault automobile insurance is being dodged by a basic, simple maneuver.

Rep. Benjamin DeZinno, D-Meriden, has proposed that an insurance company notify the Motor Vehicle Department immediately when an automobile policy is dropped.

Rep. Paul Gionfriddo, D-Middletown, has taken DeZinno's idea one step further. He suggests that the MVD revoke the automobile registration of a driver who cancels his or her insurance policy.

A more sophisticated approach has been offered by Rep. Edward Krawiecki, R-Bristol. He suggests that a computer-based system replace the no-fault insurance identification card.

The computer system would list all the insured motorists in the state. Insurance companies would be required to maintain an up-to-date log of their clients.

The newly appointed Senate chairman of the Insurance and Real Estate Committee, Frederick Knous, D-Clinton, said the insurance identification card system must be reviewed this year.

Knous said the intent of the current law is "very good," but that too many motorists have discovered an easy way out.

"There have been some problems. Some changes may be needed," he said.

The MVD did not submit legislation this year to change the insurance card law.

Don Byers of the department said that most of the "kinks" have been ironed out since the law took effect last January.

The first months of the new law were difficult for the department and the consumer. Problems arose when consumers who were unaware of the law came to the department to register their cars, only to be turned away because they did not have an insurance card.

Some insurance companies were backlogged and did not issue the cards on time to clients, but Byers said most of the problems have been resolved.

The insurance industry last year opposed suggestions that companies be required to notify the MVD when a policy is canceled. The industry argued that the notification system would be too costly. It has no plans to submit legislation to change the system.

Charleston (W.Va.) Gazette, January 31, 1980

Auto Insurance Bill Is Popular, But It Has Opponents

By Fanny Seiler
Staff Writer

Compulsory automobile liability insurance has struck a popular note in the Legislature and House Speaker Clyde See, D-Hardy, predicted Wednesday the House would pass it.

"I don't think it would be a particularly close vote," See added

But the legislation isn't assured of reaching the House floor. It has to be reported out by the Banking and Insurance Committee. Committee Chairman Clarence Martin III, D-Berkeley, an opponent of the proposal, said he wants to look into ways to improve the present system. But he said it's up to the committee to determine what action to take.

Senate Insurance Committee Chairman Robert Rogers, D-Boone, a sponsor of compulsory insurance for several years, predicted it would pass the Senate. He made the prediction at a public hearing after proponents and opponents gave their views.

OPPONENTS OF compulsory insurance said it would increase insurance rates for the low-risk drivers who already have insurance, but there still would be a high number of uninsured motorists and administrative costs would drain the state's budget at a time when inflation is already taking its toll

Proponents argued that the present system isn't working.

Opponents outnumbered proponents, and were generally insurance industry spokesmen However, John Hall, chairman of the insurance department and professor at Georgia State University, spoke in opposition, coming to Charleston at his own expense. He had done a study as a consultant hired by the South Carolina Legislature South Carolina, according to Martin, is one of the states with compulsory insurance now considering repealing it

Hall said he once was a proponent of compulsory insurance, but now opposes it because rates increase, greater pressure is brought to bear on the rate regulation process that becomes "highly political" as a result, and because enforcement efforts usually fail

Hall said high hazard drivers tend not to be insured and under compulsory insurance they pay higher rates But because they pay higher rates they become vocal in their complaints to the regulatory agency which is faced with a dilemma because the high-hazard driver can't afford the high premiums As the regulatory agency becomes political, it tends to bend under pressure from the vocal high-risk driver and low-risk drivers have to subsidize the high-risk drivers.

IN ADDITION, Hall said rate levies are depressed by the regulator agency and when losses are incurred, insurers tend to make them up from more profitable lines such as commercial business

Grover Czech, regional vice president for the American Insurance Association, representing 150 companies, said North Carolina had 45 full-time highway patrolmen at one time tracking down drivers whose insurance had elapsed Frank Norton, president of Inland Mutual Insurance Co of Huntington, said North Carolina and New York couldn't enforce it. He said he favored a system like Virginia's which gets the driver with a high accident record off the road and put him in jail.

Robert Showen, representing the Independent West Virginia Insurance Federation, said compulsory insurance would cause an additional cost to the policyholders and the taxpayers

But on the proponents side, Delegate Darrell Holmes, D-Kanawha, said an uninsured motorist who was drunk hit his son, causing $1,500 in damage to his vehicle He said the police charged the uninsured motorist with public intoxication, and the driver is still allowed to drive, which he does for a living. Holmes said the Department of Motor Vehicles wouldn't take the driver's license because he needed it Holmes said he supported compulsory insurance or another change to make the present system work.

PHARES READER, retired from the West Virginia Education Association, said he represented 300,000 retired persons in West Virginia as spokesman for the Association of Retired People. He favored compulsory insurance and said he couldn't see the great complications presented by the insurance companies.

Bill Aiken of the West Virginia Farm Bureau also favored a compulsory plan that was "just and fair to all." He said his organization had 6,500 farm members.

Delegate Joseph Caudle, D-Berkeley, spoke in favor of compulsory insurance because he said there's a $300 deduction under the present uninsured motorists law which has to be paid by the motorist who is hit by an uninsured driver.

(Jacksonville) Florida Times-Union, February 15, 1981

Mandatory auto liability insurance pushed

By RANDOLPH PENDLETON
Times-Union Capitol Bureau

TALLAHASSEE — Twenty-five years ago when $5,000 a year was a substantial salary and hospital rooms were a small fraction of what they are today, $10,000 in auto liability insurance was pretty good protection.

Today, with hospital rooms going for $100 a day and $5,000 is below the minimum wage level, $10,000 will not go far in reimbursing an accident victim.

Nonetheless, the minimum required insurance for drivers is no higher today than it was then.

In fact, under no-fault insurance, the [illegible]le now required to carry liability insurance are those who have had accidents. They must have coverage of $10,000 per person with a maximum of $20,000 per accident, and $5,000 property damage.

All drivers must have $10,000 in personal injury protection, which means their medical bills will be paid up to that amount regardless of fault.

There is no reliable figure on the number of drivers without liability insurance in the state, but there are estimates that it is at least 45 percent of those on the highways and is considerably higher in South Florida where insurance rates are considerably higher than in the rest of the state.

The prospect of all of these drivers with no insurance to protect anyone they might run into is alarming to Sen. Richard Langley, R-Clermont.

Langley has introduced a bill that would require liability insurance of $25,000 per person with a maximum of $50,000 per accident and $10,000 property damage.

Thus far there has been no great clamor of support for the legislation.

Deputy Insurance Commissioner James Hanlon says the insurance commissioner's office opposes it at this time because auto insurance companies are in court fighting an order to return excess profits to their customers and increasing the limits would increase their profits.

On the other hand, the insurance industry is opposed to mandatory liability insurance because it would force companies to insure people who are poor risks.

Ralph Cobb, in the financial responsibility section of the Department of Highway Safety and Motor Vehicles, thinks it would be impossible to enforce, particularly in a state where many of the drivers are tourists.

In fact, Cobb says, there probably are more people with liability insurance now than there would be if it were mandatory.

"If you tell people in the office not to wear green socks tomorrow, someone will wear them to see what you're going to do," Cobb said.

Langley said that before a person can support mandatory liability insurance, "There is a philosophical threshold you have to pass first: Whether it is a privilege to drive in Florida or a right. I think it is a privilege."

Having crossed the threshold, Langley feels the fact that some drivers might be kept off the roads because they could not afford compulsory liability insurance is an inadequate argument.

"There are lots of things I can't afford to do," Langley said.

Langley said he now must make up for the lack of compulsory insurance by buying uninsured motorist insurance to protect him if he is hit by someone without insurance. Although he still might need the insurance to protect against someone ignoring the law, he feels the rates would be lower for the uninsured motorist coverage if there were a compulsory liability insurance law.

"Now I'm paying for the other guy's insurance and he has the privilege of driving on the road," Langley complains.

Wilmington (Del.) Evening Journal, February 2, 1978

State Prepares Tighter Rules For Its No-Fault

By NANCY KESLER
Dover Bureau

DOVER — The Delaware Insurance Department today proposed legislation to tighten provisions of the no-fault insurance law and crack down on uninsured motorists.

David H. Elliott, state insurance commissioner, said the bill will require insurance companies to issue identification cards to their policy holders. The cards must be carried along with the registration card.

Any individual driving a car stopped by a policeman or involved in an accident must produce the insurance card. If the driver is not able to produce the card, it will be presumed the auto is not covered. However, the driver will be given 24 hours to show proof of insurance. This portion of the bill would reverse a court decision which presently requires the state to prove that a motorist has no insurance.

The bill also would impose fines for driving without insurance. A violator would be fined a mandatory $200, although the fine could go as high as $1,000.

On conviction for driving without insurance, an individual's driving privileges would be revoked until proof of insurance is furnished. The courts also may deny driving privileges for up to six months if circumstances warrant additional penalties.

Aside from the legislation, Elliott said, each individual who registers a motor vehicle would have to put on file the name of his insurance company.

The insurance commissioner said about 20 percent of the state's drivers are not insured and the problem is one mentioned often by the public. He said the legislation he is recommending should reduce significantly the number of uninsured motorists without placing a burden on the majority of drivers who abide by the law.

Consumer Affairs

Wilmington (Del.) Evening Journal, March 13, 1979

State Acts to Curb Uninsured Driver With New Card Policy

In an attempt to crack down on uninsured drivers, state Insurance Commissioner David H. Elliott has ordered auto insurance companies to send policyholders dated identification cards each year.

The proof-of-insurance cards, which have been sent out without expiration dates, are required before a car owner can get Delaware license tags. State officials say some motorists allowed their policies to lapse, but continued to renew license tags by using old, undated cards.

Elliott also said yesterday he would no longer require insurance companies to report all auto policy cancellations. Instead, only cancellations of first-year policies must be reported. The volume of policy cancellations, officials said, was swamping the Motor Vehicle Division.

Division Director Robert J. Voshell had said earlier his division was able to check only one quarter of the cancellation notices. Elliott has estimated 20 percent of the state's drivers are uninsured.

"Now we can concentrate on the first-year people who cancel," Voshell said. "We think they're the ones trying to beat the system."

The new identification cards, Voshell said, should aid in detecting cancellations of policies in effect more than a year. "If someone cancels an older policy, he won't get an annual card," he said.

Tough no-fault bill wins passage

By DOUGLAS WOO
Advertiser Politics Writer

Those who are driving without no-fault insurance coverage: Beware.

The House yesterday passed and sent to Gov. George Ariyoshi a tougher no-fault law that would require judges to fine violators at least $100 and impound uninsured vehicles.

The bill was one of 23 passed by representatives on final reading at the Legislature, which is preparing to adjourn Friday. Other measures passed or to Ariyoshi yesterday would:

• Increase the income tax deduction for the deaf, blind and totally disabled from $5,000 to $7,000.

• Require boards that regulate professions to have members of the public — as well as members of the professions — sitting on them.

• And set up energy conservation standards for new building designs.

The no-fault insurance measure, which would go into effect Sept. 1 if signed by Ariyoshi, targeted a major problem in the 3-year-old law — enforcement.

The existing law does not give clear authorization to police to demand proof of no-fault coverage from motorists they stop for other reasons. In addition, it has been criticized for not providing adequate guidelines to the courts for punishing violators.

The new law would require drivers to produce their no-fault cards to police upon demand. No-fault proof would be required also for safety inspections which, in turn, are needed for automobile registration.

The bill sets a minimum fine of $100 which cannot be suspended and requires the court to suspend or revoke an uninsured vehicle's registration and the license of the uninsured driver in addition to impounding the car.

The bill also requires applicants for a driver's license to show proof of no-fault coverage.

Also passed and sent to Ariyoshi were bills to:

• Create an office of tourism in the Department of Planning and Economic Development, to coordinate policies relating to the visitor industry.

• Increase the period of notification of rent increases by landlords.

Under present law, such notice must be given at least 28 days prior to the end of a month-to-month tenancy. The bill increases the period to 45 days.

• Permit landlords to post notice, when tenants cannot be served in person, so eviction proceedings can begin.

• Give the Board of Land and Natural Resources authority to promulgate regulations for exploration and development of geothermal resources.

• Set a ceiling of $1 million on the state's liability in insuring aquaculture loans from private lenders.

...w Orleans, La.) Times-Picayune, June 29, 1978

Insurance Rush Is On, Drivers Toe Line of Law

By PAUL ATKINSON

It's cash on the barrelhead or a loan from a finance company for many customers rushing to get compulsory auto liability insurance by Saturday.

One insurance agent said he knew of a $1,500 loan to finance a liability policy.

That was part of the picture Wednesday as insurance agents and companies reported booming business a few days before Louisiana's experiment with compulsory auto liability insurance officially kicks off.

Apparently, most of the new business is going into what is called the Louisiana Automobile Insurance Plan or high risk pool. John Hilbig, regional manager for the Insurance Information Institute, said he found among member companies their regular business was about the same but their high risk business was surging.

The manager of the high risk pool, John W. Dingman, said his office had processed more than 16,000 applications through last weekend easily breaking the one-month record of 11,000.

Starting Saturday, the state Department of Public Safety will begin checking all auto accidents to determine if the vehicle owners were insured.

Even now, said Leroy Havard, assistant secretary of the office of motor vehicles of the Department of Public Safety, motorists are being required to certify they carry the liability insurance for truck license renewals and for renewals of private passenger auto licenses that expire July 31.

Arthur M. "Artie" Caron, secretary-treasurer of the John W. Dussouy Insurance Agency, said that customers are being sent to the finance company if they don't have the cash.

Caron said much of his new business is going into the high risk pool. That plan requires that insurance agents remit the first year's premium in cash or certified check.

Some customers don't have the cash, said Caron, so they are being sent to finance companies. "They get as good rates as from banks," said Caron.

Caron said one loan was for $1,500 to finance a policy.

As alternatives to liability insurance, the motor vehicle owner could post a motor vehicle liability bond, deposit $10,000 in cash, bonds or stocks with the state treasurer or get a self insurance certificate issued by the Department of Public Safety. Neither alternative is being used much.

A spot check of insurance agents and companies by The Times-Picayune showed an almost-unbelievable demand for liability insurance policies.

"They are driving us nuts," said Caron.

A veteran State Farm Mutual insurance agent, Joseph Helwick, said he needed asbestos gloves the telephone lines are so hot.

Roger Holden, district manager for Travelers Insurance Co.'s Louisiana operations, said, "new business is about four times as great this year as it was in 1977."

As noted, many of the new insureds are going into the Louisiana Auto Insurance Plan or the high risk pool.

Dingman, manager of the plan in Louisiana, said he has had to leave his own office so clerks could use it to process the applications.

"Our old record for a month was 11,000 applications processed in May," said Dingman, looking at mail bags full of applications, "but through last Friday we had done nearly 16,000 in June. I expect we'll go 20,000 or better this month."

Dingman's office, in effect, is really a middle man, passing the policies on to conventional companies such as State Farm. Allstate or Travelers. State Farm, the state's largest auto insurance underwriter with about 25 percent of the market, gets about 25 percent of the so-called high risk business also.

That has caused drastic changes at State Farm's regional office in Monroe.

(continued)

Billy E. Wilson, service superintendent for Louisiana, said he has had to create a high risk department. "Where we had only about 3,000 high risk policies in 1975 we expect to go as high as 50,000 before the end of 1978," he said. "The staff was three people and now it is 30 but we are still sinking."

H. P. Walker, administrator for the state Insurance Rating Commission, said his office is literally being swamped with policies. By law, the Insurance Rating Commission is required to keep records on all policies written.

"We got in an all-time record 61,366 policies last week," said Walker. "That averages out to about 12,273 a day. In other years we would average about 5,200 a day."

Walker said he is sticking by an earlier prediction that by Saturday or shortly after 80 percent of the motor vehicle owners will have liability insurance.

He had earlier estimated that between April and July 1 more than 600,000 new liability policies will be sold.

He expects 1.9 million vehicles out of a total of 2.4 million will be insured.

The compulsory law requires that motor vehicles registered in Louisiana be covered by liability security with limits of $5,000 per person and $10,000 total for all bodily injuries resulting from one accident and $5,000 for property damage.

Those who are caught without the required security can have their vehicle registration revoked and can lose their driver's license for 30 days to one year.

If a person falsely swears that he has the required security, he can lose his vehicle registration and his driver's license for six to 18 months. Additionally, he can be fined not more than $125 or be imprisoned for not more than 30 days.

Havard said the Department of Public Safety's $1.36 million appropriation came through untouched in the governor's spending bill.

He said he is now going through state Civil Service to set up a staff to enforce the law. The funding will allow for a staff of 65 with 25 handling the revocation of driver's licenses.

"We hope to have our people on board by July 20," said Havard. There will be a training period leading up to strict enforcement by September.

80 % of La. Motorists Predicted to Have Liability by July 1

By PAUL ATKINSON

A top official of the Louisiana State Insurance Rating Commission predicts that nearly 80 percent of the state's motorists will have their required auto liability insurance by the July 1 enforcement deadline.

H P Walker, administrator for the rating commission which keeps all insurance policies, said he expects as many as 400 000 new policies to be sold from April 1 to July 1.

"If things continue as they are going," he said in a weekend interview, "we will have 75 percent to 80 percent of the vehicles covered by liability insurance by July 1."

Walker said about 65 percent of the vehicles were insured on April 1 – indicating the massive increase.

He said there are an estimated 2 4 million vehicles and "the way things are going just over 1 9 million should be insured by July 1."

Meanwhile, the state police are gearing up to begin enforcement of the new law in July.

Leroy Havard, assistant secretary of the Office of Motor Vehicles of the Department of Public Safety, said that beginning July 1 his office will begin checking every one of the estimated 165 000 accidents a year to determine which vehicles carried the required liability insurance.

If it is found a vehicle owner doesn't have liability insurance, Havard said he faces suspension of his driver's license for at least six months and suspension of his motor vehicle registration.

Havard said he has heard from insurance agents they are doing a booming business and he also expects 80 percent compliance with the law by July 1.

Mrs. Virginia Morgan, chief file clerk for the general insurance section at the rating commission, said that the workload has "increased tremendously" in the last two months. She said they are handling about 35 percent more policies a day.

"We have some clerks coming in at 7 in the morning because they want to catch up," said Mrs. Morgan.

Havard said that so far the Department of Public Safety's $1.24 million budget for the 1978-1979 fiscal year beginning July 1 is intact with the appropriations bill now in the Senate.

The funding will provide for the hiring of 65 new personnel, most of them to be revokation officers, he said.

Havard said the main enforcement tool for his office will come through checking all the 165,000 accidents. He said reports of the accidents will be received and the owner of each vehicle will be sent a notice asking for insurance information.

Once this is returned by those in the accidents, the insurance companies will be asked if the policies were in force. Should the insurance companies tell his office there was no insurance, the vehicle owner will be notified he will be given an opportunity for a hearing.

"We know the insurance companies can make a mistake also," said Havard. Once it is conclusively determined there was no insurance and the vehicle owner falsified the information, Havard said his officers will move in to pick up the driver's license.

Havard said vehicle owners will also have to certify they have liability insurance when they get their safety inspections and when they get a motor vehicle license. "So they will have to certify this three times in two years," said Havard.

He admitted that officials in this instance "will be basically taking their word."

But he said the idea of requiring an insurance ID card proposed earlier has been scrapped as too costly. "Where that has been tried elsewhere it hasn't worked," he said. "You have deterioration and the insurance companies just pass the cost of this on in increased rates."

Havard said there will be periodic spot checks by computers to see that vehicle owners are complying with the law.

The law provides that vehicle owners must have liability coverage of $5,000 for injury to one person or $10,000 for two or more and $5,000 for property damage or else show other financial responsibility.

chusetts will be coming to Louisiana to take the bar exam."

Bernard's no-fault legislation was completely stymied in the House Commerce Committee, while Grisbaum's compulsory liability legislation sailed through the House, 82-33, and the Senate, 28-11.

Interviewed Friday, Bernard said what will happen this session in efforts to repeal the legislation is anybody's guess. He said, however, he won't be bringing back his no-fault legislation this session.

He predicted the enforcement of the compulsory liability law "will be a big mess."

Bernard stressed that the Insurance Commissioner's office will have nothing to do with the enforcement of the compulsory liability law.

He said he sees all sorts of pitfalls, including drivers buying policies and then letting them drop immediately.

Insurance industry officials say they haven't seen a great surge of business.

Most officials believe that the major portion of the uninsureds will wind up in the Louisiana Insurance Plan, which is the high risk pool.

Even that plan, however, is not reporting the boxcar type of numbers that it will take to gain compliance with the law by July 1.

John W. Dingman, manager of the plan, said Friday that the plan applications have increased from 13,063 in 1975, to 35,403 in 1976 and to 82,737 in 1977.

"In the first three months of 1978 we have shown a 27 percent increase over the 1977 total," said Dingman. "That's 17,657 applications in 1977 and 22,403 in the first three months of 1978."

Incidentally, the Louisiana Insurance Plan drivers may be facing a rate hike of more than 20 percent effective next month. Dingman said his board has authorized him to apply to the Louisiana Insurance Rating Commission at its May meeting for a rate hike that will be somewhere below the 27 percent hike sought four times in 1977 and earlier this year.

Dingman said it is easily possible that the insurance plan membership will go as high as 200,000 before the end of the year, but this depends mostly on how much enforcement the state intends to give the law.

Checks with the regular insurance industry indicate the same business trend.

John Grush, a general insurance agent, said his firm, Grush and Mannard, had good demand in October and November of 1977 when people thought the law was going into effect on Jan. 1, 1978.

"We have good demand this year but I don't think it is because of the compulsory liability law," he said. "People don't mention it."

Bake Foster, with Aetna Life and Casualty Co., said, "Our auto insurance business has increased but I am not sure if it's the compulsory liability law or we are more competitive in our rates than we were six months ago. We do expect an increase in business."

Albert Aparicio Jr., a general insurance agent and president of the Independent Insurance Agents of New Orleans, said he found a surge of the uninsured coming forward last year when the law was signed by Gov. Edwards.

"I think the ones who are going to be the hangers-on are the less responsible segment or the don't cares," he said. "We found business increase but there has been a leveling off."

Drivers will be able to buy auto liability insurance, the insurance agents promised.

"There will be no reason for a person who has a valid driver's license in Louisiana not to get insurance," said David J. Dessauer, an insurance agent. "But he is going to pay for it, it is there. He will pay what his driving record has established."

Dingman agreed. "The insurance is available. There is a market for it."

State Will Enforce Liability Law

By PAUL ATKINSON

More than 400,000 uninsured Louisiana drivers may be in for a rude awakening this summer -- the state apparently means business in enforcing the compulsory auto liability law.

Leroy Havard, assistant secretary of the state's Office of Motor Vehicles, said Friday that Gov. Edwin Edwards has recommended a $1.2 million allocation in the 1978-1979 budget to begin enforcement of the new law which goes into effect July 1.

A spot check of insurance agents indicates that there is going to be a great last-minute crush or else a lot of drivers hope they can avoid detection. They say they just haven't seen the business.

Avoiding detection may not be so easy. Havard said the budget will fund 25 revocation officers — about seven of whom will be stationed in the New Orleans area to pick up the driver's licenses of those who are found to be without liability insurance — and 40 clerical and administrative personnel operating out of Baton Rouge.

Havard pointed out that drivers are going to have to either show their insurance policies or an insurance identification card or they will not be able to get brake tags in New Orleans or at safety inspection stations around the state.

He said he believes this requirement in itself will be a strong deterrent prodding a driver to get insurance.

Additionally, drivers will have to sign affidavits attesting to the fact they have auto liability insurance when they once again get their auto license plates next year.

The new law was passed by a 2-to-1 margin at the 1977 session of the Legislature, but the effective date was delayed until July 1, 1978.

It provides that a driver must have $5,000 liability coverage for one injured person, $10,000 for two or more persons injured in an accident and $5,000 for damages to property.

Legislation has been introduced in the 1978 session to repeal the law before it even goes into effect.

Havard said that because of this uncertainty, his office has not ordered the insurance certification forms or hired the additional personnel yet. But this will be done immediately on July 1 when it is certain the law is not going to be repealed and a new state budget year begins.

"I don't think we will have any trouble finding the personnel," he said. "Most will come from this office. We could begin real strict enforcement — having our revocation officers at their posts — by Sept. 1."

Under the provisions of the bill, if it is found by the Department of Public Safety Motor Vehicle Division that a driver does not have the minimum coverage, he will be stripped of his driver's license for six months up to 18 months. Additionally, he could be subject to a $125 fine or a 30-day jail term, for a false declaration of liability insurance.

Havard also believes that the threat of taking a person's driver's license for six months gives the law strong teeth.

"In some states if they find a person does not have liability insurance, he can get his license back once he gets insurance," said Havard.

"But our law says that the person will have to give up his license for at least six months, even if he goes out immediately and buys the liability insurance. So this is stronger."

Havard said the Department of Public Safety will also check every accident to see that those involved in the accidents have liability coverage. If they don't, their driver's licenses will be suspended for six months.

Even if the revocation officers are not physically able to go out and pick up a person's driver's license, said Havard, this revocation is entered into the Department of Public Safety's computer. The driver would be subject to being detected if he is stopped for a traffic violation and a computer check is run.

The compulsory liability law is very likely to generate more controversy during this session of the Legislature.

Metairie state Rep. Charles Grisbaum spearheaded the drive to get the law enacted last year, hitting it at the right time. He pushed it through while State Insurance Commissioner Sherman A. Bernard was heating up the air waves with a $60,000 campaign to pass his version of the compulsory no-fault auto insurance legislation.

Bernard opposed the compulsory liability law strongly, saying at one time that it would produce a field day for lawyers.

"It is going to make Louisiana the most fertile hunting ground for lawyers of any state in the union," he said last summer.

[illegible] lot of lawyers who have been driving cabs where they passed no-fault legislation (such as Hawaii

(Mo.) Globe-Democrat, November 1, 1978

Mandatory car insurance is proposed

A commission studying revisions in state auto insurance regulations has been urged to determine whether Missouri should adopt a mandatory liability insurance law.

Such a statute could require motorists to get insurance covering medical injuries and property damage in order to receive state license plates, a state division of insurance spokesman suggested.

William H. Lichius, a special assistant for consumer affairs, recommended a study of the proposal as the commission met to consider a no-fault auto insurance plan here Tuesday.

A NO-FAULT SYSTEM that would require automatic payment of some types of damages is expected to be recommended by the 15-member commission at its next meeting Nov. 14 in Springfield.

Some committee members, including Don Duggan, regional vice president of State Farm — the largest auto insurance company in Missouri — generally appeared to favor a mandatory liability law, but expressed doubt that it could be enforced.

"It seems to me that if we're going to have such a law there should be a very still penalty for persons who are caught driving without the insurance," Lichius said.

Suggested penalties raised at the meeting ranged from revocation of a driver's license to a jail term. At present, Missouri motorists are not required to have liability coverage. Drivers must either have such insurance or be able to assume financial responsibility for damages in case of an accident.

The commission, which was appointed recently by Gov. Joseph P. Teasdale, is expected to draft a no-fault insurance plan that will include at least some elements of no-fault laws that are on the books in other states, including Michigan and Oregon.

MINIMUM STANDARDS contained in four proposals being studied by the commission would make no-fault insurance mandatory, to some degree, for all drivers.

Basic insurance coverage varies in each of the plans, but all would provide medical expense payments, work-loss benefits and funeral-death benefits. Drivers eligible for the insurance generally would have to be residents of the state in which the no-fault law is passed. In three of the plans, insurance companies may offer deductible provisions ranging up to a maximum of $300.

61.02

Continuation

Jim Hunter, DMV manager of driver and vehicle safety, concurred. "I don't believe (cancellation) is an effort to get around the law.

"We're finding that of those cancellation notices, a lot of the individuals did pick up their insurance. They were switching companies, getting rid of one of their vehicles, or discontinuing use of a vehicle.

"Part of it might be stemming from economic conditions (strikes) right now contributing to shopping around for better rates," Hunter said. He also said that many vehicles such as motorcycles and four-wheel-drive units are seasonal and not insured for the entire year.

"There are a lot of insurance transactions going on out there, but people are maintaining their coverage," he said. "They are telling us the truth; when they tell us they are insured, by and large they are. What comes up on the bottom line, the accident reports, is that only 4 to 5 percent of the people are coming up uninsured."

Hunter said that in January, when DMV received 12,447 cancellation notices from insurance companies, the DMV suspended only 986 people for failure to maintain proof of insurance.

"In January we took random samples of 2,300 vehicles registered with us to verify indicated insurance coverage," he added. "We only got 71 denials back" (from insurance companies).

An insurance industry representative, Richard V. Clement, executive secretary for Independent Insurance Agents of Oregon, said, "We've always been opposed to compulsory auto insurance. We're afraid the Legislature is going to get into the business of establishing rates, and that the state can form an auto insurance company. Plus the increased paperwork.

"We still maintain that it's not going to do the stated purpose, get the uninsured driver off the road.

"But the agent isn't particularly unhappy with it," Clement said. "It's been more business for agents, although (new customers) are troubled drivers who have been driving without insurance. The so-called irresponsible driver, and that's hard business to place and a very high price."

Clement said, "There have been some minor problems; but quite frankly it's gone quite smooth. We're sitting back and watching, willing to help make it work. It looks like the trend is good. So far, our fears haven't been borne out."

(Portland) Oregonian, February 19, 1979

Mandatory insurance effective, costly

By STEVE ERICKSON
of The Oregonian staff

Oregon's 7-month-old mandatory auto insurance law is realizing what its draftsmen set out to accomplish, those responsible with its enforcement say, but administrative costs have been high.

Legislative hearings will begin this week to consider amendments that would slash administrative costs in half while attempting to maintain the high level of compliance the administrative procedures have been able to ensure.

Harold Grover, administrator of the Department of Motor Vehicles which enforces the law, said that before it became effective last July 1, 14 percent of all reported accidents involved an uninsured motorist. That figure now has been reduced to 4½ percent.

"Overall, implementation seems to be pretty smooth," Grover said. "It is succeeding better than expected. We expected it to be more difficult to administer, and more public hostility and frustration. There has been some confusion, but for the most part people have been quite cooperative and accepted it."

He said a hearing on House Bill 2052, which "would essentially simplify administration of the law," begins at 1:30 p.m. Tuesday, Feb. 20, before the House Judiciary Committee.

Under the law, if you are going to drive a motor vehicle registered in Oregon you must have liability insurance coverage of at least $15,000 for a single injury, $30,000 for injuries in a single accident, and $5,000 for property damage or you must provide the DMV with other proof of financial responsibility.

The statute requires that insurance companies notify DMV if a policy is terminated or canceled within the first 120 days of that policy. DMV then sends a license cancellation notice to the owner which becomes effective unless the licensee demonstrates that the vehicle was either disposed of or has insurance coverage.

Currently, DMV samples 1 percent of registered motor vehicles in the state annually and requests that the registered owners verify that the vehicle is insured.

Rep. Al Riebel, R-Salem, a sponsor of HB 2052, served on a Legislative Interim Task Force on Mandatory Insurance which issued a report last December that was used as a basis for proposed changes in the law.

"We (task force members) didn't feel we could say, 'This thing's no good,' because we hadn't had enough time for it to work yet," Riebel said. "We didn't feel it was fair to make sweeping changes or condemnation until it had gone through at least a year."

Riebel said the task force was "trying to see if we could cut the costs and not change the bill tremendously."

In its report, the task force stated, "The cost for fiscal year 1978-79 is $650,000 and is estimated to be a little over $1 million per biennium. If the task force recommendations are adopted by the Legislature, it is anticipated that the costs will be reduced significantly. Initial estimates indicate the cost will be $310,000 for the biennium. This amounts to an estimated $690,000 savings per biennium."

Riebel said the House Judiciary Committee will hear proposals to "reduce paperwork tremendously and be just as effective."

Mike Kopetski, who was administrator for the task force, met last week with Riebel to discuss HB2052, which Kopetski said was an attempt to "make administration of the law more efficient and at the same time maintain at least the same level of compliance."

He said the bill's "primary focus" is to propose changing enforcement mechanism from initial documentation that a person is insured to a 10 percent random sampling.

The bill also recommends doing away with the 120-day provision, which Kopetski termed "an exercise in paperwork for insurance companies and the DMV."

Grover said he does not expect Oregon to achieve zero percent uninsured. Judging by success of other states with mandatory insurance laws, he said, "about 5 percent seems to be the point of saturation. To go beyond that would be extremely expensive and you'd be hassling the major portion of the population. Our experience indicates that people who are uninsured can't afford the insurance."

Fears had been expressed that some motorists would try to circumvent the law by buying insurance and maintaining it only long enough to obtain a license or registration, then canceling the policy. Jay Rupp, who is in charge of the DMV section that processes all documentation relating to the mandatory insurance law, discussed this.

"We received 2,539 cancellation notices (from insurance companies) in August, another 5,374 in September, in excess of 9,000 for October and 12,447 in January," he said. "It is now leveling off, we're not seeing the dramatic increase we saw during fall and winter months."

Rupp said the increase in cancellation notices does not necessarily indicate deceit on the part of motorists.

"If they were trying to get around the law they wouldn't be out buying insurance," he said. "These cancellation notices were from people who did buy insurance. In some cases they found out how much it cost, couldn't afford it and tried another company. In other cases the company felt they were too high a risk and canceled them. Most cancellation notices have come to us from companies that deal mostly with the problem driver."

Houston (Tex.) Post, May 2, 1979

Mandatory auto liability bill passed by House

By FELTON WEST
Chief, Post Austin Bureau

AUSTIN — The Texas House passed and sent to the Senate Tuesday a mandatory automobile liability insurance bill which Houston Rep. R.E. "Gene" Green, the sponsor, said was "stronger" than either he or the House Insurance Committee proposed.

Because the House overwhelmingly passed — 123-9 — such a strong bill, Green said he was optimistic a mandatory liability law could be passed in the Senate despite strong insurance industry opposition and even with less than a month left in the 140-day legislative session.

"I think it has a good chance in the Senate," where it will be carried by Houston Sen. Gene Jones, Green said. "This is an important statewide issue. Every survey taken shows 75 percent or more of the people want mandatory liability. If the bill can get to the Senate floor, I think it will pass."

Green noted that although various lawmakers have for years been sponsoring bills to require mandatory liability coverage for motor vehicles in Texas, this is the first year such a bill has ever emerged from a legislative committee in either the House or the Senate in the face of insurance industry opposition.

"Now the House for the first time has put the ball in the Senate court," he said.

The Houston representative, who headed a House interim study committee on mandatory insurance, originally introduced a bill that would have required proof of liability insurance coverage (in the minimum amounts of $10,000 per person or $20,000 per accident for personal injury and $5,000 for property damage) before vehicle license plates could be bought.

But he brought from the House insurance committee a bill (House Bill 22) that would merely have required minimum coverage, made it a finable offense to be caught without it, and authorized police officers to check motorists' coverage when they stopped vehicles for traffic or other offenses.

Green said he preferred to move into mandatory insurance in that way, avoiding creating a lot of bureaucracy and paperwork for the Texas Department of Public Safety and insurance companies.

But critics argued his approach would bring about only "semi-mandatory" liability coverage that would still leave many motorists on the road without insurance, taking a chance they wouldn't be caught.

Reps. Craig Washington of Houston, Bob Hendricks of McKinney and others hatched amendments to strengthen the bill by requiring insurance companies to issue with insurance policies vehicle windshield stickers, similar to vehicle inspection stickers, that would show whether vehicles were insured. They proposed that vehicle safety inspections be denied if the insurance stickes were not on the vehicles.

Although he resisted that plan last week, Green brought the House a complete substitute for his bill Tuesday, attempting to perfect the proposed sticker system, and got it approved easily.

El Paso Rep. Ronald Coleman then added a provision that would authorize police to issue window stickers evidencing insurance coverage to vehicles registered in Mexico or other foreign counties, which he said are a particular problem in border cities.

As passed, the Green bill would have the DPS check with insurance companies about insurance coverage on vehicles involved in accidents, but the insurance companies would have to reply only if there was no insurance policy in effect on the vehicle involved. Green said that would cut down on paperwork.

The bill would not require motorists to buy vehicle liability insurance unless they could not otherwise (as present law states) show "financial responsibility" either by self-insurance or by posting with the DPS bond or a certificate of deposit or securities worth at least $25,000. The mandatory financial responsibility would not be required of vehicles registered to and operated by persons residing in other states, unless the vehicles were operated primarily in Texas. But such out-of-state vehicles or drivers would be subject to suit after involvement in accidents.

Failure to maintain financial responsibility would be punishable by fine of $50 to $200 the first time and $200 to $1,000 for subsequent offenses.

Green said financial responsibility must be enforced to reverse a downward trend in liability coverage. He estimated about 30 percent of Texas vehicles are not insured now, compared with about 24 percent three three ago. In Harris County, he said, a slightly higher percentage is without coverage.

The percentage of insured vehicles has gone down since 1973, he said.

Opposing the bill, insurance companies claim mandatory liability coverage would increase insurance rates. But Green argues that damages caused by uninsured motorists are costing Texans plenty.

"If estimated insurance rates might go up 5 to 10 percent at most," he said. "If the insurance companies use (this) as grounds for increasing rates, they're barking up the wrong tree because they have already increased rates every year I've been in the Legislature."

He has been in the House since 1973.

They could get a card and then cancel their insurance in two or three days," Sena said. "Whatever law we pass somebody will find a way around it."

From the moment AB108 was approved, Sen. Jean Ford was convinced something even tougher was needed.

"We don't require insurance companies to notify the DVM when someone cancels insurance," said Ford, D-Las Vegas, at the time.

While Sena was happy to see his mandatory insurance law become law, he wasn't pleased with the state's other new insurance law. Beginning Jan. 1, Nevada became the first state in the nation to drop its no-fault auto insurance law. Fifteen states now permit no-fault insurance.

Instead of no-fault insurance, Nevada now requires drivers to carry a minimum "15/30/5" liability coverage. The slashes around these numbers may seem confusing, but they are an attempt to simplify something complex.

Liability insurance only pays others for damage that was your fault. The number before the first slash means $15,000 is the maximum amount of money your insurance company will pay for the injury or death of one person. The middle number means $30,000 is the most money your insurance company will pay if more than one person was injured or killed in the same accident. The last number means $5,000 is the maximum amount your insurance company will pay for property damage caused by your car.

If a person injured by your car wins a $100,000 court judgment against you, then your insurance company pays only the first $15,000. The remainder comes out of your pocket.

Many, if not most, insurance agents feel the 15/30/5 liability limits are too low.

"If you rear-end a Mercedes-Benz, you better have more than $5,000 protection," says Assemblyman Mike FitzPatrick, R-Las Vegas. Until two months ago, FitzPatrick was an insurance broker.

"15/30/5 is too small," adds Ann Marie Aniello, an insurance agent. "You couldn't pay $5,000 for most cars today. Look at how high the law suits are. We always suggest higher limits. Some companies won't even write the standard 15/30/5 limits."

Consumers Reports magazine recommended a minimum liability coverage of 100/300/25 in a 1977 study.

Sena and FitzPatrick opposed adoption of the liability insurance law. They felt Nevada's no-fault law could have been saved by raising the "threshold" limit above $750.

Under no-fault, each driver was compensated by his own insurance company, regardless of who was at fault. An individual was entitled to $750 worth of medical benefit without going into court. If someone incurred more than $750 worth of medical bills, then he could sue to recover his expenses. No-fault also paid injured persons up to $175 a week in lost wages, depending on the policy.

Many witnesses testified that the $750 threshold limit was too low to prevent the filing of unnecessary law suits. Consequently, in the waning days of the Legislature the Assembly approved a bill to increase that threshold to $5,000. Yet the Senate failed to agree on the Assembly bill. Just before the session ended, the two houses compromised on Senate Bill 313, a measure which killed no-fault and required minimum liability insurance.

"We felt it was the best way to go," remembers Sen. Don Ashworth, D-Las Vegas, a member of the Commerce and Labor Committee which proposed the bill. "It's not a boost for attorneys. No-fault just wasn't the answer."

Yet the assemblymen, Sena and FitzPatrick, feel raising the no-fault threshold would have been the solution. They predict many motorists will have to sue to recover damages.

Such suits could drag on for 18 months in court, FitzPatrick said. Injured persons could go bankrupt before a settlement is reached, he added.

During the 1979 Legislature FitzPatrick blamed "your friendly neighborhood trial lawyer" for no-fault's repeal.

"They have the most to gain financially" without it, he said.

"I hope between now and 1981 the people of Nevada will understand the importance of no-fault," Sena added after the new liability law was adopted.

FitzPatrick predicted insurance rates would climb 12 percent with the repeal of no-fault. His prediction hasn't been far off. Farmers Insurance Group increased rates 13.5 percent — although state Insurance Commissioner Don Heath denied another 5 percent increase which Farmers requested explicitly because of no-fault's repeal. State Farm Insurance was awarded a 7.2 percent average rate boost. The company sought an 18 percent increase.

Though insurance rates keep rising, Changing Times magazine said in March 1979 article that a typical State Farm policyholder "has a property damage liability claim once in 18 years and a personal injury liability claim once every 55 years."

"The rate increases are a reflection of the national economy," Heath contends. "In no way are rates increasing because of the repeal of no-fault. The mandatory law should bring a price downtrend for preferred customers."

State Farm increased its rates by 81 percent in Nevada between 1976 and 1978, reported U.S. News and World Report magazine.

Surprisingly it has been an attorney, Richard Myers, president of the Nevada Trial Lawyers Association, who has publicized that no-fault could bring savings. Myers warns insurance buyers not to seek medical and wage loss coverage if they already receive such benefits from their employers.

Motorists lining up for insurance

By Ed Vogel
RJ Staff Writer

Most automobile insurance agents in Nevada have been wearing big smiles these days. Their offices have been more crowded than Fremont Street on Saturday night. And almost everyone who walks in the door is a buyer.

There's a good reason for the sudden popularity of insurance men. If you don't have auto insurance, then you don't drive anymore in Nevada.

A law went into effect Jan. 1 which requires Nevada motorists to carry cards which prove they have insurance. Police can ticket drivers who can't pull out these cards.

In addition, motorists must present the insurance cards at Department of Motor Vehicles offices when they renew license plates. A driver won't be given a 1980 license sticker unless he has such an insurance card in his possession.

The state already had required motorists to carry auto insurance. The catch was, however, a driver only had to say — not show — he had insurance when he visited the DMV. There was no penalty if someone lied. Consequently, 25 to 40 percent of the citizenry drove around without insurance, said Don Heath, state insurance commissioner.

That all changed when the 1979 Legislature approved Assembly Bill 108, the new mandatory insurance law. This legislation shoves a $100 to $500 fine on motorists who can't prove they are insured. More importantly, they won't be able to drive around long without a current license sticker.

As yet the state Highway Patrol hasn't been enforcing the requirement because some insurance companies may not have mailed cards to customers. Enforcement will begin this week, troopers say. The Metropolitan Police Department indicates it may not enforce the insurance requirement until Feb. 1. However, accident records show some drivers already have been cited for not carrying insurance.

The man most responsible for the mandatory insurance law is Assemblyman Nash Sena, D-Henderson.

"I was hit by an uninsured motorist and I had to come up with the $100 deductible to fix my car," Sena said. "I felt if I had to carry it, then other people should have to carry it, too."

Though Sena was unsuccessful in an attempt to push a similar bill through the 1977 Legislature, he had little trouble during last year's session. Testimony that as many as 40 percent of the state's drivers lacked insurance produced unanimous approval of Sena's bill.

As tough as the mandatory law may seem, Sena says some drivers will find a way to avoid it.

Lawmakers tighten auto insurance law

By Ed Vogel
R-J Legislative Bureau

CARSON CITY— The Legislature adopted a mandatory minimum automobile insurance bill Monday and then killed the current no fault insurance law.

Instead of having at least no fault insurance, starting next January 1 Nevada's motorists must have an auto insurance policy giving them at least $15,000 of public liability and $10,000 of property damage coverage.

Assembly Bill 166 also will ensure motorists actually have coverage, said Sen. Richard Blakemore, D-Tonopah.

"Thirty to 40 percent of the drivers in Nevada now are not covered," Blakemore said.

The bill virtually forces drivers to acquire insurance since they won't be given an auto license renewal sticker if they can't show proof of insurance.

"When you get a policy you will be issued a special card," Blakemore said. "Then when you get your registration renewal in the mail you will have to send the insurance card in."

Drivers also will be required to show proof of insurance when a police officer requests it.

Though the mandatory insurance bill passed the Senate on a 17-0 vote, Sen. Jean Ford, D-Las Vegas, wasn't convinced it will be strong enough.

"We don't require insurance companies to notify the Department of Motor Vehicles when someone cancels insurance," Ford said.

Blakemore agreed the law can be beaten. He said the DMV doesn't have the "mechanism" to keep up with insurance cancellations.

The Assembly raised some objections before it killed the no-fault law on a 28-7 vote.

"Repealing no-fault will hurt everybody," said Assemblyman Mike FitzPatrick, a Las Vegas insurance broker.

Without no-fault, injured persons may have to sue over auto accidents, he said. FitzPatrick said it takes 18 months to schedule a hearing on any lawsuit.

"I hope between now and 1981 the people of Nevada will understand the importance of no-fault," added Assemblyman Nash Sena, D-Henderson.

Assemblyman Jack Jeffery, however, said the insurance companies "oversold" no-fault.

"The propaganda they put out said no-fault would lower rates of liability but instead the liability rates went up something like 80 percent," added Jeffery, D-Henderson.

Blakemore believes the requirement for insurance with public liability and property damage minimums will lower insurance rates by 5 percent.

Minimum auto insurance will cost $150, Blakemore said.

or lower. Said ISO cost comparison figures for a number of firms, rates for the above policy in Jefferson County can vary from a low of $199.50 with one firm to a high of $347.64 with another. In Tuscaloosa County they go from a low of $131.90 to a high of $296. Montgomery County prices range from $156 to $283.40.

There is no law in Alabama that says you have to have insurance, said Forrester. "But there is a safety responsibility law that says that if you have an accident that is your fault and you do not reimburse the injured party, your driver's license and tag are taken.

"We estimate 30 percent of the people do not have liability insurance," said Forrester. "We strongly encourage them to carry it."

Forrester, and several insurance firm spokesmen *The News* talked to, said that there is good competition in the insurance industry in Alabama.

Alabama has lower rates than many areas of the country that are more congested or have more lawsuits that sometimes result in high legal fees and high settlements.

AND "IN Alabama we have no territory that divides a city," said Forrester. "For example, you would be charged the same premium no matter where you lived in Birmingham. That's important."

Some larger cities, such as New York and Los Angeles, are divided into areas. "That becomes a problem," said Forrester, "with one part of a town claiming they pay more."

Here are some tips on shopping for insurance from the State Insurance Department, Alabama Farm Bureau, State Farm and Allstate.

● Shop around. Compare rates and policies. You could save hundreds of dollars a year. The cost is not the only factor you should use, although that's what most customers look at first.

When comparison shopping, check at least three policies and firms. Don't be high pressured into buying the first policy you see.

● READ AND UNDERSTAND every word of a contract before you sign it. If you don't understand, ask the agent to explain it to you. If you're not happy with his explanation, ask an agent for another firm or the State Insurance Department to explain it.

● Deal with an established, reputable firm. It doesn't help to get your insurance with a firm that charges low rates if that firm will fold up when it comes time to pay you.

Ask your neighbors and relatives about their firms. Check out the firm's general reputation for settling claims. Do they do it fast and fair or do you have to fight them for it?

● How available are the firm's agents? If you are traveling out of state, how much trouble will it be to get claims settled? Firms that don't have agents in another state often contract with adjusters in that state to settle their claims for them. They say this works, while national firms said it is better to have your own agent on the scene.

● What type of discounts does the firm offer? Look for discounts for such things as having more than one car, being an honor student in school, taking driver training or not smoking and drinking. Compare at what age the rates change for that firm. Do you get a discount for a smaller car?

● See if you can get a discount if you drive to work in a car pool and don't use your car every day.

● Consider the various costs for different amounts of deductibles. A larger deductible could save a big part of your premium.

● Check to see how the rates vary for how many miles you drive to work. One firm may charge more than another for the same amount of miles.

● If your insurance premiums are low, think about paying the amount due in a lump sum rather than in quarterly or monthly payments. This will avoid your owing a payment fee or financing cost.

● However, if your premiums are high, you may want to put the amount for the premiums in a savings account, earn interest on the money and then make quarterly or monthly payments even though this means you owe a payment fee or finance charge. The interest earned may be more than the amount of the fee or finance charge.

● You can check an insurance firm's financial soundness in "Best Insurance Reports," available at most libraries.

● You also can call the State Insurance Department at 832-6140 for data on a firm's rates, financial soundness and settlement record.

Auto insurance: It pays to shop around

BY TOM CALLAGHAN JR.
News staff writer

Traffic accidents happen without warning. One moment a driver can be glancing to the side admiring the beautiful sunset, and the next moment he could be stomping his foot on the brake and bracing himself for a grinding, metal-crunching, glass-shattering crash.

It's hard to plan in a budget for a wreck like that. That's why many motorists protect themselves, in part, from the effects of car accidents by carrying insurance policies.

Many people, though, look at insurance as too complex to understand and just blindly pay what the salesman asks without checking around to see what other firms offer.

THERE ARE MANY factors that go into deciding how much an insurance policy costs. There also are many factors that can be used to compare the value of one insurance policy against another.

Insurance firms charge different prices in different territories, or areas. The reason they do this, they say, is make each area pay for itself. The rates are set, in part, on the accident rate, repair costs, hospital costs, and amount of lawsuits historically filed in that area.

People who live in the country usually have to pay less than those who live in the city because there are more cars and a better chance of getting in an accident in a city.

There also are other factors that determine what a person might be charged. They include his age (younger drivers have more accidents), past driving record, what he's using his car for, and the type of car. Some cars cost more to repair than others and some cars are safer in wrecks than others.

THE PRICE OF a policy that provides the same coverage can vary from firm to firm, as well.

"We do not have uniform rates in Alabama," said Tharpe Forrester, deputy commissioner with the State Insurance Department. "Each company looks at its loss experience in their territories. If losses in one are higher, they have higher rates. The number of territories will vary between companies."

The three firms that have sold the most automobile insurance in Alabama, said Forrester, are State Farm, Alabama Farm Bureau and Allstate. Together they sold 57 percent of the car insurance in this state.

"After the top three," said Forrester, "the percentage drops way down. Those percentages are for the year ending in 1977 but it hasn't changed much."

Some insurance firms set their own rates, he said, but there are rating service firms that suggest rates for those companies that don't want to set their own.

There are about 450 car insurance firms in Alabama. About 35 percent of them use the rating firm Insurance Services Office (ISO), said Forrester.

ISO DIVIDES the state into eight areas. The most expensive is Jefferson County, the least is Autauga and Elmore counties. That also could vary with each insurance firm.

According to ISO rates, a Birmingham driver could pay $274 for the same policy that would cost an Elmore county man only $211.

The policy is for a driver over the age of 29 who uses his 1978 Chevrolet Malibu for pleasure use only and does not drive it to work. He has a clean driving record.

The policy includes $10-20,000 bodily injury liability coverage, $10,000 property damage liability, up to $20,000 uninsured motorist, $50 deductible comprehensive and $100 deductible collision. The date of the policy was Sept. 15, 1979.

The cost of the policy can vary even more depending on other, individual factors. The costs here are for comparison only and may be different from what ISO would charge you.

That same policy at ISO rates would cost the same driver these amounts in these areas: Colbert, Franklin, Jackson, Lauderdale, Lawrence, Limestone and Madison counties — $263; Jefferson County — $274; Autauga and Elmore counties — $211; Tuscaloosa County — $246; Etowah County — $253; Mobile and Baldwin counties — $250; Montgomery County — $221; and the rest of the state — $255.

THE COST OF an insurance policy within an area can vary by firms. For

Liability law in effect now for July licenses

By KIM LARSEN
Of The Gazette Staff

Most motorists without liability insurance will no longer be able to renew their car licenses or obtain new license plates.

Yellowstone County Treasurer May Jenkins said Friday that car owners applying for July license renewals without proof of liability will be turned away from the license-plate lines in the courthouse.

The mandatory insurance measure, passed by the Legislature, goes into effect July 1.

But Mrs. Jenkins is enforcing the law now because July license renewals are being made now.

Pat Driscoll, chief assistant attorney general in Helena, said it is legal to require proof of insurance on licenses due after the effective date of the law even though that date is three weeks away.

Mrs. Jenkins said that if enforcement were not allowed now, car owners buying July licenses would have to be told to come back next month.

Minimum insurance requirements for all vehicles are $25,000 liability, $50,000 medical and $5,000 property damage.

The easiest way a motorist can prove he has the required insurance is to present a copy of his policy when he applies for a new or renewed license.

Other proofs that will be accepted are a certificate of liability statement, a memorandum from an insurance agent, an insurance identification card, a premium payment receipt or an application or binder.

"Absolutely no licenses will be issued if no proof of insurance is shown," Mrs. Jenkins said.

The treasurer also warned motorists that their insurance must be continuously in effect. "Those who think they can take out a policy and drop it in three months will be in violation of the law," she said.

Any motorist caught without insurance after having obtained a license will be guilty of a misdemeanor, according to the new law.

Motorcycles, vehicles propelled by auxiliary power, and government agency vehicles are exempt from the insurance requirement.

Mrs. Jenkins said the Motor Vehicle Department already has had to turn away "a few" license applicants because they could not prove they have insurance.

The new law is a good one, Mrs. Jenkins said, but she does not like the burden of it being placed on county treasurers. Demanding proof of insurance and noting it on registration forms will require more paperwork and cause "long lines again," she said.

"Until we get the problems worked out, I hope the public will be sympathetic — very patient with us," Mrs. Jenkins said. "It's the law, so we have to do it."

Mrs. Jenkins announced six other changes in licensing that go into effect July 1:

- The lien filing fee will be raised from $2 to $3 while the registration fee will go up $1. Vehicles weighing more than 2,850 pounds will cost $12 while those under that weight will cost $7.
- County designation stickers will be issued for personalized plates as soon as the state prepares the decals. These stickers must be placed on the upper left-hand corner of the plate.
- Personalized plates will be issued on a staggered basis just as numerical plates are now issued. Existing personalized plates will remain on a calendar-year basis, however.
- Mopeds will be deleted from the motorcycle law. House Bill 819, called the "Moped Relief Act," will allow mopeds to be ridden on the streets without registration, title or taxes.
- Special mobile plates will have a grace period to Feb. 15 of each year. Special mobiles are construction equipment used primarily on job sites but use the roads to move from site to site. Plates for these vehicles, in the past, had to be renewed on the first of the year and no grace period was allowed.
- An individual will be able to transfer one set of plates between two vehicles while still owning both. Registration fees will cease on the first vehicle upon transfer.

the hearings. It would require every car owner in the city to carry liability and collision coverag...

The other bills were introduced by Betty Ann Kane (D-At Large) and by Nadine P. Winter (D-Ward 6).

Kane said her bill was modeled after the highly successful Michigan no-fault law, and would provide more generous benefits than the Dixon bill. She said she would support the latter if it proved more politically feasible.

Dixon said his bill was drafted with help from the Committee for Consumers No-Fault, a national coalition of insurance companies, consumer groups, unions, vehicle fleet owners and car rental firms.

The measure would permit a person injured in an accident to submit a substantiated claim for up to $124,000 in expenses and lost wages without having to prove who was at fault. The claim would be paid by the insurance company carrying the policy on the car in which the injured person was riding or—if the injured party is a pedestrian—on the car involved.

Under typical insurance practice now, a motorist making a claim must demonstrate that the accident was the fault of the other driver or of circumstances beyond the motorist's control. Generally, such claims are paid by the company that insures the person found to be at fault.

With few exceptions, lawsuits would not be permitted by injured persons attempting to recover damages unless they exceed $124,000, plus $1,000 in death benefits.

Kane said her bill would not set any limit on payments. She said both bills allow lawsuits in cases involving permanent disability or disfigurement.

Nationally, no-fault coverage accompanied by restrictions against lawsuits has been fought by the Association of Trial Lawyers of America, whose members earn part of their livelihoods trying such cases.

Charles C. Parsons, president of the association's local affiliate, the Association of Plaintiffs' Trial Lawyers of Metropolitan Washington, said a spokesman for his group will testify against the no-fault bills.

He said the Dixon measure is "an insurance industry bill . . . highly disadvantageous to the general public and highly advantageous to the insurance industry."

Saying that auto injury cases represent a fraction of his own practice, Parsons insisted that "I don't see myself as an ogre" as trial lawyers often are painted in the media.

"We will show in our testimony that the only way to deal with (auto insurance) is on a case-by-case basis," Parsons said. He said the only proposal the trial lawyers could work with is the Rolark compulsory-insurance bill.

More than 30 witnesses are scheduled to testify before the City Council's Public Services and Consumer Affairs Committee at sessions scheduled for 10 a.m. and 5 p.m. Others interested in testifying may sign up at the hearings.

2 of 2

Washington (D.C.) Post, January 17, 1980

Debate on Compulsory Auto Insurance Begins

By Jack Eisen
Washington Post Staff Writer

Between 40 and 60 percent of Washington motorists drive around town on any given day without car insurance, according to a report released this week by the Washington-based consumer group Automobile Owner's Action Council.

The report adds that there is reason to believe uninsured motorists are more accident-prone than insured drivers.

But the days of the uninsured motorist may be over, if no-fault automobile insurance becomes mandatory in the District.

Hearings today on proposals to introduce some form of mandatory automobile insurance will set the stage for one of the liveliest legislative debates expected in the city this year.

There has been no official estimate on the cost of no-fault premiums. When introducing a proposal on no-fault automobile insurance last October, Council Chairman Arrington Dixon said the coverage would cost each District motorist $127 a year, but offered no comparison with the current cost of a basic insurance package.

But August P. Alegi—assistant vice president of the Government Employees Insurance Co., the city's biggest insurer and one known for relatively low premium costs—said no-fault coverage would cost $82 a year, compared with an average of $145 for a basic insurance package today. Like other advocates of no-fault, Alegi said the reduction is made possible by lower administrative costs.

Motorists will have to shoulder premium costs for no-fault insurance in addition to coverage protecting against property damage and other accident-related costs.

The Dixon bill would require insurance companies to set up a pooling arrangement offering policies to high-risk drivers.

Witnesses testifying today represent a broad spectrum of views ranging from the insurance industry—which generally supports the proposal—to the legal profession—which opposes it. The general public may also make its views known.

All the proposals being considered would require automobile owners in the District to carry liability insurance, and make it a crime to drive without this coverage. It is estimated that the owners of 114,000 cars—four out of every 10 registered in the city—currently carry no insurance.

In addition to assuring compensation to accident victims without the need to fix blame, the no-fault system would help hold down rising premium rates or even reduce them, supporters of the system say.

But trial lawyers, who have fought such measures whenever proposed in state legislatures and Congress, say the no-fault proposal would sharply curtail the existing right of victims to sue for damages.

In considering the no-fault proposal, the D.C. council will be acting for the nation's capital as a state legislature would. Any bill enacted, however, would be subject to review and possible veto by Congress, which in 1978 rejected national no-fault legislation.

The D.C. council has four bills pending, but today's testimony is expected to center on two of them:

•The first was introduced by Dixon and cosponsored by five others on the 13-member council. It would set up a comprehensive no-fault system and require everyone to be insured.

•The second was introduced by Wilhelmina J. Rolark (D-Ward 8), the committee chairman, who will preside at

Continuation

"I'm sure that estimate is high," said Bob Gwynne of Murfreesboro division manager for State Farm. "The last time I looked — and this is based on auto registrations... It was about 18 per cent statewide uninsured, and Shelby County was high — about 25 or 26."

Gwynne, who also serves as the lobbyist for State Farm when the General Assembly is in session, said that, as of the end of last year, his firm had 525,299 automobile policies in the state, with 73,559 of those in Shelby County — "our largest market in Tennessee."

Tennessee Farm Bureau, which operates only in the state, has about 351,000 casualty insurance policyholders but, according to a spokesman in the state insurance department office, has relatively little coverage in Shelby County.

"I don't know how much insurance they have in Memphis, you've got to at least drive by a farm before they'll sell it to you."

Buford Dreadon of Columbia, lobbyist for the Farm Bureau, said his company has no figures on accidents involving uninsured motorists.

There is no way to determine how many accidents per year do not involve insurance coverage. One reason is that so many use their own collision insurance to have it repaired.

Dreadon added, however, that "about 98 per cent of our people do voluntarily buy uninsured motorists insurance."

Gwynne said his company's records show 96.4 per cent of the State Farm policyholders have uninsured motorists insurance, which covers the policyholder when the other driver is at fault and has no insurance.

"Do you know why that figure's so high?" asked James E. Blount III, a Memphis attorney who specializes in representing plaintiffs in accidental injury cases.

"It's because state law requires uninsured motorist insurance to be part of the policy. The only way they cannot sell uninsured motorists (coverage) is to get the policyholder to sign a waiver of that coverage that is required under Tennessee state law.

"Even if it's not written into the policy, the courts have ruled that the coverage is there."

Blount said a problem that is almost as pressing — or depressing — as uninsured motorists is that of underinsured motorists and that inflation has played havoc with what a dollar will buy in terms of care and repair.

He said the minimum insurance required in Tennessee — $10,000 — "is probably the lowest in the country" and that Mississippi and Arkansas share that figure.

"What's $10,000 to a person badly injured when you spend $3,000 for a broken leg? We should raise the minimum limits to at least $25,000, and we're not talking about a lot of money in premiums."

Blount said insurance companies aren't known for pushing it, but underinsured-motorist coverage can be purchased "up to the limits of your liability coverage."

"Under that coverage your own company pays the difference between what the underinsured person's company pays and your actual damages or your maximum coverage."

He said he has dealt with many tragic cases where persons have been permanently disabled in accidents that were not their fault but could collect nothing because there was no insurance.

"And, oh sure, there are death cases like that where there is no insurance. But, of course, they were also to blame because they didn't have insurance either.

"I have this case where a guy ran a red light and this woman was killed. It was clearly his fault but there's no insurance. It's a tragic situation. They don't even know how they're going to bury her."

The list of tragedy is literally endless — it grows daily.

"Right now, I have this young man who was in Overton Park with his bicycle," said Jerome Hoffman, a Memphis attorney. "He was completely off the roadway when this car filled with kids, lose control and leaves the road for 100 feet or more and runs him down.

"He is disabled for life, and there was no insurance. A 20-year-old boy, disabled for life through no fault of his own and not able to get one red cent to help out. If the boy had had a driver's license and insurance he would have been able to collect through uninsured motorists, but he didn't drive a car.

"It killed me, and I'm used to this kind of thing."

Joseph Fuller, a Kingsport attorney who specializes in defense work for insurance companies, said, "It's going to shock you the number of people who are driving naked as we call it — driving without insurance coverage. A lot of people just don't have the money."

He said there is much disagreement among insurance companies he represents concerning answers to the uninsured motorists problem and such proposals as no fault and compulsory liability.

The problem, Fuller said is much like an old East Tennessee saying.

"You know what you're running from, but you don't know what you're running to."

Anchorage (Alas.) Daily Times, October 12, 1980

Alaska's automobile insurance paradox

by Bill Knaven
Times Writer

One out of every two drivers you see driving Alaska's often ice-caked roads is uninsured.

In some states, it's as illegal to drive without insurance as it is to drive drunk.

In Alaska, however, it's almost becoming a fad. According to estimates by the state department of Transportation and Public Facilities, 50 percent of the registered drivers in Alaska are uninsured — a 12 percent increase in five years.

"The horror story isn't over," says Ken Moore, state director of the division of insurance, adding that the figure doesn't take into account many more uninsured motorists in Bush communities who don't register their cars.

But Moore says the figures are not unlike those in other states with no mandatory automobile insurance laws.

"To a lot of people on a limited income, a car is a necessity," Moore says. And those states with compulsory car insurance still report up to 15 percent up to its drivers not insured. But he is at a loss to explain why half of the motorists in relatively wealthy Alaska are uninsured.

One Sunday evening last year, Roy and Phyllis Fields of Anchorage met one of those uninsured drivers — in a bone-crunching collision involving three cars.

The Fields were hospitalized for nearly two weeks. They still go back for therapy. Their bill is $12,000 and growing. They can't afford it and their insurance company isn't paying for it under their uninsured motorist coverage. A third driver involved in the accident was insured, but his company isn't paying either.

Roy says the Veterans Administration would have paid for his bills but he failed to file with them in time under the impression his insurance company was going to cover the costs.

The Fields get $420 a month in pension and social security money.

"With inflation, it's getting skimpy," Roy says.

Their attorney, Jim Palmier, has worked out a deal with the hospital to defray the bill until the case is resolved, he added.

"They are the salt of the earth," Palmier said of his clients.

Although they are eligible, the Fields will not take food stamps or medicaid or any other kind of welfare.

While the insurance companies play their claims games, the Fields wearily await the outcome.

"Both companies agree it should be paid, but by someone else," says Roy.

A typical day for the Fields is not action-packed. They spend much of their time at the Full Gospel Church or their small home on Medfra Street.

"We don't go riding too much anymore," Phyllis says, nearly laughing. Laughter doesn't come easily to the Fields these days. But then nothing does.

Phyllis can't lift her arm higher than her shoulder. If she tries to stand for any period of time, her knees swell up so bad she has to rest in bed for a day or two. A wheelbarrow full of aspirin cannot relieve her constant headaches.

Roy is doing somewhat better. Retired after an electronics career, he likes to show the bump on his shoulder where the bone didn't heal correctly. But he has a tendency to just sit and stare into space.

In the collision, they were smashed against the dashboard. Phyllis broke three ribs, her shoulder and three vertabrae in her neck. Roy fractured his clavicle, seven ribs and punctured his lungs.

The uninsured motorist suffered a broken nose.

The Fields' still haven't fully recovered from their injuries and are slowly regaining the strength that was sapped from months of inactivity. When you're in your 60s, it's not easy.

"I was so active!" Phyllis exclaims, while rattling off all the things she did before the accident — gardening, painting, shoveling snow, changing their car's oil.

"I even tarred the roof," she said as Roy nodded his head at the memory and smiled.

The Fields seem to like reminiscing. Life is a home movie. And the more reruns the better — not what is scheduled for the new season, which is more therapy, limping around and

Continued

1 of 2

wondering if and when their bills will be paid.

Phyllis has therapy twice a week to loosen up her neck. The one-hour session is nothing she looks forward to.

"I'm so dizzy when I come out. I don't know how long it will last. The doctor said it's a long-term thing."

Their injuries, Roy admits, may have been prevented by wearing seatbelts.

"Intellectually I realize I should wear the little buggers."

The first three months after the accident, a wooden chair was his bed. He couldn't breathe lying down until his ribs healed. Phyllis slept in bed with a brace.

"Sometimes he'd be slumped over and I'd have to tie him into the chair," she said.

Because of pending litigation, details of the accident — at the intersection of Chugach and Arctic — are being withheld.

The accident occurred May 27, 1979. Ironically, it was a day when the Fields thought the streets were safest — many people had deserted the city for the Memorial Day weekend.

The Fields say they feel no animosity toward the uninsured driver, even though the only time he visited them, he accused them of causing the accident, Phyllis says.

"I think he was just afraid of losing his license," says Roy. "We told him to go to the insurance company and try to convince them he was right."

He'd have a hard time convincing the Fields he even had any right to be driving. Since the accident, they believe in some kind of compulsory automobile insurance.

Twenty-four states in the nation now have compulsory insurance laws, often tied to some form of no-fault insurance, but that still doesn't keep uninsured drivers off the road.

In Alaska, when a driver causes an accident and has no insurance, he or she must prove financial responsibility to cover the costs. But an Alaska privacy act virtually voids the financial responsibility law by making that information hard or unavailable to get, state insurance director Moore said.

If you don't pay, you get your license suspended for up to three years.

Why people drive uninsured may be due to several reasons — mostly financial.

"I can't afford it," says one young career woman who nets $900 a month.

Despite getting into a recent accident due to the snow, which caused about $1,000 damage to the front end of her car, she still hasn't changed her mind.

"It's the first accident I've ever had. Think of all the money I've saved by not having insurance the past six years."

Insurance coverage for her Chevrolet Camaro would cost about $650 a year "because I'm single. And I'm not going to get married just to drop my rates."

Another rationalized not getting insurance by saying "it's a hassle."

But if you drive with a lot of heart, as they say in the demolition derby, it may be worth it to buy insurance.

Chances are, everyone driving in Alaska will be involved in one accident in one year, state troopers say.

An average accident in 1978 cost $1,700 according to State Farm Insurance figures. State Farm has the greatest share of the Alaska car insurance market — 21 percent.

Anchorage insurance agent Bob Bellott said many accidents are not reported because drivers feel it will jack up their cost of insurance too much.

"It would not adversely affect them," Bellott said. State Farm, however, does tack on a 10 percent surcharge for each accident claim, he said.

Cause an accident where people like the Fields suffer a rash of injuries and you may be looking at a $12,000 bill, not including legal fees. Accidently cause another where someone is permanently maimed and the price tag may be closer to a million dollars.

If you can't pay for the damages with insurance, you can kiss your assets goodbye.

Fairbanks (Alas.) Daily News-Miner, March 18, 1980

The uninsured motorists: are tougher laws needed?

By TRICIA OLSEN
For The News-Miner

In 23 years of driving, Carl Jeglum, 44, hadn't had an auto accident. His record was about as clean as they come.

But in the past year and a half, he has been hit three times—all by uninsured motorists. The first two drivers paid their debts quickly and willingly.

Jeglum was lucky Twice. But his luck ran out on the third accident.

No. 3 was a minor accident—a fender bender—but it triggered something in Jeglum, of 2256 Jack St. This time the offender was unwilling to pay for the damage.

"He was a nice, nice guy," said Jeglum, who didn't anticipate any problem collecting the $165 on the estimated damages. "He just said, 'Have it done and bill me.'" Jeglum preferred to prepay the work.

He tried to stay in touch, but soon the "nice guy" wouldn't answer his phone and ignored Jeglum's letters.

"When it happened to me, I said, 'We're not talking about money, it's the principle,'" and he started writing letters to state legislators to find out why the law doesn't, in his view, protect people who share his experience.

Last October, he filed suit in Small Claims Court and was awarded a default judgment on Jan. 24.

"I've got this wonderful piece of paper," Jeglum said, a legal file in his hand, "that will not repair my automobile at all."

The bill has grown a bit—it's now $198, including court costs—but an execution order allows the court to seize property, such as bank accounts or an auto, or garnish his earnings, "if he has any money," Jeglum said, emphasizing the "if."

But, he said, "My time is worth money, and so is everyone else's and you don't collect on those things."

Jeglum eventually paid for the repairs out of his own pocket.

"I've got a hunch I won't get my money back," he said. "It's a crying shame."

"This puts a lot of burden on your shoulders as . . . " Jeglum paused while his eyes ran over the paper in his hand until he found the word he was looking for: " . . . plaintiff."

One of Jeglum's letter went to Rep. Sally Smith, D-Fairbanks. Her response contained some alarming statistics.

"Currently about 30 per cent of the registered cars in Alaska are uninsured," she wrote, "and there are large numbers of cars that are unregistered."

Figures cited by Motor Vehicles Commissioner William R. Nix in his letter to Jeglum made the picture seem a little less bleak. He said 92 per cent of motor vehicle owners or drivers in accidents last year have met their financial obligations. The driver's licenses of the remaining 8 per cent were suspended for three years or until they make restitution.

Nix wrote that Alaska's financial responsibility laws are "among the toughest in the United States." The penalty of a three-year license suspension, he said, is an "inducement to have people meet their obligations."

Lee Standiford, Fairbanks office manager of the Division of Motor Vehicles, said if an accident report shows that a driver was not insured, the driver and owner will receive a "Notice of Suspension" letter from the department.

The letter asks for proof of insurance, a settlement or release from the other parties involved, or a security deposit large enough to cover the damages caused by the accident.

In addition to the deposit, they must file documents showing that they are financially responsible. If there is no judgment within a year, the motor vehicles department returns the security deposit upon request, Standiford said.

He emphasized that if the driver is not also the owner, the owner's license could be suspended, too.

Nix wrote, "This penalty was strengthened by the Legislature in 1978 when it made the penalty for driving with a suspended license a mandatory 10-day jail sentence."

But Rep. Smith doesn't think the financial responsibility laws are strong enough and suggested changing the current law to "put some teeth into it."

She wrote, "A good financial responsibility act could be done in conjunction with car registration, thus avoiding a growth in the bureaucracy. In addition, it may back up those who have to resort to the courts to obtain justice."

Alaskan law defines a financially responsible person as one who can pay for damages in these amounts: $25,000 for bodily injury or death in one person, $50,000 for two or more persons, and $10,000 for injury to or destruction of property of others.

Under current law, a person need proof of financial responsibility only after his first uninsured accident.

Many, especially those unable to collect from an uninsured motorist, believe mandatory insurance may be the answer. Today's law was clearly expressed in a 1967 Supreme Court decision: "No law of Alaska requires a driver or owner to carry automobile liability insurance as a prerequisite to his owning or operating a motor vehicle in this state."

Smith does not support mandatory insurance. A nation-wide study of insurance rates, she said, showed that six states have rates higher than Alaska's; five of them have compulsory insurance. Smith added that she fears "we would be contributing to the growth of government" and that problems are created in enforcing the insurance.

"Those states that have mandated insurance have also had to establish a large bureaucracy to handle the necessary paperwork," she wrote.

Nix wrote that even in the 21 states with mandatory insurance, only 90 to 95 per cent of the drivers are insured.

"They found that to enforce total compliance would be extremely expensive," wrote Nix, "and would place unwarranted restrictions on innocent drivers."

How no-fault failed to halt soaring insurance costs

By David Morrison
Inquirer Harrisburg Bureau

HARRISBURG — The beauty of the concept was that no matter who caused the accident, the victims would receive immediate financial help.

It was called no-fault insurance, and to its proponents in the early 1970s it held the promise of an end to the spiraling cost of automobile insurance and to the nightmarish suits and countersuits that seemed to be the inevitable result of any automobile accident resulting in damage or injury.

Under no-fault, courts no longer would be clogged with lengthy, sometimes frivolous, arguments about who caused the crash, whether the injured party had done all he or she could to avoid it and what the dollar value was of injuries, damage or death.

For a reasonable cost, a driver could ensure that he and his family could be compensated quickly by his own insurance company for medical bills, lost wages, rehabilitation and many other injury-related expenses.

That was how its proponents envisioned it, and in the last decade, Pennsylvania and two dozen other states enacted no-fault into law. But as the state House prepares to vote, perhaps as early as this week, on legislation to amend Pennsylvania's 1974 no-fault law, it is clear that no-fault insurance has not lived up to its promise.

It has, in many cases, expedited payments to accident victims. But rather than a decrease in the cost of automobile insurance, as expected, the insurance has soared.

Since enactment of no-fault in Pennsylvania, the cost of automobile insurance has increased more rapidly than the Consumer Price Index, which has been a staggering reflection of double-digit inflation in recent years.

If the current law is not amended, experts say, insurance costs will continue to increase dramatically. But even if the legislature adopts the proposed changes, which are designed to close some expensive loopholes, it is generally agreed that auto insurance costs will continue to rise.

Without the proposed changes in the law, Pennsylvania motorists would see premiums almost double in the next four years, one insurance company estimated. Even with the changes, the same company projected, premiums would climb by more than 60 percent.

The questions regarding the increases in insurance costs appear to be at best: How soon? How high?

Although several surveys have indicated that the consumer still favors the no-fault concept, there is a growing uncertainty that he is willing to pay the cost.

Currently, the no-fault debate in Pennsylvania centers on House Bill 1285, which is vigorously supported by Gov. Thornburgh and the insurance industry and is vigorously opposed by the Pennsylvania Trial Lawyers Association. When the House convenes today, members are expected to have on their desks close to 50 proposed amendments for the legislation reflecting wishes of the

Continued

1 of 3

Continuation

various groups interested in the bill.

The insurance industry versus the trial lawyers over no fault is a long-standing confrontation, and neither side's motives are entirely selfless.

Lost legal fees

According to the best data available, the changes mandated in this bill will cost attorneys who represent auto accident victims between $62 million and $90 million a year in lost legal fees — money the insurance industry says comes out of benefits that are paid to victims.

The changes would save insurance companies as much as $166 million a year in claims that would have to be paid under the current law — costs that probably would be passed on to the consumer in coming years if the bill fails.

Enactment of the bill definitely would improve the profit picture for the state's 204 auto insurance companies, which last year paid in benefits 64 percent of the more than $669 million they collected in bodily injury premiums.

Thornburgh calls the Pennsylvania legislation "our best effort" for reform. He concedes, however, that its economic impact "won't cut the rates for insurance" but could slow the rate of increases.

"We are trying to get back to the basic concept of no-fault," said Rep. Walter F. DeVerter (R-Mifflin), chairman of the House Insurance Committee and chief sponsor of the bill. "I don't know if this bill is perfect, but I do know that under the present system people have not received what has been promised to them."

Although sponsors of House Bill 1285 maintain it is not "an industry bill," automobile insurance companies nationwide are monitoring the Pennsylvania debate and are ready to field a team of experts and lobbyists at a moment's notice.

The Philadelphia-based Insurance Federation of Pennsylvania already has poured about $30,000 into newspaper advertising alone, said its president, Thomas J. Finley Jr., and probably will spend much more before the bill completes its legislative journey.

The Trial Lawyers Association is not far behind. It is currently soliciting contributions of up to $40 a month from its members for the fight, an expenditure that Philadelphia lawyer James F. Mundy described in a June 12 letter to the association's more than 2,000 members as a "commitment [that] has become as necessary to the success of your practice as rent, stationery and secretary."

"Certainly we have a selfish interest," said Bruce Dexter of Harrisburg, president of the Trial Lawyers Association. "Nobody gets this involved in an issue and spends this kind of money on an issue if they don't have a selfish interest.

"We don't expect the public to believe us. We just hope it doesn't believe the insurance industry, either."

Money at stake

Grover Czech, vice president for the mid-Atlantic region of the Washington-based American Insurance Association, a lobbying and research organization representing 150 insurance companies, agreed that economic issues were at stake in the no-fault war.

But he insisted that the industry's state-to-state proselytizing for no-fault is serving the best interests of consumers, aimed at developing "a system that works the way it is supposed to work, that provides the best possible protection for the lowest possible costs."

Once the consumer issue of liberals and Ralph Nader-like activists in the early 1970s, when there was much talk but little action toward enactment of a federal no-fault program, no-fault in the '80s more often is a classic clash of powerful special-interest groups.

"In 1974, when the law was enacted," said Michael Browne, Pennsylvania insurance commissioner, "it was heralded as something that would do two things: One, it would provide for quick, expeditious payments of claims to people who were injured in auto accidents, and two, it would reduce the cost of automobile insurance.

"While it did the first, it certainly did not do the latter."

In the absence of no-fault, a driver bought insurance to protect himself against economic losses if he was at fault in an accident. Some states required motorists to buy liability insurance to guarantee they would be able to pay claims against them. Drivers bought additional insurance for their own injuries.

Under the no-fault concept, motorists were to be required to buy only the insurance that covered them for economic losses caused by their own injuries, no matter how the accident happened. In exchange for the automatic compensation for "out-of-pocket" losses, the insured was to give up his right to sue for those damages as well as his right to sue for noneconomic or general damages, sometimes called "pain and suffering."

No state has ever tried an absolute no-fault system in which all claims are paid automatically. Each law and each proposed law to some degree still preserves the injured party's right to sue. The laws in some states, including Pennsylvania and New Jersey, require the injured person to reach a certain "threshold" of injury — determined monetarily by actual economic losses or through some verbal description — before he can take legal action to recover damages from the person who was at fault. Other states, including Delaware and Maryland, mandate insurance for the driver, combined with no restrictions on lawsuits.

Not best or worst

Although it was once a model for the nation, the Pennsylvania law is not considered the best in the United States, according to some of the more objective advocates of no-fault. But they agree that, despite its failings, the Pennsylvania law certainly is not the worst either, primarily because of its comparatively liberal benefits for accident victims.

The Pennsylvania and New Jersey laws are two of three in the nation that provide for unlimited payment of injury-related claims. In Pennsylvania, the coverage applies to both those who have purchased the insurance required by law and — through what proponents of House Bill 1285's changes call a major flaw in the law — for those who have not.

The claims of the insured are paid

Continued

2 of 3

Continuation

by his own insurance company. The claims of the uninsured, however, are paid through the Philadelphia-based Assigned Claims Plan, a pool arrangement run by the state's auto insurance companies. The uninsured, according to the State Department of Transportation's current estimates, total 350,000 in the state, with 38 percent of them in the Philadelphia area.

The Pennsylvania law provides for a death benefit of $5,000; up to $15,000 for lost income, both for the victims or their survivors, and up to $25 a day for a year for loss of services that victims normally would perform for themselves.

Victims or their survivors still have the right to sue a person they believe to be at fault in the accident if there are more than $750 in actual expenses or if the accident involves death, serious injury or permanent disfigurement.

But at the same time, the state's insurance rates are some of the highest in the nation.

According to figures supplied by Allstate Insurance Co., one of the largest automobile insurance firms operating in the state, an adult male must pay an average of $64 a year in Harrisburg for the bodily injury portions of his automobile insurance that are required by law. In Philadelphia, his premiums for bodily injury liability and basic Personal Injury Protection average $223 a year. A male teenage driver must pay an average $201 a year in Harrisburg and $697 in Philadelphia.

Allstate projects those rates will increase substantially by 1985. With enactment of the legislation, the company says, the male adult's insurance premium for bodily injury coverage will jump to $109 a year in Harrisburg and $375 if he lives in Philadelphia. Without the changes, his insurance bill in Harrisburg will be $123 a year for the bodily injury section and $426 in Philadelphia.

The teenage driver faces a similar plight: $330 a year in Harrisburg and $1,138 in Philadelphia with enactment of House Bill 1285; $385 in Harrisburg and $1,338 in Philadelphia without it.

There are three major aims of House Bill 1285:

• To replace the $750 threshold for suing with a verbal definition of the threshold. That means no one would be able to sue for pain and suffering unless the accident results in death, both "serious and permanent" injury or serious and permanent disfigurement. A compromise version, supported by some labor groups, would replace the verbal threshold with a $5,000 to $10,000 threshold.

• To crack down on uninsured motorists, both through penalties the bill would impose and by eliminating such motorists from benefits paid by the Assigned Claims Plan.

• To eliminate "double dipping" — people receiving payments for injuries both from their automobile insurance and some other insurance plan, such as a group hospitalization and health program.

But House Bill 1285 would bring other changes, too:

• Although it was not the original intent of the law, the Pennsylvania no-fault system provides that a survivor of an accident victim is not only entitled to a $5,000 death benefit, but is also entitled to receive up to $15,000 to compensate for wages the victim would have received. The bill would eliminate the wage-loss benefit for survivors and would restrict the loss-of-services benefit of $25 a day to only the victim. If he dies, his survivors would get nothing for loss of services.

• Under current law, insurance companies cannot make a "lump sum" settlement with a victim over $2,500 without court approval. House Bill 1285 proposes changing that to $10,000.

• Insurance companies now have to go to court to force an accident victim to submit to examination by insurance company physicians. The burden of proof is on the insuror to establish that there is good cause to require an examination. The bill would allow the companies to require "reasonable" examinations on their own; if the victim refuses, the burden in court would be his. The state Insurance Department says this provision would help eliminate fraud against insurance companies.

• Under current law, insurance companies are required to pay 18 percent interest on claims payments they withhold. That rule is applied, for example, to a claim that is the subject of litigation. The industry wanted the rate reduced to 6 percent, but Commissioner Browne insisted that it be lowered to 12 percent. Some consumer groups consider that still too low in view of high returns insurance companies can earn on investments, but an Insurance Department spokesman said average earnings on investments for those companies are between 6 percent and 9 percent.

The uninsured

But Hunter said the absence of strong language, coupled with the provision to reduce the interest insurors must pay on withheld claims, is particularly troublesome. "You can make 17 percent interest in a money market fund," he said. "Insurance companies could net 5 percent by simply saying, 'Hey, I'm not going to pay. Sue me,' even if they are forced to pay later.

"The only thing insurance companies understand is money," Hunter added. "If you can't hit them in the pocketbook, you can't make them toe the mark."

Continue

Jeffrey O'Connell, a University of Virginia law professor who is one of the country's foremost advocates of no-fault, says that uninsured motorists should not receive benefits they did not pay for, but he suggested that the law still should permit them to sue to recover damages if they are not at fault. He contended that those who are willfully uninsured "are usually quite poor" and cannot afford to buy the mandatory coverage, a contention supported by a recent PennDOT survey.

That is also a concern of Pennsylvania Rep. Stephen Levin (D., Philadelphia), who is the author of an amendment to House Bill 1285 that he wants to use as a vehicle to repeal the no-fault law entirely.

"You can have the working poor — a man who earns less than $10,000 a year — driving a $1,000 car buying $1,500 worth of insurance," he said. "If you take something away from somebody, you've got to give him something in return."

Otis W. Littleton, chief counsel to the House Insurance Committee and principal draftsman of House Bill 1285, argued that, "under existing law or under the proposed law, we do not limit the right to sue for actual economic losses, even if the person is willfully uninsured." However, for that person to sue for pain and suffering, he would "have to meet the same threshold as any other driver." If he is in a single-car accident or some other accident in which no one was really at fault, he would be out of luck, Littleton conceded.

The insurance industry would like to see Pennsylvania adopt a provision, similar to one in Florida, that would crack down on those engaged in the filing of fraudulent claims, a program the state Insurance Department says it is not willing to take on.

The trial lawyers are interested in adding another provision from Florida — a regulation defining and prohibiting excessive insurance industry profits, a provision the lawyers association contends has resulted in refunds of more than $100 million to Florida policy-holders. The Insurance Department says that is covered by rate review provisions in House Bill 1285.

Finally, Bob Hunter, president of the Virginia-based National Insurance Consumer Organization, said any no-fault insurance program should carry "good and open and punitive damage language to make sure the insurance companies toe the mark and pay what they are supposed to pay." The Insurance Department says all that is taken care of in another law, the Unfair Claims Practices Act.

'No-Fault' Insurance Law Facing Major Surgery

By CARMEN BRUTTO
Staff Writer

The state's five-year-old no-fault auto insurance law faces major surgery to make it tougher on uninsured motorists who have been beneficiaries of defects in the current law.

The state's mandatory auto insurance law is apparently being ignored by hundreds of thousands of motorists who nonetheless benefit from a provision that insured drivers pick up the medical bills and lost wages of uninsured persons injured in traffic accidents.

The original intent of the 1974 law was to protect pedestrians and passengers under an assigned claims provision, but the effect of the law's language was to extend the same protection to thousands of drivers who hold no insurance.

Changes in the law are being proposed in a package of bills drafted by Reps. Russell Kowalyshyn, D-Northampton, former chairman of the House Insurance Committee, and Ivan Itkin, D-Pittsburgh.

Three of the four bills in the package were introduced last week. The fourth, to eliminate an uninsured motorist's coverage for injury and lost wages compensation is being circulated among House members for additional sponsors.

"It seems to me that a person who drives in the state without insurance, which is in violation of the law, should not be allowed to collect any of the benefits provided by the law, especially since he has not paid any premiums to provide such benefits," Itkin said. "I intend to correct this glaring error in the law."

The assigned claims plan covering uninsured persons is an insurance industry pooling mechanism that distributes claim payments to vehicle passengers or pedestrians who are accident victims and not otherwise insured.

"One of the sad ironies of the no-fault law is that those who ignore it by failing to obtain insurance are protected anyway, and the cost of that protection is paid by those who are legally insured," Kowalyshyn said.

According to Kowalyshyn, more than half the assigned claims paid last year by insurance companies went to uninsured motorists. He said it is likely this has been the pattern for several years.

In addition to the actual payouts, the industry sets aside even larger amounts in "reserve" for future payments, resulting in millions of dollars of inflated premiums paid by the insured motorist, he said.

A provision in a bill passed last year would have corrected the inequity, but it was vetoed by Gov. Milton Shapp who objected to other aspects of the bill.

To avoid a recurrence of that situation, the uninsured motorist issue is being handled in a bill separate from the others.

A second no-fault-related bill by Kowalyshyn gives local constables the power to enforce the law and remove a suspended vehicle's registration and license plate from the vehicle owner.

Current law requires PennDOT employees or State Police to perform this function. Kowalyshyn wants the uninsured motorist to bear the cost rather than the general public.

Kowalyshyn also wants motorists to pay a $25 fee to re-register a vehicle after the original registration was suspended for failure to carry insurance. He said there are several hundred thousand vehicles in this category, and the revenues from the proposed fee would provide funds to make the enforcement system self-sustaining.

Kowalyshyn is also pressing Gov. Dick Thornburgh, Insurance Commissioner Harvey Bartle and PennDOT Secretary Thomas Larson to revise the current method of spot-checking for uninsured motorists.

PennDOT now uses a three percent random sample of the state's six million motor vehicle registrations to uncover those who might be uninsured.

Kowalyshyn wants PennDOT to zero in on the half million notices it receives annually from insurance companies reporting the names of drivers who have dropped their insurance.

Although many of these people have sold their vehicles or have taken coverage with another company, he said the reports will also prove useful in tracking down illegal drivers.

No-fault votes a start on long road to reform

By David Morrison
Inquirer Harrisburg Bureau

HARRISBURG — A proposal to revamp the Pennsylvania no-fault automobile insurance system will come to a vote in the House Judiciary Committee on June 8, an action that could kick off a long, hot summer of debate on the controversial measure.

Rep. Warren H. Spencer (R., Tioga), chairman of the committee, said the action should clear the way for a final House vote on the no-fault measure before the legislature's long recess, scheduled to begin June 30.

But that is actually the first of many hurdles before the legislation. Some members of the Senate have said they will attempt to put through a drastic overhaul of the state's automobile insurance laws if the no-fault bill comes within their grasp. Such action would mean that a final version of the reform proposal would come only at the end of a protracted fight in a House-Senate conference committee.

Meanwhile, Pennsylvania Insurance Commissioner Michael L. Browne has scheduled four public hearings late this month and in June on proposed rate increases that could cost Pennsylvania motorists about $154 million a year in added insurance premiums, a prospect that could liven any of the imminent no-fault debates.

Spencer's committee normally does not handle insurance-related bills. It was forced to accept the no-fault measure late last year after the bill was approved by the House Insurance Committee but failed to win enough votes to pass the House.

Strong support

The no-fault bill has hefty support from the insurance industry and Gov. Thornburgh. But it still faces opposition from a powerful lobby, the Pennsylvania Trial Lawyers Association.

The bill was brought to the floor of the House after carefully orchestrated committee work that kept legislative tinkering at a minimum. More than 100 floor amendments were proposed, many of which were designed to gut the no-fault system in Pennsylvania. On Nov. 16 the House voted 118-80 to send the bill to Judiciary for public hearings.

"Hopefully we won't have 100 amendments offered when we get this out on the floor," said Spencer, who was the only member of his lawyer-dominated committee to vote against reassigning the no-fault bill to Judiciary. "We're trying to get a bill the insurance companies can live with; one that the trial lawyers can live with, and, most important, one that will benefit the consumer."

Spencer, who conducted four hearings around the state on the bill, said members of his committee could still offer amendments to a version of the bill that's being drafted by the committee staff. But barring an unforseen rebellion in the ranks, he said, the Judiciary version of the bill would be surprisingly similar to the measure approved by the insurance committee.

Part of package

No-fault, or personal-injury protection, is only a part of the average automobile insurance policy and is required coverage in Pennsylvania. It's that portion of the policy that allows an insured motorist who is injured in an accident to be compensated for actual costs of hospitalization and medical expenses by his own insurance company, no matter who was at fault in the accident.

In a pure no-fault system, that would be all the insurance that a person should have. It would be economical because, ostensibly, settlement of claims would not require any kind of litigation, thus eliminating court costs and legal fees from the auto insurance system. There would be no need for a person to buy liability insurance.

Pennsylvania's auto insurance law, sculptured in 1974 by consumer and powerful lobbying groups, blends no-fault insurance with the old liability system. It's a prime example of lawmakers wanting desperately to try something popular and something new, but not wanting it deperately enough to abandon the past.

A Pennsylvania motorist is required to carry a brand of no-fault that pays unlimited amounts for his medical care if he's injured. Yet, if his medical bills exceed $750, he still can file a lawsuit seeking compensation for other damages, such as loss

Continuation

of a promising athletic career or simple inconvenience and discomfort caused by an accident.

Liability insurance

Consequently, a Pennsylvania motorist also is required to buy liability insurance, which pays for damages to others should he be judged at fault. That represents about 25 percent of the cost of the average insurance policy.

The reform proposal, sponsored by Rep. Walter F. DeVerter (R., Mifflin), would prohibit lawsuits for "pain and suffering" in all cases, except those that involve death or "serious and permanent" disfigurement or injury. It also would eliminate a loophole in the state law that allows an injured person to collect payments from both auto and hospitalization insurance policies for one accident.

Those two provisions and some other fine-tuning in the reform bill, DeVerter said, would save the insurance industry more than $150 million a year — savings that should be passed on to the consumer.

As a means of springing the bill from the Judiciary Committee, Browne advocated an amendment earlier this year calling for an overall 8.9 percent rollback in all insurance coverages required by law. But as a condition for endorsing that amendment, Browne told the Judiciary Committee that it would have to leave DeVerter's bill substantially intact.

Spencer said he expected that many members of the committee would want to include Browne's amendment no matter what form the bill took.

There's one indication that the insurance industry senses that a no-fault reform bill with a premium-rollback provision has a chance of being enacted this summer. And it's reminiscent of what happened when the state's no-fault law was originally passed with its provision for a rollback.

Increased rates

Before the effective date of the no-fault law, insurance companies were allowed to increase rates substantially so that policyholders never really received any benefit from the rollback. Many insurance companies in the state this year are seeking increases, all of them having received substantial rate hikes less than a year ago.

Browne has scheduled a public hearing May 27 for a 23.5-percent, $31-million rate increase request for the Assigned Risk Plan, the state pool that insures high-risk motorists. A 19.4 percent increase for the group went into effect in November.

On June 2 he'll hold a hearing on the 18-percent, $12.1-million sought by Prudential Property and Casualty Insurance Co., which got a 7.7-percent increase in September.

There's a June 16 hearing on the 10.2-percent, $42-million increase requested by Insurance Services Office, a group representing smaller companies. It got its last increase, 11.8 percent, in October.

On June 17 there's a hearing on the request for the largest auto insurer in Pennsylvania, State Farm Mutual Insurance Cos., which is seeking a 15.3-percent, $41.9-million increase, although it received a 6.8 percent increase in September.

Browne also is considering an 8.5-percent, $3.1-million increase for Liberty Mutual Insurance Co., which implemented an 8.2 percent increase in August, and a 13.2-percent, $4.8-million increase for Travelers Indemnity Co., which had a 9.3-percent increase in September.

Bracing for a rollback

Although state Insurance Department officials would not speculate on whether the companies were bracing for a rollback, one source did indicate that rate requests usually are filed annually.

"They are," the source said, "filing a bit early this year."

Spencer would not predict in an interview this week what amendments members of his committee would offer or support when the committee starts its final work on the bill June 8.

He indicated some pork-barreling provisions put in by the insurance industry — such as a proposal to reduce the interest on delayed claims payments from 18 percent to 12 percent — will be deleted. But the thrust of the measure will be to reduce the number of automobile accident-related lawsuits.

Sen. Henry G. Hager (R., Lycoming), the president pro tem, said last week that he will advocate a system similar to one in use in Delaware — the favorite system of the Pennsylvania Trial Lawyers Association — if the no-fault bill comes his way. Delaware has no restrictions of lawsuits for pain and suffering. However, an accident victim seeking compensation for something other than medical expenses, cannot use the amount he collected from his no-fault insurance coverage for medical expenses as evidence to bolster his lawsuit.

"I know there is a lot of support for the Delaware plan because it's anti-insurance, industry," Spencer said. "But it's just too liberal to get past all members of the House."

Sen. Paul McKinney (D., Phila.) is taking a different tack. He says he'll introduce legislation when the Senate reconvenes Monday to dismantle the no-fault system entirely.

States now steering clear of no-fault plans

By David Morrison
Inquirer Harrisburg Bureau

HARRISBURG — Prospects of federal legislation mandating minimum standards for automobile insurance motivated 25 states to enact some form of no-fault by 1976. But as federal momentum slowed, so did that in the states, and in the last five years, none of the remaining states has taken action toward a no-fault law.

One state, Nevada, repealed its statute after only a few years.

The concept's uneven political history perhaps can be traced to the fact that no state has adopted a pure no-fault law. Each state has permitted lawsuits at some stage where the injured may claim that another party is to blame.

"At a practical matter, nobody ... wants to be the first to try something that may be a total failure," said Gov. Thornburgh, who is supporting legislation that would bring Pennsylvania's auto insurance laws closer to a pure no-fault concept. "Politically, people have a legitimate interest. Trial lawyers have a legitimate concern that their clients ought to have recompense for their injuries from the people who actually caused them."

Aiding the attorneys who attack no-fault is the system's failure to reduce auto insurance premiums, as promised. But proponents say it is the economy, not the concept, that has kept premiums rising.

A 1977 study by the U.S. Transportation Department weighed all the problems of various no-fault systems, then concluded, "No-fault automobile insurance works."

"No problem has arisen in the implementation of no-fault for which there does not appear to be a readily available and feasible solution, given the political will to make the necessary change," the federal study said.

In Michigan, for example, bodily injury liability claims have declined from 25.3 per 1,000 insured cars in 1972, the year before no-fault was enacted there, to 2.7 in 1978. In addition, Michigan places a verbal threshold on the right sue, keeping down the number of court cases.

Michigan also offers what generally are regarded as the most liberal benefits, closer to the ideal of the no-fault law. And still the premiums there have not been out of line with the other increases in the Consumer Price Index, the state's insurance department reports.

MV flagging drivers of uninsured vehicles

By ALAN FRIEDMAN

More and more drivers are walking these days because they are ignoring New Jersey's compulsory insurance law and getting caught by the Division of Motor Vehicles (MV).

"There's no getting away from the fact that as insurance costs go up, some people are dropping their coverage," pointed out Seymour Blaustein, assistant MV director. "But I think we've got good verification procedures that catch a lot of people without insurance."

Blaustein said that during 1978, the division revoked the licenses of 66,946 motorists due to insurance related problems, an increase of about 5,000 over the previous year.

• • •

The majority of cases, 35,963, involved drivers whose insurance had been cancelled, primarily for lack of payment. Another 11,915 licenses were revoked because drivers involved in accidents had no insurance.

MV Director John Waddington estimated that between 4.5 and 5 per cent of the motorists involved in the 300,000 accidents reported yearly are uninsured.

"That's a pretty big sample," noted Waddington. That figure translates to about 230,000 uninsured drivers when related to the state's total driving population of 4.7 million.

Blaustein, however, admitted that no state" can come up with an exact count of uninsured drivers. New Jersey has had its compulsory insurance law since 1973.

The state gets most of its information about uninsured motorists from accident and police reports and from insurance companies. Insurance firms are required to notify the MV when car insurance policies are canceled.

Motorists are also required to show insurance identification cards during the annual safety inspection of their automobiles.

Waddington said the MV follows up on "a couple hundred thousand" notices a year that coverage has been ended by a driver.

"Some people have just moved out of the state. We send out a notice asking what happened," Waddington said. "If we don't get any answer, we send out a second notice. If there's no answer to the second notice, we revoke the license."

Prior to the mandatory insurance law of 1973, motorists could drive without insurance if they paid a $50 fee to the state. Blaustein said between 86 and 88 per cent of the drivers involved in accidents before 1973 were insured.

Since 1973, he said, that figure has hovered around the 95 per cent mark, going as high as 96.3 per cent in 1976. Last year it was 94.9 per cent.

• • •

The 66,946 MV license revocations for insurance causes last year comprise the largest bulk of the department's annual total of 200,000 suspensions.

A spokesman for the state Department of Insurance said New Jersey auto coverage rates are up this year about 11 per cent over 1978.

"The minimum one-car coverage would be about $370 a year," he said, adding that for families with two cars but no young drivers, the minimum would be about $500 total.

"A family with a 17-year-old driver could pay four times the one-car rate," he added. He also noted that drivers in urban areas could pay upward of $750. Some city rates run into the $1,000 range, although the Insurance Department official said that was "just an approximation."

While the state bases its estimate of uninsured drivers on the sample involving about 300,000 accident reports yearly, officials of the insurance industry have contended the number of uninsured drivers exceeds a half million.

Insurance officials say some motorists buy insurance and pay the initial 40 per cent, but don't come up with the rest of the money during the 120-day period provided for full payment.

Members of the industry maintain that those drivers still get insurance identification cards for their initial outlay, which they can show to police in the event they are stopped for a traffic violation.

(Newark, N.J.) Star-Ledger, June 16, 1978

Governor accuses auto insurers of intimidation and deception

By VINCENT R. ZARATE

Gov. Brendan Byrne yesterday charged the car insurance industry is intimidating the Legislature, misleading the public and threatening higher rates in its effort to kill his automobile insurance reform package.

Byrne, in the midst of his toughest fight since the income tax battles of 1976, charged the insurance companies' criticisms of his plan are "patently untrue."

Administration sources admitted the Governor's tough-worded attack shows how severe the fight is between the multimillion dollar insurance industry and the administration on how best to solve the mounting auto insurance crisis in the state.

Byrne wants the Assembly to vote on his package before it recesses for the summer -- either next Thursday or Monday, June 26.

* * *

The governor issued the statement as prod the seven member Assembly Banking and Insurance Committee to release the bills after its hearings. The committee, still undecided on how to vote, meets again Monday in the State House in Trenton.

Byrne pulled no punches charging the industry with a "high pressure campaign based upon threats and misstatements of fact."

At issue is whether the administration can get laws to replace the assigned risk pool, establish a new surcharge system for errant drivers and, most important, force every auto insurance company to write a policy to any person asking for it.

The industry has sent its top officials to New Jersey to kill the package, warning it would lead to higher rates and force companies to leave New Jersey and no longer write auto insurance.

Byrne said of the insurance industry's position:

"In their statements before the Assembly committee, the insurance companies have again rattled the saber of withdrawal from the state. They hope to intimidate the Legislature into bending to their wishes. I am confident that the Legislature will not do so."

He said the allegation by industry representatives that his plan would lead to higher rates "is patently untrue."

Byrne said one of his bills (A-1120) would require problem drivers to pay more for their insurance. He said the other bill (A-121) would create a reinsurance facility and allow the state insurance commissioner to establish a separate rate for drivers "with demonstrably bad driving records."

Byrne said the measures are aimed at eliminating the Assigned Risk Plan, which "claims one million drivers, 730,000 of whom have clean records, and would also eliminate present industry discrepancies in the way companies distinguish between good and bad drivers."

The major problem in New Jersey is that few persons can get automobile insurance on the open market and, instead, are dumped into the assigned risk pool.

The pool has increased from 338,353 motorists three and one half years ago to one million today, and those in assigned risks are subjected to surcharges starting at 60 per cent of their base rate for errant driving.

He charged the present system represents "for the companies . . . a game of semantics."

SECTION ANALYSIS -- MANDATORY AUTO LIABILITY INSURANCE
CSSSHB 7 (L&C)

Section 1 Declaration of Purpose. Expresses goal of legislation that motorists be financially responsible for their actions due to rising toll of accidents. The legislature declares that the public interest can best be served by the requirement to show proof of liability insurance prirot to registration.

Section 2 adds mobile homes as defined by statute to vehicles exempt from registration.

Section 3 Amends 28.10.011 by adding a new section under REGISTRATION which specifies an owner may not register or renew registration of a vehicle without providing proof of liability insurance as required in statute.

Section 4 Amends APPLICATION FOR REGISTRATION statute by specifying that certificate of registration may not be issued until the criteria set out in Section 3 above is met.

Section 5 Amends 28.10.111 (RENEWAL OF REGISTRATION) by adding a new section specifying that current registration may not be renewed until adequate proof of financial responsibility is shown as required in statute.

Section 6 Allows DMV to issue title to certain vehicles exempt from registration.

a) vehicles exempt under Soldier and Sailor's Civil Relief Act (current exemption)
b) special mobile equipment (new)
c) vehicles driven or parked on private property (new)
d) vehicles driven or moved on highway or vehicular way which is not connected to state highway system (new)
e) mobile homes as defined by statute (new)

Section 7 Requires proof of sufficient liability insurance on vehicles OWNED by driver before driver's license can be issued or renewed for both residents and non-residents. If driver did not OWN vehicles at time of license renewal, no proof would have to be shown. A person who owns a vehicle that is registered out of state must show proof of insurance prior to obtaining an Alaska license.

Section 8 Mandates suspension of license when advised that insurance has been cancelled and there is no response by license holder within 30 days of notice to suspend sent by department.

Section 9 Amends law to require knowledge of the effects of alcohol and drugs on driving and knowledge of laws relating to financial responsibility when taking test for driver's license.

Sections 10-13 Amends current financial responsibility law to increase liability limits to current rates as established for insurance polices under AS. 28.22.010 These are increasing limits from 25/50/10 to 100/300/50 thousand.

Section 14 adds requirement of offering underinsured motorist coverage for insurance policies written in state for both personal njury and property damage.

Section 15 adds new sections (l) and (m) to current definition of insurance policy. These are the same items as contained in the proposed definition under AS 28.22.010 (sec.17)

Section 16 Amends current law to increase amount of money or securities required as proof of insurance to a rate in line with policy requirements ... $100,000

Section 17 ADDS NEW CHAPTER 22 TO TITLE 28..Motor Vehicle Liability Insurance

This is virtually identical language to that now in statute 28.20.440.

CHANGES TO CURRENT LAW OR ADDITIONS:

28.22.010

(b) 2 A/B- increases minimum limits for insurance to be contained in policy. (These are the same limits that were amended in the previous 5 sections)

Bodily injury to or death of one person in any one accident
CURRENTLY $25,000 PROPOSED $100,000

Bodily injury to or death of two or more persons in any 1 accident
CURRENTLY $50,000 PROPOSED $300,000

Injury to or destruction of property of others in any one accident
CURRENTLY $10,000 PROPOSED $50,000

These are limits contained in most standard policies currently issued. These are also limits generally imposed by banks for insurance requirements to buy a car.

(3) Requires offering of underinsured motorist coverage in addition to uninsured coverage. Coverage will also relate to property damage. Current law only requires offering of uninsured coverage for bodily injury or death. But this may be waived in writing.

(l) Requires insurance carrier to notify DMV when a policy is cancelled within the first 180 days that a policy is in effect and within 10 days of knowledge of termination or intent to terminate. If a person whose coverage terminates fails to provide DMV with satisfactory evidence of insurance, DMV will suspend the driver's license and all registration certificates and plates issued to owner of vehivle until proof of insurance is given.

(m) Requires insurance carriers to provide the insured with a card indicating existance of satisfactory policy. This card must be carried in vehicle at all times.

28.22.020

To be considered effective, policies must be issued by insurance companies authorized to do business in state and meet financial limits imposed by statute. Allows for exception if power of attorney is executed.

28.22.500 PENALTIES

Penalties are imposed for driving or knowingly permitting to be driven a vehicle required to be insured unless the vehicle and driver are are covered by an adequate insurance policy. This section describes penalties for violation of that law. See attached sheet.
SEC. 28.20.510 sets out provisions relating to impoundment.

Allows for impoundment or release to person with right to possess a vehicle if a peace officer has cause to believe vehicle was driven without proper insurance. If released, the owner or person with right to possess must pay costs of impounding and storing.

Impoundment is until proof of insurance is shown if driver has not been previously convicted of similar offense or for 30-90 days if person has been previously convicted of similar violation within 10 years.

Upon impoundment, a hearing will be provided at the time of impoundment to the person with the right to possess the vehicle, the driver, other persons with an ownership interest. Following a hearing, the vehicle will be released to owner or person with right to possess if it is determined impoundment was improper or that at the time of impoundment the vehicle was being driven

by a person other than the owner or person with right to possess the vehicle AND

without the consent of the owner or person with right to possess the vehicle.

Vehicle will also be released if

the driver is not charged within 10 days of impoundment of an offense related to the impoundment OR any related charges are dropped or dismissed OR the driver is acquitted of any related offenses.

If the vehicle is not released after impoundment hearing, a lienholder may reposses the vehicle for sale and impoundment costs are to be paid by sale proceeds.

28.22.520/28.22.530 FORFEITURES

These provisions apply when forfeiture is called which happens following 3rd conviction within 10 years of driving without proper insurance.

Court will require surrender of registration and title. If not released, the department may dispose of the vehicle as governed by statutes.

Upon order to forfeit, the court will provide notification of intent to require forfeiture to all who have an ownership interest in vehicle. This will allow for any interested party to ask for remission of interest in the vehicle. Court will hold hearing if request for remission of interest is made and such interest will be remitted if

the petitioner has an interest in the vehicle acquired in good faith AND

a person other than the petitioner was convicted of the offense which resulted in forfeiture AND

before parting with the motor vehicle, the petitioner didn't know or have reasonable cause to believe it would be used in the commission of an offense.

This protects the vehicle dealer or, for example, the owner of a a car taken without permission or stolen.

If remission of interest is granted it may be either in the form of reimbursement for interest or repossession of the vehicle and title.

28.22.540 UNUSED MOTOR VEHICLES

This provision allows a person to terminate or suspend insurance policy without penalty by removing plates from vehicle and delivering them to DMV. When vehicle is to be used, driver must present proof of insurance to DMV and plates will be returned.

28.22.550 ANNUAL REPORT

Requires annual report beginning in February 1986 which is to assess impact of law with regard to effect on number of uninsured motorists, insurance rates and cost to administer law.

SECTION 18 Amends insurance code to require that insurance policies sold in state meet requirements of liability policy described in this chapter. Since the bill would not become law until July 1, 1984, this would allow insurance companies to prepare to meet this requirement.

SECTION 19 Amends insurance code to mandate that companies must offer uninsured and underinsured coverage for personal injury and liability in at least the amounts voluntarily purchased by the customer. This coverage may be waived by the insured.

SECTION 20 Delays one provision of not issuing or renewing drivers license unless insurance is proven until 1/1/85. This allows DMV time to upgrade computer to provide for cross referencing licenses and owned cars.

SECTION 21 Effective date of act is 7/1/84.

PENALTIES UNDER AS 28.22.5000

A person may not drive or move nor may an owner knowingly permit to be driven or moved on a highway or vehicular way or area a vehicle required to be insured under a motor vehicle liabilty policy that complies with AS 28.22.010 unless a motor vehicle liability policy is in effect for the motor vehicle.

If stopped and a peace officer has reason to believe a person is driving without insurance, a citation for $250 will be given. The driver will then have 5 days to show the court that insurance was in effect at the time of the citation. If proof is shown, charges and fine will be dropped. OTHERWISE....

Violation of the law is a Class B misdemeanor.

Court will impose a minimum fine of $250 and maximum of $1000. Minimum fine may not be suspended. Court may also impose jail term of up to 90 days which may be suspended if fine is paid.

ADDITIONALLY THE COURT WILL IMPOSE THE FOLLOWING SANCTIONS:

1st Offense	SUSPENSION OF LICENSE FOR UP TO 30 DAYS
	SUSPENSION OF REGISTRATION UNTIL PROOF OF INSURANCE SHOWN
2nd Offense within 10 years	SUSPENSION OF LICENSE WITHOUT LIMITED DRIVING PRIVILEGES FOR MINIMUM OF 30 DAYS/MAXIMUM OF 90 DAYS
	SUSPENSION OF REGISTRATION AND IMPOUNDMENT OF VEHICLE FOR 90 DAYS OR LONGER UNTIL PROOF OF INSURANCE IS SHOWN. ALLOWS FOR JUDICIAL HEARING BEFORE ANY IMPOUNDMENT TAKES PLACE. SUCH A HEARING INCLUDES ANY PERSON NAMED ON TITLE OR WHO MAY HAVE A LIEN INTEREST.
3rd Offense 10 years	SUSPENSION OF LICENSE WITHOUT LIMITED DRIVING PRIVILEGES FOR within MINIMUM OF 90 DAYS TO MAXIMUM OF ONE YEAR.
	FORFEITURE OF VEHICLE UNDER AS 28.22.520

Official Business

LABOR AND COMMERCE SUBSTITUTE HB 7

Changes from SSHB 7

The changes made by the Labor and Commerce Committee changed language and sections 18 and 19 to require insurance companies to offer uninsured and underinsured coverage for both property damage and personal injury. This coverage may be waived upon signature of the insured. This coverage must be available in at least equal amounts to the coverage bought voluntarily under the regular liability coverage.

The language was changed both in Title 21 and the proposed reqrite of Title 28 as this bill proposes.

No other amendments were offered in committee.

Re: Alaska - SB-223; HB-7

Dear Mr. Koch:

These bills are causing us at State Farm serious concern. In scrutinizing the Declaration of Purpose, as stated in the bills, it would appear that if the legislature is serious in attempting to decrease the non-insured driving population, the drastic increase in liability and property damage limits, would go far not in decreasing the number of uninsured drivers, but rather increase that population. Some drivers would be unable to meet the premium payments and would find ways to continue driving without coverage. No state has minimum liability limits approaching the proposed amount. Attached are the actuarial figures on the resulting costs if these bills were to succeed. In addition to these increased premium costs, there would be the intangible but real cost increases in claim payments. These increased payments would eventually be reflected in additional premium increases.

These bills also require an insurer to notify the motor vehicle department of any terminations or intentions to terminate within a ten day period. The language is unclear if the ten day period begins before or after a termination or intent to terminate. Notice requirements have been mandated in other states and it has been found that the costs to the motor vehicle departments, as well as the insurers, have not been justified as a means of decreasing the uninsured population. Such requirements would only succeed in increased costs.

Also of grave concern is the ambiguous language in the new Chapter 22 that could be interpreted to mean that all policies, i.e., an owner's policy, an operator's policy, and motor vehicle liability policy, be treated as a certified motor liability policy with absolute liability after a loss has occurred.

This bill as written could severely damage the now competitive and healthy marketplace for automobile insurance in Alaska.

Enclosed also is a publication we have used for informational purposes in other states when the compulsory issue has arisen.

In my conversation Friday, April 8, with Director Moore, it was suggested that we write to you and provide our comments. Hopefully they can be of some use in defeating these bills. We certainly appreciate your help.

Sincerely,

John Gordon
Assistant General Counsel

A. Average State Farm Mutual policy premium changes from 25/50/10 BIPD liability and 25/50 UM coverage to 100/300/50 and 100/300 UM

	Current Semi-Annual Premium	Semi-Annual Premium Increase	Percentage Increase
BIPD	$ 64.90	+ 17.10	26.3%
UM Coverage	8.00	+ 3.80	47.5%
Both BIPD & UM	72.90	+ 20.90	28.7%

B. Example #1: An adult driver, pleasure use, in Anchorage who currently carries 25/50/10 BIPD and 25/50 UM to required limits

	Current Semi-Annual Premium	Semi-Annual Increase in Premium	Percentage Increase
BIPD	$ 56.43	+ $ 14.82	+ 26.3%
UM	8.00	+ $ 3.80	+ 47.5%
Both	64.43	+ $ 18.62	+ 28.9%

Example #2: 18-year old single male principal operator, pleasure use, Anchorage; currently with 25/50/10 BIPD and 25/50 UM to required limits

	Current Semi-Annual Premium	Semi-Annual Increase in Premium	Percentage Increase
BIPD	$255.42	+ $ 67.08	+ 26.3%
UM	8.00	+ 3.80	+ 47.5%
Both	263.42	+ 70.88	+ 26.9%

CSHB 7 (Judiciary)
Effect of Amendments

The proposed Judiciary committee substitute makes the following changes:

Clarifies that the provisions of this law relate to 'motor' vehicles as defined in the statutes.

Includes a certificate of self insurance as one means of proving financial responsibility. This is typically used by commercial companies to insure a fleet of vehicles. The certificate is defined by AS 28.20.400.

Clarifies that a person seeking a license must only show proof of insurance only on vehicles which are both registered in that persons name and owned by the person which must be located within the state.

Changes the propsed liability limit increases from 100/300/50 to 50/100/25. Currently the limits in law are 25/50/10.

Adopts the language suggested by the Court system relating to issuance of a citation by a peace officer.

Deletes provisions which allowed a peace officer to impound a vehicle on the spot if he had cause to believe an insurance policy was not in effect.

Changes the responsibility for notifying parties in a forfeiture incident from the "court" to the Department of Law as suggested by the Court System.

Changes the date for submission of the first annual report from February 1986 to 1988 and changes report from Dept. of Commerce and Economic Development to a JOINT report with Department of Public Safety.

Adds new effective date of January 1, 1984 for the provisions which mandate that insurance companies offer uninsured and underinsured insurance. These sections would now take effect before any other provision in the law.

MAR 14 1983

March 9, 1983

Representative Joe L. Hayes
Pouch V
Juneau, Alaska 99811

Dear Representative Hayes:

I am writing this letter in pain, outrage and total disgust. I have painfully become aware of the completely inadequate and antiguated driving laws of this state as a result of my son Sean's death at the hands of an irresponsible, uninsured driver who was drinking, speeding, ran a red light and God only knows what else. This driver can afford alcohol and drugs (they were found in his car) but he cannot afford insurance!

The law concerning the requirement to have auto insurance, better known as "the State gives you a free one" is at best a farce. Having lived here 44 years and watching the traffic increase to the point beyond the capacity of our road system, coupled with the irresponsible attitude of the outsiders coming in and the young people growing up, dictates that the law be tightened.

It is imperative that mandatory auto insurance be required of those wishing to drive in the State of Alaska. When auto licenses are renewed or bought, or with registration and/or titles, proof of insurance at that time should be shown. Upon cancellation of insurance, then licenses revoked. In short No Insurance - No License!

Sean was not allowed to own a car or drive without insurance which he bought and paid for himself and he took that responsibility with him into his young adulthood and was subsequently killed by a person who apparently did not care or have any regard about others.

The time is long past due for all Alaskans new or old to accept the responsibilties attached to owning and driving an automobile and the necessary steps to accomplish this rests squarely on your shoulders.

Sincerely,

Robert J. Sinnett

Dear Charlie:

I have just learned through Representatives Ringstad and Pestinger that House Bill No. 7 on compulsory insurance has been transferred from Labor and Commerce to the House Judiciary committee for hearing. I would appreciate your earliest communication as to when this matter will be scheduled for public hearing. I am desirous of travelling to Juneau to speak on this legislation.

Sincerely yours,

Joe M. Huddleston

The Honorable Charlie Bussell
House of Representatives
Pouch "V"
Juneau, Alaska 99811

Dear Charlie:

I would like to take this opportunity to direct to you my thoughts on pending legislation. House Bill No. 7 and Senate Bill No. 223 is proposed legislation which requires compulsory insurance in order to obtain a driver's license or vehicle tags. The idea of compulsory insurance does have surface appeal, but I believe that it does not stand close scrutiny. As you know, I am an attorney practicing law in Anchorage. I am significantly involved in insurance defense actions and I have researched this subject at length. This matter was originally scheduled for a hearing before the House Labor and Commerce Committee on Friday, February 15th. I had planned on attending that hearing but it was cancelled on the 14th. It is my hope that I will be able to attend either the House or Senate hearing on this matter when it is rescheduled.

As I mentioned above, the idea of compulsory insurance does have a degree of surface appeal. However, our several sister states have experimented with this type of legislation to their prejudice. New York adopted a compulsory insurance law in 1956 and a study undertaken by the University of Michigan in 1963 reported that the law was unenforced, unenforceable, and a complete failure. A New York Daily News "study" reported that the law had failed to achieve its aims and was, in fact, counterproductive.

In the main our sister states have found that the compulsory insurance laws (1) cannot be enforced; (2) are costly to administer; and (3) increase insurance premiums for responsible drivers.

Notwithstanding the above, my three major reservations concerning this legislation are that it will (1) significantly increase the premium rates for responsible policy holders; (2) significantly increase the case loads at the Superior Court level; and (3) engender disrespect for law.

A superficial review of this subject might suggest that the respective insurance carriers would be in favor of this type of legislation. What greater boon could one envision to the insurance industry than legislation which mandates that everyone must buy their product? However, the insurance industry has realized that compulsory insurance creates a bureaucracy in state government and in private industry and, further, significantly raises insurance premium rates.

I would suggest to you that this Bill is simply a make work project for attorneys. In the situation where an insured motorist is involved in an accident with an uninsured motorist, he has recourse to his uninsured motorist benefits. This is a very common situation and in almost all of these situations no lawsuit is filed. The insured motorist simply settles with his own insurance carrier or, in a relatively few cases, the matter is taken to arbitration. The overwhelming majority of this type of case does not involve an attorney and is settled without recourse to the court. The savings to the taxpayer are incalculable.

The requirement that every driver obtain insurance will negate the effect of the uninsured motorist benefits and result in a proliferation of lawsuits rather than the insured simply settling the case with his own insurance company or demanding arbitration. This will be an excellent benefit for attorneys but will be a disservice to the citizens of the state of Alaska in that it will increase insurance premiums, increase state and private industry bureaucracy, increase the expense at the Superior Court level and prevent the speedy resolution of claims through the uninsured motorist provisions.

As I stated above, my research has indicated that the system of compulsory insurance is not effective in that it is unenforceable. The costs of enforcement through the Department of Motor Vehicles is prohibitive. A California study revealed that persons were applying for insurance, or actually obtaining it, and then cancelling the insurance as soon as they obtained their license. A Pennsylvania study reflected that the Department of Motor Vehicles in that state was bogged down in a bureaucratic morass. On average, forty thousand notices of cancellation or lapses of payment were processed each month by that department. The most recent information from New York reflects that the costs of enforcement were in excess of seven million dollars per year. South Carolina also spent in excess of one million dollars to enforce its compulsory law in the fiscal year ending April 30, 1979. It is the experience of our system of jurisprudence that laws that are unenforced or unenforceable are a disservice to the legislature and a disservice to the people of the state.

AN ALTERNATIVE SOLUTION

The concept that citizens of the state of Alaska should be protected from physical and financial reverses of this type is laudable and should be pursued. However, there is a much more effective method of insuring that this type of physical and financial protection is available. Many states, for instance Oregon, require that each insurance policy contain uninsured motorist benefits. Under this type of provision, when an insured driver is involved in an accident with an uninsured motorist he simply files a claim with his own insurance company rather than dealing with the financially irresponsible individual that caused the collision in the first place. Requiring uninsured motorist coverage in every policy precludes the necessity of increasing either government or private industry bureaucracy. Requiring uninsured motorist provisions in every policy is easily enforceable as the respective carriers would not be allowed to sell insurance that did not include these benefits. Additionally, uninsured motorists coverage is very inexpensive to the policy holder. I would request that you review your own insurance policy and compare the costs of uninsured motorist coverage with the costs of general bodily injury liability coverage. The UM coverage generally costs just a few dollars.

It is my firm belief that the passage of House Bill No. 7, Senate Bill No. 223 will result in a morass of bureaucracy and paperwork and significant expense to the citizens of the state of Alaska. Additionally, compulsory insurance will significantly raise the premium rates that each of us must pay for insurance. Unfortunately, it is the experience of the citizens of the state of Alaska that we are compelled to pay an inordinate price for goods and services that are available in the Lower 48 on a less expensive basis. I do not believe that this additional cost should be passed along to the citizens of the state of Alaska. I would appreciate your thoughts or comments on this. I wish to thank you for your courtesy in this matter.

Sincerely yours,

Joe M. Huddleston

IV. ANALYSIS:

The data to be used as a comparison in the report required in Sec. 28.22.550 of the bill does not currently exist in a form that is reliable or conclusive. It is necessary to create base data at the earliest possible time if any kind of comparative comments are to have any meaning in the required reports. The amounts shown as contractual are to be used for periodic polls to arrive at insured automobile ratios via poll sampling by a firm qualified to conduct such work. The information so developed along with that acquired from the court system and other affected departments will be used to prepare the report.

Panel OK's auto insurance bill

Thu Associated Press TIMES 5-7-83

JUNEAU — The House Judiciary Committee on Friday approved a measure that would require auto insurance in Alaska. If approved by the legislature and signed by Gov. Bill Sheffield, the law would be similar to those enacted in 30 other states.

The measure (CSHB7) would require proof of insurance be shown at the time registration is renewed each year for vehicle in Alaska. Drivers also would routinely be asked to show proof of insurance when stopped for a moving violation.

The penalties for driving without insurance would include a fine of between $250 and $1,000, suspension or revocation of a driver's license and vehicle registration for up to 30 days on a first offense and 90 days for a second conviction. A vehicle could be impounded after a second conviction and forfeited after a third.

The measure also increase the minimum liability limits for which a person must be insured to $50,000 for injuries caused to one person in an accident, $100,000 in accidents with multiple injuries and $25,000 for property damage. Current law requires $25,000 for injuries to one person, $50,000 in multiple-injury accidents and $10,000 for property damage.

The bill would require insurance companies to offer uninsured and underinsured insurance for both bodily injury and property damage. Currently, only uninsured insurance is offered for bodily injury.

Speaker Joe Hayes, R-Anchorage, said he is pleased with the public reaction to the bill.

"I think most people agree that those who take advantage of the privilege to drive should also take the responsibility that comes with that privilege," Hayes said.

Current law requires insurance to be purchased after an accident, which Hayes calls backwards. "We should be protecting the public before people get behind the wheel of a car," he said.

CSSSHB 7 (Judiciary)
Fiscal Note
Analysis

The Department of Law is submitting a "zero" fiscal note for this bill because the financial impact cannot be estimated at this time. There is no accurate data available that would indicate the extent to which violations may occur. The provision for forfeiture of a vehicle, which is triggered when a person is convicted twice or more within ten years, will require some work on the part of legal services attorneys in handling remission proceedings. The degree of compliance, the level of prosecution, and the potential number of repeat offenders simply cannot be predicted until sometime after this legislation becomes law. The department might have to request additional resources from the legislature if, over time, there is poor compliance resulting in a large number of repeat offenders.

RE: OSSSHB7 SENATE COUNTER PART SB223

THE FOLLOWING RECOMMENDATIONS ARE SUGGESTED HOUSEKEEPING MEASURES THAT WILL IMPROVE THE BILL.

PAGE 3, LINE 29; THE TERM "AUTHORIZED TO DO BUSINESS IN THE STATE" MAY CREATE UNCERTAINTY. THE DIVISION OF INSURANCE MAKES THE DISTINCTION OF ADMITTED OR NONADMITTED COMPANIES. SUGGEST USING WORDING ON PAGE 10, LINE 25 AFTER THE COMMA THROUGH LINE 25.

THE SAME OR SIMILAR PHRASES APPEAR ON PAGE 6 LINE 5; PAGE 7 LINE 1; PAGE 10 LINE 5, 14 AND 21.

PAGE 10, LINE 21 AND 22: HOT THE PHRASE "OR IF THE COMPANY IS NOT AUTHORIZED TO DO BUSINESS IN THE STATE." IS THIS INTENDED TO MEAN NONADMITTED COMPANIES?

PAGE 9, LINE 5: "[illegible] OF ALASKA." THIS WOULD APPEAR TO BE LEGISLATION WITH WORDING IN THE AUTO INSURANCE POLICY PROVIDES COVERAGE.

PAGE 5, LINE 22: "[illegible] SHALL BE CHANGED TO "6 MONTHS OR 3 MONTHS." MOST AUTO POLICIES ARE WRITTEN FOR THESE TERMS. THE

PAGE 6, LINE 9 THROUGH 14; "THE CARD" WORDING SHOULD BE PROVIDED BY THE DEPARTMENT OF PUBLIC SAFETY OR DIVISION OF INSURANCE SO IT IS NOT BROADER THAN THE INSURANCE POLICY.

PAGE 8, LINE 1; DELETE "AND EVERY RIDER" THE TERM RIDER IS USED IN THE LIFE INSURANCE BUSINESS NOT THE PROPERTY AND CASUALTY BUSINESS.

PAGE 8 LINE 11 THROUGH 14; I AM NOT SURE WHY THIS PROVISION IS INCLUDED IN THE BILL. IT APPEARS TO REQUIRE PAYMENT BY THE INSURER OF ITEMS NOT COVERED BY THE POLICY.

PAGE 10 LINE 22; INSERT "THE MOTOR VEHICLE" AFTER THE "KNOWLINGLY PERMIT."

THROUGHOUT THE BILL THE TERM "BODILY INJURY TO OR DEATH OF ONE PERSON" SHOULD BE CHANGED TO "BODILY INJURY, SICKNESS OR DISEASE SUSTAINED BY ANY PERSON" INCLUDING DEATH AT ANY TIME RESULTING THEREFROM."

PROPERTY DAMAGE SHOULD BE AMENDED TO "AND INCLUDING DESTRUCTION OF DAMAGED" PROPERTY."

MOST AUTO INSURANCE POLICIES OFFER COMBINED SINGLE LIMITS. NO PROVISION IS MADE IN THE BILL TO COMBINE SINGLE LIMITS COVERAGE BUT THIS IS RECOMMENDED AS AN ADDITION.

MEMO

TO: Rep. Bussell, Chairman & Rep. Liska, Vice-Chairman, & Reps. Barnes, Hayes, Malone, Clocksin & Wendte

FROM: Staff Counsel

Date: May 2, 1983

SUGGESTED AMENDMENTS

1--p. 3, line 10, the "and" at end of line, not bracketed, appears to be a typo and should be eliminated.

2--The following is suggested in the light of Karla Forsythe's letter to all Committee members. (in packet). Any violation or crime resulting in a Class B misdemeanor automatically means an appearanc in court.....not so with the traffic infractions listed in traffic bail schedules, where the individual may mail in bail and never make an appearance. (Of course, some ticket recipients want to come into court for trial, and do). There's no choice, with a Class B misdemeanor. This bill would have it both ways and the provisions are conflicting.

Where a person stands to lose a license and/or go to jail, as in this proposal and under the Class B misdemeanor, the person also can have a jury trial (Baker v. City of Fairbanks, __P.2d __1970

Following is Karla's language, offered as replacement at page 11, line 3:

(b) If a peace officer has probable cause to believe a motor vehicle was used in the commission of an offense under (a) of this section, a citation will be issued. The charge will be dismissed if evidence is presented within five days showing insurance policy coverage as required by AS 28.22.010 was in effect at the time the citation was issued.

3--As per the suggestion on the last page of Karla's letter, the following would be offered on page 14, line 15:

forfeiture of a motor vehicle under AS 28.22.520, the [court]

Department of Law shall within five days provide to every person (etc

SECTION ANALYSIS -- MANDATORY AUTO LIABILITY INSURANCE
CSSSHB 7 (L&C)

Section 1 Declaration of Purpose. Expresses goal of legislation that motorists be financially responsible for their actions due to rising toll of accidents. The legislature declares that the public interest can best be served by the requirement to show proof of liability insurance prirot to registration.

Section 2 adds mobile homes as defined by statute to vehicles exempt from registration.

Section 3 Amends 28.10.011 by adding a new section under REGISTRATION which specifies an owner may not register or renew registration of a vehicle without providing proof of liability insurance as required in statute.

Section 4 Amends APPLICATION FOR REGISTRATION statute by specifying that certificate of registration may not be issued until the criteria set out in Section 3 above is met.

Section 5 Amends 28.10.111 (RENEWAL OF REGISTRATION) by adding a new section specifying that current registration may not be renewed until adequate proof of financial responsibility is shown as required in statute.

Section 6 Allows DMV to issue title to certain vehicles exempt from registration.

a) vehicles exempt under Soldier and Sailor's Civil Relief Act (current exemption)
b) special mobile equipment (new)
c) vehicles driven or parked on private property (new)
d) vehicles driven or moved on highway or vehicular way which is not connected to state highway system (new)
e) mobile homes as defined by statute (new)

Section 7 Requires proof of sufficient liability insurance on vehicles OWNED by driver before driver's license can be issued or renewed for both residents and non-residents. If driver did not OWN vehicles at time of license renewal, no proof would have to be shown. A person who owns a vehicle that is registered out of state must show proof of insurance prior to obtaining an Alaska license.

Section 8 Mandates suspension of license when advised that insurance has been cancelled and there is no response by license holder within 30 days of notice to suspend sent by department.

Section 9 Amends law to require knowledge of the effects of alcohol and drugs on driving and knowledge of laws relating to financial responsibility when taking test for driver's license.

Sections 10-13 Amends current financial responsibility law to increase liability limits to current rates as established for insurance polices under AS. 28.22.010 These are increasing limits from 25/50/10 to 100/300/50 thousand.

Section 14 adds requirement of offering underinsured motorist coverage for insurance policies written in state for both personal njury and property damage.

Section 15 adds new sections (l) and (m) to current definition of insurance policy. These are the same items as contained in the proposed definition under AS 28.22.010 (sec.17)

Section 16 Amends current law to increase amount of money or securities required as proof of insurance to a rate in line with policy requirements ... $100,000

Section 17 ADDS NEW CHAPTER 22 TO TITLE 28..Motor Vehicle Liability Insurance

This is virtually identical language to that now in statute 28.20.440.

CHANGES TO CURRENT LAW OR ADDITIONS:

28.22.010

(b) 2 A/B- increases minimum limits for insurance to be contained in policy. (These are the same limits that were amended in the previous 5 sections)

Bodily injury to or death of one person in any one accident
CURRENTLY $25,000 PROPOSED $100,000

Bodily injury to or death of two or more persons in any 1 accident
CURRENTLY $50,000 PROPOSED $300,000

Injury to or destruction of property of others in any one accident
CURRENTLY $10,000 PROPOSED $50,000

These are limits contained in most standard policies currently issued. These are also limits generally imposed by banks for insurance requirements to buy a car.

(3) Requires offering of underinsured motorist coverage in addition to uninsured coverage. Coverage will also relate to property damage. Current law only requires offering of uninsured coverage for bodily injury or death. But this may be waived in writing.

(l) Requires insurance carrier to notify DMV when a policy is cancelled within the first 180 days that a policy is in effect and within 10 days of knowledge of termination or intent to terminate. If a person whose coverage terminates fails to provide DMV with satisfactory evidence of insurance, DMV will suspend the driver's license and all registration certificates and plates issued to owner of vehivle until proof of insurance is given.

(m) Requires insurance carriers to provide the insured with a card indicating existance of satisfactory policy. This card must be carried in vehicle at all times.

28.22.020

To be considered effective, policies must be issued by insurance companies authorized to do business in state and meet financial limits imposed by statute. Allows for exception if power of attorney is executed.

28.22.500 PENALTIES

Penalties are imposed for driving or knowingly permitting to be driven a vehicle required to be insured unless the vehicle and driver are are covered by an adequate insurance policy.
This section describes penalties for violation of that law.
See attached sheet.
SEC. 28.20.510 sets out provisions relating to impoundment.

Allows for impoundment or release to person with right to possess a vehicle if a peace officer has cause to believe vehicle was driven without proper insurance. If released, the owner or person with right to possess must pay costs of impounding and storing.

Impoundment is until proof of insurance is shown if driver has not been previously convicted of similar offense or for 30-90 days if person has been previously convicted of similar violation within 10 years.

Upon impoundment, a hearing will be provided at the time of impoundment to the person with the right to possess the vehicle, the driver, other persons with an ownership interest. Following a hearing, the vehicle will be released to owner or person with right to possess if it is determined impoundment was improper or that at the time of impoundment the vehicle was being driven

by a person other than the owner or person with right to possess the vehicle AND

without the consent of the owner or person with right to possess the vehicle.

Vehicle will also be released if

the driver is not charged within 10 days of impoundment of an offense related to the impoundment OR any related charges are dropped or dismissed OR the driver is acquitted of any related offenses.

If the vehicle is not released after impoundment hearing, a lienholder may reposses the vehicle for sale and impoundment costs are to be paid by sale proceeds.

28.22.520/28.22.530 FORFEITURES

These provisions apply when forfeiture is called which happens following 3rd conviction within 10 years of driving without proper insurance.

Court will require surrender of registration and title. If not released, the department may dispose of the vehicle as governed by statutes.

Upon order to forfeit, the court will provide notification of intent to require forfeiture to all who have an ownership interest in vehicle. This will allow for any interested party to ask for remission of interest in the vehicle. Court will hold hearing if request for remission of interest is made and such interest will be remitted if

the petitioner has an interest in the vehicle acquired in good faith AND

a person other than the petitioner was convicted of the offense which resulted in forfeiture AND

before parting with the motor vehicle, the petitioner didn't know or have reasonable cause to believe it would be used in the commission of an offense.

This protects the vehicle dealer or, for example, the owner of a a car taken without permission or stolen.

If remission of interest is granted it may be either in the form of reimbursement for interest or repossession of the vehicle and title.

28.22.540 UNUSED MOTOR VEHICLES

This provision allows a person to terminate or suspend insurance policy without penalty by removing plates from vehicle and delivering them to DMV. When vehicle is to be used, driver must present proof of insurance to DMV and plates will be returned.

Official Business

LABOR AND COMMERCE SUBSTITUTE HB 7

Changes from SSHB 7

The changes made by the Labor and Commerce Committee changed language and sections 18 and 19 to require insurance companies to offer uninsured and underinsured coverage for both property damage and personal injury. This coverage may be waived upon signature of the insured. This coverage must be available in at least equal amounts to the coverage bought voluntarily under the regular liability coverage.

The language was changed both in Title 21 and the proposed reqrite of Title 28 as this bill proposes.

No other amendments were offered in committee.

Alaska State Troopers

CSSSHB 7 (L&C)

Motor Vehicle Liability Insurance

Passage of this bill will require a statewide enforcement effort to ensure compliance. If a vehicle is stopped and proves not to have current insurance it will need to be impounded. This will require numerous Troopers all over the State to spend patrol time enforcing provisions of this particular law. The bulk of the activity will take place in the Anchorage area, Fairbanks, and Juneau. One additional Trooper is requested for each of these locations to absorb the increased work load.

FY '85

	Three Troopers	Academy(2)	Totals
Personal Svc.	201,684		201,684
Travel	6,360		6,360
Contractual	55,866	9,540	65,406
Commodities	10,494	636	11,130
Equipment(1)	64,554		64,554
	338,958	10,176	349,134

(1) Equipment costs are incurred during the first year only.

(2) The Public Safety Academy is budgeted only for costs of training replacement Troopers based on normal turnover of personnel. Any new Troopers required due to new legislation need additional funding.

Note: Inflation after FY'85 is estimated at 6% per year. FY'85 is based upon FY'84 costs inflated by 6%.

FY 84

Driver/Vehicle Services

The basic assumption of this fiscal note is that for this bill to be effective there must be an adequate system of enforcement and compliance. Other states with mandatory insurance laws estimate that 5%-15% of their vehicles are operating without insurance as owners find ways to circumvent the law. We find that our present Financial Responsibility Law, AS 28.20, is practically as effective and far less costly both to the state bureaucracy and to the citizens directly.

For this bill to be effective the division of Motor Vehicles must create a compliance unit of 9 employees. The compliance unit must be located with Division headquarters since there must be ready reference to the existing ownership and registration record. The present headquarters location will not accomodate any expansion, therefore, the fiscal note provides for relocation and lease of new space for the Division of Motor Vehicles headquarters in FY-85.

A further breakdown by object code is attached. The reason for such a large figure in the 310 catagory is because of statutory requirement that all suspension notices must be sent by registered or certified mail, return receipt requested. If action is taken on 30,000 uninsured vehicles, at $1.55 postage per notice, that cost alone is $46,500.

ANALYSIS (continued):

The FY-85 costs for the compliance unit are as follows:

100 Personal Services	
1 - Insurance Compliance Unit Supervisor (Range 18, new classification)	52.7
2 - Hearing Officers (Range 16, new classification)	90.1
1 - Clerk V	33.2
4 - Clerk IV	119.6
1 - Microfilm Equipment Operator	31.4
TOTAL	327.0
200 Travel	
Hearing Officers to travel to various cities to conduct suspension hearings	26.5
300 Contractual	
310 - phones, tolls, postage	54.6
320 - forms, advertising, public notice	15.9
330 - headquarter's space lease (6,000 sq. ft.)	171.7
360 - equipment rental (4 AJIS terminals)	31.8
382a - DP Chargeback programming and maintenance	84.8
TOTAL	358.8

ANALYSIS (continued):

400 Commodities

Normal office supplies	26.5

500 Equipment

Office Equipment (9 employees)	27.0
Word Processing Station (Wang)	20.0
Microfilm Camera and Printer	40.0
TOTAL	87.0

Inflation for subsequent years is figured at the 6% level.

FOR O&M USE ONLY
4A KEY NUMBER __ __ - __ __ - __ __ - __ __ - __ __

JUSTIFICATION

The state is required to suspend vehicle registrations and operator's licenses of those found to be operating a motor vehicle without liability insurance. The clerical functions associated with this are highly specialized in that the Clerk IV must be able to do detailed research in both motor vehicle and drivers records, must be familiar with different type of insurance policies, and must have a working knowledge of all motor vehicle laws.

Accuracy is essential in this work since the consequences of the unit's actions on individual citizens is great. The loss of vehicle and driving privileges is a harsh step and the possibility of error must be eliminated to avoid working hardships on innocent parties. To assist in record tracking and handling similar form correspondence, a Wang word processing unit will be used by the section.

Based on other states' experience, approximately 10% or 30,000 vehicle owners will try to circumvent or violate this law. The volume of records and correspondence with 30,000 cases annually will require a unit of 4 Clerk IVs.

Computation on this form is at FY 84 costs.

JUSTIFICATION

The mandatory insurance bill requires the state to suspend vehicle registrations, plates, and operator's licenses for those people who operate a vehicle without the required liability insurance. Prior to taking any action of this type, the department must provide the person an opportunity for an administrative hearing (AS 28.05.131).

Using estimates based on other states' experience with mandatory insurance, there will only be a 90% compliance level. This means action will be taken on the remaining 10% or 30,000 uninsured vehicles. The hearing officer must travel to all areas of the state to administer the hearings. With this volume there will be two hearing officers required.

Due to the limited scope of the hearing items, it is not necessary to have an attorney in this position.

Computation on this form is at FY 84 costs.

JUSTIFICATION

As a result of this bill, each vehicle operator must present some form of proof of insurance at the time of registration. This form is kept with the vehicle records which are microfilmed. Also the records of registration, suspensions, and all associated documents are microfilmed and kept with vehicle records. These forms and documents will represent a 20% increase in the documents presently maintained by the Vehicle Service Unit.

To accomodate this increased workload, a Microfilm Equipment Operator I is necessary to augment the present staff. Equipment associated with this position includes a microfilm camera and a reader-printer work station.

The microfilm retrieval system currently being used has proved cost effective in terms of labor savings and rapid response to filing needs. The high initial cost of equipment is soon offset by savings in labor and file storage costs.

Computation on this form is at FY 84 costs.

JUSTIFICATION

The mandatory insurance laws require that the state take action against those who do not have liability insurance or those who cancel policies after registration. Administration of this program is the responsibility of the Insurance Compliance Unit. The Supervisor of this unit will act under the general direction of the Chief of Vehicle Services and will be responsible for the supervision of seven employees.

This position carries considerable authority in that this unit has the responsibility of suspending both vehicle registration and operator's licenses of violators. This will require close coordination with the insurance industry, the court system, and law enforcement agencies to ensure that appropriate and timely action is taken and that complete due process is given to the citizen.

The intent of the law is to have 100% compliance, however based on other states' experience, usually only 90% compliance is achieved. This will require some action be taken on 30,000 uninsured vehicles and their owners.

Computation on this form is at FY84 costs.

3/8/8

The basic assumption of this fiscal note is that for this bill to be effective there must be an adequate system of enforcement and compliance. Other states with mandatory insurance laws estimate that 5%-15% of their vehicles are operating without insurance as owners find ways to circumvent the law. We find that our present Financial Responsibility Law, AS 28.20, is practically as effective and far less costly both to the state bureaucracy and to the citizens directly.

This fiscal note assumes an effective date of July 1, 1983. A 6% inflation factor has been applied to FY 85 and beyond.

Fiscal Note Detail - Alaska State Troopers

SS House Bill No. 7

Motor Vehicle Liability Insurance

Passage of this bill will require a statewide enforcement effort to ensure compliance. If a vehicle is stopped and proves not to have current insurance it will need to be impounded. This will require numerous Troopers all over the State to spend patrol time enforcing provisions of this particular law. The bulk of the activity will take place in the Anchorage area, Fairbanks and Juneau. One additional Trooper is requested for each of these locations to absorb the increased work load.

FY '84

	Three Troopers	Academy (2)	Totals
Per. Ser.	190,268		190,268
Travel	6,000		6,000
Contractual	52,704	9,000	61,704
Commodities	9,900	600	10,500
Equip. (1)	60,900		60,900
	319,772	9,600	329,372

(1) Equipment costs are incurred during the first year only.

(2) The Public Safety Academy is budgeted only for costs of training replacement Troopers based on normal turnover of personnel. Any new Troopers required due to new legislation need additional funding.

Note: Inflation after FY '84 is estimated at 6% per year. A Form 13 for each position is attached.

300 Contractual	398.5	422.4	447.7
400 Commodities	25.0	26.5	28.1
500 Equipment	87.0	-0-	-0-
TOTAL	843.7	802.1	850.2

For this bill to be effective the Division of Motor Vehicles must create a compliance unit of 9 employees. The compliance unit must be located with Division headquarters since there must be ready reference to the existing ownership and registration record. The present headquarters location will not accomodate any expansion, therefore, the fiscal note provides for relocation and lease of new space for the Division of Motor Vehicles headquarters in FY-84.

A further breakdown by object code is attached. The reason for such a large figure in the 310 catagory is because of statutory requirement that all suspension notices must be sent by registered or certified mail, return receipt requested. If action is taken on 30,000 uninsured vehicles, at $1.55 postage per notice, that cost alone is $46,500.

4A KEY NUMBER ___ - ___ - ___ - ___ - ___

JUSTIFICATION

The state is required to suspend vehicle registrations and operator's licenses of those found to be operating a motor vehicle without liability insurance. The clerical functions associated with this are highly specialized in that the Clerk IV must be able to do detailed research in both motor vehicle and drivers records, must be familiar with different types of insurance policies, and must have a working knowledge of all motor vehicle laws.

Accuracy is essential in this work since the consequences of the unit's actions on individual citizens is great. The loss of vehicle and driving privileges is a harsh step and the possibility of error must be eliminated to avoid working hardships on innocent parties. To assist in record tracking and handling similar form correspondence, a Wang word processing unit will be used by the section.

Based on other states' experience, approximately 10% or 30,000 vehicle owners will try to circumvent or violate this law. The volume of records and correspondence with 30,000 cases annually will require a unit of 4 Clerk IVs.

JUSTIFICATION

Under the general supervision of the Insurance Compliance Unit Supervisor, this position will supervise the clerical section of this unit. The unit will perform checks on those suspected of being in violation of the insurance laws. The consequences of the actions of this section in suspending vehicle registrations and operator's licenses and complexity of the due process system require a high level of supervision and expertise.

The section supervisor must have a thorough knowledge of motor vehicle laws and forms and vehicle insurance practices and policies. This section will also schedule administrative hearings and the supervisor must coordinate these with the hearing officer's travel plans.

This position will be responsible for the final actions of the unit, and accuracy and good judgement are essential to ensure correct compliance with the insuracne laws and to avoid hardships for innocent vehicle operators.

JUSTIFICATION

The mandatory insurance bill requires the state to suspend vehicle registrations, plates, and operator's licenses for those people who operate a vehicle without the required liability insurance. Prior to taking any action of this type, the department must provide the person an opportunity for an administrative hearing (AS 28.05.131).

Using estimates based on other states' experience with mandatory insurance, there will only be a 90% compliance level. This means action will be taken on the remaining 10% or 30,000 uninsured vehicles. The hearing officer must travel to all areas of the state to administer the hearings. With this volume there will be two hearing officers required.

Due to the limited scope of the hearing items, it is not necessary to have an attorney in this position.

4A KEY NUMBER — — - — — - — — - — — - — —

JUSTIFICATION

The mandatory insurance laws require that the state take action against those who do not have liability insurance or those who cancel policies after registration. Administration of this program is the responsibility of the Insurance Compliance Unit. The Supervisor of this unit will act under the general direction of the Chief of Vehicle Services and will be responsible for the supervision of seven employees.

This position carries considerable authority in that this unit has the responsibility of suspending both vehicle registration and operator's licenses of violators. This will require close coordination with the insurance industry, the court system, and law enforcement agencies to ensure that appropriate and timely action is taken and that complete due process is given to the citizen.

The intent of the law is to have 100% compliance, however based on other states' experience, usually only 90% compliance is achieved. This will require some action be taken on 30,000 uninsured vehicles and their owners.

JUSTIFICATION

As a result of this bill, each vehicle operator must present some form of proof of insurance at the time of registration. This form is kept with the vehicle records which are microfilmed. Also the records of registration, suspensions, and all associated documents are microfilmed and kept with vehicle records. These forms and documents will represent a 20% increase in the documents presently maintained by the Vehicle Services Unit.

To accomodate this increased workload, a Microfilm Equipment Operator I is necessary to augment the present staff. Equipment associated with this position includes a microfilm camera and a reader-printer work station.

The microfilm retrieval system currently being used has proved cost effective in terms of labor savings and rapid response to filing needs. The high initial cost of equipment is soon offset by savings in labor and file storage costs.

Ms. Diana E. Long
P. O. Box No. 2781
Palmer, AK 99645

Dear Ms. Long:

Thank you for your letter of May 3, 1983, expressing your concerns regarding mandatory automobile liability insurance.

House Bill 7 was introduced by Representatives Hayes, Barnes, Phillips, Furnace, Lindauer, Abood, Uehling, Liska, Cowdery, Szymanski, Fritz and Pestinger. This act would require evidence of motor vehicle liability insurance to be furnished to the Department of Public Safety when registering or renewing registration on a vehicle.

The Judiciary Committee began hearing HB 7 Monday, May 2, 1983, and passed it from Committee on Friday, May 6, 1983 - a near record for a piece of legislation such as this is.

Representative Adams is Chairman of the Finance Committee; this Committee will now be hearing HB 7.

Again, I appreciate your taking the time to write and become a part of the legislative process.

Very truly yours,

Evelyn J. Doane

Representative Charlie Bussell
Chairman, Committee on Judiciary

CB:lyn

P.O. Box 2781
Palmer, AK 99645

May 3, 1983

The Honorable Charlie Bussell
Pouch V Mail Stop 3100
Juneau, AK 99811

Dear Representative Bussell:

I would like to urge positive action regarding mandatory automobile liability insurance, a plan now being reviewed by the House Judiciary Committee. I feel Alaska has reached the time where mandatory automobile liability insurance is a necessity.

An article in the Anchorage Times on May 3, 1983 stated, "Officials estimate that from 10% and 40% of all cars in Alaska are uninsured." Because I am employed by the State in the Division of Motor Vehicles I am probably aware of the need for mandatory insurance more so than most. I am constantly amazed at the vast numbers of people who do not have automobile liability insurance and my own guess is that 40% is a much closer estimate than 10%.

Last week two very dear friends of mine were seriously injured in an accident. The other party involved was not injured and did not have insurance. He was found at fault for the accident. As a result of this accident the father of a family of five is in the hospital with a broken neck and will not be able to work and support his family for several months. Luckily, his vehicle was fully covered by insurance. I can't help think how serious it could have been if he did not have insurance.

I also feel that a method whereby people must prove insurance coverage prior to registering their vehicle would be feasible. I have been told it works successfully in other states.

Again, I would like to urge positive action toward this matter. The opinions stated in this letter are my personal opinions only and not that of a State employee with the Division of Motor Vehicles.

Sincerely,

D E Long

March 16, 1983

Representative Charlie Bussell
Chairman, House Judiciary Committee
State Capitol
Pouch 5
Juneau, AK 99811

RE: House Bill 8 and Senate Bill 84

Dear Representative Bussell:

The Alaska Judicial Council wishes to go on record in opposition to House Bill 8 and Senate Bill 84, both of which are currently under consideration by the Alaska State Legislature. Both bills would alter the number and size of election districts for judicial retention purposes and, thereby, the roles and responsibilities of the Judicial Council.

At the Council's meeting in Anchorage on February 15-16, 1983, Council members specified the following statutory, administrative and constitutional bases for its objections to the legislation:

Statutory Reasons:

-The difficulty of the Judicial Council determining, on the basis of vague language ("routinely and frequently"), whether a judge should be subject to election in districts other than the one in which he/she resides;

-The possible conflict created by requiring the Council to determine where a judge must run, while at the same time evaluating the judge for retention purposes.

Administrative Reasons

-The possibility that some voters, while within the jurisdiction of one Judicial District, would actually vote for retention purposes for the judge of another Judicial District;

-The confusion occasioned by using different election districts for retention elections than are used for general elections.

Constitutional Reasons

-The possibility that voters in whose election districts no Superior and/or District Court exists may be disenfranchised, either because the election district does not include a court, or because the district is served by one or more judges, none of whom hear matters "routinely or frequently" in such districts.

Should you or any member of your Committee wish to discuss the Council's position with regard to this legislation in further detail, please let me know. I would be pleased to appear before the committee to testify in opposition to this legislation at such time and place as may be convenient.

Thank you for the opportunity to present the Council's position on this matter.

Sincerely,

Francis L. Bremson
Executive Director

SUBJECT: Judicial retention elections -- HB 624

TO: Representative Ramona L. Barnes
Chairman, House Judiciary Committee

FROM: Richard A. Bradley
Legislative Counsel

You have asked that I explain the provision of HB 624 that ties judicial retention election districts to the legislative election districts as they existed in 1959. Sec. 22.18.050(b) (as enacted in Sec. 1 of HB 624) provides:

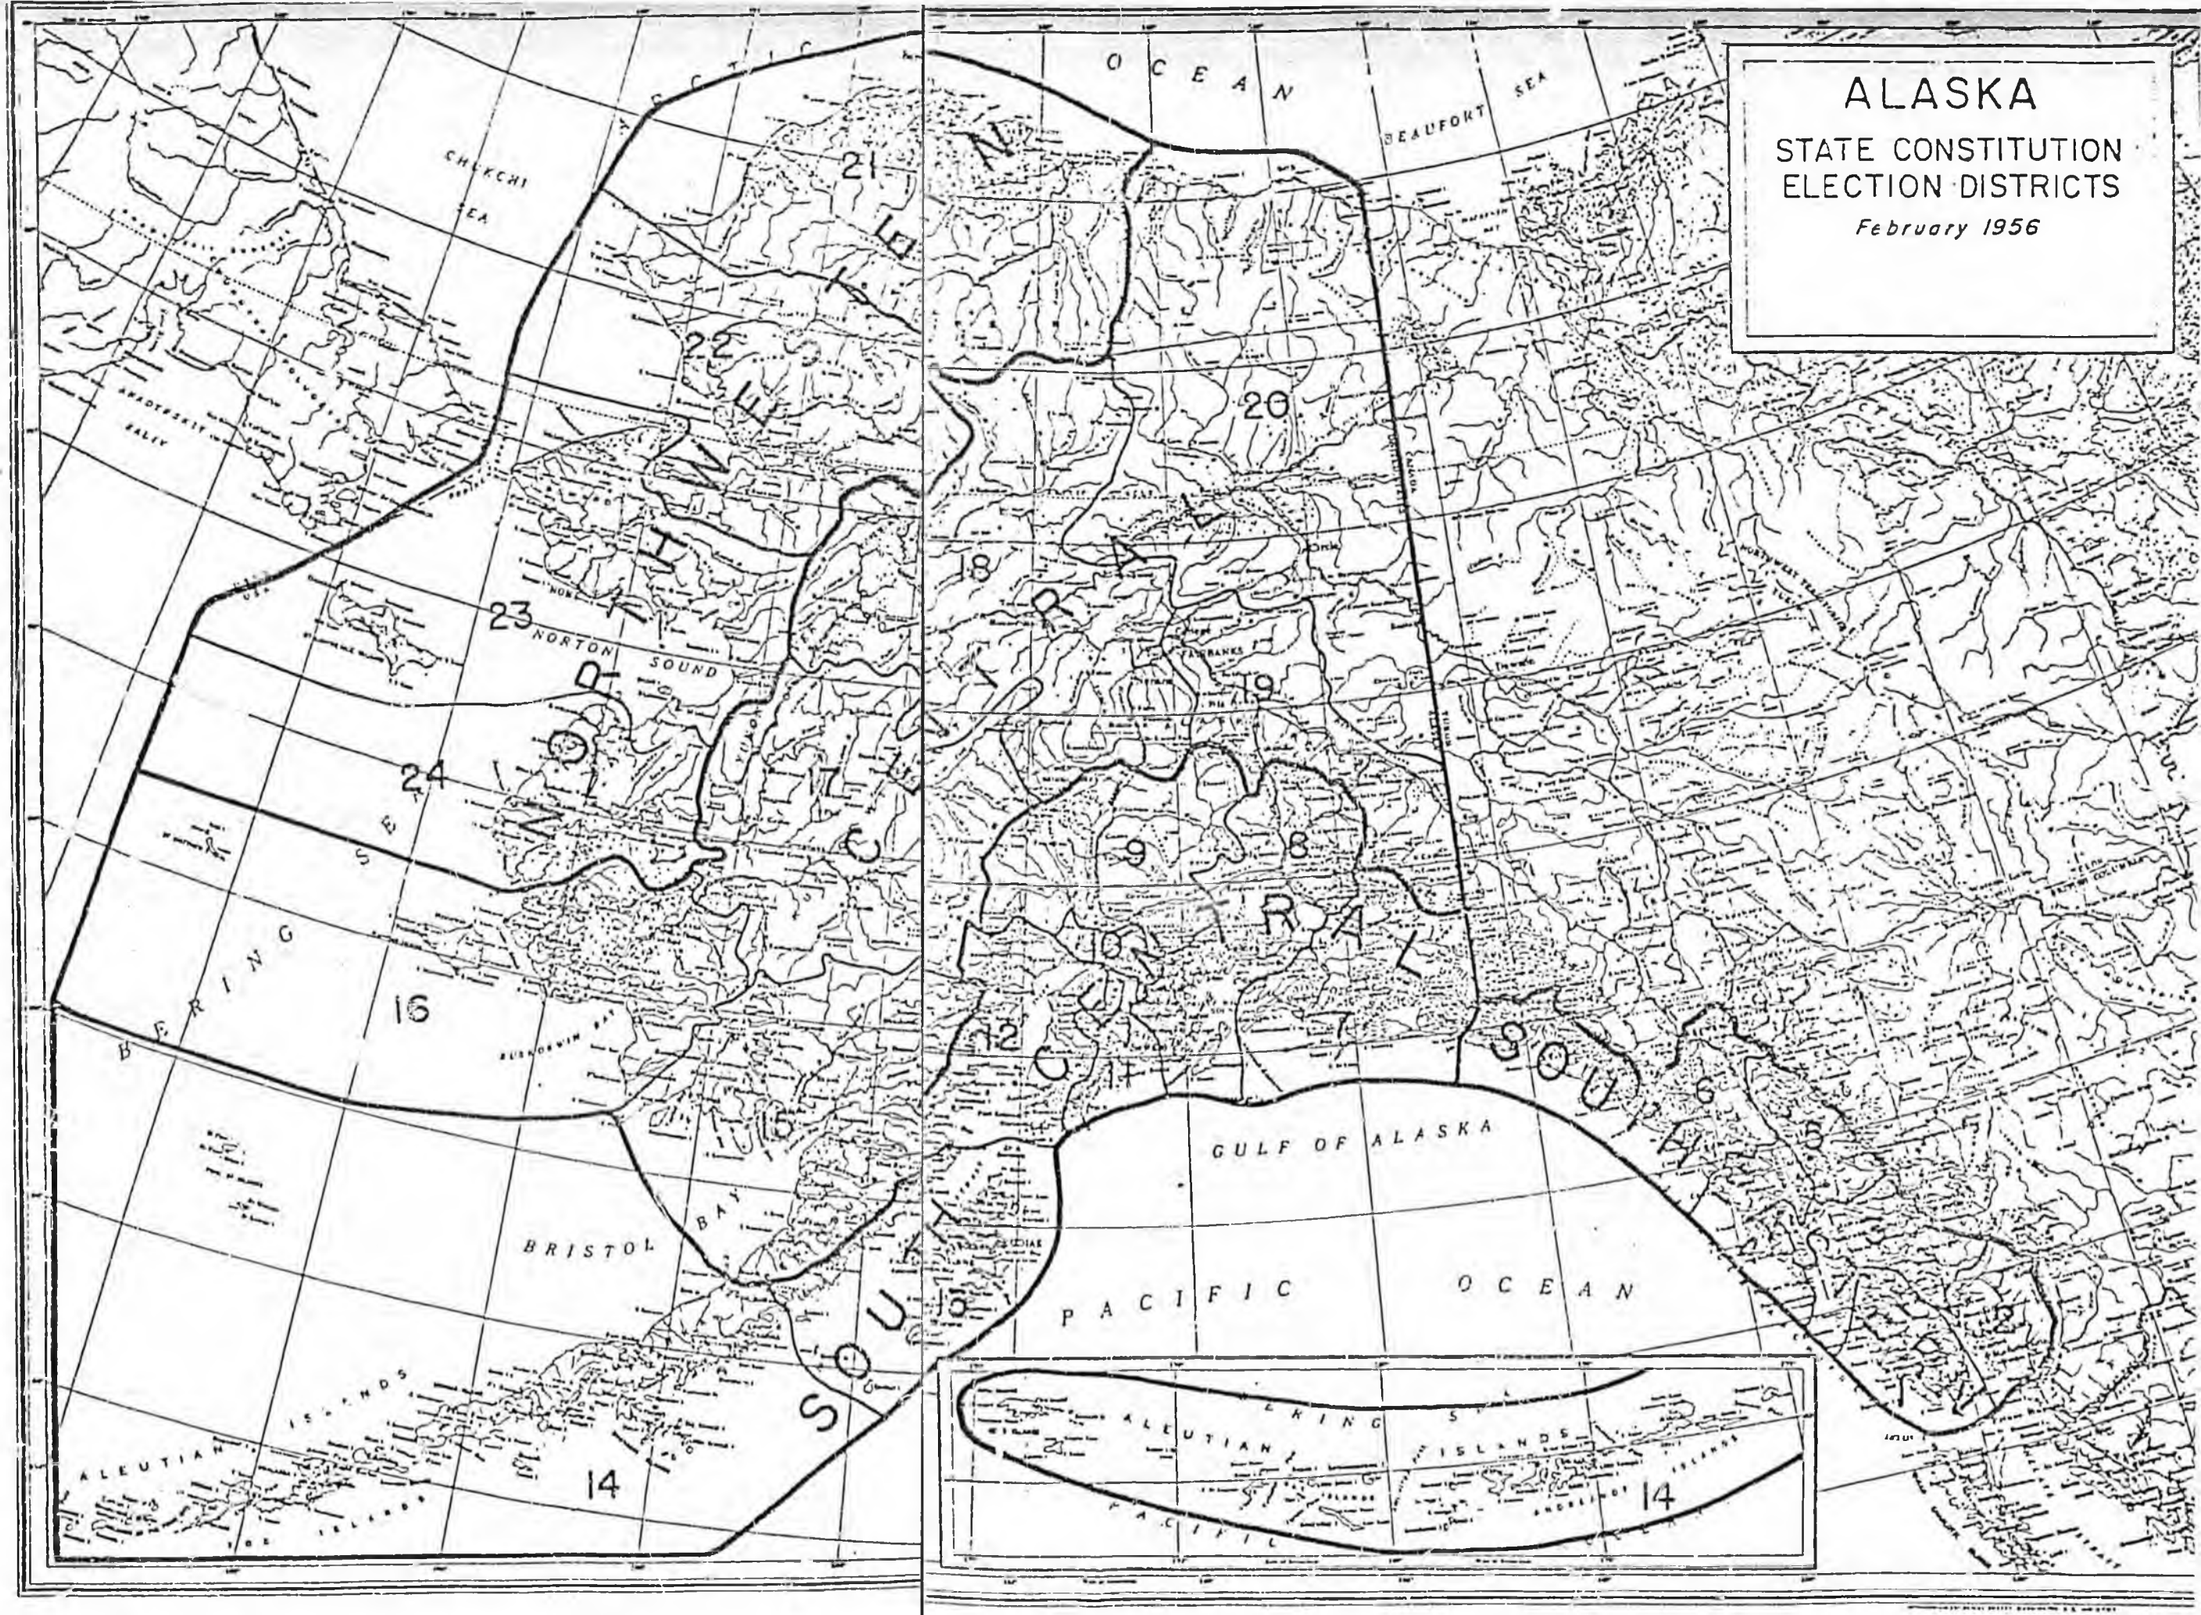
> (b) For purposes of the section, the judicial retention election districts of the state are the election districts as they are described in art. XIV of the state constitution as it existed on March 19, 1959.

March 19, 1959 has no particular significance in itself; it is merely the effective date of Chapter 50, SLA 1959, the Act that established the Alaska court system and became the basis for AS 22.

The source of the date is AS 22.10.010, the section providing for the "establishment of the superior court" and establishing the borders of the four judicial districts of the superior court. The language of the section establishes each judicial district with reference to identified election districts, "as said districts are described in art. XIV of the state constitution on March 19, 1959".

Ever since the Alaska court system was established, the jurisdiction of the superior court has been tied to the 1959 election district borders. While the districts for the election of members of the legislature have varied since then, no alteration of the borders of the four judicial districts has occurred.

I have no idea whether the judicial districts are obsolete in their borders or would benefit from revision. I am aware that there was some interest in that question several years ago but I believe the difficulties that caused the proposals may have been resolved otherwise. But I suggest that this bill should not seek to establish retention districts for judges in terms of the recent reapportionment, for example, without simultaneously altering the judicial districts of the superior court. Since the judicial districts establish lines in which cases may be brought and heard by particular judges, they should also establish the districts in which the judges seek retention.



If I may assist further, please advise. If you wish me to attend your hearing tomorrow, give me a call and I will come over.

RAB:ljb

ALASKA

STATE CONSTITUTION ELECTION DISTRICTS

February 1956

given the opportunity to express their will in response to a ballot that is drawn in conformity with the intent of the framers of the Constitution of Alaska. Boucher v. Bomhoff, Sup. Ct. Op. No. 775 (File No. 1487), 495 P.2d 77 (1972).

Section 4. Powers. Constitutional conventions shall have plenary power to amend or revise the constitution, subject only to ratification by the people. No call for a constitutional convention shall limit these powers of the convention.

The United States Congress has no power to amend a state's constitution. State v. Lewis, Sup. Ct. Op. No. 1364 (File No. 3039), 559 P.2d 630, cert. denied, 432 U.S. 901, 97 S. Ct. 2943, 53 L. Ed. 2d 1073 (1977).

The constitution of the State of Alaska provides only two means for its amendment. Alaska Const., art. XIII, § 1 authorizes such amendments by a two-thirds vote of each house of the legislature thereafter approved by a majority vote at the next statewide election. This section provides for amendments by a constitutional convention subject to ratification by the people. State v. Lewis, Sup. Ct. Op. No. 1364 (File No. 3039), 559 P.2d 630, cert. denied, 432 U.S. 901, 97 S. Ct. 2943, 53 L. Ed. 2d 1073 (1977).

The Alaska Constitution may not be amended by popular vote alone, without prior action by either the legislature or a constitutional convention. State v. Lewis, Sup. Ct. Op. No. 1364 (File No. 3039), 559 P.2d 630, cert. denied, 432 U.S. 901, 97 S. Ct. 2943, 53 L. Ed. 2d 1073 (1977).

Adoption of provision in Statehood Act did not amend constitution. — Although included in Alaska Statehood Act, § 8(b), 48 U.S.C. Prec. § 21, was the provision that in the event that three propositions to be submitted to the voters were adopted by a majority vote, "the proposed constitution of the proposed State of Alaska ... shall be deemed amended accordingly," and although the propositions were adopted, the Alaska Constitution was not thereby amended to include "the terms or conditions of the grants of land" set forth in Alaska Statehood Act, § 6(i) since there was no state legislature in existence at the time of passage of the Statehood Act, the territorial legislature never approved an amendment incorporating the restrictions of Alaska Statehood Act, § 6(i), which relates to mineral land grants, into the Alaska Constitution, and no constitutional convention was called to act on the matter. State v. Lewis, Sup. Ct. Op. No. 1364 (File No. 3039), 559 P.2d 630, cert. denied, 432 U.S. 901, 97 S. Ct. 2943, 53 L. Ed. 2d 1073 (1977).

Article XIV

Apportionment Schedule

Cross reference. — As to legislative apportionment, see Alaska Const., art. VI.

Section 1. Election Districts. Members of the house of representatives shall, until reapportionment, be elected from the election districts and in the numbers shown below:

Number of District	*Name of District*	*Number of Representatives*
1	Prince of Wales	1
2	Ketchikan	2

Number of District	*Name of District*	*Number of Representatives*
3	Wrangell-Petersburg	1
4	Sitka	2
5	Juneau	2
6	Lynn Canal-Icy Straits	1
7	Cordova-McCarthy	1
8	Valdez-Chitina-Whittier	1
9	Palmer-Wasilla-Talkeetna	1
10	Anchorage	8
11	Seward	1
12	Kenai-Cook Inlet	1
13	Kodiak	2
14	Aleutian Islands	1
15	Bristol Bay	1
16	Bethel	1
17	Kuskokwim	1
18	Yukon-Koyukuk	1
19	Fairbanks	5
20	Upper Yukon	1
21	Barrow	1
22	Kobuk	1
23	Nome	2
24	Wade Hampton	1

Reapportionment and redistricting. — The reapportionment proclamation of the governor, dated June 14, 1974, as modified by the Alaska supreme court in Groh v. Egan, Sup. Ct. Op. Nos. 1081a, 1081b (File No. 2235), 526 P.2d 863 (1974), provides that the election districts are to have the following numbers, names, and assignments of seats in the house of representatives:

Election District	Name of District	Number of Representatives
1	Ketchikan-Prince of Wales	2
2	Wrangell-Petersburg	1
3	Sitka	1
4	Juneau-Lynn Canal	2
5	Cordova-Valdez-Seward	1
6	Palmer	1
7	Anchorage Northwest	4
8	Anchorage Northeast	4
9	Anchorage Spenard	2

MEMORANDUM

TO: Representative Ben Grussendorf

FROM: Leslie Longenbaugh
Research Staff

RE: Retention Election of Judges
Research Request Number 81-141

You asked that we provide information on options for changing the system of retention by election for district and superior court judges in this state. You would like to find a way of reconciling the differences between the population most likely to be served by the judge and the population which is given the opportunity to vote on the judge's retention.

The "modified Tennessee plan," where judges are appointed and then subject to approval or rejection by the voters, is incorporated in the Alaska Constitution; however, that Constitution does vest the Legislature with the power to establish the manner in which judges are approved or rejected (see Article IV, Section 6, of the Alaska Constitution, which is Attachment C to this memorandum).

PRESENT SITUATION

One question raised by this inquiry is whether the group which is served by a judge includes few, many, or most of those who may vote for his or her retention. For the most part, the disparity between these two groups is significant. For example, a judge whose court is in Sitka will seldom hear cases from Juneau, Ketchikan, and Wrangell, and yet will be subject to approval or rejection by voters in those communities. Some proponents of change argue that a judge who is unpopular among the population he or she serves is nonetheless likely to be retained by a voting population that includes a majority who are uninformed about the judge's performance.

This difference between those served and those who may vote on a judge's retention is also perceived as a problem by some staff within the court system. The Honorable Duane Craske, Superior Court Judge in Sitka, for example, told us that he would welcome a reform in this area, seeing it

as a way of furthering communication between a judge and those he or she serves. Nick Maroules, Attorney for the Judicial Council,[1] also has said that he thinks some change in this direction is a good idea, particularly for Southeast.

For the purposes of court administration, Alaska is divided into four judicial districts (see Attachment A). The First Judicial District encompasses all of Southeast Alaska, the Second includes the far northwestern region of the state, the Third comprises Southcentral Alaska and the Aleutian Islands, and the Fourth cuts a diagonal swathe across the center of the state, including Fairbanks and Bethel. In the First Judicial District, superior and/or district court judges sit in four municipalities: Juneau, Ketchikan, Sitka and Wrangell. In the Second, judges sit in Kotzebue and Nome; the Third Judicial District contains five communities where judges sit: Anchorage, Homer, Kenai, Kodiak and Valdez. The Fourth has judges in Bethel and Fairbanks. The size of the four districts is thought by some to reduce the chances that a voter will be well-informed about the performance and popularity of a judge from another part of the judicial district.

Once appointed by the Governor, an Alaskan district or superior court judge is likely to spend most of his or her tenure in the municipality where he or she was originally assigned. This position contradicts the popular view that judges quite frequently move from one town to another. There are three occasions when a district or superior court judge will be temporarily replaced by a judge from another part of his or her judicial district: 1) illness; 2) vacation; and 3) preemption, or disqualification.

The third case mentioned above, that of disqualification, is the most common reason for temporary reassignment. Alaska law allows participants in civil cases and defendants in criminal prosecutions to request that their cases be tried before a judge other than the one assigned. The petitioner need not provide any reason for the request for disqualification. In addition, it sometimes happens that a judge feels himself or herself to be unable to participate fairly in a proceeding; in these cases, the judge files a disqualification from the case.

Once a change of judge has been granted, the Presiding Judge of the judicial district must choose a judge of the same authority as the disqualified judge, i.e., district or superior, to go to the other court to hear the case. This reassignment is sometimes a problem, particularly in judicial districts with only a few courts. For example,

---

[1]Nick Maroules, Attorney/Legal Analyst, Alaska Judicial Council, 420 "L" Street, Suite 502, Anchorage, 99501; telephone: 279-2526.

Because none of the four towns in the First Judicial District which have courts presently contains more than one superior court judge, judges who are reassigned within this district must nearly always travel some distance. During 1980, 2% of the cases heard in the First Judicial District were reassigned because of the disqualification of the original judge.[2]

In terms of the number of judges and the size of the population served, the Third Judicial District is the largest in the State. Anchorage, which is located within the Third District, has ten Superior Court judges and seven District Court judges. When a judge is disqualified from a case in the Anchorage area, another judge usually can be found in Anchorage to replace him or her on the case. Judges in Valdez, Kenai, Homer, and Kodiak, however, are also likely to be replaced by Anchorage judges. For this reason, it would seem that voters in the Third Judicial District would be more likely than voters in the First to know the judges from throughout their district.

The two remaining judicial districts, the Second and the Fourth, present situations similar to that in the First, although on a different scale. Each of these districts contains two municipalities with courts, and in each the two municipalities are separated by hundreds of miles.

OPTIONS

In your request to this Agency, you mentioned two alternatives for resolving the perceived disparity between those eligible to vote for a judge's retention and those who are served by that judge. These options are: 1) to have the voters within each election district vote on the retention of the judges in their election district; and 2) to have the voters in each community vote on the retention of judges serving in their community. For reasons discussed below, we offer a third option for your consideration: to break the present judicial districts down into smaller election units which would correspond more closely to the areas actually served by the judges within them.

---

[2]We computed this figure ourselves by counting the number of disqualifications in Judge Stewart's 1980 files, and using the figure for the total number of cases other than traffic violations given to us by Merle Martin, the Manager of Technical Operations for the Court System (telephone: 264-0544). This figure is not presently available for the other three judicial districts, but presumably could be computed in the same fashion.

The first option, to have judges retained only by the voters in their election districts, would present difficulties because of the impracticability of matching election district boundaries with the present areas served by judges (compare Attachments A and B). In order to institute this change, the area served by each judge would have to be redefined to conform to the election district.

The second option you suggested, to have only those voters in the community where a judge sits vote on his or her retention, also would be difficult to institute. If only the community where the judge sits is included in this plan, the surrounding smaller communities whose inhabitants are routinely subject to the judge's orders will be disenfranchised. For example, the judge in Sitka who hears cases from Angoon would not be voted upon by the inhabitants of Angoon, or of any of the small communities whose cases he or she hears.

We have worked out a third option, which is a combination of the two you suggested and the present practice: having the Division of Elections break up the present judicial districts, precinct by precinct, into smaller election units. This would be similar to the Division's present practice, which is to divide the election districts every ten years, precinct by precinct, in order to match the ballots to the judicial districts involved.

According to Patty Ann Polley, Director of the Division of Elections,[3] her office hopes to divide up the reapportioned election districts in time for the 1982 retention elections. Ms. Polley reports that making divisions smaller than the four judicial districts would not present any real difficulty.

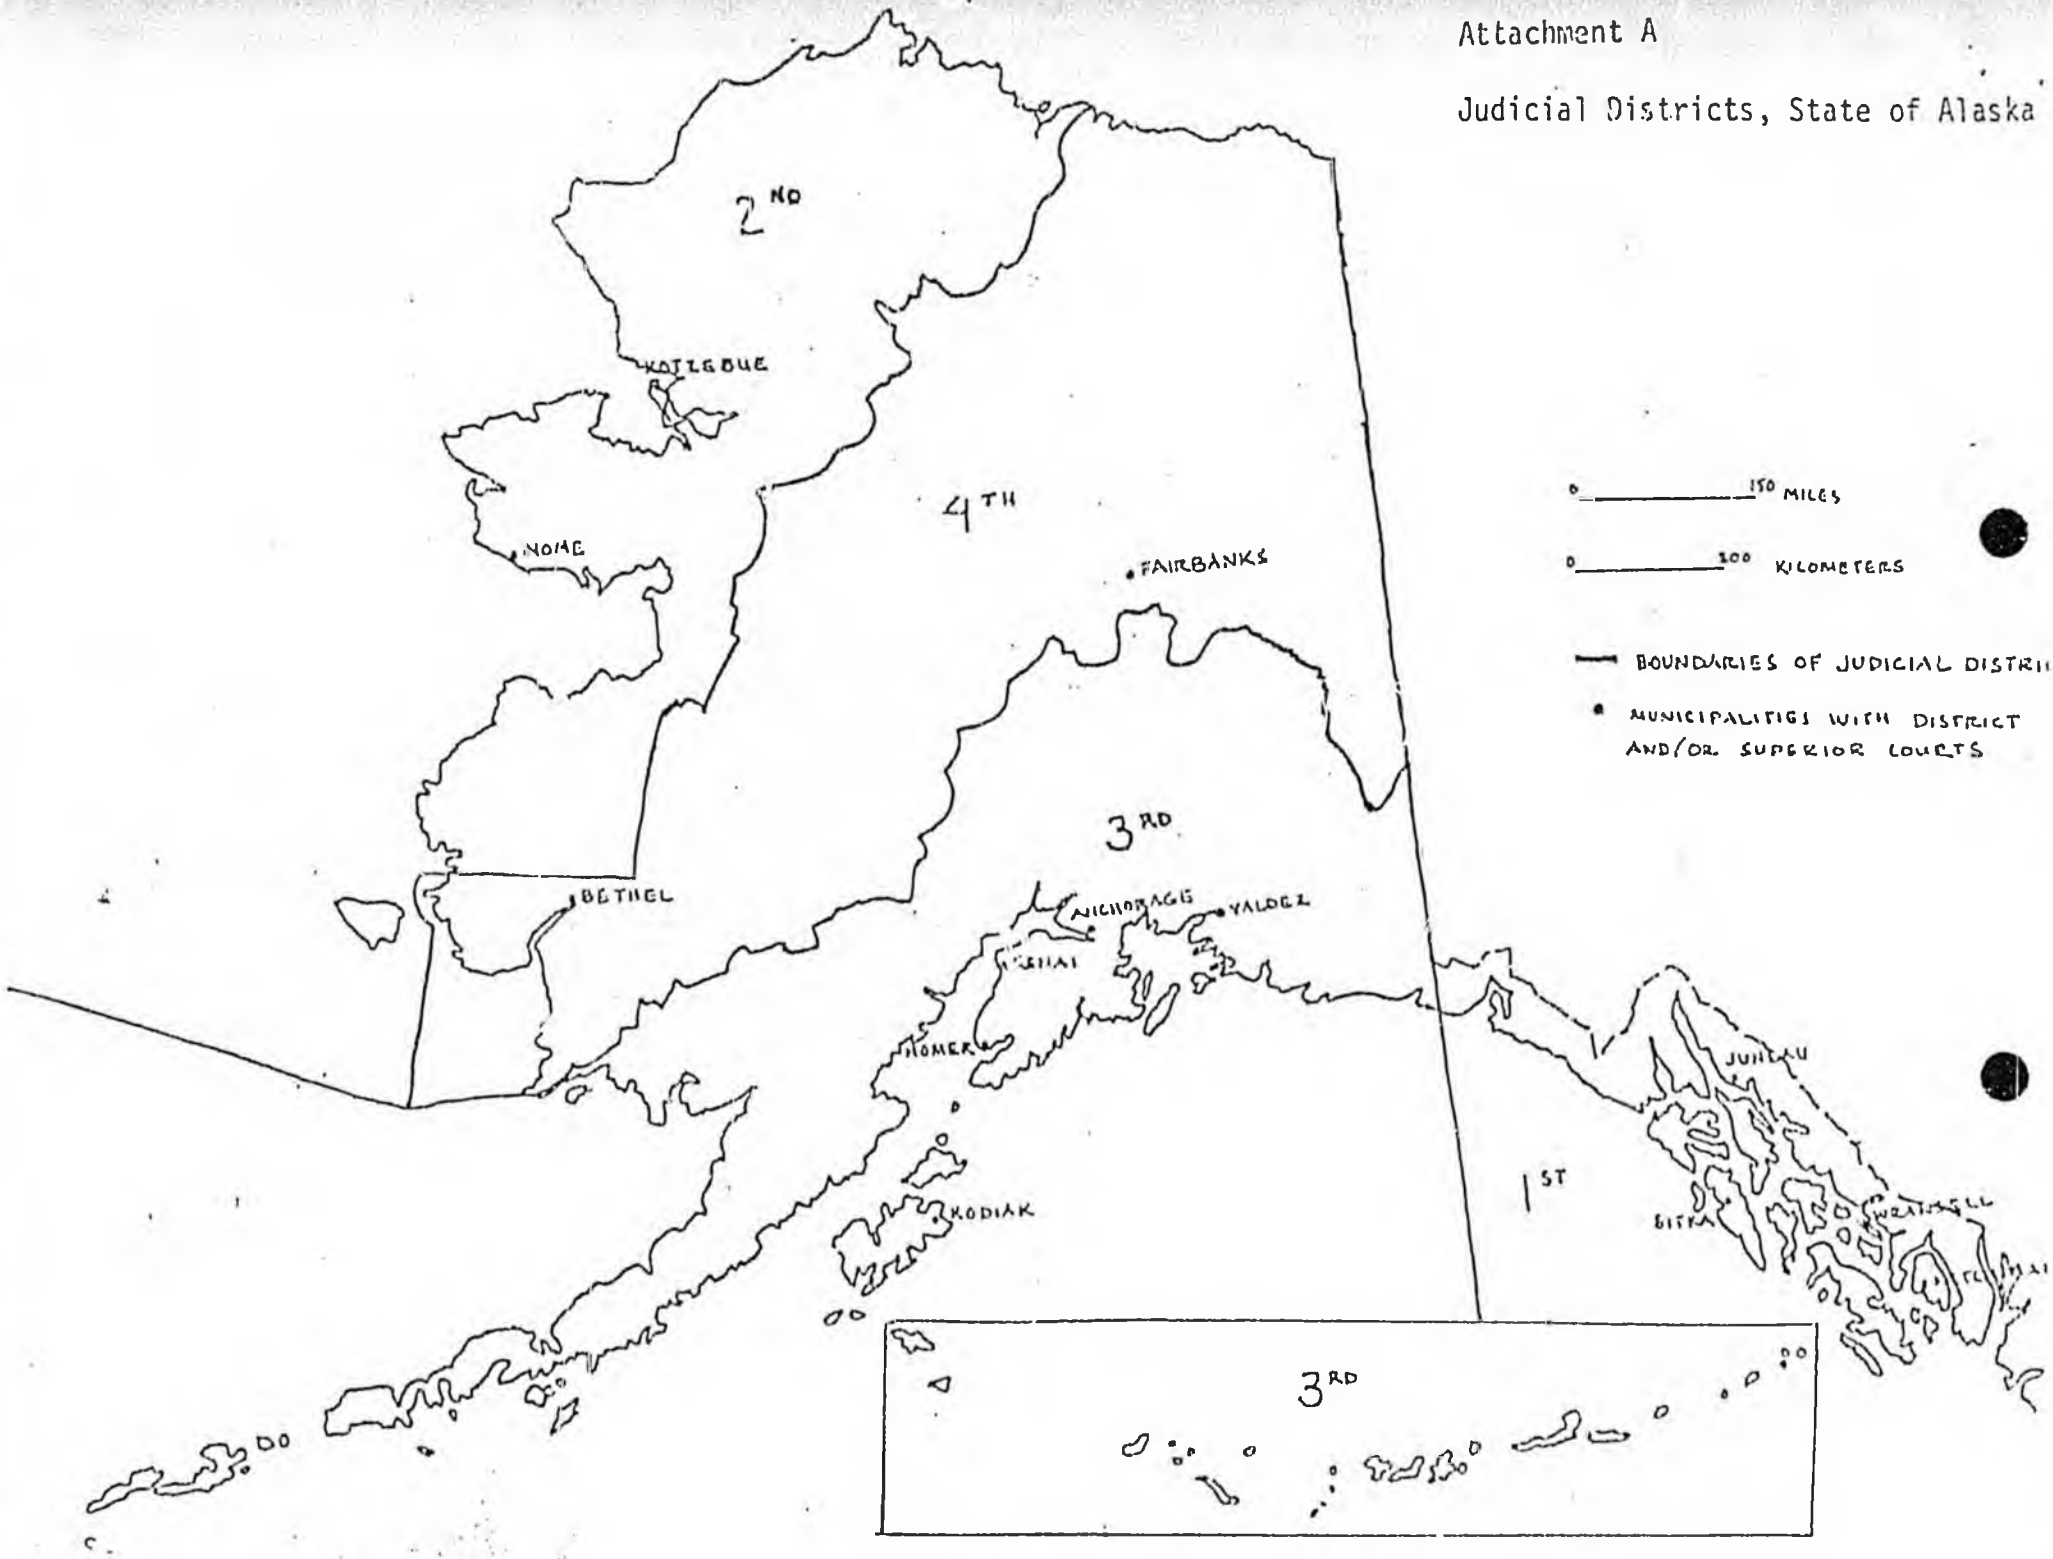
The primary problem associated with this approach seems to lie in the timing. Ms. Polley has estimated that the Division of Elections must have the figures from the reapportioned election districts by February 1982 in order to use the new districts in the 1982 elections. Thus, February 1982 is the latest date, assuming that there are no major delays in the progress of the reapportionment plan, that the Division of Elections will be starting work on the decennial division of election districts into judicial districts. If new election units of some kind are to be included in the Division's efforts, the Legislature will have had to pass the appropriate legislation, and the Judicial Council (or some other group which is qualified to make such judgments about the judiciary) will have had to decide on the boundaries of the new "judicial election districts" before February 1982.

---

[3] Patty Ann Polley, Director, Division of Elections, 3rd Street Community Building, Juneau, 99811; telephone: 586-5181.

Of course, at the request of the Legislature, the Division of Elections could redivide the judicial districts at almost any time; the time limits mentioned above refer to the earliest possible election, i.e., 1982, and to the most efficient use of staff time at the Division of Elections, since they must redivide the districts in 1982 as they do every ten years.

Mr. Marcules, the Attorney for the Judicial Council, has told us that as far as he knows, the idea of redistricting for judicial elections has never come before the Judicial Council. Mr. Marcules has placed the idea on the agenda for the next general meeting of the Council, scheduled for the first week in June, and has said that he will call us with the results of that meeting. We will keep you informed of the Judicial Council's response to the suggestion.



If you would like us to research further any of the alternatives listed above, please do not hesitate to call on us.

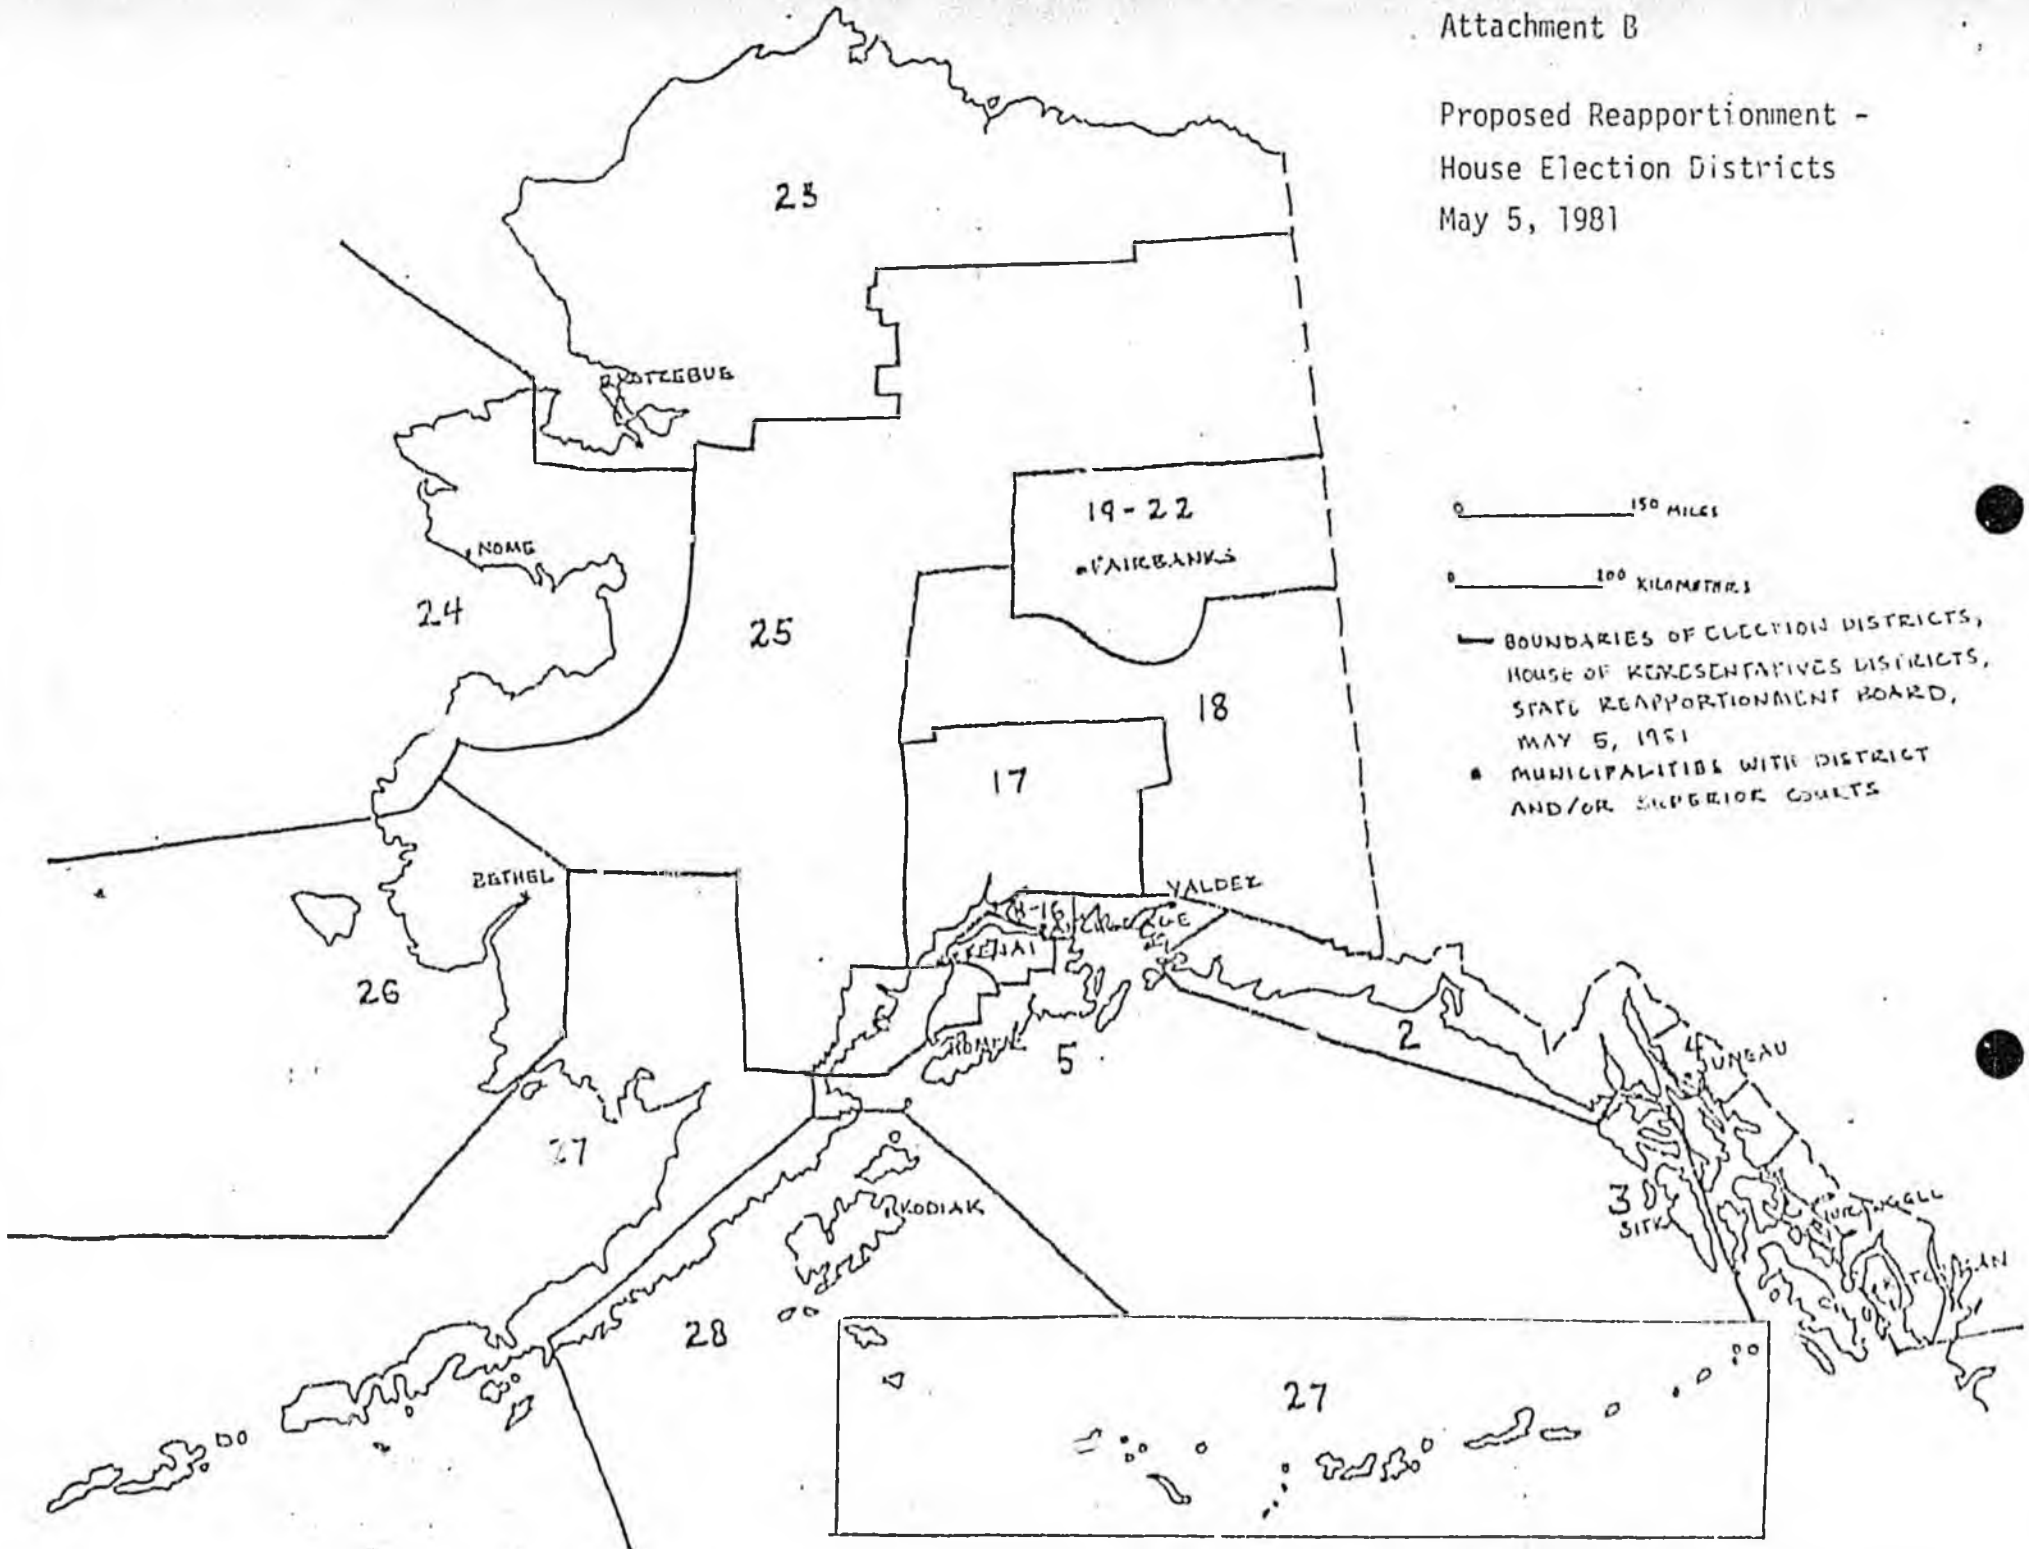
Encls.

Attachment A



Judicial Districts, State of Alaska

Sou:

Attachment B

Proposed Reapportionment -
House Election Districts
May 5, 1981

tion of courts shall be prescribed by law. The courts shall constitute a unified judicial system for operation and administration. Judicial districts shall be established by law.

Supreme Court

SECTION 2. (a) The supreme court shall be the highest court of the State, with final appellate jurisdiction. It shall consist of three justices, one of whom is chief justice. The number of justices may be increased by law upon the request of the supreme court.

(b) The chief justice shall be selected from among the justices of the supreme court by a majority vote of the justices. His term of office as chief justice is three years. A justice may serve more than one term as chief justice but he may not serve consecutive terms in that office.

(The amendment to this section was approved by the voters of the state August 25, 1970 and became effective October 10, 1970. Subsection (b) was added.)

Superior Court

SECTION 3. The superior court shall be the trial court of general jurisdiction and shall consist of five judges. The number of judges may be changed by law.

Qualifications of Justices and Judges

SECTION 4. Supreme court justices and superior court judges shall be citizens of the United States and of the State, licensed to practice law in the State, and possessing any additional qualifications prescribed by law. Judges of other courts shall be selected in a manner, for terms, and with qualifications prescribed by law.

Nomination and Appointment

SECTION 5. The governor shall fill any vacancy in an office of supreme court justice or superior court judge by appointing one of two or more persons nominated by the judicial council.

Approval or Rejection

SECTION 6. Each supreme court justice and superior court judge shall, in the manner provided by law, be subject to approval or rejection on a nonpartisan ballot at the first general election held

more than three years after his appointment. Thereafter, each supreme court justice shall be subject to approval or rejection in a like manner every tenth year, and each superior court judge, every sixth year.

Vacancy

SECTION 7. The office of any supreme court justice or superior court judge becomes vacant ninety days after the election at which he is rejected by a majority of those voting on the question, or for which he fails to file his declaration of candidacy to succeed himself.

Judicial Council

SECTION 8. The judicial council shall consist of seven members. Three attorney members shall be appointed for six-year terms by the governing body of the organized state bar. Three non-attorney members shall be appointed for six-year terms by the governor subject to confirmation by a majority of the members of the legislature in joint session. Vacancies shall be filled for the unexpired term in like manner. Appointments shall be made with due consideration to area representation and without regard to political affiliation. The chief justice of the supreme court shall be ex officio the seventh member and chairman of the judicial council. No member of the judicial council, except the chief justice, may hold any other office or position of profit under the United States or the State. The judicial council shall act by concurrence of four or more members and according to rules which it adopts.

Retirement

Impeachmen

Additional Duties

SECTION 9. The judicial council shall conduct studies for improvement of the administration of justice, and make reports and recommendations to the supreme court and to the legislature at intervals of not more than two years. The judicial council shall perform other duties assigned by law.

Compensatio

Commission on Judicial Qualifications

SECTION 10. The commission on judicial qualifications shall consist of nine members, as follows: one justice of the supreme court, elected by the

MEMORANDUM

TO: Representative Pat O'Connell

FROM: Leslie Longenbaugh LL
Research Staff

RE: Campaign Laws
Research Request Number 81-96

You have asked that we clarify the effect of the two Judiciary Committee amendments to House Bill 89 on the reporting obligations of candidates for judicial retention.

Presently judicial candidates for retention are governed by AS 15.13.110 (attached), which requires all candidates for civil office to report campaign contributions and expenditures to the Alaska Public Offices Commission. Nancy Carlson, Director of APOC[1], reports that judges are treated by the Commission in the same manner as other candidates, although judges very rarely file more than a "15-0 form," which states that they have received no contributions and have made no campaign expenditures. To Ms. Carlson's knowledge, no judges have been accused of violating the reporting requirements.

Because judges are already within the jurisdiction of APOC, this amendment would have the effect of clarifying the steps to be taken by APOC in the case of a violation by a judicial candidate of the reporting requirements. The amendment would not alter the reporting requirements already imposed upon judicial candidates.

If we can be of further assistance, please call on us.

LL/dp

Encls.

[1]Nancy Carlson, Director, Alaska Public Offices Commission; phone: 274-0321.

HB No. 8--JUDICIAL RETENTION ELECTIONS----------GRUSSENDORF, BARNES

1-- This adds a chapter to Title 22, Judiciary, re-enacting existing wording now found in separate chapters this this bill will repeal (i.e., AS 22.15.100, Supreme Court; AS 22.07.060, Criminal Court of Appeals; AS 22.10.150, Superior Court and AS 22.15.195, District Court) It combines the procedures regarding retention elections all in one new chapter.

2--Changes from running for election in an entire judicial distrcit (one of the four) to running in those election districts the judges on the ballot serve. For example, under this bill, Sitka voters would not vote on Juneau judges and vice versa; Ketchikan voters would vote on judges there, not in other Southeast locations; Anchorage judges would not be voted on in the Matanuska-Susitna Borrough; a judge serving Cordova-Glennallen,Valdez would be voted on in those districts rather than those plus the entire Third Judicial District.

3--Provision is made for certification by the Judicial Council to the director of elections, that a judge can be on ballots in other election districts when the judge sits or serves other election districts as well on a "routinely and frequently" basis.

IMPACT:

FISCAL NOTE:

AMENDMENTS:

(Suggested amendment: Lines 15,16 page 1; lines 2,3 page 2; line 17, page 2 and line 3, page e):

Omit words "....and may provide a recommendation regarding retention or rejection." This would remove the possibility of a recommendation based on whim, fancy, hearsay, manipulated statistics, personal dislike or disregard by people around the state who comprise the Judicial Council, who have never seen particular judges, observed them in court, read their opinions and may be totally unqualified to judge whether a judge is qualified..

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

2/8/83

"An Act relating to judicial retention elections"

Assumptions:

1. The passage of this legislation will initially affect the 1984 General Election ballots.

2. There would be 24 election districts as were designated in 1959.

3. Necessity of printing 24 separate ballots - one for each of the judicial retention.

4. Additional 12% inflation for each of the subsequent election years.

No additional funds are required beyond the Contractual Services area. Additional postage, printing and advertising costs will be required for the printing of 24 separate ballots. There will also be costs associated with printing additional pages in the Official Election Pamphlet, and postage associated with the heavier weight of the pamphlet.

Programming costs related to ballot counting will be substantial.

Professional Services Agreement will be required to contract for the production of a cross-reference listing of communities using the 1959 and 1981 reapportionments.

Alaska State Legislature
HOUSE OF REPRESENTATIVES

REPRESENTATIVE
CHARLIE BURSELL
CHAIRMAN

Committee on Judiciary

March 21, 1983

Mr. Francis L. Bremson
Executive Director
Alaska Judicial Council
1031 W. Fourth Avenue, Suite 301
Anchorage, Alaska 99501

Dear Director Bremson:

Thank you for your letter of March 16, 1983, expressing your views on HB 8 and SB 84, regarding judicial retention elections, and your participating in the legislative process.

I would like to comment on points raised through this letter in the order conveyed by the letter.

Statutory Reasons. A judge would be voted on, I gather, in all the districts from which litigation stems that would come before a particular judge or judges, so I do not believe there would be an insurmountable difficulty in the Council's making that determination.

Where would a conflict arise in the Council's determining where a judge must run and at the same time making an evaluation of that judge? Surely you would not want the Council considering either positive or negative comments from interested persons who would never have a case going before the particular judge or judges? Or would the Council rather solicit good (or bad) comments from any area in order either to boost or knock down a judge? I cannot believe the Council would resort to such tactics, as they might possibly border on the unethical.

As you know, the Con[illegible]itution establishes the Council, but it does not set forth Council duties, which is accomplished by legislation. Perhaps clarifying legislation should be enacted.

Administrative Reasons. I think you are confusing the four judicial districts which have existed since long before statehood with the House and Senate smaller election districts we now have. That tends to obfuscate the issue.

MEMBERS:
REP. JOHN LISKA, VICE CHAIRMAN; REP. RAMONA BARNES, EMERITUS;
REP. JOE HAYES; REP. HUGH MALONE; REP. DON CLOCKSIN; REP. RON WENDTE

You maintain that judges of one judicial district (one of the territorial four?) might actually be voted on by voters in another judicial district (one of the territorial four). As I understand the bills, no voter would be able to vote for a judge unless, in prosecuting or defending a piece of litigation, there would be the distinct possibility of a particular judge or judges of a location hearing the litigation. If the particular voter would have to bring the lawsuit in some other court, then that is the area in which the voter would vote on judges. Let us neither be confused or bound by out-moded, out-dated territorial judicial district boundaries, which probably should be demolished anyway!

I do not understand your point of confusion "by using different election districts for retention elections than are used for general elections." That is already a fact and has been a fact since statehood. That is to say, retention elections for judges are judicial district-wide now (referring to the four judicial districts mentioned earlier), whereas legislators use small divisions within those huge districts as their election districts, so the differences you mention already exist, you see. Both legislators and judges are elected now at general elections and I fail to see why confusion would reign merely by narrowing the scope of geographical areas in which judges should run. Or, would you rather scrap all House/Senate election district boundaries and have legislators run at large in the four judicial districts? For example, why should residents of the Aleutian Islands in the Third Judicial District vote for judges in Palmer, or Kenai, or Valdez, and visa versa? For that matter, why should residents of Valdez, Cordova and Glennallen vote for Anchorage and Kodiak and Kenai judges whom they rarely, if ever, see? Using common sense in establishing retention election districts should cause no confusion.

Constitutional Reasons. It is my understanding that the authors of the bills have no intention of anyone ever being disenfranchised in voting for a judge or judges. It cannot be that there would have to be a courthouse in every House (or Senate) election district in order for a citizen to vote; rather, wherever such voter would bring his/her cause of action, if one existed, would be the area in which that voter would see judges' names on the ballot. Is that not quite simple?

You mention the willingness to appear before the Committee(s) to discuss the legislation in further detail. I cannot speak for my counterpart in the Senate, but I will assure you that testimony from interested persons is always welcome. It seems to me, however, that as far as the House is concerned, the Committee quite fully understands the purpose of the proposed legislation. A determination of whether further testimony is needed will be made, I am sure, at the appropriate time.

Again, I wish to thank you for your interest in involving yourself in the legislative process.

Very truly yours,

Representative Charlie Bussell
Chairman, Committee on Judiciary

I WANT THE SO-CALLED LOOK-ALIKE DRUG TO BE MADE ILLEGAL TO OWN, DISTRIBUTE AND MANUFACTURE, ETC. THESE DRUGS CAN AND HAVE BECOME A BIG PROBLEM WITH OVERDOSE DEATHS AND OTHER VIOLENCE RELATING TO DRUG DEALING. THE SELLERS ARE THE WORST OFFENDERS.

WARMEST REGARDS.

Fake 'Speed' Causes Almost as Much Fear As the Real Thing

• • •

Look-Alikes, Mainly Caffeine, Used by Many Youngsters; Some Deaths Are Reported

By Steve R. Massey
Staff Reporter of The Wall Street Journal

CLEVELAND—"Pink footballs," "black beauties" and "yellow jackets" were confiscated here during the recent arrest of a street dealer who sells drugs to kids. But the dealer had to be released.

It turned out that the capsules were misnamed. They weren't what many of the dealer's customers thought they were: forms of "speed," the drug-world term for potent amphetamines that make a user's heart race and his nervous system tingle. Doctors prescribe amphetamines mainly for losing weight. Without a prescription, it is illegal to sell them.

But the capsules that the dealer was nabbed with are perfectly legal to sell in most places. Though disguised as pink footballs and the like, they are no stronger than three cups of coffee. In fact, caffeine is the main ingredient in most of them. Yet they, too, can be dangerous.

These stimulants are called "look-alikes" by narcotics agents. Once found almost exclusively in truck drivers' pockets, they have been cropping up all around the country. College and high-school students are gulping them for pick-me-ups. So are junior-high pupils and even younger children. The trend worries many adults.

Reports of Overdoses

The fake speed is causing almost as much alarm as genuine speed. Laurence B. Golden, a staff assistant with the intelligence office of the federal Drug Enforcement Administration, says his office receives daily reports of overdoses—and occasionally of deaths.

The dangers of look-alikes, however, are certainly less than the dangers of speed. "The real problem is that the young people are getting in on the drug scene and taking these things," says James Tudor of the Ohio State Board of Pharmacy. "It's a very natural step up into the real thing."

On the other hand, the buyer of a look-alike may already be a speed user who thinks he is getting speed again this time. If so, he almost certainly won't get the buzz he expected to get, so he may take more and more of the look-alike. That could lead to an overdose. Or it could lead him to think that he needs more speed than he used to. Then, the next time he gets *real* speed, he may overdose on that.

A look-alike pill typically is two-thirds caffeine. The remaining one-third usually is composed of two anti-allergic agents: ephedrine sulfate and phenylpropanolamine. These constrict blood vessels, and if taken in excessive quantities can collapse them.

More Work for Police

When a drug is sold as speed, the authorities have to assume that it is speed. "Once this stuff gets on the street, it's dope," says Mr. Golden. "It's dealt with the same way." So the upsurge in look-alike traffic means more work for the police. It also means more work for drug companies fighting misuse of their products. It is bad enough when your product finds its way into the street-drug trade. It is even more infuriating when it's something *disguised* as your product.

Despite efforts by local, state and federal officials, the look-alikes keep coming. One federal official estimates that as many as 100 million may be sold this year. That compares with 70 million of the actual amphetamines. The number of wholesalers pushing the bogus speed, Mr. Golden says, has jumped from a dozen a few years ago to about 120 now.

"It is like dealing with a greased pig," says Richard J. McMahon of the attorney general's office in Delaware. In June 1980, that state became the first to pass an anti-fraud law aimed at halting the flow of look-alikes. So far, only two cases have reached the courts; the state won one of them, "and even then the penalty was probation," Mr. McMahon says. More recently, nine other states have passed such laws: Arkansas, Colorado, Connecticut, Indiana, Kansas, Louisiana, Maryland, Oklahoma and South Dakota.

It may seem strange to charge someone with fraud for selling something legal instead of illegally selling something that is more dangerous anyway. But the federal drug authorities seem powerless to halt the look-alike traffic, so the states, with federal encouragement, are doing whatever they can.

There is no federal law protecting people who think they are buying speed but get look-alikes instead, and the ingredients in the look-alikes aren't controlled substances under federal regulations. So federal offi-

Please Turn to Page 21, Column 2

Almost as Much Fear as Real Ones

Continued From First Page

cials are forced to pass the buck.

Not the postal service, though. Ned Friece of the U.S. Postal Inspector's Office says the agency has filed 39 complaints with an administrative-law judge, all charging distributors of the capsules with falsely representing them as safe. (Distributors may be developing a damned-if-I-do, damned-if-I-don't complex. If they say they are selling speed, the anti-fraud laws may get them. If they truthfully say they are selling the caffeine pills, and state or imply that they are safe, the post office may get them.)

Mostly, however, federal authorities simply urge states to enact stiffer anti-fraud penalties, and they give vocal support to state and local enforcement efforts.

Death in Michigan

Ohio is considering legislation requiring packages of look-alikes to disclose that the contents aren't speed. Michigan, operating under an existing deceptive-trade law, has shut down one look-alike wholesaler and banned three others from selling the pills in the state. According to the Michigan attorney general's office, two young women in Flint, Mich., died last year from overdoses of 50 or more look-alikes each. The deaths may have been suicides.

Douglas Vivian, a pharmacist for the poison-control center and drug-information service at Hurley Medical Center in Flint, says a dose of 10 grams can be fatal. The average look-alike, experts say, contains 200 milligrams, so a 10-gram dose would be 50 pills.

But Jerry O'Donnell, the director of the police-department laboratory in Albuquerque, N.M., says there is "no way to tell" what constitutes an overdose because "it varies from person to person." Mr. O'Donnell says that three young men aged 15 to 20 died in Albuquerque during the last year after taking look-alikes. While the victims had been doing some drinking, Mr. O'Donnell says, all had been "in excellent physical condition: they all died of brain hemorrhaging, which is symptomatic of ephedrine (sulfate) and PPA (phenylpropanolamine)."

Firms Take Steps

Some established drug companies are trying to dissociate themselves from look-alikes. SmithKline Corp. in Philadelphia discontinued its green-and-clear diet-capsule line, Dexamyl, after it discovered that capsules disguised as Dexamyl were being sold as speed. Pennwalt Corp.'s Philadelphia division has successfully barred four companies from pushing imitations of its popular Biphetamine 20—the real "black beauties."

The founder of the look-alike industry, William Saye, 38, of Fairburn, Ga., applauds the prohibitive measures. "Today, it is being abused," he says. "Kids don't know how to handle business. There are too many bathtub operations in existence now and not enough quality controls."

Mr. Saye started selling caffeine pills wholesale out of his truck cab in Georgia in 1975. The next year, as business expanded, he set up Saye Drug Co. there. In 1977, he moved the company to a Tampa warehouse and changed its name to OTW Distributors Inc. By the end of that year, he had almost 50 employes selling the pills at truck stops in almost every state. The salesmen were called "peashooters," and drivers would contact them over citizens'-band radio. Mr. Saye says that his salesmen, when asked, were supposed to tell a customer that the pills weren't speed—or risk being fired. By 1980, when he retired from the drug trade, Mr. Saye's business was bringing in about $8 million annually in sales. The pills were obtained from a Long Island manufacturer. Evidently it was all perfectly legal.

Despite "hassles with the police and the press," Mr. Saye says, "I'm proud of what I've done. I ran the business right. Now I just want to lead a normal life, raise some beef cattle, and enjoy my two girls and two boys."

Small Operations

Today, most wholesale distributors are small operations, often a husband-and-wife team working out of their home. "About all they have to do is file a one-page registration form," says an official of the Food and Drug Administration. Sales are handled mainly by mail or phone except for a few storefront concerns in Albuquerque and Los Angeles with such names as the Source and the Pick-Me-Ups.

The distributors don't advertise much, though some ads run occasionally in local and college newspapers and a few national magazines. Instead, they leave calling cards in such places as truck-stop restrooms and college dormitories—a practice started by them. Supplies come from larger wholesalers such as Clifton Pharmacal Inc. in Milmy, Pa., which has its own pharmaceutical factory, or from one of an estimated 10 to 12 big manufacturers in Pennsylvania and on Long Island. They are sold in high volumes, in lots of 100 or 1,000, at prices ranging from about two cents to 10 cents a pill. On the street, says Mr. Tudor of the Ohio pharmacy board, they fetch anywhere from 50 cents to $8 a pill.

Most distributors won't divulge earnings, but estimates are that average sales for a medium-sized company can range between $500,000 and $1 million a year. Jerry Hecht, the founder of the Pick-Me-Ups in Albuquerque, says that his six stores average $1,000 a week each in profits.

SUBJECT: Imitation controlled substances (SSHB 10)

TO: Representative Mitchell E. Abood, Jr.

FROM: James H. Lear
Legislative Counsel

You have asked for a sectional analysis of SSHB 10 (An Act relating to imitation controlled substances). SSHB 10 is based on the Model Imitation Controlled Substances Act drafted by the Drug Enforcement Agency of the United States Department of Justice in October, 1981.

The bill consists of one section creating a new Chapter 73 in AS 11. The chapter contains several new sections:

Sec. 11.73.010. Prohibits the manufacture or distribution of imitation controlled substances as defined in Sec. 11.73.099(3) or possession of the same with intent to distribute. Violation of the section is punishable as a class C felony (maximum of five years in prison and maximum fine of $50,000).

It is not a crime in certain instances if the substance is to be used as a placebo for medical treatment. This section is intended to curb the distribution of noncontrolled substances currently sold over-the-counter if manufactured or distributed as imitation controlled substances. See also sec. 11.73.050.

Sec. 11.73.020. Prohibits the possession of certain noncontrolled substances with the intent to manufacture an imitation controlled substance. The substances are those most frequently used to manufacture imitation controlled substances. Violation of this section is punishable as a class C felony. This section is not part of the "Model Act".

Sec. 11.73.030. This section imposes a stricter punishment for distribution of imitation controlled substances by an adult to a minor. The crime is a class B felony punishable by a maximum of ten years in prison and a maximum fine of $50,000.

Sec. 11.73.040. Prohibits advertisement to promote the distribution of an imitation controlled substance. This crime is punishable as a class C felony. The section is directed mainly at those persons who promote the distribution of an imitation controlled substance by soliciting advertising space in newspapers, magazines, et cetera, or by publicly distributing advertisements for an imitation controlled substance. A publisher and a distributor of not only a local but of a national publication could be prosecuted for violation of sec. 11.73.040 if the state can establish beyond a reasonable doubt that the person had the requisite mental state. The defendant must have known that the purpose of the advertisement or solicitation was to promote the distribution of an imitation controlled substance in the State of Alaska. It is obvious that it would be easier for the state to prosecute an individual who resides within the state, but Alaska has criminal jurisdiction over a nonresident publisher of a national magazine or newspaper who knowingly publishes an advertisement to promote the distribution of an imitation controlled substance if that person consumates the crime from outside the state by the intervention of an innocent or guilty agent, such as a newsstand operator, within the state (AS 12.05.010 -- crime commenced outside the state but consumated inside).

Sec. 11.73.050. This section specifies that manufacturing, distributing, or possessing an imitation controlled substance solely for use as a placebo under prescription is not a crime. See also sec. 11.73.010.

Sec. 11.73.060. This section addresses the circumstances under which a violator of the chapter may have to forfeit to the state those items associated with the perpetration of offenses involving imitation controlled substances. The section is rather lengthy since it is intended to provide adequate guidelines for determining what property may be subject to forfeiture, how it is to be seized, what procedure is to be used for litigating the interests of possible owners, disposition of forfeited property, et cetera. If the degree of detail in this section were absent, an individual might successfully challenge the

forfeiture on the basis that it constitutes a taking of property without due process.

The section is almost identical to AS 17.30.110, the forfeiture provision of the 1982 drug bill enacted by Chapter 45, SLA 1982.

Sec. 11.73.099. Definition section. "Controlled substance" is defined by incorporating the definition codified in AS 11.81.900(6). However, sec. 13, Chapter 45, SLA 1982, repealed and reenacted that paragraph by substituting the following language for the former definition:

> (6) "controlled substance" has the meaning ascribed to it in AS 11.71.900(4).

The other important definition is the definition of "imitation controlled substance". Basically, a substance is an imitation controlled substance if it appears by dosage unit appearance to be a controlled substance or if it is represented as one. The definition enumerates those circumstances under which such a representation could be found.

At least 12 deaths attributed to use of 'look-alike' drugs

CHICAGO (UPI) — Counterfeit pills sold increasingly on the streets as "look-alike" hard drugs have killed at least a dozen users, the American Medical Association reported Thursday.

Authorities are essentially powerless to prosecute the sale by pushers of such drugs, which contain a combination of easily attainable ingredients found in appetite suppressants and decongestants, the AMA report said.

"They're called look-alikes because they mimic the size, shape and color of controlled substances — usually amphetamines or tranquilizers," said the AMA report.

Counterfeit "black beauties," "yellow jackets," "dexies" and other drug culture names for speed have caused 12 deaths, federal Food and Drug Administration investigations have confirmed.

They include a 17-year-old Belvidere, Ill., girl who died after taking what police presumed to be "black beauties," and a 17-year-old Albuquerque boy who consumed two counterfeit biphetamines (a type of amphetamine), lapsed into a coma and died. Several other victims have suffered paralysis after suffering strokes because of the drugs.

In addition, at least-nine suicides are linked to conterfeit drugs, most of them attributed to caffeine overdose.

A typical "look-alike," manufactured for a few pennies and sold to unwitting purchasers at huge profits, contains up to 200 milligrams caffeine, 50-75 milligrams phenylpropanolamine and 30 milligrams ephedrine. Their combined effect on a user "is unpredictable," the FDA said.

HB 10 JR

'Look-alike' drugs can lead to violence, trooper testifies

2-2-83

by Harry McFarland
Associated Press

Juneau — When the buyer discovered he had been sold imitation drugs, he grabbed a gun, went back to the seller's home and shot him.

That is an example of the violence that imitation drugs, or "look-alikes," can cause on the streets, said Alaska State Trooper Lt. Roger McCoy during testimony on a bill to outlaw their sale in the state.

"Look-alikes" are designed to resemble or duplicate the appearance of brand name amphetamines, barbituates, tranquilizers and narcotic pain killers. On the streets, they are known and sold by the same names as their drug counterparts: Black Beauties, Dexies, Yellows, Christmas Trees and Rainbows.

"Look-alikes," though, contain non-controlled substances such as caffeine, ephedrine and other over-the-counter drugs.

The bogus drugs are showing up in Alaska in large quantities, said Anchorage Police Department Lt. Ron Needham.

"I have seen bags with the sum of 100,000 dosage units," Needham said from Anchorage via the state teleconference system. "I have seen bags with 500,000, a half a million, dosage units."

The state has seen an increase in cases involving the look-alikes, McCoy said. In 1981, troopers had 95 cases involving the imitation drugs. Last year, they had 214 cases.

McCoy gave three reasons for the bill's passage: the potential of violence, the potential of overdose and the potential that juveniles will be introduced into the drug culture, McCoy said.

While the drugs are not physically addicting, they can be psychologically so, the policemen said.

Imitation drugs are very profitable, McCoy said. They sell for the same price as their real counterparts. A bag of speed will sell for $200 to $300. So will the fake stuff.

The difference is that the fake costs substantially less to manufacture, McCoy said. A tablet that sells for $3 to $5 dollars may only cost three cents to make.

Needham said 90 percent of the drugs sold on the street in Anchorage are imitations.

Rhonda Butterfield, assistant attorney general with Special Prosecution and Appeals, said there is a need for the legislation as only two ways currently exist to prosecute sellers of imitation drugs.

The first is to charge a seller with attempting to commit a crime; the other, charge the seller with theft by deception.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: CS SS HB 10 (JUD) Date on Bill: 2-23-83
Title: "An Act Relating to imitation controlled substances"
Sponsor: Abood, etc.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: CS for SS for H.B. No. 10 Date on Bill: February 23, 1983
Title: "An Act relating to imitation controlled substances."
Sponsor: Judiciary Committee
Requestor: House Judiciary Committee

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86	FY 87	FY 88
Capital				730.0	-0-	-0-		
Operating				13.9	122.4	129.8		
Total			-0-	743.9	122.4	129.8		

b. Revenues:

Revenue			-0-	-0-	-0-	-0-		

2. Source of funds to offset fiscal impact of bill:

The source of funds to implement this bill has not been identified by the sponsors.

3. Assumptions:

A. Estimated arrest and conviction information was gathered from the Department of Law and the Alaska Judicial Council statistics. They estimate that there would annually befive convictions resulting in prison terms for Class B and Class C felonies. Class A misdemeanors have been omitted in the committee substitute.

B. It is assumed that all convictions are of first time offenders.

C. The following table displays data regarding additional bed needs with enactment of HB 10:

Prepared By: Roger C. Lange Phone: 465-3376
Division: Division of Adult Corrections Date:

Approved by Commissioner: Date: 3/10/83
Department: HEALTH & SOCIAL SERVICES

5. Distribution:
Original to Legislative Finance
Copy to OMB
Copy to Sponsor
Copy to Requestor

2/8/83

Class of Offense	Expected # of Convictions	% & # to Jail	Avg. Sentence Length	Flat Years	Person Years
B Felony	1	50%/ .5	2.5 Yr.	1.9	.95
C Felony	23	20%/4.6	1.09 Yr.	.82	3.77
	24	5.1			4.72

Therefore, 4.72 beds would be needed. For purposes of this fiscal note, this was rounded to the nearest whole number resulting in 5 new beds identified as being required.

D. Cost Estimates:

1. Capital Expenditures

It is assumed that medium security beds would be the appropriate classification. It is estimted that construction costs for this type of bed will be approximately $146,000 per bed. Therefore, capital expenditures would be:

5 x $146,000 = $730,000

2. Personal Services

It is assumed that these 5 beds would be combined with other construction where staff will be identified. It is estimated two staff positions will be required to provide security and supervision for the additional inmates.

3. Other Costs

Other costs identified reflect only food, clothing, bedding, and medical services necessary to meet the physical care and medical needs of the projected inmate increase.

4. Inflation of 6% per year was used for projecting cost after FY 1985, the year in which the total bed impact would be experienced.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It does not represent the policy of the Sheffield Administration or the final estimate of fiscal impact.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL 10

"An Act relating to imitation controlled substances."

The Department of Health and Social Services is supportive of this legislation.

Data is not available on the use or distribution of imitation controlled substances also known as "look-alikes." Look-alikes are generally sold as purporting to be depressants or stimulants that normally would require prescriptions. These look-alikes are also sometimes advertised as diet aids or sleep aids.

Products sold over the counter containing caffeine (No-Doz etc.) are sometimes sold as amphetamines (uppers). This is one example of selling an imitation controlled substance.

To manufacture or sell a product by misrepresenting its contents should not be acceptable. The public health and safety risk related to misrepresented drugs can be numerous. Use of drugs (legal by prescription or over-the-counter) not in accordance with medically recommended dosage can lead to health problems. Overdose, unexpected reactions or actions and/or allergic reactions may be a few of the problems.

One possible major problem is the use of a look-alike may lead a person to take increased dosage to achieve an effect. To a careless, inexperienced or naive user the use of the "real" product after use of an imitation could result in unintentional overdose.

HB 10 could be one mechanism to help prevent such problems and to make persons aware of the danners of such actions.

Trafficking in Look-Alikes ; an Update

Trafficking in Look-Alikes; an Update

Recent federal and state actions have seriously affected the rampant trafficking in look-alikes that has been sweeping the country. Look-alike distributors, who began assaulting the nation with a blizzard of capsules and tablets early in 1980, and the manufacturers who supply them have been dealt a series of regulatory setbacks that may portend an end to this multi-million dollar industry.

Look-alikes are carefully designed to resemble or duplicate the appearance of brand name amphetamines, barbiturates, tranquilizers, and narcotic pain killers in both capsule and tablet form. On the street, they are known by the same names as their dangerous drugs counterparts: Black Beauties, Dexies, Yellows, Christmas Trees, and Rainbows. But look-alikes contain only non-controlled substances such as caffeine, ephedrine, phenylpropanolamine, acetaminophen, and other over-the-counter non-prescription drugs.

As the number of mail order and store front wholesale distributors grew from a mere handful in early 1980 to more than 150 outlets by November of 1981, the production of look-alikes was reported to have soared to 30 million dosage units per week. During the past year and a half, the look-alike industry has flooded the nation's campuses and schoolyards with hundreds of millions of these pills. Intelligence derived from local police agencies, hospital emergency rooms, and medical examiners reveals widespread abuse, especially among teen-agers and college age youths.

In marked contrast to the methods used by illicit drug traffickers, look-alike distributors have conducted extensive advertising campaigns claiming their products to be both safe and legal. They have utilized full color brochures, magazine ads, highway billboards, and even television spots designed to appeal to teen-agers and young adults. Using commercial mailing lists, distributors have mailed colorful business cards directly to young recipients.

The easy availability of look-alikes has encouraged a climate of acceptance among many teen-agers and has conditioned them to the daily trafficking, handling, and consumption of these "pharmacal stimulants." In many places, look-alikes have become as much a part of the drug culture as the shopping center head shop and the paraphernalia vendor.

As the abuse of look-alikes grew, the public health dangers of these substances quickly became apparent. It is obvious that the young consumer who thinks that he has been purchasing "speed" or "ludes" and has become used to taking several look-alike

capsules or tablets at a time in order to "get the full effect" runs the risk of serious overdose or death if one day he ingests the same number of real controlled substances. In addition to this danger, the look-alikes, themselves, can have serious damaging effects. The number of emergency room incidents attributable to these drugs has risen dramatically in the past year. More than a dozen deaths caused by look-alikes have been reported from around the country. More deaths from caffeine overdose and emergency room hypertensive incidents from severe reactions to phenylpropanolamine may have occurred but have gone unreported.

Although trafficking in look-alikes is not prohibited by the federal Controlled Substances Act, the Drug Enforcement Administration considers that the distribution and sale of look-alikes, as of drug paraphernalia, encourages and contributes to drug abuse and drug profiteering. The look-alike problem is one more facet of the nation-wide drug abuse problem. For these reasons, the DEA has undertaken a six-point program against look-alikes. Briefly stated, the six points are:

1. Drafting of a Model Imitation Controlled Substances Act[1] for concerned states to adopt.

2. Preparation of documentation describing the problem, distribution patterns and practices, and other information to be used in support of the Model Act.

3. Fostering intergovernmental agency cooperation and providing active support to other agency efforts.

4. Enlisting the support and voluntary cooperation of the legitimate pharmaceutical industry.

5. Publicizing the DEA initiative and encouraging the support of parent and community groups.

6. Targetting of states heavily involved in look-alike distribution and manufacture to encourage legislative action.

More than a dozen states have enacted or are considering legislation targetted against the manufacture and distribution of look-alikes. States with legislation now on the books include Arkansas, Colorado, Connecticut, Delaware, Florida, Indiana, Kansas, Louisiana, Maryland, North Carolina, Oklahoma, Oregon, and South Dakota. Some cities, such as Independence, Missouri, have passed local ordinances prohibiting storefront look-alike sales. In other state action, the Attorney General of Illinois has filed complaints against 39 look-alike distributors. To date, he has obtained verbal agreements from 15 distributors to cease and desist selling in the State of Illinois and he has obtained temporary restraining orders against three others.

---

[1]Copies are available upon request from the Dangerous Drugs Section, Office of Intelligence, Headquarters, DEA.

(202) 633-1263

The legitimate pharmaceutical industry also has been cooperating in efforts to eliminate the look-alike problem. The Eli Lilly Company, one of the largest manufacturers of gelatin capsules, has, since July 1981, refused to sell capsules to look-alike manufacturers. Other capsule manufacturers also have indicated a willingness to cooperate in this effort. The resulting lack of capsules already has begun to affect the look-alike distribution chain and some distributors say they can no longer obtain "Yellows" and "Black Beauties."

Recent actions by federal government agencies are having salutary effects on the problem too. During the past several months, the U. S. Postal Service has filed complaints against 39 look-alike distributors. To date, the Postal Service has concluded consent agreements with nine distributors and has obtained False Representation Orders against nine others. The False Representation Orders require postmasters to stop the delivery of all mail to the subject distributors.

The most significant federal action yet taken occurred on September 30, 1981, when the Food and Drug Administration filed counterfeiting and mis-labeling complaints against nine manufacturers of look-alike drugs. With the assistance of U. S. Marshalls in five states, seizures of equipment, materials, and finished products were effected at the following locations:

BT Pharmaceuticals, Inc.
Tampa, Florida

Frye Pharmaceuticals, Inc.
Birmingham, Alabama

Jerome Stevens Pharmaceuticals, Inc.
Central Islip, New York

Valley Run Pharmaceutical
Milroy, Pennsylvania

Newtron, Pharmaceuticals, Inc.
Coram, New York

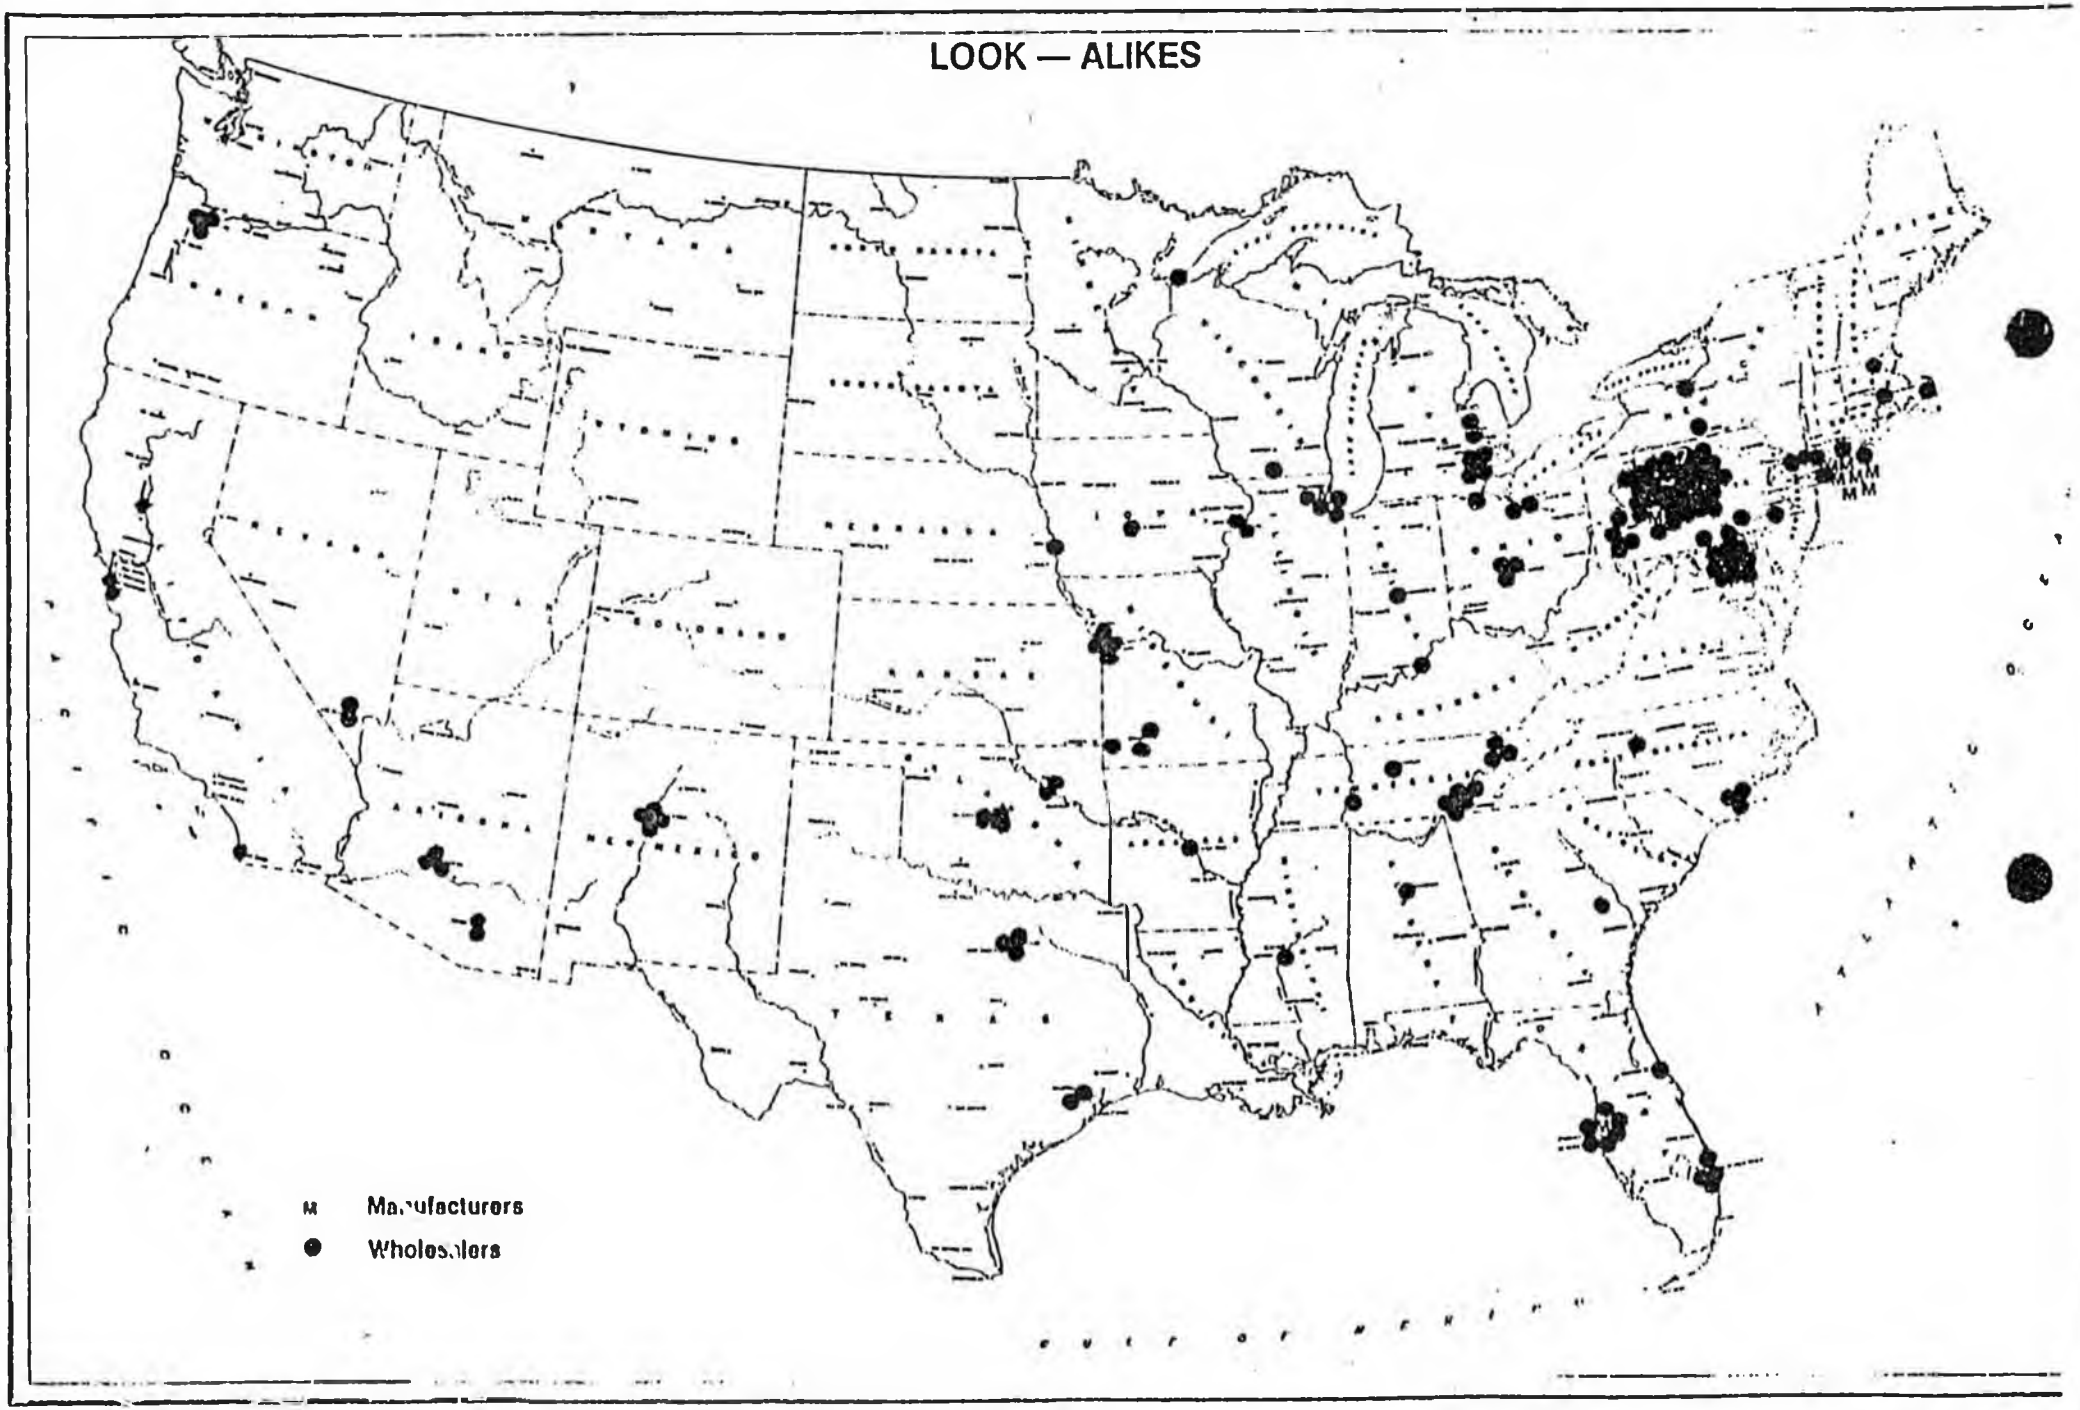
Pharmadose, Inc.
Bohemia, New York

Standard Pharmacal Corp.
Elgin, Illinois

LNK International, Inc.
Hauppauge, New York

VIP Pharmaceuticals, Inc.
Pearl River, New York

An inventory of seized items includes: 15 million filled capsules, 800,000 tablets, 20 million empty capsules, and over one million dollars worth of equipment including offset rollers, capsule printers, tablet punches and dies, and tablet presses. The FDA felt that its case against a tenth manufacturer, Ketchum Laboratories of Amityville, New York, was inadequate to support any enforcement action at that time.



As a result of the FDA actions, one of the manufacturers has already signed a consent agreement to cease and desist production of look-alikes, and two more companies are also negotiating consent agreements. Information on responses by the other manufacturers was unavailable as of the date of this report.

The actions described above comprise a promising start toward ending the nation-wide trafficking in look-alikes. It is too early to make an accurate evaluation of the overall damage sufferd by look-alike traffickers, but there is room for some optimism. Continuing action by federal agencies, state and local governing bodies, the pharmaceutical industry, and the public will be required to eliminate the look-alike problem from this country.

MEMORANDUM

TO: Representative Mitch Abood
Attention: Carol Horos

FROM: Christine Johnson, Research Staff

RE: Look-alike Drug Laws
Research Request 82-186

Carol Horos of your staff has asked us for the number of states which have passed look-alike drug laws and the number of states in which such legislation has been proposed. We received the following information from the National Conference of State Legislatures (NCSL):

- As of August 1982, thirty-six states had adopted legislation restricting the sale of look-alike drugs.

- Fourteen states* did not have look-alike drug laws in August of this year; however, legislation was pending in four of these states (Michigan, Nebraska, New Mexico, and Tennessee). Legislation has also been considered in one other state (Texas), although no law was ever passed.

The federal Drug Enforcement Administration has drafted a model look-alike drug law for states; we have requested a copy of this legislation and will forward it to you when it arrives. We have also enclosed two articles on look-alike drugs which may be of interest to you.

If we can provide any further information, please don't hesitate to contact us.

---

*States without look-alike drug laws include: Alaska, Hawaii, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, Nevada, New Mexico, North Dakota, Tennessee, Texas, West Virginia, Wyoming.

FDA Seeking to Bottle Up Fake Narcotics

By Pete Earley

An example of look-alike imitation drugs, left, and the real controlled substances.

In 1980, an Albuquerque teenager died after drinking several shots of bourbon at a Christmas party and swallowing two capsules he had been told were amphetamines. Police discovered that the capsules were not amphetamines, but non-prescription drugs made to look like them.

Since then, imitation amphetamines and barbiturates have been linked to 11 other teen-age deaths, according to the Food and Drug Administration.

The federal government faces an unusual jurisdictional problem in trying to control the so-called look-alike drugs. Because their ingredients can be obtained without a prescription, the Drug Enforcement Administration said it doesn't have jurisdiction. The FDA maintains it can play only a limited role because it has certified the ingredients as safe.

While the agencies say they are taking what steps they can, they are somewhat reluctant to take on new enforcement tasks in times of tight budgets.

Fake amphetamines contain large amounts of caffeine, phenylpropanolamine (a nasal decongestant and appetite suppressant) and the decongestant ephedrine. Imitation barbiturates contain acetaminophen, salicylamide, chlorpheniramine or other sedatives and hypnotic agents.

When the ingredients are taken separately and in small doses, they are considered safe, an FDA spokesman said. But they can cause nervousness, insomnia, temporary psychotic episodes, cerebral hemorrhage, drowsiness or death if mixed together in large amounts or taken with alcohol.

Many young people take them that way, a DEA spokesman said, because they believe that will help simulate the "high" caused by controlled substances. In mid-1981, DEA estimated that 30 million doses of fake narcotics were being manufactured each week and distributed through a network of 200 dealers.

Since 1980, FDA has filed administrative complaints against 45 companies that it claims violated counterfeit provisions of the Food, Drug and Cosmetic Act by making imitation drugs. Over the same period, the U.S. Postal Service has filed 20 complaints that accused drug makers of false advertising because they did not disclose that their products could cause illness or death.

Last week, FDA unveiled what it believes is its toughest tactic to date. It informed 16 small companies that they must submit any products that contain combinations of caffeine, ephedrine and phenylpropanolamine for certification as new drugs. "We have researched this extensively and can find no precedent for the three-drug combination. It would be hard to believe that anyone can show a medical purpose or need for these drugs," said Bill Grigg, an FDA spokesman. In effect, Grigg said, FDA's action will force many of the stimulants off the market.

Last year, DEA drafted a model law for states to ban look-alike drugs. So far, 30 states have enacted legislation. DEA also convinced three companies that make drug capsules to voluntarily refuse orders from suspected imitation drug makers.

While federal officials are confident that their tactics have driven Sen. Gordon J. Humphrey (R-N.H.) said such maneuvering has convinced him that the only way to eliminate the imitation drugs is by giving the DEA, FDA and the Postal Service jurisdiction. He has introduced legislation that would prohibit the manufacture of drugs that "look like or are represented to be controlled substances." Products that promote drug abuse would be barred from the mails and FDA counterfeit laws would be expanded.

But at a recent hearing, Hatch urged Congress to delay passing new legislation. "We are trying to solve this problem through leadership. If we can't solve the problem through state laws then we might need to do it at a federal level, but that's not yet clear," he said.

Illinois Attorney General Tyrone Fahner disagreed with Hatch. Fahner told Congress that although his state has moved against dealers, it still has problems. "Some companies we have sued and closed have popped up again under a new name and location. Just because we stop a look-a-like distributor in Illinois doesn't mean we have solved the national problem."

Washington Post May 30, 1982

mits" which allow a convicted drunk driver to drive only a specified route at a specified time without unauthorized stops.

Several states, Utah, Idaho and Maryland among them, have set the blood alcohol concentration (BAC) level, which determines intoxication, at 0.08 percent, closer to the more stringent laws in Europe where the Netherlands and Norway have the level at 0.05 percent. The new Maryland law adds that state to at least 16 others that allow police officers to administer a breath test at the scene without first arresting the driver. Refusal to take the test then subjects the driver to a six-month license suspension.

Photo courtesy of *The Denver Post*

The new solutions, however, are not expected to be panaceas, the experts admit. Stiff mandatory sentences can irk some judges who find ingenious ways to avoid applying them. Mandatory sentences may result in long lists of offenders waiting to get into crowded jails. Experts also recognize that tougher laws do not always reduce the number of alcohol-related driving deaths. For instance, the British Road Safety Act of 1967 set a BAC level of 0.08 percent as prima facie evidence of drunk driving and made punishment upon conviction a mandatory one-year license suspension. Weekend alcohol-related driving deaths declined immediately following implementation of the law but rose to previous levels within a year.

In general, though, the result of the new state laws has been increased media attention and more public awareness, two phenomena welcomed by traffic safety professionals at the National Highway Traffic Safety Administration (NHTSA) where millions of dollars have been spent on public information campaigns in the past. One NHTSA official, Clayton Hall, who specializes in the drunk-driving issue, called the new attention "a squeaky wheel thing." "People are getting interested at the community level and there is an awakening of a feeling that something must be done," Hall said.

Richard W. Foster

The 'look-alike' game: Deception in street drugs

In the shadowy world of abuse of illegal and legal drugs, a new issue that is drawing the attention of state legislatures has surfaced: the sale and use of over-the-counter drugs—called "look-alikes"—that imitate prescription stimulants. Eleven states have banned the distribution of these drugs, and seven more have considered such legislation.*

The federal Food and Drug Administration (FDA) has received numerous inquiries and complaints about look-alikes, which are generally similar in size, shape, color, and markings to amphetamine-type products such as biphetamines and Dexedrine, but which have slight deviations in markings that often go undetected by the buyer.

Illicit drug dealers have recognized that more money could be made selling counterfeits than actual prescription drugs and, in addition, they would be immune to prosecution for selling look-alikes.

The fact that these drugs are frequently mistaken for prescription drugs has caused serious problems. Many young users have overdosed by confusing the strong prescription drug with its imitation. Also, confusion of counterfeits with prescription drugs interferes with the ability of doctors to treat an overdose victim. Although the FDA has received four reports of deaths associated with the use of these drugs, the causes of death could not be directly attributed to look-alikes.

Look-alikes typically contain two-thirds caffeine and one-third cough-cold ingredients such as phenylpropanolamine (an appetite suppressant and nasal decongestant) and ephedrine sulfate (a decongestant). They are labeled in compliance with current FDA labeling requirements for use as stimulants for mental alertness and as decongestants and bronchodilators for managing bronchial asthma. Since these drugs are legitimately manufactured and properly labeled, they are considered legally marketable. By the time they filter down to the user level, however, they are almost always unlabeled and misrepresented.

The drugs produce constriction of blood vessels, which in turn elevates blood pressure and, if taken in large quantities, can cause blood vessels to collapse. Reported abuse syndromes—very similar to the amphetamine abuse syndrome—include over-excitement, insomnia and hallucinations, all of which can lead to toxic psychosis.

The FDA is encouraging and supporting state attempts to formulate and develop regulatory laws to deal with this problem. Delaware took the lead by passing anti-fraud legislation in 1980. When the Maryland General Assembly learned of increasing use of look-alike drugs in schools, the Anne Arundel County delegation sponsored a bill that expanded on Delaware's statute.

The Maryland law prohibits "distribution, attempted distribution, or possession with intent to distribute non-controlled substances intended for use or distribution as controlled dangerous substances." The law is aimed at mass volume distributors, not just street dealers. Since the law became effective in June 1981, 12 major distributors have closed or moved their business out of the state, and there are now no known distributors in Maryland. The counterfeit problem still exists, however, because of mail order businesses. Many of the complaints the FDA has received have been from the parents of children who ordered fake "pep pills" after receiving unsolicited mail-order literature.

Despite state and federal attempts to prohibit the distribution of these drugs, sales are on the rise. It is estimated that as many as 100 million look-alikes may be sold this year, compared to 70 million pills of amphetamines.

The FDA had not fully articulated its position on counterfeit drugs until September 28, 1981, when the agency raided nine factories in Alabama, Florida, Illinois, New York, and Pennsylvania. Equipment and over 10 million drugs were seized under a section of the Food, Drug and Cosmetic Act that defines a counterfeit drug and states that such drugs are liable to seizure.

Fake 'Speed' Causes Almost as Much Fear As the Real Thing

• • •

Look-Alikes, Mainly Caffeine, Used by Many Youngsters; Some Deaths Are Reported

By Steve R. Massey
Staff Reporter of The Wall Street Journal

CLEVELAND—"Pink footballs," "black beauties" and "yellow jackets" were confiscated here during the recent arrest of a street dealer who sells drugs to kids. But the dealer had to be released.

It turned out that the capsules were misnamed. They weren't what many of the dealer's customers thought they were: forms of "speed," the drug-world term for potent amphetamines that make a user's heart race and his nervous system tingle. Doctors prescribe amphetamines mainly for losing weight. Without a prescription, it is illegal to sell them.

But the capsules that the dealer was nabbed with are perfectly legal to sell in most places. Though disguised as pink footballs and the like, they are no stronger than three cups of coffee. In fact, caffeine is the main ingredient in most of them. Yet they, too, can be dangerous.

These stimulants are called "look-alikes" by narcotics agents. Once found almost exclusively in truck drivers' pockets, they have been cropping up all around the country. College and high-school students are gulping them for pick-me-ups. So are junior-high pupils and even younger children. The trend worries many adults.

Reports of Overdoses

The fake speed is causing almost as much alarm as genuine speed. Laurence B. Golden, a staff assistant with the intelligence office of the federal Drug Enforcement Administration, says his office receives daily reports of overdoses—and occasionally of deaths.

The dangers of look-alikes, however, are certainly less than the dangers of speed. "The real problem is that the young people are getting in on the drug scene and taking these things," says James Tudor of the Ohio State Board of Pharmacy. "It's a very natural step up into the real thing."

On the other hand, the buyer of a look-alike may already be a speed user who thinks he is getting speed again this time. If so, he almost certainly won't get the buzz he expected to get, so he may take more and more of the look-alike. That could lead to an overdose. Or it could lead him to think that he needs more speed than he used to. Then, the next time he gets *real* speed, he may overdose on that.

A look-alike pill typically is two-thirds caffeine. The remaining one-third usually is composed of two anti-allergic agents: ephedrine sulfate and phenylpropanolamine. These constrict blood vessels, and if taken in excessive quantities can collapse them.

More Work for Police

When a drug is sold as speed, the authorities have to assume that it is speed. "Once this stuff gets on the street, it's dope," says Mr. Golden. "It's dealt with the same way." So the upsurge in look-alike traffic means more work for the police. It also means more work for drug companies fighting misuse of their products. It is bad enough when your product finds its way into the street-drug trade. It is even more infuriating when it's something *disguised* as your product.

Despite efforts by local, state and federal officials, the look-alikes keep coming. One federal official estimates that as many as 100 million may be sold this year. That compares with 70 million of the actual amphetamines. The number of wholesalers pushing the bogus speed, Mr. Golden says, has jumped from a dozen a few years ago to about 120 now.

"It is like dealing with a greased pig," says Richard J. McMahon of the attorney general's office in Delaware. In June 1980, that state became the first to pass an anti-fraud law aimed at halting the flow of look-alikes. So far, only two cases have reached the courts; the state won one of them, "and even then the penalty was probation," Mr. McMahon says. More recently, nine other states have passed such laws: Arkansas, Colorado, Connecticut, Indiana, Kansas, Louisiana, Maryland, Oklahoma and South Dakota.

It may seem strange to charge someone with fraud for selling something legal instead of illegally selling something that is more dangerous anyway. But the federal drug authorities seem powerless to halt the look-alike traffic, so the states, with federal encouragement, are doing whatever they can.

There is no federal law protecting people who think they are buying speed but get look-alikes instead, and the ingredients in the look-alikes aren't controlled substances under federal regulations. So federal offi-

Please Turn to Page 21, Column 2

Almost as Much Fear as Real Ones

Continued From First Page

cials are forced to pass the buck.

Not the postal service, though. Ned Friece of the U.S. Postal Inspector's Office says the agency has filed 39 complaints with an administrative-law judge, all charging distributors of the capsules with falsely representing them as safe. (Distributors may be developing a damned-if-I-do, damned-if-I-don't complex. If they say they are selling speed, the anti-fraud laws may get them. If they truthfully say they are selling the caffeine pills, and state or imply that they are safe, the post office may get them.)

Mostly, however, federal authorities simply urge states to enact stiffer anti-fraud penalties, and they give vocal support to state and local enforcement efforts.

Death in Michigan

Ohio is considering legislation requiring packages of look-alikes to disclose that the contents aren't speed. Michigan, operating under an existing deceptive-trade law, has shut down one look-alike wholesaler and banned three others from selling the pills in the state. According to the Michigan attorney general's office, two young women in Flint, Mich., died last year from overdoses of 50 or more look-alikes each. The deaths may have been suicides.

Douglas Vivian, a pharmacist for the poison-control center and drug-information service at Hurley Medical Center in Flint, says a dose of 10 grams can be fatal. The average look-alike, experts say, contains 200 milligrams, so a 10-gram dose would be 50 pills.

But Jerry O'Donnell, the director of the police-department laboratory in Albuquerque, N.M., says there is "no way to tell" what constitutes an overdose because "it varies from person to person." Mr. O'Donnell says that three young men aged 15 to 20 died in Albuquerque during the last year after taking look-alikes. While the victims had been doing some drinking, Mr. O'Donnell says, all had been "in excellent physical condition; they all died of brain hemorrhaging, which is symptomatic of ephedrine (sulfate) and PPA (phenylpropanolamine)."

Firms Take Steps

Some established drug companies are trying to dissociate themselves from look-alikes. SmithKline Corp. in Philadelphia discontinued its green-and-clear diet-capsule line, Dexamyl, after it discovered that capsules disguised as Dexamyl were being sold as speed. Pennwalt Corp.'s Philadelphia division has successfully barred four companies from pushing imitations of its popular Biphetamine 20—the real "black beauties."

The founder of the look-alike industry, William Saye, 38, of Fairburn, Ga., applauds the prohibitive measures. "Today, it is being abused," he says. "Kids don't know how to handle business. There are too many bathtub operations in existence now and not enough quality controls."

Mr. Saye started selling caffeine pills wholesale out of his truck cab in Georgia in 1975. The next year, as business expanded, he set up Saye Drug Co. there. In 1977, he moved the company to a Tampa warehouse and changed its name to OTW Distributors Inc. By the end of that year, he had almost 50 employes selling the pills at truck stops in almost every state. The salesmen were called "peashooters," and drivers would contact them over citizens'-band radio. Mr. Saye says that his salesmen, when asked, were supposed to tell a customer that the pills weren't speed—or risk being fired. By 1980, when he retired from the drug trade, Mr. Saye's business was bringing in about $6 million annually in sales. The pills were obtained from a Long Island manufacturer. Evidently it was all perfectly legal.

Despite "hassles with the police and the press," Mr. Saye says, "I'm proud of what I've done. I ran the business right. Now I just want to lead a normal life, raise some beef cattle, and enjoy my two girls and two boys."

Small Operations

Today, most wholesale distributors are small operations, often a husband-and-wife team working out of their home. "About all they have to do is file a one-page registration form," says an official of the Food and Drug Administration. Sales are handled mainly by mail or phone except for a few storefront concerns in Albuquerque and Los Angeles with such names as the Source and the Pick-Me-Ups.

The distributors don't advertise much, though some ads run occasionally in local and college newspapers and a few national magazines. Instead, they leave calling cards in such places as truck-stop restrooms and college dormitories—a practice started by them. Supplies come from larger wholesalers such as Clifton Pharmacal Inc. in Milroy, Pa., which has its own pharmaceutical factory, or from one of an estimated 10 to 12 big manufacturers in Pennsylvania and on Long Island. They are sold in high volumes, in lots of 100 or 1,000, at prices ranging from about two cents to 10 cents a pill. On the street, says Mr. Tudor of the Ohio pharmacy board, they fetch anywhere from 50 cents to $8 a pill.

Most distributors won't divulge earnings, but estimates are that average sales for a medium-sized company can range between $500,000 and $1 million a year. Jerry Hecht, the founder of the Pick-Me-Ups in Albuquerque, says that his six stores average $1,000 a week each in profits.

P:60 RKY. MTN. NEWS 4/2/82

At least 12 deaths attributed to use of 'look-alike' drugs

CHICAGO (UPI) — Counterfeit pills sold increasingly on the streets as "look-alike" hard drugs have killed at least a dozen users, the American Medical Association reported Thursday.

Authorities are essentially powerless to prosecute the sale by pushers of such drugs, which contain a combination of easily attainable ingredients found in appetite suppressants and decongestants, the AMA report said.

"They're called look-alikes because they mimic the size, shape and color of controlled substances — usually amphetamines or tranquilizers," said the AMA report.

Counterfeit "black beauties," "yellow jackets," "dexies" and other drug culture names for speed have caused 12 deaths, federal Food and Drug Administration investigations have confirmed.

They include a 17-year-old Belvidere, Ill., girl who died after taking what police presumed to be "black beauties," and a 17-year-old Albuquerque boy who consumed two counterfeit biphetamines (a type of amphetamine), lapsed into a coma and died. Several other victims have suffered paralysis after suffering strokes because of the drugs.

In addition, at least nine suicides are linked to conterfeit drugs, most of them attributed to caffeine overdose.

A typical "look-alike," manufactured for a few pennies and sold to unwitting purchasers at huge profits, contains up to 200 milligrams caffeine, 50-75 milligrams phenylpropanolamine and 30 milligrams ephedrine. Their combined effect on a user "is unpredictable," the FDA said.

STATE OF ALASKA
THE LEGISLATURE

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 1, 1983

SUBJECT: Imitation controlled substances (HB 10)

TO: Representative Mitchell E. Abood, Jr.

FROM: James H. Lear
Legislative Counsel

You have asked for a sectional analysis of HB 10 (An Act relating to imitation controlled substances). HB 10 is based on the Model Imitation Controlled Substances Act drafted by the Drug Enforcement Agency of the United States Department of Justice in October, 1981.

The bill consists of one section creating a new Chapter 14 in AS 17. The chapter contains several new sections:

Sec. 17.14.010. Prohibits the manufacture or distribution of imitation controlled substances as defined in Sec. 17.14.099(3) or possession of the same with intent to distribute. Violation of the section is punishable as a class C felony (maximum of five years in prison and maximum fine of $50,000). It is not a crime in certain instances if the substance is to be used as a placebo for medical treatment. This section is intended to curb the distribution of noncontrolled substances currently sold over-the-counter if manufactured or distributed as imitation controlled substances.

Sec. 17.14.015. Prohibits the possession of certain noncontrolled substances with the intent to manufacture an imitation controlled substance. The substances are those most frequently used to manufacture imitation controlled substances. Violation of this section is punishable as a class C felony. This section is not part of the "Model Act".

Sec. 17.14.020. This section imposes a stricter punishment for distribution of imitation controlled substances by an

adult to a minor. The crime is a class B felony punishable by a maximum of ten years in prison and a maximum fine of $50,000.

Sec. 17.14.030. Prohibits advertisement to promote the distribution of an imitation controlled substance. This crime is punishable as a class C felony. The section is directed mainly at those persons who promote the distribution of an imitation controlled substance by soliciting advertising space in newspapers, magazines, et cetera, or by publicly distributing advertisements for an imitation controlled substance. A publisher and a distributor of not only a local but of a national publication could be prosecuted for violation of sec. 17.14.030 if the state can establish beyond a reasonable doubt that the person had the requisite mental state. The defendant must have known that the purpose of the advertisement or solicitation was to promote the distribution of an imitation controlled substance in the State of Alaska. It is obvious that it would be easier for the state to prosecute an individual who resides within the state, but Alaska has criminal jurisdiction over a nonresident publisher of a national magazine or newspaper who knowingly publishes an advertisement to promote the distribution of an imitation controlled substance if that person consumates the crime from outside the state by the intervention of an innocent or guilty agent, such as a newsstand operator, within the state (AS 12.05.010 -- crime commenced outside the state but consumated inside).

Sec. 17.14.040. This section specifies that manufacturing, distributing, or possessing an imitation controlled substance solely for use as a placebo under prescription is not a crime.

Sec. 17.14.050. This section addresses the circumstances under which a violator of the chapter may have to forfeit to the state those items associated with the perpetration of offenses involving imitation controlled substances. The section is rather lengthy since it is intended to provide adequate guidelines for determining what property may be subject to forfeiture, how it is to be seized, what procedure is to be used for litigating the interests of possible owners, disposition of forfeited property, et cetera. If the degree of detail in this section were absent, an individual might successfully challenge the forfeiture on the basis that it constitutes a taking of property without due process.

The section is almost identical to AS 17.30.110, the forfeiture provision of the 1982 drug bill enacted by Chapter 45, SLA 1982.

Sec. 17.14.099. Definition section. "Controlled substance" is defined by incorporating the definition codified in AS 11.81.900(6). However, sec. 13, Chapter 45, SLA 1982, repealed and reenacted that paragraph by substituting the following language for the former definition:

> (6) "controlled substance" has the meaning ascribed to it in AS 11.71.900(4).

Rather than requiring the reader to make a two-step process to get to the definition, the internal reference on line 18, page 8, of HB 10 should be amended to read "AS 11.71.900(4)".

The other important definition is the definition of "imitation controlled substance". Basically, a substance is an imitation controlled substance if it appears by dosage unit appearance to be a controlled substance or if it is represented as one. The definition enumerates those circumstances under which such a representation could be found.

MEMORANDUM

TO: Representative Mitch Abood
Attention: Carol Horos

FROM: Christine Johnson, Research Staff

RE: Look-alike Drug Laws
Research Request 82-186

Carol Horos of your staff has asked us for the number of states which have passed look-alike drug laws and the number of states in which such legislation has been proposed. We received the following information from the National Conference of State Legislatures (NCSL):

- As of August 1982, thirty-six states had adopted legislation restricting the sale of look-alike drugs.

- Fourteen states* did not have look-alike drug laws in August of this year; however, legislation was pending in four of these states (Michigan, Nebraska, New Mexico, and Tennessee). Legislation has also been considered in one other state (Texas), although no law was ever passed.

The federal Drug Enforcement Administration has drafted a model look-alike drug law for states; we have requested a copy of this legislation and will forward it to you when it arrives. We have also enclosed two articles on look-alike drugs which may be of interest to you.

If we can provide any further information, please don't hesitate to contact us.

---

*States without look-alike drug laws include: Alaska, Hawaii, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, Nevada, New Mexico, North Dakota, Tennessee, Texas, West Virginia, Wyoming.

FDA Seeking to Bottle Up Fake Narcotics

By Pete Earley
Washington Post Staff Writer

In 1980, an Albuquerque teenager died after drinking several shots of bourbon at a Christmas party and swallowing two capsules he had been told were amphetamines. Police discovered that the capsules were not amphetamines, but non-prescription drugs made to look like them.

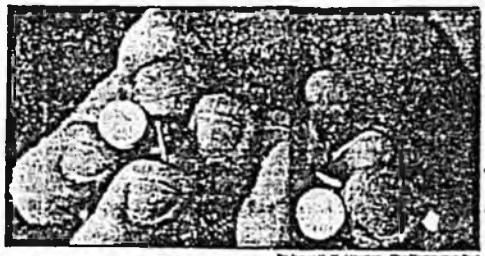
Since then, imitation amphetamines and barbiturates have been linked to 11 other teen-age deaths, according to the Food and Drug Administration.

The federal government faces an unusual jurisdictional problem in trying to control the so-called look-alike drugs. Because their ingredients can be obtained without a prescription, the Drug Enforcement Administration said it doesn't have jurisdiction. The FDA maintains it can play only a limited role because it has certified the ingredients as safe.

While the agencies say they are taking what steps they can, they are somewhat reluctant to take on new enforcement tasks in times of tight budgets.

Fake amphetamines contain large amounts of caffeine, phenylpropanolamine (a nasal decongestant and appetite suppressant) and the decongestant ephedrine. "Imitation" barbiturates contain acetaminophen, salicylamide, chlorpheniramine or other sedatives and hypnotic agents.

When the ingredients are taken separately and in small doses, they are considered safe, an FDA spokesman said. But they can cause nervousness, insomnia, temporary psychotic episodes, cerebral hemorrhage, drowsiness or death if mixed together in large amounts or taken with alcohol.



Many young people take them that way, a DEA spokesman said, because they believe that will help simulate the "high" caused by controlled substances. In mid-1981, DEA estimated that 30 million doses of fake narcotics were being manufactured each week and distributed through a network of 200 dealers.

Since 1980, FDA has filed administrative complaints against 45 companies that it claims violated counterfeit provisions of the Food, Drug and Cosmetic Act by making imitation drugs. Over the same period, the U.S. Postal Service has filed 20 complaints that accused drug makers of false advertising because they did not disclose that their products could cause illness or death.

Last week, FDA unveiled what it believes is its toughest tactic to date. It informed 15 small companies that they must submit any products that contain combinations of caffeine, ephedrine and phenylpropanolamine for certification as new drugs. "We have researched this extensively and can find no precedent for the three-drug combination. It would be hard to believe that anyone can show a medical purpose or need for these drugs," said Bill Grigg, an FDA spokesman. In effect, Grigg said, FDA's action will force many of the stimulants off the market.

Last year, DEA drafted a model law for states to ban look-alike drugs. So far, 30 states have enacted legislation. DEA also convinced three companies that make drug capsules to voluntarily refuse orders from suspected imitation drug makers.

While federal officials are confident that their tactics have driven

By Jamie K. W. Atkerson—The Washington Post

An example of look-alike, imitation drugs, left, and the real controlled substances.

Sen. Gordon J. Humphrey (R-N.H.) said such maneuvering has convinced him that the only way to eliminate the imitation drugs is by giving the DEA, FDA and the Postal Service jurisdiction. He has introduced legislation that would prohibit the manufacture of drugs that "look like or are represented to be controlled substances." Products that promote drug abuse would be barred from the mails and FDA counterfeit laws would be expanded.

But at a recent hearing, Haislip urged Congress to delay passing new legislation. "We are trying to solve this problem through leadership. If we can't solve the problem through state laws then we might need to do it at a federal level, but that's not yet clear," he said.

Illinois Attorney General Tyrone Fahner disagreed with Haislip. Fahner told Congress that although his state has moved against dealers, it still has problems. "Some companies we have sued and closed have popped up again under a new name and location. Just because we stop a look-a-like distributor in Illinois doesn't mean we have solved the national problem."

SUBJECT: HB 10, Imitation Controlled Substance Act

Dear Mr. Rexinger:

Thank you for your interest and offer of help in drafting a proper subject act.

Enclosed for your further information is a copy of the Act as amended and passed from the House Judiciary Committee on February 22, 1983.

I welcome any further comments you have regarding this or any other act we have under consideration.

Again, thank you for becoming involved in our legislative process.

Regards,

Representative Charlie Bussell
Chairman, Committee on Judiciary

Representative Mitch E. Abood
Pouch V - Room 102
Alaska State Legislature
Juneau, Alaska 99811

Attn: July McGhie

Dear Representative Abood:

The purpose of this letter is to follow-up my conversation with Ms. McGhie during which we discussed several amendments to HB 10 — the Imitation Controlled Substances Act. As I explained to Ms. McGhie, The Proprietary Association is a 102-year-old national trade association which represents manufacturers of nonprescription, i.e., over-the-counter (OTC) medicines such as St. Joseph's Aspirin for Children, Anacin, Bayer Aspirin, Contac, Tylenol, Excedrin, Pepto Bismol and many others.

Enclosed is a summary of the amendments to HB 10. Also enclosed is a memorandum on street-drug look-alikes, the U.S. Drug Enforcement Administration Imitation Controlled Substances Model State Bill, the American Medical Association Model State Bill, and the Imitation Controlled Substances Amendment as passed the United States Senate on September 30, 1982. Please note that several of these amendments appear in the text of the enclosed bills. The amendments are marked by number for your convenience and correspond to the summary of our amendments.

Please do not hesitate to contact us if we can be of further assistance. In the mean time, I intend to keep in contact with Ms. McGhie and look forward to speaking with you in the future.

Thank you.

Sincerely,

Allan R. Rexinger

AMENDMENTS TO ALASKA HB 10
IMITATION CONTROLLED SUBSTANCES ACT

*CAPITALS indicate material to be added.
**[Bracketed] material is to be deleted.

AMENDMENT I

On page 1, line 12 after the word "person" add the following words:

KNOWINGLY OR INTENTIONALLY

Comment: The addition of these words adds specific intent to the Section which is necessary to prevent coverage of a person who does not intend to manufacture, distribute, or possess an imitation controlled substance, but who by unforseen circumstances becomes unwhitingly liable under the Act.

AMENDMENT II

On page 2, line 14 after the word "possesses" add the following:

: (1)

On page 2, line 16 after the word "research" add the following:

, (2) A NONCONTROLLED SUBSTANCE THAT WAS INITIALLY INTRODUCED INTO COMMERCE PRIOR TO THE INITIAL INTRODUCTION INTO COMMERCE OF THE CONTROLLED SUBSTANCE WHICH IT IS ALLEGED TO IMITATE, OR (3) AN IMITATION CONTROLLED SUBSTANCE FOR USE IN U.S. FOOD AND DRUG ADMINISTRATION INVESTIGATIONAL NEW DRUG TRIALS.

Comment: Two additional exemptions are needed beyond that already provided for placebos. The first would provide an exemption for a legitimate over-the-counter medicine that is already on the market and which may be rendered in violation of the Act if a controlled substance is subsequently marketed with identical dosage unit appearance. It is possible therefore that the legitimate OTC would be forced off the market or its manufacturer made subject to a penalty by the subsequent manufacture of a controlled substance. We do not believe this is the intention of the bill. In addition, an exemption ought to be provided for manufacturers of drugs that are used in U.S. Food and Drug Administration approved investigational new drug trials. These tests are conducted with the approval of the FDA.

AMENDMENT III

On page 8, strike line 22-29 and in lieu thereof add the following:

(3) "IMITATION CONTROLLED SUBSTANCE" MEANS ANY SUBSTANCE THAT IS NOT A CONTROLLED SUBSTANCE, AND THAT BY DOSAGE UNIT APPEARANCE (INCLUDING COLOR, SHAPE, SIZE, AND MARKINGS) OR BY REPRESENTATIONS WOULD LEAD A REASONABLE PERSON TO BELIEVE THAT THE SUBSTANCE IS A CONTROLLED SUBSTANCE; THE TERM "REPRESENTATIONS", AS USED IN THIS PARAGRAPH, INCLUDES BUT IS NOT LIMITED TO THE FOLLOWING:

Comment: By removing any reference to specific drug entities or ingredients, the definition of an "imitation controlled substance" is broader and would necessarily cover the widest possible range of noncontrolled substances intended to imitate controlled substances. Use of specific references to drug entities or ingredients creates room for reformulation for the purpose of escaping coverage under the current language of HB 10.

MEMORANDUM

STREET-DRUG LOOK-ALIKES

INTRODUCTION

The Proprietary Association is a 100-year-old trade association which represents manufacturers of nonprescription, i.e., over-the-counter (OTC) medicines such as St. Joseph's Aspirin for Children, Anacin, Distan, Contac, Tylenol, Excedrin, Sine-Off and many others. These products are classified as drugs under both the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 300, et. seq.] and State statutes. Many of the Association's members market OTC products in this state and/or maintain plants and facilities here, employing many persons. In addition, these products are sold at retail by thousands of food stores, pharmacies, discount and department stores, and other retail outlets. The Association is therefore interested in the proposed legislation.

NON-PRESCRIPTION DRUGS

Responsible self-medication is a valuable and crucial part of our health care system and economy. For the individual, it is a familiar, inexpensive, and convenient method of treating common discomforts. For the health care system, it shields against a deluge of visits to health professionals for minor self-limiting disorders. For the national economy, self-medication helps contain the demand for unnecessary visits to the doctor and thus the total cost for formal medical services. As the 1978 edition of the U.S. Department of Commerce's U.S. Industrial Outlook stated:

> "Seventy-five percent of all illness and injuries are initially treated through self-care and OTC medications. If only a small percentage of self-treatment was shifted to medical practitioners, the patient load would disrupt the U.S. health care system" U.S. Industrial Outlook 1978, U.S. Department of Commerce, January, 1978, page 131.

OTC Labeling

Because OTC medicines are designed for use by consumers without medical supervision, federal and state law requires that they contain considerable U.S. FDA approved labeling information for the benefit of consumers -- labeling not carried by street-drug look-alikes. This information includes:

(1) the product name;

. . . /

Proposed Legislation Should Not Affect Legitimate Medicines

Laws to attack the problem of these street-drug look-alikes, however, must not be so over-broad as to make criminal the good faith marketing of legitimate drug manufacturers, nor must it make it impossible for them to comply with the law.

- Thus, a definition of an "imitation controlled substance" should take into consideration representations made about the substance as well as overall appearance of the final dosage form specifically including color, size, and shape and markings or lack thereof in determining whether a drug or a transaction in ...ng the drug is illegal (cf. New York S 7994, February 11, 1982 attachment "green").

- In order to prevent a lawfully marketed nonprescription drug from being made illegal by introduction of a new controlled substance, nothing in the act should apply to a noncontrolled substance that was initially introduced into commerce prior to the introduction into commerce of a controlled substance.

- In addition, prescription drugs, placebos, and drugs approved by FDA for use in investigational new drug trials should be excluded from the legislation since they are already under strict professional supervision and the legislation should not nor need not interfere with legitimate medical practice or research.

- The legislation should also take into account the intent of the manufacturer or distributor by considering the packaging, labeling, advertising and promotion of the drugs, along with the other criteria discussed.

Medications lawfully marketed under State and Federal law should not be forced off the market. None of these drugs have any reason, nor is there any intent, to look like a controlled substance. There are some 300,000 OTC products on the market, very many of them solid dosages, and many hundreds of brand-name and generic controlled substances.

Given the relatively few color choices - red/blue/yellow/green/white; the fact that timed dosages have clear tops to indicate timed release beads; - and the fact that there is no comprehensive pictorial index to which a manufacturer might go to determine similarity of mere color, size and shape, there is a possibility of some accidental similarity in color, shape and size in the manufacture of legitimate non-prescription medicines. Their labeling, advertising, promotion and markings make it clear, however, that they should not be swept up in the attempt to curb otherwise illicit activities.

PA Memorandum ("yellow")

MJU/dmw
3/31/82

(2) a statement of identity;
(3) a list of ingredients;
(4) the net quantity of the contents;
(5) the name and address of the manufacturer, packer, or distributor;
(6) the indications for use;
(7) directions and dosage instructions;
(8) warnings and cautionary statements;
(9) drug interaction precautions, if any; and
(10) an expiration date.

The Association is well aware of the critical functions which the labeling of an OTC serves in the appropriate and responsible use of OTC medicines. The Association makes available to consumers through pharmacists thousands of pamphlets entitled "Medicine Labels and You" (enclosed). In addition, the Council on Family Health, a non-profit organization funded by many of the Association's members, has broadcast millions of dollars worth of public service announcements on radio television urging consumers to read the label on OTC medicines.

Street-Drug Look-Alikes

The subject of the legislation is the fraudulent promotion of OTC medicines intentionally made to resemble controlled substances. The Association and its members are opposed to such practices because they necessarily involve the promotion and marketing of OTCs without adequate labeling, or encourage the disregard of OTC labeling, as well as the use of OTCs for inappropriate conditions. In addition, they damage the public's confidence in OTCs as the safe and effective medicines which they are when used as directed.

The Proprietary Association was first asked to assist in combating the marketing of street-drug look-alikes in 1979 when it was invited to testify before the Oregon Board of Pharmacy. The Association has also testified before the Wisconsin State Senate Committee on Judiciary and Consumer Affairs. The Pennsylvania House Health & Welfare Committee has provided technical advice to many other state legislatures. We have organized and keep updated a compilation of street-drug look-alike legislation which has been considered or enacted in the states. The Association has distributed this material to legislatures, pharmaceutical associations, boards of pharmacy, health officials and other interested persons in several states, including Colorado, Illinois, Iowa, Kentucky, Louisiana, Michigan, Missouri, Nebraska, New York, Utah, and Washington.

Because the marketing of imitation controlled substances has grown and changes in character in recent months, the Association has also discussed model state legislation with the U.S. Drug Enforcement Administration (attachment "buff") and the American Medical Association (attachment "pink"). Examining present law, however, the Association has concluded that the promotion of street-drug look-alikes is already illegal under several provisions of the Federal Food, Drug, and Cosmetic Act (attachment "yellow"). Accordingly, on September 21, 1981, in a letter to FDA General Counsel Thomas Scarlett, the Association formally requested that FDA take action against the practice. On September 30, 1981, FDA announced the seizure--as street-drug look-alikes--of the products of nine manufacturers in five states (attachment "blue"). The Association also has been working with the Post Office Department which has been moving against the practice.

DRUG ENFORCEMENT ADMINISTRATION
IMITATION CONTROLLED SUBSTANCES
MODEL STATE BILL
WITH CHANGES PROPOSED BY THE PROPRIETARY ASSOCIATION
AND THE PHARMACEUTICAL MANUFACTURERS ASSOCIATION

Section 1. Definitions

a. The term "controlled substance" means a substance as defined in (insert appropriate citation for definition of "controlled substance" in State Controlled Substances Act).

b. The term "distribute" means the actual, constructive, or attempted transfer, delivery, or dispensing to another of an imitation controlled substance.

c. The term "manufacture" means the production, preparation, compounding, processing, encapsulating, TABLETING, packaging, or repackaging, labeling or relabeling, of an imitation controlled substance.

d. The term "imitation controlled substance" means a substance OTHER THAN A PRESCRIPTION DRUG that is not a controlled substance, which by OVERALL dosage unit appearance (including color, shape, size and markings), AND ~~or~~ by representations made, would lead a reasonable person to believe that the substance is a controlled substance. NOTHING IN THIS ACT SHALL APPLY TO A NON-CONTROLLED SUBSTANCE THAT WAS INITIALLY INTRODUCED INTO COMMERCE PRIOR TO THE INITIAL INTRODUCTION INTO COMMERCE OF THE CONTROLLED SUBSTANCE WHICH IT IS

*Deletions indicated by strikeout.
Additions indicated by CAPITALS.

Retyped by The Proprietary Association

(over, please)

ALLEGED TO IMITATE. ~~In those rare cases when the appearance of the dosage unit is not reasonably sufficient to establish that the substance is an "imitation controlled substance" (for example in the case of powder or liquid).~~ The court or authority concerned should consider, in addition, to all other logically relevant factors, the following factors as related to "representations made" in determining whether the substance is an "imitation controlled substance":

(1) Statements made by an owner or by anyone else in control of the substance concerning the nature of the substance, or its use or effect.

(2) ~~Statements made to the recipient that the substance may be resold for inordinate profit.~~ WHETHER THE CONSIDERATION TENDERED IN EXCHANGE FOR THE NONCONTROLLED SUBSTANCE SUBSTANTIALLY EXCEEDS THE REASONABLE VALUE OF THE SUBSTANCE, CONSIDERING THE ACTUAL CHEMICAL COMPOSITION OF THE SUBSTANCE AND, WHERE APPLICABLE, THE PRICE AT WHICH OVER-THE-COUNTER SUBSTANCES OF LIKE CHEMICAL COMPOSITION SELL.

(3) Whether the substance is packaged in a manner normally used for illicit controlled substances.

(4) Evasive tactics or actions utilized by the owner or person in control of the substance to avoid detection by law enforcement authorities.

. . . /

(5) Prior convictions, if any, of an owner, or anyone in control of the object, under state or Federal law related to controlled substances or fraud.

(6) The proximity of the substances to controlled substances.

Section 2. Offenses

a. Manufacture or distribution - It is unlawful for any person to manufacture, distribute, or possess with intent to distribute, an imitation controlled substance. Any person who violates this section shall be guilty of a crime and upon conviction may be imprisoned for not more than _____, fined not more than _____, or both.

b. Distribution to a minor - Any person 18 years of age or over who violates Section 2a by distributing an imitation controlled substance to a person under 18 years of age is guilty of an aggravated crime and upon conviction may be imprisoned for not more than _____, fined not more than _____, or both.

c. Possession - It is unlawful for any person to use, or to possess with intent to use, an imitation controlled substance. Any person who violates this section is guilty of a crime and upon conviction may be imprisoned for not more than _____, fined not more than _____, or both.

. . . /

d. Advertisement - It is unlawful for any person to place any newspaper, magazine, handbill or other publication, or to post or distribute in any public place, any advertisement or solicitation with reasonable knowledge that the purpose of the advertisement or solicitation is to promote the distribution of imitation controlled substances. Any person who violates this section is guilty of a crime and upon conviction may be imprisoned for not more than _____, fined not more than _____, or both.

e. Immunity - No civil or criminal liabililty shall be imposed by virtue of this Act on any person ~~registered under the Controlled Substances Act~~ who manufactures, distributes, or possesses ~~an imitation controlled substance for use as~~ a placebo ~~by a registered practitioner~~ in the ORDINARY course of professional practice or research OR FOR USE IN U.S. FOOD & DRUG ADMINISTRATION APPROVED INVESTIGATIONAL NEW DRUG TRIALS.

Section 3. Forfeiture

(Insert designation of state civil forfeiture section) is amended to provide for the civil forfeiture of imitation controlled substances by adding the following after paragraph (insert designation of last category of forfeitable property):

"( ) all imitation controlled substances as defined by (list appropriate citation for this Act in the state's statutes).

. . . /

Section 4. Severability

If any provision of this Act or the application of the Act to any person or circumstances is held invalid, the invalidity does not affect the other provisions or applications of the Act which can be given effect without the invalid provision or application and to this end the provisions of this Act are severable.

MJU:khp

2/2/81

Revised
January 1982

In The General Assembly

State of_____

A BILL

For An Act Pertaining to the Unlawful Manufacture, Processing, Packaging, Distribution, Delivery and Sale of Imitation Controlled Substances

Be it enacted by the Legislature of the State of_____

Section 1. The Legislature hereby finds and declares that there is a serious health threat in this state presented by tablets and capsules which contain only nonprescription ingredients, but which are manufactured to resemble various controlled drugs in size, shape, color and markings. The purpose of this legislation, therefore, is to prohibit the manufacture, processing, packaging, distribution, delivery and sale of such substances and to provide criminal penalties therefor.

Section 2. Except as otherwise may be authorized by law, no person shall knowingly:

(a) Manufacture, process, package, distribute or sell a noncontrolled substance, other than a prescription drug, which, or the label or container of which, substantially resembles a specific controlled substance;

(b) Distribute or sell a noncontrolled substance upon the express or implied representation that the substance is a controlled substance;

(c) Distribute or sell a noncontrolled substance upon the express representation that the recipient, in turn, will be able to distribute or sell the substance as a controlled substance.

Section 3. In determining whether there has been a violation of Section 2 (a), the following factors shall be considered:

(a) Whether the noncontrolled substance in its overall finished dosage form is substantially similar in size, shape, and color, and markings (or lack thereof) to a specific controlled substance;

~~(b) Whether the noncontrolled substance in its finished dosage form has substantially similar markings on each dosage unit as a specific controlled substance;~~

(b) Whether the noncontrolled substance in its finished dosage form is packaged in a container which, or the labeling of which, bears markings or printed material substantially similar to that accompanying or containing a specific controlled substance.

Section 4. In determining whether there has been a violation of Section 2 (b), the following factors, in addition to those factors set out in Section 3, shall be considered:

(a) Whether the noncontrolled substance is packaged in a manner ordinarily used for the illegal delivery of a controlled substance;

(b) Whether the consideration tendered in exchange for the noncontrolled substance substantially exceeds the reasonable value of the substance, considering the actual chemical composition of the substance and, where applicable, the price at which over-the-counter substances of like chemical composition sell.

(c) Whether the consideration tendered in exchange for the noncontrolled substance approximates or exceeds the price at which the substance would sell upon illegal delivery were it actually the specific controlled substance it physically resembles.

Section 5. In any criminal prosecution brought under this Act, it shall not be a defense that the defendant believed the noncontrolled substance actually to be a controlled substance.

Section 6. The provisions of this Act shall not be applicable to:

(a) Law enforcement officers acting in the course and legitimate scope of their employment;

(b) ~~Persons who~~ The manufacture, processing, ~~package~~ packaging, ~~distribute~~ distribution or ~~sell~~ sale of noncontrolled substances to licensed medical practitioners for use as placebos in the course of professional practice or research, or for use in clinical research conducted pursuant to the Federal Food, Drug and Cosmetic Act;

(c) Licensed medical practitioners, pharmacists and other persons authorized to dispense or administer controlled substances and acting in the legitimate performance of their professional license.

(d) For purposes of Section 2(a), a noncontrolled substance in its finished dosage form that was initially introduced into commerce prior to the initial introduction into commerce of a controlled substance in its finished dosage form it may substantially resemble.

Section 7. Violation of this Act shall be a _____, punishable by a fine of not more than _____, and/or by a period of imprisonment not to exceed _____.

Section 8. If any provision of this Act or the application thereof to any person, thing or circumstance is held invalid, such invalidity shall not affect the provisions or application of this Act that can be given effect without the invalid provision or application, and to this end the provisions of this Act are declared to be severable.

Section 9. This Act shall become effective _____.

NOTE: Stricken material to be omitted.
Underscored material to be added.

No. 133—Part II

Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, SECOND SESSION

Vol. 128 WASHINGTON, THURSDAY, SEPTEMBER 30, 1982 No. 133—Part II

Senate

THURSDAY, SEPTEMBER 30, 1982

(Legislative day of Wednesday, September 8, 1982)

VIOLENT CRIME AND DRUG ENFORCEMENT IMPROVEMENTS ACT OF 1982—Continued

UP AMENDMENT NO. 1856

Mr. THURMOND. Mr. President, I send to the desk certain amendments—in fact a group of amendments that I hope can be considered and adopted en bloc.

The PRESIDING OFFICER. The clerk will state the amendments.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes an unprinted amendment numbered 1856

(S. 12789)

SENATOR DANFORTH'S AND SENATOR HUMPHREY'S SIMULATED CONTROLLED SUBSTANCES AMENDMENTS (NOS. 9 AND 10)

The amendments provide Federal criminal sanctions for the manufacture, sale, and advertising of simulated controlled substances. The sale, manufacture, and distribution of these drugs—defined as any drug containing non-controlled substances that purport to act like a controlled substance, either stimulant or depressant—would be punishable by imprisonment of not more than two years. Distribution to a minor would carry a four-year penalty. Advertising these drugs would be a misdemeanor. The Food and Drug Administration would have the primary enforcement authority.

(S. 12795)

Reproduced by The Proprietary Association
pa 10/4/82

"SEC. 308. (a) For purposes of this section, the term—

"(1) 'imitation controlled substance' means any substance other than a controlled substance or prescription drug, or combination of such substances, which is marketed, sold, or distributed to encourage recreational drug use or abuse or any similar nonmedical use and—

"(A) by representation or appearance (including color, shape, size, and markings) would lead a reasonable person to believe that the substance is a controlled substance; or

"(B) purports to act, either alone, in multiple doses, or in combination with a substance or substances, like a controlled substance, either stimulant or depressant as defined in section 102(9) of the Controlled Substances Act;

"(2) 'distribute' means the actual, constructive, or attempted transfer, delivery, or dispensing to another of an imitation controlled substance;

"(3) 'manufacture' means the production, preparation, propagation, compounding, or processing of an imitation controlled substance, and includes any packaging or repackaging of such substance or labeling or relabeling of its container; except that such term does not include the preparation, compounding, packaging, or labeling of an imitation controlled substance in conformity with applicable State or local law by a practitioner as an incident to his administering or dispensing of such substance in the course of his professional practice; and

"(4) 'controlled substance' is used as defined in section 102(6) of the Controlled Substances Act.

"(b)(1)(A) Except as provided in subparagraph (B), it shall be unlawful for any person knowingly or intentionally to create, manufacture, or distribute, or possess with intent to create, manufacture, or distribute an imitation controlled substance. Any person who violates this paragraph shall be sentenced to a term of imprisonment of not more than two years, a fine of not more than $10,000, or both.

"(B) Subparagraph (A) does not apply to the creation, manufacure, distribution, or possession of an imitation controlled substance by a person if the imitation controlled substance is created, manufactured, distributed, or possessed for use as a placebo in the course of the professional practice of a practitioner registered under part C of the Controlled Substances Act or in research conducted under section 505(i) of this Act or conducted in connection with an application filed under section 505(b) of this Act.

"(2) Any person at least 18 years of age who violates paragraph (1)(A) by distributing an imitation controlled substance to a person under 18 years of age shall be sentenced to a term of imprisonment of not more than four years, fined not more than $20,000, or both.

(c) It is unlawful for any person to place any newspaper, magazine, handbill, or other publication, or to post or distribute in any public place, any advertisement of solicitation with reasonable knowledge that the purpose of the advertisement or solicitation is to promote the distribution of imitation controlled substances. Any person who violates this subsection is guilty of a crime and upon conviction may be imprisoned for not more than one year, fined not more than $5,000, or both.".

(b) Subsection (a) of section 302 of such Act is amended by striking out "paragraphs (h), (i), and (j)" and inserting in lieu thereof "paragraphs (h) and (j)".

(11) On page 47, beginning with line 12, strike out all through line 2 on page 51 and renumber subsequent titles accordingly.

(12) On page 59, beginning with line 20, strike out all through line 6 on page 61 and insert in lieu thereof the following:

HUMPHREY, and I are offering an amendment to deal with the problem of look-alike drugs. Cosponsoring this amendment are Senators ANDREWS, GRASSLEY, and LUGAR. This amendment is now part of the lengthy committee amendment.

The past few years have witnessed the birth of a new drug problem which has most of the moral and medical dangers of narcotics abuse, and yet the drugs being abused are legal under current Federal law. In legal circles, these drugs are known as imitation controlled substances; the press refers to them as look-alikes; and street pushers call them turkeys or kiddie dope. The tablets are a combination of legal substances such as caffeine and powerful decongestants, but they are packaged to look like well-known controlled substances such as amphetamines and Quaaludes. Buyers, many of whom are junior high and high school students, think they are getting the illegal drugs when they are in fact receiving the look-alike.

According to the Drug Enforcement Administration, "the wholesale vending of look-alike drugs has become a major nationwide drug abuse problem." DEA reports that a handful of distributors at the end of 1979 grew to 110 in 1981. The pills are offered by the big distributors in 1,000-pill jars, with advertising that they can be sold individually for tremendous profits. DEA estimates that production of these pills has reached 30-million units per week.

Profits in this business are substantial. One small-time distributor of these drugs in Dallas, Tex., interviewed by the Texas Monthly, claims profits of $90,000 a year; the profits of some larger manufacturers based in New York and large distributors such as Mid-State Supply in Oklahoma and Chicago Specialty Distributors of Illinois run into the millions of dollars. Even more troubling, the over-the-counter drug store, devoted entirely to the sale of look-alikes, opened in Los Angeles last fall despite the protests of concerned citizens. Officials fear this to be the first of what may be a string of similar stores which could appear all over the Nation. Indeed, some have already opened in New Mexico.

The manufacturers and distributors of look-alike amphetamines and barbiturates use every means of advertising legally available. The small-time dealer in Dallas walks the Texas beaches distributing his business cards; larger companies use more sophisticated advertising methods. One look-alike company mails its color brochures to college freshmen. The Drug Enforcement Administration reports that another look-alike company which distributes to college campuses puts the following words on envelopes: "To College Mail Handlers: Please deliver to dorms that have a high proportion of drug users. We request that this letter be delivered to an individual that needs or uses drugs so that he may be given direction and shown the way." The implication here is that the brochure inside is from some public service organization which wishes to discourage drug abuse—a cheap ploy to reach potential customers.

The first danger of look-alikes is, then, their tendency to encourage drug abuse. As a member of the Ohio State Board of Pharmacy put it, look-alikes are "a very natural step up to the real thing." The medical hazards of look-alikes is a second. Consider the situation where someone has been using look-alikes and is then given the real amphetamine. One DEA official put it this way: "They take six or seven of the phonies and then they take six or seven of the real thing someday and they are dead." Many people do not realize that the look-alikes themselves can be lethal. The FDA has confirmed 12 deaths from look-alikes, and other sources say many more have died, and all within the last 2 years. For example, the Illinois Department of Public Health claimed six deaths in 9 months from look-alikes. Recent deaths attributed to look-alikes include a 17-year-old girl from Belvidere, Ill., a 21-year-old carnival worker from Columbus, Ga., and three young men from Albuquerque, N. Mex., aged 15 to 20, who were in excellent physical condition but suffered brain hemorrhaging from the drugs.

The medical problem presented by look-alike overdoses is ironic. Hospital officials usually find pills on the person of victims and assume the look-alikes to be real amphetamines. They then treat the patient for amphetamine overdose and he or she dies of a caffeine overdose. As an Illinois Department of Public Health official put it, "Treating a caffeine problem like it was amphetamines is useless." It is time to try to put an end to such deaths.

The Drug Enforcement Administration has advocated State and local laws prohibiting the manufacture and sale of look-alikes, and many of the States have responded. This is a commendable effort. But relying on the uncoordinated actions of a diverse group of lawmaking bodies is inadequate. The absence of Federal criminal sanctions makes the look-alike problem, according to a Delaware official, "like dealing with a greased pig." Presently, manufacturers or distributors chased out of one State simply set up in another. The American Pharmacy magazine has criticized the Federal Government for its failure to take action, saying "* * * there appears to be no central plan of action, no spearhead force to halt this nationwide scourge * * *. Yet this problem is a national one that must be stopped." In its report on look-alike drugs, Time magazine noted that "probably no serious headway will be made * * * until the Federal Government finds a way to block the look-alike loophole with a uniform national law."

Making the manufacture and sale of look-alike drugs a Federal crime will be more than a symbol, more than a gesture. Look-alike pushers are in business because their product is legal. One dealer has said: "This can't last forever. Someday they've got to write a law against it." Mr. President, we can no longer tolerate drug pushers who hide behind a facade of business cards, brochures, slogans, and sham corporations in an attempt to imitate the respectable business community.

This problem is beginning to get the attention it deserves. The Select Committee on Narcotics Abuse and Control in the House of Representatives, chaired by Congressman LEO ZEFERETTI of New York, has held very productive hearings on the dangers of look-alike drugs. Mr. ZEFERETTI has asked hard questions about how the Federal Government can stifle this new drug abuse problem that has grown to alarming proportions. The Select Committee on Narcotics has sought the advice of both the Food and Drug Administration, charged with protecting the health of the Nation against impure and unsafe drugs, and the Drug Enforcement Agency Administration, charged with suppressing narcotics and other dangerous drugs.

In September 1981, the Food and Drug Administration seized 15 million capsules and tablets and 20 million empty capsules used in the look-alike drug trade, as well as the machinery used to manufacture these items. This seizure was made possible because of the Federal statutes that outlaw the manufacture of counterfeit prescription drugs. This year, beginning in mid-August, the FDA seized 1 million finished capsules and tablets containing a combination of caffeine, ephedrine, and PPA, which had been advertised as "100 percent legal" pep pills and speed. The FDA has advised the manufacturers that pills with this combination of substances require their approval before they can be marketed. These and similar efforts on the part of FDA are commendable, and yet they are not enough. We must do more than confiscate the pills and implement new regulations.

In my view the time has come for Federal criminal sanctions for the manufacture, sale, and advertising of look-alike drugs. The amendment offered by the Senator from New Hampshire and myself is quite simple. It defines look-alike drugs and any other drug containing noncontrolled substances that purports to act like a controlled substance, either stimulant or depressant. The sale and manufacture and distribution of these drugs would be a felony under our amendment, with maximum imprisonment up to 3 years. Distributing these drugs to a minor would be an aggravated offense with imprisonment up to 4 years. Advertising these drugs would be a misdemeanor. The Food and Drug Admin-

istration will have the primary enforcement authority of these provisions. The FDA seems the best choice for enforcement because they now have jurisdiction over all noncontrolled substances, and they already have been active in the fight against look-alikes.

This amendment will not hamper any legitimate over-the-counter drug manufacturer. The intent of he amendment is clear. We are out to stop the look-alike drug trade, to stop those drugs sold primarily to teenagers and frequently passed off as controlled substances. The purpose of these drugs is clearly nonmedical.

The mushrooming look-alike drug market has been covered by all three national television networks and by publications ranging from American Pharmacy and Drug Topics to Time and the Wall Street Journal. I ask unanimous consent to insert into the RECORD a number of these program transcripts and newspaper and magazine articles about this drug problem.

I believe the Federal Government can afford to give no quarter to drug abuse. We must take sterner measures. This amendment is part of what must be a larger effort.

I want to extend my thanks to the chairman of the Judiciary Committee, Senator THURMOND, both for including this amendment in the committee amendment, and for the important work he has done on this entire legislation. Let me also extend my thanks to Mr. Paul Summitt, special counsel to the Judiciary Committee, who has devoted so much of his time to improving the criminal statutes of the United States. His tireless efforts are to be commended, and we in the Senate are glad to have the benefit of his able assistance.

Mr. HUMPHREY. Mr. President, I am delighted that the Senate Judiciary Committee has accepted this amendment to the crime bill because it contains a powerful new weapon against those who prey on our youth by manufacturing and distributing look-alike drugs to promote drug abuse.

Look-alikes resemble or duplicate the appearance of certain highly abused controlled substances such as amphetamines, barbiturates, and tranquilizers. They contain only substances commonly sold over the counter, but in multiple doses or in combination with aspirin or caffeine produce stimulant or depressant effects similar to the controlled substances they resemble.

Manufacturers and distributors are actively promoting these pills as the "legal way to get high" and have engaged in extensive advertising campaigns claiming their products to be both safe and legal. Look-alikes are sometimes advertised using the "street terms" for amphetamines and barbiturates such as black beauties yellow jackets, speed, and white crosses, and are promoted through college newspapers, handbills at rock concerts, direct mail solicitations, magazine advertisements, and storefront operations near school campuses.

The industry is lucrative and growing. According to the Drug Enforcement Administration (DEA), mail order and storefront wholesale distributors grew from a mere handful in early 1980 to more than 150 outlets in November 1981 and production had increased to 30 million dosage units per week. The profits to distributors have been estimated to range from $100,000 per year for the small operator into the millions for a larger distributor.

As chairman of the Subcommittee on Alcoholism and Drug Abuse, the rapid expansion of this industry is extremely disturbing to me. First and most importantly, look-alikes are not safe. If taken in multiple doses or in combination with alcohol, there is a risk of hypertension, cardiac problems, or cerebral hemorrhage. To date the Food and Drug Administration (FDA) has documented at least 12 deaths attributed to look-alike drugs. Additionally, the marketing of these legal drugs solely to encourage recreational mind alteration or experimentation supports the drug culture in our society and by encouraging teenagers to accept a climate of drug use, may lead to the later use of illegal drugs. Finally, development of the look-alike industry seriously undermines the efforts of all of us, both in Government and the private sector, who are working to educate young people about the serious risks of drug use and reduce the drug problem in our society.

Especially disturbing is the apparent lack of effective Federal jurisdiction over this industry. DEA has jurisdiction over drugs which are illegally trafficked if the drug components are scheduled in the Controlled substances Act. Since DEA's jurisdiction is limited to enforcement of the Controlled Substances Act, DEA has no power to restrict sales and distribution of look-alikes which do not contain controlled substances. DEA has been influential in the fight against look-alikes by developing and distributing to the States a Model Imitation Controlled Substances Act. To date 28 States have passed some legislation aimed at dealing with look-alikes and 17 more States have legislation pending. Individual statutes differ from jurisdiction to jurisdiction and manufacturers only seek new locations more favorable to their activities.

Over the counter substances are regulated by the FDA under the Federal Food, Drug and Cosmetic Act. The FDA has exerted jurisdiction under the counterfeit provisions of the act against those look-alikes designed to resemble specific controlled substances. In September 1981, the FDA seized materials and manufacturing equipment from nine manufacturers which produced and mislabeled counterfeit drugs, and is now proceeding to move against distributors under both its counterfeit and imitation provisions.

But as a result of these FDA enforcement actions manufacturers have become more sophisticated and are currently producing pills, tablets, and capsules that do not look like controlled substances and therefore are no longer subject to legal action under the Federal Food, Drug and Cosmetic Act. Now that the market has been established among our young people, these non-look-alikes are being promoted and sold in the same manner to willing buyers. As so often happens, the drug abuse promoters remain one step ahead of existing law.

Recently the FDA announced that the triple combination of phenylpropanolamine, ephedrine sulfate, and caffeine—the ingredients commonly contained in look-alikes—will now be regarded as a "new drug" and will thus require an application to FDA for marketing approval. Regulatory letters were issued to 14 manufacturers of triple combination products informing them that shipment of these drugs in interstates commerce without FDA approval violates the law. But there is already evidence that the response of these manufacturers has been to simply delete one or more of the three ingredients and thus produce a product that already possesses FDA approval. This is only further evidence of the ability of these manufacturers to modify their behavior to escape piecemeal Federal regulation, and of the need for a comprehensive Federal statute outlawing the manufacture and distribution of both look-alikes and non-look-alikes.

The U.S. Postal Service has also been involved in the look-alike drug enforcement effort. The Postal Service filed complaints against 41 distributors under its false representation statute and obtained false representation orders or consent agreements requiring postmasters to discontinue mail delivery to these distributors. The problem, however, continues. Most of the major promoters are evading the orders and agreements by restricting their business to telephone orders and payment by credit card, bank wire, or United Parcel Service COD.

Also, look-alike distributors and manufactuers no longer claim their products are absolutely safe and occasionally enumberate side effects related to consumption. Since the labels no longer misrepresent the nature of the product, the Postal Service is without

jurisdiction to restrain use of the mails for product distribution.

The only other Federal agency which may have jurisdiction over the advertising and distribution practices exhibited by look-alike dealers is the Federal Trade Commission (FTC), I am informed the Commission is reviewing its jurisdictional posture, but to date has not prosecuted.

Thus the look-alike industry appears to have circumvented ordinary regulation due to to the unique characteristics of this product and the industry's innovative ability to make changes in order to frustrate law enforcement efforts. We are confronted with an industry promoting drug use and abuse in our youth which we have no direct ability to regulate.

For these reasons, in July I introduced in the Senate a legislative package intended to supplement and clarify ongoing Federal enforcement efforts against look-alikes. The package of three bills was designed to fill the existing gaps and articulate a national policy in opposition to those who would encourage our children to take drugs for recreation, those who would make "pill popping" a national pastime, and those who would seek to make drug trafficking a socially acceptable occupation.

And it is for these reasons that I join today with Senator DANFORTH in offering this amendment to S. 2572, which incorporates the thrust of this look-alikes legislation. Our amendment is simple and straightforward. It outlaws the creation, manufacture, and distribution of imitation controlled substances which look like, or are represented to be controlled substances, and substances which purport to act like controlled substances, if they are marketed to encourage recreational drug use or abuse or any similar nonmedical use. Our definition of imitation controlled substances is broad enough to include both look-alikes and non-look-alikes, so long as they are marketed, sold, or distributed to encourage recreational drug use or abuse—but narrow enough to make it clear that prescription drugs, over-the-counter drugs, and legitimate generic drugs, over the counter drugs, and legitimate generic drugs are excluded. Exemptions are also included for placebos used in the course of professional practice and research.

The amendment imposes a felony sanction and intentional sales to minors would result in a doubled penalty. The amendment also imposes a misdemeanor sanction for advertisement of imitation controlled substances. Enactment of this legislation vests jurisdiction in the FDA to monitor and control the marketing practices of distributors.

Further, the amendment proposes to amend the Federal Food, Drug and Cosmetic Act to provide the FDA, acting through the U.S. Attorney, with power to seek injunctions to restrain manufacturers of counterfeit materials and equipment used to manufacture counterfeits but they are unable to restrain the manufacturer from distribution. Thus if the subject manufacturer has other warehouses stockpiled with counterfeits that are unknown to food and drug agents, the manufacturer can continue to distribute inventories until the FDA seizes it. The omission of injunctive power does not make sense and probably was a legislative oversight. The FDA should be empowered to restrain distribution by counterfeit manufacturers until it can be assured that future distribution by the subject manufacturer is in compliance with Federal Law.

Mr. President, enactment of this legislation will send a powerful signal that the Federal Government is firm in its resolve to shut down the look-alikes drug industry. Dr. Carlton Turner, Director of the President's Drug Abuse Policy Office, DEA, FDA, FTC, the National Institute on Drug Abuse, the U.S. Postal Service, the Internal Revenue Service, and the Consumer Product Safety Commission are now doing all within their power, through interagency meetings and cooperative efforts, to coordinate a Federal effort against these unscrupulous manufacturers and distributors. It is important that the Congress assist these agencies in this effort with a clear and comprehensive Federal policy outlawing the manufacture, distribution, and sales of look-alike drugs for the purpose of fostering drug abuse. I urge my colleagues to support this amendment in order that we may protect our young people by moving quickly and decisively against the look-alike industry.

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc.

The amendment (UP No. 1356) was agreed to.

(S. 12798)

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

It is estimated that enactment of this bill will result in 50 to 60 new criminal prosecutions throughout the state each year. This estimate is based upon a survey taken by the department, of local police agencies and the state troopers. Examined singly, no additional prosecution person nel will be required to implement the provisions of the bill. These new prosecutions, however, do represent additional workload which, when added to other crime bills, will have the effect of hampering the department's overall ability to prosecute criminal offenses. The forfeiture provisions in the bill will also require additional attorney time to handle the court hearings required if a forfeiture of specific property is contested by the owner, and may have the effect of diverting resources from other matters currently being addressed.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A. Assumptions

1. Estimated conviction information was furnished by the Department of Law. They estimate that there would annually be three convictions for a Class B felony and 30 convictions for Class C felonies. Class A misdemeanors have been omitted in the committee substitute.

2. It is assumed that all convictions are of first time offenders.

3. The following table displays data regarding additional bed needs with enactment of HB 10:

Class of Offense	Expected # of Convictions	% & # to Jail	Avg. Sentence Length	Flat Years	Person Years
B Felony	3	50%/1.5	2.5 Yr.	1.9	2.85
C Felony	30	20%/6.0	1.09 Yr.	.82	4.92
	33	7.5			7.77

Therefore, 7.77 beds would be needed. For purposes of this fiscal note, this was rounded to the nearest whole number resulting in 8 new beds identified as being required.

B. Cost Estimates:

1. Capital Expenditures

It is assumed that medium security beds would be the appropriate classification. It is estimated that construction costs for this type of bed will be approximately $146,000 per bed. Therefore, capital expenditures would be:

8 x $146,000 = $1,168,000

2. Personal Services

It is assumed that these 8 beds would be combined with other construction where staff will be identified. Therefore, no costs are specifically identified in this fiscal note for staff costs, although staff will be required to provide security and supervision for the additional inmates.

3. Other Costs

Other costs identified reflect only food, clothing, bedding, and medical services necessary to meet the physical care and medical needs of the projected inmate increase.

4. Inflation of 6% per year was used for projecting cost after FY 1985, the year in which the total bed impact would be experienced.

HB No. 10--RE: Imitation Controlled Substances Act---ABOOD, WENDTE, LINDAUER

1--This bill names seven susbstances that could be used to manufacture imitation controlled substances (look-alike drugs), as depcited in AS. 17.10 etc. (Narcotic drugs) and AS 17.12,etc. (Depressant, Hallucinogenic and Stimulant Drugs).

2--This worksheet is NOT section-by-section analysis, (Sponsor should provide that, as well as witness(es)), but see material in file from 12th Legislature.

3--In FORFEITURES chapter (AS 17.14.050) possible forfeitures are are considerably expanded from the meagre paragraph in AS 17.12.130 which merely mentions in passing "counterfeit drugs" and forfeitures of same. This provides for forfeiture the substance,raw materials, products, equipment used in making same. or processing, cmpoounding, distributing, delivering or containers or conveyances including aircraft, vehicles or vessels used in sale, transporting, receipt, possession or concealment of substance.

HB 14 vol. 1 - page 222
Fiscal Note
Analysis

This bill greatly shortens the permitting process time of state agencies. Although this will cause us to assist with some new regulations necessary for a shortened permit process for the permitting agencies, this additional work will not be time consuming or burdening. Therefore, the bill will have a fiscal impact on the Department of Law's operations. Considerable fiscal impact will occur on the part of agencies responsible for permits, such as Fish & Game, DEC and Natural Resources, as they gear up to review and issue permits in shortened times provided by the bill.

League of Women Voters of Alaska

COMMENT ON HB 14 REGARDING PROCESSING OF PERMITS
FOR HOUSE JUDICIARY COMMITTEE
May 25, 1983

The League of Women Voters of Alaska has followed the issue of processing of permits for several legislative sessions. We do not have a particular interest in the outcome of most permits, but we do have a great interest in the process of granting permits. We believe that the public interest in our air, water, and land resources must be protected. This should be the primary purpose of any permitting system. Further, the public must have appropriate opportunities to participate in the process. All factors in a permit decision must be balanced so that the greatest weight is given to the public interest.

The League of Women Voters of Alaska is composed of the five local Leagues in Ketchikan, Juneau, Central Kenai Peninsula, Anchorage, and Fairbanks, a provisional League in the Matanuska-Susitna area, a small unit in Kodiak, and a few scattered at-large members. We speak on selected governmental issues based on our principles and positions. The positions and principles are adopted following in-depth study and consensus among the whole membership.

The League of Women Voters of Alaska opposes HB 14. There has been no outpouring of public demand for this type of legislation. Rigid schedules should not be established by statute. We believe that any perceived problems with the permitting process have been and will continue to be corrected administratively. Administrative changes can provide the necessary flexibility to accommodate a variety of permits while providing for efficient processing of them.

We have some specific comments on the bill. The time limits for processing permits delineated in the bill do address some of the concerns we have had with some versions of bills dealing with this issue. There has been some provision made for public input in the allowable time limits. We still believe that the time limits are unnecessarily rigid for three reasons. First, there is no public demand for specific time limits. Second, we can envision cases where a field season would be desirable, or the issues surrounding a particular development would be so complex, that it might not be possible to reach a sound decision within the time limits. The bill does not permit much flexibility in these few cases. Thirdly, we are concerned that staffing levels at some future time may not be adequate to give full consideration to all permits applied for. Then many permit applications may face the provision for automatic approval. We do not believe that automatic approval upon failure to meet the time requirements is in the public interest. We can see a number of potential problems with this provision. For example, many permits may receive pro forma approval or denial without proper scrutiny in order to meet the requirement. In either case we suspect the result will be costly litigation which could add years of delay to any project.

The bill provides for designation of a lead agency. In principle this is reasonable. A "one-stop" process could be a great benefit to an applicant. In practice, an agency with an interest in a particular outcome may have difficulty fairly balancing conflicting information submitted by other agencies. The lead agency must be a neutral party in the process if the public is to have faith in its ability to balance competing factors.

The League of Women Voters of Alaska believes this bill is both unnecessary and unwise. There is no compelling need at this time to make statutory changes in the permitting process. This bill will not serve the public interest.

Re: SSHB 14: Sealaska Amendments

Dear Chairman Furnace:

Following yesterday's hearing, I reviewed Sealaska's proposed changes to SSHB 14 with Bill Berrier. I believe the following accurately represents the results of our discussions:

1. Sealaska has proposed the insertion of a new subsection "e" to proposed AS 44.62.635. At yesterday's hearing, concerns were expressed that our amendments' reference to the "Division of Policy Development and Planning" was improper, since DPDP was being reorganized within the Office of Budget & Management. However, because the Governor's executive order creating that office was rejected by the legislature, and because legislation creating the office (SB 152) has not yet been enacted, it is proper drafting to continue to refer to the Division of Policy Development & Planning by its historical name;

2. Sealaska had proposed to add, as a new Section 4 to HB 14, the "Authority not Enlarged" section of its proposed legislation. See Sealaska bill, p. 3, lines 6-14. This section is particularly vital if the legislature is to solve the "foot in the door" problem described in my testimony of April 12th. Mr. Berrier sees no objection to the inclusion of this subject matter in the bill; however, he would prefer to see the issue addressed in the existing lead agency section of HB 14. In response to Mr. Berrier's suggestion, Sealaska would recommend that new subsections (f) and (g) be added to proposed AS 44.62.635 to read:

(f) "Nothing in this section, or AS 46.40, may be construed as authorizing a lead agency, or any resource agency, to deny or condition a consistency determination because of impacts which may be caused by activities not themselves requiring a state permit or disposal of interest in state land."

(g) "In making a consistency determination under this section for an activity occurring outside the boundaries of a coastal resource district with an approved district plan, the lead agency, or any resource agency, may consider only those statewide standards and guidelines adopted by the Alaska Coastal Policy Council under AS 46.40.040(1)."

3. Sealaska, finally, had proposed the insertion, as a new Section 4 to HB 14, of proposed AS 46.40.065 (Sealaska bill, pg. 2, lines 4-13). This provision would have required landowner consent before "areas which merit special attention" could be designated outside the boundaries of coastal resource districts. Without this provision, the Alaska coastal policy council will retain almost unbridled authority to impair or prohibit major resource development activities in the unorganized borough.

Mr. Berrier believes that the insertion of this provision would violate the "one subject rule" (Alaska Const., Art. II, Sec. 13) because HB 14 deals only with Coastal Management procedures, while Sealaska's proposed 46.40.065 deals with the substantative authority of the Alaska Coastal Policy Council.

Sealaska respectfully disagrees with Mr. Berrier's conclusion. The Alaska Supreme Court has, repeatedly, very broadly construed the state's "one-subject" rule, and has required only that the subjects included bear some rational relationship to each other, or fall within the same "general idea." Gellert v. State, 522 P.2d. 1120, 1123 (Alaska 1974); see also North Slope Borough v. Sohio Petroleum Corporation, 585 P.2d. 534 (Alaska 1978). The driving force behind permit reform legislation over the past four years has been to ease the burden which the Alaska coastal management program has placed upon private industry in the state. Major industry in the state will be benefited little by the designation of a lead agency, if that agency may still prohibit major resource development in the unorganized borough without the landowners meaningful participation in the process. Both HB 14, and proposed AS 46.40.065, very much deal with the procedures governing the application of the Alaska Coastal Management Act to private industry. As a result, they both

"embrace some one general subject... [and] fall under some one general idea..." Gellert v. State, 522 P.2d. at 1123. Thus, there hardly appears the "substantial and plain" violation of the one-subject rule which would raise a serious constitutional question. North Slope Borough v. Sohio Petroleum Corporation, 585 P.2d. at 545.

Nonetheless, should the committee conclude that a significant "one-subject rule" problem exists with respect to the inclusion of proposed AS 46.40.065, Sealaska would urge the committee to include that provision as a companion bill. The unilateral designation of AMSA's in the unorganized borough is a very serious problem, and one which deserves consideration in conjunction with any permit reform legislation.

Sealaska appreciates the consideration given its amendments by this committee. We, in turn, have made every effort to accomodate our amendments to the needs of other industries in the state, and as well to the common goal of insuring the prompt consideration and passage of HB 14. Since the enactment of HB 14 this session will in all likelihood end the "permit reform" debate before the legislature, I'm sure the committee can appreciate Sealaska's concern that the needs of the Southeast Alaska timber industry, and of Native regional corporations throughout the state, are recognized in any permit reform legislation.

Sincerely,

BIRCH, HORTON, BITTNER,

Re: HB 14 - Processing of Permits

Over the past several years during the debate on permit reform bills, there have been alot of questions raised by municipalities about where local governments and coastal resource districts fit in the whole process of consistency decisions and the approval of permit applications. In one version, local recommendations were to be given "great weight", but what that phrase meant was unclear. This year, the local recommendations need to be "considered", according to HB 14, and are not mentioned at all in SB 219. Does this mean that local planning and zoning ordinances are no longer valid? that approved coastal management programs can be overridden? that the wishes of the residents of an area have no more weight than a letter from John Doe in Podunk? We're sure that's not the legislature's intent, but that is not clear from the legislation.

AML has consistently endorsed permit reform, either administratively or legislatively, but opposes streamlining strictly for the sake of streamlining, especially if the wishes of local people are going to be overridden in the process. We hope that you will schedule a teleconference hearing to ensure the widest possible participation in the discussions of this bill.

SUBJECT: Oil & Gas Permits
in 1982

In 1982, 22 federal Oil and Gas Permit reviews were completed by this office. All these projects were declared consistent. By each oil company, the number of days needed for each review is indicated:

ARCO	30(2) 38(3) 41 42 44 45 52 112	This averages out to 46 days each, or 40 days exclusive of the 112 day review. The latter is Put 7 - a previously inconsistent project. 3 other projects were withdrawn by the applicant prior to review close out.
EXXON	51	
MOBIL	33	
PHILLIPS	39 41	
SHELL	43 48	
SOHIO	42 30	
TENNECO	55	
UNION	142 146	These Union permits were held up by negotiations between Union and DEC over the necessity for discharge permits for relief pits.

The overall average review time is 53.9 days for these permits. Exclusive of the 3 lengthy reviews, the review time averages 41 days.

Our new expediting procedures appear to be working well.

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

FIRST JUDICIAL DISTRICT AT JUNEAU

CITY OF ANGOON and SIERRA CLUB,

Petitioners,

vs.

ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION and SEEE ATIKA, INC.,

Respondents.

(C)

FILED in the Trial Courts STATE OF ALASKA FIRST DISTRICT AT JUNEAU

FEB 10 1983

Barbara Dillman, Clerk

By SAW Deputy

No. 1JU-82-1919 Civil

MEMORANDUM OF DECISION AND ORDER

Upon hearing oral arguments of counsel and testimony of three witnesses, and upon consideration of the pleadings and memoranda, the court has arrived at the following conclusions.

1. Petition for Review

The Petition for Review is granted, pursuant to App. R. 610(b)(1). Postponement of review of the November 8, 1982 decision of the Commissioner of the Department of Environmental Conservation (DEC) on petitioners' emergency motion for stay would result in injustice. The injustice consists of petitioners inability to obtain a ruling from the Commissioner of DEC on their request for a stay before clearcutting takes place.

The Petition for Review raises the question of whether the Commissioner of DEC erred in concluding he had no jurisdiction to enjoin the clearcutting at issue. The court finds in favor of the petitioners on this question. The Commissioner himself recognized that he should consider standards for protection of the coastal zone under the Alaska Coastal Management Act when reviewing respondent's plans to construct a log transfer facility However, the Commissioner did not feel that the proposed clear-cutting was a proper subject of his permitting authority. Therefore, he held he had no power to enjoin the clearcut.

The Coastal Management Act should be given a broader reading

The Commissioner's authority is not delineated by the activity on the face of the application for a Certificate of Reasonable Assurance. The Act envisions a comprehensive review by agencies of impacts to coastal land and water. Consequently, activities closely associated with uses specifically mentioned in permit applications must also be considered.

The court finds no compelling reason to treat the clearcut separately from the log transfer facility. The cutting, by respondents' own testimony, will serve a variety of functions, all related to the sorting, storage, and transfer facilities of this project. The fact that some of the cut acreage is intended for a log sort yard does not alter the court's reasoning. No persuasive evidence was presented to require that a sort yard must receive separate consideration. Since the Commissioner has the authority, and is in fact mandated, to determine consistency with the ACMP for the entire project at Cube Cove, he has the jurisdiction to issue a stay if warranted.

The case is remanded to the Commissioner of DEC to determine whether the clearcutting should be enjoined pending the adjudicatory hearing. The interests of judicial and administrative economy dictate that DEC make this decision, not the court, given the extensive record before the department in this case already. In remanding, this court is not making any judgment on the merits of petitioners' emergency motion for stay. The court is only confirming the Commissioner's authority, and directing that he exercise that authority as soon as possible.

2. Preliminary Injunction

Ordinarily, the function of a preliminary injunction is to preserve the status quo -- or establish a new status -- while an underlying action is pending. The showing for an injunction involves three factors: irreparable harm to petitioners, little or no harm to respondents, and the existence of a substantial

question presented on the merits.

In this case, the underlying action before the court is a Petition for Review. The question presented by the Petition has been decided, in favor of the petitioners, so the traditional purpose of an injunction does not exist. However, since a TRO has been in effect for almost three months, and the Commissioner will shortly be deciding the propriety of a stay, this court finds further temporary injunctive relief appropriate. The current injunctive order will be extended only until such time as the Commissioner issues a ruling on petitioner's emergency motion for stay. The court urges that this action take place in the very near future, so that the duration of its injunctive order is extremely short-lived.

For the reasons stated above, the Petition for Review is granted and decided in favor of petitioners. The Motion for Preliminary Injunction is granted only insofar as it extends the court's current injunctive order until the Commissioner of DEC rules on the merits of petitioners' emergency motion for stay. The Commissioner is directed to handle this matter expeditiously.

IT IS SO ORDERED.

DONE at Juneau, Alaska, this 10th day of February, 1983.

Walter L. Carpeneti

Walter L. Carpeneti
Superior Court Judge

CERTIFICATION

This is to certify that on the above date I provided a copy of the above Memorandum of Decision and Order to:

Barbara Malchick, Esq.
Douglas Mertz, Esq.
Jacquelyn R. Luke, Esq.

Secretary to the Judge

Department of Environmental Conservation

Subcommittee: NRMEC
Members: Bettisworth, Grussendorf, Vaska/Wendte

House Ceiling: 11,300.
Senate ceiling: 11,000.
Governor: 11,809.

Federal Receipts: 1620.4
FY 83 Federal Receipts: 2282.7

Line item or program	Request	Gov.Amd.	House	Difference
Facilities construction and operation	1184.9	1150.	1082.	-5.8%

The area of water and sewer construction was identified by members of the subcommittee as a major interest in terms of capital projects. This area is receiving federal money to train water and sewer operators (65.) This unit administers the Village Safe Water, Municipal Grants (for sewer projects) and the Operator Training and Certification programs. The difference between the House and Governor's proposals amounts to 68. and would delete an environmental conservation supervisor position and travel money.

Environmental Quality Permit Section	0	0	0	0

This section has been cut out, due to the shifting of these functions to regional offices. This is felt to be more efficient, thus cutting down the time to process permits. This localization of function is estimated to cut down the time by up to 2 weeks. In dividing up the section, 12.2 was given to the northern regional office, 12.2 to central and 60.7 to southeast. Other money was shifted to the director's office.

Environmental Quality Southcentral region	2092.9	1798.6	1794.	-0.1%

The size of the rquest was based on a 6% increase for inflation and money to take up those areas which were covered by federal money which would not be present for the coming year.

Env. Quality Management Director's office	241.0	225.1	220.1	-2.1%

There has been an increase from FY 83 levels (146.8) largely because of transfers from other programs within this unit (Water Quality, Management and Technical Assistance, Air and Solid Waste.)

Env. Quality Management Water Quality Management	1081.	915.5	1101.5

OVERKILL

OR

HAVE WE ARRIVED AT THE POINT WHERE IT IS NO LONGER POSSIBLE TO GET THERE FROM HERE?

Part of the life blood of any logging operation in Southeast Alaska is the ability to establish logging camps and the facilities to put logs into the water and boom and raft them preparatory to towing them to a mill site or shipping point. Because these facilities involve uplands, tidelands and navigable waters, an applicant must clear the activity necessary for construction with an upland owner (if other than his own private property), the Alaska Department of Natural Resources (DNR) because they are custodians of the State's tidelands and the Corps of Engineers, Department of the Army (Corps) as the agency responsible for issuing permits for facilities in navigable waters.

To illustrate the total "overkill" of procedures and duplication one must struggle through in obtaining the necessary permits and approvals, it is necessary to track the procedure. Neets Bay 10 and 12 are a good example of such facilities and their record.

Neets Bay is within the Ketchikan Pulp Company (KPC) (KPC is a wholly-owned subsidiary of Louisiana-Pacific Corporation)long term timber sale and the original need for camp, log transfer and boom and rafting facilities was recognized and reviewed by the Forest Service (FS) multi-discipline team when designating areas for the 1974-79 five-year operating area for which an environmental impact statement (EIS) was written. Therefore, as the upland owners, the Forest Service reviewed and approved the site for these facilities and included them in the EIS prior to commencing logging operations on the five-year period beginning July 1, 1974.

On April 26, 1977 (Exhibit A) a letter was sent to the Corps together with application for a permit described as "proposed standing log boom retained in position by 5 ton anchors, log transfer facility using approximately 1,000 cubic yards of upland shot rock and employing an A-frame lift-off device, an offloading ramp consisting of a lashed log crib filled with shot rock from an upland source, a small boat dock and ramp to aid in construction of roads and facilities".

On June 15, 1977 we were sent a letter by the Corps notifying us of their receipt of our application, the assignation of Reference No. 071-OYD-2-770123 and the notification of assessment of a $100.00 processing fee should approval be granted. (Exhibit B)

On July 19, 1977 we received from the Corps (Exhibit C) a copy of a letter from the U. S. Environmental Protection Agency (EPA) requesting the permit, if issued, contain the following special conditions:

1. The permittee shall implement, once per year for a period of three years, a bottom sampling program to determine whether lost solids have accumulated in the project waters associated with the log transfer site. Each such sampling shall be completed not later than September 1 of each sampling year.

2. The permittee shall submit a brief report of the findings of each sampling effort and a sketch showing location of sampling sites, to the Corps of Engineers, the Alaska Department of Environmental Conservation and the U.S. Environmental Protection Agency not later than October 15, of each sampling year.

3. The permittee shall remove all significant accumulations of lost wood solids, if any, and dispose of them in an upland fill approved by the U.S. Forest Service and/or the Alaska Department of Environmental Conservation and concurred in by the Environmental Protection Agency. The permittee shall modify log transfer procedures, including possibly the relocation of the transfer site if significant accumulations of lost wood solids are found as a consequence of any sampling program conducted by the permittee or the Environmental Protection Agency.

AIthough EPA saw fit to copy the Alaska Department of Environmental Conservation (DEC), the U.S. National Marine Fisheries Service (NMFS), the U.S. Fish & WildLife Service (USF&WS) and the Forest Service with their letter, they did not see fit to send it to the applicant thus requiring a copy of the letter to come from the Corps with their notice to us and our return agreement July 29, 1977 to the Corps (Exhibit D) with copy to EPA.

On August 29, 1977 and after advertisement of request for public comment, the Corps sent a letter (Exhibit E) informing us to submit our processing fee and we would receive our permit. On September 15, 1977 having submitted the required fee we received a cover letter and our permit from the Corps (Exhibit F). This permit contained standard Corps conditions a-x (24 in number) plus the three additional conditions of EPA. Included in the 24 Corps conditions are the conditions for applicant

to "at all times be consistent with applicable water quality standards, effluent limitations and standards of performance, prohibitions, and pretreatment standards established pursuant to Sections 301,302,306 and 307 of the Federal Water Pollution Control Act of 1972 (P.L. 92-500; 86 Stat. 816), or pursuant to applicable State and local law".

Another subsequent section also adds, "...if applicable water quality standards are revised or modified during the term of this permit the permit will be modified if necessary to conform with such revised standards within 6 months of the revision..."

On September 30, 1977 we applied to the Department of Natural Resources for a tideland permit for this same area. However, due to market changes affecting our need for logs, scheduling our logging operations, together with the need to recover blown down timber in other areas, it became apparent we would not be moving into this area as planned.

It is difficult to be precise in these schedules when we must get our Corps permits started a minimum of six months prior to construction and construction must precede logging by at least one year. This means we are estimating our logging needs one and one-half to as much as three years in advance in relation to needing permits, and we are working with the Forest Service preparatory to writing environmental impact statements as far as eight years in advance of construction for some of these facilities.

In any event, we did not start the work applied for in either the DNR tidelands permit or the Corps permit as expected. On April 16, 1979 we received notice from DNR (Exhibit G) to notify them of our intentions on the tidelands permit or they would close the file. We advised DNR by letter of April 20, 1979 (Exhibit H) of our new estimated dates of construction schedule starting on March 1, 1980 and completion on August 1, 1980.

It was now apparent our logging activities in this area would not be completed during the 1974-79 five-year period but would now fall withir the 1979-84 period. This necessitated the FS multi-discipline team review and the inclusion of this area and its facilities in yet another EIS.

We also wrote the Corps on August 8, 1979 (Exhibit I) requesting extension of our permit to cover our new schedule. On October 4, 1979 (after a period of almost two months) we received word from the Corps (Exhibit J) stating they could not extend our permit because we had not commenced work by April 26, 1978 or a year after our original application and must reapply.

On October 16, 1979 we sent a cover letter and application to the Corps (Exhibit K). The letter, application and drawing were basically the identical ones used for our original application of April 26, 1977. On or about October 23, 1979 we received from the Corps a letter (undated) (Exhibit L) designating our application NPACO-RF-P Neets Bay 12 with the reference number 071-OYD-2-790398. We were further informed by the Corps that further action on our permit was suspended because the permit area was within the Alaska coastal zone and we must provide a certification that our activity would comply with the Alaska Coastal Management Program. Also, they advised us that a permit cannot be issued until we have obtained a Certificate of Reasonable Assurance or Waiver of Certification as required by Section 401(a)(1) of the Clean Water Act. This certification or waiver is to be issued by the DEC.

We next received a letter dated November 30, 1979 from DNR (Exhibit M) informing us that our tideland permit ADL 100073 for Neets Bay was to be advertised as shown on the attached notice. We then received a copy of the Corps public notice dated December 7, 1979 (Exhibit N) and attached was a copy of the public notice from the Office of the Governor, Division of Policy Development & Planning (DPDP) for Application for Certification of Consistency with the Alaska Coastal Management Program and also attached was the DEC public notice of Application for Water Quality Certification. This latter certification is assurance that any discharge to waters of the United States resulting from the project described in the Corps permit will comply with the Clean Water Act and applicable state laws, even though the applicant must agree to abide by these laws as a condition of obtaining the permit from the Corps and the permit itself so stipulates (see Corps permit General Conditions part b).

A letter dated December 12, 1979 was sent to the Corps from DPDP (Exhibit O) advising them they had received the application, were reviewing it for Alaska Coastal Management Program Consistency Determination and had distributed the material to the appropriate governmental agencies for a review which they were scheduled to close on January 10, 1980, soon after which they would send the review decision to the Corps. Also, the State Clearinghouse has now assigned State ID No. FD280-79121111FP.

On December 28, 1979 we had a telephone call from the NMFS questioning whether there was enough water under the transfer site to float the log bundles at all tides. We directed him to the plat submitted with our application indicating 50 to 60 feet and pointed out that the site would be of no use for our purposes if the bundles did not float. We agreed to make ourselves available to travel to the site with them However, we later found they had visited the site without cont[illegible] with us.

On January 4, 1980 we were copied on a letter sent from the Alaska Department of Fish & Game (ADF&G) (Exhibit P) requesting a one month extension to permit a more thorough evaluation and assessment of the impacts of this development. ADF&G sent copies of this letter to USF&WS, NMFS, EPA, two recipients (Juneau and Anchorage) at DNR, two recipients (both Juneau) at DEC, one other recipient at ADF&G and the State Clearinghouse.

Also, on January 4, 1980 the DPDP wrote the Corps (Exhibit Q) notifying them the Alaska State Clearinghouse was extending the closing date for review from their original January 10, 1980 by fifteen days which they calculated would be a closing date of February 2, 1980. (Actually, 15 days from January 10, 1980 is January 25, 1980).

On January 17, 1980 we received a copy of a letter from EPA to the Corps (Exhibit R) advising them the proposal may have adverse impacts on water quality and/or the aquatic resources and accordingly, coordination with appropriate State and Federal resource agencies was needed and they would expect to provide additional comments within 30 days. The EPA copied USF&WS, ADF&G, DEC and NMFS.

On January 18, 1980 we received a copy of a letter from the Corps to NMFS (Exhibit S) agreeing to extend the review period to February 7, 1980.

On January 29 we received notice and billing from DNR (Exhibit T) for the advertisement for our State Tideland Permit.

On February 8, 1980 we received a copy of a letter from EPA to the Corps (Exhibit U) informing them of no objection to issuance of this permit "provided the applicant complies with all State & Federal resource agency conditions that may be needed to protect the aquatic resources". A copy of this letter went to USF&WS, NMFS, ADF&G, and DEC. Had EPA read the requirements written into a Standard Corps Permit they would have noted the applicant must not only agree to comply with all State and Federal conditions but must also agree to currently comply if rules or regulations are added or modified and we would not now at this late date have to agree with what we must agree with to obtain the valid permit.

On February 15, 1980 we received a letter from the Corps (Exhibit V) enclosing a copy of a letter they received from the ADF&G saying they had reviewed the application and "find this project consistent with those Coastal Zone Management standards we have responsibility for reviewing and have no objections to issuance of a permit, provided the following special stipulations are included:

1. A non violent log transfer facility is employed.

2. The permit is limited to a five year period".

Copies of this letter dated February 1, 1980 were sent to NMFS, USF&WS, EPA, 2 recipients at DNR, 2 recipients at DEC, ADF&G, Clearinghouse and to the Applicant.

It is interesting to note that at this late date there is a requirement for a non violent dump when both the original and subsequent applications for permit detailed in the drawings of the facilities as well as in the verbal description a lift-off, non violent type of equipment to be used. Also, the insistence of a five year limitation with no explanation whatsoever of why they think this is necessary or investigation as to whether this limitation is consistent with the applicant's requirements.

We next heard directly from DPDP on February 19, 1980 (Exhibit W). They informed us that, "As currently planned, we have found the proposal to be inconsistent with ACMP. It will be consistent with the ACMP provided the attached stipulations are met.

INCONSISTENT DETERMINATION ATTACHMENT

Conditions related to South Neets Bay Timber Project
(State I.D. # FD 280-79121111 FP):

1. The Department of Environmental Conservation must first issue a Certificate of Reasonable Assurance stating that the proposed activity will comply with the requirements of Section 401 of the Federal Water Pollution Control Act Amendments of 1972 as modified by the Clean Water Act of 1977.

2. A non-violent log transfer facility must be employed.

Copies of this letter were sent to Office of Coastal Management (OCM), Department of Law, COE(Corps) and DEC. Again, we have the requirement for a non violent log transfer in the permit application.

At this point we seem to be in the position of not being able to get approval from DPDP until DEC goes to public notice and issues a Certificate of Reasonable Assurance that the project will be in compliance with Section 401 of the Federal Water Pollution Control Act even though this is stipulated by the Corps as a general condition of the permit.

We next received a letter from the Corps dated February 21, 1980 (Exhibit X) and relaying to us a letter they received from NMFS and indicating they had made two on-site inspections of the area to be covered by this application. They state, "As a result of these investigations, we believe that the proposed action will not significantly harm marine, estuarine, or anadromous fisheries resources if the following stipulations are incorporated into the permit:

1. Log transfer methods should be non violent. This will reduce the amount of bark debris knocked off in the transfer process.
2. This permit shall expire in five years.
3. A sufficient amount of clean shot rock shall be placed over all fill material so that erosion and leaching of fill material will not occur".

We were not copied on this letter, necessitating the Corps send us a copy and request our comments to NMFS who must then contact the Corps of our agreement. Also, had this agency read either the original or second application for this facility they, too, would have noted it was specifically for a lift-off (non violent) type and was to be filled entirely by shot rock. They also deemed a five year limitation on the permit without any explanation of the necessity or inquiry of the applicant.

Also on February 21, 1980 we wrote DPDP (Exhibit Y) agreeing to a non violent dump, even though this was the intention from the original application for this permit on April 26, 1977.

On March 3, 1980 we received from the DEC by Certified Mail, Return Receipt Requested (Exhibit Z) a cover letter transmitting to us a State of Alaska Department of Environmental Conservation Certificate of Reasonable Assurance. This document states the log transfer facility consisting of 1,000 cubic yards of shot rock fill and an A-frame lift-off device will be constructed along with other facilities. It then stipulates the following provisions:

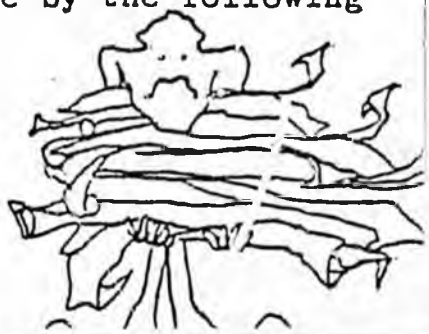
1. A spill prevention control and counter measures plan in accordance with 40 CFR 112.4(c)*has been prepared by the applicant and submitted to ADEC.

2. A non-violent log transfer facility is employed.

3. A clean shot rock cap is placed over all fill material to prevent surface erosion.

4. ADEC 401 certification expires in five (5) years.

Copies of this letter were sent to Corps, EPA, ADL(DNR), ADF&G, NMFS, USF&WS, SERO(?), OCM and State Clearinghouse.



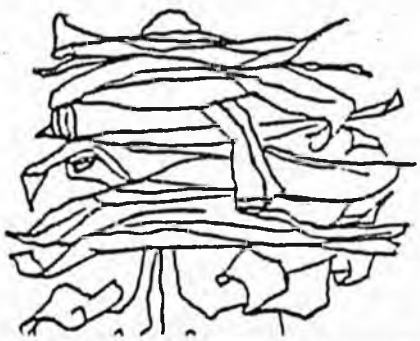
Although we do not understand why a spill prevention control and countermeasure plan is needed for approval of this permit we will submit one to DEC because to argue it would be time consuming and it will be required by the Coast Guard, FS and EPA prior to fuel being stored in the area. We will agree to a non violent log transfer as stipulated on both plans and description of our permits since April 26, 1977 and we will agree to a clean shot rock cap because all of the fill material will be clean shot rock as stated in application. We are still curious as to why so many agencies (or is it really one agency with a lot of shadows?) insist on a five-year limit without inquiring of us how long we will need the facility. In this case, we will most likely agree to the five year stipulation, only so we can commence the project and hope for an extension if we need the facility longer.

On March 3, 1980 we also received a copy of a letter from DPDP to the Corps (Exhibit AA) informing them they had received a Certificate of Reasonable Assurance from DEC stating that the subject project will comply with the requirements of Section 401 of the Federal Water Pollution Control Act. They further state they have now completed their ACMP review of the subject proposal and find it consistent with ACMP. Copies of this letter were sent to OCM, two recipients at ADF&G, DEC and Commissioner McAnerney of Regional Affairs (CRA).

As of this writing, on March 10, 1980, we do not have our permit and we do not have a DNR tideland permit. Our construction season has started and our construction people are on the ground constructing the road and developing quarry sites and are badly in need of this permit to properly schedule their work.

Neets Bay 12, NPACO-RF-P, No. 071-OYD-2-790398, State I. D. No. FD280-7912111IFP and ADL No. 100073 has been reviewed by two FS multi-discipline team reviews including participants from other State and Federal agencies, been included within two Environmental Impact Reports in which all agencies could (and most did) make comments, as well as any private citizen and has now been reviewed by, or copied with, some correspondence by the following agencies in relation to this application:

FS U.S. Forest Service



Corps	Corps of Engineers, Dept. of Army
EPA	U.S. Environmental Protection Agency
DNR	Alaska Department of Natural Resources
DPDP	Office of the Governor, Division of Policy Development and Planning
ADF&G	Alaska Department of Fish & Game
DEC	Alaska Department of Environmental Conservation
ADL	Alaska Department of Law
CRA	Commissioner of Regional Affairs
	State Clearinghouse
OCM	Alaska Department of Coastal Management
SERO	Unable to identify
NMFS	National Marine Fisheries Service
USF&WS	U.S. Fish & Wildlife Service

The question needing an answer is, why so much duplication, delay and totally unnecessary paperwork is required for a routine non-controversial permit such as this? Is it really necessary for nine State Departments or Agencies and probably twice that number of State employees along with five Federal Agencies and their employees to review, make comments and shuffle the paper? This chronology illustrates how rapdily the bureaucracy has come upon us when one reviews the rather direct route to the permit received in 1971 as compared to the frightening growth and duplication that has sprung up by 1979, even when applied to an area for which there had been a previous permit issued.

We do not fault the Corps, as their practice is to be helpful in notifying the applicants of agency input, but their regulations force them to respond to each and every comment, no matter how duplicative, until all participants are satisfied. We also think that if all agencies would read and analyze the General Conditions an applicant must consent to in order to get a permit they would realize many of their concerns are already well protected and much of their review and comments unnecessary. Attached is a current copy of the Corps General Conditions for a permit, for your information.

We sincerely feel this process is non productive, wasteful, inflationary and in need of review, particularly in respect to the State's duplicative reviews. It is only for this purpose this review has been written and circulated. If it accomplishes some reduction in what we consider a decided OVERKILL the effort will have been worthwhile.

3/80

I. General Conditions:

a. That all activities identified and authorized herein shall be consistent with the terms and conditions of this permit; and that any activities not specifically identified and authorized herein shall constitute a violation of the terms and conditions of this permit which may result in the modification, suspension or revocation of this permit, in whole or in part, as set forth more specifically in General Conditions j or k hereto, and in the institution of such legal proceedings as the United States Government may consider appropriate, whether or not this permit has been previously modified, suspended or revoked in whole or in part.

b. That all activities authorized herein shall, if they involve, during their construction or operation, any discharge of pollutants into waters of the United States or ocean waters, be at all times consistent with applicable water quality standards, effluent limitations and standards of performance, prohibitions, pretreatment standards and management practices established pursuant to the Federal Water Pollution Control Act of 1972 (P.L. 92-500, 86 Stat. 816), the Marine Protection, Research and Sanctuaries Act of 1972 (P.L. 92-532, 86 Stat. 1052), or pursuant to applicable State and local law.

c. That when the activity authorized herein involves a discharge during its construction or operation, of any pollutant (including dredged or fill material), into waters of the United States, the authorized activity shall, if applicable water quality standards are revised or modified during the term of this permit, be modified, if necessary, to conform with such revised or modified water quality standards within 6 months of the effective date of any revision or modification of water quality standards, or as directed by an implementation plan contained in such revised or modified standards, or within such longer period of time as the District Engineer, in consultation with the Regional Administrator of the Environmental Protection Agency, may determine to be reasonable under the circumstances.

d. That the discharge will not destroy a threatened or endangered species as identified under the Endangered Species Act, or endanger the critical habitat of such species.

e. That the permittee agrees to make every reasonable effort to prosecute the construction or operation of the work authorized herein in a manner so as to minimize any adverse impact on fish, wildlife, and natural environmental values.

f. That the permittee agrees that he will prosecute the construction or work authorized herein in a manner so as to minimize any degradation of water quality.

g. That the permittee shall permit the District Engineer or his authorized representative(s) or designee(s) to make periodic inspections at any time deemed necessary in order to assure that the activity being performed under authority of this permit is in accordance with the terms and conditions prescribed herein.

h. That the permittee shall maintain the structure or work authorized herein in good condition and in accordance with the plans and drawings attached hereto.

i. That this permit does not convey any property rights, either in real estate or material, or any exclusive privileges; and that it does not authorize any injury to property or invasion of rights or any infringement of Federal, State, or local laws or regulations nor does it obviate the requirement to obtain State or local assent required by law for the activity authorized herein.

j. That this permit may be summarily suspended, in whole or in part, upon a finding by the District Engineer that immediate suspension of the activity authorized herein would be in the general public interest. Such suspension shall be effective upon receipt by the permittee of a written notice thereof which shall indicate (1) the extent of the suspension, (2) the reasons for this action, and (3) any corrective or preventative measures to be taken by the permittee which are deemed necessary by the District Engineer to abate imminent hazards to the general public interest. The permittee shall take immediate action to comply with the provisions of this notice. Within ten days following receipt of this notice of suspension, the permittee may request a hearing in order to present information relevant to a decision as to whether his permit should be reinstated, modified or revoked. If a hearing is requested, it shall be conducted pursuant to procedures prescribed by the Chief of Engineers. After completion of the hearing, or within a reasonable time after issuance of the suspension notice to the permittee if no hearing is requested, the permit will either be reinstated, modified or revoked.

k. That this permit may be either modified, suspended or revoked in whole or in part if the Secretary of the Army or his authorized representative determines that there has been a violation of any of the terms or conditions of this permit or that such action would otherwise be in the public interest. Any such modification, suspension, or revocation shall become effective 30 days after receipt by the permittee of written notice of such action which shall specify the facts or conduct warranting same unless (1) within the 30-day period the permittee is able to satisfactorily demonstrate that (a) the alleged violation of the terms and the conditions of this permit did not, in fact, occur or (b) the alleged violation was accidental, and the permittee has been operating in compliance with the terms and conditions of the permit and is able to provide satisfactory assurances that future operations shall be in full compliance with the terms and conditions of this permit; or (2) within the aforesaid 30-day period, the permittee requests that a public hearing be held to present oral and written evidence concerning the proposed modification, suspension or revocation. The conduct of this hearing and the procedures for making a final decision either to modify, suspend or revoke this permit in whole or in part shall be pursuant to procedures prescribed by the Chief of Engineers.

l. That in issuing this permit, the Government has relied on the information and data which the permittee has provided in connection with his permit application. If, subsequent to the issuance of this permit, such information and data prove to be false, incomplete or inaccurate, this permit may be modified, suspended or revoked, in whole or in part, and/or the Government may, in addition, institute appropriate legal proceedings.

m. That any modification, suspension, or revocation of this permit shall not be the basis for any claim for damages against the United States.

n. That the permittee shall notify the District Engineer at what time the activity authorized herein will be commenced, as far in advance of the time of commencement as the District Engineer may specify, and of any suspension of work, if for a period of more than one week, resumption of work and its completion.

three year limit from the date of issuance of this permit unless otherwise specified) and is not completed on or before _____ day of _____, 19 _____. (three years from the date of issuance of this permit unless otherwise specified) this permit, if not previously revoked or specifically extended, shall automatically expire.

p. That this permit does not authorize or approve the construction of particular structures, the authorization or approval of which may require authorization by the Congress or other agencies of the Federal Government.

q. That if and when the permittee desires to abandon the activity authorized herein, unless such abandonment is part of a transfer procedure by which the permittee is transferring his interests herein to a third party pursuant to General Condition t hereof, he must restore the area to a condition satisfactory to the District Engineer.

r. That if the recording of this permit is possible under applicable State or local law, the permittee shall take such action as may be necessary to record this permit with the Register of Deeds or other appropriate official charged with the responsibility for maintaining records of title to and interests in real property.

s. That there shall be no unreasonable interference with navigation by the existence or use of the activity authorized herein.

t. That this permit may not be transferred to a third party without prior written notice to the District Engineer, either by the transferee's written agreement to comply with all terms and conditions of this permit or by the transferee subscribing to this permit in the space provided below and thereby agreeing to comply with all terms and conditions of this permit. In addition, if the permittee transfers the interests authorized herein by conveyance of realty, the deed shall reference this permit and the terms and conditions specified herein and this permit shall be recorded along with the deed with the Register of Deeds or other appropriate official.

II. Special Conditions: (Here list conditions relating specifically to the proposed structure or work authorized by this permit):

The following Special Conditions will be applicable when appropriate:

STRUCTURES IN OR AFFECTING NAVIGABLE WATERS OF THE UNITED STATES:

a. That this permit does not authorize the interference with any existing or proposed Federal project and that the permittee shall not be entitled to compensation for damage or injury to the structures or work authorized herein which may be caused by or result from existing or future operations undertaken by the United States in the public interest.

b. That no attempt shall be made by the permittee to prevent the full and free use by the public of all navigable waters at or adjacent to the activity authorized by this permit.

c. That if the display of lights and signals on any structure or work authorized herein is not otherwise provided for by law, such lights and signals as may be prescribed by the United States Coast Guard shall be installed and maintained by and at the expense of the permittee.

d. That the permittee, upon receipt of a notice of revocation of this permit or upon its expiration before completion of the authorized structure or work, shall, without expense to the United States and in such time and manner as the Secretary of the Army or his authorized representative may direct, restore the waterway to its former conditions. If the permittee fails to comply with the direction of the Secretary of the Army or his authorized representative, the Secretary or his designee may restore the waterway to its former condition, by contract or otherwise, and recover the cost thereof from the permittee.

e. Structures for Small Boats: That permittee hereby recognizes the possibility that the structure permitted herein may be subject to damage by wave wash from passing vessels. The issuance of this permit does not relieve the permittee from taking all proper steps to insure the integrity of the structure permitted herein and the safety of boats moored thereto from damage by wave wash and the permittee shall not hold the United States liable for any such damage.

MAINTENANCE DREDGING:

a. That when the work authorized herein includes periodic maintenance dredging, it may be performed under this permit for _____ years from the date of issuance of this permit (ten years unless otherwise indicated);

b. That the permittee will advise the District Engineer in writing at least two weeks before he intends to undertake any maintenance dredging.

DISCHARGES OF DREDGED OR FILL MATERIAL INTO WATERS OF THE UNITED STATES:

a. That the discharge will be carried out in conformity with the goals and objectives of the EPA Guidelines established pursuant to Section 404(b) of the FWPCA and published in 40 CFR 230;

b. That the discharge will consist of suitable material free from toxic pollutants in other than trace quantities;

c. That the fill created by the discharge will be properly maintained to prevent erosion and other non-point sources of pollution; and

d. That the discharge will not occur in a component of the National Wild and Scenic River System or in a component of a State wild and scenic river system.

DUMPING OF DREDGED MATERIAL INTO OCEAN WATERS:

a. That the dumping will be carried out in conformity with the goals, objectives, and requirements of the EPA criteria established pursuant to Section 102 of the Marine Protection, Research and Sanctuaries Act of 1972, published in 40 CFR 220-228;

b. That the permittee shall place a copy of this permit in a conspicuous place in the vessel to be used for the transportation and/or dumping of the dredged material as authorized herein.

This permit shall become effective on the date of the District Engineer's signature.

Permittee hereby agrees to comply with the terms and conditions of this permit.

Answer back: KAYPULPCO KET

April 1, 1980

Mr. James E. Caruth, Chief
Regulatory Functions Branch
Department of the Army
Alaska District, Corps of Engineers
P.O. Box 7002
Anchorage, Alaska 99510

Re: NPACO-RF-P, Ward Cove 23
071-OYD-2-790391

Dear Mr. Caruth:

Enclosed is a self-explanatory letter we have sent to the Division of Parks of the Alaska Department of Natural Resources. We hope we are able to convince the ADP there is a better way and trust our letter will permit continued processing of our application.

Sincerely,

D. L. Finney, Manager
Forestry & Government Affairs

Re: Ward Cove 23

Dear Chip:

Our first reaction to your comment on our Corps permit is that you have read the "Overkill" paper and felt left out by not having your agency mentioned. If this is the case, please accept our apologies as we had no intention of slighting you or your department. Just in case you haven't seen the "Overkill" paper, one is enclosed, so you can see how we have come to develop a prejudice toward any agency feeling it necessary to comment on Corps permits.

There are several things about your request for assurance on which we would like to comment. First, by writing the Corps without copying us, you necessitate the Corps writing to us (copy enclosed), us writing you and giving you assurance, then you writing the Corps and telling them it's all right, then the Corps writing us and telling us it's all right, before the processing of our permit can continue. If you really feel you must continue to be involved, please have the courtesy of sending us a copy of your request. Or, if you really intend to join the ranks of the "overkillers", you could let us know you intend to so respond to all permits and we can head off a lot of nonsense by notifying the Corps we will abide by your every wish at the time we apply. This would save you, us and the Corps a lot of letter writing, postage and, most importantly to us, valuable time.

Another observation we have is that the cultural resources you wish to protect are already covered by the American Antiquities Act of 1906 (16 USC 431-433), National Historic Preservation Act of 1966 (16 USC 470) and Executive Order 11593(1971). Provisions of a Corps permit require an applicant to be in compliance with all Federal, State and Municipal laws. Also, our long term timber sale with the Forest Service has been recently modified to include an obligation for us to report any historic cultural resources immediately. Your added request for assurance does seem to be an "overkill".

One last observation is, if you have read the permit application we submitted, you will have noted it is for placing fill material and setting piling. It strikes us that there is not even the remotest possibility of discovering cultural resources with these activities.

Chip, as you can probably tell, you rattled our chain. We have decided to take head-on all unnecessary State Agency involvement in Corps permits because it really is coming to the point where we can no longer get there from here. Your agency just happens to be the first new customer since we wrote our exposé. Hopefully, our efforts will be rewarded by getting some logic in to the system and if such is the case, it will be well worth the time spent.

Now, so our application for NPACO-RF-P Ward Cove 23 Reference No. 071-OYD-2-790391 to Construct Berm and Place Piling in Ward Cove, Ketchikan, Alaska may proceed, we hereby notify you we agree, if any cultural resources are uncovered during the period of construction, our project engineer will halt all work that may disturb such resources and contact the Division of Parks (and probably the Guinness Book of Records) at once.

We shall, by copy of this letter, notify the Corps of our agreement but respectively request that you also contact the Corps at the soonest possible time, informing them you have our assurance and have no objection to the futher processing of our permit.

Louisiana-Pacific Corporation

We would be most interested in any comments you might have concerning your continued involvement in Corps permits.

Sincerely,

D. L. Finney, Manager
Forestry & Government Affairs

Gentlemen:

Inclosed is a copy of a letter dated 12 March 1980 concerning your application for a Department of the Army permit for the referenced work.

It is the policy of the Department of the Army to provide an applicant the opportunity for a resolution or rebuttal to all objections and/or recommendations received on a proposed project. In this regard, the Alaska Division of Parks (ADP) has reviewed your proposal and requested that if any cultural resources are uncovered during the period of construction, your project engineer halt all work that may disturb such resources and contact them at once.

I would appreciate receiving any comments that you may have on the request by ADP. If you intend to comment, please give your immediate attention to this matter so processing of your permit application can be expedited.

Sincerely,

Larry L. Reeder

The Honorable Bettye Fahrenkamp
Chairman of the Senate Resources
Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: Enclosed Coastal Management Legislation

Dear Senator Fahrenkamp:

The purpose of this letter is to transmit and recommend for your consideration legislation which would make certain changes to the Alaska Coastal Management Act (AS 46.40).

The changes are sought because of several problems with the Alaska coastal management program which are shared by Sealaska and Alaskan industry as a whole. These problems are, to a degree, the same which have been raised over the past four years in the course of "permit reform" debate. As you quite are aware, permit reform legislation has become quite controversial, with little likelihood that comprehensive legislation will be enacted in the near future. There are, however, certain problems in existing state regulation over which there is little disagreement. Rather than await the uncertain resolution of the larger "permit reform" controversy, Sealaska believes that real and substantial progress in regulatory reform can be made by addressing a few specific problems at this point in time.

The first problem addressed by the enclosed legislation is perhaps the most notorious--the duplicative and potentially conflicting "consistency determinations" which are authorized by existing law. As you know, any number of state agencies are

required to make a "consistency determination" on the same project. The administration long ago acknowledged that there was absolutely no justification for this state of affairs. Yet while everyone recognizes a need for having but one "consistency determination" for each project, the pitfall has been agreeing on the agency to make that decision. While many industry groups advocate that the decision be made by the Department of Natural Resources, environmental organizations have not surprisingly recommended the Department of Environmental Conservation.

The proposed legislation strikes a middle ground by providing that one consistency determination will be made for each project by the Division of Policy Development and Planning. The division is already the agency primarily responsible for coastal management matters, and, as a result, this bill does not make revolutionary changes from the existing law. It would, however, solve the problem of overlapping consistency determinations immediately, leaving for later, more comprehensive legislation, the issue of where that authority should ultimately reside.

There is an equally important issue addressed by the bill, one of which some legislators may be unaware. When the Coastal Management Act was enacted in 1977, it was the intent of the legislature that the program be implemented through existing agency authorities. The last thing the legislature wanted was to expand the jurisdiction of any state bureaucracy.

However, earlier this year, Judge Walter Carpeneti of the State Superior Court in Juneau ruled that the coastal management program had the effect of expanding agency jurisdiction. The problem is essentially this: if the Department of Environmental Conservation has permit jurisdiction over a particular dock, Judge Carpeneti believes that DEC may deny the permit for that dock if it concludes that the activities which that dock will facilitate will violate the coastal management program--<u>even if those activities themselves do not require a DEC permit.</u> To carry Judge Carpeneti's ruling to its logical extreme, when DEC reviews the first transfer dock for a new major oil development--such as the Beaufort Sea--it may acquire jurisdiction over all field operations by virtue of the coastal management act.

A copy of Judge Carpeneti's decision is enclosed. While we believe that the court was mistaken, clarifying legislation is necessary. Under the enclosed bill, for example, if a coastal management consistency determination is needed for a dock, a determination will be made <u>on that dock,</u> and not on every single activity which will in any manner be aided by the construction of the dock.

Third, there is a developing problem of extraterritorial regulation by Alaska cities under the guise of the coastal management program. Some small cities have prepared coastal management plans which include standards and guidelines for lands outside the city limits. While the Office of Coastal Management is technically calling these extraterritorial zoning laws "advisory," it is apparent that as as a practical matter, state agencies may begin to adopt and apply them. It is Sealaska's view that if a particular city wishes to control land use outside its existing borders, it should seek to expand those borders, rather than using the coastal management act as a means of indirect annexation.

Finally, under the Alaska coastal management program, the Coastal Policy Council may designate "areas which merit special attention" outside existing district limits--zones in which development is severely restricted or perhaps precluded. Some have proposed to designate large tracts of privately-owned land as "AMSA's." Sealaska believes that private land owner consent should be required before an AMSA is designated over privately owned land outside existing district boundaries. Under this proposal, the Council will be required to accomodate the private land owner before the AMSA may be designated.

I realize that it is late in the session, and that your committee has many matters before it. On the other hand, most of the issues addressed by the enclosed legislation have been aired and debated in committee after committee for some four years. At the present time, absolutely nothing has come from the time consuming and acrimonious debate over permit reform. This bill would at least resolve some of the most obvious problems with the existing coastal management program without endless and repetitive debate.

I would appreciate it, if at your earliest convenience, you could discuss this legislation with Jon Tillinghast. I have also requested Sam Kito and Robert Loescher to work with Mr. Tillinghast on this legislation.

Sincerely,

Byron I. Mallott

IN THE SENATE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act amending the Alaska Coastal Management Act."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Sec. 1. AS 46.40.100(a) is amended to read:

Sec. 46.40.100. COMPLIANCE AND ENFORCEMENT. (a) Municipalities, and subject to AS 46.40.205, state agencies shall administer land and water use regulations or controls in conformity with district coastal management programs approved by the council and the legislature and in effect.

* Sec. 2. AS 46.40.200 is amended to read:

Sec. 46.40.200. STATE AGENCIES. Upon the adoption of the Alaska coastal management program, state departments, boards and commissions shall review their statutory authority, administrative regulations, and applicable procedures pertaining to land and water uses within the coastal area for the purpose of determining whether there are any deficiencies or inconsistencies which prohibit compliance with the program adopted. State agencies shall, within six months of the effective date of the Alaska coastal management program, and subject to AS 46.40.205, take whatever action is necessary to facilitate full compliance with and implementation of the program, including preparation and submission of recommendations to the council for additional or amended legislation.

HESSIGER AND ANDERSON
ATTORNEYS AT LAW
130 SEWARD STREET - SUITE 411
JUNEAU, ALASKA 99801
(907) 586-2660

* Sec. 3. AS 46.40 is amended by adding new sections to read:

Sec. 46.40.065. AREAS WHICH MERIT SPECIAL ATTENTION. If a person proposes to the council that an area which merits special attention should be designated outside the boundaries of a district with an approved coastal management plan, and that area includes lands which are in private ownership, the council shall, before approving the designation, notify each affected private land owner. The designation may only be approved by the council if each private land owner within the proposed designation has given his consent.

Sec. 46.40.205. COASTAL MANAGEMENT CONSISTENCY DETERMINATIONS. (a) Whevever an activity within or affecting the coastal area of the state requires either a federal permit or license for which a consistency determination is required by 16 U.S.C. §1456, or two or more state permits, a single consistency determination will be made for the activity by the division. The determination made by the division under this subsection is conclusive on all state agencies, and no state agency may comment to the federal permitting agency on the consistency of the activity with the Alaska coastal management program.

(b) Whenever an activity within or affecting the coastal area of the state requires only one state permit, any required consistency determination shall be made by the permitting agency.

(c) In making a consistency determination under (a) of this section, the division shall solicit recommendations from other state agencies. Each state agency shall confine its comments to matters within its primary area or expertise.

(d) For the purposes of this section, "state permit" includes any state action sought or required for the construction

PFEFFERLE AND ANDERSON
ATTORNEYS AT LAW
130 SEWARD STREET - SUITE 411
JUNEAU, ALASKA 99801

or operation of an activity, including any disposal of an interest in state land or water, land classification or certification under Sec. 401 of the Clean Water Act, 33 U.S.C. §1341.

Sec. 46.40.208. AUTHORITY NOT ENLARGED.

(a) Nothing in this chapter may be construed as authorizing a state agency or the division to deny or condition a permit or disposal of interest in state land or water because of impacts which may be caused by activities not themselves requiring that permit or disposal from the permitting agency.

(b) Nothing in this chapter may be construed as authorizing a coastal resource district to engage in extraterritorial planning or regulation.

* Sec. 4. AS 46.40.210 is amended by adding a new subsection to read:

(7) "division" means the Office of the Governor, Division of Policy Development and Planning.

POSITION PAPER

RE: HB 14

SPONSOR: Representative Martin

Program Effects of Bill

The bill deals with permit reform and provides for a "fast tracking" of all permit applications requiring agency decisions within certain timeframes. The measure also provides for a "Lead Agency" concept for the issuance of coastal management consistency determinations.

Comments

The proposed revisions to regulatory procedures are considerable; some of the changes are probably desirable and others have no direct bearing upon this Department or its concerns. Section 44.62.635 "Lead Agency" is of particular interest, as it deals with Alaska Coastal Management Program (ACMP) consistency determinations. One of the foremost selling points of the National Coastal Management Program is the requirement that federal coastal actions must be consistent with approved State programs. In Alaska that concept has been expanded upon to require that proposed State and Federal coastal activities be consistent with ACMP approved local programs. HB 14 and Executive Order 53 are in opposition in that the latter would continue to vest consistency review authority in the Governor's Office, while the former would disperse this responsibility to individual line agencies. Moreover, subsection (b) would weaken the consideration afforded to approved local programs to an extent rendering them little more than advisory. Communities and regions that have Coastal Management Programs in place or in the works have proceeded under the expectation that local programs would have more than advisory powers.

Original Request

THE ALLIANCE

April 21, 1983

Representative Charlie Bussell
Pouch V - MS 3100
Juneau, Alaska 99811

Dear Representative Bussell:

As one of our objectives, The Alaska Support Industry Alliance supports regulatory reform.

To enhance an improvement in the manner and the time in which permits are issued, the Board of Directors of The Alliance are in support of H.B. 14 as introduced and amended by Representative Terry Martin. The passing of H.B. 14 will improve the permitting procedure, thus allowing industry to schedule their activities in a more orderly and efficient manner, resulting in a better cost effective climate for all Alaskans.

We urge you to support H.B. 14.

Sincerely,
For The Alaska Support
Industry Alliance

William Sheffield, Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

RE: REGULATORY REFORM

Dear Governor Sheffield:

The Resource Development Council has had serious concerns about regulatory reform for the past four years and each year has encouraged the administration to do something about permitting problems. We have recently learned your administration intends to do something about it, and for this we commend you.

However, we understand administration "working groups" are nearing a final conceptual decision to have one lead agency, OMB, act for all state permits. We also understand your staff has been informed that industry has no problem with OMB's having this authority. Our industry contacts indicate exactly the opposite to be true. For this reason, we urge you to not finalize any position until there has been representative input from the various industries affected.

Attached is a copy of the new RDC policy statement on regulatory reform which was passed unanimously by the Executive Committee. As you can see, we are advocating changes in permit handling and attitudes. We think the direction your staff is heading will not only result in longer permit times, but will require more regulations, statutory and contractual changes. Also it perpetuates an unnecessary layer of bureaucracy which used to be in DPDP and has been given new life under a different name in OMB.

Comments indicate one of the selling points in having OMB issue the permits is that it is "neutral" and "capable of conflict resolution." Governor, industry doesn't really need someone who is "neutral." It needs to deal with people who are knowledgeable and can understand business problems and the free enterprise system.

Government employees need to understand that each stipulation costs money and many stipulations discourage development. Alaska is rapidly pricing itself out of the market because of the gold-plated stipulations being imposed by multilayers of government. The cost to the state in jobs and money due to "lost opportunity" runs into the hundreds of millions of dollars each year. It's too bad business can't take advantage of these opportunities and create new jobs, as bad as our state needs them.

Most of industry's problems in permitting do not come from the permitting agency charged by law to issue the permits. These agencies generally have enough expertise to understand industry's problems; permits and changes can be negotiated.

By far, most of the problems come from <u>other agencies</u> who have no statutory authority to act on the permit but who have gained authority under MOU's between agencies. These latter agencies insist that industry construct the project their way. They try to design many parts of the project, but having little or no expertise, they cannot conceive of the problems they cause and the costs that result. In most cases they don't care. Their lack of experience can result in permit provisions which are near fatal to a project. Unfortunately, these requirements seem to be in the majority of permits. Most of the problems could be eliminated by the agency setting standards and letting industry determine how to meet those standards.

State agencies that issue permits are required to show that the proposed operation is consistent with the state or locally approved CCM plan before they issue a permit. Who is better qualified than that permitting agency to make such a determination and why must the determination be made <u>twice</u>? In other words, why does the added layer of OMB have to be in the picture at all?

We need a system which significantly speeds up the permitting process. The new proposal sounds much like the earlier proposal for Uniform Procedures Regulations which would have been a disaster if they had been implemented. We urge you and your staff to abandon any thoughts along that line. We don't need new regulations to implement regulatory reform.

No amount of change in law or regulations can accomplish regulatory reform without complete backing by you. On the other hand, we are not sure that any change is required in law or regulations. We believe the main change needed is one of employee attitude and that only <u>you</u> can bring that about.

To accomplish regulatory reform, the main thing needed is for you, the Governor, to issue a command to all of your troops that you want the permit time and stipulations reduced by 50% within a year, and that after one year you will personally challenge any supervisor who has not accomplished this objective. With strict enforcement, this approach would be very effective.

The prior administration never gave state employees the feeling that it was serious and intended to accomplish reform; we are confident you can.

Sincerely,

RESOURCE DEVELOPMENT COUNCIL

POLICY STATEMENT NO. 11

REGULATORY REFORM

The Resource Development Council recognizes the need for certain regulations to implement statutes to protect the public health, safety and welfare. However, the proliferation of applications, stipulations, regulations and permits is overwhelming to Alaskans and has resulted in, and continues to have an increasingly negative effect on the economy. Everyone including labor and business suffers and the helpless consumer ends up paying the bill. Many promises of reform have been made with few tangible results.

Regulations should facilitate and maintain orderly administration of policy where the broad public interest is at issue. However, when the power of the government to regulate becomes such a burden to the private sector that it creates economic hardship, suffering or negation of individual liberties and rights of property, then the Council concludes that regulatory powers have been over-extended. When regulations multiply and overlap, the power may be abused and it becomes counter-productive and in need of reform.

The Resource Development Council recommends the following:

I

That governments draw up a test of standards by which any regulation will be measured, such as:

1) Is it duplicative?

2) is it truly calculated to protect only the broad public interest?

3) does it violate individual personal or property rights?

4) does it create undue financial burden which will translate to negative shift in the overall economy?

5) when individual and personal rights are subjected to threat, then full burden of proof of need, as well as financial responsibility, will be borne by the agency or agencies responsible for promulgation of the regulation,

6) that a clear distinction be made between established laws of the land and government regulation as created at will within government agencies and bureaus.

continued...

II

That local, state and federal governments make a positive commitment to an effective regulatory reform program that eliminates duplication of permits, multiple handling of permits, duplication of statutory authorities, "networking," and prohibits employees from writing law through "stipulations." These various governments should require their employees to adhere to this commitment of regulatory reform and should stringently enforce that commitment.

III

That government allow its employees to add stipulations only when there is a proven need and then only if required by statute.

IV

That, as public policy, the resource agency responsible for issuing a permit should be the lead agency and be responsible for all provisions of the permit. The lead agency should be able to override the recommendations of any agency furnishing advice and should not include stipulations of other agencies not provided for under the law authorizing the permit and should establish and enforce reasonable time limits for input by other agencies.

V

That the state and local governments eliminate the subtle "networking" process which functions without statutory authority and results in delays, re-work and non-issuance of permits.

VI

That the burden of proof be placed on the government to show why a permit does not comply with law.

VII

That the federal, state and local governments require agencies to review their regulations and work toward elimination of those that are archaic and not asolutely required by law; and that legislature and Congress annually review administrative progress in achieving regulatory reform.

VIII

That legislation be enacted to require disclosure of the costs, both public and private, related to permit processing and administration of regulations and that testimony at public hearings on cost/benefits be required prior to agency adoption of any regulation.

continued...

IX

That legislation be enacted to require fiscal notes on the external economic effect as well as environmental impact of each proposed statute and a cost/benefit review be included in the fiscal note.

X

That to minimize frivolous lawsuits, many of which are based on ill-founded regulations and stipulations, legislation should be enacted to require the loser in each lawsuit to pay the court costs, all attorney fees, the cost of delays, plus interest on all of these funds.

XI

That prior to adoption of regulations, public hearings be held as required by the Alaska Administrative Procedure Act (AS 44.62.190-210.)

Adopted ----------

USBORAX

April 27, 1983

The Honorable Terry Martin
Alaska House of Representative
Pouch V
State Capitol
Juneau, AK 99811

Dear Representative Martin:

U.S. Borax supports your efforts to introduce legislation (SSHB 14) to reform the permitting process in order to avoid unnecessary delays in the orderly development of Alaska's resources.

U.S. Borax is in the process of developing the Quartz Hill molybdenum deposit located 45 miles east of Ketchikan, Alaska. This is a world-class mineral deposit of significant long-term importance to the State of Alaska and anything that can be done to minimize costs and delays in the permitting process of this project while retaining the controls necessary for proper development would, in our opinion, benefit both the State of Alaska and U.S. Borax.

We have read your bill and believe it would minimize costs and delays as well as improve the permitting process by establishing a lead state agency depending on the resource involved.

Sincerely,

Eugene D. Smith/gw

Honorable Terry Martin
Alaska State Representative
Pouch V State Capitol Building
Juneau, Alaska 99811

Dear Representative Martin:

Please excuse the lack of response to your letter of April 13 concerning ALA support of H.B. 14. All the loggers are either working or are in the process of getting started and I haven't been able to get enough Directors together to consider a resolution supporting the bill.

It is hoped by the time I get it approved it will not be too late to support this legislation.

Sincerely,

Donald A. Bell

FACTS ABOUT TEENAGE DRUNK DRIVING

From the National Center for
Statistics and Analysis

Although drunk driving is a problem that pervades all age groups of our licensed population, it is especially severe for teenagers. The combination of learning how to drive, youthful risk-taking behavior, and drinking is accounting for the number one killer of teenagers in this country. Consider these facts:

- Teenage drivers are involved in 1 out of every 5 fatal accidents that occur with close to 9,000 teenagers (15-19 years old) killed in motor vehicle accidents in 1980.[1]

- Almost 60 percent of fatally injured teenage drivers were found to have alcohol in their blood systems prior to their crash, with 43 percent at legally intoxicating levels (i.e., greater than or equal to .10 percent blood alcohol concentration).[2]

- Of the 25,000 persons who die each year in drunk driver accidents, 5,000 of those victims are teenagers. That means that 14 teenagers die each day in drunk driver accidents.[1]

- Alcohol involvement in teenage fatal accidents is at least three times greater in nighttime accidents (between 8 PM and 4 AM) than it is in daytime accidents (between 4 AM and 8 PM).[2]

- In addition, teenage drivers are involved in 1 out of every 4 injury accidents, with a total of 650,000 injured teenagers in 1980.[3] Alcohol is involved in close in 20 percent of injury producing accidents, which means that 130,000 teenagers are injured per year in drunk driver accidents. So, 14 teenagers die and an additional 360 teenagers are injured in alcohol related crashes per day.

- Although teenagers comprise only 8 percent of the driver population and account for only 6 percent of the vehicle miles travelled in this country, they add up to 17 percent of all accident involved drivers and at least 15 percent of all drunk drivers in accidents.[2]

- Think of this: of 330 children born today in the U.S. (about the size of a small grade school), one will die and four will sustain serious or crippling injuries in an alcohol related crash before they reach the age of 24.[4]

- The Surgeon General has reported that life expectancy has improved in the U.S. over the past 75 years for every age group except one. The exception is the 15-24 year old American whose death rate is higher today than it was 20 years old. And the leading single cause of death for this age group is drunk driving.[5]

- As if the pain and suffering were not enough, insurance companies have estimated that teenage drunk driver accidents are costing society close to $6 billion per year in damage, hospital costs, lost work, etc.[6]

FACTS ON ALCOHOL AND HIGHWAY SAFETY

The Problem

Overview:

Drunk driving continues to be one of our nation's most serious public health and safety problems. Some 50 percent of all drivers killed each year have blood alcohol concentrations in excess of the legal limit, 0.10 percent. In single vehicle fatal crashes, where it is more certain who is at fault, upwards of 65 percent of those drivers who die were legally drunk. Over the past 10 years, the proportion of highway deaths involving alcohol has averaged a tragic 25,000 per year. Thus, a staggering one quarter of a million Americans have lost their lives in alcohol-related crashes in the last decade.

The cost of drunk driving has a high economic cost to this country as well. A conservative estimate of the total economic cost of drunk driving is put at 24 billion.

Alcohol and Crashes:

Alcohol is a major contributing factor to fatal (and serious injury) automobile crashes. According to a 1978 review of the literature, approximately 60 percent of fatal crashes involved a driver who had been drinking. Between 40 and 55 percent of such crashes involved a driver who had a blood alcohol concentration (BAC) greater than .10 percent (w/v).

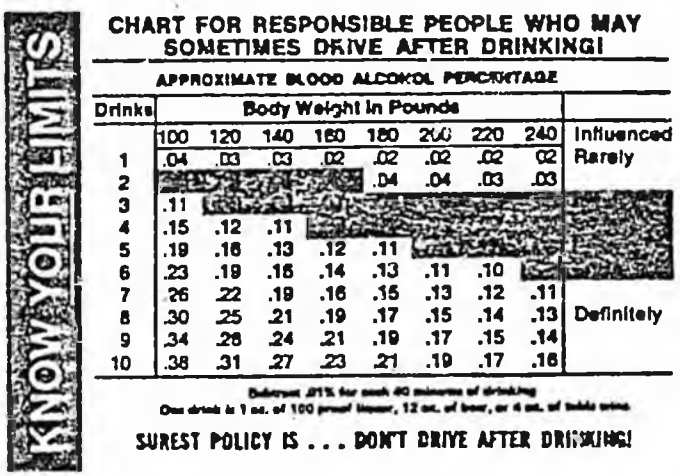
With regard to alcohol and responsibility for fatal crashes, the drinking driver problem is even more significant. In one study drivers judged to be at fault in fatal crashes were six times more likely to have had BAC's greater than .10 percent (w/v) alcohol in their blood than drivers judged not at fault for their crashes (60 percent vs. 10 percent).

This strong relationship between crash responsibility and high alcohol levels is shown further in single vehicle crashes, where responsibility is apparent, and where between 60 and 75 percent (60-75%) of dead drivers have BACs greater than .10 percent (w/v).

The Driver Population:

What the high BAC figures in crashes suggest is that the majority of alcohol related fatal crashes are caused by heavy (problem) drinkers. Some portion of the approximately 15 percent of fatal crashes which involve drivers who have been drinking, but who do not have BACs greater than .10 percent, may be caused by less heavy, less chronic, "social" drinkers.

The majority of drivers are either abstainers or light to moderate (social) drinkers. Even quite liberal estimates suggest that only about 10 to 15 percent of the nation's drivers would be classified as being heavy (problem) drinkers.



Arrested Drunk Drivers:

The average proportion of licenses drivers arrested for drunk driving over a one-year period is estimated to be one percent (1%). This translates to approximately 1.3 million of approximately 130 million licensed drivers.

On a nightly basis, between one in five hundred (1/500) and one in two thousand (1/2000) drivers on the road with a BAC greater than .10 percent (w/v) are arrested for drunk driving. These estimates come from a number of roadside surveys conducted in conjunction with the Alcohol Safety Action Projects (ASAPs) funded by the NHTSA in the 1970's and from the Grand Rapids data reported by Borkenstein and others.

The average BAC of these drinking drivers is approximately .20 percent, double the level for persumed intoxication. Estimating an average period of alcohol consumption at 4-5 hours, this means that the average fatally injured drinking driver had about 15 drinks prior to becoming involved in the crash.

Blood Alcohol and Body Weight

Past Approaches and Current Activities

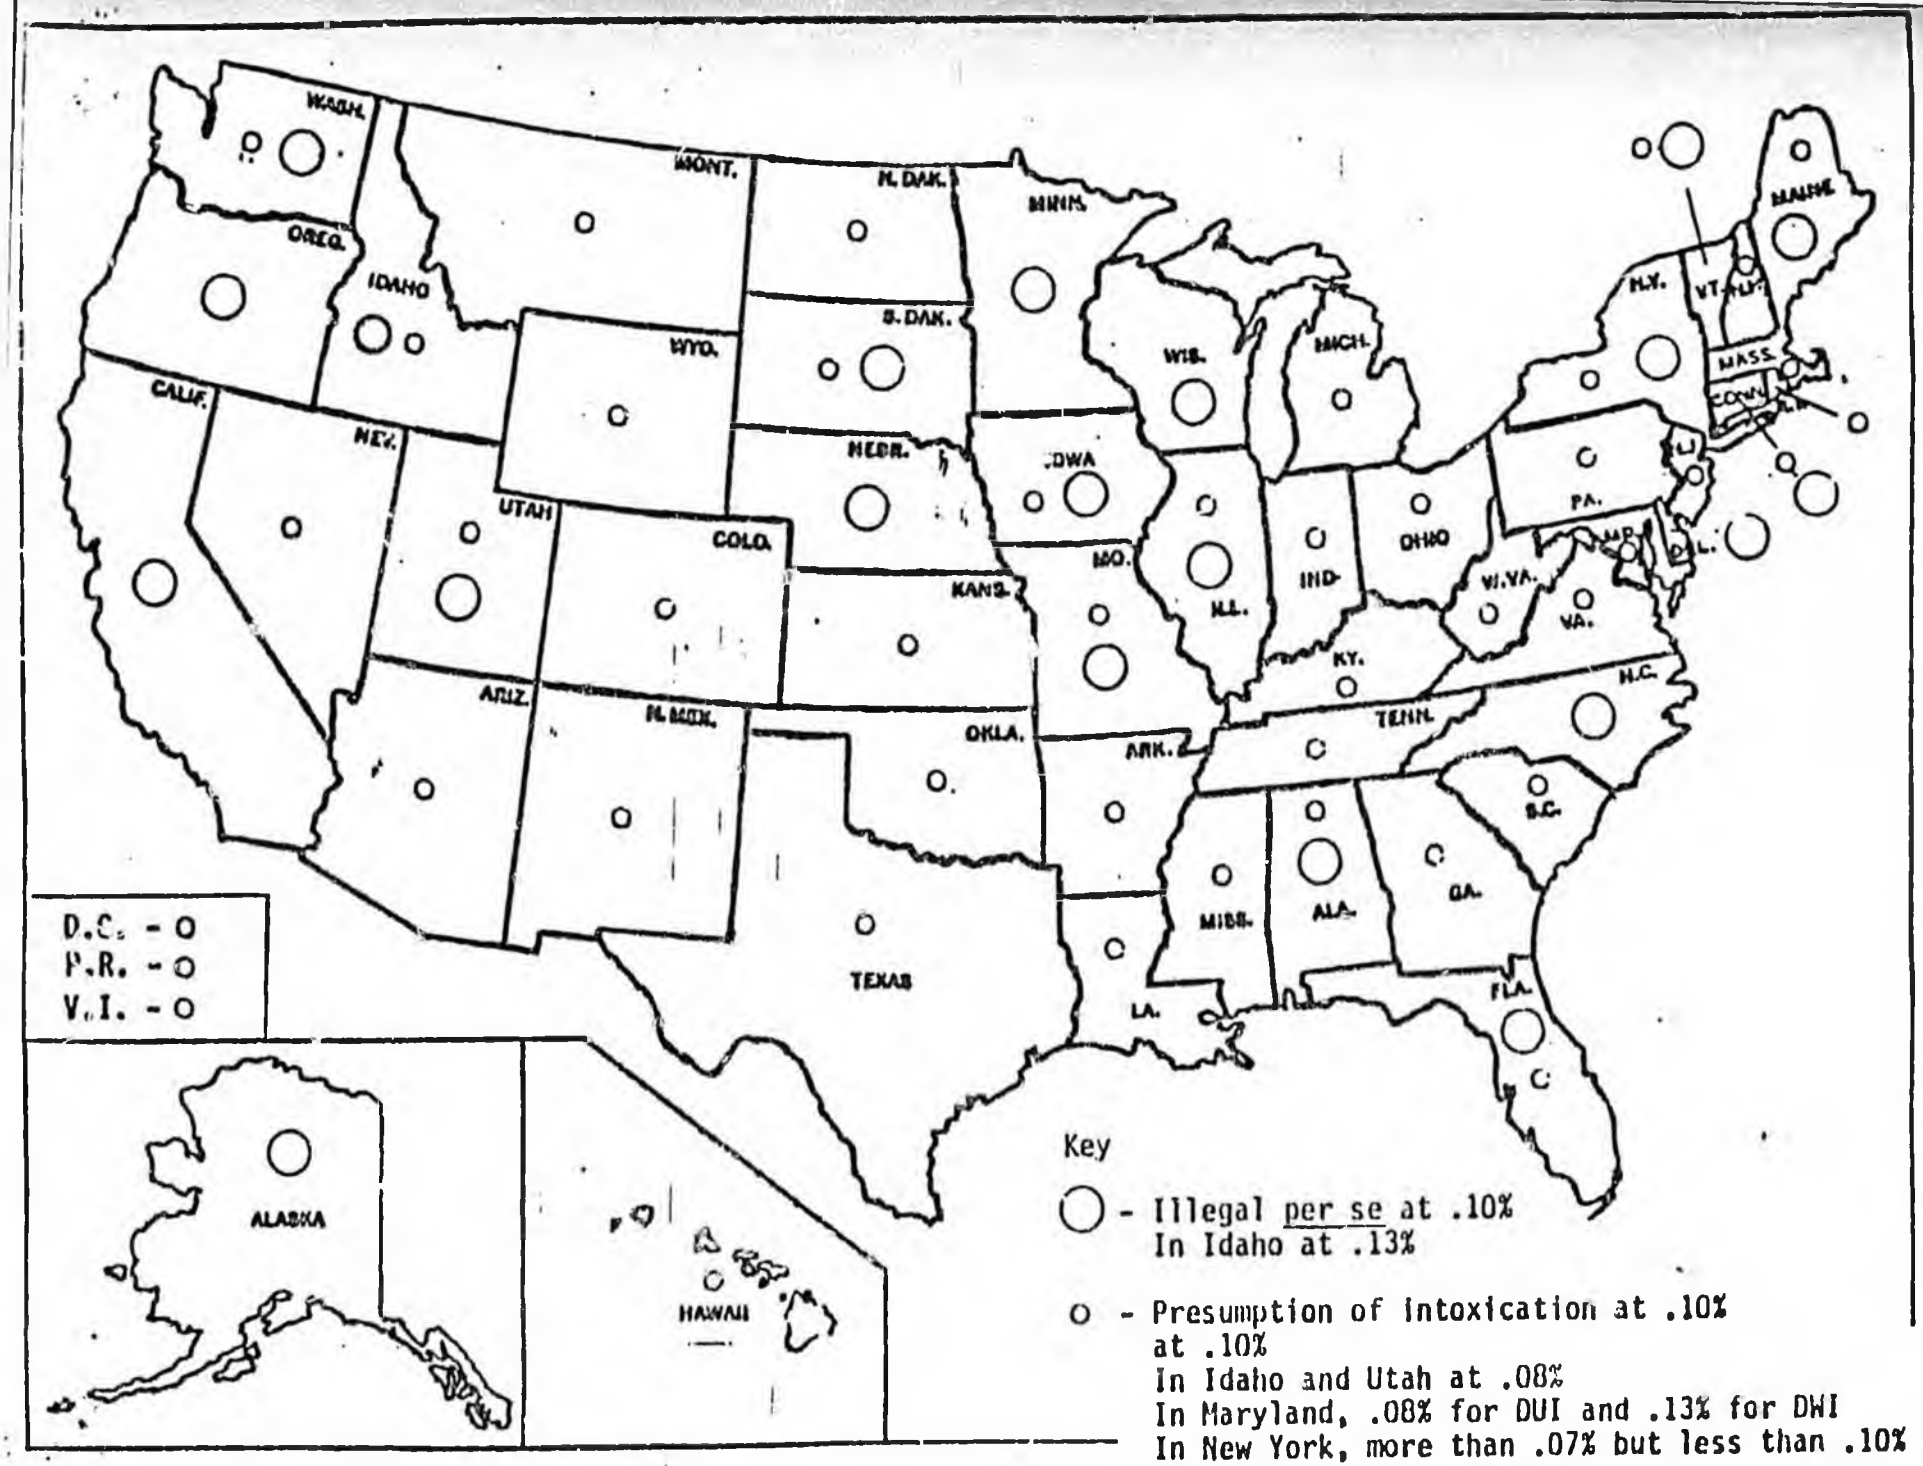
Federal Action:

Over the last 12 years, the National Highway Traffic Safety Administration (NHTSA), an Agency within the U.S. Department of Transportation, has worked with the States to reduce alcohol related deaths on the highway. NHTSA initiated 35 Alcohol Safety Action Projects (ASAPs) throughout the country from 1971-1976 which resulted in the development of a coordinated systematic approach to deal with drunk driving.

In 12 of the 35 ASAPs, a statistically significant reduction in fatal crashes at night was achieved. Individual projects were able to double, and even triple driving while intoxicated arrests, using such new technology as roadside breath testing. Court procedures were streamlined to handle large caseloads. Roughly a quarter-of-a-million drinking drivers were referred for treatment.

Before the passage of the Highway Safety Act of 1966, few States specified a presumptive level of driving while intoxicated. The Federal standard for alcohol safety prescribed the 0.10 percent blood level that legally defines the legal intoxication limit. Now all the States have laws defining driving under the influence at the 0.10 percent level. The majority of the States now have made some improvements in their law enforcement, court, rehabilitation, and educational efforts.

State Action



Under the Section 402 grant program established by the Highway Safety Act the States are increasing the proportion of funds allocated to alcohol programs. In FY 1982 approximately 35 percent of 402 funds ($27.8 of 78.6 million) were allocated to drunk driving programs (with an added 30 percent spent on alcohol enforcement activities under Police Traffic Services).

Responding to citizen interest, 21 States and a number of local jurisdictions have established special drunk driving task forces to revitalize State/local programs.

Fifteen States have raised the minimum legal drinking age to reduce alcohol related crashes among youth. Other States such as Maryland have introduced legislation to raise the drinking age during 1982.

Sixteen States have adopted statutes allowing preliminary roadside breath testing to assist officers in establishing probable cause for drunk driving arrests.

Twenty-one States have established illegal per se statutes designed to simplify and streamline the prosecution of drunk drivers by making it illegal simply to operate a motor vehicle with an illegal blood alcohol concentration (above 0.10%).

HB 17
JR

Drinking age

3-3-83
Times

A GOOD BILL to raise the minimum drinking age in Alaska from 19 to 21 is on the verge of being diluted and diverted from the legislative track.

Such a bill has been introduced in a number of previous sessions and what should be an easy matter to deal with has always gotten involved in curious machinations that have resulted in its demise.

THIS TIME AROUND, some legislators are arguing that the measure, which also prohibits persons under the age of 21 from serving drinks, is unfair to young adults. A lot of people are now dead who might be alive had that measure been put on the books when it first came up. Many of Alaska's highway deaths are attributable to drunk drivers in the under-21 age group.

Back in the early 1970s, when youngsters were being given all sorts of additional legal privileges, Alaska lowered its drinking age to 19. Those days are over and members of the Alaska legislature should pay attention to some of the things that have happened as a result of those actions.

STATISTICS show that raising the drinking age in other states has resulted in a decrease in the number of alcohol-related highway deaths. The figures also show that 19 of the 27 states that lowered their drinking age during the 1970s have now thought better of those actions and reversed them.

The new concerns being raised by Alaska legislators this session should not be allowed to block passage of this bill. Its sponsors are encouraged to do whatever is necessary to get it back on the track.

Drinking age plan may change

by Bill White
Times Juneau Bureau

3-1-83

Juneau — A bill to raise Alaska's minimum drinking age to 21 has been put on hold, as lawmakers prepare amendments to protect the rights of citizens who are 19 or 20 years old now.

As written, the proposal would raise the drinking age from 19 to 21 years old 90 days after it became law.

The bill also would prohibit workers under the legal age from serving liquor. The only exceptions would be those 19 or 20 years old who hold such jobs when the bill becomes law.

But Rep. Jim Duncan, D-Juneau, told the House Finance Committee the bill would unfairly exclude young adults from some kinds of work.

Duncan added, "we may be on the verge of making institutional criminals" of those 19 or 20 years old who are used to going to bars or dances where liquor is served. Their lifestyles aren't easy to change, he said.

Dan Hickey, the state's chief prosecutor, said passage of the bill should reduce crime. But he doesn't have the staff to push prosecutions of those who would violate the new law, he said.

Finance Chairman Al Adams, D-Kotzebue, told Hickey to prepare amendments to the bill to stagger when the new law would take effect to protect the rights of those who now drink or who may serve liquor.

The committee plans to take up those amendments Wednesday.

Rep. Mike Miller, D-Juneau, urged the committee members to approve the bill.

"I was one of the members of the legislature in the early 1970s when we took what we considered a pioneering step in lowering the drinking age," he said.

"I think I was dead wrong and I think a lot of kids are dead right now," he added, referring to statistics that show an increase in alcohol-related traffic fatalities among young people.

Miller cited a December 1982 report from the Presidential Commission on Drunk Driving that found "raising the legal drinking age produced an average annual reduction of 28 percent in nighttime fatal crashes involving 18-21 year old drivers."

He said 27 states lowered their drinking ages in the 1970s for all alcoholic beverages and 11 other states lowered the age for beer or wine consumption. But 19 states have reversed their actions.

Miller said the bill not only would save lives on Alaska's highways, but it would reduce alcohol consumption in the state. "None of us can take a great deal of pride in the amount of drinking in Alaska."

Rep. Terry Martin, R-Anchorage, sponsor of the bill, said 55 percent of all fatal traffic accidents in Alaska involved those younger than 19. But the state's Highway Safety Planning Agency said that between 1979 and 1982 the age group under 20 accounted for one-fourth of all alcohol related fatalities. Members of that same age group hold 3 percent of the driver's licenses in Alaska.

Rep. Vern Hurlbert, D-Sleetmute, said raising the drinking age might cause some young adults to drink in their cars rather than bars.

The Sheffield administration has endorsed the bill. But it favors staggering the effective date of the bill to raise the minimum age to 20 next year and 21 in 1985.

The House passed a similar bill last year. But it died in the Senate.

We support raising the drinking age

Anyone who has lived in Alaska for any length of time has known someone hurt by alcohol.

Alcohol abuse crosses every line. It affects old and young, man and woman, rich and poor. But no instance of alcohol abuse is as tragic as among young people.

To see a teen-ager caught up in alcohol abuse can only be described as a shame. Yet most of us see it, hear about it and read about it all the time.

Most drinkers, young and old, are responsible. Yet a sizable minority — a minority that cannot be ignored — continues to misuse alcohol. And many are teen-agers.

The major and most deadly abuse of alcohol is drunken driving. For some reason, young Alaskans especially are arrested time and again for drunken driving. You can see it in the daily police reports and hear about it from concerned friends and parents.

All too often, you read about it in the obituaries.

According to Mothers Against Drunk Drivers, a nationwide group that has taken hold in Alaska, almost one-third of the 24,000 people who died in alcohol-related traffic accidents nationally were teen-agers.

No death is as tragic as a drunken-driving death. That tragedy is even worse when it involves a teen-ager.

Getting rid of alcohol in Alaska seems an impossibility. Though it has been successful in many rural areas, the return of prohibition is not at hand in most of the state.

What is at hand is a movement to raise Alaska's drinking age from 19 to 21.

That is an effort we can all support. Raising the drinking age will not solve Alaska's drinking problem. Nor will it stop drunken driving among teen-agers.

But it will help stop the on-going tragedy of alcohol abuse among many of Alaska's youths.

"I voted to lower the drinking age in 1970," Rep. Mike Miller, D-Juneau, told the House Judiciary Committee last week. "We were dead wrong."

We agree. Drinking is not a right. It is a privilege we believe is hurting too many teen-agers.

Though no statistics are available for the state, we and many other responsible Alaskans agree that raising the drinking age to 21 will save lives.

We support raising the state drinking age.

21: Magic drinking age

Panel: 19 too young

By The Associated Press

Witnesses at a House Judiciary Committee hearing weren't sure people automatically become responsible drinkers at age 21, but they nevertheless agreed that the drinking-age should be lifted from 19 to 21.

A measure to do that, (HB17), whose prime is Rep. Terry Martin, R-Anchorage, was the subject of a hearing Thursday. Martin told committee members that age 21 seems to be "some kind of magical number that does reduce death."

Martin said that of 24,000 annual alcohol-related traffic deaths nationally, 7,000 were teenagers. The problem has prompted Congress to consider a national age of consumption, he added.

Alaska's director of Highway Safety, Charlie Smith, said statistics on alcohol-related traffic deaths in the 49th state are largely unavailable because "last year was the first time I was asked to produce statistics."

A presidential commission has recommended all states raise their drinking age to 21, Smith said.

Howard Scaman, who represented Mothers Against Drunk Driving, Students Against Drunk Driving, and the Coalition for a Safe Alaska, said that the problem is so serious that alcohol "is readily available in the junior high system."

The state, he said, has one liquor license per 183 people, several times higher than the national average.

Rep. Mike Miller, D-Juneau, said he was part of the problem.

"I voted to lower the drinking age in 1970," he said. "We were dead wrong. We felt that if they wanted to get it, they were going to get it. And they were going to drive anyway."

Raising the drinking age won't eliminate teenage drinking, Miller said, "but we can lessen it."

"There is no magic number," he said. "We have to draw the line somewhere. Twenty-one seems to be a good age."

When Rep. Don Clocksin, D-Anchorage, said he was concerned the law would be discriminating because of age, But, Miller added, "Drinking and getting drunk is not a right. And society has a right to draw a line."

A representative of the Hotel, Restaurant and Bartenders Union Local 878, Michelle Castanedo said she had no objection to raising the drinking age. But, she said, she would like to see a provision for 18-to 20- year-olds being allowed to work in places where alcohol is served.

A committee substitute providing for her concern is expected to be introduced today as hearings on the bill continue.

Martin supports higher drinking age

Associated Press 1/28/83

Juneau — Witnesses at a House Judiciary Committee hearing weren't sure people automatically become responsible drinkers at age 21, but they nevertheless agreed that the drinking age should be lifted from 19 to 21.

A measure to do that, sponsored primarily by Rep. Terry Martin, R-Anchorage, was the subject of a hearing Thursday. Martin told committee members that age 21 seems to be "some kind of magical number that does reduce death."

Martin said that of 24,000 annual alcohol-related traffic deaths nationally, 7,000 were teen-agers. The problem has prompted Congress to consider a national age of consumption, he added.

Alaska's director of Highway Safety, Charlie Smith, said statistics on alcohol-related traffic deaths in the 49th state are largely unavailable because "last year was the first time I was asked to produce statistics."

A presidential commission has recommended all states raise their drinking age to 21, Smith said.

Howard Scaman, who represented Mothers Against Drunk Driving, Students Against Drunk Driving, and the Coalition for a Safe Alaska, said that the problem is so serious that alcohol "is readily available in the junior high system."

The state, he said, has one liquor license per 183 people, several times higher than the national average.

Rep. Mike Miller, D-Juneau, said he was part of the problem.

"I voted to lower the drinking age in 1970," he said. "We were dead wrong. We felt that if they wanted to get it, they were going to get it. And they were going to drive anyway."

Raising the drinking age won't eliminate teen-age drinking, Miller said, "but we can lessen it."

"There is no magic number," he said. "We have to draw the line somewhere. Twenty-one seems to be a good age."

When Rep. Don Clocksin, D-Anchorage, said he was concerned the law would be discriminating because of age, Miller admitted he shared the same concerns.

But, Miller added, "Drinking and getting drunk is not a right. And society has a right to draw a line."

A representative of the Hotel, Restaurant and Bartenders Union Local 878, Michelle Castanedo said she had no objection to raising the drinking age. But, she said, she would like to see a provision for 18-to 20-year-olds being allowed to work in places where alcohol is served.

A committee substitute providing for her concern is expected to be introduced today.

Letters to the editor

Raise the age for drinking

Dear Editor:

In response to the letter, "Cure for teenage drinking," I would like to make a few comments.

Mr. Kirk wrote a lengthy and lively letter demeriting Rep. Terry Martin's bill to raise the drinking age from 19 to 21. He says the bill violates the "American Way" of giving citizens great responsibility for their individual actions.

Let's keep in mind that laws and regulations arise in response to harmful behavior. This bill is long overdue!

Real-life groups of people are, in fact, punished for the transgressions of a few of their members. The "old elementary school teacher who used to make the whole class stay in from recess because someone was talking during class" offers us all a valuable lesson. No one lives completely unto himself. Our actions always produce an affect touching those persons associated or identified with us. For example, a disruptive or criminal family member causes grief to other members of his family. Shoplifters cause the price of retail goods to rise for all shoppers, and careless youthful drivers cause other teen-agers to pay higher insurance rates. The elementary teacher was illustrating the point that it was not only her job to maintain order in the classroom but that the group also was expected to exhibit appropriate conduct and encourage classmates to do the same.

We should learn early in our education that we are individually and collectively responsible for our actions. Peer pressure to do what is right is the only hope for an orderly society, as it is impossible to have a policeman for every citizen. One who buys liquor for a minor contributes to that minor's risk of harm to himself and others. One who purchases products that contribute to people's poor health and safety — whether it be tobacco, alcohol, or illegal drugs — directly reinforces that more of that substance will be produced. These individuals share in the responsibility along with the intoxicated driver who cripples and kills on the highway.

Nothing will prevent a minor from obtaining dangerous substances if he is determined to do so just as it is impossible to prevent a suicide by a peron bent on self-destruction. However, there is no reason to make these items convenient to youth prior to their reaching an age that we hope allows for the development of maturity and judgement needed to exercise caution if not outright refusal to use these substances.

Comparing the loss of jobs for teenagers in drinking establishments because of the revised 21 year old drinking age is sort of like finding a remedy for cancer and then complaining that some nurses will find themselves out of work. It is true that unemployment is a priority, but the disabling and killing of youthful drivers, their friends, and other innocent drivers is a much higher priority. It is time we consider the long-range costs of our decisions and policies rather than just the immediate effects. It might be a bore to drive at 55 mph and see what you pass but thousands of people are alive today as a result of the law.

Yes, one could say Terry Martin's plan punishes the innocent teen-ager along with the guilty. It's a fact of life. But, if you are a teenager who chooses not to drink, you would hardly consider Rep. Martin's bill a punishment.

"Independent in All Things . . . Neutral in None"

Other opinions expressed on this page do not necessarily reflect those of the Daily News-Miner.

Alcohol abuse worries

We hope members of the Alaska Legislature will be as concerned about the serious community problems caused by alcohol abuse as are their constituents.

Around the nation, Americans are worried. A recent Gallup poll found that Americans are more worried about excessive drinking than they are about smoking or overeating. A majority think the federal tax on liquor should be doubled.

In Alaska, that concern is reflected in efforts to curb the problems caused by alcohol abuse, particularly drunk driving. Last year, Anchorage residents formed a chapter of a powerful new organization called Mothers Against Drunk Driving. Now some Fairbanks residents who have personally experienced the tragedy of losing a family member or friend in an accident involving a drunk driver are setting up a chapter here. Watch for their announcement soon of a public meeting for anyone who is interested.

It's going to take a lot of public pressure to enact the changes we need to make alcoholic beverages less available and therefore cut down on the abuses associated with alcohol. So far, the Legislature has refused to take final action on measures that would increase the state excise tax and restore the drinking age to 21. At the same time, statistics from across the nation are documenting the increasing number of deaths of young people in traffic accidents where booze is involved. And we read more and more about the young age at which students are beginning to accept alcohol consumption as part of their daily living.

The Gallup survey, commissioned by the National Council on Alcoholism's New York affiliate, found that 68 percent of the 1,039 adults surveyed rated an educational campaign to foster drinking moderation "very important."

Fifty-six percent named at least one type of alcoholic beverage on which they favored doubling the federal tax, with an increase in distilled liquor drawing the most support—from 54 percent. Forty-nine percent favored doubling the federal tax on beer, 48 percent on wine.

Sixty-two percent said they would like to see the major political parties support a moderate drinking campaign in their platforms and 59 percent said they would be more likely to vote for a candidate who supported such a campaign.

That should send a message to incumbent legislators. Though people concerned about alcohol abuse and supporting state measures to control it may not have the dollars to match campaign contributions from the liquor industry, they certainly have the votes.

The Legislature has been derelict in the face of the facts in not enacting a tax increase on alcoholic beverages since 1961. It's past time they turned a deaf ear to the powerful liquor lobbyists and passed legislation to raise the drinking age and pay for some of the human misery created by those who can't handle alcohol.

Here in Fairbanks, we've so far managed to sweep aside most of the proposals to deal with alcohol abuse, too often claiming that since a specific proposal won't do the whole job, we shouldn't enact it. With that shortsighted view, we'll never even get started.

Fairbanks Mayor Bill Walley's blue ribbon commission can be a big help in curbing alcohol abuse and thereby making Fairbanks cleaner and safer if it will recommend specific steps the community can take and urge people to also push for other steps the state can take.

The problems caused by alcohol abuse aren't going to go away if we ignore them—sadly, they're going to get even worse.

This year is the time to press for some action.

Letters to the editor

Cure for teen-age drinking

Dear Editor:

Rep. Terry Martin has filed another bill to raise the drinking age from 19 to 21 years of age. A similar bill was squashed last year in the state Senate.

Martin's argument is that by allowing these young adults — and a 19 or 20-year old is a legal adult, mind you — access to legal liquor makes it that much easier for teenagers to get booze. He points out that teenagers cause a disproportionate share of drunk-driving accidents. The answer to teen-age drunk driving, he says, is to prohibit those kids' older friends and siblings from touching that Old Demon Rum.

The bill violates certain principles.

It is the American way, our historical tradition, to give citizens great responsibility for their individual actions. Freedom is curtailed only when an individual proves irresponsibility by abusing that freedom. Groups of people — ethnic, religious, demographic — are not to be punished for the irresponsibility or other transgressions of a few of the members of those groups.

Remember that old elementary school teacher who used to make the whole class stay in from recess because someone was talking during class? Remember how, even then, you perceived that as not fair? Better example: statistics show that blacks and Hispanics in America commit more violent crimes per capita than do whites. I hope I shall never hear Alaska legislators calling for restrictions on the rights of blacks and Hispanics because of this.

Too farfetched? Allow me one more hypothetical situation: Two nations go to war. One contains a number of citizens whose ancestors came from the enemy nation. Regardless of their actual citizenship or loyalty, these citizens are rounded up and held in concentration camps for the duration. The nation which succumbs to this lapse in judgment is still embarassed by it some 41 years later.

Enough on principles. What about the practical effects of the bill in question? Martin's attempt at prohibition would not prevent 19- and 20-year-olds from getting alcohol; they would obtain it surreptiously just as 17- and 18-year-olds do now. What it would do is prevent them from holding jobs in establishments where liquor is served. This includes that nice restaurant at the hotel as well as your local neighborhood pizza parlor. Such establishments are a major source of employment for young people without job skills.

There are other ways to cut back on drunken driving. One idea, put forward by the staff of the then-Sen. Charlie Parr last year, is to suspend the license of any minor caught driving while intoxicated until that minor reaches adulthood.

For some teens, three days in jail, no matter how monotonous or difficult at the time, might seem a status symbol when back amongst their peers. But the thought of losing their wheels for a long time ought to make even the tough teens tremble. The proposal has the advantage of punishing individual teen-agers rather than a whole demographic slice of their older brothers and sisters.

There are other ways to cut back on drunk drivers, including impoundment of vehicles and longer mandatory jail terms. These proposals don't quite provide the "quick fix" Martin desires, but they differ from his plan in one important aspect: they punish the guilty, not the innocent.

Equal responsibility can be expected only when equal rights are extended. Nineteen- and 20-year-olds are legal adults who stand before the same system of police, courts and corrections as do the rest of us. To deny them a privilege we all enjoy, a right of access to entertainment as well as employment, is not only impractical but wrong.

Alaska's image

Dear Editor:

When his days as governor were numbered, Jay Hammond spent a lot of time in public appearances talking about what his "legacy" would be for eight years of service. Now we know more about what he was meant to Alaskans from the public opinion shift which has apparently occurred nationwide as a result of Hammond-era public relations escapades.

Traditionally Alaskans have not wasted a lot of valuable energy trying to impress Outside residents of our meaningful existence in this world of hocus-pocus. But image-maker Hammond needed to convince the rest of the nation that we really care what they think of us; with the result being a loss of self-esteem.!

Two million dollars were reportedly spent for a national communications program to embellish an already positive national image. Two years later, after many tales of woe for programs that flopped and books that weren't published, the concensus Outside is that Alaskans are frivolous with money they don't deserve to have or to throw around.

The Effect of Raising the Legal Minimum Drinking Age on Fatal Crash Involvement

ABSTRACT

In the early 1970's, many states in the U.S. lowered their legal minimum drinking ages, resulting in increased fatal crash involvement among young drivers. Beginning in 1976 and continuing into the 1980's, some of these states raised their drinking ages. The present study, conducted in nine states in which the drinking ages were raised, found that this resulted in reductions in fatal crash involvement among drivers the law changes applied to, especially in types of fatal crashes in which alcohol is most often involved. The reductions in the nighttime fatal crash involvement of such drivers, that occurred in eight of the nine states, ranged from 6 to 75 percent. On average, a state that raises its drinking age can expect about a 28 percent reduction in nighttime fatal crash involvement among drivers the law change applies to. It was estimated that in the 14 states that had raised their drinking ages as of January 1981, the result each year is about 380 fewer young drivers involved in nighttime fatal crashes. In the 31 states that still had a legal minimum drinking age less than 21 as of that date, it is estimated that each year there could be about 730 fewer young drivers in nighttime fatal crashes if the legal drinking age were raised to 21.

In the early 1970's, more than half of the states in the U.S. lowered their legal minimum drinking ages -- in most cases from 21 to 18 -- for the purchase of some or all alcoholic beverages. Research indicated that this legislation resulted in increased crash involvement among young drivers.[1,2] In a study of various states and Canadian provinces that reduced their drinking ages from 21 to 18, there were significant increases in fatal crash involvement -- particularly in nighttime and single vehicle crashes in which alcohol is most often involved -- of drivers under 21 in these areas, compared with adjacent areas that did not reduce their drinking ages. These increases occurred not only among 18-20 year olds, who were directly affected by the law change, but also among 15-17 year olds.[1]

As a result of these findings and other reports of growing teenage alcohol-related problems, many states that had lowered their legal minimum drinking ages in the early 1970's raised them beginning in 1976. By the end of 1980, 14 of the 30 states that had lowered their drinking ages for the purchase of some or all alcoholic beverages had raised them, although not necessarily back to the original ages. In this paper, a study of the effect of raising the drinking age on fatal crash involvement of teenage drivers is reported.

METHODS

Research Design

Nine states, all of which raised their legal minimum drinking ages between September 1, 1976 and January 1, 1980, were studied. Four states that raised their drinking ages during 1980 were excluded, because the law changes were too recent for their effects to be measured using data available when the

study was conducted. New Jersey, which raised its drinking age from 18 to 19 on January 2, 1980, but included a "grandfather" clause permitting those already 18 before that date to drink, was also excluded.

Each of the nine states was paired with a comparison state in which the legal minimum drinking age remained unchanged during the study period. Comparison states were chosen on the basis of geographic proximity to law-change states and comparability with law-change states with respect to numbers of crash fatalities. Table 1 shows the law-change and comparison state pairs, and drinking age regulations in each state.

Table 1 goes here

Data on driver involvement in fatal crashes from January 1975 through September 1980 were obtained from the Fatal Accident Reporting System (FARS).* Only drivers of motor vehicles -- automobiles, light trucks, vans, on-off road vehicles -- were included.

Alcohol is a major factor in fatal motor vehicle crashes in general, but is particularly likely to be involved in nighttime fatal crashes (9:00 p.m. - 5:59 a.m.), especially single vehicle nighttime fatal crashes.[3-5] This subset of crashes therefore received special attention during the study.

The duration of post-law periods studied ranged from nine months (Illinois) to three years (Minnesota). In two states that raised their drinking ages from 18 to 19 but had a "grandfather" clause that permitted those already 18 years

* FARS is a computerized data base containing information on motor vehicle fatalities in the 50 states, the District of Columbia, and Puerto Rico. The data are collected by the state governments under contract to the National Highway Traffic Safety Administration. Police accident reports are the primary source of data, supplemented by data from medical examiners and other sources.

old to drink, the 12-month period following the law change dates was excluded. Pre-law and post-law periods for the nine states are shown in Figure 1. The ages to which the law changes apply are also given for each state in Figure 1.

Figure 1 goes here

Fatal crash involvement of drivers younger than those covered by the laws (starting with age 15) was also studied because of the possibility of spillover effects in these ages when alcoholic beverages could no longer be obtained legally by older teenagers. As a control, drivers older than those to whom the law changes applied (through age 21) who could drink legally in law change states throughout the study period were also included.

When a state changes its drinking age, there are possible effects on fatal crash involvement in adjacent states, both in the age groups the law changes apply to, and among their younger and older associates. These effects can be positive or negative. For example, if a state raises its drinking age from 18 to 21 and a neighboring state has an 18-year-old drinking age, then 18-20 year olds in the law-change state may travel to the neighboring state in order to drink legally, and may crash there. On the other hand, if a neighboring state has a 21 year old drinking age, 18-20 year olds in that state may no longer travel to the law-change state to drink, and consequently may crash less in both states.

These and other possible effects have a bearing on the research design used in the present study, which involved comparing law-change states with neighboring (although not necessarily contiguous) states, and also must be considered in assessing the net effect of states raising their legal minimum drinking age. It was found, however, that the number of drivers of the age

groups studied with out-of-state licenses in fatal crashes in law-change and comparison states in the pre- and post-law periods was small (less than 10 percent of the total). More importantly, the number of drivers in fatal crashes in law change states that were licensed in the comparison states (and fatal crash involved drivers in comparison states that were licensed in the law-change states) was less than one percent of the total.

Analyses based only on drivers licensed in the state in which the crash occurred produced the same results as analyses based on all drivers; the latter measure was therefore used.

Statistical Analysis

If raising the drinking age reduces driver involvement in alcohol-related fatal crashes, nighttime fatal crashes would be expected to be reduced more than daytime crashes (and single vehicle nighttime fatal crashes more than multiple vehicle daytime fatal crashes). In other words, the ratio of night-to-day fatal crashes in a law-change state would be greater before the law change than after it. This can be shown in a 2 x 2 table as follows:

	Time Period	
Time of Crash	Before Law Change	After Law Change
Night	n_{11}	n_{12}
Day	n_{21}	n_{22}

and $$\frac{n_{11}}{n_{21}} \geq \frac{n_{12}}{n_{22}} \qquad (1)$$

A statistical measure that compares such ratios is the log odds ratio,[6] defined as:

$$\beta = \ell n \quad \frac{n_{12}/n_{22}}{n_{11}/n_{21}} \qquad (2)$$

Positive values of β correspond to increases in the night/day ratio, negative values to decreases, and $\beta = 0$ whenever the ratio is unchanged. Except for small samples ($n \leq 5$) the distribution of β is asymptotically normal and its variance is approximately:

$$\sigma_\beta^2 = \frac{1}{n_{11}} + \frac{1}{n_{12}} + \frac{1}{n_{21}} + \frac{1}{n_{22}} \qquad (3)$$

The hypothesis of no change in the night/day ratio subsequent to the law could therefore be tested in terms of the approximately standard normal test statistic $Z = \beta/\sigma_\beta$. Large negative values of Z would indicate a reduction in this ratio; large positive values an increase.

To rule out the possibility that changes in the ratios in law-change states were part of a regional trend, the log odds ratio for a law-change state (β_ℓ) was compared with the log odds ratio of the non-law change (comparison) state with which it was paired (β_c). To calculate β_c data for the comparison state were split into before and after periods that coincided with these periods in the law-change state. Positive, zero or negative values of the difference $\Delta\beta = \beta_\ell - \beta_c$ are indicative of greater, equal or smaller increases in the law-change state than in the comparison state. The variance of this test statistic is $\sigma^2_{\Delta\beta} = \sigma^2_{\beta_\ell} + \sigma^2_{\beta_c}$ and $\Delta\beta/\sigma_{\Delta\beta}$ is again standard normal if the change in the night/day ratio was the same in both states.

To rule out the possibility that changes observed in age groups covered by the law (and younger ages) were part of a trend in the night/day ratio that occurred in other age groups in law change states, log odds ratios in law-change and comparison states were compared for older drivers through age 21, to whom the law change did not apply. This was done by comparing $\Delta\beta_a$ for the law-affected group to a similarly calculated $\Delta\beta_o$ for the older age group. As before, the variance of $\Delta\beta_a - \Delta\beta_o$ is equal to $\sigma^2_{\Delta\beta_o} + \sigma^2_{\Delta\beta_a}$ and the test statistic is $(\Delta\beta_a - \Delta\beta_o)/(\sigma^2_{\Delta\beta_a} + \sigma^2_{\Delta\beta_o})^{\frac{1}{2}}$ which is standard normal in the absence of a difference between the $\Delta\beta$'s.

The log odds ratios were also used to estimate changes in the number and percentage of drivers in nighttime fatal crashes resulting from the law. Consider now the 2 x 2 x 2 contingency table for a given age group:

		State			
		Comparison		Law-Change	
		Before	After	Before	After
Time of Crash	Night	a	b	e	x
	Day	c	d	g	h

If the two odds ratios are the same then,

$$\frac{xg}{eh} = \frac{bc}{ad} = e^{\beta_c} \qquad \text{and } x = bceh/adg.$$

Now if, instead of x, the cell frequency is actually n, then the difference

$$\Delta n = n - x = n\,[1 - e^{\beta_c - \beta_2}] \qquad (4)$$

is the change in drivers involved in nighttime fatal crashes in the law-change state after the law went into force. This change can be expressed as a percentage:

$$\Delta P = 100\,\frac{\Delta n}{x} = 100\,[e^{\Delta\beta} - 1] \qquad (5)$$

Estimates of net changes in fatal crash involvement due to the laws were obtained by comparing the estimated changes for the age group covered by the law (ΔP_a) with the estimated change (ΔP_o) for the older group. Applying formula (5) for both age groups leads to the estimated net change due to the law for the law-affected group:

$$\Delta P_k = \frac{\text{Net change}}{\text{in state k}} = \frac{\Delta P_a - \Delta P_o}{1 + \Delta P_o} \qquad (6)$$

These methods were also used to determine what changes occurred in driver involvement in single vehicle nighttime fatal crashes and in all fatal crashes.

Data from the matched state pairs were analyzed by means of these methods in three different ways. The simplest analysis was based on data pooled across the nine law change and nine comparison states. In this analysis the pooled data were treated as if all of it had come from one change and one comparison state. This analysis disregards the variation between the states.

In the second method the "typical" change attributable to the laws was estimated as the average of the nine separate state estimates:

$$(\Delta P)_{av} = 1/9\ (\Delta P_1 + \ldots + \Delta P_9) \qquad (7)$$

The corresponding estimate for the variance of ΔP_k is

$$\sigma^2 = 1/8 \sum_{1}^{9} (\Delta P_k - (\Delta P)_{av})^2 \qquad (8)$$

and so the 95 percent confidence interval for the average is $(\Delta P)_{av} \pm 1.96\ \sigma/\sqrt{9}$. National projections for the estimated impact of already existing laws and the impact of further law changes were estimated on the basis of $(\Delta P)_{av}$.

Finally, to estimate the percentage change in driver fatal crash involvement that occurred in law-change states during the study period, the estimated changes were summed across the law-change states and divided by the estimated sum of the number of drivers that would have been in fatal crashes without the law change. This estimate corresponds to the "aggregate" change due to the laws. The aggregate change is a weighted average of the changes, whereas the typical change is an unweighted average. Statistical significance of the aggregate change was assessed in terms of the test statistic:

$$Z = \frac{1}{\sqrt{9}} \sum_{1}^{9} \frac{\Delta\beta_{ak} - \Delta\beta_{ok}}{(\sigma^2_{\Delta\beta_{ak}} + \sigma^2_{\Delta\beta_{ok}})^{\frac{1}{2}}} \qquad (9)$$

In the absence of a law effect Z would have a standard normal distribution.

RESULTS

Table 2 shows the results of comparisons between the nine law-change and comparison state pairs on driver involvement in fatal crashes before and after the laws went into force. In the age groups the laws applied to, there was a greater decrease in driver involvement in nighttime than in daytime fatal crashes in law-change states than in comparison states subsequent to the laws ($Z = -3.29$, $p = 0.001$). There was also a greater decrease in single vehicle nighttime fatal crash involvement than in multiple vehicle daytime fatal crash involvement for those ages ($Z = -2.85$, $p < 0.01$). There were an estimated 30 percent fewer drivers in the law-affected age groups in fatal nighttime crashes in law-change states during the post-law periods studied, and 41 percent fewer drivers in single vehicle nighttime fatal crashes. There was a decrease in driver involvement in all fatal crashes in law-change states in the age groups that the law applied to, but it was not statistically significant ($Z = -1.20$, $p > 0.10$).

Table 2 goes here

There was some indication of decreased fatal crash involvement of drivers in law-change states who were younger than drivers the law changes applied to, but the changes were not statistically significant. This was also the case when comparisons were based only on drivers one year younger. There were also small, non-significant changes for older drivers in law-change states.

The three sets of estimates of the percent net reductions in fatal crash involvement of drivers in law-change states to whom the law changes applied are given in Table 3. The three estimation methods yielded reasonably consistent results. Estimated reductions in driver involvement in nighttime fatal crashes

ranged from 18 to 28 percent; all three estimates were statistically significant. Estimated reductions in driver involvement in single vehicle nighttime crashes ranged from 23 to 35 percent. Although these reductions were higher than the nighttime reductions, only the aggregate estimate was statistically significant, in part because of the smaller number of drivers in nighttime single vehicle crashes. There were smaller estimated reductions in all fatal crashes (12 to 20 percent); the pooled estimate was statistically significant.

Table 3 goes here

Table 4 shows, for each of the nine law-change states, the estimated post-law changes in nighttime fatal crash involvement for law-affected and older drivers, and the net effects. The net effects of the laws on drivers the law changes applied to are also displayed in Figure 2. There were estimated net reductions in driver involvement in nighttime fatal crashes in eight of the nine states, ranging from 6 to 75 percent. Montana was the lone state in which there was not a net reduction. The average reduction in the nine states was 28 percent (± 17 percent for a 95 percent confidence interval).

Table 4 goes here

Figure 2 goes here

Figure 3 displays the estimated effects of driver involvement in nighttime fatal crashes as deseasonalized monthly time series from 1975 into 1980 as the

nine states studied raised their legal minimum drinking ages.*

Figure 3 goes here

DISCUSSION

When states lowered their legal minimum drinking ages in the early 1970's, the result was an increase, among both law-affected and younger drivers, in involvement in fatal crashes, especially those crashes in which alcohol is most often involved. The results of the present study indicate that when states raise their drinking age, there is a corresponding decrease in fatal crash involvement among law-affected drivers. There is some evidence that raising the drinking age also affects younger drivers, but the reductions in the involvement of younger drivers in fatal crashes were not statistically significant.

For the 14 states (including the nine studied plus five others) that as of January 1981 had raised their legal minimum drinking ages in recent years, it is estimated that these law changes result each year in about 380 fewer young drivers involved in nighttime fatal crashes.** For the 31 states (including seven of the nine studied) that as of January 1981 had a drinking age for

* The estimated monthly series was obtained in three steps. First, for each month the data in the 2 x 2 table representing day/night and law change/no law change splits were pooled among states that had already raised the drinking age, and the frequency of nighttime crash involvement in the change state was estimated so that the odds ratio of the modified table then equalled the odds ratio for a similar table obtained by pooling all pre-law change counts across all months and all states. Second, these estimated counts for the post-law periods in the change states were added to the sum of the observed counts in the states that still did not change their laws. Third, this sum was smoothed using X-11. The estimated monthly reduction in fatal crash involvement was subdivided between law effect and other factors using a constant factor (40 percent). This factor represents the estimated reduction in the involvement of older drivers.

** This annual estimate was based on data from 1979, the last full year for which FARS data were available when the present study was conducted.

some or all alcoholic beverages that was less than 21,* it is estimated that each year there could be about 730 fewer young drivers involved in nighttime fatal crashes if in all states the drinking age for all alcoholic beverages was raised to 21. Any single state that raises its drinking age can expect the involvement in nighttime fatal crashes of drivers of the age groups to which the change in the law applies to drop by about 28 percent.

The societal benefits achieved in states that have raised their drinking ages are substantial; the benefits achievable by additional states raising their drinking ages would be even more substantial. Raising the legal minimum drinking age to 21 in all states would have an important impact in reducing the annual toll of motor vehicle deaths in the United States, particularly the deaths of young people and of others with whom they are involved in crashes.

* If persons less than age 21 were allowed to purchase only beer containing not more than 3.2% alcohol by weight, the state was classified as having a 21-year-old drinking age.

Tennessee	18	19	6/1/79	Kentucky	21

1 The laws apply to all alcoholic beverages except where noted.

2 The age change applied to beer and wine; the legal minimum drinking age for distilled spirits was 21 throughout the study period. Prior to the 1980 change, home rule units in Illinois had the authority to promulgate different laws for drinking ages. Some raised the drinking age from 19 to 21 for beer and wine before the statewide change in 1980, although in some cases, beer and wine purchase by 19-20 year olds was permitted under some conditions.

3 A "grandfather" clause permitted 18 year olds to drink if they were 18 before the law went into effect.

4 The legal minimum drinking age was 18 for beer with not over 3.2% alcohol content, and 21 for other alcoholic beverages.

5 The following counties in central and northern New York were included: Clinton, Essex, Franklin, Fulton, Hamilton, Herkimer, Jefferson, Lewis, Madison, Montgomery, Oneida, Oswego, St. Lawrence, Saratoga, Warren, and Washington.

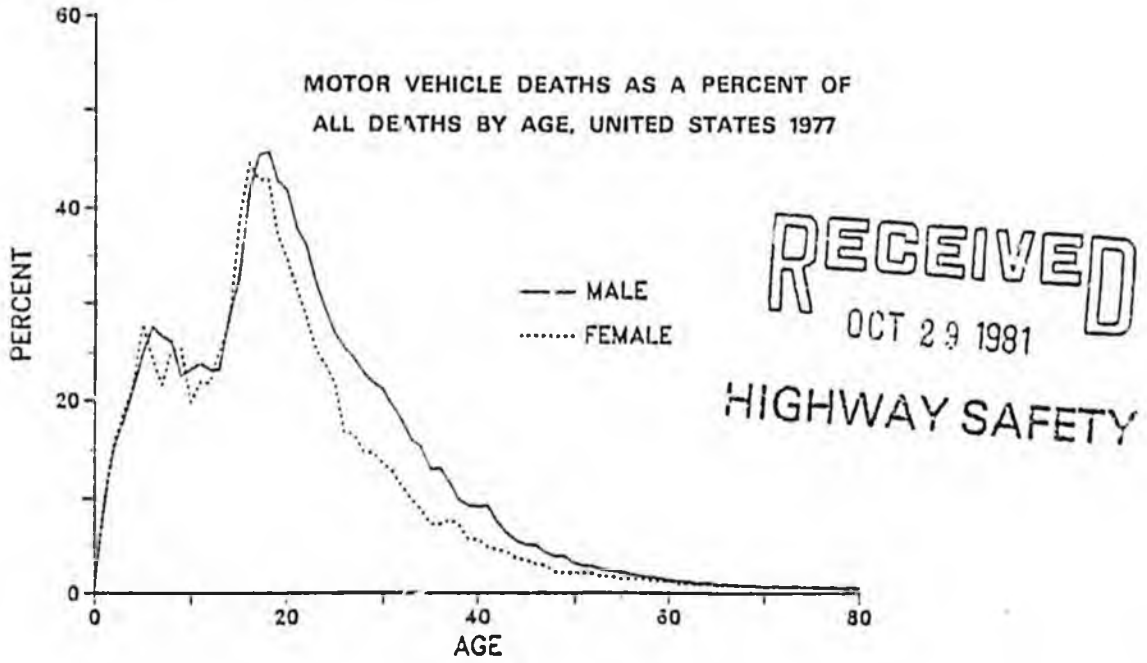
Status Report

Vol. 16, No. 14 September 23, 1981



A Special Issue

Teens and Autos: A Deadly Combination

"By a wide margin, the major public health problem for teenagers in the United States is injuries associated with motor vehicle use."

The enormity of the issue is thus summed up in a new research study by the Insurance Institute for Highway Safety. Warnings of the sometimes-tragic combination of a teenaged driver and an automobile are common. But the real story goes beyond that. Starting at the age of 13, motor vehicle passenger death rates per capita climb sharply compared to passengers of other ages. Motor vehicle-related fatalities are suffered by teenagers at more than twice the rate that would be expected on a population basis. According to one Institute study, more than 7,000 teenagers lost their lives in passenger car crashes in 1978.

Deaths and injuries inflicted on any segment of the population in motor vehicle crashes constitute a costly burden in pain and suffering and in economic terms. When a disproportionate share of those costs can be identified as being caused by a particular group of drivers and passengers, it is especially important to examine public policies and countermeasures available. This special issue of *Status Report* focuses on some of the known facts and policy options relating to teenagers and automobiles.

HIGHWAY SAFETY

The Insurance Institute for Highway Safety is an independent, nonprofit, scientific and educational organization. It is dedicated to reducing the losses—deaths, injuries and property damage—resulting from crashes on the nation's highways. The Institute is supported by the American Insurance Highway Safety Association, the American Insurers Highway Safety Alliance, the National Association of Independent Insurers Safety Association and several individual insurance companies.

Some Facts About The Teen Years

Here are some highlights of Institute research findings about teenagers and motor vehicles:

• THE DANGEROUS AGE – Nearly half of all deaths of teenagers 16-19 years old are the result of motor vehicle crashes. Motor vehicles account for higher proportions of the deaths of 16,17, 18, and 19-year-olds than for any other age. This age group, which was 8 percent of the population in 1977, sustained 17 percent of all motor vehicle-related fatalities.

• DRIVERS – More deaths per licensed driver are associated with the crashes of 18-year-olds than with any other age. More than 60 percent of the passenger vehicle-related deaths of 16- and 17-year-olds, about one-third of the deaths of 15-year-olds, one-quarter of the deaths of 14-year-olds, and smaller but appreciable proportions of the deaths of persons of other ages from infancy through late adulthood resulted from 16- and 17-year-olds driving passenger vehicles.

• PASSENGERS – When teenagers drive they not only have a very high fatality rate themselves, but also contribute substantially to the deaths of others. Teenaged passengers show a high death rate per capita compared to passengers of other ages, the increases starting at 13. The majority of fatally injured teenaged passengers sustain those injuries in vehicles driven by teenagers.

• SEX – Teenaged males have much higher rates of driver involvement in fatal crashes than females. For males the rate peaks at 18, whereas for females it is highest at age 16.

• NIGHTTIME – More than half of the 16-19-year-old passengers and drivers who sustained fatal injuries did so in crashes taking place from 9 p.m. until 5:59 a.m. the following day.

• ALCOHOL – States that have raised their legal minimum drinking age have had a substantial reduction in nighttime fatal crashes.

• SINGLE-VEHICLE CRASHES – Fatal crashes of younger drivers were more likely to involve only the passenger vehicle they were driving than were crashes of older drivers.

• DRIVER EDUCATION – When high school driver education was eliminated from some school districts in Connecticut, there was a 57 percent net reduction in licensure of 16-17-year-olds from what would have been expected had driver education continued to be available, and a commensurate reduction in crashes in this age group.

• RESTRAINTS – Evidence from Ontario, Canada, indicates that even under a mandatory belt-use law, teenaged drivers – the age group most at risk – are least likely to use seat belts and are least affected by laws requiring their use.

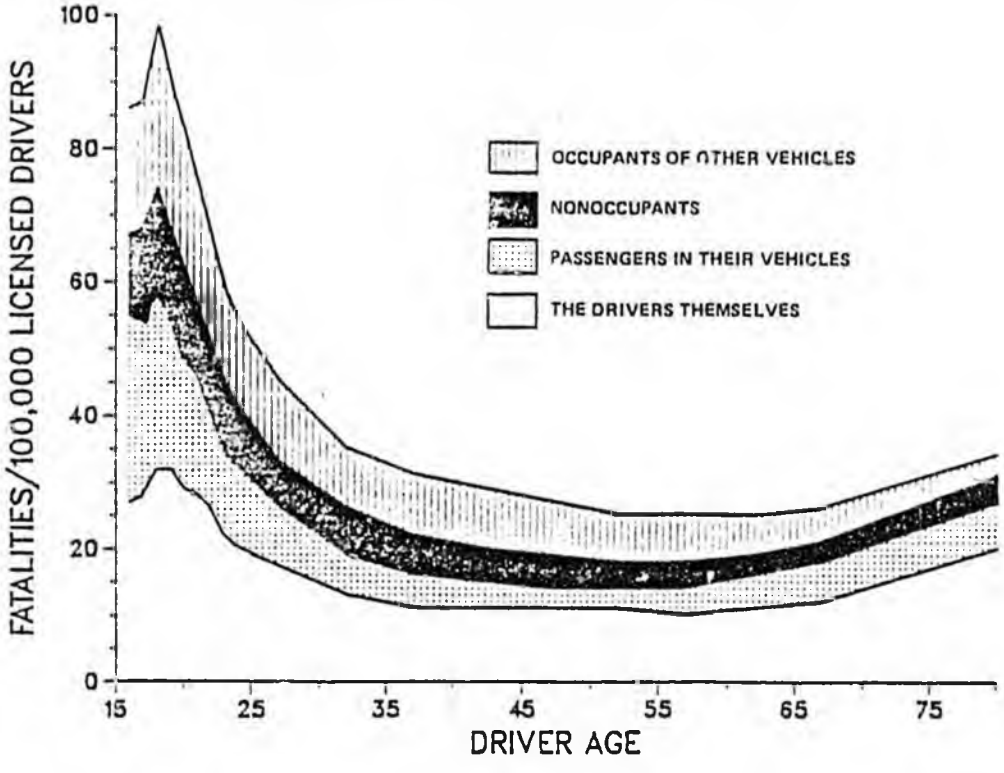
Deaths Per Licensed Driver Peak At 18

The teen years are the most treacherous ones on the highway, and the age of 18 is particularly critical, a new study of teenaged drivers by the Insurance Institute for Highway Safety has shown.

More deaths per licensed driver were associated with the crashes of 18-year-olds than with any other age, reported Ronald S. Karpf and Allan F. Williams in an analysis of 1978 fatality data.

Next to the 18-year-olds, the 16-, 17-, and 19-year-olds had the highest rates of deaths per licensed driver; the figures then declined rapidly as drivers grew older. When depicted graphically, the statistics for almost every aspect of the teen driver problem jut up in towering peaks when compared to the pattern for the entire driver population. (See Figure 1.) Not only for teenaged drivers themselves, but also for passengers in their vehicles, for occupants of other vehicles into which they crash, and for nonoccupants such as pedestrians, the peak fatality figures are all associated with drivers in their teens.

Male, Female Rates Vary



While 18 was the age of greatest involvement in fatal passenger vehicle crashes per licensed driver when both males and females were considered together, there was great variation between the sexes in the fatal crash data. For males the rate peaked at 18, while for females it was highest at 16. (See Figure 2.)

The death rates of drivers themselves were highest from 16 through 21, peaking at 18 and 19. Moreover, partly because young drivers appear to load large numbers of their friends into their cars, they were especially likely to have passengers in their vehicles die.

(Cont'd on page 4)

Figure 1

FATALITIES ASSOCIATED WITH CRASHES OF DRIVERS OF VARIOUS AGES, 1978

Deaths Per Licensed Driver Peak At 18 *(Cont'd from page 3)*

"Sixteen-year-old drivers had the highest rate of such passenger deaths," the researchers said, "in fact, fewer 16-year-old drivers were killed than were passengers in their vehicles."

Younger drivers were found more likely to be involved in fatal single-vehicle crashes than older drivers. Sixteen-year-old drivers had the highest proportion of such crashes at 39 percent. The rate remained near this level until after the age of 24.

Contribution Of 16- And 17-Year-Olds

In 1978 there were 4,198 deaths in crashes involving passenger vehicle drivers 16 and 17 years old. The young drivers themselves accounted for 1,344 of those deaths, and 1,307 of their passengers died. The other fatalities were occupants in other vehicles with which the teen drivers collided and nonoccupants (motorcyclists, pedalcyclists, and pedestrians). Taken together they all accounted for 10 percent of the 1978 deaths that occurred in crashes involving a passenger vehicle. These crashes involving 16- and 17-year-old drivers had a significant impact on the fatality toll for all of the teen years. They accounted for 60 percent of the passenger vehicle-related deaths of 16- and 17-year-olds, about one-third of the deaths of 15-year-olds, one-fourth of the deaths of 14-year-olds, and smaller but appreciable proportions of the deaths of persons of other ages from infancy through late adulthood. (See Figure 3.)

Considering the toll associated with teen drivers, the authors of the Institute study mentioned several possible measures that might reduce the loss of life in highway crashes. Among them were these:

• Raise the minimum age of licensure to 18. "This would undoubtedly be an effective policy, although not all of the more than 4,000 fatalities that result annually from the driving of 16- and 17-year-olds would be eliminated. Some might drive without licenses; those not allowed to drive would become potential pas-

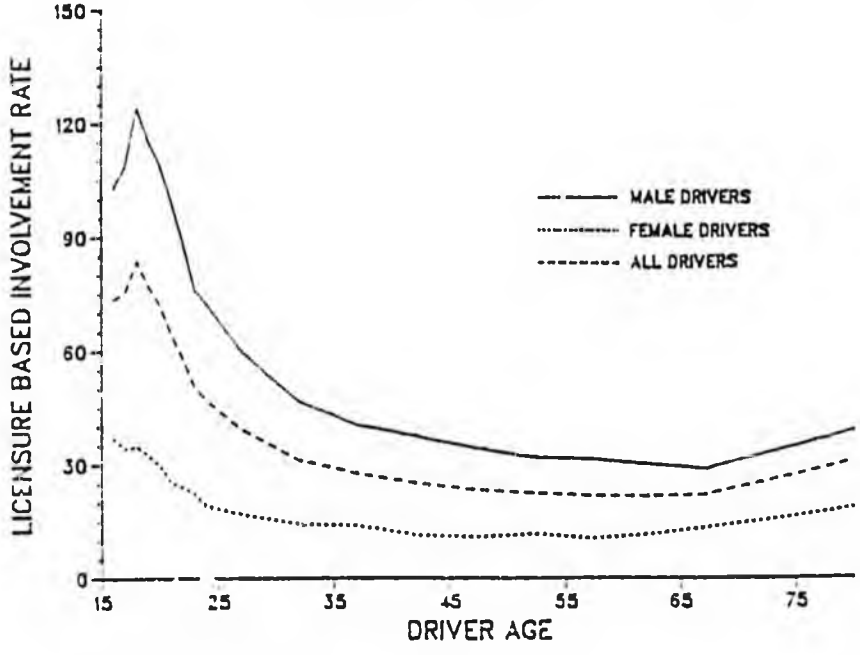

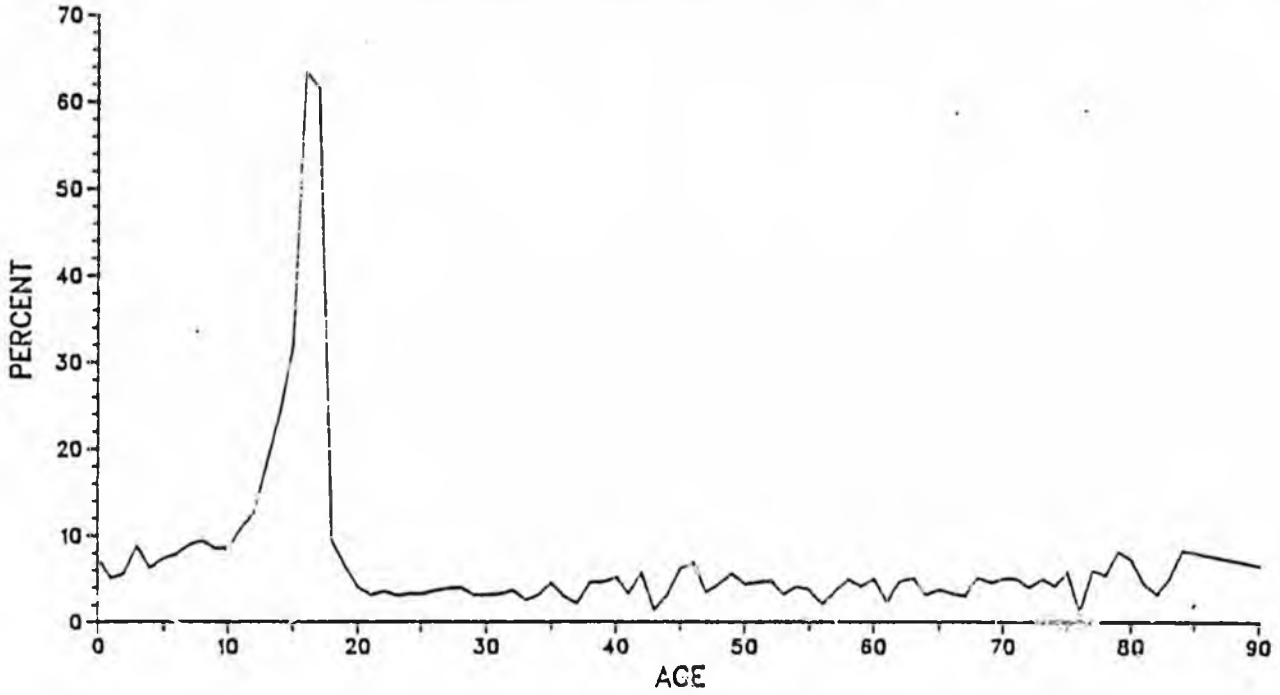

Figure 3

PERCENTAGE OF PASSENGER VEHICLE RELATED DEATHS IN VARIOUS AGE GROUPS INVOLVING 16–17 YEAR OLD DRIVERS, UNITED STATES 1978

sengers; and to some extent older drivers would substitute for 16- and 17-year-olds in providing transportation."

• Allow only "essential" driving by 16- and 17-year-olds, e.g., to and from work. This is seen as one way of offsetting the inconvenience or hardship for many teenagers and their parents in raising the age of licensure.

• Eliminate high school driver education. "High school driver education has been found to increase substantially the numbers of 16-17-year-olds licensed, without reducing crashes." (See report on page)

• Prohibit teenagers from driving during some late evening/early morning hours. "Almost half the fatal crashes of drivers less than 18 years old take place from 8:01 p.m. to 4 a.m."

• Implement long-available crash-packaging technologies and clean up highway and roadside hazards. "Deaths of motor vehicle occupants of *all* ages could be markedly reduced" by such measures, including making air bags available for public use.

• Make licenses for teen drivers conditional on seat belt use. This measure should be considered for 16- and 17-year-olds and possibly older teenagers, who rarely use seat belts.

Copies of the report, "Teenage Drivers and Motor Vehicle Deaths," by Ronald S. Karpf and Allan F. Williams, are available from the Insurance Institute for Highway Safety, Watergate 600, Washington, D.C. 20037.

Teen Passenger Toll Is Heavy, Starting at 13

Teenaged drivers not only are more in jeopardy than drivers of other age groups but – less well known – they also contribute substantially to the deaths of other teenagers as passengers.

A new research study by Allan F. Williams and Ronald S. Karpf of the Insurance Institute for Highway Safety focuses on the deaths of teenaged passengers and includes these findings:

- Teenaged passengers show a high death rate per capita compared to passengers of other ages, the increased rates starting at 13.

- The majority of fatally injured teenaged passengers sustain those injuries in vehicles driven by teenagers.

- Deaths of teenaged passengers tend to occur in nighttime crashes, especially weekend nighttime crashes.

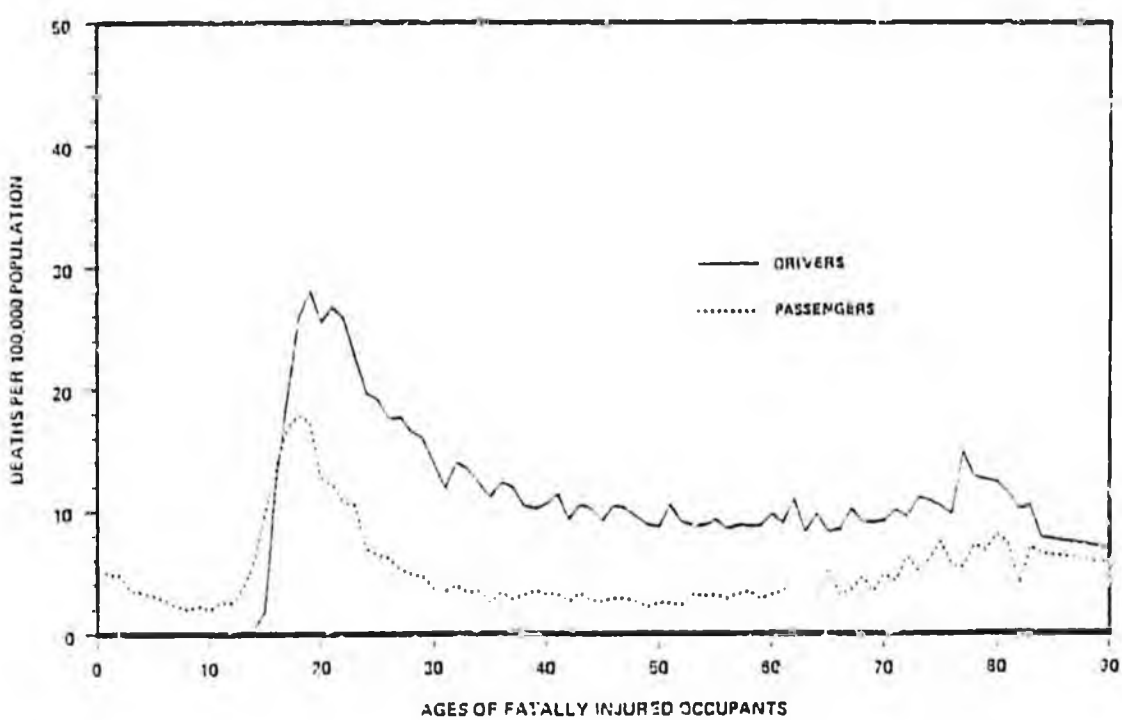
Deaths of teenagers as passengers and as drivers are actually about equal, the researchers reported. From 1978 data, they found that 63 percent of all teenaged passengers who are killed sustained their injuries in vehicles driven by teens. They also discovered that 72 percent of all passengers fatally injured in vehicles driven by teenaged drivers were teenagers.

Death Rates Rise At 13

Teenaged passengers account for nearly one in three of all passenger deaths in passenger vehicles, the new study reports. Passenger death rates per capita begin to rise at 13, the researchers reported, exceed driver death rates until 17, and are higher at each age from 16 to 19 than at any other time of life.

Figure 1

FATALLY INJURED OCCUPANTS OF PASSENGER VEHICLES
PER 100,000 UNITED STATES POPULATION, 1978



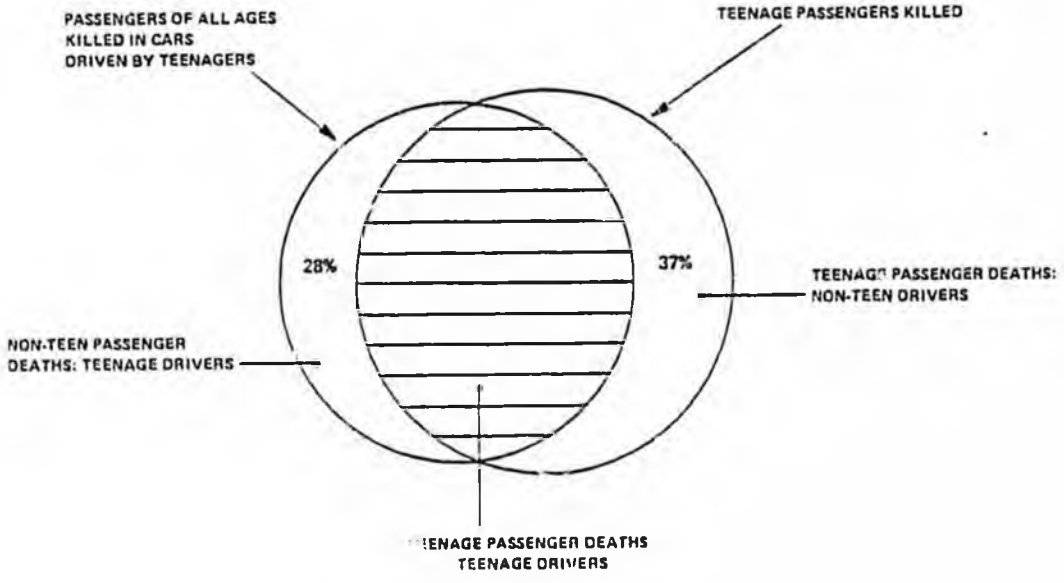


Figure 2

CONTRIBUTION OF TEENAGE DRIVERS TO DEATHS OF TEENAGE PASSENGERS

Among all teenagers, male drivers had the highest death rate per capita, followed by male passengers, female passengers, and female drivers, in that order. From 13 through 16 the rates for both male and female passenger deaths increased in a similar fashion, diverging after 16. The male rates rose sharply and peaked at 19 before declining sharply; female rates were about the same for 16 through 18, then declined.

In the 1978 data, 67 percent of the deaths of teenaged male passengers and 58 percent of the deaths of teenaged female passengers resulted from travel with a teenaged driver. "Teenaged drivers are a major source of transportation for teenage passengers," the researchers commented, "and there is some evidence that the presence of teenage passengers, especially in large numbers, is associated with increased crash risk for teenage drivers." Because of this the authors recommended that consideration be given means to prohibit teenaged drivers from transporting teenaged passengers.

Many Die In Nighttime Crashes

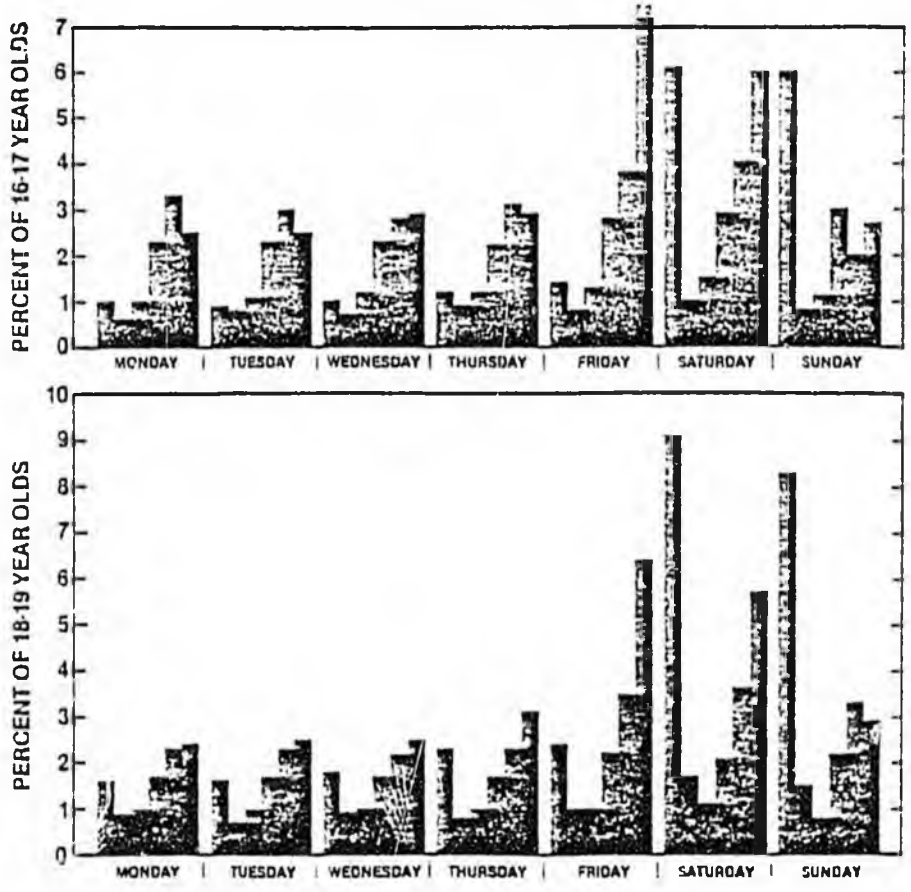
More than half of both the passengers and drivers in the 16-to-19 age range who were reported fatally injured in the 1978 data sustained their injuries in nighttime crashes. The researchers found that males in this age range were more likely than females to die in nighttime crashes.

The study referred to suggested ways to reduce the deaths of teenaged drivers offered in another study (see report on page 3), and said the same measures would be effective in reducing the deaths of teenaged passengers. Pointing especially to the need for seat belt use, the researchers noted that a number of states in recent months have passed requirements for child restraint use.

"Child restraint laws are important, but the need is much greater for teenagers," the authors said. "In 1978 there were 592 children 0-3 years old fatally injured in passenger vehicles in the United States, compared to 6,291 fatalities among 16-19-year-olds."

Copies of the study, "Deaths of Teenagers as Passengers in Motor Vehicles" by Allan F. Williams and Ronald S. Karpf, are available from the Insurance Institute for Highway Safety, Watergate 600, Washington, D.C. 20037.

Curfew, Licensing Delay Seen As Options



Postponing driver licensure until 18 and restricting the hours that young drivers are permitted to drive are two of the most promising measures that might reduce teenaged drivers' involvement in fatal crashes, a Yale University researcher has suggested.

Leon S. Robertson of the university's Center for Health Studies came to these conclusions in a study of teenaged drivers and their fatal crash involvement. The study, published in the Summer 1981 issue of the Journal of Health Politics, Policy and Law, was supported by the Insurance Institute for Highway Safety.

Robertson examined data on fatal crashes from 1975 through 1978 involving 236,205 drivers, including 19,470 under 18 years of age. From the patterns he found he concluded that an "increase in teenager deaths in the 1960s and early 1970s resulted at least partly from public policy specifically intended to reduce the crash involvement of teenaged drivers." Among the programs with questionable results he mentioned were alcohol and drug education programs that have proliferated in schools and may have contributed to increased use of narcotics and resulting problems on the highways, and high school driver education. (See report on page 10.)

"Clearly, greater consideration should be given to the potential effects of public policies before they are widely adopted," the researcher said.

Fatal Crash Involvement of Driver Age Groups by Time of Day and Day of Week*

*Each day is divided into six four-hour increments

The study pointed out that almost half of the fatal crashes involving drivers under the age of 18 occur in the four hours before or the four hours after midnight. "Thus, modification of the licensure laws to allow those less than 18 years old to operate vehicles only from 4 a.m. to 8 p.m. has the potential to reduce their fatal crash involvement if such a provision could be effectively enforced," Robertson said. He noted that police enforcement would be difficult but that parents aware of such a law might reduce the availability of vehicles to 16- and 17-year-olds late at night.

There were no adult passengers in 83 percent of vehicles in fatal crashes involving drivers below the age of 18, Robertson noted. Requiring the presence of an adult in the car for drivers of that age might reduce their involvement in fatal crashes, he said. However, he warned that such a measure should be carefully researched before adoption because of the possibility that more adult deaths would result.

Copies of the study, "Patterns of Teenaged Driver Involvement in Fatal Motor Vehicle Crashes: Implications for Policy Options," by Leon S. Robertson may be obtained from the Insurance Institute for Highway Safety, Watergate 600, Washington, D.C. 20037.

Raising Drinking Age Reduces Fatal Crashes

States that have raised their legal minimum drinking age in recent years have had a substantial reduction in nighttime fatal crashes, Insurance Institute for Highway Safety researchers have reported.

In the early 1970's more than half of all the states lowered their minimum drinking ages. But between 1976 and January of this year, 14 states had reversed that trend and raised the minimum ages. The Institute research indicated that about 380 fewer young drivers are involved in nighttime fatal crashes each year in these 14 states since the minimum ages were raised.

28 Percent Reduction Is Average

"Any single state that raises its drinking age can expect the involvement in nighttime fatal crashes of the age groups to which the change in the law applies to drop by about 28 percent," the researchers reported. In eight of nine states studied, reductions were found ranging from 6 percent to 75 percent. In only one state, Montana, was no net reduction observed.

Included in the study were Illinois, Iowa, Maine, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, and Tennessee. The research project excluded five other states that had raised their minimum drinking age so recently that there had not been sufficient time for the results to be measured with available data.

While alcohol is known to be a major factor in all fatal crashes, it is particularly involved in nighttime fatal crashes. Other research (see report on page 8) has reported that almost half of all fatal crashes involving drivers under 18 happen between 8:01 p.m. and 4 a.m.

More Gains Seen Possible

While a significant number of lives were saved by the law changes, the researchers predicted that even more substantial gains might be made if all 31 states (including seven of the nine studied) that as of last January had a drinking age of less than 21 were to raise the minimum to 21. Such action would mean that each year about 730 fewer young drivers would be involved in nighttime fatal crashes, the study estimated.

(Cont'd on page 10)

Raising Drinking Age Reduces Fatal Crashes (Cont'd from page 9)

"Raising the legal minimum drinking age to 21 in all states would have an important impact in reducing the annual toll of motor vehicle deaths in the United States, particularly the deaths of young people and of others with whom they are involved in crashes," the researchers said.

Copies of the study, "The Effect of Raising the Legal Minimum Drinking Age on Fatal Crash Involvement" by Allan F. Williams, Paul L. Zador, Sandra S. Harris, and Ronald S. Karpf, are available from the Insurance Institute for Highway Safety, Watergate 600, Washington, D.C. 20037.

High School Driver Ed Promoting Early Licensure

A Connecticut study has underscored the role of high school driver education in promoting the licensure of 16- and 17-year-olds and, as a result, their increased involvement as drivers in crashes.

In 1976, Connecticut dropped state funding for high school driver education, and eight municipalities and one regional school district eliminated the courses from their high school curricula. This provided an opportunity to observe the effects on licensure and crash involvement in the affected school districts, contrasted with nearby communities that retained their programs.

A 1980 study, carried out at Yale University's Center for Health Studies, indicated that elimination of high school driver education in these communities led to a 57 percent reduction in licensure among 16- and 17-year-olds during a three-year period, compared to a 9 percent decrease in communities that retained the program.

Conducted by Leon Robertson under a grant from the Insurance Institute for Highway Safety, the study also showed the communities without high school driver education experienced a 63 percent reduction in the crash rate among 16- and 17-year-olds on a population basis, compared with little change in the crash rate in communities that retained the programs. (See *Status Report*, Vol. 15, No. 9, June 10, 1980.)

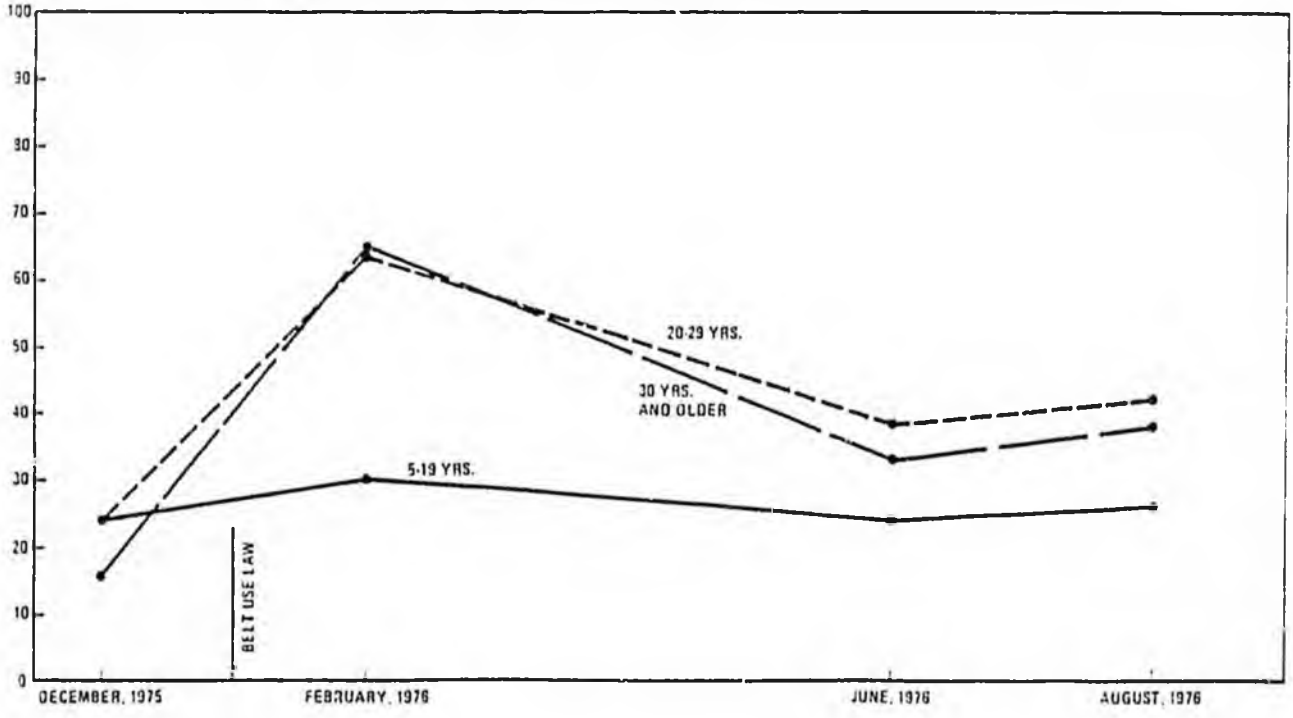
The study noted earlier research in England and the U.S. which found that "more driver education was related to more licensed drivers," with the net result being higher crash involvement per capita for 16- and 17-year-olds. (See *Status Report*, Vol. 12, No. 17, Nov. 30, 1977.)

"About 75 percent of the 16-17-year-olds who could be expected to have been licensed if they had taken high school driver education waited until they were 18 or older to be licensed when high school training was no longer available," the Robertson study concluded.

"The intertwined and more far-reaching issue is whether or not 16-17-year-olds should be licensed to drive whatever their training. Many state laws do not allow persons less than 18 years of age to vote, sign contracts, play pinball machines, and the like. And yet persons apparently considered insufficiently mature for such activities are licensed to assume responsibility for operating vehicles that so commonly kill and maim."

Robertson noted that in Connecticut – which has a relatively low crash rate – about one in five drivers licensed at 16 will be involved in a crash causing injury or more than $400 in property damage before their 18th birthdays.

Teens Found Least Likely To Obey Belt-Use Law



A belt-use law in Ontario, Canada, succeeded in raising the belt-use rates of the general population, but researchers found those most at risk – teenaged drivers – were least likely to obey it.

In November 1975, the province of Ontario adopted a law requiring vehicle drivers and passengers to wear seat belts. Researchers for the Insurance Institute for Highway Safety conducted surveys of belt-use patterns both before and after enactment of the law.

In December 1975, a month before the law became effective, 21 percent of the drivers surveyed at urban and rural sites were seen wearing belts. In February 1976, after the law went into effect, belt use by drivers jumped to 71 percent. But by August that year, it had fallen to 48 percent overall.

The story was different for teenaged drivers and passengers in their teens and under. "Shoulder belt use by teenaged drivers and teenaged or younger passengers was apparently only slightly and temporarily affected by the law," wrote researcher Leon Robertson. About three-fourths of persons estimated to be 5-19 years of age were *not* using shoulder belts in December, before the law, and in June and August of the following year. This was after a very slight increase in February, right after the law went into effect. (See graph.)

POSITION PAPER

HOUSE BILL NO. 112

"An Act authorizing an advisory vote by the qualified voters of the State on raising the age of majority to 21 for the purposes of regulation of intoxicating liquor; and providing for an effective date."

Overview

Passage in 1971 of the 26th Amendment to the United States Constitution not only allowed 18 year olds to vote but this action assisted in extending certain other privileges to this age group. During the period of 1970 to 1975, 27 states including Alaska, lowered their minimum drinking age for all alcoholic beverage, and another 11 states lowered the drinking age for wine and/or beer. However, 1976 saw a reversal of this trend when Minnesota raised its minimum drinking age and since then, eight (8) other states have also raised their drinking age. A key factor in states decisions to raise drinking ages has been their experience of sharp increases in alcohol-related highway accidents and fatalities that have coincided with the reduction in drinking age. Massachusetts, for example, found that traffic fatalities involving drinking teenagers nearly tripled in the years following lowering the legal drinking age.

Alaska Experience

Alcohol abuse and alcoholism are generally recognized as Alaska's number one health and social problems. Alcohol has also been linked with the state's high accidential death rate and other manifestations of social ills, such as homicide, suicide, crime, violence, child and spouse abuse and neglect, etc.

Youth of Alaska are not immune from the ill effects of alcoholism and alcohol abuse. For example, the State Alcoholism Plan estimates that over 7,000 of Alaska's youth are problem drinkers, defined as drinking alcohol to an extent, or in a manner that an alcohol-related disability is displayed. Also, our state-funded alcoholism treatment programs report that youth make up 5.9% of all persons seen for treatment and counselling. Our Department finds 16-17% of all juvenile arrests are for driving under the influence, liquor law violators and public drunkenness, ranging to as high as 52% in Bethel and 45% in Juneau.

These statistics appear to indicate that alcoholism and alcohol abuse continues to be a serious health and social problem in the State and to which our youth are vulnerable as well.

POSITION PAPER/Department of Health & Social Services

Department's Position

The Department offers its expertise in looking at the social and health aspects of the problem. Our experience must be considered in combination with expert advice from the other agencies and groups impacted by the problem, such as the Department of Public Safety and Department of Law. We wish to note that the raising of the legal drinking age, although not a panacea for alcohol abuse, may decrease the availability of alcohol to a population that is at risk from this major health and social service problem.

Just how big is this problem? It is estimated in the Alaska State Alcoholism Plan for FY 80 that 13,141 Alaskans between the ages of 20-29, 7,372 Alaskans 30-39, and 5,635 Alaskans 40-49 are persons with alcohol related problems. It is projected that these 26,148 people directly and seriously affect the lives of four to six other people, many of whom are children (there are 177,643 young people) in this state where the median age is 22 years. However, considering the extended family system throughout Alaska, young people are seriously affected by those 2,212 Alaskans 50-59, 1,028 Alaskans 60-69, and 72 Alaskans over 70 who are aunts, uncles and grandparents with alcohol-related problems.

Statewide statistics pertaining to youth with alcohol related problems were unavailable as studies deal with the "legal" drinking age. However, in a study done for NIAAA it was found that:

- Over 1/4 of the nation's teenagers are problem drinkers.
- Fewer than 18% of the nation's 17-year-olds never have taken a drink.
- 1/4 of the 13-year-olds surveyed could be classified as moderate drinkers.
- Nearly half of all the students surveyed (13,000 youths in 450 schools) said they had been drunk within the past year.

A National Council on Alcoholsim bulletin reported on a survey done by the Social Advocates for Youth - approximately 3500 4th, 5th, 6th graders:

- 45% of the children considered themselves users of alcohol
- 20% reported drinking alcohol once a month
- 9% stated alcohol use imposed personal problems for them which they felt they would like to discuss with someone
- Lastly, the younger students reported much of their alcohol use occurs within the family and they would be willing to seek counsel with their parents.

The ALCOHOLISM AND ALCOHOL EDUCATION REPORT from Washington, D.C. reported that Michigan's Institute for Social Research shows that "Daily drinking among high school seniors in the U.S. jumped 20% between 1978 and 1979, to 6.9 percent of the class of '79 from 5.7 percent of the 1978 seniors, according to a national study which only last year reported a decrease in the daily drinking habits of 12th graders."

And it is believed that, as with all other national studies, the Alaskan usage would be greater and the problems associated with that, more complex.

The Bachman Study found that when asked how often they had taken five or more drinks in a row during the prior two weeks, 52% of all high school senior males and 41% of females in 1979 reported doing so on at least one occasion, 26% of males and 12% of females reported doing so on three or more occasions. Each of these percentages has risen by 3 or 4% since 1976. This suggests that the problem of alcohol abuse among high school seniors may be increasing dramatically.

2) Alcohol and Youth in Anchorage

The conclusion that alcohol abuse among youth may be stabilizing in numbers, but more intense within the abusing group may be supported by the results of a study given to 8th grade Mat-Su students. Only forty percent (40%) of those surveyed felt that alcohol was a dangerous drug. Excluding the perceived risk of tobacco, alcohol was perceived as having the lowest risk of any drug mentioned. Twenty-two (22) percent of the males and 7% of the females surveyed stated they had used alcohol often and by the 8th grade only 28% of the males and 33% of the females had never used alcohol. These statistics are similar to those found in an 8th grade classroom in an Anchorage suburban school.[3]

Of the juvenile drug counseling caseload at the Open Door Clinic for FY-80, 38 admissions or 45% of the total caseload was attributable to drugs and alcohol. None of those included in the statistical profile were above 18 years of age.[9] Currently, the Municipality's Youth Outpatient Program is operating at 160% of estimated capacity.

In 1979, data derived from the Anchorage area indicated a serious and worsening situation. In the last year, the situation appears to be improving slightly. Listed below are eight arrest categories and one request for service category that have a high degree of relationship with youth and alcohol use. Between 1977 and 1979, these incidents increased by 39.9% while the total increase in police activity increased only 24%. In 1980, these incidents decreased by 10%

8 Response to Self-Evaluating Questionnaire, Akeela House, Inc., May, 1980.

9 Open Door Clinic Juvenile Drug Counseling, Demographic Characteristics, FY-80.

while the total increase in police activity increased only 24%. In 1980, these incidents decreased by 10% while the total increase in police activ-ity was 5.9%. This slight turn around could be the result of both the increasing sophistication of the Anchorage programs designed to assist youth under the age of 18 and the growing conservative philosophy in Anchorage and the Nation.

Source: 1977, 1979, and 1980 Anchorage Police Department Yearly Report.

The philosophy of the local programs are consistent with the conclusions of a recent article regarding alcohol abuse by adolescents and its prevention. The article stated that problem drinking among teenagers is frequently correlated with involvement in anti-social activities, poor school performance, drug use, problem drinking among family and/or peers, and lack of supervision. Alcohol education has tended to increase knowledge, but not change behavior patterns, and in some cases, has led to increased alcohol use. The author suggests that future prevention strategies be targeted at specifically defined groups of adolescents and that they be concerned with the prevention of problem drinking rather than the prevention of alcohol use. [10]

Youth - Prevention

Table 27. Arrest Data, by Offense Category and Adult/Juvenile Status, Alaska, 1976-1978.

YEAR	AGE GROUP	OFFENSE CATEGORY					
		DRIVING UNDER THE INFLUENCE		DRUNKENNESS		LIQUOR LAW VIOLATIONS	
		NO.	%	NO.	%	NO.	%
1978	Adult	3195	97.9	567	92.0	1205	57.3
	Juvenile	70	2.1	49	8.0	897	42.7
	TOTAL	3265	100.0	616	100.0	2102	100.0
1977	Adult	3430	97.9	184	98.4	903	49.7
	Juvenile	74	2.1	3	1.6	915	50.3
	TOTAL	3504	100.0	187	100.0	1818	100.0
1976	Adult	2928	98.3	10	71.4	592	48.4
	Juvenile	52	1.7	4	28.6	632	51.6
	TOTAL	2980	100.0	14	100.0	1224	100.0

For adult arrestees, the major alcohol-related offense class was driving under the influence, accounting for roughly 21%-24% of all adult arrests. For juvenile arrestees, the liquor law violation class was the major arrest category, accounting for approximately 12%-15% of all juvenile arrests during this period. See Table 28.

Table 28. Total Arrests and Alcohol-Related Offenses, by Adult/Juvenile Status, Number and Percent of Total, Alaska, 1976-1978.

ADULTS/ARRESTS BY OFFENSE	1978		1977		1976

alcohol abuse

- the Alaska Council on the Prevention of Alcohol and Drug Abuse estimates there are over 45,000 alcoholics in the State of Alaska
- in a study done in 1979, it was found that almost 30% of all juveniles between 12-17 years old were alcohol and other drug abusers - with alcohol being the drug of choice by far
- "problems with alcohol" is the third leading reason people seek help at local community mental health centers in Alaska
- in a study done in 1979, 12% of Anchorage residents reported they drank "almost all the time."
- Alaskans spent $280,600,000 on retail alcohol in 1980
- 58% of pedestrian-motor vehicle accidents were alcohol-related
- 62.7% of people in the under 25 age group use alcohol to face problems
- fetal alcohol syndrome is the third leading cause of birth defects nationally, and is totally preventable

alcohol-related mortality

- 52% of all fire deaths in Alaska are alcohol-related
  - Alaska's fire fatality rate is twice as high as the national average
- 68% of all drownings are alcohol-related
- in 1976-1979 in Anchorage, the leading causes of death in the age group of 15-44 were:

motor vehicle accidents	- 70% alcohol related
suicide	- 80% alcohol related
homicide	- 64% criminal homicides 40% domestic murders

0-18	4	6	1	2
19	3	4	2	2
20	1	1	1	1

AGE	NUMBER OF ALCOHOL ACCIDENTS	PERCENT INVOLVEMENT	PERCENTAGE OF LICENSED DRIVERS
15-18	220	11.3	3.4
19-29	922	47.2	36.5
30-39	407	20.9	27.8
40-49	238	12.2	15.2
50-59	134	6.9	10.3
60 +	31	1.6	2.5

During 1979, alcohol was indicated in 1,952 traffic accidents. Drivers aged 19-29 were the most frequent offenders: 47.2% of the alcohol-related accidents involved drivers in this age group who had been drinking or who were suspected of drinking.

Drivers between the ages of 15 to 18, inclusive, who make up only 3.4% of the licensed driver population, accounted for 11.3% of the alcohol-related accidents, or more than 3 times their distribution in the general driver population.

Alcohol was a factor in 70% of the fatal accidents that occurred during 1979. Further analysis is not possible because of contradictory bivariate data, although there is some indication that young drivers are, again, over-represented. Inexperienced both in driving and in drinking, the young driver also has a predilection for high speeds, and the combination is lethal.

Alcohol enforcement and diversion to treatment and/or education of the drinking driver will remain the highest priority for Alaska's highway safety program.

SPEED RELATED

The number of speed-related fatalities declined from 80 in 1978 to 61 in 1979. Although the number of fatalities that were speed-related declined, the rate of speed involvement has remained constant at 27%. Speed as a contributing factor in injury accidents declined from 21% in 1978 to 16% in 1979.

FINDINGS

Over-all throughout Alaska, over half of all respondents (54%) feel the drinking age should remain at 19, while over one-third (37%) feel the age should be increased to 21, and six percent (6%) support lowering the minimum age to 18...

> "Currently in Alaska, a person must be at least 19 years old to legally purchase and consume alcoholic beverages. Some people have said the drinking age should be raised to 21, others have said the drinking age should be lowered to 18, and still others have said the drinking age should remain at 19. What is your opinion?"
>
> Increase to 21.....37%
> Lowered to 18..... 6%
> Remain at 19.....54%

...Support for raising the minimum age to 21 is highest in rural areas of Alaska (55%), Southcentral (50%) and Southeast (46%), while 56% of Anchorage respondents and 64% of Fairbanks respondents were in favor of retaining the current age requirements.

Age-wise, younger respondents (18-24) were most in favor of retaining the current age requirements (71%), while older respondents (56 and over) were most in favor of increasing the minimum age to 21 (47%).

Females were slightly more in favor of an increase than males (39% to 36% respectively), and local government employees were more in favor of an increase (39%) than federal, state or private sector employees (28-34%).

Home-makers (52%), professional "white-collar" employees (37%) and skilled "blue-collar" craftsmen were most in favor of an increase, and upper income respondents were also in favor of raising the drinking age (45%).

Thirty-nine percent (39%) of registered voters favored an increase compared to 29% of non-registered respondents, and among registered voters, Republicans (46%) and Democrats (42%) were more in favor than non-partisans (35%).

Findings...(con't)

Support for 1:00-2:00 am closing is highest among white-collar workers (39%), while blue-collar workers tend to favor "current times" (22%) or 4:00-5:00 am (21-25%).

And support for earlier closing times increases linearly as family income increases (from 47% of 0-$20,000 to 65% of $60,000 and over).

Democrats are more in favor of later hours (22% 4:00-5:00 am and 17% "same as current"), while Republicans are more in favor of earlier hours (15% between midnight - 1:00 am, 37% between 1:00-2:00 am).

Solutions to underage drinking focuses on parental responsibility (18%) and new, stiffer penalties (13%), however over one-fourth (26%) said they didn't know what could or should be done...

"What do you think should be done about under-age drinking in your community?"

Parental discipline	18%
Make new stricter, stiffer laws	13%
Enforce current laws	9%
Educational programs	9%
Punish sellers	7%
Nothing--they'll get it anyway	5%
Peer pressure, peer example	5%
Counseling	3%
Prohibition--make it inaccessible	2%
Community work projects as punishment	1%
Not a problem	1%

...Rural respondents were the most undecided (30%), while Central Alaskan respondents supported a parental solution (27%). In Southcentral, approximately one-third (33%) didn't recommend a solution, while 15% said it was a parental-type problem and 12% supported stiffer penalties and restrictions. The Anchorage responses were similar to the other Southcentral communities, while Southeastern respondents were more in favor of educational programs (15%) as well as greater parental controls (21%), and stiffer penalties (18%).

Younger respondents (18-24 year-olds) recommended stiffer penalties (21%), "peer panels" (8%) made up of "judges" of other young people to assign penalties, and parental discipline (10%). As respondents became older,

support for a parental-based solution increased (25% of 56 and over), and sentiment for punishment of suppliers also increased (12%).

Little major differences were noted based on age -- females were a little more undecided (30%) compared to males (22%).

Support for educational programs and "peer programs" were highest among white-collar workers (11% and 10% respectively), while blue-collar workers were most in favor of new restrictions-stiffer penalties (22%).

Parental discipline was the most common solution in all income groups with the exception of 0-$20,000 which supported stronger penalties (17%) and enforcement of existing laws (13%).

Republicans and non-partisan respondents were most supportive of parental discipline (22% and 20% respectively), while Democrats were more in favor of "enforce existing laws" (11%), "punish sellers" (9%), and "can't do anything, they'll get it anyway" (9%).

In total, approximately nine out of ten Alaskans (87%) feel alcoholism is one of the most serious problems in Alaska...

"Do you think alcoholism is or is not one of the most serious problems in Alaska?"

Is	87%
Is not	11%

...with concern highest in rural areas (94%) and Southeast (93%).

Younger people (18-24) feel it is a greater problem (88%) than older people (81%), and women consider it more serious than men (92% to 81% respectively).

Home-makers, at 96%, are most concerned with the problem of alcoholism, and white-collar respondents also register strong concern (93%). On the other hand blue-collar workers are slightly less likely to consider alcoholism one of the most serious Alaskan problems (75-85%).

Findings...(con't)

In terms of annual family income. all income ranges considered alcoholism serious -- with upper income concern the greatest (94%).

Eighty-eight percent (88%) of registered voters considered alcoholism one of the most serious problems, and the concern was virtually identical for partisan and non-partisan voters -- 88% Democrats, 88% Republicans and 87% non-partisan.

Analytically speaking, the perception of alcohol as a serious problem in Alaska is wide-spread (87%), and there consequently is substantial state-wide support for earlier closing times for cocktail lounges and bars (54% 3:00 am or earlier). There is also substantial support to raise the minimum age to 21 years old (37%), however the majority (54%) prefer retaining the current minimum age of 19. Over-all, in recognition of the seriousness of the alcohol issue, there is considerable support for measures related to limiting the availability of alcohol (hours and age). This approach extends to recommended solutions to under-age drinking -- while 3% recommended counseling and 9% recommended educational programs; 18% recommended parental discipline, 14% recommended new, stiffer penalties; 9% recommended stronger enforcement of existing laws; and 7% specifically recommended punishment of sellers who provide alcohol to under-age people.

Findings...(con't)

Regarding closing times, state-wide, 20% felt bars, lounges and night clubs should remain open until 4:00-5:00 am and 17% felt the closing times should remain as they are at the present time -- which may also be 5:00 am depending on the community -- in total, 37% could support a 5:00 am closing. Over half (55%) feel the closing time should be before 3:00 am, with the bulk of that percentage (33%) favoring a 1:00-2:00 am closing...

"In your opinion, what should be the closing time for cocktail lounges and bars in your community?"

12-1:00 am	11%
1-2:00 am	33%
2-3:00 am	10%
3-4:00 am	2%
4-5:00 am	20%
5-6:00 am	--
Same as now	17%

...Geographically, rural areas are most in favor of their current closing time (42%), however 27% favor a 1:00-2:00 am close.

Support for 4:00-5:00 am close is greatest in the Fairbanks area at 34% (52% favor a pre-3:00 am close), while only 4% in Southeast favor the late close. Most of Southeastern respondents favor 1:00-2:00 am (36%) or "same as now" (29%). In the Mat Valley and Kenai Peninsula region, 17% support 4:00-5:00 am and an additional 12% support the current closing time. A total of 56% favor a closing at or before 2:00 am. In Anchorage, 4:00-5:00 am or "current time" closing is favored by 37%, while a total of 57% favor 3:00 am or earlier (primarily 1:00-2:00 am).

Age-wise, younger respondents favor later hours (34% 4:00-5:00am), while older respondents favor current closing times (21-23%) or 1:00-2:00 am (31-32%).

Females favor earlier closing hours (13% between 12:00-1:00 am; 36% between 1:00-2:00; and 12% between 2:00-3:00 am), on the other hand males tend to prefer the current times (22%). Male/Female sentiment regarding 4:00-5:00 am closing is nearly identical (19-20%.)

Dear Ms. Danis:

Enclosed are the statistics regarding traffic accidents and fatalities that you requested. The alcohol-related accidents are somewhat incomplete, but I hope what is available will be of some help to you.

Please feel free to contact me if I can be of any further assistance concerning highway safety-related matters.

Sincerely yours,

Karen VanDusseldorp

House votes to raise drinking age

TIMES 3-15-83

Harry McFarland
Associated Press

Juneau — The Alaska House Monday approved a bill that would raise the drinking age from 19 to 21, and have an advisory vote on the same question in the November 1984 general election.

The bill was approved 31-7 after several hours of debate, but Rep. Jim Duncan, D-Juneau — who engineered most of the amendments that were added to the bill — gave notice of reconsideration.

Duncan was able to have attached amendments that made the bill nearly identical to a version the House Finance Committee had recommended. House lawmakers earlier had rejected the Finance version in favor of a Judiciary Committee version.

The amendments that made the bill similar to the Finance bill were the advisory vote, four sections that specifically detail under what conditions someone under age 21 can enter an eating establishment that serves liquor, and would allow those 19 years or older to work in a hotel, restaurant or eating place also serving alcoholic beverages.

But Duncan was unable to amend the bill to add two versions of a grandfather clause, the first of which was contained in the Finance version.

The first amendment would have allowed those 19 years of age on Jan. 1, 1984, to continue entering liquor-serving establishments. The second would have allowed those 19 on the effective date of the bill, which as passed, would be 90 days after the bill is signed by the governor.

The first battle — which took place in the House's first night session this year — was over an attempt by Rep. Vern Hurlbert, D-Sleetmute, to rescind the adoption of the Judiciary version.

The bill would have been the direct opposite of what those supporting the upping of the drinking age wanted, Duncan said.

ANCHORAGE, AK 99502 (H) 243-9510 (W) NONE

THE LAWMAKERS MADE A MISTAKE WHEN THE BILL WAS PASSED TO LOWER THE DRINKING AGE FROM 21 TO 19. WE MUST CORRECT THAT, BY RAISING THE DRINKING AGE BACK TO 21. ANYTHING WE CAN DO TO LOWER THE NUMBER OF ALCOHOL-RELATED HIGHWAY DEATHS, AND SUICIDES IS AN IMPROVEMENT.

Editorial Opinion and Comment of

FAIRBANKS
Daily News - Miner
"Independent in All Things . . . Neutral in None"

Other opinions expressed on this page do not necessarily reflect those of the Daily News-Miner.

Alcohol abuse worries

We hope members of the Alaska Legislature will be as concerned about the serious community problems caused by alcohol abuse as are their constituents.

Around the nation, Americans are worried. A recent Gallup poll found that Americans are more worried about excessive drinking than they are about smoking or overeating. A majority think the federal tax on liquor should be doubled.

In Alaska, that concern is reflected in efforts to curb the problems caused by alcohol abuse, particularly drunk driving. Last year, Anchorage residents formed a chapter of a powerful new organization called Mothers Against Drunk Driving. Now some Fairbanks residents who have personally experienced the tragedy of losing a family member or friend in an accident involving a drunk driver are setting up a chapter here. Watch for their announcement soon of a public meeting for anyone who is interested.

It's going to take a lot of public pressure to enact the changes we need to make alcoholic beverages less available and therefore cut down on the abuses associated with alcohol. So far, the Legislature has refused to take final action on measures that would increase the state excise tax and restore the drinking age to 21. At the same time, statistics from across the nation are documenting the increasing number of deaths of young people in traffic accidents where booze is involved. And we read more and more about the young age at which students are beginning to accept alcohol consumption as part of their daily living.

The Gallup survey, commissioned by the National Council on Alcoholism's New York affiliate, found that 68 percent of the 1,039 adults surveyed rated an educational campaign to foster drinking moderation "very important."

Fifty-six percent named at least one type of alcoholic beverage on which they favored doubling the federal tax, with an increase in distilled liquor drawing the most support—from 54 percent. Forty-nine percent favored doubling the federal tax on beer, 48 percent on wine.

Sixty-two percent said they would like to see the major political parties support a moderate drinking campaign in their platforms and 59 percent said they would be more likely to vote for a candidate who supported such a campaign.

That should send a message to incumbent legislators. Though people concerned about alcohol abuse and supporting state measures to control it may not have the dollars to match campaign contributions from the liquor industry, they certainly have the votes.

The Legislature has been derelict in the face of the facts in not enacting a tax increase on alcoholic beverages since 1961. It's past time they turned a deaf ear to the powerful liquor lobbyists and passed legislation to raise the drinking age and pay for some of the human misery created by those who can't handle alcohol.

Here in Fairbanks, we've so far managed to sweep aside most of the proposals to deal with alcohol abuse, too often claiming that since a specific proposal won't do the whole job, we shouldn't enact it. With that shortsighted view, we'll never even get started.

Fairbanks Mayor Bill Walley's blue ribbon commission can be a big help in curbing alcohol abuse and thereby making Fairbanks cleaner and safer if it will recommend specific steps the community can take and urge people to also push for other steps the state can take.

The problems caused by alcohol abuse aren't going to go away if we ignore them—sadly, they're going to get even worse.

This year is the time to press for some action.

HOUSE OF REPRESENTATIVES

March 30, 1983

City of Cordova
P. O. Box No. 1210
Cordova, Alaska 99574

ATTENTION: Mr. Perry D. Lovett, City Manager

Dear Mr. Lovett:

Thank you for forwarding to the House Judiciary Committee a report of the Cordova City Council's unanimous support for the legislative effort to raise the minimum age for consumption of alcoholic beverages to 21.

The House Judiciary Committee held lengthy hearings on HB 17, a bill introduced for that purpose. I have enclosed a copy of the bill, CSHB 17 - Judiciary, which has moved to the Floor of the House. I have also enclosed a copy of the House Journal for the 57th day, which shows floor action on the bill.

The bill is now in the Senate State Affairs Committee. I have also enclosed 12 copies of the Legislative Directory which indicates the membership of the Senate State Affairs Committee on page 30. You may wish to contact both the Senate State Affairs Committee and the Senate Judiciary Committee, to which the bill is referred following State Affairs.

Thank you again for forwarding information regarding your concerns and for becoming involved with the legislative process. Together we can make a difference and do something about the state we are in.

With best regards I remain,

Sincerely,

Representative Charlie Bussell
Chairman, Committee on Judiciary

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES

March 28, 1983

Robert and Thelma Sinnett
2001 Salem Court
Anchorage, Alaska 99504

Dear Mr. and Mrs. Sinnett:

Thank you both for taking the time to write expressing your concerns for acts of public behavior which have gotten totally out of control.

With respect to the misuse of alcohol and drugs the Judiciary Committee in the House perfected HB 17 which raised the legal drinking age back to 21. On the House Floor I, and others, fought hours of attacks by Representatives Duncan and Clocksin to water down and destroy this bill. HB 17 is now in the Senate where Senators Ray, Josephson and Fischer will do all they can to kill it.

The House Judiciary now has HB 6 which covers increased penalties for drinking while intoxicated. Representatives Clocksin, Malone and Wendte have stalled action through two hearings, but will be unable to stop this bill from getting to the Floor of the House soon.

Within the next two weeks I hope you will be seeing two bills requiring manditory insurance coverage ready for passage by the House. Again, Representatives Duncan, Malone, Miller, Clocksin and Wendte will be doing all they can to stop or delay progress on these bills.

Slowly, but surely, we are chipping away at the problem. We need all the help you can give those of us trying to make the needed changes.

Thanks again to you both for writing and becoming part of the legislative process; together we can make a difference and do something about the state we are in.

Sincerely,

Representative Charlie Bussell
Chairman, Committee on Judiciary

CB:lyn

March 9, 1983

Representative Charlie Bussell
Pouch V
Juneau, Alaska 99811

Dear Representative Bussell:

I am writing this letter in pain, outrage and total disgust. I have painfully become aware of the completely inadequate and antiguated driving laws of this state as a result of my son Sean's death at the hands of an irresponsible, uninsured driver who was drinking, speeding, ran a red light and God only knows what else. This driver can afford alcohol and drugs (they were found in his car) but he cannot afford insurance!

The law concerning the requirement to have auto insurance, better known as "the State gives you a free one" is at best a farce. Having lived here 44 years and watching the traffic increase to the point beyond the capacity of our road system, coupled with the irresponsible attitude of the outsiders coming in and the young people growing up, dictates that the law be tightened.

It is imperative that mandatory auto insurance be required of those wishing to drive in the State of Alaska. When auto licenses are renewed or bought, or with registration and/or titles, proof of insurance at that time should be shown. Upon cancellation of insurance, then licenses revoked. In short No Insurance - No License!

Sean was not allowed to own a car or drive without insurance which he bought and paid for himself and he took that responsibility with him into his young adulthood and was subsequently killed by a person who apparently did not care or have any regard about others.

The time is long past due for all Alaskans new or old to accept the responsibilities attached to owning and driving an automobile and the necessary steps to accomplish this rests squarely on your shoulders.

Sincerely,

Robert J. Sinnett

MOTHERS AGAINST DRUNK DRIVERS
ANCHORAGE, ALASKA CHAPTER

2/1/83 CB

SCOTT AND WESLEY GERRISH MEMORIAL

Scott 13, and his brother Wesley 10, were walking on a Satruday afternoon, on December 5, 1981 at about 4:30 P.M., when they were struck down by a vehicle driven by an alleged "Drunk under the influence of alcohol". The trial has been postponed again and more information as well as the outcome of the sentence will be issued after the trial.

Scott and Wesley's death was no accident. IT WAS A CRIME! A crime that is neglected by the system. That is why the Anchorage MADD chapter was formed.

MADD is an organization of victims, survivors and concerned citizens determined to reduce deaths and injuries resulting from driving under the influence. Mothers Against Drunk Drivers encompasses all types of people; young, old, male, female, mothers, fathers, sisters, brothers, and any citizen concerned with the problems of driving under the influence.

THE GOAL OF MADD IS: TO REDUCE FATALITIES AND INJURIES RESULTING FROM DRIVING UNDER THE INFLUENCE (DUI).

THE OBJECTIVES OF MADD ARE:

To Force Effective Reform Of The Drunk Driving Problem.

To Be The Voice Of The Victim.

To Increase Public Awareness To The Awareness Of The Seriousness Of Driving Under The Influence.

Teach Communities How They Can Become Involved In The Fight Against Drunk Drivers.

Establish Court Monitoring Programs In Each Community.

SOME CHANGES WE WANT IN ALASKA:

Raise The Drinking Age To 21.

Tougher Sentences And Fines.

Work With Bartenders And Clerks In Not Serving The "Too Drunk To Drive" And "Too Young To Drink" People.

Educate The Public On The Problems Of Drinking And Driving.

MOTHERS AGAINST DRUNK DRIVERS

ANCHORAGE, ALASKA CHAPTER

SCOTT AND WESLEY GERRISH MEMORIAL

LISTED BELOW ARE SOME OF THE GOALS WE OF THE ALASKA M.A.D.D. CHAPTER HOPE TO ATTAIN IN OUR STATE:

1. To ultimately reduce the number of deaths and injuries caused by alcohol related crashes.
2. To educate people on drinking and driving. The seriousness of drinking and driving and the social responsibility not to drive after consuming alcohol.
3. Get tougher sentences for drinking and driving by working with legislators, judges, D.A.'s and law enforcement agencies to force the effective reforms of this problem.
4. Make it mandatory anyone selling/serving alcohol take a course to recognize a person who is too young and/or too drunk to purchase alcohol, much less drive a vehicle. These servers/sellers would have to carry an identification card proving they have taken the course.
5. Enforce fines and arrests for bartenders and bar owners who serve a person until they fall off the bar stool or pass out. Educate people to call a taxi, friend (of the drunk driver), or even take car keys away to prevent a driver who is drunk from going out on the streets.
6. Assisting families of victims hurt by drunk drivers. Offering emotional support to these people.
7. Getting people in general, involved in getting license numbers and makes of cars that are driving recklessly or weaving all over the road. Getting people to not be afraid to report these drivers.
8. Enforce laws that a person must have insurance before getting a drivers license. This way a persons past driving record is investigated.
9. Take vehicles away from people after the first offense, for 90 days. 2nd time, 6 months, 3rd time, three years. Getting to and from work is no excuse to drive, as there is public transportation, family, friends and fellow workers in most cases.
10. Raise the drinking age to 21.
11. While in jail for drinking while under the influence, make these people work for the State or City to save tax money. They can help keep the parks or streets clean instead of sitting in jail and watching T.V. and playing pool. These type of activities do not seem like punishment.
12. Issue M.A.D.D. bumper stickers to remind drivers about driving while drinking does not go hand in hand.

ANCHORAGE, ALASKA CHAPTER

SCOTT AND WESLEY GERRISH MEMORIAL

Don't Let Your Loved One Be A Victim...

hers Against Drunk Drivers
and Wesley Gerrish Memorial
horage, Alaska

ers Against Drunk Drivers (MADD) organization of concerned citizens e main goal is to reduce the number alities and injuries caused by persons g under the influence of alcohol. nally, over the past ten years, 00 people were killed in alcohol d accidents, and millions more were d. hen Cari Lightner was killed by nk driver her mother decided it was o do something. In 1980, Mrs. ier chartered Mothers Against Drunk rs in California — now there are ers nationwide.

Anchorage Chapter was established in by Mrs. June Gerrish in memory of vo grandsons, Scott and Wesley. The h boys were struck and killed by a e driven by an individual alleged to der the influence of alcohol. Their s, i Lightner's, and thousands of annually are crimes — crimes often go unpunished.

1978 to 1981, there were 405 ies resulting from alcohol related accidents in Alaska. During the four years over 18,000 people were d, many crippled or impaired for hese shocking statistics translate into population being either killed or injured by drivers under the influence of alcohol. And, there is no way to quantify the number of survivors who continue to suffer from these senseless "accidents".

Mothers Against Drunk Drivers is committed to reforming the system which punishes a convicted drunk driver with as little as a three day jail sentence. By increasing public awareness and involving as many community members as possible, MADD is launching a campaign to fight this crime, and ultimately to do as much as possible to minimize the heartache caused by drunk drivers.

The Anchorage Chapter of Mothers Against Drunk Drivers will be the voice of the victim. MADD's goals include working to establish court monitoring programs in the community, assisting families of victims, raising the legal drinking age to 21, and educating the general public on the problems of drinking and driving. Most importantly, MADD will enlist the help of prosecutors, legislators, judges, and law enforcement agencies to convict more of the individuals charged with drunk driving, and to establish tougher sentences for those convicted.

Every member of Mothers Against Drunk Drivers is committed to doing as much as possible to bring the drunk driver to a halt.

SUMMER 1982

MADD

MOTHERS AGAINST DRUNK DRIVERS

NATIONAL NEWSLETTER

A MESSAGE FROM CANDY

At long last the Presidential Commission on Drunk Driving got underway and we had our first meeting on June 3, 1982. Prior to that, in April, I was invited to attend a press conference at The White House where I was able to meet with the President, *briefly*, and other luminaries. I am on the Executive and Legislative Subcommittee, and will be attending their first meeting August 2nd and 3rd in Oklahoma City, Oklahoma. The next full committee meeting will be in Scottsdale, Arizona, on September 13th. These meetings are open to the public and I encourage everyone to attend.

I am proud to report that MADD is not only represented on the Presidential commission on Drunk Driving, but on Governors' Appointed State Task Forces in Florida, Colorado, Delaware, Louisiana, Maryland, Massachusetts, Michigan, Nebraska, North Carolina, Ohio, Pennsylvania, Texas, and Virginia. MADD members are also serving on many county task forces across America.

I can't tell you how much it meant to me to meet so many wonderful and dedicated people who attended our first regional workshop. I would especially like to thank Sandra Hosking for being there. Despite her numerous handicaps as a result of a drunk driver, Sandra displayed a great deal of courage and was an example for us all.

On September 22, 1982, national headquarters is having our first major fund raiser in Sacramento. It will be a dinner to honor those in California who have contributed to the drunk driving effort and our cause, and to celebrate our two-year anniversary. If you see a newsletter after this one, it was successful. If you don't, it wasn't! This money will be used to help increase our community awareness programs, student educational programs, and victim assistance programs. Yes, Virginia, MADD does do other things besides legislation.

A personal decision I have made: in the near future you will no longer see my daughter's picture and story on brochures. It is time to let her rest in peace. Two ironies: Busch, her killer, was sentenced to one year in prison on May 7, 1982, for parole violation - two years to the day after I started MADD. We completed our incorporation on September 5, 1980. Cari and Serena were born on September 5, 1966. I shall miss her always.

By the time you read this, summer will be almost over and I

(continued on page 11)

MADD Is The Voice Of The Victim

Case #1 — Jeff Morris refused the breath test but admitted having put away a half-pint of whiskey before his lumber company truck slammed into a line of five cars. Despite the death of one man, the injury of several others, and five prior DWI arrests with three convictions, Harris County Judge Neel Richardson sentenced Jeff Morris to ONLY 20 DAYS IN JAIL AND A $500.00 FINE for the charge of criminally negligent homicide.

Members of the Houston Chapter of MADD were shocked at the light sentence, as was Assistant District Attorney Nick Vincent. After Vincent and MADD representatives spoke to news reporters about the case, Judge Richardson was deluged with criticism.

Judge Richardson angrily defended himself claiming evidence of alcohol was not included in the charges. "The defendant is charged with the misdemeanor offense of negligent homicide by failing to keep a proper lookout and failing to apply his brakes in proper time", Judge Richardson explained to the Houston Chronicle. "Public reaction called my attention to the fact that there was an implication by prosecutors that Morris was a drunk driver and should have received a heavier sentence", Judge Richardson continued. While publicly complaining that the state had subjected..."*his court and the system of justice in general to public criticism*", the judge withdrew the guilty plea and sent the case to another judge.

On June 10, 1982, Judge Neil McKay, after meeting with two representatives of MADD in his office to explain his position, sentenced Morris to 180 days in jail and a $500.00 fine.

Case #2 — In May an anonymous call alerted MADD Headquarters that a truck driver was driving on a suspended license with four drunk driving arrests within a four-month time period. The arrests had occurred in two counties.

MADD's investigation revealed THREE license suspensions, each the result of the driver's refusal of a blood alcohol test. Unimpressed he continued to drink and drive. Further investigation showed that the DMV driving record did not show any of the current charges. Phone calls to both counties confirmed that in one county he had been convicted of *one* charge *six months after arrest*. In the second county three of the charges were *still* pending. Additional probing revealed

(continued on page 10)

And The Problem Goes On . . .

Seven hours after fleeing the scene where she had struck and killed Anna Clara Forde, Sandra Larizza turned herself in at Long Beach Police Headquarters. Although she confessed to having had several drinks at a party the night before, Larizza was never charged with drunk driving. On June 16th, Larizza was fined only $1,000 and put on two years probation after pleading no contest to a misdemeanor charge of leaving the scene of an accident.

Larizza reportedly had many friends in the police department including Lt. Dan Shea. Anna Forde, a clerk at the Long Beach Police Department, also knew Shea although they did not work together. In a June 24th Los Angeles Times article Lt. Shea described the VICTIM as a "*...nondescript person, one of the faceless individuals of the world...*". He went on to describe Larizza as "*...very popular, a delight to be around...everybody liked her...*".

Her husband, four children, and co-workers find it difficult to accept Shea's apparent attitude that Anna Forde's life was not as "*worthy*" as Ms. Larizza's. In a memo to Deputy Chief C.W. Clark, co-workers angrily objected to Shea's comments, saying their friend was "*...caring...vivacious, and...articulate...*". When questioned by MADD member Jeri Cole, Chief Charles Usry, Long Beach P.D., stated -- "*Lt. Shea was on duty at the time of the comment, therefore he was speaking for the Department.*"

Southern California MADD representatives are waging a letter writing campaign to local and state lawmakers, members of the judicial system and the media calling for responsible action to be taken by the courts, the DA's office, and the police department regarding the handling of drunk driving cases and Lt. Shea's irreprehensible actions. Jeri Cole shared her fear with reporters; "*What this (case) tells the public is, if you are drunk and you hit and kill somebody, go ahead and go home.*"

On October 16, 1981 Robert Lee Byington, a Long Beach Police Officer, struck and killed James M. Riddle, age 20, while driving under the influence of alcohol. Byington's BAC was .21.

Subsequently, Mr. Byington pled no contest to a charge of felony vehicular manslaughter. Judge Luis Cardenas sentenced Byington to 1 year in the county jail imposing *no* fine, *no* probation, and *no* action to revoke or suspend his drivers license. The modification of sentencing from a felony to a misdemeanor charge allows Mr. Byington the opportunity to return to his job following incarceration. Although Byington was sentenced to *county* jail, he was instead sent to the Costa Mesa *City* jail. Further, MADD has received reports that his jailers have given him preferential treatment in direct violation of jail regulations. These privileges include home-cooked food brought to him on a regular basis, unlimited phone calls, 2-3 lengthy contact visits per week including one unsupervised visit which took place in the jail parking lot.

Judge Cardenas, when questioned by MADD, defended himself by claiming that the DA did not make a strong case for the prosecution. The DA's office responded by blaming the defense, claiming a "deal" was made with the judge.

Our Orange County Chapter has called for a thorough investigation by local authorities and for the dismissal of Robert Byington from the Long Beach Police Force as provided for under law.

Letters protesting this case should be addressed to: Charles Usry, *Chief, Long Beach PD*, 400 West Broadway, Long Beach, CA 90802; Honorable Luis Cardenas, Department 5, Superior Court, County of Orange, 700 Civic Center Drive West, Santa Ana, CA 92702, or Honorable Robert E. Rickles (current Presiding Judge); George Deukmejian, *Attorney General of the State of California*, 555 Capitol Mall, Sacramento, CA 95814; Judicial Council of California, Commission on Judicial Performance, 350 McAllister, San Francisco, CA 94102.

An article in the spring newsletter reported the case of a 33-year-old Sacramento man, Gerald Basquez, who was sentenced to 3½ years in the county jail for violation of probation and driving with a revoked license. Basquez, who had 15 prior convictions for drunk driving was also tried at the time on two additional drunk driving charges but the jury was deadlocked and could not reach a verdict. He was subsequently retried and found guilty. Judge Edward Garcia, Sacramento Municipal Court, added two years, the maximum sentence, to the 3½ year jail sentence now being served. A probation officer, in a report to the judge, called Basquez "*a walking time bomb who requires incarceration for the protection of the community.*"

Long time deputy district attorneys said Basquez's 5½ year total jail sentence is the most they can remember ever being given out to a misdemeanor drunken driver in Sacramento.

HE'S BEEN THERE!

Dear MADD,

My name is Hiram I. Cobb. I am 49 years old and at the present time I am serving a life sentence in Indiana. I am an alcoholic. The reason I am writing you is because alcohol put me here. In 1973 I started having medical problems (S. Diabetes) prostrate gland problems, impotence, etc. Then marital problems. After spending a lot of money on doctors, both medical and mental, and getting nowhere, I crawled into a booze bottle and became a full-fledged alcoholic. In the summer of 1975 I was arrested twice in the same week by the same cop for drunken driving. Unfortunately I had enough money to buy my way out of that mess. But *if* the judge had not been money hungry, and *if* he had handled my case according to law, I would have been given a stiff jail sentence and placed in a detox center. Let me tell you friend, that was the worst money I ever spent. Just six months later I was arrested for bank robbery and first degree murder. *Why?* Alcohol and drugs. It's true I did not kill anyone with a drunk driving auto, but I was drunk just the same and another human being lost his life (a reserve police officer). *If* I had just been placed in jail *or* a detox center when I was arrested for drunken driving I would not be here today and another man would still be alive to see his children grew up. I too read Candy Lightner's story and I do believe something should and could be done about drunken driving. But before anything can be changed, the crooked judges and attorneys will have to be dealt with first. Any person that takes that first drink of booze, be it social or alcoholic, is a potential murderer. Everyone knows that as long as booze is made, there will be fools like me to drink it. But how about a tavern or nightclub with locked doors? What I mean is this. Anyone wishing to drink or party that goes into a tavern or nightclub would have to stay locked in the place until he or she is given a breathalizer test and declared sober...sound stupid? Well let me tell you friend, it would be a whole hell of a lot better than winding up in prison and/or losing all your family and friends and having some innocent child or grown person's death on your conscience for the rest of your life. Believe me, I know what I'm talking about. I am now a member of Alcoholics Anonymous. I know it's kind of like shutting the gate after the horse got out, but at least I know what I am now and I can be honest with myself. When it comes to the killer, alcohol, I wish there was some way I could plant this true story into the brain of every drunk driver in the world but we all know that's impossible. So in closing let me say good luck and God bless. I'll be praying for this organization.

Sincerely,
Hiram I. Cobb
Pendleton, IN 46064

Duke Van Dyke Vice President

Duke and his wife Carol lost a son to a drunk driver three years ago. They are both long-time volunteers. Before coming on board as Vice President, Duke was active in the Speakers Bureau and the Victim Asistance program as well as a "utility man" always ready to do what needed doing. Duke is a retired colonel who brings to MADD strong leadership and a wealth of experience. Duke's primary responsibility is to back up Candy and to supervise MADD's administrative staff. I am extremely pleased Duke has agreed to be our Vice President -he has already proven himself to be a valuable asset to our organization.

Community Support

Our campaign to reduce the deaths and injuries caused by drunk drivers could not continue without support from our communities. We are grateful to everyone who has contributed. We would especially like to thank:

- The **Leavey Foundation** for renewing our grant which supports the National Headquarters
- **Tandem Productions** for a generous contribution to our Los Angeles, California Chapter
- **Disney World** for their support of our Orlando, Florida Chapter
- **Government Employees Insurance Company** for its grant to our Williamson-Davidson County Chapter in Tennessee
- **Prudential Life Insurance Company** for it's grant to our Delaware Valley Chapter in Pennsylvania
- **Junior Achievment** of Glendale, California for donating the proceeds of its fund raiser to National Headquarters
- **Baverle Real Estate** for donating office space and **Railey Paper Company** for donating office furniture to our Austin, Texas Chapter
- **Sacramento El Dorado Medical Society** for assistance with our fund raiser and support of MADD.

Those Marvelous MADD Volunteers

All volunteers are very special people and MADD is blessed with the very best of them. In **Orlando, Florida, Pat Oles** is doing an outstanding job compiling, laying-out, printing and bulk mailing the monthly newsletter. Pat is a wife and mother and still finds time to do this incredible job completely on her own.

The efforts of **Bonnie Rathbone** since January of this year have been instrumental in keeping the **Central Massachusetts** Chapter on track even though the loss of 4 members of her family makes it necessary for Bonnie to travel two hours to Boston to follow the case. Bonnie has found the time and energy to testify before the State Task Force, make several dynamic radio interviews, sell raffle tickets and still be available to other victims in crisis.

Gladys Almond, of Baton Rouge, Louisiana supports herself by working full time at a job that allows her only one day off a month. Gladys spends that one day in court, monitoring cases for MADD!!!

National headquarters is fortunate to have **Ken Nelson**, an outstanding speaker.

A heart-felt "thank you" to all Marvelous MADD Volunteers!

Saving A Life Can Be Habit Forming

Experts estimate that almost half of all automobile occupant fatalities and many serious injuries might have been avoided if the people had been wearing seat belts. If you are one of those people who do not use belts for one reason or another, think carefully about your motivations.

Many people say they are afraid of being trapped in a car by a seat belt. In fact, in the vast majority of cases, seat belts protect passengers from severe injuries, allowing them to escape more quickly.

Some people use seat belts for highway driving, but rationalize it is not worth the trouble to buckle up for short trips. The numbers tell a different story: 80% of all automobile accidents causing serious injury or death involve cars traveling under 40 miles per hour. Three quarters of all collisions happen less than 25 miles from the driver's home.

We heartily support the program initiated by the National Highway Traffic Safety Administration to encourage the use of seat belts. So please fasten your own belt, and urge your family and friends to follow your example. Make it a lifesaving habit to use seat belts.

Many of our children would be alive today if they had been wearing seat belts or in child restraining seats when involved in a drunk driving crash.

CHAPTER HIGHLIGHTS

We want to express our sincere appreciation for a job well done by Ron and Karen Frazier of the **Rappahannock County** Chapter of *Virginia*. Ron has been transferred to *London* (is MADD going international?). Ron and Karen were instrumental in organizing their chapter and they have worked hard on the drunk driving issue. We want to welcome Donna Neal, the new Chapter President, and we know you will all give her your support.

CONGRATULATIONS to Ed Kunec, President of the **Fairfax County Chapter** *(Virginia)*, for his appointment to the STATE TASK FORCE. The chapter is also represented on a County Task Force.

Ruth Weill is serving on the Governor's Task Force in *Louisiana*. The **Baton Rouge Chapter** has logged over 200 hours of court monitoring and has begun a statewide victim identification program. The **San Mateo County Chapter** *(California)* has been holding weekly seminars which are conducted by local law enforcement officials, judges, motor vehicle department representatives and others involved in the drunk driving problem. The state of *Michigan* is organizing rapidly thanks to the efforts of Lee Landes and Greg Reese who are serving on the state task force. The **Wayne County Chapter** and the **Macomb County Chapter** have been leaders in the state. New drunk driving laws were signed by the Governor of the state of *Florida*. The **Orlando Chapter** did an outstanding job providing expert testimony on the laws when they were in the legislature. They also helped raise funds for a Breath Alcohol Testing Mobile Unit for the police. In *Ohio*, the **Southwestern Ohio Chapter** sponsored a drunk driving demonstration in cooperation with Warner Amex Security and Malibu Grand Prix. They also had a local marathon walker who walked from Lexington, *Kentucky* to Cincinnati, *Ohio* in less than 24 hours to call attention to the deaths and injuries caused by drunk drivers during holiday weekends. Our **Maryland Chapter** has had tremendous success. Nine new drunk driving laws were passed in *Maryland*. The **Lehigh Valley Chapter** in *Pennsylvania* conducted a mock court in which a judge, a police officer, a prosecuting attorney and a magistrate acted out the process from arrest through sentencing. *Minnesota's* governor signed new drunk driving laws in March. Both the **Metro #1** and **Metro #7 Chapters** were instrumental in the passage of these laws. In *Massachusetts*, Carol Lawler, President of the **Greater Boston Chapter** is serving on the Governor's Task Force and Jan Constantineau, President of the **Central Massachusetts Chapter** is serving on the Worchester County Early Intervention Team and Task Force on Alcohol and Safety. Congratulations to all our chapters for their hard work and tremendous success.

MADD PAST, PRESENT AND FUTURE

MADD started as a one-woman crusade for personal justice. Today it is the focus of national attention with eighty-five chapters in twenty-nine states. We look forward to the day when there are MADD chapters in every state.

When MADD first began to call for reform of California's Drunk Driving Laws, it was difficult to find a sympathetic ear. Today those new laws are in effect and thirty-five state legislatures introduced new drunk-driving laws in 1982. New laws were passed in twenty-four states. MADD will continue to work for effective drunk driving laws.

When Governor Brown of California appointed a State Task Force to find solutions to the drunk driving problem, he was one of the few politicians to understand the significance of the MADD movement. Today members serve on Governor's State Task Forces in nine states and on many County Task Forces. Candy Lightner has been appointed to the President's Commission on Drunk Driving. Tomorrow more state task forces will be formed to seek local solutions.

MADD was initially recognized for its legislative efforts. Today these MADD programs are highly regarded:

1. Community Awareness and Education (Prevention)
   One key to the solution of the drunk-driving problem is changing our attitudes about drinking and driving. Today drinking and driving is socially acceptable; in fact, drunk drivers often receive positive feedback for their anti-social behavior. Making drunk driving socially unacceptable means changing societal values. This is done by raising consciousness (awareness) and education on how to be individually responsible. Programmatically this means:
   a. Speakers Bureau
      Each chapter develops a nucleus of accomplished public speakers who make presentations before service clubs, professional associations, community groups, governmental agencies, corporations, schools and others interested in the drunk-driving problem.
   b. Student Education Program
      An educational program coordinated by MADD, but administered by and for high school students (Note: 44% of all night-time fatal alcohol-related crashes are caused by 16-24-year-olds).
   c. Media Coverage and Events
      Mass media, both local and national, keep people aware of the drunk driving problem and solutions. Events educate people on how to be individually responsible, i.e. "Holidays Ahead Campaign".
      Each MADD member becomes an advocate for reform of society. Each becomes a living, walking, talking education program. Peer pressure at work.
2. Victim Services
   A victim can be either the person who suffered injuries as a result of a crash caused by a drunk driver and/or the family members of the crash victim.
   Assistance to victims includes:
   a. Short-term treatment
      Crisis intervention, individual counseling and bereavement group support
   b. Information and Referral
      Information about and referral to appropriate services in the community
   c. Adjudication Advocacy
      If a victim wishes to follow the adjudication process of the person responsible for the crash, MADD explains the adjudication process, one's rights, is present in court, documents court proceedings and results, and follow up
3. Reform and Enforcement
   Another key to changing behavior is to punish anti-social behavior. This is accomplished by enactment of laws providing for punishment of drunk drivers and by ensuring that these laws are enforced. Programatically:
   a. Advocacy
      MADD advocates for reforms in the criminal justice system, law enforcement, motor vehicle agencies, prosecuting attorneys' handling of drunk driving cases and provides expert testimony on legislation related to the drunk-driving problem.
   b. Task Force Formation
      Chapters advocate for formation of state and county task forces which seek local solutions.
   c. Court Monitoring
      To determine if prosecuting attorneys and judges strictly enforce current laws in prosecuting and sentencing those persons accused of drunk driving.

In the future, MADD programs will reach more Americans.

Two years ago MADD staff consisted of Candy and a few friends working out of her home. Today MADD occupies a suite of offices and boasts a staff of ten professionals and five other highly qualified individuals. MADD is working towards a system of paid regional staff.

When MADD began, 26,000 people were killed every year by drunk drivers and another million were injured. Today, in four states including California, statistics show fewer deaths and injuries on our highways in 1982 as compared to 1981. **Lives are being saved!** We have a long way to go to make our highways safe but a start has been made.

In the summer of 1980 MADD was a concept, an idea. Today MADD is a movement of victims and concerned men and women from all walks of life. Someday MADD will be an anachronism as drunk driving will no longer be socially acceptable or go unpunished. Until that day MADD will continue to be the Voice of the Victim!

MADD's first picketing

EAST COAST WORKSHOP

MADD'S first regional workshop was a resounding success. One hundred people attended. One chapter president traveled from El Paso, Texas to join us in Washington, D.C.

Among the workshops were: Organizing Your Chapter, Fund Raising, Grantsmanship, Volunteer Program Management, Victim Assistance Program Management and Working with the Press. One of the most beneficial aspects of the gathering, however, was the moral support and uplifting we were able to give one another. The energy created by so many people dedicated to the same purpose gathered in one place really charged up everyone.

We are holding our final 1982 workshop in Sacramento in November. See you there!

THE VICTIMS STORY

DEAR CANDY,

I have pretty much recuperated now from the emotional and physical ordeal of sentencing, March 25th and wanted to let you know the results.

John Morgan was sentenced to two years in prison beginning April 12th. Two years for two lives doesn't seem much to me. However, it is far greater than what has been given before in our area and even more than Cook County (Chicago). The defense attorney tried again to throw the case out and Morgan spoke of how he has changed, hardship, etc. But you could tell it was not sincere. He even said he had wanted to talk to me, but when I gave him a chance after the judge left, he didn't accept it. The judge allowed me the option of speaking and when I sat there I thought I would pass out. But I did manage to say their right to life was taken, it was 11 months exactly since I had buried those 2 wonderful people and a person should take responsibility for his actions. My brother (in his clerical collar) and 4 girlfriends were with me. I believe the judge had his mind made up before, because he was quietly firm and reminded Morgan his own 2 children could have been dead also.

I understand the Trooper had given information earlier that Morgan was still drinking. But I believe your letter to the judge made a great impression especially when I saw he responded back to you. Thank you, so much, Candy. Isn't it great to know we can make a difference!

A very sincere thank you!
Georgene Zibits
Chicago, Illinois

MADD:

I happen to be a recent VODD (Victim Of A Drunk Driver). On 7 5 81 while riding my 10-speed bike I was struck from behind by a pickup truck and ended up 188 feet from the point of impact. The driver, 32, was found some blocks away with my bike wedged in his grill and a BAC of .18 and was given 4 tickets.

I spent 5 months and 19 days in the hospital with a spinal cord injury. I will never walk again. I also lost control of my bladder and bowels and am physically impotent.

My medical expenses, which I estimate at $75,000, were almost all covered by my medical insurance, and my vocational rehabilitation is already over $20,000.

The driver pled no contest and was fined $175 and got a 90-day license suspension and DWI school. My injury or even the accident weren't in any of the charges. He had no insurance or resources to sue for.

Shortly after the accident the Assistant State Attorney called me and asked if I would identify the driver. When I told her I couldn't because I was hit from behind and was unconscious, she said they'd probably have to dismiss the charges because there were no witnesses. I screamed about the bike in the grill and the tickets and he was brought to trial.

I have not had any income since the accident and if it wouldn't have been for my mother I would've lost my house through foreclosure.

I and my relatives and friends are very angry about this and how little was done to the driver.

We are on the right track with laws that will dole out stiffer penalties to the drunk drivers because it will stop some of them from driving drunk. But what about the victims!? If the victim dies, we seem to have had the attitude, "Well, we can't bring them back, and anyway it was just an accident." If the victim is permanently disabled, it is not even a crime! This is outrageous! The drivers must be held responsible for the damage they do.

LEGISLATIVE ALERT

HOWARD-BARNES BILL NEEDS YOUR SUPPORT

MADD has long endorsed effective federal legislation to assist the states in battling drunk drivers. MADD endorses H.R. 6170, a bill introduced by Congressmen James Howard of New Jersey and Michael Barnes of Maryland, providing important federal aid to those states setting up comprehensive, community-based drunk driver control programs. The Howard-Barnes bill, which has already passed the House Public Works & Transportation Committee, is expected to come up for a vote before the entire U.S. House of Representatives before the Labor Day weekend. Currently, the bill has the bipartisan cosponsorship of 120 members of the 435-member House. But this is not enough!! We must assure a clear majority cosponsoring the Howard-Barnes bill, which in MADD's view, is the best available mechanism to finally bring under control the nationwide drunk driving epidemic. The Congress must go on record that drunk driving can no longer be tolerated. Take a minute to write your Congressman NOW to cosponsor this life saving legislation.

ADDRESS YOUR LETTER:
(The Name of Your Congressman)
U.S. House of Representatives
Washington, D.C. 20515

L.A. TIMES

Dr. Joyce Brothers

Turning Rage Into Positive Action

Dear Dr. Brothers: A year ago, my 16-year-old daughter was killed instantly by a drunken driver who ran through a school crossing. Because of this, I suppose, I was not amused by the film, "Arthur," that seemed to celebrate and condone drunken driving. In fact, I was so enraged when the audience laughed at a drunk that I wanted to scream at everyone. I was unable to sleep for several nights after seeing this film.

My husband shared my views but somehow he's managed to be more adjusted. He just let it go and it didn't seem to affect him. He worries because he's afraid my anger will only end up destroying me and our marriage. Sometimes, I worry too, but I don't know what to do. G.H.

Dear G.H.: Take positive action that will turn your justifiable rage into something that will help others. Make your anger constructive. Drunks account for half the nation's fatalities and I agree that a drunken driver is never funny.

I haven't seen the movie you refer to, but I do know there's a powerful new group springing up around the country. It's called MADD, which stands for Mothers Against Drunk Driving. This crusade against slaughter on the highways has earned the attention of judges, legislators and highway officials. One result of their constructive anger is that more stringent laws have been put into effect against drunken drivers.

It will help you to write out or talk out your feelings. Your husband may have found ways to release some of his anger and pain over your daughter's death. He may use his work as a way of relieving some of those tensions.

Contact someone in your local government and ask if there's a chapter of MADD in your community. If there is, join it. If there isn't, perhaps you can form one.

• • •

MADD Is The Voice of The Victim

(continued from page 1)

that the county in which the three drunk driving charges were pending was unaware of the one conviction. When contacted BY MADD, the D.A. prosecuting the remaining three charges explained that his county considered CONDITIONAL PROBATION WITH REFERRAL TO A TREATMENT PROGRAM APPROPRIATE SENTENCING FOR THIS MAN WHO,"...OBVIOUSLY HAS A PROBLEM AND NEEDS HELP."

MADD's involvement resulted in a June 9th sentencing to 6 months in county jail, a $1,250.00 fine, driver's license revocation, 3 years formal probation and the filing of a charge of violation of probation.

Case #3 - The driver claimed the two victims darted out in front of his vehicle causing the fatal crash. Subsequent investigation revealed that Larry Hargadon and Karen Lippstren were standing on the side of the highway behind their disabled car when they were hit and killed by the defendant on January 30, 1982.

Friends had encouraged the parents *not* to become involved in the adjudication process. Lee and Bernard Hargadon followed the advice until a meeting with the probation officer disclosed the information that, based on the original report, the driver had been charged *only* with two counts of MISDEMEANOR MANSLAUGHTER. The probation officer also disclosed that *over* 100 letters, in *support* of the *charged driver*, had been received by the probation department. Shocked, the parents contacted MADD headquarters.

With encouragement and guidance of MADD, the parents took action! Several phone calls were made to bring the *second report* to the attention of the district attorney, his supervising attorney, and the probation department. Letters on behalf of the victims poured in from friends and concerned citizens. These actions resulted in the charges being changed to two counts of *felony vehicular manslaughter*. Our San Mateo chapter will continue to work with and support the Hargadon family through the court process.

REPORT

Ten minutes earlier the driver was stopped by two policemen for erratic driving. According to witnesses, despite the driver's intoxicated behavior, the officers made no arrest. Ten minutes later, he hit the Irwin family head on at 80 mph. The driver was killed. Also dead were Mark Irwin, 22, and his 6-month-old daughter, Misty Jane. Debbie Irwin, 19, and her three-year-old son Steven were seriously injured. Four years later, Debbie is suing the town of Ware, Massachusetts under the Governmental Tort Claims Act. The Massachusetts Appeals Court has ordered the case to be heard by a jury. A MADD Massachusetts chapter is supporting action to raise money for court expenses.

SECOND DEGREE MURDER

In Redding, California, on January 3, 1979, Penny Maillet and her six-year-old daughter Michelle were killed in an automobile accident. Another daughter, two-year-old Danielle, suffered major injuries. Their car had been struck by another car driven by Robert Lee Watson. Police tests indicated that Watson's vehicle was traveling in excess of 71 mph. And he was drunk! (.23 BAC) Two more deaths to add to the total of more than 26,000 caused each year on our nation's highways by drunk drivers. But this one has a different twist —a Shasta County (California) jury on July 9, 1982, found Watson guilty of 2 counts of Second Degree Murder for his wanton and "conscious disregard" for the lives of others.

For the first time in the state of California, a drunk driver was successfully prosecuted for murder when his act caused the death of another. As far as MADD researchers have been able to determine this case is also the FIRST SUCCESSFUL MURDER PROSECUTION in the UNITED STATES RELATED to a DRUNK DRIVING CRASH. As such it represents a watershed in legal thinking with respect to prior theories of criminal law relating to drunk driving situations.

The Shasta County District Attorney's Office represented by former D.A. Will Hawes, present D.A. Stephen Carlton and Deputy D.A. Dennis Sheehy, in conjunction with the California Attorney General's Office fought for more than 2 years for the right to charge defendant Watson with second degree murder. The defense advocated that Watson should only be charged with felony drunk driving and vehicular manslaughter but in a land mark decision handed down in November, 1981, the California Supreme Court held that the murder charge was appropriate where "there exists a rational ground for concluding that defendant's conduct was sufficiently wanton . . .". The court was careful to caution against "the routine charging of second degree murder"; and that it was necessary for the prosecution "to carry its burden of establishing implied malice" and "the (other) elements of second degree murder". The court's opinion, written by Justice Richardson and concurred with by Justices Mosk, Tobriner, Newman and Lachs, spoke directly to the distinction between the gross negligence finding required in "vehicular manslaughter" cases and the finding requirement of "malice" in murder cases. Gross negligence has been defined in California as "the exercise of so slight a degree of care as to raise a presumption of **conscious indifference** to the consequences". On the other hand, "malice may be implied when a person, knowing that his conduct endangers the life of another, nonetheless acts deliberately with **conscious disregard** for life". Though bearing similarity, these definitions are not identical. **Malice "contemplates a subjective awareness of a higher degree than does gross negligence"** and involves an element of wantonness which is absent in gross negligence."

On August 6, 1982, claiming he had erred in his instructions to the jury, Judge William Phelps reversed Watson's conviction and, instead, substituted a verdict of guilty of vehicular manslaughter. Not only did Phelps impose the lesser penalty of only 3 years in state prison (rather than the 15 years to life which Murder II carries) but he literally ignored the "will of the people" which the jury had expressed by its verdict. Apparently trial by jury is invalid unless the Redding judge approves of the verdict obtained. Judge Phelps decision is being appealed.

A Message from Candy

(continued from page 1)

will be wondering what happened to the vacation I promised myself I would definitely take this time. The first one was interrupted by the signing of the bills at a governor's press conference here in Sacramento, the second was cut short because of the White House ceremony, and the third one I'm afraid to plan.

Since I started MADD two years ago, I have traveled over 81,000 miles. (That was tabulated from trips I recorded. There were many I didn't record.) I have completed over 150 radio shows, over 100 TV shows, and over 30 press conferences. None of the TV and radio includes newscasts. Also, this does not include all the interviews I gave to newspapers, magazines, free-lance writers, authors and potential authors. Those were too numerous to count. I have picketed The White House once, the State Capitol three times, and participated in two candlelight vigils -one in Sacramento and one in Los Angeles. I can remember when I was terrified to speak before a group of people, and refused to do so because I was afraid they would hear my knees knock!

In the beginning I was fueled by my own grief and bitterness. After awhile, as my grief began to subside, I was fueled by others' tragedies and devastation. Now, I'm just fueled by the injustice of it all and knowing what everyone said could not be done is being done. *Laws* are changing, sentencing is changing, prosecuting is changing, attitudes are changing, and we are seeing reduction in death and injuries due to drunk driving on our highways. HAPPY TWO-YEAR ANNIVERSARY, MADD, AND CONGRATULATIONS!

Candy Lightner

LITTLE PEOPLE POWER

Early this year an article appeared in the SECOND GRADE WEEKLY READER that generated a response illustrating the awareness youngsters have of the drunk driving problem. Correspondence was received from students of Mrs. B. Kerley's class in Bartlett, TN; Mrs. Wall's class in Mounds View, MN; Mrs. Easterday's class in Dove Creek, CO; Janet Dixon's class in Rochester, MI; second grade classes in Keokuk, IA and Milroy, PA. Unfortunately space will not permit inclusion of all of these thought provoking letters, but we would like to share with you the letter received from the North Hill School in Rochester, MI.

Dear Mothers,

We talked about drunk drivers yesterday and we, too, are mad. Many of us have seen drunk drivers and we don't like to see people hurt by their carelessness. We wrote about drunk drivers in our journals. Here are some of the things we said.

...(drunk drivers) should get their license expired because if they keep on driving then more and more people will get killed.—*Scott*

...drunk drivers should go to jail.—*Eric*

...sometimes they kill people because they are dumb. —*David*

I think drunk drivers should go to jail because drunk drivers are silly.—*Amy*

I think drunk drivers should not ride.—*Mary*

...drunk drivers should go to jail because people are killed.—*Drew*

...(drunk drivers) should be put in jail for their entire life. I think a taxi should pick them up.—*Joie*

They (drunk drivers) should stop drinking. That's what I think!—*Karen*

Drunk drivers damage their brain.—*Joy*

I think their parents shouldn't let them go to parties. Or, when they are at a party and someone asks them to drink or take drugs, they should say NO!—*Mary Ann*

Drinking is yucky.—*Jessica*

Police should take away their license for the rest of their life.—*Kelly*

...it (drinking) is dangerous and people get hurt.—*Jennifer*

I think drunk drivers should never be able to drink alcohol again. That would solve the problem.—*Todd K.*

As you can see we are concerned about the problem of drunk drivers. We hope your organization can help get laws passed that will take care of some of this problem.

Sincerely,
Second Grade, Room 4

Martin supports higher drinking age

Associated Press 1/28/83

Juneau -- Witnesses at a House Judiciary Committee hearing weren't sure people automatically become responsible drinkers at age 21, but they nevertheless agreed that the drinking age should be lifted from 19 to 21.

A measure to do that, sponsored primarily by Rep. Terry Martin, R-Anchorage, was the subject of a hearing Thursday. Martin told committee members that age 21 seems to be "some kind of magical number that does reduce death."

Martin said that of 24,000 annual alcohol-related traffic deaths nationally, 7,000 were teen-agers. The problem has prompted Congress to consider a national age of consumption, he added.

Alaska's director of Highway Safety, Charlie Smith, said statistics on alcohol-related traffic deaths in the 49th state are largely unavailable because "last year was the first time I was asked to produce statistics."

A presidential commission has recommended all states raise their drinking age to 21, Smith said.

Howard Scaman, who represented Mothers Against Drunk Driving, Students Against Drunk Driving, and the Coalition for a Safe Alaska, said that the problem is so serious that alcohol "is readily available in the junior high system."

The state, he said, has one liquor license per 183 people, several times higher than the national average.

Rep. Mike Miller, D-Juneau, said he was part of the problem.

"I voted to lower the drinking age in 1970," he said. "We were dead wrong. We felt that if they wanted to get it, they were going to get it. And they were going to drive anyway."

Raising the drinking age won't eliminate teen-age drinking, Miller said, "but we can lessen it."

"There is no magic number," he said. "We have to draw the line somewhere. Twenty-one seems to be a good age."

When Rep. Don Clocksin, D-Anchora said he was concerned the law would be criminating because of age, Miller admit he shared the same concerns.

But, Miller added, "Drinking and gett drunk is not a right. And society has a ri to draw a line."

A representative of the Hotel, Restaur and Bartenders Union Local 878, Miche Castanedo said she had no objection to ra ing the drinking age. But, she said, would like to see a provision for 18 20-year-olds being allowed to work in pla where alcohol is served.

A committee substitute providing for h concern is expected to be introduced tod

JUNEAU EMPIRE, FRIDAY, JANUARY 28, 1983 3

21: Magic drinking age

Panel: 19 too young

By The Associated Press

Witnesses at a House Judiciary Committee hearing weren't sure people automatically become responsible drinkers at age 21, but they nevertheless agreed that the drinking-age should be lifted from 19 to 21.

A measure to do that, (HB17), whose prime is Rep. Terry Martin, R-Anchorage, was the subject of a hearing Thursday. Martin told committee members that age 21 seems to be "some kind of magical number that does reduce death."

Martin said that of 24,000 annual alcohol-related traffic deaths nationally, 7,000 were teenagers. The problem has prompted Congress to consider a national age of consumption, he added.

Alaska's director of Highway Safety, Charlie Smith, said statistics on alcohol-related traffic deaths in the 49th state are largely unavailable because "last year was the first time I was asked to produce statistics."

A presidential commission has recommended all states raise their drinking age to 21, Smith said.

Howard Scaman, who represented Mothers Against Drunk Driving, Students Against Drunk Driving, and the Coalition for a Safe Alaska, said that the problem is so serious that alcohol "is readily available in the junior high system."

The state, he said, has one liquor license per 183 people, several times higher than the national average.

Rep. Mike Miller, D-Juneau, said he was part of the problem.

"I voted to lower the drinking age in 1970," he said. "We were dead wrong. We felt that if they wanted to get it, they were going to get it. And they were going to drive anyway."

Raising the drinking age won't eliminate teenage drinking, Miller said, "but we can lessen it."

"There is no magic number," he said. "We have to draw the line somewhere. Twenty-one seems to be a good age."

When Rep. Don Clocksin, D-Anchorage, said he was concerned the law would be discriminating because of age, But, Miller added, "Drinking and getting drunk is not a right. And society has a right to draw a line."

A representative of the Hotel, Restaurant and Bartenders Union Local 878, Michelle Castanedo said she had no objection to raising the drinking age But, she said, she would like to see a provision for 18-to 20- year-olds being allowed to work in places where alcohol is served.

A committee substitute providing for her concern is expected to be introduced today as hearings on the bill continue.

Letters to the editor

Raise the age for drinking

Dear Editor:

In response to the letter, "Cure for teenage drinking," I would like to make a few comments.

Mr. Kirk wrote a lengthy and lively letter demeriting Rep. Terry Martin's bill to raise the drinking age from 19 to 21. He says the bill violates the "American Way" of giving citizens great responsibility for their individual actions.

Let's keep in mind that laws and regulations arise in response to harmful behavior. This bill is long overdue!

Real-life groups of people are, in fact, punished for the transgressions of a few of their members. The "old elementary school teacher who used to make the whole class stay in from recess because someone was talking during class" offers us all a valuable lesson. No one lives completely unto himself. Our actions always produce an affect touching those persons associated or identified with us. For example, a disruptive or criminal family member causes grief to other members of his family. Shoplifters cause the price of retail goods to rise for all shoppers, and careless youthful drivers cause other teen-agers to pay higher insurance rates. The elementary teacher was illustrating the point that it was not only her job to maintain order in the classroom but that the group also was expected to exhibit appropriate conduct and encourage classmates to do the same.

We should learn early in our education that we are individually and collectively responsible for our actions. Peer pressure to do what is right is the only hope for an orderly society, as it is impossible to have a policeman for every citizen. One who buys liquor for a minor contributes to that minor's risk of harm to himself and others. One who purchases products that contribute to people's poor health and safety — whether it be tobacco, alcohol, or illegal drugs — directly reinforces that more of that substance will be produced. These individuals share in the responsibility along with the intoxicated driver who cripples and kills on the highway.

Nothing will prevent a minor from obtaining dangerous substances if he is determined to do so just as it is impossible to prevent a suicide by a peron bent on self-destruction. However, there is no reason to make these items convenient to youth prior to their reaching an age that we hope allows for the development of maturity and judgement needed to exercise caution if not outright refusal to use these substances.

Comparing the loss of jobs for teenagers in drinking establishments because of the revised 21 year old drinking age is sort of like finding a remedy for cancer and then complaining that some nurses will find themselves out of work. It is true that unemployment is a priority, but the disabling and killing of youthful drivers, their friends, and other innocent drivers is a much higher priority. It is time we consider the long-range costs of our decisions and policies rather than just the immediate affects. It might be a bore to drive at 55 mph and see what you pass but thousands of people are alive today as a result of the law.

Yes, one could say Terry Martin's plan punishes the innocent teen-ager along with the guilty. It's a fact of life. But, if you are a teenager who chooses not to drink, you would hardly consider Rep. Martin's bill a punishment.

We support raising the drinking age

Anyone who has lived in Alaska for any length of time has known someone hurt by alcohol.

Alcohol abuse crosses every line. It affects old and young, man and woman, rich and poor. But no instance of alcohol abuse is as tragic as among young people.

To see a teen-ager caught up in alcohol abuse can only be described as a shame. Yet most of us see it, hear about it and read about it all the time.

Most drinkers, young and old, are responsible. Yet a sizable minority — a minority that cannot be ignored — continues to misuse alcohol. And many are teen-agers.

The major and most deadly abuse of alcohol is drunken driving. For some reason, young Alaskans especially are arrested time and again for drunken driving. You can see it in the daily police reports and hear about it from concerned friends and parents.

All too often, you read about it in the obituaries.

According to Mothers Against Drunk Drivers, a nationwide group that has taken hold in Alaska, almost one-third of the 24,000 people who died in alcohol-related traffic accidents nationally were teen-agers.

No death is as tragic as a drunken-driving death. That tragedy is even worse when it involves a teen-ager.

Getting rid of alcohol in Alaska seems an impossibility. Though it has been successful in many rural areas, the return of prohibition is not at hand in most of the state.

What is at hand is a movement to raise Alaska's drinking age from 19 to 21.

That is an effort we can all support. Raising the drinking age will not solve Alaska's drinking problem. Nor will it stop drunken driving among teen-agers.

But it will help stop the on-going tragedy of alcohol abuse among many of Alaska's youths.

"I voted to lower the drinking age in 1970," Rep. Mike Miller, D-Juneau, told the House Judiciary Committee last week. "We were dead wrong."

We agree. Drinking is not a right. It is a privilege we believe is hurting too many teen-agers.

Though no statistics are available for the state, we and many other responsible Alaskans agree that raising the drinking age to 21 will save lives.

We support raising the state drinking age.

Getting MADD about drunken driving

Group asks Legislature for stiffer DWI penalties

By CHRIS JARVIS
Empire Staff Reporter

She's MADD about drunken drivers, and she wants the Alaska Legislature to do something about it.

June Gerrish knows all too well the pain than goes with drunken driving-caused accidents. In December 1981, two of her grandchildren, 13-year-old Scott Gerrish and his 10-year-old brother Wesley, were run down and killed by a car driven by a drunken driver as they walked along a road in Girdwood, a quiet ski-resort town south of Anchorage.

The driver, Patrick Clemans, was last week sentenced to two concurrent eight-year terms and two years of probation by Anchorage Superior Judge Seaborn Buckalew.

Gerrish said today she was pleased with the sentence, noting it might serve as a warning to others of what can happen when driving while drunken and how serious the courts treat the crime.

And though last week's sentencing "took a lot weight off our minds," she said she is not done with her fight against drunken driving.

It is a fight that goes far beyond the boundary of the state's largest city. This week a Juneau man who recently pleaded no contest to a negligent homicide charge in the drunken-driving death of another 25-year-old man last June was again arrested, this time accused of drunken driving.

Some people withdraw from their anger and outrage, but Gerrish is doing something about hers. She founded the Alaska chapter of Mothers Against Drunk Drivers, a national group of citizens waging an all-out war against drunken driving.

The Alaska Chapter of MADD, started in September, now has about 800 members and will soon have chapters in Juneau, Valdez, Seward, Palmer and Fairbanks.

Now she has brought her fight to the Legislature and the House State Affairs Committee, which on Wednesday will hear her side of the growing drunken-driving tragedy in Alaska.

"We're not against drinking, but when they get in their cars, that's our business," Gerrish said.

Of her own experience, Gerrish said she never will forget the deaths of her grandchildren and the pain it created.

"It's not fair," she said. "There are two kinds of death."

"The first, like the death of an old or very sick person, you can understand .... You're still hurt, but you know why," she said.

"But this was senseless; this was stupid," she said. "That's what makes me mad; I don't know why."

"We can never have another Christmas, we can never have birthdays," she said of her tight-knit family.

Her son, an Anchorage paramedic, had trouble returning to work following the death of his sons, Gerrish said. One of the first calls he received when he returned to work was to treat a 13-year-old boy who had been hit by a car, she said.

"He had trouble being in the same emergency room" under the same circumstances, she said.

While it supports raising the drinking age to 21, MADD is even more vocal about two other bills now under consideration in the House.

The first, introduced by House Speaker Joe Hayes, R-Anchorage, would require proof of liability insurance before a car can be registered in the state "so that innocent victims of motor vehicle accidents may be recompensed for the injury and financial loss inflicted upon them."

The other bill supported by MADD was introduced by Rep. Mitch Abood, R-Anchorage. It would increase penalties for repeated convictions for driving while intoxicated, refusal to take a breathalyzer test and driving while a license is suspended or revoked.

For example, the minimum sentence for someone convicted of driving while his driver's license is revoked following a conviction for driving while intoxicated would be 14 days in jail and a $500 fine.

In Alaska, Gerrish said, people don't have much trouble coming up with the money to pay fines, so she wants the fines increased to make more of an impression on drunken drivers.

Other changes the bill makes are a minimum jail term for those who refuse, a second time, to undergo a breatalyzer test. A second conviction would increase the sentence to no less than 20 days in jail and a fine of at least $500.

A second conviction for driving while intoxicated would result in a sentence of at least 20 days in jail and a fine of at least $500.

A third conviction would result in a sentence of no less than 30 days in jail and a fine of at least $1,000.

The bill also would allow a police officer to notify the driver at the time of arrest that he faces license revocation.

The revocation, could be appealed to the court within seven days. If not appealed, the revocation stands.

Dear Charlie Bussell:

I would like to know your opinion on whether or not we should raise the drinking age to twenty-one, or leave it at nineteen?

I don't think we should raise the age to twenty-one. Instead I think we should raise the punishments for alcohol abuse.

Sincerely,

Albert Brock

RE: HB 17

WE URGE SWIFT PASSAGE OF HOUSE JUDICIARY VERSION OF HB 17, RESOTRING THE DRINKING AGE TO 21. WE APPALLED BY THE NEEDLESS SLAUGHTER OF 19 AND 20 YEAR OLDS ON ALASKA'S HIGHWAYS DUE TO DRIVING WHILE DRUNK AND ARE WEARY OF PAYING ESCALATED INSURANCE PREMIUMS FOR TWISTED METAL AND SPLAYED FLESH. WE FAVOR STRONG MEASURES NOW WITH NO WAFFELING BY THE LEGISLATURE.

House rejects higher drinking age...

The Associated Press

JUNEAU — House lawmakers on Monday soundly defeated a move to raise the legal drinking age in Alaska from 19 to 21.

Rep. Terry Martin, R-Anchorage, pushed the change in the form of an amendment to a bill revamping state liquor laws. After defeating Martin's amendment, and voting on several others, the House approved the 73-page revision of Alaska's alcohol laws on a 33-2 vote.

The bill passed the Senate earlier, but the House amended it so the legislation (HCSCSSSSB239 Finance) now returns to the Senate. It may end up in a House-Senate free conference committee.

Martin said the number of persons who die in auto accidents involving intoxicated drivers is on the increase. He said the combination of liquor and driving is "snuffing out the lives of many promising youths."

But opponents argued that persons who are old enough to go to war for their country are old enough to decide if they want to drink.

"I think it's ludicrous that we stand here trying to take away freedom," said Rep. Ray Metcalfe, R-Anchorage. "Pretty soon someone is going to propose that we lock ourselves in a rubber room to protect ourselves."

Reps. Nels Anderson, Ramona Barnes, Vern Hurlbert, Mike Miller and Martin voted in favor of raising the drinking age.

Another amendment, which was adopted on a 21-13 vote, would allow the Alcoholic Beverage Control Board, in certain situations, to approve a liquor license that exceeds the quota set for an area.

Rep. Joyce Munson, D-Anchorage, said there's a problem in Anchorage, especially in the Girdwood area. She said the value of liquor licenses has risen to the point where the natural location is downtown.

The legislation, which is the outgrowth of a special committee headed by Sen. Bill Ray, D-Juneau, makes numerous other changes in Alaska's liquor laws.

One change would expand the ABC Board to include one person who is knowledgeable about alcoholism and alcohol abuse.

Another would allow a bartender or liquor store owner to refuse to sell liquor to a person who has a serious drinking problem.

A major provision in the bill would allow communities to declare themselves "damp" rather than wet or dry. The bill provides for a local vote on several options beyond whether the community should be wet or dry.

The bill establishes seven options for first and second class cities and 6 options for unincorporated villages. T options range from a total b on liquor sales to a ban importation and possession allowing sales and possessi just on holidays to commun liquor licenses (for cities) complete freedom in sales a possession.

The bill sets out penalties violation of liquor laws in a community:

- Selling liquor without license would be a felony p ishable by a $50,000 fine a five years in jail for a seco conviction, sale to a minor, o large sale. A first convict would be a misdemeanor p ishable by a year in jail an $5,000 fine.
- Possession would be a m demeanor punishable by days in jail and a $1,000 fine.
- Importation would be felony punishable by five ye in jail and a $50,000 fine fo second conviction or a c involving a large quantity alcohol. Other importation fenses would be misdemeano

..But survey shows support for 21

By JEANNE ABBOTT
Daily News reporter

More Anchorage residents than not say the state's drinking age should be raised from 19 to 21, according to a telephone survey taken last week by the Daily News. But the difference of opinion between those who approve a change and those who don't is slight.

In a sample of 100 residents taken randomly from the telephone book, the newspaper found that 49 percent wanted the legal age of liquor consumption raised to 21 years while 43 percent thought it should remain at 19. Eight percent registered no opinion.

The state Senate voted last week to ask voters whether the drinking age should be raised. The Senate voted 12-5 to put the question to voters on the November general election ballot i the form of an advisory vote. However, the vote would not be binding but simply would be a recommendation to the legislature.The bill passed without debate and went to the House, where lawmakers amended the bill and sent it back to the Senate.

Of those surveyed, a number applauded any measure that would keep liquor from the hands of teenagers.

Said one: "I don't think people can handle it at 50, let alone when they're kids."

And another: "Kids at that age are incompetent to make such judgments. I know I was."

And another: "The way teenagers drive and drink, I don't think anybody should be drinking before they're 21."

Many who approved the change were parents who viewed it as a positive move for their own children. "I have a few teenage daughters, and I'd like to see them wait a few years," said a mother.

And several were non-drinkers who disapprove of any drinking, at any age, although one teetotaler said he didn't want to be in a position to dictate to those who drank.

Of those who thought the age should remain at 19, opinions fell into two basic patterns.

Many agreed with one man who said: "If they're old enough to be drafted and fight, they're old enough to buy a beer."

But more voted from this perspective: "I don't think it's going to make any difference. It just means more hassles for law enforcement, and I don't see the need."

Or, as this resident said: "They'll violate the law anyway. It's hard to give something, and then take it away. This will just make kids criminals."

Likewise, said another: "Liquor is readily available no matter what age you are. I just don't think raising the age limit would do any good."
