District 26 includes all of the Bristol Bay Native Corporation area except Ivanof Bay, Perryville, Chignik Lake, Chignik Lagoon and the Lake Clark-Lake Iliamna communities. Included are the remainder of the Alaska Peninsula communities, the Aleut n communities, the Bristol Bay

communities as far west as Twin Hills, and communities as far up river as Aleknagik and Koliganek. The Bristol Bay Borough is also included. The district has a population of 9,479 and a variance of +2.7 percent. It will elect one house member and, with District 27, one senator.

27. Kodiak-East Alaska Peninsula

District 27 covers the Kodiak Island Borough and the Alaska Peninsula communities of Ivanof Bay, Perryville, Chignik Lake, Chignik and Chignik Lagoon. It has a population of 9,592.4 and a variance of +3.9 percent. It will elect one house member and, with District 26, one senator.

SHEFFIELD APPOINTS FIVE MEMBER STATE REAPPORTIONMENT BOARD
OCTOBER 20, 1983
NO. 83-172

FOR IMMEDIATE RELEASE

ANCHORAGE -- Governor Bill Sheffield today announced the appointment of a five-member State Reapportionment Board, in compliance with an order issued by Superior Court Judge Milton Souter on October 12.

Appointed were: Joseph H. McKinnon, an Anchorage lawyer and former member of the Legislature; Felix Toner, a Juneau engineer with previous Reapportionment Board experience who also served on the Juneau Assembly; Mary Nordale, a Fairbanks lawyer; Richard Borer, a Cordova hotel owner and former member of the Legislature; and Willie Hensley of Anchorage, a former Legislator who now is President of NANA Development Corporation and Chairman of United Bank Alaska.

Toner, McKinnon, Nordale and Hensley are Democrats. Borer is a Republican.

The board is charged with presenting the Governor with a proposal to amend a final Proclamation of Reapportionment approved by former Governor Hammond. The Alaska Supreme Court ordered the plan revised last July 23 and returned the case to the Superior Court. In his order last week, Judge Souter ordered the reapportionment plan amended so that the city of Cordova is "placed in a contiguous, compact and relatively integrated socio-economic election district...."

-MORE-

Cordova lies in House District 2, the so-called "Iceworm District." The district currently stretches from Prince William Sound to the state's southernmost border, excluding the largest towns and cities of Southeast Alaska.

The board members will convene in Juneau October 26, and will meet with Department of Law representatives to review their authority and discuss administrative matters before beginning their deliberations.

The proposed amended plan is to be delivered to Sheffield by January 3. The Governor is to then issue the revised final plan by February 3.

Judge Milton Souter
Superior Court, Third District
303 "K" Street
Anchorage, Alaska 99501

Dear Judge Souter:

Alaska's history of apportionment and reapportionment has been one of much concern by all citizens, for this state of just twenty-five years belonging as an equal partner in the United States. Our youth as a state has its benefits, in that we have learned by the mistakes of other states and took advantage of major U.S. Supreme Courts decisions pertaining to the equality of each citizen in equal representation. This is verified in Article IV Sections 4 and 6. Both of these sections are based on the decennial census of the United States [Art. IV, Sec. 3]

Sec.4. Reapportionment shall be by the methods of equal proportion, except that each election district having major fraction of the quotient obtained by dividing total civilian population by forty shall have one representative.

Sec. 6. The governor may further redistrict by changing the size and area of election districts, subject to the limitations of this article. Each new district so created shall be formed of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic area. Each shall contain a population at least equal to the quotient obtained by dividing the total civilian population by forty. Consideration may be given to local government boundaries. Drainage and other features shall be used in describing boundaries whenever possible.

As you are aware the "forty" formula was most distorted in the 1972 and 1974 reapportionments. In the 1980 reapportionment, the committee achieved a much more desirable equal apportionment, but even this missed the mark with some representative districts being as much as 5.8% above the quotient or 4.18% below the quotient, thus a difference of almost 10% inequality of representation, from an average population of 9,228 per house member of the 1980 census of 400,481 people. This excludes transient military population. [See attached "State Government News" - Oct. 1981]

Since the Federal Census of 1980, every state has gone through the traumatic reapportionment mandated. It can be concluded that most states tried to adhere to the U.S. Supreme Court's requirements for "one person, one vote." Many have less than 1% difference. In some states the governors took this criterion so serious that they vetoed badly drawn plans of their legislature - even against their own party. In one case, Colorado, the governor vetoed the new reapportionment plan although the largest and smallest districts had a population difference of only 41 people. In Texas, Supreme Court ruled the House plan split counties unnecessarily in violation of the state constitution. Some states use the Federal Census as their base, some use less of that figure and others do not use the decennial census at all.

In Alaska, it is clearly the intent of the Constitution [Art. VI. Sec. 3] to use the decennial census of the United States. While the intent of this was good - since in the territory era we had no better way of counting people nor the ability to pay for such an undertaking - this method is extremely limiting today. The Constitution, as I interpret it, does not limit the state to outdated statistics when reapportioning between decennial periods. If this is not true, then we are severly limited in complying to the "one person, one vote" equality concept and the current exercise of the Reapportionment Board is diminished in value. Another approach should be considered that is much more reliable and annually takes into consideration the annual fluctuation of population, also. The true military resident count should be added to the Constitution.

I would like to bring to your attention the potential use of statistics completed by the Department of Revenues for recipients of the Permanent Fund dividends. If we are going to reapportion it seems only logical and certainly within the constitution concept of "one person, one vote" equality to use the best census available. While the Federal census of 1980 shows 400,000 plus residents, the Permanent Fund dividends of 1982 has verified 474,000 plus residents. Thus, in the current scheme of reapportionment, almost twenty percent of the population will not be considered for the quotient obtained divided by forty. Alaska can be quite unique in its abilities of combining this new program and using its statistic to allow other departments, commissions, and legislature to share the information of exactly where the people are.

Combining the total recipients of 1982 Permanent Fund checks with the U.S. Post Office zip code numbers makes it easy for any reapportionment committee to combine an equal number for each political districts. [See attached letter and stats - Nov 3, 1983] This obviously is a far superior method of census counting than any yet devised. We know these citizens have been checked for residency and volunteer the information of each household with no additional cost to the state. A most unique aspect in this program is the pre-counting of persons. It allows a pregnant woman of six month pre-birth to count the child to be and receive a dividend check.

The 1983 P.F. statistics can be readily obtained if you approve of the concept for Governor Sheffield's Reapportionment Board. This applied to the latest zip codes of each city, municipality and village will help decrease conflicting reports from various state agencies and local governments as to how many people live where.

Judge Souter, I appeal to you to ask the present Board appointed by Governor Sheffield to reapportion the whole State of Alaska and to use the very latest and factual statistics available - namely the 1983 Permanent Fund Dividend recipients.

If you would like to explore this concept with me personally or need additional information, I will make myself available at your convenience.

Thank you very much for your consideration of my request. I look forward to hearing from you soon.

Most sincerely,

Terry Martin

Representative Terry Martin

CHAMBERS OF
MILTON M. SOUTER, JUDGE

November 14, 1983

Honorable Terry Martin
Chairman, Labor and Commerce Committee
3960 Reka Drive-B6
Anchorage, Alaska 99504

Dear Representative Martin:

This morning you delivered to my office a three page letter together with enclosures, pertaining to the on-going reapportionment proceedings. It appears to me that you are perhaps laboring under a misconception of those proceedings at present, so I feel it appropriate to take this opportunity to present a brief explanation.

A newly constituted reapportionment board is presently handling the reapportionment proceedings. Accordingly, nothing is occurring in court with respect to those proceedings at this time. Further, it is unlikely that anything further will occur in court until the reapportionment board has made its recommendations to Governor Sheffield and he has issued an amended reapportionment order. Therefore, it would have been better for your purposes if you had delivered your letter and enclosures to the reapportionment board, rather than to me.

Because you are not a party to the reapportionment court case, you do not have the right to file with the court any written arguments, suggestions or comments regarding the

case. This is the rule pertaining to non-parties in all court cases. Accordingly, I am returning to you the letter and enclosures which you delivered to me, since it is not proper for me to consider items from a non-party. It might be possible for you to become a party to the case or to submit argument, etc., as an "amicus curiae", but you should consult with a lawyer to determine whether and how to do this.

Despite the formal tone of this letter, I wish to assure you that I appreciate the interest which you have shown in this matter, and I am sure that the active participants in the reapportionment proceedings will wish to consider your views. I have therefore instructed my secretary to send a xerox copy of your letter and enclosures to the formal parties in the reapportionment court case.

Sincerely yours,

Milton M. Souter

REP. TERRY MARTIN SAYS PERMANENT FUND STATISTICS SHOULD BE USED FOR REAPPORTIONMENT

ANCHORAGE - Rep. Terry Martin is asking the Superior Court to have the Sheffield administration use population statistics compiled from the Permanent Fund Dividend program as a basis for reapportioning the state's election districts.

In a letter sent to Superior Court Judge Milton Souter on Monday, Martin said the Permanent Fund Dividend program's statistics were the most current and accurate population figures available for reapportionment. Martin also asked that the entire state be reapportioned using these statistics.

"While the federal census of 1980 shows 400,000 plus residents, the Permanent Fund dividends of 1982 has verified 474,000 plus residents," Martin said. "Thus, in the current scheme of reapportionment, almost 20 percent of the population will not be considered" in the pending reapportionment process.

Martin, R-Anchorage, said because the Permanent Fund Dividend applications have already been thoroughly checked for accuracy, the program offers a unique and inexpensive means of determining a current population count.

"This obviously is a far superior method of census counting than any yet devised," Martin said. "We know these citizens have been checked for residency and volunteer the information of each household with no additional cost to the state."

Martin added, "A most unique aspect in this program is the pre-counting of persons. It allows a pregnant woman of six month pre-birth to count the child to be and receive a dividend check."

Martin said equitable election districts could be designed by using the program statistics and postal zip codes.

"Judge Souter, I appeal to you to ask the present (reapportionment) board appointed by Gov. Sheffield to reapportion the whole State of Alaska and to use the very latest and factual statistics available - namely the 1983 Permanent Fund Dividend recipients," Martin concluded in the letter.

Martin said he is also having the Legislative legal service conduct research on his behalf for legislation which would allow Martin's recommendation to be voted on in the 1984 general election, and also include a clause which would specifically count military residents for political reapportionment. Martin intends to introduce the legislation at the beginning of the upcoming session in January 1984.

NEWS RELEASE

REAPPORTIONMENT BOARD PROPOSES REVISIONS TO 1981 PLAN
November 18, 1983

FOR IMMEDIATE RELEASE

JUNEAU--Following extensive meetings in Juneau during the last several weeks, the newly-appointed Reapportionment Board has proposed two plans for the court-mandated revisions to the 1981 Reapportionment Plan. Chairman Willie Hensley says the Board is moving as quickly as possible in order to have their recommendations to Governor Sheffield by January 3. "We would like to have the public review these proposals and provide us with their comments. The Board will be holding several public hearings in the next two weeks and we invite anyone concerned with this process to participate in the hearings," said Hensley. The Public Hearing Schedule is as follows:

Mon., Nov. 21 - Ketchikan	7:30 p.m. School District Board Room Masonic Temple Building Grant Street
Tues., Nov. 22 - Juneau	7:30 p.m. Court Room A Alaska Court Building
Tues., Nov. 29 - Fairbanks	7:30 p.m. Borough Assembly Chambers 520 Fifth Avenue
Wed., Nov. 30 - Anchorage	Two Sessions: 1:30 - 5:00 p.m. 7:30 - 10:00 p.m. Court Room G, Room 401 Alaska Court Building 303 K Street
Thurs., Dec. 1 - Kenai	1:30 - 4:00 p.m. City Council Chambers 210 Fidalgo

The 5-member panel, including Hensley of Kotzebue, Mary Nordale of Fairbanks, Joe McKinnon of Anchorage, Richard Borer of Cordova and Felix Toner of Juneau, is charged with presenting recommendations to Governor Sheffield which revise the 1981 Reapportionment Plan by shifting the Cordova area from House District 2 in Southeast to a Southcentral district.

PLAN 1

Plan 1 utilizes the same data used by the 1981 Reapportionment Board in formulating their recommendations to former Governor Hammond. The Southeast revisions include separating Metlakatla and Annette Island from District 1 and Hoonah from District 3, to replace the Cordova area in District 2. Although Southeast Alaska as a region is only slightly underpopulated, -3.2 percent for six house seats, the allocation of the population is difficult because of the overpopulation in the Juneau area. After considerable thought, the Board concluded that it would be ill-advised to sever a portion of the Juneau area. Their proposal for Southeast, which is the same in Plans 1 and 2, has a total combined variance between the most overpopulated and the most underpopulated district of 14.84 percent.

The Cordova area in Plan 1 is placed in a Prince William Sound district, District 6, which includes the communities of Tatitlek, Valdez, Seward, Hope, Cooper Landing, Moose Pass, Port Graham, and English Bay. House District 5, a two-member district, remains virtually the same with the exception of Port Graham and English Bay.

The Nikishka area and North Kenai Peninsula that was formerly in House District 6 has been moved into South Anchorage in both Plans 1 and 2. The revised District 7 includes the area from Klatt Road south along the New Seward Highway to Potter Creek, all remaining area south of Potter Creek in the Municipality of Anchorage, and the Nikishka area.

Modifications to District 8 in Plan 1 include extension of the southern boundary from DeArmoun Road to Potter Creek and rather than following the New Seward Highway to Tudor Road, the boundary turns east at Dowling Road to Lake Otis Parkway and then north to Tudor Road. Why no mention of pop. decrease in S.W.AK. - military -

District 9's boundaries remain unchanged. District 10's western boundary is revised to follow Arctic Boulevard from International Airport Road to Fireweed Lane, then west to Spenard Road and north to Chester Creek. This also becomes the new eastern boundary of District 11.

PLAN 2

During the course of the Board's deliberation, the Board identified several instances where the data used for the 1981 Plan contained a reporting error. The principal error occurred in the reporting of the census data for the Eagle River area, where 1,414 persons were inadvertantly excluded. In order to address the problem with the initial census data, Governor Sheffield asked that asked the Board provide him with a plan which uses the most accurate census data available. Under Plan 2, which utilizes the adjusted census data, the ideal population per house seat is increased from 9,176.2 in Plan 1 to 9,210.5 in Plan 2.

The proposal for revisions to districts in Southeast Alaska and on the Kenai Peninsula are the same in both Plans 1 and 2. The population variances change slightly because of the increase in the ideal population per seat.

In Anchorage, Plan 2 offers three proposals for redistricting. Because of a major correction in 1980 census data in the Eagle River area of an additional 1,414 persons, shifts in the boundaries are necessary to correct the excessive population variance.

Plan 2-A utilizes the same redistricting plan for House Districts 7 through 11 as in Plan 1. District 12 includes the Downtown area and North Mountain View. Elmendorf Air Force Base and the North Muldoon area are in District 13, South Muldoon and University in District 14, and part of Muldoon, east of Muldoon Road is included with Fort Richardson, Chugiak, and Eagle River in District 15.

Plan 2-B includes the same revision for District 7 and makes major revisions to District 8 which includes part of the Hillside area and Campbell Lake. Abbott Loop, Rogers Park, Tudor, and part of the Spenard and Taku-Campbell areas are in District 9. District 10 includes Sand Lake and Turnagain and District 11 encompasses most of the Spenard area. District 12 is the Downtown area and District 13 includes Elmendorf AFB, Mountain View and North Muldoon area. The University and South Muldoon areas are in District 14 and residents east of Muldoon Road are in District 15 with Fort Richardson, Chugiak and Eagle River.

Plan 2-C changes the other proposals for District 7 from the Klatt Road area to include the Upper Hillside. District 8 becomes a single-member district in the Lower Hillside area and District 9 is also a single-member district including the Campbell Lake and Klatt Road area. The University, Rogers Park and Tudor areas are combined with Abbott Loop and Taku-Campbell in District 10. District 11 includes most of Sand Lake and Turnagain and District 12 encompasses the Spenard area. The Downtown area becomes District 13, with Elmendorf AFB, Mountain View, and North Muldoon in District 14. South Muldoon becomes District 15 and Fort Richardson, Chugiak, Eagle River, and part of Muldoon become District 16. Because of the creation of two additional single-member districts in South Anchorage in Plan 2-C, it is necessary to renumber District 16, the Matanuska-Susitna Borough, to District 17, and all remaining districts through District 28. Only the numbers change. There have been no changes in election district boundaries beyond Anchorage.

Attached to the press release is a detailed discussion of adjustments to the 1980 census data, a statistical summary for house districts in Plan 1 and Plan 2-A, 2-B, and 2-C. Maps of the revised districts are also included as well as a map of the 1981 election districts in Anchorage.

Copies of this material may be obtained by contacting the Reapportionment Office in Juneau at 465-3538, the Regional Governor's Offices, and Legislative Information Offices.

REAPPORTIONMENT OF ELECTION DISTRICTS
ADJUSTMENTS TO 1980 CENSUS DATA
November 18, 1983

In September of 1981, the U.S. Bureau of the Census issued revised 1980 census counts for three census areas in the State of Alaska; Anchorage, Matanuska-Susitna, and Southeast Fairbanks. A detailed listing of these revised counts by census tract, blocks, and enumeration districts was compiled in November, 1981. The November listing also included a correction in the Prince of Wales census sub-area that did not change the population for the sub-area, but reallocated the population previously reported to the correct enumeration district.

Three additional corrections to the 1980 census data for Alaska were issued in June of 1982; in Saxman, Selawik, and Barrow. These corrections represented a reallocation of population within the specific census area and did not change the population in those census areas.

The 1981 corrections to the 1980 census counts for Alaska are as follows:

Anchorage Census Area	
Tract 0002 - Eagle River	+1,414
Matanuska-Susitna Census Area	
ED 1168 Wasilla Area	+50
Southeast Fairbanks Census Area	
ED 0833	-94

The 1980 population for the State of Alaska utilized by the 1981 Reapportionment Board was 367,050.29 (that number excluded 33,430.7 non-resident military and dependents from the original statewide total of 400,481).

The adjusted 1980 population for the State of Alaska, incorporating the 1981 revisions, is 368,420.29.

	367,050.29	- 1980 population
	+ 1,414	- Eagle River
	+ 50	- Matanuska-Susitna
	- 94	- Southeast Fairbanks
TOTAL	368,420.29	- Adjusted 1981 population

The ideal house district population is also adjusted from 9,176.2 to 9,210.5; the quotient of dividing the adjusted population by the 40 house seats to be apportioned.

BILL SHEFFIELD
GOVERNOR

for 1:30 meeting:
get there early &
let Willie Hensley
know you're there —
he'll get you on early.

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

November 18, 1983

~~He~~ ~~Hensley will be back~~ Shall try to get back to me today or first thing tomorrow

Terry - afternoon ~~meeting, testimony~~

Class at 3:00, so before that.

Dear Legislator:

William Hensley, Chairman of the Reapportionment Board, requested that I provide all incumbent legislators with the various proposed plans adopted by the 1983 Reapportionment Board. As you know, the Alaska Supreme Court ruled that the 1981 Plan improperly included the Cordova area within House District 2. With the advise of the Reapportionment Board, Governor Sheffield must therefore formulate amendments to the 1981 Plan which relocates the Cordova area and which satisfies the constitutional guarantee of equal representation.

The Reapportionment Board recently concluded a series of meetings in Juneau, during which the Board drafted two proposed plans for amending the 1981 Plan. Included in the packet is a news release which fully explains the proposed changes. The Board has not as yet had an opportunity to address whether changes in either Senate districts or Senate terms is advisable.

The news release also describes the public hearings scheduled by the Board. You are, of course, invited to attend any of the scheduled public hearings. If you would like to offer comments to the Board, but are unable to attend a scheduled public hearing, you may submit written testimony. All written testimony should be mailed by December 5, 1983, to:

Reapportionment Board
Pouch A
Juneau, AK 99811

If you need any additional information please feel free to contact the Reapportionment staff at 465-3538.

Sincerely,

Dana LaTour

NEWS RELEASE

REAPPORTIONMENT BOARD PROPOSES HOUSE AND SENATE PLANS
December 9, 1983

FOR IMMEDIATE RELEASE

JUNEAU -- The Reapportionment Board will be holding a series of teleconferences and hearings concerning two proposals they have adopted for house and senate districts. The five-member Board, including Willie Hensley of Kotzebue, Mary Nordale of Fairbanks, Joe McKinnon of Anchorage, Richard Borer of Cordova, and Felix Toner of Juneau, scheduled the hearings and teleconferences to gain public comment on the proposals. Board Chairman Willie Hensley said, "We are operating under severe time constraints and realize that it would be desirable to give everyone more time. However, we are trying to meet a January 3 deadline for submission of our recommendations to Governor Sheffield." The Governor is required to issue a reapportionment proclamation by February 4.

The meeting and public hearing/teleconference schedule for the Reapportionment Board is as follows:

Wed., Dec. 14 - Anchorage	9:00 AM - 4:00 PM Board Meeting 1024 W. 6th Legislative Information Office
	6:00 PM - 9:00 PM Teleconference with the Kenai Matanuska-Susitna Borough, and Prince William Sound areas
Thurs., Dec. 15 - Anchorage	9:00 AM - 3:00 PM Board Meeting 1024 W. 6th Legislative Information Office

Thurs., Dec. 15 - Anchorage

Board Meeting
1024 W. 6th
Legislative Information Office

The Reapportionment Board was appointed in October to make revisions to the 1981 Reapportionment Plan as ordered by Superior Court Judge Milton Souter. In mid-November the Board released several redistricting options, Plan 1, and Plan 2a, 2b, and 2c for public comment. After extensive meetings and hearings during the last few weeks, the Board adopted Plan 1 and Plan 2c with some revisions.

Plan 1 - House Districts

Plan 1 utilized the same data used by the 1981 Reapportionment Board in formulating their recommendations to former Governor Hammond. The Southeast revisions include separating Metlakatla and Annette Island from District 1 and Hoonah from District 3, to replace the Cordova area in District 2. This proposal for Southeast has a total combined variance between the most over-populated and the most underpopulated district of 14.84 percent.

The Cordova area in Plan 1 is placed in a Prince William Sound district, District 6, which includes the communities of Tatitlek, Valdez, Seward, Hope, Cooper Landing, Moose Pass, Port Graham, and English Bay. House District 5, a two-member

district, remains virtually the same with the exception of Port Graham and English Bay, and with the inclusion of the Sterling area from proposed District 7.

The Nikishka area and North Kenai Peninsula that was formerly in House District 6 has been placed with South Anchorage into House District 7. This district includes the area from Klatt Road south along the New Seward Highway to Potter Creek, all remaining area south of Potter Creek in the Municipality of Anchorage, and the Nikishka area.

Modifications to District 8 in Plan 1 include extension of the southern boundary from DeArmoun Road to Potter Creek and rather than following the New Seward Highway to Tudor Road, the boundary turns east at Dowling Road to Lake Otis Parkway and then north to Tudor Road.

District 9's boundaries remain unchanged. District 10's western boundary is revised to follow Arctic Boulevard from International Airport Road to Fireweed Lane, then west to Spenard Road and north to Chester Creek. This also becomes the new eastern boundary of District 11.

Plan 1 - Senate Districts

In keeping with the Superior Court order to make as few changes as possible, the Board determined that the senate districts would remain unchanged in Plan 1.

Plan 2c - House Districts

During the course of their deliberations, the Board identified several instances where the data used for the 1981 Plan contained a reporting error. The principal error occurred in the reporting

of the census data for the Eagle River area, where 1,414 persons were inadvertantly excluded. In order to address the problem with the initial census data, Governor Sheffield asked that the Board provide him with a plan which uses the most accurate census data available. Under Plan 2c, which utilizes the adjusted census data, the ideal population per house seat is increased from 9,176.2 in Plan 1 to 9,210.5 in Plan 2c.

The proposal for revisions to House Districts 1, 2, 3, and 4 in Southeast Alaska, and House Districts 5 and 6 for the Prince William Sound and the Kenai Peninsula are the same in Plan 1 and 2c. The population variances change slightly because of the increase in the ideal population per seat.

Plan 2c has been revised from the original version released in mid-November to address some concerns expressed to the Board during the last several weeks. District 7 previously placed the Upper Hillside area with Nikishka in a single-member district. The revised Plan 2c for District 7 places the area from Furrow Creek, south along the old Seward Highway to DeArmoun Road, then south of DeArmoun Road and Huffman Road from Bainbridge Road east to Glen Alps, with Nikishka. House Districts 8 and 9 are combined into a two-member district including the Campbell Lake, Klatt Road, and the Hillside areas. With only minor modifications the remainder of 2c is the same as orginally proposed. Because of the combination of the two single-member districts in South Anchorage in the revised Plan 2c, it is necessary to renumber all the Anchorage house districts. Please refer to the map included in this release for district numbering.

Plan 2c - Senate Districts

The Board has proposed three options for senate districts under Plan 2c for the Prince William Sound and Kenai Peninsula area.

1. One proposal would be to combine House District 5, a two-member house district, with single-member House Districts 6 and 7 into a two-member senate district.
2. The second proposal would have House District 5 become a single-member senate district, and combine House Districts 6 and 7 into a single-member senate district.
3. Because of testimony received by the Board concerning composition of a senate district that would include the Matanuska-Susitna Borough, the Prince William Sound, and part of the Kenai Peninsula, the third proposal would combine House Districts 6 and 7 with House District 16, a two-member house district for the Matanuska-Susitna area, into a two-member senate district. House District 5 would be a single-member district.

Three proposals were also developed for senate district combinations in the Anchorage area under Plan 2c.

1. The first proposal would be to create single-member senate districts in House Districts 8 - 15, which are all two-member house districts.
2. The second proposal would combine House Districts 8 and 10, House Districts 9 and 11, House Districts 12

Used 33 1/3% changes in 1981 - Board

To change as few old people as district

All are w/in 20% of same people in old Senate District

and 13, and House Districts 14 and 15, into two-member senate districts.

3. Finally, the third proposal would combine House Districts 8 and 9, House Districts 10 and 11, House Districts 12 and 13, and House Districts 14 and 15 into two-member senate districts.

The Reapportionment Board is very interested in receiving public comment on these proposals and would like to encourage anyone concerned with this process to participate in the teleconferences and meetings scheduled for December 14 through 16.

Attached to the press release is a statistical summary for house districts in Plan 1 and Plan 2c. Maps of the revised districts are also included as well as a map of the 1981 election districts in Anchorage.

Copies of this material may be obtained by contacting the Reapportionment Office in Juneau at 465-3538, the Regional Governor's Offices, and Legislative Information Offices.

NEWS RELEASE

REAPPORTIONMENT BOARD ADOPTS HOUSE AND SENATE PLANS
December 19, 1983

FOR IMMEDIATE RELEASE

JUNEAU -- In order to make court-mandated revisions to the 1981 Reapportionment Plan, the newly appointed Reapportionment Board has tentatively adopted two redistricting plans for submission to the Governor. The Board, appointed by Governor Sheffield in October, is charged with presenting recommendations to him which shift the Cordova area from House District 2 in Southeast Alaska to a Southcentral district.

PLAN 1 - House Districts

Plan 1 utilizes the same data used by the 1981 Reapportionment Board in formulating their recommendations to former Governor Hammond. The Southeast revisions include separating Metlakatla and Annette Island from District 1 and Hoonah from District 3, to replace the Cordova area in District 2.

The Cordova area in Plan 1 is placed in a Prince William Sound district, District 6, which includes the communities of Tatitlek, Valdez, Seward, Hope, Cooper Landing and Moose Pass; Port Graham and English Bay are shifted back into House District 5, a two-member district that remains virtually the same with the exception of the inclusion of the Sterling area from proposed District 7.

The Nikishka area, formerly in House District 6, has been placed with South Anchorage into House District 7. This district includes the area from Klatt Road south along the New Seward Highway to Potter Creek, and all remaining area south of Potter Creek in the Municipality of Anchorage with the Nikishka area.

Modifications to District 8 in Plan 1 include extension of the southern boundary from DeArmoun Road to Potter Creek, and rather than following the New Seward Highway to Tudor Road, the boundary turns east at Dowling Road to Lake Otis Parkway and then north to Tudor Road.

District 9's boundaries remain unchanged. District 10's western boundary is revised to follow Arctic Boulevard from International Airport Road to Fireweed Lane, then west to Spenard Road and north to Chester Creek. This also becomes the new eastern boundary of District 11.

The remaining districts in Plan 1 are the same with the exception of a minor boundary change between House Districts 12 and 13 to shift a small trailer court into District 13. This change was made as a result of testimony received by the Board.

PLAN 1 - Senate Districts

In keeping with the Superior Court order to make as few changes as possible, the Board determined that the senate districts would remain unchanged in Plan 1.

PLAN 2 - House Districts

During the course of their deliberations, the Board identified several instances where the data used for the 1981 Plan contained

a reporting error. The principal error occurred in the reporting of the census data for the Eagle River area, where 1,414 persons were indavertantly excluded. In order to address the problem with the initial census data, Governor Sheffield asked that the Board provide him with a plan which uses the most accurate census data available. Under Plan 2, which utilizes the adjusted census data, the ideal population per house seat is increased from 9,176.2 in Plan 1 to 9,210.5 in Plan 2.

The proposal for revisions to House Districts 1, 2, 3, and 4 in Southeast Alaska, and House Districts 5 and 6 for the Prince William Sound and the Kenai Peninsula are the same in Plan 1 and Plan 2. The population variances change slightly because of the increase in the ideal population per seat.

Anchorage House District 7 in Plan 2 has been revised to address some concerns expressed to the Board during the past week. District 7 previously placed the Upper Hillside area with Nikishka in a single-member district. The revised District 7 places the area south of Klatt Road to the New Seward Highway, south along the New Seward Highway to Huffman Road, west along Huffman Road to the Old Seward Highway then south along the Old Seward Highway to DeArmound Road and east along DeArmoun Road to Rabbit Creek, with Nikishka. House District 8 is a two-member district including the Campbell Lake and Hillside areas. With only minor modifications the remainder of Plan 2 is the same as originally proposed.

PLAN 2 - Senate Districts

The Board has recommended that House District 5, a two-member district on the Kenai Peninsula, become a single-member

senate district. House Districts 6 and 7 will also become a single-member senate district. In an effort to make as few changes as possible the Board decided to retain the two-member senate districts in Anchorage as utilized in the 1981 Plan. House Districts 8 and 10 will be combined into a two-member senate district as will House Districts 9 and 11, House Districts 12 and 13, and House Districts 14 and 15.

The Board's staff will be completing a legal analysis of these proposals and other alternatives in preparation of submitting their recommendations to Governor Sheffield by mid-January. The Governor has given the Board an extension from January 3 to January 16 to present their recommendations to him.

Attached to this release is a statistical summary for House Districts in Plan 1 and Plan 2. Maps of the revised districts are also included as well as a map of the 1981 election districts in Anchorage.

Copies of this material may be obtained by contacting the Reapportionment Office in Juneau at 465-3538, the Regional Governor's Offices, and Legislative Information Offices.

Mr. Willie Hensley
c/o Reapportionment Board
Pouch A
Juneau, AK 99811

Attention: Karen Rehfeld

Dear Mr. Hensley:

A copy of the Board's most recent reapportionment plan (Dec.19) was most appreciated and I take this opportunity to express my concerns.

Because of past actions of the 1981 Reapportionment Board, Judge Souter's very restrictive directions, Governor Sheffield's concerns that all persons be counted, outdated constitution wording and fast growing, population, your Board faces an impossible task and is severely hampered in doing a responsible and constitutionally sound job of reapportionment. The previous Board's action seriously discriminated against the majority of Alaska's true population. All plans thus far proposed by your Board only exasperate the problem of meeting the superior requirement of one person equals one vote.

In order to save excessive court costs in the immediate future, I believe it imperative that the Board request Gov. Sheffield to ask Judge Souter and/or the Alaska Supreme Court to lift the current restrictions imposed and allow a statewide reapportionment that will properly use Federal census figures of 1980 (if we must be limited to this) and insure equal and fair representation for all Alaskans.

Admittedly this may delay reapportionment taking place until after the 1984 election but in the long run, without broader direction for the Board and considering the court's previous recommended changes in Alaska's constitution, all your current efforts seem futile.

Please also consider the following points of views on the past and present reapportionment plans.

Yours very truly,

Terry Martin

Rep. Terry Martin

Executive Director
Gov. Wm. Sheffield
Speaker of House
Senate President
Media
Attorney General's Office

In the wake of the Carpenter v. Hammond decision it seems that the current Board has strayed from the controlling consideration in reapportionment - one man, one vote. The 1980 Board strove to keep combined variances between any two districts below ten per cent. This ten per cent total population variance (from highest to lowest) seems to be the rule of thumb. In Carpenter v. Hammond, Judge Moore required the adjustment of district boundaries in Southwest Alaska to reduce the combined population variance between Districts 25 and 26 (11.5%).

The current Board appointed by Governor Sheffield, seems to weigh the socio-economic guideline (brought out in the Carpenter Case) equal to if not more important than equally populated districts. In the original reapportionment plan (June 10, 1981) there was only one variance between districts greater than ten per cent and Judge Moore required adjustment of those districts. In the plan adopted by the current Board on Dec. 19, 1983 (Plan 2) there are 28 cases where combined variances between districts exceed ten per cent. (TABLE X) Granted, there may be uncontrollable factors involved, but to leap from 1 to 28 seems excessive.

In examining past Supreme Court decisions the basis for apportionment is clearly stated. The opinion of the U.S. Supreme Court in Wesberry v. Sanders 376 U.S. 1 at 180 was: "While it may not be possible to draw congressional districts with mathematical precision, that is no excuse for ignoring our Constitution's plain objective of making equal representation for equal numbers of people the fundamental goal for the House of Representatives." And although the previous quote refers specifically to Federal Representatives, the same applies to state legislatures as noted in the opinion of the Alaska Supreme Court in Egan v. Hammond, Alaska 502P2d 856 at 875: "Under the Equal Protection & Supremacy Clause of the Constitution of the United States of America, the constitutional right to vote of every citizen of Alaska is protected against impermissible dilutions and impairments flowring from malapportionment of either the House of Representatives or the Senate."

Some would argue that the Alaska State Constitution provides guidelines other than population alone to be used for reapportionment. While contiguity, compactness, and socio-economic integration can be considered, they are not to be the controlling factors. This point is in the U.S. Supreme Courts opinion in Reynolds v. Sims 377 U.S. 533 at 579-580: "But neither history alone, nor economic or other sorts of group interests, are permissible factors in attempting to justify disparities from population - based representation." In the same opinion on page 581 the Justices noted, "But if, even as a result of a clearly rational state policy of according some legislative representation to political subdivisions, population is submerged as the controlling consideration in the apportionment of seats in the particular legislative body, then the right of all the State's citizens to cast an effective and adequately weighted vote would be unconstitutionally impaired."

In utilizing the variance concept to achieve equitable representation, there must be an underlying assumption of randomness in those variances. If one region is biased with non-random variations then the cumulative effect of those variations can be substantial. Southeast Alaska is a good example of these non-random variances and their effect. With 5 of 6 S.E. districts having significant negative variations, the average negative variation for all 6 seats is 5.5%.

While statistics are useful aids for comparison, they can also be quite misleading. In Reapportionment Plan 2 (Dec 19,1983) the average population variance in Southeast from the ideal House seat size is -3.5%. The variance for the 17 Anchorage seats from the ideal is +1.8%. (TABLE I)

Neither variance sounds excessive, but when actual numbers from Southeast and Anchorage are compared, the problem becomes apparent. The total population for six Southeast House seats is 53308 or 8885 per seat. Likewise, Anchorage's population is 159,466 for 17 seats or 9380 per seat. Direct comparison shows a difference of 495 people per average seat size. (TABLE I)

While individual variances may seem reasonable, the cumulative effect is not. Essentially, Anchorage is under represented by 495 people per seat. For 17 Anchorage seats that works out to 8415 people, which is a significant number when compared with the Southeast seat size of 8885 and the ideal seat size of 9211. Anchorage is under represented by one seat. (TABLE II)

When comparing the rest of Alaska (excluding Anchorage) with Southeast similar problems occur. There is a 271 person per seat difference between Southeast and the rest of Alaska. This works out to a cumulative inequity of 4607 people between the two regions. The total overpopulation for the whole state vs. Southeast is 8415 (Anchorage) + 4607 (Remaining Alaska) or 13022. This emphasizes that not only is most of Alaska under represented, but that Southeast Alaska is over represented when compared with the rest of the state. (TABLE III)

As noted in the order of the Alaska Supreme Court in Egan vs. Hammond, Alaska, 502P2d 856 at 875: "Under the Equal Protection and Supremacy Clause of the Constitution of the United States of America, the constitutional right to vote of every citizen of Alaska is protected against impermissible dilutions and impairments flowing from malapportionment of either the House of Representatives or the Senate."

While there have been instances where Courts have upheld reapportionment plans with variances greater than ten per cent, there are usually specific reasons for this. In Abate v. Mundt, 403 U.S. 182, the U.S. Supreme Court upheld an 11.9% total variance due to historical considerations and the fact that there were no built in bases which favored a certain area or interest. Just the opposite is true in Alaska. The variances in the reapportionment plan are strongly biased in favor of Southeast Alaska and against the Anchorage area.

In Kilgarlin v. Hill, 386 U.S. 120, the U.S. Supreme Court set a precedent in allowing a combined variance of 20.48%. They reasoned that the under populated area had a high growth rate and would soon have the population to eliminate the variance. In examining Alaska's reapportionment under this growth principle, inequities surface once again. Those areas growing fastest, which would soon justify more representation are the regions with the highest variances above the average. North Kenai - South Anchorage (+4.0%), Campbell-Hillside (+4.4%), Turnagain-Sandlake (+4.0%), Kenai-Cook Inlet (+4.2%) are all rapidly expanding, yet they all have large positive variances. It seems the Board could at least consider growth areas and rather than becoming more under represented, a region could grow into fair representation.

The major problem with all the reapportionment plans is the unequal representation afforded certain regions of the state. The 1981 Board made some mistakes which when coupled with mandates from the Carpenter v Hammond case further exacerbate the problem.

Throughout the reapportionment process the Anchorage area has been allocated more people and the Southeast region has been allocated less. This is specifically due to three things; the movement of Cordova out of Southeast, the alternative treatment of the military, and the 1980 census revisions. All of these further the inequity of representation between the two regions.

The 1981 Board received its official census data on March 12, 1981. The first Draft of the reapportionment plan, issued May 5, 1981, did not include an April Census revision which added 1414 people to Eagle River, 50 to the Mat Su Borough and subtracted 94 from the S.E. Fairbanks area. The Board still did not consider the corrections when it made revisions and issued its final plan on May 22, 1981.

Reasons for not using the updated census data are unknown. Fortunately, the current board appointed by Gov. Sheffield has utilized these corrections in at least one of its reapportionment plans (2). The reasons for still considering Plan I, which doesn't use corrected data, are unclear. The 1414 people in Eagle River need to be represented. They can't be just overlooked.

The 1981 Board utilized a plan to consider a certain proportion of military personnel as residents for reapportionment purposes. In the original reapportionment plan (June 10,1981, resident military personnel were determined at only 7 major military installations (Elmendorf, Eilson, Ft. Wainwright, Ft. Richardson, Ft. Greeley, Adak Naval Base, and the Kodiak Coast Guard Station). This resulted in 31,363.8 non-resident military personnel. Since all military were included in Alaska's population during the 1980 Federal census, these 31,363.8 were subtracted from the census figures to arrive at Alaska's resident population for reapportionment (400,481-31,353,7 = 369.117.2).

Problems arise in the application of the plan. Why did the 1981 Board only consider the seven major military installations? They didn't include approximately 2491 other military personnel throughout the state. Of the 2491 only 424 were considered residents. Therefore 2067 more people should be subtracted from the total state population to arrive at the base figure for reapportionment.

Fortunately, the current Board has considered these additional personnel in formulating both of their reapportionment plans (Plan 1 and Plan 2). The only criticism to be levied upon the current Board is their lack of public disclosure. No where do they explain this exclusion of the additional 2067 non-resident military personnel in the current plans (Plan 1 & 2). The population figures change in many districts without any explanations or indications of change.

In the Carpenter v Hammond case the Alaska Supreme Court decided that Cordova was not similar enough in socio-economic terms to be included in the Iceworm District. Their mandate was to take Cordova out of the Southeast district and move it elsewhere. This shift reduced Southeast's population base by 2241.

Also, in Carpenter v Hammond, Judge Souter,, who has jurisdiction in the case, ordered that the reapportionment be done consistent with federal and state constitutional requirements of equal representation, but with the fewest possible changes to the original plan (June 10,1981). All of these guidelines make the current Boards reapportionment job extremely difficult.

To tie in all three problem areas it must be noted again that throughout the reapportionment process, Anchorage has been gaining people and S.E. has been losing them, resulting in an unacceptable imbalance of representation.Due to the census correction, Anchorage area gained 1414 people. As a result of considering additional non-resident military, rural Alaska lost 2067 people, and specifically Southeast lost 484. Most significant of all is moving Cordova, thus reducing Southeast's population by another 2241 people. So, as a result of the reapportionment the disparity between Anchorage and Southeast has grown by 4139 people (1414 + 2241 + 484).

Since the Carpenter v. Hammond case which required removal of Cordova from the Iceworm District, the current Board seems to be picking and choosing when to apply the socio-economic test and when not to. In Plan 2 (Dec. 19,1983) Port Graham and English Bay were reincluded in District 5 because of the feeling from public testimony that their ties were with Seldovia and Homer. This move increased the variances of both Districts 5 and 6, but the Board made the move because of the economic ties and they felt it was reaching a long way from Prince William Sound just to include these two communities.

The same socio-economic and distance arguments can be made for Metlakatla in Southeast, yet no changes were made. The people of Metlakatla have strongly voiced their desire to be politically attached to Ketchikan only a few miles away and not be forced to vote for a representative that lives four or five hundred miles away. All of their ties are with Ketchikan - social, economic, transportation, communication, yet Metlakatla is included with Yakutat, Haines and Skagway who are far away and have few if any direct ties. It seems the Board is reaching as far in this Southeast District as it did with Port Graham and English Bay, yet no changes have been made.

Including Nikishki (North Kenai) in one district with South Anchorage seems as bad as the above cases. People from North Keani and South Anchorage have expressed their displeasure at being combined into one district. All of Nikishki's ties are with Kenai. Travel must be through Kenai to get to Anchorage. Nikishki belongs to the Kenai school district not Anchorage. Again, despite few ties between two areas and public opposition the Board has placed them in the same district.

Why are a few blocks from Muldoon plased in District 15 which is primarily Eagle River-Chugiak? Why is Tyonek, an area in the Kenai School District and with all its ties to Anchorage or Kenai, the only coastal village in a huge district stretching far into the Interior? It seems that the current Board lacks a consistent set of guidelines to apply during the reapportionment process.

One guideline which would improve representation would be to fashion all single member House and Senate seats. The history of Alaska since the Statehood convention of 1955-56 has shown a continuous effort to move toward single member elected House and Senate seats. Catering to this principle that insures and enhances one person one vote will readily decrease the problems of equal representation and drawing of election boundary lines.

Single member seats would guarantee that your representative would live in your District. One strong block of voters, such as Eagle River or downtown wouldn't be able to elect both representatives for the whole election area.

Single seat districts further guarantee representation for neighborhoods in large urban areas. In the future Fairview and Mountain View will always be sure of a Representative that truly lives in their area. Chugiak-Eagle River can easily support its own single Senate seat and two House seats. Under the current districts (1981) there are no Senators living in District 13. If Plan 2 (Dec. 19,1983) were adopted and the current Senators were re-elected, Districts 13 and 14 (all of east Anchorage) would lack senators living in their district.

Multi-member districts also discriminate against the political candidates in them. It costs a lot more to run a campaign focused at 18,500 people (multi-member district size) than one for 9250 people. Single member districts make it more feasible (less money) for the average person to run for office. And once in office it costs less for mailouts to smaller districts. Fewer people to represent would hopefully result in better representation. In large districts (area wise) single seats cut down the distance a representative must travel to physically meet constituents.

It must be noted again that many of the problems mentioned in this report are unsurmountable when working within the constraints given the current Board. The Boards current plans (1 and 2) which discriminate against a large number of people and many regions of the state, will no doubt face expensive and time consuming litigation. Rather than end up with a patch-work reapportionment that must be lived with until 1990, why not take the necessary time and use specific guidelines to fashion a fair and equitable state reapportionment plan.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 6, 1984

The Honorable Terry Martin
State Representative
Pouch V
Juneau, AK 99811

Dear Mr. Martin:

Thank you for your recent letter expressing your concerns with the 1981 Reapportionment Plan, the restrictions placed on this Board by the Court, and our current proposals to amend the plan. We appreciate your time in preparing the extensive background information that accompanied your letter.

First, let me say that it is unlikely that this Board would encourage Governor Sheffield to seek authority from the Court to undertake a comprehensive redistricting of the state. Although we understand and appreciate your contention that there may have been serious problems with the work of the previous board, it appears the courts have already made their decision on the validity of that plan.

Secondly, we have been subjected to criticism from those who believe we have already gone too far in making our revisions. Those criticisms center around the use by this Board of official corrections made by the U.S. Bureau of the Census to the 1980 census counts for Alaska. These corrections were not available to the 1981 Board. As you know, our state constitution requires that reapportionment utilizes federal census data. We feel that this implies use of the most accurate census data available.

Finally, we realize that some people will be unhappy with our recommendations. Reapportionment is a very difficult task and one that is surrounded by controversy. Given the history of reapportionment litigation in our state, it is

likely that this plan will face legal challenge. Please be assured that this Board has made every effort to follow the constitutional and court-mandated guidelines in developing our proposal.

Thank you again for your letter.

Sincerely,

William Hensley/ggr

REP. MARTIN SEEKS CONSTITUTIONAL AMENDMENT ON REAPPORTIONMENT PROCESS

JUNEAU - Rep. Terry Martin today introduced a House Joint Resolution which would place a constitutional amendment to alter the state's reapportionment process on the 1984 general election ballot.

Martin said the constitutional amendment is needed to "correct the potential for party politics of being the major consideration for reapportionment."

As proposed in HJR 53:

- The entire state would be reapportioned into single-member House and Senate election districts;

- Only a two percent disparity in population will be allowed statewide and no more than five percent disparity per district;

- All military personnel and their families must be counted equally throughout the state.

"This resolution calls for the necessary changes in the state constitution pertaining to equality of representation for all Alaskans," said Martin, R-Anchorage.

"A major feature of this is to correct a problem that discriminates against military residents," Martin said. "As it is now, most military residents are treated like second-class citizens."

Currently, most military residents living in the southeast and southwest portions of the state are counted as "100 percent" residents. But in Anchorage and Fairbanks, Martin said, the military residents count as only "15 percent" residents. This inequitable formula, Martin said, inflates the population statistics for the southern parts of the state while "robbing Anchorage and Fairbanks of equal representation."

"The disparity from district to district is appalling," Martin said. "Some areas, primarily Anchorage, are under represented."

Martin said his resolution would allow only a five percent disparity in population in each district "with some justification for socio-economic factors."

"But in the last reapportionment (1980) and the current reapportionment negotiations, the boards have put socio-economic factors ahead of equal representation."

Martin said he is confident the resolution would be approved by the voters, "If this does pass both houses I'll be surprised," Martin said. "It won't allow them to play as many games."

But Martin said he felt the public, if given the opportunity, would support his measure.

"It's fair, it's equal and I just hope the other members of the legislature put aside party politics and vote for something that allows the state equal representation for all residents.

"This is really getting down to the fundamentals of pure democracy," Martin concluded. "The goal is to get this on the ballot and let the people see the value of it and vote accordingly."

MEMORANDUM State of Alaska

TO: William Hensley, Chairman
Reapportionment Board

DATE: January 10, 1984

FILE NO:

TELEPHONE NO: 465-3600

FROM: Norman C. Gorsuch
Attorney General

SUBJECT: Legal review of proposed reapportionment plan

By: Jonathan B. [illegible]
Assistant Attorney General

Following the Reapportionment Board's (Board) tentative adoption on December 16, 1983 of proposed amendments to the 1981 Reapportionment Plan (Plan), the Department of Law requested an opportunity to review certain legal concerns which had been raised during the course of the Board's deliberations. Our legal review of several probable areas of concern are set forth in this memorandum. We caution, however, that the law relating to reapportionment is, in many respects, quite unsettled and that, as a consequence, our legal analysis is intended more as an indication of probable judicial analysis than as a statement of legal validity. 1/

I. Southeast Alaska

The proposed configuration of districts in Southeast Alaska retains the conceptual approach embodied in the 1981 Plan. Cordova, of course, has been removed from District 2. To retain the concept of a predominantly rural, "island chain" district, the communities of Metlakatla and Hoonah were removed from Districts 1 and 3 respectively, and relocated into District 2. In other respects, the 1981 Plan is unchanged. The comparative variation of this proposed plan is 14.8 percent, with District 4 (Juneau) the most overpopulated district, and District 1 (Ketchikan) the most underpopulated.

1/ To assist in this review, the Department of Law engaged the law firm of Sanosky, Chambers, Sachse & Guido, a firm located in Washington, D.C. with substantial expertise in the areas of reapportionment law. The views of the Sanosky firm are included within this memorandum.

To evaluate the proposed configuration, we assess the proposed Plan as opposed to Southeast Option No. 5, an alternative option considered by the Board which rejects the concept of District 2, and instead divides the region in a more horizontal fashion. Under this plan, District 1 would be a two-member district which includes Ketchikan, Metlakatla, Wrangell, and Prince of Wales. District 2 would include Petersburg, Hoonah, Gustavus, Haines, Skagway, and Yakutat. The comparative variation in this plan is 15.5 percent.

A. Population Variances

We first address whether the proposed comparative variance of 14.8 percent raises a substantial legal problem under the Equal Protection Clause of the United States and Alaska Constitutions.

In Reynolds v. Sims, 377 U.S. 533 (1964), the Supreme Court enunciated the basic test for judging the population distribution in a state legislative redistricting plan, with the Equal Protection Clause:

> [T]he Equal Protection Clause requires that a State make an honest and good faith effort to construct districts, in both houses of its legislature, as nearly of equal population as is practicable.

377 U.S. at 577. The Court recognized that "legitimate considerations incident to the effectuation of a rational state policy," 377 U.S. at 579, such as a desire to respect subdivision lines or to provide for compact districts of contiguous territory, justify some deviations from the principle of equal population. But it cautioned that the "overriding objective" of state redistricting plans "must be substantial equality of population among the districts, so that the vote of any citizen is approximately equal in weight to that of any other citizen." Id. 2/

2/ In Reynolds, the Court struck down population variance ratios of 41 to 1 in the Alabama Senate and 16 to 1 in the Alabama House. 377 U.S. at 546. On the same day Reynolds was decided, continued

In the cases subsequent to Reynolds and its companion cases, the Court refined its analysis of permissible population variances in state legislative redistricting plans. Although the Court has acknowledged that such districts are to be judged by more flexible standards than congressional districts, see e.g., Wesberry v. Sanders, 376 U.S. 1 (1964); Kirkpatrick v. Roeisler, 394 U.S. 526 (1969); Gaffney v. Cummings, 412 U.S. 735, 742 (1973), the apparent "rule" is that state legislative districts should not exceed a maximum deviation of 10 percent, and may not exceed a maximum deviation of 16.5 percent. This rule has been applied -- virtually without exception -- since the early 1970's by both the Supreme Court and the lower federal courts.

In Swann v. Adams, 385 U.S. 440 (1967), for instance, the Supreme Court disapproved of maximum variance of 25.65 percent in the Florida legislature. Similarly, it disapproved a maximum deviation of 26.48 percent in Kilgarin v. Hill, 386 U.S. 120 (1967), and deviations of 24.78 percent and 28.20 percent in Whitcomb v. Chairs, 403 U.S. 124 (1971). On the other hand, the Court permitted a maximum deviation of 7.83 percent in Gaffney v. Cummings, 412 U.S. 735 (1973), and, with justification by the state, a deviation of 11.9 percent in Abate v. Mundt, 403 U.S. 182 (1971).

In White v. Regester, 412 U.S. 755 (1973), the Court held that a maximum deviation of 9.9 percent in a state redistricting plan did not, in itself, establish a prima facie case of invidious discrimination under the Equal Protection Clause. 412 U.S. at 764. Thus, the state bore no burden to justify any deviation up to that degree. Id. The Court did recognize, however, that "larger differences between districts would not be tolerable without justification" based on the effectuation of a rational state policy. Id.

2/ continued
the Court also struck down redistricting plans with a variance ratio of 1.7 to 1 in the House and 3.6 to 1 in the Senate in Colorado, Lucas v. Colorado General Assembly, 377 U.S. 713 (1964); a variance of 32 to 1 in the Senate and 6 to 1 in the House in Maryland, Maryland Committee v. Tawes, 377 U.S. 656 (1964), a variance of 2.65 to 1 in the Senate and 4.36 to 1 in the House in Virginia, Davis v. Mann, 377 U.S. 678 (1964), and a variance of 15 to 1 in the Senate and 35 to 1 in the House in Delaware, Roman v. Sincock, 377 U.S. 695 (1964). In each instance, the Court found that such wide population disparities among legislative districts violated the Equal Protection Clause.

In a prior case, Mahan v. Howell, 410 U.S. 315 (1973), the Court permitted Virginia to accept a plan with a maximum deviation of 16.4 percent -- but only after making a strong demonstration that the deviation was justified by the state policy of respecting subdivision boundaries. 410 U.S. at 328. The Court expressly noted that the 16.4 percent deviation approved in Mahan "may well approach tolerable limits ..." 410 U.S. at 329.

The Court has adopted a three part test. Maximum deviations below 10 percent are treated by the Court as "minor deviations from mathematical equality" which are "insufficient to make out a prima facie case of invidious discrimination ... so as to require justification by the State." Gaffney v. Cummings, 412 U.S. at 745. Deviation greater than 10 percent but less than the 16.5 percent in Mahan "may be sufficiently large to require justification but nonetheless justifiable and legally sustainable." Id. Finally, deviations larger than the 16.4 percent approved in Mahan would likely exceed the tolerable limits in state redistricting plans. 3/

Virtually all court rulings from the early 1970's to the present support these distinctions. Maximum deviations below 10 percent are approved with little or no further scrutiny, and those below 16.5 percent approved if justified by a rational state policy. See, e.g., Farnum v. Burns, 561 F. Supp. 83 (D. R.I. 1983) (deviation of 2.5 percent); Bover v. Gardner, 540 F. Supp. 624 (D. N.H. 1982) (deviation of 13.74 percent); Winter v. Dockering, 373 F. Supp. 308 (D. Kansas 1974) (deviation of 11.6

3/ A 1983 case, Brown v. Thomson, _____ U.S. _____, 77 L.Ed.2d 214 (1983) appears as an exception to this rule but is, we believe, of virtually no precedential value. There, the Court approved an extraordinary maximum deviation of 89 percent in the Wyoming House of Representatives on the grounds that the state redistricting plan furthered the state policy of preserving county boundaries. 77 L.Ed.2d at 272. The Court found the population variances to be "entirely the result of the consistent and nondiscriminatory application of a legitimate state policy." Id. at 223. However, the Court explicitly addressed only the marginal deviation that resulted from the overrepresentation of a particular county. Indeed, six members of the Court, including two justices from the majority, noted the limited question at issue, and as a consequence, Brown will likely have little, if any, precedential effect.

percent); Gaines v. Herskell, 362 F. Supp. 313 (S.D. W Va. 1973) (deviation of 16.1 percent); Kelly v. Bumpers, 340 F. Supp. 468 (B.D. Ark. 1972) (deviations of 3.5 percent and 9.5 percent); Dunn v. State of Oklahoma, 343 F. Supp. 320 (W.D. Okla. 1972) (deviation of 2.2 percent); In re Senate Bill No. 220, 225 Kan. 628, 593 P.2d 1 (Kansas 1979) (deviation of 6.5 percent); In re Senate Bill 177, 318 A.2d 157 (Vt. 1974) (deviation of 16.6 percent); Franklin v. Krause, 367 N.Y.S.2d 998 (N.Y. 1975) (deviation of 8.6 percent) (county commissioners); Schneider v. Rockefeller, 31 N.Y.2d 420, 293 N.E.2d 67 (N.Y. 1972) (deviations of 1.82 percent and 3.38 percent); Davenport v. Apportionment Commission, 65 J.J. 125, 319 A.2d 718 (N.J. 1974) (deviation of 4.2 percent); In re Apportionment Law, 263 So.2d 797 (Fla. 1972) (deviations of .3 percent and 1.15 percent).

On the other hand, maximum deviations exceeding 16.5 percent are, virtually without exception, struck down as a violation of equal protection. As one federal court noted in a recent decision:

> In fact, as far as we can ascertain from independent research, it appears that no court since Mahan has upheld a legislative reapportionment scheme which includes a maximum deviation of 16.5% or more. Apparently most courts have read the Supreme Court's caveat in Mahan as implicitly setting this figure as the outermost limit allowed by the Constitution.

Travis v. King, 552 F. Supp. 554, 562 (D. Hawaii 1982). A review of the court decisions confirms the view that a 16.5 percent maximum deviation is the limit permissible, and that deviations between 10 percent and 16.5 percent will be approved only if justified by the state. See, e.g., Fanium v. Burns, 548 F. Supp. 769 (D. R.I. 1982) (disapproved deviation of 88 percent); Travis v. King, 552 F. Supp. 554 (D. Hawaii 1982) (disapproved deviations of 15.02 percent and 43.2 percent); Sanchez v. King, 550 F. Supp. 13 (D. N.M. 1982) (disapproved deviations of 94 percent and 83 percent); Cosner v. Dalton, 572 F. Supp. 350 (E.D. Va. 1981) (disapproved deviations of 26.63 percent and 72.12 percent); Mader v. Crowell, 498 F. Supp. 726 (M.D. Tenn. 1980) (disapproved deviation of 18.03 percent); Sullivan v. Crowell, 444 F. Supp. 606 (W.D. Tenn. 1978) (disapproved deviations of 21.8 percent and 35.6 percent); Chapman v. Meier, 407 F. Supp. 649 (D. N.D. 1975) (disapproved deviation of 20.17 percent); Cohen v. Maloney, 410 F. Supp. 1147 (D. Del. 1976) (disapproved deviation of 18.3 percent) (city council); Winter v. Docking, 356 F. Supp. 88 (D. Kansas 1973) (disapproved deviation of 19.41

percent); Sims v. Amos, 336 F. Supp. 924 (M.D. Ala.) aff'd 409 U.S. 942 (1972) (disapproved deviations of 28.65 percent and 24.28 percent); Stufy v. Anderson, 93 Wash.2d 546, 611 P.2d 764 (Wash. 1980) (disapproved deviation of 168.6 percent) (county commissioner); In re Senate Bill 177, 294 A.2d 657 (Ver. 1972) (deviation of 25.33 percent disapproved); Franklin v. Krause, 367 N.Y.S. 998 (N.Y. 1975) (deviation of 22 percent disapproved) (county commissioner); Scrimminger v. Sherwin, 60 N.J. 483, 291 A.2d 134 (N.J. 1972) (deviations of 28.83 percent and 26.20 percent disapproved); Opinion of the Justices, 307 A.2d 198 (Me. 1973) (deviation of 94.02 percent disapproved).

Thus, any state redistricting plan with a maximum deviation less than 10 percent will likely be found per se not to violate the Equal Protection Clause. A plan with a deviation between 10 percent and 16.5 percent may be upheld if the state meets its burden of rebutting a prima facie violation of equal protection by demonstrating both that the state made a good faith effort to minimize the population deviation and that the deviation is necessary to effectuate a legitimate state policy, such as compact, contiguous districts that preserve subdivision lines. Finally, the case law indicates that maximum deviations in excess of 16.5 percent will likely be held to violate the equal protection clause, no matter what justification is offered by the state. Accordingly, deviations in excess of 16.5 percent would raise substantial legal uncertainty and should thus be avoided.

It is our view that the projected deviation in Southeast Alaska does not violate the Equal Protection Clause. The projected variance directly results from the Board's decision to retain a two-member district within the boundaries of the City and Borough of Juneau, a district which is 4.8 percent overpopulated. Simply put, a population deviation of less than 10 percent could not be obtained unless a segment of the Juneau population was included within another southeast district. Importantly, the projected deviations under the proposed plan are less than 16.5 percent, threshhold recognized as the tolerable limit to permissible population deviations. Historically, of course, the boundaries of the Juneau area have been preserved in the redistricting process. Preservation of political subdivision boundaries has been repeatedly recognized as a legitimate state objective. E.g. Mahan v. Howell, 410 U.S. at 328. More importantly, the long-standing state policy to establish districts which are socio-economically integrated, as required under article 6, section 6 of the Alaska Constitution, may well preclude the promulgation of a reapportionment plan which severs the Juneau community. See Groh v. Egan, 526 P.2d at 879, n.65.

why split up Anchorage w/ Nikolski?

B. Voting Rights Act Considerations

Any consideration of the two identified alternative districting options in Southeast Alaska must revolve around a comparative assessment under the Voting Rights Act of 1965 (Act), as amended, 42 U.S.C. § 1973C. The inquiry as to compliance with the Act focuses on the impact on minority voting prerogatives. House District 2, as established in the 1981 Plan, contained a 27.5 percent Native population. The proposed District 2 would contain a 41.9 percent Native population, while under the alternative approach, 28.9 percent of the district would be Native.

Analysis

The Act was adopted to insure the protection of rights guaranteed by the Fifteenth Amendment and "to rid the country of racial discrimination in voting." South Carolina v. Katzenbach, 383 U.S. 301 (1966). Section 5 requires that no jurisdiction subject to "preclearance" procedures, such as Alaska, may implement any change in "any voting qualification or prerequisite to voting, or standard, practice, or procedure with respect to voting" unless such change has been approved by the United States Attorney General or the District Court for the District of Columbia. 42 U.S.C. § 1973C. The standard on review is to ensure that such change "does not have the purpose and will not have the effect of denying or abridging the right to vote on account of race or color." Id. This standard was intended to guarantee that gains in minority political participation "would not be emasculated or destroyed through new discriminatory procedures and techniques." Mississippi v. United States, 490 F. Supp. 569, 581 (D.D.C. 1979) (three-judge court).

The Supreme Court has held that section 5 applies to state legislative redistricting plans. See Georgia v. United States, 511 U.S. 526 (1973); Beer v. United States, 425 U.S. 130 (1976); Allen v. State Board of Elections, 393 U.S. 544 (1969). The burden of proof lies with the state in demonstrating the legality of its plan under section 5. Georgia v. United States, supra; South Carolina v. Katzenbach, supra.

In Beer, supra, the Supreme Court stated the test for a section 5 analysis in terms of "retrogression":

> [T]he purpose of § 5 has always been to insure that no voting-procedure changes would be made that would lead to a retrogression in the position of racial minorities with respect to their effective exercise of the electoral franchise.

425 U.S. at 141. The central issue is whether a proposed change would "dilute the effectiveness" of the vote of a racial minority as compared to the situation prior to change. City of Rome v. United States, 446 U.S. 156, 183 (1980). Minority voting strength is impermissibly diluted when a redistricting scheme would operate "to minimize or cancel out the voting strength of racial elements of the voting population." Fortsen v. Dorsey, 379 U.S. 433, 439 (1965); Burns v. Richardson, 384 U.S. 73, 88 (1965).

In applying this test, lower federal courts have held that a redistricting plan dilutes minority votes when minority population concentrations are "unnecessarily fragmented and dispensed." Mississippi v. United States, 490 F. Supp at 582. In Kirksey v. Board of Supervisors, 554 F.2d 139 (5th Cir. 1977), for instance, the Fifth Circuit held that a reapportionment plan for a unit of local government would "tend to dilute the voting strength of the minority" because it fragmented members of the minority bloc between two districts. 554 F.2d at 144. See also Robinson v. Commissioners Court, 505 F.2d 674, 679 (5th Cir. 1974).

If viewed solely as a question of the percentage of Native voters in District 2, it would appear that neither of the two alternatives reflect a dimunition in minority voting strength. While the proposed District 2 would substantially enlarge the percentage of Native residents in District 2, the state is under no affirmative obligation to maximize the percentage of Native residents in the district.

We caution, though, that the probative consideration is whether a proposed redistricting would "delete the effectiveness" of the minority vote. Were the concept of a chain of rural, island communities rejected, it is arguable that the inclusion of rural Native communities with more urbanized population centers in Southeast may, as a practical matter, dilute the effectiveness of the minority vote. 4/ And, if the alternative districting

---

4/ In preliminary research, we have not discovered any authority which directly addresses this matter.

proposal in southeast is viewed as a retrogressive plan, the fact that the alternative plan would extend, not reduce, the comparative population deviation in southeast would be material.

In sum, while we believe that either alternative would ultimately obtain Justice Department approval, we cannot unequivocally advise that the alternative approach to House District 2 would not prove violative of the Voting Rights Act. Our review of the available case law suggests that absent compelling facts to establish a dimunition in the effectiveness of minority voting prerogatives, a numerical inquiry is the traditional mode of analysis. Yet, it bears noting that while either version may well be acceptable under the Voting Rights Act, the likelihood of expeditious review and approval is undoubtedly furthered under the proposed District 2, a proposal which substantially increases the percentage of Native residents in the district.

C. Article VI, Section 6 Considerations

Article VI, section 6 provides that all districts "shall be formed of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic areas." As initially adopted at the constitutional convention, the substantive restrictions set forth in section 6 were principally intended to inhibit, if not prevent, the instances of impermissible political gerrymandering. 3 Alaska Legislative Council, Alaska Constitutional Convention 1846 (1965); see Carpenter v. Hammond, 667 P.2d 1204, ____ (Alaska 1983). The Carpenter decision illustrates, though, that the section 6 standard operates independent of any evidence of gerrymandering. Importantly, though, while the recent Carpenter ruling has spawned a broader public sensitivity to section 6 considerations, the substantive restrictions established in section 6 are subsidiary to the concern for equal population distribution, the "overriding objective" under a federal constitutional inquiry.

1. Compactness

Section 6 mandates that districts shall be compact. The compactness requirement, however, is clearly not an absolute standard which demands that any configuration less than the most compact is impermissible. The Alaska Supreme Court has unambiguously recognized the governor's authority under article

VI to select between single-member or multi-member districts. Cf. Groh v. Egan, 526 P.2d at 880; Egan v. Hammond, 501 P.2d at 873. Since a multi-member district is necessarily less compact than a single-member district, it is apparent that compactness is a relative concept.

While the alternative southeast configuration may well be more compact than the proposed configuration of District 2, I believe that either alternative satisfies the constitutional mandate. Importantly, the proposed configuration of District 2 is more compact than the district at issue in Carpenter, a district which a majority of the court did not find impermissibly noncompact. 5/

2. Socio-Economic Integration

The more difficult inquiry concerns the mandate to establish districts which "contain as nearly as practicable a relatively integrated socio-economic area." The most extensive discussion of the constitutional provision is included in Carpenter v. Hammond, 667 P.2d 1204. In Carpenter, the Alaska Supreme Court concluded that the record presented to the court did not establish the requisite degree of social and economic interaction between Cordova and the communities in District 2 to support the inclusion of Cordova within the district.

The Carpenter decision, however, raises far more questions with respect to the parameters of the relative socio-economic intergration standard than it provides answers. Several general comments are warranted. First, Carpenter clearly rejects the assertion that socio-economic homogeneity is itself sufficient to satisfy the constitutional prerequisite. 667 P.2d at _____. Second, the preferred interpretation of Carpenter is that at least a majority of the court apparently rejects the interpretation that section 6 demands that proposed districts are permissible only if socio-economic integration is maximized. The court noted that the state conceded that Cordova was more integrated with other Prince William Sound communities than with the communities in District 2. Notwithstanding the concession, the court recognized that the question was "extremely close," and concluded that "the record is simply devoid of evidence of

---

5/ Justice Mathews concluded otherwise in a concurring opinion.

significant social and economic integration...." Id. at _____. Implicitly, then, evidence of "significant" socio-economic integration would be sufficient to meet the requirements of section 6. Unfortunately, the court did not articulate what quantum of social and economic integration is sufficient, nor did the court address the relationship between the socio-economic integration standard and other applicable constitutional standards.

Under the proposed configuration of District 2, the inclusion of Metlakatla within the district poses the most substantial integration question. Historically, Metlakatla has been united with Ketchikan for purposes of legislative apportionment, an area with which they share an obvious economic and social linkage. Again, though, we do not believe that the appropriate inquiry is whether Metlakatla is more integrated with the communities in District 1 than with the communities in District 2. Indeed, the inquiry is whether a significant degree of social and economic integration exists between Metlakatla and the other communities in the proposed district. While the question is quite close and depends to a large extent on the court's ultimate explication of the rule enunciated in Carpenter, we think it certainly arguable that the inclusion of Metlakatla in District 2 is consistent with the section 6 standard. Clearly, the degree of homogeneity is stronger in this instance than in the Cordova context. And, intervisitation between the rural communities in southeast is demonstrably more extensive than was the case between Cordova and the other communities within District 2.

We note, though, that the alternative southeast districting proposal does not, in our preliminary assessment, appear to pose as close a question under section 6. The significant aspect of the alternative configuration is the communities of Wrangell and Petersburg would not be included within the same district. That the two communities share an obvious and historic linkage does not necessarily preclude the existence of sufficient ties to communities in Districts 1 and 2 respectively to support a districting proposal which places the communities in different legislative districts.

JBR:cyb

State of Alaska because of its differing climates, topography, ethnic composition, socio-economic interests and distribution of its relatively sparce population. However, under the mandate of various decisions of the United States Supreme Court, we make the following determinations and order:

1. The reapportionment plan proposed by the Governor of Alaska in his Proclamation of Reapportionment and Redistricting of December 30, 1971, is unconstitutional in that its overall reapportionment of the Senate and House of Representatives results in proposed election districts that do not contain as nearly equal population proportions as is practicable. Reynolds v. Sims, 377 U.S. 533, 84 S.Ct. 1362, 12 L.Ed.2d 506 (1964); Wade v. Nolan, 414 P.2d 689 (Alaska 1966). Under the Equal Protection and Supremacy Clause of the Constitution of the United States of America, the constitutional right to vote of every citizen of Alaska is protected against impermissible dilutions and impairments flowing from malapportionment of either the House of Representatives or the Senate. In order to effectuate this constitutionally protected right to vote, we are obliged to declare the reapportionment plan of December 30, 1971, invalid under the Equal Protection Clause of the Fourteenth Amendment to the United States Constitution.

2. To insure compliance with the Equal Protection Clause in regard to the forthcoming 1972 primary and general elections for the State Legislature this court must formulate an interim reapportionment and redistricting plan. Scott v. Germano, 381 U.S. 407, 85 S.Ct. 1525, 14 L.Ed.2d 477 (1965); Maryland Comm. for Fair Representation v. Tawes, 377 U.S. 656, 673–676, 84 S.Ct. 1429, 12 L.Ed.2d 595, 607 (1964). The Lieutenant Governor is to conduct the 1972 primary and general elections for the State Legislature pursuant to the interim reapportionment and redistricting plan which this court will adopt.

3. In order to fashion an interim plan this court will appoint one or more masters to assist it.

4. Upon receipt of the report of the master or masters, this court will consider the manner in which the House and Senate districts shall be reapportioned. This court will then proceed to adopt an interim plan of reapportionment which, as nearly as practicable, considering the allotted time, reflects the standards which have been made binding upon the states by the United States Supreme Court. Ely v. Klahr, 403 U.S. 108, 91 S.Ct. 1803, 29 L.Ed.2d 352 (1971); Reynolds v. Sims, 377 U.S. 533, 586, 84 S.Ct. 1362, 12 L.Ed.2d 506, 541 (1964).

5. In the event this court determines that the exigencies of the situation preclude the fashioning of an interim constitutional reapportionment plan by June 15, 1972, this court will enter a further order specifying the plan under which the Lieutenant Governor shall conduct the 1972 primary and general elections for the State Legislature, together with the dates that such elections will be held. Connor v. Johnson, 402 U.S. 690, 91 S.Ct. 1760, 29 L.Ed.2d 268 (1971).

6. A full opinion discussing and determining the issues which were raised in the petition and cross-petition will be filed in due course.

Dated at Juneau, Alaska, this 26th day of May, 1972.

n: USGPO, 1970),

ORDER ESTABLISHING AN INTERIM REAPPORTIONMENT PLAN FOR 1972 LEGISLATIVE ELECTIONS

This Court declared the Reapportionment and Redistricting Proclamation dated December 30, 1971, unconstitutional by its Decision and Order entered May 26, 1972. Pursuant to that Decision and Order, the Court appointed Dr. George W Rogers and William H. Scott Masters to assist it in fashioning an interim reapportionment plan for the 1972 Alaska Legislative Elections.[1]

The Court, on May 26, 1972 gave the Masters the following written instructions:

1. By use of the official census of 1970, you should establish a population base for the State of Alaska. This population base should include military personnel who were enumerated in the 1970 Census.

2. You should make an inquiry to determine whether or not the number of nonresident military personnel included in the 1970 Census can be determined. If a determination can be made, then you should subtract the number from the total which you have arrived at in paragraph 1 above. You should also state the methods in detail by which you arrived at this determination.

3. Once you have determined the population base, you should divide the same by 40. This will give you the ideal number of persons to be included in a single member House district. You should then divide the population base by 20 which will represent the ideal population for a single member Senate district.

4. You should then establish House and Senate election districts containing a number of persons as close to the formula as feasible.

5. In establishing House and Senate districts, an effort should be made to make the districts correspond, where feasible, with the approximate boundaries set out in the 1971 reapportionment plan. No designated seats will be established within a multi-member district if multi-member districts are established. In establishing House and Senate districts you should, wherever feasible, create a district of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic area.

6. If there are any substantial deviations from the population norms, express, specific reasons should be set forth.

The Masters submitted a report on June 12, 1972. Thereafter, the Masters met with the Court on June 13, 1972, at which time the report was amended to reflect determinations made by the Court concerning the reapportionment plan.

The Court, now being fully advised in the premises, hereby makes and orders the following interim reapportionment plan for the 1972 legislative elections:

(1) By use of the Official Census of 1970, the Court determines that the total population base for the State of Alaska shall be 302,361. This figure includes the military population residing in the State of Alaska at the time of the Official Census of April, 1970. In the time available to the Court for the preparation of the interim plan, the Court could find no feasible method of excluding some or all of the military personnel from the total population base. Moreover, computations revealed that changes in representation under the interim plan due to the inclusion of military personnel were minimal.

1. We commend George W. Rogers, Professor of Economics at the University of Alaska, and Mr. William H. Scott, C.P.A., their legal assistant R. E. Hicks, and Mr. Richard Listowski, cartographic and statistical assistant, for the excellence of their performance in executing the Court's instructions.

litigation of reapportionment plans in Alaska, would be an issue in the inevitable legal challenge to the amended Plan.

With the foregoing considerations in mind, the Proposed Order articulates three broad areas which may necessitate amendment to the Reapportionment Plan. First, the Carpenter decision specifically explicated the constitutional mandate that each district contain "as nearly as practicable a relatively integrated socio-economic area." Alaska Constitution, article VI, section 6. To implement the Carpenter decision, it is at least necessary to remove the Cordova area from District No. 2 and to include the area within another appropriate district. And, if the configurations of other districts must be modified to implement the Carpenter decision, all "new" districts must also conform to the recently articulated standards for social and economic integration. 3/

Second, relocation of the Cordova area will, in turn, harbor substantial implications with respect to the constitutional mandate to assure relatively equal population distribution among districts. See Groh v. Egan, 526 P.2d 863 (1974); White v. Regester, 412 U.S 758 (1973); cf. Kentopp v. Municipality of Anchorage, 652 P.2d 453 (Alaska 1982). The Cordova area contains approximately 2,250 residents, a number which constitutes more than 20% of the average district population. Removal of the Cordova area from District No. 2 will thus result in a substantial relative underpopulation (overrepresentation) for House District No. 2. Conversely, relocation of the Cordova area into House District No. 6 will result in the substantial underrepresentation of that district. See Affidavit of Rehfeld. To place Cordova within a

3/ Indeed, if the socpe of the necessary amendment to the Reapportionment Plan is substantial, it is arguable that any qualified voter would have standing under article VI, section 11 to challenge the relative degree of social and economic integration of any district.

this right. In urging the people to adopt the Constitution, Madison said in No. 57 of *The Federalist:*

> "Who are to be the electors of the Federal Representatives? Not the rich more than the poor; not the learned more than the ignorant; not the haughty heirs of distinguished names, more than the humble sons of obscure and unpropitious fortune. The electors are to be the great body of the people of the United States. . . ." [47]

Readers surely could have fairly taken this to mean, "one person, one vote." Cf. *Gray* v. *Sanders*, 372 U. S. 368, 381. While it may not be possible to draw congressional districts with mathematical precision, that is no excuse for ignoring our Constitution's plain objective of making equal representation for equal numbers of people the fundamental goal for the House of Representatives. That is the high standard of justice and common sense which the Founders set for us.

Reversed and remanded.

MR. JUSTICE CLARK, concurring in part and dissenting in part.

Unfortunately I can join neither the opinion of the Court nor the dissent of my Brother HARLAN. It is true that the opening sentence of Art. I, § 2, of the Constitution provides that Representatives are to be chosen "by the People of the several States . . . ." However, in my view, Brother HARLAN has clearly demonstrated that both the historical background and language preclude a finding that Art. I, § 2, lays down the *ipse dixit* "one person, one vote" in congressional elections.

On the other hand, I agree with the majority that congressional districting is subject to judicial scrutiny. This

[47] The Federalist, No. 57 (Cooke ed. 1961), at 385.

376 U.S. v (1)

Court has so held ever since *Smiley* v. *Holm*, 285 U. S. 355 (1932), which is buttressed by two companion cases, *Koenig* v. *Flynn*, 285 U. S. 375 (1932), and *Carroll* v. *Becker*, 285 U. S. 380 (1932). A majority of the Court in *Colegrove* v. *Green* felt, upon the authority of *Smiley*, that the complaint presented a justiciable controversy not reserved exclusively to Congress. *Colegrove* v. *Green*, 328 U. S. 549, 564, and 568, n. 3 (1946). Again, in *Baker* v. *Carr*, 369 U. S. 186, 232 (1962), the opinion of the Court recognized that *Smiley* "settled the issue in favor of justiciability of questions of congressional redistricting." I therefore cannot agree with Brother HARLAN that the supervisory power granted to Congress under Art. I, § 4, is the exclusive remedy.

I would examine the Georgia congressional districts against the requirements of the Equal Protection Clause of the Fourteenth Amendment. As my Brother BLACK said in his dissent in *Colegrove* v. *Green*, *supra*, the "equal protection clause of the Fourteenth Amendment forbids . . . discrimination. It does not permit the States to pick out certain qualified citizens or groups of citizens and deny them the right to vote at all. . . . No one would deny that the equal protection clause would also prohibit a law that would expressly give certain citizens a half-vote and others a full vote. . . . Such discriminatory legislation seems to me exactly the kind that the equal protection clause was intended to prohibit." At 569.

The trial court, however, did not pass upon the merits of the case, although it does appear that it did make a finding that the Fifth District of Georgia was "grossly out of balance" with other congressional districts of the State. Instead of proceeding on the merits, the court dismissed the case for lack of equity. I believe that the court erred in so doing. In my view we should therefore vacate this judgment and remand the case for a hearing

But neither history alone, nor economic or other sorts of group interests, are permissible factors in attempting to justify disparities from population-based representation. Citizens, not history or economic interests, cast votes. Considerations of area alone provide an insufficient justification for deviations from the equal-population principle. Again, people, not land or trees or pastures, vote. Modern developments and improvements in transportation and communications make rather hollow, in the mid-1960's, most claims that deviations from population-based representation can validly be based solely on geographical considerations. Arguments for allowing such deviations in order to insure effective representation for sparsely settled areas and to prevent legislative districts from becoming so large that the availability of access of citizens to their representatives is impaired are today, for the most part, unconvincing.

A consideration that appears to be of more substance in justifying some deviations from population-based representation in state legislatures is that of insuring some voice to political subdivisions, as political subdivisions. Several factors make more than insubstantial claims that a State can rationally consider according political subdivisions some independent representation in at least one body of the state legislature, as long as the basic standard of equality of population among districts is maintained. Local governmental entities are frequently charged with various responsibilities incident to the operation of state government. In many States much of the legislature's activity involves the enactment of so-called local

Ordinance of 1787, in explicitly providing for population-based representation of those living in the Northwest Territory in their territorial legislatures, clearly implied that, as early as the year of the birth of our federal system, the proper basis of legislative representation was regarded as being population.

377 U.S. 533 (1964)

legislation, directed only to the concerns of particular political subdivisions. And a State may legitimately desire to construct districts along political subdivision lines to deter the possibilities of gerrymandering. However, permitting deviations from population-based representation does not mean that each local governmental unit or political subdivision can be given separate representation, regardless of population. Carried too far, a scheme of giving at least one seat in one house to each political subdivision (for example, to each county) could easily result, in many States, in a total subversion of the equal-population principle in that legislative body.[62] This would be especially true in a State where the number of counties is large and many of them are sparsely populated, and the number of seats in the legislative body being apportioned does not significantly exceed the number of counties.[63] Such a result, we conclude, would be constitutionally impermissible. And careful judicial scrutiny must of course be given, in evaluating state apportionment schemes, to the character as well as the degree of deviations from a strict population basis. But if, even as a result of a clearly rational state policy of according some legislative representation to political subdivisions, population is submerged as the controlling consideration in the apportionment of seats in the particular legislative body, then the right of all of the State's citizens to cast an effective and adequately weighted vote would be unconstitutionally impaired.

[62] See McKay, Political Thickets and Crazy Quilts: Reapportionment and Equal Protection, 61 Mich. L. Rev. 645, 698–699 (1963).

[63] Determining the size of its legislative bodies is of course a matter within the discretion of each individual State. Nothing in this opinion should be read as indicating that there are any federal constitutional maximums or minimums on the size of state legislative bodies.

ter in a free and democratic society. Especially since the right to exercise the franchise in a free and unimpaired manner is preservative of other basic civil and political rights, any alleged infringement of the right of citizens to vote must be carefully and meticulously scrutinized. Almost a century ago, in *Yick Wo* v. *Hopkins*, 118 U. S. 356, the Court referred to "the political franchise of voting" as "a fundamental political right, because preservative of all rights." 118 U. S., at 370.

Legislators represent people, not trees or acres. Legislators are elected by voters, not farms or cities or economic interests. As long as ours is a representative form of government, and our legislatures are those instruments of government elected directly by and directly representative of the people, the right to elect legislators in a free and unimpaired fashion is a bedrock of our political system. It could hardly be gainsaid that a constitutional claim had been asserted by an allegation that certain otherwise qualified voters had been entirely prohibited from voting for members of their state legislature. And, if a State should provide that the votes of citizens in one part of the State should be given two times, or five times, or 10 times the weight of votes of citizens in another part of the State, it could hardly be contended that the right to vote of those residing in the disfavored areas had not been effectively diluted. It would appear extraordinary to suggest that a State could be constitutionally permitted to enact a law providing that certain of the State's voters could vote two, five, or 10 times for their legislative representatives, while voters living elsewhere could vote only once. And it is inconceivable that a state law to the effect that, in counting votes for legislators, the votes of citizens in one part of the State would be multiplied by two, five, or 10, while the votes of persons in another area would be counted only at face value, could be constitutionally sustainable. Of course, the effect of

state legislative districting schemes which give the same number of representatives to unequal numbers of constituents is identical.[40] Overweighting and overvaluation of the votes of those living here has the certain effect of dilution and undervaluation of the votes of those living there. The resulting discrimination against those individual voters living in disfavored areas is easily demonstrable mathematically. Their right to vote is simply not the same right to vote as that of those living in a favored part of the State. Two, five, or 10 of them must vote before the effect of their voting is equivalent to that of their favored neighbor. Weighting the votes of citizens differently, by any method or means, merely because of where they happen to reside, hardly seems justifiable. One must be ever aware that the Constitution forbids "sophisticated as well as simple-minded modes of discrimination." *Lane* v. *Wilson*, 307 U. S. 268, 275; *Gomillion* v. *Lightfoot*, 364 U. S. 339, 342. As we stated in *Wesberry* v. *Sanders*, *supra*:

> "We do not believe that the Framers of the Constitution intended to permit the same vote-diluting discrimination to be accomplished through the device of districts containing widely varied numbers of inhabitants. To say that a vote is worth

[40] As stated by Mr. Justice Black, dissenting, in *Colegrove* v. *Green*, 328 U. S. 549, 569–571:

"No one would deny that the equal protection clause would . . . prohibit a law that would expressly give certain citizens a half-vote and others a full vote. . . . [T]he constitutionally guaranteed right to vote and the right to have one's vote counted clearly imply the policy that state election systems, no matter what their form, should be designed to give approximately equal weight to each vote cast. . . . [A] state legislature cannot deny eligible voters the right to vote for Congressmen and the right to have their vote counted. It can no more destroy the effectiveness of their vote in part and no more accomplish this in the name of 'apportionment' than under any other name."

more in one district than in another would . . . run counter to our fundamental ideas of democratic government . . . ." [41]

State legislatures are, historically, the fountainhead of representative government in this country. A number of them have their roots in colonial times, and substantially antedate the creation of our Nation and our Federal Government. In fact, the first formal stirrings of American political independence are to be found, in large part, in the views and actions of several of the colonial legislative bodies. With the birth of our National Government, and the adoption and ratification of the Federal

[41] 376 U. S., at 8. See also *id.*, at 17, quoting from James Wilson, a delegate to the Constitutional Convention and later an Associate Justice of this Court, who stated:

"[A]ll elections ought to be equal. Elections are equal, when a given number of citizens, in one part of the state, choose as many representatives, as are chosen by the same number of citizens, in any other part of the state. In this manner, the proportion of the representatives and of the constituents will remain invariably the same." 2 The Works of James Wilson (Andrews ed. 1896) 15.

And, as stated by MR. JUSTICE DOUGLAS, dissenting, in *MacDougall v. Green*, 335 U. S., at 288, 290:

"[A] regulation . . . [which] discriminates against the residents of the populous counties of the state in favor of rural sections . . . lacks the equality to which the exercise of political rights is entitled under the Fourteenth Amendment.

"Free and honest elections are the very foundation of our republican form of government. . . . Discrimination against any group or class of citizens in the exercise of these constitutionally protected rights of citizenship deprives the electoral process of integrity. . . .

"None would deny that a state law giving some citizens twice the vote of other citizens in either the primary or general election would lack that equality which the Fourteenth Amendment guarantees. . . . The theme of the Constitution is equality among citizens in the exercise of their political rights. The notion that one group can be granted greater voting strength than another is hostile to our standards for popular representative government."

Constitution, state legislatures retained a most important place in our Nation's governmental structure. But representative government is in essence self-government through the medium of elected representatives of the people, and each and every citizen has an inalienable right to full and effective participation in the political processes of his State's legislative bodies. Most citizens can achieve this participation only as qualified voters through the election of legislators to represent them. Full and effective participation by all citizens in state government requires, therefore, that each citizen have an equally effective voice in the election of members of his state legislature. Modern and viable state government needs, and the Constitution demands, no less.

Logically, in a society ostensibly grounded on representative government, it would seem reasonable that a majority of the people of a State could elect a majority of that State's legislators. To conclude differently, and to sanction minority control of state legislative bodies, would appear to deny majority rights in a way that far surpasses any possible denial of minority rights that might otherwise be thought to result. Since legislatures are responsible for enacting laws by which all citizens are to be governed, they should be bodies which are collectively responsive to the popular will. And the concept of equal protection has been traditionally viewed as requiring the uniform treatment of persons standing in the same relation to the governmental action questioned or challenged. With respect to the allocation of legislative representation, all voters, as citizens of a State, stand in the same relation regardless of where they live. Any suggested criteria for the differentiation of citizens are insufficient to justify any discrimination, as to the weight of their votes, unless relevant to the permissible purposes of legislative apportionment. Since the achieving of fair and effective representation for all citi-

Judge Moore

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

MARILYN CARPENTER,

Plaintiff,

vs.

JAY S. HAMMOND, Governor of Alaska,

Defendant.

No. 3AN-81-5839 Civ.

NOTICE OF COMPLIANCE WITH FINAL JUDGMENT

The Governor of the State of Alaska, Jay S. Hammond, by and through his attorney, hereby gives notice of his compliance with the court's directions in its final judgment in this action dated March 26, 1982. The court required adjustment of district boundaries in Southwest Alaska to reduce the combined population variation between Districts 25 and 26 (11.5%).

The court suggested but did not require the transfer of Platinum and Goodnews Bay from District 25 to District 26. Such a transfer would be inadvisable since those two communities are socially and economically tied to the Bethel region and are geographically isolated from the District 26 communities by coastal mountains; the only transportation ties with Platinum and Goodnews Bay are via Bethel. These problems were expressly addressed by the Reapportionment Board. See Plaintiff's Exhibit 2, p. 16. In addition, the two communities are in the Calista Corporation region whereas their placement in District 26 would situate them in a district comprised of the Bristol Bay Native Corporation and Aleut Corporation regions. See Plaintiff's Exhibit 13.

Instead, the Governor will accomplish the required adjustment by means of the movement of Tuluksak from District 25 to District 24 and the movement of the Lake Iliamna/Lake Clark region (Igiugig, Iliamna, Kokhanok, Newhalen, Nondalton, Pedro Bay) from District 24 into District 26. The Lake Iliamna/Lake Clark region was originally included in District 24 to avoid the excessive overpopulation that would be caused in District 26.

ATTORNEY GENERAL, STATE OF ALASKA
STATE CAPITOL
PLACH N JUNEAU ALASKA 99811
PHONE 465 3600

Socially and economically, however, the communities are tied to Bristol Bay, sharing the same fish stocks, communication links and transportation networks. The residents of the region were the most vociferous of all in their objection to their placement in District 24; there were numerous phone calls, letters, telegrams and petitions demanding their inclusion in District 26 rather than District 24.

The adjustment will be accomplished as follows:

A. The population of District 25 will be reduced by placing Tuluksak in District 24. The relevant enumeration districts (ED) and populations are ED 0292 (Tuluksak, pop. 236) and ED 0344 (Tuluksak area, pop. 0). The population of District 25 will become 9,448 with a variance of +2.96%.

B. The population of District 24 will be changed by the inclusion of Tuluksak (236) and the movement of the Lake Iliamna/Lake Clark region into District 26. The relevant enumeration districts in the Lake Iliamna/Lake Clark region are EDs 0475, 0476, 0478, 0479, 0480, 0481, 0482, 0515, 0516B, 0522A, 0522B, 0522C and 0523; they have a total population of 530. The population of District 24 will become 8,920 with a variance of -2.79%.

C. The population of District 26 will be increased, by the inclusion of the Lake Iliamna/Lake Clark region, by 530. The population will become 9,157.61 with a variance of -.2%.

With this adjustment, the maximum combined variance for the state will be as follows:

District 4 (Juneau)	+ 5.34%
District 16 (Matanuska-Susitna)	- 3.87%
	9.21%

This notice has been reviewed by all the members of the Reapportionment Board. The board members expressed their unani-

STATE CAPITOL
POUCH K, JUNEAU, ALASKA 99811
PHONE 465-3600

3. In addition, by use of address lists provided by the military branches, Dr. Kruse was able to determine, with precision, how many non-resident servicemembers and dependents live in each off-base enumeration district. The following numbers of non-resident servicemembers and dependents were deducted from off-base enumeration district populations in the listed areas:

Anchorage	4,678.5
Fairbanks	382.1
Matanuska-Susitna	41.4
Delta Junction	229.9

See Exhibit 2, Table II.

E. Military Bases Treated by the Governor

1. The Governor deducted from the reapportionment population base those numbers of non-resident military personnel and dependents who resided at or near the seven largest military installations in Alaska: Elmendorf Air Force Base, Ft. Richardson, Eielson Air Force Base, Ft. Wainwright, Ft. Greeley, Kodiak Coast Guard Station and Adak Naval Station.

2. There were approximately 2,067 non-resident military personnel at smaller installations on the Aleutians, in Bristol Bay, in interior Alaska and in Southeast Alaska. The largest numbers of non-residents were at Shemya and King Salmon in District 26 (851), Galena in District 24 (259), Juneau (195), Sitka (137), Ketchikan (133) and Clear in District 17 (100).

3. Had all these numbers of non-resident military, and those at other locations not listed in the preceeding paragraph, been deducted from the population base, that population base would have become 367,050 and the ideal district size would have become 9,176. See Appendix I, attached hereto.

4. Under this scheme, the most overpopulated district would be district 25 with 9,684 persons (+5.53%); the most underpopulated district would be district 26 with 8,628 persons

discretion cannot be disturbed unless it lacks any rational basis.

2. It was reasonable and not arbitrary to exclude identifiable non-resident military personnel and dependents from the reapportionment population base while including non-identifiable members of other groups. The rights of military personnel and dependents to due process and equal protection were not violated. Groh v. Egan at 870-871.

3. It was reasonable and not arbitrary for the Governor to forego study of military at smaller, remote installations in view of the demonstrably small impact their potential non-residency would have on the reapportionment populations of the individual districts.

4. It was reasonable and not arbitrary to exclude non-resident military dependents based upon answers to survey questions put to their parents or spouses. Such a procedure did not violate the dependents' rights to due process and equal protection.

5. The survey utilized by the Governor to determine the proportion of non-residents among military personnel and dependents was a reasonable and constitutional device which accurately identified that proportion of military personnel and dependents who neither intend to make Alaska their domicil nor register to vote in Alaska, the two key criteria identified by the Alaska Supreme Court. Groh v. Egan at 873, text and n. 36.

6. Since military personnel and dependents are in Alaska under legal compulsion, it was reasonable and consitutional to inquire in the survey about their intent to make a home in Alaska at a time when they had the freedom to choose where they would live, i.e. at the time of retirement or discharge. See RESTATEMENT (SECOND) OF CONFLICT OF LAWS, Section 12, Illustration 3 and Comment i; Section 17, Comment d and Illustrations 1, 2, 7 and 8; Section 18, Comment b (cont.); Section 19, Illustrations 1 and 2. See also Groh v. Egan at 871-872, n. 34.

7. Alaska Constitution article VI, section 6 requires that election districts be "compact". It does not require that the districts be the most compact that could possibly be devised; considerations of population equality, socio-economic integration, geographic barriers and municipal boundaries may militate against the most compact configuration. The goal to be achieved by the compactness requirement is effective legislative representation, which occurs when persons and communities with substantially like backgrounds and interests, usually but not always in a single region, are joined in a political unit to elect the person of their choice. Effective transportation and communication systems may make a far-flung district functionally compact, especially when the residents of the district have common interests and take advantage of the transportation and communications systems to develop their policy positions and make their views known to their legislator.

8. District 2 does not violate the requirement of compactness.

9. Alaska Constitution article VI, section 6 requires that a district "contain as nearly as practicable a relatively integrated socio-economic area." The concept embodies a number of interrelated components, including economic base, ethnic composition, governmental boundaries, community size, transportation and communication links, and lifestyle. The reapportionment process requires a balancing of these components; one may be deemed predominant while another may be subordinated. As well, the socio-economic factors may be subordinated to the consideration of population equality with another district. The balance is to be struck by the Governor and will be sustained unless it lacks any rational basis. Groh v. Egan at 866.

10. Socio-economic integration does not require that regular social and economic interactions or transactions occur between the communities of a district, although such occurrences

are indicia of socio-economic integration. Integration of social or economic interests, as distinguished from integration of social or economic systems, is all that is required. Integration of interests alone has been the basis of many districts formed at and since the Alaska Constitutional Convention. See e.g., the discussion of the placement of the community of Livengood in Minutes, Alaska Constitutional Convention at 1933-1939, 1941. See, also, the comments of Delegate Hellenthal in Minutes, Alaska Constitutional Convention at 1872. Integration of interests was the basis of the North Slope - Kotzebue and Yukon River districts drawn by the Alaska Supreme Court in Egan v. Hammond, 502 P.2d 58[illegible] (Alaska 1972); there was, in those districts, no integration of social or economic systems across those vast areas.

11. The inclusion of Cordova in a district with small Inside Passage communities with identity or similarity of interests in fishing, forest management, ferry service, air service and other issues does not violate the constitutional requirement of socio-economic integration.

The Governor shall submit a form of judgment in conformity with these findings and conclusions.

DATED at Anchorage, Alaska this _____ day of March, 1982.

Daniel A. Moore, Jr.
Superior Court Judge

Judge Souter

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT

FILED in the Trial Courts
State of Alaska, Third District
OCT 12 1983
CLERK OF TRIAL COURTS
By: Deputy Clerk

MARILYN CARPENTER,

Plaintiff,

vs.

JAY S. HAMMOND,

Defendant.

Case No. 3AN-81-5839 CI

ORDER

Having reviewed the opinion of the Alaska Supreme Court in this case, together with the applicable constitutional provisions and the arguments presented by the parties:

IT IS HEREBY ORDERED that:

1. This case is remanded to the Governor of the State of Alaska, who, after being advised by the Reapportionment Board, shall issue, no later than February 3, 1984, a revised final Proclamation of Reapportionment in conformity with the opinion of the Alaska Supreme Court which was issued in this case on July 22, 1983.

2. The revised final Proclamation of Reapportionment shall, in a manner consistent with the federal and state constitutional requirements of equal representation, but with the fewest possible changes in the final Reapportionment Plan as approved by the Alaska Supreme Court in this case, cause Cordova to be placed in a contiguous, compact and relatively integrated socio-economic election district and cause House District 2 to be transformed into such an election district.

3. The revised final Proclamation of Reapportionment shall utilize the "indefinite intention" test in determining the residency of military members in any election

districts whose boundaries must be changed in order to accomplish the necessary changes regarding Cordova and District 2, and it shall not utilize any amendments to the most recent federal decennial census which were issued after the initial final decision which was entered by the Superior Court in this case on March 16, 198[illegible]

4. The Reapportionment Board shall meet as soon as practicable, hold such public hearings as it deems appropriate and present the Governor with a proposed amended final Proclamation of Reapportionment no later than January 3, 1984, unless otherwise ordered by the Governor. The Reapportionment Board which provided the recommendations which formed the basis for Governor Hammond's Proclamation of Reapportionment on July 24, 1981 remains in existence and may be used by Governor Sheffield. However, Governor Sheffield may, in his discretion, appoint a new Reapportionment Board to serve in the place and stead of the existing one.

5. This court shall retain continuing jurisdiction in this case for the purpose of resolving such disputes as might hereafter be properly submitted to it regarding the reapportionment proceedings at issue, it being this court's intention not to entertain any but the most extraordinary of motions in this case until the revised final Proclamation of Reapportionment has been issued.

ENTERED this 12th day of October, 1983.

Booming economy makes Alaska the fastest-growing state

By RONNIE CHAPPELL
Daily News correspondent

The largest influx of people in Alaska history pushed the state's population past 500,000 in 1983 and confirmed Alaska as the fastest growing state in the nation.

The Alaska Department of Labor, last year estimated the state's population at 460,037. This year, the five largest cities and boroughs in the state have reported combined population increases of 49,799 — which alone would push Alaska over the 500,000 mark. The state will not release an official estimate until February.

"If growth continues at the same rate (as in 1982) we're going to be over 500,000 in 1983," said Jo Van Patten, an economist in the state Department of Labor.

The population boom between the 1980-to-1983 period exceeds the leaps of the Gold Rush, World War II and the pipeline era.

"In sheer numbers this would be the greatest influx," said John Whitehead, associate professor of history at the University of Alaska, Fairbanks. "In the past it has taken at least a decade to add 100,000 people to the state's population.

Based on figures provided by the Alaska Department of Labor and local governments throughout the state, The Daily News estimates the state's population at 505,000, an increase of more than 100,000 since the 1980 U.S. Census.

The Department of Labor does not base its population estimates solely on figures supplied by Alaska communities. The figures are suspect because communities receive state revenue-sharing money on the basis of population. They have an incentive to report the highest possible populations, Van Patten said.

For that reason, Van Patten checks the figures against a formula based on elementary school enrollments, housing starts, births and deaths.

In addition to its burgeoning population, the Alaska economy has expanded by more than 40,000 jobs since 1980.

Those new jobs are the byproduct of subsidized home loans, permanent fund dividends, an increasing state payroll and massive government con-

See Page A-8, GROWTH

Growth

Continued from Page A-1

struction budgets, according to a new report by the labor department.

Experts agree that $14 billion in state spending — about 1½ times the amount spent on the trans-Alaska pipeline — is the underlying cause of the boom.

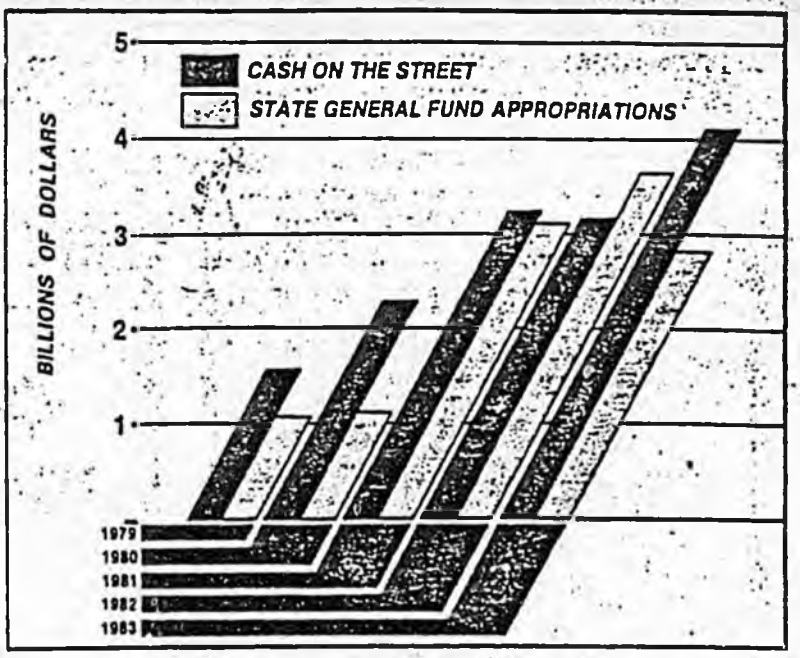
Despite recent population gains, Alaska remains the smallest state, trailing Vermont, which had 518,000 people in July 1982.

But Alaska, with a population increase of more than 10 percent between 1980 and 1982, is the fastest growing. In the same period, Vermont's population grew 1.3 percent.

If the Alaska economy continues its present pace for one more year, Vermont could be the smallest state in the nation by the end of 1984.

In Alaska, the Matanuska-Susitna Borough is the fastest growing area in the nation's fastest-growing state. Its population is up 71 percent since 1980, from 17,816 to 30,568.

During the same period, Anchorage added 56,415 people, an increase of 32 percent, for a total of 230,846.



The population of the Kenai Peninsula is up 38 percent, Fairbanks is up 20 percent and Juneau is up 40 percent.

Rural Alaska is growing too, but at more moderate rates.

Rapid growth in the 1980s has not hit Alaska with the sudden, sledgehammer force of the pipeline years. Because it has come independent of a single mammoth project that focuses public attention, the growth has been felt area by area without being noted as a major statewide phenomenon.

In Anchorage, commuters are spending more time driving to and from work. School enrollment in Palmer is growing so fast that after the holidays some children will return to classes in a National Guard Armory. Vacancy signs are disappearing in Fairbanks and developers are building apartments again.

In Soldotna, the spruce trees behind Ellington's Hardware have been replaced by a McDonald's, a pizza restaurant, a Safeway and a 21-store mall.

"It was kind of scary at first," said store owner Joan Ellington. But "after doing some reading about other places this has happened, we realized it could double our business."

Still, the changes amaze Ellington.

"It makes you wonder what's down here to bring all these people," she said.

The answer to her question is simple.

Work.

One clerk at Ellington's Hardware has been in the state 16 months. She came with her husband and four children. The other clerk arrived four years ago with five other family members.

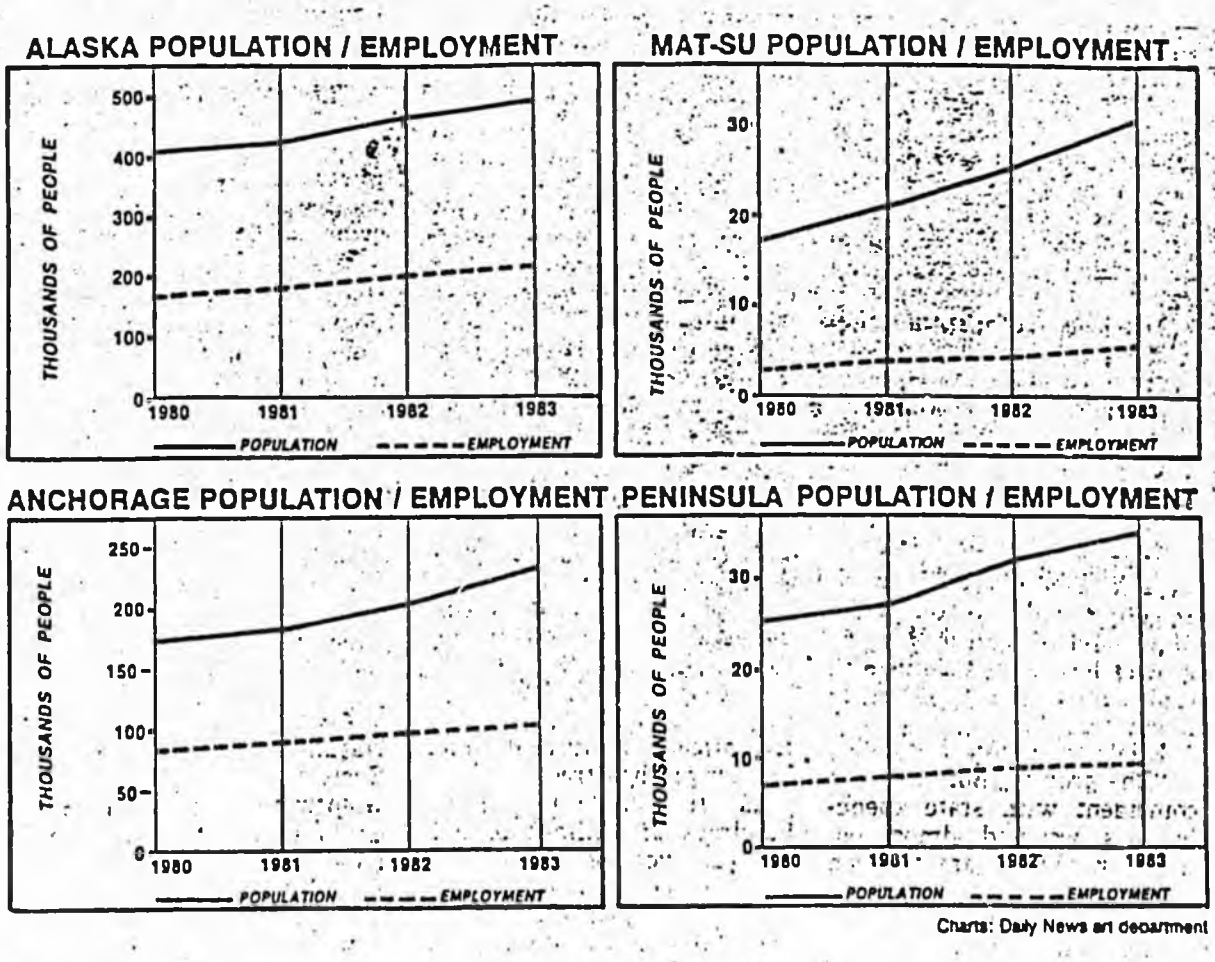
Thousands of people are coming to Alaska to escape a bitter recession that has produced bread lines and soup kitchens in other parts of the country. They are leaving old jobs to find better ones.

"Economic opportunity is the No. 1 reason they're coming," said Neal Fried, an economist for the Alaska Department of Labor. "People have heard about wages. They've heard about the pipeline. Many have relatives here who tell them to come."

For many, the move has been a good one.

"There is a lot of opportunity for people here," Fried said. "But it is not a job market with a shortage of people. Unemployment hasn't come down."

In fact, despite the addition of 40,000 jobs to the economy, the unemployment rate actually increased from 9.3 percent to 10.1 percent during the last two years. Nearly 4,000 more people are looking for work in Alaska today than in 1981.



Still, it is better to be unemployed in Alaska than in the idle factory towns of Michigan or logging communities of northern Idaho. The chances of finding work in an expanding economy are better than in a stagnant one, Fried said.

Huge numbers of new Alaskans are not finding jobs in the oil, fishing and timber industries. Instead, they are working as carpenters, roofers, electricians, store managers, clerks, waitresses, cooks, gas station attendants, lawyers, engineers, surveyors, real estate agents, reporters, teachers. Some have started new businesses.

Two thousand jobs have been created on the Kenai Peninsula despite the lack of significant growth in the oil and fishing industries.

People are working in new shopping centers, in new restaurants, gift shops, nurseries, computer stores and sporting goods outlets. Oldtimers are starting to complain that downtown Soldotna looks like Northern Lights Boulevard in Anchorage.

Residential and commercial construction reached all-time highs in 1983. Homer Electric Association added 1,500 new

Charts: Daily News art department

customers.

Sales tax revenues generated on retail sales in Kenai and Soldotna are up 40 percent over 1982.

"What's happening here is being evidenced everywhere else in Alaska," said Frank McIlhargey of the borough resource development office. "We're in the midst of a government-dollar-generated boom."

Assessing the effect of massive government spending on the economy is difficult. It was made easier in 1982 when economists Gregg Erickson and Tom Singer developed a way to track the money pumped into the economy by state government.

The result is a series of multi-billion dollar totals — based on checks actually issued by the treasury — that Erickson and Singer call Cash-on-the-Street.

Cash-on-the-Street includes loans by the Alaska Housing Finance Corp. and other state agencies, permanent fund dividends, the salaries paid state employees, operation and maintenance costs, general fund and bond financed capital projects.

the permanent fund.

In four of the last five years, Cash-on-the-Street exceeded state general fund appropriations — the figure most often referred to as a measure of state spending.

In a September 1983 report, the state Department of Labor observed that "Alaska employment is closely correlated with Cash-on-the-Street. In a statistical sense, 95 percent of the growth in employment from 1978 through the first half of 1983 is explained by growth in Cash-on-the-Street."

According to Erickson and Singer, "statistical evidence suggests that state spending now accounts for 44 percent of Alaska personal income."

Cash-on-the-Street has increased steadily from $1.5 billion in fiscal year 1979 to $4 billion in 1983. It peaked during a three-month period in the summer of 1982 when the state paid $1.3 billion to people and businesses in Alaska.

Cash-on-the-Street does not affect employment and population immediately, the economists said. There is a six-month to one-year lag, which means this year's boom is the

It is unlikely that Cash-on-the-Street will again reach the record levels of 1982, according to the Labor department report. Oil revenues have declined since 1980 and state spending is down. North Slope production will fall off sharply after 1990. One-third of the known reserves in Prudhoe Bay have already been pumped through the pipeline.

The looming question now is what happens to the state's economy when the state can no longer afford subsidized loans, permanent fund dividends and huge expenditures on capital projects.

"Nobody really knows what's going to happen," said Scott Goldsmith, an enonomist with the Institute of Economic and Social Research at the University of Alaska.

"I've got to believe some of the small new businesses are operating right at the margin now. When Cash-on-the-Street tails off, those marginal businesses are going to start hurting and go under."

But Goldsmith says he doesn't see a bust in the future.

The economic contraction

Alaska becomes nation's fastest-growing state

Continued from Page A-8

spending won't be "as immediate and dramatic as the growth has been," Goldsmith said. "Businesses will try to tough it out."

Erickson agrees.

"The growth that has been coincident with state spending has occurred almost entirely in service areas" such as retail trade, communications and transportation, Erickson said.

"There is some reason to think that won't be lost. It depends on where and how fast declines in state spending occur and it depends on how much faith people have in Alaska."

The service sector of the economy is population sensitive. If people remain in Alaska despite a decrease in their standard of living, if they are willing to make do with less disposable income, then chances are good the economy can be weaned from state spending without too much social dislocation, Erickson said.

He also pointed out that:

• Much of the recent growth was needed. Compared to similar markets in other parts of the nation, the service economy in Alaska was underdeveloped.

• Alaska's basic industrial base will not be affected by contraction of state spending. Oil field employment may actually increase as production declines.

• Even today, construction is not a big part of the state economy. Construction employment is the same today — in terms of percentage of total labor force — as it was in 1963.

• There has been no five-year period since 1950 in which the service sector didn't add more jobs to the state economy than the industrial sector.

If policy makers better understood the relationship between state spending and the economy, Erickson believes, they could mitigate the negative effects of future declines in Cash-on-the-Street.

Is it wise to spend hundreds of millions of dollars each year on new capital projects? On permanent fund dividends? On subsidized loans? Should the state spend money to keep down local property taxes? What is best for the economy? Which appropriations have the biggest effect, per dollar expended, on employment?

Without answers to questions like these, Erickson said, state leaders can't hope to soften the effects of future state spending cuts on the economy.

Right now, no one is serious trying to find the answers. "There's been no institutional support for this kind of research," Erickson said.

Big spending cuts are inevitable because oil income is rapidly declining. That fact becomes apparent when state revenue projections are adjusted for inflation.

According to Matt Berman of the Institute for Social and Economic Research, oil revenues will decline 50 percent — in terms of 1982 dollars — by the early 1990s.

Nothing on the horizon is capable of replacing the revenue now provided by oil. Even royalty income generated by the proposed Alaska Natural Gas Transportation System will not be sufficient, Goldsmith said. Offshore oil exploration is taking place on federal leases.

By the mid-1990s, interest income generated by the permanent fund will be the state's second largest revenue source. How big a revenue source it becomes depends on how much money is set aside today.

Alaska has already enjoyed five years of Prudhoe Bay production. In six to eight years, production will decline significantly.

The choices facing lawmakers now are difficult. Should they maintain the state's thriving economy over the next few years by continuing to pump huge amounts of money into the marketplace? Or should they cut state spending today to keep the cost of basic government services affordable after 1990? Is there any way to accomodate these seemingly incompatible goals?

"There are no easy answers," Goldsmith said.

Districting options unpopular

Governor's board hears views on reapportionment

By JOHN MARRS
Editor

If the rest of Southcentral and Southeastern Alaska were as easy to please as English Bay and Port Graham, the governor's special reapportionment board would have few problems.

Testimony during a teleconference conducted over the state's conference network Wednesday evening indicated no consensus in English Bay or Port Graham for or against whether the two southern peninsula villages were put in one voting district or another.

The rest of the 30 people who spoke told

See BOARD, Page 14

...Board hearing

Continued from Page 1

the board they didn't like the pending reapportionment plans.

Half of those who spoke urged the board to revive a once-proposed but abandoned plan to create one large Senate district encircling Anchorage with Nikiski, Seward, Valdez, Cordova, Whittier and the Matanuska Valley. The area — not counting Nikiski — is roughly the same as the pre-1981 Senate district represented by Sen. Jay Kerttula, D-Palmer.

The possibility of switching English Bay and Port Graham from a House District for Prince William Sound to one for the Kenai Peninsula was the only change actually mentioned as a possibility by the board.

The change is contemplated in the board's last public report, and Chairman Willie Hensley and board member Mary Nordale mentioned it Tuesday in discussions with citizens who were testifying. The change, if made when the board meets today, would move the Chitna and McCarthy areas into House District 6 (Valdez-Seward-Cordova) and put English Bay and Port Graham back in House District 5, the peninsula's main voting district.

Walter Maganik Sr., president of the Port Graham Village Council, urged the board to "leave us alone," but he also said a village vote came out 21 in favor of moving to the new Prince William Sound District to 29 in favor of staying put.

Rep. Milo Fritz, R-Anchor Point, speaking from Juneau, said he spoke earlier Tuesday with Vince Kvasnikoff, an English Bay village leader, and was told that the people there couldn't make up their minds whether they would be better off one way than the other. He also asked that a board representative visit the village to talk about it.

Assemblywoman Karen McGahan of Nikiski, Dorothy Westphal of Sterling and Lois Irvin of Homer all protested the board's plan to put Nikiski with South Anchorage in a new House District 7.

Westphal also read a letter by Sharon Overman of Soldotna, president of the Central Peninsula Republican Women's Club, objecting to a plan that would cut the peninsula's representation in the Senate.

Two peninsula residents, Jack Warner and Louis Bernacardino of Seward, joined people from Whittier, Valdez, Cordova and the Mat-Su Borough in recommending that proposed House Districts 6, 7 and 16 be combined to form a Senate district with two seats. Similar to Kerttula's former district, the plan has been called the "Doughnut District" because of its shape.

The reapportionment board dropped the plan, originally raised by Kerttula, without comment at its last meetings in December. Tuesday night, Hensley said the idea had not found any support on the board.

The board has until Feb. 3 to report to the governor, who this week got a court extension to Feb. 17 for his report to Superior Court Judge Milton Souter.

February 4, 1984

Honorable Ben Grussendorf
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Mr. Grussendorf:

My testimony on the statewide teleconference yesterday on HJR# 53 is that I am very concerned about the future trends in reapportionment of the State of Alaska's legislature. Although the United States Constitution is designed for providing for one man, one vote philosophy in order to have a fair representation, I don't believe it is fair as it affects Alaska and it's vast areas of small populations.

The main problem as I see it, is the increasing population in the Anchorage area. Right now their voting strength in the legislature is nearly fifty per cent, this means that they are almost to the point of running the entire State of Alaska as they please and can get practically any population increasing facilities or programs.

What chance do we have as citizens of Alaska if all the voting power is concentrated in one small area of Alaska? If the present trend continues we will have only a limited voice in determining the future of our Alaskan life style, our cultures,resources and political participation. The Capital move proponents I am sure will again become active.

I would rather see a rigid constitutional provision to allow for geographical representation rather than by population. This would provide us with an adequate political voice in determining the future of our Alaskan way of life.

Candidates for the State Legislature from the out lying areas of Alaska must travel great distances at great expenses to campaign for the office while those in the population centers can do their campaigning in a few city blocks of their district.

If they should eventually succeed in getting all the government of the State of Alaska, then I think the only way to preserve our political life is to create an area to be known as the "District of the State of Alaska" very similiar to what Washington D.C. is at the present time.

I know that the creation of a "District of the State of Alaska" is a wild idea not legally possible, it is simply a heart cry of what might be the answer to preserving our political life as Alaskan cultures.

I often wish the United States Supreme court would take into consideration the vastness and the diversity of Alaska in it's decisions.

Sincerely,

Mark Jacobs, Jr.

I. THE REAPPORTIONMENT BOARD

A. Introduction

This Report presents the recommendations of the 1983 Reapportionment Board of the State of Alaska.

The 1983 Reapportionment Board was convened to propose amendments to the 1981 State Reapportionment Plan following the Alaska Supreme Court's determination that the 1981 State Reapportionment Plan improperly included Cordova in House District 2. Carpenter v. Hammond, 667 P.2d 1204 (Alaska 1983). The constitutional problem identified by the court was that the inclusion of Cordova in a district with communities in Southeast Alaska violated the mandate of article 6, section 6 of the Alaska Constitution which requires that legislative districts contain "as nearly as practicable a relatively integrated socio-economic area."

In an order entered on October 12, 1983, the Honorable Milton M. Souter of the Alaska Superior Court, Third Judicial District, directed the Governor, with the advice of the Reapportionment Board, to issue a Proclamation of Reapportionment on or before February 3, 1984 1/ which causes Cordova to be placed in a contiguous, compact and relatively integrated

---

1/ By subsequent order of the court, the deadline for the issuance of a Proclamation of Reapportionment was extended to February 17, 1984.

socio-economic election district. The court further directed the Governor to amend the 1981 Plan as is necessary to satisfy federal and state constitutional requirements, but to make only the fewest possible changes.

In accordance with the superior court order, the 1983 Reapportionment Board was appointed by Governor Bill Sheffield on October 20, 1983. The Reapportionment Plan recommended in this Report sets forth the Board's solution to the problems identified in the Carpenter decision. In formulating this Plan, the Board has sought to make the fewest possible changes to the 198' Plan while giving primary importance to the principle of equal representation.

1. Composition of the Board

In the superior court's October 12 order, the Governor was instructed to issue a revised Proclamation of Reapportionment with the assistance of an advisory board. The following individuals were appointed by Governor Sheffield in October of 1983 to serve on the Reapportionment Board: William L. Hensley, Kotzebue; Mary A. Nordale, Fairbanks; Joseph H. McKinnon, Anchorage; Richard R. Borer, Cordova; and Felix J. Toner, Juneau. William Hensley was elected chairman during an organizational meeting in Juneau on October 26, and Mary Nordale was selected to serve as vice-chairman.

2. Staff and Technical Requirements

Dana LaTour served as staff assistant to the Board. Her responsibilities included all administrative and fiscal details such as arranging meetings and hearings and maintaining accurate records of all Board activities. Cheryl Barsness and Cheryl Beaty provided clerical and administrative support to the Board for the duration of the project. Assistant Attorney General Jonathan Rubini served as the Board's legal counsel.

The Board retained the services of Karen Rehfeld to provide technical assistance on a contractual basis. Rehfeld served as Executive Director for the 1981 Reapportionment Board.

B. Public Participation

The Board provided as much opportunity for public participation as was possible within the limited time available. All meetings of the Board were open to the public. In addition, the Board conducted six public hearings, most of which took place in communities directly affected by the proposals described in this report. And, through use of the Legislative Teleconference Network on three occasions, all citizens were accorded an opportunity to present their views to the Board. A schedule of the dates and locations of the meetings and hearings is included.

In almost every case, all Board members were present for the public hearings. Weather conditions prohibited Dick Borer and the reapportionment staff from attending the Fairbanks hearing. Chairman William Hensley was unable to attend the

teleconference with the communities in the Prince William Sound area, the Kenai Peninsula, and Matanuska-Susitna Borough.

Advertising for the hearings included newspaper display ads that were sent to the newspapers in the specific areas for each hearing. In most cases, public service announcements were prepared and read via telephone to the local radio stations prior to the public hearings. Additionally, the Legislative Teleconference Network in the Legislative Affairs Agency, Division of Public Services, provided assistance by advertising the teleconferences in each site location involved. Newspapers and radio stations conducted interviews which resulted in increased attention to the hearings.

Following each board meeting, the Board prepared a news release which explained the proposed plans for reapportionment. Copies were supplied to each Legislative Information Office, Regional Governor's Office, all 60 legislators, members of the press and interested persons. These news releases served as the basis for public comment and testimony.

Attendance at the public hearings varied in each location. In many locations the public comment received was in response to the plans already proposed by the Board. The Board also sought public comment on three proposals for redistricting Anchorage. Various options for apportioning the senate in Anchorage and Southcentral were discussed during the hearings. Additionally, the Board received numerous letters and telegrams.

As a result of testimony received, the Board made two revisions to their proposed plans. During a meeting on January 11, 1984, the Board formulated their recommendations and directed staff to prepare the text of this report and corresponding maps to submit to the Governor.

1983 REAPPORTIONMENT BOARD
MEETING/PUBLIC HEARING SCHEDULE

Community	Date and Time	Location
Juneau	Meeting October 26-27, 1983	5th Floor Court Building
Juneau	Meeting November 7-8, 1983	7th Floor State Office Bldg.

Juneau	Meeting January 10-11, 1984	Room 123 Alaska Office Bldg.
Metlakatla, Ketchikan, Wrangell, Petersburg, Sitka, Hoonah, Juneau, Haines, Yakutat, Cordova, Valdez, Whittier, Seward, Homer, Soldotna, Wasilla, Anchorage	Teleconference January 10, 1984 4:30 - 6:30 p.m.	Leg. Teleconference Office - Juneau
Juneau	Meeting February 3, 1984	Room 711 State Office Bldg.

* Due to a delay in the arrival of the plane from Ketchikan, the Board and staff did not arrive at the hearing until 8:15 p.m.

** There was no public participation at the Fairbanks hearing. Therefore, there is no transcript of the hearing.

*** The Kenai hearing was originally advertised to be held in the City Council Chambers in Kenai from 1:30 - 4:00 p.m. The hearing was changed at the request of the community.

C. Population Base and Ideal District Size

At the outset the Board considered which census data it should use in preparing its plan. The 1981 Reapportionment Board utilized census figures prepared by the U.S. Bureau of Census in 1980. However, as discussed in more detail below, substantial corrections were made by the Bureau of Census in 1981.

1. The Original 1980 Census Population

The original 1980 Census population reported by the Bureau of Census showed a statewide total population of 400,481. Drawing upon this figure, the 1981 Reapportionment Board excluded 31,363.8 as estimated nonresident military personnel and dependents, leaving a statewide total for reapportionment purposes of 369,117.2. The ideal district size under the census data utilized by the 1981 Board was 9227.9.

Following issuance of the 1981 Proclamation of Reapportionment, the nonresident military exclusion was further adjusted by order of the superior court in March 1982. The superior court concluded that the original military exclusion should have been applied consistently across the state. This required the exclusion of an additional 2,066.91 nonresident military personnel and dependents. The total military population of 33,430.71 excluded from the 1980 Census statewide population of 400,481, left a reapportionment population base of 367,050.29. The ideal house district size was then 9,176.2. The court ordered adjustments were made prior to the 1982 elections.

2. The 1981 Census Data Corrections

In September 1981, the United States Bureau of the Census issued corrected 1980 census counts for three census areas in Alaska -- Anchorage, Matanuska-Susitna, and Southeast Fairbanks. A detailed listing of these revised counts by census tract, blocks, and enumeration districts was compiled in November, 1981. 2/ The 1981 corrections to the 1980 census counts for Alaska are as follows:

Anchorage Census Area Tract 0002 - Eagle River	+1,414
Matanuska-Susitna Census Area ED 1168 Wasilla Area	+50
Southeast Fairbanks Census Area ED 0833	-94

The adjusted 1980 population for the State of Alaska, incorporating the 1981 revisions, is 368,420.29.

	367,050.29	-	1980 Adjusted Census Figure
	+ 1,414	-	Eagle River
	+ 50	-	Matanuska-Susitna
	- 94	-	Southeast Fairbanks
TOTAL	368,420.29	-	Adjusted 1981 Population

2/ The November listing also included a correction in the Prince of Wales census sub-area that did not change the population for the sub-area, but reallocated the population previously reported to the correct enumeration district.

Additional corrections to the 1980 census data for Alaska were issued in June 1982 for Saxman, Selawik, and Barrow. These corrections also represented a reallocation of population within the specific census area and did not change the population in those census areas. None of the reallocation corrections affect the Reapportionment Plan, and none are therefore considered in this report.

In order to confirm the validity of these corrections and to ensure that these corrections included all official Census Bureau adjustments, the Board consulted with the State Department of Labor, Research and Analysis Section. The Research and Analysis Section is the contact for the Federal/State Cooperative Programs for population estimates and projections, and is the contact agency for the Alaska Census Data Network. In these capacities, it receives all publications and data generated by the Bureau of Census pertaining to Alaska. In its response to the Board's inquiry, dated November 17, 1983, the Research and Analysis Section confirmed that no additional corrections have been issued.

In addition, the Board requested that the Institute of Social and Economic Research, University of Alaska, review the matter to assure that use of corrected data would not interject a new statistical bias. The Institute of Social and Economic Research reviewed the corrected data, and concluded that the use of corrected data yielded the best possible data base for the present reapportionment. 3/

3. The Board's Decision to Use Corrected Census Data

The October 12, 1983 order directed the Governor to:

> [N]ot utilize any amendments to the most recent federal decennial census which were issued after

---

3/ The Institute's conclusions are set forth in a letter to the Board dated November 21, 1983.

> the initial final decision which was entered by the Superior Court in this case on March 26, 1982.

The controlling date in the order is March 26, 1982. The official corrections to the original 1980 census data were made in September 1981, well in advance of this date. Thus, use of this data by the Board complies with the superior court's order.

Despite the literal language of the superior court's order, the Governor and the Board recognized that the correct intent of the court's order may actually have been to require that any new plan utilize the same figures as employed by the 1981 Reapportionment Board, that is, the uncorrected 1980 census data. Pending resolution of how to proceed, Governor Sheffield sent a letter to the members of the Reapportionment Board, requesting that the Board prepare alternative plans amending the 1981 Plan, one utilizing corrected census data and the other using the uncorrected original data. At the same time, the Governor requested that the Department of Law review the issue.

In a Memorandum of Advice to the Governor dated February 1, 1984, the Department of Law concluded that the Board should utilize the 1981 corrections to the 1980 census in the preparation of its amended Reapportionment Plan. By letter dated February 2, 1984, Governor Sheffield expressed his recommendation that the Board submit its Plan utilizing only the corrected data. After consideration of the conclusions reached by the Department

of Law, the Board has decided to submit a single Plan utilizing only the corrected census data. 4/

The Department of Law concluded in its February 1, 1984, memorandum that utilization of the uncorrected data would expose the plan to legal challenge. The Equal Protection Clause of the United States Constitution requires a state to construct its districts with as nearly equal population as is practicable, a goal intended to ensure the ideal of one-man, one-vote. Reynolds v. Sims, 377 U.S. 533, 577 (1964). Adoption of a plan using data which is admittedly erroneous serves only to distort the fundamental tenet of equal representation. As the Alaska Supreme Court stated in Groh v. Egan, "There can be little question but that the general principle of equalizing votes per person can best be achieved by use of the most current accurate data reasonably available." 526 P.2d at 868. (Emphasis added.) To ignore the 1981 corrections would be tantamount to ignoring -- and thereby disenfranchising -- 1,414 voters in Eagle River, a solution the Board considers to be absolutely unacceptable.

In order to comply with the U.S. and Alaska constitutional mandates and the directions of the Alaska Supreme Court, the Board has concluded that it is mandatory that this Report and the Board's Plan utilize only the most accurate data

---

4/ Prior to this decision, the Board had prepared a Plan using the erroneous uncorrected data (pursuant to Governor Sheffield's request of November 8, 1983). This alternative Plan remains a part of the record of the Board's proceedings.

presently available. The 1980 census data, as corrected in 1981, is the most accurate census data available to the Board.

4. Ideal District Populations

The adjusted statewide population utilized in this plan, incorporating corrections made to 1980 census data, is 368,420.29. The ideal house district population is determined by dividing the total population by the 40 house seats to be apportioned. The ideal house district population is 9,210.5.

The ideal senate district population is determined by dividing the total population by the 20 senate seats to be apportioned. The ideal senate district population is 18,421.

II. REVISED ELECTION DISTRICTS

A. House Districts

The revisions made in the Board's proposal affect the Southeast and Southcentral areas of the state.

In Southeast, the Board shifted the community of Metlakatla and vicinity, previously in House District 1, and the community of Hoonan, previously in House District 3, into House District 2 to replace the Cordova population which was moved into House District 6. As a result, Districts 1, 2, and 3 are slightly affected under this proposal. House District 4 remains unchanged.

The Southcentral districts are affected two ways: first by the inclusion of the Cordova area (approximately 2,200 persons) with the Prince William Sound area; and second, by the technical correction made by the U.S. Census Bureau which added an additional 1,414 persons to the Eagle River area.

House District 6 has been revised to include the Cordova, Chitina, and McCarthy areas. Because of the need to distribute the excess population in Southcentral over a larger area, the Nikiski area of the North Kenai is combined with South Anchorage in House District 7. With the exception of the inclusion of a small enumeration district along the Sterling Highway, House District 5 in unchanged. The Anchorage house districts were revised to reflect the adjusted population in the southern and northern areas of the municipality. In making these

changes, particular attention was given to following community council boundaries and neighborhoods in drawing the district lines.

Following is a brief outline of the area within each election district, the major communities in the district, the population of the district, and the population variance. The complete technical boundary description for each district is included as an appendix to this report.

1. Ketchikan-Wrangell-Petersburg

District 1 is an area within a line proceeding from Dixon Entrance in a northerly direction up Clarence Strait, passing west of Zarembo Island, northerly up Duncan Canal, across Frederick Sound to a point west of Cape Fanshaw, then northeasterly to the Canadian border and southerly along the Canadian border to the point of beginning at Dixon Entrance, excluding the area on Annette Island. The district includes the Ketchikan Gateway Borough, Wrangell, Petersburg, Hyder, Saxman, Meyers Chuck, and Kupreanof. It has a population of 16,601.58 and a variance of -9.9 percent. It will elect two house members to designated seats and one senator.

2. Inside Passage

District 2 is composed of that portion of Southeast Alaska between Dixon Entrance and Boundary Point 187 on the U.S./Canadian International Boundary that is not contained in

Districts 1, 3, and 4. Included within its boundaries are the communities of Yakutat, Haines, Skagway, Klukwan, Gustavus, Hoonah, Angoon, Kake, Metlakatla, Thorne Bay, Klawock, Craig, and Hydaburg. The district has a population of 8,924.35 and a variance of -3.1 percent. It will elect one house member and, with District 3, one senator.

3. Baranof-Chichagof

District 3 consists of Baranof Island, Yakobi Island, Chichagof Island, and all of the smaller adjacent islands offshore, excluding the area within the City of Hoonah. The communities on the islands include Sitka, Pelican, Elfin Cove, Tenakee Springs, and Port Alexander. The district has a population of 8,448.97 and a variance of -8.3 percent. It will elect one house member and, with District 2, one senator.

4. Juneau

District 4 boundaries coincide with those of the City and Borough of Juneau. The district has a population of 19,332.75 and a variance of +4.9 percent. It will elect two house members to designated seats and one senator.

5. Kenai-Cook Inlet

District 5 includes all of the coastal areas on the east and west sides of Cook Inlet inside the Kenai Peninsula Borough, that lie south and west of Nikiski. Communities within

the district include Kenai, Soldotna, Sterling, Ninilchik, Anchor Point, Homer, Seldovia, Port Graham, and English Bay. The district has a population of 19,189.95 and a variance of +4.2 percent. It will elect two house members to designated seats and one senator.

6. Prince William Sound

District 6 includes the area along Prince William Sound from Boundary Point 187 on the U.S./Canadian International boundary on the east to the Kenai National Moose Range boundary on the west. Included in the district are the communities of Hope, Cooper Landing, Moose Pass, Seward, Whittier, Valdez, Chitina, McCarthy, Tatitlek, and Cordova. It has a population of 8,753.19 and a variance of -4.9 percent. It will elect one house member and, with Districts 7 and 16, two senators to designated seats.

7. North Kenai-South Anchorage

District 7 contains the Nikiski area on the northern Kenai Peninsula, and the southeastern reaches of the Municipality of Anchorage, including the community council areas of Old Seward/Oceanview, Rabbit Creek, Turnagain Arm, and Girdwood Valley. Its northern boundary proceeds east from Turnagain Arm along Klatt Road to the New Seward Highway, southerly on the New Seward Highway to Huffman Road, westerly along Huffman Road to the Old Seward Highway, southerly on the Old Seward Highway to DeArmoun Road, east on DeArmoun Road to Rabbit Creek, and

easterly and southerly along Rabbit Creek. The district has a population of 9,580.1 and a variance of +4.0 percent. It will elect one house member and, with Districts 6 and 16, two senators to designated seats.

8. Campbell-Hillside

District 8 is bounded on the south by Rabbit Creek, DeArmoun Road, the Seward Highway, and Klatt Road, and on the west by Turnagain Arm. Dimond Boulevard and Abbott Road form the northern boundary, and the Chugach Mountains are the eastern boundary. This district includes the neighborhood council areas of Bayshore/Klatt, Huffman/O'Malley, Mid-Hillside, Hillside East and Glen Alps. The district has a population of 19,230.7 and a variance of +4.4 percent. It will elect two house members to designated seats and, with District 10, two senators to designated seats.

9. Turnagain-Sand Lake

District 9 is bounded by a line beginning at Turnagain Arm and proceeding east on Dimond Boulevard to Arctic Boulevard, then north to International Airport Road, then west to Spenard Road, then northerly to Fish Creek and continuing north to W. 36th Avenue, then west to Wisconsin Street and north on Wisconsin to Northern Lights Boulevard, then east on Northern Lights to Minnesota Drive and north on Minnesota Drive to Chester Creek, then west on Chester Creek to Knik Arm. The district includes the community council areas of Turnagain and Sand Lake. It has a

population of 19,155.9 and a variance of +4.0 percent. It will elect two house members to designated seats and, with District 11, two senators to designated seats.

10. Mid-Town

District 10 is bounded by a line beginning at the intersection of Arctic Boulevard and Dimond Boulevard, then north to International Airport Road, east to the Old Seward Highway, north to Chester Creek, easterly to Bragaw Street and E. 20th Avenue, east to Pine Street, south to Tudor Road, then westerly and southerly along the Bureau of Land Management boundary to Birch Road, south to Abbott Road, and west along Abbott Road to the New Seward Highway, north to Dimond Boulevard, and west to the point of beginning. The district includes the community council areas of Rogers Park, Tudor, Taku-Campbell, Lake Otis, and University. It has a population of 18,183.5 and a variance of -1.3 percent. It will elect two house members to designated seats and, with District 8, two senators to designated seats.

11. Spenard

District 11 is bounded by District 10 on the east, International Airport Road on the south, Wisconsin Street, Fish Creek, and Spenard Road on the west, and Chester Creek and W. 23rd Avenue on the north. It includes the community council areas of Spenard and North Star. It has a population of 18,804.1 and a variance of +2.1 percent. It will elect two house members

to designated seats and, with District 9, two senators to designated seats.

12. Downtown

District 12 is bounded by Chester Creek on the south, Bragaw Road on the east, Commercial Drive and the Elmendorf reservation boundary on the north and the inlet on the west. Included are the community council areas of Government Hill, Downtown, Penland Park, South Addition, Fairview, and parts of the areas of North Mountain View and Airport Heights. The district has a population of 18,678.4 and a variance of +1.4 percent. It will elect two house members to designated seats and, with District 13, two senators to designated seats.

13. Elmendorf Air Force Base-Mountain View

District 13 is bounded by a line beginning at the intersection of Bragaw Street and E. 20th Avenue proceeding east to Baxter Road, north to DeBarr Avenue, east to Muldoon Road, north to E. 4th Avenue, west to Patterson Street, north to the Glenn Highway, east on the Glenn Highway to the common boundary between Elmendorf Air Force Base and Fort Richardson, then following the Elmendorf military reservation boundary to Commercial Drive, then east to Mountain View Drive, then southwesterly to the Glenn Highway, then east to Bragaw Road and south to the point of beginning. The district includes the community council areas of Russian Jack Park, North and South Mountain View, Airport Heights, and North Muldoon. It has a

population of 19,173.1 and a variance of +4.1 percent. It will elect two house members to designated seats and, with District 12, two senators to designated seats.

14. South Muldoon

District 14 includes Stuckagain Heights and the community council areas of Northeast, South Muldoon, and Scenic Park. The District is bounded by District 13 on the north, District 15 on the north and east, District 8 on the east and south, and District 10 on the south and west. District 14 has a population of 18,265.4 and a variance of -.8 percent. It will elect two house members to designated seats and, with District 15, two senators to designated seats.

15. Chugiak-Eagle River-Fort Richardson

District 15 includes the northern portion of the Municipality of Anchorage from Fort Richardson on the west to the municipality's border on the north and east, and by District 14 on the south. It includes the community council areas of Eklutna Valley, Chugiak, Birchwood, and Eagle River Valley. Also included are Fort Richardson, and the area of the North Muldoon community council area bounded by Chester Creek, Muldoon Road, E. 4th Avenue, Patterson Street, and the Glenn Highway. The district has a population of 18,395 and a variance of -.1 percent. It will elect two house members to designated seats and, with District 14, two senators to designated seats.

16. Matanuska-Susitna

District 16 is comprised of the Matanuska-Susitna Borough, including the communities of Talkeetna, Willow, Houston, Big Lake, Wasilla, Bodenburg Butte, Palmer, Sutton, Peter's Creek, Montana, and Chickaloon. It has a population of 17,692.23 and a variance of -3.9 percent. It will elect two house members to designated seats and with Districts 6 and 7, two senators to designated seats.

17. Interior Highways

District 17 is made up of those areas outside of the Matanuska-Susitna Borough and the Fairbanks North Star Borough which are along the Glenn, Parks, Richardson, and Alaska Highways. Included are Paxson, Gulkana, Glennallen, Copper Center, Tonsina, Tazlina, Eagle, Delta, Fort Greely, Tanacross, Tok, Tetlin, Northway, Nenana, Anderson, Healy, and Cantwell. The district has a population of 8,753.57 and a variance of -4.9 percent. It will elect one house member and, with District 18, one senator.

18. Southeast North Star Borough

District 18 encompasses the southeast section of the Fairbanks North Star Borough. It includes North Pole, Eielson Air Force Base, Salcha, and Harding Lake. Its population is 9,300, with a variance of +.9 percent. It will elect one house member and, with District 17, one senator.

19. Outer Fairbanks

District 19 includes Livengood, Ester, Goldstream Road, the Steese Highway, the eastern half of Farmers Loop Road, Fort Wainwright, Chena Hot Springs Road, Circle, Central, and Circle Hot Springs. It has a population of 8,934.3 and a variance of -3.0 percent. It will elect one house member and, with Districts 20 and 21, two senators to designated seats.

20. Fairbanks City

District 20 is bounded by the Noyes Slough and University Avenue on the west, the Fairbanks International Airport on the southwest, the Tanana River on the south, and Fort Wainwright on the east. The Creamers Field area is included as the northern edge of the district. The district has a population of 18,319.7 and a variance of -.5 percent. It will elect two house members to designated seats and, with Districts 19 and 21, two senators to designated seats.

21. West Fairbanks

District 21 includes the western half of Farmers Loop Road and the area west of Noyes Slough and University Avenue to, but not including, the Ester area. It has a population of 9,247.1 and a variance of +.4 percent. It will elect one house member and, with Districts 19 and 20, two senators to designated seats.

22. North Slope-Kotzebue

District 22 includes the areas of the North Slope Borough, Arctic Slope Regional Corporation, and the Northwest Alaska Native Association. It has a population of 8,999.06 and a variance of -2.3 percent. The district will elect one house member and, with District 23, one senator.

23. Norton Sound

District 23 includes the area of the Bering Straits Regional Corporation; Shishmaref, Diomede, Teller, Nome, Koyuk and Saint Michael, and the coastal communities as far south as Hooper Bay and Paimiut. Chevak is also included along with Yukon River villages down river from Mountain Village. The district has a population of 9,338.86 and a variance of +1.4 percent. It will elect one house member and, with District 22, one senator.

24. Interior Rivers

District 24 includes the communities on or near the great interior rivers, the Yukon, the Koyukuk, and the Kuskokwim, as far down river as Mountain Village on the Yukon and Tuluksak on the Kuskokwim. The district has a population of 8,936.12 and a variance of -3.0 percent. It will elect one house member and, with District 25, one senator.

25. Lower Kuskokwim

District 25 includes the Kuskokwim River communities down river from Akiak and Akiachak, and the coastal communities from Newtok to Platinum. It has a population of 9,432.35 and a variance of +2.4 percent. It will elect one house member and, with District 24, one senator.

26. Bristol Bay-Aleutian Islands

District 26 includes all of the Bristol Bay Native Corporation area except Ivanof Bay, Perryville, Chignik Lake, Chignik, and Chignik Lagoon. Included are the remainder of the Alaska Peninsula communities, the Aleutian communities, the Bristol Bay communities as far west as Twin Hills, and communities as far up river as Aleknagik and Koliganek. The Bristol Bay Borough is also included. The district has a population of 9,157.61 and a variance of -.6 percent. It will elect one house member and, with District 27, one senator.

27. Kodiak-East Alaska Peninsula

District 27 covers the Kodiak Island Borough and the Alaska Peninsula communities of Ivanof Bay, Perryville, Chignik Lake, Chignik, and Chignik Lagoon. It has a population of 9,592.4 and a variance of +4.1 percent. It will elect one house member and, with District 26, one senator.

B. Senate Districts

The Board recommends only slight revision to the configuration of senate districts. House Districts 5, 6, and 7 were formerly included in a two-member senate district. Under the proposal, House District 5 becomes a single-member senate district and House Districts 6, 7, and 16 become a two-member senate district. The Board retained the concept utilized by the 1981 Board of two-member senate districts in Anchorage. The following table sets forth the house districts and their corresponding senate district:

1984 HOUSE/SENATE DISTRICTS

House Districts	Senate Districts
1 (A-B)*	A
2, 3	B
4 (A-B)	C
5 (A-B)	D
6, 7, 16 (A-B)	E (A-B)*
8 (A-B), 10 (A-B)	F (A-B)
9 (A-B), 11 (A-B)	G (A-B)
12 (A-B), 13 (A-B)	H (A-B)
14 (A-B), 15 (A-B)	I (A-B)
17, 18	J
19, 20 (A-B), 21	K (A-B)
22, 23	L
24, 25	M
26, 27	N

(A-B)* = two-member house/senate district

The Board's proposal does not significantly affect the composition of senate districts requiring truncation of an incumbent senator's term. However, the Board adopted several guidelines for truncation, those being: 1) if 35 percent or more

of an incumbent senator's constituency had changed, either by addition of 35 percent or more new constituents to the district or by subtraction of 35 percent or more of constituents previously included in the district; and 2) if the method of electing senators had changed, i.e., from a two-member district to a single-member district. In only one case is truncation of a four-year incumbent required, in Senate District D (House District 5). Senate District D was formerly a two-member senate district and is now a single-member district. More than 35 percent of the constituents previously in the district were removed and the method of selecting the senator changed.

In order to preserve staggering of senate terms, the length of term for Senate District D will be four years and in Senate District E (House Districts 6, 7, and 16) Seat A will be a four-year term and Seat B a two-year term. The incumbents in two-member senate districts serving the remainder of their four-year terms will hold Seat B in each of their respective districts. The remaining four-year senate seats up for election in 1984 in two-member senate districts will be designated as Seat A in each of the respective districts.

III. DISCUSSION

The relocation of the Cordova area required that the Board consider a variety of approaches concerning the formation of election districts. As is inevitably the case, the process of reapportionment requires that a difficult balance be struck among a great many factors. Of the numerous approaches considered by the Board, almost all offered certain advantages and disadvantages, almost all were favored by some and opposed by others.

While reapportionment is decidedly a difficult process of balancing the advantages of one approach with those of alternative approaches, the Board's discretion was also limited by several well-developed legal standards. The options and legal concerns will be discussed in more detail as they affect certain areas of the state. Two concerns, however, so substantially affected the Board's deliberations in all areas where redistricting was required that several general comments are warranted.

The first, and predominant, legal constraint derives from the Equal Protection Clause of the United States Constitution. 1/ Under that provision, there must be a substantial equality of population among state legislative

---

1/ See also Alaska Const. art. I, § 1; Alaska Const. art VI, § 4.

districts. In the landmark case of Reynolds v. Sims, the United States Supreme Court established a basic rule:

> [T]he Equal Protection Clause requires that a state make an honest and good faith effort to construct districts, in both houses of its legislature, as nearly of equal population as is practicable.

377 U.S. 533, 577 (1964). The rule of mathematical equality is not absolute, however. Modest deviations from the principles of population equality are tolerable if "incident to the effectuation of a rational state policy." 377 U.S. at 579. The Reynolds case requires, as a matter of federal constitutional law, that a state's "overriding objective" must be to establish districts with equal population. The focal point of the equal protection inquiry is on the "comparative deviation" in the Plan, a comparison between the most overpopulated district within the state and the most underpopulated district.

Following the Reynolds case, there have been in excess of 1,500 judicial opinions relating to the question of whether an apportionment scheme satisfies the equal protection mandate, many of these involving the apportionment of state legislative bodies. This voluminous body of law can be summarized under three general rules. First, comparative deviations below 10 percent are treated by courts as "minor deviations from mathematical equality" which are "insufficient to make out a prima facia case of invidious discrimination ... so as to require justification by the State." Gaffney v. Cummings, 412 U.S 735, 745 (1973). Second, comparative variations greater than 10 percent but less

than 16.4 percent may be justifiable and legally sustainable if the state can establish that the population imbalance is necessary to effectuate a rational state policy. An example of a state policy which can serve as a basis to justify a population variance of between 10 percent and 16.4 percent is the desire to respect subdivision boundaries or the desire to form compact, contiguous and socio-economically integrated districts. Finally, comparative deviations greater than 16.4 percent are likely to exceed the tolerable limits in state redistricting plans. The outer limit of a comparative variance of 16.4 percent derives from Mahan v. Howell, a case in which the United States Supreme Court noted that a 16.4 percent deviation "may well approach tolerable limits." 410 U.S 315, 329 (1973). With only one unique exception, 2/ no federal court has approved in recent years a reapportionment plan which proposed a comparative variance in excess of 16.4 percent.

The Board, therefore, concluded that proposed plans which resulted in a comparative variance of 16.4 percent or greater were simply too vulnerable to challenge under federal constitutional standards of equal protection. Further, options which resulted in a comparative variance of greater than 10 percent but less than 16.4 percent would be considered only if necessary to effectuate a substantial state policy objective. In

---

2/ Brown v. Thomson, ___ U.S ___, 77 L.Ed 2d 214 (1983).

all respects, the Board attempted to arrive at a plan containing the lowest possible population deviation consistent with other permissible state policies.

The Plan adopted by the Board satisfies the equal population concerns. The maximum comparative variation of the Plan is 14.8 percent, with District 4 (Juneau) the most overpopulated district (+4.9 percent), and District 1 the most underpopulated (-9.9 percent). 3/ Importantly, all districts outside of Southeast Alaska are within 5 percent of the ideal district size, and the comparative deviation of the Board's overall plan, excluding Southeast Alaska, is 9.3 percent. These deviations are well within the standards set forth by the United States Supreme Court.

The second principal limitation on options available to the Board derives from the standards established in the Alaska Constitution. Article VI, Section 6, requires that all districts "shall be formed of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic area." Application of the socio-economic integration standard presented an exceedingly difficult task. Effective legislative representation is most readily available where communities within

---

3/ The unique configuration and socio-economic characteristics of Southeast Alaska have historically resulted in state reapportionment plans with even greater population variances. See Groh v. Egan, 526 P.2d 863 (Alaska 1974); Egan v. Hammond, 501 P.2d 856 (Alaska 1972).

a district share common interests. Yet, the goal of social and economic integration is at times directly at odds with the paramount objective in the reapportionment process -- the desire to satisfy the one-man, one-vote mandate. In addition, the goal of social and economic integration is also difficult to achieve because of the expansive and unique geographic features of the state, coupled with the diverse cultural and economic factions within the state.

Further, there is no clear legal construction of what section 6 requires or how the Board is to apply it. Carpenter v. Hammond, the most recent and most extensive judicial comment on the constitutional provision, did not articulate a rule which can be easily applied in a consistent and decisive manner throughout the state. In Carpenter, the Alaska Supreme Court indicated that section 6 requires socio-economic interaction, not just homogeneity. In ruling that Cordova did not have sufficient ties to the other southeastern communities in former District 2 to withstand challenge, the court stated only that homogeneity of interest, without any demonstration of social and economic integration, is unacceptable.

The Carpenter decision did not, however, state a rule which indicates what kind, or how much, evidence is necessary to meet the section 6 requirement of socio-economic integration. It may well be that relatively homogeneous communities may be districted together as long as they have some degree of social and economic ties between them.

The issue of whether section 6 requires some interaction between communities, or the best interaction between communities, is an important one. The Board in two notable instances was faced with the question of districting together communities that clearly have some social and economic integration between them. It was also clear that in both cases, the communities had strong integration with communities elsewhere. The Board felt that as long as it was satisfied that two communities have some meaningful interaction with each other, they may be districted together, even if an argument can be made that the communities have ties, and perhaps stronger ties, elsewhere. In other words, the Board believes that section 6 imposes a requirement that there be some demonstrable and significant interaction between communities placed together in a district, but not that the Board redistrict together only those communities that are most strongly tied to each other.

The Board further believes that the section 6 requirement must be analyzed within the context of other state and federal constitutional requirements as well as the extraordinary difficulties in redistricting posed by the unique size, geography, diversity, and population distribution of the state. As a result, the socio-economic standard must be flexibly applied, and must be applied on a case-by-case basis with an understanding of the available alternatives.

In rural Alaska, for example, the social and economic standard cannot be applied with the same rigor as in other areas

of the state. In House Districts 22, 23, and 24, for example, districts combine communities with little, if any, active interaction. Each district groups communities with language, economic, and cultural barriers. In these districts, and Districts 25, 26, and 27 as well, direct transportation links between communities within each district are generally nonexistent. Oftentimes, different regional transportation hubs serve different areas within the same district. Yet, the experience in Alaska has demonstrated that effective legislative representation is available notwithstanding the absence of substantial interaction.

The Board attempted to apply the social and economic integration rule as fairly and as consistently as was possible. Most districts proposed in this Plan evidence for more socio-economic integration than is required to satisfy the section 6 standard. In two instances -- the inclusion of Metlakatla within District 2 and the link between the North Kenai area and South Anchorage in District 7, -- the proposed district is the best of the available alternatives. In each instance the degree of social and economic interaction is demonstrably more extensive than was the apparent tie between Cordova and the southeastern communities in former District 2. Viewed from the broader state perspective, each of these proposed configurations obtain a greater degree of socio-economic integration than is evident in many of the rural districts.

In each of the areas where revisions were necessary, problems of varying magnitudes arose which required specific attention by the Board. The following discussions review in detail the approach the Board utilized in resolving the numerous difficulties that surfaced in preparing their final recommendations.

A. Southeastern Alaska

The Board proposes only minimal revisions to the districts created under the 1981 Plan. Cordova is removed from District 2. To replace most of the 2,200 Cordova residents removed from District 2, the communities of Metlakatla and Hoonah, formerly part of Districts 1 and 3 respectively, were included within District 2. No other modifications are proposed.

Redistricting in Southeast Alaska has historically presented substantial difficulties. The communities in Southeast, with the exception of Juneau, are predominantly dependent economically and socially on the fishing and timber industries. An area with almost no highway transportation links, the unique geographic setting underscores the difficulty of attempting to forge integrated units within the region. To compound the problem, the region is underpopulated by 3.5 percent for its six legislative seats, a variance for the region in major part directly attributable to the relocation of Cordova. In contrast to the regional underpopulation, the City and Borough of Juneau, an area historically united for purposes of

apportionment, is overpopulated for its two-member district by 4.9 percent. These two population characteristics mean that overall population variances for Southeast in excess of 10 percent are inevitable if a portion of the Juneau population is not transferred to another legislative district.

The Board considered and, ultimately, rejected a series of proposals which moved a portion of the Juneau community into another district. In all previous reapportionment plans adopted in Alaska, the boundaries of what is now the City and Borough of Juneau have remained intact, in each instance at the expense of achieving a comparative variance of 10 percent or less. No court has ever disapproved of these variances. Importantly, it was possible to form a statewide plan with a maximum comparative variance of less than 16.4 percent and still preserve the two-member Juneau district. Preservation of the configuration of District 4 promotes two concerns, both of which have been recognized as legitimate state objectives. First, District 4 retains the boundaries of a political subdivision. While it was not possible to do so in all instances throughout the state, the Board attempted to form districts consistent with local political subdivision boundaries where possible. Second, and more importantly, retention of all of Juneau within a two-member district recognizes the unique social and economic nature of the community. Where other Southeast communities are principally dependent on fishing and timber, Juneau is inextricably tied to the operation of state government. Tourism is the second

principal economic activity, not fishing or timber. Since not required to satisfy constitutional population distribution concerns, the Board determined that a decision to split the Juneau community may well contravene the constitutional obligation to form districts with the requisite social and economic links.

The decision to retain Juneau within a two-member district also supported the Board's desire to retain the concept of the Iceworm or Inside Passage District. District 2 is designed to facilitate legislative representation of the concerns of the small, rural communities in southeast. Until the 1981 Plan, these communities were merged in districts with dominant urban centers. The Board agreed with the 1981 Board that the political aspirations and interests of these communities would be substantially promoted by joining these communities in one legislative district.

The proposed configuration of District 2 -- the only identified alternative to retain the concept of the Iceworm District -- also facilitates review under the Voting Rights Act of 1965 (Act), as amended, 42 U.S.C. § 1973C. Under the Act, Alaska must submit its proposed reapportionment plan to the United States Department of Justice for review and approval. The Act is intended to preserve the voting prerogatives of minority voters. The proposed District 2 increases the Native population in District 2 from 27.5 percent to 41.9 percent. Importantly, the principal alternative approach in Southeast considered by the

Board, a proposal which essentially divided the region in a horizontal fashion, resulted in a district with a native population of 28.9 percent. 4/

Districting in Southeast on a horizontal basis, however, requires that smaller rural communities be divided between districts anchored by a dominant urban center. The practical voting strength of Native voters may be submerged and diluted where rural Native communities are joined with urban, largely non-Native communities. As a consequence, the horizontal configuration raised a substantial compliance question under the Act. Had the horizontal configuration been adopted, the prospect of prolonged Justice Department review and analysis posed a real concern in the face of the impending election.

To retain the concept of the Iceworm District, to achieve constitutional population distribution, and to meet the standards of the Voting Rights Act, the Board had no option but to include the Metlakatla community within District 2. In prior reapportionment plans, Metlakatla has been joined with

---

4/ Under this proposal, District 1 would be a two-member house district which would include Ketchikan, Metlakatla, the communities on Prince of Wales Island, and Wrangell. House District 2, a single-member district, would include the communities of Petersburg, Kake, Angoon, Hoonah, Gustavus, Haines, Klukwan, Skagway, and Yakutat. Sitka, Pelican, Elfin Cove, Tenakee, and Port Alexander would be in House District 3, a single-member district, and Juneau would remain a two-member house district.

the Ketchikan area for purposes of legislative representation. While the Board recognizes the tie between the two communities, the Board concluded that the Metlakatla community enjoys a substantial degree of socio-economic interaction with the chain of communities included in District 2. The substantial degree of homogeneous economic interests within the entire district is patent. Most of the communities in District 2, Metlakatla included, are predominantly dependent on commercial fishing and timber harvesting. All rely on the marine highway system as the principal mode of transpor- tion. And, as smaller rural communities, all communities share an interest in the mode in which social services are delivered to areas detached from urban centers. Like Metlakatla, a majority of the District 2 communities are included in Regional Education Attendance Areas for their school system.

The degree of direct social and economic interaction between Metlakatla and the other communities in District 2 is also significant. For example, the Board was advised that the Angoon village corporation, Kootznoowoo, Inc., recently negotiated an agreement under which Metlakatla will process timber harvested at Chomly Sound. It is estimated that in excess of 20 million board feet of timber will be processed under this arrangement in 1984. Similarly, fishing fleets from Klawock and Craig have sold seine fish to Metlakatla for processing at the Metlakatla facility.

The requisite degree of social interaction is also evident. Though not as actively as other communities in District 2, members of the Metlakatla community participate in the Alaska Native Brotherhood and Sisterhood. Metlakatla participates in the activities and programs of the Tlingit-Haida Central Councils. Chapters of other fraternal organizations provide links between the various communities. And, student athletes from Metlakatla participate in an extensive schedule of competition with numerous other southeastern communities.

The Board was mindful of some concerns raised that Metlakatla does not share the same degree of interaction with the balance of the District 2 communities as those communities share with one another. To the extent the Board encountered difficulties in defining greater ties between Metlakatla and the other communities in District 2, the Board found that this difficulty reflected more than anything else the unique nature of the Metlakatla community itself. Metlakatla is in many respects independent from all other communities in Southeast, including Ketchikan. Metlakatla is the only remaining Indian reservation in Alaska, the Annette Islands Reserve. 5/ The governing body of the reservation is the Metlakatla Indian Community. In many

---

5/ The Reservation, established by Congress in 1891, adopted in 1944 a Constitution under section 16 of the Indian Reorganization Act, 25 U.S.C. § 476. Under section 19(a) of the Alaska Native Claims Settlement Act, all reservations, except Metlakatla, were abolished.

respects, Metlakatla's status as the only Indian reservation in Alaska is an important distinguishing feature. The community, which adopted its own constitution in 1944, enjoys the power to perform traditional local government functions. Metlakatla is not subject to state fish and game regulations. The community operates its own judicial system. Many of the substantial services offered by the community are supported by federal, not state, funding. For all these reasons, Metlakatla stands out as a unique community in Southeast, rendering the usual standard of integration with other communities more difficult to ascertain.

In sum, it was the Board's judgment that the section 6 requirement, as well as the requirements of the federal Voting Rights Act, would best be served by including Metlakatla in District 2.

B. Prince William Sound - Kenai Peninsula

The tension between socio-economic factors and population considerations with which the Board was concerned is most apparent in Southcentral Alaska, where one finds Alaska's largest and most modern city at the hub of a communications and transportation network for the communities in the Prince William Sound and the Kenai Peninsula. As a region, the area is more densely populated, more urbanized, and has fewer geographic barriers than any other region in the state. At the same time, the population distribution is such that districts of fairly equal population could not be formed without establishing a

districting link between South Anchorage and some portion of the Kenai Peninsula.

The population of the Kenai Peninsula Borough supports roughly two and three-quarters house seats. Combined with the population of the Prince William Sound communities, principally Cordova, Valdez, and Seward, the region is not sufficiently populated to support four seats, but too populated (+10.2 percent) to be allocated only three seats.

At the urging of Kenai Peninsula Borough residents, one option extensively reviewed by the Board was the establishment of a three-member district including the Kenai Peninsula Borough area, Whittier, and that portion of the Municipality of Anchorage south of Potter Creek. While this approach resolves the Kenai Peninsula districting problem, it would necessitate moving the populations of Valdez and Cordova (approximately 5,500) into the interior districts. The Board determined that distribution of an excess population of this magnitude, roughly 60 percent of a district, across the remaining eleven interior and bush districts was virtually impossible. In attempting to develop a proposal that would have redrawn the interior districts, extreme cultural and economic disparities were apparent. Further, redistricting in rural Alaska would not have avoided the need to redistrict in Southcentral Alaska. Under the Interior redistricting option, few of the election districts from the 1981 Plan would have remained untouched in the extensive redistricting that would have been required.

The board came reluctantly to the conclusion that the configuration which best serves the socio-economic interests of the Southcentral communities and allows the closest approach to population equality is as follows: District 5 (A-B) remains substantially unchanged; District 6, to include Cordova, gives up the Nikiski area; District 7 is redrawn to include Nikiski, Portage, Girdwood, and portions of South Anchorage. This solution yielded the lowest population deviation of all alternatives while avoiding redistricting the entire state or establishing an unwieldy multi-member district. 6/

The inclusion of Nikiski in District 7 was the Board's most difficult decision, and was adopted only after extensive consideration and elimination of the available alternatives. However, the Board was mindful that in the 1981 Plan the North Kenai communities and South Anchorage were included in the same senate district. Most importantly, the Board was convinced that the Nikiski-South Anchorage districting link was supported by substantial social, economic, and political underpinnings.

The area north of the City of Kenai is variously described as "the North Kenai industrial area" or "the Nikiski industrial area." Nikiski is the home of the oil, gas, and petrochemical processing industry in Alaska. Nikiski, like South

---

6/ As we discuss, infra, these changes in South Anchorage necessitated other changes in Districts 8-15 and in Senate district pairings.

Anchorage, is clearly an urbanized area within the Alaska context. And while Nikiski's ties to Kenai-Soldotna are undeniably close, the economic division is also patent.

The industrial base in Nikiski is unlike that in any other area of the Peninsula. One publication described "a definite geographic difrerentiation in economic function among the main centers of population [on the Kenai Peninsula]." 7/ Currently, the fishing and recreation sectors are the principal economic activities in the South Peninsula. Kenai-Soldotna is the center for governmert and education, as well as a wide variety of oil and gas industry support firms. In Nikiski, on the other hand, the economic centerpieces are a petrochemical complex manufacturing fertilizer on a world market scale, a liquified natural gas plant, and two refineries. 8/ Similarly, in contrast to the dock facilities in Kenai, which receive general cargo and fresh fish, the marine facilities at Nikiski are designed and operated to meet the needs of the oil and gas industry exclusively, with hundreds of thousands of tons of bulk liquids moving inbound and outbound.

7/ The Alaska Factbook Series, Kenai and Soldotna Factbook, 1983.

8/ The major proportion of refinery output is transported by pipeline to Anchorage. Kenai Peninsula Borough Port and Harbor Demand and Feasibility Study (1979) 2-49.

The distinctive economic focus of Nikiski, and the resultant ties to Anchorage, are likely to remain the dominant characteristic of the area. A $100 million expansion of the Tesoro Refinery is projected to begin this year. Construction is slated to begin in 1987 on Pacific Alaska's gas liquification plant, a $1.5 billion project. The planning, financing, and development of a project of this magnitude in Alaska inevitably creates links to Anchorage, the financial center of the state.

Principal news and entertainment media for Nikiski (and the rest of the Peninsula) are Anchorage based. Television signals from Anchorage reach Nikiski via translator. The Anchorage newspapers, as well as the Peninsula Clarion, are available in Nikiski. Nikiski has no local radio station.

Air transportation from Anchorage to Nikiski via Kenai is readily available. To Kenai, Alaska Airlines has eight flights per day Monday - Friday, and six flights per day on weekends. The same number of flights return to Anchorage. Southcentral Air runs 22 round trip flights between Kenai and Anchorage daily, and AAI runs flights to and from Anchorage almost hourly. In addition, the South Anchorage area and the North Kenai area are connected by the Seward and Sterling Highways.

Any analysis of relative social and economic integration of District 7 must also reflect the lack of available alternatives. The relocation of Cordova into District 6 resulted

in an unacceptably large population imbalance in the Southcentral area. Some revisions were required in order to satisfy federal constitutional standards of population equality. And, due to the several factors discussed earlier, the only identifiable way to balance the population distribution while minimizing the number of changes made to the overall 1981 Plan was to form a district which joined a portion of South Anchorage with a portion of the Kenai Peninsula.

The Board did consider the creation of a four-member district comprised of proposed Districts 5 (Kenai-Cook Inlet), 6 (Prince William Sound-Kenai), and 7 (Nikiski-South Anchorage) as a response to the specific concerns of the Nikiski area. Establishment of a multi-member district solely to achieve population parity, particularly a district which does not conform to political subdivision boundaries, may raise equal protection concerns. Also, the multi-member district would simply recast, not resolve, the social and economic integration concerns.

Finally, it warrants emphasis that the Nikiski-South Anchorage districting link is no less a problem than was the case under the 1981 Plan. The Board recognizes that Nikiski shares a strong link to the communities of Kenai and Soldotna. Yet under the 1981 Plan, Nikiski was separated from these communities, and instead placed within a district which included such communities as Seward and Valdez. The nature of economic activity in Nikiski, the extensive network of transportation links between Nikiski-Kenai and Anchorage, and the recreational ties between

Kenai and Anchorage, are factors which demonstrate that Nikiski's tie to South Anchorage is stronger in many respects than the tie between Nikiski and the communities in House District 6 under the 1981 Plan.

C. Anchorage

The Board quickly became aware that domino effect put into motion by resolution of the Cordova problem simply could not be contained to one or two districts only. Further adjustments were required to satisfy the constitutional standard of equal population. The relocation of Cordova from District 2 to District 6, which in turn required the establishment of the North Kenai-South Anchorage district, ultimately resulted in an increase of 2,679 people in South Anchorage which had to be dispersed throughout the Anchorage area to accommodate population distribution considerations.

At the same time, a new and unanticipated problem in North Anchorage, causing similar unavoidable reverberations in other districts from the 1981 Plan, was created by the corrected census data in the Eagle River area, which added an additional 1,414 persons. These influences were so substantial from both the south and the north that ultimately all of the Anchorage districts were affected to some extent.

Redistricting in a densely populated area is at once easier and more difficult than in less urbanized areas of the state. The dense concentration of population in an urban center

makes it difficult, and at times impossible, to reallocate only a small segment of population. This problem was further aggravated due to the manner in which the census data was available for use by the Board. On the other hand, a balancing factor easing the redistricting task in Anchorage was that the standard of economic and social integration has few limiting consequences within the Anchorage area, a principle previously recognized by the Alaska Supreme Court. 9/

The Board developed numerous proposals for Anchorage districts, all of which were released for public review and comment. Ultimately, the Board adopted districts which generally conform with the boundaries of the Anchorage Community Councils and/or Subcommunity Planning Districts. The councils serve to varying degree as an accessible forum to address neighborhood issues. Establishment of legislative districts which respect the boundaries of these local units to the extent possible thus offers the various Anchorage communities an effective bridge between neighborhood and statewide representation.

The map of the community council boundaries and the subcommunity boundaries are included with this Report. In most instances, the proposed district configurations incorporate the boundaries of the neighborhood councils. While exact alignment was not possible due to population equality requirements, the

---

9/ See Groh v. Egan, 526 P.2d at 878.

Board made a special effort to accommodate the boundaries of the most active of the local councils, such as Hillside (District 8), Oceanview (District 7), Sand Lake (District 9), Spenard (District 11), Turnagain (District 10), and Fairview (District 12). 10/

In addition to its concern for neighborhood council boundaries, the Board also attempted to establish districts which most promoted the social integration within the district. The revisions necessary due to the census data corrections is illustrative. To correct the population imbalance in District 15, the Board relocated the Elmendorf Air Force Base area to the Mountain View/North Muldoon district. Only 7.7 percent of the air force personnel who do not reside on the Elmendorf base reside in the Eagle River-Chugiak area. In contrast, over 50 percent of the off-base personnel and their dependents live in the Mountain View-North Muldoon areas east of Merrill Field and north of Northern Lights Boulevard. 11/

10/ In response to testimony received during public hearings in Anchorage, the Board made some adjustments to district boundaries to place the majority of the Fairview Community Council in District 12, and the Russian Jack Community Council into District 13.

11/ This data obtained from The Final Report -- Design and Implementation of Alaska 1980 Reapportionment Data Collection Effort, August 29, 1980, prepared by Dr. John A. Kruse of The Institute of Social and Economic Research, University of Alaska.

D. Senate Districts

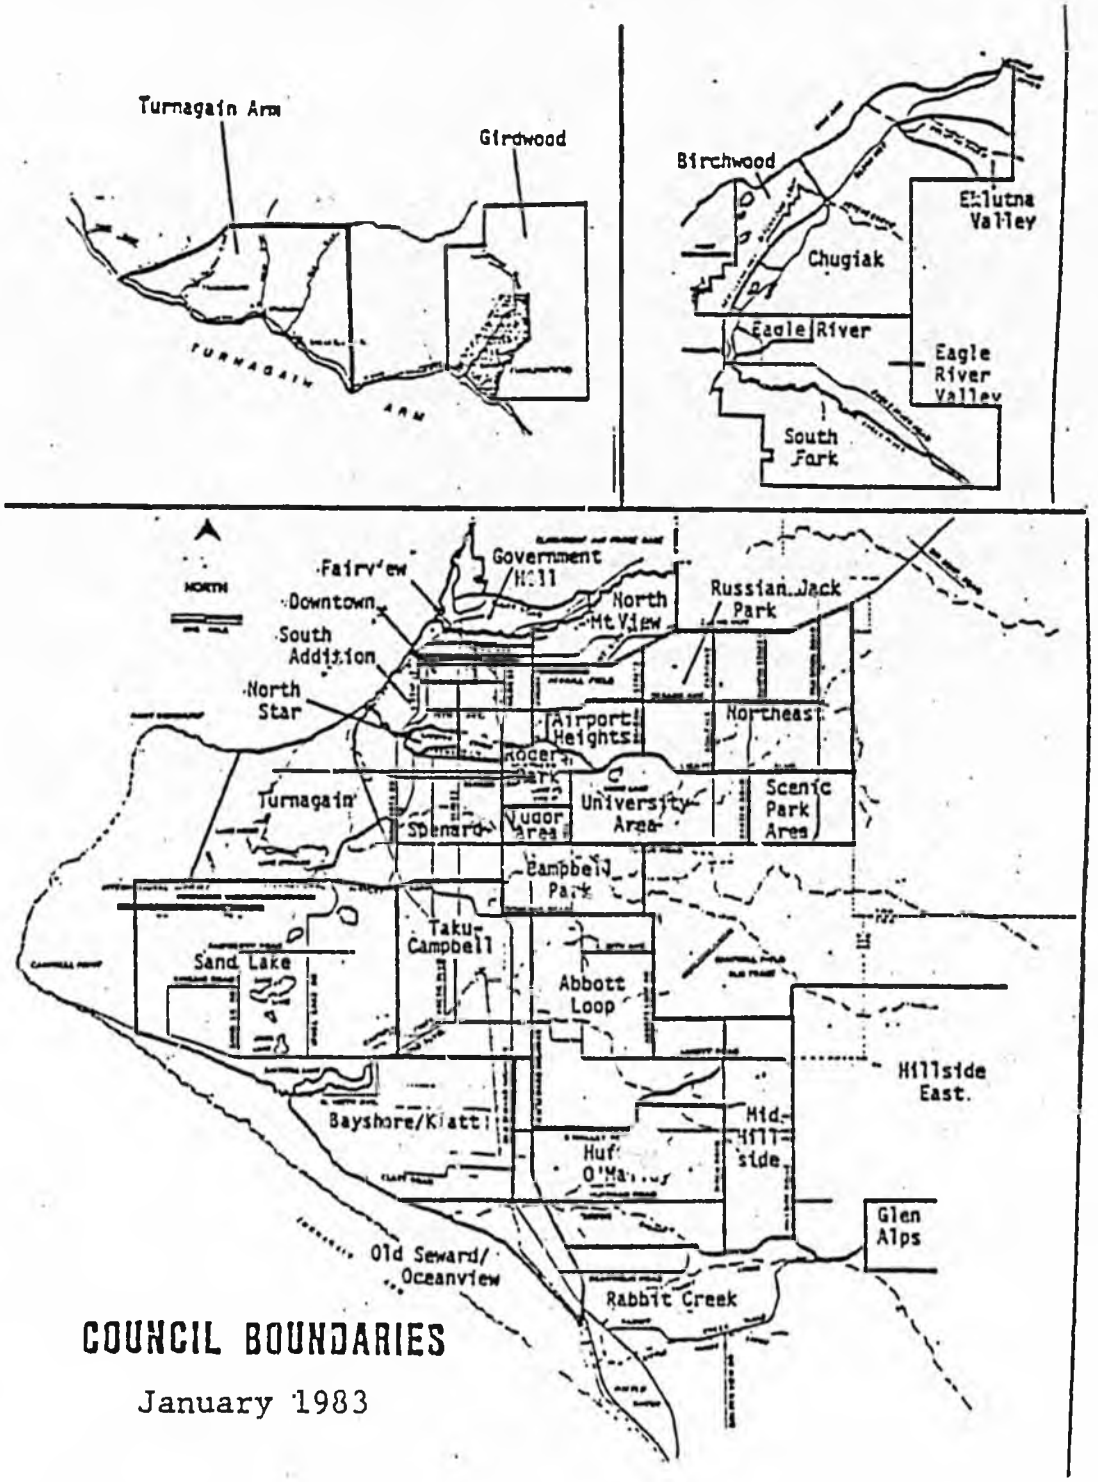
Once the Board had made tentative decisions concerning revisions to house district boundaries, the board circulated several options for possible senate district configurations for public review and comment. There were numerous opportunities for public testimony through meetings, hearings, and teleconferences.

In Anchorage, the Board received extensive public comment in favor of single-member senate districts. Although the Board agreed with the concept of single-member districts, the Board concluded that rejection of the two-member configuration established under the 1981 Plan would be beyond the scope of its mandate to propose amendments to the Plan which rectify the problems identified in the Carpenter decision. As a consequence, the Board proposes two-member senate districts within the Anchorage area.

The Board also received extensive testimony regarding the senate district configuration in the Southcentral areas surrounding Anchorage. Under the 1981 Plan, Districts 5, 6, and 7 were combined into a two-member senate district. The testimony received from residents of the south coast communities expressed dissatisfaction with a two-member district dominated by the Kenai Peninsula population centers. Residents of the scuth coast communities cogently argued that the Prince William Sound communities do not share common interests with the Kenai Peninsula communities.

The Board responded to these concerns through establishment of one single-member senate district for District 5, and one for Districts 6 and 7. Upon closer examination, however, the single-member senate district approach in Districts 6 and 7 not only failed to respond to the concerns of the Prince William Sound communities, but it harbored the potential to disrupt the balance drawn under the 1981 Plan between senate representation on a regional basis and representation of the Anchorage area. This problem reflects the disproportionate growth of the South Anchorage portion of District 7. Population growth projections available to the Board indicate that if present population trends continue, the South Anchorage area would effectively dominate a senate district comprised of Districts 6 and 7. 12/ The likely consequence would thus be the submergence of the voting strength of the Prince William Sound communities and, of greater concern, the creation of an additional "Anchorage" senate seat.

To respond to both the dissatisfaction with the present senate district configuration (5,6,7) and the desire to retain the balance between regional and Anchorage senate representation, the Board proposes a two-member senate district comprised of

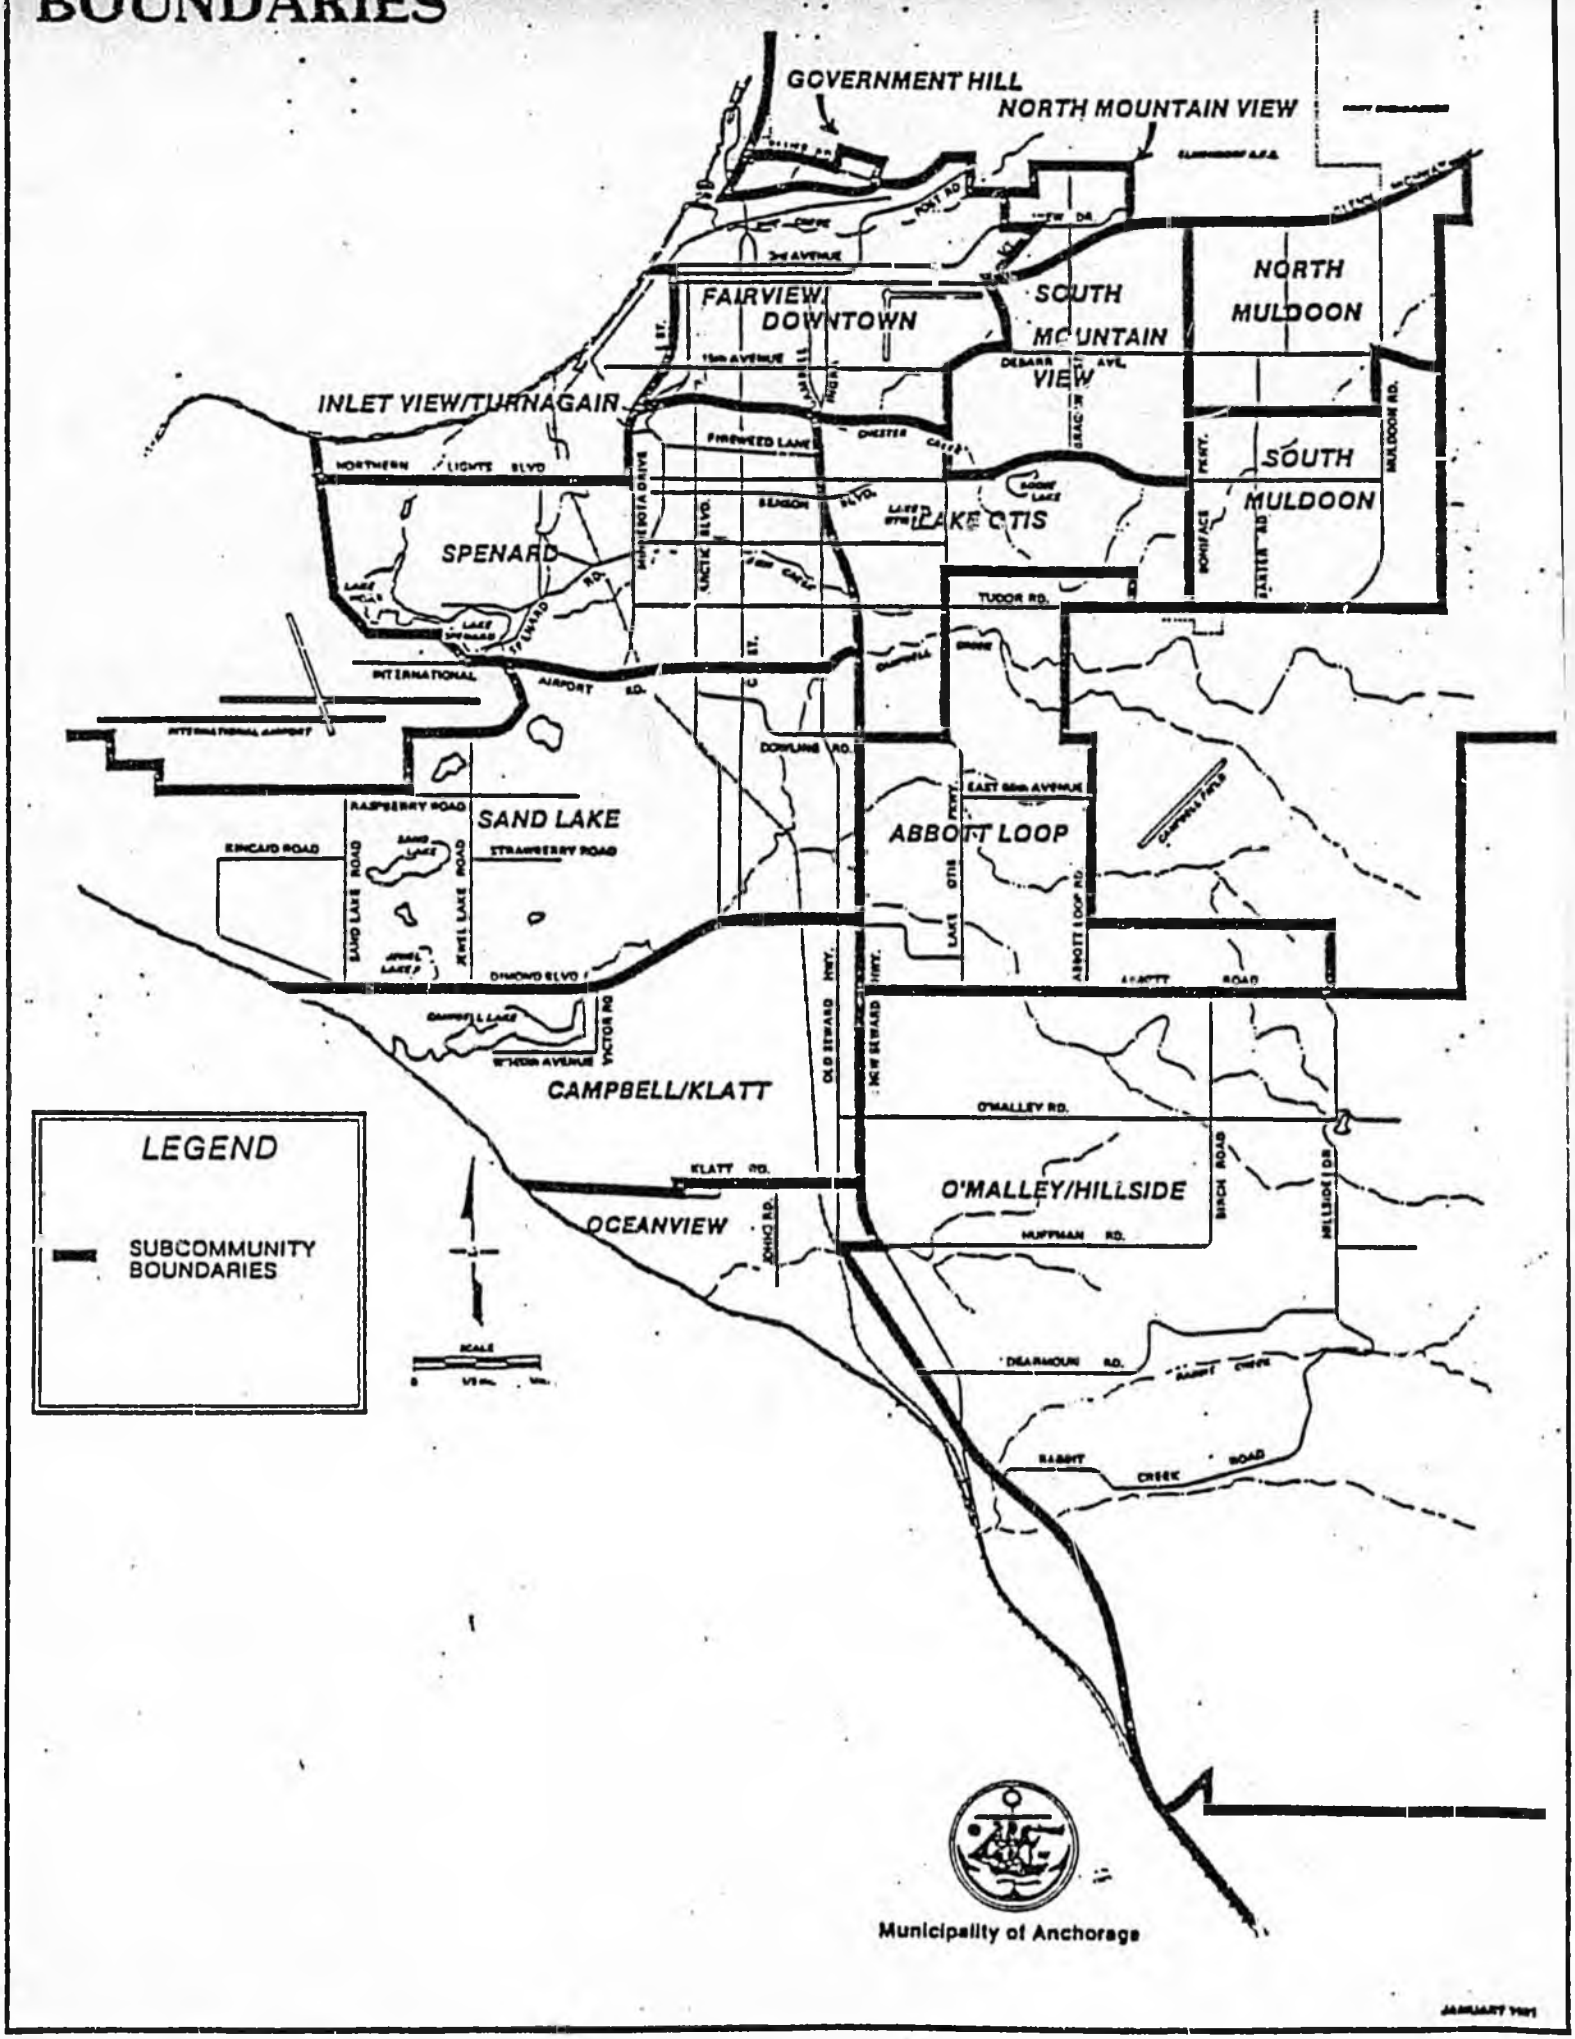


---

12/ Figures available from the Anchorage Planning Department establish that Census Tract 28.02 (District 7) is one of the fastest growing areas in Anchorage. The increase in population in this area has already reached the municipality's population projection for 1985.

Districts 6, 7 and 16. 13/ In substantial part, proposed Senate District E recreates the historic link for purposes of senate district configuration between the Matanuska-Susitna Borough and the Prince William Sound. Importantly, the overwhelming testimony presented to the Board supported this two-member senate district composed of Districts 6, 7 and 16. Without exception, testimony received on behalf of the Matanuska-Susitna Borough and from such communities as Valdez, Cordova, Whittier, and Seward supported a senate district of Districts 6, 7 and 16. In contrast, residents of the Kenai areas presented the only testimony in opposition to the proposal.

Alignment of Districts 6, 7 and 16 into a two-member senate district affords a strong foundation for regional senate representation. The bulk of the senate district population is found in communities in which the economic focus is independent of Anchorage in some respects, substantially intertwined in others. For the most part, the communities in Senate District E share a common communication and transportation network.



13/ Board Member Richard Borer dissents from this proposal, and instead supports a single-member senate district of Districts 6 and 7.

SUBCOMMUNITY BOUNDARIES

E. Scope of Redistricting

Modifying the 1981 Plan to accommodate the relocation of the Cordova areas proved to be a demanding task. The Board was also sensitive to the concern that repeated redistricting proves disruptive to the legislative process and to the affected voters. For that reason, the Board attempted to accomplish its mandate with only modest redistricting. The following table demonstrates the modest scope of redistricting provided in this Plan.

CHANGES IN CONSTITUENCY
HOUSE

18-27	No Change	No Change	100% (old) 0% (new)	No Change	No Change

As illustrated in the table, 12 of the electoral districts are unchanged in all respects. In Southeastern Alaska, the necessary revision was accomplished through the relocation of only two communities, Metlakatla and Hoonah. While there is doubtless a substantial affect on these communities, Southeast as a region is substantially unchanged. Even in the Southcentral region, where the confluence of numerous factors resulted in the more extensive redistricting, House Districts 5, 12, and 17 were changed by less than 3 percent. Only a single House District (District 10) had as much as a majority of the former district relocated. In most

instances within the Anchorage area, the new districts contain at least 60 percent of the district established under the 1981 Plan.

The scope of redistricting is even less extensive when senate districts are considered, as shown in the following table.

CHANGES IN CONSTITUENCY

* Up for election in 1984

In Southeast, 100 percent of the population in Senate Districts A and C was also in those districts in the 1981 Plan. Senate District B retains 93 percent of the population from the old district. Senate District D is made up of 100 percent of the population within the previous district. The most substantial change occurs in Senate District E, which becomes a two-member senate district. Fifty percent of the district was included in the former single-member district in the 1981 Plan. Five of the senate districts are unchanged. Four are only slightly revised, and the four Anchorage senate districts retain between 67 percent and 79 percent of the population of the 1981 districts.

IV. CONCLUSION

The proposals adopted by the Board and detailed in this Report are, in the opinion of the Board, the fewest revisions to the 1981 Reapportionment Plan necessary to obtain a proper balance between the various legal standards and policy concerns which must be addressed in the reapportionment process.

The difficulties confronted by the Board in formulating this Plan prompt two additional recommendations. The Board first recommends the adoption of procedures to improve the cooperation between the state and the Bureau of the Census. Oftentimes, the census data were presented to the state in a manner which exacerbated the inevitable difficulties in reapportionment. The Board further recommends that the Governor and the Alaska Legislature undertake a comprehensive review of article VI of the Alaska Constitution. Evolving legal standards have invalidated many of the provisions in article VI, and the remaining constitutional standards are exceedingly difficult to apply in a consistent fashion across the state.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M January 26, 1984

SUBJECT: Reapportionment of the legislature (HJR 53)

TO: Representative Mitch Abood
Chairman, House State Affairs Committee

FROM: Richard A. Bradley
Legislative Counsel

You have requested a sectional analysis of the above described resolution.

As a preliminary matter, I must advise you that a sectional analysis or summary of a resolution should not be considered an authoritative interpretation of the resolution and the resolution itself is the best statement of its contents. If you would like an interpretation of the resolution as it may apply to a particular set of circumstances, please address a specific request to this office.

To some extent, the amendments proposed in this resolution are unusual to the extent that the changes contained in the resolution may confirm existing understandings of the constitutionally required framework for the reapportionment of the Alaska legislature; the Alaska Supreme Court has been obliged to rewrite these provisions under the mandates received from the U.S. Supreme Court in a series of reapportionment decisions delivered by the Supreme Court. See, among other decisions, Baker v. Carr, 369 U.S. 186 and Reynolds v. Sims, 377 U.S. 533. To that extent, the language does not so much indicate a change in what may be expected after ratification of the proposed amendments but rather an affirmative confirmation of existing legal and constitutional reality. The Alaska Supreme Court has invited the legislature to propose conforming amendments several times in its reapportionment decisions. See Wade v. Nolan, 414 P.2d 689 (Alaska 1966) Egan v. Hammond, 502 P.2d 856 (Alaska 1972), Groh v. Egan, 526 P.2d 863 (Alaska 1974), and Carpenter v.Hammond, 667 P.2d 1204 (Alaska 1983).

In a few instances, the sponsor of the resolution has sought to adopt improvements in the constitutional framework.

I will indicate in these comments the nature of the changes proposed.

Section 1 of the resolution proposes an amendment to art. VI, section 1 of the Alaska Constitution.

The section provides that members of the house are elected from the districts established in the most recent reapportionment of the house. The material from the last sentence that is deleted has been obsolete since the first reapportionment of the House of Representatives in 1960; the material added to the end of the first sentence replaces that language.

The second full sentence of the section that is added by this resolution represents a policy choice by the sponsor; as you will recognize, a number of the members of the house are now elected from designated seats in multi- member districts. It is generally agreed that the gubernatorial power to reapportion in Alaska grants the governor the authority to establish single member districts; the governors have rearranged districts probably from the first reapportionment and the governors have reduced the number of candidates elected from a single district from the high of 14 in Anchorage after the 1960 reapportionment to the present formulation.

The proposed amendment mandates single member house districts in all cases.

Section 2 of the resolution amends art. VI, section 2 of the Alaska Constitution.

The section provides that members of the senate are elected from districts that are established under the most recent reapportionment of the senate. The material from the last sentence that is deleted has been obsolete since the first reapportionment of the Senate in 1964; the material added at the end of the first sentence replaces that language.

Just as each house member will be elected under the revised Section 1 to a single member district, each senator will be elected from a senate district that is composed of two house districts. This material represents a policy goal requested

by the sponsor of the resolution. To a some extent, I believe that this formulation represents the existing reality; the language mandates that result.

Section 3 of the resolution amends art. VI, section 3 of the Alaska Constitution.

The amendments to the first sentence of the section conform the language of the section to the understanding of the intent of the constitutional convention. The Alaska Supreme Court concluded after Governor Egan reapportioned the senate in 1964 that if the drafters of the Alaska Constitution had understood that the senate also must represent people and not geographic areas, that they would have given the governor the authority to reapportion the senate. Wade v. Nolan, 414 P.2d 689 (Alaska 1966).

The change from "based upon civilian population" to "based upon the best available evidence of the resident population" results from Egan v. Hammond, 502 P.2d 856 (Alaska 1972) and Groh v. Egan, 526 P.2d 863 (Alaska 1974); the Alaska Supreme Court held that exclusion of the military from the population base without consideration whether the individual member of the military was a resident of the state was irrational.

My understanding of the reason for the deletion of the reference to the census was simply that the sponsor wanted the reapportionment board able to use the "best available evidence", whether that was the census reports or something else. As suggested, that represents a policy goal sought by the sponsor.

Note that sections 4 and 5 of art. VI are proposed for repeal. See resolution section 7.

Section 4 established an obsolete concept of reapportionment based on "equal proportions." Section 5 permitted the combining of house districts in certain instances. Both concepts have been obsolete since the original U. S. Supreme Court decisions mandating "one person, one vote."

Section 4 of the resolution amends art. VI, section 6 of the Alaska Constitution.

The amendment makes clear in the first sentence that it applies to senate as well as house reapportionment.

The third sentence is deleted from the section but note that its content is carried into the new subsec. (b) in Section 5 of the resolution.

Section 5 of the resolution amends art. VI, section 6 of the Alaska Constitution by adding a new subsection.

It provides that each "election district" for the election of house members and each senate district shall each contain "a population as nearly equal as possible." The last two sentences state a mathematical requirement for deviations from the ideal district population.

Note that section 7 of art. VI has been repealed. See resolution section 7.

Section 7 dealt with limitations on the modification of senate district boundaries. It has been obsolete since 1964.

Section 6 of the resolution amends art. VI, section 8 of the Alaska Constitution.

The amendment recognizes that that there have not been regional senate districts since the 1964 reapportionment.

As noted above, secs. 4, 5, and 7 of art. VI are proposed for repeal in section 7 of the resolution.

Also proposed for repeal in section 7 is art. XIV of the Alaska Constitution. Art. XIV establishes a reapportionment schedule: the listing of the various house and senate districts and their boundaries.

It should be understood that the material contained within art. XIV will continue to be necessary but since it is not truly constitutional, it will become a footnote to the provisions of art. VI, presumably secs. 1 and 2.

It is not constitutional in the sense that its provisions will necessarily receive amendment in each reapportionment but will take effect because of the reapportionment proclamation of the governor and not because they have been adopted in a constitutional amendment proposed by the legislature and ratified by the qualified voters of the state.

Section 8 of the resolution is standard language directing the election officers to put the resolution before the qualified voters of the state at the next general election in conformity with the constitution and election laws.

The amendments would become a part of the constitution 30 days after the certification of the election results by the lieutenant governor. See art. XIII, sec. 1. The implementation of the provisions would not be called for until after the reporting of the next decennial census, after 1990.

If I may be of further assistance, please advise.

OFFICE OF THE GOVERNOR

MEMORANDUM

DATE: February 10, 1984

TO: House Judiciary Committee

FROM: Mary Lou Meiners, Director
Division of Elections

RE: CSHJR 53, Relating to Reapportionment

This resolution would place six amendments to the Constitution on the 1984 general election ballot dealing with reapportionment and repeal three articles.

My reading of the resolution is that, should the voters approve any or all of these amendments, they would take effect at the next reapportionment in 1992. (Otherwise, a new reapportionment board must be convened in 1985 to redraw election districts and apply those amendments that passed. This latter scenario is probably not the sponsor's intent.)

The substantive changes proposed are contained in Sections 1 and 2 of the resolution, from lines 8 to 28 on page 1. This would require that any future reapportionment create only single member districts for each member of the House of Representatives. This would prohibit, for instance, the present arrangements in Districts 1, 4, 5, 8-16, and 20. I urge you to closely examine the population and geographic reasons for the two-member-district method of apportionment and consider the consequences and problems associated with single member districts. Populations may be unevenly spread over the district, by subdivision or town.

However, before constraints are placed on future reapportionment boards that could have unfortunate consequences, please do analyze these cited two member districts and determine whether they can or should be divided into single districts.

ARTICLE VI

LEGISLATIVE APPORTIONMENT

Election Districts

SECTION 1. Members of the house of representatives shall be elected by the qualified voters of the respective election districts. Until reapportionment, election districts and the number of representatives to be elected from each district shall be as set forth in Section 1 of Article XIV.

Senate Districts

SECTION 2. Members of the senate shall be elected by the qualified voters of the respective senate districts. Senate districts shall be as set forth in Section 2 of Article XIV, subject to changes authorized in this article.

Reapportionment of House

SECTION 3. The governor shall reapportion the house of representatives immediately following the official reporting of each decennial census of the United States. Reapportionment shall be based upon civilian population within each election district as reported by the census.

Method

SECTION 4. Reapportionment shall be by the methods of equal proportions, except that each election district having the major fraction of the quotient obtained by dividing total civilian population by forty shall have one representative.

Combining Districts

SECTION 5. Should the total civilian population within any election district fall below one-half of the quotient, the district shall be attached to an election district within its senate district, and the reapportionment for the new district shall be determined as provided in Section 4 of this article.

Redistricting

SECTION 6. The governor may further redistrict by changing the size and area of election districts, subject to the limitations of this article. Each new district so created shall be formed of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic area. Each shall contain a population at least equal to the quotient obtained by dividing the total civilian population by forty. Consideration may be given to local government boundaries. Drainage and other geographic features shall be used in describing boundaries wherever possible.

Modification of Senate Districts

SECTION 7. The senate districts, described in Section 2 of Article XIV, may be modified to reflect changes in election districts. A district, although modified, shall retain its total number of senators and its approximate perimeter.

Reapportionment Board

SECTION 8. The governor shall appoint a reapportionment board to act in an advisory capacity to him. It shall consist of five members, none of whom may be public employees or officials. At least one member each shall be appointed from the Southeastern, Southcentral, Central and Northwestern Senate Districts. Appointments shall be made without regard to political affiliation. Board members shall be compensated.

Organization

SECTION 9. The board shall elect one of its members chairman and may employ temporary assistants. Concurrence of three members is required for a ruling or determination, but a lesser number may conduct hearings or otherwise act for the board.

Reapportionment Plan and Proclamation

SECTION 10. Within ninety days following the official reporting of each decennial census, the board shall submit to the governor a plan for reapportionment and redistricting as provided in this article. Within ninety days after receipt of the plan, the governor shall issue a proclamation of reapportionment and redistricting. An accompanying statement shall explain any change from the plan of the board. The reapportionment and redistricting shall be effective for the election of members of the legislature until after the official reporting of the next decennial census.

Enforcement

SECTION 11. Any qualified voter may apply to the superior court to compel the governor, by mandamus or otherwise, to perform his reapportionment duties or to correct any error in redistricting or reapportionment. Application to compel the governor to perform his reapportionment duties must be filed within thirty days of the expiration of either of the two ninety-day periods specified in this article. Application to compel correction of any error in redistricting or reapportionment must be filed within thirty days following the proclamation. Original jurisdiction in these matters is hereby vested in the superior court. On appeal, the cause shall be reviewed by the supreme court upon the law and the facts.

ARTICLE VII

HEALTH, EDUCATION, AND WELFARE

Public Education

SECTION 1. The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

State University

SECTION 2. The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

Board of Regents

SECTION 3. The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. The board shall, in accordance

with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

Public Health

SECTION 4. The legislature shall provide for the promotion and protection of public health.

Public Welfare

SECTION 5. The legislature shall provide for public welfare.

ARTICLE VIII

NATURAL RESOURCES

Statement of Policy

SECTION 1. It is the policy of the State to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest.

General Authority

SECTION 2. The legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the State, including land and waters, for the maximum benefit of its people.

Common Use

SECTION 3. Wherever occurring in the natural state, fish, wildlife, and waters are reserved to the people for common use.

Sustained Yield

SECTION 4. Fish, forests, wildlife, grasslands, and all other replenishable resources belonging to the State shall be utilized, developed, and maintained on the sustained yield principle, subject to preferences among beneficial uses.

Facilities and Improvements

SECTION 5. The legislature may provide for facilities, improvements, and services to assure greater utilization, development, reclamation, and settlement of lands, and to assure fuller utilization and development of the fisheries, wildlife, and waters.

State Public Domain

SECTION 6. Lands and interests therein, including submerged and tidal lands, possessed or

California Reapportionment Proposal

RELEASE: Immediate

#583

COUNCIL OF STATE GOVERNMENTS

A proposed legislative constitutional amendment to place the responsibility for reapportionment with a nonpartisan commission of eight state Court of Appeal justices was submitted today to the legislative counsel on behalf of Governor George Deukmejian.

The proposal will be introduced in the legislature in January and fulfills the governor's pledge to recommend a fair and nonpartisan mechanism for redrawing the state's congressional, state Senate, Assembly and Board of Equalization districts.

If approved, California would join 10 states where reapportionment is accomplished by commissions and not by legislative bodies directly affected by it. Jurists are utilized in several states in a backup role to break deadlocks.

If the legislature places the measure on the ballot and it is approved by California voters, the proposal calls for the independent commission---with the assistance of professional staff---to redraw district lines for the 1986 California elections.

Subsequent commissions would be impanelled each ten years to reapportion the state following the decennial federal census.

The constitutional amendment mandates the drawing of districts which provide fair representation for all Californians, including racial, ethnic and language minorities, and which promote meaningful political competition.

The commission would be compelled by the Constitution to create districts which are geographically compact, which minimize the division of cities and ~~counties~~ municipalities, communities, local neighborhoods, villages and which do not favor political parties or legislative incumbents.

The amendment calls for each state Senate district to be composed of two adjacent ~~Assembly~~ Representative districts, ~~and for each Board of Equalization district to be composed of 10 state Senate districts~~. The districts are to be as equal in population as possible.

"In my judgment, the public is frustrated by a reapportionment process which has been motivated by ~~legislative~~ political party self-interest instead of by the demonstrated public desire for fair and competitive districts," the ~~governor~~ Warden said in a statement.

"The public legitimately expects the goal of reapportionment is not to assure that current political parties and office holders have safe seats for a decade," he said. "By taking redistricting out of the hands of the ~~legislature~~ Party System and by asking it be accomplished by respected senior appellate justices, we will have assured the public that the process will be fair, nonpartisan, and as objective as possible."

Later today, the proposed constitutional ame nt also will be submitted as a proposed initiative to the attorney general for preparation of title and summary.

COUNCIL OF STATE GOVERNMENTS
NOV 21 1983
STATES INFORMATION CENTER

The governor said he would prefer that the process be changed by action of the legislature, but in the event the legislature is not responsive an initiative campaign would be undertaken to permit a vote on putting in place the commission before the 1986 elections.

This is how it would work:

Twenty days following voter ratification of the amendment, the Judicial Council will provide to the Secretary of State the names of present state Court of Appeal justices with no previous legislative experience and who have served on the court for more than five years.

The names will be divided into two groups: those appointed by Democratic governors and those appointed by Republican governors.

The amendment directs the president of the University of California or his representative---under the supervision of the Secretary of State---to draw by lot four justices from each group. Additionally, one non-voting member each will be selected by the governor and by the highest ranking constitutional officer of the opposing party. The commission will have professional staff to assist in accomplishing its task in a timely manner.

The commission budget will not exceed one half of the amount spent by the legislature to draft the present legislative districts.

If any vacancy occurs among the voting members, the president of the University of California will be directed to draw a replacement justice by employing the same procedure.

The proposal calls for the commission to hold its initial meeting 20 days later and to select a chairman and vice chairman who were appointed to the judiciary by governors of opposing parties.

After completing an extensive public hearing process, the commission will utilize computers to redraw legislative districts that meet the criteria of the amendment.

Once approved by the commission, the redistricting program could not be amended or invalidated by the legislature. It would be subject to the referendum process and exclusive judicial review by the California Supreme Court.

However, if an impasse exists among the commissioners, the commission will draw by lot to disqualify one voting member in order to break the deadlock. If the impasse continues, another commissioner will be disqualified by lot two days later.

Commission members will receive no salary, but will be compensated for necessary expenses.

NOV 21 1983
STATES INFORMATION CENTER

"It is my hope that the legislature will respond positively to the will of the people who are irritated by the present process—which too often rewards incumbency at the expense of fair representation and meaningful political competition," Deukmejian said.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y · STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

MEMORANDUM January 26, 1984

SUBJECT: Reapportionment of the legislature (HJR 53)

TO: Representative Mitch Abood
Chairman, House State Affairs Committee

FROM: Richard A. Bradley
Legislative Counsel

You have requested a sectional analysis of the above described resolution.

As a preliminary matter, I must advise you that a sectional analysis or summary of a resolution should not be considered an authoritative interpretation of the resolution and the resolution itself is the best statement of its contents. If you would like an interpretation of the resolution as it may apply to a particular set of circumstances, please address a specific request to this office.

To some extent, the amendments proposed in this resolution are unusual to the extent that the changes contained in the resolution may confirm existing understandings of the constitutionally required framework for the reapportionment of the Alaska legislature; the Alaska Supreme Court has been obliged to rewrite these provisions under the mandates received from the U.S. Supreme Court in a series of reapportionment decisions delivered by the Supreme Court. See, among other decisions, Baker v. Carr, 369 U.S. 186 and Reynolds v. Sims, 377 U.S. 533. To that extent, the language does not so much indicate a change in what may be expected after ratification of the proposed amendments but rather an affirmative confirmation of existing legal and constitutional reality. The Alaska Supreme Court has invited the legislature to propose conforming amendments several times in its reapportionment decisions. See Wade v. Nolan, 414 P.2d 689 (Alaska 1966), Egan v. Hammond, 502 P.2d 856 (Alaska 1972), Groh v. Egan, 526 P.2d 863 (Alaska 1974), and Carpenter v. Hammond, 667 P.2d 1204 (Alaska 1983).

In a few instances, the sponsor of the resolution has sought to adopt improvements in the constitutional framework.

I will indicate in these comments the nature of the changes proposed.

Section 1 of the resolution proposes an amendment to art. VI, section 1 of the Alaska Constitution.

The section provides that members of the house are elected from the districts established in the most recent reapportionment of the house. The material from the last sentence that is deleted has been obsolete since the first reapportionment of the House of Representatives in 1960; the material added to the end of the first sentence replaces that language.

The second full sentence of the section that is added by this resolution represents a policy choice by the sponsor; as you will recognize, a number of the members of the house are now elected from designated seats in multi- member districts. It is generally agreed that the gubernatorial power to reapportion in Alaska grants the governor the authority to establish single member districts; the governors have rearranged districts probably from the first reapportionment and the governors have reduced the number of candidates elected from a single district from the high of 14 in Anchorage after the 1960 reapportionment to the present formulation.

The proposed amendment mandates single member house districts in all cases.

Section 2 of the resolution amends art. VI, section 2 of the Alaska Constitution.

The section provides that members of the senate are elected from districts that are established under the most recent reapportionment of the senate. The material from the last sentence that is deleted has been obsolete since the first reapportionment of the Senate in 1964; the material added at the end of the first sentence replaces that language.

Just as each house member will be elected under the revised Section 1 to a single member district, each senator will be elected from a senate district that is composed of two house districts. This material represents a policy goal requested

by the sponsor of the resolution. To a some extent, I believe that this formulation represents the existing reality; the language mandates that result.

Section 3 of the resolution amends art. VI, section 3 of the Alaska Constitution.

The amendments to the first sentence of the section conform the language of the section to the understanding of the intent of the constitutional convention. The Alaska Supreme Court concluded after Governor Egan reapportioned the senate in 1964 that if the drafters of the Alaska Constitution had understood that the senate also must represent people and not geographic areas, that they would have given the governor the authority to reapportion the senate. Wade v. Nolan, 414 P.2d 689 (Alaska 1966).

The change from "based upon civilian population" to "based upon the best available evidence of the resident population" results from Egan v. Hammond, 502 P.2d 856 (Alaska 1972) and Groh v. Egan, 526 P.2d 863 (Alaska 1974); the Alaska Supreme Court held that exclusion of the military from the population base without consideration whether the individual member of the military was a resident of the state was irrational.

My understanding of the reason for the deletion of the reference to the census was simply that the sponsor wanted the reapportionment board able to use the "best available evidence", whether that was the census reports or something else. As suggested, that represents a policy goal sought by the sponsor.

Note that sections 4 and 5 of art. VI are proposed for repeal. See resolution section 7.

Section 4 established an obsolete concept of reapportionment based on "equal proportions." Section 5 permitted the combining of house districts in certain instances. Both concepts have been obsolete since the original U. S. Supreme Court decisions mandating "one person, one vote."

Section 4 of the resolution amends art. VI, section 6 of the Alaska Constitution.

The amendment makes clear in the first sentence that it applies to senate as well as house reapportionment.

The third sentence is deleted from the section but note that its content is carried into the new subsec. (b) in Section 5 of the resolution.

Section 5 of the resolution amends art. VI, section 6 of the Alaska Constitution by adding a new subsection.

It provides that each "election district" for the election of house members and each senate district shall each contain "a population as nearly equal as possible." The last two sentences state a mathematical requirement for deviations from the ideal district population.

Note that section 7 of art. VI has been repealed. See resolution section 7.

Section 7 dealt with limitations on the modification of senate district boundaries. It has been obsolete since 1964.

Section 6 of the resolution amends art. VI, section 8 of the Alaska Constitution.

The amendment recognizes that that there have not been regional senate districts since the 1964 reapportionment.

As noted above, secs. 4, 5, and 7 of art. VI are proposed for repeal in section 7 of the resolution.

Also proposed for repeal in section 7 is art. XIV of the Alaska Constitution. Art. XIV establishes a reapportionment schedule: the listing of the various house and senate districts and their boundaries.

It should be understood that the material contained within art. XIV will continue to be necessary but since it is not truly constitutional, it will become a footnote to the provisions of art. VI, presumably secs. 1 and 2.

It is not constitutional in the sense that its provisions will necessarily receive amendment in each reapportionment but will take effect because of the reapportionment proclamation of the governor and not because they have been adopted in a constitutional amendment proposed by the legislature and ratified by the qualified voters of the state.

Section 8 of the resolution is standard language directing the election officers to put the resolution before the qualified voters of the state at the next general election in conformity with the constitution and election laws.

The amendments would become a part of the constitution 30 days after the certification of the election results by the lieutenant governor. See art. XIII, sec. 1. The implementation of the provisions would not be called for until after the reporting of the next decennial census, after 1990.

If I may be of further assistance, please advise.

MEMORANDUM

DATE: February 10, 1984

TO: House Judiciary Committee

FROM: Mary Lou Meiners, Director
Division of Elections

RE: CSHJR 53, Relating to Reapportionment

This resolution would place six amendments to the Constitution on the 1984 general election ballot dealing with reapportionment and repeal three articles.

My reading of the resolution is that, should the voters approve any or all of these amendments, they would take effect at the next reapportionment in 1992. (Otherwise, a new reapportionment board must be convened in 1985 to redraw election districts and apply those amendments that passed. This latter scenario is probably not the sponsor's intent.)

The substantive changes proposed are contained in Sections 1 and 2 of the resolution, from lines 8 to 28 on page 1. This would require that any future reapportionment create only single member districts for each member of the House of Representatives. This would prohibit, for instance, the present arrangements in Districts 1, 4, 5, 8-16, and 20. I urge you to closely examine the population and geographic reasons for the two-member-district method of apportionment and consider the consequences and problems associated with single member districts. Populations may be unevenly spread over the district, by subdivision or town.

However, before constraints are placed on future reapportionment boards that could have unfortunate consequences, please do analyze these cited two member districts and determine whether they can or should be divided into single districts.

ARTICLE VI

LEGISLATIVE APPORTIONMENT

Election Districts

SECTION 1. Members of the house of representatives shall be elected by the qualified voters of the respective election districts. Until reapportionment, election districts and the number of representatives to be elected from each district shall be as set forth in Section 1 of Article XIV.

Senate Districts

SECTION 2. Members of the senate shall be elected by the qualified voters of the respective senate districts. Senate districts shall be as set forth in Section 2 of Article XIV, subject to changes authorized in this article.

Reapportionment of House

SECTION 3. The governor shall reapportion the house of representatives immediately following the official reporting of each decennial census of the United States. Reapportionment shall be based upon civilian population within each election district as reported by the census.

Method

SECTION 4. Reapportionment shall be by the methods of equal proportions, except that each election district having the major fraction of the quotient obtained by dividing total civilian population by forty shall have one representative.

Combining Districts

SECTION 5. Should the total civilian population within any election district fall below one-half of the quotient, the district shall be attached to an election district within its senate district, and the reapportionment for the new district shall be determined as provided in Section 4 of this article.

Redistricting

SECTION 6. The governor may further redistrict by changing the size and area of election districts, subject to the limitations of this article. Each new district so created shall be formed of contiguous and compact territory containing as nearly as practicable a relatively integrated socio-economic area.

Each shall contain a population at least equal to the quotient obtained by dividing the total civilian population by forty. Consideration may be given to local government boundaries. Drainage and other geographic features shall be used in describing boundaries wherever possible.

Modification of Senate Districts

SECTION 7. The senate districts, described in Section 2 of Article XIV, may be modified to reflect changes in election districts. A district, although modified, shall retain its total number of senators and its approximate perimeter.

Reapportionment Board

SECTION 8. The governor shall appoint a reapportionment board to act in an advisory capacity to him. It shall consist of five members, none of whom may be public employees or officials. At least one member each shall be appointed from the Southeastern, Southcentral, Central and Northwestern Senate Districts. Appointments shall be made without regard to political affiliation. Board members shall be compensated.

Organization

SECTION 9. The board shall elect one of its members chairman and may employ temporary assistants. Concurrence of three members is required for a ruling or determination, but a lesser number may conduct hearings or otherwise act for the board.

Reapportionment Plan and Proclamation

SECTION 10. Within ninety days following the official reporting of each decennial census, the board shall submit to the governor a plan for reapportionment and redistricting as provided in this article. Within ninety days after receipt of the plan, the governor shall issue a proclamation of reapportionment and redistricting. An accompanying statement shall explain any change from the plan of the board. The reapportionment and redistricting shall be effective for the election of members of the legislature until after the official reporting of the next decennial census.

Enforcement

SECTION 11. Any qualified voter may apply to the superior court to compel the governor, by mandamus or otherwise, to perform his reapportionment duties or to correct any error in redistricting or reapportionment. Application to compel the governor to perform his reapportionment duties must be filed within thirty days of the expiration of either of the two ninety-day periods specified in this article. Application to compel correction of any error in redistricting or reapportionment must be filed within thirty days following the proclamation. Original jurisdiction in these matters is hereby vested in the superior court. On appeal, the cause shall be reviewed by the supreme court upon the law and the facts.

ARTICLE VII

HEALTH, EDUCATION, AND WELFARE

Public Education

SECTION 1. The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

State University

SECTION 2. The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

Board of Regents

SECTION 3. The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

Public Health

SECTION 4. The legislature shall provide for the promotion and protection of public health.

Public Welfare

SECTION 5. The legislature shall provide for public welfare.

ARTICLE VIII

NATURAL RESOURCES

Statement of Policy

SECTION 1. It is the policy of the State to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest.

General Authority

SECTION 2. The legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the State, including land and waters, for the maximum benefit of its people.

Common Use

SECTION 3. Wherever occurring in the natural state, fish, wildlife, and waters are reserved to the people for common use.

Sustained Yield

SECTION 4. Fish, forests, wildlife, grasslands, and all other replenishable resources belonging to the State shall be utilized, developed, and maintained on the sustained yield principle, subject to preferences among beneficial uses.

Facilities and Improvements

SECTION 5. The legislature may provide for facilities, improvements, and services to assure greater utilization, development, reclamation, and settlement of lands, and to assure fuller utilization and development of the fisheries, wildlife, and waters.

State Public Domain

SECTION 6. Lands and interests therein, including submerged and tidal lands, possessed or

SECTION 1.

Subsection (a) is language which creates within Article IX of the Constitution a major projects fund (MPF).

- A cost threshold of $100 million is set for projects qualifying. This minimum allows reasonable flexibility for covering major capital projects, without opening the fund to capital projects that may be effectively addressed through the normal capital budget process.

- This section also allows the money in the MPF to be invested in a manner similar to the Permanent Fund, except that it may be managed by the Department of Revenue as part of the State Treasury.

- Subsection (a)(1) establishes an annual deposit of 10% of state revenue into the fund from the following sources:
  (A) severance tax;
  (B) mineral lease rentals;
  (C) royalties;
  (D) royalty sale proceeds; and
  (E) federal mineral revenue-sharing payments and bonuses.

- Subsection (a)(2) on line 28 and 29 requires the interest earned by the money in the fund to be reinvested into the fund, rather than going into the general fund.

- Subsection (a)(3), along with subsection (c), lines 15-18, is the mechanism which provides for repayment back into the MPF, from projects financed by the MPF.

Subsection (b) establishes minimum requirements to be met before appropriations are made from the fund.

- The Legislature must approve the appropriation;
- All costs of the project must be committed;
- The project has to earn revenue; and
- The project must be owned by the State.

MEMBERS:
REP. JOHN LISKA, VICE CHAIRMAN; REP. RAMONA BARNES, EMERITUS;
REP. JOE HAYES; REP. HUGH MALONE; REP. DON CLOCKSIN; REP. RON WENDTE

Subsection (c) as mentioned above is the mechanism for repayment of the MPF by a project funded by the MPF. Expenditures from the fund must be recovered and returned to the fund over the operational life of the project. The intent is to recover the principal of the fund from revenue generated by the project.

Subsection (d) allows the fund, by a two-thirds vote of the legislature, to be used to meet a declared state of disaster.

Subsection (e) requires that the first appropriation from the MPF be for construction of the Watana Dam portion of the Susitna River Hydroelectric project.

Subsection (f) requires that up to 10% of the annual revenue paid into the fund be reserved for power cost assistance.

SECTION 2.

Section 2 amends Article IX, section 7 of the Constitution which refers to the dedication of funds. In order to establish a stream of dedicated oil revenue into the MPF, it must be exempted from the dedication of funds section of the Constitution. This has been done in the past when the Permanent Fund was created. (Art. IX, sec. 15)

SECTION 3.

This section amends Article IX, sec. 16, the Appropriation Limit, by exempting the MPF. Neither deposits to the fund, nor appropriations from the fund would then be subject to the appropriation limit.

SECTION 4.

This section of the resolution requires approval of the voters on the November 1984 election ballot.

RE: HJR 57, Creating a Major Projects Fund in the Constitution

---

I. OVERVIEW.

HJR 57 establishes a major projects fund, very much like the Permanent Fund, within Art. IX of the Constitution. This legislation does basically two things: it allows Alaskan residents the opportunity to establish by their vote a constitutionally dedicated major projects fund with the stipulation that Watana dam be the first project to be financed from the fund.

Because this is a proposed amendment to the Constitution, passage will require a 2/3 vote of both Houses, plus an affirmative vote by the people on the Nov.'84 election ballot.

The key feature of this amendment is the dedication of 10% of the State's total petroleum revenue to a major projects fund. The stream of revenue to the fund through the dedication will be sufficient to finance the largest of the projects we foresee at the present time, the Watana dam portion of the Susitna River hydroelectric development.

Another feature of this legislation is a guarantee that up to 10% of the annual revenue paid into the fund be reserved for power cost assistance.

Based on forecasts of declining revenue in the future, it is reasonable to assume that it will become increasingly difficult to appropriate sufficient funds to build major capital projects. Assuming that such projects will be in the best interest of the state, the question becomes how to best provide a financing mechanism that would enable their construction.

HJR 57 creates a mechanism which would insure a stable source of funds for such appropriations. Without this sort of mechanism, it may be difficult, if not impossible, to finance some of our major capital projects.

Another key feature is that the voters, upon considering this amendment, will be able to decide whether or not to appropriate sufficient revenue to build Watana dam.

BILL SHEFFIELD
GOVERNOR

HB257

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 23, 1984

The Honorable Joe Hayes
Speaker of the House
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a joint resolution which proposes an amendment to the Alaska Constitution creating a major projects fund.

As you know, the state treasury will continue to receive substantial petroleum revenues for many years to come. However, our best current estimates indicate that large annual cash surpluses above operating budget requirements will cease to be available by the early 1990's. There is still time to set aside enough for one or more major capital projects that can serve as foundations for Alaska's future economy, but the opportunity to do so will probably be gone within the next six or seven years. Examples of major projects are the Susitna hydroelectric project; road and port infrastructure projects in rural Alaska for support of mining, fishing, and other economic development activities; the Knik Arm Crossing; the Bradley Lake hydroelectric project; Eklutna water supply; and renovation and extension of the Alaska Railroad.

The major projects fund is needed to accumulate the revenue for these large projects. There are two reasons for this. First, for many of these large projects and especially for Susitna, there still is not enough clear information to warrant unequivocal commitment. Actual construction might not begin for a number of years because of the length of time necessary for engineering, environmental study, obtaining permits, and demonstration of economic feasibility.

It is difficult through our conventional capital budgeting procedures to secure large, direct appropriations for projects that will not enter the construction phase for a year or more, and to which the state is not yet willing to specifically commit itself. However, if setting aside the necessary money is delayed until construction is about to begin, the chances are that the revenue surpluses will have diminished by then. The proper response is not to rush into massive financial commitments before oil production goes into decline, but to systematically set aside the money needed to accomplish major projects, and draw down on the principal only when satisfied that a commitment is prudent.

The second reason that a continuation of conventional capital budgeting practices is not likely to meet the needs for major project funding is that the revenues available for annual capital expenditure tend to be split into many small pieces. If all of these revenues are made subject to an allocation system similar to that in recent years, accumulation of enough money for any major project over several years is unlikely.

The most plausible solution to these problems is the establishment of a major projects fund in which money can be stored for major projects that are not yet specified.

I believe that the major projects fund should be created through an amendment to the Alaska Constitution. A constitutionally dedicated fund will be protected from future uses that are not in keeping with the fund's original intent. Automatic deposits to the fund are mandated, as is automatic retention of the fund's interest earnings.

The key feature of this amendment is the dedication of 10 percent of the State's total petroleum revenue to the major projects fund. The stream of revenue to the fund through this dedication should be sufficient to finance the largest of the projects we foresee at the present time, Susitna River hydroelectric development.

Excluding interest, deposits of this magnitude should create a fund of approximately $2.2 billion by fiscal year 1991. Assuming that nine percent interest is earned and redeposited in the fund, and that no disbursements are made until fiscal year 1991, the fund could have a principal sum of as much as $3 billion by then.

Ten percent of total petroleum revenue approximates the proportion that is currently dedicated to the permanent fund. For fiscal year 1985, this would require a deposit to the major projects fund of approximately $300 million, which allows an operating budget of $2.1 billion, a regular capital budget of $700 million, loan appropriations of $260 million, and enough remaining money for debt service and other likely obligations.

There are several other significant features of the amendment.

(1) Deposits to the fund begin in fiscal year 1985 and continue through fiscal year 1990, in keeping with current expectations of future revenue availability.

(2) Disbursements from the fund for a project cannot be made until all sources of the money necessary to complete the project (or a stand-alone phase of a larger project) has been identified and the money committed.

(3) A cost threshold of $100 million is set for projects to qualify for financing from the fund. This minimum allows reasonable flexibility for covering such projects as the Susitna and Bradley Lake dams, the Knik Crossing, and extension of the Alaska Railroad, without opening the fund to capital projects that can be effectively addressed in the regular capital budget process.

(4) Appropriation bills to spend from the fund must have a two-thirds majority vote in order to pass the legislature. The purpose of this requirement is to assure that projects have state-wide support at the time disbursements are made.

(5) Expenditures from the fund must be recovered and returned to the fund over the operational life of the project. The intent is to recover the principal of the fund from fees generated by the project.

(6) Neither deposits to the fund nor appropriations from the fund would be subject to the appropriation limit.

Among the alternatives available, I believe that a constitutional amendment is the most effective and direct method of achieving the objectives of the major projects fund. As you know, amendments to the Alaska Constitution must be ratified by the voters at a general election. The next general election will occur in November, 1984. I believe that if ratification of the amendment is delayed until November, 1986, it would come too late to capture enough money to accomplish the intended purposes of the fund.

I look forward to working with you and members of the legislature on this important piece of legislation.

Sincerely,

Bill Sheffield

AML RESOLUTION SUPPORTING MAJOR PROJECTS FUND

WHEREAS Governor Sheffield has proposed a major projects fund to accumulate revenues for large capital projects in Alaska; and

WHEREAS Alaskan municipalities and their residents may benefit from the construction of major projects in their areas; and

WHEREAS it is difficult through conventional capital budgeting procedures to secure large direct appropriations for major projects; and

WHEREAS the Governor has indicated that sufficient revenues can be dedicated to this fund without reducing the amount available for other important current state programs; and

WHEREAS such a fund will help prepare the state for the day when annual cash surpluses above operating budget requirements decline substantially;

NOW THEREFORE BE IT RESOLVED by the Board of Directors of the Alaska Municipal League that the Board extends its conceptual support to a major projects fund, as long as the fund does not negatively impact other state programs which support Alaskan municipalities.

Adopted by the AML Board of Directors, January 31, 1984 in Juneau, Alaska.

Honorable Charlie Bussell
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Bussell:

We, in the private sector of the Alaska Transportation System, are concerned over several points in the Alaska Railroad Operational Bill, H.B. 512 (work draft dated March 15, 1984).

There is no doubt that the State of Alaska will need the Alaska Railroad in the future in order to develop its natural resources, assist in the growth of the resource areas, and to move the resources to the closest deepwater port for export. Whether the U.S. Government or the State of Alaska operates the Railroad, it should be preserved; but it should have some oversight to ensure that the Railroad will be an asset to the State and not a liability.

Attached to this letter are some suggestions for changes or amendments which we definitely would like to see in the bill. If the Alaska Railroad were to be allowed to buy other modes of transportation, such as air, truck, and water, the private sector would not be able to compete with them in the marketplace. Reasons: a government entity is not required to service their capital as is the private sector (bank loans at market interest rates, etc.); no consideration for taxes (local, state, and federal); and it is not necessary to show a Return On Investment (R.O.I.). With the above advantages, the Alaska Railroad could price their services to a degree that would be detrimental for private carriers to stay in business and compete.

Hopefully, some consideration can be given to the above suggestions in H.B. 512.

Sincerely,

H. L. Schuyler

HOUSE BILL NO. 512

Suggested changes or amendments to House Bill No. 512 from copy of work draft dated 3/15/84.

1) Page 1, Line 14, insert the word rail between efficient and transportation.

2) Page 1, Line 19, insert the word rail between a and transportation.

3) Page 2, Line 28, insert the word rail between economical and transportation.

4) Page 6, Line 5, insert the word rail between common and carrier.

5) Page 6, Line 10, insert the word rail between economical and transportation on Line 11.

6) Page 6, Line 16, at the end of sentence add: rail transportation service.

7) Page 12, Line 10, Sec. 42.40.260. Annual Report. Since the Alaska Railroad will belong to the people of the State, shouldn't the Annual Report be made public?

8) There does not appear to be any limitation to the Alaska Railroad's ability to purchase other modes of transportation. The Alaska Railroad should not be allowed to enter into the ownership of air, truck, or water transportation. On Page 15, Line 6, Paragraph 20, they are given the ability to contract with other modes of transportation service connecting to the Railroad's rail services. Why should the State invest in other modes of transportation which competes with the private sector who pays market rates for capital and pays local, state, and federal taxes?

9) There should be a Pricing Policy statement added to the Bill, such as: When pricing their services in competition with existing private carriers or businesses, the State-owned Alaska Railroad must include a reasonable provision for capital (whether or not provided by State appropriation), taxes (even though exempted), and interest (equal to the private sector rate). Also, policy should state that pricing should be at a level to earn reasonable Return On Investment (R.O.I.).

MEMORANDUM

TO: Senate Transportation Committee

FROM: Gross & Burke SAB

RE: Organization of Public Corporation to Operate the Alaska Railroad

At your request, we have reviewed the drafts of SB 10 and SB 352, with a view toward determining the extent to which those bills create a valid legal structure to operate the Alaska Railroad after its proposed purchase. Initially, we were asked whether the legislature had the power to require that gubernatorial appointments to the governing authority[1/] of the railroad be confirmed by the legislature. Both SB 352 and SB 10 presently require confirmation of executive appointments. At a second committee hearing we were requested to advise you of the minimum number of executive branch controls which must be placed on any entity created by law to operate the railroad to insure that the entity would be a part of the executive branch and, therefore, constitutionally sound. We shall answer the questions in the order posed.

SB 10 and SB 352 both provide that appointments made by the Governor be confirmed by the legislature in joint session.

1/ SB 10 speaks of an "Authority" while SB 352 creates a similar organization but describes it as the "Railroad Corporation." Purely for the purposes of simplicity, we will refer to the basic organizational structure at issue here as an "Authority."

We assume that if a similar section remains in a bill, which passes the legislature, the Governor will probably choose to submit the names of his appointees for confirmation just as he submits his appointees to a host of other boards and commissions in state government. It is our opinion, however, that should an occasion arise when the Governor decides not to submit a name or names for confirmation, the legislature would have no legal right to insist he do so.

Our conclusion is based both on the words of the Alaska Constitution and a decision of the Alaska Supreme Court. The constitution provides in Art. III, sec. 25 that:

> The head of each principal department shall be a single executive unless otherwise provided by law. He shall be appointed by the Governor, subject to confirmation by a majority of the members of the legislature in joint session . . .

Sec. 26 of the same article states that:

> When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the Governor subject to confirmation by a majority of the members of the legislature in joint session . . .

The wording of the constitution is clear on its face. The legislature may confirm the heads of all departments, whether they are single executive officers or a board. The legislature may also confirm boards or commissions which are "regulatory or quasi-judicial" agencies. A regulatory authority is, as it implies, one whose basic function is to regulate a particular public activity. The Fish and Game Board is a classic example of such a regulatory board. A quasi-judicial

agency is one in which individual rights are adjudicated. An example of such a board would be the Public Utilities Commission, where contested proceedings determine rates.

The Railroad Authority as established in SB 352 or SB 10 fits under none of these definitions. It is no at the head of a department[2/] nor is it a quasi-judicial or regulatory agency. Under the constitution, then, the legislature has no power to confirm executive appointments to the Authority, unless the legislature can add to the powers of confirmation which are granted in the constitution.

The legislature attempted to do just that in 1975 when it passed a statute authorizing confirmation of a whole list of lesser executive branch officials, including deputy commissioners and certain division directors. The Alaska Supreme Court held that the statute granting the legislature the additional confirmation power was unconstitutional. Bradner v. Hammond, 553 P.2d 1 (Ak. 1976) In the Supreme Court's view, the power to appoint to positions in the executive branch is a power reserved to the Governor under the doctrine of separation of power, except as the constitution permits the legislature to participate in the process through confirmation. If the constitution does not specifically

2/ We recognize that SB 352 provides, "The corporation shall be considered a principal department only for the purposes of Art. III, sec. 26, Constitution of the State of Alaska." (emphasis added) In our view, however, the courts would almost certainly view this purely nominal designation as one purely of form, since the bill does not actually establish a new department with the kinds of gubernatorial controls normally associated with a principal department of state government. This issue of gubernatorial controls is addressed in detail later in this memorandum.

authorize confirmation, there is no legal power to do so and the Governor's power of appointment can not be subjected to confirmation by the legislature. Put another way, the Bradner case holds that the constitution states the outer limits of legislative powers of confirmation; the legislature may not expand that power by statute. While neither SB 10 or SB 352, as presently structured, would withstand constitutional challenge on the issue of confirmation, there are options available to the legislature which would provide a valid legal basis for the confirmation of appointments. We will set these options out briefly for your consideration.

The first and most obvious manner for the legislature to obtain confirmation power is to pass a joint resolution placing before the voters a constitutional amendment that would specifically authorize the legislature to confirm appointments to the Railroad Authority. This amendment could be placed before the voters during this year's election. If the amendment passed, the first appointees of the Governor to the authority or commission would be constitutionally subject to confirmation; if it did not pass, the situation would remain as it is today -- confirmation if and when the Governor chooses to submit the names. We should note that following the Brabner case a constitutional amendment granting broad additional confirmation powers to the legislature was put before the voters and failed, but whether that would be the fate of a more narrowly drawn provision would be difficult to predict.

The second option to insure confirmation would be to create an entirely new department of state government, which would be headed by the Railroad Authority. The sole purpose that new department would be to the railroad. In such an instance, the Authority would be at the head of a department and under Art. III, sec. 26 of the Alaska Constitution, the members of the Authority, would be subject to confirmation. There are, however, certain serious problems which might result from this approach. One of the basic purposes of the present bills creating an independent public corporation or authority (located nominally within a department) is to permit the Railroad Authority to raise money for operations without involving the general credit of the state. If, however, the authority which manages the railroad is a full department of state government there is some real question about its ability to successfully perform this fundraising activity without the involvement of state credit. Art. IX, sec. 8 of the constitution provides that no state debt may be incurred unless (1) it is authorized by law; (2) is for capital improvements; and (3) is ratified by the voters. Sec. XI of the same article provides that the restrictions of sec. 8 do not apply to debts incurred through revenue bonds issued by public corporations or public enterprises of the state when the only security is the revenue of the enterprise or the corporation. Whether or not an entire department of state government can be made a "public corporation" or whether

or not the entire activity of a department of state government would qualify as a "public enterprise" are questions that have never been decided in this state by any court. While the committee can certainly receive advice from legal counsel as to the possible or probable outcome of litigation on these subjects, it would at best be an educated guess. The result might well be that in order to obtain confirmation powers the committee would create a department which, in the end, might be subject to the same bonding restrictions applicable to all other departments of state government. I gather there is no disagreement within the committee that such a result would be highly undesirable. We cannot recommend this method of insuring confirmation powers because the risks are simply to great -- the legislature would be in totally unchartered waters and the magnitude of the questions involved is simply to great to accept that degree of risk.

Having discussed the issue of confirmation, we now move to the second issue posed by the committee. Specifically, that question involves the extent to which a public corporation may be established independently of the authority of executive branch and yet be a part of that branch of government. Art. III, sec. 22 of our constitution requires that all agencies of state government and their respective functions shall be allocated within no more than 20 principal departments.

The only exceptions provided are for "regulatory, quasi-judicial, and temporary agencies." As we view the functions of the operation of the Railroad -- whatever form of entity is chosen -- those functions are not primarily "regulatory" or " quasi-judicial." Further, the railroad operation would not necessarily be "temporary." Although conceivably the railroad could be sold or leased at some point in the future to a private corporation, the existence of the operating entity could well be permanent.

We think it is clear that the Alaska Supreme Court would view the Railroad Authority as performing operational or executive functions and would, therefore, require that the Authority be either a separate principal department or located within one of the already established principal departments. We have already reviewed the problems that would be created if the Railroad Authority would be made the head of an entirely separate principal department. Therefore, we are left with the conclusion that the only other constitutionally sound option is to place the governing board or authority within an existing department of state government.

Simply stated, then, the legal issue you have asked reduces itself to this. On the one hand, the legislature seeks to create an "independent" authority -- one which has financial and political autonomy and is not subject to direct gubernatorial control. On the other hand, the constitution

requires that all executive or managerial functions be a part of the executive branch, which, in turn, is under the supervision and control of the Governor. What then are the limits -- how much gubernatorial control is required to make the "independent" authority a constitutionally valid part of state government?

The cases that the Alaska Supreme Court has reviewed concerning the requirements of Art. III, sec. 22 make it clear that more than mere nominal placement of an independent corporate entity within a department in the executive branch is required. For example, in De Armond v. Alaska State Development Corporation, 376 P.2d 717 (Alaska 1962), it was claimed that the legislation creating the Alaska State Development Corporation was unconstitutional because it sought to create an independent agency that was nominally within the Department of Commerce, but which the challengers claimed was not in actuality within that department. The Alaska Supreme Court rejected this contention and upheld the constitutionality of the Development Corporation. In doing so, the court enumerated a number of features contained in the enabling legislation for the corporation, which demonstrated sufficient ties with the Department of Commerce to justify the conclusion that the corporation was (at least for constitutional purposes) truly within the Department of Commerce.

The factors that the court cited were as follows:

(1) the Commissioner of Commerce had a permanent seat on the board of directors and thus had "considerable influence" on the board;

(2) the other six members of the board were appointed by the Governor, and served at his pleasure;

(3) the board was required to submit comprehensive annual reports to the Governor and legislature;

(4) the financial records were to be audited annually by the legislative auditor; and

(5) the state's bank examiner was required to examine the corporation's records each year.

Additionally, although the court did not make clear what significance this fact had, it noted that the corporation was "temporary" and could be dissolved by a majority vote of the board subject to legislative approval.

Four years later, the court reviewed a similar challenge to the constitutionality of the Alaska State Mortgage Association; i.e. that it was only a nominal rather than a legitimate part of the department of state government in which it had been placed. Walker v. Alaska State Mortgage Association, 416 P.2d 245 (Alaska 1966). The court, however, noted that the mortgage association legislation contained most of the same features which it had cited in De Armond to support its conclusion that the development corporation was properly established within a department of state government. Like

the development corporation in De Armond, the mortgage association members were appointed by the Governor and served at his pleasure. The commissioner of Commerce had a permanent seat on the board of the association. Additionally, the court noted that as further evidence of gubernatorial control, the mortgage association was required to submit detailed annual reports to the Governor and legislature, the financial records were subject to an annual legislative audit, and certified copies of the minutes of every meeting of the association were required to be sent to the Governor.

Neither of these decisions, unfortunately, provide any guidance on the question of the minimum number of factors that will be required in order to meet the constitutional requirements of executive supervision or control. In both cases, however, the court seemed to emphasize two factors over and above all the others. The first was that board members served at the pleasure of the Governor. The second was that the Commissioner of the department within which these independent entities were located served on the board and was a full voting member. These two features were emphasized by the court to demonstrate that the Governor exercised at least partial control over the activities of the board. The court, for instance, noted that while the commissioner was only a single member of a multi-member board his position as a cabinet member would give him

substantial influence. The court further emphasized that the Governor was in a position to exercise influence on an otherwise independent board through the fact if there were a real disagreement in policy, he could exert control over the board members through his ultimate power to reove them. The court, in Walker, cited with approval language from the Superior Court decision in the case to this effect:

> If the Governor is dissatisfied with the executive director in either his capacity as a member of the Alaska State Housing Authority or the Alaska State Mortgage Association, he can assert his authority over the board members to effect the director's removal, and should they disregard his wishes, his alternative is to appoint members to the board who will appoint an executive director satisfactory to the Governor.

Walker, at 250 n.19.

At the same time, the court recognized that there may be important and legitimate reasons for the legislature to insulate a board or authority from direct gubernatorial influence over particular decisions. In the courts words:

> It is true that the Commissioner of Commerce can not dictate the decisions of the Board. Nor can any other state official . . . . It is quite apparent that the legislature intended the board to be free from outside control in making decisions on particular loans.

De Armond, at 724 (emphasis added).

Nonetheless, it is clear from the decisions that there are limits to the degree of insulation that the court will

tolerate and still uphold the constitutionality of the placement of the independent corporation nominally within a department of state government.

Accordingly, it is our view that to insure constitutionality of this bill the legislature should, at an absolute minimum:

1. create an independent authority which is part of an enumerated department of state government;

2. provide that the board for the public corporation or authority be comprised of persons appointed by the Governor and who serve at his pleasure;[3/] and

3. that the commissioner of the department in which the authority is placed serve as a voting member of the board.

3/ There is a secondary, but perhaps no less important, reason why the appointees to the governing body of the railroad should serve at the Governor's pleasure. As a constitutional matter, there is a serious question as to whether any appointee of the executive branch with the exception of those who serve in regulatory or quasi-judicial positions can be subject to any other restrictions but that they serve at the Governor's pleasure. The U.S. Supreme Court has interpreted that under the federal constitution, if an office is "executive" in nature, legislative efforts to restrict the president's power to remove an official are invalid. Myers v. United States, 272 U.S. 178. That opinion has been modified slightly in Humphries Executor v. United States, 295 U.S. 602, as the court held that a member of the Federal Trade Commission could have his term set by Congress and be insulated from removal by the president, but the court was clear to limit its opinion to quasi-legislative or judicial agencies, i.e. those that were actually passing regulations or resolving legal disputes as their prime function. The Railroad Authority would fall in neither of these categories, but would be within a traditional executive agency structure.

We raise this issue because we can be reasonably sure that the content of this bill will be litigated in the courts, if there is any reasonable basis to do so. The appointment of commissioners to the Railroad Authority who serve at the Governor's pleasure would reduce the possibility of legal attack on yet another basis.

It would be advisable, as well, to include at least some of the kinds of provisions (such as the annual reports to the Governor and legislative audits) which the court in De Armond cited as significant, although these may not be essential. Beyond that, the legislature may, in our view, limit the application of acts such as the Executive Budget Act, Administrative Procedures Act and others which impact most executive branch agencies, but are not, in our view, critical to upholding the constitutionality of this public corporation structure.

HJR 13

YOUR INTRODUCTION TO THE LIBERTY AMENDMENT

HJR 13

Questions and Answers

by

Rep. Larry McDonald (D-Ga)

CONGRESSIONAL RECORD — *October 9, 1975 H 10015—H 10022*

Rep. Larry McDonald (D-Ga)

Mr. McDONALD of Georgia. Mr. Speaker, the average American is acutely aware that he is rapidly losing his liberty. Government takes 48 percent of his income in taxes, while inflation devalues the remaining 52 percent. The marvelous, highly productive economy, of which he is a part, once free, is now grinding to a halt under the massive weight of Government controls. Decisions that were once his to make—the kind of food he eats, the kind of car he drives, how and where his children are educated—are now being made by Government bureaucrats.

In short, he is losing control over his life and faces a bleak and uncertain future. But what can he do about it? The Government has grown so huge and complex that he feels helpless in attempting to control it. Where would he begin. Going about it piecemeal—abolishing a welfare program here, a regulation there, and restoring a few freedoms along the way—would take forever.

There is, however, a much faster and simpler way of reducing the size and power of Government and restoring indivdual liberties: amend the Constitution to reinstate the constitutionally limited Government envisioned by our Founding Fathers. The Constitution is a document designed to limit the power of Government and it is because Government has grown far outside the bounds of the Constitution that we are losing our liberty. An amendment that restored proper limits on Government power would automatically eliminate programs and policies that have infringed on the rights and freedoms of Americans.

Such an amendment already exists. It was introduced in the present Congress as House Joint Resolution 23 by John Rousselot of California, Steve Symms of Idaho, and myself. Known as the Liberty amendment, it has been introduced in previous Congresses and has been approved by the legislatures of seven States, including my own State of Georgia.

Since its introduction on January 14 of this year, I have had numerous requests for information on just what it would accomplish. Often these requests are in the form of questions, the answers to which in turn generated further questions. In response, I have prepared the following series of questions and answers on the Liberty amendment.

1. "What is the Liberty amendment?"

The Liberty amendment is a proposed amendment to the U.S. Constitution which would put an end to the Government engaging in business enterprises that are not constitutionally authorized. Getting the Government out of these businesses, returning them to State jurisdiction and private taxpaying enterprise, would cut the cost of Government more than half, and thereby end the need for the Federal individual income tax, which would be repealed.

The first section provides:

"The Government of the United States shall not engage in any business, professional, commercial, financial or industrial enterprise except as specified in the Constitution."

This clause will cut the cost of Government in half, making possible the repeal of the 16th—income tax—amendment, cut the national debt tremendously, get us back to a balanced budget and stop inflation.

2. "Just what are some of the businesses the Government is in?

Some of the larger are the Commodity Credit Corporation, a loan company; the Tennessee Valley Authority, a gigantic producer and distributor of electric power and fertilizer; and the Federal Crop Insurance Corporation, an intrusion into the Insurance field. The book, "Where the Money Went," by Willis Stone, lists over 500 others.

3. "But how about all those people who will lose their jobs if the Liberty amendment is adopted?"

Employees of Government businesses that are bought will be better off than before because under private ownership and management the business will prosper. This happened in the case of the General Aniline & Film Co.—now the GAF—and others already sold. Employees of Government businesses with no valid economic purpose, will probably have to look for other jobs, but if they want work they will have no problems. When people have money now taken by the income tax, their increased purchasing power will expand all kinds of business which will create a great need for more employees. There will be more jobs than people to fill them.

4. "How would you get the Government out of these businesses? Who would buy them?"

These business enterprises would be bought by people who want to invest their money, just as other businesses are bought and sold. In 1965 the General Aniline & Film Co., which the Government seized at the beginning of World War II, was sold as a stock corporation. The shares were offered on the open market, and in 1 day 11 million shares of stock were bought for more than $300 million.

A few years earlier the Inland Waterways Corp. was sold in a matter of days for $11 million, although its book value at the time was only slightly over $3 million.

Any businesses that have a valid economic reason for existing would be salable. Those which are economically unsound and guaranteed money losers would be liquidated through the sales of their assets. The proceeds of these sales would reduce our national debt by approximately 25 percent.

5. "How can Government get along if the income tax is repealed? What will they do for money?"

The latest Federal budget shows that individual income taxes supply only 42 percent of the Federal revenue; the rest comes from other sources. There is ample documentation to prove that getting the Federal Government out of these unauthorized businesses would cut the cost of Government at least 50 percent, while revenue is reduced only 42 percent, would give a surplus of 8 percent.

6. "Is the only purpose of the Liberty Amendment just to get the Government out of business and to repeal the income tax?"

Partially. The Liberty Amendment will get the Government out of those businesses it operates without constitutional authority. As a consequence, Government costs will be reduced to such an extent that the Federal Government will not need the personal income tax. The main purpose of the Liberty Amendment, however, is to restore the Constitution to full force and effect. Then the Government will be confined to the business of governing—of protecting individual liberties—and no longer compete with its own citizens.... Repeal of the income tax will increase take home pay 20 percent without changing the rate of pay or the price of things.

7. "Why amend the Constitution? Is not there an easier and quicker way?"

In almost two centuries our Constitution has been amended a comparatively few times. The first 10 amendments—Bill of Rights—were added almost immediately after the Constitution was ratified—in December, 1791—and there have been only 16 added since then. This may seem too slow, but any amendment is unique in that is supersedes anything preceding it which is contrary to it.

Only through an amendment, will we be able to correct the present distortion of our basic law. The Liberty Amendment will clarify the terms of our freedom, rectify the current conflict between Government and people, define our economic liberties and force the Government to abide by that definition.

8. "What freedoms have I lost?"

Year after year our freedoms have been shrinking, by restriction upon restriction, tax upon tax, edict upon edict. Here are a few of the many freedoms lost which were once considered your natural right as Americans.

You do not have sound money any more.

You are not free to plan your future as inflation makes you dollar buy less and less.

You can neither rent, sell, buy, nor exchange without political control.

Neither an employer nor an employee can establish a wage by mutual consent.

You can not operate a business without Government consent and restrictions, and without acting as tax collector.

A doctor can no longer keep his patient's history confidential, or serve patients without Government intervention.

You no longer can receive a full day's pay for a full day's work.

You no longer have any real privacy.

Bank accounts are open to scrutiny, personal affairs are fed into computers, and the last vestiges of privacy are fading into memory. Your private life is no longer private.

9. "If Government continues to grow bigger and bigger, what is going to be the outcome?"

The answer is simple. Growing at its present rate, there is but one ultimate answer—we shall soon have a totalitarian government. Whether we call it communism or by some other name, the despotism imposed will be as terrifying as any other in history.

10. "Haven't there always been waste and corruption in government?"

Waste and corruption in government are nothing new. The bigger government grows, the greater are the opportunities for pork-barrel politics, and the takeover of economic power and resources.

It was this that caused the American Revolution, and our Founding Fathers tried to prevent its recurrence through our Constitution of strictly limited powers.

11. "Was the progressive income tax invented by Karl Marx?"

No, Karl Marx did not invent it. The progressive income tax is almost as old as recorded history, and is the historic way by which people have been subjugated. Every tyrant in history has used it successfully, in one way or another, so Karl Marx included it as one of his 10 rules in the communist Manifesto. The men who drafted our Constiution carefully prohibited a progressive income tax, but this was nullified in 1913. Therefore, the income tax is part of the Constitution and part of our law

and the only way to get rid of it is through another amendment.

12. "Is not the Federal income tax unconstitutional?"

The Federal income tax is completely constitutional as long as we have the 16th amendment. The statement that it is unconstitutional is wishful thinking. All of the hideous consequences of the 16th amendment will remain with us until it is repealed as the Liberty Amendment provides.

13. "Is not the progressive income tax the fairest kind of tax because it is based on ability to pay?"

It may be made to sound fair, but it does not work that way. Actually, it a form of slavery, draining the life energy of a person, penalizing success, and destroying initiative.

If you are poor enough, you do not pay; and if you are rich enough, you do not pay either. If you are a responsible productive worker, you carry the load. Tax foundation figures prove you work until the middle of May each year just to pay taxes.

14. "Why eliminate the personal income tax? Why not reduce taxes gradually?"

This question is usually asked to divert attention from the Liberty amendment, designed to cut spending not authorized by the Constitution, which will remove the need for the income tax. Eliminating the Federal income tax is the only way to get tax relief for the people.

Political candidates may talk about cutting taxes, but historically this never happens. The application of the Liberty amendment can actually do it.

15. "What will replace the income tax?"

Nothing need replace the income tax. Reduced spending imposed by the Liberty amendment will remove the need for income taxes. Recent Government budgets estimate that only 42 precent of revenue comes from individual income taxes. Excise taxes, duties and imposts and other miscellaneous revenues provide the other 58 percent of revenues. The amendment will cut spending 50 percent, removing the need for income taxes and make tax cuts possible in other areas.

16. "How are you going about getting the Liberty amendment passed?"

The fifth article of the Constitution prescribes two valid methods for amending the Constitution. An amendment may be proposed by two-thirds of both Houses of Congress concurring; or the legislatures of two-thirds of the several States—34—may require Congress to call a Constitutional Convention to propose such amendments, which, in either case, become a part of the Constitution when three-quarters—38 States—ratify a proposed amendment.

The Liberty Amendment resolution is being advanced in both ways. It is now pending in Congress as House Joint Resolution 23. It has also been approved by the Legislatures in seven of the sovereign States and is pending in several others.

17. "Why are you going to State legislatures to amend the Federal Constitution?"

The fifth article of the Constitution provides this method of causing the amendments to be proposed. Then, too, the States must eventually ratify to make it a part of the Constitution. This country consists of a union of sovereign States which hold the only power to ratify amendments and State legislatures hold concurrent power under the Constitution to initiate such amendments as they, the States and the people within them, require.

18. "Who's behind the Liberty Amendment? Where does the money come from?"

The folks behind the Liberty Amendment are just ordinary people with an extraordinary desire to hold fast to the ideals on which this country was founded. The organization is nonpolitical, nonpartisan, nonbigoted, nonsectarian, and certainly nonprofitable. Its aim is to educate the public on the values of the Constitution and the means of restoring it before it is too late. Neither big business nor big labor, per se, has subscribed to the Liberty Amendment. Its financial support depends upon contributions—some small, some larger—from folks in every State. With the exception of an understaffed headquarters office, everyone in an unpaid volunteer, including national chairman, directors, State chairmen, committemen and members.

19. "Why allow only 3 years for the Government to sell all those buinesses? Won't they need more time than?"

Three years is adequate and we have ample proof of it. Inland Waterways Corp. was sold in a matter of days. The General Aniline and Film Corp., nationalized in World War II, was sold on the open market in a single day for more than $300,000,000. The liquidation of the entire synthetic rubber industry was accomplished and fully paid for by private enterprise in less than 9 months. These and many other cases are discussed in the book, "Where the Money Went," by Willis Stone.

Properties and facilities affected that are not sold within the 3 years will revert to state jurisdiction.

20. "I think the Liberty Amendment is a good idea, but isn't it too late?"

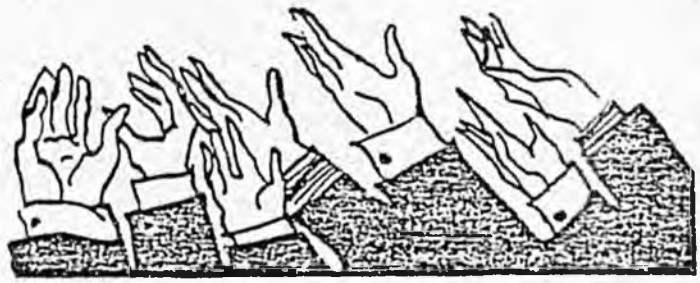
No. It is not too late. It is never too late to stop the process of political confiscation as long as the amendment process can still be employed.

21. "Why do politicians make wild promises to give 'something to everybody' even when they know they cannot according to the Constitution?"

Men of high integrity in their personal lives often enter politics and adopt a new set of values in a game of bargaining for power. When they acquire a thirst for power, they resent being hampered by the Constitution, the Liberty Amendment, or anything else.

Legislators can be restrained, however, by the voter at the polls who will vote against every candidate who violates the Constitution. Know what the Constitution guarantees, and then require all candidates and office holders to support basic American principles.

22. "Is not the Constitution too oldfashioned for today's complex society?"



Our Constitution, written almost 200 years ago, appears made for today's world which accents youth and change. The Constitution of the United States is a most revolutionary document, because it was based upon the radical idea that men should be left largely free to pursue their own affairs.

The men who drafted the Constitution foresaw that our life style would change, but human nature would not.

They built into the Constitution safeguards to make it possible for people to control the avarice and bullying instincts of politicians when they taste power. As Thomas Jefferson said:

"Let no more be heard of confidence in man, but bind him down from mischief by the chains of the Constitution."

23. "Does the 'general welfare' clause in the Constitution mean that the Government is responsible for our well-being?"

Probably one of the most misused phrases is the "general welfare clause." It is often taken out of context and distorted unmercifully. The term "general welfare" appears only twice in the Constitution: once, in the Preamble as one of the general purposes of the Constitution, and again in article 1, section 8, as one of the reasons why the Constitution grants to Congress certain specified powers. The two words—general welfare—are just two descriptive words in a phrase, within a clause, within a single sentence which is 18 paragraphs in length. It is used by the unscrupulous as a peg on which to hang their pet schemes which violate the intent and purposes of the Constitution.

24. "Do you think the courts that now ignore the Constitution will abide by the terms of the Liberty Amendment when it is added to the Constitution?"

Of course they will. Once the people speak, and the Liberty Amendment is added to the Constitution, all courts and other Federal agencies will be compelled to bide by it.

As a classic precedent for this: more than a century ago slavery was lawful in certain States. The courts were ruling that it was lawful in other States, regardless of

State laws and State constitutions. This was the conflict which brought about the Civil War. The 13th amendment resolved the question by abolishing slavery and involuntary servitude. That amendment invalidated hundreds of court decisions and statutes, and the question was settled with apparent permanence. Similarly, the Liberty Amendment will restore the equities and justice of the Constitution as written and wipe out all court decisions, statutes, Executive Orders, or bureaucratic directives and regulations which are contrary to it.

25. "If only Congress has the power to write Federal laws, where does the President get his authority to issue Executive Orders, such as ceilings on rents, prices, and wages?"

Executive Orders originally were issued by the Chief Executive to members of the executive branch relating to the conduct of their assigned duties. This has changed until now they have the power of law. The fact that it has been accepted as law by the administration does not make it any more legal.

An Executive Order which assumes a legislative power is improper as it has no constitutional authority. The President has no legitimate power to issue Executive Orders that legislate. Neither does any agency of Government have any power to issue "regulations" which legislate. Congress alone has the power to legislate, as provided for in article 1, section 1 of the Constitution and limited as article 6, paragraph 2 provides.

26. "The book, 'Where the money Went,' says the Patent Office, the Central Intelligence Agency, Defense Department, and other agencies will be affected by the Liberty Amendment. Would these have to be sold?"

No, these agencies and a great many others on the list will not be abolished, because they do have important constitutional functions but those activities which are not constitutionally authorized will end.

These agencies appear in the book because their activities have extended into areas not constitutionally authorized.

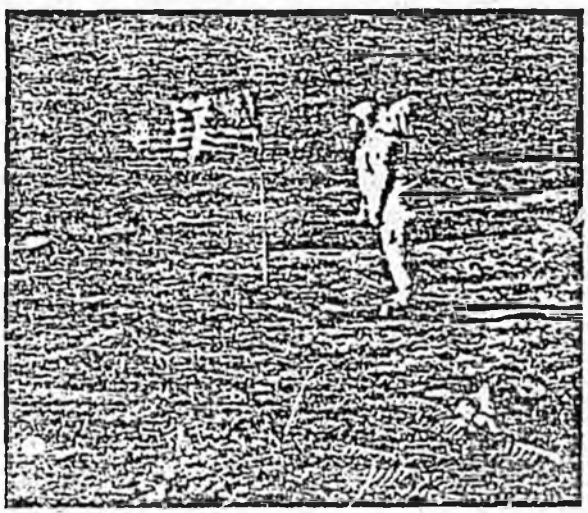
The Patent Office, for instance, has produced electronic equipment in competition with private enterprise. The Defense Department is operating railroads, barge lines, hotels, restaurants, saloons, and they even manufacture ladies underwear. The Central Intelligence Agency, according to the U.S. budget, is engaged also in roadbuilding, real estate, and property management.

27. "Who, other than the Federal Government, could possibly carry out the really big jobs, such as flood control, or drought relief?"

Individuals, local districts, and States have the ability to handle all such problems themselves without depending upon Washington, D.C.

Actually, the Federal Government spends our tax money lavishly, while pretending to do for us what we can do better for ourselves. The big jobs they undertake almost invariably are badly done and cost twice as much as they should. When a crisis arises the problems are of a local nature, interest is high, and the people directly affected are far better able to know and work out their own problems than someone from the Federal Government.

Hoover Dam was built by private enterprise, whereas Tennessee Valley Authority was built by the Federal Government and so far it has cost the taxpayers billions of dollars. Our Constitution grants to the Federal Government no authority to take on responsibility for such things as disaster relief or flood control.



28. "How could local and State government get along without Federal aid to finance such things as care of the handicapped and the needy?"

The only way the people within our States and localities can ever handle these local problems is by stopping federal intrusion into our domestic affairs. The Federal Government's job is to govern and regulate and protect us from external dangers. It is failing in this, its assigned task, while assuming the power to invade sovereign

States to meddle in the problems of people and their localities.

It is commonly believed that the Federal Government owes its citizens help in every form, but it has no such authority. When the Federal Government gives to one person, it must take from someone else. If you are a taxpayer, it is your maney that is being thus misused. As a people, Americans are the first to rush to the aid of those less fortunate. If we could take home a full pay check, we would provide our local facilities and private charities with the means for handling all problems of the handicapped and needy.

29. "Will the Liberty Amendment force us to abandon such projects as space exploration and super-highways?"

Not necessarily. It will return to the people only those activities which the Federal Government has taken over without constitutional authority. A great highway system was built under local jurisdiction and paid for by local taxes or gasoline taxes at the pump. These expanded from country lanes to superhighways, and only recently has the Federal Government invaded this field, expanding the costs and producing not a single mile of road that could not have been done better within the local jurisdiction at far less cost.

The Federal Government has a valid interest in space from a military standpoint, but the assumption that only Government can carry through large projects is not correct. For example, Telstar was designed, built, and launched by American Telephone & Telegraph Co.

30. "Do you not believe that Federal aid to education is essential if every child is to have an equal opportunity?"

No one will dispute that every child should have a good education. The question is, whose responsibility is it?

"Education" *per se* is not mentioned in the Constitution, and consequently, under the 10th amendment, this activity is reserved to the States. Federal aid to education produces Federal control of education, and this has proved most detrimental.

31. "How will the Liberty Amendment affect civil rights for minority groups?"

When the Constitution is restored, everyone, regardless of race, will enjoy equity and equality before the law. The Liberty Amendment is a friend to all minority groups, for its purpose is to preserve and guarantee true civil rights to all people—equally. Some people have been encouraged by certain politicians to expect very unequal "civil rights," through the enactment of special interest laws and special subsidies.

32. "What effect will the Liberty Amendment have on veterans' benefits?"

Almost every family numbers a veteran among its members. Adding the Liberty Amendment to the Constitution would in no way nullify the obligation of Congress to recruit and provide for an armed force and to care for that force and everyone in it. Service-connected disabilities would be an obligation, as always, and the powers and obligations to care for the Armed Forces would be in no way affected. The abuses developed in this field will, of course, stop.

33. "How will the Liberty Amendment affect the Indians and their reservations?"

The Liberty Amendment will emancipate Indians, as the 13th amendment emancipated the slaves in 1863.

The Bureau of Indian Affairs controls those lands, and the Indians cannot improve their environment or themselves.

Indians must be elevated to the status of first-class citizens, rather than wards of the Government. Because the Liberty Amendment deals specifically with economic freedom for all people, the Indians will be set free—free to administer their own lands, to improve, develop, buy and sell—just the same as every other person in this country.

34. "If the Federal urban renewal program should end, how could we possibly modernize our cities?"

The modernization of cities must rest with the people, at the local level of government, for that responsibility is not given to the Federal Government under the Constitution.

The Federal urban renewal program has used our tax dollars to drive out property owners, often in the lower income group, and then turn them over to affluent and generally politically powerful persons for renewal devised by the bureaucrats.

Private citizens, unhampered by the horrendous burden of taxes, Government restrictions and regulations, would pridefully invest their money and effort to keep their cities up to date.

35. "What will happen to farm subsidies? Can the American farmer survive without help from the Federal Government?"

The farm subsidy program is probably the most tragic example of what happens when government disregards the Constitution and intervenes in free enterprise.

Farm subsidies have raised the price of farm products and consequently increased the consumer's food bill. The bulk of the billions in subsidies go to the factory-type operations which have driven out the real farmers. And every farmer—big and small—has lost the freedom to plant the crops of his choice and sell the product of his toil at the best possible price in the free market.

John Scott of Gilby, N.C., states the case:

"We who remain on the farms and ranches of this nation are fighting for survival. We simply cannot endure a continuation of the restrictions, regulations, and meddling that beset us these forty years . . . We need an end to federal farm programs . . . We ask for a free market of supply and demand."

And we who pay the food bill, ask for the same.

36. "What about the social security system?"

Until recently there were few dissenting voices on the subject of social security but it is now being given much scrutiny. The facts now being revealed show social security is: First, not insurance because the so-called premiums we are forced to pay are really a tax on wages, paid into a general fund. The Congress appropriates those funds to many Government agencies. The tax on wages and funds appropriated to Social Security are not necessarily similar. Second, the operation is not social, because it is compulsory. Third, it is not secure, as it is subject to any alteration at any time, and there is no contract. Neither is funding as required of insurance companies, and is therefore, hopelessly in debt with contingent liabilities of almost half a trillion dollars.

Unfortunately, Social Security is so many different things that its ultimate fate must be left to the Supreme Court for decision. If the Supreme Court decides it is not constitutional, benefits will stop instantly, which would be a tragic situation for many elder citizens.

The Liberty Amendment, on the other hand, provides 3 years in which to transfer the operation from unfunded political mismanagement to funded, ecomonically sound, private management, controlled by law so that present and future beneficiaries will go right on receiving their checks.

37. "What about medicare? Will this be eliminated?"

The "medicare" program is similar to that of the Social Security system as a whole. With or without the Liberty Amendment the Supreme Court will some day have to settle the question. With the Liberty Amendment in force, the basic structure can be returned to private enterprise which has adequate medical and hospital plans working advantageously. The present system is unfunded and deeply in debt because of its contingent liabilities.

Actually, all our people will be in much better position with private insurers under a firm contract supervised by law.

38. "Is not the Federal Government responsibile for seeing our air and water is not polluted?"

Polluted water and smog-filled air is of deepest concern to the people of the community. Only they can solve the problem. Absentee bureaucrats in Washington, D.C. can not. As an example, Pittsburgh was once our dirtiest city and politicians kept it that way. A Smoke

Committee was organized by private manufacturers and industrialists and whipped the problem, with the result that today it is a clean city. The same can be done elsewhere.

39. "Our entire transportation system is in terrible shape, particularly railroads and local rapid transit. If the Federal Government does not take over, who will?"

Once upon a time we had the most efficient transportation system the world ever knew, all built and operated by private enterprise. Over an interval of a great many years, our local and national systems have been destroyed by the strategy of freezing revenue while increasing costs and taxes to the point of bankruptcy.

The only solution is to confine the Government to constitutional limits and permit the people themselves to build the network of transportation needed by today's mobile millions.

40. "If the Liberty Amendment gets the Government out of business, what will prevent large companies and wealthy individuals from creating monopolies?"

Competition in a free market prevents monopolies, because the rewards for production, invention, development, and service are profits. Profits are dependent upon giving the customer what he needs or wants to survive. If one fails to serve the customer, he is out of business and his competion takes over.

The exception to this is when political pressure is applied, and politicians take over....The Liberty Amendment would tend to eliminate monopoly and open up a truly free market.

41. "How did the Federal Government get so much land? What will happen to all the 'public lands?"

The Federal Government had no authority to hold back any public lands from the States as they were created, or to "take" any land in any State except as the Constitution provides.

The Constitution confirmed the terms of the Northwest Ordinance. All States were to come into the Union with rights and powers equal to the original States—in which the Federal Government had no property rights whatsoever—except first, as land might be purchased, second, with the consent of the legislature of the State in which the same shall be, and third, for agreed upon and needful purposes, such as arsenals, magazines, forts dockyards, et cetera.

Now we find that only two—tenths of 1 percent of Alaska was originally subject to the jurisdiction of the State. In Nevada the Federal Government holds 87 percent of the land area, in Utah 66 percent, and in Oregon 52 percent, in Idaho 64 percent, and in California 45 percent of the land area. Under the Liberty Amendment the 40 percent of the land area now under Federal control will be restored to State jurisdiction.

42. "Much of the land under Federal control seems to be worthless desert or rugged mountains. Who would buy land like that?"

Land that appears worthless to one may be highly regarded by another. An example is the land just north of California-Mexico border which was the most barren area imaginable, but men of vision saw possibilities in the arid desert land well below sea level, and now the Imperial Valley is a garden without compare. There is no worthless land.

43. "If private land developers get control of this land, would not they destroy the natural beauties and add to the problem of ecology?"

Federally controlled lands, turned back to State jurisdiction, will be under the watchful eye of the people most concerned with preserving their beauty and usefulness. State and local authorities will make the laws regarding them. An absentee landlord in Washington is not as concerned with the future of the land as are the people of the community involved.

44. "What will happen to our national parks and forests?"

There is no reason to fear that parks and forests will be destroyed because they will be in State jurisdiction. There is nothing to indicate that Federal control has any merit. State, city, and county parks are generally better maintained than national parks, because the local interest is higher.

The same may be said of forests. Records show that the ravages of fire and disease in a national forest are far greater than in State forests, and greater in States forests than in private forests. The obvious reason is that trees in a private forest represent a salable crop, while in public hands they are an avenue to political power.

45. "Can the States be trusted to maintain their parks and monuments and preserve these for posterity?"

Under the Constitution each State was sovereign and held complete jurisdiction over the land and activities within its boundares. As the Parks and Monuments are located within States, the States are naturally better stewards of their own property than any Federal agency could be.

The Constitution intended the state would hold exclusive jurisdiction over all land and activities within its own boundaries. The Liberty Amendment will restore that concept.

46. "What will be the effect on the Federal Trade Commission?"

According to the U.S. Government Organization Manual of 1971-72 (page 439), the Federal Trade Commission was established to "promote free and fair competition in interstate commerce through prevention of price-fixing agreements, boycotts, combinations in restraint of trade, and other unfair methods of competition." Nice words but this agency has become along with others, the proponent of price fixing, boycotts, and various restraints of trade that hamper private enterprise. This may well be an attempt to cripple private enterprise and clamp a tighter political grip on private affairs. Under the Liberty Amendment the Federal Trade Commission will hold limited regulatory powers.

47. "How will the application of the Liberty Amendment affect the Federal Communications Commission?"

The Federal Communication Commission holds some valid regulatory powers, but they have no constitutional authority to control, punish, or dismember any channels of communication. Like so many Government agencies, the Federal Communications Commission has assumed powers that it simply does not have. Media slanting is one of these. The Liberty Amendment will stop the despotic control of broadcasting privileges of stations at odds with FCC bias.

48. "What about the effect of the Liberty Amendment on the Labor Relations Board?"

The National Labor Relations Act of 1935 authorized a National Labor Relations Board to investigate and settle labor disputes. It has no constitutional authority for existence, but it has wielded enormous power. We can assume the Liberty Amendment will stop the arbitrary control of labor, management, and industry by edicts that have no constitutional authority. Realistically, the only legitimate jurisdiction the Federal Government has over labor and management is within the ranks of Federal employees.

With the National Labor Relations confined to its proper sphere, the terrifying power of labor unions over workers will be drastically reduced. . . .

50. "How will Government be able to control labor and business monopolies if the Liberty Amendment removes or limits the regulatory powers of the Federal Government?"

It is ironic that so many people are worried about labor and business monopolies, and yet it apparently never occurs to them that the monopolist to fear most is Government itself. In Communist countries government has a monopoly on all activities, and the people have no

economic freedom. With our Federal Government controlling 40 percent of the land area and 20 percent of the industrial capacity of this Nation, we are facing the same disaster.

Free enterprise destroys monopolies faster than can government control.

51. "What is the value of the land and personal property held by the Federal bureaus?"

The Committee on Government Operations of the House of Representatives maintains a continuing inventory of the real and personal property held by the Government. Their June 30, 1970, report gives a figure of $435 billion for the world wide holdings as of that date. The estimate is extremely low and some properties—such as the famous Presidio in San Francisco inventoried at $1—are under valued in their appraisal. One thing is certain, if even half of these properties—the ones held without constitutional authorization—are sold at half of book value, the recovered amount will be well over $100 billion.

52. "Supposing all these properties and facilities are not sold off as expected, or do not sell for the prices expected, then that happens?"

If the properties are not sold within 3 years, the Federal Government must relinquish them anyway, and anything left unsold will revert to State jurisdiction for disposal or retention, as the case may be. Prices may vary in the liquidation process, but the main point is that these properties will be removed from Federal hands and restored to State jurisdiction and private taxpaying ownership. The consequent saving from not maintaining these bureaucratic empires will exceed what we now pay in income taxes.

53. "Now that you have the activities of these agencies that are not authorized and listed, why not get Congress to eliminate them?"

Theoretically this sounds like a good idea, but do you know of anyone who has enough power in Congress to override the pressure of the Federal bureaucracy? The bureaucracy has billions of our tax dollars at their disposal every year, and their lobby keeps the pressure on Congress for more power and more appropriations, endlessly. The only way to remove their power is to dry up the tax fountain with the Liberty Amendment.

54. "What effect would the Liberty Amendment have on the plan for regional government, which would concentrate all power in Washington?"

A concerted effort is being made to brainwash the American people into accepting not only regional government, but a new Constitution. Books advance the idea, articles in prominent magazines, TV programs and speeches by people who must be misinformed are outright enemies.

The Liberty Amendment will stop these attacks and restore the sovereignty of States. It will automatically outlaw all such designs for the concentration of power from either regional government or a Constitution other than the one we now have, which provides for individual freedom.

55. "Will the Liberty Amendment have any effect on unemployment?"

Unemployment is a tragic fact of life to many people. Surprisingly, the Liberty Amendment will solve much of the unemployment problem. Getting the Government out of business enterprises it operates without constitutional authority would eliminate the staggering losses. This would make possible the elimination of income tax. Workers would then receive about 20 percent more take home pay without any change in their rate of pay. This increased purchasing power would stimulate production and make the economy boom.

56. "Isn't the Liberty Amendment just a scheme to shift the load of responsibility from the Federal Government onto the back of the State government"

Not at all. The idea is to get the responsibility back into the hands of each individual. When Government deprives the individual of self determination and individual responsibility, it tends toward a nation of slaves or robots. In a free society, a free man must be self-reliant and help maintain the society of which he is a part. Our Government was limited in power by the Constitution. The purpose of the Liberty Amendment is to stop the concentration of despotic power an redistribute it to the people.

57. "Does not Congress already have the power to sell such properties and repeal or reduce taxes?"

Yes, Congress has such power and used it on various occasions, sometimes very strangely. For example, Congress did abolish the Reconstruction Finance Corporation, after it had dissipated an estimated $50 billions in tax dollars. While title I of the act abolished the Reconstruction Finance Corporation, title II of the same act created the Small Business Administration, enlarged the General Services Administraction, and divided all the residuary powers of RFC between them. The name on the door changed, but now there were two doors instead of one.

The sale of the Synthetic Rubber Industry and General Analine and Film Corp. was accomplished, but while these were being sold, other businesses were issuing from the prolific bureaucracy. Reinforcing the Constitution will stop this sleight-of-hand process.

58. "If Federal agencies are operating businesses without constitutional authority, why do not you take them to court?"

A good idea, and many persons have tried it; but there is a catch—there is no way to sue Government without the Governments's permission, and this is rarely given. The Constitution provides that we, the people, shall be able to "petition the Government for redress of grievances," but the courts have repeatedly shut their eyes to the flagrant assaults against the constitutional rights and powers of the people, and have contended that they have no "jurisdiction" when a bureaucratic "regulation" is involved. The only real court available that can change this situation is the court of public opinion which can restore the Constitution by applying the Liberty Amendment.

59. "Do not you think it is necessary for our Government to keep ahead of Russia in the space race, or the arms race, or the merchant marine?"

The United States for a long time has been the first place in most fields. We should continue in that position. The question is, why are we lagging behind now? Is it possible our Government has been so busy playing the dangerous game of world power politics and trying to run everyone else's affairs that they have neglected our safety and liberty? Now we are warned that we need to hurry to keep up, but we are increasingly being hampered in our efforts by regulations and directives and competition from tax-free governmental agencies that prevent it. The Liberty Amendment will release the vast resources of American inventive genius and production know-how and again give workers the incentive of a full paycheck.

So far as the space race is concerned, the Space Act strangled private incentive by declaring that all inventions dealing with space belong to the Government, instead of to the inventors, as the Constitution provides.

60. "Exactly what is the Federal Reserve System an what will the Liberty amendment do about it?"

There is probably more misinformation about the Federal Reserve System than about any other one thing. Some say it is a Federal agency; others say that it is privately owned. In 1913 an act of Congress created the FRS to provide us with what was defined as "an elastic currency." This has been done, and in the process our stable currency, based on silver and gold standards, has been replaced by printing press money. The Hoover report of 1955 declared the Federal Reserve to be the first of the 104 banking and lending organizations then being operated by Government. A recent U.S. Government organization Manual confirms this. The article "Who Gets The Plunder?" in Freedom magazine reproduced a page from the 57th Federal Reserve report to Congress, showing that in 1970 the U.S. Treasury received 98.9 percent of the earnings, while only 1.2 percent went to the banks compelled to own FRS bank stock. The Liberty Amendment will remove the Government from the banking business.

61. "Can the inflation we have experiencing for years be stopped by the Liberty Amendment?"

The sprial of inflation will be stopped when the Federal Reserve System's endless stream of printing press money is stopped. Webster's International Dictionary defines

"Inflation" as "an increase in the volume of money and credit relative to available goods resulting in a substantial and continuing rise in the general price level." In other words, when money is printed faster than actual production of goods and services, we have inflation.

Our president and Congress constantly spend more money than all the American people combined can funnel into Washington through taxes. Then they translate these deficits into unredeemable printing press money and we have inflation. In 1971, $40 billion of new paper money was printed for the FRS to cover the Government's deficit—thus was created that much inflation.

Yes, the Liberty Amendment can stop inflation.

62. "Does the Government have anything to do with setting interest rates, and what will the Liberty Amendment do about it?"

Economists and the news media have a great deal to say about interest rates, although it is baffling to most ordinary individuals. These days our credit is at the mercy of the bureaucracy that controls money. Interest rates are manipulated by the politically appointed directors of the Federal Reserve System. This manipulation will stop when the Liberty Amendment is in operation. When the happy day comes, credit arrangements will be strictly between the borrower and the lender, based upon the borrower's integrity and ability to repay. Interests rates will become realistic, also, when they are no longer manipulated through political control. after all, it is on this basis America was built.

63. "How about all the tax money that is spent on wars. Will the Liberty Amendment change this?"

The sole function of the Defense Department is to defend this country from foreign aggression. The Liberty Amendment will not cut the obligations of Defense Department to carry out its specified duties, to defend this Nation on the ground, in the air, at sea, and even in space. The Constitution enforced by the Liberty Amendment, will not permit undeclared "no win" wars, and our defense posture will be improved enormously by getting our defense establishment back into the business of defending, rather than competing with us, as they do now, through thousands of business, industrial and commercial establishments.

64. "Will the Liberty Amendment have any effect on the present law regarding the draft?"

While there is no longer a draft in this country, every eligible male who attains the age of 18 years must register and carry a draft card, presumably to keep a record of eligible strength in case of emergency.

The 13th amendment very distinctly provides that:

"Neither slavery nor involuntary servitude, except as punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction."

If we have learned anything from history it is that no conscripted army has ever proved the equal of a free people defending themselves. Returning to the Constitution will prevent the draft, and increase our defense posture because we will be free to defend the most priceless possession of all—Liberty.

65. "Exactly what effect will the Liberty Amendment have on our membership in the United Nations?"

The United Nations building is located in New York City. This country contributes by far the largest amount of money in support to this organization. Some people believe that the United Nations Charter supersedes our Constitution, but this is not true. Nothing supersedes our Constitution as the supreme law, and certainly not the United Nations Charter. The Liberty Amendment will end the pretense that treaty law, the Genocide Treaty, or any other such device can have an valid impact on our domestic affairs, our industries, our domestic affairs, our industries, our lands, or our activities. It will reduce the United Nations Organization to a forum for the discussion of international affairs and international relations.

66. "Will the Liberty Amendment have any effect upon Communist countries?"

Time and again the wealth and resources of the United States have been diverted to the aid of Communist controlled countries. Apparently the Communist system is incapable of sustaining its own existence. When our Government is confined again to the terms of the Constitution, it can no longer bail out Communist countries

when their economy falters, and the enslaved people may be able to establish forms of government of their own free choice.

67. "Unless we have a hand in managing the affairs of some small nations, is there not danger that they will fall under Communist control?"

When the torch of freedom burns brighter in this country through the re-establishment of our Constitution, we will be in a better position to set an example for other nations. The Constitution does not permit this country to maintain the economy of other nations or control their political lives, yet that is what we have been doing. Foreign aid around the world cost the United States people, from 1946 through 1971, a total of $212,880,797,000. The rulers of 3½ billion inhabitants of this world, have received aid from the United States. The Liberty Amendment will stop with this madness which is destroying us.

68. "Would it not be a good idea to continue foreign aid to help the more friendly countries?"

Foreign aid does not reach the people of any country, friendly or otherwise. It is a gift from the Chief of State elsewhere. It only enriches the tyrant. Our constitution protects us from this device for plunder. Our Government was empowered to gather taxes to protect this Nation from the avarice and cupidity of all the other nations of the Earth. It did not grant any administration the power to hand our tax dollars, or the production of our people, to any foreign power. The Liberty Amendment will stop this dissipation of our substance by Government, and will restore the right of people to assist whom ever they willaround the world, as they once did.

69. "How will the Liberty Amendment affect such treaties and alliances as NATO, SEATO, and others like them?"

The Liberty Amendment will not alter the right and power of the President, with the advice and consent of the Senate, to enter into any treaty that may be within the authority of the Constitution. A review of the Constitution shows that no treaty can be valid which in any way jeopardized the independence of the United States or any of the separate States or permits any foreign power or combination of foreign powers to exercise jurisdiction or control over the internal affairs of the United States or any of the individual States, whether it be with the U.N., NATO, SEATO, or any other.

70. "Will we be able to defend our country properly under the Liberty Amendment?"

We have already touched on this subject of defense, and should be reassured that the Liberty Amendment will accomplish miracles in this area. At the present time the Defense Department is involved in thousands of businesses without constitutional authority. Divorced from these activities, their total attention will be given to the defense of this Nation, and with the Constitution back in force and effect we will not be involved in undeclared wars. The Constitution wisely separated the power of declaring war from the power of waging war, to prevent its being declared for the sake of waging it.

71. "Will we still be able to have a strong economy in the fields of mining, agriculture, manufacturing and transporation with the Liberty Amendment?"

All of these activities will flourish incredibly well. Gold and silver production has been stifled, agriculture has been hampered; manufacturers have been in bureaucratic straightjackets; transportation has been strangled. There is no open market. We can expect spectacular new developments in all these fields and every other area of production when the Liberty Amendment is in force.

72. "If the Government does not finance or underwrite research and development, who will?"

The only research and development of Government has any right to be involved in is in the defense of this Nation. Even here, it has been individuals and companies that have researched and devised all methods of production. A man named Colt invented the revolver, and the Army was reluctant to adopt it. An American

invented the submarine, and our Navy would not even look at it. The airplane was invented here, and the U.S. was one of the last to adopt it to our defense. Gen. Billy Mitchell was discharged from the Armed Forces because he advocated air power. Government has curtailed real research and development, and our weaponry has suffered.

73. "Exactly what effect will the Liberty Amendment have on our local State and city governments?"

Federal aid to state and city governments sounds good, but the Federal government has manipulated the States into very dangerous financial situations through "sharing," "matching funds" and managed inflations.

Cities have been drained of vitality by the Federal individual income tax, which syphons away their potential resources, and federal agencies which inject themselves into essential municpal services and make them more costly. Both States and cities will be better off under the Liberty Amendment.

74. "What will happen to the Government's revenue sharing plan?"

At first glance revenue sharing looks like a splended idea. The Federal Government gathers a wealth of taxes from the people and then dribbles a little money back to the States and local governments for their own use. Upon further examination, this new device proves to be a take-over of the states, for it is only a small subsidy, and when government subsidizes anything it exerts control.

There are already too many subsidies in existence that undermine our states' prerogatives. Now even their boundaries are being threatened by "regional government" which would replace the individual states with 10 regions.

Restoring the Constitution, as the Liberty Amendment is capable of doing, would take care of all of these questions—regional government included.

TAPE 561, No. 1

Liberty Amendment

This is Alan Stang. Congressman Ron Paul wants the federal income tax abolished. Details in a minute. Please stick around.

***

A few weeks ago, Congressman Ron Paul, of Texas, who is a member of the House Banking Committee, reintroduced the Liberty Amendment. This historic legislation would eliminate the need for the personal income tax, by abolishing agencies of the federal government that are doing business in direct competition with private enterprise. Congressman Paul points to such examples as the Commodity Credit Corporation, the Tennessee Valley Authority, the Synthetic Fuels Corporation, and various lending institutions.

The Commodity Credit Corporation is of course the bank of the Department of Agriculture. Regular listeners will remember that it is paying your tax money to the monster multinational banks, because Poland is broke. Those payments began last year, with the blessing of the Reagan Administration. Dr. Paul says that the Commodity Credit Corporation and other businesses "are not constitutionally authorized and should be eliminated. This would so radically reduce federal expenditures that the personal income tax — the 16th Amendment to the U.S. Constitution — could itself be repealed, which the Liberty Amendment would accomplish." Of course the Internal Revenue Service would be abolished too. That's right, friends, no more 1040s, no more withholding!

Dr. Paul explains that since income taxes do not supply the bulk of the federal government's revenues, the losses in revenues would be more than made up by the sale of government corporate operations — and the profits could then be used to balance the federal budget.

Congressman Paul says this: "This amendment would go far toward restoring constitutional government in America, addressing our economic problems at their cause — excessive government spending — and by so doing eliminating the need for the personal income tax. The Liberty Amendment would leave the government with all revenue sources it ever had from the beginning until 1913 — corporate taxes, excises, imposts, duties and a host of miscellaneous taxes which have always been within the power of the federal government."

Nineteen thirteen is of course the year we got the income tax. Except for the Civil War years, we got along without one from the very beginning of our nation until well into the present century. Our government never collapsed, not once. It didn't need an income tax because it wasn't spending us into bankruptcy. Now, it is, and even with a tax approaching confiscation, the government says it needs still more of your money. I'll be back in a minute.

***

The Liberty Amendment has been endorsed by state legislatures around the country; most recently by Indiana and Arizona. It certainly has to be considered news, but your reporter can't remember ever hearing it mentioned by his colleagues in the national press. Be with me tomorrow when we'll see whether the income tax is legal.

This is Alan Stang. Think about it.

Tape 561, No. 2

Is Income Tax Legal?

This is Alan Stang. Is the income tax legal? A new discovery. Details in a minute. Please stick around.

***

Yesterday, as you will recall, we mentioned the proposed Liberty Amendment to the U.S. Constitution, which Texas Congressman Ron Paul recently reintroduced in the House. The Liberty Amendment would repeal the Sixteenth Amend-

The Alan Stang Report is a daily five-minute radio news commentary. The broadcasts are written and narrated by Alan Stang, and are produced by Marilyn White. Printed copies of Mr. Stang's commentaries are available at three copies for one dollar, or twenty copies for five copies. Information on availability of The Stang Report for broadcast in your area will be sent free of charge upon request.
Please address orders and inquiries to: The Alan Stang Report, Post Office Box 725, Alta Loma, California 91701.

ment, which gives Congress the power to impose an income tax. If the income tax is legal, it applies only to a strictly limited, very small group of people and activities, such as corporations. If you are a regular listener to these broadcasts, you know that the paycheck you get for your work is not what the law means by income. It is not subject to the tax.

Is the income tax legal? A fascinating article on the subject appeared in the January issue of *The Justice Times*, which says that "the 16th Amendment cannot be valid law due to the fact that it was not signed by the President of the United States." The Sixteenth Amendment started out as a Joint Resolution of Congress. According to *Black's Law Dictionary*, a Joint Resolution must be approved by the President. But the Joint Resolution that gave us the income tax was signed by Vice President James Sherman, not President William Howard Taft. Does this mean that the law is defective?

There is also the interesting fact that the Sixteenth Amendment is listed in U.S. statutes as a private law, as opposed to public law. Private law governs relations between individuals, and applies only to particular groups. Public law brings the government into it, and applies to everyone, without exception. So, why would the income tax amendment turn out to be a private law, rather than a public one?

The Justice Times says, as follows: "The intent of the framers of the 16th Amendment, which is supported by any number of Supreme Court decisions, was that the income tax was an excise tax and must be limited to an indirect tax which was assessed on corporations in return for the privilege of doing business in a corporate capacity. Is this the reason the 16th Amendment was designated as a Private Law rather than a Public Law? Let the reader be the judge."

This fascinating question certainly deserves further investigation. It is one of the many mysteries of the income tax that research is bringing to the surface. It is important to note that Congress could get rid of the income tax any day of the week. The Sixteenth Amendment doesn't say there has to be an income tax. It just gives Congress the power to impose one, if it wants to. Congress could abolish the I.R.S. tomorrow. I'll be back in a minute.

Why not read the article for yourself. *The Justice Times* is published monthly in Clinton, Arkansas. A yearly subscription is twenty dollars. The address is Post Office Box 562, Clinton, Arkansas, 72031. Be with me tomorrow, when we'll take a look at a remarkable offer by author Irwin Schiff.

This is Alan Stang. Think about it.

Tape 561, No. 3

Irwin Schiff's Offer

This is Alan Stang. Author Irwin Schiff makes a remarkable offer. Details in a minute. Please stick around.

***

Regular listeners to these broadcasts are familiar with Irwin Schiff. Mr. Schiff is the author of the book entitled, *How Anyone Can Stop Paying Income Taxes*, the national best seller distributed by Simon & Schuster. In it, Schiff shows that the payment of income tax is voluntary, a fact repeated by one Commissioner of Internal Revenue after another. Now, to use a cliche that fits perfectly, Irwin Schiff puts his money where his mouth is.

Irwin Schiff's Freedom League has launched the $100,000 I.R.S. Treasure Hunt. Here's what the Treasure Hunt is all about, from the Freedom League's advertising copy: "One hundred thousand dollars will be awarded to anyone who can show any section of the Internal Revenue Code that 'requires' we the people, as individual citizens, to file a personal income tax return (popularly known as the 1040 form). The contest is open to all, including I.R.S. personnel! Let the I.R.S. help you win! If there is any section of the code which 'requires' one to file, then the I.R.S. should know. So call the I.R.S. Ask them if American citizens are 'required' to file income tax returns or if it is 'voluntary.' If the I.R.S. says you are 'required,' then ask them to send you the section of the Internal Revenue Code which states that you are 'required.'"

The ad says you should send the information you get from I.R.S. to Irwin Schiff. The earliest postmark wins. Everyone is eligible. In the event of a tie, the $100,000 will be divided equally, and it is tax-free. Needless to say, the winner will be paid in Federal Reserve Notes, not in money, because the government has made money unavailable. Still, the Schiff offer sounds like an excellent deal. This is the Internal Revenue Service's chance to prove its case, and make Irwin Schiff look like a fool.

We suspect that I.R.S. is going to have trouble. There is a good reason that various Commissioners of Internal Revenue have said repeatedly that the income tax is voluntary. It *has* to be voluntary, because when you sign the return —under penalty of perjury — you are testifying against yourself just as certainly as if you were sitting on the witness chair in court. This is a well-settled fact in our system of law. The Fifth Amendment forbids the government to require an American to testify against himself. If the income tax required that, it would be illegal. That's why the Commissioners keep saying it is voluntary. I'll be back in a minute.

***

To win your $100,000, send the pertinent section from the Internal Revenue Code to Irwin Schiff, Freedom Books, Post Office Box 5303, Hamden, Connecticut, 06518. For more information, call Irwin Schiff's Freedom League, at (714) 771-6520.

This is Alan Stang. Think about it.

Tape 561, No. 4

Corporate Tax

This is Alan Stang. Some thoughts on the President's remark about the corporate income tax. Details in a minute. Please stick around.

***

Three weeks ago, President Reagan said in Boston: "I realize that there'll be a great stirring and I'll probably kick myself for having said this but when are we all going to have the courage to point out that in our tax structure the corporate tax is very hard to justify?" The President said we ought to consider abolishing that tax. The theory behind abolition is that corporate profits are taxed twice: once when the corporation earns them; again when they are paid to the stockholders as dividends. Abolition would stop this double taxation.

Let's say a word in defense of the corporate income tax. A corporation is of course a creature of government. It is created by government and could not exist without it. Its existence is a favor granted by the government. Just as the God of most individual Americans is the Lord; the god of the corporation is government. If an income tax should be levied properly anywhere, it should hit the corporation, as a tribute paid to government in return for the favor of the corporation's existence.

The President got into substantial political trouble for suggesting the abolition of the corporate income tax. He would win the gratitude of tens of millions — and stand on much firmer constitutional ground — by calling for the abolition of the *personal* income tax. Indeed, the President could end one of the biggest hoaxes of all time — maybe the biggest — by stating that the personal income tax on individuals has been illegal all along.

We mentioned that the President drew political flak for his suggestion. The next day, he backed away from it quickly. The *Los Angeles Times* reports that his advisers told him he had said "the wrong thing at the wrong time." One White House official said that the President had been "fighting to stay awake" just before he made the suggestion, and just forgot that about three hundred reporters were there. The next day, White House spokesman Larry Speakes was reminded that the President of the United States had said the idea should be looked at. Speakes replied, "Well, it ain't gonna be looked at."

Remember, all these examples come from within the Administration, not from Tip O'Neill, and they certainly lend fuel to the accusations by the President's enemies that he lacks the political courage he talks about, and that he is someone else's tool. We don't pretend to know what is happening in the White House, but this latest fiasco proves something is wrong. I'll be back in a minute.

***

The monster multinational corporations are happy to pay the corporate income tax. One of its effects has been to stifle competition, by making it difficult for new companies to challenge the biggies. To do that, the challenger must accumulate capital; but the corporate income tax takes that money away.

This is Alan Stang. Think about it.

Tape 561, No. 5

Watt Baiting

This is Alan Stang. A remarkable editorial about Socialism and James Watt. Details in a minute. Please stick around.

***

By now you know that a few weeks ago, Secretary of the Interior James Watt made a speech about the shocking problems of many American Indians. Watt said this: "Every social problem is exaggerated because of socialistic government policies on the Indian reservation. If you want an example of the failure of socialism don't go to Russia — come to America and go to the Indian reservations."

Our friends the liberals didn't like this. They don't like much of anything Secretary Watt has to say, but his statement about the reservations seems to have struck the proverbial sensitive nerve. *The Miami Herald*, one of the nation's major daily newspapers, put the following headline on its denunciation: "Red Baiting." We are certainly grateful to the *Herald* for acknowledging that Socialism is Red. Socialism is obviously the *Herald's* hot button. In its remarkable editorial, the Miami newspaper worries more than anything else about defending Socialism from Secretary Watt.

The *Herald* says this: "Socialism is that system of political economy that best describes the societies of most nations in Western Europe. Socialism is the Tennessee Valley Authority and Social Security and Medicare and Government subsidies for Lockheed and Chrysler." That's right, that's what the *Miami Herald* says, and, again, it has our gratitude. Social Security and those other things *are* Socialism, are Red, as the *Herald* says; but until now a man could be labelled an extremist for saying so. Now that the *Miami Herald* says so, presumably it's okay. It has always been okay to call government subsidies to Lockheed and Chrysler "Socialism for the rich." That what it is.

But, if the disaster on the Indian reservations *isn't* Socialism, what it is? *The Miami Herald* has the answer: "America's Indian reservations are not socialism. They are failures of something more properly understood as paternalism, and a cruel, uncaring paternalism indeed. The Government maintains them, but the Government does precious little for them."

In short, the *Herald* is angry because the government hasn't given as much to the reservations as it has to the corporations. Our friends the liberals don't want to change the reservation system; they made it. Their complaint is the fact that "Socialism for the poor" isn't luxurious enough. Would the *Miami Herald* please comment. The more that newspaper editorializes, the better we like it, and the more grateful we are. I'll be back in a minute.

The Miami Herald's problem is that paternalism and Socialism go together like two legs on the same bug. Indeed, paternalism is the *essence* of Socialism, which is impossible without it. British Socialist George Bernard Shaw once explained that you would live fairly well under Socialism if you did as you were told. If you didn't you would be shot.

This is Alan Stang. Think about it.

SB

13

LETTER OF INTENT

CSSB 13

HOUSE JUDICIARY COMMITTEE
May 9, 1983

The Committee does not intend that the mere presence at the scene of a fire of a firefighter or other emergency responder would be sufficient in all cases to constitute danger of serious physical injury necessary to establish the crime of arson in the first degree. The existence of the necessary danger will be an issue of fact which must be determined by the trier of fact in each individual case.

SENATE LETTER OF INTENT

(SENATE BILL 13)

The Judiciary Committee has had under consideration SB 13, relating to the crime of arson. The Committee recommends that SB 13 be replaced with Committee Substitute for SB 13 (CSSB 13), and that CSSB 13 do pass.

Under Alaska Statute 11.46.400, a person, under certain circumstances set forth in the section, is guilty of the crime of arson in the first degree if by starting a fire or explosion, such person recklessly places another "person" in danger of physical injury.

However, in the Superior Court at Fairbanks, a trial judge instructed a jury, in an arson prosecution under AS 11.46.400, that "a fireman is not a 'person' within the crime of first degree arson", i.e., that one who starts a fire or explosion, thereby placing a fireman in danger of physical injury, has not thereby put a "person" in danger of physical injury within the meaning of the section cited. (State v. Markland, case no. 4FA S82-100 Criminal).

The Alaska State Firefighters Association has sought an amendment to prevent such an instruction from being given again. The Committee Substitute for SB 13 would make clear that for purposes of AS 11.46.400, public safety personnel and public employees responding to emergencies are "person[s]" whose reckless endangerment by another who intentionally causes a fire or explosion could be the basis of a prosecution under the statute.

During the Judiciary Committee's consideration of SB 13, a representative of the Alaska Department of Law expressed concern lest the Legislature, by changing AS 11.46.400 only, could be viewed by a Court as having intended to exclude public safety personnel and/or public employees responding to emergencies from the meaning of the word "person" or "persons" where those words appear elsewhere in Title 11.

There is no such intention. Rather, the Committee wishes to cure a specific problem which arose in a specific setting under one section of Title 11. It is the view of the Committee, respectfully, and as part of the traditional legislative oversight of judicial interpretations of statutory law, that the exclusion of fire fighters from the purview of the term "person", in AS 11.46.400, in the instruction of the trial judge, was a misapprehension of legislative intent and was unsupportable as public policy. The Committee wishes to avoid any similar misapprehensions of the meaning of AS 11.46.400 in future. The report of the Committee and the enactment of CSSB 13 should not be construed to reflect any legislative intent to exclude fire fighters, police officers, or other public safety personnel or public employees from the purview of the term "person" in other sections of Title 11. On the

contrary, it is rather the view of the Committee that no such exclusion can be reasonably found or implied, and thus, no other statutory changes are required.

ALASKA STATE FIREFIGHTERS ASSOCIATION

HOUSE JUDICIARY COMMITTFE

Hearing on Committee Substitute for Senate Bill No. 13, relating to Crime

March 18, 1983

Mr. Chairman:

My name if E. Robert Haag and I represent the Alaska State Firefighters Association and the Alaska Fire Chief Association.

We wish to speak in favor of CSSB-13 now before your Committee.

We appreared before the Senate Judiciary Committee in January and February in support of SB-13. We did suggest a minor wordage change to the defination of "another person" in the Bill. This was considered by the Senate Judiciary Committee. A Committee Substitue was drafted, discussed and subsequently passed by the Committee. The full Senate passed the Bill without objections.

Mr. Chairman, we know that you have all the information concerning this Bill. Also you have a very busy schedule. Therefore, our hope is that your Committee will give serious consideration to the passage of this Bill so that it may become law at the earlist date.

SB

86

FROM SENATOR KERTTULA

SB 86: BACKGROUND

State compensation for victims of violent crimes was a response to the growing concern that while an offender's rights were protected the rights of the victim were often overlooked. California was the first state to address this issue and in 1965 enacted a Victim Compensation Program. As of January 1, 1983, thirty-four states plus the District of Columbia had established similar programs.

AS 18.67, establishing a Violent Crimes Compensation Board, was adopted by the state legislature in 1972. The purpose of this legislation is:

> to facilitate and permit the payment of compensation to innocent persons injured, to dependents of persons killed, and to certain other persons who by virtue of their relationship to the vicitm of a crime incur actual and reasonable expense as a result of certain serious crimes or in attempts to prevent the commission of crime or to apprehend suspected criminals. AS 18.67.010.

The Violent Crimes Compensation Board is in the Department of Public Safety. The Board is composed of three members appointed by the governor. It is the duty of the board to review and rule on all applications received. Payment of compensation can be ordered if personal injury or death resulted from:

> (1) an attempt on the part of the applicant to prevent the commission of crime, or to apprehend a suspected criminal, or aiding or attempting to aid a police officer to do so, or aiding a victim of a crime; or
>
> (2) the commission or attempt on the part of one other than the applicant to commite any of the following offenses: murder in any degree, manslaughter, criminally negligent homicide, assault in the first or second degree, kidnapping, sexual assault in any degree, sexual abuse of a minor, robbery in any degree, contributing to the delinquency of a minor under AS 11.15.130(a)(4), or threats to do bodily harm. AS 18.67.101.

Victim compensation covers reasonable expenses incurred; loss of earnings power due to incapacibility; job retraining or employment - oriented rehabilitive services; pecuniary loss to the dependents of the deceased victim; and other reasonable loss determined by the board. AS 18.67.110.

Presently compensation is made payable to or for the benefit of the injured person; to a person responsible for the maintenance of the victim; or to the dependent of a deceased victim. AS 18.67.080. The total amount of compensation is limited to $25,000 per victim per incident for losses and expenses not covered by collateral sources. Life insurance proceeds are not treated as a collateral source AS 18.67.090. However, in the case of the death of a vicitm who has more than one eligible dependent compensation may not exceed $40,000. AS 18.67.130.

Additional limitiations exist under the current state statute. No compensation may be awarded unless an application to the board for compensation was made within two years after the date of the incident and the incident was reported to the police within five days of its occurrance or within five days of the time when a report could reasonably have been made. AS 18.67.130.

Presently no compensation may be awarded if the victim:

(1) is a relative of the offender;
(2) is, at the time of the personal injury or at the time of the injury wihcih results in the death of the victim living with the offender as a member of the same family or household, or maintaining a sexual relationship, whether illicit or not, with the offender or with a member of the offender's family;
(3) violated a penal law of the state, hsich violation caused or contributed to his injuries or death; or
(4) is injured as a resurlt of the operation of a motor vehicle, boat or airplane unless the vehicle was used a s a weapon in a deliberate attempt to injure or kill the victim.

The bill as introduced would revise the statutes affecting the Violent Crimes Compensation Board as follows:

(1) AS 18.67.080 would be amended by adding a new paragraph, which would allow compensation to be paid directly to the provider of the service.

Result: The victim receives necessary services and the provider is ensured of payment with a minimal amount of red tape.

Argument for: In situations where the provider has given services to the victim without charge the board must make joint payment to the victim or his representative and the provider. Nola Capp, administration to the board, has encountered numerous cases where payment never reached the provider. With the addition of this new paragraph the administrative procedures will be reduced.

Argument against: The only possible argument against this addition might be the concern that victims who paid for the service would not be reimbursed. This can be countered with the administrative safeguard already in existence. The Board requires receipts of all expenses paid by the victim and also notifies the provider that if payment has already been made then the award of compensation is to be passed on to the victim

(2) The bill repeals AS 18.67.130(b) (1) and (2), which deny compensation to the victim if he or she is a relative of the offender, member of the offender's household, maintaining a sexual relationship with the offender or with a member of the offender's family.

Result: The purpose of AS 18.67.10 - AS 18.67.130, "to facilitate and permit the payment of compensation to innocent persons injured" will only be achieved if all "innocent victims" are treated equally.

Arguments for: The relation between the victim and the offender should not work as a financial disadvantage if the victim is innocent, reports the crime and cooperates with the local law enforcement officials. Each case that comes to the board is investigated completely and a determination is made as to whether or not compensation should be awarded. Thus we already have sufficient safeguards in existence to weed out any fabricated stories. Also, since compensation only covers those reasonable expenses incurred as a result of the personal injury nothing is to be gained. The present restriction primarily denies compensation for victims of domestic violence and incest. Rural Alaska presents another problem due to the fact that the population is sparse, housing is often limited and many people are distantly related.

Arguments against: If relatives are allowed to be

compensated for injuries sustained as a result of criminal activity the offender is benefiting from his/her misconduct. Counter: Only reasonable expenses incurred are compensated, thus no financial gain.

Victims of domestic violence will get compensated but might not file charges. Counter: the crime must now be reported under AS 18.67.130, and if this bill passes in its entirety, the victim would be required to aid in the apprehension and conviction of the offender. Once again, the board carefully scrutinizes each case.

Relatives or members of same household are more likely to conspire for financial gain. Counter: where is the gain if only expenses incurred are compensated?

(3) AS 18.67.130(b) would be amended by adding a new paragraph. No compensation may be awarded if the victim:

> refuses to give reasonable cooperation to state or local law-enforcement agencies in their efforts to apprehend and convict the offender for the crime resulting in the personal injury, unless good cause for the refusal is shown the board.

Result: Although the victim must presently report the incident within five days of its occurrence, this would strengthen the amount of assistance imposed on the recipient of compensation.

Arguments for: This provides the local law enforcement agency with additional support in the apprehension and conviction of offenders. In many ways this is already required because of the reporting requirement. Even a hostile victim/witness can be subpoenaed by the prosecution. More importantly this additional requirement would counter the argument that relatives or members of a household, if eligible for compensation, would conspire to defraud the state through collusion.

Arguments against: Certain victims might argue that this is an unreasonable requirement, particularly if further mental anxiety would occur. However, each case is reviewed individually and the amendment gives the board the discretion to determine whether "good cause" is shown for noncompliance.

Defense attorneys might use this compensation/cooperation requirement to impeach the credibility of a victim/witness with a "bought" testimony argument. The counter argument is that the victim/witness only is reimbursed for reasonable expenses incurred as a result of the perpetrator's criminal conduct. No real financial gain.

Final Note

A victim is a victim and if innocent should be treated as such.

In 1982 the basic provisions of this bill were introduced in the House by Halford and Clocksin (HB 869) and in the Senate, by Bradley (SB 620).

SB 620 restricted compensation if at the time of application for compensation (the victim) was living with the offender as a member of the same family or household, or maintaining a sexual relationship, whether illicit or not, with the offender."

This provision only speaks to the time of making application and nothing prevents reconciliation, if that was the point to be made. Because of this I find this provision to be without real merit.

SCOPE
CA DC FE GE IL MA MD TN VA
ABSTRACT

THIS ARTICLE PRESENTS THE NOTION THAT BOTH ECONOMY AND JUSTICE ARE WELL SERVED BY FORMS OF PUNISHMENT OTHER THAN PRISON. IT CONTENDS THAT POLICIES THAT INCREASE THE DURATION AND FREQUENCY OF PRISON SENTENCES ARE BY FAR THE MOST EXPENSIVE WAYS TO DEAL WITH THE CRIME PROBLEM, SO IT IS SURPRISING THAT NEW SENTENCING LAWS AND THE PRISON BUILDING BOOM HAVE SO FAR ESCAPED PROPOSITION 13 FEVER. THEIR IMMUNITY FROM THE FISCAL SCYTHE IS NOT DUE TO ANY GREAT PUBLIC OR LEGISLATIVE SATISFACTION WITH THE PRISON SYSTEM, WHICH MANY BELIEVE HAS FAILED MISERABLY TO REHABILITATE PRISONERS OR DETER CRIMES. ILL. INCLUDED.

	Months				

ANALYSIS:

If the proposed legislation is enacted, it is anticipated there would be an increase of approximately 50 claims. It is estimated we would receive 40 assault claims (the statute covers only Assault I and II) of which we estimate 26 claims would receive compensation. The average award is $4500.00 per claim so 26 claims would total $117,000. It is estimated the program would receive 10 death claims and 5 would be awarded: 2 claims at one dependent per incident would be $50,000 and 3 claims for multiple dependents would be $120,000 for a total estimated grant money of $287,000.

Because there will be an increase of claims, it is determined it will be necessary to have one more board meeting at a cost of $1500.00. Because of the repeal of the statute it is anticpated there would be 8 hearings at $800 for travel per hearing. The reason for more hearings is because of the change in the statute, the Board will want to be certain the offencer will not receive any of the compensation and because of circumstances in some cases, they may order a hearing prior to a final determination by the Board.

The current staff for the Violent Crimes Compensation Board consists of two persons. This change in the statute would necessitate the addition of a clerk typist (range 8) and associated costs, including equipment.

(continued)

Under contractual services, there would be a need for a terminal only for the IBM displaywriter at $3000.00 per year. There would be the cost of hearing officers' fees for 8 hearings at $700 per hearing and a total cost of $5600. Since this will be a major change in the statute, the public must be made aware through TV spots, radio and newspapers. Production of the TV spots will be a one time expense as will the radio spots. These spots should cost around $6500 plus another $1000 for public notices in newspapers around the state.

The costs are assumed to begin 7/1/83.

FOR O&M USE ONLY
4A KEY NUMBER __ __ - __ __ - __ __ - __ __ - __ __

JUSTIFICATION

The number of claims received annually by the Violent Crimes Compensation Board has doubled since 1976 and is projected to double again during the two-year period ending 6/30/84. Yet the program has only the same two-person staff it had in 1973.

It is anticipated the change in the statute will increase the number of claims by 50. This increase, on top of the existing understaffing, will necessitate the addition of a clerk-typist and associated costs, including equipment.

Since this is a major change in the statute, all the applications, brochures and posters will have to be redone. The public must be made aware of the changes through TV, radio and newspapers, again much clerical work. There will be an increase in hearings, which must be transcribed verbatim.

The equipment costs include a desk, chair, file cabinet, table, calculator and transcriber.

ANALYSIS

If the proposed legislation is enacted, it is anticipated there would be an increase of approximately 50 claims. It is estimated we would receive 40 assault claims (the statute covers only Assault I and II) of which we estimate 26 claims would receive compensation. The average award is $4500.00 per claim so 26 claims would total $117,000. It is estimated the program would receive 10 death claims and 5 would be awarded; 2 claims at one dependent per incident would be $50,000 and 3 claims for multiple dependents would be $120,000 for a total estimated grant money of $287,000.

Because there will be an increase of claims, it is determined it will be necessary to have one more board meeting at a cost of $1500.00. Because of the repeal of the statute it is anticipated there would be 8 hearings at $800 for travel per hearing. The reason for more hearings is because of the change in the statute, the Board will want to be certain the offender will not receive any of the compensation and because of circumstances in some cases, they may order a hearing prior to a final determination by the Board.

The current staff for the Violent Crimes Compensation Board consists of two persons. This change in the statute would necessitate the addition of a clerk typist (range 8) and associated costs, including equipment.

Under contractual services, there would be a need for a terminal only for the IBM displaywriter at $3000.00 per year. There would be the cost of hearing officers' fees for 8 hearings at $700 per hearing and a total cost of $5600. Since this will be a major change is the statute, the public must be made aware through TV spots, radio and newspapers. Production of the TV spots will be a one time expense as will the radio spots. These spots should cost around $6500 plus another $1000 for public notices in newspapers around the State.

MEMORANDUM February 1, 1984

SUBJECT: Sectional analysis of CSSB 101 (Resources)

TO: Representative Charlie Bussell
Chairman House Judiciary Committee

FROM: Edward H. Hein EHA
Legislative Counsel

Section 1 adds a new section, AS 16.05.165, to the fish and game code that provides that a peace officer investigating a misdemeanor violation of the code or a regulation adopted under it may issue a citation as provided in AS 12.25.180, notwithstanding the provisions of AS 16.05.160, which requires a peace officer to arrest any person committing a code violation in the officer's presence. Note that SSHB 404 would amend AS 16.05.160 to make such arrests discretionary, but would expand the arrest authority to include violations of all of AS 16 except AS 16.51 and 16.52. Section 1 also directs the supreme court to establish a bail schedule for fish and game misdemeanor violations and provides for paying fines by mail, similar to what is done with traffic tickets.

Section 2 amends AS 16.05.410, which provides for revocation of licenses for conviction of sport fishing and hunting license violations. The amendment provides that the existing revocation provisions do not apply to violations for which a forfeitable bail amount is established under AS 16.05.165. Two convictions of such an offense, however, could result in a peace officer filing a civil action to have the person's license revoked. A non-jury court hearing is required. If the court finds that the person's actions demonstrate a disregard for the preservation of the state's fish or wildlife resources, the license may be revoked for a mandatory one-to-three year period.

Section 3 amends AS 12.25.190(c) to provide that a person receiving a citation under AS 16.05.165 is not required to

give a written promise that he or she will appear in court in response to the citation.

SENATE RESOURCES COMMITTEE

LETTER OF INTENT

CSSB 101

It is the intent of the Resources Committee in passing out this bill that the Supreme Court shall specify certain fish and game violations for which bail amounts can be set and for which citations could be issued which would not require court appearances. It is intended that this procedure be similar to that currently employed under the motor vehicle code for traffic citations. Through implementation of this procedure it is intended that savings to the court system, enforcement agencies and violators in time would be realized.

However, the Committee recognizes that only some fish and game misdemeanors would be identified under this new statute because of their "minor" nature. Other misdemeanors would continue to require court appearances by the cited violators. In testimony before the Committee and in statements to the Committee the following misdemeanors were mentioned as examples of those violations for which the provisions of this bill might in all likelihood apply:

1) snagging or attempting to snag fish
2) failure to punch harvest tickets
3) failure to submit hunting permit reports
4) license not in possession

The following misdemeanors were mentioned as examples of those violations for which the provisions of this bill should probably not apply:

1) commercial fish
2) limited entry
3) guide-related
4) closed season
5) same-day airborne
6) waste

It is the intention of the Committee that the Supreme Court, in consultation with the Department of Public Safety, would identify misdemeanors under this bill consistent with the above lists.

CSSB 101 (Res) RELATING TO THE ISSUANCE OF CITATIONS FOR FISH AND GAME VIOLATIONS.

ASK FOR UNANIMOUS CONSENT FOR ADOPTION OF THE RESCURCES COMMITTEE SUBSTITUTE.

(SMALL CHANGES WERE MADE IN THE C.S : (ALL RECOMMENDED BY THE COURT SYSTEM)

.. REMOVED REFERENCES TO "MINOR MISDEMEANOR" AS IT HAS NO LEGAL DEFINITION

.. ALLOWS THE DEFENDANT TO PAY BAIL IN THE COURT WHERE THE OFFICER FILES THE CITATION RATHER THAN IN THE COURT OF JURISDICTION

... MAKES AN ALLOWANCE FOR A PERSON WHO FORGETS TO SIGN HIS/HER CITATION

.. AND SOME TECHNICAL CHANGES IN LINE WITH RECOMMENDATIONS FROM THE ATTORNEY GENERAL'S OFFICE

LETTER OF INTENT
IN THIRD READING, PRIOR TO PASSAGE, ASK FOR UNANIMOUS CONSENT FOR ADOPTION OF THE LETTER OF INTENT.

.. ASSURES THAT ONLY MINOR OFFENSES WOULD BE COVERED BY THIS BILL

IN GENERAL
THIS BILL WOULD GIVE PEACE OFFICERS THE AUTHORITY TO ISSUE CITATIONS FOR FISH AND GAME MISDEMEANORS UNDER A PROCEDURE SIMILAR TO THE ISSUANCE OF TRAFFIC CITATIONS. THE INTENT IS TO EXPEDITE THE ENFORCEMENT PROCEDURE BY REDUCING COURT LOADS. THE SUPREME COURT IS TO IDENTIFY THE MISDEMENAORS APPROPRIATE FOR DISPOSITION WITHOUT COURT APPEARANCE - CONSIDERABLE WORK WAS DONE IN COMMITTEE TO ASSURE THAT ONLY MINOR OFFENSES WOULD BE COVERED BY THE TRAFFIC TICKETING SYSTEM. WE ANTICIPATE A REDUCTION OF ABOUT 1,000 CASES A YEAR THAT WOULD NORMALLY GO BEFORE THE COURTS.

FISCAL NOTE IS ZERO.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 1, 1983

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that will establish an expeditious procedure to dispose of minor uncontested misdemeanor fish and game violations.

Under existing law (AS 12.25.180), peace officers have the authority to issue citations for misdemeanors instead of arresting the offender. Once a citation is issued, however, the offender must ordinarily appear in court, even if he does not wish to contest the charge. Section 1 of the attached bill adopts a procedure similar to that found in the motor vehicle code (AS 28.05.151) which allows the offender to post and forfeit bail if he does not wish to contest the charge. The bill also authorizes the supreme court to establish a bail schedule for those minor misdemeanor offenses which are appropriate for disposition without court appearance.

As in the comparable motor vehicle code provision, this bill provides that when a person is convicted of a minor misdemeanor which is included in the bail schedule, the fine imposed may not exceed the bail amount, even though statutes or regulations may allow a higher maximum penalty level. This bail amount "ceiling" on fines is necessary to ensure that a person who contests a citation and goes to trial will not receive a more severe penalty upon conviction than the person who enters a no contest plea and forfeits the bail amount without appearance. To expose the person who contests a citation to a higher maximum possible sentence would penalize the exercise of the right to a trial, constituting a denial of equal protection of the law.

Section 2 of this bill generally exempts persons who have been convicted of two or more minor fish and game violations from the mandatory license forfeiture required by AS

16.05.410(a) -- (c). However, the bill also provides that, in specific appropriate situations the hunting or fishing licenses of frequent repeat minor offenders may be revoked following a district court hearing.

Passage of this bill will benefit law enforcement, the person cited for a relatively minor offense, and the judicial system. The person will avoid the time and expense associated with a court appearance, while law enforcement will be able to concentrate its resources on more serious offenses. We anticipate a reduction of approximately 1,000 cases per year that would normally go before the courts.

Sincerely,

Bill Sheffield
Governor

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

ROBERT J. SUNDBERG
COMMISSIONER

DEPARTMENT OF PUBLIC SAFETY

DIVISION OF FISH & WILDLIFE PROTECTION

P. O. BOX 6188, ANNEX
ANCHORAGE, ALASKA 99502

March 9, 1983

Representative Mitch Abood
Pouch V
Juneau, Alaska 99801

Dear Representative Abood:

During the budget hearings on March 7th involving the Division of Fish and Wildlife Protection we discussed Senate Bill 101 and it's potential impact on the Division. Senate Bill 101 was introduced on February 1st, 1983 and is a bill entitled "An Act relating to the Issuance of Citations for Fish and Game Violations."

Should this Bill pass it will allow the Alaska Supreme Court to establish a bail system for minor fish and wildlife offenses. If that occurs we anticipate approximately twenty (20) of the most common and minor violations being placed on this bail system. A fine will be established by the Court System for the offenses and if an individual is caught in a violation he will have the option of mailing in a fine or appearing in court. We anticipate that this will have a significant impact on the Court System, the Division of Fish and Wildlife Protection and the District Attorneys Office and it will be a positive impact because we feel an overwhelming majority of people will elect to use the bail system.

In an era when the State's treasury is going down and operating funds for the Division are not going to be as great as they have been in the past this type of legislation will assist the Division in maintaining it's current posture while decreasing expenditures at the same time. Last year the Division spent nearly 6,000 hours in court in the prosecution of the violations that we apprehended in the field. We believe that at a minimum, one half of this time can be eliminated if this particular piece of legislation passes. I would like to note also that we believe this will be of tremendous benefit to the sportsmen of the State of Alaska. I say sportsmen because right now we do not envision commercial type violations being placed on the bail system. In many cases persons are traveling, for example from Anchorage to Kenai to participate in the sport fishery and are cited for a violation. In order to go to court the individual has to take at least one day off from work, go to court, plead guilty or innocent, pay his fine, and it's an inconvenience to the general public as well as a burden on the court system, my officer's time, and the District Attorney's time. We feel the passage of this Bill will help not only us, but also the citizen.

·L12LH

Should this Bill come before the House State Affairs Committee of which you are the Chairman, I urge your support for this piece of legislation. If we can be of further assistance in explaining the benefits of this legislation or in answering any questions, please feel free to contact us.

Sincerely,

Colonel Robert J. Stickles
Director

FROM: Stephanie J. Cole
Deputy Director for Services
Alaska Court System

SUBJECT: SB 101

DATE: March 16, 1983

The Alaska Court System supports the passage of legislation enabling the development and adoption of a bail forfeiture schedule for minor fish and game offenses. Such a bail schedule could both reduce the court's workload and promote public convenience.

The following comments are offered about SB 101:

1. Section I, AS 16.05.165(a): We would suggest the addition of the phrase "as provided in AS 12.25.180" at the end of the sentence.

   AS 12.25.180 (When peace officer has option to take person before judge or magistrate) sets forth the parameters of a peace officer's discretionary power to issue a citation to a defendant. It should be as applicable to fish and game misdemeanors as to other types of misdemeanors. The reference to AS 12.25.180 will make the incorporation clear.

2. Section I, AS 16.05.165(b): We would suggest the deletion of the word "minor" in the first sentence.

   This first sentence refers to "minor misdemeanors." This term does not have any legal definition. The legislative intent that only minor types of cases be included in the bail schedule is already addressed by the language in this same sentence, "...misdemeanors that are appropriate for disposition without court appearance." More serious misdemeanors would not be appropriate for inclusion in the bail schedule. The inclusion of the term "minor misdemeanors" could be unnecessarily confusing.

3. Section I, AS 16.05.165(c): In the first sentence, we would delete "...having jurisdiction over the place where the violation occurred," and would substitute "...in which the citation is filed by the peace officer."

   The defendant may have no knowledge about which court has jurisdiction over the place where the violation occurred. He must deal with the court where the peace officer files the citation. This court address would be indicated on the citation.

4. Section I, AS 16.05.165(c)(2): We would suggest that a final sentence be added to this subsection: "Bail shall be forfeited if the person cited returns the bail amount but fails to sign the citation."

   Clerical problems will develop if (as frequently occurs with the traffic bail schedule receipts) persons mail in their bail money and omit, inadvertently or otherwise, to sign their citations. This provision would allow the court to treat the matter as if the person had signed the citation, thus expediting case processing.

5. Section I, AS 16.05.165(f): We would change the provision in the first sentence of "after trial" to "after plea or trial."

   It sometimes happens that a person wants to plead guilty to this sort of offense while still wanting to go to court to tell the judge about the particular circumstances of his case. This minor addition will insure that he or she would not be penalized for doing so.

6. Section I, AS 16.05.410(g): This subsection raises the possibility of a number of problems and leaves a number of questions unanswered.

   Among the issues raised are the following. Is this a criminal or civil proceeding? What standard of proof does the court use? If the license to be revoked is considered to be a "valuable license" by the court, the defendant has the right to a trial by jury. [See Baker v. City of Fairbanks, 471 P.2d 386 (Alaska 1970).] Then, how does the court treat the underlying prior misdemeanor offenses which support the case before the court, for which the defendant did not have the right to trial by jury? Is the defendant allowed to raise issues relating to his or her guilt in these closed cases before the jury? Different courts will probably decide these and other questions in varying ways.

As an alternative method, the legislature may want to consider the implementation of an administrative point system as is presently in use in traffic matters. See AS 28.15.221 et. seq. Such a point system would avoid many of the procedural pitfalls created by the present subsection.

Thank you for the opportunity to comment on this proposed legislation.

Stephanie J. Cole

Appreciate your scheduling SB 111 - relating to teleconferenced meetings under the administrative procedures act (by Gov.)

This bill codifies what is a reasonable approach to the use of teleconferencing for public meetings. I am not sure it is really necessary, but it would avoid arguments over what the rules are.

Thanks for your consideration.

MEMORANDUM

March 25, 1983

TO: Members of the House Judiciary Committee

FROM: Teresa B. Cramer Teresa B Cramer
Administrative Assistant

SUBJECT: CSSB 116(SA) - Placing Emergency Guards Employed by the Department of Public Safety in the Partially Exempt Service

In 1979, the Blue Ribbon Commission sponsored legislation to place greater restraints on the employment of both nonpermanent and emergency classified state workers. These restrictions have created some difficulties for the Department of Public Safety because of the large number of emergency guards they hire. In 1982 the department hired 495 emergency guards. There were only 112 other emergency appointments in the state.

An emergency employee is defined as "an employee appointed for a period not to exceed 30 calendar days, whose appointment was made under conditions requiring immediate action to carry on work that is required in the public interest". AS 39.25.200(3). Departments are required to report the reason for hiring an emergency employee within 15 working days of the appointment. Personnel practices require that departments prepare Personnel Action forms at the beginning and end[illegible] of an emergency appointment. In addition, employment forms from the Division of Payroll and the Division of Retirement and Benefits must be prepared for each appointment.

For some communities with frequent need for emergency guards, the department employs the same individuals each time the need arises. There were 136 individuals who filled the 495 emergency guard appointments during 1982. These employees guard prisoners or seized property in rural areas where a one- or two-person post prevents a trooper from maintaining 24-hour per day watch. The period required for the emergency service is between arrest and either arraignment or transportation to a correctional facility or until other arrangements are made to maintain custody of the seized property. According to the Department of Public Safety, typical appointments last from two to four days.

Placing emergency guards in the partially exempt service will substantially reduce the paperwork burden placed on the Departments of Public Safety and Administration. Those employees who are repeatedly hired when an emergency occurs can remain on the payroll indefinitely, preparing time sheets for each period they actually work. Making the positions part of the partially exempt service means that the positions remain part of the state's classification plan and are paid according to the state's pay plan. This will insure pay equity for those employees.

The Blue Ribbon Commission recommends placing these positions in the partially exempt service. It will reduce the paperwork burden on the department with little effect on the employee. (The protections for emergency appointments in the classified service are not much greater, if at all, than for partially exempt employees.) The continuing need for these appointments has been adequately documented.

Bill Analysis

Line 10 Section 1 amends the section of the State Personnel Act which lists positions placed in the partially exempt service to include emergency guards.

Line 14 Section 2 amends the chapter which creates the Department of Public Safety by requiring the department to report to the Director of Personnel on the number and description of appointments of emergency guards. Departments are currently required to report the number of classified service emergency appointments they make. This will retain that requirement for emergency guards after they are moved to the partially exempt service.

The Honorable Bill Ray
Senate Judiciary Committee
Alaska Senate
Pouch V
M.S. 3100
Juneau, Alaska 99811

RE: Senate Bill 131

Dear Senator Ray:

On behalf of the Alaska Chapter of Associated General Contractors of America, I offer support to the passage of SB 131. Similar statutes have been enacted by Michigan, Kansas, Oregon, Texas, Wisconsin, Hawaii, Idaho, Ohio, New Hampshire and Pennsylvania.

Obviously, Alaska has had its share of disasters -- from the 1964 earthquake to the 1967 flood in Fairbanks. As you are undoubtedly aware, most disaster assistance operations depend upon quick and effective mobilization of the communities' resources. Increasing litigation and the potential liability resulting therefrom, makes it extremely important to minimize the impact of any lawsuits arising out of any disaster assistance operation. Persons providing disaster assistance should not be held to the same standard of care as persons performing the same operations under normal circumstances. It would be a sorry state of affairs if a person failed to render disaster assistance when needed solely because of fear of legal liability.

We believe enactment of SB 131 will help preserve the natural tendency of persons to render assistance when necessary. I urge you and your fellow Sentors to expeditiously move this bill through the Senate.

Sincerely,

ALASKA CHAPTER
ASSOCIATED GENERAL CONTRACTORS

Derald Schoon
President

Disaster Assistance Bulletin #82-2
June 18, 1982

TO: Chapter Managers
Disaster Assistance Committee

SUBJECT: HOLD HARMLESS STATUTES

The following states have been identified as having existing statutes which protect a contractor from liability for his actions during a disaster relief operation which are ordered by a government official or agent of the government:

Michigan	Hawaii
Kansas	Idaho
Oregon	Ohio
Texas	New Hampshire
Wisconsin	Pennsylvania

Although the language varies in each statute, an example of typical and effective language appears in the Wisconsin statute as follows:

> Exemption from Liability - No person who provides equipment or services under the direction of the governor, the secretary or the head of emergency government services in any county, town or municipality during a state of emergency declared by the governor is liable for the death of or injury to any person or damage to any property caused by his or her actions, except where the trier of fact finds that the person acted intentionally or with gross negligence. This subsection does not affect the right of any person to receive benefits to which he or she would otherwise be entitled under the worker's compensation law or under any pension law, nor does it affect entitlement to any other benefits or compensation authorized by state or federal law.

The Disaster Assistance Committee has encouraged chapters to attempt to have hold-harmless, good samaritan or other similar legislation passed on the state level to protect contractors working in disaster relief operations. If you would like copies of the statutes from any of the above listed states, please let me know.

Sincerely,

Brian Deery

BRIAN DEERY
Secretary
Disaster Assistance Committee

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M January 17, 1984

SUBJECT: House CS for CSSB 133 (Judiciary)

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: David R. Dierdorff
Revisor of Statutes

This bill was prepared by the revisor of statutes under AS 01.05.036 which provides, in part, that the revisor of statutes shall

> ". . . prepare for submission to the legislature legislation for the correction or removal of . . . deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of . . . the statute law of this state."

This memorandum discusses the House Committee Substitute for the bill.

SECTIONAL ANALYSIS

Sections 1-3, 80 and 127 amend statutory references to the Pacific time zone to reflect the change to Alaska time.

Section 4 improves the definition of "municipality" that was first enacted as a part of the Alaska Aeronautics Act of 1949, subsequently rewritten during the bulk formal revision of the Alaska Statutes and amended by the 1974 revisor's bill. The present definition excludes unified municipalities, which we do not believe was intended, and, if interpreted strictly, also excludes home rule cities or boroughs, as there are no classifications of home rule municipalities. The latter problem was the inadvertent result of an amendment made to the revisor's bill as it

progressed through the legislature in 1974. The proposed new definition is identical to that which is contained in the revised municipal code (SB 1 and HB 272) and will be valid whether or not SB 1 or HB 272 are enacted.

Section 5 clarifies the term "director" in AS 03.10.-030(e). The term is not defined in AS 03.10 and appears only in this section.

Section 6 repeals all of AS 03.19. This chapter deals exclusively with the small grain incentive program, a program which ended with the crop year 1975. The division of agriculture has confirmed that this material is obsolete and that it is quite unlikely that a program of this type would ever be used in the future.

Sections 7 and 8 clarify responsibilities in the programs related to diseased livestock. When responsibilities in Title 3 were divided between the Departments of Natural Resources and Environmental Conservation by Executive Order in 1981, the sections immediately preceding and following the sections amended by secs. 7 and 8 of the revisor's bill were changed to place responsibility in the Department of Environmental Conservation. However, by virtue of the definitions applying to Title 3, the word "commissioner" in AS 03.45.060 and AS 03.45.070 must be read as "commissioner of natural resources". Since all sections in AS 03.45 are part of an integrated scheme, it is our opinion that the failure to change the references to commissioner in these two sections was an oversight.

Section 9 repeals references to the Board of Barbers, Board of Hairdressers, Board of Welding Examiners, and Collection Agency Board. The latter two boards were "sunsetted" and the first two were repealed by Chapter 159, SLA 1980.

Section 10 corrects an apparent oversight. When the Board of Hairdressers and Board of Barbers were repealed they were combined into the Board of Barbers and Hairdressers. However, the name of that board was not added to the list in AS 08.01.010, which sets forth the boards subject to AS 08.01.

Section 11 amends AS 08.02.010(a) to correct a reference to nurses and to make consistent the reference to other professions. The term "professional nurse" is no longer defined in AS 08.68.410 as a result of 1982 amendments. The

section also contains two changes to remove gender indicating pronouns.

Sections 12 and 13 repeal obsolete references to the Collection Agency Board and the Board of Welding Examiners which are found in the section setting forth the schedules for the sunset of regulatory boards.

Section 14 repeals an obsolete requirement in the chapter on the licensing of public accountants. The paragraph repealed had application only for a period in the 1960's.

Section 15 corrects an error in tense which appears in AS 08.20.140.

Section 16 repeals those sections in AS 08.24 which established the Collections Agency Board and a paragraph which defined "board" for the chapter. The board was terminated by operation of the sunset statutes. The termination date was June 30, 1980.

Sections 17 - 23 amend provisions in the law licensing and regulating collection agents to delete references to the terminated Collection Agency Board.

Sections 24 and 25 correct internal references in AS 08.36. AS 08.36.310 was repealed and replaced by AS 08.36.315 in 1980.

Section 26 repeals an obsolete definition. The word defined ("resident")is not used in the chapter and has not been used since prior to the original bulk formal revision of the Alaska Statutes.

Sections 27 and 28 repeal and remove material which has become obsolete through the passage of time and is no longer necessary.

Section 29 amends AS 08.68.270(4) to reflect the changes in the drug laws which went into effect on January 1, 1983. The deleted sections of the Alaska Statutes which were referenced in this paragraph were repealed in the drug legislation passed last session.

Section 30 repeals AS 08.71.220 which is an obsolete portion of the chapter regulating dispensing opticians. The

provisions of this section were in the nature of temporary transition provisions for licensing.

Section 31 repeals a subsection of AS 08.80.295 which is obsolete. The mandate of subsection (e) was to extend for a "period of two years following September 16, 1976".

Section 32 amends AS 08.88.201 by deleting the second sentence, which is now obsolete. AS 08.88.191(a) no longer provides for petitions for an additional examination.

Sections 33 and 34 amend provisions in AS 08.88 to reflect the 1980 repeal of AS 08.88.211 and substitute the current references.

Section 35 repeals all but one section of the chapter on the Board of Welding Examiners which was terminated under the sunset law. The retained section establishes the piping code of the state.

Section 36 corrects a reference to the federal bankruptcy act in the exemptions act passed by the last session of the legislature. Chapter "XIII" refers to the Wage Earner Plan of the old bankruptcy act of 1898. The amendment conforms the reference to the current bankruptcy law. We have also changed the citation to federal law to conform to our present style.

Section 37 makes another correction in the exemptions act. There is no consumer price index for the month of December. The Anchorage index is issued every other month. The index which would be used to establish December price relationships would, in fact, be the November consumer price index.

Section 38 corrects an internal reference by deleting a reference to statutes repealed in 1972 and inserting the proper current references.

Section 39 corrects internal references to reflect the 1982 legislative action repealing the referenced section in AS 09.35 and establishing AS 09.38, the Alaska Exemptions Act.

Section 40 repeals AS 11.71.120(d). That subsection should have been deleted from the 1982 bill when the legislature decided to make the Controlled Substances Advisory Committee a purely advisory committee and amended out of the bill its power to designate substances as controlled substances.

Section 41 also deletes language to reflect the final form of the controlled substances legislation. In the version enacted, AS 11.71.120 does not provide for the designation of a substance as controlled.

Section 42 corrects an incorrect reference to the court rules. Rule 2(c) of the District Court Rules of Criminal Procedure has been repealed and replaced by Rule 603(b) of the Rules of Appellate Procedure.

Section 43 makes a change in AS 12.47.030(b) to reflect the fact that the assertion by a criminal defendant of evidence to establish that the defendant was guilty but mentally ill is not a defense to a criminal prosecution.

Section 44 amends AS 12.62.035(e) to more clearly reflect legislative intent. This is required by an attorney general's opinion of November 1, 1983, that stated that convictions of certain crimes under statutes repealed in 1980 were not within the definition of "sex crime." The amendment makes other minor form and style changes.

Section 45 amends AS 14.07.058(e) to clarify the meaning of the word "board". In AS 14.60, the word "board" is defined for AS 14 to mean the State Board of Education. Consequently, the use of the word with no further identification could be confusing.

Section 46 deletes a reference to a statute repealed in 1982.

Sections 47 and 48 consolidate definitions for AS 14.11.100 - 14.11.135 by repealing a subsection that contained a redundant definition and amending into the definition section the remaining definition that was in ther repealed subsection.

Section 49 amends AS 14.17.080 to remove obsolete references. "Basic need" is no longer defined in AS 14.17.021 and there is no longer any matching under AS 14.17.071. As a matter of fact, AS 14.17.071 has been repealed.

Section 50 also deletes obsolete references that result from the changes in policy in the school foundation program. The second sentence of the amended section is also changed to conform the internal reference to our present style.

Section 51 repeals AS 14.17.225(d) because the underlying statute, AS 14.17.215, was repealed in 1980 by sec. 20, Chapter 26, SLA 1980.

Section 52 repeals provisions which set forth the minimum teachers' and administrators' salary scales and definitions. The salary scales are obsolete since salaries are set by negotiation. The definitions section is also obsolete by reason of successive reapportionments. The section which contains minimum salaries for teachers (AS 14.20.220) also contains some material still useful to the Department of Education and school districts and that portion of the section is not repealed.

Sections 53, 54 and 55 delete obsolete references to the old state-operated school system and substitute the regional educational attendance area. In sec. 54, the phrase "school board" is substituted for "district" because "district" is not defined in AS 14. "School board" is.

Section 56 deletes a reference in AS 14.42.015(a)(2) to the Alaska Methodist University and substitutes the successor school, Alaska Pacific University.

Sections 57 and 58 delete references to the old tuition grant program that was declared unconstitutional by the Alaska Supreme Court some time ago and repealed by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

Section 59 repeals the definition of a phrase that is not used in the scholarship loan program. The term "part-time student" is not used in the Alaska Statutes.

Section 60 repeals a chapter that is obsolete and inoperative. When the chapter was enacted in 1972 it was based on participation in "the federal child nutrition act of 1971". However, that federal legislation was never enacted. No programs have been implemented or regulations adopted under this chapter.

Section 61 deletes from AS 14.57.020(b), relating to the state museum collections advisory committee, a sentence which was necessary only during the initial year of operation of the committee.

Sections 62 and 63 correct references to the acknowledgement statute. AS 09.65.012 has been replaced by AS 09.63.020.

Section 64 conforms the language used AS 15.60.101(30) to that found in the rest of the election laws.

Section 65 deletes material from the law on registration tags for shellfish pots or buoys to reflect the 1977 repeal of AS 16.05.630 and 16.05.670.

Section 66 amends AS 16.05.660 to make more specific the reference to 25 cent licenses. At the time this section was enacted, there was only one type of 25 cent license available (for certain heads of households or their dependents). Subsequent legislation has provided a 25 cent sport fishing license for blind residents, leading to the need to clarify the reference in this section.

Section 67 repeals AS 16.10.530 on the basis of the decision of the Supreme Court in State v. Alex, 646 P.2d 203 (1982) The case only invalidated AS 16.10.530.

Section 68 repeals the residency requirement on certain bounties. An identical change was made in AS 16.35.130 by chapter 67, SLA 1983 (the residency bill) and it appears that this section was inadvertently overlooked when the residency bill was put together.

Section 69 repeals a provision that applied only to permits issued for 1974.

Section 70 makes changes to reflect the 1977 repeal of the underlying statutes.

Sections 71 and 72 delete references to the adoption of regulations under AS 11.71.120(a). This conforms the language of the two amended sections to the enacted version of the controlled substances bill. See also sections 40 and 41 of the proposed committee substitute.

Section 73 substitutes the substantive provisions of repealed AS 11.05.010 for the obsolete reference to the repealed provision.

Section 74 repeals a reference made obsolete by changes in the school foundation program. "Local effort" is no longer a required part of the public school foundation law.

Section 75 substitutes a date certain for language referring to the end of the United States' involvement in Vietnam.

Similar changes have been made previously in other provisions of the statutes.

Section 76 corrects an incorrect internal reference in AS 21.60.010(d). The section currently referenced contains a definition of "insurance" rather than a penalty.

Section 77 repeals and reenacts AS 22.05.020 which establishes the composition and general powers of the Supreme Court. The repeal and reenactment deletes obsolete material relating to the number of justices and organizes the section into three subsections for clarity.

Section 78 is a repeal and reenactment of AS 22.10.020, which sets forth the jurisdiction of the superior courts. The sole purpose of the rewriting is to make the section more readable. There have been no substantive changes and it is not the purpose of this section to override differences, if any, between jurisdiction of the superior court set forth by statute and that set forth by court rule.

There are three minor changes which should be noted. In new subsection (a), the words "but not limited to" have been deleted following the word "including". Since the words "include" or "including" are not exclusive words, it is unnecessary to use the term "but not limited to" following such words in the Alaska Statutes. In new (h), the internal reference to the Alaska Native Claims Settlement Act has been changed to conform to present style. The other change is the deletion of a reference to AS 23.10.192 in new subsection (i). That section was repealed in 1980 and the provisions of AS 18.80, which are still referenced, have picked up the provisions of the repealed section.

Section 79 corrects a problem of tense in AS 22.10.040(4).

Section 81 deletes a reference to the legislative board of retirement benefits. That board was repealed in 1980.

Section 82 repeals a provision in the Surface Coal Mining Control and Reclamation Act that was intended to provide regulation in the event the Alaska program was disapproved by the Secretary of Interior. The program was approved on May 2, 1983, so the repealed provision is not required.

Section 83 repeals an obsolete provision in the motor vehicle code. AS 28.10.105(c) was applicable only during 1979.

Section 84 corrects a drafting error made during the first session by restoring to AS 28.10.201(b) certain internal references that were mistakenly deleted when the final version of SCS CSHB 184 (Rules) (chapter 99, SLA 1983) was prepared.

Section 85 amends AS 28.10.411(b) by deleting a reference to repealed AS 42.15.

Section 86 clarifies a reference to the commissioner of natural resources.

Sections 87, 88, and 89 delete references to a statute which was repealed when the new criminal code was enacted in 1978. The proper references to the provisions on unlawful evasion have been substituted.

Section 90 revises a definition in the Agreement on Detainers. The term defined, "state" was changed to "party state" through amendments to the original bill. However, the definition was not changed. "State" needs to be defined in this law, as the term is used to include the jurisdictions of the United States which are not states, e.g., Puerto Rico and the District of Columbia. "Party state" does not need to be defined, as it is clear from a reading of the Agreement on Detainers that a party state is a state (as defined) which is a party to the agreement. Without some change, some confusing results occur in reading the law to which the definitions apply.

Section 91 repeals a subsection that is redundant to the provisions of AS 09.38 referenced in the subsection. The rights and liabilities purportedly established by this subsection are more clearly established in AS 09.38. If this subsection is repealed, a cross reference note to the appropriate provisions in AS 09.38 will be added to the annotations for AS 34.15.140.

Section 92 deletes references to AS 14.08.161 which has been repealed.

Section 93 deletes a reference in AS 38.04.065(a) to a statute repealed in 1981 and substitutes a reference to the present notice provisions.

Section 94 deletes from AS 38.04.900(a) provisions which were of a temporary nature and are now obsolete.

Section 95 rewrites the paragraph in AS 38.04.910 which defines "state park" for AS 38.04. The old definition contained specific references to some of the laws designating areas which fall within the definition of state parks, but has not been kept up to date as new areas have been designated. It is our opinion that it would be better to enact a definition such as that proposed in this section and maintain a current list of laws designating the various areas in a note to the section.

Section 96 amends a reference in AS 38.05.057 to the notice provisions of AS 38.05.345. Note that there is still an AS 38.05.345(e), but that the section was substantially rewritten after AS 38.05.057(e)(3) was enacted, resulting in the repeal of the notice provisions of former AS 38.05.-345(e). The present provisions are irrelevant in the context of the reference found in AS 38.05.057(e)(3).

Section 97 deletes the last sentence of AS 38.05.057(g), as the sentence is no longer necessary. AS 38.05.055, referenced in the sentence, has been rewritten and no longer contains any requirements for contracts. AS 38.05.065 now establishes certain terms required for contracts under this section. The deletion of "or his representative" is consistent with the law requiring the deletion of gender indicating pronouns, and is not required in this provision, since other provisions authorize the director to act through designated representatives. See AS 38.05.035.

Section 98 amends AS 38.05.079(a) to reflect the repeal of two sections referenced in the subsection. In the case of AS 38.05.047, the reference is retained, but the reader will know that the section is no longer operative. In the case of AS 38.05.305, a reference to AS 38.05.345 was substituted. That section now contains all of the notice procedures.

Section 99 updates an obsolete internal reference.

Section 100 also updates an obsolete internal reference. A review of the legislative history of AS 38.05.102 (amended by this section) indicates that the spanned reference should be to the entire article on leasing. In any event, AS 38.-05.100 has been repealed.

Section 101 substitutes a reference to AS 38.05.345 for the obsolete reference to repealed AS 38.05.305.

Section 102 makes a number of minor style changes and substitutes a reference to AS 46.15 for an obsolete reference to repealed law.

Section 103 clarifies an internal reference to reflect 1980 amendments to the referenced section.

Section 104 makes the same change to AS 38.08.020 that was made to AS 38.05.057(e)(3) by section 96 of the bill.

Section 105 deletes obsolete language relating to initial (1960) appointments to the personnel board.

Section 106 corrects an error in the internal references in AS 39.25.120(b) which were created by the repeal and re-enactment, with some renumbering, of AS 39.25.150.

Section 107 adds the Alaska Power Authority and the Alaska Resources Corporation to the list of agencies included in the definition of "state commission or board" for purposes of the conflict of interest laws. These boards are subject to AS 39.50 by the terms of the laws establishing them, but they were not added to the list in AS 39.50.200. This over-sight was brought to our attention by the staff of the Alaska Public Offices Commission.

Section 108 repeals two subsections that set out duties to be performed on December 31, 1980. They are now obsolete.

Section 109 repeals obsolete material that applied only during 1980.

Section 110 harmonizes the language used in AS 42.06.280 by substituting commission for commissioner in two places.

Section 111 corrects an internal reference to reflect other legislative action and makes a minor word change to conform to proper statutory drafting.

Section 112 repeals a provision made obsolete by the enactment of the criminal code. The material repealed is now covered by AS 11.46.210.

Section 113 makes a minor technical change to clarify the language of the statute.

Section 114 repeals a provision made partially obsolete by the repeal of AS 43.20.170 in 1980 and adequately dealt with elsewhere in AS 43.05.290.

Section 115 deletes a reference to AS 43.21, which was repealed in 1981.

Section 116 makes changes in internal references required by the enactment of the Alaska Exemptions Act in 1982.

Section 117 corrects an internal reference.

Section 118 changes a three year residency requirement that was overlooked last session to a one year requirement. The one year provision was suggested by the Department of Law.

Section 119 corrects an internal reference.

Section 120 repeals AS 43.58. The tax established by this chapter terminated in 1977 under the provisions of AS 43.58.170 and the chapter is now obsolete.

Section 121 corrects the reference to the head of the Department of Community and Regional Affairs by substituting "commissioner" for "director".

Section 122 corrects the reference in the Alaska Statutes to the United States Board on Geographic Names.

Section 123 corrects an internal reference to reflect 1982 legislation affecting the referenced section.

Section 124 changes a reference to the licensing of embalmers to reflect other legislative changes.

Section 125 supplies the words necessary to make a complete sentence out of the last sentence in AS 44.83.398(f).

Section 126 repeals a reference made obsolete by changes in the school foundation program. See secs. 50 and 74 of this memo.

Section 128 amends the Alaska Securities Act to clarify the time that is available to take an appeal from an administrative order. The Alaska Court Rules of Appellate Procedure allow only 30 days for an appeal from an administrative decision. However, this section of the securities act currently allows 60 days. This is a direct conflict and should be resolved. The applicable appellate rule is Rule 602(a)(2). Other minor word changes are made in the subsection.

Sections 129, 130, and 131 delete obsolete material from three sections of AS 46.30. All of the deleted material is dated and no longer necessary.

Section 132 corrects an internal reference in AS 47.10.-230(f).

Section 133 repeals a definition in the child support enforcement chapter that is not used in the chapter. The term defined is "disposable earnings".

Section 134 makes changes in internal references required by the new exemptions statute.

Section 135 corrects an internal reference.

Section 136 provides for an immediate effective date.

All Members of the
Alaska State Senate
Juneau, Alaska

Dear Senators:

At Senator Ray's request, I have attached the following hereto: (1) the most recent proposed CSSB 133; (2) the Revisor's letters of February 15, 1983, March 23, 1983 and May 4, 1983; and (3) my subcommittee letter of April 14, 1983.

Senator Faiks has indicated the bill will probably be calendared in the near future.

It is the hope of the Judiciary Committee Chairman that you will review this material prior to the date it is calendared in order that if you have any questions concerning the legislation you can contact me, my A.A. Guy Van Doren, Counsel for the Judiciary Committee, John Gabrielli, and David Dierdorff, Revisor of Statutes.

Once you start to pick a bill of this nature apart on the floor, you will encounter complex problems.

If any Senator has amendments to propose, we would appreciate your submitting them to Mr. Gabrielli.

Very truly yours,

Robert H. Ziegler, Sr.

April 14, 1983

Senator Bill Ray,
Chairman - Senate Judiciary Committee
Alaska State Legislature
Juneau, Alaska 99811

RE: CSSB 133

Dear Senator Ray:

Your man John, my guy Guy and Revisor of Statutes Dave Dierdorff have labored mightily on the captioned bill.

It would be my suggestion that you distribute copies of the committee substitute and the Revisor's letter of March 23rd to all members of the Senate at least one week before the Rules Committee Chairperson intends to calendar it.

In the committee letter of transmittal to the Senate membership, if I may offer another suggestion, you could say that if anyone has any questions about the bill to get in touch with you, me or our staff people prior to the day it is calendared.

It is obviously my intent to get the mother through the Senate without getting bogged down in floor fights or amendments.

Regards,

3 —

Enclosure

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 15, 1983

SUBJECT: "An Act making corrective amendments in the Alaska Statutes as recommended by the revisor of statutes" (Work Order No. 13-0470)

TO: Senator Bill Ray
Chairman, Legislative Council

FROM: David R. Dierdorff
Revisor of Statutes

This bill was prepared by the revisor of statutes under AS 01.05.036 which provides, in part, that the revisor of statutes shall

> ". . . prepare for submission to the legislature legislation for the correction or removal of . . . deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of . . . the statute law of this state."

It is suggested that this memorandum accompany the bill through its legislative course.

SECTIONAL ANALYSIS

Section 1 improves the definition of "municipality" that was first enacted as a part of the Alaska Aeronautics Act of 1949, subsequently rewritten during the bulk formal revision of the Alaska Statutes and amended by the 1974 revisor's bill. The present definition excludes unified municipalities, which we do not believe was intended, and, if interpreted strictly, also excludes home rule cities or boroughs, as there are no classifications of home rule municipalities. The latter problem was the inadvertent result of an amendment made to the revisor's bill as it progressed through the legislature in 1974. The proposed new definition is identical to that which is contained in

the revised municipal code (SB 1) and will be valid whether or not SB 1 passes.

It should be mentioned that this section is but one of 24 sections of the Alaska Statutes which define municipality. Those 24 sections contain ten different definitions. Only eight of the 24 sections contain definitions which are essentially identical; however, all but two or three of the definitions are fairly similar in most respects. Ten of the 24 sections would be repealed by SB 1. It is the revisor's opinion that it would be wise to consider placing a general definition of "municipality" in AS 01.10.060. That would eliminate the need for a definition of "municipality" in other parts of the Alaska Statutes except where the use of the term required some variation from the standard definition.

Section 2 deletes the definition of "domestic fur farm animal" from AS 03.05.010(c)(6). The definition is preceded by a definition of "fur farming" and is limited to the purposes of the paragraph in which it is contained. The term "domestic fur farm animal" does not occur in the paragraph nor does it occur at any other place in the Alaska Statutes.

Section 3 clarifies the term "director" in AS 03.10.-030(e). The term is not defined in AS 03.10 and appears only in this section.

Section 4 repeals all of AS 03.19. This chapter deals exclusively with the small grain incentive program, a program which ended with the crop year 1975. The division of agriculture has confirmed that this material is obsolete and that it is quite unlikely that a program of this type would ever be used in the future.

Sections 5 and 6 clarify responsibilities in the programs related to diseased livestock. When responsibilities in Title 3 were divided between the Departments of Natural Resources and Environmental Conservation by Executive Order in 1981, the sections immediately preceding and following the sections amended by Secs. 5 and 6 of the revisor's bill were changed to place responsibility in the Department of Environmental Conservation. However, by virtue of the definitions applying to Title 3, the word "commissioner" in AS 03.45.060 and AS 03.45.070 must be read as "commissioner of natural resources". Since all sections in AS 03.45 are

part of an integrated scheme, it is our opinion that the failure to change the references to commissioner in these two sections was an oversight. Both sections also make changes in the use of pronouns in accordance with Chapter 58, SLA 1982.

Section 7 repeals references to the Board of Barbers, Board of Hairdressers, Board of Welding Examiners, and Collection Agency Board. The latter two boards were "sunsetted" and the first two were repealed by Chapter 159, SLA 1980.

Section 8 corrects an apparent oversight. When the Board of Hairdressers and Board of Barbers were repealed they were combined into the Board of Barbers and Hairdressers. However, the name of that board was not added to the list in AS 08.01.010, which sets forth the boards subject to AS 08.01.

Section 9 amends AS 08.02.010(a) to correct a reference to nurses and to make consistent the reference to other professions. The term "professional nurse" is no longer defined in AS 08.68.410 as a result of 1982 amendments. The section also contains two changes to remove gender indicating pronouns.

Sections 10 and 11 repeal obsolete references to the Collection Agency Board and the Board of Welding Examiners which are found in the section setting forth the schedules for the sunset of regulatory boards.

Section 12 repeals an obsolete requirement in the chapter on the licensing of public accountants. The paragraph repealed had application only for a period in the 1960's.

Section 13 corrects an error in tense which appears in AS 08.20.140.

Section 14 repeals the chapter on the Collection Agency Board which has been rendered obsolete by operation of the sunset statute. The termination date was June 30, 1980.

Sections 15 and 16 correct internal references in AS 08.36. AS 08.36.310 was repealed and replaced by AS 08.36.315 in 1980.

Section 17 repeals an obsolete definition. The word defined is not used in the chapter and has not been used since prior to the original bulk formal revision of the Alaska Statutes.

Sections 18 and 19 repeal and remove material which has become obsolete through the passage of time and is no longer necessary.

Section 20 amends AS 08.68.270(4) to reflect the changes in the drug laws which went into effect on January 1, 1983. The deleted sections of the Alaska Statutes which were referenced in this paragraph were repealed in the drug legislation passed last session.

Section 21 repeals AS 08.71.220 which is an obsolete portion of the chapter regulating dispensing opticians. The provisions of this section were in the nature of temporary transition provisions for licensing.

Section 22 repeals a subsection of AS 08.80.295 which is obsolete. The mandate of subsection (e) was to extend for a "period of two years following September 16, 1976".

Section 23 amends AS 08.88.201 by deleting the second sentence, which is now obsolete. AS 08.88.191(a) no longer provides for petitions for an additional examination.

Sections 24 and 25 amend provisions in AS 08.88 to reflect the 1980 repeal of AS 08.88.211 and substitute the current references.

Section 26 repeals the chapter on the Board of Welding Examiners which was terminated under the sunset law.

Section 27 corrects a reference to the federal bankruptcy act in the exemptions act passed by the last session of the legislature. Chapter "XIII" refers to the Wage Earner Plan of the old bankruptcy act of 1898. The amendment conforms the reference to the current bankruptcy law. We have also changed the citation to federal law to conform to our present style.

Section 28 makes another correction in the exemptions act. There is no consumer price index for the month of December. The Anchorage index is issued every other month. The index which would be used to establish December price

relationships would, in fact, be the November consumer price index.

Section 29 corrects internal references to reflect the 1982 legislative action repealing the referenced section in AS 09.35 and establishing AS 09.38, the Alaska Exemptions Act.

Section 30 corrects an incorrect reference to the court rules. Rule 2(c) of the District Court Rules of Criminal Procedure has been repealed and replaced by Rule 603(b) of the Rules of Appellate Procedure.

Section 31 makes a change in AS 12.47.030(b) to reflect the fact that the assertion by a criminal defendant of evidence to establish that the defendant was guilty but mentally ill is not a defense to a criminal prosecution. It is, rather, a strategy which involves the presentation of mitigating factors in order to affect the disposition of the matter following a conviction.

Section 32 amends AS 14.07.058(e) t clarify the meaning of the word "board". In AS 14.60, the word "board" is defined for AS 14 to mean the State Board of Education. Consequently, the use of the word with no further identification could be confusing.

Section 33 amends AS 14.17.080 to remove obsolete references. Basic need is no longer defined in AS 14.17.021 and there is no longer any matching under AS 14.17.071. As a matter of fact, AS 14.17.071 has been repealed.

Section 34 also deletes obsolete references that result from the changes in policy in the school foundation program. The second sentence of the amended section is also changed to conform the internal reference to our present style. If appropriate changes were made in AS 29.88.020, this section could be repealed.

Section 35 amends AS 14.17.190(b) to delete a reference to money acquired from school district "local effort". "Local effort" is no longer a required part of the public school foundation act.

Section 36 repeals AS 14.17.225(d) because the underlying statute, AS 14.17.215 was repealed in 1980 by sec. 20, Chapter 26, SLA 1980.

Section 37 repeals the three sections which set forth the minimum teachers' and administrators' salary scales and definitions for the sections. The salary scales are obsolete since salaries are set by negotiation.

Sections 38, 39 and 40 delete obsolete references to the old state-operated-school system and substitute the regional educational attendance area. In Sec. 39, the phrase "school board" is substituted for "district" because "district" is not defined in AS 14. "School board" is.

Section 41 deletes a reference in AS 14.42.015(a)(2) to the Alaska Methodist University and substitutes the successor school, Alaska Pacific University.

Sections 42 and 43 delete references to the old tuition grant program that was declared unconstitutional by the Alaska Supreme Court some time ago and repealed by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

Section 44 repeals the definition of a phrase that is not used in the scholarship loan program. The term "part-time student" is not used in the Alaska Statutes. HB 174 would introduce the term to AS 14, but a definition is not necessary in the context it appears in HB 174.

Section 45 repeals a chapter that is obsolete and inoperative. When the chapter was enacted in 1972 it was based on participation in "the federal child nutrition act of 1971". However, that federal legislation was never enacted. No programs have been implemented or regulations adopted under this chapter.

Section 46 deletes from AS 14.57.020(b), relating to the state museum collections advisory committee, a sentence which was necessary only during the initial year of operation of the committee.

Sections 47 and 48 correct references to the acknowledgement statute. AS 09.65.012 has been replaced by AS 09.63.020.

Sections 49 and 50 correct an apparent oversight in AS 16.10. The sections presently read as if any fisherman who sells fish without an entry permit or interim use permit is in violation of the sections. However, certain fishermen are not required to have entry permits or interim use

permits, so certain types of fish could legally be sold. The suggested amendments make it clear that fishermen who are not required to hold a permit under AS 16.43 can sell fish without violating these sections.

Section 51 repeals AS 16.10.500 - 16.10.620 on the basis of the decision of the Supreme Court in State v. Alex. Technically, the case only invalidated AS 16.10.530 but the effect was to wipe out the entire program set forth in these sections. The present program is operated under AS 43.76.

Section 52 deletes an obsolete provision in AS 18.23.040 relating to punishment for misdemeanors. The effect of this amendment is to make a violation under this section a class A misdemeanor, through operation of the section relating to unclassified misdemeanors, AS 11.81.250(c). Since the penalty for a class A misdemeanor under is up to one year in jail and a fine of up to $5,000, the penalty would be more severe than under the repealed section referred to presently in AS 18.23.040. Under the repealed section the jail sentence would be the same but the maximum fine would have been only $500. The legislature may wish to amend this section of the bill to retain the old penalty, or consider establishing this as class B misdemeanor, with a maximum fine of $1,000 and a term of imprisonment of not more than 90 days.

Section 53 repeals a reference made obsolete by changes in the school foundation program. See sec. 35 of this memo.

Section 54 corrects an incorrect internal reference in AS 21.60.010(d). The section currently referenced contains a definition of "insurance" rather than a penalty.

Section 55 repeals and reenacts AS 22.05.020 which establishes the composition and general powers of the Supreme Court. The repeal and reenactment deletes obsolete material relating to the number of justices and organizes the section into three subsections for clarity.

Section 56 is a repeal and reenactment of AS 22.10.020, which sets forth the jurisdiction of the superior courts. The sole purpose of the rewriting is to make the section more readable. There have been no substantive changes and it is not the purpose of this section to override any differences between jurisdiction of the superior court set forth by statute and that set forth by court rule. In other

words, in those ways that this material may differ from the rules, the repealed and reenacted statute does not necessarily override should it pass by more than a two-thirds vote.

There are three minor changes which should be noted. In new subsection (a), the words "but not limited to" have been deleted following the word "including". Since the words "include" or "including" are not exclusive words, it is unnecessary to use the term "but not limited to" following such words in the Alaska Statutes. In new (h), the internal reference to the Alaska Native Claims Settlement Act has been changed to conform to present style. The other change is the deletion of a reference to AS 23.10.192 in new subsection (i). That section was repealed in 1980 and the provisions of AS 18.80, which are still referenced, have picked up the provisions of the repealed section.

Section 57 corrects a problem of tense in AS 22.10.040(4).

Section 58 deletes a reference to the legislative board of retirement benefits. That board was repealed in 1980.

Section 59 repeals an obsolete provision in the motor vehicle code. AS 28.10.105(c) was applicable only during 1979.

Sections 60, 61, and 62 delete references to a statute which was repealed when the new criminal code was enacted in 1978. The proper references to the provisions on unlawful evasion have been substituted.

Section 63 revises a definition in the Agreement on Detainers. The term defined, "state" was changed to "party state" through amendments to the original bill. However, the definition was not changed. "State" needs to be defined in this law, as the term is used to include the jurisdictions of the United States which are not states, e.g., Puerto Rico and the District of Columbia. "Party state" does not need to be defined, as it is clear from a reading of the Agreement on Detainers that a party state is a state (as defined) which is a party to the agreement. Without some change, some confusing results occur in reading the law to which the definitions apply. Consequently, the legislature should either adopt the amendment proposed in this section, or adopt the amendment and an additional amendment as follows:

(4) "party state" means a state which is party to this agreement.

Sections 64 and 65 delete references to AS 14.08.161 which has been repealed.

Section 66 repeals AS 37.14.060 - 37.14.100, which comprised Article 2 of AS 37.14. This article was not to be effective until the Board of Regents of the University of Alaska approved certain matters. In fact, the Board of Regents disapproved all matters on August 17, 1978. Consequently, the repealed sections never took effect.

Section 67 corrects an error in the internal references in AS 39.25.120(b) which were created by the repeal and reenactment, with some renumbering, of AS 39.25.150.

Section 68 makes changes in internal references required by the enactment of the Alaska Exemptions Act in 1982.

Section 69 corrects the reference to the head of the Department of Community and Regional Affairs by substituting "commissioner" for "director".

Section 70 corrects the reference in the Alaska Statutes to the United States Board on Geographic Names.

Section 71 deletes a reference to the licensing of embalmers. The referenced provisions were repealed in 1976.

Section 72 supplies the words necessary to make a complete sentence out of the last sentence in AS 44.83.398(f).

Section 73 repeals a reference made obsolete by changes in the school foundation program. See secs. 35 and 53 of this memo.

Section 74 amends the Alaska Securities Act to clarify the time that is available to take an appeal from an administrative order. The Alaska Court Rules of Appellate Procedure allow only 30 days for an appeal from an administrative decision. However, this section of the securities act currently allows 60 days. This is a direct conflict and should be resolved. The applicable appellate rule is Rule 602(a)(2).

Sections 75, 76, and 77 delete obsolete material from three sections of AS 46.30. All of the deleted material is dated and no longer necessary.

Section 78 corrects an internal reference in AS 47.-10.230(f).

Section 79 re[illegible] definition in the child support enforcement ch[illegible]hat is not used in the chapter. The term defined [illegible]sable earnings".

Section 80 mak[illegible]nges in internal references required by the new exemption statute.

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM May 4, 1983

SUBJECT: Changes in CSSB 133 (Judiciary)

TO: Senator Bill Ray
Chairman, Senate Judiciary Committee

FROM: David R. Dierdorff
Revisor of Statutes

Enclosed with this memo are the revised revisor's memo, which you may wish to use as a committee report, and CSSB 133 (Judiciary) in final form. The changes made since the March 23rd draft are:

1. In Sec. 9 (page 3, line 8), "registered" was substituted for "licensed" to more accurately reflect previous legislative intent.

2. In Sec. 20 (page 5, line 10), "an" was deleted for clarity.

3. Sec. 33 (page 7, line 12), now repeals all of AS 08.99 except AS 08.99.110. That section establishes the piping code for the state and, although we are unable to determine any relationship with other laws, it was the revisor's opinion, shared by the Departments of Law and Labor, that we ought to retain the section until we were certain that it was unnecessary or obsolete. We will editorially transfer it to Title 18 later this year.

4. Sec. 42 (page 10, lines 16 - 21 of the March 23rd draft), was deleted at the request of the Department of Law, as the Department of Education desires that local districts continue the practice of making records of local effort available to the commissioner for audit.

5. In Sec. 43 (page 10, line 17), we have deleted AS 14.20.220 from the list of sections repealed, at the request of the Department of Law. The Department of Education is preparing a major revision of this and other

sections which will retain the provisions of (e) and (g) of the section. Those two subsections are still used by the department and districts for certain purposes.

6. Sec. 57 (page 14, line 12), now proposes the repeal of only AS 16.10.530 rather than all of the sections from AS 16.10.500 to 16.10.620. The section to be repealed is the one held unconstitutional in State v. Alex. The other sections are still valid and being used regularly in a variety of programs.

7. On page 15, line 25 of the draft, a form and style change was made for clarity.

If you have any questions, please feel free to call. Thank you for your assistance in expediting Senate consideration of the bill this session.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M May 4, 1983

SUBJECT: "An Act making corrective amendments in the Alaska Statutes as recommended by the revisor of statutes" (CSSB 133 (Judiciary))

TO: Senator Bill Ray
Chairman, Senate Judiciary Committee

FROM: David R. Dierdorff
Revisor of Statutes

This bill was prepared by the revisor of statutes under AS 01.05.036 which provides, in part, that the revisor of statutes shall

> ". . . prepare for submission to the legislature legislation for the correction or removal of . . . deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of . . . the statute law of this state."

It is suggested that this memorandum accompany the bill through its legislative course.

SECTIONAL ANALYSIS

Section 1 improves the definition of "municipality" that was first enacted as a part of the Alaska Aeronautics Act of 1949, subsequently rewritten during the bulk formal revision of the Alaska Statutes and amended by the 1974 revisor's bill. The present definition excludes unified municipalities, which we do not believe was intended, and, if interpreted strictly, also excludes home rule cities or boroughs, as there are no classifications of home rule municipalities. The latter problem was the inadvertent result of an amendment made to the revisor's bill as it progressed through the legislature in 1974. The proposed new definition is identical to that which is contained in the revised municipal code (SB 1) and will be valid whether or not SB 1 passes.

It should be mentioned that this section is but one of 24 sections of the Alaska Statutes which define municipality. Those 24 sections contain ten different definitions. Only eight of the 24 sections contain definitions which are essentially identical; however, all but two or three of the definitions are fairly similar in most respects. Ten of the 24 sections would be repealed by SB 1. It is the revisor's opinion that it would be wise to consider placing a general definition of "municipality" in AS 01.10.060. That would eliminate the need for a definition of "municipality" in other parts of the Alaska Statutes except where the use of the term required some variation from the standard definition.

The Senate Declined this Section Because of the Passage of HB 159

Section 2 deletes the definition of "domestic fur farm animal" from AS 03.05.010(c)(6). The definition is preceded by a definition of "fur farming" and is limited to the purposes of the paragraph in which it is contained. The term "domestic fur farm animal" does not occur in the paragraph nor does it occur at any other place in the Alaska Statutes.

Section 3 clarifies the term "director" in AS 03.10.-030(e). The term is not defined in AS 03.10 and appears only in this section.

Section 4 repeals all of AS 03.19. This chapter deals exclusively with the small grain incentive program, a program which ended with the crop year 1975. The division of agriculture has confirmed that this material is obsolete and that it is quite unlikely that a program of this type would ever be used in the future.

Sections 5 and 6 clarify responsibilities in the programs related to diseased livestock. When responsibilities in Title 3 were divided between the Departments of Natural Resources and Environmental Conservation by Executive Order in 1981, the sections immediately preceding and following the sections amended by Secs. 5 and 6 of the revisor's bill were changed to place responsibility in the Department of Environmental Conservation. However, by virtue of the definitions applying to Title 3, the word "commissioner" in AS 03.45.060 and AS 03.45.070 must be read as "commissioner of natural resources". Since all sections in AS 03.45 are part of an integrated scheme, it is our opinion that the failure to change the references to commissioner in these two sections was an oversight. Both sections also make

changes in the use of pronouns in accordance with Chapter 58, SLA 1982.

Section 7 repeals references to the Board of Barbers, Board of Hairdressers, Board of Welding Examiners, and Collection Agency Board. The latter two boards were "sunsetted" and the first two were repealed by Chapter 159, SLA 1980.

Section 8 corrects an apparent oversight. When the Board of Hairdressers and Board of Barbers were repealed they were combined into the Board of Barbers and Hairdressers. However, the name of that board was not added to the list in AS 08.01.010, which sets forth the boards subject to AS 08.01.

Section 9 amends AS 08.02.010(a) to correct a reference to nurses and to make consistent the reference to other professions. The term "professional nurse" is no longer defined in AS 08.68.410 as a result of 1982 amendments. The section also contains two changes to remove gender indicating pronouns.

Sections 10 and 11 repeal obsolete references to the Collection Agency Board and the Board of Welding Examiners which are found in the section setting forth the schedules for the sunset of regulatory boards.

Section 12 repeals an obsolete requirement in the chapter on the licensing of public accountants. The paragraph repealed had application only for a period in the 1960's.

Section 13 corrects an error in tense which appears in AS 08.20.140.

Section 14 repeals those sections in AS 08.24 which established the Collections Agency Board and a paragraph which defined "board" for the chapter. The board was terminated by operation of the sunset statutes. The termination date was June 30, 1980.

Sections 15 - 21 amend provisions in the law licensing and regulating collection agents to delete references to the terminated Collection Agency Board.

Sections 22 and 23 correct internal references in AS 08.36. AS 08.36.310 was repealed and replaced by AS 08.36.315 in 1980.

Section 24 repeals an obsolete definition. The word defined is not used in the chapter and has not been used since prior to the original bulk formal revision of the Alaska Statutes.

Sections 25 and 26 repeal and remove material which has become obsolete through the passage of time and is no longer necessary.

Section 27 amends AS 08.68.270(4) to reflect the changes in the drug laws which went into effect on January 1, 1983. The deleted sections of the Alaska Statutes which were referenced in this paragraph were repealed in the drug legislation passed last session.

Section 28 repeals AS 08.71.220 which is an obsolete portion of the chapter regulating dispensing opticians. The provisions of this section were in the nature of temporary transition provisions for licensing.

Section 29 repeals a subsection of AS 08.80.295 which is obsolete. The mandate of subsection (e) was to extend for a "period of two years following September 16, 1976".

Section 30 amends AS 08.88.201 by deleting the second sentence, which is now obsolete. AS 08.88.191(a) no longer provides for petitions for an additional examination.

Sections 31 and 32 amend provisions in AS 08.88 to reflect the 1980 repeal of AS 08.88.211 and substitute the current references.

Section 33 repeals all but one section of the chapter on the Board of Welding Examiners which was terminated under the sunset law. The retained section establishes the piping code of the state.

Section 34 corrects a reference to the federal bankruptcy act in the exemptions act passed by the last session of the legislature. Chapter "XIII" refers to the Wage Earner Plan of the old bankruptcy act of 1898. The amendment conforms the reference to the current bankruptcy law. We have also changed the citation to federal law to conform to our present style.

Section 35 makes another correction in the exemptions act. There is no consumer price index for the month of December. The Anchorage index is issued every other month. The index

which would be used to establish December price relationships would, in fact, be the November consumer price index.

Section 36 corrects internal references to reflect the 1982 legislative action repealing the referenced section in AS 09.35 and establishing AS 09.38, the Alaska Exemptions Act.

Section 37 corrects an incorrect reference to the court rules. Rule 2(c) of the District Court Rules of Criminal Procedure has been repealed and replaced by Rule 603(b) of the Rules of Appellate Procedure.

Section 38 makes a change in AS 12.47.030(b) to reflect the fact that the assertion by a criminal defendant of evidence to establish that the defendant was guilty but mentally ill is not a defense to a criminal prosecution.

Section 39 amends AS 14.07.058(e) to clarify the meaning of the word "board". In AS 14.60, the word "board" is defined for AS 14 to mean the State Board of Education. Consequently, the use of the word with no further identification could be confusing.

Section 40 amends AS 14.17.080 to remove obsolete references. Basic need is no longer defined in AS 14.17.021 and there is no longer any matching under AS 14.17.071. As a matter of fact, AS 14.17.071 has been repealed.

Section 41 also deletes obsolete references that result from the changes in policy in the school foundation program. The second sentence of the amended section is also changed to conform the internal reference to our present style. If appropriate changes were made in AS 29.88.020, this section could be repealed.

Section 42 repeals AS 14.17.225(d) because the underlying statute, AS 14.17.215 was repealed in 1980 by sec. 20, Chapter 26, SLA 1980.

Section 43 repeals two sections which set forth the minimum teachers' and administrators' salary scales and definitions. The salary scales are obsolete since salaries are set by negotiation. The definitions section is also obsolete by reason of successive reapportionments. The section which contains minimum salaries for teacher's (AS 14.20.020) is also obsolete, but contains some material still useful to

the Department of Education and school districts. It will be the subject of a bill being prepared by the department proposing substantial revision in that and other sections.

Sections 44, 45 and 46 delete obsolete references to the old state-operated-school system and substitute the regional educational attendance area. In sec. 46, the phrase "school board" is substituted for "district" because "district" is not defined in AS 14. "School board" is.

Section 47 deletes a reference in AS 14.42.015(a)(2) to the Alaska Methodist University and substitutes the successor school, Alaska Pacific University.

Sections 48 and 49 delete references to the old tuition grant program that was declared unconstitutional by the Alaska Supreme Court some time ago and repealed by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

Section 50 repeals the definition of a phrase that is not used in the scholarship loan program. The term "part-time student" is not used in the Alaska Statutes. HB 174 would introduce the term to AS 14, but a definition is not necessary in the context it appears in HB 174.

Section 51 repeals a chapter that is obsolete and inoperative. When the chapter was enacted in 1972 it was based on participation in "the federal child nutrition act of 1971". However, that federal legislation was never enacted. No programs have been implemented or regulations adopted under this chapter.

Section 52 deletes from AS 14.57.020(b), relating to the state museum collections advisory committee, a sentence which was necessary only during the initial year of operation of the committee.

Sections 53 and 54 correct references to the acknowledgement statute. AS 09.65.012 has been replaced by AS 09.63.020.

Sections 55 and 56 correct an apparent oversight in AS 16.10. The sections presently read as if any fisherman who sells fish without an entry permit or interim use permit is in violation of the sections. However, certain fishermen are not required to have entry permits or interim use permits, so certain types of fish could legally be sold. The suggested amendments make it clear that fishermen who are

not required to hold a permit under AS 16.43 can sell fish without violating these sections.

Section 57 repeals AS 16.10.530 on the basis of the decision of the Supreme Court in State v. Alex. The case only invalidated AS 16.10.530.

Section 58 substitutes the substantive provisions of repealed AS 11.05.010 for the obsolete reference to the repealed provision.

Section 59 repeals a reference made obsolete by changes in the school foundation program. "Local effort" is no longer a required part of the public school foundation law.

Section 60 corrects an incorrect internal reference in AS 21.60.010(d). The section currently referenced contains a definition of "insurance" rather than a penalty.

Section 61 repeals and reenacts AS 22.05.020 which establishes the composition and general powers of the Supreme Court. The repeal and reenactment deletes obsolete material relating to the number of justices and organizes the section into three subsections for clarity.

Section 62 is a repeal and reenactment of AS 22.10.020, which sets forth the jurisdiction of the superior courts. The sole purpose of the rewriting is to make the section more readable. There have been no substantive changes and it is not the purpose of this section to override differences, if any, between jurisdiction of the superior court set forth by statute and that set forth by court rule.

There are three minor changes which should be noted. In new subsection (a), the words "but not limited to" have been deleted following the word "including". Since the words "include" or "including" are not exclusive words, it is unnecessary to use the term "but not limited to" following such words in the Alaska Statutes. In new (h), the internal reference to the Alaska Native Claims Settlement Act has been changed to conform to present style. The other change is the deletion of a reference to AS 23.10.192 in new subsection (i). That section was repealed in 1980 and the provisions of AS 18.80, which are still referenced, have picked up the provisions of the repealed section.

Section 63 corrects a problem of tense in AS 22.10.040(4).

Section 64 deletes a reference to the legislative board of retirement benefits. That board was repealed in 1980.

Section 65 repeals an obsolete provision in the motor vehicle code. AS 28.10.105(c) was applicable only during 1979.

Section 66 amends AS 28.10.411(b) by deleting a reference to repealed AS 42.15.

Sections 67, 68, and 69 delete references to a statute which was repealed when the new criminal code was enacted in 1978. The proper references to the provisions on unlawful evasion have been substituted.

Section 70 revises a definition in the Agreement on Detainers. The term defined, "state" was changed to "party state" through amendments to the original bill. However, the definition was not changed. "State" needs to be defined in this law, as the term is used to include the jurisdictions of the United States which are not states, e.g., Puerto Rico and the District of Columbia. "Party state" does not need to be defined, as it is clear from a reading of the Agreement on Detainers that a party state is a state (as defined) which is a party to the agreement. Without some change, some confusing results occur in reading the law to which the definitions apply. Consequently, the legislature should either adopt the amendment proposed in this section, or adopt the amendment and an additional amendment as follows:

> (4) "party state" means a state which is party to this agreement.

Sections 71 and 72 delete references to AS 14.08.161 which has been repealed.

Section 73 repeals AS 37.14.060 - 37.14.100, which comprised Article 2 of AS 37.14. This article was not to be effective until the Board of Regents of the University of Alaska approved certain matters. In fact, the Board of Regents disapproved all matters on August 17, 1978. Consequently, the repealed sections never took effect.

Section 74 deletes a reference in AS 28.04.065(a) to a statute repealed in 1981 and substitutes a reference to the present notice provisions.

Section 75 deletes from AS 38.04.900(a) provisions which were of a temporary nature and are now obsolete.

Section 76 rewrites the paragraph in AS 38.04.910 which defines "state park" for AS 38.04. The old definition contained specific references to some of the laws designating areas which fall within the definition of state parks, but has not been kept up to date as new areas have been designated. It is our opinion that it would be better to enact a definition such as that proposed in this section and maintain a current list of laws designating the various areas in a note to the section.

Section 77 amends a reference in AS 38.05.057 to the notice provisions of AS 38.05.345. Note that there is still an AS 38.05.345(e), but that the section was substantially rewritten after AS 38.05.057(e)(3) was enacted, resulting in the repeal of the notice provisions of former AS 38.05.-345(e). The present provisions are irrelevant in the context of the reference found in AS 38.05.057(e)(3).

Section 78 deletes the last sentence of AS 38.05.057(g), as the sentence is no longer necessary. AS 38.05.055, referenced in the sentence, has been rewritten and no longer contains any requirements for contracts. AS 38.05.065 now establishes certain terms required for contracts under this section. The deletion of "or his representative" is consistent with the law requiring the deletion of gender indicating pronouns, and is not required in this provision, since other provisions authorize the director to act through designated representatives. See AS 38.05.035.

Section 79 amends AS 38.05.078(e) to reflect the fact that (b) of the section has been repealed. The reference is retained as "former (b)" to insure that the remedies contained in (e) will be available to the state in the event of an action involving a contract for the purchase of land authorized by the repealed subsection.

Section 80 repeals the definition of a term no longer used in the section.

Section 81 amends AS 38.05.079(a) to reflect the repeal of two sections referenced in the subsection. In the case of AS 38.05.047, the reference is retained, but the reader will know that the section is no longer operative. In the case of AS 38.05.305, a reference to AS 38.05.345 was

substituted. That section now contains all of the notice procedures.

Section 82 updates an obsolete internal reference.

Section 83 also updates an obsolete internal reference. A review of the legislative history of AS 38.05.102 (amended by this section) indicates that the spanned reference should be to the entire article on leasing. In any event, AS 38.-05.100 has been repealed.

Section 84 substitutes a reference to AS 38.05.345 for the obsolete reference to repealed AS 38.05.305.

Section 85 makes a number of minor style changes and substitutes a reference to AS 46.15 for an obsolete reference to repealed law.

Section 86 makes the same change to AS 38.08.020 that was made to AS 38.05.057(e)(3) by section 77 of the bill.

Section 87 corrects an error in the internal references in AS 39.25.120(b) which were created by the repeal and reenactment, with some renumbering, of AS 39.25.150.

Section 88 adds the Alaska Power Authority and the Alaska Resources Corporation to the list of agencies included in the definition of "state commission or board" for purposes of the conflict of interest laws. These boards are subject to AS 39.50 by the terms of the laws establishing them, but they were not added to the list in AS 39.50.200. This oversight was brought to our attention by the staff of the Alaska Public Offices Commission. Other matters brought to our attention will be handled through notes to this section in the 1983 supplement or editorial corrections.

Section 89 makes changes in internal references required by the enactment of the Alaska Exemptions Act in 1982.

Section 90 corrects the reference to the head of the Department of Community and Regional Affairs by substituting "commissioner" for "director".

Section 91 corrects the reference in the Alaska Statutes to the United States Board on Geographic Names.

Section 92 deletes a reference to the licensing of embalmers. The referenced provisions were repealed in 1976.

Section 93 supplies the words necessary to make a complete sentence out of the last sentence in AS 44.83.398(f).

Section 94 repeals a reference made obsolete by changes in the school foundation program. See secs. 42 and 60 of this memo.

Section 95 amends the Alaska Securities Act to clarify the time that is available to take an appeal from an administrative order. The Alaska Court Rules of Appellate Procedure allow only 30 days for an appeal from an administrative decision. However, this section of the securities act currently allows 60 days. This is a direct conflict and should be resolved. The applicable appellate rule is Rule 602(a)(2).

Sections 96, 97, and 98 delete obsolete material from three sections of AS 46.30. All of the deleted material is dated and no longer necessary.

Section 99 corrects an internal reference in AS 47.-10.230(f).

Section 100 repeals a definition in the child support enforcement chapter that is not used in the chapter. The term defined is "disposable earnings".

Section 101 makes changes in internal references required by the new exemptions statute.

DRD:ljb

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM March 23, 1983

SUBJECT: "An Act making corrective amendments in the Alaska Statutes as recommended by the revisor of statutes" (CSSB 133 (Judiciary))

TO: Senator Bill Ray
Chairman, Senate Judiciary Committee

FROM: David R. Dierdorff
Revisor of Statutes

This bill was prepared by the revisor of statutes under AS 01.05.036 which provides, in part, that the revisor of statutes shall

> ". . . prepare for submission to the legislature legislation for the correction or removal of . . . deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of . . . the statute law of this state."

It is suggested that this memorandum accompany the bill through its legislative course.

SECTIONAL ANALYSIS

Section 1 improves the definition of "municipality" that was first enacted as a part of the Alaska Aeronautics Act of 1949, subsequently rewritten during the bulk formal revision of the Alaska Statutes and amended by the 1974 revisor's bill. The present definition excludes unified municipalities, which we do not believe was intended, and, if interpreted strictly, also excludes home rule cities or boroughs, as there are no classifications of home rule municipalities. The latter problem was the inadvertent result of an amendment made to the revisor's bill as it progressed through the legislature in 1974. The proposed new definition is identical to that which is contained in the revised municipal code (SB 1) and will be valid whether or not SB 1 passes.

It should be mentioned that this section is but one of 24 sections of the Alaska Statutes which define municipality. Those 24 sections contain ten different definitions. Only eight of the 24 sections contain definitions which are essentially identical; however, all but two or three of the definitions are fairly similar in most respects. Ten of the 24 sections would be repealed by SB 1. It is the revisor's opinion that it would be wise to consider placing a general definition of "municipality" in AS 01.10.060. That would eliminate the need for a definition of "municipality" in other parts of the Alaska Statutes except where the use of the term required some variation from the standard definition.

Section 2 deletes the definition of "domestic fur farm animal" from AS 03.05.010(c)(6). The definition is preceded by a definition of "fur farming" and is limited to the purposes of the paragraph in which it is contained. The term "domestic fur farm animal" does not occur in the paragraph nor does it occur at any other place in the Alaska Statutes.

Section 3 clarifies the term "director" in AS 03.10.-030(e). The term is not defined in AS 03.10 and appears only in this section.

Section 4 repeals all of AS 03.19. This chapter deals exclusively with the small grain incentive program, a program which ended with the crop year 1975. The division of agriculture has confirmed that this material is obsolete and that it is quite unlikely that a program of this type would ever be used in the future.

Sections 5 and 6 clarify responsibilities in the programs related to diseased livestock. When responsibilities in Title 3 were divided between the Departments of Natural Resources and Environmental Conservation by Executive Order in 1981, the sections immediately preceding and following the sections amended by Secs. 5 and 6 of the revisor's bill were changed to place responsibility in the Department of Environmental Conservation. However, by virtue of the definitions applying to Title 3, the word "commissioner" in AS 03.45.060 and AS 03.45.070 must be read as "commissioner of natural resources". Since all sections in AS 03.45 are part of an integrated scheme, it is our opinion that the failure to change the references to commissioner in these two sections was an oversight. Both sections also make

changes in the use of pronouns in accordance with Chapter 58, SLA 1982.

Section 7 repeals references to the Board of Barbers, Board of Hairdressers, Board of Welding Examiners, and Collection Agency Board. The latter two boards were "sunsetted" and the first two were repealed by Chapter 159, SLA 1980.

Section 8 corrects an apparent oversight. When the Board of Hairdressers and Board of Barbers were repealed they were combined into the Board of Barbers and Hairdressers. However, the name of that board was not added to the list in AS 08.01.010, which sets forth the boards subject to AS 08.01.

Section 9 amends AS 08.02.010(a) to correct a reference to nurses and to make consistent the reference to other professions. The term "professional nurse" is no longer defined in AS 08.68.410 as a result of 1982 amendments. The section also contains two changes to remove gender indicating pronouns.

Sections 10 and 11 repeal obsolete references to the Collection Agency Board and the Board of Welding Examiners which are found in the section setting forth the schedules for the sunset of regulatory boards.

Section 12 repeals an obsolete requirement in the chapter on the licensing of public accountants. The paragraph repealed had application only for a period in the 1960's.

Section 13 corrects an error in tense which appears in AS 08.20.140.

Section 14 repeals those sections in AS 08.24 which established the Collections Agency Board and a paragraph which defined "board" for the chapter. The board was terminated by operation of the sunset statutes. The termination date was June 30, 1980.

Sections 15 - 21 amend provisions in the law licensing and regulating collection agents to delete references to the terminated Collection Agency Board.

Sections 22 and 23 correct internal references in AS 08.36. AS 08.36.310 was repealed and replaced by AS 08.36.315 in 1980.

Section 24 repeals an obsolete definition. The word defined is not used in the chapter and has not been used since prior to the original bulk formal revision of the Alaska Statutes.

Sections 25 and 2 repeal and remove material which has become obsolete through the passage of time and is no longer necessary.

Section 27 amends AS 08.68.270(4) to reflect the changes in the drug laws which went into effect on January 1, 1983. The deleted sections of the Alaska Statutes which were referenced in this paragraph were repealed in the drug legislation passed last session.

Section 28 repeals AS 08.71.220 which is an obsolete portion of the chapter regulating dispensing opticians. The provisions of this section were in the nature of temporary transition provisions for licensing.

Section 29 repeals a subsection of AS 08.80.295 which is obsolete. The mandate of subsection (e) was to extend for a "period of two years following September 16, 1976".

Section 30 amends AS 08.88.201 by deleting the second sentence, which is now obsolete. AS 08.88.191(a) no longer provides for petitions for an additional examination.

Sections 31 and 32 amend provisions in AS 08.88 to reflect the 1980 repeal of AS 08.88.211 and substitute the current references.

Section 33 repeals the chapter on the Board of Welding Examiners which was terminated under the sunset law.

Section 34 corrects a reference to the federal bankruptcy act in the exemptions act passed by the last session of the legislature. Chapter "XIII" refers to the Wage Earner Plan of the old bankruptcy act of 1898. The amendment conforms the reference to the current bankruptcy law. We have also changed the citation to federal law to conform to our present style.

Section 35 makes another correction in the exemptions act. There is no consumer price index for the month of December. The Anchorage index is issued every other month. The index which would be used to establish December price relationships would, in fact, be the November consumer price index.

Section 36 corrects internal references to reflect the 1982 legislative action repealing the referenced section in AS 09.35 and establishing AS 09.38, the Alaska Exemptions Act.

Section 37 corrects an incorrect reference to the court rules. Rule 2(c) of the District Court Rules of Criminal Procedure has been repealed and replaced by Rule 603(b) of the Rules of Appellate Procedure.

Section 38 makes a change in AS 12.47.030(b) to reflect the fact that the assertion by a criminal defendant of evidence to establish that the defendant was guilty but mentally ill is not a defense to a criminal prosecution. It is, rather, a strategy which involves the presentation of mitigating factors in order to affect the disposition of the matter following a conviction.

Section 39 amends AS 14.07.058(e) to clarify the meaning of the word "board". In AS 14.60, the word "board" is defined for AS 14 to mean the State Board of Education. Consequently, the use of the word with no further identification could be confusing.

Section 40 amends AS 14.17.080 to remove obsolete references. Basic need is no longer defined in AS 14.17.021 and there is no longer any matching under AS 14.17.071. As a matter of fact, AS 14.17.071 has been repealed.

Section 41 also deletes obsolete references that result from the changes in policy in the school foundation program. The second sentence of the amended section is also changed to conform the internal reference to our present style. If appropriate changes were made in AS 29.88.020, this section could be repealed.

Section 42 amends AS 14.17.190(b) to delete a reference to money acquired from school district "local effort". "Local effort" is no longer a required part of the public school foundation act.

Section 43 repeals AS 14.17.225(d) because the underlying statute, AS 14.17.215 was repealed in 1980 by sec. 20, Chapter 26, SLA 1980.

Section 44 repeals the three sections which set forth the minimum teachers' and administrators' salary scales and defi-

nitions for the sections. The salary scales are obsolete since salaries are set by negotiation.

Sections 45, 46 and 47 delete obsolete references to the old state-operated-school system and substitute the regional educational attendance area. In sec. 46, the phrase "school board" is substituted for "district" because "district" is not defined in AS 14. "School board" is.

Section 48 deletes a reference in AS 14.42.015(a)(2) to the Alaska Methodist University and substitutes the successor school, Alaska Pacific University.

Sections 49 and 50 delete references to the old tuition grant program that was declared unconstitutional by the Alaska Supreme Court some time ago and repealed by Chapter 94, SLA 1980 and Chapter 59, SLA 1982.

Section 51 repeals the definition of a phrase that is not used in the scholarship loan program. The term "part-time student" is not used in the Alaska Statutes. HB 174 would introduce the term to AS 14, but a definition is not necessary in the context it appears in HB 174.

Section 52 repeals a chapter that is obsolete and inoperative. When the chapter was enacted in 1972 it was based on participation in "the federal child nutrition act of 1971". However, that federal legislation was never enacted. No programs have been implemented or regulations adopted under this chapter.

Section 53 deletes from AS 14.07.020(b), relating to the state museum collections advisory committee, a sentence which was necessary only during the initial year of operation of the committee.

Sections 54 and 55 correct references to the acknowledgement statute. AS 09.65.012 has been replaced by AS 09.63.020.

Sections 56 and 57 correct an apparent oversight in AS 16.10. The sections presently read as if any fisherman who sells fish without an entry permit or interim use permit is in violation of the sections. However, certain fishermen are not required to have entry permits or interim use permits, so certain types of fish could legally be sold. The suggested amendments make it clear that fishermen who are not

required to hold a permit under AS 16.43 can sell fish without violating these sections.

Section 58 repeals AS 16.10.500 - 16.10.620 on the basis of the decision of the Supreme Court in State v. Alex. Technically, the case only invalidated AS 16.10.530 but the effect was to wipe out the entire program set forth in these sections. The present program is operated under AS 43.76.

Section 59 substitutes the substantive provisions of repealed AS 11.05.010 for the obsolete reference to the repealed provision.

Section 60 repeals a reference made obsolete by changes in the school foundation program. See sec. 42 of this memo.

Section 61 corrects an incorrect internal reference in AS 21.60.010(d). The section currently referenced contains a definition of "insurance" rather than a penalty.

Section 62 repeals and reenacts AS 22.05.020 which establishes the composition and general powers of the Supreme Court. The repeal and reenactment deletes obsolete material relating to the number of justices and organizes the section into three subsections for clarity.

Section 63 is a repeal and reenactment of AS 22.10.020, which sets forth the jurisdiction of the superior courts. The sole purpose of the rewriting is to make the section more readable. There have been no substantive changes and it is not the purpose of this section to override any differences between jurisdiction of the superior court set forth by statute and that set forth by court rule. In other words, in those ways that this material may differ from the rules, the repealed and reenacted statute does not necessarily override should it pass by more than a two-thirds vote.

There are three minor changes which should be noted. In new subsection (a), the words "but not limited to" have been deleted following the word "including". Since the words "include" or "including" are not exclusive words, it is unnecessary to use the term "but not limited to" following such words in the Alaska Statutes. In new (h), the internal reference to the Alaska Native Claims Settlement Act has been changed to conform to present style. The other change is the deletion of a reference to AS 23.10.192 in new sub-

section (i). That section was repealed in 1980 and the provisions of AS 18.80, which are still referenced, have picked up the provisions of the repealed section.

Section 64 corrects a problem of tense in AS 22.10.040(4).

Section 65 deletes a reference to the legislative board of retirement benefits. That board was repealed in 1980.

Section 66 repeals an obsolete provision in the motor vehicle code. AS 28.10.105(c) was applicable only during 1979.

Section 67 amends AS 28.10.411(b) by deleting a reference to repealed AS 42.15.

Sections 68, 69, and 70 delete references to a statute which was repealed when the new criminal code was enacted in 1978. The proper references to the provisions on unlawful evasion have been substituted.

Section 71 revises a definition in the Agreement on Detainers. The term defined, "state" was changed to "party state" through amendments to the original bill. However, the definition was not changed. "State" needs to be defined in this law, as the term is used to include the jurisdictions of the United States which are not states, e.g., Puerto Rico and the District of Columbia. "Party state" does not need to be defined, as it is clear from a reading of the Agreement on Detainers that a party state is a state (as defined) which is a party to the agreement. Without some change, some confusing results occur in reading the law to which the definitions apply. Consequently, the legislature should either adopt the amendment proposed in this section, or adopt the amendment and an additional amendment as follows:

> (4) "party state" means a state which is party to this agreement.

Sections 72 and 73 delete references to AS 14.08.161 which has been repealed.

Section 74 repeals AS 37.14.060 - 37.14.100, which comprised Article 2 of AS 37.14. This article was not to be effective until the Board of Regents of the University of Alaska approved certain matters. In fact, the Board of Regents

disapproved all matters on August 17, 1978. Consequently, the repealed sections never took effect.

Section 75 deletes a reference in AS 38.04.065(a) to a statute repealed in 1981 and substitutes a reference to the present notice provisions.

Section 76 deletes from AS 38.04.900(a) provisions which were of a temporary nature and are now obsolete.

Section 77 rewrites the paragraph in AS 38.04.910 which defines "state park" for AS 38.04. The old definition contained specific references to some of the laws designating areas which fall within the definition of state parks, but has not been kept up to date as new areas have been designated. It is our opinion that it would be better to enact a definition such as that proposed in this section and maintain a current list of laws designating the various areas in a note to the section.

Section 78 deletes a reference to a repealed section and substitutes the substantive provisions of that repealed section. After consultation with the Departments of Law and Natural Resources, we felt that this substitution would more accurately reflect legislative intent and present administrative practices. Note that there is still an AS 38.05.345(e), but that the section was substantially rewritten after AS 38.05.057(e)(3) was enacted, resulting in the repeal of the provisions of former AS 38.05.345(e). The present provisions are irrelevant in the context of the reference found in AS 38.05.057(e)(3).

Section 79 deletes the last sentence of AS 38.05.057(g), as the sentence is no longer necessary. AS 38.05.055, referenced in the sentence, has been rewritten and no longer contains any requirements for contracts. AS 38.05.065 now establishes certain terms required for contracts under this section. The deletion of "or his representative" is consistent with the law requiring the deletion of gender indicating pronouns, and is not required in this provision, since other provisions authorize the director to act through designated representatives. See AS 38.05.035.

Section 80 amends AS 38.05.073(e) to reflect the fact that (b) of the section has been repealed. The reference is retained as "former (b)" to insure that the remedies contained in (e) will be available to the state in the event

of an action involving a contract for the purchase of land authorized by the repealed subsection.

Section 81 repeals the definition of a term no longer used in the section.

Section 82 amends AS 38.05.079(a) to reflect the repeal of two sections referenced in the subsection. In the case of AS 38.05.047, the reference is retained, but the reader will know that the section is no longer operative. In the case of AS 38.05.305, a reference to AS 38.05.345 was substituted. That section now contains all of the notice procedures.

Section 83 updates an obsolete internal reference.

Section 84 also updates an obsolete internal reference. A review of the legislative history of AS 38.05.102 (amended by this section) indicates that the spanned reference should be to the entire article on leasing. In any event, AS 38.05.100 has been repealed.

Section 85 substitutes a reference to AS 38.05.345 for the obsolete reference to repealed AS 38.05.305.

Section 86 makes a number of minor style changes and substitutes a reference to AS 46.15 for an obsolete reference to repealed law.

Section 87 makes the same change to AS 38.08.020 that was made to AS 38.05.057(e)(3) by section 78 of the bill.

Section 88 corrects an error in the internal references in AS 39.25.120(b) which were created by the repeal and reenactment, with some renumbering, of AS 39.25.150.

Section 89 adds the Alaska Power Authority and the Alaska Resources Corporation to the list of agencies included in the definition of "state commission or board" for purposes of the conflict of interest laws. These boards are subject to AS 39.50 by the terms of the laws establishing them, but they were not added to the list in AS 39.50.200. This oversight was brought to our attention by the staff of the Alaska Public Offices Commission. Other matters brought to our attention will be handled through notes to this section in the 1983 supplement or editorial corrections.

Section 90 makes changes in internal references required by the enactment of the Alaska Exemptions Act in 1982.

Section 91 corrects the reference to the head of the Department of Community and Regional Affairs by substituting "commissioner" for "director".

Section 92 corrects the reference in the Alaska Statutes to the United States Board on Geographic Names.

Section 93 deletes a reference to the licensing of embalmers. The referenced provisions were repealed in 1976.

Section 94 supplies the words necessary to make a complete sentence out of the last sentence in AS 44.83.398(f).

Section 95 repeals a reference made obsolete by changes in the school foundation program. See secs. 42 and 60 of this memo.

Section 96 amends the Alaska Securities Act to clarify the time that is available to take an appeal from an administrative order. The Alaska Court Rules of Appellate Procedure allow only 30 days for an appeal from an administrative decision. However, this section of the securities act currently allows 60 days. This is a direct conflict and should be resolved. The applicable appellate rule is Rule 602(a)(2).

Sections 97, 98, and 99 delete obsolete material from three sections of AS 46.30. All of the deleted material is dated and no longer necessary.

Section 100 corrects an internal reference in AS 47.-10.230(f).

Section 101 repeals a definition in the child support enforcement chapter that is not used in the chapter. The term defined is "disposable earnings".

Section 102 makes changes in internal references required by the new exemptions statute.

DRD:ljb

Enclosure

SB 133 and CSSB 133(Jud)

REVISORS BILL

TO: SENATOR ROBERT H. ZIEGLER SR.

FROM: GUY A. VAN DOREN ADMIN. ASST.

SUBJECT: REVISORS BILL

I have reviewed the origional SB 133 and CSSB 133 (Jud) and submit the following report.

With the exception of the sections listed below, all sections are satisfactory and within the jurisdiction of the revisor's duties.

The only reason specific sections are listed below is if they have been changed from the origional bill or are additions to the origional bill. There are several section upon which I have made comments or observations.

Section 3. I still question, as I did in SB133, whether the words "of the department" on lone 26, pg. 1, are necessary. Since the entire section deals with the Department of Natural Resources, I feel the words are redundant.

Section 14 In the origional bill, the entire AS 08.24 was repealed. In checking with the Department of Commerce, it was found that though the Board of Collection Agencies was terminated, the statutes governing collection agency activities are still in effect.

Section 15-21: These sections all amend provisions in the statutes licensing and regulating collection agencies to delete references to the Board which was terminated. They did not appear in the origional bill because the entire 08.24 was deleted in error.

Section 41. NOTE!!! Notes exemptions under 43.25 which must be honored. The more exemptions,,the less taxable real and personal taxes 29.88.020.

Section 59. This section has changed a little from the origional. The revisor spelled out the punishment in this CS, rather than just providing that violations are misdemeanors.

Section.67. This section did not appear in the origional bill, but O.K.

Section.75. This section was not in the origional bill. The revisor indicated that a new book for Title 38 will be issued next year. The revisor is trying to eliminate as many obsolete sections in Title 38 as possible begfore the new book is printed.

Section.. 76 New section in CS..See Section 75 explanation
In this section, the revisor deleted the obsolete material. He also deleted the pronoun to eliminate the masculine gender by substituting "believed" for "he believes". Since no other sub-section or section in the chapter authorizes the Commissioner to adopt regulations, I suggest that "believed" be deleted. The section would then read: "The Commissioner shall adopt under the Administrative Procedure Act (AS 44.62) regulations necessary to carry out the purposes of this chapter"

Sections 77-87 All new sections added to the origional bill. See Sec.75 For explanation.

Section. 90. O.K. Although, the exemptions listed for livestock, food, fuel, household goods, tools, etc., etc. were enacted in 1949 and the amounts are unrealistically low; therefore, in my opinion, obsolete. The committee may want to look into this for another bill.

REMAINDER OF THE BILL, FINE.....

M E M O R A N D U M May 2, 1983

SUBJECT: Revisor's bill
(CSSB 133 (Judiciary))

TO: Senator Bill Ray
Chairman, Senate Judiciary Committee

FROM: David R. Dierdorff
Revisor of Statutes

In light of the changed position of the Department of Natural Resources and the language of CSSB 222 (Resources), the following language should be substituted for Secs. 78 and 87 of CSSB 133 (Judiciary):

* Sec. 78. AS 38.05.057(e)(3) is amended to read:

(3) notice of the application period and the date of the lottery shall be given in accordance with AS 38.05.345 [AS 38.05.345(e)]; and

* Sec. 87. AS 38.08.020 is amended to read:

Sec. 38.08.020. PUBLIC NOTICE. The director shall publish notice of the availability of the land in the same manner as provided in AS 38.05.345 [AS 38.05.345(e)].

The revisor's memo dated March 23, 1983, would need to be modified by substituting the following text for the discussion of Sec. 78:

Section 78 amends a reference in AS 38.05.057 to the notice provisions of AS 38.05.345. Note that there is still an AS 38.05.345(e), but that the section was substantially rewritten after AS 38.05.057(e)(3) was enacted, resulting in the repeal of the notice provisions of former AS 38.05.345(e). The present provisions are irrelevant in the context of the reference found in AS 38.05.057(e)(3).

The discussion of Sec. 87 in the revisor's memo does not require a change, as it merely refers back to the above text accompanying Sec. 78.

FILE WITH SB133

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

OFFICE OF THE COMMISSIONER

POUCH M
JUNEAU, ALASKA 99811
PHONE: 465-2400

April 27, 1983

The Honorable Bill Ray
Chairman
Senate Judiciary Committee
Pouch V
Juneau, AK 99811

Dear Senator Ray:

My staff has reviewed CSSB 133 (Jud) which will be heard in the Judiciary Committee on Monday, May 2. I submit two amendments to that proposed legislation for your consideration. In both cases we have discussed these amendments with Mr. Deardorf, the revisor, and with Tom Koester of the Attorney General's Office. They both agree that the change we are requesting is a matter of policy.

Page 21, Lines 14-20 should read:

*Sec. 78. AS 38.05.057(e)(3) is amended to read:

(3) notice of the application period and the date of the lottery shall be given in accordance with AS 38.05.345[(e)]; and

Page 23, Lines 20-27 should read:

* Sec. 87. AS 38.08.020 is amended to read:

Sec. 38.08.020. PUBLIC NOTICE. The director shall publish notice of the availability of the land in the same manner as provided in AS 38.05.345[(e)].

We are requesting this change rather than the change recommended by the revisor in order to make all public notice requirements consistent as provided in AS 38.05.345. In some cases this may require the department to do somewhat more rigorous public notice than previously required. However, we feel that the result will be less confusion for the public and for department officials implementing these programs.

10-J9LH

If you have any questions about these recommendations, please call my office. We will be available to testify on this bill as requested.

Sincerely,

Esther C. Wunnicke

Committee on Resources

April 28, 1983

Memo

To: Senator Bill Ray, Chairman Senate Judiciary Committee

From: Senator Bettye Fahrenkamp

Subject: Comments on CSSB 133, Statute Revisions

The following are in response to your request for comments on the above bill scheduled for hearing on May 2, 1983:

1) Section 2 amends the definition of fur farming contained in AS 03.05.010(c)(6). The Resources Committee recently heard and reported out CSHB 187 which also amends this section. This bill includes the same changes but also includes additional clarifying amendments. As this bill appears to have an excellent chance of enactment, I would recommend that prior to any final action on CSSB 133 conforming changes to CSHB 187 be made. Attached is a copy of the relevant section from CSHB 187.

2) Section 77 of CSSB 133 amends the state park definition in AS 38.04.910. The Senate has passed and sent to the House SB 128 which establishes a marine park system within the state park system. I would recommend that the definition of state park in CSSB 133 be amended to include marine park units should SB 128 pass in advance of CSSB 133.

3) Section 78 of CSSB 133 amends 38.05.057(e). The Resources Committee has recently reported SB 222 making changes in Title 38 including this section. The changes in 38.05.057(e) are different than those proposed in CSSB 133 and have been agreed to be DNR and the Statute Revisor. Again, I would recommend that CSSB 133 be changed to conform with SB 222 if that legislation should be enacted prior to CSSB 133.

4) Section 79 of CSSB 133 amends 38.05.057(g). SB 222 makes an additional change in this section. ("director" changed to "commissioner")

5) Section 84 of CSSB 133 amends 38.05.102. SB 222 makes an additional change in this section.

6) Section 86 of CSSB 133 amends 38.05.255. SB 222 makes an additional change in this section.

7) Section 87 of CSSB 133 amends 38.08.020. SB 222 contains an amendment to this same section but in a different, more comprehensive manner. This amendment has been agreed to by the DNR and the Statute Revisor.

Attached are copies of the relevant sections of SB 222 indicating these changes.

Thank you for the opportunity to comment on this bill. I hope that between your committee, the Statute Revisor, and others we can watch the timing of all this legislation and ensure conformity.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: Senate Bill No. 133 Date on Bill: February 21, 1983
Title: "AN Act making corrective amendments to the Alaska Statutes."
Sponsor: Rules Committee
Requestor: Legislative Council

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86
Capital				
Operating				
Total				

b. Revenues:

Revenue	(4.1)	(2.7)	(12.9)	

2. Source of funds to offset fiscal impact of bill:

3. Assumptions: See attached sheet.

2/15/83

Assumptions: Senate Bill No. 133, as relates to the repeal of AS 08.24, Collection Agencies.

Section 14, AS 08.24, of this bill repeals the licensing function for Collection Agencies and Collection Agency Operators. Current licensure fees for biennial licensure of Collection Agencies is $200.00, and $100.00 for Collection Agency Operators.

Initial application fees are $100.00 for Collection Agencies and $40.00 for Collection Agency Operators.

Past history reveals a 50 to 60% turnover of licensed operators during any given calendar-year. Collection Agency licensure has remained at a fairly constant level with infrequent turnover.

For the remainder of FY '83, April-June, there are currently 8 Agency and 12 Operator applications on file. The loss of revenue for the remainder of FY '83 is projected to be $4,080.00.

The next biennial license period is June 30, 1984, for FY '85/'86. The projected loss of revenue for FY '84 would be from the anticipated turnover of Collection Agency Operators. Including the application fee of $40.00 and the license fee of $100.00, the loss of revenue is projected to be $2,660.00.

The projected loss of revenue for FY '85 would be $12,860.00 and would cover Collection Agency renewals, Collection Agency Operator renewals, as well as the anticipated turnover of operators.

MEMORANDUM State of Alaska

TO: Harry Treager, Director
Division of Occupational Licensing
Department of Commerce and Economic Development

DATE: October 14, 1981

FILE NO: J-66-111-82

TELEPHONE NO: 465-3600 ex 56

FROM: WILSON L. CONDON
ATTORNEY GENERAL

By: Diane T. Colvin
Legal Assistant

SUBJECT: Agency responsibility following termination of an occupational licensing board pursuant to AS 08.

You asked for our opinion on the division's responsibilities when a board is terminated pursuant to AS 08.03.010, the sunset law. Your question pertains specifically to the Collection Agency Board, the only board allowed to expire to date under sunset. We believe that basically your duties and responsibilities are not affected by termination of the board, for the reasons given below.

AS 08.03.010 provides a termination date of June 30, 1980 for the Collection Agency Board. Because the Legislature did not affirmatively act to reestablish the board, it automatically expired on the date indicated. Pursuant to AS 08.03.020 it continued in existence until June 30, 1981 for the purpose of "concluding its affairs." AS 08.03.020 further provides that:

> One year after the date of termination, a board not continued shall cease all activities.

No other "guidance" is given by the statutes except by way of reference to AS 44.66.050, concerning legislative oversight. This statute deals generally with review procedures for boards and commissions subject to scrutiny under AS 08.03 and AS 44.66. In regard to boards terminated, AS 44.66.060 provides:

> This chapter shall not cause the termination or dismissal of a claim or right of a citizen against a board, commission or program of an agency terminated under this chapter which is subject to litigation. Claims and rights shall be assumed by the department to which the board or commission terminated under this chapter was attached for administrative purposes.

It should be noted that the Collection Agency Board is somewhat unique in that it had effectively ceased to function before its sunset termination date. According to the performance review of the Collection Agency Board prepared by Legislative Audit

in March 1979, no meetings were held by the board between October 13, 1971 and March 14, 1977. 1/ During this time, the Department of Commerce and Economic Development conducted all licensing functions and handled all administrative matters relating to collection agencies and operators.

There is also a unique feature to Alaska's sunset law in that the automatic termination date under sunset applies to the respective boards or commissions only, not to the accompanying licensing laws. Most of the states that have enacted sunset laws have applied the principle of automatic expiration to all the statutes relating to a particular occupation or profession, thus terminating licensing as well as the boards if the legislature takes no action.

Because AS 08.03.010 applies only to AS 08.24.011, the statute creating the Collection Agency Board and designating board membership, the functions of the Division of Occupational Licensing are essentially unchanged with termination of the Board. This is particularly true in the case of the Collection Agency Board, since it had only minimal authority under the law when it was in existence. Under AS 08.24, the board was specifically empowered to 1) adopt rules and regulations (AS 08.24.031); 2) waive certain license requirements (AS 08.24.100), and 3) investigate applicants (AS 08.24.120). (The latter two powers were shared with the Department, and the first is an implied power of the Department.)

All of the other powers relating to regulation of collection agencies are granted to the Department of Commerce and Economic Development. This differs from most licensing laws, where the board or the commission, not the department, is granted certain powers and required to carry out certain duties.

1/ According to the report, six meetings were held between August 1977 and February 1979. There appears to be a correlation here with the passage of sunset legislation (Chapter 194, SLA 1977 was approved by the Governor on June 18, 1977 and went in effect on September 16, 1977).

Consequently, your division's responsibilities regarding licensing of collection agencies and enforcement of the licensing law have essentially not been affected by the termination of the board. 2/ You should continue all administrative, investigative, licensing and enforcement functions you have conducted in the past. The division was charged with administration and enforcement of the law prior to termination of the board; this has not been changed by expiration of the board.

We would recommend that the Department adopt regulations to carry out its duties under the law. No regulations were ever adopted by the Board, although some were drafted and proposed. We would be happy to work with you on development of any regulations you deem necessary.

It should be noted that the advice given here applies only to a board such as the Collection Agency Board which is limited to an advisory role. Should the Legislature allow one of the boards to terminate that is vested with specific powers and duties, the question of the Division's continuing responsibilities would be a more complicated one. We shall deal with that question when and if the issue arises.

Please contact us if you have further questions on this matter.

DTC/jb

2/ Other than to ensure that no claims or rights against the Board are affected by its termination. (See AS 44.66.060.)

SB
139

Introduced: 2/23/83
Referred: Resources and Judiciary

IN THE SENATE BY THE RESOURCES COMMITTEE

SENATE BILL NO. 139

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act repealing the licensing of big game transporters."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.54.190(a) is amended to read:

(a) A master guide, registered guide, class-A assistant guide, or assistant guide [OR TRANSPORTER] license expires on December 31, following issuance.

* Sec. 2. AS 08.54.200(d) is amended to read:

(d) No person who is disciplined under this section may engage in any guiding [OR TRANSPORTING] activity during the period of license revocation or disciplinary action. No person licensed under this chapter may hire or work for a guide whose license is suspended or revoked under this section.

* Sec. 3. AS 08.54.210 is amended to read:

Sec. 08.54.210. UNLAWFUL ACTS. (a) It is unlawful for

(1) a master guide, registered guide, class-A assistant guide, or assistant guide [OR TRANSPORTER] to fail to timely report to the Department of Public Safety, division of fish and wildlife protection, and in no event later than 30 days, violations by a client of a state fish, game or guiding statute or regulation;

(2) a master guide, registered guide, class-A assistant guide, or assistant guide [OR TRANSPORTER] to aid the commission of a violation of this chapter or of AS 16.05 or a regulation promulgated under either chapter, or permit the commission of a violation in the

guide's [OR TRANSPORTER'S] sight without attempting to prevent it, short of using force, and without reporting it;

(3) a person to guide [OR TRANSPORT] as defined in this chapter without being licensed under this chapter and without having the license in actual possession; [HOWEVER, FOR PURPOSES OF TRANSPORTING BY AIR, IN THE CASE OF A CORPORATION, COMPANY, PARTNERSHIP OR OTHER BUSINESS ENTITY, THE LICENSE MAY REMAIN AT THE PRINCIPAL PLACE OF BUSINESS OF THE BUSINESS ENTITY;]

(4) a person to advertise as or represent to be a licensed master guide, registered guide, class-A assistant guide, or assistant guide [OR TRANSPORTER] without being currently licensed, or to falsely advertise services;

(5) a person to guide as defined in this chapter without having a current valid hunting and fishing license in the person's possession; [.]

(6) a master or registered guide to employ or supervise more than three assistant guides at the same time; [.]

(7) a person to guide as defined in this chapter without paying a fee as prescribed in AS 16.05.340(e).

(b) A person who violates (a)(1) - (6) of this section is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $1,000 or by imprisonment for not more than one year, or by both, and the person's license may be revoked for a period up to five years. However, a person who engages in guiding [OR TRANSPORTING] activity during the period the person's license is suspended or revoked under this chapter is guilty of a felony punishable, upon conviction, by a fine of not more than $5,000 and by imprisonment for not less than one year nor more than three years. In addition to punishment for a felony, all guns, fishing tackle, boats, aircraft,

automobiles or other vehicles, camping gear and other equipment and paraphernalia used in, or in aid of, guiding [OR TRANSPORTING] activity engaged in during the period of suspension or revocation shall be confiscated by persons authorized to enforce this chapter. A person who violates (a)(7) of this section, upon conviction, is subject to the same license revocation provision as for a violation of (a)(1) - (6) of this section and, in addition, is punishable by a fine of not more than $5,000, or by imprisonment for not more than one year, or by both.

* Sec. 4. AS 08.54.142, 08.54.144, 08.54.146, 08.54.170(c), and 08.54.-240(5) are repealed.

MEMORANDUM

TO: Members, House Judiciary Committee

FROM: Senator Vic Fischer

DATE: March 26, 1984

RE: SB 163, HB 262, HB 464 (Child Safety Devices)

Dr. Clinton Lillibridge, of the American Academy of Pediatricians, asked that I send you a copy of the attached article on child safety device law.

UNIVERSITY OF
COLORADO
LAW REVIEW

CHILD SAFETY IN AUTOMOBILES: MANDATORY RESTRAINT-USE LAWS

Automobile safety is an issue of long-standing concern, but only recently has special attention been focused on the safety needs of young children, to whom cars pose one of the largest public health threats in the country.[1] This threat would be greatly diminished if each pre-school aged child were properly secured in a child restraint device (CRD) each time he or she traveled in a motor vehicle.

A CRD is a car seat, padded shell, or harness which is designed to protect infants and young children in the event of an accident, and which is usually secured in place by a vehicle's existing lap belts.[2] These devices are fairly inexpensive and readily available, yet they are rarely used. In fact, a leading study found that less than ten percent of children transported in motor vehicles were adequately protected against the possibility of injury.[3]

A growing awareness of this public health problem has resulted in passage of legislation mandating the use of CRDs in two states[4] and proposed legislation in twenty-eight others.[5] This Comment will examine the laws mandating the use of CRDs and the legal issues which may arise from them. The efficacy of the various statutes will be analyzed as well as their constitutional validity under state police powers. An evaluation of the potential impact of CRD laws on auto-

---

1. See text accompanying notes 6-8 *infra*.

2. Some CRDs are designed solely for use by infants while others protect only toddlers capable of sitting alone. Many restraint devices are convertible and can be used from birth until the child weighs more than forty to fifty pounds, at four or five years of age. For a complete description and evaluation of many of the CRDs marketed today, *see* MICHIGAN'S MOTOR VEHICLE OCCUPANT PROTECTION PROGRAM, MICHIGAN TRAFFIC SAFETY INFORMATION COUNCIL, A DETAILED REVIEW OF CURRENTLY MARKETED INFANT AND CHILD RESTRAINTS (1979); *Child Restraint Systems*, 42 CONSUMER REPORTS 314 (1977).

3. *See* Williams, *Observed Child Restraint Use in Automobiles*, 130 AM. J. DISEASES OF CHILDREN 1311 (1976).

4. CRD-use laws are in effect in Tennessee and Rhode Island. See notes 33 and 41 *infra*.

5. Child restraint bills have been proposed in the following states: Alabama, Arizona, California, Colorado, Connecticut, Delaware, Hawaii, Illinois, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, South Dakota, Virginia, Washington, West Virginia, and Wisconsin. *See* ACTION FOR CHILD TRANSPORTATION SAFETY, SUMMARY OF PROPOSED CHILD RESTRAINT LEGISLATION AND ALTERNATIVE MODEL LAWS (1979, updated May, 1980) [hereinafter cited as ACTS].

mobile accident litigation will follow. Before turning to those issues, however, the problem to which CRD laws are addressed will be more fully described.

THE PROBLEM

Motor vehicle accidents cause death and injury to more children than any other single cause, including childhood diseases.[6] In 1979 alone, 1159 children under the age of five died, and at least fifty times that number were injured, in such accidents in the United States.[7] Colorado contributed fourteen fatalities and 835 recorded injuries to that toll.[8] These high numbers are due primarily to two factors: the physical characteristics of young children and the positions they usually occupy as unrestrained passengers in motor vehicles.

The unique center of gravity and small size of young children make them particularly vulnerable to serious injuries in automobile crashes.[9] A child's head makes up a great proportion of his overall body weight, and this, coupled with an inability to brace himself with his short arms and legs, greatly increases the likelihood that he will be propelled head-first in the direction of any impact point. The result is a high incidence of head injuries and related deaths among accident victims in this age group.[10] In fact, such injuries can occur even in the absence of an actual accident when an unsecured child is thrown against the automobile's interior by a sudden swerve or application of the brakes.[11] Larger and heavier passengers, on the other hand, are less likely to be shifted by abrupt driving maneuvers.

The physical characteristics of very young children also tend to

and the forward-moving weight of the person holding him.[18] This same crushing action can occur when a seatbelt is fastened around both the adult and the child on his lap. In a collision, the weight of the adult is forced against the child penned in the seatbelt with him, and the probability of serious abdominal injury to the child is greatly increased.[19]

The final variation of on-lap travel is a seatbelted adult holding an unrestrained child on his lap. In this position, the adult does not crush the child in an accident, but is powerless in most cases to prevent other harm to the child, for even the smallest infant weighs the equivalent of several hundred pounds at the instant of impact, and is likely to be torn from even the strongest of human arms.[20] In short, holding a child can never be an adequate safety alternative to the use of an appropriate restraint device.

The need for CRDs will not be obviated by the automatic restraint systems which federal legislation will require on all new cars by 1984.[21] While manufacturers will be able to satisfy the requirements by providing either automatic seatbelts or airbags in their vehicles, neither option is fully adequate for child safety needs. Automatic seatbelts designed for average sized adults will not offer even minimal protection to infants. Airbags, on the other hand, will diminish the threat to children riding in the front seat, but present legislation does not require airbag installation for the protection of rear seat passengers, a class composed largely of children.[22] Furthermore, airbags will provide little protection in side- and rear-impact collisions and rollovers.[23]

Finally, unlike a CRD, an airbag would not play a role in preventing the occurrence of an accident. A study conducted at the University of North Carolina concluded that more than two hundred

20. The force that a child will exert upon impact can be roughly calculated by multiplying the child's weight and the vehicle's speed together. For instance, a fifteen pound infant will exert a force of three hundred pounds in a twenty mile per hour collision. *See* IIHS, *An Evaluation of Adult Clasping Strength for Restraining Lap-Held Infants*, discussed in IIHS STATUS REPORT 6 (Mar. 19, 1979).

21. Automatic restraint systems are being phased in over several years with large cars being targeted first. All new cars will have to meet the requirement by the 1984 model year. 49 C.F.R. § 571.208 (1979).

22. One survey found that about seventy percent of the nearly 9000 children observed in motor vehicles were riding in the back seat. Riesinger & Williams, *Evaluation of Programs Designed to Increase the Protection of Children in Cars*, 62 PEDIATRICS 280, 286 (1978).

23. *See* Comment, *Occupant Protection in Automobiles*, 27 AM. U. L. REV. 635 (1978) for a thorough discussion of automatic restraint systems.

of that state's traffic accidents in 1977 were caused by unrestrained children who had distracted the driver of the vehicle in which they were riding. Children who fell off the seat or interfered with the operation of the motor vehicle were, in many instances, found to have been the direct cause of a crash.[24]

All of the problems discussed above would be greatly alleviated by the use of CRDs. Experts in the field generally agree that the number of children killed and injured in automobile accidents would be minimized—some claim by as much as ninety percent—if CRDs were consistently and properly used.[25] Yet recent data shows that only seven percent of the children riding on the nation's roads are adequately secured for protection against possible harm.[26] Parents who wear their own seatbelts while transporting their children have been found to use child restraints more than any other group. Yet even in that situation, only twenty-two percent of the passenger children were secured by a CRD or seatbelt.[27] The great number of children harmed, coupled with the low voluntary usage rate of adequate restraints, has led to a growing interest in a statutory solution to this public health problem.

THE STATUTES

The field of automobile safety is one which legislators enter with trepidation. Traditional public hostility toward regulation of individual driving habits has led to a reluctance to impose safety requirements on individual drivers. Public sentiment was so strong against the federally mandated seatbelt-ignition interlock system,[28] for example, that Congress was forced to repeal the measure less than a

---

24. This study was summarized in MICHIGAN ASSOCIATION FOR TRAFFIC SAFETY, FORMATS, *Child Passenger Safety News* (Feb. 1980)

25. A study of crashes done in Washington state by Dr. Robert G. Scherz, for example, concludes that "[t]he difference between deaths and disabling injuries between the restrained and unrestrained pre-school children was highly significant. If all of the children in the 0-5 age group had been restrained at the time of the accident, then the . . . deaths may have been reduced from 124 to 13 (down 90%) and disabling injuries reduced from 716 to 238."

Alter, *supra* note 9, at 10.

The reduction in injuries in the Washington study is about 33%, a rate very similar to that obtained by analyzing accidents involving children under fifteen years of age in North Carolina. The North Carolina study found that "[u]se of restraints reduced the injury rate by 39% in the front seat and by 31% in back." Williams & Zador, *supra* note 16, at 10.

26. Williams, *supra* note 3.

27. *Id.* at 1314.

28. The seatbelt-ignition interlock system prevented a vehicle's engine from being started until seatbelts were buckled. An annoying buzzer sounded if seatbelts were unfastened while the seat was occupied.

year after it went into effect.[29] This public hostility explains the absence of mandatory seatbelt-use laws in any of the states.

The somewhat warmer reception given to CRD-use laws in state legislatures is undoubtedly due to the age of those who would benefit from such legislation. Because infants and young children are completely dependent on others for their well-being, state law has historically provided for their health and safety when those charged with their care fail adequately to do so.[30] The effectiveness and practicality of extending state protection to children as automobile passengers will be evaluated by examining the various CRD statutes which have been proposed.

The Existing Laws

Two states have succeeded in passing CRD legislation: Tennessee[31] and Rhode Island.[32] The pioneering Tennessee statute, which went into effect at the beginning of 1978, requires that all children under the age of four be secured in a CRD when riding in a vehicle owned and operated by their parents.[33] Exemptions are allowed for children riding on other passengers' laps, and for children riding in recreational vans and certain trucks.[34] The penalty for breaking this law is a moderate fine; and proof of the violation cannot be raised in civil suits for negligence.[35]

31. TENN. CODE ANN. § 55-9-214(b) (1980).
32. R. I. GEN. LAWS § 31-22-22 (1980).
33. TENN. CODE ANN. § 55-9-214 (1980):
(b) Effective January 1, 1978, every parent or legal guardian of a child under the age of four (4) years residing in this state shall be responsible, when transporting his child in a motor vehicle owned by that parent or guardian operated on the roadways, streets or highways of this state, for providing for the protection of his child and properly using a child passenger restraint system meeting federal motor vehicle safety standards, or assuring that such child is held in the arms of an older person riding as a passenger in the motor vehicle. Provided that the term "motor vehicle" as used in this paragraph shall not apply to recreational vehicles of the truck or van type. Provided further that the term "motor vehicle" as used in this paragraph shall not apply to trucks having a tonnage rating of one (1) ton or more. Provided that in no event shall failure to wear a child passenger restraint system be considered as contributory negligence, nor shall such failure to wear said child passenger restraint system be admissible as evidence in the trial of any civil action.
(c) Violation of any provision of this section is hereby declared a misdemeanor and anyone convicted of any such violation shall be fined . . . not less than two dollars ($2.00) nor more than ten dollars ($10.00) for each violation of subsection (b) of this section.
34. *Id.*
35. *Id.*

From a safety standpoint, the most controversial provision of this law is the so-called "babes-in-arms" exemption.[36] Holding a child in a passenger's arms has been shown to be an entirely inadequate substitute for the use of a restraint,[37] and there is hope among the original sponsors of the Tennessee law that this exemption will be repealed at some future date.[38] Unfortunately, similar provisions were included in bills introduced in four other states.[39]

A second aspect of the Tennessee law which may lessen its effectiveness is that it applies only to parents who are transporting their own children. Although the majority of children less than four years old are likely to be driven by a parent whenever they ride in a vehicle, this provision may nevertheless lead to enforcement problems. Since most children carry no identification, the temptation for any parent or guardian to simply assert that he is, for example, the child's uncle or babysitter when stopped for a possible violation is evident. A police officer faced with such a statement would in many cases lack probable cause to go forward and issue a citation.[40]

Tennessee's final exempting provision, which excludes trucks and vans from the law's application, was probably viewed as a practical necessity because of the limited seating which is available in those vehicles. The addition of a further provision requiring that restraints be used if seating were available would strengthen the protective purpose of the law while still acknowledging these practical concerns.

A CRD-use law with quite different provisions went into effect in Rhode Island in July of 1980.[41] Unlike the Tennessee statute, this

---

36. The exemption allowed for children who ride on another passenger's lap was added as an amendment by one of the bill's opponents. He argued that the happiest day of his daughter's life was when she brought her new baby home from the hospital in her arms and that the law would deny this pleasure to other new mothers. It was feared that the law would not be passed if the exemption were removed. R. Sanders, *Effective Interaction With State Legislatures* (paper presented at the Child Passenger Safety Conference, U. of Tenn. Transp. Center, May 10, 1978, available from Action for Child Transportation Safety).

37. See text accompanying notes 17-20 *supra*

38. Sanders, *supra* note 36.

39. This language was included in bills introduced in Illinois, Louisiana, New Hampshire, and New Jersey, none of which passed. ACTS, *supra* note 5.

40. Probable cause exists when the facts and circumstances within the officer's knowledge are sufficient in themselves to warrant a belief by a man of reasonable caution that an offense has been committed. Brinegar v. United States, 338 U.S. 160, 175-76 (1949). More than mere suspicion is required. Henry v. United States, 361 U.S. 98, 101 (1959).

41. R. I. GEN. LAWS § 31-22-22 (1980):

> Child Passenger Restraint Systems. Any person transporting a child three (3) years of age or under in the front seat of a motor vehicle operated on the roadways, streets or highways of this state, will provide for the protection of the child and

law applies to all persons driving in Rhode Island and therefore avoids the potential enforcement problems posed by a "parents-only" provision. The unique feature of Rhode Island's law is that it requires CRD use by children under the age of four only while they are riding in the front seat of a vehicle.[42] The law thus addresses the most hazardous practices of unrestrained, or on-lap, front seat travel, but fails to provide protection for the majority of child passengers: those who ride in the back seat.[43] A more stringent bill, to be introduced in the South Dakota legislature,[44] would provide the added protection. That bill would require that children ride in the back seat *and* be secured in the vehicle's available seatbelts whenever possible. Should it be necessary for a child to be transported in the front seat, a restraint device appropriate for the child's age and size, such as is required in Rhode Island, would have to be used.

Pending Legislation: Some Further Options

The majority of CRD legislation introduced in other states is similar to the Tennessee law, but without the "babes-in-arms" exemption.[45] These statutes typically would require that a parent who is driving his own vehicle must have his young children secured in CRDs. The protected class of children is most often limited to those younger than four years, or alternatively, to those who weigh less than forty pounds.[46] These age and weight limitations provide convenient lines for the legislators to draw, since they encompass the class

---

properly use a child passenger restraint system approved by the United States Department of Transportation under Federal Standard 213, provided that in no event [shall] failure to wear a child passenger restraint system be considered as contributory negligence, nor [shall] such failure to wear said child passenger restraint system be admissible as evidence in the trial of any civil action.

Any person deemed to be in violation of this section shall be issued a citation with a fine of fifteen ($15.00) dollars and it will be recorded on said person's driving record within the rules and regulations governing Section 31-43.

43. While one study found that a "back seat location reduced the injury rate by 28% among unrestrained child passengers and by 18% among restrained children," it further concluded that restrained children are safer than those who are unrestrained, regardless of their position in a vehicle. Williams & Zador, *supra* note 16, at 71.

44. The South Dakota proposal is described in ACTS, *supra* note 5.

45. Arizona H.B. 2418 (defeated in committee), Colorado H.B. 1440 (defeated in the House); Michigan substitute for H.B. 5327, Minnesota H.B. 156 and S.B. 274, Nebraska Leg. B. 79; North Carolina H.B. 1018 (defeated); North Dakota H.B. 1490 (defeated); Oregon H.B. 2667 (defeated in the House); Washington H.B. 199 and S.B. 2895 (withdrawn by sponsors); Wisconsin Asmb. B. 747. The sponsors of many of the defeated bills plan to reintroduce their respective proposals. ACTS, *supra* note 5.

46. *Id.*

of passengers for whom CRDs are typically designed.[47] Also, by drafting legislation concerned with CRD use only, legislators can minimize the political and public opposition which would accompany a more far-reaching restraint-use law.

The four year age limit is not universal, however. California has a bill pending which would encourage the use of appropriate restraint systems for all children under the age of sixteen.[48] This bill is designed primarily to educate the public and would allow law enforcement officers to issue verbal hazard warnings, but not citations, to non-complying motorists. Other age variations are found in the South Dakota legislation mentioned above,[49] which would apply to children up to thirteen years of age, and in a Maryland bill which would require restraint use for the protection of children who are less than eight.[50]

Proposed CRD laws also vary in their determination of who will be responsible for complying with their respective terms. As noted, the majority would hold only parents or legal guardians liable for the failure to use restraint devices. Statutes with broader coverage usually are written to apply to all resident drivers,[51] or to the drivers of all vehicles which are registered in the enacting state.[52] One novel variation is the New York proposal,[53] which would impose a penalty on both the driver of a vehicle in which an unrestrained child was riding, and the vehicle owner who knowingly permitted a child to be transported in that manner.

Other provisions which may be incorporated into some proposed statutes include a ban on carrying passengers in the cargo areas of hatchbacks, station wagons, and pickup trucks,[54] and on the practice of buckling one seatbelt around two people.[55] One exemption under consideration in some states allows children with medical problems

52. *See, e.g.*, Colorado H.B. 1440, ACTS, *supra* note 5.
53. New York S.B. 2623, ACTS, *supra* note 5.
54. *See, e.g.*, Massachusetts S.B. 1269 which would prohibit the carrying of passengers in open trucks. ACTS, *supra* note 5. This particular provision has been enacted by city ordinance in Ogden, Utah. This five year old law forbids persons from riding in any portion of a motor vehicle not designed or intended for use by passengers. It further makes it illegal to operate a motor vehicle while any person is standing on the vehicle's seats. MICHIGAN ASSOCIATION FOR TRAFFIC SAFETY, FORMATS, *Child Passenger Safety News* 4 (Apr. 1980).
55. *See, e.g.*, Maryland H.B. 33; Washington H.B. 199 and S.B. 2895, ACTS, *supra* note 5.

which may make the use of a CRD impossible, to travel without being secured in such a device.[56] To avoid possible abuse of this provision, a doctor's certificate of exemption would be required by some statutes.[57]

In combining any of these provisions into a workable child restraint law, the interest in maximizing safety should be balanced against considerations of fairness and practicality. The statutes must be flexible. For example, a large family that can afford only a small car with inadequate seating for all family members should not be subject to a penalty each time they venture onto the public roads. A law which requires the use of CRDs for available seating and which further requires all unrestrained children to ride in the back seat might best accomodate both safety concerns and tight family budgets.

Flexibility and compromise is also necessary in striking a reasonable balance between the strictness of a restraint law's provisions and the determination of who will be subject to the law's terms. For example, a requirement that CRDs be obtained and used would be less controversial under a law that applies only to parents and legal guardians, rather than to all in-state drivers. Conversely, statutes which apply to all drivers might require only that the vehicle's available seatbelts be used for the protection of children. Under a law of the latter type, parents could still be encouraged to obtain CRDs by other means, such as by allowing a tax credit as an incentive for their purchase. The tax credit incentive is presently under consideration in some states.[58]

Costs and Enforcement

The burden which would be imposed on members of the public by requiring them to obtain CRDs should not be viewed as an insurmountable problem. The cost of these devices, generally between twenty and forty-five dollars,[59] is not unreasonable when it is consid-

---

56. Members of Action for Child Transportation Safety find exemptions for "physical or medical" reasons unacceptable and argue that children unable to sit in the typical car seat style CRD — because of a bulky cast or perhaps some birth defect — are nevertheless entitled to protection. They suggest larger shield or harness type restraints as alternatives. ACTS, *supra* note 5. *See also* L. Schneider, J. Melvin, C. E. Cooney, *Impact Sled Test Evaluation of Restraint Systems Used in Transportation of Handicapped Children* (paper presented to the Society of Automotive Engineers, Detroit 1979) discussed in HHS STATUS REPORT 5 (Mar. 19, 1979).

57. *See, e.g.*, Colorado H.B. 1440; Massachusetts S.B. 1097, ACTS, *supra* note 5.

58. *See, e.g.*, Michigan S.B. 394, ACTS, *supra* note 5.

59. See note 2 *supra*.

ered that a CRD provides up to four years of protection and that each CRD can be re-used by several children. The price of the device could simply be considered, along with license plates, safety inspections, and insurance, as one of the costs of owning and operating a motor vehicle.

On the other hand, CRD legislation would probably receive greater public acceptance if it were accompanied by programs designed to minimize the cost of compliance. Legislative efforts toward this end could include the tax credit mentioned above and, possibly, Medicaid coverage of CRD purchases for the poor. It has been suggested that Medicaid payments for CRDs could be justified under the same theory that applies to childhood vaccinations—that such devices constitute effective preventive medicine.[60]

As an alternative to government help, many innovative private programs offer means of keeping compliance costs down. Examples include CRD rental programs which have been successfully established in several parts of the country, as well as programs which offer used restraint devices for sale at minimal cost.[61] A different approach has been implemented by one insurance company, which provides CRDs to its insured families without charge, thereby spreading the cost of the devices among all of its policy holders.[62] Thus, several possibilities exist in both the government and private sectors which could minimize the financial burden imposed by CRD-use laws.

A final concern about the practicality of these statutes centers on the enforcement problems that they may present, although these problems appear to be no greater than those which accompany many other traffic regulations. As in the case of driving without a valid license, which is against the law[63] but usually goes undetected, CRD violations might often be found only after the driver of the car is stopped for another infraction. More likely, an officer would simply

---

60. Action for Child Transportation Safety is among those groups exploring the possibility of Medicaid payments for CRD purchases. Allowing such payments was urged by the safety coordinator of a pediatric preventive medicine program in testimony before the House Commerce Subcommittee on Oversight and Investigation. HHS STATUS REPORT 7 (May 17, 1979).

61. Several such programs are described in *Child Passenger Safety News*, *supra* note 24.

62. Robert E. Vanderbeck, president of the League General Insurance Companies of Southfield, Michigan told the House Commerce Subcommittee on Oversight and Investigation that "[t]he program . . . makes economic sense and we believe will be cost effective — it will pay for itself through reduced claims." HHS STATUS REPORT 6 (May 17, 1979).

63. *See, e.g.*, COLO. REV. STAT. § 42-2-101 (1973).

notice a child standing on the seat of a vehicle or riding on another person's lap and then pull that vehicle over in order to issue a ticket to the driver. Children traveling in dangerous positions are often visible to other motorists on the road and no extraordinary surveillance techniques would be needed by police charged with halting that practice.

THE POLICE POWER

Each state possesses authority to pass laws which protect the health, safety, or welfare of the public.[64] This authority is an inherent aspect of the state's sovereignty and is known as its police power.[65] In determining the validity of any legislation passed pursuant to this power, courts typically employ a two-step analysis. Such a law will be upheld if it furthers a legitimate state objective and if the means employed to attain it are reasonably related to that end.[66]

A Legitimate Objective

An appropriate state objective has been held to be any one which promotes or protects the public welfare.[67] This definition is elastic enough to encompass the wide variety of laws which are enacted in response to changing public needs. The shift from an agrarian to an industrial society, for example, created the need for regulations such as workmen's safety, pure food, and urban housing and sanitation laws.[68] More recently, the public welfare concept has been expanded to include rent control laws,[69] anti-deceptive credit practice laws,[70] and anti-billboard and landmark preservation statutes

64. *See* Berman v. Parker, 348 U.S. 26, 32 (1954); East New York Bank v. Hahn, 326 U.S. 230, 232 (1945); Nebbia v. New York, 291 U.S. 502, 523 (1934); License Cases, 46 U.S. (5 How.) 504, 583 (1847).

65. The term "police power" appears to have been first used by Justice Marshall in Brown v. Maryland, 25 U.S. (12 Wh.) 419, 433 (1827). It is a residuary power, one which was retained by the states after certain enumerated powers had been transferred to the new federal government.

66. "To justify the state in . . . interposing its authority in behalf of the public, it must appear, first, that the interests of the public . . . require such interference; and, second, that the means are reasonably necessary for the accomplishment of the purpose, and not unduly oppressive upon individuals." Goldblatt v. Hempstead, 369 U.S. 590, 594-95 (1962) *quoting* Lawton v. Steele, 152 U.S. 133, 137 (1894).

67. *See, e.g.*, In re Interrogatories of the Governor, 97 Colo. 587, 595, 52 P.2d 663, 667 (1935) which notes that this power is as "broad as the public welfare."

68. *See* Morissette v. United States, 342 U.S. 246, 253-54 (1952).

69. Hutton Park Gardens v. West Orange Town Council, 68 N.J. 543, 350 A.2d 1 (1975).

70. Birkenfield v. City of Berkeley, 17 Cal.3d 129, 550 P.2d 1001, 130 Cal. Rptr. 465 (1976)

designed to protect the aesthetic features of an area.[71]

Regulations such as these can be viewed as an attempt to redress an unequal balance of power. When members of the public are faced with some threat with which they cannot deal on an individual level, the constitutional niche known as the police power has enabled the state to attempt to protect their well-being by regulating the conduct of those who do have the power and ability to mitigate the potential harm. Thus, the acts of the employer, the manufacturer, and the polluter may be regulated for the benefit of the worker, the consumer, and the public at large.

The CRD statutes fit easily into this pattern. In passing these laws, states are seeking to protect a particularly powerless class of people by regulating the behavior of those in the best position to minimize the risk to that class. Insofar as they seek to promote safety, these statutes are at the core of the police power doctrine.[72]

Highway Regulations. Specifically, CRD legislation is addressed to the problem of highway safety, an area in which the states have extensively exercised their rule-making powers.[73] Since the arrival of the automobile, both drivers and vehicles have been subjected to a variety of statutory requirements designed to protect the driving and riding public. In evaluating the validity of CRD laws as highway safety regulations, a useful analogy can be drawn from the motorcycle helmet laws which, like CRD laws, mandated the use of specialized equipment.

The controversial helmet laws, which swept the country approximately a decade ago, were sustained as valid police power legislation by the overwhelming majority of courts which faced the issue.[74] The Colorado Supreme Court's discussion in the case of *Love v. Bell*[75] is typical of many of these opinions. As with most of the courts across the country which addressed the problem, the Colorado

74. Helmet statutes were struck down in only two of the thirty-three states in which they were challenged. Illinois, People v. Fries, 42 Ill.2d 446, 250 N.E.2d 149 (1969) and Michigan, American Motorcycle Association v. Davids, 11 Mich. App. 351, 158 N.W.2d 72 (1968). The Michigan Supreme Court upheld a very similar municipal law several years later in City of Adrian v. Poucher, 398 Mich. 316, 247 N.W.2d 798 (1976). The helmet cases are collected in 32 A.L.R.3d 1270.

75. 171 Colo. 27, 465 P.2d 118 (1970).

court studiously avoided the most salient issue which grew out of the helmet legislation, the issue of whether mandatory self-protection and of regulating a person for his own good was a valid state objective.[76] Instead, the court sought to find some benefit which the helmet statutes provided to other highway users in order to sustain the law. It found one such benefit in the economic area, noting the "laws may be passed within the police power to protect the public from financial loss."[77] In drawing upon a record which showed a higher frequency of serious head injuries and deaths among bare-headed riders than among those who wore helmets, the court ruled that the law protected the public's financial health since it prevented motorists involved in accidents with motorcycles "from being required to respond in damages more heavily than might be the case if the motorcycle driver and passenger were wearing helmets."[78] Other courts also employed the "financial health" argument and cited increased public medical and welfare costs which would have to be paid to disabled cyclists, as well as higher insurance rates.[79]

Most of the helmet law opinions did not rest solely on this economic protection analysis, but also sought some connection between helmets and the public's physical well-being. Many courts found such a connection in the "flying debris" theory, which is based upon the hypothesis that an unprotected cyclist might be struck in the head by loose gravel or other objects thrown up by passing vehicles, thereby causing the cyclist to lose control and possibly cause an accident.[80] The courts were unswayed by the argument that such a chain of events had never been known to have occurred.

If CRDs are substituted for helmets in the analysis above, the reasoning employed in the typical helmet case not only remains valid but is, in fact, strengthened. As with helmets, CRDs offer the potential for mitigating physical, and therefore, financial damages resulting from highway accidents. More importantly, a CRD law would not leave a court having to strain for a "loose gravel" rationale in

---

76. Few courts were willing to ground their opinions on the self-protecting aspect of helmet legislation. Two cases which did discuss this issue were People v. Carmichael, 56 Misc. 2d 388, 288 N.Y.S.2d 931 (1968) (state has an interest in preserving strong, healthy citizens) and State v. Mele, 103 N.J. Super. 353, 247 A.2d 176 (1968) (state has an interest in protecting people from their own carelessness).

searching for a connection between the regulation and the physical safety of non-regulated members of the public. In contrast to the helmet law discussions on this point, the potential beneficiaries of CRD legislation are not hypothetical, their existence is clearly documented in the "0-4 years" column of each state's accident reports.

The mandatory helmet statutes are perhaps on the periphery of valid police legislation. They raise the difficult problem of the extent to which an individual can be regulated for his own good. Shifting political attitudes on just this point have resulted in the repeal of helmet laws in twenty-eight of the forty-nine states which originally enacted them.[81] The notion of protecting a person against himself is not a factor in CRD legislation, however, for in requiring the use of child restraints the state is attempting to protect those too young to make rational choices in their own best interest. In this vein, it is interesting to note that of those states which repealed helmet laws, nearly two-thirds reenacted such legislation applicable only to minors.[82]

Parens Patriae. The state's interest in the well-being of its youth is of ancient origin. Plato believed that the good of the state as a whole justified the regulation of child-rearing practices.[83] His pupil, Aristotle, differed on this point, suggesting that regulations were necessary only to protect the interests of the individual child.[84] These two theories have survived to the present and are often meshed with a third concern, an interest in preserving the family structure as the basic unit in society.[85]

---

81. California is the only state never to have enacted helmet legislation. A summary of the recent status of helmet laws in this country, including dates of enactment, repeal and pending legislation is compiled in HHS STATUS REPORT 5-8 (Apr. 30, 1979).

84. ARISTOTLE, POLITICS 32-33 discussed in Kleinfeld, *The Balance of Power Among Infants, Their Parents and the State*, 4 FAM. L. Q. 410 411-12 (1970).

85. See text accompanying notes 105-08, *infra* An example of the interweaving of these ideals is the preamble to the Colorado Children's Code. COLO. REV. STAT. § 19-1-102 (1973): The general assembly declares that the purposes of this title are:

> (a) To secure for each child subject to these provisions such care and guidance, preferably in his own home, as will best serve his welfare and the interests of society;
>
> (b) To preserve and strengthen family ties whenever possible, including improvement of home environment;
>
> (c) To remove a child from the custody of his parents only when his welfare and safety or the protection of the public would otherwise be endangered; and
>
> (d) To secure for any child removed from the custody of his parents the necessary

The Platonic theory was mentioned more often in early cases dealing with child-related legislation than it is today. For instance, in sustaining the state's compulsory schooling law, the Colorado Supreme Court in 1927 stated flatly that "[t]he state, for its own protection, may require children to be educated. This needs no citation."[86] This "good-of-the-state" approach is also reflected in statutory provisions, such as those which override parental objections to immunization whenever a community is threatened with an epidemic.[87]

Statutes usually demonstrate a more Aristotelian concern for the welfare of individual children, rather than for the state as a whole. Examples are child abuse laws,[88] child labor laws,[89] and those mandating specific medical procedures to prevent blindness[90] and mental retardation[91] in newborns. The "child protection" rationale is also cited frequently by state courts since the United States Supreme Court has stated that "[t]he well-being of its children is of course a subject within the State's constitutional power to regulate. . . ."[92]

Although CRD legislation arguably benefits the state as a whole by preserving the health of future productive citizens and by reducing the number of those who might require long-term public aid because of automobile injuries, its primary purpose is to prevent needless harm from being inflicted upon young children. This latter goal is an entirely appropriate one, as has previously been shown. The question that remains is whether requiring individual drivers to obtain and use child restraints is a reasonable method of attaining that objective.

Reasonable Means

The legislature is given wide discretion in implementing its goals, and a presumption of validity attaches to each statute it enacts.[93] In order to rebut this presumption, an opponent must prove that a law, when applied, violates some provision of the state or federal constitution,[94] or that the law does not reasonably relate to the state's objective in passing it.[95] The question of its "reasonableness" is, in fact, the central issue in any challenge to a police power regulation.[96]

Most statutes promulgated under the police power seek to protect public welfare by regulating conduct in the manufacturing and professional sectors. Individual behavior may also legitimately be regulated so long as the burden imposed does not infringe on a fundamental right.[97] A mere showing "that in its operation a police measure may increase their labor, decrease the value of their property or otherwise inconvenience individuals" will not suffice to render a law void.[98] Securing a child in a CRD before each automobile trip may at times be inconvenient, but the question of concern to a reviewing court would be whether a law mandating that action infringes upon a fundamental right.

An opponent of CRD legislation could claim that any one of several rights are infringed upon by such a law: the right to parental autonomy[99] and privacy;[100] the right to equal protection under the

98. In re Interrogatories of the Governor, 97 Colo. 587, 596, 52 P.2d 663, 667 (1935). One example of a law which puts the burden of compliance on individuals is COLO. REV. STAT. § 33-31-105 (1973 & Supp. 1979). This law makes it the duty of a boat owner or operator — not of the boat manufacturer — to provide an adequate life preserver for each person on board.

99. Parental rights are afforded constitutional protection against unwarranted or unreasonable interference by the state. Planned Parenthood v. Danforth, 428 U.S. 52, 73 (1976); Wisconsin v. Yoder, 406 U.S. 205 (1972); Meyer v. Nebraska, 262 U.S. 390 (1923). *See also* Smith v. Organization of Foster Families, 431 U.S. 816, 842-44 (1977); Ginsberg v. New York, 390 U.S. 629, 639 (1968).

law;[101] and the right to free and unrestricted travel between the states.[102] The last claim can be quickly dispensed with by once again analogizing to the helmet cases, which consistently held that the right to travel was not unreasonably restricted by requiring motorcyclists to obtain and use a relatively inexpensive piece of safety equipment.[103] This right was not infringed even though the helmet statutes were written to apply to all, and not just resident, motorcyclists travelling on the enacting state's roads.[104] The CRD laws are not as broad as the helmet statutes since they typically apply only to resident parents or to those driving vehicles registered in the enacting state. Non-resident tourists therefore would not be subject to the law's provisions.

Parental Autonomy and Privacy. The allocation of power between parent and state in making decisions concerning the best interests of the child is always a sensitive issue. Supreme Court cases have "consistently recognized that the parents' claim to authority in their own household to direct the rearing of their children is basic in the structure of our society."[105] Indeed, the integrity of the family unit has found protection in the Due Process[106] and Equal Protection[107] Clauses of the fourteenth amendment and in the ninth amendment.[108]

Despite this high regard for the family unit, laws which restrict parental autonomy in order to further the welfare of children are usually sustained. Such laws are struck down only if they are arbitrary and capricious. For example, a law attempting to promote good citizenship by banning the teaching of foreign languages in elementary schools was struck down in *Meyer v. Nebraska* on these grounds.[109] Similarly, if the state's objective in passing the law is not sufficiently compelling to overcome a parental objection based on a

109. 262 U.S. 390 (1923).

freedom of religion claim it will be held void.[110]

CRD statutes could not be invalidated under either theory. These laws are narrowly drawn, requiring the use of an effective, readily available device designed specifically for the purpose of protecting children in motor vehicles, and are therefore not vulnerable to charges of arbitrariness or caprice. Nor could these laws, which are essentially traffic safety regulations, conceivably be subject to any objections based on religious grounds. In short, the statement that it is "fundamental . . . that parental rights must yield to the interest and welfare of the child"[111] would appear to be particularly uncontroversial when applied to the issue of highway safety.

Parental rights are based to a large extent on the broader claim of a right to privacy—the "right to be let alone."[112] This broader right itself is not unreasonably infringed upon by traffic regulations, as aptly pointed out by the Wisconsin Supreme Court:

> There is no place where any such right to be let alone would be less assertible than on a modern highway. . . . When one ventures onto such a highway, he must be expected and required to conform to public safety regulations and controls, including some that would neither have been necessary nor reasonable in the era of horse-drawn vehicles.[113]

Equal Protection. CRD statutes distinguish between children less than four years old and all other highway users. If a court were convinced that no rational basis existed for this distinction, it could void such legislation on the ground that it denies the public equal protection under the law. A statutory discrimination will not be invalidated, however, if any state of facts reasonably can be conceived to justify it.[114]

When reviewing CRD legislation, a court could rely on several supporting factors to sustain the legislature's classification. A court could find that members of the statutorily created class of children four years of age or younger face a greater risk of injury or death than do others in accident situations, are incapable of making ra-

114. Dandridge v. Williams, 397 U.S. 471, 485 (1970), *rehearing denied*, 398 U.S. 914 (1970).

tional choices to further their self-preservation, and are not afforded the same degree of protection by existing safety belts as are older passengers for whom such belts are designed.[116] Furthermore, although all legislatively imposed age restrictions are arbitrary to some extent, the class delineated by CRD legislation is not unreasonable since it corresponds to that class for which CRDs are designed and manufactured.[116] These factors could support a finding that a state of facts sufficient to justify the statutory distinction exists.

Finally, it should be noted that although all automobile passengers could benefit by mandatory seatbelt laws, the fact that such laws have not been enacted is insufficient to void CRD laws under the Equal Protection Clause. A law will not be invalidated for violating that Clause merely because the legislature has not "comprehensively remedied all problems at once—it is entitled to proceed one step at a time."[117]

In sum, CRD legislation is valid under both the "ends" and the "means" prongs of the police powers analysis. The state is operating in traditional areas when it seeks further highway and child safety, and no fundamental rights are threatened when the state mandates the use of appropriate equipment in attempting to attain that safety objective.

Civil Proceedings

Aside from the constitutional issues, the legal ramifications which could attend CRD legislation in certain civil cases remain to be examined.[118] Although the only two CRD laws currently in force expressly provide that a breach of their respective terms may not be

117. Bushnell v. Sapp, 194 Colo. 273, 280, 571 P.2d 1100, 1104 (1977).

118. CRD statutes could also have an impact on certain criminal proceedings, particularly vehicular homicide and vehicular assault cases. Drunk driving typically is a misdemeanor, but if death to another results, it may be filed as vehicular homicide, a felony. If a drunk driver collides with a vehicle in which an unsecured child is riding and the collision results in the death of that child, a decision to file a felony charge against the drunk driver may pose problems. In Colorado, for example, such a charge can be brought only against a person whose wrongful acts were the "sole proximate cause" of a highway death. Goodell v. People, 137 Colo. 507, 509, 327 P.2d 279, 280 (1958). If the child would not have died had he been properly secured in a CRD, then the failure to use that device would be another proximate cause of his death. Hence, felony charges could not be lodged against the drunk motorist.

The problem is not merely a speculative one, for prosecutors in Michigan have contacted state highway officials to seek advice on this particular issue. Telephone interview with David Shinn, Driver and Vehicle Admin., Mich. Dep't of State, July 1980.

raised in any civil action,[119] future enacting states may pass such laws without this limitation. The discussion below evaluates the impact which a CRD statute without a "no liability" clause could have in negligence lawsuits.

Civil Liability

Negligence per se. In the absence of CRD legislation, a suit for negligence brought on behalf of a child injured in an automobile accident against the child's driver would face serious obstacles. Typically, in order to support a negligence claim, the burden is on the plaintiff to establish by a preponderance of the evidence that the defendant owed him a certain standard of care, that the standard was breached, and that the breach was a cause of the harm suffered.[120] Without a CRD law in force the plaintiff's burden on the question of "standard of care" would be substantial. He would have to assume the burden of educating and persuading six or twelve peers from the community on the practicality and wisdom of CRDs. The fact that the community as a whole has shown little inclination to use child restraints indicates the size of the plaintiff's task in proving this element of the case.

Were a CRD-use law in existence, however, the mere fact of its enactment would greatly lessen the plaintiff's burden. In passing that law, the legislature would have established in specific language the appropriate standard of care which was owed by the defendant, and that question would be removed from the jury's consideration.[121] In other words, the plaintiff could show that the defendant acted negligently simply by showing that the defendant breached the statute. The only further burden the plaintiff would have in this negligence per se claim would be to show a causal link between the harm suffered and the negligent act or omission.[122]

As previously shown,[123] proof of causation should not be difficult, particularly if the child's injuries resulted from his ejection from the vehicle, or from his collision with some portion of its inte-

tempts to shift some of the responsibility for the harm done to the injured child to that third party, but no doctrine would provide this original defendant with complete immunity from liability. Contributory or comparative negligence statutes which limit or totally bar the payment of compensation to a plaintiff would be inapplicable to CRD related lawsuits. Those statutes apply only when the plaintiff has been shown to have contributed to his injuries by his own careless actions.[130] A pre-school aged child is, in many states, legally incapable of negligence,[131] and his failure to look out for his own safety cannot be raised as a defense in any suit in which that child is a plaintiff.[132]

Nor can the defendant obtain complete immunity from liability by claiming contributory negligence due to the carelessness of a plaintiff child's parents. The "doctrine that the negligence of the parents of a child of tender years shall be imputed to the child" was dismissed in one early case as "not only unsound, but absurd and inhuman,"[133] and that doctrine is universally rejected today.

The child's driver, on the other hand, stands a better chance of claiming immunity if he is brought into the negligence case as a third party defendant. If he is unrelated to the plaintiff he can seek to avoid liability under any guest statutes which exist in that state. These laws, which are no longer as prevalent as they once were, prevent a person from suing his "host" driver for any injuries sustained while riding as a non-paying passenger in that driver's vehicle.[134] The laws have been justified in part by an "assumption of the risk" type of theory and for that reason have often been held inapplicable to young children.[135] The child's driver has a much better chance of claiming immunity, and therefore of imposing the full cost of compensating the child on any other defendants, if he is the plaintiff

---

130. *See, e.g.*, COLO. REV. STAT. § 13-21-111 (1973 & Supp. 1979). such lawsuits will tend to preserve family harmony.[142] In any CRD related action, the plaintiff would necessarily be a very young child, incapable of maliciously plaguing his parents with lawsuits. The decision to bring a suit on his behalf will most likely be made by the child's parents, with an awareness that their liability insurer will be the true defendant. Under those circumstances, commencing an action is not evidence of a family's internal strife, but rather of the "provident management of its affairs."[143]

The invalidity of the first two arguments, which ignore the existence of liability insurance, must be conceded before credence can be given to the third argument: allowing children to sue their parents will lead to widespread collusion and fraud against insurance companies.[144] A trust in the jury system and its ability to distinguish between valid and fraudulent claims is the first step which must be taken to reject the argument. The courts have consistently reaffirmed that trust and have relied on juries to prevent injustice to insurance companies in automobile cases between husbands and wives[145] and between close friends.[146] No readily apparent reason exists for refusing to extend that trust to cases involving a parent and child.[147] Indeed, an attempt by a parent to defraud an insurance company in a case which centered on the lack of CRD use would be quite difficult. Because of his age, the plaintiff could not be an active participant in the scheme and could not be counted on to convincingly fake a nonexistent harm.

The strongest reason for abrogating parental immunity, at least under the limited circumstances of a CRD law, is largely unrelated

Re: House Bill 464 regarding child passenger restraints (Cato's bill)

Dear Representative Bussell:

In our telephone conversation on Friday, March 9th, you indicated you were philosophically opposed to such legislation as it interfered with the family's responsibility to care for their own children.

I disagree with this opinion for the following reasons:

Twenty percent of accidents in which unrestrained children are involved are actually caused by the child. Alaska Department of Highway Safety statistics show that 253 serious injuries and 9 deaths occur to children each year (1979 - 1981 data). This translates into approximately 50 serious injuries and 2 deaths caused because people are not acting responsibly by buckling in their children. Philosophically, I can permit you to swing your fist all you want as long as you don't hit anyone innocent. When your fist contacts my nose, that's no longer a matter of your relationship with your fist. That action then becomes a matter of public concern.

This is not a matter of inconvenience to the parents. This is smashed heads, crushed babies, bleeding, dying, agony! Education programs and seat loaner programs achieve only 15-19% compliance in many states that have tried this approach over many years.

Many children are killed and more children are maimed from riding in automobiles than any other risk. In fact, the second and third causes of death (congenital malformations, prematurity and sudden infant death syndrome) combined do not add up to the carnage produced by the automobile.

You, as a legislator, can do more to save lives than the combination of all the pediatricians in Alaska.

Your refusal to support this issue strongly is parallel to being passive regarding the murder of unborn children by the abortionists.

The pediatricians of Alaska, in their quarterly meeting March 8th, unanimously supported passage of House Bill 464. I look forward to hearing that you also support it.

Sincerely yours,

Clint Lillibridge

BRIEFING PAPER CS SB 163 (Rules)

The Department of Health and Social Services has two vested interests in seeing this bill enacted this session:

1) it will improve the health status of our children and
2) it will probably save the Department money.

Point No. 1. Regarding health status: Accidents kill and injure more Alaskan children than any other disease, infection, or condition. When we examine the specifics of these accidents using the tools of epidemiology and common sense it is clear that ~~the greatest~~ major reductions can be derived from occupant protection on our streets and highways. Child safety devices (car seats) have been available for 10-15 years. When properly used we know they save infants and children from death and injury in event of a crash or sudden stop.

Experience has shown that utilization of car seats improves somewhat with just education and loaner programs. But, the biggest improvements have been experienced only after enactment of mandatory child safety device legislation. Tennessee has led the nation in this mandatory approach. Their experience over a seven year period has demonstrated a 55% reduction of highway fatalities of children under 4 years of age, from an average of 15-20 deaths per year before mandatory usage to 6-10 deaths per year after enforcement. This enforcement has leveled off at approximately 4,000 citations per year in Tennessee. That is an average of one child's life saved for every 500 citations. Would your child's life be worth that investment?

According to the Michigan EMS Office, one year after a child passenger safety law went into effect in April, 1982, which required children under 4 years old to be restrained in approved passenger safety devices while travelling in automobiles, the death rate for children under 4 dropped 35 percent. A survey during this same period showed that use of child restraints rose from 6% to 82%.

An article in Pediatrics in 1981 reported a study by R.G. Schurtz in Washington State that showed when children under 4 are properly restrained in automobiles, deaths in crashes can be reduced by up to 90% and injuries can be reduced up to 63%.

The issue of protection of civil rights has been raised as an argument against passage of this bill. We submit the same argument, protection of an individual's rights, can be made for passage if you consider the child's rights, a child who cannot exercise his/her own right to health and growing up to be a productive citizen. If parents fail to protect the child's interests, then the state has an obligation to do so - particularly in an instance of this nature where the protection is cheap, not intrusive, and actually contributes to improved behavior of children.

At the recent meeting of the Regional EMS Coordinators and State Advisory Council on EMS in Juneau a couple of weeks ago, they unanimously endorsed legislation to require child restraints in automobiles. Emergency medical responders report that they have seen too many accidents in which small children were seriously injured or killed because they were not properly restrained in child passenger safety devices. One member reported a case in Fairbanks a couple of years ago where an infant was crushed in his mother's arms when she hit the dashboard in an auto crash. Any preventable death or serious injury is tragic, but it is even more tragic when this happens to an infant or small child, especially when it often can be so easily prevented.

According to the Insurance Institute for Highway Safety, 42 states have passed some type of child restraint legislation. Most states provide for citations if parents are transporting an unrestrained child in an automobile, but there usually is no fine if they prove they have obtained a child restraint device within a certain period of time. These laws are not meant to be punitive, rather, they are designed to protect the lives of small children who cannot look out for their own well-being. Furthermore, many parents still may not be aware of the hazards of transporting unrestrained children in cars. No doubt the mother in Fairbanks, whose infant died in her arms, would rather have had a citation, than a dead child. She probably didn't realize that carrying the infant in her arms was potentially lethal.

Point No. 2. Saving money: Please consider the out-of-pocket costs of passing this legislation versus the costs of your letting the bill die in this committee. ~~My~~ The Division of Public Health has the Handicapped Children's Program that covers medical expenses of chronic, handicapping conditions of children. For every death on the highway there are 10 serious injuries, some of which result in lifelong handicaps like cerebral palsy, mental retardation, seizures, and paralysis. ~~Our~~ The Handicapped Children's program and other third party payors (Medicaid, Insurance, Catastrophic Illness - all programs that are familiar to this body's finance committees) will likely have reduced expenditures if you pass this legislation.

A couple of the EMS Coordinators said they would rather see passage of this legislation than an increase in their budget this year. They felt that actions to prevent deaths and injuries are more important than spending more money on treatment, even though improved emergency medical treatment is extremely important.

We know of ~~no~~ few other public health programs which can have as great an impact immediately on saving lives or reducing disabilities in small children, and saving the state money at the same time, as legislation requiring child passenger safety devices.

SECTIONAL ANALYSIS: CS SB 163 (Rules)
An act relating to the use of child safety devices in motor vehicles

*Sec. 1 AS 28.05.095 is amended by adding new sections to read:

Sec. 28.05.095 CHILD SAFETY DEVICES.

(a) requires chilren under the age of seven to be properly secured while being transported in a motor vehicle in Alaska if

(1) in a front seat and under the age of four, in an approved child safety device (CSD)

(2) in a back seat and under the age of four, in an approved CSD or in a seatbelt

(3) between the age of four and six in an approved CSD or a seatbelt

(b) exempts the following vehicles and passengers

(1) mass transit vehicles (school bus,taxi, emergency vehicles etc.)

(2) off road vehicles (ATV's, snow mobiles, motorcycles etc.)

(3) children exempted by regulations under AS 28.05.096 (handicapped, disabled, or children with physical or medical conditions that preclude the use of standard restraining devices).

(4) when all seats equipped with seatbelts are occupied by passengers using the seatbelts

(5) when the motor vehicle is not equipped with seatbelts

(6) moter vehicles exempt under AS 28.10.011(11) - (areas in Alaska not connected to the state marine or road highway system, specifically northern and western Alaska).

(c) prohibits a person removing seatbelts from passenger vehicles in order to be exempted under (b) (4) or (5)

Sec. 28.05.096 EXEMPTIONS; ALTERNATIVE SAFETY DEVICES.

(a) permits the Commissioner of public safety to adopt regulations to exempt a child or class of children from the requirements of this bill if it's determined a CSD is impractical because of physical or medical conditions.

(b) permits the Commissioner to desginate alternative means of protection for children exempted under this section

Sec. 28.05.097 PENALTY.

(a) Any person convicted of violating AS 28.05.095 (a) or (c) is guilty of an infraction and eligible for a fine and demerit points against their driver's license unless

(b) they provide a peace officer, within 30 days of issuance of the citation, proof of purchase or acquisition and installation of an approved CSD. If the proof is provided within 30 days the citation is dismissed and no points are assessed under (a) of this section unless

(1) they have been convicted previously for violating that section by failing to provide a CSD or seatbelt

(2) they have been cited for failure to provide a CSD or seatbelt and forfeited the bail required by the citation; or

(3) provided the proof required by this subsection on a prior occasion

* Sec. 2. Effective date is one year after enactment.

MEMORANDUM

TO: Rep. Charlie Bussell
Chair, House Judiciary Committee

FROM: Sen. Vic Fischer

DATE: February 22, 1984

SB 163, a bill relating to the use of child safety devices (car seats), is currently before the House Judiciary Committee.

This bill is an important one for the children of Alaska and their parents. I believe it is the single most effective thing this legislature can do to address the greatest cause of death and serious injury to Alaska's children - automobile accidents.

In addition, it is a strong personal priority of mine. I would appreciate it greatly if you could schedule this bill for hearing before the committee at your earliest convenience.

Attached is back-up material for the committee. Please let me know if additional material is necessary.

Thanks.

Alaska State Legislature

Senate Committee on State Affairs

From: Senator Vic Fischer

Date: February 7, 1984

Re: SB 163 - an act relating to the use of child safety devices in motor vehicles in Alaska

Senate Bill 163 is before the Senate today and I ask for your support. I believe this bill is the single most effective thing we will do this session to protect the life, health and safety of our children.

As of 1984, Alaska remains one of the few states in the Union that has no laws pertaining to the use of child restraints in automobiles. A massive education and advocacy program has gone on nationwide over the last decade, spearheaded by physicians, pediatricians, and public safety officials. There are compelling reasons for this. Among them are:

* Automobile accidents kill more children under the age of five in the United States than are killed by the total of all major childhood diseases.

* Because children's bodies have a higher center of gravity (an infants head comprises over 20% of body weight as opposed to 10% in adults) an infant becomes a high speed projectile, head first, in any accident, even those at relatively low speeds (20 mph).

* Each year 4,300+ children under the age of five are killed in auto accidents and another 100,000 are injured.

* Infants, particularly young infants, are at greater risk of death in automobile accidents than any other passenger.

Statistics on motor vehicle accidents in Alaska are equally compelling.

* The number 1 cause of death in Alaska for ages 1-4 is accidents. The mortality rate for accidents in Alaska is 105% higher than the U.S.

* 40% of all accidental deaths in Alaska for ages 1-4 are due to motor vehicle accidents.

* In 1978 there were 137 fatalities in Alaska from motor vehicle accidents and 4,962 injuries. In all there were 15,030 motor vehicle accidents resulting in an economic loss of $20,136,864.00.

* The average lifetime medical costs for a head-injured child are a staggering $1,192,000! Virtually none of Alaska's citizens can afford that level of care, even with medical insurance. Subsequently, the state can expect to pick up the tab for medical costs for children needlessly injured in automobile accidents.

You may ask what can prevent such tragedy? The answer is specially constructed car seats. When used properly and consistently, these restraints can save 91% of the lives and prevent 78% of the injuries attributable to car accidents involving preschoolers. In spite of this, car seats or restraints are used for less than 7% of children under 4.

In response to this national tragedy, over 40 states have instituted child restraint laws in the last decade. These laws range from a polite request to criminal charges for failure to restrain children. In Alaska, we've chosen to take the "middle ground" in the form of SB 163.

WHAT SB 163 DOES

* Requires children age 1-4 to be restrained in an approved car seat (or in lieu of a car seat, restrained in a seat belt in a rear seat).

* Requires children age 4-6 to be restrained in an approved car seat or a seat belt.

* Violation of this act is treated as an equipment violation with points assessed against your drivers license. If a person cited for failure to comply with this act shows a peace officer (including village safety officers) proof of having purchased or installed an approved CSD within 30 days of the infraction, the citation is dismissed.

WHAT SB 163 DOES NOT DO

SB 163 does not apply to:

* A mass transit vehicle, a school bus, an emergency vehicle, a taxicab or other commercial vehicle.

* A motor vehicle designed for and used primarily off the highway (RV's).

* Vehicles that are not required to be equipped with seatbelts as original equipment.

* Children riding as passengers in a motor vehicle in which all seating positions equipped with seatbelts or child safety devices are occupied by other passengers using the seatbelts or devices. (in other words, SB163 does not require anyone to install additional seatbelts above and beyond what the vehicle is normally equipped with).

* Areas in Alaska not connected to the state road or marine

highway system, specifically Northern and Western Alaska.

WHY SB163 DESERVES YOUR SUPPORT

The leading cause of death to children age 1-4 in Alaska is automobile accidents. Seat belts and approved CSD's can be expected to reduce those deaths by 90% and to reduce injuries to preschoolers by 70%. The single most effective thing you can do to save the lives of children under age four is to see that every driver in Alaska uses child safety devices!

What those numbers mean in "real" terms is that there will be seven more children alive in Alaska the year SB 163 becomes effective than there will be without it. That's a pretty convincing argument to me.

Some more food for thought:

* In many states, extensive educational programs have been tried, with very little increase in usage. Education programs alone do not work.

* Use of a CSD will be more likely to save your child's life that all the immunizations, vitamin pills and preventative health care available to you.

* 20% of all motor vehicle accidents where children are passengers were caused by the children not being adequately and safely restrained while the vehicle was in motion.

* Your chances of being in a major vehicle accident is greatly increased by other drivers not adequately restraining their passengers.

* Most vehicle accidents in Alaska that result in serious injury or death occur in daylight, with dry roads and excellent driving conditions, within 25 miles of your home.

The legislature constantly deals with serious issues adversely affecting children in this state. Child abuse, assault, abandonment, disease, delinquency. All these issues literally keep us awake at night trying to find the best programs, adequate funding and trained staff to turn the tide of destruction and despair for Alaska's children. Funding for the above programs is considerable; funding for SB163 is nil.

Yet, as a legislator, the single most effective thing you can do to save Alaska's children from serious injury, dismemberment, and death is to vote for SB 163.

FROM: SEN. ADD. Cont.
2/21/84

EFFECTIVENESS OF CHILD SAFETY DEVICES (CAR SEATS)
IN PREVENTING DEATH AND SERIOUS INJURY TO CHILDREN UNDER SEVEN YEARS OLD

ILLINOIS

Law went into effect July 1, 1983. In 1982 3,485 children were injured in automobile accidents, 27 killed. For nine months of 1983 there were 2,471 injured and 6 killed.

TENNESSEE

Before Tennessee passed their child restraint law between 20-25 children died each year in automobile accitends. The law was enacted in 1978. In 1980 there were 14 deaths (none of the children were restrained) and in 1981 10 deaths (in which one of the children was in an approved child restraint device).

MASSACHUSETTS

Massachusetts instituted an education program for the use of car seats in 1979. In 1980 they instituted mandatory car seat laws.

Usage of seat restraints	Education Program	Mandatory
Age 1 year	41%	70%
2 years	22%	49%
3 years	12%	40%

WASHINGTON STATE

In Washington state from 1970-79 39,500 accidents in which children were passengers claimed 148 children's lives. For 6,300 of those accidents where children were restrained, 2 died. Of the remaining 33,200 where children were not restrained 146 died.

The death rate for unrestrained children was 13 times as great than for restrained children. Twenty percent of the unrestrained children were being held on an adult's lap but were killed. Nine out of every ten adults holding the child were not killed.

WISCONSIN

Legislation was passed in 1982 with penalties enacted in 1983. From January to July of 1983 head injuries to children under 4 in automobile accidents was down 19%. Wisconsin is currently in theprocess of applying the law to all persons transporting children from the present requirement for guardians and parents only.

*This survey was done using a child passenger protection laws summary prepared by the State Relations Department of the Motor Vehicle Manufactures Association and updated by the National Transportation Safety Board.

NATIONAL TRANSPORTATION SAFETY BOARD
WASHINGTON, D.C. 20594

SAFETY STUDY

Adopted: September 7, 1983

CHILD PASSENGER PROTECTION AGAINST DEATH, DISABILITY, AND DISFIGUREMENT IN MOTOR VEHICLE ACCIDENTS

INTRODUCTION

Motor vehicle accidents are the number one killer and crippler of children in the United States. Infants and small children riding as passengers in motor vehicles are especially vulnerable to death, disability, and disfigurement, even in minor accidents and noncrash incidents, such as sudden stops. Although it is estimated that most fatalities and injuries to infants and small children in motor vehicles could be prevented by the proper use of child safety seats, 1/ safety seat use remains low, and most children continue to be transported in motor vehicles without proper protection.

In 1982, because of its increasing concern about the continuing high levels of highway fatalities and injuries, the National Transportation Safety Board began a study of child passenger protection as part of an expanded effort to concentrate its highway accident investigations and its other activities on safety problems having high potential for success in reducing fatalities and injuries.

In mid-1982, the Safety Board launched a series of detailed investigations of accidents involving infants and small children. Fifty-three investigations were conducted in 19 States by highway accident investigators in four field offices located in Los Angeles, New York, Kansas City, and Atlanta, and in the Safety Board's Washington, D.C., headquarters. The investigations examined the use and crash performance of child safety seats as well as accident consequences to infants and small children who were not traveling in child safety seats. The accident investigations were not intended to produce statistically representative accident data. The Safety Board selected each accident individually to obtain cases which would permit investigation of potentially significant safety issues in motor vehicle transportation of infants and small children. 2/

The 53 accidents were identified with the assistance of State and local law enforcement agencies, State highway safety agencies, and other organizations, including Physicians for Automotive Safety, the American Academy of Pediatrics, the American Association for Automotive Medicine, the National Child Passenger Safety Association and some of its State and local chapters, the Highway Safety Research Center of the University of North Carolina, the University of Michigan Transportation Research Institute, the Rehabilitation Institute of Chicago, the National Safety Council and some State and local safety councils, and some of the National Accident Sampling System teams of the National Center for Statistics and Analysis of the National Highway Traffic Safety Administration, U.S. Department of Transportation.

1/ In this report, "child safety seat" is used generally to refer to any of a number of types of child restraint systems, which include infant safety seats, toddler safety seats, convertible child safety seats, booster seats, safety harnesses, and handicapped child safety seats. For a complete description of each of these types, see appendix D.

2/ Case summaries of the 53 accidents investigated for the study appear at appendix E. For ease of reference, the case summaries are organized by topic and are numbered 1 through 53.

On December 7, 1982, based on the preliminary results of its initial investigations, the Safety Board issued Safety Recommendations H-82-59 and -60 to the Governors or Governors-elect of 31 States and the Mayor of the District of Columbia. (See appendix A.) Safety Recommendation H-82-59 urged the adoption of child passenger protection laws requiring the proper use of child safety seats, and Safety Recommendation H-82-60 urged the adoption of comprehensive, statewide child passenger safety programs. When the recommendations were issued, 19 States had passed child passenger protection laws requiring safety seat use. In the next 7 months, 22 more laws were enacted, bringing the nationwide total to 41 child passenger protection laws in 40 States and the District of Columbia. (Additionally, Pennsylvania enacted a law on November 1, 1983. Data hereinafter do not reflect this additional law.)

In early 1983, the Safety Board held regional public hearings in Dallas (January 13, 1983), Philadelphia (February 4, 1983), and St. Louis (March 24, 1983), on the problem of child passenger safety. The hearings were held to gather information for the public record and to increase public awareness of the problem of child motor vehicle deaths and injuries and the importance of proper child passenger protection. Testimony was received from 54 witnesses, including families of children involved in crashes, accident investigators and law enforcement officials, pediatricians and other medical personnel, highway safety and accident prevention specialists, and State legislators. (See appendix B.)

This report presents the findings and recommendations of the Safety Board's child passenger protection study. The report presents investigative results; illustrates the problem of deaths and injuries of infants and small children in motor vehicle accidents and the benefits of proper use of child safety seats; identifies misuse of child safety seats as a significant problem in accidents; identifies other problems and issues developed in the accident investigations; identifies a need for improvements in child passenger safety laws and programs; identifies elements for inclusion in an effective child passenger protection law; and includes further recommendations to reduce child passenger fatalities and injuries.

BACKGROUND

In the United States, more infants and small children under 5 years old are killed or crippled while riding as passengers in motor vehicles than the total killed or crippled by the seven common childhood diseases that children are immunized against. Motor vehicle accidents are the number one traumatic cause of epilepsy, and are a major traumatic cause of mental retardation and spinal cord injury in children. In the last 5 years (1978 through 1982), nearly 3,400 child passengers under 5 years old were killed in traffic accidents, 3/ and more than 250,000 more were injured. Most of these deaths and injuries are preventable; up to 90 percent of the fatalities and 67 percent of the disabling injuries could have been prevented by the proper use of child safety seats. 4/

3/ Fatal Accident Reporting System data base, National Center for Statistics and Analysis, National Highway Traffic Safety Administration, U.S. Department of Transportation (See appendix C, "Child Passenger Fatalities by State, Age 0 through 4, 1978-1982").

4/ Robert G. Scherz, M.D., "Summary of Statistics on the Children Age 0-15 Years Who Were Passengers in Motor Vehicles Involved in Accidents," Washington State Seat Belt Study 1970-77, Mary Bridge Children's Health Center, Tacoma, Washington, 1978; and Robert G. Scherz, M.D., "Restraint Systems for the Prevention of Injury to Children in Automobile Accidents," American Journal of Public Health, Vol. 66, No. 5, May, 1976.

Child car seats have been available for some 50 years as a means of keeping children confined, supported, and elevated for better behavior and a better view from windows in motor vehicles. However, it has only been in the last 10 to 15 years that the injury prevention potential of child safety seats has been recognized and more fully developed as a result of the efforts of concerned physicians and engineers, initiatives by individual manufacturers, and the adoption of a Federal safety regulation.

Child safety seats are specially designed to prevent the infants or small children riding in them from striking the vehicle interior during a collision or sudden stop. In a head-on collision into a brick wall or a tree at 30 mph, the car stops almost instantly, but the occupants inside continue traveling forward at 30 mph, or 44 feet per second. Unless restrained by some means, the car's occupants will collide with brutal force into whatever object is in front of them — the instrument panel, windshield, steering wheel, or seatback. Previous accident investigations by the Safety Board have shown that a frontal collision into a tree can be fatal to an unrestrained adult at speeds as low as 19 mph. 5/

Modern child safety seats are designed to provide more protection for infants and small children than a standard vehicle safety belt. They work by using a safety harness or protective shield, or both, to distribute the crash forces over a larger area of the child's fragile body than a safety belt, and to cushion the body to a stop before the child can strike the vehicle interior.

Federal Safety Standard

All child safety seats marketed in this country must meet the requirements established by the National Highway Traffic Safety Administration (NHTSA) in Federal Motor Vehicle Safety Standard (FMVSS) 213, 6/ Child Restraint Systems, which became effective April 1, 1971. Through the efforts of Consumer's Union and concerned health and safety professionals, FMVSS 213 was later upgraded to include stricter requirements for safety seats manufactured on or after January 1, 1981. Currently FMVSS 213 requires that safety seats be dynamically tested in a simulated 30-mph frontal crash using a test dummy representative of a 6-month-old infant or a 3-year-old toddler (convertible safety seats must be tested with both dummies). During the tests, the forward movement of the dummy's head and knees and the amount of force exerted on the head and chest are measured. To pass the test, the seats must not allow such forces to exceed certain limits. Safety seats and booster seats which require use of a tether strap must pass both a 30-mph crash test with the tether strap used and a 20-mph "misuse" test without use of the tether strap. Safety seats designed with a nonprotective front armrest also must pass a misuse test at 20 mph with the harness unfastened and only the armrest in front of the dummy.

FMVSS 213 also requires that safety seat manufacturers label their products with certain basic instructions for use and that they provide a place on the safety seat where the complete, detailed usage instructions may be stored. The label must identify the manufacturer and must contain a statement warning the user that failure to follow the instructions exactly "can result in your child's striking the vehicle interior during a sudden stop or crash."

6/ Code of Federal Regulations, Title 49, Part 571, Section 571.213, U.S. Government Printing Office, Washington, D.C., 1982.

Although many child restraint systems have been certified under FMVSS 213 for motor vehicle use, few have received the approval of the Federal Aviation Administration (FAA), which specified additional testing requirements for child restraint systems for use in aircraft. 7/ In a February 24, 1983, recommendation letter (Safety Recommendation A-83-1) to the FAA, the Safety Board expressed its concern that the extremely limited availability of FAA-approved child safety seats not only limits the opportunity for children to be protected adequately during air travel, but also discourages families traveling by air from taking their child safety seats with them for motor vehicle use before and after the air travel portion of their trips.

To increase the availability of child safety seats for use before, during, and after air travel, in August 1983 the NHTSA began rulemaking action to combine the existing FMVSS 213 requirements and the separate FAA requirements into a single standard administered by a single agency. 8/ To speed certification of child restraint systems for use in both motor vehicles and aircraft, the NHTSA also began a program to test the ability of current child restraint systems to meet the FAA requirements for aircraft use.

Public Education and Safety Seat Loan Programs

Between the mid-1960's and the late 1970's, efforts to increase public awareness of the problem of child passenger safety spread from individual pediatricians and other concerned physicians to a wide variety of organizations. As early as 1963, two out of five pediatricians were counseling parents on the need to protect their children in motor vehicles; 9/ by 1978, the American Academy of Pediatrics began to expand its ongoing support for these efforts by developing a national "First Ride, A Safe Ride" program. The program, which was developed to encourage child safety seat protection for small children beginning with the newborn's first motor vehicle trip (usually the trip home from the hospital), was officially launched in 1980.

Some of the earliest organized efforts to educate the public about child passenger protection were undertaken by Physicians for Automotive Safety, a national organization now based in Armonk, New York. Through its efforts, child passenger safety education programs for new parents had been established in a number of hospitals throughout the country by the early 1970's, and with its help, concerned parents in Seattle, Washington, founded a national organization, Action for Child Transportation Safety (ACTS), in 1972. ACTS developed educational brochures, pamphlets, films, slides, posters, and bumper stickers; encouraged the development of public education programs in many communities throughout the country; and with funding from the NHTSA, ACTS developed an "Early Rider" educational curriculum for health professionals. After 10 years of active public service, ACTS was dissolved as a national organization due to financial and other reasons.

By the mid-1970's public education programs were being conducted by many hospitals, community volunteer and civic organizations, and State public health and highway safety agencies. Safety seat loan programs also were established by hospitals,

7/ On May 28, 1982, the FAA issued Technical Standard Order (TSO) C-100, Child Restraint Systems. The intent of this TSO is to describe the minimum performance requirements for infant and child restraint devices permissible for use on aircraft as "approved" seats.

8/ NHTSA Notice of Proposed Rulemaking, "Child Restraint Systems for Use in Motor Vehicles and Aircraft," Docket No. 74-09, Notice 13, Federal Register, Vol. 48, No. 158, August 15, 1983, pp. 36849-53.

community groups, and public agencies to encourage safety seat use by making them widely available at nominal cost. The NHTSA sponsored two series of regional workshops during the 1970's to improve coordination and communication among the various groups involved and to foster the sharing of information about effective approaches to child passenger safety. Public education efforts also were supported at the Federal level by the U.S. Department of Health, Education and Welfare, which had developed printed materials to guide parents in selecting child safety seats as early as 1967. 10/

In 1981, the National Child Passenger Safety Association (NCPSA) was formed as a national non-profit organization dedicated to working with individuals, organizations, and government agencies to ensure the right of every child to protection against death or injury while being transported as a passenger in a motor vehicle. Its national headquarters is located in Ardmore, Pennsylvania, and it is affiliated with State and local child passenger safety associations throughout the country. NCPSA also serves as a central national clearinghouse to assure the uniformity and accuracy of child passenger safety information disseminated to safety and health professionals, legislators, and the public.

Public education and safety seat loan programs were effective in increasing safety seat use, especially when both programs were conducted together, 11/ but these programs alone were unable to bring about usage increases of the magnitude necessary to achieve proper protection for the majority of infants and small children nationally. While programs in some communities achieved significant increases in safety seat use, most children under 5 years old continued to be transported unrestrained even by safety belts, which are found almost universally in automobiles. 12/

Child Passenger Protection Laws

To increase the use of child safety seats and safety belts by infants and small children and reduce child passenger fatalities and injuries more effectively, most States have adopted a legislative approach. As of July 1, 1983, 40 States and the District of Columbia had enacted child passenger protection laws to "immunize" infants and small children against death, disability, and disfigurement in traffic accidents (see figure 1). Twenty-seven were already in effect on that date, and the remainder were scheduled to go into effect on various dates between then and July 1, 1984.

UNRESTRAINED INFANTS AND SMALL CHILDREN—UNSAFE AT ANY SPEED

Case 15: About 6:55 a.m. on April 16, 1983, a 1974 Chevrolet Chevelle sedan was traveling about 25 mph on a four-lane boulevard in Paramount, California, when the driver of a pickup truck approaching from the opposite direction attempted to make a left turn across the path of the Chevelle. The driver of the Chevelle braked sharply but was unable to avoid colliding into the right front of the pickup truck. The Chevelle was occupied by an 18-month-old girl seated on a fold-down center front armrest, her mother, who was driving, and her grandmother, who was seated in the right front. All three occupants were unrestrained and were thrown forward and to the left on impact. The mother and grandmother in the Chevelle and the driver of the pickup truck received minor injuries. The 18-month-old girl struck the windshield with her head, the instrument panel with her chest, and the gear selector lever with her neck. She died of multiple injuries within 10 hours after the accident. (NTSB Investigation No. LAX83HCR13)

Accident investigations conducted by the Safety Board show that it is extremely dangerous for an infant or small child to ride without proper protection in a motor vehicle at any time, under any circumstances. In the 23 accidents investigated involving unrestrained infants and small children, 18 children were killed and 9 were injured, including infants as young as 8 days, 5 weeks, and 7 weeks old. 13/ Most of the accidents were not severe, and other (older) occupants of the same vehicle, while injured, survived.

The accidents which killed or injured unrestrained infants and small children included minor accidents and cases of severe braking without a collision on city business or residential streets, as well as more serious crashes on highways. Some of the children were killed or seriously injured on routine trips as little as 50 yards from the family's home while going to or returning from shopping, taking a child to a babysitter's, traveling to a local restaurant, going to visit grandparents or other relatives, driving a friend or relative to work, or taking the children out for ice cream.

The investigations illustrate that, far from being less subject to the risk of death or injury, unrestrained infants and children are more likely to be killed or to suffer severe injuries if they are being held in the arms of an adult or if they are ejected from the vehicle. Virtually all fatal and serious injuries to unrestrained children in the accidents investigated were head or spinal injuries resulting from being propelled into the instrument panel, windshield, or other interior surfaces, and from contacts with other unrestrained occupants. These injuries are common to all unrestrained infants and children. In addition, unrestrained children being held in the arms of an adult are often crushed into the instrument panel or other interior surfaces by the weight and acceleration of the adult holding them. Further, unrestrained infants and children who are ejected from the vehicle suffer collisions with exterior surfaces, such as another vehicle or the pavement, or are crushed by the vehicle's overturning on top of the child (in addition to injuries sustained from contact with the vehicle interior before or during ejection).

13/ The accidents involving unrestrained infants and small children were Cases 1-18, 25, 27, 29, 30, and 38.

The investigations show also that an unrestrained infant or small child is in danger of being killed or injured in certain common, everyday driving incidents even if the vehicle is not involved in a crash. Such noncrash incidents include sudden stops, swerves, turns, and children falling from moving vehicles.

In addition, unrestrained children can cause accidents which endanger not only the children involved and other occupants of the vehicles in which the children are riding, but other motorists, their passengers, pedestrians, and bicyclists.

The Vulnerability of Infants and Small Children to Fatal or Serious Injury

Medical witnesses heard by the Safety Board in the regional public hearings on child passenger safety identified several reasons why infants and small children are more likely to be killed or injured even in minor accidents or noncrash incidents. According to pediatricians and specialists in pediatric surgery and pediatric emergency medicine, infants and small children have less built-in anatomical protection against injury. Muscle mass, which provides some protection in adults, is less well-developed. The skull of an infant or small child is thin and soft, and an infant has an open fontanelle, or boneless area, which does not close until late in the first year of life. The ribcage of an infant or small child is flexible and offers less protection for the chest and upper abdominal organs. The spine also is less protected and susceptible to injury. Consequently, infants and small children are subject to a significantly higher risk of serious head, spine, chest, and abdominal injury in accidents than are older passengers. In infants and small children, the head is also large and heavy in relation to the body, resulting in a higher center of gravity. In an accident, the infant or small child is likely to be catapulted through the air toward the vehicle's point of impact head-first as a helpless "unguided missile" or human torpedo, into a violent collision with the vehicle interior.

When infants and small children are propelled against the vehicle interior, they do not benefit as much as adults from padding and energy-absorbing materials which, if they are provided, are placed in areas more likely to be contacted by adults. Infants and small children also are more likely to contact the protruding controls, knobs, door handles, window cranks, and ashtrays usually found on the instrument panel, doors, and seatbacks. Finally, injured children do not show symptoms of injuries in the way that adults do, and their injuries are more difficult to diagnose and treat effectively.

According to testimony given in Philadelphia by the President of Physicians for Automotive Safety:

> In a crash, children are projected so frequently head-first, helpless missiles striking unyielding interior surfaces, or worse, are ejected from the car, sustaining so frequently irreversible brain damage. More American children have been rendered paralyzed, epileptic, or mentally retarded by car accidents than by any other trauma or crippling disease. Considering the rather delicate aspects of infant and child anatomy -- skin, torso, skeletal weaknesses — the devastating injuries to [unrestrained] children in traffic accidents should be no surprise.

Children Riding in the Arms of Adults—The Most Dangerous Way to Travel

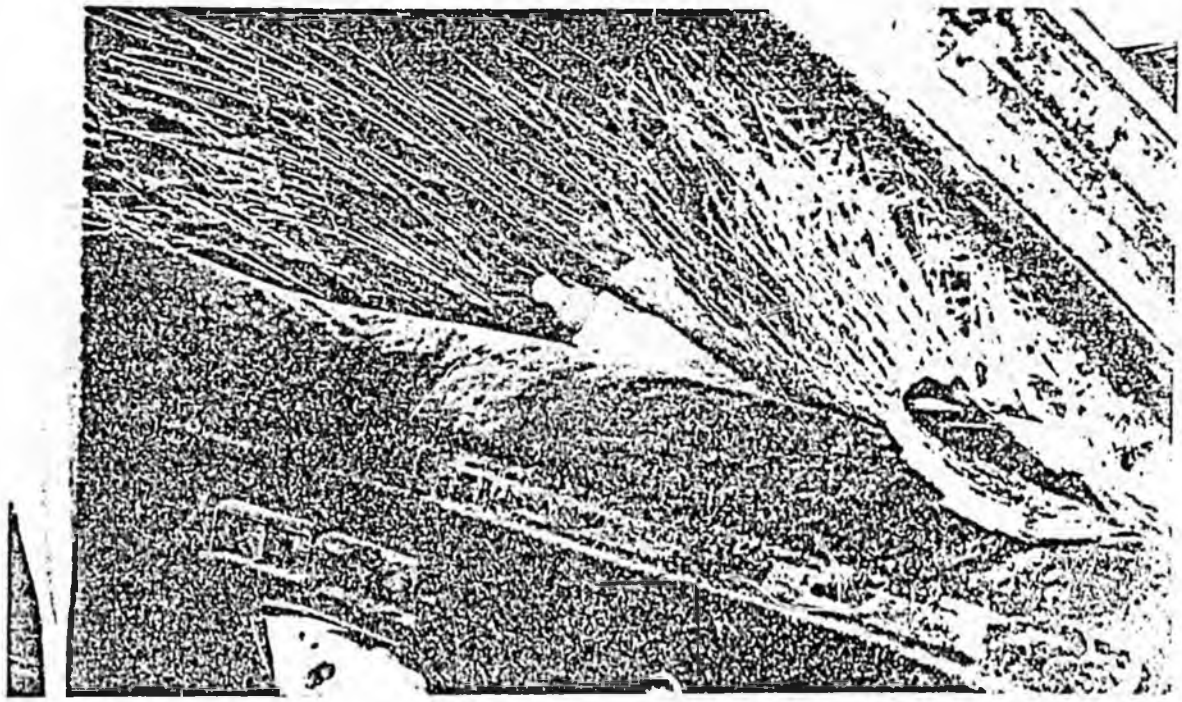

Figure 2.—Head-on Collision on July 27, 1982, near Addison, New York.

Case 1: About 5:15 p.m. on July 27, 1982, a Dodge sedan traveling on a two-lane State Route near Addison, New York, crossed the yellow centerline and collided head-on with a Ford sedan. The Dodge was occupied by three adults and two infants, all of whom were in the front seat unprotected by safety belts or child safety seats. The infants, ages 5 months and 15 months, were riding in the laps of their parents. The two infants were crushed into the dashboard by the weight and acceleration of their parents' bodies and died of massive head injuries. (See figure 2.) The parents and the driver survived with moderate injuries. (NTSB Investigation No. NYC82HCR05)

Case 2: About 5:28 p.m. on November 2, 1982, a Subaru station wagon occupied by a man, his wife, and their 5-week-old baby was traveling about 32 mph on East Riverside Drive in Austin, Texas, when it was struck head-on by a Ford sedan that crossed the centerline traveling about 57 mph. At the time of impact, the infant was being held in the arms of his mother while her husband drove. The mother and father, who were not using safety belts, received minor-to-moderate injuries. The 20-year-old driver of the Ford, who was charged with driving while intoxicated, received bruises on both legs. The baby was crushed into the dashboard by the weight and acceleration of his mother's body and died at the hospital from massive head injuries. (NTSB Investigation No. MKC83HCR02)

Eight of the accidents investigated involving 10 infants held in the arms of adults or of another child passenger illustrate why this is one of the most dangerous ways for infants or small children to travel in a motor vehicle. In these four frontal collisons and four side impact accidents, the 10 adults who were holding infants in their arms were unable to protect them from harm. Nine lap-held infants ranging in age from 5 weeks to 15 months were killed, and one infant survived with head and facial injuries.

The investigations show clearly that a mother's arms (or the arms of any person) are not a safe place for an infant in a motor vehicle. In a 30-mph collision, a 20-pound infant who is unrestrained can generate a propelling force of 300 to 600 pounds. Experiments have shown that even a restrained adult cannot hold onto and protect a lap-held infant in a moderate collision, and that many adults may not be able to protect a lap-held infant even in a minor collision. 14/ If the adult is unrestrained, the lap-held infant is subject to being crushed against the vehicle interior by the adult's body, which, being heavier, can generate a propelling force of several thousand pounds in a moderate accident.

In the frontal collisions, the six adults who were holding infants in their arms not only were unable to protect them, the adults also increased the severity of the injury to the infants. At least four of the infants were crushed into the dashboard or windshield by the bodies of the adults who were holding them, causing massive, fatal head injuries to the infants. In one accident, a lap-held infant was killed, although another infant who was lap-held in the rear seat received relatively minor head and facial injuries from being thrown into the rear of the front seatback. In all four frontal collisions, the lap-held infants who were killed were the only fatalities in the vehicle. None of the adults holding infants who were killed in frontal collisions received more than minor or moderate injuries because the infants cushioned the impact of the adult with the vehicle interior. In two cases, the infant's mother or grandmother reported that the baby was "still in my lap" or they were "still holding" the baby after the crash. Both infants were fatally injured by being crushed into the instrument panel.

In the side impact collisions, infants were propelled from the arms of the persons holding them and received fatal injuries from contact with the vehicle interior (or in one case, from being crushed by the vehicle after ejection).

The accidents investigated did not include any cases of a safety belt being fastened around both the adult and the infant in the adult's lap, although the Safety Board would expect this also to produce very severe crushing forces on the infant in a crash.

Increased Risk of Death for An Unrestrained Child Ejected from the Vehicle

Case 7: About 12:30 a.m. on July 26, 1982, a 1976 Chevrolet sedan occupied by a young couple and their two-year-old daughter who were returning home after a weekend visit to the child's grandmother was traveling on a two-lane State Route in Maddox, Maryland, when the driver failed to negotiate a curve and the vehicle ran off the road. The Chevrolet sideswiped a utility pole, severed a wooden signpost, and descended a 4-foot embankment, sliding on its side until it rolled over completely and came to rest on its wheels in a soybean field. The two unrestrained adults received minor injuries. The 2-year-old girl, who was sleeping unrestrained on the rear seat, was ejected from the vehicle and died of massive head injuries. (NTSB Investigation No. NYC 2HCR03)

14/ D. Mohan and L. Schneider, "An Evaluation of Adult Clasping Strength for Restraining Lap-Held Infants," Human Factors, Vol. 21, No. 6, The Human Factors Society, Inc., 1979.

Case 8: About 6:25 p.m. on November 28, 1982, the driver of a 1982 Oldsmobile Custom Cruiser station wagon was cresting a hill on the New York Thruway when he saw the brake lights of vehicles stopping and colliding on icy pavement ahead and attempted to stop. The station wagon skidded first to the left, then to the right on the slight downgrade and struck the rear of a vehicle with its left side, shattering the left rear side window. The Oldsmobile was traveling about 27 mph when the impact occurred, and the vehicle it struck was traveling about 10 mph. The Oldsmobile was occupied by two adults in the front seat and their two children, who were sleeping on top of the folded down rear seatback which formed part of the station wagon's rear cargo area. The two restrained adults received minor injuries. The father, who was wearing a lap/shoulder safety belt in the driver's seat, sustained a strained shoulder and the mother, who was wearing a lap/shoulder safety belt in the right front, sustained a strain of the lower right leg. The two unrestrained children, ages 3 and 5 years old, were ejected from the cargo area through the shattered left rear window of the station wagon, struck the roof and hood of the other vehicle, and collided with the pavement. They slid on the ice and came to rest on the roadway and shoulder about 50 feet ahead of the vehicles' point of rest. Both children sustained multiple injuries, including fatal head injuries probably received when they struck the pavement. (NTSB Investigation No. DCA83HCR03)

A particularly serious hazard to unrestrained infants and small children in accidents, in addition to their being propelled into violent collisions with the vehicle interior and other occupants, is ejection from the vehicle. Ejection increases the potential for additional injury from windshield and window glass and collisions with the pavement, other vehicles, and other exterior objects, thereby compounding injury severity and further reducing the chances of survival. In five accidents investigated by the Safety Board, six unrestrained children under 5 years old and one 5-year-old were ejected from the vehicle during collision impacts or overturn (Cases 7-11). All but one of the children ejected were fatally injured. An additional accident involving a child seated on a safety seat in which he was not restrained by a safety harness or shield resulted in ejection with fatal injury (Case 42).

The only child ejected who was not fatally injured suffered serious injury in a minor accident (Case 9) in which the only other occupant of the vehicle, an adult who also was unrestrained, remained in the vehicle and escaped without injury. The 3-year-old boy who was ejected sustained a concussion and facial and knee abrasions from contact with the vehicle interior, and a fractured elbow. The boy's collision with the pavement probably contributed to the severity of his head injury.

One of the accidents involving ejection (Case 11) was an extremely severe head-on collision with a tractor-semitrailer. Two children who were unrestrained in the rear seat of the case vehicle and one unrestrained adult in the front seat were ejected and fatally injured. The unrestrained driver was thrown into the rear seat and remained in the vehicle, but was fatally injured. While the proper use of child safety seats probably would have prevented ejection and might have enabled the two children to survive, data on the performance of child safety seats under such extremely severe impact forces are insufficient to support a finding as to the probability of the children's survival in this accident had they been properly restrained. In this case, the possibility of the children's survival, even with proper use of child safety seats, was compromised by the unrestrained driver being thrown into the rear seat.

In their testimony in the regional public hearings, doctors and law enforcement officers cited other accidents involving ejection of children with fatal or severe consequences. One mother's testimony described an accident in which her unrestrained 3-year-old son was ejected and killed, while her unrestrained 22-month-old daughter remained in the car and survived, although she was severely injured. (See appendix F.)

Noncrash Incidents — Unrestrained Children Killed or Injured During Swerves, Turns, and Sudden Stops

Case 12: About 2:30 p.m. on October 28, 1982, a mother, her two children, and their grandmother were departing a local convenience grocery store in Mt. Vernon, Kentucky, to return home. The grandmother was driving her 1973 Chevrolet station wagon, and the children's mother was seated in the right front. Her 4-month-old daughter was properly harnessed in a child safety seat in the center front, and her 4-year-old son was in the rear seat. As they drove away from the store, the boy was standing up, leaning over the front seatback and playing with his sister. Suddenly, as the station wagon was negotiating a slight left curve, the 4-year-old boy fell to the pavement through the right rear door when it opened for undetermined reasons. Before his grandmother could stop the station wagon, the boy had been run over and fatally injured by the right rear wheel. (NTSB Investigation No. MKC83HCR01)

Three investigations of noncrash incidents highlight one of the most tragic and least recognized kinds of accidents that can occur to unrestrained child passengers -- the kind that involves no crash or external impact but results in death or injury to an unrestrained child. Each noncrash incident investigated involved a child either falling from a moving vehicle or being propelled into the windshield in a sudden stop.

In Case 43, a 2-month-old infant fell to the roadway when the partially open right front door swung wide as his mother backed the car into the road in back of their house. The infant was run over by the right front wheel of the car and fatally injured. Because the infant had been seated in a child safety seat with the harness not fastened and the safety seat not secured to the vehicle, the infant was considered unrestrained.

Case 13 involved a driver who made a sudden stop to avoid collision with another vehicle that made an unexpected maneuver. Although he was traveling only 25 to 30 mph, the driver was powerless to protect his unrestrained 4-year-old son. The boy was thrown head-first into the windshield and sustained moderate head and facial injuries, although the vehicle was not involved in a collision and no other person was harmed. In each noncrash incident investigated, the proper use of either a child safety seat or a safety belt would have prevented the child's death or injury.

Pediatricians and surgeons testified in the public hearings that in their professional experiences, cases of unrestrained children injured in noncrash incidents are common. One doctor described the case of a 6-month-old infant riding in his mother's lap, who was fatally injured in a sudden stop when his head was crushed against the instrument panel by his mother's body. No one else was injured in the incident. Evidence suggests that at least one out of every four or five children injured while riding as passengers in motor vehicles is injured in a noncrash incident. Moreover, because nonfatal, noncrash incidents typically are not reported to or investigated by police, more than 20 percent of all injuries to child passengers may not be included in motor vehicle injury statistics. 15/

15/ Phyllis F. Agran, M.D., M.P.H., "Motor Vehicle Occupant Injuries in Noncrash Events," Pediatrics, Vol. 67, No. 6, American Academy of Pediatrics, June 1981.

In the course of normal law enforcement activities, law enforcement officers have significant opportunities to identify usage errors, to provide the user information as to how misuse errors can degrade safety seat performance, and to encourage corrective action. Data on safety seat use and misuse in actual crashes, which could be collected in police traffic accident reports and could be included in a State's traffic accident data system, are needed to identify the kinds of problems that are occurring, as a basis for adjusting child passenger safety programs to combat those problems more effectively. Some jurisdictions have conducted training for police on safety seat use, and an increasing number of jurisdictions have tried to improve the occupant restraint data collected in accident investigations and to ensure that limited child safety seat data are collected and reported to the traffic accident data system. Generally, however, these kinds of activities have been limited. In virtually all Safety Board-investigated accidents which involved safety seat misuse, the misuse was not identified in the police report of the accident.

Another reason for police training to identify safety seat misuse is that, in some cases, news reports relying on police-reported information will report that a child was killed in a safety seat in an accident, without reporting, for example, that the safety harness was not fastened around the child and that the child was, in effect, unrestrained. One accident investigated by the Safety Board in North Carolina (Case 3) was originally reported as involving an infant killed in a safety seat. The investigation established that the safety seat was being carried loose and unused in the rear of the car when the accident occurred. The prompt identification of safety seat misuse (or nonuse) in accidents can help to avoid unintentionally misleading media reporting, which may undermine the public education efforts undertaken by State and local jurisdictions.

Improving Safety Seat Design, Instructions, and Labeling.—The misuse problems identified in the accidents investigated by the Safety Board indicate that it is absolutely essential that safety seat design and instructions for use of safety seats be as simple, clear, and precise as possible. However, trained professional highway accident investigators familiar with child safety seats and their use found that instructions accompanying many safety seats involved in the accidents were complex, imprecise, confusing, and not clearly illustrated. This was especially true for convertible models where the thresholds specified for conversion from forward-facing to rear-facing orientation and for changes between infant and toddler harness routing were variously specified in terms of when a child can sit upright by himself, a height or height range, a weight or weight range, or a sitting height (which requires a special measurement exclusively for this purpose). In some cases, two different standards were used, and, in one case, the instructions specified the use of a cushion under the child "if the child sits too low in relation to the shield" without any guidance for determining how low is "too low."

In one study 23/ of factors affecting the acceptance and use of child safety seats, "observations made during the study concerned the role of the marketplace and Federal regulation in adversely affecting the design of child restraints. Marketing reactions to the preferences of ill-informed consumers have sometimes encouraged cumbersome and uncomfortable systems with "something in front," to the exclusion of innovations in the form of harness-only and other systems." The study concluded that child safety seat designers "need to concentrate on obvious, simple systems that accommodate real children."

23/ Kathleen Weber and Nancy Polchik Allen, "Child Restraint Systems: Factors Affecting Their Acceptance and Use," The HSRI Research Review, University of Michigan Highway Safety Research Institute, Ann Arbor, May-June 1982, Vol. 12, No. 6.

Some recent revisions of instructions have resulted in improvements. For example, Questor Juvenile Furniture Company made significant improvements in instructions issued with one of its safety seats, including improvements which were suggested by the findings of one of the Safety Board's first accident investigations for the child passenger protection study (Case 43). The instructions were revised with the assistance of a child passenger safety consultant engaged for that purpose. Some manufacturers also have begun to use labels on the safety seat to identify correct safety belt routing locations. These kinds of initiatives can help to make the correct locations readily identifiable, even when the detailed usage instructions are not available or are not used.

FMVSS 213 requires that child safety seats have an instruction label attached to the safety seat itself, and that a more detailed instruction booklet be furnished with the safety seat. However, in the accidents investigated, labels of some of the safety seats had been torn off or were missing, wrinkled and difficult to read, or abraded. In some cases involving misuse, including cases involving children who were killed or injured, the family did not have any instructions because they were not included with the seat when it was purchased second-hand at a yard or garage sale or when it was handed down by a friend or relative. Misuse appeared to be a prevalent problem in these cases, and some of the seats were incomplete, with part of the harness missing, when they were acquired. The family did not have the detailed usage instructions and did not realize that the safety seat was not complete.

SAFETY BELT USE BY SMALL CHILDREN

Case 52: About 11:45 a.m. on November 25, 1982, a 1979 Ford sedan occupied by a 17-year-old driver and his 18-month-old niece was traveling on a 2-lane U.S. highway near Cynthiana, Kentucky, when the Ford crossed the centerline in a curve and collided head-on with a 1981 Oldsmobile sedan. The unrestrained 17-year-old driver of the Ford sustained fatal head, neck, and chest injuries. The 18-month-old girl, secured by an adult lap safety belt in the center front seating position, sustained minor injuries which included facial abrasions and a laceration of the upper lip. (NTSB Investigation No. ATL83HCR01)

Emphasis on the need for special protection for infants and small children may have led to an incorrect perception that safety belts do more harm than good to children in crashes. 24/ At a time when more children are riding in safety seats than ever before, nearly all infants and small children who are not riding in safety seats are being transported completely unrestrained — without even the use of available safety belts -- and the use of safety belts by older children is rare. 25/ There appears to be a need to develop a better public understanding of the benefits and limitations of safety belt use by children both to encourage greater use of child safety seats and other child restraint systems for superior protection, and to reduce the incidence of children being transported unrestrained when safety belts are available.

24/ Physicians for Automotive Safety, "Safety Belts OK for Small Children," PAS News, Rye, New York, Fall 1982 - Winter 1982-83.

25/ James L. Nichols, Ph.D., Effectiveness and Efficiency of Safety Belt Usage Programs: the Safety Potential of Safety Belts, Child Restraints, and Programs to Promote Their Use, National Highway Traffic Safety Administration, U.S. Department of Transportation, January 1982.

Testimony at the public hearings and other research and accident data from several countries 26/ indicate that children of all ages (including infants) generally are safer in crashes if they are wearing safety belts, especially in the rear seat, than if they are unrestrained. Pediatricians and surgeons testified that adult safety belts can prevent the ejection of children, which would be likely to result in fatal or severe injury, and can prevent or reduce the occurrence of fatal and serious head injuries, irreparable brain damage, and other serious injuries which may be suffered by unrestrained children who are thrown against the vehicle interior or other passengers in a crash. Safety belt use also can be expected to be virtually 100 percent effective in preventing child fatalities and injuries in noncrash incidents. 27/

The limitations of safety belt use by children are known in a general sense, but have not been fully crash tested in the laboratory, or fully documented in actual crashes (largely because safety belt use by children is rare). Several decades of medical research beginning in the 1920's identified unique anatomical characteristics of infants and small children. In the 1950's and 1960's researchers examining the question of effective crash protection for children emphasized that infant and child anatomy differs from that of adults in a number of ways which make the use of adult safety belts less effective in protecting infants and children than adults. 28/ The increasing recognition of the need for more effective protection designed specifically for children led to the development of child safety seats and other child restraint systems. The medical evidence that is available and limited data on crash injuries to safety-belted children indicate that while safety belts prevent ejection and prevent or reduce impact injuries to children from contact with interior vehicle structures, safety belt-induced injuries can occur. The risk of these kinds of injuries to children appears to be significantly greater for infants, and generally appears to decrease with age. 29/ However, it is important to stress that this risk is less than the risk of transporting children unrestrained.

Parents and others transporting infants and small children need to be encouraged to at least use safety belts to protect child passengers who otherwise would be transported unrestrained. At the same time, crash test studies and further accident research are needed to provide the public, legislators, and others with better information about the benefits and limitations of safety belt use by children at various ages so that informed choices can be made about child passenger protection. Data currently available are inadequate to answer questions about the relative degree of safety provided by a safety belt to a child at various ages, what the limitations are, and the kinds of results that can be expected in crashes. There is a need especially for a greater understanding of the interaction of safety belts with the body regions where they can be expected to localize

crash forces — the pelvis, abdomen, spine, chest, and neck — at different stages of child anatomical development.

Proper child passenger protection for older children also remains a problem. Motor vehicle accidents are the leading cause of death for children at all ages after the early weeks of life. In 1982, nearly 3,500 children ranging from age 5 to age 17 were killed in traffic accidents in the United States. In passenger cars and trucks only, during the last 5 years nearly 18,500 child passengers from age 5 through age 17 were killed in traffic accidents. (See appendix H.) Although substantial progress is being made in improving the safety of child passengers under age 5, little or no progress has been made in the protection of children age 5 and older. Currently, virtually none of the 41 child passenger protection laws are designed to foster the transition of children from safety seat use to safety belt use. A notable exception is the State of New York, which in 1983 enacted legislation which, in each of the next 4 years, gradually will extend the age requirements for mandatory safety seat or safety belt use until children through the age of 9 years will be covered effective April 1, 1987.

Moreover, there is no evidence that use of child safety seats leads to safety belt use later, after a child outgrows conventional safety seats. In the accidents investigated by the Safety Board, 14 child passengers ranging from age 5 to age 17 were unrestrained, including at least two who had traveled in child safety seats until they had outgrown them. Ten of the older children were injured, two fatally. In two other accidents, two children who outgrew their safety seats at age 3 or 4 also were unrestrained when the accident occurred, and both children were killed. Children, beginning when they are too large to use conventional safety seats, need to be protected by either safety belts or booster seats designed for motor vehicle crash protection.

There is a potential for misuse of both booster seats and safety belts. Virtually all booster seats require the use of a tether strap and safety harness unless the seat is used in conjunction with a lap/shoulder safety belt. Considering the results of surveys indicating that failure to install and use a tether strap with conventional safety seats which require them is a common problem, similar problems may be encountered with the use of booster seats. Crash test results for a booster seat used with a lap belt only, without the required shoulder harness or tether strap, suggest that greater injury can occur in a crash than would occur to a child using a lap belt only, and there may be a greater potential for head injury. 30/

While concern about potential neck injuries to small children using an adult shoulder belt passing across the neck are considered by some researchers to be generally unfounded, 31/ one study of children in crashes found that adult safety belts did not provide adequate protection to children when the safety belt was fastened loosely. 32/ Crash tests have identified significant potential for serious injury when a single lap safety belt is fastened around two children. In the tests, the bodies of the dummies collided with each other. 33/

In one accident investigated by the Safety Board (Case 53), a 3-year-old girl was sharing a single lap/shoulder safety belt with an adult in the right front seat. The child also was out of position on impact, with her head and shoulders lying across the adult's lap. The child sustained moderate head and facial injuries, including a concussion, contusions and abrasions, from striking the unpadded area of the lower right instrument panel. The adult passenger also received moderate injuries.

Another accident investigated by the Safety Board (Case 41) involved a lateral right side impact to the vehicle with secondary impact in the right front. A 4-year-old girl was restrained by a lap-type safety belt in the left rear, next to a 2-year-old boy seated in a forward-facing convertible child safety seat in the right rear. The 4-year-old girl weighed 32 pounds and was 38 inches tall. On impact, her upper body was propelled toward the right, and her head contacted the tubular steel frame of the safety seat, causing fatal injury. The 2-year-old boy in the safety seat sustained minor facial abrasions from contact with the side of the safety seat. The unrestrained driver sustained severe injuries. In this accident, the 4-year-old girl probably would have survived if she had been properly protected by a child safety seat, which would have restrained the movement of her upper torso and head and probably would have prevented any contact with the safety seat in the right rear. However, the accident indicated that further improvements may be needed in child safety seats through additional padding or other means to minimize the injury potential from an unrestrained or lap-restrained occupant contacting a safety seat installed in the vehicle.

THE ECONOMIC COSTS OF CHILD PASSENGER DEATHS AND INJURIES

In addition to the tragic human costs of crash consequences to unrestrained children and their families in terms of fatalities, pain and suffering, physical and mental disabilities, psychological trauma, and the loss of human potential, significant economic costs are paid not just by the families involved, but by virtually all Americans. The total bill for these costs (and the share paid by each citizen) is not well documented because there is no system for collecting these cost data on any broad scale. However, there are indications that the costs are considerable. Moreover, the expenses are paid, directly or indirectly, by every State and Federal taxpayer; everyone who pays premiums for automobile, health, or life insurance; and everyone who pays a hospital bill.

Testimony presented at the Safety Board's public hearings included some indications of the kinds of costs that can be involved when a child is killed or injured in a motor vehicle accident. Doctors and other health profes ·als from several parts of the country testified that the cost of a single emergency room visit for a child with very minor injuries who is treated and released immediately typically would be about $50 (less than the cost of most safety seats), or up to about $200 if a few x-rays or routine tests are necessary. For minor injuries requiring hospitalization, the cost would run several hundred dollars for each day in the hospital, with additional costs for tests x-rays, medications, and followup examinations after discharge.

One review 34/ examined the cases of 12 children between 12 months old and 4 years old who were injured in motor vehicle accidents and treated at St. Louis Children's Hospital in Missouri during one 6-month period. The average hospital stay was 2 weeks, and the costs incurred during their hospitalization alone ranged from $936 to $26,839,

34/ Greg Echele, Director of Community Services Development, St. Louis Children's Hospital, "Case Examples: Cases Treated at St. Louis Children's Hospital Who Were Involved in Automobile Accidents and Survived," unpublished summary.

with an average cost of $6,226. It was estimated that the medical costs for 20 percent of the children were paid by Medicaid funds from Missouri and Federal tax dollars.

In a typical example of a seriously injured child with a broken neck, witnesses testified that the injury would require approximately 21 days in an acute care hospital at a cost of about $600 per day, and an additional 4 months care in a rehabilitation hospital at a cost of approximately $78,000, for a total cost of more than $90,000 (not counting any additional costs which might be expected following hospitalization).

As an indication of the kinds of costs that can be incurred for treatment of children severely injured and disabled in auto accidents, one witness cited an actual case of a patient treated at the Rehabilitation Institute of Chicago and Northwestern Children's Memorial Hospital, which together constitute the largest of the 17 spinal cord injury treatment centers in the United States. 35/ The patient, an 18-day-old girl, was injured in a low-speed collision while taking her second car ride with her grandparents. She was cradled in the arms of her grandmother and on impact was crushed by her grandmother's body, resulting in a brain stem contusion. Three years after the accident, the child was still believed to be cortically blind, and she had not been able to ingest food or breathe for herself.

From the time of her injury to her first birthday, the baby was kept alive by life support systems in the intensive care unit of Children's Memorial Hospital. When she was discharged, the hospital costs were $450,000. At that time she was brought home, where she receives continuous nursing care and must be on a ventilator most of the day.

Before she was 3 years old, the child's care had cost $700,000. Her parents raised more than $15,000 of that amount and their insurance company paid the rest. At an annual cost of more than $100,000 for the child's continuing medical care and rehabilitation, the $1 million limit on the insurance policy was expected to be reached before the child's sixth birthday.

Although this is an extreme example, it is not an isolated case. Another medical witness cited the case of a child who has now been hospitalized for nearly 10 years as a result of a spinal cord injury suffered in a motor vehicle accident, and whose care has cost more than $1 million. 36/ These kinds of cases, and many others involving medical costs of hundreds of thousands of dollars, occur annually.

Besides the economic costs of injuries to children in crashes and noncrash incidents, other evidence suggests that substantial additional costs result from accidents caused by unrestrained children. One study of a majority of the reported accidents which occurred

in North Carolina during a 5-year period identified 748 accidents caused by unrestrained children. 37/ The accidents occurred when the children either interfered physically with the driver or the vehicle controls, or distracted the driver by falling onto the floor or by moving around the car, etc. Besides the occupants of the vehicles in which the unrestrained children were riding, the accidents involved 562 other persons (other motorists, their passengers, bicyclists, or pedestrians) and resulted in 1 fatality, 572 injuries, and costs of at least $4.1 million. The study found that all the accidents could have been prevented if the children had been properly restrained. In 309 other accidents which resulted in costs of $1.5 million, the information about the accidents was insufficient to determine whether or not the accidents were preventable.

CHILD PASSENGER PROTECTION LAWS—BENEFITS, LIMITATIONS, AND LOOPHOLES

The first child passenger protection law in the United States was enacted in Tennessee in 1977 as the result of a campaign led by pediatricians. Effective January 1, 1978, the law required that children through age 3 be properly protected by a child safety seat when transported by the child's resident parent or legal guardian in a vehicle owned by the parent or legal guardian. The law established a fine of $2 to $10 for violation. The Tennessee law also included an amendment which permitted a child to be held in the arms of an older passenger in lieu of being protected by a child safety seat. The amendment was known as the "Babes in Arms Amendment," but later became known as the "Child Crusher Amendment" after some 13 infants and small children were killed in accidents in Tennessee while riding in the arms of other passengers. The amendment was repealed in 1981. 38/

After enactment of the law, a 3-year public information and education program was begun with funding from the Governor's Office of Highway Safety and the NHTSA. The purpose of the program was to inform the public about the requirements of the law and to provide public education through a campaign which included brochures, billboards, posters, public service announcements, and news media reporting. A child safety program was conducted by the Tennessee Department of Public Health with the goal of establishing safety seat loan programs throughout the State in all 95 county health departments.

Initially, oral warnings were given to violators, then law enforcement officers began to issue citations; aggressive enforcement did not actually begin until September 1979. The Tennessee Highway Patrol in the Department of Safety also developed a positive enforcement policy under which all 800 Highway Patrol cruisers were equipped with child safety seats for troopers to loan to violators on-the-spot. The seats were to be returned at the time of the court appearance, and if the violator could show at that time that a safety seat had been acquired, the law enforcement agency would ask the court to waive the fine and court costs. Although thousands of citations were issued, virtually all

Council, Highway Safety Research Center, University of North Carolina, "Warning: In Cars, Children May Be Hazardous to Their Parents' Health: The Role of Restraints in Preventing Collisions," Proceedings of the Twenty-Fourth Conference of the American Association for Automotive Medicine, AAAM, Morton Grove, Illinois, 1980.

38/ Testimony of Robert S. Sanders, M.D., before the National Transportation Safety Board, Public Hearing on Child Motor Vehicle Passenger Safety, Dallas, Texas, January 13, 1983; and Robert S. Sanders, M.D., "Legislative Approach to Auto Safety: The Tennessee Experience," in A.B. Bergman, ed., Preventing Childhood Injuries, Report of the Twelfth Ross Roundtable on Critical Approaches to Common Pediatric Problems, Ross Laboratories, Columbus, Ohio, 1982.

violators appeared in court with the required proof, and the assessment of a fine was extremely rare. When given a citation, violators frequently thanked Highway Patrol Troopers for their concern and assistance. In terms of fostering good law enforcement-community relations, the enforcement policy was considered the most effective public relations activity in the history of the Tennessee Highway Patrol. 39/

Child safety seat usage rates in Tennessee began to increase after enactment of the child passenger protection law. After the public information and education and safety seat loan programs were established to support the law, usage rates reached 29 percent, or more than triple the prelaw average of 9 percent. However, the impact of the law and the support programs on usage was considered to have been weakened to some extent because for the first 3 years citizens could also comply with the law without safety seat use by having children ride in the laps of their parents or other passengers. 40/

Before the Tennessee law was enacted, 20 to 25 child passenger fatalities occurred yearly in the State in the 3-and-under age group covered by the law. After the law's enactment and the supporting enforcement, public information and education, and safety seat loan programs were put in place, child passenger fatalities in that age group dropped to 15 in 1980, 10 in 1981, and 6 in 1982. While the reductions may have been affected somewhat by other factors (such as changes in the accident exposure of this age group), the reductions are considered to be attributable primarily to the child passenger protection law and support programs.

In the 5 years following enactment of the Tennessee law, other States gradually began to enact similar legislation, and those States are beginning to report similar results. For example, during the first 10 months after the North Carolina law went into effect child safety seat use by children under age 2 increased from 30 percent to 46 percent and an estimated 8 deaths and 23 serious injuries were prevented. 41/ Since the Rhode Island law became effective on April 1, 1981, Rhode Island has not reported a single child passenger death in the 3-and-under age group covered by the law. During the first 9 months the Michigan law was in effect, total child passenger casualties (fatalities and injuries combined) in the 3-and-under age group covered dropped by 31 percent compared to the same period the previous year, while adult motor vehicle occupant fatalities dropped only 10 percent.

All 41 child passenger protection laws which had been enacted in the United States by mid-1983 contain provisions which define and limit their applicability. While some limitations are necessary, others have the effect of excluding children from the

protection of the law unnecessarily. Consequently, the laws fail to place a clear prohibition on transportation of children unrestrained. Accident investigations illustrate the gaps created by four kinds of limitations: those on the adults responsible for complying with the law; those on the children who must be protected; those based on "personal needs" exemptions; and those which restrict the enforcement of the law. (See Summary of Child Passenger Protection Laws at appendix G.)

Adults Responsible for Compliance

On September 4, 1982, in an accident near Winston-Salem, North Carolina, a 9-month-old girl riding in her grandmother's lap was killed, along with her grandparents (Case 3). A child safety seat that was being carried loose and unused in the rear of the car was ejected during impact and was found lying next to the car after the accident. If the baby had been riding properly secured in that safety seat, rather than riding in her grandmother's lap, she probably would have survived the accident. North Carolina's child passenger protection law had been in effect for 2 months when this accident occurred. The law applies to every driver required to have a North Carolina driver's license when transporting his or her own child under age 2 in his or her own motor vehicle; it does not apply to transportation of children by any other person, including grandparents, other relatives, or friends.

Laws in 33 States, expressly or indirectly, restrict the applicability of the law to residents of the State, or to drivers of vehicles registered in the State, or both. In 16 jurisdictions, the law applies to the child's parent or legal guardian only, and 11 of those laws are further limited to motor vehicles owned by the parent or legal guardian. Three laws are limited to drivers who regularly and customarily transport a small child, and two provide exceptions for use of a temporary or a substitute vehicle.

The effect of these limitations in many cases is to exclude infants and small children from the protection of the law because the person transporting them is not subject to the law. The limitations may have been made for reasons that seemed valid at the time of enactment -- for example, out of concern that having to purchase a child safety seat would be an unreasonable financial burden for persons other than a child's parent or guardian, or for nonresidents who were not subject to similar requirements in their own State. Now, however, four out of five States either already have a child passenger protection law in effect or will have one in effect by mid-1984, and more laws are expected to be enacted by the remaining States. Rather than excluding from the coverage of the law children in nonparental driving situations and allowing them to be transported with no protective restraint, some States, such as California, provide a safety belt option. Under the California law, the child passenger protection requirement may be met by use of either a safety seat or a safety belt in a nonparental driving situation or when a parent is driving someone else's vehicle.

Children Not Required to be Protected

Many children also are excluded from the protection of the law by provisions which limit applicability only to certain children based on age, weight, height, or some combination thereof. The laws vary considerably, with 3 covering children through 1 year old only, 2 extending through age 2, 20 through age 3, 10 through age 4, 4 through age 5, 1 through age 9, and 1 which applies to children 40 inches or less in height. Some laws provide exemptions for children whose weight meets or exceeds 40 pounds or who obtain a physician's certificate indicating that safety seat use is impracticable due to the child's size or weight, or medical reasons. Others provide a safety belt option, rather than an outright exemption, based on age, size, or weight.

In some of the accidents investigated, children who were not covered by an existing child passenger protection law were not using any protective restraint and were killed or injured. For example, in Mt. Vernon, Kentucky (Case 11), an unrestrained 4-year-old boy who was fatally injured in a nonerash incident when he fell from a moving vehicle was 42 inches tall — 2 inches taller than the maximum height specified by the Kentucky law for mandatory safety seat use. This law requires the superior protection provided by a safety seat until a child outgrows it, and then does not require any protection at all.

In an accident in Herkimer, New York (Case 8), a 3-year-old girl and her 5-year-old brother, both unrestrained, were ejected from the family station wagon, collided with another vehicle and the pavement, and were fatally injured. Both children almost certainly would have survived, probably with little or no injury, if they had been wearing safety belts. However, the New York child passenger protection law in effect at that time covered children only through age 4, and, thus, did not apply to the 5-year-old boy. The law did apply to his 3-year-old sister; however, she was 42 inches tall and had outgrown her safety seat. The New York law was amended in 1982 to include a safety belt option for 4-year-old children, but the option was not extended to 3-year-olds too large to use conventional safety seats. In other accidents investigated by the Safety Board involving infants and small children, 10 other unrestrained children over 4 years old were killed or injured. Safety belt options provide a means of extending child passenger protection requirements to older children who are not covered by existing laws as well as to children who cannot use conventional safety seats because of their size or weight.

Exemptions for Nursing, Diapering, or Other "Personal Needs"

An accident which occurred November 2, 1982, in Austin, Texas, involved a young mother who was nursing her 5-week-old son in the front seat of their 1974 Subaru while her husband was driving. All three occupants were unrestrained. A drunk driver traveling in the opposite direction in a 1968 Ford sedan suddenly veered across the centerline and collided head-on with the Subaru. The baby's father was seriously injured and the mother sustained moderate injuries. The 5-week-old baby was crushed into the instrument panel by the weight and acceleration of his mother's body and died of massive head injuries.

Since Texas had not enacted a child passenger protection law, it was not unlawful for the baby not to be properly protected by a child safety seat while he was being nursed by his mother. This practice also would not have been unlawful in five of the States that do have child passenger protection laws. In the five States —Georgia, Michigan, North Carolina, Tennessee, and South Carolina — a child does not have to be properly protected when the child is being nursed, and some of the exemptions extend to situations when an adult is attending to a child's "personal needs" or when a child "has any distress which makes it impractical to use a child restraint system."

"Personal needs" exemptions are based largely on convenience and do not adequately protect the child's health and safety. The exemptions may encourage or perpetuate a false notion that it is somehow "safe" to transport a child without proper protection if the child is being nursed or diapered. However, the Austin, Texas, accident shows that it is dangerous for a child to travel without proper protection while personal needs are being accommodated, even for a brief period. If a child has a personal need which cannot be attended to while the child is properly restrained, it should not be attended to while traveling in a moving vehicle.

Enforcement Limitations

The intent of child passenger protection laws is positive, rather than punitive. As one witness testified in the public hearings, child passenger protection laws are "education with teeth." 42/ Their purpose is to encourage the safe transportation of children and, especially, to encourage families to obtain and use child safety seats to protect infants and small children properly. Consequently, most laws provide that the fine specified for violations either must or may be waived upon showing proof that a child safety seat has been obtained. While the existence of a child passenger protection law in itself serves an educational function, the law must be enforced to be fully effective.

The child passenger protection laws of two States — Arizona and New Mexico -- do not permit law enforcement officers to stop a vehicle solely for the purpose of enforcing child passenger protection requirements. In effect, law enforcement officers in those States are prevented from enforcing the child passenger protection law even when a particularly hazardous situation, such as a child riding in the lap of a driver or passenger or standing in a moving vehicle, is observed, unless the officer has another reason for making a stop (such as a violation of another law). The child passenger protection laws of three other States — Kansas, Kentucky, and Oklahoma — do not provide any penalty for violations, and instead restrict enforcement action to the issuance of an oral or written warning which may be accompanied by printed educational materials provided to violators.

Even in States which do not have such restrictions, law enforcement agencies in many cases may not be conducting an active enforcement campaign. While much of the focus of child passenger safety efforts has been concentrated on the passage of legislation and the development of public information and education programs, there is a growing recognition that the implementation of the laws, and especially their enforcement, has not received sufficient attention. An increasing number of jurisdictions are finding that the passage of a child passenger protection law is just the beginning, and that a considerable amount of effort is required for effective planning and coordination of its implementation.

In addition to the law enforcement training discussed previously, a critical element of implementation is the training and education of law enforcement officers in the positive role that they have in enforcing a child passenger protection law. It cannot be assumed that individual officers and their superiors will automatically be supportive and committed to enforcing a child passenger protection law in the absence of such training and of a written enforcement plan.

The National Child Passenger Safety Association is concerned about the implementation of child passenger protection laws and is in an excellent position to assist the States in identifying implementation problems and developing effective implementation programs which would address the need for effective law enforcement plans and training, public information, education and safety seat loan programs, the evaluation of the effectiveness of such laws and programs, and efforts to combat safety seat misuse.

42/ Testimony of Robert S. Sanders, M.D., before the National Transportation Safety Board, Public Hearing on Child Motor Vehicle Passenger Safety, Dallas, Texas, January 13, 1983.

TOWARD FURTHER ADVANCES IN CHILD PASSENGER SAFETY: ELEMENTS OF AN EFFECTIVE CHILD PASSENGER PROTECTION LAW

Based on the foregoing analysis, the Safety Board believes that to prevent or reduce more effectively the needless death, disability, and disfigurement of children in motor vehicle accidents and nonerash incidents, child passenger protection laws should incorporate the following major elements.

A. Age and Type of Protection

1) For infants and children through 4 years old whose height does not exceed 40 inches and whose weight does not exceed 40 pounds, require use of a child safety seat or other child restraint system; for a child 1 year old or older transported by a person other than his or her parent or legal guardian, or in a vehicle which is not owned by the parent or legal guardian, permit use of a safety belt, preferably in the rear seat, in lieu of a child safety seat.

2) For infants and children through 4 years old whose height exceeds 40 inches or whose weight exceeds 40 pounds, require use of a safety belt, preferably in the rear seat, or a child restraint system, such as booster seat, which is appropriate for the child's height and weight.

3) For all children age 5 and older, require use of a vehicle safety belt or a child restraint system, such as a booster seat.

4) Exceptions: a) when restraint use would be inappropriate for medical reasons or during an emergency; or b) when the number of passengers exceeds the number of seating positions equipped with safety belts, if all safety belts are in use and if preference in use of restraints is given to children.

B. Person Responsible for Child's Protection

The driver is responsible, except when the child's parent or legal guardian is present in the vehicle.

C. Vehicles Subject to Child Passenger Protection Requirements

All vehicles equipped with safety belts at the time of manufacture or currently equipped with safety belts.

D. Specific Prohibitions

1) Temporarily unrestraining a child for nursing, feeding, or diapering.

2) Using household infant carriers or home booster chairs not designed for motor vehicle crash protection.

3) Leaving a child under age 5 secured in a child safety seat or child restraint device in a vehicle that is unattended by an adult.

E. Acceptable Child Safety Seats and Child Restraint Systems

Those which meet applicable Federal Motor Vehicle Safety Standards in effect at the time of manufacture.

F. Proper Use Required

1) A child safety seat or other child restraint system must be used exactly in accordance with the manufacturer's instructions.

2) A safety belt must be used properly, according to the instructions of the vehicle manufacturer.

G. Penalty for Noncompliance

1) An appropriate fine, which may be waived for the first violation upon provision of proof that a child safety seat or other appropriate child restraint system has been acquired within a period of time established by the law.

H. Enforcement

Evidence of violation is sufficient cause for enforcement without the occurrence of a separate violation of law or other prerequisite.

I. Evaluation

Ongoing or periodic evaluations of effectiveness of State law, including measurements of the degree of compliance, the degree of misuse of child safety seats, the degree of enforcement, and accident consequences to restrained and unrestrained child passengers.

CONCLUSIONS

1. It is extremely dangerous for an infant or child to be transported in a motor vehicle without proper protection at any time, under any circumstances.

2. An infant or child in a moving vehicle cannot be restrained and protected properly by being held in the arms of another passenger, which adds the danger of the child being crushed against the vehicle interior by the weight and acceleration of the body of the holder in an accident, and increases the risk of fatal or serious injuries to the child.

3. Ejection of an unrestrained child from a vehicle increases the danger of fatal or serious injury from striking the pavement, other vehicles, or other exterior objects, in addition to the danger of injuries resulting from contact with the vehicle interior before and during ejection.

4. Children riding unrestrained in a motor vehicle are in danger of being killed or injured even if the vehicle is not involved in a crash; death or injury can result from common driving maneuvers, such as sudden stops, turns, swerves, or from the unrestrained child falling from a moving vehicle.

5. Household infant carriers and home booster chairs are not designed to provide any protection for children in motor vehicle accidents and cannot be relied upon to do so.

6. Child safety seats, when used properly according to the manufacturer's instructions, can provide excellent protection against the death or serious injury of children in motor vehicle accidents.

7. A second essential element of child passenger protection is that all other vehicle occupants be properly restrained to prevent fatal or serious injury to a child from violent contact with unrestrained occupants propelled by crash impact forces.

8. Misuse of child safety seats appears to be a significant and widespread problem. While in some kinds of accidents, a misused safety seat may still provide some protection, misuse can reduce or totally negate the protection provided by a safety seat.

9. The most prevalent misuse problem encountered in the Safety Board investigated accidents was the failure to use or to correctly anchor the tether on safety seats which require a tether and which rely on its use for effective crash performance. In almost every case where a tether was required, it was not used, and when it was used, it was sometimes tied to some part of the vehicle, rather than being properly secured to an anchor installed for that purpose.

10. Two of the most safety-critical misuses uncovered in the accidents investigated were the failure to fasten the safety seat harness around the child (or not securing it snugly) and the failure to use the vehicle safety belt (or failure to fasten it in the correct place on the safety seat) to secure the safety seat tightly to the vehicle. In the accidents investigated, these errors allowed infants and small children to be propelled from the safety seat, or both the safety seat and the child to be propelled together, against the vehicle interior.

11. Additional safety seat design improvements may be needed to prevent injury to a restrained or unrestrained vehicle occupant resulting from contact with a safety seat installed in the vehicle.

12. The possibility of developing abdominal load and neck load criteria, anthropomorphic dummies, and dynamic test procedures for certification of child safety seats should be explored by the National Highway Traffic Safety Administration through further research and developmental crash testing.

13. To combat the problem of misuse of child safety seats, additional action is needed to place special emphasis on the misuse problem in child passenger safety public education programs and in safety seat loan programs, to train law enforcement officers to identify misuse in their enforcement and accident investigation activities, to identify through accident data the kinds of misuse problems that are occurring in accidents, to determine their magnitude, and to simplify safety seat design and improve manufacturers' usage instructions and labels.

14. Many children are cut off from the benefits of child passenger protection laws by statutory provisions which unnecessarily limit the scope of the law in terms of the adults responsible for compliance, the children covered by the law, and the circumstances in which the law applies.

15. Virtually none of the child passenger protection laws enacted as of mid-1983 are designed to foster the transition of children from safety seat use to safety belt use; the vast majority of the laws require that a child be provided the superior protection of a safety seat until age 1, 2, 3, 4, or 5 (often with a safety belt option at the upper end of that age range), but permit a child to be transported without any protection whatsoever after the maximum age specified.

16. The proper use of safety belts by infants and small children, although not as effective as the proper use of safety seats in preventing death or injury, should be encouraged for those driving situations in which a child at any age would otherwise be transported unrestrained.

17. Crash test studies and accident data are needed to evaluate the use and crash performance of safety belts by small children, to better identify injury prevention benefits and limitations, and to provide guidance to legislators and the public.

18. The economic costs of motor vehicle deaths and injuries to unrestrained children (and adults) in the United States are paid by all American citizens through higher taxes for police services, emergency medical services, medical care and rehabilitation, public health and highway safety programs to reduce child fatalities and injuries, and special education for the handicapped; through higher hospital costs; and through higher insurance premiums.

19. Accidents caused by unrestrained children endanger the health and safety of other motorists and their passengers, pedestrians, bicyclists, and others, and result in substantial additional costs to taxpayers and consumers.

RECOMMENDATIONS

As a result of its Safety Study of Child Passenger Protection Against Death, Disability, and Disfigurement in Motor Vehicle Accidents, the National Transportation Safety Board made the following recommendations:

--to the Governors and legislative leaders of Alaska, Idaho, Iowa, Louisiana, South Dakota, Texas, Utah, Vermont, Wyoming, American Samoa, Guam, Puerto Rico, and the Virgin Islands:

> Enact legislation requiring the proper protection of children traveling in motor vehicles, following as closely as possible the elements set forth by the National Transportation Safety Board in its Safety Study, "Child Passenger Protection Against Death, Disability, and Disfigurement in Motor Vehicle Accidents." (Class II, Priority Action) (H-83-49)
>
> Include, as part of a statewide child passenger safety program, public information and education activities specifically aimed at combating misuse of child safety seats. (Class II, Priority Action) (H-83-50)

--to the Governors and legislative leaders of Alabama, California, Connecticut, Delaware, Florida, Illinois, Kansas, Kentucky, Massachusetts, Michigan, Minnesota, New York, North Carolina, Ohio, Rhode Island, Tennessee, Virginia, West Virginia, and Wisconsin:

> Include, as part of a statewide child passenger safety program, public information and education activities specifically aimed at combating misuse of child safety seats. (Class II, Priority Action) (H-83-51)

--to the Governors and legislative leaders of Arizona, Arkansas, Colorado, Georgia, Hawaii, Indiana, Maine, Maryland, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Dakota, Oklahoma, Oregon, South Carolina, Washington, and the Mayor and Chairman of the Council of the District of Columbia:

Include, as part of a statewide child passenger safety program, public information and education activities specifically aimed at combating misuse of child safety seats. (Class II, Priority Action) (H-83-52)

--to the National Highway Traffic Safety Administration:

Expedite the issuance of a final rule requiring that newly-manufactured vehicles under 10,000 pounds gross vehicle weight be equipped with tether anchorages or predrilled holes for the installation of such anchorages at all rearmost seating locations. (Class II, Priority Action) (H-83-53)

Examine the consequences in accidents of nonuse and misuse of tether straps with safety seats requiring use of tether straps to determine whether such safety seats should be required to meet all the requirements of Federal Motor Vehicle Safety Standard 213, Child Restraint Systems, without the tether strap attached. (Class II, Priority Action) (H-83-54)

Examine the incidence of nonuse and misuse of a tether strap with child safety booster seats when used in a rear vehicle seat and the consequences in accidents of such nonuse or misuse to determine whether the advantages offered by such booster seats outweigh the disadvantages. (Class II, Priority Action) (H-83-55)

Amend Federal Motor Vehicle Safety Standard 213, Child Restraint Systems, to require that child safety seats and other child restraint systems include on their certification labels, information for obtaining a replacement copy of the manufacturer's detailed instructions for use. (Class II, Priority Action) (H-83-56)

Conduct research and developmental crash testing to explore the feasibility and desirability of developing abdominal and neck load criteria, anthropomorphic dummies, and test procedures for child safety seats and other child restraint systems. (Class II, Priority Action) (H-83-57)

Conduct research to examine the potential for other restrained or unrestrained vehicle occupants to sustain injuries in accidents from contact with a child safety seat when used in a motor vehicle and to determine whether additional safety requirements may be necessary and practicable to prevent or minimize potential injuries. (Class II, Priority Action) (H-83-58)

Conduct crash tests and accident research to examine the use and accident performance of safety belts with children at various ages to better identify the benefits and limitations of such use. (Class II, Priority Action) (H-83-59)

--to Child Safety Seat Manufacturer:

Review and revise instructions for use of child safety seats and other child restraint devices as needed to improve the clarity of the instructions and to establish specific height, weight, or other thresholds for required actions which depend on a child's physical characteristics (such as conversion between forward and rear-facing modes and harness rerouting on convertible child safety seats). (Class II, Priority Action) (H-83-60)

Attach permanent labels to safety seats to identify correct safety belt routing points, harness routing points, and correct recline positions for use in motor vehicles. (Class II, Priority Action) (H-83-61)

--the International Association of Chiefs of Police:

Coordinate and promote the development of training programs for State and local law enforcement officers on the use and misuse of child safety seats and safety belts for law enforcement and accident investigation purposes. (Class II, Priority Action) (H-83-62)

Promote the use of statewide traffic accident data systems to collect and analyze specific data identifying the use and misuse of child safety seats and safety belts in motor vehicles involved in accidents and the consequences of such use and misuse. (Class II, Priority Actior) (H-83-63)

—to the National Child Passenger Safety Association:

Assist the States in developing effective programs to implement child passenger protection laws. (Class II, Priority Action) (H-83-64)

CHILD PASSENGER PROTECTION LAWS
SUMMARY OF KEY PROVISIONS
(40 STATES AND DISTRICT OF COLUMBIA)

STATE CHILD PASSENGER SAFETY LAWS

State Effective Date	Requires	Children	Where[1] Seated	To Use[2]	Vehicle	Exceptions	Penalties	Public Education Campaign	Other Provisions
Arizona 1/1/87	Resident Driver	Under Age 3	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	Non-resident drivers Active Duties under question	Maximum fine $100.00	No	Failure to use child restraint system shall not be considered contributory negligence. Violation of law does not nullify or change provisions of insurance contract
Arizona 7/1/83	Resident Parent or Guardian	Under Age 4 or Under 40 lbs	Not Specified	Approved Child Passenger Restraint System	Non-commercial Motor Vehicle	Non-resident drivers, vehicles originally manufactured without factory-installed passenger restraint devices, more than one child in back seat of vehicle and vehicle for which not provided suitable anchorage devices	7/1/83 to 12/31/84 warning ticket; after 7/1/84 maximum fine $50.00; fine will be waived if proof of acquisition of system is shown	Yes. Requires hospitals to provide parents of newborn with information regarding child restraint programs prior to leaving baby from hospital. Fines will be placed in fund for rental program	Prohibits police officer from stopping vehicle solely for enforcing the law; exempts persons with physical disabilities from child restraint use or non-use of system is inadmissible evidence in court
Arkansas 6/1/83	Resident Driver	Under Age 3	Not Specified	Approved Child Passenger Safety Seat System	Passenger Automobile Van or Pick Up Truck	Drivers of for hire vehicles; children who can't use system due to medical condition verified by physician; during emergency situations; all other seats filled with seat belts used or occupied by non-resident drivers	6/1/83 to 6/30/84 warning ticket; after 7/1/84 $10.00 - 25% of fine or proof of acquisition of system	Yes. Law encourages law enforcement agencies and hospitals to conduct public information campaign. Fines will be placed in fund for rental program	Failure to use child restraint system does not constitute comparative or contributory negligence. Use or non-use of system is inadmissible evidence in court
		Ages 3-5	Not Specified	Approved Child Passenger Safety Seat System or Seat Belt					
California 1/1/83	Resident Parent or Legal Guardian	Own Child Under Age 4 or Under 40 lbs	Not Specified	Approved Child Passenger Seat Restraint System	Passenger Vehicle or Motor Truck Under 6,001 lbs Owned by Parent or Guardian and Registered in State	Non-resident drivers; children who can't use system due to medical condition or body size	Child warning system to be developed prior to first year of campaign; charges dropped if proof of acquisition of system shown in court. Fine $50.00 - $100	Yes. Law includes public information and education campaign on value of seat restraints for infants & children up to age 10. Campaign expires 1/1/84	None
	Resident Parent or Legal Guardian	Own Child Under Age 4 or Under 40 lbs	Not Specified	Approved Child Passenger Seat Restraint System or Seat Belt	Passenger Vehicle or Motor Truck Under 6,001 lbs Not Owned by Parent or Guardian but Registered in State				
	Resident Driver	Any Child Under Age 4 or Under 40 lbs	Not Specified	Passenger Seat Restraint or Seat Belt	Passenger Vehicle or Motor Truck Under 6,001 lbs Registered in State		Charge against resident drivers will be dropped if child, parents or legal guardians are present in vehicle at time of violation		
Colorado 1/1/84	Resident Driver	Under Age 4 and Under 40 lbs	Not Specified	Approved Child Restraint System	Non-commercial Passenger Vehicle	Non-resident drivers	$25.00 fine will be waived if proof of acquisition is shown	Yes. Law includes public information and education campaign to be implemented 7/1/84	Failure to use child restraint device shall not constitute negligence or contributory negligence per se
Connecticut 10/1/82	Driver	Under Age 4	Front Seat	Approved Child Restraint System	Motor Vehicle	Non-resident vehicles; children in certain buses; buses for hire; medical reasons	Violation is deemed an infraction; fine will be waived if proof of acquisition of system is shown	No	Failure to use child restraint system shall not be considered contributory negligence; use or non-use is inadmissible evidence in court
		Under Age 4	Rear Seat	Approved Child Restraint System or Seat Belt					
Delaware 6/2/82	Resident Parent or Legal Guardian	Under Age 4	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	Non-resident drivers	Maximum fine of $25.00; fine will be waived if proof of acquisition of system is shown	No	Failure to use child restraint system shall not be considered contributory negligence; use or non-use is inadmissible evidence in court
Florida 7/1/83	Resident Parent or Legal Guardian	Under Age 4	Not Specified	Approved Child Restraint System	Passenger Car Van or Pick Up Truck	Non-resident drivers	$15.00 fine; proof of acquisition of system	Yes. Law specifies that law enforcement agencies should conduct a public education campaign. Agencies are urged to send notice to all registered drivers with delivery of license plates	Failure to use child restraint system does not constitute negligence per se; use or non-use of system is inadmissible evidence in court
		Ages 4 & 5	Not Specified	Approved Child Restraint System or Seat Belt					

N.A. - Not applicable

[1] Where not specified, we are assuming use is required in both front and rear seats

[2] Approved system = a system which meets Federal motor vehicle safety standards

STATE CHILD PASSENGER SAFETY LAWS (continued)

State Effective Date	Requires	Children	Where[1] Seated	To Use[2]	Vehicle	Exceptions	Penalties	Public Education Campaign	Other Provisions
Georgia 7 1 84	Resident Driver	Under Age 3	Not Specified	Approved Child Passenger Restraint System	Passenger Automobile Van or Pick Up Truck	For those vehicles not equipped with seat belts, children whose physical characteristics are beyond limits established by manufacturers	Maximum fine $25 00 for second and subsequent violations in court	Yes Law includes public information program Campaign expires 1 1 84	Failure to use child restraint system does not constitute negligence or contributory negligence per se
		Ages 3 4	Not Specified	Approved Child Passenger Restraint System or Seat Belt					
Hawaii 7 1 83	Driver	Under Age 3	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	For those vehicles common to all vehicles all other seats in which children are occupied	Maximum fine $100 00 for first conviction maximum fine $200 00 for second conviction within one year maximum fine $500 00 for subsequent conviction	No	Failure to use child restraint system shall not be considered contributory negligence or comparative negligence or negligence per se
		Ages 3 4	Not Specified	Approved Child Passenger Restraint System or Seat Belt					
Illinois 7 1 81 As Amended 6 27 83	Resident Parent or Legal Guardian	Under Age 4	Not Specified	Approved Child Restraint System	Motor Vehicle or Recreational Vehicle	Non resident drivers	First offense maximum fine $25 00 subsequent offense maximum fine $50 00 Fee will be waived upon proof of acquisition of systems shown Attorney General's office to initiate actions for violations	No	Failure to use child restraint device shall not constitute negligence use or non use may be admissible evidence in court
	Resident Parent or Legal Guardian	Ages 4 6	Not Specified	Approved Child Restraint System or Seat Belt					
Indiana 1 1 84	Resident Driver	Under Age 3	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	Taxicabs school buses rental vehicles leased for less than 90 days non resident drivers motorbus	$25 00 $500 00 court costs Fee will be waived upon proof of acquisition of systems shown	Previous public education campaign expires on 9 1 84	Failure to use child restraint system shall not constitute contributory negligence
		Ages 3 5	Not Specified	Approved Child Passenger Restraint System or Seat Belt					
Kansas 1 1 82	Resident Parent or Legal Guardian	Under Age 2	Front Seat	Approved Child Passenger Restraint System	Passenger Vehicle	Non resident drivers drivers of temporary substitute vehicles	Oral warnings	Yes	Failure to use child restraint system shall not constitute negligence per se
Kentucky 7 14 82	Resident Parent or Legal Guardian	Under 40 Inches in Height	Not Specified	Approved Child Restraint System	Motor Vehicle	Non resident drivers rental rental vehicles trucks over one ton vehicles not owned by parents or guardians	Oral warnings	No	Failure to use child restraint system does not constitute negligence per se use or non use of systems inadmissible evidence in court
Maine 9 23 83	Resident Parent or Legal Guardian	Less Than 4 Years	Not Specified	Approved Child Safety Seat	Motor Vehicle Owned and Operated by Parent or Legal Guardian	Vehicle not equipped with seat belts not required number of passengers and has no seats with seat belts only non resident drivers	9 23 83 3 23 84 oral warning After 3 23 84 $25 00 for initial violation $50 00 subsequent violations Fee will be waived upon proof of acquisition of systems shown	Yes State had public education campaign that ended 3 1 83	Failure to use child safety seat does not constitute negligence per se use or non use of systems inadmissible evidence in court
	Resident Driver	Ages 1 4	Not Specified	Approved Child Safety Seat or Seat Belt	Motor Vehicle Neither Owned nor Operated by Parent or Legal Guardian				
	Resident Driver	Less Than 1 Year	Not Specified	Approved Child Safety Seat	Motor Vehicle Neither Owned nor Operated by Parent or Legal Guardian				
Maryland 1 1 84	Resident Driver	Under Age 3	Not Specified	Child Safety Seat	Passenger Motor Vehicle or Multi purpose Motor Vehicle	Children who can use system Use by medical conference Use at other seats with seat belts are occupied	$25 00 fee will be waived Proof of acquisition of systems shown Points will not be assessed	Yes Law specifies that DOT and Department of Motor Vehicles shall implement an educational program	Prohibits use of safety seat or seat belt by more than one person per seat at one time Failure to use Child safety seat does not constitute contributory negligence Use or non use of systems inadmissible in court
		Ages 3 5	Not Specified	Child Safety Seat or Seat Belt					
Massachusetts 1 1 82	Driver	Under Age 5	Not Specified	Approved Child Passenger Restraint System or Seat Belt	Motor Vehicle	Vehicle used to transport passengers for hire vehicle not required with seat belts all other seats with seat belts are occupied	Maximum fine $25 00 or probation or loss of license	No	Failure to use child restraint system does not constitute negligence per se
Michigan 4 1 82	Resident Driver	Ages 1 4	Front Seat	Approved Child Restraint System	Motor Vehicle	Non resident drivers child care centers registered taxi & school bus taxi after other vehicle not required to be equipped with seat belts	Maximum fine $10 Objections courts or local police department system points will not be assessed	No	None
		Ages 1 4	Back Seat	Approved Child Restraint System or Seat Belt					
		Under Age 1	Not Specified	Approved Child Restraint System					

(1) Where not specified we are assuming users required to be in front or rear seats

(2) Approved systems are systems which meet Federal motor vehicle safety standards

STATE CHILD PASSENGER SAFETY LAWS (continued)

State Effective Date	Requires	Children	Where[1] Seated	To Use[2]	Vehicle	Exceptions	Penalties	Public Education Campaign	Other Provisions
Minnesota 1 1 82 As Amended 8 1 83	Resident Parent or Legal Guardian	Under Age 4	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	Non resident drivers ve hicles registered by parent or guardian vehicles not equipped with seat belts	Maximum fine $25 00 fine will be waived if proof of acquisition of system is shown Points will not be assessed	No	None
Mississippi 7 1 81	Resident Parent or Legal Guardian	Under Age 2	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	Non resident drivers	Maximum fine $10 00 fine will be waived if proof of acquisition of system is shown	Notice of new law will be sent to registered owners with delivery of motor vehicle license plates	Failure to use child restraint system does not constitute con tributory or comparative negligence law does not create any new standard of duty on part of parent to child
Missouri 1 1 84	Resident Driver	Under Age 4	Front Seat	Child Passenger Restraint System Approved by Department of Public Safety	Motor Vehicle	Temporary substitute vehicles but two vehicles from resident drivers	Maximum fine $25 00	Yes Law provides for public information program	Failure to use child restraint system does not constitute negligence or contributory negligence use or non use of system is in admissible evidence in court all other seats with seat belts are required child shall be transported in rear seat
			Rear Seat	Child Passenger Restraint System or Seat Belt Approved by Department of Public Safety					
Montana 1 1 84	Resident Parent or Legal Guardian	Under Age 2	Not Specified	Approved Child Restraint Device	Motor Vehicle	Drivers not required to equip vehicle with more than three child restraint sys tems child for whom can use system due to medical con dition or body size taxi cab motorcycle or school bus vehicles which only seat two persons and which at any one time contain over 2 persons over age 4 in vehicle vehicles not required to be equipped with seat belts non resident drivers	First violation $10 00 $25 00 fine will be waived if proof of acquisition of system is shown Subsequent viola tions within two years $25 00 $100 00 fine	No	Failure to use child restraint system shall not constitute negligence use or non use is inadmissible evidence in court
		Ages 2 4 or Under 40 Lbs	Not Specified	Approved Child Restraint Device or Seat Belt					
Nebraska 8 26 83	Resident Driver	Under Age 1	Not Specified	Approved Child Passenger Restraint System	Motor Vehicle	1963 or earlier model No vehicle not equipped with seat belts for child who can use system due to medical condition of body size non resident drivers	$25 00 if proof of acquisition of system		Failure to use system shall not constitute negligence use or non use of system shall not constitute a defense to recovery of medical expenses
		Ages 1 4	Not Specified	Approved Child Passenger Restraint System or Seat Belts					
Nevada 7 1 83	Resident Driver	Under Age 5	Front Seat	Approved Child Restraint Device	Motor Vehicle	Non resident drivers taxi cab school bus rented vehicle child for whom can use system because of medical condition or body size all other seats with seat belts are occupied	$35 00 $100 00 fine fine will be waived if proof of acquisition of system is shown points will not be assessed	No	Failure to use child restraint system will not constitute negligence preference be use of safety belts that All children in children under age three shall at all times be seated in child restraint system children under age five should be seated in rear seat
		Under Age 3	Rear Seat	Approved Child Restraint Device					
		Ages 3 5	Rear Seat	Approved Child Restraint Device or Seat Belts					
New Hampshire 6 27 83	Driver	Under Age 5	Not Specified	Child Passenger Seat or Seat Belt	Motor Vehicle	For hire vehicles ve hicles not equipped with seat belt child for whom can use system because of medical condition	Maximum fine $1 00 fine will be waived if proof of acquisition of system is shown	No	Failure to use child restraint system shall not con stitute contributory negligence

(1) Where not specified we are assuming use is required in both front and rear seats

(2) Approved system is a system which meets Federal motor vehicle safety standards

STATE CHILD PASSENGER SAFETY LAWS (continued)

State Effective Date	Requires	Children	Where[1] Seated	To Use[1]	Vehicle	Exceptions	Penalties	Public Education Campaign	Other Provisions
New Jersey 4 7 83	Driver	Under Age 5	Front Seat	Approved Child Passenger Restraint System	Motor Vehicle	None	$10 00 $25 00 fine will be waived if proof of acquisition of system is shown	Yes Law calls for public information program	Failure to use child restraint system shall not constitute contributory negligence use or non use of system is in admissible evidence in court Where number of children in one family under age 5 in motor vehicle exceeds number of available seat belts children must be seated in other seat
		Ages 18 Mos 5 Yrs	Rear Seat	Approved Child Passenger Restraint System or Seat Belt					
New Mexico 6 17 83	Resident Driver	Under Age 5	Front Seat	Approved Child Passenger Restraint Device	Passenger Car Van or Pick Up Truck	Non resident drivers school bus all seating positions and seat belts are occupied	$50 00 fine fine will be waived if proof of acquisition of system is shown	No	Failure to use child restraint system shall not constitute negligence
		Ages 1 5	Rear Seat	Approved Child Passenger Restraint Device or Seat Belt					
New York 4 1 82	Resident Driver	Under Age 4	Not Specified	Approved Child Restraint Seat	Passenger Motor Vehicle	School buses non resident drivers	Maximum fine $25 00 or proof of acquisition of system	No	Vehicle owner shall not permit use of vehicle unless child passengers are restrained
		Ages 4 & 5 (as amended 4 2 82)	Not Specified	Approved Child Restraint Seat or Safety Belt Approved by Commissioner of Motor Vehicles					
As Amended 6 28 83									Law has been expanded to require use of seat belts by children as follows After 4 1 84 Under Age 7 After 4 1 85 Under Age 8 After 4 1 86 Under Age 9 After 4 1 87 Under Age 10
North Carolina 7 1 82 - 7/1/85	Resident Parent	Under Age 1	Not Specified	Child Restraint System Approved by Commissioner of Motor Vehicles	Motor Vehicles or a Family Purpose Vehicle	Non resident drivers children whose personal needs are being attended to all other seats with seat belts are occupied not required if seated in seat not requiring safety belt	7 1 82 6 30 84 warning ticket 7 1 84 6 30 85 $10 00 fine points will not be assessed	No Study is mandated from 7 1 82 6 30 85	Legislature is not obligated to appropriate funds to implement law failure to use child restraint system does not constitute negligence per se
		Ages 1 2	Not Specified	Child Restraint System Approved by Commissioner of Motor Vehicles or Seat Belt					
North Dakota 1 1 84	Parent or Legal Guardian	Under Age 2	Not Specified	Approved Child Restraint System	Passenger Car	Vehicles manufactured prior to 1966 not equipped with seat belts	Maximum $20 00 fine fine will be waived if proof of acquisition of system is shown	No	Failure to use child restraint system does not constitute negligence use or non use is in admissible in court
		Ages 2 4	Not Specified	Approved Child Restraint System or Seat Belt					
Ohio 3 7 83	Resident Driver	Under Age 4 or Under 40 lbs	Not Specified	Approved Child Restraint System	Motor Vehicle Owned by Parent or Guardian and Registered in State	Taxi cabs vehicles not required to be equipped with seat belts Ambulances emergencies non resident owners Director of Highway Safety to develop other rules on subject	$10 00 fine fine waived if proof of acquisition of system is shown	No	Failure to use child restraint device does not constitute negligence use or non use is inadmissible in court
	Resident Driver	Under Age 1	Not Specified	Approved Child Restraint System	Motor Vehicle Not Owned by Parent or Guardian and Registered in State				
	Resident Driver	Ages 1 4 or Under 40 lbs	Not Specified	Approved Child Restraint System or Lap Belt or Seat Belt	Motor Vehicle Not Owned by Parent or Guardian and Registered in State				
	Resident Driver	Under Age 4 or Under 40 lbs	Not Specified	Approved Child Restraint System	Motor Vehicle Owned by Nursery School Day Care Center or Kindergarten and Registered in State				

(1) Where not specified we are assuming users required to be in front seat or rear seats

(2) Approved by systems A system which meets Federal motor vehicle safety standards

STATE CHILD PASSENGER SAFETY LAWS (continued)

State Effective Date	Requires	Children	Where[1] Seated	To Use[2]	Vehicle	Exceptions	Penalties	Public Education Campaign	Other Provisions
Oklahoma 11 1 83	Resident Driver	Under Age 4	Rear Seat	Approved Child Passenger Restraint System or Seat Belt	Motor Vehicle	Non-resident driver school bus farm truck vehicle not required to be equipped with seat belts all other seats with seat belts are occupied child can refuse to use system because of medical conditions	Oral warning	Yes Law provides for public education campaign	Use or non use of system is inadmissible evidence in court failure to use system shall not be used in mitigation of damages
		Under Age 4	Front Seat	Approved Child Passenger Restraint System					
		Ages 4&5	Not Specified	Approved Child Restraint System or Seat Belt					
Oregon 1 1 84	Resident Driver	Under Age 5	Not Specified	Child Safety System Approved by Division of Motor Vehicles or Seat Belt	Motor Vehicle or Pick Up Truck Under 8 000 lbs	Privately owned common carrier vehicle vehicle manufactured prior to 1968 and not equipped with seat belts child who can use system because of medical condition body size all other seats with seat belts are occupied residents of other states that don't have similar laws	1 1 84 & 30 84 warning after 7 1 84 maximum $20 00 fine fine will be waived if proof of acquisition of system is shown	No	Failure to use system does not constitute negligence use or non use of system is not admissible evidence in court
Rhode Island 7 1 81	Driver	Under Age 3	Front & Rear Seat (as amended 1 4 84)	Approved Child Passenger Restraint System	Motor Vehicle	None	Maximum fine of $15 00 or proof of purchase of system recorded on driver's record	No	Use or non use of system is inadmissible evidence in court failure to use child restraint system does not constitute negligence per se
South Carolina 7 1 83	Resident Driver	Under Age 1	Front or Rear Seat	Approved Child Passenger Restraint System	Passenger Car Pick Up Truck Van Recreational Vehicle	(a) church day care and school bus drivers commercial motor vehicle child being fed child who can use system due to medical conditions	7 1 83 & 30 83 warning to bail After 7 1 84 maximum fine $25 00 fine will be waived if proof of acquisition of child restraint system is shown	No	Failure to use system does not constitute negligence per se or constitute any negligence use or non use of system is inadmissible evidence in court costs of certain proceedings failure to use system may be introduced in mitigation of damages proof of financial responsibility may be given to child on under age three
		Under Age 4	Front Seat	Approved Child Passenger Restraint System					
		Ages 1 3	Rear Seat	Approved Child Passenger Restraint System or Seat Belt					
Tennessee 1 1 78 As Amended 1 1 81	Resident Parent or Legal Guardian	Under Age 4	Not Specified	Approved Child Passenger Restrained System	Motor Vehicle	Children being rushed to attended to by mother who cannot normally be present or guardians non resident drivers	$10 00 $10 00 fine no court costs	No	Use or non use of system is inadmissible evidence in court failure to use child restraint system does not constitute negligence per se
Virginia 1 1 81	Resident Parent or Legal Guardian	Under Age 1 & Under 40 lbs	Not Specified	Child Restraint System Approved by State Police	Motor Vehicle Manufactured After 1 1 68	Public taxi or school bus vehicle which has exemption designation on registration certificate use system if child is examined by a doctor and doctor states that use system is not advisable non resident drivers driving of vehicle manufactured prior to 1 1 68	$25 00 fine ($10 to locality retain system if driver) fine may be waived if non use is due to financial reasons	No However law provides for development of a program to provide child restraint systems to persons who are financially unable to purchase system	Failure to use child restraint system does not constitute negligence per se failure to use system will not constitute contributory negligence or payment of medical claims
		Ages 1 4 & Over 40 lbs	Not Specified	Child Restraint System Approved by State Police or Seat Belt					
Washington 12 31 81	Resident Parent or Legal Guardian	Under Age 1	Not Specified	Child Passenger Restraint Device Approved by State Commission Equipment or Seat Belt	Motor Vehicle Owned by Parent Guardian and Registered in State	Non residents	1 1 84 & 31 84 written warning after 1 1 84 maximum fine $ 101 fine will be waived if proof of acquisition of system is shown	No	Failure to use child restraint device does not constitute negligence per se use or non use of system not admissible in court
		Ages 1 4	Not Specified	Child Passenger Restraint Device Approved by State Commission Equipment or Seat Belt					

(1) Where not specified most laws assume children are required to ride in front and rear seats

(2) Approved system is a system which meets Federal motor vehicle safety standards

STATE CHILD PASSENGER SAFETY LAWS (continued)

State Effective Date	Requires	Children	Where[1] Seated	To Use[1]	Vehicle	Exceptions	Penalties	Public Education Campaign	Other Provisions
Washington D.C. 7/1/83	Resident Driver	Under Age 1	Not Specified	Approved Child Restraint Seat	Motor Vehicle	Taxicabs, farm purposes, for hire vehicles, resident drivers, all others with seat belts are exempt	$25 initial fine, waiver if proof of acquisition of system is provided, points will not be assessed	Yes. Law specifies that public information programs will be undertaken	Failure to use child restraint system shall not constitute negligence or contributory negligence, violation is compulsory and not provide basis for civil action for damages
		Ages 1-3	Not Specified	Approved Child Restraint Seat or Seat Belt					
West Virginia 7/9/81	Resident Driver	Under Age 3	Not Specified	Approved Child Passenger Restraint System Car Seat or Car Seat	Passenger Automobile Van or Pick Up Truck	For hire vehicles, non resident drivers	Misdemeanor $10.00 - $20.00 fine or proof of purchase of system	No	Failure to use system does not constitute negligence per se

Summary of CS SB 179 (Jud)

This bill will allow the commissioners of the principal departments of the state to delegate their membership on boards and commissions to high level subordinate employees. Delegation shall be to an equivalent of a division director, subject to approval by the Governor, and must be in writing. Delegation remains in effect until principal executive officer revokes it, resigns, or otherwise forfeits office.

The Judiciary CS adds a provision which allows the legislature to nullify a delegation by adopting a concurrent resolution within 30 days after the legislature is notified of the delegation.

Current Commissioners Responsibilities:

Commissioner Casey (5)

Commissioner Collinsworth (5)

Commissioner Heath (6)

Commissioner Lewis (7)

Commissioner Lind (3)

Commissioner Lyon (11)

Commissioner Neve (4)

Commissioner Robison (2)

Commissioner Rudd (3)

OFFICE OF MANAGEMENT AND BUDGET

POSITION PAPER

SB 179

A Bill Relating to the Delegation of Department Head Membership on Boards, Commissions, and Other Units of State Government

The Sheffield Administration supports this bill -- a bill which allows Commissioners to delegate their membership on boards and commissions to high-level subordinate employees.

This bill would serve to clarify the management responsibilities of the heads of principal departments of the State. Present statutes provide that the heads of several principal departments must sit on many boards of the plethora of public agencies throughout the executive branch of government, in addition to serving as the chief executive officers (CEOs) of their respective agencies.

These provisions have created an anomalous situation that inhibits the ability of these key members of government to exercise either their duties as commissioners or board members. The statutes in question leave little room to allocate top management resources to these important functions. In fact, most of the public agency statutes require that important board memberships can only be filled from a group of fifteen (15) people.

Another effect of this severe limitation on the pool of talent available for boards has been the creation of single-deputy positions to assume CEO duties for principal departments. This creates an otherwise unnecessary layer of management that insulates the operational management of each agency from the line of accountability of top management. This insulation is not in the public interest.

Position Papers

It is in the public interest to ensure that government makes the best use of the abilities of the people who are appointed to manage the principal agencies.

Our laws must provide that the uppermost duty of the head of each department is to manage the affairs of that department. The laws should also provide that the many important public agencies directed by boards should benefit from access to the larger pool of top management talent presently available within the Alaska government.

Department of Natural Resources

SUBJECT: SB 179

Thank you for inviting my comments on SB 179 and the draft position paper which you drafted.

I agree that SB 179 should be enacted into law, and, with one exception, I agree with the case you have so well presented for its enactment.

That part of the agreement with which I disagree is the assertion that it is the membership of Commissioners on boards which has led to the establishment of single-deputy positions. Given the range of Commissioner responsibilities to the Governor, to departmental employees, to legislators, and to the public, I think there are a multiplicity of reasons for the appointment of single deputy commissioners.

Dear Mr. Mayer,

On February 14, 1983 a meeting of the Alaska Association of Chiefs of Police was held in Anchorage. An item of specific interest at that meeting was the issue of subpoena powers for the APSC. This was discussed at some length with several presentations on this issue.

It was resolved by the Alaska Association of Chiefs of Police, that it is absolutely essential for the APSC to have subpoena powers in order to make informed decisions in carrying out their regulatory functions. You, or your staff, when testifying on this matter may represent this position on our behalf.

Please keep me informed as to the status of this proposed statutory change.

FROM: James F. Mayer
Executive Director
Alaska Police Standards Council

SUBJECT: 1983 Legislation

To amplify on my memo of August 4, 1982 to former Commissioner Nix, most internal investigations and disciplinary actions against police officers by state and municipal police departments are considered confindential by those departments and not available for review by the Council. Yet those reports are necessary to form a basis for decisions by the Council on revocation of a police officer's certificate.

If the Council had the authority to subpeona these records it could avoid erroneous and premature decisions in denials and revocations and legally relieve the department of liability under the various privacy acts in addition to assisting the Attorney General's office in determining whether the Police Standards Act has been violated.

SUBJECT: 1983 Legislation

FROM: James F. Mayer
Executive Director
Alaska Police Standards Council

I've attached a copy of a bill drafted by the Department of Law at the Council's request for introduction in the Twelfth Legislature - Second Session. The bill was not introduced at that Session.

The Council requests that it be introduced in the Thirteenth Legislature - First Session.

The Council has experienced considerable difficulty in obtaining sufficient information from various police departments upon which to base decisions concerning denial or revokation of police officer certificates. In order to avoid erroneous decisions without sufficient information or based on inaccurate or incomplete information, the Council requests this legislation. It would also largely relieve the police departments of potential liability under the various privacy acts.

It would have no fiscal impact on the Councils activities.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 18, 1983

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that will grant investigative subpoena power to the Alaska Police Standards Council.

The Alaska Police Standards Council is empowered to establish and enforce minimum standards for the employment of police officers within the state. Under existing law, the council has the authority to investigate the background and qualifications of individual police officers, and may deny or revoke certification of those officers who do not meet the minimum standards. In the past, the council has experienced some difficulty in obtaining records from some police departments, as the departments regard information such as personnel files or the results of internal investigations as confidential and accessible only through a court order.

This bill adds a new paragraph to the statute which enumerates the powers granted to the council. It explicitly confers investigatory authority and authorizes the issuance of subpoenas for persons, books, records, or other documents related to an investigation. Passage of the bill will enable the council to investigate more efficiently when it appears that a police officer does not meet the educational, training, or moral character standards established by the council. It will enable the council to swiftly terminate, without the necessity of a formal hearing, those investigations which find that concern regarding an officer's qualifications is unfounded.

Sincerely,

Bill Sheffield
Governor

SB

194

Arthur Peterson, Department of Law, testified that the CS takes care of many of the problems he had identified in the original bill. He stated that he had some concern that the project may be taking on too much. He went through the list of things to be included in the journal and commented on each one. He discussed the benefits of the provision which disclaims liability for the contents of the journal.

Senator Rodey moved and asked for unanimous consent to pass the bill from committee with individual recommendations. There were no objections.

SB 194--Relating to "ice classics"

Senator Sackett (prime sponsor) testified that he had been asked to help create a "Kuskokwim Ice Classic" by Bethel Social Services. This group wants to reduce their dependence on state money.

Senator Ray suggested that the title of the bill be changed to " An Act relating to Establishment of the Kuskokwim Ice Classic".

Senator Fischer suggested a minor change on line 13 of the bill.

Senator Ray moved and asked unanimous consent that these changes be incorporated in a committee substitute, that the committee substitute be adopted and passed out of committee with individual recommendations. There was no objection.

SB 137--Requiring public employees to comply with the Regulation of Lobbying Act.

Senator Faiks (prime sponsor) testified that she had contemplated a sponsor substitute but decided against it. She reviewed the substance of the bill and described the current situation where municipal and university lobbyists do not have to register and disclose while private sector lobbyists do. She described lobbying laws in other states. She stated that it was very difficult to get information on lobbying expenditures from the Municipality of Anchorage.

Senator Ray asked if, for example, a municipal attorney who answered questions for a legislator or legislative staff person would have to register. Senator Faiks responded that that would be true it the public employee was lobbying for money. She pointed out that "substantial and regular" portions of this person's salary must come from lobbying.

SENATE JUDICIARY COMMITTEE MEETING

Meeting Minutes

4/4/83

The meeting was called to order at 1:10 p.m. by Senator Ray, Chairman.

All members were present except Senator Eliason, who was excused.

The first order of business was Senate Bill 208--Extending the termination date of the Alcoholic Beverage Control Board--and the Sunset review and report regarding the ABC Board, as to which Patrick L. Sharrock, the Director of the ABC Board, and Robert Sundberg, Commissioner of Public Safety, were present and participated in the ensuing discussion and deliberation

Senator Ray asked Director Sharrock a question about the auditor's conclusion, on page 5 of the 12/15/82 Sunset report, that "the ABC Board has not met its mandated enforcement responsibilities of Title 4 of the Alaska Statutes." Director Sharrock adamantly refuted this conclusion and concurred with Senator Ray's statement regarding the fact that agents of the Board are not empowered to routinely carry guns and make arrests and stated that this is pursuant to the entire scheme of applicable law requiring local participation whereby municipalities are allowed to retain licensing fees to cover the cost of enforcement. In other words, Director Sharrock stated that the auditor's conclusion was merely a statement of existing legislative intent and enforcement policy, rather than a valid finding that the Board has failed to carry out its mandated duties.

Senator Ray stated that the author of the Sunset review and report of 12/15/82 doesn't seem to have grasped the basic concept previously mentioned, and Director Sharrock fully concurred.

Commissioner Sundberg stated that he strongly recommends that the Board's tenure be extended and that no changes be made in its operation and procedures.

Senator Ray stated that the Board appears to be operating properly and the Sunset report appears to be wrong about the Board not meeting its statutory enforcement obligations.

Senator Josephson stated that, in regard to the Sunset report's comments about the Board's enforcement power, existing law already provides for agents of the Board to have police enforcement powers, such as the power to carry firearms and make arrests, subject to certain conditions, such as a prior finding by the Board and approval by the Commissioner of Public Safety, and Commissioner Sundberg fully concurred.

Senator Ray stated that it has been an established policy of past Commissioners of Public Safety not to allow ABC Board agents to carry firearms or make arrests, and Commissioner Sundberg concurred, stating that he doesn't recommend any changes in that policy.

Senator Ray again stated that the licensing fee has been used as payment to municipalities for their enforcement functions and Director Sharrock concurred, stating that this has worked out very well and there are no problems in that regard. Senator Ray then further pointed out that this is precisely where the author of the Sunset report went wrong by failing to realize that there are no problems with the existing enforcement functions and policy of the ABC Board.

Senator Pettyjohn pointed out that recommendation number 1 on page 7 of the Sunset report seems to state that criminal sanctions and prosecutions are necessary to adequately enforce existing law. Senator Pettyjohn then posed a question to Director Sharrock as to the sufficiency of existing notice of violation and administrative proceedings. Director Sharrock replied that pursuant to existing procedures, notices of violation are issued based on reported incidents and the Board prefers this approach to the filing of criminal complaints because the latter wouldn't be appropriate in the vast majority of cases. Discussion was had on this point, with Senator Josephson participating therein and pointing out that the author of the Sunset report apparently failed to understand two key practical factors in making his previously mentioned finding and recommendation:

1. The economics of a situation where a notice of violation is served on a licensee who may have a substantial economic interest at stake (for example, Director Sharrock pointed out that the fair market value of a license can be as high as $200,000.00 to $400,000.00); and

2. The heavy burden of proof in a criminal case which makes it very difficult and expensive to obtain a conviction after a criminal complaint is filed.

Senator Pettyjohn then concurred with the previous speakers' opinions that existing notice of violation procedures are more effective than the recommended filing of criminal complaints.

Senator Ray pointed out that, based on his extensive experience in this area, approximately 95% of licensees are honest, law-abiding and hard working whereas 5% are always in trouble.

Furthermore, Senator Ray pointed out that he is very disappointed with the Sunset report which seems to be inacurrate and raises more questions than it answers.

Director Sharrock and Commissioner Sundberg, as well as Senators Ziegler, Josephson and Pettyjohn, concurred in Senator Ray's last observation, and Senator Pettyjohn further pointed out that, at best, the Sunset report is very superficial. Commissioner Sundberg then again

stated that he strongly recommends no changes whatsoever in existing ABC Board functions and procedures.

Don Kubley of the Alaska Cabaret and Hotel Restaurant Association testified in support of Senate Bill 208 and stated that, on behalf of his organization, he recommends the rejection of the Sunset report's recommendations and he believes that the ABC Board policies and procedures are essentially firm but fair.

Senator Josephson then moved for a Do Pass with individual recommendations on Senate Bill 208. After a vote was taken, the motion passed unanimously.

The second order of business was Senate Bill 111--Relating to the use of teleconferencing under the Administrative Procedure Act--as to which Sue Plumber, Director of Teleconference Services testified in favor of the bill, stating that it clears up existing legal questions and has a potential for decreasing travel and related costs.

Extensive discussion was then had on the bill and it was unanimously agreed that a committee substitute would be drafted by Senator Pettyjohn along with Committee counsel and Billy Berrier's office, to be presented at the committee hearing on Friday, April 8, 1983.

The third order of business was a brief discussion of matters to be considered at future Committee meetings.

The fourth order of business was a new subcommittee assignment:

SB 4	Repealing the requirement that an applicant for a beverage dispensary license file a bond	Ray

There being no further business the meeting adjourned at 1:48 p.m.

PURPOSE OF THE REPORT

In accordance with the provisions of Alaska Statutes 24.20.271(1) and 44.60.050 (Sunset Legislation) an examination of the Alcoholic Beverage Control Board was conducted to determine whether there is a demonstrated need to continue liquor regulation in its present form. To determine that need we reviewed Board activities for Fiscal Year 1982 to see if the Board has been operating in an efficient and effective manner.

AS 44.66.010 specifies that the Alcoholic Beverage Control Board will terminate on June 30, 1983, but will continue until June 30 of the following year for the purpose of concluding its affairs. This report should be considered during the legislative oversight function in determining whether the Board should be allowed to terminate, be reestablished in its present form or be reestablished in a modified form.

(Intentionally left blank)

ORGANIZATION AND FUNCTION

In 1933 the Territorial Legislature created the Board of Liquor Control with full power, authority, and control to prescribe (1) rules and regulations to govern the manufacture, barter, sale and possession of intoxicating liquors, (2) qualifications of those engaged in that business, and (3) license fees and excise taxes. The present Alcoholic Beverage Control Board (hereinafter referred to as the ABC Board or the Board) was established in 1959, and the same broad powers and duties conferred on the Board of Liquor Control were transferred to the new ABC Board at that time.

Members are appointed for three-year terms by the Governor and serve at his pleasure subject to confirmation by the Legislature. Membership is limited by statute to five persons (two liquor industry representatives, three non-industry representatives). A director, also appointed by the Governor, serves as executive officer and is responsible for enforcement of Title 4 liquor laws and regulations developed by the Board.. Although he is not a member of the Board, the director may cast a tie-breaking vote.

The ABC Board is a regulatory, quasi-judicial agency, vested with the powers, duties, and responsibilities for the control of alcoholic beverages, including the power to propose and adopt regulations, and to hear appeals. The Board may order the director to issue, renew, revoke, transfer, or suspend licenses and permits.

Title 4 prescribes the type of licenses, fees, and specific activities allowed under each license classification (see schedule of license types and fees in Appendix C). Fees are payable at the time of application and are not reduced or prorated in any way for periods less than the statutory calendar year. To renew an already existing liquor license, the application must be filed (and the corresponding fees paid) on or before February 28.

The staff of the ABC Board is divided into three major functions: administration, licensing, and enforcement. A brief description of the services provided by those functions follows:

Administration. The director of the ABC Board provides all administrative support needed by the Board including overseeing all staff functions, preparing budget documents, and directing the preparation and implementation of administrative and public hearings, and directing special enforcement investigations.

Licensing. The licensing staff currently consists of three full-time employees responsible for issuing and receiving application forms, maintaining records and files for all licenses, collecting fees, issuing all licenses and permits authorized by the Board, and answering inquiries from the general public on routine licensing matters.

Enforcement. The ABC Board currently employs five investigators - three operating from the Anchorage central office, one operating from the Fairbanks field office, and one operating from the Juneau field office. One Anchorage Investigator position is vacant. Services provided include (1) surveillance and inspections of licensed premises, (2) investigations to obtain information to be used in criminal and civil proceedings and investigations into suspected licensing violations, (3) public appearances relating to ABC laws and regulations, and (4) assisting the licensing staff in handling inquiries from the general public.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting those practices are not within the scope of this review but require legislative consideration. In debating these decisions the legislative oversight committees should take into consideration the findings and alternatives presented in this report, so that the potential impact of the policy changes can be evaluated.

Report Conclusions

Title 4 of the Alaska Statutes established the ABC Board to control the manufacture, barter, possession and sale of alcoholic beverages in the State in order to protect the public's health, safety and welfare. We believe this control should continue to exist, however, it is our opinion the ABC Board has not met its mandated enforcement responsibilities of Title 4 of the Alaska Statutes. We recommend the ABC Board reevaluate its interpretation and application of the enforcement requirements of Title 4.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Alcoholic Beverage Control Board should reevaluate its interpretation and application of the enforcement requirements of Title 4.

Alaska Statute 04.06.075 states that the director of the ABC Board shall enforce Title 4 and regulations adopted by the Board. Title 4 also provides that a person who violates a provision of the Title or adopted regulations is guilty, upon conviction, of a class A misdemeanor. To enable the Director and enforcement personnel to accomplish this task, Title 4 also provides for the exercise of peace officer powers, upon concurrence of the Commissioner of Public Safety.

Although these statutes clearly show that the ABC Board is mandated to enforce Title 4, it is ABC's opinion the primary responsibility for enforcement rests with State and local law enforcement agencies. As a result, few criminal complaints have resulted from ABC enforcement activities. During Fiscal Year 1982, only eight criminal complaints were filed, five of which were originated by ABC personnel.

The ABC Board utilizes a Notice of Violation to communicate to licensees that a violation allegedly occurred. However, Notices of Violation of and by themselves carry no penalty. Again, the ABC Board relies primarily on State and local law enforcement agencies to provide information to generate a Notice. Over 60 percent of the Notices issued during Fiscal Year 1982 were the result of work performed by local law enforcement agencies.

State and local law enforcement agencies are required to investigate and report violations of Title 4 to the ABC Board. However, this responsibility is only a small part of their total criminal enforcement responsibilities in the State of Alaska. As a matter of priority, these agencies cannot devote sufficient time to the enforcement of Title 4. Therefore, this responsibility must and does rest with the ABC Board.

It is our opinion that the ABC Board should reevaluate its interpretation of the enforcement responsibilities of Title 4 and, within staffing limitations, reconsider the direction of current ABC enforcement efforts.

Recommendation No. 2

The Office of the Governor should keep appointments to the Alcoholic Beverage Control Board current and staggered as required by AS 04.06.030.

During our review of appointments to the ABC Board we noted the following exceptions:

1. Past appointments to the Board have not been made in accordance with the provisions of AS 04.06.030(b) which requires the Governor to fill vacancies to unexpired terms within 30 days of the vacancies. Our review of appointments showed one position remained vacant for 92 days and another position was vacant for 152 days.

2. AS 04.06.030(a) requires appointments to be overlapping terms of 3 years. We found that the terms of two members will expire on January 31, 1984, and the terms of two other members will expire January 31, 1985.

We recommend the Office of the Governor appoint new members or reappoint current members to vacant ABC Board seats in a timely manner and in compliance with AS 04.06.030. We also recommend that the appointment terms be staggered as required by law.

We further recommend the Office of the Governor establish a talent pool for Board appointments. The concept of a talent pool is to have a list of persons available and desiring to serve as a Board member. Many sources exist in the State to establish such a pool. Liquor industry associations could be requested to provide a list of members who would like to serve as an industry representative on the Board.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analysis indicates both positive and negative attainments of the ABC Board and how its activities relate to the public need factors defined by AS 44.66.050. This analysis is not intended to be comprehensive in nature.

I. The extent to which the board, commission or program has operated in the public interest.

Public protection gained through licensing to control liquor manufacture and traffic has been adequately provided by the ABC Board. However, the Board is also charged with enforcement of the alcoholic beverage control laws, rules, and regulations. As previously documented in this report, it is our opinion the ABC Board has not met its statutory responsibilities in protecting public health, safety, and welfare (see Recommendation No. 1).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personal matter.

The 1980 revisions to Title 4 have, for the most part, been beneficial to the operation of the ABC Board. However, those sections which deal with suspension and revocation of licenses and permits place severe restrictions upon the ability of ABC to suspend and revoke licenses for the illegal act of licensee employees.

The Board is also restricted in meeting its statutory responsibilities in protecting the public health, safety and welfare by the size of the enforcement staff which consists of one agent in Juneau, one in Fairbanks and three, including a supervisory agent in Anchorage. Including the supervisory agent, there are only five agents with inspection and enforcement responsibilities for 1,483 licensed premises. However, one other Anchorage Investigator position is vacant.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

Our review of licensing activity of the ABC Board to determine whether all statutory qualifications of licensees were being met revealed no exceptions. The Board has therefore, presented qualified applicants to serve the public.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

No discrepancies were noted during our review of the ABC Board affirmative action program.

IX. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to I and II above and to the previous section, Findings and Recommendations.

APPENDIX C

STATE OF ALASKA
DEPARTMENT OF REVENUE
ALCOHOLIC BEVERAGE CONTROL BOARD
DESCRIPTION OF LICENSE TYPES AND FEES

Source	Description	Annual Fee
Application Fee	For each license application.	$ 50
Beverage Dispensary	To sell or serve on the licensed premises alcoholic beverages for consumption on the licensed premises only.	1,250
Restaurant or Eating Place	To sell beer and wine for consumption only on the licensed premises.	300
Club	To sell alcoholic beverages for consumption only on the licensed premises.	600
Bottling Works	To operate a bottling works where beer and wine may be bottled and sold.	250
Brewery	To operate a brewery where beer is manufactured and bottled or barreled for sale.	500
Winery	To operate a winery where wine is manufactured and bottled or barreled for sale.	250
Package Store	To sell alcoholic beverages to a person in response to a verbal solicitation for purchase received from the person present on the licensed premises or in response to a written solicitation made by a person known to the licensee for a purchase to be received by the person making the solicitation.	750

Source	Description	Annual Fee
Retail Stock	To sell the remaining stock of a package liquor store when the owner wishes to close or terminate business. Sale may only be to licensed persons.	$ 100
General Wholesale	To sell alcoholic beverages in the original package, and wine in bulk, in quantities of not less than five gallons to holders of licenses.	1,000 First $100,00 of sales plus $500 - 10,000 on additional sales
Wolesale Malt Beverage and Wine	To sell malt beverages and wine in the original packages in quantities of not less than five wine gallons to holders of licenses.	200 First $20,000 of sales plus $300 - 10,000 based on additional sales
Distillery	To operate a distillery where alcoholic beverages are distilled and bottled or barreled for sale.	500
Community Liquor	Authorizes a municipality to operate a beverage dispensary or a package store or both subject to the same conditions and fees applicable to beverage dispensary or package liquor store licenses.	1,250 Beverage Dispensary 750 Package Store
Common Carrier Dispensary	To sell alcoholic beverages for consumption aboard a vehicle, boat, aircraft, or railroad buffet car licensed by the State or federal agency for passenger travel.	350 Per vehicle, boat, aircraf or railroad car
Recreational Site	To sell beer and wine at a recreational site during and one hour before and after a recreational event which is not a school event, for co sumption on designated areas at the site.	400

Source	Description	Annual Fee
Pub	To sell beer and wine for consumption only at designated premises located on the campus of an accredited college or university.	$ 400
Caterer	Authorizes the holder of a [illegible]rage dispensary license [illegible]l or dispense alcoholic [illegible]ges at conventions, [illegible]s, social gatherings, [illegible].ng events or similar [illegible]rs held off the holder's licensed premises.	50
Special Events	To sell or dispense beer or wine for consumption at designated premises for a specific occasion and limited period of time. Only a nonprofit organization may acquire the permit.	50 Per day
Conditional Contractor	To sell beer or wine for consumption only on designated premises for one year from the date of issuance of the permit at construction sites which are located outside a city and inside the boundaries of a military or naval reservation.	600

LEGISLATIVE AUDIT

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, AK 99811

Dear Mr. Wilkerson:

This letter is in response to your Recommendation No. 1 contained in your preliminary audit report of the Alcoholic Beverage Control Board dated December 15, 1982.

Without generating a lengthy dissertation about staff and budgetary limitations, utilization of present staff, and administrative/judicial due process, we generally believe your recommendation has merit. However, if we understand your perception of enforcement by the board to be criminally oriented, under present law heavy reliance on other state and local-law authority is required, and no single agency could fill a void which the report implies exists.

The board at each and every monthly meeting evaluates its enforcement function through granting or denying license applications, sitting in informal conference, and reviewing hearing officer decisions. The board has scheduled "workshop" sessions during its two-day April meeting in Juneau and will review law and regulations in light of your opinion.

Thank you for the opportunity to respond.

Sincerely,

Robert D. Heath
Commissioner of Revenue

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
SENATE BILL NO. 231

Atricle III, Section 18, of the Alaska Constitution requires the State establish a parole system. This administration supports the Parole Board as the least costly constitutional method of carrying out the parole process. Numerous legislative hearings held around the State over the last four years in conjuction with the sunset review of the Parole Board support this position.

Although the administration expects to submit a comprehensive bill next session to revise the outdated statutes, this bill will extend the life of the Board until the new bill is submitted next session.

The Parole Board is currently in its one year "wind down" now and is due to go out of existence on July 1, 1983. Legislation must be passed by then to comply with the constitutional mandate for a parole system. Expeditious passage of this legislation is strongly supported.

GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

April 6, 1983

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill extending the life of the State Board of Parole to June 30, 1985. Under the current law, that board "sunsetted" June 30, 1982 and is now in its one-year wrap-up period. Unless it is extended, it will go out of existence on June 30, 1983. However, art. III, sec. 21, of the Alaska Constitution says that "A parole system shall be provided by law." Therefore, it is necessary either to extend the life of the present board or establish a new parole system before the present board goes out of existence. It is my intent that members of my administration work with the legislature in dealing with additional issues confronting the parole system.

Sincerely,

Bill Sheffield
Governor

SENATE JUDICIARY COMMITTEE

Meeting Minutes
4/22/83

The meeting was called to order at 1:37 p.m. by Chairman Ray. All members were present.

The first order of business was SENATE BILL 231--Extending the life of the parole board, as to which Senator Ray briefly explained the purpose of the legislation and a discussion was had wherein Senator Pettyjohn stated that he was on the parole board for about two years and thus has some familiarity with the subject matter of the bill and he fully supports it. Senator Ziegler then moved to pass the bill out with individual recommendations. All members voted Do Pass.

The second order of business was SENATE BILL 232--Relating to state liability under AS 03.05, as to which Mark Hutton, who works for the Commissioner of the DEC, testified, concluding that his department opposes the present version of the bill and recommends that action on it be held in abeyance pending the drafting of a better version. After a discussion in which Senators Ray, Eliason and Ziegler participated, it was agreed that the Committee would follow Mr. Hutton's recommendation.

The third order of business was SENATE BILL 243--Modifying or abolishing some common law real property rules, as to which Dick Regan, Research Director for the Alaska Code Revision Committee, testified in favor of the bill and answered various questions posed by each member of the Committee, all of whom participated in a discussion, whereupon Senator Ziegler moved that the bill be passed out with individual recommendations. Senators Josephson, Ziegler and Pettyjohn voted Do Pass. Senators Ray and Eliason voted No Recommendation.

The fourth order of business was the unanimous confirmation of the following new ABC Board appointees:

John Walters from Nome; and

Wesley "Wally" Wallace from Fairbanks

The fifth and final order of business was the following new subcommittee appointments:

SB 163--Use of seat belts in cars.

Senator Pettyjohn

RE: SB 243 on common law property rules

When Professor Jesse Dukeminier was here to testify but had to return to Los Angeles, you suggested we might submit written testimony on SB 243.

For an analysis of the bill we cannot provide a more accurate written statement than the commentary in Joint House and Senate Journal Supplement No. 8.

However, in an effort to express the reasons for the bill non-technically, I recently provided the attached statement to Chairman Bussell. It could serve as written testimony, and I'll be glad to answer questions about the bill at the hearing today.

DR:chw

Enclosure

FURTHER EXPLANATION OF THE REASONS FOR SB 243 ON COMMON LAW PROPERTY RULES

SB 243 deals with common law rules with roots that go back to feudal land holdings.

The main purpose of the bill is to remove possible hidden traps in order to make it more sure that the terms of a person's will will be carried out.

The bill benefits the person who drafts his or her own will. It benefits lawyers, too, in the same sense that accident prevention benefits insurance companies. But everybody who may leave property by a will benefits by reducing the risk of accidents in will drafting so the person's true intentions can be carried out. Nothing is much sadder than the bitterness engendered among family members by a disputed will. These ancient common law rules can be a cause of that bitterness.

The bill is to clarify and simplify the law by abolishing two old rules and changing a third.

Section 1 is a statement of intent that would become a revisor's note with the sections when they are published in Alaska Statutes. It is a broad brush explanation using the common names for the rules.

Section 2 changes the rule against perpetuities. That rule is well entrenched and it is needed. It sets a limit on how long a person can control who will own the property the person deeds, gives, or includes in the person's will.

But the rule works injustices by invalidating from the start many transfers that would be completed well within the time limit. The old rule determines validity or invalidity of a transfer based on possibilities, no matter how outlandishly unlikely the possibilities may be. This bill would carefully change the rule by statute so actual events, not unlikely possibilities, determine validity of a transfer. And any transfer that still is not completed within the time limit is to be carried out as nearly as possible within the limits of the rule as changed.

More than half of the states, England, and several Commonwealth jurisdictions have changed the rule, and the form we are proposing has proven to be suitable in other jurisdictions.

Sections 3 and 4 of the bill would abolish the other two old rules--the "Rule in Shelley's Case" and the "doctrine of destructibility of contingent remainders." The reasons for the two rules no longer exist in modern land holding. But common law rules aren't statutes that can just be repealed by a repealer section. Abolishing or changing a common law rule requires careful use of language. Unfortunately, as the rules are old, some old-sounding terms are needed in a bill that abolishes or changes them.

As is pointed out in joint journal supplement number 8, whether the Rule in Shelley's Case presently applies in Alaska is unclear. It is easy to make it clear that the rule does not apply by enacting section 3 of SB 243, the kind of course that has been taken in the vast majority of states.

Similarly, about three-fourths of the states have managed in one way or another to get rid of the long outdated doctrine of destructibility of contingent remainders, as the bill does in section 4.

Enactment of the bill would include Alaska among the enlightened jurisdictions that have enacted statutes to assure that the old rules from the feudal system will no longer interfere with reasonable property dispositions.

RE: SB 243 on common law property rules

When Professor Jesse Dukeminier was here to testify but had to return to Los Angeles, you suggested we might submit written testimony on SB 243.

For an analysis of the bill we cannot provide a more accurate written statement than the commentary in Joint House and Senate Journal Supplement No. 8.

However, in an effort to express the reasons for the bill non-technically, I recently provided the attached statement to Chairman Bussell. It could serve as written testimony, and I'll be glad to answer questions about the bill at the hearing today.

Enclosure

FURTHER EXPLANATION OF THE REASONS FOR SB 243 ON COMMON LAW PROPERTY RULES

SB 243 deals with common law rules with roots that go back to feudal land holdings.

The main purpose of the bill is to remove possible hidden traps in order to make it more sure that the terms of a person's will will be carried out.

The bill benefits the person who drafts his or her own will. It benefits lawyers, too, in the same sense that accident prevention benefits insurance companies. But everybody who may leave property by a will benefits by reducing the risk of accidents in will drafting so the person's true intentions can be carried out. Nothing is much sadder than the bitterness engendered among family members by a disputed will. These ancient common law rules can be a cause of that bitterness.

The bill is to clarify and simplify the law by abolishing two old rules and changing a third.

Section 1 is a statement of intent that would become a revisor's note with the sections when they are published in Alaska Statutes. It is a broad brush explanation using the common names for the rules.

Section 2 changes the rule against perpetuities. That rule is well entrenched and it is needed. It sets a limit on how long a person can control who will own the property the person deeds, gives, or includes in the person's will.

But the rule works injustices by invalidating from the start many transfers that would be completed well within the time limit. The old rule determines validity or invalidity of a transfer based on possibilities, no matter how outlandishly unlikely the possibilities may be. This bill would carefully change the rule by statute so actual events, not unlikely possibilities, determine validity of a transfer. And any transfer that still is not completed within the time limit is to be carried out as nearly as possible within the limits of the rule as changed.

More than half of the states, England, and several Commonwealth jurisdictions have changed the rule, and the form we are proposing has proven to be suitable in other jurisdictions.

Sections 3 and 4 of the bill would abolish the other two old rules--the "Rule in Shelley's Case" and the "doctrine of destructibility of contingent remainders." The reasons for the two rules no longer exist in modern land holding. But common law rules aren't statutes that can just be repealed by a repealer section. Abolishing or changing a common law rule requires careful use of language. Unfortunately, as the rules are old, some old-sounding terms are needed in a bill that abolishes or changes them.

As is pointed out in joint journal supplement number 8, whether the Rule in Shelley's Case presently applies in Alaska is unclear. It is easy to make it clear that the rule does not apply by enacting section 3 of SB 243, the kind of course that has been taken in the vast majority of states.

Similarly, about three-fourths of the states have managed in one way or another to get rid of the long outdated doctrine of destructibility of contingent remainders, as the bill does in section 4.

Enactment of the bill would include Alaska among the enlightened jurisdictions that have enacted statutes to assure that the old rules from the feudal system will no longer interfere with reasonable property dispositions.

PMS SEN BILL RAY 1305

JUNEAU

THE PROBATE LAW SECTION OF THE ALASKA BAR ASSOCIATION CONSIDERED THE DRAFT OF SB243 RELATING TO THE ABOLISHMENT OF THREE COMMON LAW PROPERTY RULES AT ITS REGULAR MEETING ON JANUARY 20 1983. THE SECTION FAVORS THE PASSAGE OF THE BILL. THE SECTION FEELS THAT THE THREE COMMON LAW RULES IN QUESTION ARE ANTIQUATED AND WERE DESIGNED TO DEAL WITH SOCIAL PROBLEMS THAT NO LONGER EXIST. THE SECTIONS AGREE THAT PROPOSED LEGISLATION IS SUFFICIENTLY SIMPLE AND DIRECT TO ACCOMPLISH THE DESIRED RESULTS. WE URGE YOUR FAVORABLE CONSIDERATION OF THE BILL.

MEMORANDUM

TO: Chairman, Alaska Legislative Council

FROM: John W. Abbott, Chairman
Alaska Code Revision Commission

DATE: February 22, 1983

RE: Bill on common law property rules

Pursuant to authority granted in AS 24.20.075(c), the Alaska Code Revision Commission has prepared the attached bill on common law property rules and asks that it be introduced in the legislature.

The bill deals with three old common law property rules. If enacted it will modify the rule against perpetuities, and will abolish the rule on destructability of contingent remainders and a rule known to lawyers as "the rule in Shelley's case."

The reasons for treating these rules by statute and the debt the commission owes to Professor Jesse Dukeminier in its preparation are matters covered in the attached commentary on the bill.

FEBRUARY 1983

COMMENTARY TO ACCOMPANY DRAFT BILL

ON COMMON LAW PROPERTY RULES

BILL NO.

GENERAL BACKGROUND

The rules dealt with in the attached bill reach so far back that few remember they exist. That is one of the main reasons for the bill. The rules, when not recognized and dealt with by statute, can defeat the intention of a person who makes a will or otherwise transfers real property. Many Alaskans draft their own wills, and many Alaska attorneys are general practitioners who may not be aware that these archaic rules still may be in effect in Alaska.

The common law that has developed through custom and precedent is the basic law of Alaska, subject to AS 01.10.010. That section provides:

> SEC. 01.10.010. APPLICABILITY OF COMMON LAW. So much of the common law not inconsistent with the Constitution of the State of Alaska or the Constitution of the United States or with any law passed by the legislature of the State of Alaska is the rule of decision in this state.

Statutes are needed to make clear whether certain of the old common law rules regarding land transfers continue to apply and to assure that the rules that apply are modified if no longer consistent with current conditions. A distinguished professor of real property law, Jesse Dukeminier of the UCLA Law School, has focused on the problem caused by these common law property rules and the need for legislation to abolish or modify them. His pointing out the need for legislation in Alaska caused the Alaska Code Revision Commission to consider the subject and to propose the attached bill on three rules--the rule against perpetuities, the rule in Shelley's Case, and the doctrine of

destructibility of contingent remainders. With minor exceptions, the following explanations of the rules and the need for legislation is Professor Dukeminier's, and is adopted by the commission.

Section 1

The Statement of Purpose is self-explanatory.

Section 2

Three common law property rules are dealt with here:

I. AS 34.27.010. MODIFICATION OF THE COMMON LAW RULE AGAINST PERPETUITIES.

Purpose of Proposed AS 34.27.010. Proposed AS 34.27.-010 is to provide the State of Alaska with a Rule against perpetuities that preserves (a) the essential purpose of the Rule, and (b) the intentions of testators, grantors, and settlors of trusts to the maximum extent possible.

What is the Rule Against Perpetuities?

Expressed in the technical language of the law, the rule is as follows:

> No interest is good unless it must vest, if at all, not later than 21 years after some life in being at the creation of the interest.

The purpose of the rule is to prevent property from being tied up for too long a period. It was developed by the English courts to curb the efforts of land owners who wanted to establish family dynasties. These problems are almost nonexistent today.

Why Does the Rule Need Modification?

Many unsound incrustations upon a basically sound rule have accumulated over the many years of the rule's existence. The rule is ridden with superfluous technicalities and decisions that destroy careful and reasonable estate plans offering no threat to the public interest. The following examples illustrate

these technicalities, which are traps for people who write their own wills and for lawyers and their clients:

> The fertile octogenarian. Testator devises property in trust to pay the income 'to my sister A for life, then to A's children for their lives, and then to distribute the principal to A's grandchildren.' A is eighty years old at testator's death. Because the law conclusively presumes A to be capable of bearing children, for purposes of the rule against perpetuities, the remainder to A's grandchildren might not vest until the death of A's children conceived after testator's death, which is too remote. The remainder to A's grandchildren is void.
>
> The unborn widow. Testator devises property 'to my son A for life, then to A's widow for life, then to A's issue per stirpes.' The remainder to A's issue may not vest until the death of A's widow, who might be a woman not yet born at testator's death. Hence the remainder to A's issue is void
>
> The slothful executor. Testator devises property 'to my issue living upon distribution of my estate.' Because the law assumes the distribution of testator's estate may occur more than twenty-one years after lives in being at testator's death, the gift to testator's issue is void.

The two basic difficulties with standard perpetuities doctrine, which result in defeating reasonable dispositions by reasonable property owners, are these:

> 1. In determining whether an interest violates the rule the courts close their eyes to events which actually happen and decide the case upon events which might happen after testator's death. For example, the courts assume that a man or woman of any age--even eighty or beyond--can have a child. See the fertile octogenarian case above. It will be observed that the first sentence of proposed AS 34.27.-010 corrects this by declaring that 'the period of perpetuities shall be measured by actual rather than possible events.' If in fact A does not have a child born after testator's death the gift is good. This sentence enacts the wait-and-see doctrine.
>
> 2. If it is found that an interest violates the rule, the entire interest is struck down instead of cutting it down to permissible size. It will be observed that the second sentence of proposed AS 34.17.010, corrects this

> by declaring that the interest 'shall be reformed, within the limits of that rule, to approximate most closely the intention of the creator of the interest.' (It should be noted that this provision of proposed AS 34.17.010 applies to private dispositions the cy pres doctrine, with which all lawyers are familiar, whereby when the purpose of a charitable trust fails the money is applied, under the supervision of the Attorney General, to such other charity as most closely approximates the general charitable intent of the settlor of the trust.)

All the known anomalies in the decisions on the rule will be automatically corrected by these two simple provisions. Modification of the rule by these provisions will avoid a trap for people who draft their own wills, and will also practically eliminate any potential liability of lawyers for falling into what John Chipman Gray (the great authority on the rule) called "the net which the rule spreads for the unwary."

Is There General Recognition that the Rule is Defective?

Yes. The wait-and-see doctrine determines validity by what actually happens, not by what might happen. The wait-and-see doctrine has been adopted in one form or another by fourteen states, England, and several Commonwealth jurisdictions. Fla. Stat. § 689.22(2) (1977); Ky. Rev. Stat. § 381.216 (1972); Ohio Rev. Code Ann. § 2131.08 (Page 1978); 20 Pa. Cons. Stat. Ann. § 6104(b) (Purdon 1975); Va. Code § 55-13.3 (approved April 7, 1982); Vt. Stat. Ann. tit. 27, § 501 (1975); Ill. Ann. Stat. ch. 30, § 195 (Smith-Hurd 1969 & Supp. 1979); Wash. Rev. Code §§ 11.98.010-.050 (1976); Conn. Gen. Stat § 45-95 (1979); Me. Rev. Stat. tit. 33, § 101 (1978); Md. Est. & Trusts Code Ann. § 11-103(a) (1978); Mass. Gen. Laws Ann. ch. 184A, § 1 (West 1977); Phelps v. Shropshire, 254 Miss. 277, 785, 183 So. 2d 148, 161-62 (1966); Merchants Nat'l Bank v. Curtis, 90 N.H. 225, 230-31, 97 A.2d 207, 211 (1953); English Perpetuities

and Accumulations Act, 1964, c. 55, § 3. In May 1979, the American Law Institute approved the wait-and-see approach to be incorporated into the Restatement (Second) of Property. Restatement (Second) of Property, Donative Transfers §§ 1.3-.4 (Tent. Draft No. 2, 1979).

Under the cy pres doctrine the invalid interest is reformed to give effect as nearly as possible to the general intent of the creator of the interest. The cy pres doctrine has been adopted in fifteen states and by the Restatement (Second) of Property. Cal. Civ. Code § 715.5 (West 1970); Mo. Ann. Stat. § 442.555 (Vernon Supp. 1979); Okla. Stat. tit. 60, § 75 (1971 & Supp. 1978); Tex. Rev. Civ. Stat. Ann. art. 1291b (Vernon Supp. 1978); Ky. Rev. Stat. § 381.216 (1972); Ohio Rev. Code Ann. § 2131.08(c) (Page 1976); Vt. Stat. Ann. tit. 27, § 501 (1975); Va. Code § 55-13.3 (approved April 7, 1982); Wash. Rev. Code § 11.98.030 (1976); In re Estate of Chun Quan Yee Hop, 52 Haw. 40, 46, 469 P.2d 183, 197 (1970); In re Foster's Estate, 190 Kan. 498, 503, 376 P.2d 784, 788 (1962) (semble); Carter v. Berry, 243 Miss. 321, 376, 140 So. 2d 843, 855 (1962); Edgerly v. Barker, 66 N.H. 434, 31A. 900 (1891); Berry v. Union Nat'l Bank, 262 S.E.2d 766 (W. Va. 1980) (a particularly persuasive opinion analyzing cy pres and citing most of the relevant literature); See also Atchison v. City of Englewood, 568 P.2d 13, 17-18 (Colo. 1977) (reforming commercial agreement so as to avoid violation of the Rule). Restatement (Second) of Property, Donative Transfers § 1.5 (Tent. Draft No. 2, 1979), applies the cy pres doctrine if the interest actually vests beyond the perpetuities period. Thus, the Restatement has adopted the modifications adopted in Kentucky, Mississippi, New Hampshire, Ohio, Vermont, and Virginia. These modifications are provided in proposed AS 34.27.010 of the statute proposed for Alaska.

To summarize, proposed AS 34.27.010 draws upon and combines the best features of existing legislation in other American states, and does so in simple form.

Who Will Benefit from This Bill?

This bill will cause innocent and reasonable family dispositions, which standard perpetuities doctrine now invalidates, to be upheld within the limits of the rule. Instead of determining validity of interests by what might happen, often unforeseen by competent lawyers, it will determine the validity of interests by what actually occurs. It will benefit the general practicing lawyer who has difficulty keeping abreast of the intricacies and technicalities of the rule. It will also benefit the property owner who consults the lawyer or who drafts his own will.

It should be noted that the statute does not affect or modify any disposition that would have been valid prior to enactment of the statute. It only affects dispositions that heretofore would be void.

How Will the Statute Apply?

The discussion that follows is somewhat more technical.

In the first place, it would seem desirable for a court to decline to pass on the validity of a future interest which may or may not vest within the rule until previous interests have expired; in the case of land no issue of possession can arise until this time comes, and in the case of a trust the trustee is not in a position where he or she has to distribute. It is standard practice in many jurisdictions to decline to pass on a perpetuities issue until previous interests expire. The proviso in the first sentence of proposed AS 34.27.010

("However, the period of perpetuities may not be measured by a life whose continuance does not have a causal relationship to vesting or failure of the interest") prevents waiting out lives which have no relationship to the gift.

If decision is postponed until previous interests expire, it will usually be found that "actual rather than possible events" have eliminated any hypothetical violation of the rule. If, however, actual events still produce a violation of the rule, then the court under the second sentence of proposed AS 34.27.010 will enter a decree reforming the will, deed, or trust in such a way as to carry out most closely the intent while still staying within the limits of the Rule.

Two common examples:

(1) A childless farmer has several brothers. His youngest brother, John, works the place with him. John has several children. The farmer's will leaves the place to John for life, and then to John's children who reach the age of 25. Under standard perpetuities doctrine, the gift to the children is void; and on John's death the property will pass to the farmer's heirs (who would include the other brothers). Under the proposed Act the validity of the remainder would not be determined until John's death; then, if all John's children were born in the testator's lifetime or if all were over 4 years old at John's death, no reformation of the interest would be required. The remainder would actually vest within the period. If there were at John's death a child under 4 who was born after the testator's death, the will would be reformed to give the farm to such of John's children as should reach 21. The justification is that the testator obviously would have preferred earlier vesting to total invalidity if the point were put to him.

(2) A father has a son, aged 45, who is married and has three children. He leaves his property in trust to pay the income to the son for life, then to pay the income to the son's widow for life, and then to pay the principal to the son's children who should be living at the death of the survivor of the son and his widow. Under standard perpetuities doctrine the gift to the children is void, because of the possibility that the son's present marriage might end by death or divorce, the son might marry a woman who was unborn at the testator's death, there might be children of this second marriage, and the second wife might survive her husband. Of course, the chance that these events would occur is absurdly slight; but the existence of the chance causes the standard rule to be violated. Under the proposed Act it would not be determined whether the gift to children is valid or void until the son's death, when it would doubtless appear that the "actual events" did not violate the rule. However, on the long chance that this extraordinary series of events actually did take place, the court would reform the gift to the children so that it would read: ". . . to such children of my son as shall be living at the death of the survivor of my son and any widow of his, provided that, if my son leaves a widow who was unborn at my death, the interest to my son's children shall vest not later than 21 years after my son's death." As thus reformed, the gift is valid, no matter what happens.

Conclusion

Proposed AS 34.27.010, if enacted, will provide Alaska with a law of perpetuities which at once safeguards the public interest against overlong dispositions, carries out to the greatest feasible extent the intentions of testators,

grantors, and settlors of trusts, and removes potential traps for the lay will drafter and the general practicing attorney.

II. AS 34.27.020. ABOLITION OF THE COMMON LAW RULE IN SHELLEY'S CASE.

What is the Rule in Shelley's Case?

Many lawyers know the rule in Shelley's Case only as a quaint rule learned in law school and immediately forgotten after the real property law exam. Under the rule if one instrument creates a life estate in land in a person and purports to create a remainder in the person's heirs, the remainder becomes a remainder in fee simple in the grantee, not in the grantee's heirs. Thus:

> Testator devises land to A for life, remainder to A's heirs. The remainder to A's heirs is void. A takes the remainder in fee simple, which merges with A's life estate, giving A a fee simple in possession. See 1 American Law of Property §§ 4.40-4.52.

The rule in Shelley's Case is a rule of law defeating the testator's intent to give A only a life estate. It serves no good purpose. It is a feudal anachronism which has been abolished in thirty-nine states and the District of Columbia.

Does the Rule Exist in Alaska?

It is not clear whether the rule exists in Alaska, and the question should be answered by legislation. Deferring to the courts would only cause someone to incur major litigation expenses and would perpetuate the period of uncertainty until someone is willing to incur the expense in time and money to resolve the question.

The rule in Shelley's Case was abolished by statutes in Alaska that were part of the original code adopted from Oregon, Compiled Laws of Alaska 1913, Sections 586 and 587. These sections were carried over into Alaska Statutes in 1962 as AS 13.05.210 and AS 13.05.220. They were:

> Sec. 13.05.210. DEVISE OF ESTATE FOR LIFE WITH REMAINDER TO HEIRS. If any person by last will devise any real estate to any person for the term of such person's life, and after his death, to his or her children or heirs, or right heirs in fee, such devise shall vest an estate for life only in such devisee, and remainder in fee simple in such children.
>
> Sec. 13.05.220. ESTATE BY DEED OR WILL. Where any estate, real, or personal is given by deed or will to any person for his life, and after his death to his heirs, or to the heirs of his body, the conveyance shall be construed to vest an estate for his life only in such person, and a remainder in fee simple in his heirs or the heirs of his body.

These sections were repealed by the blanket repeal of AS 13 when the Uniform Probate Code was adopted in Alaska by ch. 78, SLA 1972.

The rule of statutory construction involved is AS 01.-10.100(c):

> (c) When any act repealing a former act, section, or provision is itself repealed, such repeal does not revive the former act, section, or provision, unless it is expressly so provided.

AS 13.05.210--13.05.220, now repealed, simply declared a rule of law that negated a common law rule. Whether the common law rule in Shelley's Case was revived by the 1972 repeal of AS 13.-05.210--13.05.220 is an open question. Proposed AS 34.27.020 in the bill would include Alaska clearly with the 39 states in which the rule is specifically abolished by statute.

Why Should the Rule be Abolished?

The rule developed out of feudal land holdings where feudal incidents (equivalent to death taxes) came due if land descended to the heir, not if the heir took by way of remainder. To prevent tax avoidance by giving A a life estate only, with remainder to A's heirs, the rule was invented. No reason for the rule exists in the present system of land holding, but it

is ingrained in the common law and crops up occasionally to defeat testamentary intent in the few states where the rule is not abolished by statute.

III. AS 34.27.030. ABOLITION OF THE COMMON LAW DESTRUCTIBILITY OF CONTINGENT REMAINDERS.

What is the Rule on Destructibility of Contingent Remainders?

At English common law a legal contingent remainder in land was destroyed if it did not vest at or before the termination of the preceding freehold estate. Thus:

> Testator devises land to A for life, then to A's children who reach 21. Thereafter A dies, leaving two children aged 15 and 12. Because the children are under 21, the remainder is destroyed and A's children never take. Testator's heirs take a fee simple absolute at A's death. See 1 American Law of Property §§ 4.60-4.63.

Using the same example and assuming proposed AS 34.27.030 has been enacted, the state of the title is:

> A has a life estate, A's children have a contingent remainder, and the testator's heirs have a reversion. If A dies leaving children under 21, possession of the land will go to the testator's heirs until a child reaches 21. The testator's heirs will have to surrender possession to A's first child to reach 21, who in turn will have to share possession with his siblings who reach 21. This is what is meant by the final sentence of AS 34.27.030: "the remainder [in A's children] takes effect [after the termination of the life estate] in the same way as a springing or shifting executory interest." The remainder is not destroyed at A's death, but takes effect [springs up] later if the condition is met.

There are two types of future interests in transferees: remainders and executory interests. A remainder follows a life estate in possession. An executory interest is an interest which springs up in the future at some time other than at the death of a life tenant; it does not follow a life estate. Remainders were recognized in early feudal days; executory

interests were made permissible by the Statute of Uses (1536). The main difference between remainders and executory interests was that remainders were destroyed if they did not vest upon termination of the life estate, whereas executory interests--which did not follow life estates--were indestructible. It is this difference that AS 34.27.030 wipes out.

Why Should the Doctrine be Abolished by Statute?

This doctrine ought to be abolished because it defeats the testator's intent. In the above example there is no reason why A's children should not take when they reach 21. This doctrine has been abolished in about three-fourths of the states, but not expressly abolished in Alaska. There appears to be no Alaska case accepting or rejecting it.

There are ways an astute lawyer can draft a will to avoid the consequences of this doctrine, but not all lawyers and very few non-lawyers are aware of the potential problem. Until the doctrine is abolished by statute the potential exists for malpractice by attorneys drafting wills and for frustration of the testamentary intent of persons who carefully plan for the disposition of their property after death.

SB 243
Fiscal Note
Analysis

This bill modifies and abolishes some common law property rules. It is part of an ongoing effort of the Code Revision Commission to clarify and update the state's property statutes in a model form. Because this action enhances the legal process there will be no fiscal impact on the Department of Law's operations.

SB

257

FREE

Federation's Role in our Enterprise Economy

25 May 1983

Representative Charlie Bussell
Chairman of the Judiciary Committee
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Re: Legislative Ethics -- SB 257

Dear Representative Bussell:

On May 23, 1983, the FREE Committee wrote to you concerning SB 257 and HB 362. Since that letter was posted, the final version of SB 257 as it was passed by the Senate on friday, May 20, became available in Anchorage. It is our understanding that SB 257 will be considered by your committee on monday, May 30, at 1:30 p.m. and, therefore, a representative of the FREE Committee will be attending that meeting.

There were 14 significant amendments made on the floor to the Senate Judiciary Committee version of the bill before it was passed by the Senate. The FREE Committee has reviewed those amendments and submits the following comments and suggested amendments for your consideration. (Deletions are in brackets and additions are underlined.)

1. To avoid confusion and to ensure that the state can continue to contract non-competitively with sole sources, for fair traded items, for air taxi services, or for other services or goods enumerated in AS 37.05.230, page 3, line 29 and page 4, lines 1 through 7 should be amended to read as follows:

> contract or lease unless the contract or lease is let [by competitive bidding under] pursuant to AS 37.05.230 or the total amount of the state contract or lease is $1000 or less, [or is a standardized contract or lease generally available to the public at large, members of a profession, occupation or group which was developed under publicly established guidelines]. A person has an interest in a state contract or lease under this section if the person receives direct or indirect financial benefits.

There are many occasions when the state has a legitimate reason to contract non-competitively and the FREE Committee believes that it is important to protect that right even where one possible beneficiary is a legislator or employee of the legislature. The second deletion is suggested, because it is not

clear why the deleted language was included and is, therefore, unnecessary.

2. FREE Committee believes that public officials have the right to expect that ethical standards be clearly defined so that they can avoid ethical problems and, therefore, suggests that the following sentence be added to Sec. 24.60.050 (a) at page 4, line 18:

> determining qualification. Within 30 days, the committee shall issue a list of loans that are not considered to create a conflict of interest. Such list shall be reviewed annually.

3. While the public's right to know is important, FREE believes that legislators and legislative employees have a right to privacy. Loan applications and the supporting documents often contain information that should be kept confidential and, therefore, FREE recommends that only notice of a loan application be sent to the APOC. It is simply not the function of the Ethics Committee to second guess the decision of the lending agency to lend money. Where an agency exercises its authority to lend money, even courts are reluctant to impose a contrary determination. More importantly, since the Ethics Committee has subpeona powers and the power to require the production of evidence when it is investigating a complaint, it is unnecessary to require routine production of such confidential information where no complaint has been filed.

In addition, FREE believes that it should be incumbent upon the legislator seeking the loan to notify the APOC, rather than upon the lending agency. Finally, FREE believes that to be consistent, the bill needs to specify where loan applications of legislative employees should be filed. To minimize expense, FREE suggests that APOC could be designated, so long as AS 15.13.030 was amended to permit APOC to receive the information. Based on these reasons, the following changes to page 4, lines 27-29 and to page 5, lines 1-3 are suggested:

> the [lending agency] legislator shall send a [copy] notice of the application to the Alaska Public Offices Commission, which will incorporate the [material] notice into the applicant's financial disclosure statement, if the applicant is required to file a disclosure statement or which will place the information in a legislative employee loan file which is open to the public, if the applicant is not required to file a disclosure statement. [All records relating to a state loan to a person to whom this chapter applies may be disclosed to the committee.]

4. FREE is also concerned that Sec. 24.60.050 (d) (page 5, lines 4-9) only requires state loan agencies to list outstanding loans. It does not clearly require quasi-state loan agencies

(such as the Alaska Commercial and Fishing and Agriculture Bank) to provide the same information. Since a large number of loans are processed through such agencies, this language should be re-written to address them. With that in mind, the following language is suggested for page 5, line 4:

> (d) Each February 1, each [state loan agency] lending agency that receives more than 50% of its funding from state funds must deliver a . . .

5. Since reasonable regulations should apply to everybody, FREE believes that Sec. 24.60.050 (e) (page 5, lines 10-14) should be deleted entirely. In addition, if separate well written regulations setting up procedures for granting loans are enacted, it makes an Ethics Committee unnecessary, because there would be no reason to review an agency's decision to grant a loan.

6. For reasons discussed above in paragraph 3, subsection (f), page 5, lines 17-18 should be re-written as follows:

> to determine whether [appropriate procedures were observed in granting or reviewing the loans] loan conditions imposed by the lending agency are being enforced. The division shall report its findings to the committee by April 1.

7. The FREE Committee believes that the entire Sec. 24.60.070, beginning page 5, line 29 and ending page 6, line 16, should be deleted. This section duplicates information already provided to the APOC by legislators and where it would affect legislative employees, that information would already have been filed with the APOC by the other business partner (legislator, public official required to file a financial disclosure, or registered lobbyist). The only economic association that would not already have been disclosed would be an association between supervisor and employee. It is difficult to understand why this is relevant to the purpose of this bill, legislative ethics. Therefore, FREE suggests that this section be deleted.

8. The original language found in SB 257 for Sec. 24.60.080 should be used rather than the new language, page 6, lines 17-25. The original language was clearer and carefully identified gifts which would not create conflicts of interests. The present version creates a legal problem by requiring intent to be established.

9. To be consistent with the rest of Sec. 24.60.090, line 26, page 6, should be changed to read as follows:

> Sec. 24.60.090. NEPOTISM. (a) [A relative of] An individual who is related to a member of the . . . .

10. Sec. 24.60.100 allows legislators and legislative

employees to represent clients before state agencies, boards and commissions for compensation. FREE believes that this is improper and recommends that the present section be deleted and re-written as follows (page 7, lines 9-17):

> Sec. 24.60.100. REPRESENTATION. (a) Except as provided in this section, a member of the legislature or a person employed by an agency of the legislature established under AS 24.20 may not represent another person for compensation before an agency, board, or commission of the state.
>
> (b) A member of the legislature may represent a client in
>
> (1) an action before a court of the state; or
>
> (2) a matter which was pending at the time a person to whom this chapter applies assumes office or is employed.

The FREE Committee believes that if a person receives no compensation, representation does not create a conflict of interest. Legislators should be allowed to represent constituents without fear that they will be subject to censure.

11. To avoid creating unnecessary, expensive permanent interim committees, the FREE Committee suggests that page 7, line 26, be amended to read as follows:

> the Rules committee shall maintain a [public] record open to the public of the disclosure . . . .

12. In a time of declining revenues, FREE Committee believes that every effort must be made to reduce government and its costs. Therefore, FREE suggests that any committee created to address violations of the ethical code be limited to employing staff only when there is in fact a complaint to investigate. The following addition to page 8, lines 21 and 22, is therefore suggested:

> (f) The committee or a subcommittee may contract for professional services and may employ staff as it considers necessary to investigate a complaint and to recommend action by the legislature. The authority of the committee or subcommittee to contract for professional services or to employ staff is expressly limited to those times that it is actively addressing a complaint.

13. The FREE Committee does not believe that any Ethics Committee created by this legislation should be bound by its inaction on a request for an advisory opinion and, therefore, recommends that the sentence binding the committee be eliminated. The section would then read as follows (page 9, lines 8-15):

Sec. 24.60.150. ADVISORY OPINIONS. The committee shall issue an advisory opinion within 30 days on the request of a person to whom the chapter applies as to whether the facts and circumstances of a particular case constitute a violation of ethical standards. [If an advisory opinion is not issued within 30 days after the request is filed with the committee, the facts and circumstances of the particular case do not constitute a violation of the ethical standards.] The opinion issued [or considered issued] is binding on the committee in any subsequent . . . .

14. FREE Committee does not believe that it is appropriate to leave a legislator or legislative employee open to investigation for a violation of this chapter for 4 years. This is unreasonable. Since a person who intentionally hides his or her unethical behavior is not subject to any time limit and since criminal prosecution is not affected by this section, the FREE Committee recommends that any complaint must be brought within one year of the alleged violation. It is too difficult to reconstruct the circumstances surrounding a complaint 4 years later. The amended language would read on page 9, line 26, as follows:

a proceeding begun within [four] one year[s] after the alleged violation . . . .

15. Subsection (d) should also be re-written. Since a complaint can be initiated by one private person, it only makes sense that a complaint should be allowed to be initiated by one sub-committee member where the complaint is against a legislator. (It should be remembered that each sub-committee only has three members and this bill would require all three to initiate the complaint.) In addition, the FREE Committee sees no reason to stay all pending actions before a committee within 60 days preceding a state primary or general election. There is some merit to not allowing complaints to be filed within the 60 day period, however. The following language is, therefore, recommended (page 10, lines 7-17):

the committee. A complaint may be initiated by any [private] person [or by three or more members of the committee). A complaint shall be in writing and signed under oath by the person making the complaint. No complaint, other than a complaint initiated by [five or more members] the majority of the members of the committee, may be received within a period fo 60 days preceding a state primary or general election. [All proceedings pending before the commission on the 60th day preceding a state primary or general election are stayed unless the proceedings are based on a complaint initiated by five or more members of the committee. No further action may be taken in the stayed proceeding

until the legislature next convenes in regular session.]

16. Line 15, page 11 should be amended to set a specific minimum notice period for setting a hearing. This is only fair. The time itself should only be a minimum and is somewhat arbitrary. The language could read as follows:

> the committee with a minimum of 10 days notice to the complainant, if any, and to the . . . .

17. The Committee believes that subsections (j) and (k) found on page 12, lines 3-19, appear to conflict and are somewhat difficult to understand. It is suggested that they be carefully considered. In particular, the phrase, "The order is confined to this determination." needs to be clarified. While subsection (j) seems to make this order public immediately, subsection (k) appears to require a 30 day waiting period (lines 16-18). The Committee also suggests that the 30 day period should run whether the legislature is in session or not. To do otherwise allows the committees to engage in political manipulation. Therefore, the Committee recommends that the following deletion be made (page 12, lines 17-18):

> the referral. [Days during which the legislature is not in session may not be counted in determining the 30 day period.] The legislature . . . .

18. Finally, the FREE Committee is concerned about frivolous accusations and complaints. Therefore, the Committee has enclosed a copy of a statute found in the Louisiana ethics legislation which provides a penalty for false accusations. While the penalty provisions might be harsh, it is suggested that this is one approach that the legislature might consider.

Ethics legislation is important to Alaska, its citizens and the persons directly affected by this legislation. The FREE Committee urges you to carefully consider its recommendations.

Sincerely,

Cheri C. Jacobus

Governor Bill Sheffield

D. Prescription.—No action to enforce any provisions of this Part shall be commenced after the expiration of two years following the discovery of the occurrence of the alleged violation or four years after the alleged violation, whichever period is shorter. No action may be taken against a violator who committed the violation prior to the effective date of this Chapter. Added Acts 1964, No. 110, § 1.

Library references: States ⇨81; C.J.S. States § 85.

§ 1146. Criminal laws not affected

Nothing in this Part is intended to nor is to be construed as repealing, amending or modifying in any way the provisions of ar of the criminal or penal laws of this state. Added Acts 1964, No. 110, § 1.

Library references: Criminal Law ⇨15; C.J.S. Criminal Law § 27.

§ 1147. Penalty for false accusations

Any person who shall knowingly and intentionally file a false complaint with either the Louisiana Commission on Governmental Ethics or the Louisiana Board of Ethics for State Elected Officials or any member of either said board or commission who shall knowingly and intentionally initiate action against any state employee, board or commission member or elected official knowing such action to be false shall, upon conviction in a court of competent jurisdiction, be guilty of the crime of making false accusations.

Whoever commits the crime of making false accusations shall be fined not more than five thousand dollars or imprisoned, with or without hard labor for not more than five years, or both. Added Acts 1964, No. 110, § 1.

Library references: Malicious Prosecution ⇨78; C.J.S. Malicious Prosecution § 116.

§ 1148. Procedure and rules of evidence for hearings

Notwithstanding any other provisions of this Chapter, all hearings conducted by the Louisiana Commission on Governmental Ethics and by the Louisiana Board of Ethics for State Elected Officials shall be held in accordance with the rules of procedure set forth in Title 15 of the Louisiana Revised Statutes of 1950, including but not restricted to those rules governing the admissability of evidence and all other rules pertaining to the introduction of and the weight to be given to any evidence. Added Acts 1964, No. 110, § 1.

MEMORANDUM

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Representative Randy Phillips R.P.

DATE: May 25, 1983

RE: Conflict of Interest Legislation
(House Bill 362, CSSB 257 (Jud) am)

Attached are the following items for your committee's review:

1. Memorandum dated May 24, 1983, entitled "Comparison of CSSB 257 (Jud) am and SB 257. As you know, SB 257 is the same as House Bill 362.

Attached to this memorandum is a copy of CSSB 257 (Jud) am in which the changes from SB 257 to the Senate-passed version have been highlighted.

2. Memorandum dated May 25, 1983, comparing the Legislative Ethics Commission as proposed in HB 362/SB 257 and the Select Committee on Legislative Ethics as proposed in CSSB 257 (Jud) am.

If you have any questions, please do not hesitate to contact me. I plan on being in attendance at this Friday's meeting when I understand this subject matter will be before your committee.

MEMORANDUM

FROM: Janet Seitz J. Seitz

DATE: May 25, 1983

RE: Conflict of interest legislation

Attached is a seven-page comparison of the Legislative Ethics Commission, as contained in House Bill 362/Senate Bill 257, and the Select Committee on Legislative Ethics, as contained in CSSB 257 (Jud) am.

The provisions for the Legislative Ethics Committee start in Sec. 24.60.130, starting on page 8 of SB 257. The provisions for the Select Committee on Legislative Ethics start in Sec. 24.60.130, starting on page 8 of CSSB 257 (Jud) am.

The page and line number references are included for each category.

LEGISLATIVE ETHICS COMMISSION (SB 257/HB 362)	SELECT COMMITTEE ON LEGISLATIVE ETHICS (CSSB 257 (Jud) am)
In legislative branch (p.8, l. 3-5)	In legislative branch (p. 8, l. 3-5)
Seven Members (p. 8, ls. 6-25) One Senator appointed by President with concurrence of 3/4 roll call vote of full membership One Representative appointed by Speaker with concurrence of 3/4 roll call vote of full membership Two persons appointed by Senate President with concurrence of 2/3 roll call vote of full membership Two persons appointed by Speaker with concurrence of 2/3 roll call vote of full membership One former legislator appointed by other commission members	Six Members - two subcommittees (p. 8, ls. 6-14) Senate subcommittee 3 Senators appointed by President with concurrence of 3/4 roll call vote of full membership House subcommittee 3 Representatives appointed by Speaker with concurrence of 3/4 roll call vote of full membership
No more than 4 members of same party or residents of same organized or unorganized borough (p. 8, ls. 26-28)	No more than two members of each subcommittee may be of same party (p. 8, ls. 15-16)
Commission members shall elect chair and vice-chair and other offices. Legislators may not serve as chair or vice-chair (p. 8, l. 29 to p. 9, l. 3)	Members of each subcommittee shall elect chairs, who shall co-chair meetings (p. 8, ls. 17-18)
Term of office (p. 9, ls. 4-8) Public member - 4 years from Feb. 1 of year of appointment and until successor is appointed and qualifies Legislator may not serve beyond expiration of legislative term Members may not serve more than one full term.	
Members MAY NOT (p. 9, ls. 9-16) Hold or seek elective office (except for legislators who are members)	

LEGISLATIVE ETHICS COMMISSION
(SB 257/HB 362)

Be officer of political party, political committee, or group

Lobby

Vacancy (p. 9, ls. 17-18)
Filled under appointment provisions for balance of term

Services and Staff (p. 9, ls. 19-21)-
Commission may contract for professional services and staff

Compensation (p. 9, ls. 22-28)
No compensation received except for travel and per diem. Legislators who are members of the committee are not entitled to travel or per diem if receiving from legislative duties.

DUTIES OF COMMISSION (p. 9, l. 29 to p. 10, l. 13)

Adopt regulations.

Recommend legislation.

SELECT COMMITTEE ON LEGISLATIVE ETHICS
(CSSB 257 (Jud) am)

Vacancy (p. 8, ls. 19-20)
Filled in same manner as original appointments

Services and Staff (p. 8, ls. 21-22)
Committee may contract for professional services and staff

COMMITTEE AUTHORITY (p. 8, l. 23 to p. 9, l. 7)

Senate subcommittee has authority over proceedings concerning Senate member or former member or employee of Senator or Senate committee.

House subcommittee has authority over proceedings concerning House member or former member or employee of House or House committee.

Full committee:
1. has authority over employee of legislative agency
2. may review matter arising under this chapter that would result in action being required by both houses
3. may issue advisory opinions

LEGISLATIVE ETHICS COMMISSION (SB 257/HB 362)	SELECT COMMITTEE ON LEGISLATIVE ETHICS (CSSB 257 (Jud) am)
Subpoena witnesses, administer oaths, take testimony, require production for examination.	
Publish semi-annual summaries of decisions, advisory opinions, and informal advisory opinions, with sufficient deletions to prevent disclosure	
ADVISORY OPINIONS (p. 10, ls. 13-27)	ADVISORY OPINIONS (p. 9, ls. 8-21)
Issued on request of person to whom chapter applies.	May issue on request of person to whom chapter applies as to whether facts and circumstances of particular case constitute violation.
States whether facts and circumstances of a particular case constitute violation.	
If not issued within 30 days of request, no violation.	If not issued within 30 days after request is filed, no violation.
Opinion issued is binding on commission unless material facts were omitted or misstated in request.	Opinion issued is binding on committee on subsequent proceedings concerning facts and circumstances unless facts or circumstances were misrepresented or omitted.
Opinion is confidential but may be made public upon written request of person who requested opinion.	Opinion is confidential unless written request from person involved is received.
PROCEEDINGS BEFORE COMMISSION (p. 10, l. 28, to p. 11, l. 9)	PROCEEDINGS BEFORE COMMITTEE (p. 9, l. 22, to p. 10, l. 6)
Commission may initiate, receive, and consider complaints.	Committee may initiate, receive, and consider complaints.
Commission may investigate violation in proceeding begun within 4 years after alleged violation and 1 year after termination of service.	May investigate a violation of this chapter in a proceeding begun within 4 years after alleged violation occurs and within one year after termination of state service.
Nothing bars proceedings against person who by fraud prevents discovery of violation.	Nothing bars proceedings against person who intentionally prevents discovery of violation.
Before the commission may investigate resolution supported by three	Before exercising powers authorized, committee must have resolution

LEGISLATIVE ETHICS COMMISSION (SB 257/HB 362)	SELECT COMMITTEE ON LEGISLATIVE ETHICS (CSSB 257 (Jud) am)
commission members must be passed defining nature and scope	supported by majority vote of full membership of the committee to define scope and nature.
Investigations are confidential	Investigations are confidential.
COMPLAINTS (p. 11, l. 9, to p. 12, l. 7) Proceedings commenced by filing complaint.	COMPLAINTS (p. 10, l. 5, to p. 11, l. 13) Proceeding initiated by filing of complaint either by private person or three or more members of the committee.
Complaint must be in writing and signed under oath. Three or more commission members may initiate.	Complaint must be signed under oath and in writing.
No complaint, other than one initiated by five or more commission members, may be received within 60 days preceding state primary or general election.	No complaint, other than one initiated by five or more committee members, may be received within a period of 60 days preceding a state primary or general election. All proceedings pending before the committee on the 60th day preceding election are stayed unless proceedings are based on a complaint initiated by five or more members of the committee. No further action may be taken in stayed proceedings until the legislature next convenes in regular session.
Commission must notify in writing each person against whom complaint is received. Person accused must be given opportunity to explain conduct.	Committee shall notify each person against whom complaint alleged, in writing, and afford person opportunity to explain conduct.
If commission determines that complaint is insufficient, may dismiss	If committee determines complaint does not contain sufficient allegations for violation, may dismiss
Commission shall investigate charges filed and issue advisory opinion to person alleged to have violated provisions of chapter.	Committee shall investigate charges filed and issue advisory opinion to person alleged to have violated provisions of chapter. If committee determines that a probable violation exists that may be corrected by action of the person, and does not warrant other sanctions, the advisory opinion shall recommend such action.

LEGISLATIVE ETHICS COMMISSION (SB 257/HB 352)	SELECT COMMITTEE ON LEGISLATIVE ETHICS (CSSB 257 (Jud) am)
If advisory opinion indicates probable violation, person against whom complaint was made may request formal opinion or comply with advisory opinion.	
	Person against whom complaint is filed may comply with advisory opinion or request hearing.
	After hearing, committee may amend or affirm opinion.
Upon failure to comply or belief by majority of commission that probable cause exists regarding violation, commission will file complaint.	If person fails to comply with opinion or if majority of committee determines probable cause for belief violation may not be corrected, committee shall formally charge person.
Complaint shall be personally served on person charged, who has 20 days after service of the complaint to respond in writing to commission.	Charge and statement of alleged violation shall be personally served on person charged and that person has 20 days to respond in writing to the committee.
HEARING (p. 12, ls. 8-25)	HEARING (p. 11. l. 14 to. p. 12, l. 2)
Commission may set time and place for hearing. Notice shall be given to complainant and person charged.	Committee may set time and place for hearing with notice to complainant and person charged.
Representative of commission and the charged with violation shall have opportunity to be heard, subpoena witnesses, require production of items, to be represented by counsel and to have right of cross-examination.	Representative of committee and person charged with violation shall have opportunity to be heard, subpoena witnesses, and require production of items, to be represented by counsel and to have right of cross-examination.
Witnesses shall testify under oath.	Witnesses shall testify under oath.
Hearings are closed to public unless person charged requests open hearing.	Hearings are closed unless person charged otherwise requests.
Commission not bound by rules of evidence but findings must be based upon evidence.	Committee not bound by rules of evidence but findings must be based upon evidence.
Testimony taken shall be recorded and evidence maintained	Testimony recorded and record maintained.
Testimony and evidence available only to commission staff and to person	Testimony and evidence available to committee and staff and person charged

LEGISLATIVE ETHICS COMMISSION (SB 257/HB 362)	SELECT COMMITTEE ON LEGISLATIVE ETHICS (CSSB 257 (Jud) am)
charged with violation.	with violation.
Copy of transcript may be furnished to person charged with violation upon that person's request and at no charge to that person.	Copy of transcript may be furnished to person charged with violation upon that person's request and at no charge to that person.
DECISION (p. 12, l. 26 to p. 13, l. 24)	DECISION (p. 12, ls. 3-29)
In writing and signed by four or more commission members	In writing and signed by majority of committee
Accompanied by written order determining if violation did or did not exist.	Accompanied by written order determining if violation did or did not exist.
Order is confined to determination.	Order is confined to determination.
Order is public record.	Order is public record.
If decision is that violation has occurred or legislator has not cooperated with commission, decision is to be referred to presiding officers of legislature.	If committee decides violation has occurred, shall refer decision to presiding officers of legislature.
Decision shall contain statement of facts determined to constitute violation or failure to cooperate.	Decision shall contain statement of facts determined to constitute violation or failure to cooperate
May contain recommendations for civil penalties (up to $25,000), divestment of interest, termination of legislative privileges, or expulsion.	May contain recommendations for penalties.
Decision shall be made public 30 days referral. Days during which legislature is not in session are not counted.	Decision is public 30 days after referral. Days legislature is not in session are not counted.
Legislature shall act as appropriate.	Legislature shall act as appropriate.
If four commission members agree to decision that a former member of legislature or employee or former employee of legislative agency has violated this chapter, commission shall issue a public statement of its decision 30 days after date of decision.	If majority of committee agree to decision that former member or an employee or former employee has violated this chapter, the committee shall issue public statement of decision 30 days after date of decision.
Legislature shall act as appropriate.	Legislature shall act as appropriate.

LEGISLATIVE ETHICS COMMISSION (SB 257/HB 362)	SELECT COMMITTEE ON LEGISLATIVE ETHICS (CSSB 257 (Jud) am)
In case of an employee, action may include suspension, demotion, or dismissal.	In case of employee, action may include suspension, demotion, or dismissal. Employee is entitled to hearing before action taken.
CONFIDENTALITY (p. 13, ls. 25-28)	CONFIDENTALITY (p. 12, l. 29, to p. 13, l. 2)
Commission member or individual who divulges information regarding a charge before the filing of a complaint by the commission is guilty of misuse of confidential information under AS 11.56.860 (Berrier says this is a Class A misdemeanor.)	A committee member or staff member divulges information concerning proceedings is guilty of a Class A misdemeanor.

MEMORANDUM

TO: REP. RANDY PHILLIPS

FROM: JANET SEITZ

DATE: MAY 24, 1983

RE: COMPARISON OF CSSB 257 (JUD) AM and SB 257

On the attached bill, changes are highlighted in yellow.

Changes are also as listed below:

1. Page 1, Line 8, title change -- from "Legislative Ethics Commission" to "Select Committee on Legislative Ethics".

2. Page 1, Line 23 - same as title change. Reference is to the committee's name.

3. Page 1, line 27, deletes "to a person employed by a member of the legislature." This was done by Senator Kelly on the Senate floor. Senator Moss had pointed out that this language would mean that a person employed outside of a member's legislative duties would also be effected by this legislation (Sen. Moss cited the person plowing his field as an example). Remaining language now reads: "This chapter applies to a member of the legislature and to a permanent or temporary employee of an agency of the legislature."

4. Page 2, line 6, deletes "a member of". This is, I think, part of Kelly's amendment, referenced above.

5. Page 2, Line 19, deletes "has discretion to" and then the verbs are changed in the rest of this subsection.

6. Page 2, line 20, changes "which" to "that"

7. Page 3, lines 2-5. Changes the wording to read positively. Rather than a conflict does not exist, this new language states: "A conflict exists . . ."

8. Page 3, Lines 6 to 26. Includes (g) concerning fund raising during legislative session.

9. Page 3, Lines 27-29. Adds "or lease" to this provision.

10. Page 4, Lines 2-7. Adds "or lease" as appropriate. Also ADDS "or is a standardized contract or lease generally available to the public at large, members of a profession, occupation or group which was developed under publicly established guidelines" after "less," on line 3. DELETES "A person has an interest in a state contract under this section if the contract is awarded to (1) a firm, corporation, or association that has assets in excess of $5,000,000 and in which the person has an ownership

interest greater than 10 percent or that has assets of $5,000,000 or less and in which the person has an ownership interest greater than 25 percent; or (2) a partnership in which the person is a partner."

11. Page 4, Line 10, deletes "the person is a party to the contract, and without regard to whether"

12. Page 4, Line 11. Changes "inure" to "ensue"

QUERY: No mention is made of "leases" in (b). Oversight?

13. Page 4, Line 22, changes references to "commission" to "committee"

14. Page 5, line 4. Changes "1st" to "1" when referring to date. Adds "state" before "loan agency". Somewhere along the line, I remember some reference to the fact that the language in the original bill would mean all loan agencies, be they state or private, would have to report if the original language was retained. Changes "publish" to "deliver" when referring to the list of loans.

15. Page 5, lines 6-7, adds "to the presiding officer of each house." That's who the list of loans is to be delivered to by the state agencies.

16. Page 5, Lines 8-9. Adds: "The list shall be published in the supplemental journal."

17. Page 5, Line 19. Changes reference from "commission" to "committee".

18. Page 5, Lines 25 and 26. Adds "wilfully" before "discloses" and "knowingly" before "uses".

19. Page 6, Lines 1-5. Drops reference to commission. Adds, after "shall disclose", the following: "in the journal of the appropriate body or if the legislature is not in session to the committee, which shall maintain a public record of the disclosure and forward the disclosure to the respective house for inclusion in the journal for the first day of the session,"

20. Page 6, lines 15-16. Adds "(4) a registered lobbyist who is not a member of the immediate family of the person." as another class of persons that close economic association with (formation or maintenance of) must be disclosed under this section.

21. DROPPED from this section was section (b) of the original bill: "(b) It is a prohibited conflict of interest for a person to whom this chapter applies to form or maintain a close economic association involving a substantial financial matter with a lobbyist who is not a member of the immediate family of the person."

22. Page 6, Line 18, drops reference to the $100 figure.

23. Page 6, line 19. Same as 22 above.

24. Page 6, lines 20-25, DELETES: "under circumstances in which it may reasonably be inferred that the gift is intended to influence the person in the performance of the duties of the person or is intended as a reward for an official action by the person. (b) It is not a conflict of interest under this section if a person to whom this chapter applies accepts (1) hospitality at another person's residence, including meals, lodging or ground or water transportation; (2) discounts that are generally available to the public or a large class of persons to which the person belongs; (3) an invitation to attend a meal or social event that does not exceed $100 in value received by the person for each meal or event and that does not in the aggregate exceed $250 in value during the calendar year from one person; or (4) gifts from the person's immediate family. (c) The commission may establish policies that limit the extent to which persons to whom this chapter applies may accept the benefits set out in (b)(2) of this section, or that require public officials to turn over the benefits to the agency."

PLACED IN THE NEW VERSION IS: "if the gift was intended as a reward for an official action by the person. A gift of travel and hospitality received by a member of the legislature in obtaining information on matters of legislative concern is not prohibited by this section, nor are political contributions received and reported under AS 15.13.040.

25. Page 6, lines 26-29 REPLACES "(a) An individual who is related to a member of the legislature may not be employed in the house in which the legislator is a member, by an agency of the legislature established under AS 24.20, or in the other house during the interim between sessions." WITH "(a) A relative of a member of the legislature may not be employed in the house in which the legislator is a member, by an agency of the legislature established under AS 24.20, or in the other house during the interim between sessions."

26. Page 7, Line 4, adds "stepchild".

27. Page 7, Line 5, REPLACES "a permanent member of the legislators' household" WITH "a member of the same household."

28. Page 7, Lines 6-8, REPLACES "(b) An individual is not employed if no compensation is received from the state for the services provided" WITH "(b) For purposes of this section an individual is not employed if no compensation is received from the state for the services provided."

29. Page 7, Line 9, DROPS "BY LEGISLATORS" and REPLACES "(a) Except as provided in this section, a member of the legislature or a person employed by an agency of the legislature established under AS 24.20 may not represent another person for compensation before an agency, board, or commission of the state. (b) A member of the legislature may represent a client in (1) an action before a course of the state; or (2) a matter which was pending at the time a person to whom this chapter applies assumes office or is employed. (c) A legislator cannot avoid a conflict of interest under this section by waiving compensation for representing another person under circumstances where compensation would

ordinary be expected." WITH "A person to whom this chapter applies who represents another person for compensation before an agency, board, or commission of the state shall disclose the name of the person represented, the subject matter of the representation, and the body before which the representation is to take place in the journal of the appropriate body or if the legislature is not in session to the committee. The committee shall maintain a public record of the disclosure and forward the disclosure to the respective house for inclusion in the journal for the first day of the session."

30. Page 7, lines 18-20. Adds "knowingly" before "has a conflict of interest" and adds "or has been notified of a conflict of interest" before "shall immediately".

31. Page 7, line 21. Adds "conflicting" before "position".

32. Page 7, lines 25-6. Changes reference from "commission" to the committee.

33. Page 8, lines 1-2. REPLACES "for private gain or campaign purposes" WITH "except property under lease from the state or funds for private gain."

34. Page 8, lines 3, through Page 9, line 8. This is where the Commission is dropped and the Committee is inserted.

35. Page 9, lines 8-21. Changes reference from commission to committee.

36. Page 9, line 22, through Page 13, lines 3. Sets out the proceedings before the committee. While some of the procedures are similar, they are not the same.

38. Page 13, Lines 9, Definitions - defines "committee".

39. Page 13, lines 12-15. Adds Section 2 "Nothing in this Act applies to conduct which occurred before the effective date of the Act and the committee established by this Act has no jurisdiction over any alleged violation which occurred before the effective date of this Act."

Lawmakers judge selves under ethics bill

JUNEAU (AP) — A measure to establish standards of conduct among Alaska legislators and their employees and to create a joint-legislative committee to ensure the standards were followed cleared the Senate Thursday.

The bill, held for a reconsideration vote, was approved 13-6 following the defeat of several amendments including one that to give the public four seats on the panel that would sit in judgment of lawmakers.

As the bill stands now, lawmakers would act as their own judges, a provision that one legislator said injures the measure's main aim -- to instill public confidence in the Legislature.

Chopped from the final version was a provision that would have banned lawmakers from holding campaign fundraisers in the capital during the session unless they lived here. The vote on the deletion, proposed by Sen. Bettye Fahrenkamp, DFairbanks, came despite arguments that it was a conflict of interest for lawmakers to solicit donations from lobbyists while considering legislation being sought by lobbyists.

The bill (CSSB257), forged by a special joint-committee on legislative reform and two Senate panels, follows a warning from Attorney General Norman Gorsuch that his office would begin enforcing common law controlling conflicts of interest and related concerns if the Legislature failed to pass its own standards of conduct.

Common law is defined as law based not on statute but on a body of legal opinion derived from court cases involving conduct of public officials both within and outside Alaska.

Approval came after one opponent called the measure an "abomination" and backers said it represented the Senate's best effort to grapple with the murky area of "ethics."

The bill sets guidelines controlling conflicts of interest, business contracts with the state, applying for some state loans, hiring relatives, accepting gifts and raising campaign funds during the legislative session, among other things..

The measure would not supplant a state statute banning conflicts of interest, which are defined in the law as use of public office for personal gain.

Sen. Fritz Pettyjohn, R-Anchorage, and others, however, said common law was "judges law" and not the proper way to control legislative behavior. "Personally, I want a statute that tells me what I can and cannot do."

Sen. Joe Josephson, D-Anchorage, who played a major role in hammering out the legislation, said "This is not a perfect bill by any means. And if our constituents feel it needs strengthening, they can tell us so and we can take action."

Josephson said he was disappointed in his failed effort to amend the measure to permit public representation on the panel that would judge those who violated the standards of conduct. He said the failure could weaken public confidence in the law.

Sen. Bob Ziegler, D-Ketchikan, submitted an amendment, partly in jest, that would have replaced the measure with the following:

"To be an ethical and moral legislator you must (1) turn aside without ostentation to aid the weak; (2) treasure ideals more than raw ambition; (3) hold honesty of conscience above honesty of purse; (4) track no man to his undeserved hurt; and (5) pursue no woman to her tears."

Ziegler withdrew the amendment but said he viewed the measure with trepidation because "You've got problems when you endeavor to legislate ethics and morality.'"

Among other things, the bill would:

—Ban conflicts of interest, defined as taking or withholding official action that "could substantially benefit or harm a financial matter in which a person has a direct or indirect private interest.

—Ban virtually any interest in a state contract unless it was for $1,000 or less or complied with statutory competitive bidding regulations.

—Permit legislators to receive state loans, such as for home mortgages, that are generally available to the public. However, a legislator or employee who applied for a state loan not generally available to the public, such as a fishing or business business loan, must send a copy of the application to the Alaska Public Offices Commission to be incorporated in the legislator's financial disclosure statement.

—Ban solicitation or acceptance of gifts in any form or amount that is intended as a reward for official action. "However, gifts of travel and hospitality received by a legislator to obtain information about matters of legislative concern" would be expressly exempted.

—Ban relatives of lawmakers from employment in the house of which a legislator is a member or in a legislative agency. Relatives could be employed by the other house during the session, however.

Voting for the measure were: Sens. Dick Eliason, R-Sitka; Fahrenkamp; Jan Faiks, R-Anchorage; Paul Fischer, R-Soldotna; Vic Fischer, D-Anchorage; Josephson; Tim Kelly, RAnchorage; Jay Kerttula, D-Palmer; Bob Mulcahy, R-Kodiak; Pettyjohn; Bill Ray, DJuneau; Pat Rodey, D-Anchorage; and Arliss Sturgulewski, R-Anchorage.

Voting against were Sens. Don Bennett, R-Fairbanks; Don Gilman, R-Kenai; Halford; Moss; John Sackett, R-Ruby, and Ziegler.

Senate OKs ethics bill to let lawmakers judge themselves

NEWS 5-20-83
B1

By HAL SPENCER
The Associated Press

JUNEAU — A measure to establish standards of conduct for Alaska legislators and their employees and to create a joint legislative committee to ensure the standards are followed cleared the Senate on Thursday.

The bill, held for a reconsideration vote, was approved 13-6 following the defeat of several amendments, including one to give the public four seats on the panel that would sit in judgment of lawmakers.

As the bill stands now, lawmakers would act as their own judges, a provision that one legislator said works against the main aim of the measure — to instill public confidence in the legislature.

Chopped from the final version was a provision that would have banned lawmakers from holding campaign fund-raisers in the capital during the session unless they lived here. The vote on the deletion, proposed by Sen. Bettye Fahrenkamp, D-Fairbanks, came despite arguments that it was a conflict of interest for lawmakers to solicit donations from lobbyists while considering legislation being sought by lobbyists.

Sen. Bob Ziegler

The bill, forged by a special joint committee on legislative reform and two Senate panels, follows a warning from Attorney General Norman Gorsuch that his office would begin enforcing common law controlling conflicts of interest and related concerns if the legislature failed to pass its own standards of conduct.

Common law is defined as law based not on statute but on a body of legal opinion derived from court cases involving conduct of public officials both within and outside Alaska.

Approval came after one opponent called the measure an "abomination" and backers said it represented the best effort of the Senate in the murky area of ethics.

The bill sets guidelines controlling conflicts of interest, business contracts with the state, applying for some state loans, hiring relatives, accepting gifts and raising campaign funds during the legislative session, among other things.

The measure would not supplant a state statute banning conflicts of interest, which are defined in the law as use of public office for personal gain.

The key distinction between the proposal and the criminal statute is that the proposal deals with appearances of misconduct while the law, which carries a maximum misdemeanor penalty of a year in jail and a $5,000 fine, deals with actual misconduct.

The measure would provide a committee composed of legislators the power to advise their colleagues they were violating the standards of conduct. If the advice were ignored, the House or Senate could take action against the member in question.

Both bodies could use their existing powers to punish the member by stripping the member of committee assignments, withdrawing privileges, or even expulsion.

"I oppose this bill for the simple reason that it does nothing in and of itself, but does repeal common law," which does maintain legislative standards of conduct, said Sen. Rick Halford, R-Chugiak.

Sen. Joe Josephson, D-Anchorage, who played a major role in drafting the legislation, said, "This is not a perfect bill by any means. And if our constituents feel it needs strengthening, they can tell us so and we can take action."

Josephson said he was disappointed in his failed effort to amend the measure to permit public representation on the panel that would judge those who violated the standards of conduct. He said the failure could weaken public confidence in the law.

Sen. Bob Ziegler, D-Ketchikan, submitted an amendment, partly in jest, that

Sen. Joe Josephson

would have replaced the measure with the following:

"To be an ethical and moral legislator you must (1) turn aside without ostentation to aid the weak; (2) treasure ideals more than raw ambition; (3) hold honesty of conscience above honesty of purse; (4) track no man to his undeserved hurt; and (5) pursue no woman to her tears."

Ziegler withdrew the amendment but said he viewed the measure with trepidation because "you've got problems when you endeavor to legislate ethics and morality."

Among other things, the bill would:

- Ban conflicts of interest, defined as taking or withholding official action that "could substantially benefit or harm a financial matter in which a person has a direct or indirect private interest."
- Ban virtually any interest in a state contract unless it was for $1,000 or less or complied with statutory competitive bidding regulations.
- Permit legislators to receive state loans, such as for home mortgages, that are generally available to the public. However, a legislator or employee who applied for a state loan not generally available to the public, such as a fishing or business loan, must send a copy of the application to the Alaska Public Offices Commission.
- Ban solicitation or acceptance of gifts in any form or amount that is intended as a reward for official action.
- Ban relatives of lawmakers from employment in the house of which a legislator is a member or in a legislative agency.

Standards-of-conduct bill clears Senate

by Hal Spencer
Associated Press

Juneau — A measure to establish standards of conduct among Alaska legislators and their employees and to create a joint-legislative committee to ensure the standards were followed cleared the Senate Thursday.

The bill, held for a reconsideration vote, was approved 13-6 following the defeat of several amendments including one that would have given the public four seats on the panel that would sit in judgment of lawmakers. If the bill passes the reconsideration vote, it will go to the House.

As the bill stands now, lawmakers would act as their own judges, a provision that one legislator said injures the measure's main aim — to instill public confidence in the legislature.

Chopped from the final version was a provision that would have banned lawmakers from holding campaign fund-raisers in the capital during the session unless they lived her. The vote on the deletion, proposed by Sen. Bettye Fahrenkamp, D-Fairbanks, came despite arguments that it was a conflict of interest for lawmakers to solicit donations from lobbyists while considering legislation being sought by lobbyists.

The bill, forged by a special joint-committee on legislative reform and two Senate panels, follows a warning from Attorney General Norman Gorsuch that his office would begin enforcing common law controlling conflicts of interest and related concerns if the legislature failed to pass its own standards of conduct.

Common law is defined as law based not on statute but on a body of legal opinion derived from court cases involving conduct of public officials both within and outside Alaska.

Approval came after one opponent called the measure an "abomination" and backers said it represented the Senate's best effort to grapple with the murky area of "ethics."

The bill sets guidelines controlling conflicts of interest, business contracts with the state, applying for some state loans, hiring relatives, accepting gifts and raising campaign funds during the legislative session, among other things.

The measure would not supplant a state statute banning conflicts of interest, which are defined in the law as use of public office for personal gain.

The key distinction between the proposal and the criminal statute is the proposal deals with appearances of misconduct while the law, which carries a maximum misdemeanor penalty of a year in jail and a $5,000 fine, deals with actual misconduct.

The measure would provide a committee composed of legislators the power to advise their colleagues they were violating the standards of conduct. If the advice were ignored, the House or Senate could take action against the member in question.

Both bodies could use their existing powers to punish the member by stripping the member of committee assignments, withdrawing privileges, or even expulsion.

"I oppose this bill for the simple reason that it does nothing in and of itself, but does repeal common law," which does maintain legislative standards of conduct, said Sen. Rick Halford, R-Chugiak.

"This bill is an abomination," said Sen. Pappy Moss, D-Delta Junction. He favored relying on common law to keep lawmakers honest.

Sen. Fritz Pettyjohn and others, however, said common law was "judges law" and not the proper way to control legislative behavior. "Personally, I want a statute that tells me what I can and cannot do."

Sen. Joe Josephson, D-Anchorage, who played a major role in hammering out the legislation, said "This is not a perfect bill by any means. And if our constituents feel it needs strengthening, they can tell us so and we can take action."

Josephson said he was disappointed in his failed effort to amend the measure to permit public representation on the panel that would judge those who violated the standards of conduct. He said the failure could weaken public confidence in the law.

Sen. Bob Ziegler, D-Ketchikan, submitted an amendment, partly in jest, that would have replaced the measure with the following:

"To be an ethical and moral legislator you must (1) turn aside without ostentation to aid the weak; (2) treasure ideals more than raw ambitions; (3) hold[illegible]

regulations.

- Permit legislators to receive state loans, such as for home mortgages, that are generally available to the public. However, a legislator or employee who applied for a state loan not generally available to the public, such as a fishing or business business loan, must send a copy of the application to the Alaska Public Offices Commission to be incorporated in the legislator's financial disclosure statement.
- Ban solicitation or acceptance of gifts in any form or amount that is intended as a reward for official action. "However, gifts of travel and hospitality received by a legislator to obtain information about matters of legislative concern" would be expressly exempted.
- Ban relatives of lawmakers from employment in the house of which a legislator is a member or in a legislative agency. Relatives could be employed by the other house during the session, however.

Voting for the measure were: Sens. Dick Eliason, R-Sitka; Fahrenkamp; Jan Faiks, R-Anchorage; Paul Fischer, R-Soldotna; Vic Fischer, D-Anchorage; Josephson; Tim Kelly, R-Anchorage; Jay Kerttula, D-Palmer; Bob Mulcahy, R-Kodiak; Pettyjohn; Bill Ray, D-Juneau; Pat Rodey, D-Anchorage; and Arliss Sturgulewski, R-Anchorage.

Voting against were Sens. Don Bennett, R-Fairbanks; Don Gilman, R-Kenai; Halford; Moss; John Sackett, R-Ruby, and Ziegler. Sen. Frank Ferguson, D-Kotzebue, was absent.

Sec. 24.60.180 Definitions.....8

Sec. 24.60.010 LEGISLATIVE FINDINGS AND PURPOSE

This section states, in essence, that the basic purpose of this Act is to give legislators and staff the benefit of specific standards to guide their conduct while, at the same time, recognizing that under the Alaska Constitution each house of the legislature has primary responsibility for judging the qualifications of--and by implication judging the conduct of--its own members.

Another key purpose of the Act is to establish a Select Committee on Legislative Ethics (hereinafter the "Ethics Committee") which can initiate, accept, investigate and act upon complaints and render advisory opinions.

Sec. 24.60.020 APPLICABILITY

Pursuant to this section, the Act applies to the following persons:

All legislators once they have been sworn in;

Former legislators, but only in the limited circumstances set forth in the Act;

Legislative employees at or above Step 2, Range 12 (i.e., administrative assistants are covered, but not professional secretaries);

Former legislative employees, but only in the limited circumstances set forth in the Act.

The Act also expressly repeals--or supersedes--common law rules regarding legislative conflicts of interest, but it does not supersede applicable criminal laws.

Sec. 24.60.030 CONFLICTS OF INTEREST

Under this section two things are generally prohibited:

The use of public office for private advancement or gain; and

Conflicts of interest.

A conflict of interest is deemed to exist under the following two broad situations:

When a person takes or withholds official action or exerts influence that could substantially benefit or harm a financial matter in which the person has a direct or indirect private interest; and

If benefits accrue to a person beyond that which may accrue uniformly to members of the profession, occupation

or group to which the person belongs, or to the public at large.

In addition, a conflict of interest is deemed to exist if a legislator who does not represent the City and Borough of Juneau accepts money from a fundraiser held therein during session. However, this does not apply if the legislator is running for anything other than a state legislative office. Thus, for example, a legislator running for statewide or congressional office can hold a fundraiser in Juneau during session without violating the Act.

Furthermore, the Act also provides that it is a conflict of interest to knowingly disclose, or willfully use for personal gain or the gain of another, confidential information acquired in the course of official duties (see Sec. 24.60.060, below).

Conflicts of interest are expressly deemed not to exist under the following specific circumstances:

If there is no substantial impropriety or appearance of impropriety because the person's interest in a matter is relatively insignificant or the person's authority in regard to the matter is relatively remote; or

If a person merely accepts:

Hospitality at another's residence within the state, including meals, lodging or transportation;

Public discounts;

Meals or social events worth $100 or less each;

Cultural food and foodstuffs;

Gifts from the person's own family.

It is also provided that the Ethics Committee, or a subcommittee thereof, can establish policies limiting the extent to which persons can accept the benefits previously listed. However, legislative approval is necessary to establish these additional limitations.

Sec. 24.60.040 CONTRACTS

This section prohibits virtually any interest in a state contract unless:

The contract is for $1000 or less; or

It complies with statutory competitive bidding criteria.

The basic philosophy and intent of this section is that a person to whom the Act applies should have the same right as anyone else to enter into

a state contract, as long as the contract complies with statutory competitive bidding criteria. State leases were intentionally omitted because the Judiciary Committee believes that they are inherently different from state contracts and, also, that they are already subject to statutory competitive bidding criteria.

Sec. 24.60.050 STATE LOANS

The basic philosophy, intent and provisions of this section provide that, as to state loans generally available to the public, persons covered by the Act will be treated exactly the same as anyone else.

However, when a person covered by the Act applies for a state loan that is not generally available to the public, full disclosure is required in that the loaning agency must send a copy of the application to APOC, where it will be kept, and where it will be incorporated into the financial disclosure statement of an applicant who is otherwise required to file one with APOC.

State loan agencies must publish annual lists of all outstanding loans that are not generally available to the public and are made to persons covered by the Act. The agencies must also adopt separate procedures for granting and reviewing such state loans, and annual reviews by the division of legislative audit are required, as well as annual reports to the Ethics Committee.

Sec. 24.60.060 CONFIDENTIAL INFORMATION

This section prohibits, by deeming it a conflict of interest, persons covered by the Act from knowingly disclosing or wilfully using, for personal gain or the gain of another, confidential information acquired in the course of official duties.

Sec. 24.60.070 INTERESTS BETWEEN PUBLIC OFFICIALS

Under this section, a person covered by the Act must disclose a close economic association involving a substantial financial matter with:

The person's own supervisor;

A legislator;

A public official in another branch who is required to file an APOC statement; or

A registered lobbyist not a member of the person's immediate family.

Disclosure is to be made as follows:

When the legislature is in session, in the journal of

the appropriate house;

When the legislature is not in session, to the Ethics Committee, which, in addition to maintaining a public record thereof, must forward the disclosure to the appropriate house for inclusion in its journal for the first day of session.

Sec. 24.60.080 GIFTS

This section generally prohibits a person covered by the Act from soliciting, accepting or receiving a gift in any form or amount which is intended as a reward for an official action.

However, gifts of travel and hospitality received by a legislator to obtain information about matters of legislative concern are expressly exempted. Also, under Sec. 24.60.030 (see above), certain other "gifts" --such as hospitality at another's residence within the state--are exempted.

Sec. 24.60.090 NEPOTISM

This section sets forth the following limitations:

Relatives of a legislator may not be employed in the house of which the legislator is a member or be a legislative agency;

Relatives of a legislator may be employed in the house of which the legislator is not a member, but only during session; and

Relatives of an employee of the legislature may not be employed in a position over which the employee has supervisory authority.

However, individuals who are not on the state payroll are exempt from these limitations.

Furthermore, the definition of a relative includes close family members --such as spouses, children, parents and siblings--as well as "a member of the same household".

Sec. 25.60.100 REPRESENTATION

This section provides that a person covered by the Act is not prohibited from paid representation of another before a state agency, board or commission. However, disclosure of such representation must be made in essentially the same manner as disclosure of interests between or with public officials (see Sec. 24.60.070, above).

Sec. 24.60.110 ACTION ON A CONFLICT OF INTEREST

Under this section if a legislator knows or has been notified that he or she has a conflict of interest, the legislator must immediately resign the conflicting position; or get rid of the interest that caused the conflict; or disclose the conflict. Disclosure is to be made in essentially the same manner as disclosure of interests between or with public officials (see Sec. 24.60.070, above).

Sec. 24.60.120 STATE PROPERTY AND FUNDS

Pursuant to this section. the use of state property or funds for private gain is prohibited. However, there is an exception for state leases.

Sec. 24.60.130 SELECT COMMITTEE ON LEGISLATIVE ETHICS

In essence, this section establishes the Ethics Committee, consisting of a three-member subcommittee from each house. Members are to be appointed by the presiding officer with the concurrence of three-fourths of the full membership of each house, and no more that two members of each subcommittee can belong to the same political party.

Sec. 24.60.140 AUTHORITY OF THE COMMITTEE

This section provides that the Ethics Committee as a whole has authority over:

> Proceedings involving the conduct of employees of legislative agencies;
>
> Matters requiring action by both houses of the legislature; and
>
> The issuance of advisory opinions.

Each subcommittee has authority over proceedings involving the conduct of members or employees of its respective house.

Sec. 24.60.150 ADVISORY OPINIONS

Pursuant to this section, a person covered by the Act can request an advisory opinion from the Ethics Committee as to whether or not the facts and circumstances of a particular case constitute a violation of ethical standards.

The Ethics Committee has thirty days to issue the advisory opinion. If it fails to do so within that period, the facts and circumstances of that particular case are automatically deemed not to constitute an ethical violation, unless there were material omissions or misstatements in the request for the advisory opinion.

When the Ethics Committee does issue and advisory opinion, that opinion is binding in any subsequent proceeding involving the same facts and circumstances, unless there were material omissions or misstatements in the request for the advisory opinion.

Advisory opinions are confidential unless the persons requesting them ask, in writing, that they be made public.

Sec. 24.60.160 PROCEEDINGS BEFORE THE COMMITTEE

This section generally empowers the Ethics Committee to initiate, receive, investigate and consider complaints against persons covered by the Act, but a complaint must be filed within four years of an alleged violation, unless the accused person has intentionally prevented the discovery of the violation.

A complaint must be filed in writing and under oath, and this can be done by a private person or by three or more members of the Ethics Committee.

No complaint can be filed or acted on in any way within sixty days prior to a state primary or general election, unless the complaint has been initiated by five or more members of the Ethics Committee.

Before acting on a complaint, a majority of the members of the Ethics Committee must pass a resolution defining the nature and scope of the inquiry, and all investigations must be conducted on a confidential basis.

Once the Ethics Committee proceeds to act on a complaint, written notice must be served on the accused person, who must be given an opportunity to explain the alleged misconduct, whereupon the Ethics Committee can summarily dismiss the complaint if it determines that even if the alleged facts and circumstances are true, they are not sufficient to constitute a violation of the Act.

After investigating the charges alleged in a complaint, the Ethics Committee must issue an advisory opinion which can merely recommend that a probable violation of the Act be corrected. The accused person can then simply comply with the recommendation and thus end the matter. However, the accused person can also request a hearing before the Ethics Committee, following which the advisory opinion can either be affirmed or amended.

If an accused person does not comply with an advisory opinion, or if the Ethics Committee determines that a violation has occurred that cannot be corrected as previously described, formal written charges must be personally served on the accused person, who then has twenty days to submit a written response, whereupon a time and place must be set for a formal hearing before the Ethics Committee, with notice thereof to the accused person as well as to the complainant, if any.

Unless the accused person otherwise requests, hearings before the Ethics Committee are closed to the public and are to be conducted pursuant to the following procedural and substantive rights to:

Be represented by counsel;

Be heard (i.e., to testify and present evidence and witnesses);

Subpeona witnesses;

Require the production of books and papers;

Have witnesses testify under oath;

Cross-examine witnesses;

Have the Ethics Committee base its findings on competent and substantial evidence, even though it is not bound by formal rules of evidence;

Have testimony recorded and evidence preserved and not be released to anyone else; and

Receive a free transcript of the testimony.

After a formal hearing, the Ethics Committee must submit a written decision signed by a majority of its members, along with a written order, which becomes a public record, determining only whether or not there was a violation of the Act. If the decision establishes that a legislator has violated the Act or has failed to cooperate with the Ethics Committee, specific details as to what constitutes the violation or failure to cooperate must be provided, and the decision can also contain recommendations as to appropriate penalties to be imposed. The decision will then be referred to the presiding officers of the legislature--and thirty days later the decision is to be made public--for disposition as the legislature deems appropriate.

If the proceedings involved a former legislator or a past or present legislative employee, and if the decision contains a determination that a violation of the Act occurred, the Ethics Committee must issue a public statement of its decision thirty days after it is made, whereupon the legislature must act on it as it deems appropriate.

Furthermore, this section provides that if a member or employee of the Ethics Committee divulges unauthorized information about a proceeding, that person is guilty of a class A misdemeanor.

Sec. 24.60.170 COOPERATION BY STATE AGENCIES

This section provides that state executive agencies must fully cooperate with the Ethics Committee or a subcommittee thereof, including the disclosure of financial and other records, to the extent allowed by state and federal law.

Sec. 24.60.180 DEFINITIONS

This section defines the terms "committee" and "person employed by a member of the legislature."

ATTACHMENT

Fiscal Note for Senate Bill No. 257:

III ANALYSIS:

There are no guidelines in the bill for amount or level of staff or for amounts of travel and per diem. It is necessary, therefore, to establish a set of assumptions on which to build a fiscal note.
Using input from various legislators who worked on the bill, I have made the following assumptions:

Assumption 1: There will be no permanent staff at this time. Personal services and professional services will be contracted as needed; therefore, no office space or equipment will be needed. The commission will determine how the central files are to be kept.

Personal Services Contracts	20.0
Professional Services Contracts	20.0
Other Contractual Services	10.0
	50.0

Assumption 2: To establish a good average for travel costs, I have hypothetically assumed that the Commission is to be made up of members living in Nome, Bethel, Fairbanks, Anchorage, Kodiak, Juneau, Ketchikan, and will travel coach fare: 3 roundtrips to Juneau; 4 roundtrips to Anchorage; and 5 roundtrips to Fairbanks for meetings. There will be no more than an average of three days per month of travel and per diem for meetings. There be no more than an average of one meeting per month.

Per Diem ----------	$18,720
Travel ----------	$25,385
TOTAL Trvl/PD	$44,105

Assumption 3: Additional costs, if any, for reports or copies made by other agencies for the Commission will be absorbed in that agency's operation budget.

Assumption 4: The Legislative Affairs Agency print shop can print the semi-annual summaries of decisions and advisory opinions.

Re: Common Law Conflicts of Interest

Dear Representative Bussell:

As you know, none of the legislative ethics bills considered this session was passed. It was my hope that bills dealing with conflicts of interest for both legislators and public employees would be enacted so that definite and certain statutory standards would supersede the common law standards that now apply. As I pointed out in my letter of June 16, 1983 to Senator Vic Fischer, the imposition of common law conflicts of interest standards on citizen legislators in the state of Alaska is less than desirable. First, the common law standards are not well defined, producing uncertainty in determining what conduct is acceptable. In addition, the common law standards are strict, prohibiting not only actual conflicts of interest but also requiring avoidance of even the appearance of impropriety.

The common law conflicts of interest standards that are now in effect will be enforced by this office prospectively only; i.e., from the close of the legislative session. This is in accordance with my memorandum of December 28, 1982, in which I stated that enforcement action of the common law rules relating to conflicts of interest would be deferred until the end of the session, in order to give the legislature the opportunity to modify those rules. Since no action was taken, my decision to defer enforcement must be retracted. I recognize that some of you may have explored or entered into investment or business opportunities during the session in reliance on my decision to defer enforcement and on the presumption that a legislative ethics bill superseding the common law would be enacted. In those instances, even if the final arrangements were made after the end of the session, I will not take enforcement action based on the common law rules, unless, of course, the conduct is egregious (e.g., where the conflict also violates express civil or criminal statutes).

The purpose of this letter is not only to remind you that the common law standards are in effect and will be enforced during the interim, but also to provide you with some basic guidelines regarding conflicts of interest until statutory standards can be established, preferably during the next legislative session. In regard to state contracts and loans, the key to avoiding a conflict is the amount of discretion involved in administration of the loan or contract. As indicated in the December 3, 1982 opinion of this office, home loans and education loans are subject to fixed eligibility standards and little discretion is involved in their administration. Commercial loans, in contrast, involve a much higher degree of discretion, giving rise to a greater potential for influence or abuse. Thus, before entering into a state loan or contract, a legislator should examine carefully the amount of discretion involved, and avoid any situation in which there is potential for influence because of the degree of discretion. If the administrative procedures for granting a loan or contract are well-defined and minimal discretion is exercised in awarding the loan or contract under these procedures, the potential for undue influence should likewise be minimal, and the loan or contract can be accepted without fear of creating a conflict.

In regard to financial interests other than state loans and contracts, certain additional factors should be considered in attempting to avoid potential conflicts. These include:

1. whether your interest is of a type possessed generally by the public or by a large class of persons to which you belong;

2. whether your authority as a legislator is relatively far removed from any official action that could affect a matter in which you have a financial interest;

3. whether the effect that your action or influence could have on a matter in which you have a financial interest is insignificant or speculative; and

4. whether your financial interest is relatively insignificant.

These factors, taken together, should help you to judge whether there is potential for influence or abuse. If that potential exists, a financial interest should be avoided.

I hope this reminder will be of assistance to you in dealing with potential conflicts situations during the interim.

I trust that in the next legislative session the uncertainty of dealing with the common law standards will be cured with adoption of an ethics bill covering both legislators and public employees.

If you have any questions, please do not hesitate to contact this office. Assistant Attorney General Thomas M. Jahnke can assist you with conflicts problems. If he is unavailable, please contact Assistant Attorney General Diane T. Colvin.

Sincerely,

Norman C. Gorsuch
Attorney General

Draft Amendments to CSHB 362(St. Affs.)

by Rep. M.M. Miller

1. Pg. 1 - L. 16 - Delete "must" and insert "should".

2. - L. 18 - After "legislators" add "and legislative employees".

3. - L. 25 - After "chapter." add "This chapter shall be liberally construed to promote high standards of ethical conduct in the legislature."

4. - L. 29 - After "legislature." insert "Except for AS 24.60.090,".

5. Pg. 2 - L. 11 - Delete "specifically repeal" and insert "supercede".

6. Pg. 3 - L. 4 - After "less" insert "except as set forth in subsection (c)."

7. - L. 11 - Insert the following subsections:

(c) A state agency may enter into a contract without resort to the competitive bidding process under AS 37.05.230 when, in the judgment of the agency the property or services should not in the public interest, be acquired through competitive bidding. Written justification for the noncompetitive award of such contract shall be made a matter of public record and shall be filed with the ethics commission at least ten days before such contract is entered into.

(d) In addition to any other penalty provided by law, any contract entered into by the state in violation of this chapter is voidable on behalf of the state; provided that in any action to avoid a contract pursuant to this section, the interests of third parties who may be damaged thereby shall be taken into account, and the action to void the transaction is initiated within sixty days after the determination of a violation under this chapter. The Attorney General shall have the authority to enforce this provision.

8. Pg. 6 - L. 13 - After "lobbyist" insert "as defined by AS 24.45.171,".

9. - L. 19 - Delete "A gift of travel and hospitality received by a member of the legislature in obtaining information on matters of legislative concern is not prohibited by this section."

10. Pg. 7 - L. 15 - Delete the entire section and insert the following:

A person to whom this chapter applies who knowingly has a conflict of interest or has been notified of a conflict of interest shall

(1) Immediately divest the interest that has resulted in the conflict; or

(2) Prepare a written statement describing such matter and the nature of the conflict, and

(A) in the case of a legislator, deliver within 48 hours, copies of the statement to the commission and the presiding officer of respective body of the legislator, who shall cause such statement to be printed in the journal or if the legislature is not in session such statement shall be printed in the first journal of the following legislative session; or

(B) in the case of an employee of the legislature covered by this chapter, deliver within 48 hours, a copy of the statement to the commission and to their immediate superior, if any, who shall assign the matter to another employee, or if the employee has no immediate superior, the employee shall take such steps as the commission shall prescribe or advise to remove the employee from influence over action or decision on the matter.

11. Pg. 10, L. 21 - After "opinion" insert ", or until the opinion is amended or revoked by the commission."

23 May 1983

Representative Charlie Bussell

Re: Legislative Ethics -- SB 257 and HB 362

Dear Representative Bussell:

For the past two years, the FREE Committee has been concentrating on legislative ethics reform and is on record as recommending that a code of ethics be added to the Uniform Rules. Enclosure 1 is a copy of that recommendation.

The Committee recently completed a careful review of the ethics and conflict of interest laws in all 50 states and based upon that review identified several areas that should be addressed in any ethics legislation considered by the Legislature. Enclosure 2 is a copy of suggested changes to the existing Alaska law that was forwarded to the Joint Legislative Reform Committee in January

In developing its recommendations, the FREE Committee was also concerned that amendments to the present law not become so restrictive that good legislators with other sources of income be prohibited from serving the public. Therefore, unlike the provisions in SB 257 and HB 363, the FREE Committee proposal would not prohibit public officials from obtaining loans or contracts from the state, so long as the suggested safeguards were incorporated.

We believe that public officials have the right to expect that ethical standards be clearly defined so that ethical problems can be avoided. With these things in mind, the Committee drafted language which if adopted would more clearly identify problem areas and which would provide for binding Attorney General opinions where the law is not clear.

The main difference between the FREE Committee proposal and the versions being considered by the legislature is that the FREE proposal addresses illegal activity and the legislative versions address improper but not necessarily illegal behavior. This distinction is significant, because the state constitution requires the legislature to be the sole judge of the improper behavior of legislators. By adding a code of ethics to the Uniform Rules, similar to that proposed in HCR 33 and SCR 21

(copies enclosed), the legislature could address infractions as a whole body, assigning various members the task of investigating complaints.

After careful consideration, the Committee rejected the approach taken in all versions of SB 257 and HB 362. This legislation would create a new commission whose main purpose is to evaluate and investigate legislator and legislative employee activities for conflicts and to recommend what action should be taken by Legislature. While this is a popular method chosen by other states and is superficially attractive, the Committee rejected this idea for four reasons.

First, this would unduly lengthen the process by creating another layer of government and since nearly every potential conflict would have to be run through the commission to determine whether there is in fact a conflict, the expense could be quite high. In fact, these bills should contain a fiscal note. Even after the process is completed, only the Legislature can finally decide whether disciplinary action should be taken.

Second, we are opposed to creating new governmental bodies if other less expensive and complicated approaches would provide the same or better results.

Third, this could result in politically motivated investigations and less than even handed treatment of persons who are investigated. While some of the versions envision a commission composed of a mix of legislators and citizens, the risk of politically motivated investigations is still real. Unless the citizen members were chosen from the population as a whole by lottery, they would be political creatures and not immune from political motivations.

Fourth, we believe strongly that a public official is a citizen who is serving the public and, therefore, deserves to know what activities are prohibited before being investigated. The present bills do not clearly identify improper behavior.

In summary, the FREE Committee believes that it is important to ensure that our legislators and their employees behave properly and avoid acting solely to enrich themselves. However, we believe that this goal can be accomplished with minimal rules and without creating a new and expensive body. The FREE Committee wants good legislators and, therefore, urges you to vote no on SB 257 and HB 362. We strongly believe no bill is better than a poor bill.

Sincerely,

Cheri C. Jacobus

INTRODUCTION

The Anchorage FREE Committee is the product of a nation-wide program designated by the General Federation of Women's Clubs. FREE is an acronym for "Federation's Role in our Enterprise Economy", and is dedicated to the preservation of America's enterprise economy. Through active participation in the GFWC FREE Enterprise Program, we can:

- make our nation's lawmakers aware of the impact which 600,000 Clubwomen can have by promoting the American Free Enterprise system.
- broaden public understanding of the American economic system.
- provide a mechanism by which GFWC members can become actively involved in the legislative process at federal, state and local levels.

The free enterprise system is the economic counterpart of a politically free society. It provides economic liberty, which means that the tools of production are privately owned; producers are free to produce and offer in a competitive market what they believe consumers want; comsumers are free to buy what they choose.

While monitoring the activities of the Alaska State Legislature, it has become apparent to the members of the Anchorage FREE Committee that legislative rules (or lack of)

and procedures could be used to circumvent the wishes of the majority. Often, it seemed, important decisions and appropriations were made by a very few legislators. A dozen legislators in key positions distributed more than $1½ million worth of non-competitive contracts and 20 lawmakers split $3.2 million in interim committee funds, (ref. ALL ALASKA WEEKLY, 6/27/80, 7/4/80; THE ANCHORAGE TIMES, 10/7/80). Since the political and economic structures of our American society are closely interrelated, each system must be preserved in order that the other might survive.

In an effort to educate ourselves as well as the citizens of Alaska, FREE formed a Legislative Study Committee in September of 1980. The purpose of the committee was to try to discover how policies and procedures of our state legislature might be modified or changed in order to make the legislative process run smoother, allow for additional public input, and make it less vulnerable to abuse.

We have interviewed or received written comments and suggestions from twenty-four legislators regarding our topics. Our sessions with the legislators, involving over 100 hours of discussion, were extremely productive and we are grateful for their willingness to meet with us and share their time and ideas.

At the request of several lawmakers during our discussions, FREE and Common Sense for Alaska have written all states requesting their uniform rules. We are currently

analyzing and comparing the other states' uniform rules to determine how they have avoided, through rules and procedures, problem areas which have surfaced in the Alaska Legislature. A complete report comparing these uniform rules will be made available at a later date.

On the basis of our research and discussions to date, however, FREE feels that there are some legislative rules that warrant immediate attention and change. We have included as much data from the rules of other states as is currently available. The following report deals with these recommendations.

SUMMARY OF RECOMMENDATIONS

The following points summarize the conclusions of this study:

I. Two consecutive conference committees should be appointed, deliberate in good faith, and be unable to reach a compromise before granting powers of free conference to a third committee. Free conference powers would be granted for those specific areas of disagreement only. Non-germane amendments and sections would be prohibited. All conference or free conference bills should be printed and placed on legislators desks twenty-four hours prior to voting. All budget related conference committee meetings should be open to the public. (pp. 6-9)

II. A simple "bill content" rule is needed to define "germane" and prevent bill "piggybacking" from occuring. The rule should read, "No bill shall be passed by either house containing more than one subject, which should be clearly expressed in the title." (pp. 10, 11)

III. The public should be informed of the standing committee meetings and their agendas at least five days prior to the meeting. (pp. 12, 13)

IV. The House and Senate Finance Committees should meet jointly for the purpose of holding public hearings or considering any proposed or pending legislation. (pp. 14, 15)

V. The procedures of the standing committees are vital to the quality of legislation. Precise procedures involving a majority of the committee working in the open would serve to maintain and improve the integrity of the committee system. Fiscal impact statements and legislative intent should be included with all bills. The committee report should include one of three recommendations from each member - "do pass", "do pass as amended", or "do not pass". (pp. 16-18)

VI. No interim committees should be provided except those authorized by the state constitution, or either or both houses jointly may by resolution or statute, provide for the appointment of interim committees. (pp. 19, 20)

VII. The legislative session should be limited to 120 days. Any extension beyond 120 days should require a 2/3 vote of both houses and include a "limited call" provision. The extension itself should be for a specific number of days. (pp. 21, 22)

VIII. In order to encourage the concept of a citizen legislature, there should be a limitation on the number of consecutive terms a Representative and Senator may serve. The recommendations are two 4-year terms for a Senator and four 2-year terms for a Representative. An individual could prolong his years of service by alternating legislative houses every eight years. (pp. 23, 24)

IX. A Code of Ethics should be added to the uniform rules. General aspects should include a definition of ethical conduct, conflict of interest provisions, responsibilities of legislative staff in relation to campaigning and privileged information, and a section dealing with compensation for services rendered. A disciplinary mechanism should be established to deal with alleged violations. (pp. 25-27)

X. A simple, precise procedure is needed in the awarding of legislative professional service contracts. Requesting committees and legislators should follow specific procedures in requesting professional services. The Legislative Affairs Agency or other existing agency should have the authority to advertise, select and monitor all contracts. (pp. 28-30)

I.

FREE CONFERENCE COMMITTEE

According to the majority of the responding legislators, the use of the FREE Conference Committee is the most abused and dangerous [illegible] our Alaska legislative procedures.

In the normal course of events, when a bill is passed by both the House and the Senate, but with differences, a conference committee is appointed. Members of both houses sit on this committee, and their responsibility is to reach a compromise based solely on the material appearing before them in the two bills. The conference committee must choose between two existing concepts, and cannot add new ideas or phraseology, (ref. New Hampshire Joint Rule 20(h), California Joint Rule 29.56).

If the members of the conference committee cannot agree on amendments, or one or both houses refuses to adopt its report, then a Free Conference Committee is appointed. Historically and traditionally, the granting of the powers of free conference is the absolute final step in resolving a deadlock. New language and information germane to the issue can be introduced in an attempt to reach a compromise. The granting of the powers of free conference appears to be a perfectly logical outgrowth of a conference committee which is unable to reach a compromise, (ref. Alaska Uniform Rule 41).

Unfortunately, the free conference committee has been widely abused in the Alaska legislature. Legislators are currently, even before the start of the new session, campaigning for spots on various free conference committees. The legislators are assuming that, first, the House and Senate will surely disagree on a bill, and secondly, that a conference committee will not be able to choose between the bills to arrive at a compromise. In Louisiana, specific guidelines set forth the selection of conference committee members, (ref. Louisiana House Rule 6.15). California prohibits powers of free conference on the budget bill, (ref. California Joint Rule 29.5(c)).

As a practical matter in Alaska, conference committees are "granted the powers of free conference" without going through the conference committee process. Therefore, a non-restricted free conference committee has enormous power to create, add, delete and alter bills without benefit of standing committee approval or public hearings.

Part of the problem with free conference committees is their lack of adherance to the word "germane". Webster defines germane as "closely related, appropriate, pertinent, to the point". At the present time, laws are passed that have no relation to the intent of the original bill, or amendments are added that are totally unrelated in context and intent to the rest of the bill.

Due to the problems encountered with the free conference committee and the lack of a clear, specific germaneness

rule which is adhered to by our legislators, it is tempting to recommend the total elimination of the free conference committee. In many of our sister legislatures in the Lower 48 (10 out of 15 studied), the powers of free conference are not allowed; if the conference committee cannot compromise, the bills are dead.

However, the FREE Committee feels it is not the powers of free conference that are the problem, but rather the guidelines for its use and strict adherance to "germaneness" which is badly needed in Alaska.

FREE recommends the following rule changes in the use of the conference and free conference committees:

1. Two consecutive conference committees should be appointed, deliberate in good faith, and be unable to reach a compromise before granting powers of free conference to a third committee. The specific areas of non-agreement would be clearly documented and signed by all conference committee members. Free conference powers would be granted for those specific areas of disagreement only. (Ref. North Carolina Assembly Rule 44(a-c), California Joint Rule 29, North Dakota Joint Rule 6(e), New Jersey Joint Rule 1-6, Pennsylvania Senate Rule 21(1-3).

2. Non-germane amendments and sections should be prohibited and not allowed under any circumstances. (Ref. New Hampshire Joint Rule 11 and 20(d)(e)(h), West Virginia Joint Rule 3).

3. All conference or free conference bills should be printed and placed on lawmakers desks twenty-four hours prior to voting. (Ref. New Hampshire Joint Rule 20(d)(e)(h), North Dakota Senate Rule 54, Pennsylvania Senate Rule 21.1-3).

4. All budget related conference or free conference committee meetings should be open and readily accessible to the public. (Ref. California Joint Rule 29.5(a)).

California has a very specific rule relating to appropriation bills which bears further investigation. Number 29 of the Joint Rules states,

> "It shall require an affirmative recorded vote of 2/3 of the entire elected membership of each house to adopt any conference report affecting any bill which contains an item or items of appropriation which are subject to subdivision".

Actually, there are several states that have other than majority vote requirements for appropriation bills. We feel this is an area that needs further investigation, and FREE will recommend rule changes on this topic in our next report.

II.

"BILL CONTENT" RULE

Currently, bill "piggybacking" is practiced in the Alaska Legislature, even though Alaska Uniform Rule 34 prohibits such action. This process adds non-germane amendments to existing bills in order to facilitate the passage of weak or controversial bills.

The potential for abuse is obvious in that a particular bill favored by a few can be piggybacked onto another popular bill favored by the public, and therefore be sure to pass. Or, non-germane amendments dealing with other topics can be piggybacked to not only facilitate their passage, but to prevent adequate public hearing on the topic to be added.

Many states have solved this problem by adopting in their joint rules a very simple, but certainly far reaching "bill content" rule. The FREE Committee highly recommends this or a similar rule to stop the piggybacking process.

Simply stated, and quoting from the Arkansas Joint Rules Sec. 4, "No bill shall be passed by either house containing more than one subject, which should be clearly expressed in the title". (Also ref. North Dakota Senate Rule 31d, West Virginia House Rule 97, Pennsylvania Senate Rule 14.3). All amendments must remain within the scope of the bill being considered, or all amendments must be "germane".

(Ref. North Dakota Senate Rule 49, Pennsylvania Senate Rule 15, California Joint Rule 9, North Carolina Assembly Rule 43, Washington House Rule 31, West Virginia House Rule 113, Main Senate Rule 11).

Legislators could then vote on the merit of a bill without having to consider the political consequences of a piggyback, and the rights of the majority would be protected. Each piece of legislation should be considered on the basis of its own merit. (Ref. West Virginia House Rule 62, New Hampshire Joint Rule 11, Florida House Rule 11.8, Washington House Rule 31).

III.

PRIOR NOTICE OF COMMITTEE MEETINGS AND AGENDA

At the present time, there is not adequate prior notice of committee meetings and their agendas. Citizens with interest in a particular bill are often unable to adequately respond in writing or in person unless advance notice is given.

There, FREE recommends the public be informed of the standing committee meetings and their agendas at least five days prior to the meeting. (Ref. North Dakota Senate Rule 43, Arkansas Senate Rule 33, New Jersey Rules of Assembly 10.6, California Joint Rule 36(2), Pennsylvania Senate Rule 16.8, Florida House Rule 6.18, Washington House Rule 78). In an emergency, 2/3 majority of the committee can vote to suspend the public notice rule. (Ref. Arkansas Senate Rule Sec. 33). Public notice and agendas could be placed in the press room and throughout the network of legislative information offices. (Ref. North Carolina Assembly Rule 143-318:12).

FREE feels that there are a great many advantages that would occur as a result of this prior notice. Legislation would have the benefit of additional public scrutiny by allowing for more public input. Legislators would be forced to pre-plan their schedules, which would in turn result in a more organized committee system, and help to alleviate some of the "end of the session crunch".

FREE is aware that there will be protests that one cannot give advance public notice of committee meetings and still expect the legislature to complete its work in 120 days as recommended elsewhere in this report. Certainly it may not be easy at first, but the need for the public to be better informed must take precedence over legislative convenience.

Note: The State of Pennsylvania requires 30 days published notice in the locality affected by a bill prior to its introduction, (ref. Pennsylvania Senate Rule 5, and also Florida House Rule 7.4).

IV.

FINANCE COMMITTEE REFORM

FREE recommends that the House and Senate Finance Committees meet jointly for the purpose of holding public hearings or considering any proposed or pending legislation. (Ref. Calfironia Joint Rule 37).

A joint hearing would eliminate the need for state agencies, municipalities, school districts and other entities requesting funds to travel and testify, twice. The financial savings would be significant to the agencies and both houses would receive the same budgetary information. This is a worthwhile consideration for other committees as well. (Ref. Arkansas Joint Rules Sec. 25, New Hampshire Joint Rule 14, California Joint Rule 3, Louisiana Senate Rule 66 and House Rule 6.27, Maine Joint Rule 13, West Virginia Joint Rule 11, 19).

By meeting jointly, coordination of action by the two houses should become automatic and efficiency in pursuing budget matters should be enchanced. A time table should be set early in the session by the Joint Finance Committee for the finalization of the budget. (Ref. Arkansas Senate Rule 93(J)). Every new item added to the budget should list program implications, back-up material, criteria and fiscal impact.

Historically, the budget derives from the governor's initial budget proposal submitted to each new session of

the legislature. Literally thousands of hours have gone into the preparation and justification of this budget by administrators and their staffs throughout the state. After in-depth review by the separate House and Senate Finance Committees, different versions of the budget are passed in each house, and thus the budget ends up in a free conference committee.

It is in the free conference committee that budgetary abuses occur. New items are added based on political motives and "a slice of the pie" theory. There seems to be little or no research done on these new items, and some justification of the new items is not made apparent. Some states have a constitutional limit on such appropriations. (Ref. Arkansas Senate Rule 93(L)). Hopefully, a Joint Finance Committee can work to decrease these abuses and eliminate the need for the budget free conference committees.

V.

STANDING COMMITTEES

The procedures of the standing committees are vital to the quality of legislation, as well as the efficiency and organization of the entire legislature. Legislators should strive to maintain and improve the integrity of the committee system.

FREE feels the following recommendations would enhance standing committee operations:

1. All bills introduced in the name of the committee should have the prior approval (of introduction) by a majority of the committee members. (Ref. Louisiana House Rule 8.14, California Joint Rule 10.7, Florida House Rule 7.1-, Washington House Rule 79).
2. At least a majority of all members constituting a standing committee should be required to report a bill out of committee. (Ref. Pennsylvania Senate Rule 16.16, Arkansas Senate Rule 34(d) and 36, New Jersey Rules of Assembly 10.6, California Joint Rule 62.(c), Florida House Rule 6.32).
3. No action should be taken on any measure outside of a duly constituted committee meeting in which a quorum is present, and such meeting should be open to the general public. (Ref. Washington House Rule 79, Florida House Rule 6.25, New Jersey Rules

of Assembly 10.5, West Virginia House Rule 83, Nevada Senate Rule 13 and 53).

4. Elimination of public hearings or similar measures which detour or abbreviate the bill process should be avoided. (Ref. Louisiana House Rule 6.11, New Jersey Rules of Assembly 10.5, Washington House Rule 79).

5. Any bill or resolution which would have fiscal impact on the state should have a note stating a reliable estimate of the fiscal effect of such a bill. This information could be prepared by the Legislative Finance Division. (Ref. Louisiana Joint Rule 44, New Hampshire Joint Rules 5-a, New Jersey Rules of Assembly 10:11, 15:2(a)-15:2(g), California Joint Rule 37.1, Maine Joint Rule 20, West Virginia House Rule 95a, Florida House Rule 7.16, North Carolina Assembly Rule 38, Delaware House Rule 23).

6. Each committee report should include one of three recommendations from each member - "do pass", "do pass as amended", "do not pass". We feel "no recommendation" should not be allowed, since a committee member who has participated in the public hearings and committee deliberations should be able to make a specific recommendation in the committee report. (Ref. Arkansas Senate Rule 34(a), New Jersey Rules of Assembly 10.6, West Virginia House

Rule 98, Delaware House Rule 17(d), North Carolina Assembly Rule 36, Florida House Rule 6.34, Pennsylvania Senate Rule 16.12).

7. Each committee report should include a statement of the legislative intent of all bills that address themselves to major innovation or change in public policy. (Ref. Florida House Rule 6.33, Arkansas Senate Rule 34(c), New Jersey Rules of the Assembly 15:4, Maine Joint Rule 31, Delaware Senate Rule 8).

Many states have deadlines for reporting bills out of the standing committee to which they have been assigned. (Ref. New Hampshire Joint Rules 10(a-c), North Dakota Senate Rule 38 and 44, Florida House Rule 6.29, Maine Joint Rule 13). In addition, there are early deadlines for the introduction of bills. (Ref. Louisiana Joint Rule 5, New Hampshire Joint Rule 12, Arkansas Joint Rule Sec. 19 and 24, West Virginia Senate Rule 14, Washington House Rule 19). If the standing committees in the Alaska Legislature are having problems organizing and accomplishing their work loads, further consideration should be given to these concepts.

VI.

INTERIM COMMITTEES

According to the majority of legislators interviewed, interim committees are primarily needed and used by legislators to keep good staff year-round, to reward political supporters and to meet the demands of their constituents during the interim. FREE feels that interim committees are not being used in ways that benefit the citizens of Alaska.

Used wisely and with restraint, interim committees could be a legitimate tool of the legislature, but recent legislatures have used them with neither wisdom nor self-restraint. Dissatisfied voters have rejected propositions in 1978 and in 1980 to expand and legitimize interim committees.

FREE recommends that no interim committees be provided except those authorized by the state constitution.

In those cases where there is a need to study or promote a topic, the task can simply be assigned to the appropriate standing committee which has a professional staff, or the legislators can authorize an interim committee by statute. (Ref. California Joint Rule 36, Statutes of Nevada 1968, 1973). This insures that a majority of legislators must agree to the necessity of an interim committee prior to its creation.

In both cases the assumption is made that the request be substantiated by a clear purpose and objective, statement of who will do the work, budget limitations, and reporting procedures. The committee ceases to exist upon completion of its task.

During the discussion on interim committes, there was a great deal of time spent evaluating the demands made on legislators by their constituents between sessions - phone calls, answering mail, attending meetings and generally being responsive to the public. The suggestion was made that secretarial help or legislative aides be provided. FREE does not recommend such staff at this time. The feeling is that meeting these needs is part of the job of being an elected citizen legislator, and that those for whom this is a burden should perhaps reconsider their availability to serve.

VII.

LIMIT ON LEGISLATIVE SESSION

There seems to be growing support throughout the state for imposing a limit on the number of days allowed for each legislative session. FREE concurs with this sentiment, and proposes a limit of 120 days. (Ref. Wyoming State Constitution, Florida State Constitution, Nevada State Constitution). Any extension beyond 120 days should require a 2/3 vote of both houses, and should include a "limited call" provision, whereby the topics to be addressed must be limited and pre-stated, and the extension itself should be for a specific number of days. (Ref. New Hampshire Joint Rule 24).

FREE feels that a session limit would enhance the concept of a citizen legislature, in that a shorter (the tendency has been for longer and longer sessions) and specific time frame would facilitate participation as lawmakers by a greater number of citizens.

The Alaskan legislature has the distinction of being the most costly (per capita) of any state in the union. A limited session would be cost efficient in that salaries, per diem, rents and other costs related to time would be decreased.

A limited session would encourage legislators to work together as a matter of expediency. A deadline

necessitates working and accomplishing goals in the most efficient and organized manner.

Perhaps the quality of legislation would be enhanced. Only those issues which have broad support and concern would be brought before the legislature. There would be less time to create problems where none exist.

Finally, a limited session would help to stop the growing talk from legislators of the need for a full time staff and legislature. The staff, in turn, would be better able to plan for additional employment after the session.

VIII.

LIMIT TERMS OF OFFICE

The FREE Committee strongly believes in the concept of a citizen legislature versus professional lawmakers. For this reason, and others, FREE feels that there should be a limitation on the number of terms a Representative and Senator may serve. Surprisingly, a good portion of the responding legislators favored this concept.

FREE feels that a limitation would serve as an incentive for more citizens to seek elective office - the perception being that incumbents are generally pretty difficult to unseat. New faces bring fresh approaches to programs and issues, needed at all times, but especially now in Alaska with its vast natural resource wealth.

When legislators remain in one house for a long period of time, excessive power over colleagues and staff seems to develop, as do legislative cliches. By dispersing the concentration of power, it will be more difficult for a handful of "long time" legislators to control legislation contrary to the wishes of the majority.

One legislator commented during the discussions that it was difficult for even the "good guy' legislators to remain free of obligations to their colleagues. In the lawmaking process there is always give and take, and legislators who have been on the job for a long time will inevitably build up a certain amount of "favors due" and

"favors owed", so that it becomes increasingly difficult to judge matters under consideration solely on their merit.

FREE recommends the following limitations on the terms of office:

1. Senate - two 4-year consecutive terms.
2. House - four 2-year consecutive terms.
3. Present incumbents would begin counting their terms with the effective date of the law.

Using FREE's formula, legislators popular with their constituents could remain in the legislature, but would have to change Houses every eight years. Thereby, the right of the citizen to choose his lawmakers remains intact.

CODE OF ETHICS

Any public office holder in a free government is entrusted with the security, safety, health, prosperity and general well-being of those whom he serves. With such a trust, high moral and ethical standards which produce the public's confidence should be the goal of every legislator.

FREE recommends that a code of ethics or standards of conduct be added to the uniform rules. Parameters for acceptable and unacceptable behavior must be drawn so that legislators know what kind of behavior to expect from one another. It is difficult to confront and correct unethical activities until the guidelines are drawn and understood by all.

General aspects of the Code of Ethics should include, but not be limited to, the following:

1. Any conflict between private interests and official duties must be avoided. No state legislator should accept any employment which could impair his independence and integrity of judgment nor should he exercise his position of trust to secure unwarranted privileges for himself or others. (Ref. Maine Legislative Code of Ethics, New Jersey Legislative Code of Ethics 2:1.a, California Joint Rules 44.(a)).

2. Members of the legislature should not directly or indirectly receive or agree to receive any compensation for any services which one knows or has reason to believe is given with the intent of influencing him in the performance of his duties as a legislator. (Ref. New Jersey Legislative Code of Ethics 2:1.6, California Joint Rules 44.(3)).

3. Legislators should be directly responsible for the ethical conduct of their staff. (Ref. California Joint Rule 44(f), Florida House Rule 5.11).

4. Legislators should notify the leadership prior to taking any action or voting upon any bill in which he or any member of his immediate family has a personal or professional interest which ensures his private gain or the gain of any principal by whom he is retained or employed. The legislator should disqualify himself from the vote in which he has a conflict of interest. (Ref. Florida House Rule 5.10, California Joint Rules 44.(s), Pennsylvania Senate Rule 22.2, Washington State Constitution Article 2, Sec. 30).

5. Legislative staffs should not be assigned to campaign or fund raising duties; legislative staff should not be considered to be political organizations.

6. Legislators should be prohibited from raising campaign funds during the legislative session. (Ref. New Jersey Legislative Code of Ethics 2:10.)

New Jersey has developed a comprehensive manual entitled "Legislative Code of Ethics" which would serve as an excellent resource instrument. In addition, North Carolina includes with their General Statutes a thorough "Code of Legislative Ethics".

It follows that once a Code of Ethics is established, some sort of mechanism needs to be implemented to deal with alleged violations. Many states have detailed disciplinary procedures which would make excellent guidelines. (Ref. Pennsylvania Senate Rule 37, 38, Illinois House Rule 12, New Jersey Joint Rule 19(a,b), California Joint Rule 45(a-p), North Carolina General Statutes Article 14, Part 3).

X.

PROFESSIONAL SERVICE CONTRACTS

FREE feels it is extremely important that the new legislature adopt very specific professional service contracting procedures. We are gratified by the concern expressed by many legislators in relation to this subject, but the voiced concern must be developed into a solid, practical set of rules.

FREE recommends the following guidelines:

1. The Legislative Affairs Agency or another existing agency should be in control of all professional service contracts. (Ref. New Jersey Rules of Assembly 10:12).
2. The purposes and objectives of the professional service desired should be clearly defined in written form by the committee or legislator requesting the service, along with a statement of reasons why the admisistration or legislative staff could not meet the need.
3. The parameters and scope of the service required should be pre-determined and included in the written request.
4. A time frame for commencement and completion should be indicated.
5. The request, including items 2-4, should be forwarded to the controlling agency.

6. The agency should advertise throughout the state.
7. The agency should analyze the bid proposals, ranking the proposals in 1, 2, 3, . . . order.
8. A contract would be negotiated by the legislative agency with the #1 responder, moving on to #2 or #3 until a satisfactory contract is negotiated.
9. The agency should monitor the project and determine if the finished product meets the desired and stated criteria prior to any disbursement of funds.
10. A report should be made available to the public no later than 10 days after it is due to the committee.
11. The final report should include on the title page the name of the requesting committee, the name of the firm providing the service, and the total cost of the report or project.
12. Some provision must be made for needed emergency information when the above procedures cannot, for reasons of time, be followed. FREE suggests any professional service contract needed which cannot follow the prescribed procedures must be approved by 2/3 vote of the house requesting the service.
13. Contracts may be entered into without going through steps 6 and 7 provided the amount of the contract does not exceed $2,500, and no one

entity receives contracts in excess of $10,000 in each calendar year.

CONCLUSION

Throughout history, frustration and apprehension have been felt by citizens of their states regarding the actions taken by their state legislatures. Numerous examples of misdeeds have aroused public outcry, which in turn has resulted in changes in procedures.

In comparison to its sister legislatures in the Lower 48, the Alaska State Legislature is a young entity. Currently, the Alaska legislature is undergoing "growing pains", but under a different, and more difficult, set of circumstances that those of other states.

In the Lower 48, legislative activity was, and still is, watched by dozens of news reporters representing numerous small towns and counties, as well as the larger metropolitan areas. This results in close scrutiny of legislative activity, and a better informed public.

Closely tied in with media coverage is the accessibility of the legislative halls to the general population, which also leads to closer scrutiny of legislative activities and greater awareness by the general public of their elected representative's activities.

Finally, when comparing Alaska's legislature with that of other states, one very significant factor is without precedent - no other state has ever had such a huge budget surplus, per capita.

A blessing, yes, and yet a potentially destructive force demanding extreme caution in its management.

Because of these differences, it is incumbent upon our elected officials to follow sound, accountable legislative procedures. While other states have undergone a gradual maturation process over the years, we do not have that luxury. Alaska's state government must do in a couple of years what other states have done in at least sixty years or more (excluding Hawaii).

This, then, is a major challenge facing our Alaska State Legislature. It will require changes in thinking and in ways of conducting legislative business. But the people of Alaska, and our elected officials in particular, are not unfamiliar with challenges. Citizens and legislators, working together, have an opportunity to create a noble and splendid existence.

DELETIONS ARE BRACKETED AND ADDITIONS ARE UNDERLINED

(The following section changes filing requirements for the Alaska Public Offices Commission to be consistent with the other changes. Primarily these changes address inequities created by the law's requirement that nondependent children's income and spousal income be reported but not that income of persons living together. The changes are less wordy and the dollar amounts are more realistic.)

* Section 1. AS 39.50.030 is amended to read:

Sec. 39.50.030. Contents of Statements. (a) Each statement shall be an accurate representation of the financial affairs of the public official or candidate and shall contain the same information for each member of his family or household as [specified in (b) of this section] defined in AS 39.50.200, to the extent that it is ascertainable by the public official or candidate. [An asset or liability under $500, household goods, and personal effects need not be identified.]

(b) Each statement filed by a public official or candidate under this chapter shall include:

(1) the source of all income over [$100] $500, including capital gains, whether or not taxable, received by him [or his spouse or dependent child of his or nondependent child of his who is living with him during the preceding calendar year] , his family or member of his household;

(2) the identity, by name and address, of each business in which he or [his spouse or dependent child of his or nondependent child of his who is living with him] his family or a member of his household was a stockholder, owner, officer, director, partner, proprietor, or employee during the preceding calendar year;

(3) the identity and nature of each interest owned by him or [his spouse or dependent child of his or nondependent child of his who is living with him,] by his family or by a member of his household, in any business during the preceding calendar year;

(4) the identity and nature of each interest in real property, including an option to buy, owned by him or [his spouse or dependent child of his or nondependent child of his who living with him,] by his family or by a member of his household during the preceding calendar year;

(5) the identity of each trust or other fiduciary relation in which he [or his spouse or dependent child of his or nondependent child of his living with him,] his family or member of his household, held a beneficial interest during the preceding calendar year, a description and identification of the property contained in each trust or relation and the nature and extent of the beneficial interest in it;

(6) any loan or loan guarantee made to him or [his spouse or dependent child of his or nondependent child of his who is living with him,] to a member of his family or household and the identity of the maker of the loan or loan guarantor and the identity of each creditor to whom he or [his

spouse or dependent child of his or nondependent child of his who is living with him] a member of his family or household owed $500 or more;

(7) a list of all contracts and offers to contract with the state, or an instrumentality of the state, during the preceding year, held, bid or offered by him, [his spouse, dependent child of his or nondependent child of his who is living with him, his mother or father] a member of his family or his household or a partnership or professional corporation of which he is a member, or a corporation in which he or [his spouse or his children] a member of his family or household, or a combination of them, hold a controlling interest; and

(8) a list of all mineral, timber, oil, or any other natural resource lease held, or lease offer made, during the preceding calendar year by him, [a dependent child of his or nondependent child of his who is living with him, his mother or father] a member of his family or his household or a partnership or professional corporation of which he is a member, or a corporation of which he or [his spouse or his children,] a member of his family or his household, or a combination of them, hold a controlling interest.

(The following section is rearranged, sections are added to make the law clearer, and certain activities would be punished as felonies. It should be noted that the present versions of SB 257 and HB 362 allow the legislature to impose a fine of up to $50,000.)

* Section 2. AS 39.50.090 is repealed and reenacted to read:

AS 39.50.090. Prohibited Acts. (a) Violation of this sub-section is a class C felony, punishable by a fine of not less than $5,000, nor more than $50,000, by imprisonment of up to 5 years, or by both.

(1) No public official may use his official position or office for the primary purpose of obtaining any financial or other type of benefit for himself, a member of his family or his household or business with which he or his family or household is associated or owns stock.

(2) No public official or former public official shall disclose any information which by law or practice is not available to the public and which he acquired in the course of his official duties or use of the information for his personal gain or the benefit of anyone.

(b) Violation of this sub-section is a misdemeanor, punishable by a fine of not less than $500, nor more than $2,000, by imprisonment up to one year, or by both.

(1) No person may offer or pay to a public official and no public official may solicit or receive money for legislative advice or assistance, or for advice or assistance given in the course of the official's public employment or relating to his public employment. However, this prohibition does not apply to a chairman or member of a state commission or board or municipal officer of the subject matter of the

legislative advice or assistance is not related directly to the function of the commission, board, or municipal body served by the municipal officer; this exception from the general prohibition does not apply to one whose service on a state commission or board constitutes him a full-time state employee under AS 39.

(2) No public official may represent a client before a state agency for a fee. However, this prohibition does not apply to a municipal officer, or chairman or member of a state commission or board except with regard to representation before his own commission or board; this exception from the general prohibition does not apply to one whose service on the commission or board constitutes him a full-time state employee under AS 39.

(3) A former public official may not assist any person, business, instrumentality of the state or act in a representative capacity for a fee or other consideration, on matters in which he personally participated as a public official, nor may the former public official within twelve months after termination of office or employment act in a representative capacity for a fee or other consideration before any state agency. This subsection does not prohibit any agency from contracting with a former public official on a matter on behalf of the state and does not prevent the former public official from appearing before any agency with relation to such employment.

(4) A public official may not apply for a loan from a state agency unless the application is simultaneously filed with the commission. A state agency may not approve a loan to a public official who fails to file the application with the commission and a state agency may not grant special consideration to the application of a public official.

(5) No public official, member of his family or household, or business with which he, his family or household, is associated may enter into any contract with the state, valued at $100 or more, other than a contract of employment as a state employee or pursuant to a court appointment, unless the contract has been awarded in compliance with existing state law in an open and public process, including prior public offer and subsequent public disclosure of all proposals considered and the contract awarded. A member of the legislature shall simultaneously file the offer to contract with the commission; if the offer to contract is a sealed bid, the commission may not open the offer to contract until after the offer to contract has been opened by the agency receiving the offer to contract. A state agency may not award a contract to a public official or to a person known to be a member of the family or of the household of a public official or to a business that is associated with the public official or with a member of the family or of the household of a public official unless the offer to contract is filed with the commission.

(6) No member of the legislature, person acting on behalf of a member of the legislature, member of the legislator's family or household may solicit funds for political contributions to the campaign treasury of the member of the

legislature during a legislative session. Both the legislator and the person soliciting the contribution are liable and subject to penalty for any violation of this subsection.

(c) In this section, "public official" includes, in addition to the persons specified in AS 39.50.200(a)(1), chairmen and members of all commissions and boards created by statute or administrative action as agencies of the state.

(d) No municipal officer may represent a client for a fee before the municipal body which he serves.

(The following section provides for advisory opinions from the Attorney General to help public officials from inadvertently violating the conflict of interest law. This approach is followed in a number of different jurisdictions.)

* Section 3. AS 39.50.095 is added to read:

Sec. 39.50.095. Attorney General Opinion. If any public official or member of his family or household or business with which he is associated is in doubt whether a proposed transaction or action constitutes a violation of this chapter, the public official or business may request in writing a written determination from the Attorney General's office. Within thirty days of such request, the Attorney General's office shall issue a written opinion based on the facts recited by the requester. If a legislator is involved, this advisory opinion shall be published in the daily legislative journal. A public official or business with which he is associated shall not be liable under this chapter, for any action or transaction carried out in accordance with such an advisory interpretation, provided he disclosed all the known facts to the Attorney General at the time of the request.

* Section 4. AS 39.50.200 (a)(8) is amended to read:

(8) "source of income" means the entity for which service is performed or which is otherwise the origin of payment; if the person whose income is being reported is employed by another, his employer is the source of his income; but if he is self employed by means of a sole proprietorship, partnership, professional corporation, or a corporation in which he [or his spouse or his children,] , his family or a member of his household, or a combination of them, hold a controlling interest, the "source" is the client or customer of the proprietorship, partnership or corporation, but if the entity which is the origin of payment is not the same as the client or customer for whom the service is performed, both are considered the source;

* Section 5. AS 39.50.200 (a) is amended by adding new paragraphs to read:

(10) "member of his household" means any person whose permanent address is the same as the public official's permanent address or anyone who actually resides in the same household;

(11) "family" includes mother, father, spouse, children, parents in law;

(12) "financial gain" means economic benefit resulting from salary, gratuity, gift, or other compensation or remuneration from any individual, partnership, organization or association, or resulting from ownership or interest in a business entity.

MEMORANDUM

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Representative Randy Phillips R.P.

DATE: May 25, 1983

RE: Conflict of Interest Legislation
(House Bill 362, CSSB 257 (Jud) am)

Attached are the following items for your committee's review:

1. Memorandum dated May 24, 1983, entitled "Comparison of CSSB 257 (Jud) am and SB 257. As you know, SB 257 is the same as House Bill 362.

Attached to this memorandum is a copy of CSSB 257 (Jud) am in which the changes from SB 257 to the Senate-passed version have been highlighted.

2. Memorandum dated May 25, 1983, comparing the Legislative Ethics Commission as proposed in HB 362/SB 257 and the Select Committee on Legislative Ethics as proposed in CSSB 257 (Jud) am.

If you have any questions, please do not hesitate to contact me. I plan on being in attendance at this Friday's meeting when I understand this subject matter will be before your committee.

Representative Charlie Bussell

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES

TO: All Legislators

FROM: Representative Charlie Bussell

RE: Conference Committee on SB 257 - Ethics

DATE: March 22, 1984

I would like to inform you that today at 3:00 p.m. there will be a meeting of the Conference Committee on SB 257, ethics. The meeting will be held in Judiciary Committee Room, Room 124 of the Capitol. The committee consists of myself, Rep. Bussell, Rep. Martin, Rep. Flood, Senator Ray, Senator Mulchay, and Senator Gilman.

Previously Senator Ray has distributed amendments for consideration.

Attached you will find a CS that I am proposing.

I am sure the committee will appreciate your attendence and comments on this legislation.

SUBJECT: Sectional Analysis

TO: Conference Committee on SB 257

FROM: Billy G. Berrier
Director
Division of Legal Services

You have requested that I prepare a sectional analysis on CCS SB 257 and note changes from the Senate version, CSSB 257 (Jud) am and the House version, HCS CSSB257 (Jud) am H.

Sec. 24.60.010 set out the legislative findings and purpose. It states that it is essential that legislators have the respect and confidence of the people, must avoid conduct that appears to violate the trust of the people and should have specific standards to guide them. The purpose is stated to be to establish standards of conduct for legislators and legislative employees and to establish the Select Committee on Legislative Ethics to consider violations and to render advisory opinions.

* Except for the committee name all three versions are essentially identical.

Sec. 24.60.020 provides the chapter applies to legislators and permanent or temporary employees of an agency of the legislature, excludes former members and former employees except to the extent they are specifically included in a provision, excludes members elect and excludes employees whose pay is below the pay established for Step A, Range 18 of the state salary schedule. It provides this section supersedes common law but does not supersede criminal law.

* The House version excludes employees from the nepotism provision, the Senate bill includes them and the Conference Committee bill also does. Otherwise the three are essentially identical.

Sec. 24.60.030 relates to conflict of interest

(a) Provides that a person may not use public office for private advancement or gain.

* This is identical in all three bills.

(b) Provides that a conflict of interest exists when a person takes official interest or exerts influence that could benefit or harm a private financial matter of the person.

* This is identical in all three bills.

(c) Prohibits conflict of interest but sets out two exceptions where there is no substantial impropriety or appearance of impropriety.

* This is identical in all three bills.

(d) provides that a conflict of interest exists if benefits accrue to a person other than those which accrue uniformly to a group to which the person belongs.

* This is identical in all three bills.

(e) provides that a conflict of interest does not exist if a person accepts hospitality at another persons residence within the state, generally available discounts, meals or social events which do not exceed $100.00, indigenous food or gifts from a person's family.

* This is identical in all three bills.

(f) provides it is a conflict of interest for a legislator to accept money raised at a fund raiser in Juneau during the session.

* This is identical in all three bills.

* The Senate version allows the committee to establish, with approval of the legislature, additional policies that limit the extent by which a person may accept benefits under (e). The House bill and the Conference Committee bill do not contain this.

Sec. 24.60.040 relates to contracts and leases.

(a) Provides that a person may not be a party to or have an interest in a state contract or lease unless

(1) The contract or lease is let by competitive bidding.

(2) The amount is $1,000,00 or less.

(3) The contract or lease is standardized and available to the public or to a group generally.

This applies when the person receives a direct or indirect financial benefit under the contract or lease. (b) defines direct or indirect financial benefits.

* The exception for a standardized contract or lease is not contained in the House bill. Otherwise the three bills are essentially identical.

Sec. 24.60.050 relates to state loans.

(a) Provides that it is not a conflict of interest to receive a state loan if the loan is generally available, has fixed eligibility standards and minimal discretion is excercised in determining qualifications. It also requires the Committee to issue a list of programs and loans it considers to meet the standards of this paragraph and revise the list annually.

* The Senate bill does not contain the list requirement which is in the House bill and the Conference Committee bill.

(b) In determining whether a conflict of interest exists the committee must consider the adequacy of administrative procedure for granting and reviewing loans to legislators but is not limited to considering only that.

* In the Senate version this paragraph applies only to legislators. In the House version and the Conference Committee version it applies to all persons covered by the bill.

(e) requires that upon application for a loan, other than a loan described in (a) the person shall send a notice of the application to Alaska Public Offices Commission which will incorporate that in the financial disclosure statement. If the person is not required to file a disclosure statement the notice must be placed in an employee loan file open to the public. All records relating to a loan may be disclosed to the committee.

* The House bill does not contain the provision that all records relating to the loan may be disclosed to the committee which is in the Senate bill and the Conference Committee bill. The Senate bill requires the copy of the application be sent by the lending agency and the House and Conference Committee bill requires it be sent by the person involved. Otherwise this paragraph is identical in each of the bills.

(d) requires that on each February 1, each loan agency must deliver a list of loans to the presiding officer of each house, set out what must be included in the list and provides the list must be published in the supplemental journal.

* This paragraph is identical in each of the bills.

(e) requires the Division of Legislative Audit to annually review state loans to persons to whom this chapter applies to determine whether appropriate procedures were observed in granting the loan and whether loan conditions are being enforced. The division must report its findings to the committee by April 1, of each year.

* The Senate bill requires the auditor to determine whether appropriate procedures were observed in granting the loan. The House bill requires the auditor to determine whether loan conditions are being enforced. The Conference Committee bill requires both.

(f) Defines state program.

* This paragraph is identical in each bill.

* The Senate version requires the lending agencies to adopt regulations that establish separate procedures for granting and reviewing loan to persons to whom this chapter applies.

This requirement is not in the House or Conference Committee bill.

Sec. 24.60.060 provides it is a conflict of interest if a person uses for personal gain of the person or another confidential information the person acquired in the course of official duties.

* This section is identical in each bill.

Sec. 24.60.070 requires disclosure of a close economic association with an employee, and a supervisor if the supervisor is not a member of the legislature, a legislator, a public official in another branch if the public official is required to file a disclosure statement or a lobbyist.

* The House version does not contain this requirement. The Senate version does not explicitly exclude legislators from the supervisor-employee provision.

Sec. 24.60.080 provides that a person may not solicit a gift in any amount or accept a gift in excess of $100.00 or in the aggregate in excess of $250.00 during a calendar year if the gift was intended as a reward or inducement for official action. A gift of travel and hospitality within Alaska received by a member of the legislature in obtaining information of legislative concerns and political contribution reported under AS 15.13.040 are not prohibited.

* The Senate bill has no dollar limitation and does not have the term "inducement". The House bill prohibits gifts under circumstance in which it may reasonably be inferred that the gift was intended to influence a person in the performance of official duties and specifically sets out exceptions.

Sec. 24.60.090 prohibits employment of relatives in specified circumstances. A spouse of a legislator may not be employed by either house during the interim or by an agency of the legislature. Other relatives may not be employed in the house in which the related legislator is a member, by an agency of the legislature or by the other house during the interim. An individual who is related to an employee of the legislature may not be employed in a position over which the employee has supervisory authority. The section defines relative. It provides that for this section a person is not employed if the person does not receive compensation and

that a member of the legislature is, for purposes of this section, not an employee of the legislature.

* The provision relating to employment of a spouse during the session is not in the Senate bill or the House bill. Both the House bill and Senate bill include "a member of the same household" in the definition of relative which is not included in the Conference Committee bill. The term "adopted child" is specifically included in both the House and Senate bill but in the Conference Committee bill this term is subsumed under the word "child".

Sec. 24.60.100 requires that a person who represents another person before an agency of the state for compensation shall disclose the representation in the journal if the legislature is in session and, if not, to the committee. The committee must maintain a record of the disclosures and send them to the house involved for inclusion in the journal for the first day of the session.

* The Senate version is identical. The House version prohibits representation before an agency of the state for compensation except in court actions and actions which were pending at the time the person was elected or employed.

Sec. 24.60.110 provides that a legislator who has a conflict of interest shall resign the conflict of interest, divest the interest or disclose the interest in the journal or, if the legislature is not in session to the committee. Disclosure does not remove the conflict.

* Neither the House or Senate bill contains the provision that disclosure does not remove the conflict. Otherwise the three versions are identical.

Sec. 24.60.120 provides a person may not use state funds or state property, except under lease, for private gain.

* This section is identical in all three versions.

Sec. 24.60.130 establishes a Select Committee on Legislative Ethics consisting of three members from each house with a Senate and House subcommittee. The members are appointed by the presiding officer with concurrence of three fourths of the full membership of the house. Vacancies are filled in the same manner. No more than two members may be of the same party or organizational caucus. The chair is elected

by each subcommittee. The chair of the Senate subcommittee chairs the full committee in odd numbered year and the house chair in even numbered years. Members serve for the duration of the legislature. A member of a committee is disqualified from serving if the member is a party and provision is made for appointment of a replacement for the matter involved. The committee or a subcommittee may employ staff and contract for services.

* The Senate version does not contain the prohibition of more than two members and the disqualification provision. Otherwise it is essentially identical. The House version is substantially different. It has a single committee with seven members. A legislator and two other persons are appointed by each presiding office with concurrence of two thirds of the membership of the house. These members appoint the remaining member who must be a former legislator. The public members have four year terms. The legislative members may not serve beyond the expiration of the legislative term of office. A committee member may not serve more than one term. A legislator member may not hold or seek elective office, be an officer of a political party or group or lobby. The chair and vice chair are elected by the committee and may not be legislators. Vacancies are filled in the same manner as the original appointment. Members receive no compensation but may receive travel expenses and per diem. The committee may employ staff and contract for services.

Sec. 24.60.140 provides a subcommittee shall have authority over proceedings involving a member or employee of its house. The full committee has authority over agency employees, a matter that would require action by both houses and issuance of advisory opinions.

Sec. 24.60.150 prescribes duties for the committee requiring the committee to adopt procedures for receipt of inquiries and prompt rendition of opinion. It may recommend legislation and use compulsory process.

* This is identical to the version in the Senate bill. The House version does not include this.

* This is identical with the House version except for the division into mandatory and permissive which is not in the House version. The Senate version does not include this.

Sec. 24.60.160 provides for advisory opinions by the committee on request of a person to whom this chapter applies. The opinion must be issued within 30 days but that period may be extended 10 days with consent of the person requesting the opinion. The opinion is binding on the committee unless material facts were omitted or misstated in the request. The opinion is confidential unless the person who requested the opinion requests in writing that it be made public.

* This provision is substantially identical to the House version except for the 10 day extension of time. In the Senate version if the advisory opinion is not issued within the 30 day period the facts in the particular case for which the opinion is requested do not constitute a violation of ethical standards.

Sec. 24.60.170 establishes the procedure before the committee.

(a) The committee may initiate, receive and consider complaints alleging a violation of the chapter.

* All three versions are identical.

(b) The committee may investigate a violation within four years after the violation and within one year after termination of service. The limitations do not apply if there is intentional prevention of discovery of the violation.

* All three versions are identical.

(c) The committee must by resolution define the nature and the slope of an inquiry before exercising any power under this section. It must investigate all complaints on a confidential basis.

* All three versions are identical.

(d) Proceedings are commenced by filing which is in writing and under oath and may be initiated by any person. Within 60 days of a general election no complaint other than a complaint initiated by two thirds of the members of a committee may be received and, except for such complaints all proceedings are stayed until the election is certified. If the proceedings are stayed

the committee shall notify the person against whom the complaint was filed. If the person objects in writing to the stay the proceedings shall continue.

* In the House version a complaint in the 60 days preceeding election needs a majority of the committee. There is no provision for a stay.

* In the Senate version that complaint requires 5 members of the committee and the stay is until the legislature next convenes in regular session.

(e) The committee must notify the person against whom a complaint is filed and afford the person an opportunity to explain the conduct. The committee may summarily dismiss the complaint if the alleged facts, if true would not constitute a violation.

* All three versions are identical.

(f) The committee must investigate charges filed and issue an opinion to the person charged.

* All three version are identical.

(g) If the committee finds a probable violation exists that may be corrected and does not warrant sanction other than correction it shall recommend corrective action. The person may comply or request a hearing. The committee may affirm the opinion or amend it after the hearing.

* All three versions are identical except that both the House and Senate used the term "advisory opinion" while the Conference Committee deleted "advisory" in this paragraph and in paragraph (h), to avoid confusion with Sec. 24.60.160.

(h) If the person fails to take the corrective action recommended under (g) or corrective action is not sufficient the committee shall charge the person and serve the person with the charge and statement of the violation. The person has 20 days to respond in writing.

* All three versions are identical except for the change noted in (h).

(i) establishes procedure of a hearing and provides the hearing is closed to the public unless the person charged requests an open hearing.

* The Conference Committee version requires a minimum of 10 days notice to the person charged. The House and Senate versions have no explicit notice period. Otherwise all three versions are identical.

(j) A decision must be in writing and signed by a majority of the committee. An order limited to a determination that a violation does not exist must accompany the decision. The order is public.

* All three versions are identical.

(k) If the committee finds a violation or a failure to cooperate by a legislator it must refer the matter to the presiding officer. The decision must contain a statement of facts and may recommend sanctions. The committee shall make the decision public 30 days after transmittal. The house involved shall act on the decision as it considers appropriate.

* The Senate version provides that days when the legislature is not in session may not be counted as part of the 30 day period before the decision is made public. The House and Conference Committee versions do not contain this. Otherwise all three versions are identical.

(l) If the committee finds a violation by an employee it shall make a public statement of the decision 30 days after the date of the decision. The legislature shall act as it considers appropriate. Sanctions may include suspension, demotion or dismissal. The employee is entitled to a hearing before final action is taken.

* All three versions are identical.

(m) Disclosure of information by a committee member or staff concerning a proceeding except as permitted by this chapter is a class A misdemeanor.

* All three versions are identical.

Sec. 24.60.180 requires executive branch agencies to the extent permitted by law to cooperate fully with the committee.

* All three versions are identical.

Sec. 24.60.190 defines committee to mean the Select Committee on Legislative Ethics or where appropriate the applicable subcommittee.

* The House version, which has a single committee, does not refer to the subcommittees.

Sec. 11.56.805 establishes the crime of false accusation if a person knowingly or intentionally initiates a false complaint with the committee as a Class C felony.

* This is not in the Senate version.

Sec. 39.50.025 requires APOC to mail a copy of the standards of conduct establishes in * Sec. 1 of this bill to each legislative candidate.

* This is not in the House or Senate version.

Section 4 provides the Act does not apply to conduct which occurred before the effective date of this act.

* All three versions are identical.

Section 5 Provides an immediate effective date for the sections establishing the committee and providing for its authority.

* All three versions are identical.

MEMORANDUM

TO: Senator Bill Ray, Chairman
Senate Judiciary Committee

FROM: Representative Randy Phillips R.P.

RE: CCSSB 257 (Legislative Ethics)

DATE: March 8, 1984

I have looked over the compromise language that is proposed to be included in CCSSB 257 and have the following comments and questions:

1. Page 3, following line 17, insert:
"(6) gifts of nominal value given by a nonprofit organization in recognition of public service by the recipient."

QUESTION: What is the definition of "nominal value"?

2. Page 3, lines 19 and 20 following the word "event", delete:
"held within the City and Borough of Juneau"

COMMENT: I would prefer to see such language left in the legislation.

3. Page 8, line 12, following the word "members", insert:
"and the executive director of the Alaska Public Offices Commission who serves as a member of the full committee and of each subcommittee with all of the rights of a member except the executive director does not have the right to vote"

COMMENT: It is my feeling that the ideal composition of the Ethics Committee would be as set out in HCS CSSB 257 (Jud) am H -- one senate member, one house member, two public members appointed by senate, two public members appointed by house, and one past legislator appointed by the other members of the committee.

Or, it would be even more acceptable if a committee composed of three senate members, three house members and one public member who is a member of the Alaska Public Offices Commission.

I appreciate being given the opportunity to comment on the proposed changes in this legislation. Please do not hesitate to contact me should you have any questions regarding my comments on the proposed changes.

M E M O R A N D U M

March 14, 1984

TO: Senator Bill Ray

FROM: Representative Joe Flood

SUBJECT: CSSB 257

I have a few questions in regards to CSSB 257. I would appreciate it if you or a member of your staff would take a few minutes and clarify the following points for me.

1. Page 3, line 19 and 20. Does the elimination of "held within the City and Borough of Juneau" mean that no events anywhere in the state can be held during the session?

2. Page 6, line 18 through 20. Does the elimination of "in excess of $100 and which does not in the aggregate exceed $250 in value during the calendar year" mean that no gift whatsoever, irregardless of cost or utility can be accepted by a member, i.e., the calanders we receive, the note pads, the pens, pencils, these sort of innocuous things. If we take out the dollar amounts are we therefore excluding everything.

3. Page 7, lines 1 and 2. This section makes reference to a legislator's family working during the interim. It does not specifially state that a legislator's family could work during the session. Under this clause, it appears to me that I could put my entire family on staff during session. Therefore, it would be extremely helpful to me if you or a member of your staff could read and interpret that clause in regards to this question.

4. Page 8, lines 12 through 17. This clause is referring to having the Executive Director for the Alaska Public Office Commission sitting on the committee. Considering that APOC has to come to the legislature for their budget needs, I believe we would be putting the Executive Director for APOC in an untenable position with respect to issues that come before the Ethics Committee insofar as the Director would be agreeing and in many cases disagreeing with individual legislators who have authority over the Director's department's budget. This appears to

me to present quite a problem for both the legislators and that Executive Director. Perhaps it would be better to simply have someone from the private sector be appointed to that committee. Perhaps a retired judge, retired commissioner, or respected but completely retired public official.

These were some of the points that came to mind as I worked through the legislation and I am confident that working together we'll be able to answer these questions and if necessary come up with solutions that are fair and equitable for all parties concerned.

FILE WITH 257

M E M O R A N D U M

To: Senator Bill Ray, Chairman
Conference Committee on SB 257

From: Senator Frank R. Ferguson FRF

Subj: Ethics Legislation Amendments

Date: March 12, 1984

In response to your memorandum of March 8, 1984 concerning the Ethics legislation, I will first of all give you comments on your recommendations and then comment on the overall bill.

Page 3, lines 16 and 17 I agree with these technical and substantive changes;

Page 3, lines 19-20 Although I agree with deleting the City and Borough of Juneau, I believe that the following should be inserted: the Capital City.

Page 6, lines 18-20 I agree with this substantive change.

Page 7, line 8 Although I agree with your change but it should be noted that it will be very difficult to determine whether or not a relationship was platonic or not if two individuals are living together.

Page 8, line 12 I prefer the language in SB 518 but in the spirit of compromise I could go along with the APOC Executive Director to serve as a member of the full committee and that the director or her designee shall sit on each subcommittee. I don't believe that the first Conference Committee reached an acceptable compromise and, therefore, I voted against the first Conference Committee Report.

Page 8, line 21 I agree with the technical change.

Page 9, line 2 I agree with the technical change.

Page 9, line 8 I agree with the technical change.

Additional Comments

Page 1 of 2 1. I believe all reference to legislative employees should be deleted from the bill because

legislators hire and fire. Legislators are elected but employees are appointed. Should a criminal infraction take place involving an employee, the courts can deal with the individual immediately.

2. I believe spouses should be prohibited from employment during both the session and the interim.

3. I believe it should specify the types of disciplinary action the committee can recommend including but not limited to censorship, loss of pay, fines or other penalties.

4. I believe the hearings on complaints should be open to the public unless the person in the complaint desires a closed proceeding.

5. I believe the penalty for divulging of information under this chapter should be changed from a class A misdemeanor to a class C felony.

M E M O R A N D U M

March 21, 1984

TO: Senator Bill Ray

FROM: Senator Arliss Sturgulewski

RE: CCSSB 257 Legislative Ethics

Thank you for an opportunity to comment on proposed changes to the above bill. Following are my comments.

1. You suggested an amendment on page 3, lines 19 and 20, following the word "event" delete "held within the City and Borough of Juneau." I do not support this deletion and prefer the language as currently stated in the bill. However, there does need to be language which provides an exemption for legislators who live within the City and Borough of Juneau.

2. Although you have taken a step in the right direction by adding the executive director of the Alaska Public Offices Commission to the Select Committee on Legislative Ethics, I have and continue to support public members on this committee with all rights of a legislative member. Support has been strong from my constituency for public members on the oversight committee. There is a strong feeling that political considerations will keep the legislature from adequately policing its own actions. I certainly hope you will reconsider the membership of the committee.

The other amendments appear to clarify the legislation. Again, thank you for an opportunity to comment.

MEMORANDUM

TO: Conferees, CCSSB 257 - Legislative Ethics

FROM: Senator Dick Eliason

DATE: March 10, 1984

RE: Proposed Amendment

Page 3, lines 19 and 20, following the word "event", delete: "held within the City and Borough of Juneau".

In my opinion, this amendment is proposed for one purpose only, that being to restore the questionable practice of fund raisers held in Juneau when the Legislature is in session. An attempt, but not a very clever attempt.

This specific prohibition was discussed on two occasions on the Senate Floor, when the Senate version passed. It was an amendment to the Ethics Bill, made on the Floor of the Senate and adopted by a majority of the Senate membership.

If it is not a conflict of interest to invite the lobbyists to a fundraiser for a legislator, the perception certainly is. There is no question in my mind that if a committee chairperson held a fundraiser in Juneau during session, any lobbyist who had anything of interest in that committee would feel obligated to either go or contribute. It seems to me to be the prudent thing to do, no matter what the "cover charge" might be.

If we truly want to bring credibility to our presence here in Juneau, such fundraisers must be prohibited.

I would certainly urge you to oppose this proposed amendment.

From the desk of:
Fritz Pettyjohn
Alaska State Senator

Re: CCSSB 257

Bill,

I believe 2 public, voting members should be appointed by the presiding officer of each body, subject to 1 3/4 confirmation vote.

I believe some former legislators (Butrovich?) would have the confidence of enough legislators to make it work.

I can think of possible public members who would probably be more trusted than some incumbent legislators.

Bill - this looks good! Vic F. 3-9-84

RESPONSE from SENATOR FISCHER

SB

312

SB 317

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

June 8, 1983

The Honorable Jalmar Kerttula
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to create an office of public advocacy within the Department of Administration. The bill transfers responsibility for the public guardian program (AS 13.26.360 -- 13.26.410) and for administration of statutorily required advocacy services from the court system to the executive branch.

PUBLIC GUARDIANSHIP

The public guardian office, established by the legislature in 1981 (AS 13.26.370), provides guardianship and conservatorship services to incapacitated persons and minors when no one else is willing or qualified to perform in this capacity. Many of the wards are severely handicapped due to mental retardation, developmental disabilities, or mental illness. The public guardian's responsibilities for individual wards include placement; securing medical, dental, vocational, or rehabilitation services; financial management; benefits application; and personal visits.

The public guardian is also required to assist private guardians throughout the state to ensure that guardians and conservators secure the necessary services for the persons they protect. This task involves maintaining contact with community resource programs and government agencies, and producing informational and educational aids.

The court system is not qualified or equipped to handle such a social services program. By law, coroners/public administrators must serve as the public guardians, yet none of the coroner/public administrators is a social worker.

PUBLIC REPRESENTATION

The court system, by statute (AS 18.85.130(a)), appoints and compensates attorneys who represent indigent persons when the public defender agency cannot provide an attorney because of a conflict of interests. The court is also authorized by current law to appoint and pay for guardians ad litem to represent the best interests of a minor in proceedings which affect the minor's welfare (AS 09.65.130). Representation and guardian ad litem services presently are provided by contract with private law firms and by direct court appointment at hourly rates that are below customary rates charged by attorneys.

OFFICE OF PUBLIC ADVOCACY

The bill creates an office of public advocacy under the commissioner of administration, who also oversees the public defender agency. The office will be empowered to provide public guardian and guardian ad litem services as well as legal representation to indigent persons, when authorized by existing statutes. Services will be provided both by staff employed by the office and by independent contractors, subject to centralized management under the commissioner of administration.

In creating such an office, it is anticipated that it will have locations in major population areas around the state. This will permit efficient sharing of resources, including space, personnel, clerical support, and other administrative costs, with other state offices. In developing the staffing requirements and other costs, it has been determined that in many instances it will be less costly for the state to establish full-time offices with full-time employees rather than contract for these services.

The judicial branch supports transfer of the public guardian program and the management of advocacy services to the office of public advocacy. Principles of sound management and fiscal responsibility point to the desirability of this approach, and I urge passage of the bill.

Sincerely,

Bill Sheffield
Governor

ANALYSIS OF SB 312

The FY 85 budget for the Court System contains $2,395.500 of funds for the functions being transferred to the Department of Administration by this bill. In the transfer of the guardian function, the Court System will maintain the existing eight (8) positions until the Department of Administration has established its organization and offices around the state. At that time the positions will be transferred to the Department of Administration.

Fiscal Note Analysis
Prepared by Administrative Services
Department of Administration

Date: February 7, 1984

Establishment of the Office of Public Advocacy will transfer numerous attorney functions, now being handled by the court system through contracts with attorneys in private practice, to a new office with staff attorneys and guardians. The attached breakdown of budget figures is based on suggested staffing for this office provided to the Department of Administration by the Alaska Court System.

Due to the fact that the Office of Public Advocacy, like the Public Defender Agency, will be unable to control which cases are assigned it by the court system, flexibility must be allowed the department. This was the reason for the original lump sum fiscal note presented to this committee.

A number of variables associated with transforming these attorney functions in to a new State agency still exist. These variables necessitate giving the Department of Administration maximum flexibility in allocation of funds between personal services and contractual and or transfer of positions from one geographic area to another to accomplish the following:

1. Provision of quality services to indigent clients in remote bush areas by contracting with local attorneys on a case-by-case basis;

2. Handling multiple-defendant conflict cases by contract where the Public Defender Agency and the Office of Public Advocacy are each already handling one defendant and have a conflict in representing additional defendants associated with the case; and

3. Transfer of attorneys, guardians, and clerical positions from one Office of Public Advocacy branch office to another as the caseloads warrant.

These projected costs are predicated upon utilization of attorneys as State employees rather than engagement of private attorneys contracted on an as-needed basis. However, some private attorney contracts will continue to be necessary in cases of multiple party conflict and to assist the Office of Public Advocacy in remote locations.

It is intended that the court system will continue to handle the responsibilities of the guardianship cases in FY 85 and the completion of any open contracts until the cases are resolved. The court system will retain the seven guardian PCN's and one accounting clerk, and the Department of Administration will allocate Reimbursable Services Agreement funds to the court for these costs. In FY 86 these 8 positions will transfer to the Department of Administration.

The Department of Administration will manage the Public Advocacy FY 85 Budget Appropriation during the transition period and RSA funds to the Court System to pay the continued contract costs during this period.

CSSB 312 (Jud)
Fiscal Note Analysis
Prepared by Administrative Services
Department of Administration

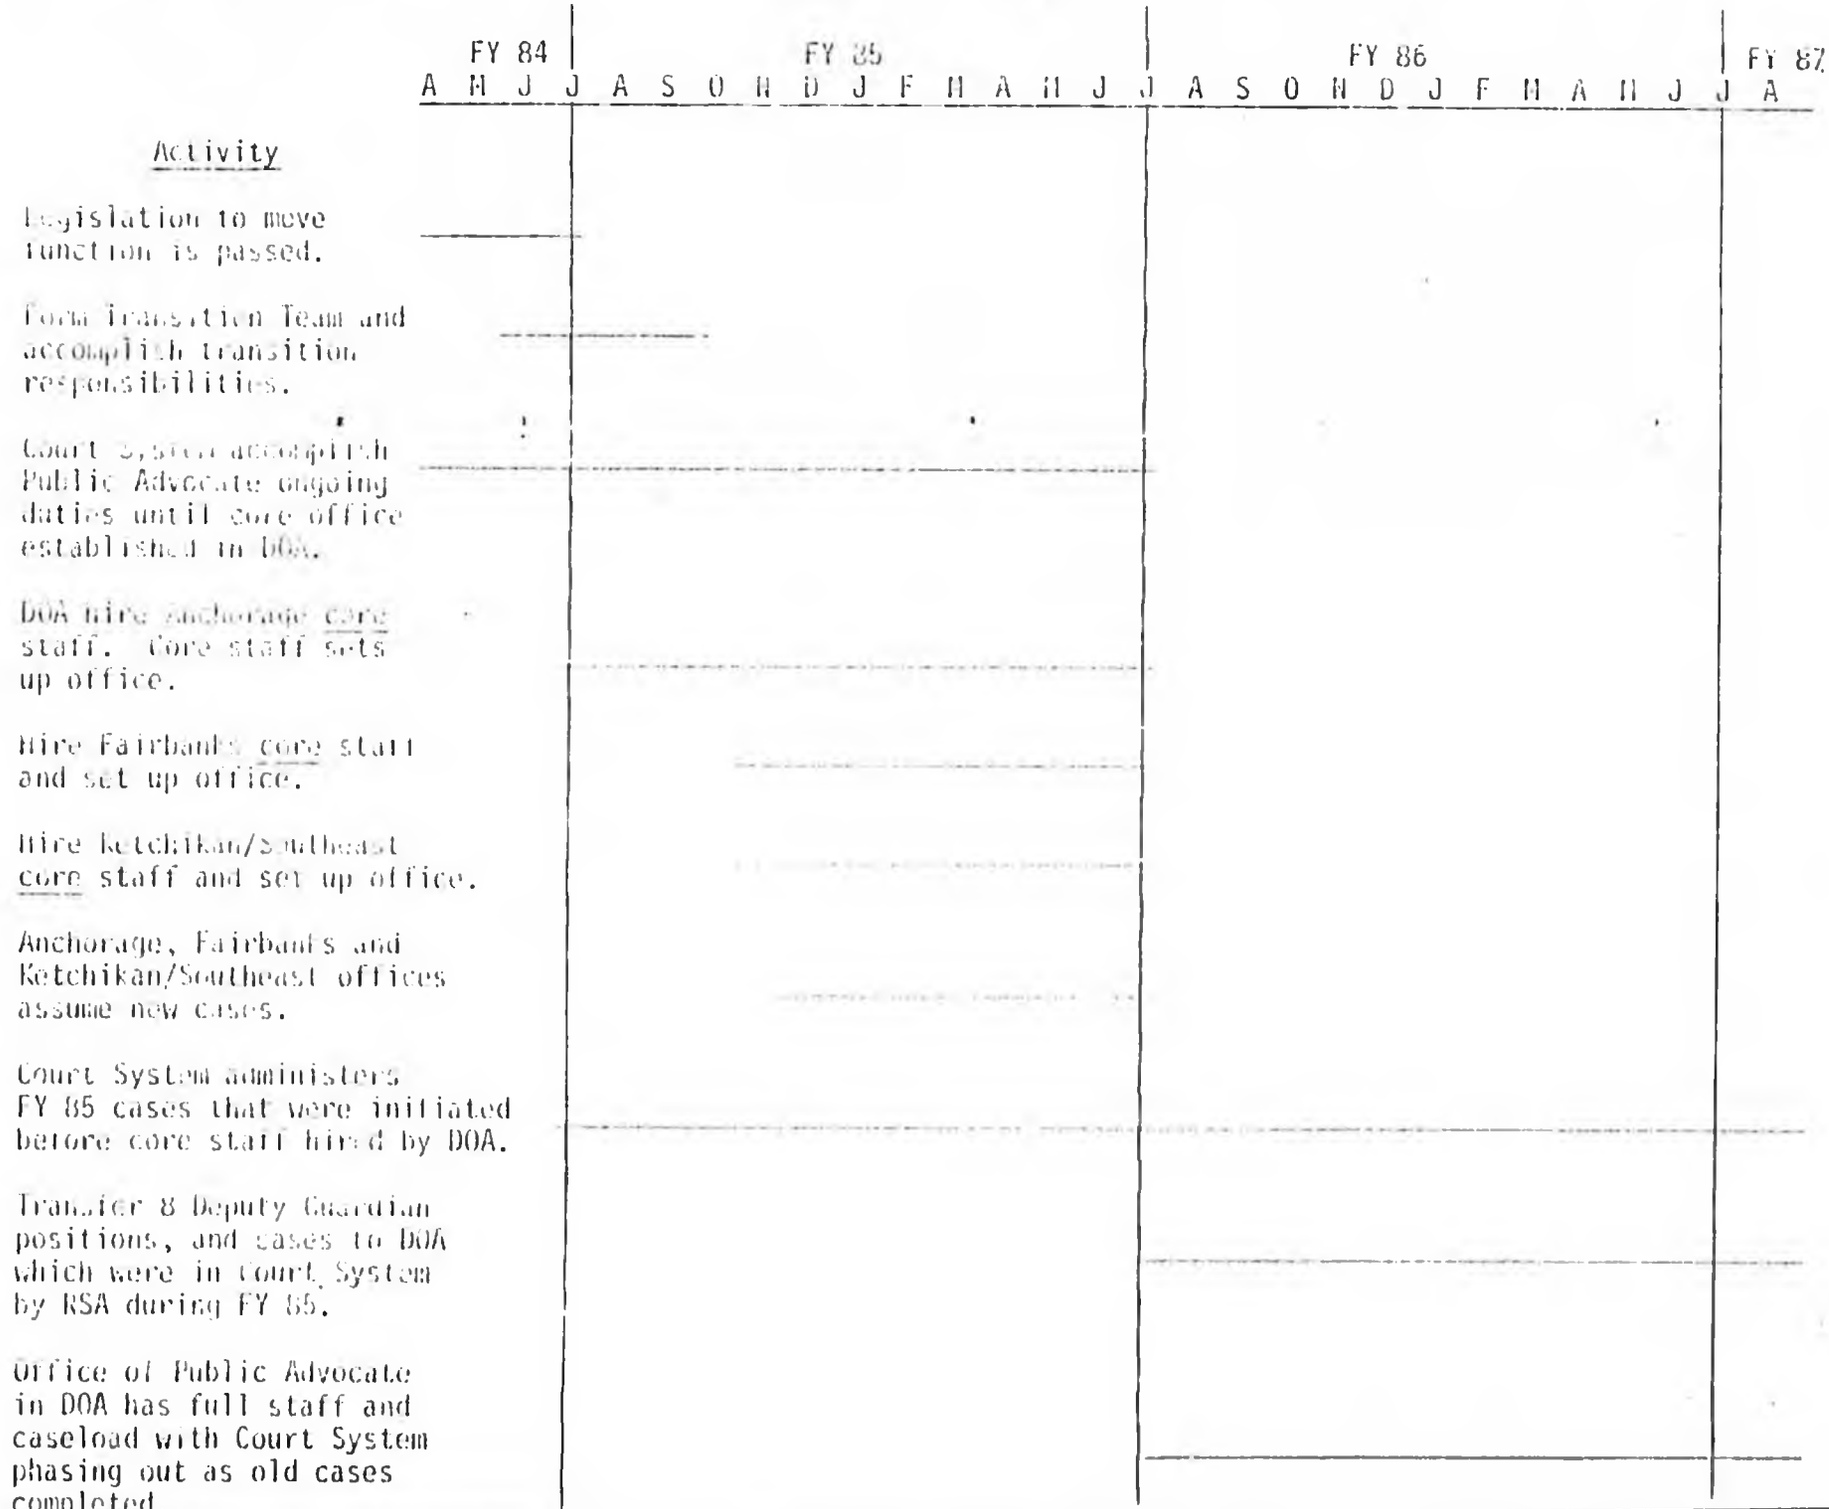
Date: February 7, 1984

The Department of Administration, Division of Administrative Services, has projected the need for two additional accounting technicians to handle the increased responsibilities of another division within the department. These positions are for additional workload in professional contracts, vendor payment and payroll functions for these three new offices.

This Fiscal Note is based on information from the court system on caseloads, location of cases, hours per case and costs of guardianship.

Because the Public Advocacy Office will be administered differently than in the court system, we can not guarantee that moving the function will be a cost saving matter. Neither can we guarantee the actual costs since we have used court system projections without having performed this function ourselves.

Office of Public Advocacy



FY 85 Staff Projection

Hire Date	Staff	Position	Location	Full 12 Month P.S. Cost	Months Vacant	FY 85 Partial Cost
07-01-84		Attorney VI	Anchorage (1)	$ 74,900	0	$ 74,900

SOURCE OF FUNDS TO OFFSET FISCAL IMPACT OF BILL:

ANALYSIS:

This act amends the state's statutes covering the treatment of mentally ill persons. The amendment clarify existing law and provide additional safeguards for the general public and the relatives of mentally ill persons, while seeking to protect the legal rights of persons suffering from mental illness. The amendments will not require any additional legal services, over those currently being provided, and their enactment will not have a fiscal impact on the department's operations.

HEALTH-ANALYSIS
12/1/83

The Division of Mental Health and Developmental Disabilities does not foresee any increase or decrease in expenditures as a result of the passage of SB 346 at this time. The primary purpose of this bill is mainly directed at reducing the procedural requirements of A.S. 47.30.655 - 47.30.915, changing the age of majority from 14 to 18 years of age, changing the period of time for the initial commitment from 21 to 30 days and the third period of commitment from 120 to 180 days, expanding the definition of peace officers to include mental health professionals, and slightly relaxing the standards for commitment.

We do not believe that any of these proposed amendments will increase or decrease the number of mentally ill persons that will require hospitalization. The amendments should, however, make it easier to commit the mentally ill which should result in more professional staff time available to provide direct patient care and treatment rather than excessive time being expended in the commitment process.

ALASKA MENTAL HEALTH ASSOCIATION

2611 Fairbanks Street, Suite A Anchorage, Alaska 99503
Telephone 276-1705

A Division of the National Mental Health Association

February 29, 1984

Senator Joe Josephson
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Josephson:

On February 15, 1984, I was involved in an emergency commitment situation which occurred at approximately 4:30 p.m., and which I think exemplifies one of the basic problems with the current commitment law. A patient came to the Fairbanks Community Mental Health Center for treatment and expressed an intent to kill herself. After evaluating her, the mental health professional called Carol Davis, the Probate Clerk who ordinarily handles these cases for the Magistrate. Ms. Davis stated she could not order an involunatry emergency commitment after hours because she could not do the paperwork. She would give the order if a physician at the hospital requested it. She advised the Center to call the police and have them exercise their authority to Emergency Commit the patient.

When the municipal police arrived, they said they knew they could commit, but refused to exercise their power because it is their agency's policy to avoid this responsibility except when they "encounter" a person in the usual course of their duties. They appeared to feel that the court system was "dumping" the responsibility on their shoulders after hours.

As you know, under current law, neither the mental health professional or a physician can act in this type of situation alone. In fact, the policemen involved were aware of this and also aware that they were the only ones empowered to act alone. Needless to say, this stalemate tied up the mental health professional - who was forced to cancel other patients - the court representative, and the police. It was finally resolved by an extra-legal (in my opinion) act. The police officer said that he would transport the patient to the Fairbanks hospital emergency room if the emergency room doctor would agree to see her and, in effect, authorize the involuntary transport. This freed the Center to resume its activities and seemed to shift the responsibility to the hospital.

I think you can see that the Mental Health Center and the patients are caught in a kind of territorial dispute between the municipal police and the court

system. Since both of these systems feel free to operate independently, the "system" of care breaks down. It results in one emergency commitment system for 9:00 a.m. to 5:00 p.m., and another for 5:01 p.m. to 8:59 a.m. A similar stand-off has occurred in Anchorage, although the situation in Fairbanks is more complicated because the system must depend upon a private hospital.

The provision in the revised commitment bill which reinstates the physician certificate (or mental health professional certificate) would alleviate this this problem.

It would also be alleviated if the courts and the police would work cooperatively.

Sincerely,

Jerry L. Schrader, M.D.
President, Alaska Mental Health Association

OFFICE OF THE COMMISSIONER

POUCH H 01
JUNEAU, ALASKA 99811
PHONE: 465-3030

April 14, 1983

Document No. 83-152

The Honorable Joe Josephson
Senator
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Josephson:

RE: AS 47.30.655 - 47.30.915
(Involuntary Commitment Act for
Mentally Ill Persons)

We appreciate the work you are undertaking and would like to add our comments to those you have already received regarding possible amendments to Alaska's recently enacted civil commitment statutes for mentally ill persons. As you know, the Division of Mental Health and Developmental Disabilities supports the general intent of the Act but feels it is procedurally too cumbersome. This seems to have resulted in treatment staff wasting their time in complying with procedures and filling out numerous forms rather than providing treatment for mentally ill persons.

I have enclosed a copy of our earlier suggested amendments that were prepared during the previous administration. The status of these suggested amendments is unknown to us. Upon review, however, I believe that you will agree that they are primarily designed to facilitate treatment. In addition, I am confident that the Attorney General's Office will be able to assist your staff in determining which forms, notices and procedures that are presently required can be deleted while still protecting the rights of the mentally ill.

Another area of extreme importance in the successful implementation of this Act has been the availability, or lack thereof, of detoxification facilities and other alcohol and substance abuse programs and services. Experience has shown that the emergency involuntary hospitalization at API of persons with a primary diagnosis of alcoholism has increased dramatically since the new Act became effective. This is cause for considerable concern to us as our bed space for legitimate psychiatric emergency cases is in extremely short supply. We believe that if additional alcoholism and substance abuse programs offering emergency

inpatient care were available, especially in Anchorage, that the number of referrals of intoxicated persons to API would be substantially reduced. You may be interested to know that the provisions of the Uniform Alcoholism and Intoxification Treatment Act (AS 47.37.010 - 47.37.270) have never been fully implemented, partially as a result of a lack of inpatient facilities that offer various types of alcoholism services and treatment.

The most utilized provision of the Uniform Alcoholism and Intoxification Treatment Act seems to have been what is called the "12-hour drunk law." This provision allows persons that are seriously incapacitated as a result of alcohol to be placed in a local jail or state correctional center for up to 12 hours with no criminal charges being filed. In the past, this has permitted law enforcement agencies the opportunity to take intoxicated persons into custody and house them in a jail or correctional center until the person has regained sobriety and is no longer in danger of harm as a result of his inebriated condition.

Unfortunately, as a consequence of the extreme shortage of bed space in all of Alaska's correctional centers, law enforcement agencies are no longer able to deliver these incapacitated persons to correctional facilities and have them held in custody until they are no longer incapacitated by alcohol. More simply put, as a result of serious overcrowding in our correctional systems, drunks are being taken to API and kept there until they sober up sufficiently to make a diagnosis. More often than not, the diagnosis reveals that they are suffering primarily from alcoholism and not a major mental illness. At that point they are discharged and referred elsewhere. This results in a serious misuse of the few psychiatric resources we have. It is our position that these limited resources should be exclusively available to the seriously mentally ill person that presents himself, or is presented, to Alaska's only designated psychiatric hospital.

In addition to the recommended amendments contained in the enclosure, as well as the previously mentioned concerns, we have listed below a number of other changes to the Act that we would like to support:

1) We recommend that the period of commitment be changed from 21 days, 90 days, and 120 days to 30 days, 90 days, and 180 days. It is our opinion that this would reduce the administrative workload of our treatment staff while having little or no effect on the period of time patient's are actually involuntarily committed.

   Rather than interrupt treatment after 21 days in order to undergo the 90-day commitment process, treatment could continue for an additional 9 days if necessary. This would allow medications and other forms of therapy some additional time to stabilize the patient, possibly resulting in a discharge between the 21st and 30th day. The change from 120

days to 180 days is simply to reduce the administrative and procedural requirements necessary for the long-term, chronic metally ill patients that require extended periods of hospitalization.

2) We propose that all references to a minor child be changed from age 14 to age 18 throughout the Act. Numerous situations have arisen as a consequence of this provision that indicate it has fostered confusion as well as placing young people and API in an awkward position with regard to their status. It is also not in concert with other provisions of Title 47 that address the care and treatment of minors in Alaska.

3) Under AS 47.30.730(a)(3), we recommend that the following language be added with regards to gravely disabled: "... or that painful or dangerous regression could be prevented and the respondent could maintain the capacity for self-reliance;...". It has been our experience that some gravely disabled individuals may not be expected to actually improve during hospitalization, but if left untreated can be expected to suffer substantially, even to the point of requiring permanent institutionalization as a result.

4) Under AS 47.30.840(4), (5), (6), and (7), we suggest that provision be made to restrict these rights in unusual circumstances in which harm to the patient or others may result if these rights are exercised. We propose adding "... unless the professional person in charge determines it is not in the best interests of the patient and will pose a threat to the safety or well being of the patient or others;..." to these sections.

5) We recommend that AS 47.30.845 be amended to add a provision that would allow confidential information or records to be disclosed to law enforcement agencies in emergency situations involving a current or former patient. In order to restrict this disclosure we suggest the following section be added: "(7) a law enforcement agency when there is substantiated concern over imminent danger to the community by a presumed mentally ill person."

This would allow the disclosure of information to law enforcement agencies that may be helpful in preventing needless injury or death occurring as a result of the actions of a mentally ill persons during an emergency situation.

6) An additional area that, in our opinion, should be revised is the area of involuntary outpatient commitment. Thusfar, there have only been a limited number of these types of commitments. It seems, however, that none have proven successful for various reasons. While the idea of involuntary outpatient

commitment appears sound, the provisions of the Act appear to militate against the successful utilization of this less restrictive alternative. Perhaps your proposed revision to the definition of "likely to cause serious harm" will have a positive influence on the successful use of outpatient commitment.

It should be noted, with regards to outpatient treatment, that AS 47.30.800(a) requires persons seeking conversion from involuntary outpatient commitment to inpatient commitment must have direct knowledge that the respondent is mentally ill or gravely disabled. If the respondent fails to report to the provider of service, than the provider will be unable to substantiate the allegations necessary to convert the commitment to inpatient treatment.

7) In AS 47.30.745(b), the last sentence should read "... not later than 90 days..." rather than "... not earlier ...." as it currently reads.

8) The final area in which we would recommend revision is the requirement that all patients be given the opportunity to be voluntarily admitted. We do not dispute the value of this option in the vast majority of cases that require psychiatric hospitalization; there are, however, instances in which it may not be wise or prudent to be required to offer or allow the voluntary admission of some patients to the hospital. Certainly, the substitution of "reasonable" for "every" in Section 1 of your draft is a step in the right direction. We would hope that it would be interpreted to mean in cases in which it was deemed unreasonable, that involuntary commitment proceedings would commence.

While I am confident that these recommendations for amendments do not represent a panacea for all that is wrong with such a complicated set of laws, I am certain that these, along with many other suggestions that you have received, represent a substantial improvement in providing for the care and treatment of Alaska's mentally ill. Again, I would like to thank you and your staff for giving this information your review and consideration. My staff and I look forward to working with you and other members of the Legislature in revising our civil commitment laws.

Sincerely,

Robert London Smith

Commissioner

Enclosure

POSITION PAPER/Department of Health & Social Services

RECEIVED

POSITION PAPER

Senate Bill No. 346

"An Act relating to the treatment of mentally ill persons."

In October, 1981, Chapter 84, SLA 1981 became effective. This act completely revised Alaska's involuntary commitment laws for mentally ill persons that required involuntary hospitalization or treatment. Upon its effective date, there was considerable concern that the Act was procedurally cumbersome which would require that an excessive amount of professional treatment staff time be consumed in filling out forms, testifying in court, and other non-treatment related activities. While the Act has proven workable and involuntary commitment of the mentally ill have continued to occur, there are a number of areas in the Act that have proven repeatedly troublesome since its effective date. Senate Bill 346 is an attempt to amend some of those troublesome provisions that have tended to inhibit or hamper the treatment of the involuntarily committed mentally ill patient.

The majority of the amendments that are proposed in Senate Bill 346 are technical rather than substantive in nature, a number of the amendments are intended to change the Act in a way that is seen by many as improving its effectiveness. Those amendments that are considered to require clarification are discussed below:

Page 1, Section 1, Line 20:

During the period of time the Act has been in effect, many areas have applied literal interpretation to the requirement that "every" opportunity be afforded to respondents to accept voluntary treatment. The result has been instances in which a prospective involuntary patient has repeatedly refused to accept voluntary treatment until the court hearing is actually in progress or about to begin and then suddenly decides he will accept voluntary treatment. The court proceedings cease and the petition for commitment is dismissed. If, prior to arrival to API for involuntary admission, the patient changes his mind and again refuses voluntary treatment (as has been the case), the entire involuntary commitment process must be started anew.

This has been cause for considerable concern and confusion. The amendment offered would change "every" opportunity to "reasonable" opportunity to accept voluntary treatment. This would allow for some discretion in its interpretation. Thus, if a patient repeatedly refused voluntary treatment, the commitment process would proceed even if the patient requested voluntary treatment at a later time. This would insure that treatment would be possible and the expensive commitment process would not have to be repeated unnecessarily.

Page 2, Section 2, Line 7:

Under the Act, the age of majority, for purposes of accepting or rejecting voluntary treatment without the consent of a parent or guardian was set at 14 years old. This has created a number of difficulties especially for those children between the ages of 14 and 18 years of age.

For example, a 14 year old child could present himself at API and request admission without the knowledge or approval of the parent or guardian. As A.S. 47.30.845 (Confidential Records) does not give the hospital the authority to release any information to the parents or guardians of a person 14 years of age or older without the permission of the patient, it may not be legal for us to tell parents or guardians the whereabouts or condition of their child.

Also, a 14 year old child that would benefit from evaluation or treatment at API but does not meet involuntary civil commitment standards may not be admitted at the request of the parents or guardian unless the child voluntarily agrees to accept treatment. Thus, some mentally ill children may not receive necessary mental health care and treatment even though their parents or guardian attempt to provide these services for them. In cases such as this, it becomes even more ludicrous if the Division of Family and Youth Services attempts to file a petition to have the court find the youth as a child in need of aid by alleging that the child's medical needs are being neglected. If the parents or guardian sought voluntary hospitalization of the child that is 14 years old but the child refused treatment, then parental neglect, which would support a finding of a child in need of aid status, is not possible.

The amendment proposed would change the age of majority under this section from 14 to 18 years of age. This would be consistent with other statutes that govern the care of treatment of these children and adolescents as well as correct these legal anomalies.

Page 3, Section 5, Line 12

This would increase the period of time for voluntary hospitalization of a minor by 9 days (from 21 to 30 days). This additional time will increase the ability of the hospital to provide a more thorough and comprehensive evaluation and treatment program for mentally ill children.

Page 3, Section 5, Line 22-23,

This language would broaden the circumstances under which a minor may be accepted for admission at the hospital if the professional person in charge believes that hospitalization is necessary on a voluntary basis. This added provision could prove very helpful in addressing the treatment needs of mentally ill children and adolescents who are at risk of further deterioration and need hospitalization. Under the existing statutes, unless improvement in their condition can be reasonably expected, admission may not be possible. We believe this added provision will prove helpful in providing necessary care and treatment for this group of patients.

Page 4, Section 6, Lines 6-26

The addition of this language provides needed clarification regarding the circumstances and procedures for releasing or retaining mentally ill minors with or without the consent of the parent or guardian. It is especially pertinent as there have been occasions when the safety of the child or others was questionable and the child was not committable but the parents or guardian have demanded immediate release of the child. This amendment will make it possible to insure the safety of all concerned prior to release of the minor.

Page 5, Section 7, Line 3

By granting mental health professionals the authority to take mentally ill persons into custody under an emergency situation and deliver them to an evaluation facility, a number of problems will be alleviated. Under the existing statutes, if a physician in an emergency room examines an individual that is brought to the hospital by relatives or friends, and the patient is clearly mentally ill and is in need of immediate hospitalization, the physician may have to call the police in order to have a peace officer take the patient into custody and sign an application for the patient's examination. This situation may occur in any hospital in Alaska including API.

Under the proposed amendment, the physician or any other health care professional that is included in the definition of a mental health professional under A.S. 47.30.915(11), can sign the application for examination under A.S. 47.30.705 and have the patient held in custody pending completion of the exam and receipt of an ex part order.

Page 5, Section 7, Lines 9-12

As written, this proposed amendment, if strictly interpreted, could tend to prohibit the completion of examination or evaluations of patients that were detained in jails or correctional centers even if qualified evaluation personal were available. We certainly agree in principle that jails and correctional centers should not be used to hold the non-criminal, mentally ill; however, in practice, we have found that under certain exceptional circumstances, a jail or correctional center may be the only facility available to detain the patient at the local level for purposes of evaluation and insure the safety of the patient and the community.

It has been our experience that the utilization of there types of facilities is neither widespread nor indiscriminate and is used only on a very short-term basis. Nevertheless, when it is necessary to house patients in jails or correctional centers, we proceed with the examination, evaluation, and involuntary commitment process when the necessary resources are locally available. The time spent by these

patients under these circumstances is then counted for purposes of the 24 hour and 72 hour time limit that is required for examinations and evaluations to occur by mental health professionals. This tends to insure that patients are not detained longer than necessary and treatment, if indicated, can commence immediately.

Consequently, we recommend that this amendment be deleted and that the existing language in A.S. 47.30.705 on lines 12-15 (in brackets) should be retained.

Page 5, Section 7, Line 24

This amendment would change the period of time for the first involuntary commitment from 21 to 30 days and is repeated throughout Senate Bill 346. The additional 9 days would tend to reduce the administrative workload of our treatment staff while having little or no effect on the period of time patients are actually involuntarily hospitalized.

Rather than interrupt treatment on the 21st day in order to undergo the 90-day commitment process, treatment could continue for an additional 9 days if necessary. This would allow medications and other forms of therapy an additional period of time to stabilize the patient, possibly resulting in a discharge of the patient between the 21st and 30th day.

Page 9, Section 10, Lines 17-19

This amendment is designed to insure that a less formal courtroom atmosphere is possible during the involuntary civil commitment process. This should make the commitment proceedings less painful and frightening to the mentally ill respondent.

Page 9, Section 10, Lines 27-28

The addition of this provision to allow a respondent to call his own experts or other witnesses to testify on his behalf is not seen as necessarily having an impact on the Division of Mental Health and Developmental Disabilities unless the respondent decides to call experts from API to testify on his behalf. It may, however, have a financial impact on the Alaska Court System if the respondent is indigent and the court has to pay the expenses of the experts and other witnesses called by the respondent on his behalf.

Page 12, Section 13, Line 7

This amendment would change the 120-day commitment to 180 days and is repeated throughout the bill. This change will reduce the administrative and procedural requirements necessary for the long-term, chronic mentally ill patients that require extended periods of involuntary hospitalization.

Page 13, Section 16, Lines 23-26

This additional requirement for notification of a patients family or guardian as well as any person known to been threatened by the patient of his unauthorized absence from the treatment facility is supported by the Division of Mental Health and Developmental Disabilities. We feel that this is an appropriate and necessary measure in cases such as this.

Page 14, Section 18, Lines 8-9

The addition of this language is seen as necessary and will correct what appears to have been an oversight when the he Act was drafted. It simply makes specific that computations of time for a patient being evaluated or a patient being detained for evaluation do not include Saturdays, Sundays, legal holidays, or transportation time and are not to be included in the 72 or 48 hour time limitation prescribed by the Act.

Page 15, Section 19, Lines 6-7

This adds mental health professionals among those that may not be held civilly or criminally liable for detaining and transporting a person, under the Act. This amendment is consistent with this section of the Act.

Page 15, Section 20, Lines 15-17

This amendment will require that an adult designated by the respondent must give informed consent in cases in which the patient is unable to give informed consent prior to certain treatments being authorized. We feel this is an appropriate addition to the Act.

Page 15, Section 21, Lines 28-29

This simply requires that an adult designated by the patient must be provided a copy of the patient's discharge plan. This is consistent with A.S. 47.30.845 under the existing statutes regarding confidential information.

Page 17, Section 24, Lines 6-8

This proposed amendment would clarify the circumstances under which the hospital may release confidential information and records to law enforcement agencies when they are concerned that a patient or ex-patient may present as an imminent danger to the community. Under certain circumstances, we feel it is in the best interests of the community and the patient to take such action.

Page 17, Section 24, Line 13

The addition of this language will include hospitals operated by the federal government, such as the PHS facilities, for use as evaluation facilities for purposes of the Act. Under the existing statutes, these facilities are not included in the definition of an evaluation facility and some of these federal facilities have not been able or willing to be utilized in this capacity.

Page 17, Section 24, Lines 21-26

This addition to the definition of a gravely disabled person will significantly clarify and improve our position with respect to the involuntary care and treatment of these patients. An additional period of hospitalization may help prevent further deterioration of gravely disabled persons in order to avoid or reduce the risk of further tragedy and/or agony.

Page 18, Section 27, Line 1

This amendment offered in the bill will reduce the standard upon which a potentially suicidal person may be taken into custody and involuntarily committed. It is our belief that this is both necessary and appropriate given our current rate of death by suicide in Alaska.

Page 18, Section 27, Lines 5-8

As in the previous section, this language will alter the standard for involuntary hospitalization of a person that may present as a danger to others or to the property of others. This may allow some seriously mentally ill persons to be involuntarily committed before they actually harm another person or another person's property.

Page 18, Section 28, Lines 17-20

This simply requires that a psychologist or a psychological associate must be trained specifically in clinical psychology in order to be considered a mental health professional for purposes of screening, examination, and evaluation under the Act.

Page 18, Section 28, Lines 22-24

This amendment is intended to include in the definition of mental health professionals those registered nurses that have experience in psychiatric nursing in a JCAH accredited psychiatric hospital for purposes of screening, examination, and evaluation under the Act. This is considered an appropriate addition to this definition.

POSITION PAPER/Department of Health & Social Services

The Department of Health and Social Services generally supports the amendments contained in Senate Bill 346 and endorses its passage with the exceptions noted above.

SECTIONAL ANALYSIS OF CSSB 346 (JUD)am - AN ACT RELATING TO THE TREATMENT OF MENTALLY ILL PERSONS BY Josephson and Faiks.

NOTE: Throughout the bill, the age of majority has been changed from 14 to 18, commitment time periods have been from 21, 90 and 120 days to 30, 90, and 180 days, and neutral words have been substituted for gender pronouns.

Section 1 — Provides a word change ("every" to "reasonable") to limit the endless paperwork from patients transferring in and out of voluntary status.

Section 2-5 — Changes the age of majority under the title from 14 to 18 to make this statute consistent with others dealing with juveniles. Section 4 also changes the term "immediate" to "timely" in order to avoid the inoperable situations caused by literal interpretation of the language.
Section 5(b) provides for the appointment of a guardian ad litem for each minor to monitor appropriateness of placement. Subsection (3) adds language to admission procedures to allow treatment of those minors whose condition could worsen if untreated.

Section 6 — Provides options for the release of a minor, and options to keep a minor in danger of harming self or others. (Statutory basis for procedure currently used at A.P.I.)

Section 7 — Adds "mental health professional" to current law allowing peace officers to take someone into custody for emergency evaluation. It also limits the use of a correctional facility for the mentally ill, providing only emergency protective custody while awaiting transportation to an evaluation facility.

Section 8-9 and 10 — Technical amendments concerning time computations and neutral language to comply with other sections of this bill.

Section 11 — Adds to respondents rights in a 30 day commitment hearing; that the rules of evidence and civil procedure be applied in an informal way;
that experts and other witnesses may testify on the respondent's behalf.

Section 12, 13 and 14 — Time computation changes.

Section 15 — Adds a new section providing that medication and treatment may be administered to an involuntarily committed patient in compliance with patient's rights.

Section 16 — Provides new language to the statute dealing with unauthorized absences providing that a parent, guardian or a person known to have been threatened by the patient will be immediately notified.

Section 17 — Adds a new section to the statute relating to the change of status from involuntary to voluntary, providing that the physician must agree that the transfer is appropriate and must be made in good faith.

Section 18 — Provides that acceptance of order, and 48 hour detention period time computations will not include weekends and holidays.

Section 19 — Amends liability section to include a mental health professional who detains and transports a patient.

Section 20 — Provides that an adult designated as a guardian shall be provided with a copy of a patient's discharge plan.

Section 21 — Adds a new section to the law providing that a patient has the right to a nutritionally sound and medically appropriate diet.

Section 22 — Adds to the patient's rights section of law, additional rights to:
be free of corporal punishment;
exercise and recreation;
at any time have a visit or phone conversation with an attorney;
not be retaliated against for assertion of rights.

Section 23 — Allows for temporary suspension of certain patient rights (wearing personal clothing, phone calls, visitors and recreation) only after the initial evaluation period, if there is a threat to the patient or others.

Section 24 — Allows access to confidential records by a law enforcement agency if there is substantial concern over imminent danger from a presumed mentally ill person.

Section 25 — Includes federal facilities in the definition of "evaluation facility".

Section 26 — Expands the definition of "gravely disabled" to include persons who are not in imminent danger, but whose lack of treatment would cause deterioration of their condition.

Section 27 — Expands the definition of "likely to cause serious harm" beyond recent attempts to include threats and likelihood of injury in the near future.

Section 28 — Changes language relating to psychologists and psychological associates, to be consistent with their licensing statute, which indicates that they do not have a "specialty designation" but have training in clinical psychology.

Section 29 — Definition of mental illness.

The Honorable Mae Tischer
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

SB 346, relating to the treatment of mentally ill persons has passed the Senate and has been referred to your committee.

This bill is the result of a year and a half of work by the Senate, and addresses the concerns of all who testified in the many hearings conducted around the state.

I was pleased to incorporate your amendment for the right to a nutritionally sound and medically appropriate diet (Section 21). A significant amount of new patients' rights will be added to the mental health commitment law with the passage of this bill.

My interest in this legislation was sparked by input from family grounds of the chronically mentally ill, the Alaska Mental Health Association and the Alaska Psychiatric Association. The major revision in the law of 1981 brought about dramatic changes in the treatment of the mentally ill, and I see SB 346 as a refinement of those provisions.

I am enclosing some backup material on this legislation for your perusal. I know this is a difficult and emotional issue, but I find that this bill has a broad base of support.

I will be happy to meet with you at any time to discuss this issue.

With best wishes, I am

Sincerely,

Joe P. Josephson

RE: Version 3, Proposed House CS for CS for Senate Bill 346 (HESS)

Attached please find a copy of Version 3 of a proposed House HESS CS for CS for Senate Bill 346, "An Act relating to the treatment of mentally ill persons."

The amendments to the bill, indicated with blue highlighting on the attached draft, are found on the pages and lines indicated below. A brief explanation of the effect of each amendment is provided. Please note that page and line references are to Version 3, House CS for CS for Senate Bill 346 (HESS), dated May 15, 1984.

1. Page 1, line 20: This phrase was slightly reworded so as to give added emphasis to the requirement that persons be given ample opportunity to accept voluntary treatment.

2. Page 3, lines 24 - 26: This sentence was rewritten so as to accommodate a couple of substantive and technical amendments: (a) at the request of the Court System, the words "under AS 25.24.310" (circled on line 25 of the draft) were inserted in order to clarify the legal mechanics for the appointment of guardians ad litem as described in this section; (b) the words "as soon as possible" (circled on line 26 of the draft) were inserted so as to require the prompt appointment of a guardian ad litem for each minor.

3. Page 3, lines 28 and 29: As in amendment 2(a) above, the words "under AS 25.24.310" were inserted at the request of the Court System in order to clarify the legal mechanics for the appointment of guardians ad litem under this section.

4. Page 4, lines 11 - 15: This amendment would require a treatment facility to inform as soon as possible the parent or guardian of a minor under 18 years of age if the minor is detained at or admitted or committed to the treatment facility.

5. Page 13, lines 27 and 28: The catch line for AS 47.30.790 was changed so as to more accurately reflect the contents of the section.

6. Page 16, lines 4 - 16: This set of amendments would require a treatment facility to evaluate all patients present in the facility for more than 72 hours to determine if any individual patients have nutritional deficiencies. In conjunction with the original requirement that the treatment facility provide a nutritionally sound diet, this amendment further requires the facility to take appropriate steps to correct any identified deficiencies.

7. Page 20, line 11: This amendment merely returns the language in the bill to the way it appears in present law, deleting the reference to "a psychologist trained in clinical psychology."

8. Page 20, lines 17 - 18: This amendment inserts the word "substantial" before the word "experience," the effect of which would be the application of a higher standard (requiring substantial experience, instead of some possibly lesser degree of experience) when determining the kind of social worker who would be qualified to act as a "mental health professional."

9. Page 20, line 18: This amendment, meant as a purely technical amendment, changes the phrase "experience in the field of mental illness" to "experience in the field of mental health."

10. Page 20, lines 27 - 29; Page 21, lines 1 - 3: This amendment inserts temporary law requiring the division of mental health and developmental disabil-

ities to review the literature concerning orthomolecular psychiatric methods (nutritional therapy) in order to determine their potential uses in the treatment and diagnosis of mentally ill persons in the state; and to submit the report to the legislature by February 1, 1985.

Amendments 1, 2(b), 5, 7, 8 and 9 are found in Version 3 of the proposed House HESS Committee Substitute only. Amendments 2(a), 3, 4, 6 and 10 (in substance) have appeared in one or more of the earlier versions of the proposed House HESS Committee Substitute.

Please review this proposed CS and share your suggestions or comments with me as soon as possible. If there are no additional suggestions or comments, this will be the Version of the bill which we will discuss and hopefully move out during our next HESS meeting. I would appreciate receiving your response as soon as possible.

2. Page 3, lines 24 - 26: This sentence was rewritten so as to accommodate a couple of substantive and technical amendments: (a) at the request of the Court System, the words "under AS 25.24.310" (circled on line 25 of the draft) were inserted in order to clarify the legal mechanics for the appointment of guardians ad litem as described in this section; (b) the words "as soon as possible" (circled on line 26 of the draft) were inserted so as to require the prompt appointment of a guardian ad litem for each minor.

3. Page 3, lines 28 and 29: As in amendment 2(a) above, the words "under AS 25.24.310" were inserted at the request of the Court System in order to clarify the legal mechanics for the appointment of guardians ad litem under this section.

4. Page 4, lines 11 - 15: This amendment would require a treatment facility to inform as soon as possible the parent or guardian of a minor under 18 years of age if the minor is detained at or admitted or committed to the treatment facility.

5. Page 13, lines 27 and 28: The catch line for AS 47.30.790 was changed so as to more accurately reflect the contents of the section.

6. Page 16, lines 4 - 16: This set of amendments would require a treatment facility to evaluate all patients present in the facility for more than 72 hours to determine if any individual patients have nutritional deficiencies. In conjunction with the original requirement that the treatment facility provide a nutritionally sound diet, this amendment further requires the facility to take appropriate steps to correct any identified deficiencies.

7. Page 20, line 11: This amendment merely returns the language in the bill to the way it appears in present law, deleting the reference to "a psychologist trained in clinical psychology."

8. Page 20, lines 17 - 18: This amendment inserts the word "substantial" before the word "experience," the effect of which would be the application of a higher standard (requiring substantial experience, instead of some possibly lesser degree of experience) when determining the kind of social worker who would be qualified to act as a "mental health professional."

9. Page 20, line 18: This amendment, meant as a purely technical amendment, changes the phrase "experience in the field of mental illness" to "experience in the field of mental health."

10. Page 20, lines 27 - 29; Page 21, lines 1 - 3: This amendment inserts temporary law requiring the division of mental health and developmental disabil-

ities to review the literature concerning orthomolecular psychiatric methods (nutritional therapy) in order to determine their potential uses in the treatment and diagnosis of mentally ill persons in the state; and to submit the report to the legislature by February 1, 1985.

Amendments 1, 2(b), 5, 7, 8 and 9 are found in Version 3 of the proposed House HESS Committee Substitute only. Amendments 2(a), 3, 4, 6 and 10 (in substance) have appeared in one or more of the earlier versions of the proposed House HESS Committee Substitute.

Please review this proposed CS and share your suggestions or comments with me as soon as possible. If there are no additional suggestions or comments, this will be the Version of the bill which we will discuss and hopefully move out during our next HESS meeting. I would appreciate receiving your response as soon as possible.

The Honorable Mae Tischer
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Tischer:

SB 346, relating to the treatment of mentally ill persons has passed the Senate and has been referred to your committee.

This bill is the result of a year and a half of work by the Senate, and addresses the concerns of all who testified in the many hearings conducted around the state.

I was pleased to incorporate your amendment for the right to a nutritionally sound and medically appropriate diet (Section 21). A significant amount of new patients' rights will be added to the mental health commitment law with the passage of this bill.

My interest in this legislation was sparked by input from family grounds of the chronically mentally ill, the Alaska Mental Health Association and the Alaska Psychiatric Association. The major revision in the law of 1981 brought about dramatic changes in the treatment of the mentally ill, and I see SB 346 as a refinement of those provisions.

I am enclosing some backup material on this legislation for your perusal. I know this is a difficult and emotional issue, but I find that this bill has a broad base of support.

I will be happy to meet with you at any time to discuss this issue.

With best wishes, I am

Sincerely,

Joe P. Josephson

JPJ/ndc

Enclosure

SECTIONAL ANALYSIS OF CSSB 346 (JUD)am - AN ACT RELATING TO THE TREATMENT OF MENTALLY ILL PERSONS BY Josephson and Faiks.

NOTE: Throughout the bill, the age of majority has been changed from 14 to 18, commitment time periods have been from 21, 90 and 120 days to 30, 90, and 180 days, and neutral words have been substituted for gender pronouns.

Section 1 — Provides a word change ("every" to "reasonable") to limit the endless paperwork from patients transferring in and out of voluntary status.

Section 2-5 — Changes the age of majority under the title from 14 to 18 to make this statute consistent with others dealing with juveniles. Section 4 also changes the term "immediate" to "timely" in order to avoid the inoperable situations caused by literal interpretation of the language.
Section 5(b) provides for the appointment of a guardian ad litem for each minor to monitor appropriateness of placement. Subsection (3) adds language to admission procedures to allow treatment of those minors whose condition could worsen if untreated.

Section 6 — Provides options for the release of a minor, and options to keep a minor in danger of harming self or others. (Statutory basis for procedure currently used at A.P.I.)

Section 7 — Adds "mental health professional" to current law allowing peace officers to take someone into custody for emergency evaluation. It also limits the use of a correctional facility for the mentally ill, providing only emergency protective custody while awaiting transportation to an evaluation facility.

Section 8-9 and 10 — Technical amendments concerning time computations and neutral language to comply with other sections of this bill.

Section 11 — Adds to respondents rights in a 30 day commitment hearing; that the rules of evidence and civil procedure be applied in an informal way;
that experts and other witnesses may testify on the respondent's behalf.

Section 12, 13 and 14 — Time computation changes.

Section 15 — Adds a new section providing that medication and treatment may be administered to an involuntarily committed patient in compliance with patient's rights.

Section 16 — Provides new language to the statute dealing with unauthorized absences providing that a parent, guardian or a person known to have been threatened by the patient will be immediately notified.

Section 17 — Adds a new section to the statute relating to the change of status from involuntary to voluntary, providing that the physician must agree that the transfer is appropriate and must be made in good faith.

Section 18 — Provides that acceptance of order, and 48 hour detention period time computations will not include weekends and holidays.

Section 19 — Amends liability section to include a mental health professional who detains and transports a patient.

Section 20 — Provides that an adult designated as a guardian shall be provided with a copy of a patient's discharge plan.

Section 21 — Adds a new section to the law providing that a patient has the right to a nutritionally sound and medically appropriate diet.

Section 22 — Adds to the patient's rights section of law, additional rights to:
be free of corporal punishment;
exercise and recreation;
at any time have a visit or phone conversation with an attorney;
not be retaliated against for assertion of rights.

Section 23 — Allows for temporary suspension of certain patient rights (wearing personal clothing, phone calls, visitors and recreation) only after the initial evaluation period, if there is a threat to the patient or others.

Section 24 — Allows access to confidential records by a law enforcement agency if there is substantial concern over imminent danger from a presumed mentally ill person.

Section 25 — Includes federal facilities in the definition of "evaluation facility".

Section 26 — Expands the definition of "gravely disabled" to include persons who are not in imminent danger, but whose lack of treatment would cause deterioration of their condition.

Section 27 — Expands the definition of "likely to cause serious harm" beyond recent attempts to include threats and likelihood of injury in the near future.

Section 28 — Changes language relating to psychologists and psychological associates, to be consistent with their licensing statute, which indicates that they do not have a "specialty designation" but have training in clinical psychology.

Section 29 — Definition of mental illness.

Document No. 83-152

The Honorable Joe Josephson
Senator
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Josephson:

RE: AS 47.30.655 - 47.30.915
(Involuntary Commitment Act for
Mentally Ill Persons)

We appreciate the work you are undertaking and would like to add our comments to those you have already received regarding possible amendments to Alaska's recently enacted civil commitment statutes for mentally ill persons. As you know, the Division of Mental Health and Developmental Disabilities supports the general intent of the Act but feels it is procedurally too cumbersome. This seems to have resulted in treatment staff wasting their time in complying with procedures and filling out numerous forms rather than providing treatment for mentally ill persons.

I have enclosed a copy of our earlier suggested amendments that were prepared during the previous administration. The status of these suggested amendments is unknown to us. Upon review, however, I believe that you will agree that they are primarily designed to facilitate treatment. In addition, I am confident that the Attorney General's Office will be able to assist your staff in determining which forms, notices and procedures that are presently required can be deleted while still protecting the rights of the mentally ill.

Another area of extreme importance in the successful implementation of this Act has been the availability, or lack thereof, of detoxification facilities and other alcohol and substance abuse programs and services. Experience has shown that the emergency involuntary hospitalization at API of persons with a primary diagnosis of alcoholism has increased dramatically since the new Act became effective. This is cause for considerable concern to us as our bed space for legitimate psychiatric emergency cases is in extremely short supply. We believe that if additional alcoholism and substance abuse programs offering emergency

inpatient care were available, especially in Anchorage, that the number of referrals of intoxicated persons to API would be substantially reduced. You may be interested to know that the provisions of the Uniform Alcoholism and Intoxification Treatment Act (AS 47.37.010 - 47.37.270) have never been fully implemented, partially as a result of a lack of inpatient facilities that offer various types of alcoholism services and treatment.

The most utilized provision of the Uniform Alcoholism and Intoxification Treatment Act seems to have been what is called the "12-hour drunk law.' This provision allows persons that are seriously incapacitated as a result of alcohol to be placed in a local jail or state correctional center for up to 12 hours with no criminal charges being filed. In the past, this has permitted law enforcement agencies the opportunity to take intoxicated persons into custody and house them in a jail or correctional center until the person has regained sobriety and is no longer in danger of harm as a result of his inebriated condition.

Unfortunately, as a consequence of the extreme shortage of bed space in all of Alaska's correctional centers, law enforcement agencies are no longer able to deliver these incapacitated persons to correctional facilities and have them held in custody until they are no longer incapacitated by alcohol. More simply put, as a result of serious overcrowding in our correctional systems, drunks are being taken to API and kept there until they sober up sufficiently to make a diagnosis. More often than not, the diagnosis reveals that they are suffering primarily from alcoholism and not a major mental illness. At that point they are discharged and referred elsewhere. This results in a serious misuse of the few psychiatric resources we have. It is our position that these limited resources should be exclusively available to the seriously mentally ill person that presents himself, or is presented, to Alaska's only designated psychiatric hospital.

In addition to the recommended amendments contained in the enclosure, as well as the previously mentioned concerns, we have listed below a number of other changes to the Act that we would like to support:

1) We recommend that the period of commitment be changed from 21 days, 90 days, and 120 days to 30 days, 90 days, and 180 days. It is our opinion that this would reduce the administrative workload of our treatment staff while having little or no effect on the period of time patient's are actually involuntarily committed.

   Rather than interrupt treatment after 21 days in order to undergo the 90-day commitment process, treatment could continue for an additional 9 days if necessary. This would allow medications and other forms of therapy some additional time to stabilize the patient, possibly resulting in a discharge between the 21st and 30th day. The change from 120

days to 180 days is simply to reduce the administrative and procedural requirements necessary for the long-term, chronic metally ill patients that require extended periods of hospitalization.

2) We propose that all references to a minor child be changed from age 14 to age 18 throughout the Act. Numerous situations have arisen as a consequence of this provision that indicate it has fostered confusion as well as placing young people and API in an awkward position with regard to their status. It is also not in concert with other provisions of Title 47 that address the care and treatment of minors in Alaska.

3) Under AS 47.30.730(a)(3), we recommend that the following language be added with regards to gravely disabled: "... or that painful or dangerous regression could be prevented and the respondent could maintain the capacity for self-reliance;...". It has been our experience that some gravely disabled individuals may not be expected to actually improve during hospitalization, but if left untreated can be expected to suffer substantially, even to the point of requiring permanent institutionalization as a result.

4) Under AS 47.30.840(4), (5), (6), and (7), we suggest that provision be made to restrict these rights in unusual circumstances in which harm to the patient or others may result if these rights are exercised. We propose adding "... unless the professional person in charge determines it is not in the best interests of the patient and will pose a threat to the safety or well being of the patient or others;..." to these sections.

5) We recommend that AS 47.30.845 be amended to add a provision that would allow confidential information or records to be disclosed to law enforcement agencies in emergency situations involving a current or former patient. In order to restrict this disclosure we suggest the following section be added: "(7) a law enforcement agency when there is substantiated concern over imminent danger to the community by a presumed mentally ill person."

This would allow the disclosure of information to law enforcement agencies that may be helpful in preventing needless injury or death occurring as a result of the actions of a mentally ill persons during an emergency situation.

6) An additional area that, in our opinion, should be revised is the area of involuntary outpatient commitment. Thusfar, there have only been a limited number of these types of commitments. It seems, however, that none have proven successful for various reasons. While the idea of involuntary outpatient

commitment appears sound, the provisions of the Act appear to militate against the successful utilization of this less restrictive alternative. Perhaps your proposed revision to the definition of "likely to cause serious harm" will have a positive influence on the successful use of outpatient commitment.

It should be noted, with regards to outpatient treatment, that AS 47.30.800(a) requires persons seeking conversion from involuntary outpatient commitment to inpatient commitment must have direct knowledge that the respondent is mentally ill or gravely disabled. If the respondent fails to report to the provider of service, than the provider will be unable to substantiate the allegations necessary to convert the commitment to inpatient treatment.

7) In AS 47.30.745(b), the last sentence should read "... not later than 90 days..." rather than "... not earlier ...." as it currently reads.

8) The final area in which we would recommend revision is the requirement that all patients be given the opportunity to be voluntarily admitted. We do not dispute the value of this option in the vast majority of cases that require psychiatric hospitalization; there are, however, instances in which it may not be wise or prudent to be required to offer or allow the voluntary admission of some patients to the hospital. Certainly, the substitution of "reasonable" for "every" in Section 1 of your draft is a step in the right direction. We would hope that it would be interpreted to mean in cases in which it was deemed unreasonable, that involuntary commitment proceedings would commence.

While I am confident that these recommendations for amendments do not represent a panacea for all that is wrong with such a complicated set of laws, I am certain that these, along with many other suggestions that you have received, represent a substantial improvement in providing for the care and treatment of Alaska's mentally ill. Again, I would like to thank you and your staff for giving this information your review and consideration. My staff and I look forward to working with you and other members of the Legislature in revising our civil commitment laws.

Sincerely,

Robert London Smith

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

Senate Bill No. 346

"An Act relating to the treatment of mentally ill persons."

In October, 1981, Chapter 84, SLA 1981 became effective. This act completely revised Alaska's involuntary commitment laws for mentally ill persons that required involuntary hospitalization or treatment. Upon its effective date, there was considerable concern that the Act was procedurally cumbersome which would require that an excessive amount of professional treatment staff time be consumed in filling out forms, testifying in court, and other non-treatment related activities. While the Act has proven workable and involuntary commitment of the mentally ill have continued to occur, there are a number of areas in the Act that have proven repeatedly troublesome since its effective date. Senate Bill 346 is an attempt to amend some of those troublesome provisions that have tended to inhibit or hamper the treatment of the involuntarily committed mentally ill patient.

The majority of the amendments that are proposed in Senate Bill 346 are technical rather than substantive in nature, a number of the amendments are intended to change the Act in a way that is seen by many as improving its effectiveness. Those amendments that are considered to require clarification are discussed below:

Page 1, Section 1, Line 20:

During the period of time the Act has been in effect, many areas have applied literal interpretation to the requirement that "every" opportunity be afforded to respondents to accept voluntary treatment. The result has been instances in which a prospective involuntary patient has repeatedly refused to accept voluntary treatment until the court hearing is actually in progress or about to begin and then suddenly decides he will accept voluntary treatment. The court proceedings cease and the petition for commitment is dismissed. If, prior to arrival to API for involuntary admission, the patient changes his mind and again refuses voluntary treatment (as has been the case), the entire involuntary commitment process must be started anew.

This has been cause for considerable concern and confusion. The amendment offered would change "every" opportunity to "reasonable" opportunity to accept voluntary treatment. This would allow for some discretion in its interpretation. Thus, if a patient repeatedly refused voluntary treatment, the commitment process would proceed even if the patient requested voluntary treatment at a later time. This would insure that treatment would be possible and the expensive commitment process would not have to be repeated unnecessarily.

Page 2, Section 2, Line 7:

Under the Act, the age of majority, for purposes of accepting or rejecting voluntary treatment without the consent of a parent or guardian was set at 14 years old. This has created a number of difficulties especially for those children between the ages of 14 and 18 years of age.

For example, a 14 year old child could present himself at API and request admission without the knowledge or approval of the parent or guardian. As A.S. 47.30.845 (Confidential Records) does not give the hospital the authority to release any information to the parents or guardians of a person 14 years of age or older without the permission of the patient, it may not be legal for us to tell parents or guardians the whereabouts or condition of their child.

Also, a 14 year old child that would benefit from evaluation or treatment at API but does not meet involuntary civil commitment standards may not be admitted at the request of the parents or guardian unless the child voluntarily agrees to accept treatment. Thus, some mentally ill children may not receive necessary mental health care and treatment even though their parents or guardian attempt to provide these services for them. In cases such as this, it becomes even more ludicrous if the Division of Family and Youth Services attempts to file a petition to have the court find the youth as a child in need of aid by alleging that the child's medical needs are being neglected. If the parents or guardian sought voluntary hospitalization of the child that is 14 years old but the child refused treatment, then parental neglect, which would support a finding of a child in need of aid status, is not possible.

The amendment proposed would change the age of majority under this section from 14 to 18 years of age. This would be consistent with other statutes that govern the care of treatment of these children and adolescents as well as correct these legal anomalies.

Page 3, Section 5, Line 12

This would increase the period of time for voluntary hospitalization of a minor by 9 days (from 21 to 30 days). This additional time will increase the ability of the hospital to provide a more thorough and comprehensive evaluation and treatment program for mentally ill children.

Page 3, Section 5, Line 22-23.

This language would broaden the circumstances under which a minor may be accepted for admission at the hospital if the professional person in charge believes that hospitalization is necessary on a voluntary basis. This added provision could prove very helpful in addressing the treatment needs of mentally ill children and adolescents who are at risk of further deterioration and need hospitalization. Under the existing statutes, unless improvement in their condition can be reasonably expected, admission may not be possible. We believe this added provision will prove helpful in providing necessary care and treatment for this group of patients.

Page 4, Section 6, Lines 6-26

The addition of this language provides needed clarification regarding the circumstances and procedures for releasing or retaining mentally ill minors with or without the consent of the parent or guardian. It is especially pertinent as there have been occasions when the safety of the child or others was questionable and the child was not committable but the parents or guardian have demanded immediate release of the child. This amendment will make it possible to insure the safety of all concerned prior to release of the minor.

Page 5, Section 7, Line 3

By granting mental health professionals the authority to take mentally ill persons into custody under an emergency situation and deliver them to an evaluation facility, a number of problems will be alleviated. Under the existing statutes, if a physician in an emergency room examines an individual that is brought to the hospital by relatives or friends, and the patient is clearly mentally ill and is in need of immediate hospitalization, the physician may have to call the police in order to have a peace officer take the patient into custody and sign an application for the patient's examination. This situation may occur in any hospital in Alaska including API.

Under the proposed amendment, the physician or any other health care professional that is included in the definition of a mental health professional under A.S. 47.30.915(11), can sign the application for examination under A.S. 47.30.705 and have the patient held in custody pending completion of the exam and receipt of an ex part order.

Page 5, Section 7, Lines 9-12

As written, this proposed amendment, if strictly interpreted, could tend to prohibit the completion of examination or evaluations of patients that were detained in jails or correctional centers even if qualified evaluation personal were available. We certainly agree in principle that jails and correctional centers should not be used to hold the non-criminal, mentally ill; however, in practice, we have found that under certain exceptional circumstances, a jail or correctional center may be the only facility available to detain the patient at the local level for purposes of evaluation and insure the safety of the patient and the community.

It has been our experience that the utilization of there types of facilities is neither widespread nor indiscriminate and is used only on a very short-term basis. Nevertheless, when it is necessary to house patients in jails or correctional centers, we proceed with the examination, evaluation, and involuntary commitment process when the necessary resources are locally available. The time spent by these

patients under these circumstances is then counted for purposes of the 24 hour and 72 hour time limit that is required for examinations and evaluations to occur by mental health professionals. This tends to insure that patients are not detained longer than necessary and treatment, if indicated, can commence immediately.

Consequently, we recommend that this amendment be deleted and that the existing language in A.S. 47.30.705 on lines 12-15 (in brackets) should be retained.

Page 5, Section 7, Line 24

This amendment would change the period of time for the first involuntary commitment from 21 to 30 days and is repeated throughout Senate Bill 346. The additional 9 days would tend to reduce the administrative workload of our treatment staff while having little or no effect on the period of time patients are actually involuntarily hospitalized.

Rather than interrupt treatment on the 21st day in order to undergo the 90-day commitment process, treatment could continue for an additional 9 days if necessary. This would allow medications and other forms of therapy an additional period of time to stabilize the patient, possibly resulting in a discharge of the patient between the 21st and 30th day.

Page 9, Section 10, Lines 17-19

This amendment is designed to insure that a less formal courtroom atmosphere is possible during the involuntary civil commitment process. This should make the commitment proceedings less painful and frightening to the mentally ill respondent.

Page 9, Section 10, Lines 27-28

The addition of this provision to allow a respondent to call his own experts or other witnesses to testify on his behalf is not seen as necessarily having an impact on the Division of Mental Health and Developmental Disabilities unless the respondent decides to call experts from API to testify on his behalf. It may, however, have a financial impact on the Alaska Court System if the respondent is indigent and the court has to pay the expenses of the experts and other witnesses called by the respondent on his behalf.

Page 12, Section 13, Line 7

This amendment would change the 120-day commitment to 180 days and is repeated throughout the bill. This change will reduce the administrative and procedural requirements necessary for the long-term, chronic mentally ill patients that require extended periods of involuntary hospitalization.

Page 13, Section 16, Lines 23-26

This additional requirement for notification of a patients family or guardian as well as any person known to been threatened by the patient of his unauthorized absence from the treatment facility is supported by the Division of Mental Health and Developmental Disabilities. We feel that this is an appropriate and necessary measure in cases such as this.

Page 14, Section 18, Lines 8-9

The addition of this language is seen as necessary and will correct what appears to have been an oversight when the he Act was drafted. It simply makes specific that computations of time for a patient being evaluated or a patient being detained for evaluation do not include Saturdays, Sundays, legal holidays, or transportation time and are not to be included in the 72 or 48 hour time limitation prescribed by the Act.

Page 15, Section 19, Lines 6-7

This adds mental health professionals among those that may not be held civilly or criminally liable for detaining and transporting a person, under the Act. This amendment is consistent with this section of the Act.

Page 15, Section 20, Lines 15-17

This amendment will require that an adult designated by the respondent must give informed consent in cases in which the patient is unable to give informed consent prior to certain treatments being authorized. We feel this is an appropriate addition to the Act.

Page 15, Section 21, Lines 28-29

This simply requires that an adult designated by the patient must be provided a copy of the patient's discharge plan. This is consistent with A.S. 47.30.845 under the existing statutes regarding confidential information.

Page 17, Section 24, Lines 6-8

This proposed amendment would clarify the circumstances under which the hospital may release confidential information and records to law enforcement agencies when they are concerned that a patient or ex-patient may present as an imminent danger to the community. Under certain circumstances, we feel it is in the best interests of the community and the patient to take such action.

Page 17, Section 24, Line 13

The addition of this language will include hospitals operated by the federal government, such as the PHS facilities, for use as evaluation facilities for purposes of the Act. Under the existing statutes, these facilities are not included in the definition of an evaluation facility and some of these federal facilities have not been able or willing to be utilized in this capacity.

Page 17, Section 24, Lines 21-25

This addition to the definition of a gravely disabled person will significantly clarify and improve our position with respect to the involuntary care and treatment of these patients. An additional period of hospitalization may help prevent further deterioration of gravely disabled persons in order to avoid or reduce the risk of further tragedy and/or agony.

Page 18, Section 27, Line 1

This amendment offered in the bill will reduce the standard upon which a potentially suicidal person may be taken into custody and involuntarily committed. It is our belief that this is both necessary and appropriate given our current rate of death by suicide in Alaska.

Page 18, Section 27, Lines 5-8

As in the previous section, this language will alter the standard for involuntary hospitalization of a person that may present as a danger to others or to the property of others. This may allow some seriously mentally ill persons to be involuntarily committed before they actually harm another person or another person's property.

Page 18, Section 28, Lines 17-20

This simply requires that a psychologist or a psychological associate must be trained specifically in clinical psychology in order to be considered a mental health professional for purposes of screening, examination, and evaluation under the Act.

Page 18, Section 28, Lines 22-24

This amendment is intended to include in the definition of mental health professionals those registered nurses that have experience in psychiatric nursing in a JCAH accredited psychiatric hospital for purposes of screening, examination, and evaluation under the Act. This is considered an appropriate addition to this definition.

POSITION PAPER/Department of Health & Social Services

The Department of Health and Social Services generally supports the amendments contained in Senate Bill 346 and endorses its passage with the exceptions noted above.

ALASKA MENTAL HEALTH ASSOCIATION

2611 Fairbanks Street, Suite A Anchorage, Alaska 99503
Telephone 276-1705

A Division of the National Mental Health Association

February 29, 1984

Senator Joe Josephson
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Josephson:

On February 15, 1984, I was involved in an emergency commitment situation which occurred at approximately 4:30 p.m., and which I think exemplifies one of the basic problems with the current commitment law. A patient came to the Fairbanks Community Mental Health Center for treatment and expressed an intent to kill herself. After evaluating her, the mental health professional called Carol Davis, the Probate Clerk who ordinarily handles these cases for the Magistrate. Ms. Davis stated she could not order an involunatry emergency commitment after hours because she could not do the paperwork. She would give the order if a physician at the hospital requested it. She advised the Center to call the police and have them exercise their authority to Emergency Commit the patient.

When the municipal police arrived, they said they knew they could commit, but refused to exercise their power because it is their agency's policy to avoid this responsibility except when they "encounter" a person in the usual course of their duties. They appeared to feel that the court system was "dumping" the responsibility on their shoulders after hours.

As you know, under current law, neither the mental health professional or a physician can act in this type of situation alone. In fact, the policemen involved were aware of this and also aware that they were the only ones empowered to act alone. Needless to say, this stalemate tied up the mental health professional - who was forced to cancel other patients - the court representative, and the police. It was finally resolved by an extra-legal (in my opinion) act. The police officer said that he would transport the patient to the Fairbanks hospital emergency room if the emergency room doctor would agree to see her and, in effect, authorize the involuntary transport. This freed the Center to resume its activities and seemed to shift the responsibility to the hospital.

I think you can see that the Mental Health Center and the patients are caught in a kind of territorial dispute between the municipal police and the court

system. Since both of these systems feel free to operate independently, the "system" of care breaks down. It results in one emergency commitment system for 9:00 a.m. to 5:00 p.m., and another for 5:01 p.m. to 8:59 a.m. A similar stand-off has occurred in Anchorage, although the situation in Fairbanks is more complicated because the system must depend upon a private hospital.

The provision in the revised commitment bill which reinstates the physician certificate (or mental health professional certificate) would alleviate this this problem.

It would also be alleviated if the courts and the police would work cooperatively.

Sincerely,

Jerry L. Schrader, M.D.
President, Alaska Mental Health Association

SOURCE OF FUNDS TO OFFSET FISCAL IMPACT OF BILL:

ANALYSIS:

This act amends the state's statutes covering the treatment of mentally ill persons. The amendment clarify existing law and provide additional safeguards for the general public and the relatives of mentally ill persons, while seeking to protect the legal rights of persons suffering from mental illness. The amendments will not require any additional legal services, over those currently being provided, and their enactment will not have a fiscal impact on the department's operations.

HEALTH-ANALYSIS
12/1/83

The Division of Mental Health and Developmental Disabilities does not foresee any increase or decrease in expenditures as a result of the passage of SB 346 at this time. The primary purpose of this bill is mainly directed at reducing the procedural requirements of A.S. 47.30.655 - 47.30.915, changing the age of majority from 14 to 18 years of age, changing the period of time for the initial commitment from 21 to 30 days and the third period of commitment from 120 to 180 days, expanding the definition of peace officers to include mental health professionals, and slightly relaxing the standards for commitment.

We do not believe that any of these proposed amendments will increase or decrease the number of mentally ill persons that will require hospitalization. The amendments should, however, make it easier to commit the mentally ill which should result in more professional staff time available to provide direct patient care and treatment rather than excessive time being expended in the commitment process.

NUTRITION AND ORTHOMOLECULAR THERAPY

Nov. 1983

Prepared for the

APA Commission on Psychiatric Therapies

NUTRITION AND ORTHOMOLECULAR THERAPY

Nutrition is a branch of biology which studies the requirements for foods, their composition, and the processes by which they are converted into energy and the tissue growth and repair required for health and life. Prior to about 1750, nutrition was naturalistic and ethno-pharmacological. Plant and animal foods of unknown chemical composition were eaten in diets which varied greatly from culture to culture. Centuries of trial and error had demonstrated their value or danger. Certain foods were designated by Hippocrates to have special curative properties which were useful in the treatment of many of man's illnesses. Others were poisonous or tabooed for unknown reasons. In the period from 1750 to 1900, as chemistry developed, foods were simply classified chemically as carbohydrates, proteins, fats and the non-combustible ash. Attempts to raise animals on diets containing only these quickly showed the inadequacy of this simple classification. The golden age of nutrition occurred between 1900 and 1950. When the need for micronutrients was discovered, a conceptual revolution occurred with the insight that much of man's illness resulted from the absence of significant dietary constituents. To the established infectious and toxic theories of illness were added the deficiency diseases. With the discovery of vitamins, essential amino acids and trace elements, the nature of common diseases like pellagra, beri beri, scurvy, nutritional anemia and protein malnutrition were quickly understood. The development of quantitative standards for daily requirements of these nutrients for man, animals, and plants stimulated revolutionary changes in food production and several major public health triumphs. It is difficult to recognize that less than 50 years ago there were more than 200,000 cases of pellagra annually in this country. Mortality from this illness averaged 33% and about 10% of the beds in insane asylums

the country were occupied by demented patients with this illness. In the South, where pellagra was endemic because of the staple diet of corn, fatback and molasses, from 1/3 to 1/2 of the state mental hospital population had physical symptoms of pellagra and dementia (1). Pellagra was also very common among sharecroppers and in prisons, orphanages, and other state institutions. The discovery in 1937 that vitamin B_3 (niacin) was the antipellagra vitamin and the subsequent fortification of most cereal products with this vitamin made pellagra virtually absent in this country. Clinical nutritional research was greatly accelerated in World War II because of the need to develop adequate military rations. It led to the semi-quantitative determination of human needs for most nutrients. It was so successful that World War II was the first war in which more combat troops died from war injuries than from malnutrition and infection (2). The spin-offs to civilian nutrition were large. Today, nutritional science is sufficiently advanced so that, in this country, malnutrition is uncommon and when it does occur, it is likely a function of poverty, alcoholism, or self-selected inadequate diets. This is not true in the Third World where millions of children are stillborn, retarded, or die within the first few years of life because of the unavailability of adequate calories, protein, or micronutrients (3). In the world as a whole, malnutrition today remains as large a public health problem as infectious disease with which it constantly interacts.

In the richer, industrialized world, research in nutrition has moved into more specialized areas. In medicine, there have been significant advances in the study of the nutritional needs of special populations like pregnant women, premature infants, and the elderly. Vitamin requirements have been shown to increase when some drugs are administered for treatment of tumors, convulsions,

or even contraceptive purposes (4). Great advances have been made in furnishing the nutritional requirements of postsurgical patients or those with severe burns by total parenteral feeding. Specialized nutritional needs have been found for some patients with ophthalmological or dermatological disease. Genetic illnesses, like phenylketonuria, have been found to be clinically responsive to minimizing the intake of the amino acid phenylalanine. Rare genetic autosomal recessive illnesses characterized by mental retardation and multiple somatic defects have been found. These can be prevented or cured by the daily administration of very large quantities of particular vitamins (3,5,6).

Nutritional theories of the etiology of common mental illness and behavior disorders and treatments based on these theories are very controversial. Nevertheless, new diagnostic methods have shown that several psychiatric illnesses may be complicated by nutritional deficiency and may respond to nutritional supplementation. We shall discuss these below. These are all reviewed in an excellent text, Nutritional Support of Medical Practice (7). A comprehensive review is offered in the five volumes entitled Nutrition and the Brain (8).

Many natural foods, especially those from plants, contain chemicals which are biologically active and may be either toxic or therapeutically useful. Many of these substances have been identified and isolated in pure form and now are useful products in our pharmacological armamentarium. In the industrialized world, food chemists supplement natural foods with nutrients and also with natural and synthetic additives which enhance the taste and appearance of foods and diminish spoilage, thus enhancing their useful distribution. Residues from synthetic herbicides and insecticides used to increase crop production and steroids and

antibiotics used to increase animal food production may appear in our food. Because of this, there has arisen the quasi-nutritional subspecialty of nutritional toxicology designed to protect the public from foods which might contain dangerous chemicals like mercury in fish or selenium in wheat or foods to which chemicals are purposely added during processing. There has also been increasing interest in what might be called nutritional pharmacology. Selected, specific nutrients like the amino acids tyrosine and tryptophan or the quaternery ammonium compound choline can be fed in doses greatly above their usual intake levels in order to elevate neurotransmitters in the brain. Such precursor therapy is actively under investigation and its interest to psychiatry will be discussed below. Although the substances used are natural and even essential in our daily diet in small quantities, quantities employed in precursor therapy are so much greater than are ordinarily required that we choose to call the use of the substances in these quantities "pharmacological." Moreover, their biological effects at high concentrations may be different from and unrelated to their primary action. For example, nicotinic acid and nicotinamide have identical nutritional value as vitamin B_3. In very high doses, nicotinic acid causes vasodilation and lowers blood cholesterol; nicotinamide does not. These actions of nicotinic acid at high doses are considered pharmacological (9).

There is also included under the rubric of nutrition, the study of food allergy and hypersensitivity to either specific foods or to commercial additives. Reactive hypoglycemia, generally attributed to the use of high carbohydrate diets which result in the over-production of insulin which, in turn, leads to hypoglycemia has also been studied in relation to clinical states as diverse as panic disorders, depression, and aggression leading to crime and delinquency (10,11).

Along with the slow, cautious, and steady advances in nutrition, there continues to be what we call "pseudonutrition". Nutritional fads have been promulgated in the lay press, in books, and in a few journals. These attribute many common somatic and psychiatric complaints to inadequate or toxic diets. They promise much: enhancing longevity, diminishing the risk of, or improving the treatment of cancer, heart disease, and the major mental illnesses with appropriate dietary therapies. These generally unproven treatments are especially popular among those with illnesses which are chronic and for which conventional medical or psychiatric treatment is slow, not yet fully adequate, and often, expensive. Patients with cancer and mental illness seem to be extraordinarily susceptible to seduction by these claims. Substantial efforts and quantities of time and money have been spent in scientific trials to test the claims of nutritional faddists. Despite many negative results, the claims persist. We shall, therefore, devote some time and space to a discussion of the theory which underlies the claims of the therapeutic value of orthomolecular psychiatry, additive free diets, hypoglycemic diets, and diets designed to eliminate substances to which patients claim to be hypersensitive and which they feel may cause the major mental illnesses.

Nutritional Principles

Man, as an evolutionary product of the animal kingdom, has nutritional needs similar to those of other mammals. The complex foods he eats are digested to simpler molecules which are then absorbed and resynthesized under genetic interactions to the multitude of compounds of which he is made. Maintenance of body temperature, movement, growth, repair and reproduction require energy supplied mainly by the oxidation and carbohydrate and fat. Metabolic end products like exhaled carbon dioxide or urinary nitrogen metabolites need constant replacement from dietary intake. Even the body minerals are constantly turning over metabolically and must be replaced by ingested food. For growth and development, a positive balance of calories and essential nutrients must be supplied. For adult maintenance the balance should be zero. Control of appetite and food intake involves a complex set of sensors and feedback systems in the brain and endocrine organs which are beyond the scope of this chapter.

Despite the capacity of each species to synthesize the myriad of compounds unique to it, some things must be supplied in the diet. These include water, the major anions and cations of the cellular fluids and skeleton, and trace elements like copper, manganese, cobalt, fluorine, vanadium, selenium, and zinc. Ten amino acids cannot be synthesized and must be furnished. They are needed for the synthesis of proteins and other nitrogenous compounds. Thirteen vitamins are required, four of these are fat soluble, eight are members of the vitamin B complex and vitamin C is uniquely required by man, primates, the guinea pig, an East Indian bat, and a bird. It is a remarkable testimony to the synthetic capacities of the body that the thousands of compounds of which we are made can all be synthesized from approximately two dozen organic compounds furnished in the diet.

Several features of man's nutrition deserve comment. First, as mentioned previously, he is quite rare in requiring vitamin C. The evolutionary purpose of this is not known. Second, he is an omnivore who eats a greater variety of foods than any other known species except perhaps the rat. Undoubtedly, this offers a great evolutionary advantage since it permits man to survive on the indigenous food of any region on earth. Third, he is apparently the only species whose choice of diets is determined by taste, smell, color, appearance, and even texture. He is the only animal for whom eating is both a necessity and an aesthetic experience. In contrast to most animals who eat the same food every day of their lives, man constantly seeks variety and, whenever possible, gets it. The aesthetic qualities of food have had inte esting social consequences. For example, it may be argued that Columbus discovered America while looking for food additives; that is, the spices that help to preserve food and enhance its taste and color. In the industrialized United States, food companies compete vigorously to produce products which are more attractive than their competitors even though they are nutritionally equivalent. This is done with food additives. Many of the food fads are based upon presumed, but unproven, hazards created by commercial food processing. Man still attributes to foods magical properties which can hurt or help him.

Fourth, the precise nutritional requirements for man are less well known than they are for the domesticated animals which supply his food. There are several reasons for this. Experiments can be done on food animals which cannot be done safely with man. Animals are bred to be genetically homogeneous and efficient in their conversion of food to milk, eggs, or edible animal protein. Their daily activities and energy output are much more closely regulated than are those

of man. Finally, the economics of the food industry make it essential to know the minimum food requirements of animals for maximum growth and marketability. Despite the difficulties in precisely determining the nutritional requirements of man, reasonable estimate have been made since 1941, by the Food and Nutrition Board, National Research Council of the National Academy of Sciences. These are revised every five years; the 9th edition (121) was published in 1980. It offers recommended daily allowances (RDA) for calories, protein, minerals, and vitamins for men, women, and children. The RDA are not minimal requirements. Recognizing substantial variance in man's nutritional needs because of genetic heterogeneity and living habits, they are calculated by the Board to exceed average nutritional needs by a "safe margin" allowing for individual differences in a basically healthy population. The magnitude of the safety factor is substantial. For example, the minimal requirement for folic acid is estimated to be about 50micrograms per day; the RDA is 400micrograms. The RDA has been accepted by the American Medical Association (122) and is used by the Food and Drug Administration for food labelling. It is also the basis on which the Department of Agriculture and the United States Public Health Service established national food programs and nutritional educational programs. The RDA can be found in most standard texts of medicine, pharmacology, and biochemistry (3,4,7).

In an affluent society, man's omnivorous appetite and his wish for variety makes it easy to obtain a nutritionally sound, balanced diet. RDA requirements are generally met by diets which offer a mixture of four food groups in adequate proportions. These groups are (1) Fruits, vegetables, and fruit juices; (2) Grains and grain products; (3) Meats and meat products; (4) Milk and milk products.

Such diets offer adequate nutrients as well as taste and variety. When they are consumed, vitamin or mineral supplementation is not required. Impoverished populations here or abroad who subsist largely on grain and who have no variety in their diets generally need supplementation with vitamins, minerals, and other proteins.

Under special conditions of illness, severe dieting, heavy alcohol consumption, stress, pregnancy or lactation, supplementation may be desirable with modest quantities of vitamins. Massive supplementation with megadoses of vitamins is required only in three conditions. (1) In the genetic vitamin dependency or insufficiency illnesses, (2) When there are transport difficulties for nutrients in the gut or across other cell membranes, and (3) When antivitamin antimetabolites are used as in the treatment of cancer.

Some orthomolecular psychiatrists believe that the brain may have nutritional requirements so much larger than the other body tissues that cerebral avitaminosis may exist and may account for much major mental illness.

But, malnutrition generally produces mental changes along with somatic changes like weight loss or anemia. In early or minimal nutritional deficiences mental changes may occasionally appear before readily observable physical changes ensue. But, careful examination will reveal lowered blood or tissue levels of vitamins or minerals. The mental changes associated with vitamin deficiency are nonspecific. Perusal of the literature shows that weakness, irritability, anxiety, anorexia, lassitude, depression, apathy, anergia, headache, dizziness and inability to concentrate have been reported in subjects or patients with mild deficiency of any of the water soluble

vitamins. When the deficiency is severe, memory loss, disorientation, delusions, hallucinations, and other signs of dementia may appear.

Clinical ecologists, advocates of the Feingold diet, and some orthomolecular psychiatrists believe that in some individuals, the brain may be uniquely allergic or hypersensitive to certain foods, food additives, or other environmental chemicals. Such hypersensitivity is considered by them to be related to hyperkinesis in children and a variety of illnesses including schizophrenia, depression, anxiety, drug addiction and antisocial behavior.

But, allergy or hypersensitivity when it exists involves the whole body and is manifested by physical symptoms like asthma and urticaria as well as by nonspecific mental complaints.

In the following sections we shall discuss: Consequences of protein calorie malnutrition, psychiatric manifestations of deficiencies of some of the B complex vitamins and the use of amino acids in pharmacological doses as precursors of neurotransmitters. Finally, we shall devote the remainder of the chapter to an examination of what we call "pseudonutrition" in relation to psychiatric practice.

Protein Calorie Malnutrition

Many studies conducted in impoverished socities have shown that severe, prolonged protein calorie malnutrition is especially devastating to infants and children and that the consequences are prolonged and likely irreversible. The results of such studies have been summarized in several excellent monographs derived from international conferences on this subject (12,13). The reasons for this high vulnerability is the rapid growth of the human brain in infancy and the effects of malnutrition on its growth and development. Winnick (14) has shown that, in the human, the number of brain cells increases linearly from gestation until birth and then more slowly until about 10 months of age, at which time it virtually stops. Cell size, in contrast to cell number, continues to increase for several years. Myelination occurs rapidly at birth and is still occurring at two years. The weight of the brain increases rapidly through gestation and the first two years of life, its rate of growth diminishes thereafter, but adult weight is not reached until adolescence. Studies on the brains of children who have died from malnutrition show that children dying from marasmus in the first two years of life have from 15 to 50% fewer brain cells than normal children of comparable age. Children with kwashiorkor who become malnourished after being taken off the breast in the second or third year of life have a normal number of brain cells, but the size of the cells is diminished (15). Studies of the behavior of children who survive early malnutrition show that such children have profound disturbances in the acquisition of language, motor skills, interpersonal relationships, and adaptive and motivational behavior. Memory defects have also been found (12,14). Most of these studies have been limited to children studied only a few years after recovery from malnutrition. However,

an ongoing longitudinal study by Cravioto and DeLicardi (16) should ultimately give an answer to the question of whether or not the damaging consequences of early malnutrition are truly irreversible. If they are, it would lead to a vicious cycle in which malnutrition during infancy results in a large pool of poorly functioning people who, because of their poor level of functioning, rear their children under conditions destined to produce a new generation of malnourished people (14,16). Children born in the poverty that leads to malnutrition also live in social and family environments which are themselves capable of retarding mental and behavioral development. Some ingenious experiments on rats, conducted by Francova (13) have shown that protein deficient rats, raised with their mothers and litter mates show about 20% decrement in exploratory activity. Rats on normal diets that have restricted optical and acoustical stimuli show about a 30% decrement in exploratory activity. Rats deprived of both protein and environmental stimuli show a 90% decrement. The effects of both types of deprivation simultaneously are thus more than additive; they are synergistic. The introduction of an "aunt," a nonpregnant virgin female, into the cages of protein deprived infant rats elevated their performance to that of normal rats, even though such a "mother's helper" did not lactate and was unable to offer food. She did, however, stimulate them by grooming and retrieving them. DeLicardi and Cravioto have conducted experiments which led to similar conclusions in impoverished children from an agricultural community in Central America. In this population, 83% of the children showed no clinical signs of malnutrition, 11% showed mild and moderate malnutrition, and 5% showed severe malnutrition. Yet, the families of all of the children had approximately equal incomes, land, and food. Therefore, no correlation could be established between the amount of food available to the

families of these children and the level of malnutrition. However, a significant correlation was found by psychologists who studied this cohort of children while unaware of their nutritional antecedents. They found that the degree of psychological stimulation offered at age six months to those children who later developed severe malnutrition was significantly lower than that of controls from the same population matched by age and birth weight. In children whose diets are marginal nutritionally, psychosocial deprivation predisposes them to severe malnutrition. Malnutrition, in turn, diminished activity, motivation, exploratory behavior, and those complex signals that ordinarily elicit a stimulating and gratifying response from adult parents. A vicious cycle is thus set up in which the effects of malnutrition synergize with those of environmental deprivation. The consequences may lead to irreversible emotional and mental disorders of development. The interaction between nutrition and psychosocial stimulation is not unique to rats or man. All species that have been studied show the same interaction (13).

Vitamin Deficiency States

Vitamin Requirements

Several methods have traditionally been used to determine the vitamin requirements of human subjects. One, employed commonly with conscientious objectors during World War II was the deliberate production of nutritional deficiency followed by the measurement of the quantity of nutrient required to eliminate the signs and symptoms of the deficiency and to maintain health. This quantity was then considered the recommended dietary allowance, and was added to the K rations of our troops. Variations on this strategy use populations in which nutritional deficiency is endemic. Another approach is to measure abnormal metabolites of carbohydrate and protein known to exist in specific deficiencies in the blood and urine. For example, elevated blood lactate and pyruvate occurs in thiamine deficiency. The dose of a specific vitamin required to correct this biochemical abnormality is considered to be the daily requirement. The third approach is the direct measurement of the vitamin in the blood and urine by chemical or microbiologic means. "Normal" levels have been established. This strategy involves the use of large populations of healthy subjects of different age, sex, and race in order to obtain normative data. Recently a new approach to the measurement of vitamin requirements has been proposed. This is based on the assumption that the enzymes requiring cofactors should be fully saturated with cofactor at all times and that a vitamin deficiency exists if they are unsaturated. For example, serum or erythrocyte glutamic-oxalacetic transaminase activity is measured with and without added pyridoxalphosphate, the cofactor. If activity is greater with added cofactor, the enzyme is unsaturated and a

deficiency is said to exist. This method is somewhat controversial but it may be useful in detecting cases of vitamin deficiency and vitamin insufficiency illnesses (17).

Using such methods, a number of vitamin deficiency states relevant to psychiatry have been found; usually they are secondary to the use of pharmacological agents. They most commonly follow the long term use of antituberculosis drugs, anticonvulsants, oral contraceptives, and anti-tumor drugs (18).

The functions of the water soluble vitamins in the nervous system, the manifestations of deficiency and their therapeutic utility has recently been reviewed in great detail (8.19). The following emphasizes features unique to psychiatry:

Vitamin B_6

Vitamin B_6 has many neurobiological functions. It is the precursor of a coenzyme required for more than 50 enzymes in the body. It is so widely distributed in our food supply that it has not been found to occur in populations throughout the world. It has been produced experimentally. Mental symptoms associated with deficiency include lassitude, weakness, depression, anorexia, and confusion. Somatic symptoms include a microcytic anemia which fails to respond to iron but improves dramatically following treatment with small doses of the vitamin. Isoniazide and cycloserine form carboxyl addition compounds with pyridoxal or pyridoxal phosphate that make it unable to function as a cofactor in the approximately 50 enzymes with which it is associated. The administration of vitamin B_6 supplement along with antituberculosis medication reveals that both neurologic and psychiatric symptoms disappear when supplementary vitamin is given in appropriate quantities (20). Estrogens have been shown to compete with pyridoxal phosphate for binding sites among its numerous apoenzymes. High estrogen levels which

occur during pregnancy or the use of oral contraceptives seem to increase the requirements for vitamin B_6. In therapeutic trials on women who developed depression during pregnancy or while taking oral contraceptives, vitamin B_6 supplementation has been reported to improve mood and to correct the abnormal urinary excretion of tryptophan metabolites (21,22,23). Based on such findings some investigators recommend the inclusion of supplemental B_6 into oral contraceptive preparations (22). In Spain, manufactured oral contraceptives contain 25mg of pyridoxine and the combination is reported to produce fewer side effects (24). The RDA for vitamin B_6 for adults is 2.0mg/day. Doses 10 times this are safe and can prevent deficiencies due to drugs administered for other purposes. Although vitamin B_6 is not very toxic, doses several hundred or thousand times of the estimated daily requirement have been reported to cause convulsions and liver hypertrophy (25).

Vitamin B_3

Vitamin B_3 (niacin, niacinamide, nicotinic acid, nicotinamide) is combined with adenine, ribose and phosphoric acid in the body cells to form nicotinamide adenine dinucleotide (NAD). This is a cofactor for many enzymes which catalyze oxidation reduction reactions which are involved in energy release from carbohydrate, the synthesis of fatty acids, steroid metabolism, etc. Niacin in the judgment of some is not truly a vitamin because limited quantities can be synthesized from the metabolism of the essential amino acid tryptophan (26). While this is correct, historical usage, plus the fact that niacin deficiency can be produced on diets ordinarily adequate in tryptophan seem to us to warrant continued classification as a vitamin. Corn, which is deficient in both tryptophan and niacin, is the common food staple in countries where pellagra was common and where it continues to exist. Hartnup's disease is an autosomal recessive disease characterized by diminished absorption of neutral amino acids including tryptophan. Some of its

symptoms resemble pellagra and these respond to niacin (27). The recommended daily allowance of niacin is 6.6mg/1000 calories of food or about 10-20mg/day. The requirement increases during pregnancy and lactation (27).

Pellagra is characterized by a triad of symptoms - dermatitis, diarrhea, and dementia. In early deficiency, psychiatric symptoms are diffuse and include apathy, depression, anxiety and memory deficits. In severe pellagra, mania, delirium, organic dementia, bulbar palsy, and visual field deficits may be present. The EEG has excessive theta and delta activity. This returns to normal after niacin treatment. Routine manufacture of wheat flour and all cereal products supplemented with niacin has caused pellagra to virtually disappear in the U.S. Niacin deficiency in the brain, without deficiency in other tissues, has been claimed by orthomolecular psychiatrists to account for schizophrenia and other mental disturbances. This will be discussed later.

In pharmacological doses of 10-30grams/day, nicotinic acid, but not nicotinamide, lowers blood cholesterol and causes transient cutaneous vasodilation manifested by a flush (19). Nicotinamide, but not nicotinic acid, at doses of 250mg/day tranquilizes rodents and diminishes locomotor activity in gerbils (28). At similar doses, it increases REM sleep and it has been reported to be of benefit to some insomniacs (29). Nicotinamide also binds weakly to the benzodiazepine receptor (30). At ordinary dietary doses, the brain concentrations of nicotinamide are likely to be too low for biologically significant binding to this receptor, but at megadoses, this might occur. At such doses, niacinamide might have anxiolytic properties like the benzodiazepines. This has not been tested. Nicotinic acid and nicotinamide are identical as vitamins; the different properties of the two compounds occur only at pharmacological doses. Thus,

there is no evidence to relate their pharmacological properties shown at high doses to their classical vitamin action as precursors of NAD. Niacin and niacinamide are not very toxic even in megadoses, but in view of their use in orthomolecular psychiatry at doses 100-500 times higher than the average nutritional requirement, it is worth noting that reported side effects include hepatoxicity (31), hypotension, tachycardia, and hyperglycemia (32). There is a very recent report of severe sensory neuropathy from pyridoxine abuse at doses of 2-6mg/day for several months (158,159). These toxic must be balanced against any presumed therapeutic utility.

Vitamin B_{12}

Vitamin B_{12} (cyanocobalamin) is unique in three regards. It is the only vitamin containing a mineral (cobalt) as part of its chemical structure; it is not found in plants and its absorption from the gut requires a highly specialized mechanism the failure of which results in pernicious anemia. The RDA is about 3.0mg/day. 1micro daily causes remission of pernicious anemia. The vitamin is involved in transmethylation reactions, the synthesis of amino acids, purines and pyrimidines. It is vital for blood formation and the maintenance of neuronal integrity.

A number of studies have shown that 25-30% of patients with untreated pernicious anemia have either major or minor psychiatric problems (33). These include depression and apathy, irritability, confusion, and paranoid states. Neurological symptoms results from demyelination of the dorsal columns of the pyramidal tracts and result in the syndrome known as combined system disease. As many as 60% of untreated pernicious anemia patients have been found to have an abnormal EEG (33,34). Deficiencies of vitamin B_{12} may arise from strict vegetarian diets, but more often follow failure to absorb the vitamin as when there is lack of the gastric intrinsic factor or in ileitis and following bowel surgery. It may also follow chronic ingestion of alcohol or after the administration of neomycin, para-amino salicyclic acid or colchicine. There is an increased requirement for vitamin B_{12}

during pregnancy. Since folic acid is required for the absorption of B_{12}, folate deficiency may be accompanied by B_{12} deficiency (35,36).

Although a large percentage of patients with hematologic and neurologic findings of vitamin B_{12} deficiency also have psychiatric symptoms,

> . . . in a significant number of patients the psychiatric manifestations may be the first symptoms and can antedate anemia or spinal cord disease. A recent report (37) presents two cases of organic psychosis without anemia or spinal cord symptoms that responded dramatically to the appropriate administration of intramuscular B_{12}. It is noteworthy that both patients had normal hematologic profiles. Diagnosis was made by finding low serum levels of B_{12}. With restoration of appropriate B_{12} levels, the presenting symptoms disappeared. Evans et al. (37) recommends consideration of B_{12} deficiency and serum B_{12} determination of all patients with organic psychiatric symptoms whose cause is not clearly known. Even more recently, Van Tiggelem et al. (38) have suggested that blood levels of B_{12} may not always correlate with cerebrospinal fluid levels and that the latter may be much lower.

Folic Acid

Folic acid (pteroyl glutamic acid) is involved in: hydroxylation reactions required for norepinephrine and serotonin synthesis, transmethylation reactions, the synthesis of the purine bases, adenine and guanine, and the pyrimidine base thymine. Folic acid is, therefore, indispensible for the production of DNA and RNA. Transmethylation reactions are involved in myelin synthesis and in the inactivation of the neurotransmitters norepinephrine and serotonin. The RDA is less than 0.5mg/day. It doubles during pregnancy. Serum concentrations in man range from 5-30ng/ml. Folate deficiency has been produced in experimental animals. Diminished learning capacity and EEG changes have been reported in rat pups born of mothers with folate deficiency.

Folic acid, as the name implies, is present in leafy green vegetables and in meats. In man, folate deficiency occurs endemically in severely malnourished populations. It can be produced experimentally in volunteers on folate deficient diets and iatrogenically in marginally nourished people by the administration of anticonvulsants like diphenylhidantoin, oral contraceptives, or the antifolates used in the treatment of malignancy. In experimental folate deficiency, forgetfulness and insomnia appear at the same time as megaloblastic anemia and can be quickly reversed by the vitamin. In less pure deficiency states, occurring among the aged or chronically institutionalized patients, the spectrum of mental disorders includes apathy, irritability, depression, psychosis, delirium and dementia (39).

Folate deficiency can readily be determined by measurement of blood levels. When this is done, as many as 30% of psychiatric admissions have been reported to be deficient (39). Of a sample of admissions to a psychogeriatric ward, 67% have been reported to be folate deficient (40). Carney and Sheffield found that

about 25% of 432 psychiatric admissions have low blood folate levels. Folate treated patients with organic psychoses, endogenous depression and schizophrenia had shorter hospital stays and left in better clinical state than untreated patients (36).

An association between folate deficiency and gestational difficulties has been recognized for many years. Population surveys have shown that about 15% of women, especially among the poor, have marginal or deficient blood levels. Deficiency during pregnancy is associated with an increase in prematurity and teratogenicity.

In the last few years, evidence has accumulated which tends to relate folic acid deficiency during early gestation to neural tube defects and to the Fragile X syndrome of mental retardation. Both of these are polygenic illnesses in which the phenotypic expression of the genotypic defect is apparently determined by the nutritional state of the uterine environment. Smythells (42) has found that when 493 women who had already given birth to a child with neural tube defect gave birth to a second child, 23 of these had children with such a defect. In 397 similar women who were given a vitamin supplement containing folic acid prior to conception and through the first menstrual period, only 3 had such recurrences. This strikingly significant difference cannot be readily explained except by a direct prophylactic effect of vitamin supplementation very early after conception.

The Fragile X chromosome is a relatively newly discovered cause of mental retardation. The fragility of the X chromosome can be rectified <u>in vitro</u> by folic acid (43). Lejeune (44) has reported that the administration of folic acid greatly reduced symptoms of autism and psychotic complications of mental retardation in 7 out of 8 such patients.

Both of these interesting findings clearly require confirmation. If confirmed, they will represent a major advance in the understanding and treatment of two devastating illnesses of concern to neurologists, psychiatrists, and pediatricians through appropriate nutritional supplementation early in conception. A series of studies have shown that folic acid can be added to staple foods, as nicotinic acid commonly is, and that such fortification is feasible, safe, and effective (155). Until this is done, oral administration of folic acid tablets at a level of 0.5mg/day to pregnant women, especially those living in poverty, appears to be prudent (155).

A genetic vitamin dependency illness which required about 20mg of folic acid daily has been reported. These rare cases presented with homocystinuria. One such patient showed mild mental retardation with symptoms of schizophrenia which improved after folate administration and recurred 6 months after the supplementary vitamin was dicontinued (41).

Quasi-Nutrition

Precursor Therapy

Communication between neurons in the central nervous system, it is generally accepted, is overwhelmingly chemical. Neurotransmitters synthesized in presynaptic neurons are extruded into the synaptic cleft when the neuron fires. They then engage specific receptors on post synaptic neurons and initiate a series of metabolic steps which may excite, inhibit, or modulate their activity. More than 20 neurotransmitters are thought to exist; they range in composition from simple amino acids to complex polypeptides. The classical neurotransmitters, dopamine, norepinephrine, serotonin, and acetylcholine have been the most studied. The paradigm for precursor therapy is the use of L-DOPA in Parkinson's disease. The enzyme for the conversion of tyrosine to L-DOPA is lacking in the striatal neurons of the brain from patients with this disease. But, the decarboxylation of L-DOPA to dopamine can still take place. Hence, L-DOPA in pharmacological doses permits the synthesis of sufficient dopamine to be therapeutically effective for several years.

More than a decade ago, it was discovered by Wurtman and his coworkers (45) that the synthesis and release of several neurotransmitters in presynaptic neurons can be influenced by the concentration of precursors offered to them. The amino acids tryptophan and tyrosine are the precursors of serotonin and norepinephrine respectively. Choline is the precursor for the synthesis of acetylcholine. The conversion of precursors to active neurotransmitters is enzymatic. When saturating concentrations of the precursors are available, the rate at which transmitters can be synthesized is limited by the enzymatic capacity. But, concentrations of the dietary precursors in the blood is not constant and under some conditions the rate limiting enzymes may not be saturated, but can become so if

large doses of precursors are administered. Precursor therapy is relatively safe, because feedback inhibition and other neuronal control mechanisms prevent the synthesis of more transmitter than is needed by the neuron at any particular time. Consequently, few side effects are noted when subjects are given pharmacological doses of tyrosine, tryptophan (46), or choline (47,48) that is, amounts much greater the quantities usually ingested in the diet.

The finding that levels of neurotransmitters in the brain can be altered by experimentally manipulating the quantity of ingested precursor had led to considerable basic research as well as clinical research on both normal volunteers and patients in whom there is reason to believe that there may be a neurotransmitter deficiency.

Dietary precursors must be absorbed from the gut, transported in the blood, penetrate the blood brain barrier, and finally enter into appropriate neurons. These are complex processes which depend initially on the quantity of the precursor in the diet, the effectiveness of the gut in absorbing them, and the transport mechanisms within the blood. Circulating amino acids then compete with each other for active transport through the blood brain barrier into the brain (45,49). The ratio of plasma tryptophan, for example, to the sum of the concentration of other neutral amino acids like tyrosine, phenylalanine, leucine, isoleucine, and valine determines the penetrability of tryptophan into the brain, and, hence, the brain serotonin concentration. Thus, a high protein meal in which many amino acids compete for transport into the brain depresses serotonin synthesis in the rat brain (45,50). A high carbohydrate, low protein meal raises brain serotonin because it elicits the secretion of insulin which lowers the blood levels of other neutral amino acids without affecting tryptophan. Doses of tryptophan as large as 10-15grams would be

more likely to diminish transport of other amino acids into the brain than doses of 1-3grams.

Tryptophan and Tyrosine

Tryptophan, administered at a dose of 50mg/kg to healthy young men in the morning, significantly increased self reports of fatigue and inertia and reduced vigor and activity (46). It is interesting to note that in this same experiment, tyrosine at 100mg/kg had undetectable effects. It is also worth noting that tryptophan did not cause depression, anxiety, confusion, nor anger in this experiment.

Tryptophan has also been used in the treatment of insomnia with apparent favorable effects. Doses of 1 to 5 grams before bedtime have been reported to reduce sleep latency without producing distortions of physiological sleep as measured by EEG recordings (51). Doses of 10-15 grams cause EEG changes but these are less pronounced than those resulting from the use of hypnotics. The mechanism for the effectiveness of tryptophan in insomnia is presumed to be due to its effects on serotonin levels in the brain stem (52). The use of L-tryptophan for the treatment of insomnia is still experimental even though the amino acid is available for sale in health food stores. The current literature suggests that it would have substantial advantages over conventional hypnotics, but it appears not to be uniformly effective for insomniacs. Furthermore, the long term effects of doses of 5-15grams per day require further investigation.

Serotonin deficits have been implicated in some depressions and mania and clinical trials with tryptophan were conducted with mixed results (53,54). Since tryptophan is rapidly catabolized enzymatically by liver pyrollase, the idea occurred that the concomitant administration of an inhibitor could more effectively

raise brain serotonin. Nicotinic acid and nicotinamide are both pyrollase inhibitors and in a preliminary report, encouraging results were obtained with the combination of tryptophan and nicotinamide in the treatment of depression (55). These results have not been confirmed. In very recent work, it has been reported that tryptohan diminishes sensitivity to mild pain and in people over forty increases the likelihood of errors in performance tasks (56).

The administration of tyrosine can, under certain circumstances, elevate levels of brain catecholamines (45,57). It has been reported to help some patients with depression (58) and mild Parkinson's disease (57). Continued clinical research in which tyrosine or tryptophan is used with depressed patients might help to distinguish depressions in which norepinephrine is involved from those in which the defect may be in serotonin metabolism.

Choline and Lecithin

Several studies have shown that the administration of choline or lecithin, the precursors of acetylcholine, increased cholinergic function in the brain (59). On the basis of this finding, clinical research has been conducted in which there is a possible disorder in acetylcholine metabolism. Tardive dyskinesia is one such disorder. Presumably the disorder arises because of prolonged administration of neuroleptics, which chronically block striatal dopamine receptors, cause these receptors to become supersensitive to dopamine (60). Some dopamine receptors are present on cholinergic neurons and their supersensitivity probably causes a chronic decrease in the release of acetylcholine by decreasing the firing rates of the cholinergic neurons. Davis et al. (61) reported marked clinical improvement after giving oral choline to a patient with tardive dyskinesia. Several additional studies have confirmed this (62,63). Unfortunately, large doses of choline have undesirable side effects.

including a socially unacceptable odor which results from the degradation of ingested choline to trimethylamine by intestinal bacteria. Lecithin, a phosphatidyl choline, is the most common source of our dietary choline. Lecithin is more effective than choline in raising plasma choline levels (64). Several reports suggest that it, too, is effective in diminishing symptoms of tardive dyskinesia (65,66). A review of the literature suggests that there is modest improvement in the motor function of about 1/2 of the patients who receive lecithin. Interestingly, the antipsychotic action of neuroleptics has not been reported to be diminished by the administration of either choline or lecithin.

Choline has been administered to schizophrenic subjects and failed to modify their clinical symptoms (67). Lecithin has been administered to manic patients with encouraging results (68). Disorders in acetylcholine function have been suggested in Huntington's Disease, Friedrich's Ataxia, and Tourette Syndrome. The results of therapeutic trials with choline or lecithin in those illnesses are equivocal. They have been reviewed by Growden et al. (69).

Alzheimer's disease, the most common cause of dementia among the elderly, is characterized by impaired functioning of cholinergic neurons. On autopsy, the brains of such patients show a dramatic loss of brain choline acetyltransferase (71,70,45). Memory deficits are characteristic of Alzheimer's disease and many studies have been conducted to measure the effects of acethylcholine precursors in normal people and in patients with Alzheimer's disease (48,72). These studies have not convincingly demonstrated any enhancement of memory after treatment with acetylcholine precursor.

Alternative methods for enhancing cholinergic activity include the use of choline esterase inhibitors and cholinergic agonists. Physostigmine, a reversible

short acting choline esterase inhibitor and arecoline, a short acting cholinergic agonist, improve memory when given in low doses to healthy young adults (73,74). Physostigmine, in a double blind experiment, enhanced the memory processes of patients with Alzheimer's disease for brief periods (75).

It is curious that physostigmine, which enhances cholinergic function by inhibiting the enzyme which destroys acetylcholine, should be more effective than precursors which increase the concentration of this neurotransmitter. The reason is not known, but it immediately raises the question of whether a combination of a precursor and a choline agonist or choline esterase inhibitor might be additive or synergistic. To the best of our knowledge, this has not yet been tested.

The precursor strategy with tryptophan, tyrosine, and choline has thus far yielded results which are of great research interest but have only preliminary and uncertain clinical utility. This type of research is young, and vigorous. We may hazard a guess that greater clinical effects from precursors may be achieved when they are combined with other types of psychotropic drugs. Tryptophan or tyrosine combined with tricyclics might accelerate the therapeutic process or decrease the required dose in depression. Stern and Mendels have reviewed the literature on the use of such combinations in the treatment of refractory depression (76). A recent report suggests that the combination of physostigmine and lecithin improves memory in Alzheimer's disease (75).

Pseudo-Nutrition

Food Additives and Hyperkinesis

In 1975, the late Dr. Ben F. Feingold, a pediatrician and allergist, proposed that some children have a central nervous system variant that predisposes them to sensitivity to synthetic food additives, particularly to food colors and the antioxidants butylated hydroxyanisole (BHA) and butylated hydroxytoluene (BHT). He claimed that in such children hyperkinetic behavior results from the ingestion of these additives. The use of an additive free diet which he developed led to dramatic improvement or even cure in from 50-70% of hyperkinetic/learning disabled children. He stated that 75% of children who had been treated with stimulant medication could discontinue the treatment (77). The diet, he claimed, became effective in several days to several weeks and the younger the patient, the more rapid and complete his response. Total and permanent adherence to the diet is mandatory, Feingold insisted, because even a minor infringement produces a return of symptoms within about 3 hours, which may persist as long as 72 hours. Feingold based his findings on extensive clinical experience in open studies. He did not conduct controlled, double blind trials to test his hypothesis. The Feingold dietary treatment gained considerable popularity among the lay public and more than 20,000 families of hyperkinetic children were reported to adhere to the diet and to advocate its use (78). Feingold urged that labelling of additives be mandatory and the immediate clinical application of an additive free diet in school food programs to a congressional committee by stating: "it is not necessary to await the availability of basic data, it has been demonstrated that these children respond to dietary intervention" (79). Several uncontrolled clinical studies supported Feingold. Rigorous double blind studies, conducted in 7 centers and involving about 200 children have benerally failed to replicate his findings (84).

Two types of controlled studies have been conducted. Harley et al. (80) offered families with hyperactive children two different diets blindly at weekly intervals. One was a conventional diet; the other was prepared solely from foods recommended by Feingold. In 36 school age boys, based on teacher and objective ratings, no significant differences in behavior occurred with the diet. With these school age children, a few parents reported a significant improvement when the additive free diet followed the controlled diet, but they were unable to detect differences when the order was reversed. In preschool age children, where only parental ratings were available, a few parents were able to consistently detect differences with the additive free diet compared to the usual diet.

Most of the double blind studies have been challenge trials; that is, children, who ate additive free diets because their parents believed that they improved on them, were blindly "challenged" by the addition of cookies or drinks which contained food color additives. About 200 children have been tested in several studies conducted throughout the U.S. (81,82,83). A summary of these experiments and the results and conclusions has been reported (84). The National Institutes of Health (88) and the American Council on Science and Health (85) have concurred. The data from these studies have recently been examined statistically by an independent group who have come to the same conclusions (86). The conclusions from these many studies are that Feingold's claims that 50-70% of children improve dramatically on an additive free diet and deteriorate rapidly after minor infractions from the diet cannot be supported in careful double blind trials. At most, 3 of the 200 children were reported by their mothers to deteriorate significantly when challenged with food colors. In these 3 children, objective tests and/or outside observers were not used. The Nutrition Foundation Report (84) concluded that there was

insufficient evidence to require a special symbol on food labels indicating the presence or absence of these food additives for the purpose of treating these behavioral disorders. There is also insufficient evidence to suggest a ban on food containing artificial food colorings in federally supported school programs.

Rimland, Vice President of the Academy of Orthomolecular Psychiatry, has challenged the methods, results, and conclusions of those who failed to confirm Feingold's results (87).

Food and Environmental Allergy and Hypersensitivity

The notion that hypersensitivity or allergy to foods or other environmental agents like gasoline fumes, soaps, or hydrocarbons results in medical or psychiatric illness is subscribed to by what Brodsky calls a "medical subculture" (89). Clinical ecologists and some orthomolecular physicians are among those who support this view. It has been popularized extensively by books and in the media (90,91,92,93). Symptoms which have been related to such sensitivity or allergy include lethargy, depression, palpitations, sleep disturbance, mood swings, poor concentration, anxiety attacks, aggressiveness, and delinquent behavior. The Feingold hypothesis (77) that hyperactivity and learning disability in children is related to the ingestion of common synthetic food additives seems to be a specific variant of the food hypersensitivity thesis which focuses on synthetic food additives and natural salicylates. Hoffer (94) has claimed that many of his schizophrenic patients who failed to respond favorably to megavitamins do respond to five days of starvation followed by diets in which single items of food to which the patients are not sensitive are carefully introduced.

Pierson et al. recently sought objective evidence for the role of food hypersensitivity in 23 patients who attributed a wide variety of their physical and psychological symptoms to food allergies (95). These patients were seen independently for initial diagnosis by a psychiatrist who withheld his findings from the other investigating physicians. The allergists assessed the patients by medical and dietary history, a physical examination, and skin tests for common inhalant and food antigens. The patients were then put on exclusion diets consisting of uncommon foods to which they had no alleged hypersensitivity. All the patients improved. Single foods which the patients had themselves incriminated were then

added openly. Many patients became ill with their initial complaints. Blind tests were then performed using the same foods, freeze dried, and in opaque capsules. The investigators found that only four of the 23 patients had true food hypersensitivity. None of these four had significant psychiatric symptoms and all of them had physical symptoms characteristic of atopy, i.e., allergic rhinitis, urticaria, asthma o. atopic eczema which appeared even when the offending foods were given blindly. The 19 in whom food hypersensitivity could not be confirmed in the blind trials had physical and psychological symptoms not characteristic of the atopic syndrome; 18 of these 19 patients had been diagnosed by the intake psychiatrist as having significant psychiatric illness; 10 of these were considered neurotically depressed, the remainder had other neuroses and personality disorders but none were psychotic. The authors conclude that psychogenic reactions to food are very common and that some form of double blind testing is the only certain means by which the diagnosis of food hypersensitivity can be established. They note that "since the dangers of unwise dietary restriction are real, patients should not be encouraged to restrict their diet without specialist, dietetic advice and without objective confirmation of food hypersensitivity."

There have been claims that food allergies are responsible for delinquency and criminal behavior (96,97,98). Statements are made that food allergies are common in delinquents but prevalance rates are not given. The only reported double blind studies of behavioral change in relation to food allergy have used sublingual testing, a method whose validity is considered doubtful (99).

Clinical ecologists go farther. Patients are initially tested for dietary sensitivity and are placed on elimination diets. If these are not helpful, they are placed in a "chemical free" environment in a hospital. If they improve in

that environment, they are then treated by prescribed avoidance of environments which include the common substances like perfume, smoke, etc. to which they claimed sensitive. Such avoidance inevitably leads to major changes in their lives including a move to a "clean climate". Patients may also receive injections of the indicted substances in order to desensitize themselves. According to Brodsky (89) they spend much of their time on diets, tests for sensitivity, reading about allergies, participating in a support group of similar patients, and tending to worker's compensation claims.

Schizophrenia and Gluten

In 1966, Dohan suggested that peptides derived from cereal grain glutens may play an important role in the pathogenesis of schizophrenia in genetically predisposed people. This proposal was based on the observations of considerably higher than chance occurance of celiac disease in schizophrenics as well as schizophrenia among adults with celiac disease. In addition, both schizophrenia and celiac disease have been reported to be three times more prevalent in Ireland than in England and Wales. Dohan also found a strong correlation between a change in rates of admission of female patients with schizophrenia to psychiatric institutions and a change in wheat consumption during World War II among five

countries (USA, Canada, Finland, Sweden, and Norway) variously affected by the war. Following these observations, he and his colleagues studied the effects of milk free and cereal free diet on schizophrenic patients. 47 schizophrenic patients randomly assigned to a cereal free diet showed a significant increase in rate of release from hospitals compared to 55 patients on a high cereal diet. No difference was found when wheat gluten was added to the cereal free diet in a subsequent double blind study (100).

Singh and Kay (101) found that schizophrenic patients who received neuroleptics and a cereal free, milk free diet showed a significant decline when challenged with wheat gluten in a double blind manner. They suggested that clinical improvement on a gluten free diet and subsequent deterioration on gluten challenge may be related to a gluten mediated decrease in neuroleptic absorption. In support of this, Fried et al. (102) found that wheat gluten given to mice 20 minutes before a 1mg/kg dose of haloperidol reduced the amount of neuroleptic absorbed into the blood stream. Recently, however, Osborne et al. (103) found that 5 chronic schizophrenic patients did not improve on a gluten free diet; furthermore, the gluten free diet had no effect on blood levels of butaperazine, which had been administered in constant doses throughout the study. The study, however, selected patients who had failed to respond to traditional neuroleptic therapy and who thus might represent an atypical subpopulation. Also, as the authors note, their patients were on the special diet for 36 weeks. Dohan and Grassberger (104) stressed that chronic patients may require months or years of gluten free diets before significant results are achieved.

Potkin et al. (105) studied 8 chronic schizophrenic patients who were maintained on a diet free of gluten, cereal grains and milk and who were challenged

in a double blind manner with dietary wheat gluten and placebo. They found no deterioration in clinical status (as measured by the BPRS) on gluten challenge; however, Singh and Kay (106) have pointed out that with an N of 8, the authors' chances of detecting a true small or medium effect of gluten would be only 7% and 15%, respectively.

Hallert (107) who has studied many celiacs in Sweden where it has a relatively high prevalence rate found no schizophrenia in adult celiacs, but did find significant depression. He suggests that celiac disease is not an appropriate model. Dohan recently (108) reviewed the evidence supporting the model and suggests approaches for further study.

Recently, Zioudrous et al. (109) reported that gluten peptides have naloxone-reversible endorphin activity at brain opiate receptor sites. This finding might explain a link between gluten free diets and clinical response in a subpopulation of schizophrenics. However, such a relationship has yet to be consistently demonstrated and the important observations of Dohan's group and Singh and Kay merit further exploration.

"Reactive, Relative, or Postprandial Hypoglycemia"

In animals and man, food intake is intermittent and yet the blood sugar levels, except for transient rises after eating, remains relatively constant. Such homeostasis requires the synchronized participation of the liver, muscles, pancreas, other endocrine organs and the central nervous system. Most body tissues can tolerate fluctuations in blood sugar but the brain, which is unable to store glucose or glycogen in significant quantities and which uses glucose as its primary fuel, requires a constant supply. In the resting state, the brain accounts for 80% of the glucose consumed by the body.

Glucose homeostasis is remarkably effective. In a normal population, fasting levels of plasma glucose range from 50-115mg/dc. Such levels occur 5-6 hours after feeding and do not change significantly overnight. In well nourished individuals, blood glucose levels change very little after several days of fasting. Many physical illnesses like diabetes or islet cell tumors of the pancreas can either elevate or lower the fasting blood sugar (110,111).

Reactive, relative, or postprandial hypoglycemia is an abnormal degree of depression of the extracellular glucose concentration reflected in the plasma, without a well defined cause. When plasma levels fall below 50mg/dc or blood levels below 40mg/dc, symptoms and signs of adrenergic hyperactivity or nervous system depression or a combination of the two usually appear. Hypoglycemic activation of the adrenergic system causes tremulousness, anxiety, hunger, sweating, palpitations, and tachycardia. Central nervous system hypoglycemia causes perturbations of cortical and subcortical functions with symptoms of fatigue, headache, weakness, diplopia, confusion, amnesia, incoordination, seizures and coma. There is substantial variation in the cluster of symptoms of hypoglycemia from patient to patient.

Several of the symptoms of hypoglycemia resemble those with which anxious, depressed, and hypochrondiacal patients present. Consequently, some patients may diagnose themselves as having hypoglycemia. The tendency to do this is augmented by popular books in the lay press which have featured hypoglycemia as a global cause for a welter of illnesses and antisocial behavior like "nervous breakdown", alcoholism, juvenile delinquency, drug dependence, inadequate sexual performance, and overt aggression in prisoners (112,113,114).

Some orthomolecular physicians and clinical ecologists are among the physician groups who attribute much mental illness and antisocial behavior to hypoglycemia and who treat this condition with low carbohydrate, high protein diets. Psychotropic drugs are frequently added but this is not usually acknowledged. While the majority of endocrinologists, psychiatrists, and criminologists have not accepted nutritional theories and dietary treatments of neurotic and antisocial behavior, these theories have, nonetheless, had an impact on prisons, probation departments, and school systems. The Los Angeles County Probation Department, for example, banned the consumption of chocolates, other sweets, and refined sugar products from juvenile facilities and is attempting to reduce consumption of processed and additive-containing foods in prisons (115). There have also been malpractice suits in which patients have claimed that their physicians missed the diagnosis of reactive hypoglycemia and, therefore, mistreated them.

The concept that postprandial or reactive hypoglycemia is common in the population has not been generally accepted by the medical profession. The American Diabetes Association (116), in collaboration with other societies, has published statements to downplay the prominence of the misattribution of hypoglycemia as a cause of multiple illness. Yager and Young (117) have referred to the epidemic

proportions of the incorrect diagnosis of hypoglycemia as a cause for multiple psychiatric and somatic complaints. Too often the diagnosis is made without a glucose tolerance curve at all. Diagnosis by questionnaires which attempt to relate symptoms to eating habits is inadequate. Many patients who have affective, somatization or anxiety disorders report a relationship of symptoms to food intake which is not borne out in a glucose tolerance test (110,118,119).

The reasons for the conflict between those who emphasize hypoglycemia as a major contributor to multiple psychiatric illnesses and those who discount it lie largely in the rigor with which a 5 hour glucose tolerance test is conducted and in how it is interpreted. In this test, the patient should be prepared by eating a diet containing about 250gm of carbohydrate daily for three days. He is then fasted overnight, and is given 50-100gms of sugar orally in solution. Alterations in plasma or blood glucose are monitored at half hour intervals for the ensuing five hours, while subjective symptoms are recorded. The typical normal glucose tolerance curve shows a rise of 60-70mg/dc in the first 30-60 minutes; this is the period when glucose enters the circulation from the gastrointestinal tract. In normal persons, increasing glucose concentration, abetted by cholinergic signals, stimulate insulin secretion. The increased circulating insulin in conjunction with declining glucagon production results in decreasing hepatic glucose output and a fall of blood glucose to levels approximating or slightly lower than the fasting state over the next four hours. By the fifth hour, there is usually recovery to base levels. At its peak, blood glucose levels in normal subjects seldom exceeds 160mg/dc. Higher levels suggest diabetes. At the nadir, glucose levels below 50mg/dc should raise the suspicion of reactive hypoglycemia. For a definitive diagnosis to be made, the low blood sugar values should coincide in time with the symptoms of adrenergic activation and central nervous system hypoglycemia referred to above. The diagnosis

should not be made on the basis of a low blood sugar without clinical symptoms or on symptoms alone without a low blood sugar. Many patients report symptoms and signs of anxiety with blood sugar levels above 70; others may have the blood sugar fall to levels of below 40 without manifest symptoms or signs of hypoglycemia (118). Sinc the glucose tolerance test may vary from day to day in any patient, borderline tests should be repeated. Orthomolecular psychiatrists interpret the results of glucose tolerance tests differently from endocrinologists. An example of orthomolecular interpretation is shown in the work of Meiers who claims that 70% of schizophrenics have relative hypoglycemia (123).

The notion that hypoglycemia is related to panic attacks, reported by patients, has recently been tested by Gorman et al. (11). These investigators measured the blood sugar in ten patients who met DSM III criteria for panic disorder or agoraphobia at the moment when panic was experienced by the patient during an infusion of 0.5molar sodium lactate under single blind conditions. They found that, on the average, such patients had a fasting blood sugar of 98mg/dc and at the moment of panic it was 94mg/dc. None of these patients had serum glucose levels even close to hypoglycemic levels. These findings demonstrate that hypoglycemia is not a necessary condition for panic attacks, but do not, of course, prove that hypoglycemia may not cause panic attacks. To determine the latter, it may be necessary to experimentally lower blood sugar in such patients by an insulin tolerance test and then determine whether it triggers panic and whether the blood sugar levels correlate well with the onset of panic. It is also now possible for patients who suspect that they have hypoglycemia related to panic, or to any other clinical symptoms to screen themselves at home by collecting capillary blood on impregnated filter paper. They can measure the blood sugar levels themselves or send it to a laboratory for analysis (120). In either type of experiment, a close correlation between clinical symptoms and blood sugar

values must be found in order to designate hypoglycemia as a proximate cause of the symptoms. It seems likely that such research will be conducted in the near future.

In summary, there is little evidence from carefully conducted research to support the concept that reactive hypoglycemia is a common condition and that it is causally related to psychiatric or behavioral disorders. Nonetheless, some professionals and patients are convinced a priori that emotional illness and inappropriate behavior is caused by postprandial or relative hypoglycemia which follows a high dietary intake of carbohydrates. Individuals who choose to believe this may alter their diets to diminish intake of simple sugars and to increase protein and complex carbohydrates with little danger or expense. But, the translation of hypoglycemic mythology into dietary regulation on a mass scale in schools or prisons is not justified.

Orthomolecular Psychiatry

"Psychiatry seems unusually vulnerable to almost any fad which happens to drift into its amoeboid maw."
(Osmond, 1982)

The theory, practice, and clinical value of megavitamin therapy and orthomolecular psychiatry has been the subject of debate for almost twenty years. An American Psychiatric Association Task Force reviewed the evidence thoroughly in 1973 and was very critical (124). Orthomolecular psychiatrists responded (125), calling the Task Force Report biased, unfair, and full of errors. Pauling (126) was also critical. His criticisms were answered by Klein (127) and Wyatt (128). A book Orthomolecular Psychiatry: Treatment of Schizophrenia which details their theory and practice was published in 1973 (129). A detailed update of the APA Task Force critique which included a review of the role of the water soluble vitamins in the nervous system was published in 1979 (130). The present chapter summarizes some older reviews of this subject and adds material published since that time.

Orthomolecular Theory

The term "megavitamin therapy" was coined in the early 1950s to describe a treatment for acute schizophrenia that employed doses of vitamin B_3 (nicotinic acid or nicotinamide) in the dose range of 3-30 grams daily. The theoretical basis for this treatment was initially pharmacological, not nutritional. The originators of megavitamin therapy attributed the pathogenesis of schizophrenia to the endogenous formation of adrenochrome and adrenolutein which are hallucinogenic condensation products of oxidized adrenaline. Adrenaline is formed by methylation of noradrenaline and in schizophrenia the formation was thought to be excessive. These products caused perceptual distortions which were the primary causes of schizophrenia. The perceptual defects could be detected and quantified by a psychological card sorting test called Hoffer-Osmond Diagnostic Test (HOD).

They see schizophrenia as primarily a perceptual disorder. For example, Hawkins, co-editor of the book Orthomolecular Psychiatry (129,p627) says, "Clinically, the illness begins as altered subjective experiences associated with changes in perception and these may or may not in time result in the observable changes upon which a diagnosis or schizophrenia has hitherto been based .... At this stage of the illness, the diagnosis may be made by interviewing techniques focused on detection of these subjective changes. The perceptual changes may also be detected by objective measures such as the HOD and EWI tests which parallel changes in the severity of the illness. The stage of the illness may be called metabolic disperception. It precedes the appearance of overt clinical schizophrenia -- the signs and symptoms of schizophrenia are secondary to the perceptual disorders and these in turn precede the tertiary impairments in social functioning." Hawkins then presents evidence to support the proposition that all of the manifestations of schizophrenia can be produced by perceptual changes alone. The HOD score is described by him as being more accurate than the usual clinical criteria in evaluating the degree of the patient's illness and response to treatment. He say (129,p617), "The majority of patients that we see with schizophrenia are not overtly psychotic. Although schizophrenia is technically classified as a psychosis, the development of irrationality indicates an advanced degree of the state of the illness. We, therefore, view schizophrenia as a disease process which is capable of producing psychosis." He continues (129,p602 "The HOD test consists of 145 true-false questions, read and answered by the patient which are designed to measure visual, auditory, olfactory, touch, taste, and time perception as well as thought and mood disturbances. Underlying this work is the assumption now supported by substantial experimental evidence that there is a genetic predisposition in schizophrenics which under certain conditions leads to errors in metabolism resulting in the formation of chemicals that may interfere with the function of the central nervous system which is responsible for maintaining perceptual abilities."

Kelm (129,p327-342) defines metabolic disperception as "people who suffer from varying degrees of abnormal perception, with corresponding changes in thought, mood

and behavior who respond favorably to megavitamin B_3 and allied therapy if treated before irreversible damage has developed." Subclinical pellagra is defined as "a deficiency syndrome characterized by the presence of perceptual changes affecting any or all of the five senses associated with neurasthenia. The HOD and related tests can measure the degree of perceptual abnormality and changes in thought and mood."

Hawkins (129,p620) continues, "For routine use, the HOD test. . . .is the most useful test, not only to confirm the diagnosis, but also to determine the degree of illness and to monitor the response to treatment. Beneficial measures are followed by a reduction of the HOD score and deleterious measures or an increase in the illness are followed by an increase. It can be administered and scored by anyone in the office. Shock treatment brings the most rapid reduction in the HOD score, the phenothiazines will also lower the score considerably, but usually not to within normal range. The patient can take the test retroactively; that is, he can answer the question according to how he felt when most ill or at any specified time in the past."

Hoffer remains committed to nicotinic acid deficiency as the primary cause of of schizophrenia, which he sees as cerebral pellagra. He says (129,p250), "If all the vitamin B_3 were removed from our food, everyone would become psychotic within 1 year. This pandemic psychosis would resemble pellagra and it would resemble schizophrenia. It could not be called pellagra, because none of the antecedents of that disease would exist."

"Schizophrenia and pellagra are not identical since they require different quanitities of vitamin B_3. Most symptoms of pellagra are alleviated by doses of vitamin B_3 below 1 gram/day, but a small proportion may need many times as much. Most schizophrenia respond to 3 to 6 grams, but a small proportion may require more than 20 grams per day" (129,p251).

But, Hoffer also believes in the use of ECT in the treatment of schizophrenics who do not respond to megavitamins. Commenting on the failure of others to confirm megavitamin therapy, he says (129,p206), "Several experiments are underway, but they are testing only 1 part of the program. For example, they do not use ECT. It is, therefore, necessary to reiterate that the megavitamin program is not one which can be completed in a single month or six months or a year. Time alone is no criterion. One starts with the simplest therapy that is chemotherapy alone using megavitamin doses plus all the other chemotherapies available to psychiatry as indicated in each case. The patients who recover are maintained on the program in order to keep them well. Patients who do not recover within 3 months are then given a series of ECT in addition to the chemotherapy. They may require a second or even a third series. With any acute series, using ECT if there is insufficient improvement within three months of beginning chemotherapy, one can expect a recovery rate of over 90% within one year and improvement in the other 10%."

He also says (129,p659), "All patients were treated with phenothiazines, megavitamins, accessory symptomatic medication, group therapy and all the other usual adjunctive measures. The exception was that 85 patients received ECT and 55 served as controls. When the results were tabulated and graphed, the very significant effect of ECT was observable. This was most marked in the younger age groups."

To prevent or treat schizophrenia, it was thou necessary to reduce adrenaline formation. Since adrenaline was formed by methylation of noradrenaline, a means to diminish methylation was sought.

When nicotinic acid or nicotinamide are administered in large doses n-methyl-nicotinamide is formed and is rapidly excreted; hence, both compounds are methyl acceptors. Since they are relatively non-toxic in large doses, they were chosen as competitive inhibitors of the methylation of noradrenaline. It is worth emphasizing that they were not chosen as nutrients; indeed, in a 1957 publication advocating the use nicotinic acid in the treatment of schizophrenia, Hoffer et al. (131) speculated about the mechanism of therapeutic action of nicotinic acid. They chose as the most likely mechanism the ability of nicotinic acid to be a methyl acceptor which would reduce the formation of the endogenous hallucinogen adrenochrome. They rejected its role as a vitamin, saying, "psychosis (sic) association with pellagra does in many ways resemble the schizophrenic psychosis except that it contains qualities of toxic confusion. However, the incidence of avitaminosis among schizophrenic persons is no greater than among the general population. Doses adequate to treat any unknown deficiency are without affect on schizophrenia; it may, therefore, be concluded that this factor is unimportant." (131)

In 1968, Pauling (132) published a theoretical paper in which he suggested that some forms of mental illness might be due to deficiencies in essential nutrients occurring in susceptible irdividuals eating an ordinarily adequate diet. Man's genetic heterogeneity leads to biochemical individuality with large variations in the need for essential nutrients, especially vitamins (132). The brain might differ from other organs in its nutritional requirements so that localized cerebral deficiency could occur. Pauling named his concept "orthomolecular psychiatry" and he defined it as "the treatment of mental disease by the

provision of the optimum molecular environment for the mind, especially the optimum concentration of substances normally present in the human body." With the publication of this interesting theoretical paper, clinicians who had been practicing megavitamin therapy quickly adopted Pauling's concept and claimed that what they had been practicing from 1952 to 1968 was, indeed, orthomolecular psychiatry. This conceptual shift from the transmethylation hypothesis in which nicotinic acid was a pharmacological methyl acceptor to a nutritional hypothesis in which schizophrenia was cerebral pellagra treatable by nicotinic acid functioning as a true vitamin was accompanied by the formation of an Academy of Orthomolecular Psychiatry and a name change of their journal from the Journal of Schizophrenia to the Journal of Orthomolecular Psychiatry. With this shift in theory, many other vitamins and hormones were added to their therapeutic armamentarium. The scope of the conditions which orthomolecular psychiatrists treat has also been expanded to include autism, hyperkinesis, depression, anxiety, alcoholism, drug addiction, delinquency, etc. Their current practice is perhaps best described by Hawkins. "Clinicians practicing orthomolecular psychiatry are using a combination approach which varies from patient to patient depending upon the biochemical peculiarities of a given case and which often includes high doses of niacin or niacinamide, ascorbic acid, pyridoxine, vitamin E, thyroid, vitamin B_{12}, hypoglycemic diets, cereal free diets, daily physical exercise, lithium, the phenothiazines, and also the commonly used tranquilizers and antidepressants."(133). Electroconvulsive shock therapy is still frequently used (125). The current theory is expressed by Hoffer (134), "There is a simple message: The most important treatment for psychosis is nutritional. Other treatments which are considered THE treatment by the American Psychiatric Association are merely palliative."

The change in the theory of schizophrenic pathogenesis from excessive transmethylation to nutritional deficiency broadened the therapeutic ingredients of orthomolecular practice greatly. With the first theory, there was a pharmacological need for nicotinic acid as a methyl acceptor and no special needs for other vitamins and nutrients. With the nutritional theory there is room for the addition of many other micronutrients to the therapeutic program. In current practice, many nutrients are added in megadoses simultaneously. Nonetheless, nicotinic acid seems to be always included in the therapeutic cocktail for schizophrenia and this is because that illness continues to be looked at as cerebral pellagra. Hoffer says, "It is clear that there are no clinical grounds for separating the two diseases. A distinction is artificial". He also says, "schizophrenia is a vitamin B_3 dependent condition or an NAD deficiency disease" (135). Nonetheless, other water soluble vitamins and minerals are also used in megaquantities.

The concept of reactive hypoglycemia and of food or environmental allergy as causative agents in many types of mental illness and behavioral disorders has also been adopted (136). Orthomolecular psychiatrists who originally rejected psychotropic drugs as unnecessary poisons imposed on the medical profession and patients by heavy industrial advertising is now accepted as sometimes useful adjunctive therapy. Characteristic of orthomolecular psychiatry is the absence of psychological or social causes for mental illness or aberrent behavior. Nor is there any admission of a useful role for psychological treatment, although halfway houses and self help groups are used.

The transmethylation hypothesis is testable and has been tested by many investigators over the past 20 years. No evidence of any excess transmethylation

has been found. If anything, there may be diminished transmethylation (137,143). There is also neither clinical nor laboratory evidence for a metabolic defect similar to that found in pellagra in any of the schizophrenias. This subject was thoroughly reviewed a decade ago in the APA Task Force Report (124) and no evidence to the contrary has appeared since that time.

The Pauling statement that there is an optimum molecular environment for the neurons in the brain is probably true, but it is not testable, because optimum, especially for any single individual, cannot be defined nor determined. It is like saying that there should be an optimum income, education, and degree of health and freedom for every citizen. There would be enormous arguments by people of different political persuasions about the meaning of the term. Pauling noted that optimum intake of phenylalanine should be very low for the patient with phenylketonuria. But, in general he tended to view optimum as very much larger than the RDA. He suggested that genetic variance in the transport of vitamins across the blood brain barrier might, in selected individuals, result in a cerebral avitaminosis despite normal blood and other tissue levels of these nutrients. He also felt that the protein apoenzymes for which vitamins or their derivatives function as coenzymes might be genetically defective so that much higher concentrations of coenzymes were necessary in order for the enzymes to function. He stated that "the so-called gene for schizophrenia may itself be a gene that leads to a localized cerebral deficiency . . one or more vital substances" (126,132).

Roger Williams (138), more than 30 years ago, had presented evidence for a degree of variability within a species which he called biochemical individuality that might account for differences in nutritional requirements. Pauling's hypothesis was an elaboration of Williams' thesis. Williams' thesis is also not arguable in principle, but the quantitative aspects

need empirical testing. We all readily accept biochemical individuality for things like height, weight, hemoglobin, intelligence, caloric needs, metabolic rate, etc., but generally speaking, such variability is seldom more than 15%. Orthomolecular theory suggests that differences in vitamin requirements might be as great as several thousand percent. Some evidence has been found in rare genetic diseases to support this. There are about 25 known genetic "vitamin-responsive in-born errors of metabolism"(139). These disorders are genetic autosomal recessives and are so rare that a total of less than 1,000 cases have been described in the world literature. All of the water soluble B vitamins except niacin and riboflavin have been implicated. Vitamin dependency illnesses are characterized by an increase in the requirement for a specific vitamin that ranges from 10 to several hundred times the RDA. This is because they have mutant apoenzymes which require high concentrations of cofactor to function. Vitamin dependency illnesses are manifest at birth or in early childhood and they are generally associated with mental retardation as well as with multiple somatic disorders ranging from convulsions to severe anemias. Patients with these illnesses show demonstrable abnormalities in circulating amino acids or other metabolites. Unless they are treated with megadoses of the appropriate vitamin early in life such patients show retardation in growth and development and usually die in childhood. Orthomolecular psychiatrists apparently believe that the large differences in nutritional needs which occur in the rare genetic vitamin dependency illnesses are common in psychiatric patients of all types. Hoffer, for example, believes that schizophrenia is a vitamin B_3 dependent condition or an NAD deficiency disease (135). Since schizophrenia fails to meet the many other criteria established for the definition of autosomal recessive genetic diseases, it becomes necessary for him to postulate that the vitamin dependency characteristic is localized to the brain.

There is another genetic variant less severe than the vitamin dependency illnesses which Blass calls "vitamin insufficiency illness" (140). This occurs in that small fraction of alcoholics who develop Wernicke-Korsakoff syndrome. Such patients are apparently able to grow normally to adulthood on ordinary daily requirements of thiamine and an average diet, but under the unusual circumstances of heavy alcohol consumption when the vitamin intake diminishes and the vitamin requirement may increase, the syndrome develops. This condition can be detected by measurement of a thiamine dependent protein apoenzyme called transketolase which in Wernicke patients requires a much higher concentration of thiamine pyrophosphate in order to function adequately. Folkers et al. (141) have reported that patients with carpal tunnel syndrome may also have a vitamin insufficiency syndrome because their erythrocyte glutamate oxaloacetate transaminase (EGOT) is unsaturated at normal dietary levels of pyridoxine. At megadoses the enzyme becomes saturated and new enzyme synthesis is induced. Of interest to psychiatry has been the report of Rimland et al. (142) who recently found that massive doses of pyridoxine could improve the symptoms of about 30% of autistic children and that in such children pyridoxine causes a drop in the urinary excretion of homovanillic acid, a major metabolite of dopamine. It is, therefore, possible that a subgroup of autistic children may have a vitamin B_6 insufficiency illness. Detection of this particular subgroup can thus far not be made clinically or biochemically. Moreover, even though some improvement occurs when these children are given pyridoxine, they are still very far from being psychologically well.

The possibility that schizophrenia or even a significant subgroup of the schizophrenias is a vitamin dependency illness must be considered very remote. They have multiple somatic abnormalities which have not been found in schizophrenics.

They are generally mentally retarded and they have distinct biochemical abnormalities in the blood or urine which are detectable at birth or in early infancy. They respond quickly and dramatically to large doses of the single vitamin required to remedy their genetic metabolic abnormality. Schizophrenia fails to meet any of these criteria.

Is schizophrenia a vitamin insufficiency illness which resembles the Wernicke-Korsakoff syndrome? Again, it is very unlikely. A vitamin dependent specific enzyme defect has not been found, nor is there any evidence of a metabolic abnormality.

Recent Studies:

Some literature has appeared in the last several years dealing with megavitamin therapy and orthomolecular principles in autism, learning disability and mental retardation. Rimland et al. conducted a double blind crossover study of the effects of high doses of vitamin B_6 on autistic children (142). LeLord has studied the effects of high doses of vitamin B_6 and magnesium on autistic children (145) Both groups have reported positive findings. The results suggest that in a heterogeneous illness like autism there may be a subgroup that responds to this treatment. The degree of response is modest but statistically significant.

Kershner and Hawke (146) studied the efficacy of adding megavitamins to a diet low in carbohydrates high in protein with 20 learning disabled children who carried diagnoses of hyperactivity, minimal brain dysfunctions, or both. After a double blind six month period of treatment, the addition of megavitamins failed to produce any significant improvement when compared to the diet alone on a variety of intellectual, school achievement, perceptual, and behavioral measures. The efficacy of the diet alone could not be assessed because no dietary control group was employed. The parents of 18 of these children reported improvement in their children on this diet regardless of whether megavitamins or placebo were added. As the authors cautiously point out, this may reflect parent enthusiasm and/or the child's maturation rather than dietary effects.

In 1981, Harrell et al. (147) reported the results of a study in which 16 children (age range 5-15) with either Down's syndrome or unclassified mental retardation (IQ 17-70) received either placebo or a supplement containing 11 vitamins and 8 minerals for a four month period. All subjects were also placed on diets which restricted the intake of "sugary foods and soft drinks" and encouraged consumption of fruits and milk. All but one of the subjects were also given thyroid hormone because of low morning axial temperatures. At the end of four months,

the children were evaluated by 2 of 7 psychologists who did not all use the same IQ testing instruments. One of the psychologists, the principle investigator, was not blind to the conditions of the experiment. During the first four months of treatment, the five children who received supplemental vitamins increased their average IQ by 5-9.6 points and the 11 subjects on placebo showed negligible change. In a second phase of the experiment, all 16 of the subjects received vitamin supplements and the 11 subjects who had been on placebo in the first phase showed an average IQ increase of 10 points. The Harrell study has received considerable attention because of the implications of its conclusions. However, it has also received much criticism because of the weakness of its design and methodology.

Coburn et al. (157) carried out a replication study using mentally retarded young adults. This experiment was conducted entirely on a double blind basis with a uniform IQ testing procedure. None of the subjects, including those on the Harrell supplementation, showed any improvement in performance on the Stanford Binet test at 10 and 20 weeks. Admittedly, the Coburn study examined mentally retarded patients who were older than those studied by Harrell et al. Possibly, improvement in IQ may be limited to very young subjects. However, given the methodological weaknesses in the Harrell study and the absence of confirma · replication studies at this point, there is reason to skeptical. Replication studies are required for both professional responsbility and in the public interest.

Conclusion:

The history of medicine clearly shows that theory and practice are often dissociated. Regardless of the weaknesses of orthomolecular theory, the question may be asked, Does it work? The APA Task Force addressed this question by translating the hypotheses into testable questions. In doing so, they foccused only on the testing of the value of nicotinic acid in the treatment of schizophrenia. It was felt that this was justified because nicotinic acid was the cornerstone of megavitamin and, later on, orthomolecular theory and because the original publications for therapeutic efficacy used only this vitamin. The results of studies by many investigators who did double blind controlled studies are given in detail by the Task Force Report (124). The results were negative. Nicotinic acid as the sole medication for newly admitted schizophrenics was no better than an inactive placebo. As an adjuvant medication to phenothiazines it was worse and increased the duration of hospital stay and the amount of neuroleptic required. For chronic patients receiving neuroleptics, it was also worse than placebo. The Task Force was critical of the use of the Hoffer-Osmond card sorting test for perceptual difficulties which was the primary instrument for diagnosing schizophrenia and for measuring change with megavitamin therapy.

Since the publication of the APA Task Force Report in 1973, many other professional, academic organizations have reviewed the field of orthomolecular psychiatry and have arrived at similar conclusions. The Royal Australian and New Zealand College of Psychiatrists concluded that orthomolecular medicine has "no status in the practice of medicine or psychiatry. Its clinical role is unproven and the pathology tests cannot be justified for the rational practice of internal medicine or psychiatry". The Canadian Mental Health Association collaborative study indepndently investigated some of the underlying

hypotheses supporting orthomolecular psychiatry and obtained negative results. The American Academy of Pediatrics' Committee on Nutrition, looking specifically at the published evidence on megavitamn therapy for childhood psychoses and learning disabilities, concluded that "megavitamin therapy as a treatment for learning disabilities psychoses in children including autism is not justified on the basis of documented clinical results" (144).

The reply of Hoffer and Osmond to the APA Task Force Report was published in 1976 by the Canadian Schizphrenia Foundation of which Hoffer is President (125). The authors are careful to say that it does not necessarily represent the opinion of the Directors nor all of the members of the Foundation. It is 121 pages long; more than twice as long as the Task Force Report. The interested reader should examine it carefully.

Hoffer and Osmond (125) state that the Task Force Report and the data upon which it was based were grossly unfair and biased. They have many objections: (1) Fixed doses of nicotinic acid at 3 grams/day were used; some patients require 20 to 30 grams; (2) Orthomolecular claims were for acute schizophrenics; the so-called attempts at replication employed chronic schizophrenics; (3) Megavitamin practitioners use ECT as an adjuvant when necessary; it was not used in the replication experiments, which they feel should not be called "replication"; (4) The double blind trials which counted heavily in the Task Force judgment were unnecessary and restrictive. Criticism of megavitamin therapy research which failed to do control studies is unfair becuase it is unethical for practitioners to withhold treatment which they know is effective;(5) The Task Force Report based its judgment solely on research on vitamin B_3; megavitamin therapy has evolved to a much more complex therapeutic program which now uses other vitamins, minerals, psychotropic drugs, hormones, and other procedures; (6) The NAD experiments were

were done with a preparation which was not enterically coated. Hoffer had the megavi used with specially coated tablets which resisted digestive enzymes; (7) The Task Force selected from the literature all negative reports and did not adequately weigh the confirmatory reports.

At a more political level, Hoffer and Osmond feel the report is biased because (1) Dr. Lipton, the Chairman, was an avowed opponent, (2) at least two of the other members were opponents for different reasons, (3) no orthomolecular practitioners were on the Task Force, (4) The Task Force used pejorative adjectives in describing the work of the megavitamin therapists.

Most of the work of the orthomolecular psychiatrists is printed in their Journal of Orthomolecular Psychiatry, which is published quarterly by the Academy of Orthomolecular Psychiatry and the Canadian Schizophrenia Foundation. The Journal averages about 75 pages in each issue. It is not indexed in many major citation services, such as Index Medicus, and few medical school or university libraries in this country subscribe to it.

In a one year period (4th quarter 1981 to 4th quarter 1982), half of the full length articles were essays or reviews (15) with an additional 3 editorials, 5 case reports, 14 pages of Letters to the Editor, and 8 pages of book reviews. Only 10 articles presented data, and the vast majority of these were so flawed in methodology and so confused and confusing in purpose so as to prohibit labeling them as scientific reports.

The essays and reviews cover such topics as "Principles of Bio-Ecologic Medicine", "Towards the Orthomolecular Environment" ["We have seen how the migration of our species into space may bring us into the environment that most closely approximates the optimum for human beings, the ortho-environment. . ." (156)], "Allergies and Schizophrenia", and "Stigma and Mental Illness: Theory versus Reality."

Several of the papers and Letters to the Editor make imaginative and, perhaps, correct statements. For example, we are told that Lactobacillus Casei in the

human gut serves as an antidepressant and mild euphoriant since their cell walls contain phenylethylamine" (150). The use of mercury amalgams for filling teeth may result in chronic mercury poisoning (151). Manganese and nicotinic acid supplementation prevents tardive dyskinesia in patients receiving neuroleptics (152). Nearly 100,000 schizophrenic patients have been treated in the past 20 years. There is no doubt in the mind of every physician who has used these vitamins as part of a sophisticated treatment approach that it is remarkably beneficial (153). But data are seldom given, at most there will be an anecdotal case report.

The orthomolecular psychiatry may be called a belief system or subculture. It is not cautious and self correcting as a science should be.

It should be apparent that few, if any. research psychiatrists would agree with the orthomolecular definition of psychiatric disorders., their conc its pathogenesis, and the psychological instruments they use to measure its severity or its change with treatment. Given these vast differences, it is easy to understan why systematic attempts using research criteria to replicate their work invariably fail.

Orthomolecular psychiatrists say that clinical experience is enough to validate their procedures and that controlled blind studies are unethical. There may be other reasons, such as orthomolecular psychiatrists who are mainly in pr practice. Only a few hold academic or research positions.

Few psychiatric patients have unique nutritional requirements. Nutritional research in relation to psychiatry continues at a steady, if not spectacular pace. The pharmacological use of nutrients as in precursor therapy shows considerable promise. The special nutritional requirements of the early fetus and of geriatric patients are receiving constant attention and it seems very likely that these will be better understood and treated.

Preface

In the article *Insanity* in the ninth edition of the Encyclopaedia Britannica (1881) insanity is defined as a chronic disease of the brain inducing chronic disordered mental symptoms. The author of the article (J. Batty Tuke, M.D., Lecturer on Insanity, School of Medicine, Edinburgh) then stated that this definition

> possesses the great practical advantage of keeping before the student the primary fact that insanity is the result of disease of the brain, that it is not a mere immaterial disorder of the intellect. In the earliest epochs of medicine the corporeal character of insanity was generally admitted, and it was not until the superstitious ignorance of the Middle Ages had obliterated the scientific, though by no means always accurate, deductions of the early writers that any theory of its purely psychical character arose. At the present day it is unnecessary to combat such a theory, as it is universally accepted that the brain is the organ through which mental phenomena are manifested, and therefore that it is impossible to conceive of the existence of an insane mind in a healthy brain.

By 1929, when the fourteenth edition of the Encyclopaedia Britannica was published, the situation had changed, largely because of the development of psychoanalysis by Sigmund Freud. The earlier definition of insanity was deleted, and replaced by discussions from two points of view: the point of view of the materialistic school

> that though in many states of insanity no observable structural changes are found, they exist all the same, only they are such that our imperfect methods cannot detect them, and in time they will be discovered . . .

and the point of view of the psychogenic school,

> that though mental disease may arise secondarily to physical disorder, the symptoms are psychological reverberations of that disorder and the body of an individual must be regarded as environmental to the ego. . . . The many structural changes which are found in certain forms of insanity should be reviewed as probably secondary to a perverted mentality.

Psychoanalysis has failed, and psychiatry is now rapidly returning to the scientific approach, the recognition of the corporeal character of mental disease, with manifestations determined to some extent by environmental stress and past experience. Supportive psychotherapy has great value—an example is the explanation to the schizophrenic patient and his family that his disturbed behavior and thinking are the result of an imbalance in the molecular composition of his body, and that this imbalance can be corrected (Hawkins, Chapter 29 of this volume). The recognition of the effectiveness of phenothiazines and other drugs (and the ineffectiveness of psychoanalysis) has accelerated the reacceptance of the concept that mental disease is disease of the brain, and that the brain itself needs to be treated, by changing its molecular composition.

The relation of vitamins to mental disease became evident as soon as vitamins were discovered. One manifestation of pellagra is psychosis. Pellagra is a vitamin-deficiency disease, and the psychosis is cured (averted) by the provision of an adequate intake of the vitamin (niacin). It is estimated that in the first decades of this century 10 percent of the persons in psychiatric hospitals were pellagrins (Kety, 1970). The discovery in 1937 that niacin is the pellagra-preventing vitamin soon led to its trial in controlling mental disease in patients not suffering from pellagra. Cleckley et al. (1939) and Sydenstricker and Cleckley (1941) reported some success in treating 48 subjects with acute mental illness of one sort or another by use of moderately large doses of niacin (300 to 1,500 mg per day, as compared with the pellagra-preventing intake of about 12 mg per day).

In 1943 Kaufman described the deterioration in mental and physical health of 150 patients with a disease to which he gave the name aniacinamidosis, and in 1949 he published a larger book on this subject, with discussion of 455 patients. Measurements of impairment of joint mobility and increase in blood sedimentation rate gave objective information about the progress of the disease. He found that most of the patients improved greatly on a regime of 1 to 5 g of niacinamide per day, in divided doses (6 to 16 per day), continuing for as long as nine years (Kaufman, 1955). He observed no untoward reactions from niacinamide in several thousand patient-years of continuous use. His recommended intake of niacinamide for treatment of restricted mobility of joints and other manifestations of aniacinamidosis is 4 or 5 g per day. Many of his patients showed striking improvement in mental health as well as physical health on this regime.

The effective introduction of megavitamin therapy for schizophrenia came in the period from 1952 on through the work of Hoffer and Osmond, as described in several chapters of this book. After making some studies on a few patients with encouraging results, they carried out several double-blind and blind comparisons of niacin, niacinamide, and a placebo. A study with 171 subjects (73 receiving 3 g of niacin per day for all or part of the period of study, 98 receiving a placebo) gave a statistically significant difference in the number transferred to the mental hospital and a difference in the number of suicides (0 and 4, respectively) with borderline statistical significance (Hoffer et al., 1957). Another study with 82 subjects (43 receiving 3 g of niacin per day and 39 receiving a placebo) gave a difference with high statistical significance in the number classified as improved or unimproved (Hoffer, 1962).

It is evident from the published accounts of these studies that amounts larger than 3 g per day of niacin or niacinamide are needed for a pronounced therapeutic effect for many schizophrenic patients. Hoffer and Osmond had in fact observed that daily amounts of niacin or niacinamide larger than 6 g seemed to be required by some patients, and also that many patients benefited from receiving 3 to 6 g per day of ascorbic acid. Other vitamins, especially pyridoxine in amounts 600 mg to 1,500 mg per day, have been found to be beneficial. In addition, many schizophrenics, probably more than 80 percent, suffer from hypoglycemia, which needs to be corrected, as described in some chapters in this book. The orthomolecular treatment of schizophrenia includes more than the routine administration of 3 g of niacin or niacinamide per day.

The importance of good nutrition to good health cannot be denied. There is much evidence to support the thesis that for most people the optimum daily intake of ascorbic acid is far larger than the usually recommended daily allowance (Pauling, 1970); 3 to 6 g per day, the amount customary in megavitamin treatment of schizophrenia, may well be only the average optimum for most human beings. Little effort has been expended in the study of the amounts of vitamins required for optimum health. The decision by most psychiatrists who do not accept the principles of orthomolecular psychiatry to restrict the intake of vitamins by their patients to certain arbitrary levels, without checking the possible benefit for the patient of an increased intake, cannot be justified.

Part of the resistance to megavitamin therapy is based on the idea that an increased intake of a vitamin should be subjected to as thorough testing as a new synthetic drug. This is nonsense; the vitamins are substances to which the human body has long been accustomed, and the toxicities of the water-soluble vitamins are known to be low and the side effects few. Another part of the resistance is the result of a misunderstanding of the meaning of statistical significance. Investigations described as attempts to replicate Hoffer and Osmond's results are reported to have failed to show a statistically significant difference between the subjects receiving niacin or niacinamide and those receiving a placebo. This conclusion is then incorrectly interpreted as meaning

that the investigations have shown niacin or niacinamide to have no greater value than a placebo.

For example, Hoffer had reported that mentally ill children receiving niacinamide and ascorbic acid benefited more than those receiving a placebo. Greenbaum (1970) then reported that he was unable to confirm the claimed value of niacinamide in his double-blind study of 17 children receiving niacinamide (1000 mg per day per 50 lb. body weight) and 24 children receiving a placebo (also 16 receiving niacinamide and a tranquilizer). The principal criterion was the increase during the six months of the study in the score on a clinical scale of observable behavior categories. Greenbaum reported that "there was no significant difference attributable to niacinamide." This statement is seriously misleading. The average improvement in the score was in fact 4.0 units for the niacinamide group and 2.6 units for the placebo group. The difference between 4.0 and 2.6 is reported as not statistically significant. But we see that Greenbaum found 54 percent greater improvement in the niacinamide group than in the placebo group. From Greenbaum's result we can say that it is more likely that niacinamide has an effect (54 percent greater than the placebo) than that it has no effect, but it is not 20 times more likely ($P < 0.05$, accepted as statistically significant).

The statistical significance is determined by the design of the investigation. If Greenbaum had got the same result (54 percent more improvement for the niacinamide group than for the placebo group) with a larger number of subjects the null hypothesis of equal effect of niacinamide (in the dosage used) and placebo could have been rejected with statistical significance ($P < 0.05$).

Ban (1971) states that "The hypothesis, based on these findings [by Hoffer], that nicotinamide therapy is useful in childhood schizophrenia was not verified by Greenbaum in a carefully designed—placebo controlled—study." I consider this statement to be wrong. Greenbaum found 54 percent more improvement in the niacinamide group than the placebo group. Surely 54 percent more improvement is useful. The amount of improvement, 54 percent, is unreliable, but that is what he found.

I have discussed this matter in some detail because much of the objection to the use of orthomolecular methods in psychiatry is based upon similar misrepresentations of the reported studies.

Another investigation that is quoted as having provided evidence against the hypothesis that niacin or niacinamide has value in the treatment of schizophrenia was published by Ananth et al. in 1970, with the title "Nicotinic acid in the prevention and treatment of artificially induced exacerbation of psychopathology in schizophrenics." It is known that a substance, such as the amino acid methionine, whose molecules can donate methyl groups to other molecules has the property of exacerbating the mental illness of schizophrenics when it is ingested, and it has been suggested that the effectiveness of niacin and niacinamide in controlling schizophrenia results from the action of their molecules as methyl acceptors—that is, they remove methyl groups

om some methylated compounds in the body that may be causing the mental illness. n the investigation by Ananth et al. schizophrenia patients were given daily doses of ethionine. Some of the patients also were given niacinamide. All of the patients owed a pronounced exacerbation of their mental illness. The result has been terpreted as showing that niacinamide does not neutralize the methyl-donating fect of methionine in exacerbating schizophrenia by virtue of its function as a methyl ceptor. This conclusion is, however, not justified, because there was a serious flaw the design of the experiment. The patients were given 20 g of methionine per day. er 16 g of niacinamide per day would be required to accept the methyl groups nated by 20 g of methionine, but the patients were given only 3 g. It could have en predicted that the experiment would fail.

There is thoroughly convincing evidence that the methods of orthomolecular sychiatry discussed in this book have great value. Some aspects of the scientific asis of these methods are presented in the earlier chapters. Some of the chapters are most interest to biochemists. Most of the chapters can, I believe, be read with nderstanding and profit by physicians and by laymen who have some acquaintance ith the terminology of chemistry and other sciences. Despite the progress that has en made in controlling it, mental illness is still the cause of a tremendous amount of uffering. The work of Hoffer, Osmond, Hawkins, and others has shown that the ethods of orthomolecular psychiatry can be used to decrease the amount of this uffering. I join my co-editor, Dr. David Hawkins, and the other contributors to this ook in expressing the hope that it will be found useful not only by scientists and hysicians but also by those who suffer from schizophrenia and by their families.

I thank Dr. Gustav Albrecht for his help.

Orthomolecular Psychiatry

LINUS PAULING

INTRODUCTION

The methods principally used now for treating patients with mental disease are psychotherapy (psychoanalysis and related efforts to provide insight and to decrease environmental stress), chemotherapy (mainly with the use of powerful synthetic drugs, such as chlorpromazine, or powerful natural products from plants, such as reserpine), and convulsive or shock therapy (electroconvulsive therapy, insulin coma therapy, pentylenetetrazol shock therapy). I have reached the conclusion, through arguments summarized in the following paragraphs, that another general method of treatment, which may be called orthomolecular therapy, may be found to be of great value, and may turn out to be the best method of treatment for many patients.

Orthomolecular psychiatric therapy is the treatment of mental disease by the provision of the optimum molecular environment for the mind, especially the optimum

(*Reprinted with permission from* Science, *19 April 1968, vol. 160, pp. 265–271.* *Copyright © 1968 by the American Association for the Advancement of Science.*)

concentrations of substances normally present in the human body.[1] An exam the treatment of phenylketonuric children by use of a diet containing a smaller normal amount of the amino acid phenylalanine. Phenylketonuria (Følling, 1 results from a genetic defect that leads to a decreased amount or effectiveness o enzyme catalyzing the oxidation of phenylalanine to tyrosine. The patients on a mal diet have in their tissues abnormally high concentrations of phenylalanine some of its reaction products, which, possibly in conjunction with the decreased centration of tyrosine, cause the mental and physical manifestations of the dis (mental deficiency, severe eczema, and others). A decrease in the amount of phe alanine ingested results in an approximation to the normal or optimum concer tions and to the alleviation of the manifestations of the disease, both mental physical.

The functioning of the brain is d pendent on its composition and structure; tha on the molecular environment of the mind. The presence in the brain of molecule N,N-diethyl-D-lysergamide, mescaline, or some other schizophrenogenic substa is associated with profound psychic effects (see, for example, Woolley, 1962). Cl kin has recently pointed out (1967) that in 1799 Humphry Davy described sim subjective reactions to the inhalation of nitrous oxide. The phenomenon of gene anesthesia also illustrates the dependence of the mind (consciousness, epheme memory) on its molecular environment (Pauling, 1961; Miller, 1961).

The proper functioning of the mind is known to require the presence in the brai molecules of many different substances. For example, mental disease, usu associated with physical disease, results from a low concentration in the brain of a one of the following vitamins: thiamine (B_1), nicotinic acid or nicotinamide (E pyridoxine (B_6), cyanocobalamin (B_{12}), biotin (H), ascorbic acid (C), and folic ac There is evidence that mental function and behavior are also affected by changes the concentration in the brain of any of a number of other substances that are nor ally present, such as L(+)-glutamic acid, uric acid, and γ-aminobutyric acid.[2]

OPTIMUM MOLECULAR CONCENTRATIONS

Several arguments may be advanced in support of the thesis that the optimum mol cular concentrations of substances normally present in the body may be differe from the concentrations provided by the diet and the gene-controlled synthe

[1] I might have described this therapy as the provision of the optimum molecular composit of the brain. The brain provides the molecular environment of the mind. I use the word mind a convenient synonym for the functioning of the brain. The word orthomolecular may be criticiz as a Greek-Latin hybrid. I have not, however, found any other word that expresses as well t idea of the right molecules in the right amounts.

[2] The literature is so extensive that I refrain from giving references here.

chanisms, and, for essential nutrilites (vitamins, essential amino acids, essential ty acids) different from the minimum daily amounts required for life or the "recommended" (average) daily amounts suggested for good health. Some of these arguments are presented in the following paragraphs.

VOLUTION AND NATURAL SELECTION

e process of evolution does not necessarily result in the normal provision of timum molecular concentrations. Let us use ascorbic acid as an example. Of the ammals that have been studied in this respect, the only species that have lost the wer to synthesize ascorbic acid and that accordingly require it in the diet are man, her Primates (rhesus monkey, Formosan long-tail monkey, and ring-tail or brown puchin monkey), the guinea pig, and an Indian fruit-eating bat (*Pteropus medius*).[3] resumably the loss of the gene or genes controlling the synthesis of the enzyme or nzymes involved in the conversion of glucose to ascorbic acid occurred some 20 illion years ago in the common ancestor of man and other Primates, and occurred dependently for the guinea pig and for one species of bat and one bird, in each case an environment such that ascorbic acid was provided by the food. For a mutation te of 1/20,000 per gene generation and for even a very small advantage for the mutnt (0.01 percent more progeny) the mutant would replace the earlier genotype within bout 1 million years. The advantage to the mutant of being rid of the ascorbic-acid-ynthesis machinery (decrease in cell size and energy requirement, liberation of machinery for other purposes) might well be large, perhaps as much as 1 percent; a disadvantage nearly as large (less by 0.01 percent) resulting from a less than optimum supply of dietary ascorbic acid would not prevent the replacement of the earlier species by the mutant. Hence, even if the amount of the vitamin provided by the diet available at the time of the mutation were less than the optimum amount, the mutant might still be able to replace its predecessor. Moreover, it is possible that the environment has changed during the last 20 million years in such a way as to provide a decreased amount of the vitamin. Even a serious disadvantage of the changed environment would not lead to a mutation restoring the synthetic mechanism within a period of a few million years, because of the small probability of such mutations, far smaller than of those resulting in loss of function.

Moreover, the process of natural selection may be expected later on to lead to the survival of a species or strain that synthesizes somewhat less than the optimum amount of an autotrophic vital substance rather than of the species or strain that synthesizes the optimum amount. To synthesize the optimum amount requires

[3] For references, see Stone (1965). The only other vertebrates known to require exogenous ascorbic acid are the red-vented bulbul, *Pycnonotus cafer*, and related passeriform birds.

about twice as much biological machinery as to synthesize half the optimum amou
As suggested in Figure 1-1, the evolutionary disadvantage of synthesizing a less th

Diagrammatic representation of growth rate or other vital property of an organism as function of the concentration of vital substance in the organism, showing the concentration at which the differential advantage of an increased amount of vital substance is just balanced by the differential disadvantage resulting from an increased amount of machinery for synthesis, and the concentration that gives optimum functioning without consideration of the burden of the machinery for synthesis.

optimum amount of the vital substance may be small, and may be outweighed by th
advantage of requiring a smaller amount of biological machinery. Evidence from th
study of microorganisms is discussed in the following paragraphs.

EVIDENCE FROM MICROBIOLOGICAL GENETICS

Many mutant microorganisms are known to require, as a supplement to the mediu
in which they are grown, a substance that is synthesized by the corresponding wil
type organism (the normal strain). An example is the pyridoxine-requiring mutant
Neurospora sitophila reported by G. W. Beadle and E. L. Tatum in their first *Neur*
spora paper, published in 1941.

Several species of *Neurospora* that have been extensively studied are known to b
able to grow satisfactorily on synthetic media containing inorganic salts, an in
organic source of nitrogen, such as ammonium nitrate, a suitable source of carbon
such as sucrose, and the vitamin biotin. All other substances required by the organis

e synthesized by it. Beadle and Tatum found that exposure to x-radiation produces utant strains such that one substance must be added to the minimum medium in der to permit the growth at a rate approximating that of the normal strain. Their yridoxine-requiring mutant was found to grow on the standard medium at a rate nly 9 percent of that of the normal strain. When pyridoxine (vitamin B_6) is added to e medium, the rate of growth of this strain at first increases nearly linearly with the oncentration of the added pyridoxine and then increases less rapidly, as shown in igure 1-2.[4] The growth rate of the normal strain without added pyridoxine is equal o that of the mutant with about 10 micrograms of the growth substance per liter in he medium. At a concentration about four times this value (40 micrograms per liter) he growth rate of the mutant strain reaches a value 7 percent greater than that of the ormal strain without added pyridoxine.

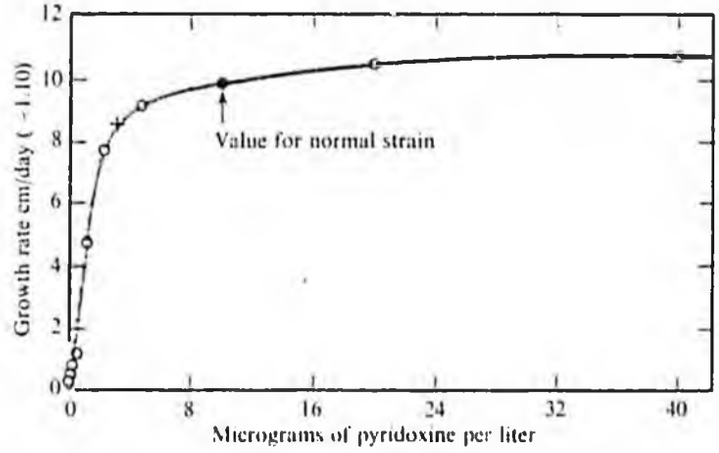

FIGURE 1-2.
The observed rate of growth of a pyridoxine-requiring *Neurospora* mutant (Beadle and Tatum, 1941), as function of the concentration of pyridoxine in the medium.

The point of maximum curvature of the curve in Figure 1-2, at about 3.2 micrograms of pyridoxine per liter (indicated by a cross), may be reasonably considered to mark the division between the region of vitamin deficiency (to the left) and the region of normal vitamin supply (to the right), such as might permit the mutant to compete with the wild type, which has the growth rate represented by the filled circle in Figure 1-2. The point marked by the cross might well correspond to an "adequate" or "recommended" amount of the vitamin, in that the growth rate of the mutant is only

[4] The points in Figure 1-2 represent my measurement of the slopes of the growth curves shown in Figure 1 of Beadle and Tatum (1941). They agree closely with the points of their Figure 2, except for one point, that for 1.2 μg/liter, which may have been misplotted.

12 percent less than that of the wild strain, and that the amount of the vitamin would have to be increased threefold to make up this 12 percent.[5]

As shown in Figure 1-2, quadrupling the concentration of pyridoxine that gives the mutant a growth rate equal to that of the wild type causes a further increase in growth rate by nearly 10 percent. The growth rates of the mutant and the wild type at very large concentrations of the vitamin have not been measured, so far as I know, and the optimum concentration is not known. From the work of Beadle and Tatum (1941) the optimum concentration may be taken to be greater than 40 micrograms per liter; that is, more than ten times the "adequate" concentration for the mutant and more than four times the concentration equivalent to the synthesizing capability of the wild type. The growth rate of the mutant at the optimum concentration is more than 22 percent greater than that at the "adequate" concentration and more than 9 percent greater than that of the normal strain.

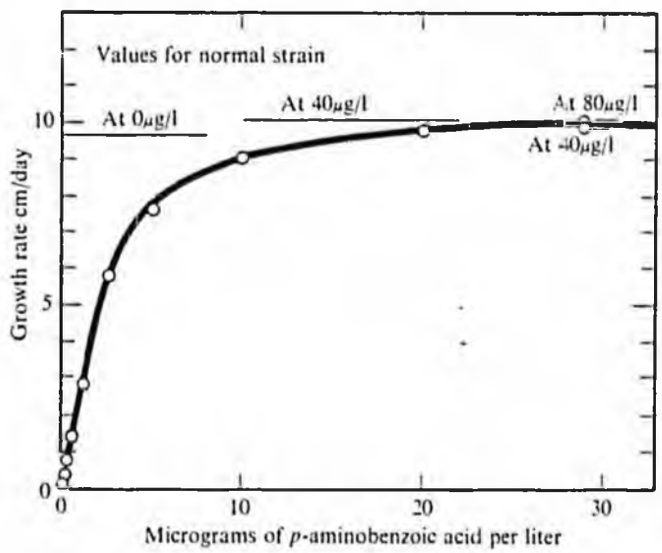

FIGURE 1-3.
The observed rate of growth of a *p*-aminobenzoic-acid-requiring *Neurospora* mutant (Tatum and Beadle, 1942), as function of concentration of the growth substance in the medium.

Similar results have been reported for other mutants of *Neurospora*. The values found by Tatum and Beadle (1942) for a *p*-aminobenzoic-acid-requiring mutant of *Neurospora crassa* as a function of the concentration of *p*-aminobenzoic acid added to the standard medium are shown in Figure 1-3. The growth-rate curve is similar in

[5] The reported growth rate for the normal strain in a medium with 40 μg of added pyridoxine per liter is 3 percent greater than that for the basic medium, as shown by the slopes of the lines in Figure 1 of Beadle and Tatum (1941).

shape to that for the pyridoxine-requiring mutant. The value of the growth rate for the normal strain of *Neurospora crassa* with no added *p*-aminobenzoic acid is equal to that for the mutant at a concentration of added *p*-aminobenzoic acid of about 15 micrograms per liter. A value about 4 percent greater is found for the normal strain at 40 micrograms per liter and for the mutant strain at 80 micrograms per liter, as indicated in Figure 1-3.

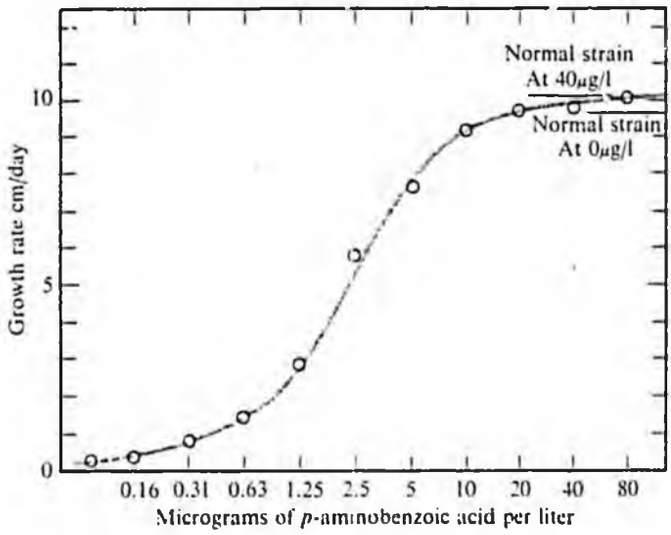

FIGURE 1-4.
Observed rate of growth of a *p*-aminobenzoic-acid-requiring *Neurospora* mutant as function of the logarithm of the concentration of *p*-aminobenzoic acid.

It is customary to plot values of the growth rate against the logarithm of the concentration of the growth substance, as shown in Figure 1-4. The amount of increase accompanying a doubling in the concentration of the growth substance is a maximum at 1.25 to 2.5 micrograms per liter, and decreases thereafter to about half the value for each successive doubling.

From these two examples we see that there may be a significant increase in rate of growth of the normal strain through addition of some of the growth substance that it synthesizes to the medium in which it is grown; that is, that the amount of the growth substance that is synthesized by the normal strain is not the optimum amount, but is somewhat less, leading to a rate of growth approximately 7 percent less than the maximum in the case of pyridoxine (with the normal strain of *Neurospora sitophila*) and 4 percent less for *p*-aminobenzoic acid (with the normal strain of *Neurospora crassa*). Many other examples are known of microorganisms that grow more

abundantly in a medium containing vitamins, amino acids, or other substances th they are able to synthesize than on a minimum medium.

Evidence supporting the above arguments has been presented recently by Zame hof and Eichhorn (1967) in a paper entitled "Study of microbial evolution throu loss of biosynthetic functions: Establishment of 'defective' mutants." These authc carried out experiments involving competitive growth in a chemostat of an aux trophic mutant (a mutant requiring a nutrilite) and a prototrophic parent in a mediu of constant composition containing the nutrilite. They found that the "defectiv mutant has a selective advantage over the prototrophic parental strain under the conditions. For example, an indole-requiring mutant of *Bacillus subtilis* was found t show a strong selective advantage over the prototrophic back-mutant when the tw were grown together in a medium containing tryptophan: the relative number of cel of the latter decreased 10^6-fold in 54 generations. They also found that greater ac vantage to the auxotroph accompanies a greater number of biosynthetic steps tha have been dispensed with (earlier block in a series of reactions), with the final meta bolite available. They point out that a mutant with a gene deletion would be at distinct selective advantage over a point mutant, in that not only the synthesis of th metabolite, but also that of the structural gene, the messenger RNA, and perhaps th inactive enzyme itself would be dispensed with, and that accordingly the mutant witl a deletion would replace the point mutant in competition. They mention evidence that some of the "defective" strains occurring in nature have lost one or more of thei structural genes by deletions, rather than by point mutations.

MOLECULAR CONCENTRATIONS AND RATE OF REACTION

Most of the chemical reactions that take place in living organisms are catalyzed by enzymes. The mechanisms of enzyme-catalyzed reactions in general involve (1) the formation of a complex between the enzyme and a substrate molecule, and (2) the decomposition of this complex to form the enzyme and the products of the reaction. The rate-determining step is usually the decomposition of the complex to form the products or, more precisely, the transition through an intermediate state of the complex, characterized by activation energy less than for the uncatalyzed reaction, to a complex of the enzyme and the products of reaction, with a rapid dissociation. Under conditions such that the concentration of the complex corresponds to equilibrium with the enzyme and the substrate, the rate of the reaction is given by the following equation (the Michaelis–Menten equation; Michaelis and Menten, 1913):

$$R = \frac{d[S]}{dt} = \frac{kE[S]}{[S] + (1/K)}, \tag{1}$$

In this equation $[S]$ is the concentration of the substrate, E is the total concentration of enzyme (present both as free enzyme and enzyme complex), K is the equilibrium constant for formation of the enzyme complex ES, and k is the reaction-rate constant for decomposition of the complex to form the enzyme and reaction products. This equation corresponds to the case in which there are no enzyme inhibitors present.

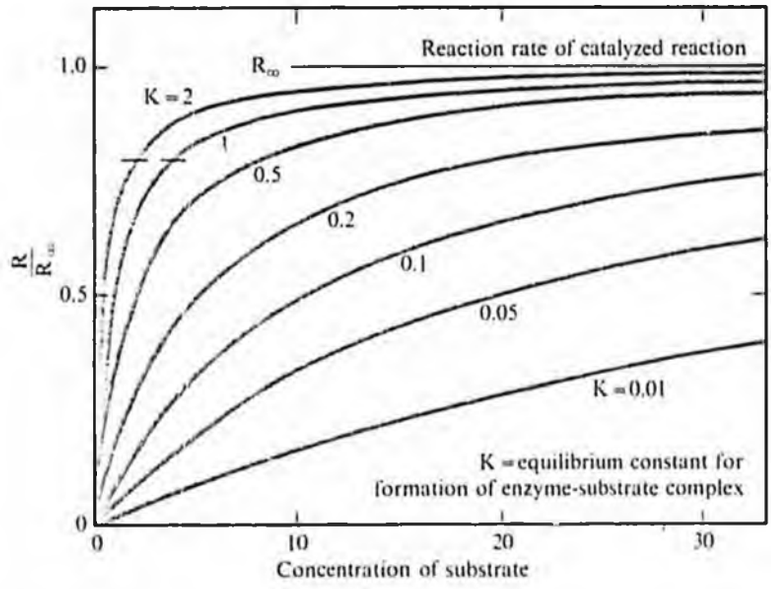

FIGURE 1-5.
Curves showing calculated reaction rate R/R_∞ of catalyzed reaction as function of the concentration of the substrate, for different values of the equilibrium constant K for formation of the enzyme-substrate complex.

Values of the reaction rate calculated from this equation for different values of K are shown in Figure 1-5. The curves are similar in shape to those of Figures 1-2 and 1-3. At concentrations much smaller than K^{-1} the reaction rate is proportional to the concentration of substrate. At larger concentrations, as the amount of enzyme complex becomes comparable to the amount of free enzyme, the reaction rate changes from the linear dependence. At substrate concentration equal to K^{-1} the slope of the curve is one-quarter of the initial slope, and the value is one-half of the value corresponding to saturation of the enzyme by the substrate.

The similarity of the curves of Figures 1-2 and 1-3 to appropriate curves in Figure 1-5 suggests that the growth substance may be involved in an enzyme-catalyzed reaction in which it serves as the substrate. The normal strain of the organism manufactures an amount of the substrate such as to permit the reaction to take place at what

may be considered a normal rate, 90 or 95 percent of the maximum ra
sponds to saturation of the enzyme. As described above, the gain
associated with the manufacture of a larger amount of the substrat
sponding advantage to the organism, might be balanced by the disa
organism associated with the upkeep of the larger amount of machin
manufacture the increased amount of substrate. An increase in rate
could also be achieved by an increase in the amount of the enzyme syn
organism. Here, again, the advantage to the organism resulting fro
may be overcome by the disadvantage associated with the increase in
machinery required for the increased synthesis. During the process of
has presumably been selection of genes determining the concentrati
zymes catalyzing successive reactions such as to achieve an approx
optimum reaction rate with the smallest amount of disadvantage to t

The rate of an enzyme-catalyzed reaction is approximately propo
concentration of the reactant, until concentrations that largely satura
are reached. The saturating concentration is larger for a defective en
creased combining power for the substrate than for the normal enzyn
defective enzyme the catalyzed reaction could be made to take place
normal rate by an increase in the substrate concentration, as indicated
The short horizontal lines intersecting the curves indicate what may
"normal" reaction rate, 80 percent of the maximum. For $K = 2$ the "n
achieved at substrate concentration $[S] = 2$. At this substrate conc
reaction rate is only 29 percent of the maximum and 35 percent of "r
mutated enzyme with $K = 0.2$; it could be raised to the "normal" valu
increase in the substrate concentration, to $[S] = 20$. Similarly, the sti
advantage of low reaction rate for a mutated enzyme with K only 0.01 c
come by a 200-fold increase in substrate concentration, to $[S] = 400$.
ism of action of gene mutation is only one of several that lead to disa
manifestations that could be overcome by an increase, perhaps a great in
concentration of a vital substance in the body. These considerations ol
gest a rationale for megavitamin therapy.

MOLECULAR CONCENTRATIONS AND MENTAL DISEASE

The functioning of the brain and nervous tissue is more sensitively depe
rate of chemical reactions than the functioning of other organs and tiss
that mental disease is for the most part caused by abnormal reaction rat
mined by genetic constitution and diet, and by abnormal molecular conce
essential substances. The operation of chance in the selection for the chi

The complement of genes of the father and mother leads to bad as well as to good genotypes, and the selection of foods (and drugs) in a world that is undergoing rapid scientific and technological change may often be far from the best. Significant improvement in the mental health of many persons might be achieved by the provision of the optimum molecular concentrations of substances normally present in the human body. Among these substances, the essential nutrilites may be the most worthy of extensive research and more thorough clinical trial than they have yet received. One important example of an essential nutrilite that is required for mental health is vitamin B_{12}, cyanocobalamin. A deficiency of this vitamin, whatever its cause (pernicious anemia; infestation with the fish tapeworm *Diphyllobothrium*, whose high requirement for the vitamin results in deprivation for the host; excessive bacterial flora, also with a high vitamin requirement, as may develop in intestinal blind loops), leads to mental illness, often even more pronounced than the physical consequences. The mental illness associated with pernicious anemia (a genetic defect leading to deficiency of the intrinsic factor [a mucoprotein] in the gastric juice and the consequent decreased transport of cyanocobalamin into the blood) often is observed for several years in patients with this disease before any of the physical manifestations of the disease appear (Smith, 1950). A pathologically low concentration of cyanocobalamin in the serum of the blood has been reported to occur for a much larger fraction of patients with mental illness than for the general population. Edwin et al. (1965) determined the amount of B_{12} in the serum of every patient over 30 years old admitted to a mental hospital in Norway during a period of 1 year. Of the 396 patients, 5.8 percent (23) had a pathologically low concentration, less than 101 picograms per milliliter, and the concentration in 9.6 percent (38) was subnormal (101 to 150 picograms per milliliter). The normal concentration is 150 to 1300 picograms per milliliter. The incidence of pathologically low and subnormal levels of B_{12} in the serums of these patients, 15.4 percent, is far greater than that in the general population, about 0.5 percent (estimated from the reported frequency of pernicious anemia in the area, 9.3 per 100,000 persons per year). Other investigators[6] have also reported a higher incidence of low B_{12} concentrations in the serums of mental patients than in the population as a whole, and have suggested that B_{12} deficiency, whatever its origin, may lead to mental illness.

Nicotinic acid (niacin), when its use was introduced, cured hundreds of thousands of pellagra patients of their psychoses, as well as of the physical manifestations of their disease. For this purpose only small doses are required; the recommended daily allowance (National Research Council) is 12 milligrams per day (for a 70-kilogram male). In 1939 Cleckley et al. reported the successful treatment of 19 patients, and

[6] Hansen et al. (1966) report serum B_{12} concentration below 150 pg/ml in 13 of 1,000 consecutive patients admitted to a Copenhagen psychiatric clinic. Henderson et al. (1966) report that 9 of 1,012 unselected psychiatric patients in a region in Scotland were found to have B_{12} deficiency, in addition to 5 pernicious anemia patients in the group.

in 1941 Sydenstricker and Cleckley[7] reported similarly successful treatment of 29 patients with severe psychiatric symptoms by use of moderately large doses of nicotinic acid (0.3 to 1.5 grams per day). None of these patients had physical symptoms of pellagra or any other avitaminosis. More recently many other investigators have reported on the use of nicotinic acid and nicotinamide for the treatment of mental disease. Outstanding among them are Hoffer and Osmond, who since 1952 have advocated and used nicotinic acid in large doses, in addition to the conventional therapy, for the treatment of schizophrenia (Hoffer et al., 1957; Hoffer, 1962, 1966; Osmond and Hoffer, 1962; Hoffer and Osmond, 1964). The dosage recommended by Hoffer is 3 to 18 grams per day, as determined by the response of the patient, of either nicotinic acid or nicotinamide, together with 3 grams per day of ascorbic acid. Nicotinic acid and nicotinamide are nontoxic (the lethal dose, 50 percent effective [LD_{50}], is not known for humans, but probably it is over 200 grams; the LD_{50} for rats is 7.0 grams per kilogram for nicotinic acid and 1.7 grams per kilogram for nicotinamide), and their side effects, even in continued massive doses, seem not to be commonly serious. Among the advantages of nicotinic acid, summarized by Osmond and Hoffer (1962), are the following: it is safe, cheap, and easy to administer, and it is a well-known substance that can be taken for years on end, if necessary, with only small probability of incidence of unfavorable side effects.

Another vitamin that has been used to some extent in the treatment of mental disease is ascorbic acid, vitamin C. A sometimes-recommended daily intake of ascorbic acid is 75 milligrams for healthy adults. Some investigators have estimated that the optimum intake is much larger (Kyhos et al., 1945), perhaps 3 to 15 grams per day, according to Stone (1966, 1967). Williams and Deason (1967) have emphasized the variability of individual members of a species of animals; they have reported their observation of a 20-fold range of required intake of ascorbic acid by guinea pigs, and have suggested that human beings, who are less homogeneous, have a larger range.

Mental symptoms (depression) accompany the physical symptoms of vitamin-C deficiency disease (scurvy). In 1957, Akerfeldt reported that the serum of schizophrenics had been found to have greater power of oxidizing N,N-dimethyl-*p*-phenylenediamine than that of other persons. Several investigators then reported that this difference is due to a smaller concentration of ascorbic acid in the serum of schizophrenics than of other persons. This difference has been attributed to the poor diet and increased tendency to chronic infectious disease of the patients (Benjamin, 1958; Kety, 1959), and has also been interpreted as showing an increased rate of metabolism of ascorbic acid by the patients (Hoffer and Osmond, 1960; Briggs, 1962). It is my opinion, from the study of the literature, that many schizophrenics have an increased metabolism of ascorbic acid, presumably genetic in origin, and that the

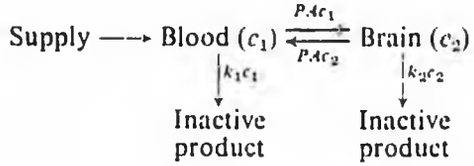
gestion of massive amounts of ascorbic acid has some value in treating mental disease.

Other vitamins (thiamine, pyridoxine, folic acid) and other substances (zinc ion, magnesium ion, uric acid, tryptophan, L(+)-glutamic acid, and others) influence the functioning of the brain. I shall review work on L(+)-glutamic acid as a further example. L(+)-Glutamic acid is an amino acid that is present at rather high concentration in brain and nerve tissue and plays an essential role in the functioning of these tissues (Weil-Malherbe, 1936). It is normally ingested (in protein) in amounts of 5 to 10 grams per day. It is not toxic; large doses may cause increased motor activity and nausea. In 1943 Price et al. reported favorable results for glutamic acid therapy of convulsive disorders (benefit to one out of three or four patients with petit mal epilepsy: Waelsch, 1948). Zimmerman and Ross (1944) then reported an increase in maze-running learning ability of white rats given extra amounts of glutamic acid. Zimmerman and many other investigators then studied the effects of glutamic acid on the intelligence and behavior of persons with different degrees and kinds of mental retardation. L(+)-Glutamic acid is apparently more effective than its sodium or potassium salts. The effective dosage is usually between 10 and 20 grams per day (given in three doses with meals), and is adjusted to the patient as the amount somewhat less than that required to cause hyperactivity. Several investigators[8] have reported an improvement in personality and increase in intelligence (by 5 to 20 I.Q. points) for many patients with mild or moderate mental deficiency.

LOCALIZED CEREBRAL DEFICIENCY DISEASES

The observation that the psychosis associated with pernicious anemia may manifest itself in a patient for several years before the other manifestations of this disease become noticeable has a reasonable explanation: the functioning of the brain and nervous tissue is probably more sensitively dependent on molecular composition than is that of other organs and tissues. The observed high incidence of cyanocobalamin deficiency in patients admitted to a mental hospital, mentioned above, suggests that mental disease may rather often be the result of this deficiency, and further suggests that other deficiencies in vital substances may be wholly or partly responsible for many cases of mental illness.

The foregoing arguments suggest the possibility that under certain circumstances a deficiency disease may be localized in the human body in such a way that only some of the manifestations usually associated with the disease are present. Let us consider, for example, a vitamin or other vital substance that is normally metabolized by the



[8] A recent survey of the role of glutamic acid in cognitive behaviors has been published by Vogel et al. (1966). Many references to earlier work are given in this paper.

catalytic action of an enzyme normally present in the tissues and organs of the bod
In a person of unusual genotype there might be an especially great concentration
this enzyme in one body organ, with essentially the normal amount in other organ
Through the action of this enzyme in especially great concentration the steady-sta
concentration of the vital substance in that organ might be decreased to a level muc
lower than that required for normal function. Under these circumstances there woul
be present a deficiency disease restricted to that organ.

An especially important case is that of the brain. We may, as a rough model of th
human body, consider two reservoirs of fluid, the blood and lymph, with volume V
and cerebrospinal fluid, the extracellular fluid of the brain and spinal column, wit
volume V_2. We assume that a vital substance is destroyed in each of these reservoirs a
a characteristic rate, corresponding to the rate constants k_1 and k_2, that it diffuse
across the blood-brain barrier at a rate determined by the product of the permeabilit
and area of the barrier and the difference $c_2 - c_1$ of the concentrations in the tw
reservoirs, and that it is introduced from the gastrointestinal tract into the firs
reservoir at a constant rate. The steady-state con rations are then in the ratio

$$c_1/c_2 = 1 + (k_2V_2/PA)$$

where PA is the product of permeability and the area of the blood-brain barrier. Th
steady state corresponds to the following system:

From this equation it is seen, as shown also in Figure 1-6, that for small values o
k_2V_2/PA the difference in steady-state concentrations in the cerebrospinal fluid and
the blood is small, but that through either decrease in permeability of the barrier o
increase in the metabolic rate constant k_2 the dy-state concentration in the brai
becomes much less than that in the blood.

This simple argument leads us to the possibility of a localized cerebral avitaminosi
or other localized cerebral deficiency disease. There is the possibility that some huma
beings have a sort of cerebral scurvy, without any of the other manifestations, or a
sort of cerebral pellagra, or cerebral pernicious anemia. It was pointed out by
Zuckerkandl and Pauling (1962) that every vitamin, every essential amino acid, every
other essential nutrilite represents a molecular disease (Pauling et al., 1949) which our
distant ancestors learned to control, when it began to afflict them, by selecting a thera-
peutic diet, and which has continued to be kept under control in this way. The local-
ized deficiency diseases described above are also molecular diseases, compound
molecular diseases, involving not only the original lesion, the loss of the ability to

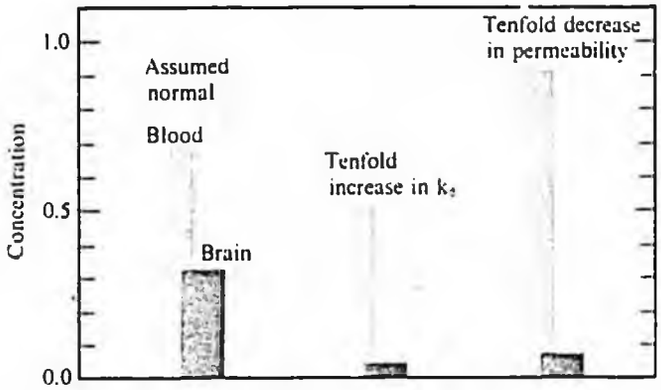


FIGURE 1-6.
Values of the concentration of a vital substance in the blood and in the cerebrospinal fluid for three different assumed sets of values of blood-brain barrier permeability and rate of destruction in the cerebrospinal fluid.

nthesize the vital substance, but also another lesion, one that causes a decreased te of transfer across a membrane, such as the blood-brain barrier,[9] to the affected gan, or an increased rate of destruction of the vital substance in the organ, or some ther perturbing reaction.

It has been suggested by Huxley et al. (1964), partially on the basis of the observations of Böök (1953, 1958) and Slater (1958) on the incidence of schizophrenia in relatives of schizophrenics, that schizophrenia is caused by a dominant gene with incomplete penetrance. They suggested that the penetrance, about 25 percent, may in some cases be determined by other genes and in some cases by the environment. I suggest that the other genes may, in most cases, be those that regulate the metabolism of vital substances, such as ascorbic acid, nicotinic acid or nicotinamide, pyridoxine, cyanocobalamin, and other substances mentioned above. The reported success in treating schizophrenia and other mental illnesses by use of massive doses of some of these vitamins may be the result of successful treatment of a localized cerebral deficiency disease involving the vital substances, leading to a decreased penetrance of the gene for schizophrenia. There is a possibility that the so-called gene for schizophrenia is itself a gene affecting the metabolism of one or another of these vital substances, or even of several vital substances, causing a multiple cerebral deficiency.

I suggest that the orthomolecular treatment of mental disease, to be successful, should involve the thorough study of and attention to the individual, such as is

[9] It has been suggested by Melander and Martens (1958, 1959) and by Hoffer and Osmond (1966) that the effects of taraxein (Heath et al., 1958) may result from changing the permeability of the blood-brain barrier.

customary in psychotherapy but less customary in conventional chemotherapy. the course of time it should be possible to develop a method of diagnosis (measu ment of concentrations of vital substances) that could be used as the basis for det mining the optimum molecular concentrations of vital substances for the individu patient and for indicating the appropriate therapeutic measures to be taken. My c workers and I are carrying on some experimental studies suggested by the foregoi considerations, and hope to be able before long to communicate some of our resul

SUMMARY

The functioning of the brain is affected by the molecular concentrations of many su stances that are normally present in the brain. The optimum concentrations of the substances for a person may differ greatly from the concentrations provided by h normal diet and genetic machinery. Biochemical and genetic arguments support th idea that orthomolecular therapy, the provision for the individual person of th optimum concentrations of important normal constituents of the brain, may be th preferred treatment for many mentally ill patients. Mental symptoms of avitaminos sometimes are observed long before any physical symptoms appear. It is likely tha the brain is more sensitive to changes in concentration of vital substances than ar other organs and tissues. Moreover, there is the possibility that for some persons th cerebrospinal concentration of a vital substance may be grossly low at the same tim that the concentration in the blood and lymph is essentially normal. A physiologica abnormality such as decreased permeability of the blood-brain barrier for the vita substance, or increased rate of metabolism of the substance in the brain, may lead to a cerebral deficiency and to a mental disease. Diseases of this sort may be called local ized cerebral deficiency diseases. It is suggested that the genes responsible for abnor malities (deficiencies) in the concentration of vital substances in the brain may be responsible for increased penetrance of the postulated gene for schizophrenia, and that the so-called gene for schizophrenia may itself be a gene that leads to a localized cerebral deficiency in one or more vital substances.

Orthomolecular Psychiatry: Treatment of Schizophrenia

DAVID HAWKINS

INSTRUCTIONS TO THE PATIENT

Education of the Patient: Explanation of the Illness and Test Results

Subsequent to the completion of tests and the diagnostic interview, the patient is given an interpretation of all the test findings and the diagnosis, including a biochemical explanation of his illness. It is explained to him how the HOD test reveals faulty perception, and he is told his exact HOD score and its correlation with his symptoms. It is then explained that a medical regimen will be prescribed that is designed to correct the brain's faulty perceptual functioning. An adequate understanding of the illness frequently relieves irrationality rapidly.

Similarly, when it is explained to the patient that paranoia is a result of faulty brain chemistry and it is labeled "paranoia" he becomes less paranoid and more rational. Unless the condition is of considerable duration, so that it has become

systematized with many attendant secondary gains, paranoid symptoms usually diminish rapidly. An adequate explanation to the patient of his illness is an extremely important therapeutic procedure and sets the stage for all the treatment procedures that follow.

We use the term "metabolic dysperception" (see Chapter 19 by Kowalson and Chapter 26 by Robie) to most accurately describe the patient's condition, and we explain that metabolic dysperception, if it gets bad enough, can produce overt clinical schizophrenia. We have yet to see a patient who has rejected this explanation, if expressed correctly. Many of the patients respond very positively and will state that this is the first time a psychiatrist has ever been honest with them.

Telling the patient that he has a specific illness allows him to assume the sick role with all the attendant benefits that accrue in our society, as have been well described by Siegler and Osmond (1969). Once the patient and family understand the nature of the illness they are usually willing to accept it and do something about it. The family no longer has to utilize denial or reaction formation to handle their guilt, anger, and other emotional reactions which automatically stem from psychological formulations of the illness. Under these conditions, families readily assent to counselling in those instances where disturbed family interaction is apparently impeding the patient's progress.

General Medical Regimen

The patient is told that he will be placed on a regimen consisting of diet, megavitamins, medications, and prescribed periods of exercise, rest, and sleep. No more than 8 hours of sleep is advised as more has been shown to increase fatigue and disability (Globus, 1969). Daily physical exercise is prescribed for its physiological benefit. Anxiety in mental patients has been demonstrated to be accompanied by elevated lactate levels as a result of altered energy systems (Pitts and McClure, 1967; Beebe and Wendell, 1968; also see Chapter 21 by Beebe and Wendell). The beneficial effect of exercise has also been reported by members of Schizophrenics Anonymous; they claim that of all the forms of exercise, swimming is the most subjectively beneficial.

Patients are advised to avoid excessive fatigue and stress and they are placed on a hypoglycemic diet which consists primarily of the avoidance of sugar and sweets, reduction of starch, and elimination of caffeine. Because there is an increasing interest in functional hypoglycemia there are a number of recent books available to the patient (see Chapter 22 by Meiers). A booklet "Hypoglycemia and Me" by the Hypoglycemic Foundation[1] is excellent and provides all the information needed.

---

Patient self-help groups such as Health Frontiers[2] hold regular meetings, distribute educational literature, and sponsor informative lectures by endocrinologists.

The use of adrenal cortical extract (ACE) in the alleviation of hypoglycemic episodes is occasionally necessary. Our experiences have indicated that in certain patients it can be demonstrated to have a marked benefit and in several instances, the use of the ACE injections has made it unnecessary to hospitalize patients who had precipitated relapses by going off their diets. "Physicians Guidelines to Diagnosis and Treatment of Hypoglycemia or the Hypoadrenocortical State" and "Hypoadrenocorticism" are available from the Hypoglycemia Foundation to physicians only.[3]

We also advise patients that strong aged cheeses such as Roquefort and Camembert should be avoided as these have been reported by the members of SA to aggravate their symptoms.

Patients appreciate the reasons for all of these instructions and are far more cooperative when the rationale is given. It is useful to clarify the difference between a vitamin *deficiency* disease and a vitamin *dependency* disease (Rosenberg, 1970) in which vitamins are being used in pharmacologic rather than replacement doses. To aid in their understanding of the illness, educational literature is made available and most patients and families find helpful the educational package which is available from the Schizophrenia Association of Long Island.[4] In our experience, the more the patient and family know about the illness, the better the result.

Joining Schizophrenics Anonymous is recommended when it appears the patient would benefit, and we suggest to family members that they join one of the schizophrenia associations, become acquainted with the other families, and attend the educational lectures. Many patients become interested in the hypoglycemic aspect of the illness and appreciate being referred to patient self-help groups concerned with this illness.

With the alcoholic-schizophrenic patients, treatment is first concentrated on the schizophrenia and they are referred to SA. In each of the SA groups, there are also members of Alcoholics Anonymous and, as the patient improves, these recovered alcoholics introduce the patient to AA. If the patient is not going to SA then he is referred directly to AA after his HOD score has gone down and the schizophrenic process has abated. Surprisingly, at that point the schizophrenic-alcoholic usually abruptly stops drinking without the prolonged struggle and battle typical of the nonschizophrenic alcoholic. The patient frequently attends both SA and AA groups and as the schizophrenic process dissolves, he usually drifts away from SA and continues in just AA.

MEDICATION

Psychotropic Drugs

The academic drug researcher operates at a distinct disadvantage—he cannot employ the great variety of techniques which the clinician utilizes almost automatically in his daily practice. Also, the researcher can only handle very limited data and the number of controlled variables must of necessity include only those that are most obvious and that lend themselves to data collection and processing. The parameters of research designs are, therefore, arbitrarily quite limited, as are the results. Unfortunately, the results of such studies are often extrapolated beyond the confines of the data and the results are stated in terms which do not limit the results to the conditions of the study. Because he is unencumbered by such limitations, it is usually possible for the clinician to accomplish more with any given drug than the literature infers. The more complex the illness being treated, the more this general principle holds true, and it is especially so in schizophrenia.

Correct sequencing of medications is important in the psychopharmacology of schizophrenia. By changing the sequence it is often possible to obtain results with the same drug to which the patient was previously unresponsive. A similar observation has also been made by Kline (1969), who noted, in doing cross-over studies, that patients may react differently to the same dose of the same drug when it is later re-introduced and that this phenomenon creates a previously unrecognized problem for drug research. We have learned that this can be done deliberately—a patient can be "set up" to respond to a drug that we intend to administer at a later date. In doing this, advantage can be taken of certain readily observable principles of central nervous system activity such as the rebound phenomenon. For instance, a patient will often readily respond to an "up" drug if it is rapidly introduced during the immediate period following cessation of a "down" drug and vice-versa. Brain function, as a general rule, tends to be compensatory, and this natural tendency can be used to purposely "sensitize" a patient to the effect of the same or another drug. In attempting to induce this reaction, the action of the "sensitizing" drug should be in the opposite direction from the drug whose response we later need to effect a recovery.

Researchers who are not clinically experienced are often puzzled by the "polypharmacy" that they come across, because, from the limitations of a theoretical viewpoint, it "doesn't make sense." The clinician, however, often follows by "intuition" certain principles in drug usage which have been learned by experience. Besides sequencing, these include: utilization of mutual synergisms and antagonisms, balancing off of side effects, purposely utilizing desired side effects, extending dosage ranges by concurrent use of antagonists, calculating onsets and durations of action, predicting progressive loss of response, predicting development of tolerance or loss

of tolerance, estimating effective dosage ranges at different stages of the illness, and predicting phases of drug responses. Because of all these clinically important factors, which are not included in research designs, it is common for clinicians to obtain quite different results from those that are received from academic studies. In daily practice the clinician automatically compensates for biological individuality (Williams, 1971) and the difference between patients, which in psychiatric conditions are more marked than in other kinds of illness. In psychiatry it is common for patients to require 10 to 100 times the "average dose" of a given substance before they respond favorably.

Additional reasons for the traditional "town versus gown" difference in the results of treatment between clinicians and academic researchers are provided by understanding Joseph Wilder's "Law of Initial Value," which states that the pre-stimulus state of the organism determines the response as much as does the nature of the stimulus itself. The chemical importance of this concept has been reviewed by Lesse (1971). Because of the antipsychotic effect of the phenothiazines, all patients are placed on either a suitable phenothiazine or other antipsychotic medication if this has not been done previously. According to Hollister (1971), antipsychotic drugs "contribute the most therapeutic benefits in schizophrenia—there is little direct evidence that traditional therapies add more," and all antipsychotics produce a postsynaptic dopamine receptor blockade leading to stabilization of the membrane at the receptor site.

The site of action may also be an enzymatic protein in the presynaptic membrane adjacent to the intersynaptic cleft (Teller and Denber, 1968). They point out that the defective protein at the synaptic site is probably quite small and that the antipsychotic drugs are capable of changing protein structure even in minute doses. The change in structure then causes change in functioning of the enzymatic activity. Utilizing a "framework molecular model" (available from Prentice-Hall, Inc., Englewood Cliffs, N. J.) they demonstrated, for instance, that the "architectural" characteristic of chlorpromazine and mescaline allowed for a demonstration of their mutually antagonistic action by action at the cell's protein membrane discs.

Spontaneous disinhibition of neuronal circuits, because they are connected in series rather than parallel, can result in clinically significant symptoms even though only a few sites are involved. This may lead to production of reverberative circuits in which apparent perceptions may occur, for instance, without external stimulation. Also, in chronic schizophrenia there is a disturbance of internal inhibitory activity (Saarma, 1968), and Saarma and Vasar (1970) have demonstrated that this disturbance is positively influenced by nicotinic acid. Teller and Denber conclude that the symptoms resulting from the endogenous genetic defect in schizophrenics are similar, from the viewpoint of molecular biology, to those that are exogenously caused by the psychotomimetic drugs. Bradley and Johnston made a valuable contribution to future research in this area in their work on "The Molecular

Pharmacology of Hallucinogens" (1968). Animal research until this time had been based only on gross behavioral changes in response to the drugs being investigated. Bradley and Johnston introduced the use of operant conditioning techniques to determine more subtle behavioral changes in response to a series of possible psychotogens. By correlating these more subtle responses to a series of structural changes in the molecules being studied, they have come closer to approximating the human condition in drug research with experimental animals.

It is explained to the patient that the phenothiazines are being prescribed, not as tranquilizers, but for their effect in reducing the HOD score and for their antischizophrenic action. Intelligent patients appreciate a brief explanation of the action of the phenothiazines so that they get to know that chlorpromazine has a "down" action and is, therefore, useful when they are agitated, or upset, or have insomnia, whereas fluphenazine, especially in lower doses, has an "up" action. An explanation is given of extra-pyramidal side effects and the reason for prescribing anti-Parkinsonian medication.

Patients are told that if they get blurred vision, the anti-Parkinsonian drug dose is too high, and that if they get restless legs or cannot sit still, it is too low. An explanation is given that the phenothiazines are not properly called tranquilizers and that that term should be reserved for drugs of the meprobamate type. This removes the common prejudice against taking tranquilizers. Many patients are either fearful of tranquilizers or they have reaction formations against them and do not want to become dependent on them. Clarification of this issue is often of considerable importance because some patients will discontinue antipsychotic drugs, with dire results, for these reasons.

The dose of phenothiazines is reduced as the patient improves and his medication is shifted from one end of the phenothiazine spectrum to the other, depending on what phase of illness or recovery he is in currently. We have seen many patients whose impairment was impeded by their being kept on the wrong phenothiazine due to the mistaken notion that all phenothiazines are interchangeable. As an example:

> A 28-year-old schizophrenic man was admitted to a hospital with paranoid symptoms. He was placed on 600 mg of chlorpromazine, following which the paranoid symptoms disappeared. He then became depressed and apathetic. During the next year-and-a-half he had psychotherapy three times a week, but did not improve and so was discharged at the end of that time as having achieved maximum hospital benefit. Medication remained the same throughout the entire hospital stay and he was discharged on the same dosage.
>
> When seen at the clinic, he was still "down," apathetic, listless, and indifferent. The notes in the patient's hospital record indicated that this was thought to be due to the schizophrenic process. At the first visit, his medication was changed from 600 mg chlorpromazine to 5 mg fluphenazine three times daily. Within 24 hours the entire symptom constellation disappeared. He became alert, responsive, and energetic, and eventually recovered.

The best clinical principle is that the patient should be on the right dosage of the right phenothiazine at the right time. We tell the patient that as he recovers the dosage will be reduced, but that he will be kept on a small, perhaps "bed-time only" maintenance dose for its beneficial chemical effect even though he has long since not needed a tranquilizer. This again demonstrates to the patient that the phenothiazine is not being used as a tranquilizer, but for its biochemical effect. This explanation results in increased patient cooperativeness.

Antidepressants may be necessary in this connection. We have found that activation of the tricyclic antidepressants by thyroid medication may bring about a prompt response. This has been recently reported by Prange et al. (1969) and Earle (1970). It is important, as mentioned before, that the patient's euthyroid status be ascertained prior to placing him on this combination of medications. The patient's active symptoms should always be first brought under control with a phenothiazine before the antidepressant is introduced.

Another medication which is useful in the treatment of schizophrenia is methylphenidate hydrochloride (Ritalin®). If the depression is not too severe, 10 to 20 mg three times per day before meals will alleviate fatigue and depression, as well as any sedation effects from the phenothiazines. This medication at times has relieved depressions of suicidal degree in less than an hour and helps to tide the patient over until his basic condition improves sufficiently that the depression passes. Overreliance on this medication can lead to a diminution of effect. It can be used to potentiate the effects of the tricyclic antidepressants. This synergistic effect results in an increase of blood levels of the antidepressants through enzyme inhibition (Wharton et al., 1971). Overusage by schizophrenic patients is rare, and in our experience has occurred only in those who have a problem with multiple drug abuse.

An additional use for thyroid medication in the euthyroid schizophrenia patient is in the treatment of periodic catatonia. In this condition, between upsets, the patient's HOD score may be within the normal range, and when an attack occurs the score rises precipitously. The typical response to 3 or 4 grains of thyroid daily is exemplified by the following case:

> A 41-year-old housewife had been hospitalized *15 times* in the last seven years for recurrent acute schizophrenic episodes uncontrolled by massive doses of chlorpromazine. When seen in the office between attacks, her HOD score was only 10. The attacks were always preceded by a period of insomnia and often occurred during the pre-menstrual period. In addition to megavitamins and a hypoglycemic diet, she was placed on 4 grains of Proloid® daily at the first visit. Since then she has not had a single recurrence—she feels and functions as though she had never been ill. She returns to the clinic for follow-up visits every three months.

Although the successful use of thyroid in treating schizophrenia has been the subject of many papers in psychiatry for more than 40 years, apparently many

clinicians do not think of using it because schizophrenics are usually euthyroid. The periodic catatonic is a readily recognizable subgroup of the schizophrenias and the value of using thyroid in this condition has been reported by many researchers including Gjessing (from 1932 on, but recently see 1964, 1967, 1969). Danziger (1958) Danziger and Kindwall (1953, 1954), Gunne and Gemzell (1956), Sourkes (1962 1970), Lochner et al. (1963), Minde (1966), Cookson et al. (1967), Jenner (1967) Vestergaard (1969), and Hoffer (1967). Thyroid can be used in treatment of the recurrently ill schizophrenic as well as for other types of schizophrenia.

Hoffer and Osmond (1967) reviewed the literature and noted that the average dose of thyroid used was 5 grains daily. Danziger and Kindwall (1953, 1954) gave doses of 2 to 20 grains but found that few patients required more than 10 grains. All researchers have commented on the considerable resistance of the schizophrenic to thyroid hormone and in our own work we have observed the same phenomenon. Our most common dose is 3 to 5 grains daily, and many patients who were previously unresponsive to treatment will recover when this amount of thyroid is added. Many of these are patients who do not present the classic periodic pattern; one will be described later.

Megavitamins

We routinely use mega doses of four vitamins for a variety of reasons in treating schizophrenic patients, and this has resulted in increased rates of recovery. It is still not possible to predict exactly which patients will benefit by megavitamins and it remains for future researchers to give us the useful clinical indicators to identify these patients in advance. Work supported by the Canadian Mental Health Association (Ban, 1969; Ananth et al., 1969; Ban and Lehmann, 1970) is proceeding in that direction and preliminary results indicate that there is a segment of the schizophrenic population that responds to either nicotinic acid and pyridoxine or pyridoxine alone and may eventually be identifiable.

Ananth, Ban, and Lehmann report (1972) that the therapeutic effect of nicotinic acid in chronic schizophrenics is potentiated by pyridoxine. This was demonstrated in a 48-week double blind control study in which pyridoxine alone, nicotinic acid alone, or the two together were demonstrated to have a statistically significant therapeutic effect. The therapeutic effect was demonstrable even though the patients had been hospitalized for an average of 10.9 years, were not on hypoglycemic diets, and the doses of both pyridoxine (75 mg daily) and vitamin B3 (3 g a day) were considerably below the dosages we routinely prescribe.

In general, it can be said from our own experience that the higher the patient's HOD score, the greater the likelihood of response to an overall megavitamin treatment regimen. The schizophrenic patient whose illness could be called "metabolic

rception" responds the best. The grown-up childhood schizophrenic with the OD score, postural stigmata of propioceptive deficit, and primarily visual per-al distortions is the least likely to benefit. The most significant visual perceptual tion in this group of patients is loss of depth. This particular distortion, even it is induced hypnotically in normal subjects, produces a schizophreniform nse with primitivization and regression, as has been shown by Aaronson in al studies (1967a, b, 1968). This type of patient appears to belong to a different iemical subcategory of the subtypes of the schizophrenias.

e megavitamins and the phenothiazines act clinically as though they had a gistic action, and for that reason patients are kept on a low daily dose of a othiazine prophylactically even after they have recovered. Sainz (1964) has onstrated that the phenothiazines elevate blood ascorbic acid levels, and there be a variety of synergistic effects such that the antipsychotic action of the phenothiazines may be augmented by the megavitamins. Demonstration of the effectiveness of the combination requires correction of co-existing functional hypoglycemia. any patients, in our experience, recovery was prevented by lack of adherence to ypoglycemic diet. As an example:

> A 26-year-old unemployed schizophrenic man had been ill for several years and had been hospitalized several times, during which he had had shock treatment and all other available forms of therapy. By the time he came to the clinic, he was surly, uncooperative, paranoid, and obese. The Glucose Tolerance Test revealed definite functional hypoglycemia and he was placed on the usual regimen of megavitamins, phenothiazines, and a hypoglycemic caffeine-free diet.
>
> For the next one-and-a-half years no progress was achieved and during visits he was highly uncommunicative, despite high doses of vitamins and phenothiazines. It was then discovered from his family that he was drinking at least half a case of a cola beverage per day and on week-ends he usually drank a whole case daily. Cessation of the cola ingestion resulted in rapid, progressive improvement with noticeable changes in behavior, communicability, and relationship with the family. His inappropriateness and surly, gauche manner disappeared and he is continuing to improve.

When we first began using megavitamins in treating childhood schizophrenics we re unaware of the importance of ameliorating the hypoglycemia and, therefore, r first reports on the use of nicotinamide in schizophrenic children stated that . . niacin and niacinamide were found to be relatively ineffective in childhood izophrenics and less effective in adult schizophrenics with childhood onset" awkins, 1967, 19. 8b). Similar negative experiences have been reported by Roukema d Emory (1970) and Greenbaum (1970b), who also demonstrated that nicotinamide alone in the treatment of childhood schizophrenia, except for improvement in me individual cases, did not produce statistically significant results. It was Cott 969) who pointed out that recovery of childhood schizophrenics on megavitamins as not possible until the hypoglycemia was corrected, and that unless this was

done it was useless to proceed. The importance of this concept cannot be overemphasized, as in this group as well as certain other patient groups no recovery at all is possible unless the hypoglycemia is corrected.[5] In this connection it might be well to emphasize again that recovery after the acute phase is over can be delayed for long periods of time if the patient is allowed to sleep beyond 8 hours a day. The apathy and lassitude which ensue from prolonged oversleep can negate attempts at rehabilitation.

Our initial combination of megavitamins usually consists of 1 gram niacinamide, 1 gram ascorbic acid, 50 mg pyridoxine, and 400 I.U. of natural vitamin E, repeated four times daily. Although occasionally an adolescent girl will develop nausea as a result of this dose of niacinamide and require a reduction of dosage, this combination is tolerated by the majority of patients without any side effects. The most frequent complaints are about the nuisance of taking the pills and, occasionally, difficulty in swallowing them.

For a time, we hypothesized that the difficulty in swallowing, especially in adolescent girls, was hysterical in origin, but we discovered this was often due to esophageal dysfunction associated with schizophrenia as reported by Hussar and Bragg (1969, 1970). Their study on the swallowing functioning in schizophrenics using cineradiographic techniques demonstrated that almost half of the schizophrenic patients showed various degrees of swallowing abnormalities and that chlorpromazine medication had no effect on the swallowing mechanism. The conclusion of their study was that "these results contribute to an understanding of the not infrequent tragic episodes of asphyxiation on food among chronic schizophrenic patients often incorrectly ascribed to tranquilizer medication."

Both niacinamide and ascorbic acid are available in capsules, which are more easily swallowed than pills. The ascorbic acid available in crystalline form can be mixed easily with orange juice.

The maximum therapeutic dose of niacin or niacinamide is about 1 gram per day below the nausea-inducing dose. We routinely begin by using niacinamide and later switch the patient to niacin if there are specific indications to do so, such as the existence of concomitant alcoholism, elevated cholesterol, or hypoglycemia, or if the schizophrenia has been precipitated by LSD. Although the flushing side-effect of niacin can be controlled by cyproheptidine (Periactin®) 4 mg four times daily (Robie, 1967), the flush unnecessarily alarms patients even when it has been previously explained to them. Niacin also appears to be more beneficial than niacinamide in treating the alcoholic-schizophrenic, although we do not have statistical studies to prove that this is so.

Recent studies (Davis and Walsh, 1970; Lieber and DeCarli, 1970) have demonstrated metabolic pathways in alcoholics which may account for nicotinic acid's

---

[5] Hypoglycemic episodes, for instance, will trigger post-LSD "flashbacks."

action in this disorder. Thus, alcohol, by way of its primary metabolite, acetaldehyde, competitively inhibits nicotinamide-adenosine-dinucleotide-linked aldehyde dehydrogenase, which interferes with the metabolic disposition of the biogenic amine dopamine, producing aberrant metabolites. Prolonged consumption of alcohol enhances the activities of the enzyme-reduced nicotinamide-adenosine-dinucleotide phosphate oxidase. In this connection, alcoholics have also been demonstrated to have a deficiency of vitamin C as exemplified by a lower level leukocyte ascorbic acid in control groups (Goldberg, 1970).

Althougn Saarma and Vasar (1970) report that with nicotinic acid there is an appearance of clinical improvement between the fourth and sixth week of treatment, in our experience the response to the megavitamins is generally more delayed and not discernible until the third to sixth month. A very noticeable or marked degree of improvement as compared to patients who are treated with just phenothiazines is most obvious by the end of the first year.

Improvement can be speeded up by the use of parenteral injections of the megavitamins, in which case a noticeable improvement begins within a few weeks (see Chapter 25 by Cott). Patients who have been on adequate oral doses for a considerable length of time without improvement will often suddenly respond when switched to parenteral administration. The ability of the intestinal tract to handle a given compound is not the same in all persons (Kaloon, 1970). Some patients may have a defect in transport enzyme systems so that a patient may have been on a high dosage of ascorbic acid for some time and yet still show a subnormal blood ascorbic acid level. This level then suddenly increases to normal when much smaller doses of ascorbic acid (500 mg) are given by injection.

Multiple modes of action of nicotinic acid in schizophrenia have been described (see Chapter 11 by Hoffer), including the recent work of Galzigna (1969, 1970) and Galzigna and Rizzoli (1970) showing that nicotinamide reacts rapidly with the aminochromes, reducing them. In the absence of nicotinamide in the brain tissue, the aminochromes react with acetylcholine to form a stable complex which acts as an endogenous hallucinogen. They conclude that "if we consider adrenochrome reduction derivatives as non-toxic excretion products of the psychotogen aminochromes, a rationale for the clinical use of nicotinamide in mega doses as a therapy for mental illness is provided." Further work is in progress to demonstrate the nature of this interaction with ascorbic acid which is central to the authors' "short circuit" theory of the onset of mental illness.

Nicotinic acid has nonspecific properties of blocking the production of stress-induced gastric ulcers in laboratory animals and it also blocks the L-dopa-induced exacerbation of symptoms in schizophrenic Parkinsonian patients (Yaryura-Tobias, 1971). Research is currently being done to determine the effect of nicotinamide in reducing the stress responses (cold pressor test) of normal students to final examinations (Bovard, 1971, personal commun.). The contraindications for using nicotinic

acid have been described by Hoffer and Callbeck (1959), Hoffer (1962, 1969), Hoffer and Osmond (1966), Mosher (1970), and Newbold (1970), and have been reviewed in other chapters. The four main contraindications to niacin are those of peptic ulcer, hypertension, diabetes, and gout. The niacin-induced hyperglycemia may alter insulin requirements in diabetics. The histamine-release, which produces the flush, results in hyperchlorhydria in ulcer patients. The elevation of uric acid may precipitate gout attacks, and if the hypertensive patient is on a reserpine-type anti-hypertensive agent, the patient may possibly go into shock. The cholesterol-lowering effect has been demonstrated in long-term heart studies and the heart studies have discovered the same contraindications (Boyle, 1968). Here, obviously, the lowering of blood cholesterol is sought, and it is a side benefit when niacin is taken by schizophrenics.

In the review articles mentioned earlier concerning the possible side effects of nicotinic acid, several cases of possible hepatic toxicity were reported. When the effect of nicotinic acid in producing false positive liver enzyme tests is discounted, these appear to be questionable. We have not seen any cases of noninfectious jaundice which did not clear up when the phenothiazine was discontinued. In addition, we have seen several cases of intercurrent infectious hepatitis as demonstrated by liver function tests and liver biopsy. The majority of patients who develop phenothiazine jaundice were continued on the megavitamins and the jaundice cleared up with no difficulty. In a few cases, because of the isolated reports in the literature, megavitamins were discontinued along with all other medications, and the patients were subsequently replaced on nicotinamide with no recurrence of jaundice. At this time, we consider that jaundice due to nicotinic acid, although unlikely, may be a remote possibility and treatment will depend upon the judgment of the attending internist.

We explain to patients that both vitamin E and ascorbic acid are prescribed for their antioxidant effects. Ascorbic acid alone has been shown in controlled studies to benefit psychiatric patients as evidenced by improvements in their Wittenborn and MMPI scores (Milner, 1963). The effect of vitamin C in preventing the common cold has been reviewed by Pauling (1970), and this is of benefit to schizophrenic patients, who characteristically show a clinical worsening and an increase of perceptual difficulties as a response to viral infections. For those patients in whom this has been a problem, we recommend the sustained-action form of ascorbic acid in capsule granulated form, which sustains ascorbic acid blood levels during sleep (Ricciталli, 1972) and thereby eliminates recurrent colds in the majority of patients. We frequently have observed minor relapses and setbacks in recovered patients in response to upper respiratory virus infections and a possible mechanism for this observation has been described by Teller and Denber (1968) related to abnormal protein structure (such defects can occur genetically, or be caused by malnutrition, avitaminosis, infection, toxins, or immunologic reactions). The greater retention of

rbic acid in schizophrenic patients has been shown by Cowan et al. (1970) and iously by Herjanic and Herjanic (1969) and VanderKamp (1966). Current ies by Pauling and Robinson and by Herjanic are reported in Chapters 2 and 14 his volume.

igh doses of ascorbic acid may occasionally cause mild diarrhea in some viduals and it may cause false positive urine tests in diabetics who use commercial e test kits. A case is also reported in which ascorbic acid shortened the pro-mbia time in a patient who was receiving a Warfarin (Coumadin®) anticoagulant senthal, 1971). In treating over 5,000 patients with 4 grams or more of ascorbic per day, however, we have not had a single instance of any serious side effects.

/e explain to patients that vitamin B6, pyridoxine, is necessary as a precursor of tinic acid. It is an intermediary step in the biotransformation of tryptophan to tinic acid where it is required for the hydroxylation of kynurenine (derived from tophan) to 3-OH-kynurenine and for the further metabolism of 3-hydroxyky-nine to 3-hydroxyanthranilic acid (immediate precursor to nicotinic acid; Gibbs Walshe, 1969). Vitamin B6 deficiency interferes with the metabolism of amino s, proteins, and biogenic amines, and causes abnormalities of nervous system vity in man, where the pathological effects of deficiency are most marked on the loping brain. Abnormalities of vitamin B6 metabolism have been associated not with schizophrenia but also with a variety of other abnormalities of the central ous system, and B6 deficiency at the subcellular level may be produced by a ber of antimetabolites (Knapp, 1966; Coursin, 1969). The antagonism between min B6 and L-dopa is a recent illustration (Duvoisin et al., 1969; Cotzias and avasilion, 1971). Pyridoxine in high doses has been used by Cott (1969) in the tment of childhood schizophrenia. The role of pyridoxine in psychiatric disorders recently been summarized by Ananth, Ban, and Lehmann (1972) in their paper tled "Potentiation of Therapeutic Effects of Nicotinic Acid by Pyridoxine in onic Schizophrenics" presented at the Canadian Psychiatric Convention in ntreal, June 8, 1972. This paper states that pyridoxine potentiates the action of tinic acid, possibly by opening up the kynurenine cycle of tryptophan metabolism thereby decreasing the formation of indoles. In their study, already referred to, doxine alone had a therapeutic effect in schizophrenics as well. In more than 0 patients we have not observed a single side effect from pyridoxine administra-of 200 mg daily.

is best to write down the medication schedule and the recommendations for p and diet on a card and give it to the patient at the initial visit. It is also advisable dicate to the pharmacist that all medications be labelled to show the name and age size. Unless this is done, there will be mistakes and many call-backs as most ents are perceptually disordered and unable to remember verbal instructions.

summary, the addition of megavitamins is inexpensive and safe, and very itively influences the long-term outcome. Side effects of a serious nature are quite

rare and easily avoided. The occurrence of even the most mild side effects is avoided by giving niacinamide instead of niacin. Precise identification of those patients most likely to respond is not yet possible but, in general, the more elevated the HOD, the more likely the response, provided however, that concomitant hypoglycemia is also corrected.

INVOLVEMENT OF THE PATIENT IN AN INTEGRATED COMMUNITY TREATMENT SYSTEM

Because of the severity of a patient's condition or situation, hospitalization may either be required or elective. The average length of hospitalization for intensive hospital treatment (which may or may not include a course of ECT) in our series of patients over the last five years is eight weeks. Ten to twelve weeks may be necessary, however, if the patient has been taking large doses of methedrine (speed). ECT rapidly reduces the HOD score, and this effect is most marked in the younger age groups, as will be discussed later.

If the schizophrenia has been exacerbated by LSD or methedrine to the degree that the patient is psychotic, then ECT, in our experience, is often necessary, as the psychosis otherwise tends to persist. It is also very effective with the depressive aspect of the patient's illness, which may be creating a suicidal risk. The response to ECT is different if the patient has been preparatorily pretreated. If, while in the hospital, the patient receives high-dosage megavitamins both orally and parenterally and is on phenothiazines and a hypoglycemic diet, the relapses following cessation of ECT formerly seen in schizophrenics seldom occur and the improvement is maintained following discharge.

Curiously, annoying side effects from medication seldom occur in a hospital setting. The patient who had side effects from practically every medication tried as an outpatient will probably have none from much higher doses of the same medication if he is hospitalized. In the hospital, patients are given 500 mg of ascorbic acid and 200 mg of niacinamide intramuscularly three times weekly in addition to the usual oral doses. Few patients fail to improve from intensive hospital treatment and even many of the severe chronic patients improve sufficiently so that they can be discharged and treated as outpatients.

Patients who appear shaky at the time of discharge or have difficult home situations or who have become disabled by the long duration of their illness benefit considerably from a convalescent period in a halfway house where they can be maintained on the same therapeutic regimen with monthly visits for changes of medication and evaluative follow-up. The use of SA, family groups, day activities programs, and

involvement with other supportive units of a treatment complex are described in Chapters 28 and 29.

Patients' self-help groups, such as Recovery, can also be of benefit to certain patients who have residual symptoms, so that, no matter what the family's financial limitations are, a great deal of supportive help and definitive group psychotherapy is available to both patient and family at no cost.

Pathological family interaction in which abnormal pressures are exerted on the patient by his family, or where there is a disturbed family situation that can impede his recovery, may require either family group therapy or parent counselling to facilitate the patient's recovery. This can be suspected as an operative factor when the patient's HOD score decreases progressively but is not accompanied by a return to normal function. The disability may then be stemming from an overprotective parent who infantilizes the patient rather than from the previously active schizophrenic process, and this pattern may require therapeutic intervention. At times this may be actively resisted by the dominant parent, who has unwittingly utilized the patient's illness for secondary gain or for other pathologic reasons.

Highly specialized group therapy may be necessary for the patient who has become heavily involved with the drug culture because unless this is done he tends to fall back into the same drug usage which precipitated his schizophrenia. In this type of group therapy, we have found that a straight chemical approach brings the best response. In this group setting, which differs markedly from the traditional analytically oriented group therapy, there is considerable discussion of drugs and their biochemical effects and especially the effects of drugs on the HOD score. The therapist needs to have knowledge of the current drug scene and the whole psychedelic subculture, especially language, life styles, and an awareness of what has recently been termed Consciousness III (Reich, 1970).

Once the patients learn that mescaline, psylocybin, LSD, STP and methedrine elevate the HOD score—with the risk of "freaking out"—they begin leaving these dangerous drugs alone. They learn that these drugs are truly psychotogens for them and that many of them have had to be hospitalized for LSD- or speed-precipitated schizophrenia psychoses. Patients inevitably discover that neither marijuana nor hashish has a residual effect on their HOD score and, therefore, for a period of time, excessive use of these two drugs may replace their former involvement with the more dangerous drugs that are likely to precipitate hospitalization and psychosis. As their HOD scores come down, the use of marijuana diminishes and they begin to function again and return to school or to work.

Prolongation of the excessive marijuana smoking may be associated with altered time perception, which should then be tested for with a timing device such as an electronic metronome (see Chapter 18 on dyschronia). Until this specific schizophrenic syndrome is alleviated, attempts to dissuade the patient from excessive pot smoking are almost always unsuccessful.

PSYCHOTHERAPY

From the model of schizophrenia which we have described, and the description of the diagnostic process, it is apparent that the patient has already been oriented to his illness and that this has been augmented by explanations of the meaning of the laboratory and perceptual test results. In addition to an explanation of the biochemical and perceptual aspects of the illness an explanation is given of how these interfere with functioning, feeling, and relating to others.

Although the illness intensifies pre-existent psychological conflicts and personality problems, it is explained to the patient that the initial phase of therapy will be devoted to medical recovery from the illness and that coexistent psychological problems will not be dealt with primarily until the HOD score is within the normal range. The explanation given for this is that impaired brain function causes so many different kinds of symptoms and effects on the personality that there would be no way of knowing, until the patient gets better, which of them are results of the patient's own personal problems and which are manifestations of an active disease process. The analogy given here is similar to a toxic brain syndrome. A more common example is that of the alcoholic who when actively drinking may develop an enormous range of pathologic symptoms and behavior and when sober may have only mild or no indications for psychotherapy.

Most patients readily concur with this treatment plan. The majority of patients will have already undergone previous psychotherapy, often of a prolonged and intensive nature with a number of therapists, so that they are seldom motivated to take part in any kind of formal psychotherapy. Many patients are actively opposed to psychotherapy as well as being bitter about such previous experiences.

The resentment of patients and families and the turmoil ensuing from previous experience with psychotherapy were responsible for much of the bitter comment about traditional methods of psychiatric treatment for schizophrenia which appeared in the early issues of the *Newsletter* of the American Schizophrenia Association. This same conflict and disillusionment has been reported by professionals themselves when a member of their family has become ill. For example, a Professor of Psychiatry reported his own disheartening experience with this dilemma (Kysar, 1968).

At the North Nassau Mental Health Center, five years of experience using the orthomolecular approach were compared with the previous five years when traditional psychiatry approaches were used. This comparison showed that dynamically based psychotherapy was of very limited benefit in schizophrenia. Although parent counselling and educational and supportive therapy were demonstratively beneficial, and often critically so, therapies based on theories of a psychodynamic etiology of the patient's schizophrenia brought questionable benefit (Hawkins, 1969). Whether psychotherapy or pharmacotherapy was more important was glaringly demonstrated

by the disastrous consequences which occurred when patients discontinued medication. Most patients relapsed upon termination of medication, but showed little response to termination of psychotherapy. One of the most common reasons for hospitalization was discontinuance of medication, yet hospitalization was never required because of a therapist's absence or termination of psychotherapy. Hospitalization was in fact more often preceded and precipitated by the patient's decision to "go for analysis." Those patients placed on the orthomolecular program who continued in psychotherapy with their previous analyst did considerably less well than those patients in whom psychotherapeutic intervention was kept to an absolute minimum.

The clinic's conclusions have been corroborated by similar findings from large-scale research studies done elsewhere as well as by the collective experience of patients and their families.

Information about the value of psychotherapy in schizophrenia can be obtained from three additional decisive areas: (1) controlled studies in the scientific literature; (2) reports from therapists in institutions who have had extensive, long-term experience with the use of psychoanalytic psychotherapy in the treatment of schizophrenia; and (3) the experiences of large numbers of patients and their families.

During recent years, there have been several large-scale authoritative studies on the value of psychotherapy in schizophrenia, the most extensive being that of May (1968, 1969), in which a comparison was made of five different treatment methods in schizophrenia. This study was so extensive and included so many collaborators that a research project of its magnitude on the value of psychotherapy will probably never be duplicated. The study was supported by the State of California Department of Mental Hygiene, U.S. Department of Health, Education and Welfare, U.S. Public Health Service, the National Institute of Mental Health, the University of California Health Services, and the research committee of the Los Angeles Psychoanalytic Society, and there was collaboration with many other authorities too numerous to mention.

In review of this work, Barnes (1971) considers the study to be the most meticulous, intensive, complex, and comprehensive research design in the field of psychiatric therapy. He notes that many will disbelieve the results but

> more for emotional reasons than on the basis of any critical analysis of the work . . . these findings are of the greatest importance both to clinical psychiatry and to mental health program administration . . . it also leads us to wonder about the efficacy of the various therapies used in out-patient work with ambulatory patients, both schizophrenics and others.

The conclusions of this immense study were that medication alone, whether combined with psychotherapy or not, was the most effective and efficient treatment for most patients. Electroconvulsive therapy was the second most effective treatment.

Individual psychotherapy and milieu therapy were found to be the least effective, most expensive, and most time consuming.

Another series of important studies on the value of psychotherapy in the treatment of schizophrenia was reported from the Department of Psychiatry, Harvard Medical School, at the Massachusetts Mental Health Center. The conclusion from these computerized studies was that psychotherapy alone, even with experienced psychotherapists, did little or nothing for chronic schizophrenic patients, even over two years time (Grinspoon et al., 1967, 1968). In another study by the same researchers (Grinspoon et al., 1969) the same conclusions were reached: medication with or without psychotherapy had the most marked benefits. These studies confirm the earlier findings of May and Tuma (1965) that psychotherapy alone does not improve the schizophrenic patient's chances for improvement. In a further study by Shader et al. (1971) the authors conclude that there was no demonstrable difference in the results whether a patient received psychotherapy by either a "Type A" or a "Type B" therapist.

The findings of these extensive studies are supplemented by the 10-year study done by the American Psychoanalytic Association, in which data supplied by 386 analysts on over 3,000 patients reported an overall rate of symptom cure for schizophrenia of 9 percent (1968).

The second area of informative data is supplied by those institutions with long-term intensive experience in the use of psychoanalytic therapy with schizophrenia. Of these, Chestnut Lodge in Rockville, Maryland, is probably the best known. Two recent books from that institution indicate the failure of this method of treatment. In *Schizophrenia and the Need-Fear Dilemma* (Burnham et al., 1969) the psychoanalytic theory of schizophrenia is deftly presented together with an explanation of the lack of positive clinical results obtained. As a matter of fact, all of their case histories end with the patient either dead or still sick with schizophrenia. In the second book, *Conflicts and Reconciliation: A Study on Human Relations in Schizophrenia* (Stierlan, 1969), a similar lack of clinical results is reported.

Gray (1970) points out in a review article that "Sigmund Freud always held that schizophrenia was not amenable to psychoanalytic cure" and that "the challengers of this statement have failed to disprove the truth of it."

The clinic has had the opportunity to provide treatment for a number of patients who had prior long-term in-patient psychoanalytic treatment. In almost every case these patients who had been unresponsive to intensive, long-term psychoanalytic therapy promptly responded to a medical regimen. After 8 weeks of medication and/or ECT in a hospital, the majority had recovered. They are now employed, or back in college, able to socialize and some married. The following case is illustrative:

> This 24-year-old man had been ill with schizophrenia for six years and for the last two years had been in the hospital for psychoanalysis during which time he received no drugs of any kind. The family was alarmed at his deteriorating condition as he had

decided to commit suicide by not eating and the institution refused to use any medications. The family experienced great difficulty in getting the patient transferred to a medically oriented hospital and finally had to threaten legal action to obtain his release. The patient was so disturbed that the hospital had to wrap him in wet sheets mummy fashion and move him by ambulance because of their refusal to use tranquilizer medication.

On admission to the Brunswick Hospital, the patient was mute, withdrawn, severely depressed, negativistic, and uncooperative. After 8 weeks of intensive hospital treatment he recovered sufficiently to be discharged. Within a few months, he was gainfully employed, and was taking college courses in the evening. He then moved away from his family, became independent, and subsequently married.

The foregoing would tend to augment the findings of Will (1970), who concludes an article on psychotherapy in schizophrenia with the statement "*few schizophrenic patients will be helped in this prolonged, expensive and largely unattainable treatment.*"

The general consensus of many schizophrenic patients also has been that the results of psychotherapy were disappointing. Not only are their experiences discussed at meetings of Schizophrenics Anonymous and the various schizophrenia associations throughout the United States, but their collective experience also was expressed resentfully in the first few volumes of the *Newsletter* of the American Schizophrenia Association, as was previously mentioned. Autobiographies by former patients or their families reflect the same attitudes. *In Search of Sanity* by Gregory Stefan (1966) and *Gone is Shadow's Child* (Foy, 1970) are typical examples.

From the foregoing survey of important sources of information, the evidence is that psychotherapy based on psychoanalytic formulations of schizophrenia is of no statistically demonstrable benefit to patients. When done by therapists who are less than expert, psychotherapy may well be deleterious. Therefore, the requests of patients and their families for the inclusion of medication in the patient's treatment is hardly irrational, nor does it constitute "uninformed lay opinion." Many families, especially those who belong to a schizophrenia association, are very well informed and have read extensively. Dr. May's book, for instance, among many others, is for sale at association meetings. (One of the families of the Long Island Schizophrenia Association recently co-sponsored a major professional symposium on Gilles de la Tourette's Syndrome—which indicates a rather high degree of sophistication.)

In the clinic's experience, most patients do not desire or require formal psychotherapy once their HOD scores have returned to normal. During the initial period of the illness, while the patient's HOD score is still elevated, the less interference the patient experiences from the psychiatrist, the better will be the result. Patients who continue in dynamically oriented psychotherapy during this phase recover much slower and to a lesser degree. This conclusion became apparent after several years of experience with patients who were in therapy elsewhere and who were allowed to continue in therapy while the clinic handled their medications. As a group, these patients recovered to such a noticeably lesser degree that the clinic finally had to

recommend that patients discontinue that type of psychotherapy until they had medically recovered from the worst of their illness. When this practice was followed, results were much better—when patients did resume therapy, it was usually for far different reasons than the ones for which they had originally sought it.

After the initial diagnostic visit, patients are usually seen weekly to adjust medications until an effective regimen has been established. This usually occurs by the end of the first month and visits during the second and third months are usually bi-weekly. The average patient is then seen monthly for the remainder of the first year. During the second year patients are usually seen every two or three months, and during the third year they are seen every three or four months.

Inasmuch as the patients go through various stages of recovery, the problems that they present during these periods of time will vary. Initially, the patient needs an explanation and interpretation of the illness followed by support and encouragement. During the first year, the main concerns are associated with symptoms, but these progressively diminish, so that by the end of the first year problems relating to returning to functioning in the various areas of life will be presented. The second year is devoted primarily to the problems of re-entry into a social life, returning to work, or returning to school, and there is a desire to become independent of the family who has supported the patient during the illness. Dependency conflicts become almost routinely manifest and at times family therapy or parental counselling may be required to handle the family's matching anxieties regarding resolution of this conflict. Adolescent-type problems then typify the second stage of recovery, which constitutes the "re-entry" phase.

During the third year, many patients will have grown and progressed beyond the level of functioning which preceded their illness. Many will state that they are "weller" than they were before they became ill, and at this time the actual onset of the illness will be dated retrospectively. This will almost always precede the previously accepted date of onset. This occurs because the patients never knew what it was to feel and function well, and now that they experience this, they will frequently give the exact time in their lives when the internal change had occurred which signalled the real beginning of the illness. Many function with perceptual impairment for years; one characteristic of this state is the subjective certainty that one has "always been this way." Patients may need practical advice as they enter areas of life in which they have never before ventured.

During the second and third years of treatment, when some patients marry and begin having children, their questions concern genetic predisposition and pertain to what percentage of their children may be expected to develop the same illness. Almost routinely, newly married recovered schizophrenics want to know if there are any ways in which they can prevent the occurrence of schizophrenia in their children or detect it early. It is important to advise the women to stay on the medical regimen during pregnancy to prevent post-partum relapses.

nts, especially if they became ill during early adolescence, will have
able, secondary neurotic gains—especially the fulfillment of depend-
and will continue to display immature child-like behavior even though
ores have returned to normal. Some will tenaciously cling to the sick
ro. ough it is no longer appropriate and they may require both explanation of what they are now doing as well as firm encouragement in a more mature direction. Often, these problems become disguised by the patient's adoption of self-serving interpretations of the youth culture "drop-out" pattern. Group therapy techniques are often useful to overcome these delayed maturational problems.

The adolescent rebellion pattern may coexist or predominate, instead of the passive dependent style. As is well known, this may also be a reaction formation. These conflicts associated with the dependence-independence growth phase may require adroit handling, as well as considerable forbearance. Families forget that schizophrenics can demonstrate the same problems that other young people do in our culture and that the problems that they are having with the patients are not all due to schizophrenia. It is frequently necessary to reorient families to this fact, as they lose their perspective from living so intimately with the illness.

In summary, during the acute phase of the illness, when the patient's HOD score is elevated, the most effective psychotherapy is an educational approach, which is of considerable benefit to both patient and family. This is followed by supportive practical advice as the patient recovers and goes through the successive stages of recovery, during which time he may have changing symptoms, which merely indicate that he is passing through a different phase, rather than getting worse, as he may erroneously conclude. The well-known appearance of depression following disappearance of the paranoid and hallucinatory symptoms is an example, and the patient needs to be reassured that the depression symptom will also pass and respond to treatment as did the previous phase.

After the patient's HOD score has returned to normal, specific conflicts may be handled either by supportive, individual therapy or group therapies. At this stage, recurrence of symptoms accompanied by elevation in HOD score indicates that the cause is biochemical and should be treated by a change in the medical regimen. Symptoms unaccompanied by a rise in the HOD score, on the other hand, are probably stemming from interpersonal or psychological conflicts and are, therefore, treated psychotherapeutically.

The approach to the patient during the initial phase of the illness has certain parallels with handling the psychedelic experience, in that every effort is made to influence favorably the patient's set and setting (which includes the therapeutic setting) so that the patient will be subject to benign experiences as much as possible. Following this principle will greatly increase the likelihood of recovery and the prevention of unfortunate sequellae. The importance of respecting the patient's extreme vulnerability when his defenses are inoperative is paramount. Analogies

between the schizophrenic and psychedelic experiences have been made by many authors, including Silverman (1968), Hoffer and Osmond (1967), and Laing (1967).

If the altered biochemistry of some people spontaneously sends them on a "voyage of discovery into inner space" then their experiences should be made as positive as is possible. This is also emphasized by Dabrowski (1964) in his book, *Positive Disintegration*, which demonstrates the possibility of reintegration at a higher level of functioning, as so many of our patients actually do.

In our view it is a serious misunderstanding to consider, as Laing has done, that if some people are defined as having schizophrenia the word itself is an epithet or a damaging "label." A vase can be used to hit someone over the head, but that does not mean that vases are inherently damaging or evil. *All* labels are potentially damaging—the fact that a person is labelled as American, Catholic or Protestant, black or white, rich or poor, educated or whatever, will put that person in very serious trouble in certain social circumstances. Some groups in society will negatively use any label that can be thought of. We should see to it the word schizophrenia is not used in that way against our patients, but the dilemma is not solved by pretending that the condition does not exist.

Although from a theoretical viewpoint the schizophrenic experience can be made a positive one, it should not be allowed to last indefinitely. Even a voluntary psychedelic experience is emotionally exhausting and the subject is relieved when it is over. Because the situation in which the schizophrenic experience occurs is seldom favorable for any length of time, the "voyage" of the schizophrenic illness is endlessly painful. We have never known a patient to have regrets that the experience was finally over—the plunge into another experiential world was involuntary. Even those patients who became schizophrenic following the intentional use of psychedelics did not intend to go that far—they meant to only spend a day that way—not years or maybe forever.

RESULTS AND RESPONSE TO TREATMENT

General Problems in Evaluating Treatment Results in Schizophrenia

Once it becomes known that a particular institution is using a new or helpful approach to an illness, it tends to attract a distorted sample of patients. A progressively increasing percentage is made up of difficult and intractable cases. Determining the results of treatment then becomes more difficult and interpretation of statistics is less and less meaningful. Reporting of results in schizophrenia is notoriously fraught with

almost impossible obstacles, so that no matter how carefully research designs have been devised they are still subject to criticism in some area. Each professional discipline has its own criteria of what is meaningful. Control groups can also be grossly misleading, as the variables which one researcher considers essential to control are ignored by another. As Williams (1971) has shown, even identical twins are not biochemically nor even anatomically equal. Matching groups of patients with schizophrenia as to age, classical diagnosis, sex, or occupational group may actually be of minimal importance.

Of considerably more clinical significance would be the matching of groups of patients who are identical with respect to HOD score, incidence and severity of hypoglycemia, type of previous treatment, and favorability of life circumstances. Of importance also are the patient's degree of knowledge of his illness and the manner in which it has been presented to him. The use of the medical model itself, for instance, has an effect in that the patient is allowed to be ill when he is ill. The nonspecific effects of Selye's general adaptation syndrome also have to be taken into account, as the response of the patient during the alarm reaction can be quite different from the response of a patient when he is in the stage of chronic resistance or exhaustion.

We would also have to know whether the average HOD scores in the contrasting groups, even though numerically equal, were on the rise, indicating a worsening of the condition, or were falling, indicating a process of remission. We could not, for example, compare pneumonia patients based just on their temperature. A temperature of 102° might occur because the patient is in the process of going into a fulminating crisis where the temperature might eventually reach 107°, or because his temperature has been previously higher, which would indicate that he is in the process of getting well.

Evaluations of drug responses are difficult to assess, as many such studies utilize fixed dosages instead of the *optimal* dosages which take into account individual variation. Fixed-dosage-schedule studies, therefore, give only mathematical probability figures and fail to indicate the real clinical usefulness of a given medication when used in the proper dosage and in the proper sequence.

Because of the impossibility of meeting all these crucial requirements, results of any treatment method in schizophrenia are probably most usefully conveyed to clinicians by giving as detailed and accurate a description of the clinical response as is possible, so that the results could be duplicated. The average busy clinician is interested in treatment methods that are practical and produce observable results. In daily practice, he tends to be pragmatic and unimpressed by the polemics of theoreticians. Most physicians are aware that the ultimate scientific explanation of most of the treatments they use in daily practice will not be forthcoming in the near future. Practical considerations prevail when the physician is confronted by the sick patient.

Practical Factors: Acceptability, Applicability, Cost, and Safety

The orthomolecular approach circumvents most of the public's objections to psychiatric treatment. Psychiatry has generally been accused of developing treatments which are totally impractical in that they are either extremely time consuming, expensive, and drastic, they produce serious side effects, they fail to produce results, or they are so objectionably named as to cause them to be rejected and resisted. In addition, many of the treatment modalities require a high degree of motivation, sophistication, verbal ability, and insight, and the absence of factors which would result in their not being accepted for a particular treatment. Intensive psychotherapy, for instance, exemplifies many of these objections, and in addition often results in alienation of the patient from the family, which in itself is an extremely serious side effect.

"Shock" treatment, by its very name, has such dread connotations that its applicability and acceptability have been seriously curtailed. Long-term hospitalizations for psychodynamic therapies are extraordinary in cost and disappointing in results. Imprudent publicity and actions by some agencies have caused many patients to be more concerned with side effects than they are with getting well. This has reached such a degree that recently a depressed patient who wanted to commit suicide was reluctant to take antidepressants because they might cause side effects! She was not even aware of the absurdity of her position, so deeply had this fear been embedded in her mind. Another block in reaching large numbers of patients is the idea that all psychotherapy is "Freudian." Schizophrenic patients especially are not enthusiastic about the prospect of having their personal privacy invaded by interrogation, especially when it does not pertinently relate to what they are experiencing.

In our experience with the orthomolecular-medical model-approach to a wide variety of patients representing the whole socio-economic scale, this treatment method has been extremely well accepted. The involvement of patients and their families in an integrated community system allows them to compare notes, observe results, and compare experiences of different treatment methods. This has had a remarkable effect on morale and cooperation and it results in a beneficial increase in education of both patients and their families.

Because return visits are widely spaced and diminish in frequency with time, this treatment method is economically feasible and compares favorably with more traditional ones. Patients feel that their illness is being monitored by some objective means rather than by just the subjective opinion of the psychiatrist or family.

The treating psychiatrist has objective data upon which to base treatment and verify results so that this treatment method is also well accepted by the professional. In addition, the treatment method can be used in private, hospital, and clinic practice

and is suitable for treating large numbers of patients at significant savings in cost and manpower.

The safety factor is considerable, and this is important in our present society. Because psychotherapy with this treatment system is aimed primarily at educating and increasing the understanding of patient and family, disruption of the family is not a side effect of treatment. Patients are not advised to leave the family unit, because the family is not viewed as pathogenic. A recovered patient may decide to leave a family unit because he feels that the particular family structure is deleterious to his recovery, but that is an individual matter which may be handled by family therapy. In our experience with this method, in the majority of instances when the patient leaves the family unit it is because he is well enough to make it on his own. As patients recover, they develop insight into the fact that the illness caused perceptual distortions, and that many of their perceptions of family interaction were distorted and subsequently remained in that form in their memories. Recognition of this results in reconciliation with the family more frequently than disruption. The storing up of distorted memories of a family interaction has been described by others, including Rubinfine (1971), who stated that

> schizophrenics suffer impairment of consciousness from infancy onward so that percepts are registered in this altered state and memories from this state of infancy onward are impaired. These distorted perceptions become openly evident in the decompensated state and treatment requires correcting these altered percepts.

The side effects that we have observed in treating over 5,000 patients with megavitamins have been minimal and minor. We have seen no side effects from vitamin E except for loose stools in one patient. Pyridoxine has not produced side effects in any case. Vitamin C in in the routine dosage of 4 grams a day has not resulted in discernible side effects. Although loose stools are supposedly a possibility, we have not observed this. We have three patients with a history of gout on 4 grams per day and there has been no increase in uric acid level, nor attacks of gouty arthritis. There is serious doubt as to whether ascorbic acid produces any significant incidence of side effects. This was reviewed in an article on the subject in World Medical News, Vol. 12, Issue No. 8, February 26, 1971. Patients who were pregnant were continued on megavitamins with no untoward effects on either the mother or the baby.

Niacinamide in a dosage of 4 grams a day can produce nausea in a few patients, usually adolescent girls. This can be circumvented by the use of buffered niacinamide in capsule form, the addition of one tablet per day of meclazine (Bonine®), or by lowering the dosage.

The side effects of niacin have been extensively reviewed in articles by Hoffer (1969), Mosher (1970), and Boyle (1968); the contraindications remain those of duodenal ulcer, hypertension, gout, and diabetes. If niacin is not used in these conditions (although it can be with adequate medical controls) the only side effects seen are those

of the initial flush and occasional nausea. The flush can be diminished by taking the full starting dosage of 1 gram four times a day with meals and a glass of cold milk in the evening, or by premedicating the patient with cyproheptadine (Periactin®). The flush disappears in 24 to 36 hours and is hastened by raising the dosage rather than by lowering it (on a low dosage, patients will continue to flush indefinitely). Inasmuch as the flush is due to a release of histamine from the mast cells, the histamine is sufficiently "washed out" after a day so that insufficient histamine is released by subsequent doses to cause further flushing. Nausea can be controlled by the same measure as with niacinamide. An inositol salt of nicotinic acid, available in Canada as Linodil®, also effectively circumvents nausea. Young patients, especially those with red hair and fair complexions are least tolerant of niacin and may develop a recurrent itchy rash requiring its discontinuance. The niacin flush may also produce heartburn or other gastrointestinal symptoms in a minority of cases, also requiring its discontinuance. Niacin may also give false positive liver enzyme tests and should be discontinued two days prior to the testing procedure. It will also cause hyperglycemic changes in the glucose tolerance curve, and accordingly should not be given for 48 hours before that test.

We have seen patients who have taken 20 to 40 grams of niacin daily for prolonged periods with no adverse effect. In general, as both Hoffer and Mosher conclude, and our experience corroborates, niacin appears to be relatively harmless as long as due caution is taken in avoiding its use in the presence of the aforementioned contraindications.

Administratively, the orthomolecular approach provides several sizable advantages. The cost, waiting time, and professional manpower for psychodiagnostic testing are greatly reduced. Psychiatrists can handle large numbers of patients without any special equipment, although having one's own biochemical laboratory is a distinct advantage. Continuity of treatment is not interrupted when there is a change of doctors, which is a frequent circumstance in clinics and hospitals and one that poses difficulties if the therapy is based primarily on psychotherapy. The treatment method results in enormous economic advantages in that seeing a patient once a month costs about one-twelfth as much as seeing patients three times weekly for long-term therapy.

Joining Schizophrenics Anonymous and taking part in the activities of the schizophrenia associations further reduces costs in that they supply specific group therapy at no cost to the patient. When the cost of treatment in the average case is prorated over a three-year period the annual cost of treatment itself will amount to only a few hundred dollars, which compares very favorably with any other available treatment system. Even in those cases where hospitalization is necessary the comparative cost is still relatively low because the average duration of hospitalization with this treatment method is only 5 weeks, and rehospitalization is seldom necessary except in a very chronic and severe case where the patient has been ill since childhood.

Because this treatment method utilizes objective monitoring of the patient's response, it facilitates reporting of improvement by treatment agencies, and this may become of progressive importance. In New York City, for instance, all mental health agencies contracting with the City's Funding Agency must now demonstrate tangible outcome of treatment to justify funding. With this treatment system, response to treatment in individuals or groups can be demonstrated even before the patient's behavior begins to reflect that improvement. The following case is an illustrative example:

> A 34-year-old housewife developed schizophrenia postpartum. She had been hospitalized and then treated unsuccessfully for two years. When the patient applied for treatment at the clinic she was depressed and relatively immobilized, with a HOD score of 110. On a treatment regimen of megavitamins, hypoglycemic diet, phenothiazines, antidepressants, and supportive therapy, she clinically remained essentially the same, with neither symptomatic nor behavioral improvement.
>
> Serial HOD testing showed, however, that the score was coming down progressively. It was not until the fourteenth month of treatment, when the HOD score got down to 30, that her symptoms finally disappeared and she resumed total functioning. Two months prior to her behavioral recovery the question of hospitalization had arisen. Because of the trend of the HOD scores, however, hospitalization was not advised, as it appeared to be only a matter of time before the HOD score would finally reach the level where recovery would occur.

In this case, several important things were demonstrated. First, an unnecessary hospitalization was avoided, but had it occurred her recovery two months later would have been falsely attributed to it. Second, a behavior rating scale or multiple interviewing techniques would have erroneously concluded at the end of the first year of treatment that she was no better, when in fact the basic disease process was considerably improved. The obverse is also true, in that, for instance, many patients have worked the very day they committed suicide, and the HOD score could have picked up the increasing severity of their illness despite behavioral status quo. The pressures in our society toward normal behavior are so enormous that relatively normal behavior may still occur in the face of *serious* degrees of illness.

Evaluation of Effectiveness

In view of the previously described difficulties in evaluating treatment results in schizophrenia, a variety of ways of demonstrating the effectiveness of this treatment approach can be described in terms that are appropriate for different settings.

OFFICE PRACTICE

The only absolute control which meets all of the essential criteria is the utilization of the patient as his own control. This also eliminates the problem of placebo or transference responses. In this regard, it is useful for the physician to select from his own practice patients with whom he has become familiar, whose failure to recover despite all previous treatments had been personally observed, and about whom he has collected a great deal of subtle and usually unreported data. A change in the patient's response then becomes readily apparent even though transmission of this observation to others may only sound anecdotal and be difficult to demonstrate convincingly. The following two cases are illustrative:

Case No. 1: This 33-year-old housewife and mother of three young children had been overtly and severely psychotic with schizophrenia for five years. The family had unlimited means and provided her with the best of professional help. She had been in a number of hospitals and was treated by many highly qualified psychiatrists. She had had all the psychotropic drugs in massive doses and in multiple combinations, as well as several courses of electroshock therapy. Despite all this, her condition became progressively worse. She was openly delusional, suicidal, out of contact, and irrational.

Because of the hopelessness and severity of her condition, a prefrontal lobotomy was finally advised and it was scheduled to be performed. At this point, the family asked if she could be given a trial of megavitamin therapy before resorting to the drastic surgical procedure. The reply was "Lobotomy, yes—niacin, no!" The family then had the patient transferred, against medical advice, out of the hospital and had her admitted to the Brunswick Hospital. The patient was not at all happy about the transfer; she did not like the new hospital, did not believe any treatment would help, and did not like the new doctor—she did, however, agree to take the prescribed medications.

On a combination of megavitamins, thyroid, hypoglycemic diet, and a small dose of tranquilizers, she recovered in 10 weeks. She was discharged from the hospital 4 years ago and during the intervening time has returned to full normalcy, including taking care of her children, running her household, and becoming active in the PTA and other social activities. In addition, she is working at a part-time job. She is seen for after-care visits at the clinic every four months. She looks well, feels well, and has no symptoms. During February 1971, she was interviewed by a correspondent on CBS News on nationwide television and she gave no sign of ever having been ill.

Case No. 2: A 24-year-old unmarried, unemployed young woman with a diagnosis of borderline paranoid schizophrenia had spent 10 years in weekly psychotherapy during which time she had three different therapists. Despite everything, she remained "half well" in that her borderline paranoia prevented her from holding a job, keeping a boyfriend, or making close friends. She stayed home and bemoaned her fate that she would always be disabled and would never be able to get married. She felt herself to be a social fifth wheel and an embarrassment to her family, who belonged to a subculture in which for a young woman of her age to be unmarried was a social disgrace. All of the psychodynamic possibilities had been repeatedly explored, but her condition remained static. In addition to different phenothiazines, a variety of medications had

been tried. She usually had unpleasant side effects and her attitude toward medications was suspicious.

At this point, the therapist put her on a sugar-free diet with no explanation, except that it might help her to take off weight. She was also placed on the megavitamin regimen with the explanation that vitamins might give her more energy. Because she suffered from apathy, listlessness, and hypochondriasis, she agreed. Within a few months she began to demonstrate a different emotional tone and lost the hostile, paranoid edge in her interactions with others, so that for the first time in her life she made a friend. Soon after, also for the first time, she was able to keep a boyfriend (prior to this time she had gone out with many young men but she was so hypercritical that seldom did they call her for a second date).

She now was able for the first time to hold a job and get along with her superiors. In the past she had always become paranoid and had either been fired or quit in a huff. She subsequently married, now has two children, and functions normally as a housewife. All medications were prophylactically temporarily increased after the birth of each child to prevent a postpartum episode.

To the clinician then, the efficacy of a new treatment method is most convincingly evidenced by a clinical response in patients who have failed to recover by all previously tried methods.

HOSPITAL PRACTICE

Changes in the collective HOD scores of groups of patients demonstrate the effectiveness of a given procedure. A research project done at the Brunswick Hospital demonstrated the usefulness of this method in determining the effect of ECT in the treatment of schizophrenia (Chiossone et al., 1969). In this study, all patients were given both the HOD and OIT tests on admission and again on discharge. The same patients were also evaluated on a clinical rating scale and although there was no statistically significant difference between the two groups at the time of their discharge as far as their degree of recovery, suitability for discharge, and scores on the rating scale, the HOD scores demonstrated that there had been a marked difference in response to treatment.

All patients were treated with phenothiazines, megavitamins, accessory symptomatic medications, group therapy, and all the other usual adjunctive measures, with the exception that 85 patients received ECT and 55 served as controls. When the results were tabulated and graphed, the very significant effect of ECT was observable. This was most marked in the younger age groups (Fig. 30-1).

Figure 30-2 shows the effect of ECT as compared to the control group by graphing only improvement in the percentage of scores above the median on the perceptual subscale of the HOD test.

Figure 30-3 graphs the same results, except that the improved scores have been obtained by totalling the paranoid and perceptual subscales. The purpose of comparing these subscales with the total scores is to eliminate the effect of improvement

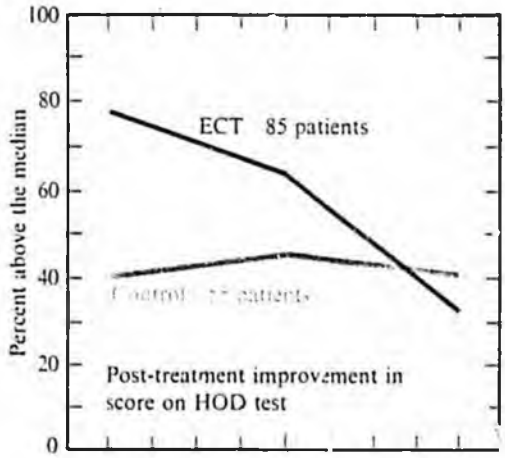

FIGURE 30-1.

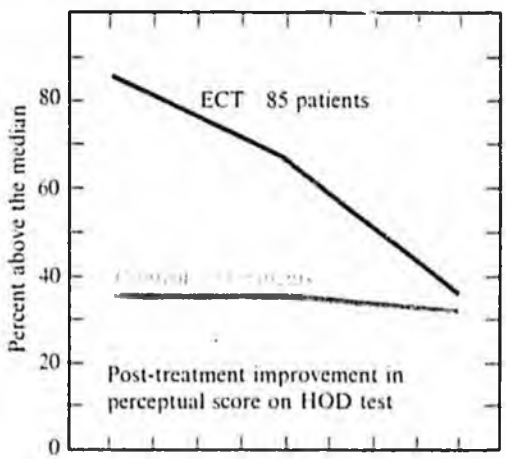

FIGURE 30-2.

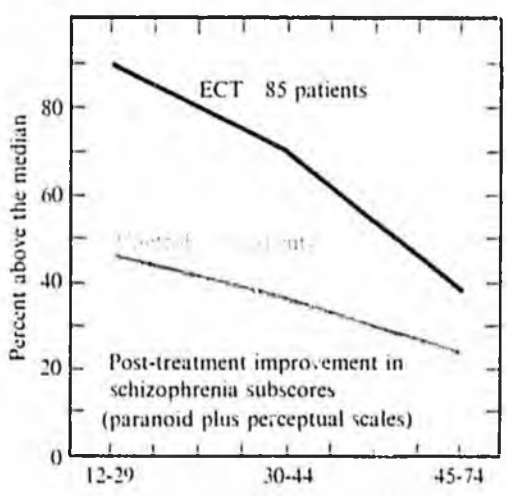

FIGURE 30-3.

in the patient's depressive subscales, as depression in and of itself is not intrinsic to the schizophrenic process and is often only reactive. By eliminating the depressive subscale, comparison of the two groups demonstrates the substantial benefit of ECT in the young schizophrenic and it demonstrates that this is not due to the alleviation of any accompanying depression, but rather to an alleviation of the schizophrenic process itself.

Without the use of the HOD test, this marked difference could not have been demonstrated as rating scales based on behavior showed no difference between the two groups. This study again supports the view that schizophrenia is both an inner experience and a perceptual disorder and not just abnormal behavior, arbitrarily labeled as schizophrenia.

In reporting the above data, a method was selected to by-pass rater bias and to demonstrate that behavioral rating scales would have been grossly misleading. Also, it was assumed for purposes of this study that the patients were in a worsening condition with a rising HOD score at the time of their admission to the hospital. In addition, all patients were on the same diet and all patients were seriously ill. This type of reporting of data is suitable for evaluation of the effectiveness of a treatment which has a rapid response. During a short-term hospital stay it would be impossible to evaluate the effects of other treatment measures such as the use of thyroid or megavitamins, which usually take a few months or even six months to a year to demonstrate results.

A follow-up study was conducted at the Brunswick Hospital during a two-year period to determine the effects of the continuance of megavitamins on the recovery rate (Hawkins et al., 1970). So that results of the study would be comparable to other follow-up studies reported in the literature, it was arbitrarily decided to use the rehospitalization rate as evidence of response, as that is the most frequently cited criterion. The pros and cons of utilization of rehospitalization rates have been well discussed over the years and will not be cited here except to say that in a practical way it represents the resultant of many factors, including social survival. The study included 140 patients who had been hospitalized because of severe schizophrenia, during which time the patients were hospitalized for an average length of 8 weeks. While in the hospital, all patients received phenothiazines, megavitamins, and adjunctive therapy. The diagnoses were confirmed by HOD testing and no cases were included in which there was doubt about the diagnosis. At the time of discharge from the hospital, megavitamins were discontinued in 85 patients. The remaining patients were subdivided into subgroups taking the megavitamins for periods of three months or for one year. Tabulation of the rates of rehospitalization (to any hospital) over the two-year period of study revealed that among the control group, in whom megavitamins were discontinued, 35 percent were rehospitalized. Of patients who continued on the megavitamins for three to six months, 25 percent were rehospitalized. The rehospitalization rate for the patients who stayed on megavitamins for one year

or more was 16 percent (9 of 57 patients). The χ^2 score value for this comparison is in excess of the 5.99 required for a significance at the 0.05 level, indicating a definite correlation between the continuation of the megavitamin therapy and a 50 percent lower readmission rate than for the patients in the control group.

CLINIC PRACTICE

In a clinic setting it is possible to follow large numbers of patients for a considerable length of time and also to observe subgroups in which schizophrenia is associated (for example, with alcoholism, drug abuse or homosexuality). In evaluating a new treatment method, several of the most common sources of evaluative error need to be eliminated—rater bias, placebo reaction, and positive transference "cures."

Placebo effect can be eliminated by studying patients who have had many trials over the years on multiple drugs without success and also by waiting for a year to pass before evaluating results. Rater bias can be bypassed by objective testing, such as the HOD test. Other objective data can also be used, such as achievement of sobriety by the alcoholic, discontinuance of drug abuse, cessation of homosexual activity, return to college, or whatever criteria are appropriate to the sample being studied.

Positive transference reactions can be eliminated by a variety of techniques which are also applicable to private practice. Using patients as their own controls is obviously the best. Looking for a difference in recovery rates between patients who have a positive transference and those who have a negative transference is another commonsense approach. In actual practice, treating large numbers of patients who are chronically ill and who have had a number of therapists and many different drugs eliminates most doubts, as it is obvious that if they were prone to placebo or transference cures they would not still be ill. There is really no answer to the question of spontaneous remissions except that in the comparison of large groups of patients over many years it can be assumed that the spontaneous remission rates in both groups will have equalized.

One criterion for the effectiveness of a medical regimen is the response of the patient when it is discontinued. Another way of ascertaining the specificity of a treatment modality is to determine the type of case or disease entity where it does not work. In schizophrenia, which is most likely a group of different biochemical illnesses, evaluation of drug studies requires clinical interpretation. As an example, if the effectiveness of a given antibiotic in treating pneumonia is reported in percentages, it can well be that of all pneumonias treated by a given drug, only 10 percent might respond. This might be taken to mean that the antibiotic is only 10 percent effective, and therefore hardly warrants marketing. The clinical fact may be, however, that the 10 percent represents a particular type of pneumonia for which the particular antibiotic is close to 100 percent effective and is in fact specific for that type of pneumonia but not for others. It would appear that in the psychiatric

literature similar conditions prevail. The importance of some of these factors was pointed out by Fritz Freyhan in his presidential address to the American Psychopathological Association. The influence of the double-blind study on the actual practice of clinical psychiatry has been curiously nil. Not a single treatment used in psychiatry was discovered by the use of the double-blind method, with one single exception—the first double-blind study done in psychiatry (actually it was a triple-blind study), devised by Hoffer and Osmond to study the effect of niacin in schizophrenia, and the results of this meticulous, long-term study were generally ignored for some years (see Chapter 10 by Osmond on the history of the niacin treatment).

In reporting data, then, the clinical researcher is confronted by a communications problem (Heston, 1970). We have found that the most useful style of reporting results to other clinicians is in terms of definite observations that include enough data about the circumstances to allow the results to be duplicated. To report the total clinical experience of treating 5,000 schizophrenic patients with a new treatment method involving a new conceptual framework over a five-year period presents sizeable difficulties. Because the setting itself influences treatment results, some general description of the situation in which a clinical experience takes place will be described.

The clinic itself is situated in a very informal setting, above a set of stores, and is innocuous and unforbidding in appearance. Each office is decorated differently so that a schizophrenic patient is unlikely to feel depersonalized or lost. The informality extends to the waiting room which lends itself to conversation and is friendly rather than institutional in style and atmosphere. It is not the kind of place where a patient is likely to feel like a number. Each patient and family becomes aware that specific arrangements are being made for them individually. Over the years, many of the families and clinic staff have had meetings under a variety of circumstances and have developed a certain community feeling and mutual concern. To some degree, the well-being of each patient then subsequently becomes part of the total community concern, so that if a given patient is not doing well there is an immediate feedback. This is a unique situation and although it exerts considerable pressure on the staff, it also results in a certain enthusiasm and a heightened therapeutic intention. There is an expectation that every patient is going to improve sooner or later, therefore any self-fulfilling prophecies that occur are likely to do so to the patient's benefit.

The patient most likely to respond to this overall treatment regimen has an elevated HOD score and a discernible perceptual dysfunction. These represent the majority of patients and most of these patients will have improved or recovered by the end of a year. The patients who fail to improve are, as stated previously, usually those in whom the onset was in early childhood, and they are further characterized by low HOD scores, primarily visual distortions, and the stilted postural attitudes indicative of an underlying proprioceptive disorder of long duration. This latter group constitutes the

minority of patients, and of them only about half will improve.[5] Also, they do not show the complete recovery which frequently occurs in the more favorable group. Even so, the improvement may be in areas which are extremely important to patient and family, so that limited improvement may still be of considerable importance. The following case is an example:

> A 30-year-old chronic schizophrenic patient was brought to the clinic after having had 15 years of continuous prior treatment, including six hospitalizations where she had a full course of insulin shock treatment plus a total of 125 electroshock treatments. The family indicated that this was to be the last trial of treatment before they would reluctantly have to accept permanent state hospital placement for the patient. The family reported that she was incontinent, refused to wear her false teeth, constantly rocked, and was uncommunicative. She therefore presented a considerable nursing problem for her parents.
>
> The patient was placed on an overall treatment regimen of hypoglycemic diet, megavitamins, phenothiazines, and thyroid. She responded very slowly, but by the end of two years her appearance was markedly improved, she used make-up, wore her teeth, spoke politely, had stopped rocking, and had long since been continent. The family was able to take her on social family visits, and could travel in public with her.
>
> This patient was far from recovered, however, in that her affect was flat, her behavior was still moderately inappropriate, and her overall style was awkward and somewhat stilted, but her family was extremely pleased. The treatment also had been based on bi-monthly and then tri-monthly visits, which were within the family's financial capacity.

The megavitamin approach is effective in other conditions associated with an elevated HOD score, such as alcoholism or post-psychedelic drug reactions. It is the most effective treatment for post-LSD "flashbacks" of the type reported by Horowitz (1969) and far more efficient than psychotherapy (Hoffer, 1972). It also is of benefit to some hyperkinetic children and also to some with learning disorders (Rossi, 1967; Green, 1970, 1971). There are many adolescent patients who present a clinical picture of pseudo-psychopathic behavior due to an underlying, unrecognized schizophrenia disorder, and in these patients the behavior improves on the overall megavitamin regimen.

We have not observed any benefit from megavitamins on convulsive disorders but the hypoglycemic diet has helped several. Megavitamins are also ineffective in manic-depressive or other psychoses. They are also ineffective in the psychoneuroses. (Many "neurotic" patients, however, are greatly helped by the hypoglycemic diet—especially depressed, anxious, phobic, fatigued, irritable, or hypochondriacal patients. In many of these, the diet eliminated the need for psychotherapy.) We have

---

[5] These results were confirmed by a research study conducted by the Institute for Child Behavior Research in which it was reported that 50 percent of the children responded to megavitamins (Rimland, 1970, 1972, and Chapter 24 of this book).

treated six patients with prior lobotomies and none of them responded to the treatment although their diagnosis was definitely that of schizophrenia.

The homosexual schizophrenic patient responds quite favorably, and by the end of the first year of treatment the majority report the disappearance of the supposed homosexuality. In these cases, no discussion of the homosexual pattern was entered into during the entire year and the recoveries from these patterns were reported spontaneously. It would seem that the perceptual disorganization impairs the self-image, including sexual identity. This was accompanied in these patients by regression and the development of pseudo-homosexuality, as has been described by Ovesey (1954, 1955a, 1955b). This was most likely to occur with male schizophrenics. Several female schizophrenic patients who were also alcoholic continued a homosexual life style despite abatement of the schizophrenic process.

Postpartum psychotic episodes were completely eliminated in our schizophrenic patients with this treatment method. By prophylactically increasing doses of medications immediately following delivery, this complication was prevented, which was in marked contrast to clinical experience of years past. On the other hand, several patients who had previously recovered and then stopped all medication became pregnant and did have postpartum relapses.

Therapeutic results do not depend on a positive transference. Its presence, however, is helpful, not so much to the eventual outcome as to the ease of clinical management of the case. We have treated a number of patients via family members and also by mail with results equal to those for patients seen in the clinic. The following case is an example:

> A 44-year-old man with chronic paranoid schizophrenia of 10-years duration had been given up as hopeless after many years of treatment. The family kept him home in an upstairs room where his condition was disturbed and dishevelled. He screamed obscenities at his hallucinatory enemies, refused to change clothes, refused to take any medication, and exhibited no interest in external events. The family came to the clinic, learned of the megavitamin treatment and worked out a combination of vitamins titrated with bicarbonate of soda and flavored with chicory, which was then placed surreptitiously in all of his beverages.
>
> After a few months he began to respond and improve, and at that point a small dose of thioridazine in liquid form was added to his formula. By the end of the year he had become a clothes dandy, carried on a normal conversation, was no longer hallucinating, was calm, read a daily paper, watched television, and answered the telephone. Two years later he continues to do well and is planning to live on his own, which has created apprehension with the family, as they are still reluctant to inform him of their secret treatment. When they finally tried to persuade him to take megavitamins he said he didn't think he needed them as he had been doing pretty well on his own for the last few years!

Getting patients to take the medication and stay on it is seldom a problem, especially after they have had an opportunity to experience subjective improvement.

A few patients who have recovered will feel so well that they will experiment with discontinuance of the therapeutic regimen and promptly relapse. One reason this occurs is that in altered states of consciousness there is difficulty in remembering what one has learned in another state of consciousness. This has also been demonstrated experimentally in animals and is a common clinical observation. This phenomenon does not appear to be attributable to the mechanism of denial, although that, too, may at times play a role. Recovery from relapses unfortunately is usually slower and more difficult than was the original recovery. This is more true in children than adults, however, and has been reported also by Cott (1969).

As patients recover, certain questions tend to recur. Many of these relate to the ability to concentrate and the question of when to return to college or work. Initially, when the patient's HOD score is high, his ability to concentrate is markedly impaired, and we usually ask patients if they are able to follow a story on television. When the HOD score is close to 100 this is usually not possible, but as the patients recover they will report that they are now able to follow the story, so this is a favorable indicator. It is usually some months and, in many cases, close to the end of the first year of treatment, before concentration returns to the point that the patient is able to remember what he has read, and we advise him not to return to college until this capacity has returned. We recommend that the patient take 6 credits the first semester and if that goes well, that he take 12 credits the following semester and then 15 credits thereafter. Allowing patients to return to school prematurely invites failure and discouragement.

Return to work, on the other hand, is quite different and this may occur almost immediately or as soon as the patient feels "up to it." It is a common observation then that the patient is capable of returning to work sometimes the very day following discharge from the hospital and yet he is unable to take evening college courses for a [illegible] year.

As has been pointed out previously, we avoid i[illegible]ing the patient's personal privacy when his HOD score is elevated and interpersonal contact is painful. This saves a great deal of reparative work later which would otherwise become necessary to undo the deleterious effects of such intrusions. Where the patient has already had this unfortunate prior experience, some reparative therapy to the patient's damaged self-esteem may become necessary as he recovers. A patient's resentment over having had this experience forced upon him in the past can be amazingly severe.

Lastly, it is on the administrative level that the effect of the orthomolecular treatment approach first becomes most strikingly apparent. There is an almost immediate disappearance of waiting lists. There is a marked reduction of diagnostic testing costs and time. There is a progressive increase in the case load within the same budget and manpower limitations, and there is an overall improvement in treatment results which is expressed in a very positive feedback. The level of functioning in group therapy with schizophrenic patients increases noticeably to a higher level and the

percentage of patients who are capable of such interaction also increases greatly. The preoccupation is no longer with "keeping the patient out of the hospital" but rises to the level of counselling him about the advisability of seeking a better job at this time, or on the timing of an impending marriage.

Another response noticeable to administration is that sizeable numbers of patients who were on welfare at the time they began treatment will be off welfare by the end of a year, since their social disablement stemmed from a previously undiagnosed perceptual disorder.

GROUP AND HALFWAY HOUSE EXPERIENCE

All of the Schizophrenics Anonymous groups that did not use the orthomolecular-megavitamin approach soon failed and all the groups that were successful had taken the orthomolecular approach. In Alcoholics Anonymous, many members were unable to stay sober until they were placed on a sugar-free diet with megavitamins. In 1972, an estimated 20,000 to 25,000 alcoholics were taking megavitamins.

This approach is an integral part of the therapeutic regimen in many alcoholic rest homes. Of these, the most comprehensive and intensive therapeutic regimen is the one in use at Guest House, Lake Orion, Michigan, for alcoholic priests. In their experience, high-dosage megavitamins and hypoglycemic diets are critically essential in the recovery of a sizeable percentage of their alcoholics. It is notable that they achieve an overall recovery rate of 80 percent (Ripley, 1969, personal commun.).

A more elaborate study by Smith (1971) included 4,243 alcoholics. Of these, a group of 507 patients had been carefully followed for five years. All were long-time-treatment failures, and 400 of the 507 cases had been sober for two years and more, which is quite remarkable considering the severity of their condition. A formal cross-over double-blind study of two sanitarium groups will be completed in 1972. A full report of 3,673 patients will also be forthcoming. In this study, it can already be reported that niacin was superior in effectiveness to niacinamide.

Similar positive results were reported by Hawkins (1967) in the first group of clinic patients treated with this method. In that group there were 53 alcoholic-schizophrenic patients. By the end of a year, 41 patients were active in AA and 36 had achieved sobriety.

When the HOD test was given to residents at a halfway house for soft drug users (Kinsman Hall, New York), almost two-thirds were found to have abnormally elevated scores and they were unresponsive to the intensive therapy until placed on megavitamins (Palmer, 1970; Hepper, 1970, personal commun.). The experience of this halfway house could be expected from the work already done on the use of the HOD test with psychedelic-drug users by the LSD Rescue Service which is in operation in major cities throughout the United States (Peters, 1971, personal commun.).

The LSD Rescue Service has for years relied primarily on giving megavitamin doses and on attempting to raise blood sugar level to counteract adverse psychedelic drug reactions. It is notable that they have discovered that high doses of thiamine hydrochloride have been found to be beneficial in reducing the craving and return to the use of methedrine (speed).

The use of niacin and niacinamide in ameliorating LSD reactions is well known among the more knowledgeable members of the drug subculture and has been reported widely in the underground newspapers. *The Hippy's Handbook* (Bronsteen, 1967) details this use under "Rx for a Bad Trip" and also has this to say about psychiatry, "Without one single exception, every hippy interviewed had, at one point, gone to a therapist—in every single case the experience was negative . . . modern psychiatry is out of touch with young people. . . ." The "Practical Advice" section of Abbie Hoffman's *Revolution for the Hell of It* (1968) includes similar advice to avoid the psychiatric establishment and to use niacin or niacinamide for "freak-outs." The use of megavitamins for the "drug wipeout" is described in the Do It Now Foundation's *Conscientious Guide to Drug Abuse* (Pawlick, 1971).

The evidence then for the effectiveness of the combination of megavitamins and hypoglycemic diets in correcting perceptual disorders, whether they are associated with outright schizophrenia, alcoholism, or drug use, is derived from widespread experience in a variety of patient population groups and settings.

We can compare the results of this treatment with statistics as given by authorities in the field of schizophrenia. For instance, the Chief of the Center for Studies of Schizophrenia for the National Institute of Mental Health, Dr. Lorin Mosher, indicates that only 30 percent of the patients who develop schizophrenia are able to return to work, and according to Caffey et al. (1970) only 15 percent of patients who had been hospitalized for any appreciable length of time ever function in a completely normal way thereafter. Statistics from the New York State Department of Mental Hygiene indicate that 55 percent of patients hospitalized for schizophrenia are readmissions and in this percentage are many patients with multiple rehospitalizations. As compared to these overall large-scale statistical guidelines, it would appear beyond any doubt that the orthomolecular psychiatric approach offers substantial and valid hope to patients and family. As the number of patients increases, the development of an integrated community system for the treatment of schizophrenia evolves to meet the growing needs of the patient population. The strength of the system, however, relies entirely on demonstrable results.

SUMMARY

Following the diagnostic process, the patient is given the results of the tests and the diagnosis, along with an explanation of his illness based on the orthomolecular

medical model and the significance of his perceptual disorder. The patient is then placed on a medical regimen consisting of a hypoglycemic diet, prescribed rest and exercise, phenothiazines, and other ancillary medications and megavitamins. The importance of detecting and treating functional, relative, or absolute hypoglycemia is stressed.

While the HOD score is elevated, psychotherapeutic intervention is kept to an absolute minimum. Those problems that still remain after the HOD score has returned to normal may be dealt with by psychotherapy if the patient is so motivated. Recovery is facilitated by the use of ancillary measures such as SA, group therapy, family therapy, AA, halfway houses, or specialized drug groups. Case histories and vignettes are used to explain and illustrate many of these principles. Evidence is reviewed to corroborate the experience that psychodynamically oriented psychotherapy does not influence the basic disease process itself to any statistically demonstrable degree.

The patient group most responsive to the orthomolecular approach is identified by an elevated HOD score, which demonstrates perceptual dysfunction. The majority of these patients recover by the end of the first year, re-enter life's activities during the second year, and in the third year are able to function on a higher level than they were before they became ill. We have not seen this response with any other treatment method.

The general problems inherent in evaluating the results of treatment in schizophrenia have been briefly surveyed and an attempt made to report a huge mass of data in terms which are useful to the clinician.

The orthomolecular approach is very practical. There is a high degree of acceptability and it is suitable for a wide range of applications in a variety of settings such as private practice, hospital, clinic, halfway house, and a diversity of groups. Because patient visits are widely spaced, there is a great saving in cost, not only to the patient, but also to the institution. With proper safeguards, there is an ample safety factor. Medical contraindications to the use of certain vitamins in high dosage are enumerated and toxicity is reviewed. The positive safety and cost factors are augmented by the establishment of a specialized laboratory.

We have described the effectiveness of this overall treatment approach with several thousand patients over a five-year period. Its evaluation in private practice has been with an emphasis upon using the patient himself as the ideal control, and we have also discussed how this overall system is used in hospital practice. We included the results of a study utilizing group improvements in HOD scores to demonstrate the effectiveness of ECT. This study demonstrated the defect of behavioral rating scales and the marked effectiveness of ECT in amelioration of the schizophrenic process especially in the younger patient. The results of a two-year follow-up study to evaluate the effect of continuance of megavitamins on the relapse rate have been reported. Using the rehospitalization rate as the criteria of effectiveness, the control group had twice the relapse rate of the megavitamin group.

The patients most likely to respond to this treatment have elevated HOD scores associated with schizophrenia, or schizophrenia plus homosexuality, psychedelic drug abuse, or alchoholism. Although each requires different handling, the overall results are promising and the degree of positive response in the majority of cases was responsible for the development of an integrated community system for the treatment of schizophrenia. The system is related to a variety of other treatment settings where a large body of positive results with this approach have been reported over the years.

The overall results from such a wide range of clinical experience correlates with both theoretical formulations and laboratory research to establish a broad foundation for the concept of orthomolecular psychiatry.

Hospital's liability for injury or death to patient resulting from or connected with administration of anesthetic. 31 ALR3d 1114.

Liability of hospital for refusal to admit or treat patient. 35 ALR3d 841.

Attending physician's liability for injury caused by equipment furnished by hospital. 35 ALR3d 1068.

Hospital's liability to patient injured going to or using bathroom or toilet facilities. 36 ALR3d 1235.

Liability for negligence in diagnosing or treating aspirin poisoning. 36 ALR3d 1358.

Liability of one releasing institutionalized mental patient for harm he causes. 38 ALR3d 699.

Medical malpractice in connection with diagnosis, care, or treatment of diabetes. 42 ALR3d 482.

Hospital's liability for injury allegedly caused by improper diet or feeding of patient. 42 ALR3d 736.

Liability for injury allegedly resulting from negligence in making hypodermic injection. 45 ALR3d 731.

Liability for injury or death from blood transfusion. 45 ALR3d 1364.

Liability of hospital for injury caused through assault by a patient. 48 ALR3d 1288.

Hospital's liability to patient for injury allegedly sustained from absence of particular equipment used in diagnosis or treatment of patient. 50 ALR3d 1141.

Hospital's liability for negligence in selection or appointment of staff physician or surgeon. 51 ALR3d 981.

Liability for injuries or death resulting from physical therapy. 53 ALR3d 1250.

Liability of hospital, or medical practitioner, under doctrine of strict liability in tort, or breach of warranty, for harm caused by drug, medical instrument, or similar device used in treating patients. 54 ALR3d 258.

Liability of physician or hospital in the performance of cosmetic surgery upon the face. 54 ALR3d 1255.

Liability of hospital, other than mental institution, for suicide of patient. 60 ALR3d 880.

Validity and construction of contract between hospital and physician providing for exclusive medical services. 74 ALR3d 1268.

Tort liability of physician or hospital in connection with organ or tissue transplant procedures. 76 ALR3d 890.

Recovery for mental or emotional distress resulting from injury to, or death of, member of plaintiff's family arising from physician's or hospital's wrongful conduct. 77 ALR3d 447.

Malpractice in connection with diagnosis of cancer. 79 ALR3d 915.

Patient tort liability of rest, convalescent, or nursing homes. 83 ALR3d 871.

Arbitration of medical malpractice claim. 84 ALR3d 375.

Malpractice in connection with electroshock treatment. 94 ALR3d 317.

Application of rule of strict liability in tort to person or entity rendering medical services. 100 ALR3d 1205.

Sec. 18.20.020. License required. No person or government unit, except the federal government, acting severally or jointly with another person or governmental unit may establish, conduct or maintain a hospital in the state without a license. (§ 40-6-3 ACLA 1949; am § 3 ch 112 SLA 1957)

Cross references. — As to requirement for certificate of need to construct or alter a health care facility, see AS 18.07.011 — 18.07.111.

Opinions of attorney general. — A nursing home is considered a hospital for the purpose of the licensing provisions. 1963 Op. Att'y Gen., No. 7.

If a person establishes a hospital which gives general and medical treatment and in addition provides nursing service, both aspects of hospital operation are nonetheless within the same hospital, and there is no justification for breaking up the operations of one hospital into separable units for licensing purposes; therefore, one license should be required for the entire hospital operation. 1963 Op. Att'y Gen., No. 7.

Collateral references. — Licensing and regulation of nursing or rest homes. 97 ALR2d 1187.

Sec. 18.20.030. Application and fees. Application for a license shall be made to the department upon a form provided by it, and shall contain the information the department requires, which may include affirmative evidence of ability to comply with the reasonable standards, rules and regulations prescribed under AS 18.20.060 — 18.20.080. Each application for a license shall be accompanied by a license fee of $10. The department shall deposit all fees received in the state treasury. (§ 40-6-4 ACLA 1949)

Sec. 18.20.040. Issuance and renewal of license and posting. Upon receipt of an application for license and the license fee, the department shall issue a license if the applicant meets the requirements established under AS 18.20.060 — 18.20.080. If the applicant does not meet the requirements established under AS 18.20.060 — 18.20.080 but makes continued efforts to comply with them, the department may grant him a temporary or provisional license for a reasonable period of time. A license, unless suspended or revoked, is renewable annually without charge upon filing by the licensee, and approval by the department of an annual report on the uniform date and containing the information in the form the department prescribes by regulation. Each license issued is for the premises and person or governmental unit named in the application and is not transferable or assignable except with the written approval of the department. Licenses shall be posted in a conspicuous place on the licensed premises. (§ 40-6-5 ACLA 1949; am § 4 ch 112 SLA 1957)

Sec. 18.20.045. Insurance required.

Repealed by § 40 ch 177 SLA 1978.

Editor's notes. — The repealed section derived from § 39, ch. 102, SLA 1976.

As to purpose of repealing act, see § 1, ch. 177, SLA 1978 in the 1978 Temporary and Special Acts and Resolves.

Sec. 18.20.050. Denial, suspension or revocation of license. The department may deny, suspend or revoke a license in a case in which it finds that there has been a substantial failure to comply with the requirements established under AS 18.20.060 — 18.20.080. (§ 40-6-6 ACLA 1949)

Sec. 18.20.060. Regulations and standards. The department shall adopt, amend, and enforce rules, regulations and standards for all hospitals designed to further the accomplishment of the purposes of AS 18.20.010 — 18.20.130 in promoting safe and adequate treatment of individuals in hospitals in the interest of public health, safety and welfare. (§ 40-6-7 ACLA 1949)

Sec. 18.20.070. Compliance with regulations. Each hospital in operation at the time the department adopts rules and regulations or

Council under § 1524(c)(2)(A) of P.L. 93-641 and only after consideration of comment and advice of the Advisory Board on Alcoholism. In awarding grants, the department shall further consider the amount of money that is available for all applications and whether an application would contribute to the wise development of a comprehensive program of alcoholic rehabilitation and prevention.

(c) Grants shall be awarded in a ratio of 90 percent state money to 10 percent community money for the costs of providing staff and limited improvement, renovation or new construction of facilities for alcoholic detoxification, rehabilitation or "half-way house" care. The department may waive all or part of the requirement that state money be matched by community money if the department finds that community money is unavailable and waiver of the requirement is in the best interests of the state. No grant for improving, renovating or constructing may exceed $50,000 except when there is a lack of applicants for available money and then only with the approval of the Review Board on Alcoholism. The department is not required to award all money available under this program, or the full percentages specified in this subsection, when another source of money is available or could reasonably be made available to the applicant.

(d) Money used by the applicant to qualify for state money may be from any source other than the state. The cost of developing an application is not reimbursable from the grant. The value of real property to be used directly in conjunction with the grant may be used in calculating the required amount of community money, as allowed by regulations of the department.

(e) No grant may be awarded under this section unless the application includes a plan which provides for

(1) the expenditure of grant money for education and other preventative measures, or the treatment of alcoholics;

(2) the reception of advice and comment from a local advisory board, or, if a local advisory board cannot be formed because the area is sparsely populated, from the governing bodies of private nonprofit health organizations, regarding the design, implementation, and evaluation of the plan and action to be taken;

(3) goals, expressed in quantifiable terms that express the intended impact of the assistance provided under the plan upon the number of individuals needing or utilizing such assistance;

(4) coordination with the goals and objectives of the health systems plan developed by the health systems agencies under § 1513(b)(2) of P.L. 93-641.

(f) The department shall monitor the implementation of the plan required under (e) of this section, and shall terminate payment of grant money if the plan is not implemented or approval of the program as a public or private treatment program under AS 47.37.110 is not granted within one year of the award of the grant, or is suspended, revoked,

limited or restricted. Modification of the plan required by (e) of this section must be approved by the department before implementation of the modification.

(g) The department shall provide management training for persons administering a program receiving grant money under this section.

(h) If the department determines, after the award of a grant under (c) of this section, that the community is capable of bearing a greater portion of the cost of a program than originally determined, the department may

(1) reduce the award by that portion of the cost of a program which the department subsequently determined the community could bear; or

(2) terminate payment of the grant entirely. (§ 2 ch 101 SLA 1970; am § 1 ch 126 SLA 1975; am §§ 1, 2 ch 116 SLA 1978; am § 33 ch 168 SLA 1978; am § 1 ch 150 SLA 1980)

Effect of amendments. — The 1980 amendment substituted "90" for "75", and "10" for "25", deleted "except that in communities designated as poverty areas the ratio shall be 80 percent state money to 10 percent community money" following "community money" near the beginning of subsection (c), inserted the second sentence of subsection (e), and substituted "Review" for "Advisory" near the end of the third sentence of subsection (c).

Article 6. Mental Health Program.

Section
655. Purpose
660. Powers and duties of department

Sec. 47.30.655. Purpose. The purpose of this major revision of Alaska civil commitment statutes (AS 47.30.660 — 47.30.915) is to more adequately protect the legal rights of persons suffering from mental illness. The legislature has attempted to balance the individual's constitutional right to physical liberty and the state's interest in (1) protecting society from persons who are dangerous to others; and (2) protecting persons who are dangerous to themselves, by providing due process safeguards at all stages of commitment proceedings. In addition, the following principles of modern mental health care have guided this revision:

(1) that persons be given every opportunity to accept voluntary treatment before involvement with the judicial system;

(2) that persons be treated in the least restrictive alternative environment consistent with their treatment needs;

(3) that treatment occur as promptly as possible and as close to the individual's home as possible;

(4) that a system of mental health community facilities and supports be available;

(5) that patients be informed of their legal rights and be informed of and allowed to participate in their treatment program as much as possible;

(6) that persons who are mentally ill but not dangerous to others be committed only if there is a reasonable expectation of improving their mental condition. (§ 1 ch 84 SLA 1981)

Editor's notes. — The parenthetical expression in the first sentence was added by the revisor of statutes pursuant to AS 01.05.031.

Sec. 47.30.660. Powers and duties of department. The department is the mental health authority of the state and shall

(1) administer a comprehensive program for the prevention of mental illness and the care and treatment of the mentally ill, including inpatient and outpatient care and treatment and the procurement of services of specialists or other persons on a contractual or other basis;

(2) take the actions and undertake the obligations which are necessary to participate in federal grants-in-aid programs and accept federal or other financial aid from whatever sources for the study, examination, care, and treatment of the mentally ill;

(3) administer AS 47.30.660 — 47.30.915;

(4) designate, operate, and maintain treatment facilities equipped and qualified to provide inpatient and outpatient care and treatment for the mentally ill;

(5) provide for the placement of mentally ill patients in designated treatment facilities;

(6) enter into arrangements with governmental agencies for the care or treatment of the mentally ill in facilities of the governmental agencies in the state or in another state;

(7) enter into contracts with treatment facilities for the custody and care or treatment of the mentally ill;

(8) enter into contracts which incorporate safeguards consistent with AS 47.30.660 — 47.30.915 and the preservation of the civil rights of the patients with another state for the custody and care or treatment of patients previously committed from this state under 48 U.S.C., sec. 46 et seq., and P.L. 830, 84th Congress, 2nd Session, 70 Stat. 709;

(9) prescribe the form of applications, records, reports, requests for release, and consents to medical or psychological treatment required by AS 47.30.660 — 47.30.915;

(10) require reports from the head of a treatment facility concerning the care of patients;

(11) visit each treatment facility at least annually to review methods of care or treatment for patients;

(12) investigate complaints made by a patient or an interested party on behalf of a patient,

(13) delegate upon mutual agreement to another officer or agency of it, or a political subdivision of the state, or a treatment facility designated, any of the duties and powers imposed upon it by AS 47.30.660 — 47.30.915; and

(14) adopt regulations to implement the provisions of AS 47.30.660 — 47.30.915. (§ 1 ch 84 SLA 1981)

Editor's notes. — Section 6, ch 84, SLA 1981, provided: "Except as provided in this Act, the provisions of AS 47.30.660 — 47.30.915 enacted by sec. 1 of this Act do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1981, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1981. However, 90 days after October 1, 1981, the provisions of this Act apply to all persons committed under statutes in effect before October 1, 1981."

Article 7. Voluntary Admission for Treatment.

Section		Section	
670	Standards for voluntary admission	690	Admission of minors under 14 years of age
675	Notice of rights	695	Notice of request for release of minors under 14 years of age from detention and commitment
680	Discharge of voluntary patients		
685	Notice of intent to leave facility; commitment		

Editor's notes. — Section 6, ch 84, SLA 1981, provided: "Except as provided in this Act, the provisions of AS 47.30.660 — 47.30.915 enacted by sec. 1 of this Act do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1981, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1981. However, 90 days after October 1, 1981, the provisions of this Act apply to all persons committed under statutes in effect before October 1, 1981."

Sec. 47.30.670. Standards for voluntary admission. A person 14 years of age or older may be voluntarily admitted to a treatment facility if he is suffering from mental illness and he voluntarily signs the admission papers. (§ 1 ch 84 SLA 1981)

Sec. 47.30.675. Notice of rights. (a) Upon the application of a person for voluntary admission, or at the time a person admitted under AS 47.30.690 reaches the age of 14, he shall be given a copy of the following documents which shall be explained to him as necessary:

(1) notice of rights as set out in AS 47.30.825 — 47.30.895 and an explanation of any document served upon him; and

(2) notice that should he desire to leave at a time when the treatment facility determines that he is mentally ill and as a result is likely to cause serious harm to himself or others or is gravely disabled the facility would initiate commitment proceedings against him.

(b) If an applicant for voluntary admission does not understand English, the explanation shall be given in a language he understands. (§ 1 ch 84 SLA 1981)

Sec. 47.30.680. Discharge of voluntary patients. A patient who no longer meets the standards established in AS 47.30.670 shall be discharged from the treatment facility. (§ 1 ch 84 SLA 1981)

Sec. 47.30.685. Notice of intent to leave facility; commitment. A voluntary patient who is 14 years of age or older and who desires to leave a treatment facility must submit to the facility a written notice of intent to leave on a form provided to him by the facility. Upon immediate investigation, the patient shall be evaluated in writing and discharged immediately or given written notice that involuntary commitment proceedings will be initiated against him. The treatment facility may detain the patient for no more than 48 hours after receipt of the patient's notice of intent to leave in order to initiate involuntary commitment proceedings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.690. Admission of minors under 14 years of age. (a) A minor under the age of 14 may be admitted for 21 days evaluation, diagnosis, and treatment at a designated treatment facility if his parent or guardian signs the admission papers and if, in the opinion of the professional person in charge,

(1) he is gravely disabled or is suffering from mental illness and as a result he is likely to cause serious harm to himself or others;

(2) there is no less restrictive alternative available for his treatment; and

(3) there is reason to believe that the patient's mental condition could be improved by the course of treatment.

(b) The minor may be released by the treatment facility at any time during the 21 day period if the professional person in charge or his designated mental health professional determines the minor would no longer benefit from continued hospitalization and the minor is not dangerous. The minor's parents or his guardian must be notified by the facility of the contemplated release and that, unless they initiate involuntary commitment proceedings, the minor will be released. (§ 1 ch 84 SLA 1981)

Sec. 47.30.695. Notice of request for release of minors under 14 years of age from detention and commitment. The parent or guardian of a minor who is less than 14 years of age may request and obtain immediate release of the minor at any time, unless as the result of mental illness, the minor is likely to cause serious harm to himself or others. (§ 1 ch 84 SLA 1981)

---

Editor's notes. Section 6, ch 84, SLA 1981, provided "Except as provided in this Act, the provisions of AS 47.30.660 — 47.30.815 enacted by sec. 1 of this Act do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1981, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1981. However, 90 days after October 1, 1981, the provisions of this Act apply to all persons committed under statutes in effect before October 1, 1981."

Sec. 47.30.700. Initiation of involuntary commitment procedures. (a) Upon petition of any adult, a judge shall immediately conduct a screening investigation or direct a local mental health professional employed by the department or by a local mental health program that receives money from the department under AS 47.30.520 — 47.30.620 or another mental health professional designated by the judge, to conduct a screening investigation of the person alleged to be mentally ill and, as a result of that condition, alleged to be gravely disabled or to present a likelihood of serious harm to himself or others. Within 48 hours after the completion of the screening investigation, a judge may issue an ex parte order orally or in writing, stating that there is probable cause to believe the respondent is mentally ill and that condition causes the respondent to be gravely disabled or to present a likelihood of serious harm to himself or others. The court shall provide findings on which the conclusion is based, appoint an attorney to represent the respondent, and may direct that a peace officer take the respondent into custody and deliver him to the nearest appropriate facility for emergency examination or treatment. The ex parte order shall be provided to the respondent and made a part of the respondent's clinical record. The court shall confirm an oral order in writing within 24 hours after it is issued.

(b) The petition required in (a) of this section shall allege that the respondent is reasonably believed to present a likelihood of serious harm to himself or others or is gravely disabled as a result of mental illness and shall specify the factual information on which that belief is based including the names and addresses of all persons known to the petitioner who have knowledge of those facts through personal observation. (§ 1 ch 84 SLA 1981)

Sec. 47.30.705. Emergency detention for evaluation. A peace officer who has probable cause to believe that a person is gravely disabled or is suffering from mental illness and is likely to cause serious harm to himself or others of such immediate nature that considerations of safety do not allow initiation of involuntary commitment procedures set out in AS 47.30.700, may cause the person to be taken into custody and delivered to the nearest evaluation facility. A correctional facility may be used as an emergency evaluation facility if an evaluation facility is not available. Upon arrival at the evaluation facility, the peace officer shall complete an application for examination of the person in custody and be interviewed by a mental health professional at the facility. (§ 1 ch 84 SLA 1981)

Sec. 47.30.710. Examination. (a) A respondent who is delivered under AS 47.30.700 to 47.30.705 for emergency examination and treatment to an evaluation facility shall be examined and evaluated as to his mental and physical condition by a mental health professional and by a physician within 24 hours after arrival at the facility.

(b) If the mental health professional who performs the emergency examination has reason to believe that the respondent is (1) mentally ill and that condition causes the respondent to be gravely disabled or to present a likelihood of serious harm to himself or others, and (2) is in need of care or treatment, the mental health professional may hospitalize him, or arrange for hospitalization, on an emergency basis. If a judicial order has not been obtained under AS 47.30.700, the mental health professional shall apply for an ex parte order authorizing hospitalization for evaluation. (§ 1 ch 84 SLA 1981)

Editor's notes. — The word "respondent" was substituted for the word "person" in the first sentence of subsection (b) by the revisor of statutes pursuant to AS 01.05.031.

Sec. 47.30.715. Acceptance of order. When a facility receives a proper order for evaluation, it must accept the order and the respondent for an evaluation period not to exceed 72 hours. The facility shall promptly notify the court of the date and time of the respondent's arrival. The court shall set a date, time and place for a 21-day commitment hearing, to be held if needed within 72 hours after the respondent's arrival, and the court shall notify the facility, the respondent, his attorney, and the prosecuting attorney of the hearing;

arrangements. Evaluation personnel, when used, shall similarly notify the court of the date and time when they first met with the respondent. (§ 1 ch 84 SLA 1981)

Sec. 47.30.720. Release before expiration of 72-hour period. If at any time in the course of the 72-hour period the mental health professionals conducting the evaluation determine that the respondent does not meet the standards for commitment specified in AS 47.30.700, the respondent shall be discharged from the facility or the place of evaluation by evaluation personnel and the petitioner and the court so notified. (§ 1 ch 84 SLA 1981)

Sec. 47.30.725. Commitment proceeding rights; notification. (a) When a respondent is detained for evaluation under AS 47.30.660 — 47.30.915, he shall be immediately notified orally and in writing of his rights under this section. Notification shall be in a language understood by the respondent. His guardian, if any, and if the respondent requests, an adult designated by the respondent, shall also be notified of the respondent's rights under this section.

(b) Unless a respondent is released or voluntarily admits himself for treatment within 72 hours of his arrival at the facility or, if he is evaluated by evaluation personnel, within 72 hours from the beginning of his meeting with evaluation personnel, he is entitled to a court hearing to be set for not later than the end of that 72-hour period to determine whether there is cause to detain him after the 72 hours have expired for up to an additional 21 days on the grounds that he is gravely disabled or mentally ill and as a result presents a likelihood of serious harm to himself or others. The facility or evaluation personnel shall give notice to the court of the releases and voluntary admissions under AS 47.30.700 — 47.30.820.

(c) The respondent has a right to communicate immediately, at the department's expense, with his guardian, if any, or an adult designated by the respondent and the attorney designated in the ex parte order, or an attorney of the respondent's choice.

(d) The respondent has the right to be represented by an attorney, to present evidence, and to cross-examine witnesses who testify against him at the hearing.

(e) The respondent has the right to be free of the effects of medication and other forms of treatment to the maximum extent possible before the 21-day commitment hearing; however, the facility or evaluation personnel may treat him with medication under prescription by a licensed physician or by a less restrictive alternative of his preference if, in the opinion of a licensed physician in the case of medication, or of a mental health professional in the case of alternative treatment, the treatment is necessary to

(1) prevent bodily harm to the respondent or others;

(2) prevent such deterioration of the respondent's mental condition that subsequent treatment might not enable him to recover; or

(3) allow the respondent to prepare for and participate in the proceedings.

(f) A respondent, if he is represented by counsel, may waive, orally or in writing, the 72-hour time limit on the 21-day commitment hearing and have the hearing set for a date no more than seven calendar days after his arrival at the facility. The respondent's counsel shall immediately notify the court of the waiver. (§ 1 ch 84 SLA 1981)

Sec. 47.30.730. Procedure for 21-day commitment; petition for commitment. (a) In the course of the 72-hour evaluation period, a petition for commitment to a treatment facility may be filed in court. The petition must be signed by two mental health professionals who have examined the respondent, one of whom is a physician. The petition must

(1) allege that the respondent is mentally ill and as a result is likely to cause harm to himself or others or is gravely disabled;

(2) allege that the evaluation staff has considered but has not found that there are any less restrictive alternatives available that would adequately protect the respondent or others; or, if a less restrictive involuntary form of treatment is sought, specify the treatment and the basis for supporting it;

(3) allege with respect to a gravely disabled respondent that there is reason to believe that the respondent's mental condition could be improved by the course of treatment sought;

(4) allege that a specified treatment facility or less restrictive alternative that is appropriate to the respondent's condition has agreed to accept the respondent;

(5) allege that the respondent has been advised of the need for, but has not accepted, voluntary treatment, and request that the court commit the respondent to the specified treatment facility or less restrictive alternative for a period not to exceed 21 days;

(6) list the prospective witnesses who will testify in support of commitment or involuntary treatment;

(7) list the facts and specific behavior of the respondent supporting the allegation in (1) of this subsection.

(b) A copy of the petition shall be served on the respondent, his attorney, and his guardian, if any, before the 21-day commitment hearing. (§ 1 ch 84 SLA 1981)

Sec. 47.30.735. 21-day commitment. (a) Upon receipt of a proper petition for commitment, the court shall hold a hearing at the date and time previously specified according to procedures set out in AS 47.30.715.

(b) The hearing shall be conducted in a physical setting least likely to have a harmful effect on the mental or physical health of the

respondent, within practical limits. At the hearing, in addition to other rights specified in AS 47.30.660 — 47.30.915, the respondent has the right

(1) to be present at the hearing; this right may be waived only with the respondent's informed consent; if the respondent is incapable of giving informed consent, the respondent may be excluded from the hearing only if the court, after hearing, finds that the incapacity exists and that there is a substantial likelihood that the respondent's presence at the hearing would be severely injurious to his mental or physical health;

(2) to view and copy all petitions and reports in the court file of his case;

(3) to have the hearing open or closed to the public as he elects;

(4) to be proceeded against according to the rules of evidence applicable to civil proceedings;

(5) to have an interpreter if he does not understand English;

(6) to present evidence on his behalf;

(7) to cross-examine witnesses who testify against him;

(8) to remain silent.

(c) At the conclusion of the hearing the court may commit the respondent to a treatment facility for not more than 21 days if it finds, by clear and convincing evidence, that the respondent is mentally ill and as a result is likely to cause harm to himself or others or is gravely disabled.

(d) If the court finds that there is a viable less restrictive alternative available and that the respondent has been advised of and refused voluntary treatment through the alternative, the court may order the less restrictive alternative treatment for not more than 21 days if the program accepts the respondent.

(e) The court shall specifically state to the respondent, and give him written notice, that if commitment or other involuntary treatment beyond the 21 days is to be sought, the respondent shall have the right to a full hearing or jury trial. (§ 1 ch 84 SLA 1981)

Sec. 47.30.740. Procedure for 90-day commitment following 21-day commitment. (a) At any time during the respondent's 21-day commitment, the professional person in charge, or his professional designee, may file with the court a petition for a 90-day commitment of that respondent. The petition must include all material required under AS 47.30.730(a) except that references to "21 days" shall be read as "90 days"; and

(1) allege that the respondent has attempted to inflict or has inflicted serious bodily harm upon himself or another since his acceptance for evaluation, or that he was committed initially as a result of conduct in which he attempted or inflicted serious bodily harm upon himself or another, or that he continues to be gravely disabled, or that he demonstrates a current intent to carry out plans of serious harm to himself or another.

(2) allege that the respondent has received appropriate and adequate care and treatment during his 21-day commitment;

(3) be verified by the professional person in charge, or his professional designee, during the 21-day commitment.

(b) The court shall have copies of the petition for 90 day commitment served upon the respondent, his attorney, and his guardian, if any. The petition for 90-day commitment and proofs of service shall be filed with the clerk of the court, and a date for hearing shall be set, by the end of the next judicial day, for not later than five judicial days from the date of filing of the petition. The clerk shall notify the respondent, his attorney, and the petitioner of the hearing date at least three judicial days in advance of the hearing.

(c) Findings of fact relating to the respondent's behavior made at a 21-day commitment hearing under AS 47.30.735 shall be admitted as evidence and may not be rebutted except that newly discovered evidence may be used for the purpose of rebutting the findings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.745. 90-day commitment hearing rights. (a) A respondent subject to a petition for 90-day commitment has, in addition to the rights specified elsewhere in AS 47.30.350 — 47.30.915, or otherwise applicable, the rights enumerated in this section. Written notice of these rights shall be served on the respondent, his attorney, his guardian, if any, and may be served on an adult designated by the respondent at the time the petition for 90-day commitment is served. An attempt shall be made by oral explanation to insure that the respondent understands the rights enumerated in the notice. If the respondent does not understand English, the explanation shall be given in a language he understands.

(b) Unless the respondent is released or voluntarily admits himself following the filing of a petition and before the hearing, he is entitled to a judicial hearing within five judicial days of the filing of the petition as set out in AS 47.30.740(b) to determine if he is mentally ill and as a result is likely to cause harm to himself or others, or if he is gravely disabled. If the respondent voluntarily admits himself following the filing of the petition, the voluntary admission constitutes a waiver of any hearing rights under AS 47.30.740 or under AS 47.30.685. If at any time during the respondent's voluntary admission under this subsection, the respondent submits to the facility a written notice of intent to leave, the professional person in charge may file with the court a petition for 120-day commitment of the respondent under AS 47.30.770. The 120-day commitment hearing shall be scheduled for a date not earlier than 90 days after the respondent's voluntary admission.

(c) The respondent is entitled to a jury trial upon request filed with the court if the request is made at least two judicial days before the hearing. If the respondent requests a jury trial, the hearing may be

continued for no more than 10 calendar days. The jury shall consist of six persons.

(d) If a jury trial is not requested, the court may still continue the hearing at the respondent's request for no more than 10 calendar days.

(e) The respondent has a right to retain an independent licensed physician or other mental health professional to examine him and to testify on his behalf. Upon request by an indigent respondent, the court shall appoint an independent licensed physician or other mental health professional to examine him and testify on his behalf. The court shall consider an indigent respondent's request for a specific physician or mental health professional. A motion for the appointment may be filed in court at any reasonable time before the hearing and shall be acted upon promptly. Reasonable fees and expenses for expert examiners shall be determined by the rules of court.

(f) The proceeding shall in all respects be in accord with constitutional guarantees of due process and, except as otherwise specifically provided in AS 47.30.700 — 47.30.915, the rules of evidence and procedure in civil proceedings.

(g) Until the court issues a final decision, the respondent shall continue to be treated at the treatment facility unless the petition for 90-day commitment is withdrawn. If no decision has been made within 20 days of filing of the petition, not including extensions of time due to jury trial or other requests by the respondent, he shall be released. (§ 1 ch 84 SLA 1981)

Sec. 47.30.750. Conduct of hearing. The hearing under AS 47.30.745 shall be conducted in the same manner, and with the same rights for the respondent, as set out in AS 47.30.735(b). (§ 1 ch 84 SLA 1981)

Editor's notes. — The words "under AS 47.30.745" was added following "hearing" by the revisor of statutes pursuant to AS 01.05.031.

Sec. 47.30.755. Court order. (a) After the hearing and within the time limit specified in AS 47.30.745, the court may commit the respondent to a treatment facility for no more than 90 days if the court or jury finds by clear and convincing evidence that the respondent is mentally ill and as a result is likely to cause harm to himself or others, or is gravely disabled.

(b) If the court finds that there is a less restrictive alternative available and that the respondent has been advised of and refused voluntary treatment through the alternative, the court may order the less restrictive alternative treatment after acceptance by the program of the respondent for a period not to exceed 90 days. (§ 1 ch 84 SLA 1981)

Sec. 47.30.760. Placement at closest facility. Treatment shall always be available at a state operated hospital, however, if space is

available and upon acceptance by another treatment facility, a respondent who is committed by the court shall be placed by the department at the designated treatment facility closest to his home unless the court finds that

(1) another treatment facility in the state has a program more suited to the respondent's condition, and this interest outweighs the desirability of the respondent being closer to home;

(2) another treatment facility in the state is closer to the respondent's friends or relatives who could benefit him through their visits and communications; or

(3) the respondent wants to be further removed from his home, and the mental health professionals who sought his commitment concur in the desirability of removed placement. (§ 1 ch 84 SLA 1981)

Sec. 47.30.765. Appeal. The respondent has the right to an appeal from any order of involuntary commitment. The court shall inform the respondent of this right. (§ 1 ch 84 SLA 1981)

Sec. 47.30.770. Additional 120-day commitment. (a) The respondent shall be released from involuntary treatment at the expiration of 90 days unless the professional person in charge files a petition for a 120-day commitment conforming to the requirements of AS 47.30.740(a) except that all references to "24-day commitment" shall be read as "the previous 90-day commitment" and all references to "90-day commitment" shall be read as "120-day commitment".

(b) The procedures for service of the petition, notification of rights, and judicial hearing shall be as set out in AS 47.30.740 — 47.30.760. If the court or jury finds by clear and convincing evidence that the grounds for 90-day commitment as set out in AS 47.30.755 are present, the court may order the respondent committed for an additional treatment period not to exceed 120 days from the date on which the first 90-day treatment period would have expired.

(c) Successive 120-day commitments are permissible on the same ground and under the same procedures as the original 120-day commitment. An order of commitment may not exceed 120 days.

(d) Findings of fact relating to the respondent's behavior made at a 24-day commitment hearing under AS 47.30.735, a 90-day commitment hearing under AS 47.30.755, or a previous 120-day commitment hearing under this section shall be admitted as evidence and may not be rebutted except that newly discovered evidence may be used for the purpose of rebutting the findings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.775. Commitment of minors. The provisions of AS 47.30.700 — 47.30.815 apply to minors. However, all notices required to be served on the respondent by AS 47.30.700 — 47.30.815 shall also be served on the parent or guardian of a respondent who is a minor, and parents or guardians of a minor respondent shall be notified that they may appear as parties in any commitment proceeding concerning the

minor and that as parties they are entitled to retain their own attorney or have one appointed for them by the court. A minor respondent has the same rights to waiver and informed consent as an adult respondent under AS 47.30.660 — 47.30.915; however, he shall be represented by counsel in waiver and consent proceedings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.780. Early discharge. The professional person in charge shall at any time discharge a respondent on the ground that the respondent is no longer gravely disabled or likely to cause serious harm as a result of mental illness. A certificate to this effect shall be sent to the court which shall enter an order officially terminating the involuntary commitment. (§ 1 ch 84 SLA 1981)

Sec. 47.30.785. Authorized absences. A respondent undergoing involuntary treatment on an inpatient basis under AS 47.30.700 — 47.30.815 may be authorized to be absent from the treatment facility during times specified by the professional person in charge, or his professional designee, when an authorization to be absent is in the best interests of the respondent and he is not likely to cause harm to himself or others. (§ 1 ch 84 SLA 1981)

Sec. 47.30.790. Return from unauthorized absence. When a respondent undergoing involuntary treatment on an inpatient basis is absent from the treatment facility without, or in excess of, authorization under AS 47.30.785, the professional person in charge, or his professional designee, may contact the appropriate peace officers who shall take the respondent into custody and return him to the treatment facility. If it is determined by the professional person in charge to be necessary, a member of the treatment facility staff shall accompany the peace officers when they take the respondent into custody. (§ 1 ch 84 SLA 1981)

Sec. 47.30.795. Involuntary outpatient care for committed persons. (a) A respondent who was originally committed to involuntary inpatient care under AS 47.30.700 — 47.30.915 may be released before the expiration of his commitment period if a provider of outpatient care accepts him for specified outpatient treatment for a period of time not to exceed the duration of his commitment, and if the professional person in charge, or his professional designee, finds that

(1) it is not necessary to treat the respondent as an inpatient to prevent him from harming himself or others; and

(2) there is reason to believe that the respondent's mental condition would improve as a result of the outpatient treatment.

(b) A copy of the conditions for early release shall be given to the respondent, his attorney, his guardian, if any, the provider of outpatient care, and the court.

(c) If during the commitment period the provider of outpatient care determines that the respondent can no longer be treated on an

outpatient basis because he is likely to cause harm to himself or others or is gravely disabled, the provider shall give the respondent oral and written notice that he must return to the treatment facility within 24 hours, with copies to the respondent's attorney, his guardian, if any, the court, and the inpatient treatment facility. If the respondent fails to arrive at the treatment facility within 24 hours after receiving the notice, the professional person in charge may contact the appropriate peace officers who shall take the respondent into custody and transport him to the facility. If it is determined by the professional person in charge to be necessary, a member of the treatment facility staff shall accompany the peace officers when they take the respondent into custody.

(d) If the provider of outpatient care determines that the respondent will require continued outpatient care after the expiration of his commitment period, the provider may initiate further commitment proceedings as if he were the professional person in charge, and the provisions of AS 47.30.660 — 47.30.915 apply, except that provisions relating to inpatient treatment shall be read as applicable to outpatient treatment. (§ 1 ch 84 SLA 1981)

Sec. 47.30.800. Conversion of involuntary outpatient treatment to inpatient commitment. (a) A respondent ordered by the court under the provisions of AS 47.30.700 — 47.30.915 to receive involuntary outpatient treatment may be required to undergo inpatient treatment when the provider of outpatient care finds that (1) the respondent is mentally ill and is likely to cause serious harm to himself or others or is still gravely disabled; (2) the respondent's behavior since the hearing resulting in court-ordered treatment indicates that he now needs inpatient treatment to protect himself or others; (3) there is reason to believe that the respondent's mental condition will improve as a result of inpatient treatment; and (4) there is an inpatient facility appropriate to the respondent's need which will accept him as a patient. Treatment for these respondents shall be available at state-operated hospitals at all times.

(b) Upon making the findings specified in (a) of this section, the provisions of AS 47.30.795(b) relating to notice and AS 47.30.745 relating to hearing apply. (§ 1 ch 84 SLA 1981)

Sec. 47.30.805. Computing periods of time. (a) Except as provided in (b) of this section,

(1) computations of a 72-hour evaluation period do not include Saturdays, Sundays, legal holidays, or any period of time necessary to transport the respondent to the treatment facility;

(2) a 21-day commitment period expires at the end of the 21st day after the 72 hours following initial acceptance;

(3) a 90-day commitment period expires at the end of the 90th day after the expiration of a 21-day period of treatment;

(4) a 120-day commitment period expires at the end of the 120th day, after the expiration of a 90-day period of treatment or previous 120-day period, whichever is applicable.

(b) When a respondent has failed to appear or absented himself contrary to any order properly made or entered under AS 47.30.660 — 47.30.915, the relevant commitment period shall be extended for a period of time equal to the respondent's absence if written notice of absence is promptly provided to the respondent's attorney and his guardian, if there is one, and if, within 24 hours after the respondent has returned to the evaluation or treatment facility, written notice of the corresponding extension and the reason for it is given to the respondent, his attorney, his guardian, if any, and to the court. (§ 1 ch 84 SLA 1981)

Sec. 47.30.810. Habeas corpus. Nothing in AS 47.30.660 — 47.30.915 may be construed as limiting a person's right to a writ of habeas corpus. (§ 1 ch 84 SLA 1981)

Sec. 47.30.815. Limitation of liability; penalty for false application. (a) A person acting in good faith upon either actual knowledge or reliable information who makes application for evaluation or treatment of another person under AS 47.30.700 — 47.30.915 is not subject to civil or criminal liability.

(b) The following persons may not be held civilly or criminally liable for detaining a person under AS 47.30.700 — 47.30.915 or for releasing a person under AS 47.30.700 — 47.30.915 at or before the end of the period for which the person was admitted or committed for evaluation or treatment if the persons have performed their duties in good faith and without gross negligence:

(1) an officer of a public or private agency;

(2) the superintendent, the professional person in charge, the professional designee of the professional person in charge, and the attending staff of a public or private agency;

(3) a public official performing functions necessary to the administration of AS 47.30.700 — 47.30.915;

(4) a peace officer responsible for detaining a person under AS 47.30.700 — 47.30.915.

(c) A person who wilfully initiates an involuntary commitment procedure under AS 47.30.700 without having good cause to believe that the other person is suffering from a mental illness and as a result is gravely disabled or likely to cause serious harm to himself or others, is guilty of a felony. (§ 1 ch 84 SLA 1981)

Article 9. Patient Rights.

Section	Section
825. Patient rights: Medical	845. Confidential records
830. Prohibition of experimental treatments	850. Expungement of records
835. Civil rights not impaired	855. Posting of rights
840. Right to privacy and personal possessions	860. Notices in languages other than English
	865. Discrimination prohibited

Sec. 47.30.825. Patient rights: Medical. Each patient who is receiving services under AS 47.30.660 — 47.30.915 has the following rights:

(1) A patient, or his counsel, guardian, or the adult designated in accordance with AS 47.30.725 if the patient is mentally incapable of participation, is entitled to participate in formulating his individualized treatment plan and to participate in the evaluation process as much as possible, at minimum to the extent of requesting specific forms of therapy, inquiring why specific therapies are or are not included in his treatment program, and being informed as to his present medical and psychological condition and prognosis. The treating physician may not withhold any of this information from the patient.

(2) A patient has the right to know the name of medication that he is asked to take, what its purpose is, and what side effects may occur with this medication. If the patient is incapable of understanding the purpose and side effects of the medication, the treating physician or mental health professional shall explain it to the patient's counsel or guardian or, if there is no guardian, the adult designated in accordance with AS 47.30.725.

(3) A locked quiet room, or other form of physical restraint, may not be used, except as provided in this paragraph, unless a patient is likely to physically harm himself or others unless restrained. The form of restraint used shall be that which is in the patient's best interest and which constitutes the least restrictive alternative available. When practicable, the patient shall be consulted as to his preference among forms of adequate, medically advisable restraints including medication, and his preference shall be considered. Nothing in this section is intended to limit the right of staff to use a quiet room at the patient's request or with his knowing concurrence when considered in the best interests of the patient. Patients placed in a quiet room or other physical restraint shall be checked at least every 15 minutes or more often if good medical practice so indicates. Patients in a quiet room must be visited by a staff member at least once every hour and must be given adequate food and drink and access to bathroom facilities. At no time may a patient be kept in a quiet room or other form of physical restraint against his will longer than necessary to accomplish the purposes set out in this paragraph. All uses of a quiet room or other restraint shall be recorded in the patient's medical record, the information including but not limited to the reasons for the use, the duration of use, and the name of the authorizing staff member.

(4) A patient has the right to be free from unnecessary or excessive medication. Psychotropic medication shall be administered only on the order of a licensed physician when the physician determines that such medication is in the best interest of the patient or will prevent serious harm to others.

(5) A patient capable of giving informed consent has the absolute right to accept or refuse electro-convulsive therapy or aversive conditioning. A patient who lacks substantial capacity to make this decision may not be given such therapy or conditioning without a court order.

(6) In no event may treatment include psychosurgery, lobotomy, or other comparable form of treatment without specific informed consent of the patient, including a minor unless he is clearly too young or disabled to give an informed consent in which case the consent of his legal guardian is required. In addition, such treatment may not be given without a court order after hearing compatible with full due process.

(7) When, in the written opinion of a patient's attending physician, a true medical emergency exists and a surgical operation is necessary to save the life, physical health, eyesight, hearing or member of the patient, the professional person in charge, or his professional designee, may give consent to the surgical operation if time will not permit obtaining the consent of the proper relatives or guardian or appropriate judicial authority. However, an operation may not be authorized if the patient is not a minor and knowingly withholds consent on religious grounds.

(8) A patient upon discharge shall be given a discharge plan specifying the kinds and amount of care and treatment he should have after discharge and such other steps as he might take to benefit his mental health after leaving the facility. The patient shall have the right to participate, as far as practicable, in formulating his discharge plan. A copy of the plan shall be given to the patient, his guardian, the court if appropriate, and any follow-up agencies. (§ 1 ch 94 SLA 1981)

Sec. 47.30.830. Prohibition of experimental treatments. (a) Experimental treatments involving any significant risk of physical or psychological harm may not be administered to a patient.

(b) If the personnel of an evaluation or treatment facility are uncertain as to whether a proposed treatment is experimental or is experimental as applied to a particular patient or would involve a significant risk of mental or physical harm to the patient, the matter may be referred to the commissioner for a determination. The patient, his attorney, his guardian, if any, and an adult designated by the patient, shall, simultaneously with the referral to the commissioner, be provided with copies of all the documents by which the referral is made and shall have the opportunity to provide evidence to the commissioner on the question.

(c) A determination by the commissioner that a treatment is experimental and entails significant risks of mental or physical harm is binding upon all persons involved in the administration of treatment to a patient. (§ 1 ch 84 SLA 1981)

Sec. 47.30.835. Civil rights not impaired. (a) A person may not deny to a person who is undergoing evaluation or treatment under AS 47.30.660 — 47.30.915 a civil right, including but not limited to, the right to free exercise of religion and the right to dispose of property, sue and be sued, enter into contractual relationships, and vote. A person who violates this subsection commits the crime of interference with constitutional rights under AS 11.76.110.

(b) Court-ordered evaluation or treatment under AS 47.30.660 — 47.30.915 is not a determination of legal incapacity under AS 13.26.005 — 13.26.330. (§ 1 ch 84 SLA 1981)

Sec. 47.30.840. Right to privacy and personal possessions. A person undergoing evaluation or treatment under AS 47.30.660 — 47.30.915 shall

(1) not be photographed without his consent and that of his guardian if a minor, except that he may be photographed upon admission to a facility for identification and for administrative purposes of the facility; all photographs shall be confidential and may only be released by the facility to the patient or his designee unless a court orders otherwise;

(2) at the time of admission to an evaluation or treatment facility, have reasonable precautions taken by the staff to inventory and safeguard his personal property; a copy of the inventory signed by the staff member making it shall be given to the patient and made available to his attorney and any other person authorized by the patient to inspect the document;

(3) have access to an individual storage space for his private use while undergoing evaluation or treatment;

(4) be permitted to wear his own clothing, to keep and use his own personal possessions including his toilet articles if they are not considered unsafe for him or other patients who might have access to them, and to keep and be allowed to spend a reasonable sum of his own money for his own needs and comfort;

(5) be allowed to have visitors at reasonable times;

(6) have ready access to letter writing materials, including stamps, and have the right to send and receive unopened mail;

(7) have reasonable access to a telephone, both to make and receive confidential calls. (§ 1 ch 84 SLA 1981)

Sec. 47.30.845. Confidential records. Information and records obtained in the course of a screening investigation, evaluation, examination, or treatment are confidential and are not public records, except as the requirements of a hearing under AS 47.30.660 — 47.30.915 may

necessitate a different procedure. Information and records may be copied and disclosed under regulations established by the department only to

(1) a physician or a provider of health, mental health, or social and welfare services involved in caring for, treating, or rehabilitating the patient;

(2) the patient or an individual to whom the patient has given written consent to have information disclosed;

(3) a person authorized by a court order;

(4) a person doing research or maintaining health statistics, if the anonymity of the patient is assured, and the facility recognizes the project as a bona fide research or statistical undertaking;

(5) the division of corrections in a case in which a prisoner confined to the state prison is a patient in the state hospital on authorized transfer either by voluntary admission or by court order;

(6) a governmental or law enforcement agency when necessary to secure the return of a patient who is on unauthorized absence from a facility where the patient was undergoing evaluation or treatment. (§ 1 ch 84 SLA 1981)

Sec. 47.30.850. Expungement of records. Following the discharge of a respondent from a treatment facility or the issuance of a court order denying a petition for commitment, the respondent may at any time move to have all court records pertaining to the proceedings expunged on condition that he file a full release of all claims of whatever nature arising out of the proceedings and the statements and actions of persons and facilities in connection with the proceedings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.855. Posting of rights. The rights set out in AS 47.30.825 — 47.30.855 shall be prominently posted in all treatment facilities in places accessible to all patients. A patient who does not understand English shall have his rights explained to him in a language he understands. (§ 1 ch 84 SLA 1981)

Sec. 47.30.860. Notices in languages other than English. When practicable all documents and notices required by AS 47.30.660 — 47.30.915 to be served on a respondent, or on his parents, guardian or adult designee, shall be explained in a language the person understands if he is not competent in English. (§ 1 ch 84 SLA 1981)

Sec. 47.30.865. Discrimination prohibited. (a) The fact that a person is or has been evaluated or treated for mental illness may not be a basis for discrimination in

(1) seeking employment;

(2) resuming or continuing professional practice or previous occupation,

(3) obtaining or retaining housing;

(4) obtaining or retaining licenses or permits, including but not limited to a motor vehicle license, motor vehicle operator's and chauffeur's license, and a professional or occupational license.

(b) Applications for positions, licenses, and housing may not contain requests for information concerning evaluation or treatment experiences.

(c) It is unlawful for a person to aid, abet, incite, compel, or coerce the doing of an act forbidden under this section or to attempt to do so. (§ 1 ch 84 SLA 1981)

Article 10. Miscellaneous Provisions.

Section	
870	Transportation
875	Nonresident patients
880	Interstate compact
885	Rights outside state
890	Provision for personal needs upon discharge
895	Disposition of personal property and unclaimed money
900	Disposition of money and personal property subject to claim
905	Fees and expenses for judicial proceedings
910	Liability for expense of placement in a treatment facility
915	Definitions

Sec. 47.30.870. Transportation. When a person is to be involuntarily committed to a facility, the department shall arrange, and is authorized to pay for, the person's necessary transportation to the designated facility accompanied by appropriate persons and if necessary by a peace officer. The department shall pay return transportation of a person, his escorts, and if necessary a peace officer, after a determination that the person is not committable, at the end of a commitment period, or at the end of a voluntary stay at a treatment facility following an evaluation conducted in accordance with AS 47.30.715. When advisable, one or more relatives or friends shall be permitted to accompany the person. The department may pay necessary travel, housing, and meal expenses incurred by one relative or friend in accompanying the person if the department determines that the person's best interests require that he be accompanied by the relative or friend and the relative or friend is indigent. (§ 1 ch 84 SLA 1981)

Sec. 47.30.875. Nonresident patients. (a) The admission papers of a person who is admitted to a treatment facility under AS 47.30.660 — 47.30.915 shall include a statement as to his residence. The department may return a patient who is not a resident of the state to the state of his residence with court approval if the person has been committed. If the state in which he has residence does not accept him as a patient, the person shall be treated as a resident of this state under the provisions of AS 47.30.660 — 47.30.915.

(b) To facilitate the return of nonresident patients the department may enter into a reciprocal agreement or compact with another state providing for the prompt return under appropriate supervision of residents of that state who are mentally ill. A mentally ill resident of this state who has been placed in a facility outside this state may be admitted with the approval of the department to a treatment facility in the state designated by the department. The department may enter into reciprocal agreements or contracts with another state providing for custody, care or treatment, or return of mentally ill residents of this state by the other state and for the custody and care or treatment of mentally ill residents of that state by this state on a reimbursable basis. A resident of this state who has been committed in another state and is returned in accordance with this section shall, within 72 hours of his admission to the designated facility, be examined. After examination the mental health professional in charge shall release him or shall petition for involuntary commitment as prescribed in AS 47.30.740.

(c) In taking action under (a) and (b) of this section, consideration shall be given to the best interests of the patient, particularly to the relationship of the patient to his family, legal guardian, or friends to maintain relationships and encourage visits beneficial to the patient. (§ 1 ch 84 SLA 1981)

Sec. 47.30.880. Interstate compact. This state ratifies and adopts by reference "The Interstate Compact on Mental Health" consisting of 14 articles approved on September 30, 1955, by the Northeast State Governments Conference on Mental Health. The department is designated as compact administrator with full power to carry out the purpose of the compact and to make all necessary regulations to implement the compact. (§ 119(e) ch 87 SLA 1957; added by § 11 ch 127 SLA 1959; AS 47.30.180)

Editor's notes. — This section derives from former AS 47.30.180 and was renumbered by the revisor of statutes under AS 01.05.031 to accord with the revision of the mental health statutes in Chapter 84 SLA 1981.

Sec. 47.30.885. Rights outside state. Nothing in AS 47.30.660 — 47.30.915 alters or impairs the application or availability to a patient, while hospitalized in another state under contractual arrangements entered in accordance with AS 47.30.660 — 47.30.915, of the rights, remedies or safeguards provided by the laws of this state. (§ 1 ch 84 SLA 1981)

Sec. 47.30.890. Provision for personal needs upon discharge. The department shall insure that

(1) a patient is not discharged from a treatment facility without suitable clothing; and

(2) a discharged indigent patient is furnished

(A) suitable transportation to his permanent residence in this state or to another suitable place at the discretion of the department; and

(B) a reasonable amount of money to meet his immediate needs. (§ 1 ch 84 SLA 1981)

Sec. 47.30.895. Disposition of personal property and unclaimed money. (a) Articles of personal property and unclaimed money in the custody of a treatment facility that belong to a patient who dies before discharge, or to a patient who leaves the hospital without authority, if unclaimed by the patient or his legal heirs or representatives within one year after the death or departure of the patient, shall be disposed of in the manner prescribed by the department and the proceeds shall be deposited in the state treasury.

(b) If a mentally ill individual has died in a foreign facility and the department desires to recover the patient's personal property under this section, the commissioner or his designated representative may secure the property and for that purpose only is designated the decedent's administrator. Property so recovered shall be disposed of as provided by law. (§ 1 ch 84 SLA 1981)

Sec. 47.30.900. Disposition of money and personal property subject to claim. The department shall make diligent inquiry in every instance after departure without authority or death of a patient, to ascertain the whereabouts of the patient or that of his legal heirs or representatives, and shall turn over to the proper person the money or articles of personal property in the custody of the facility to the credit of the patient. Claims to the money or articles of personal property, including claims by the state, may be presented to the department at any time. If a claim other than by the state is established by clear and convincing evidence more than one year after the death or departure without authority of a patient, it shall be certified to the legislature for consideration and the legislature may pay the claim. (§ 1 ch 84 SLA 1981)

Sec. 47.30.905. Fees and expenses for judicial proceedings. (a) The witnesses, expert witnesses, and the jury in commitment proceedings under AS 47.30.660 — 47.30.915 are entitled to the fees, compensation, and mileage established by the administrative rules of court for other jurors and witnesses. Compensation, mileage, fees, transportation expenses for a respondent, and other expenses arising from evaluation and commitment proceedings shall be audited and allowed by the superior court of the judicial district in which the proceedings are held. To the extent that services of a peace officer are used to carry out the provisions of AS 47.30.660 — 47.30.915, he is entitled to fees and actual expenses from the same source and in the same manner as for his other official duties.

(b) An attorney appointed for a person under AS 47.30.660 — 47.30.915 shall be compensated for his services as follows:

(1) the person for whom an attorney is appointed shall, if he is financially able under standards as to financial capability and indigency set by the court, pay the costs of the legal services;

(2) if the person is indigent under those standards, the costs of the services shall be paid by the state. (§ 1 ch 84 SLA 1981)

Sec. 47.30.910. Liability for expense of placement in a treatment facility. (a) A patient, or his legal representative acting in a representative capacity, or his spouse, or his parents if the patient is under the age of 18, shall pay or contribute to the payment of the charges for the care, transportation, and treatment of the patient when hospitalized under AS 47.30.660 — 47.30.915. Charges assessed after an order for commitment for treatment is issued and charges assessed when a patient is hospitalized at a facility operated by the department, or under a contract for services with the department, may not exceed the actual cost of the care and treatment. The department may order payment by the patient or by the person responsible for payment for the patient's care and treatment under this subsection, according to ability to provide for payment. The department may make necessary investigations to determine the ability to pay and may require sworn statements of income by the patient, or his legal representative acting in a representative capacity, or his spouse or parent. In the exercise of his discretion, the commissioner may impose full liability for the patient's actual cost of care and treatment on the patient, his legal representative, his spouse, or parent for refusal to supply a sworn statement of income. An order for payment shall be issued by the department within six months after the date on which the charge was incurred. The order shall remain in full force and effect unless modified by subsequent court or department order. Liability under this subsection shall be determined as follows: A patient hospitalized under AS 47.30.660 — 47.30.915, or the person responsible for payment of charges for the patient, may be required to pay according to his ability to provide for payment, and in the manner and proportion which the department finds is not detrimental to the patient's rehabilitation. The department shall, at any time that it determines the action will serve the best interests of the state and the patient or the person responsible for payment, relieve the patient or the person responsible for payment from liability for charges for the care, transportation, and treatment of the patient.

(b) As used in (a) of this section, the term "actual cost of the care and treatment" means either the rate provided for by a contract entered into under AS 47.30.660 — 47.30.915, or, in the absence of a contract, a daily rate approved by the department.

(c) The department may charge, or accept from a person money or property, for the care or treatment of an inpatient or outpatient or for

other purposes, even if the payment is not required by an order of the department, so long as the total payments received do not exceed the actual cost of care or treatment.

(d) All money paid by the patient or on his behalf to the department under this section shall be deposited in the state treasury.

(e) If an order for payment is entered by the department under this section, and delinquency in the payment of any amount due the state under the order continues for a period of more than 30 days after the notification to the patient or the legal representative, spouse, or parent of the patient by the department, the state may proceed to collect the amounts due by appropriate proceedings. An action to enforce the collection of payments may only be brought within three years after the date of notification of a delinquent payment.

(f) The orders of the department issued under this section may relate only to charges incurred after October 1, 1981. (§ 1 ch 84 SLA 1981)

Sec. 47.30.915. Definitions. In AS 47.30.660 — 47.30.915

(1) "commissioner" means the commissioner of health and social services;

(2) "court" means a superior court of the state;

(3) "department" means the Department of Health and Social Services;

(4) "designated treatment facility" means a hospital, clinic, institution, center, or other health care facility that has been designated by the department for the treatment or rehabilitation of mentally ill persons and for the receipt of these persons by court-ordered commitment, but does not include correctional institutions;

(5) "evaluation facility" means a health care facility that has been designated or is operated by the department to perform the evaluations described in AS 47.30.660 — 47.30.915; or a medical facility licensed under AS 18.20.020;

(6) "evaluation personnel" means mental health professionals designated by the department to conduct evaluations as prescribed in AS 47.30.660 — 47.30.915 who conduct evaluations in places in which no staffed evaluation facility exists;

(7) "gravely disabled" means a condition in which a person as a result of mental illness, is in danger of physical harm arising from such complete neglect of basic needs for food, clothing, shelter, or personal safety as to render serious near term illness or death highly probable if care by another is not taken;

(8) "inpatient treatment" means care and treatment rendered inside or on the premises of a treatment facility, or a part or unit of a treatment facility, for a continual period of 24 hours or longer;

(9) "least restrictive alternative" means mental health treatment facilities and conditions of treatment which are

(A) no more harsh, hazardous, or intrusive than necessary to achieve the treatment objectives of the patient, and

(B) involve no restrictions on physical movement nor supervised residence or inpatient care except as reasonably necessary for the administration of treatment or the protection of the patient or others from physical injury;

(10) "likely to cause serious harm" means a person who

(A) poses a substantial risk of imminent and substantial bodily harm to himself, as manifested by recent attempts at suicide or bodily harm;

(B) poses a substantial risk of imminent and substantial bodily harm to one or more other persons as manifested by behavior causing or attempting harm, including, in regard to evaluations, at least one incident within 30 days before the filing of a petition for emergency hospitalization; or

(C) demonstrates a current intent to carry out plans of serious harm to himself or another;

(11) "mental health professional" means a psychiatrist or physician who is licensed to practice in this state or employed by the federal government; a clinical psychologist licensed by the state Board of Psychologists and Psychological Associate Examiners; a psychological associate with a clinical psychology or counseling specialty licensed by the Board of Psychologists and Psychological Associate Examiners; a registered nurse with a master's degree in psychiatric nursing, licensed by the State Board of Nursing, and a social worker with a master's degree in social work and experience in the field of mental illness;

(12) "mental illness" means an organic, mental, or emotional impairment that has substantial adverse effects on an individual's ability to exercise conscious control of his actions or ability to perceive reality or to reason or understand; mental retardation, epilepsy, drug addiction, and alcoholism do not per se constitute mental illness, although persons suffering from these conditions may also be suffering from mental illness;

(13) "peace officer" includes a state police officer, municipal or other local police officer, state, municipal, or other local health officer, public health nurse, United States marshal or deputy United States marshal, or a person authorized by the court;

(14) "provider of outpatient care" means a mental health professional or hospital, clinic, institution, center, or other health care facility designated by the department to accept for treatment patients who are ordered to undergo involuntary outpatient treatment by the court or who are released early from inpatient commitments on condition that they undergo outpatient treatment;

(15) "screening investigation" means the investigation and review of facts which have been alleged to warrant emergency examination or treatment, including interviews with the persons making the allegations, any other significant witnesses who can readily be contacted for interviews, and if possible, the respondent, and an investigation and evaluation of the reliability and credibility of persons

providing information or making allegations;

(16) "state" means a state of the United States, the District of Columbia, the territories and possessions of the United States, and the Commonwealth of Puerto Rico, and, with the approval of the United States Congress, Canada;

(17) "professional person in charge" means the senior mental health professional at a facility or his designee; in the absence of a mental health professional it means the chief of staff or a physician designated by the chief of staff. (§ 1 ch 84 SLA 1981)

Chapter 35. Private Institutions.

Article 1. Foster Homes, Boarding Homes and Institutions.

Section
20 License or permit required
40 Licensing
50 [Repealed]
55 Provisional license
80 Definitions

Sec. 47.35.020. License or permit required. No person may, without a license or permit to do so,

(1) maintain or conduct, for more than 90 days, a boarding home, foster home, group home, institution, or other place for the regular reception or care of children under 16 years of age, or a foster home, group home, or institution for the care of dependent adults; or

(2) engage in the business of receiving or caring for children under 14 years of age, with or without compensation, in a nursery in which five or more children not related by blood or marriage, or legal adoption, to the owner, operator or manager of the business are lodged. (§ 3 ch 17 SLA 1951; am § 3 ch 42 SLA 1973; am § 3 ch 253 SLA 1976; am § 2 ch 45 SLA 1977; am § 1 ch 97 SLA 1982)

Effect of amendments. — The 1982 amendment inserted "for more than 90 days" near the beginning of paragraph (1) and made minor changes in style.

Sec. 47.35.040. Licensing. (a) The department shall issue a license to a facility if it determines that the facility has met the standards for operation set out in AS 47.35.010 — 47.35.080 and the regulations adopted under AS 47.35.010 — 47.35.080.

(b) A license is valid for two years after the date of issuance unless it is revoked or modified. The department may revoke a license or modify a license to provisional status if it determines that a facility is not in compliance with AS 47.35.010 — 47.35.080 or the regulations adopted under AS 47.35.010 — 47.35.080.

(c) The department may waive compliance with a standard set out in regulations adopted under AS 47.35.010 — 47.35.080 if an acceptable alternative is established that meets the purpose of the provision and reasonably assures the well-being of persons in care.

(d) A license may not be transferred to a different facility or owner.

(e) The department shall give written notice of revocation or modification under (b) of this section 5 days before the effective date of the action. However, if the health or well-being of children or dependent adults is in jeopardy, the revocation or modification action is effective immediately upon the issuance of written notice by the department. (§§ 5, 8 ch 17 SLA 1951; am § 4 ch 42 SLA 1973; am § 2 ch 97 SLA 1982)

Effect of amendments. — The 1982 amendment substituted the present provisions of the section for the provisions set out in the main pamphlet.

Sec. 47.35.050. Duration of license or permit.

Repealed by § 5 ch 97 SLA 1982.

Cross references. — For present provisions covering the subject matter of the repealed section, see AS 47.35.040(b) and (c).

Editor's notes. — The repealed section derived from § 6, ch. 17, SLA 1951; § 5, ch. 42, SLA 1973; § 3, ch. 45, SLA 1977.

Sec. 47.35.055. Provisional license. (a) The department shall issue a provisional license to a new facility if the facility submits to the department an acceptable plan for operation that is in conformity with the provisions of AS 47.35.010 — 47.35.080 and the regulations adopted under AS 47.35.010 — 47.35.080. After the department determines that the new facility is operating in conformity with the provisions of AS 47.35.010 — 47.35.080 and the regulations adopted under AS 47.35.010 — 47.35.080, the department shall issue a license under AS 47.35.040 to the facility.

(b) The department may issue a provisional license to a facility that is licensed under AS 47.35.040 but is temporarily unable to conform to the provisions of AS 47.35.010 — 47.35.080 or the regulations adopted under AS 47.35.010 — 47.35.080.

(c) The department may issue a provisional license under (b) of this section only if the facility submits to the department an acceptable plan to bring the facility into conformity with the provisions of AS 47.35.010 — 47.35.080 and the regulations adopted under AS 47.35.010 — 47.35.080 within the time specified in the provisional license.

(d) A provisional license is valid for a period not exceeding one year from the date of issuance. The department may renew a provisional license for an additional period not to exceed one year. (§ 3 ch 97 SLA 1982)

Sec. 47.35.080. Definitions. In AS 47.35.010 — 47.35.100

(1) "boarding home or foster home" means an establishment providing regular care for less than six children not related by blood or marriage to the foster parents;

MENTAL HEALTH COMMITMENT LAW

Senate HESS 9/23/83

Attendance: Josephson, P. Moss. Sens. V. Fischer, P. Fischer, and Halford excused.

018 Josephson convened meeting regarding mental health commitment law testimony.

093 Josephson: Our purpose today is to receive testimony on the question of mental health commitment. I think our purpose would be better served if those wishing to testify could talk to how you evaluate the existing law, what changes you would like to see, rather than to address any specific work draft as a mark-up vehicle.

120 Sonya Benson, representing Representative Niilo Koponen: I don't have any specific testimony at this time.

129 Mrs. Ann Denardo, Family of Chronically Ill Victims, Fairbanks: Our son is schizophrenic and housed at A.P.I. We've had a lot of experience of with this commitment act and we find it to be burdensome, vague, and emotional. We feel families should have a great role in commitment procedures. A broader criteria for commitment should be studied based on ability to function with thought processes.

198 Denardo: Under paragraph 7, 'gravely disabled' means a condition in which a person is a result of mental illness. We would like to add 'or is not receiving such care in mental medical treatment as is necessary for health and safety' or 'a person who thought processes, perception of reality or judgment is substantially impaired'.

230 Josephson: Has this language been used anywhere else?

273 Denardo: I've studied other acts from other states, and this language comes from a combination of law in two or three other states. We also suggest that a study be done of other commitment acts.

299 Denardo: Commitment procedures should be redefined, with a view to creating a less adversarial situation and family. Court procedures are either civil or criminal. Commitment comes under civil procedure. In civil procedure, there has to be cross-examination and rules of evidence presented. This puts family members in the position of testifying against their child. I would like to suggest that the legislature study the possibility of another procedure, not civil and not criminal, but a procedure just for mental commitments.

335 Denardo: Mentally ill patients should receive better continuity of care as they move from hospital to community. Commitment procedures should reflect this need. We feel that the courts should be better apprised to the mental health system and the whole problem of severe mental illness.

374 Josephson: What do families experience in Fairbanks, being far from API? What happens as the family member enters the system?

389 Denardo: First of all, there aren't very many involuntary commitments from Fairbanks because we do all we can to convince the patient that they should go in on a voluntary admission. It's emotionally easier because the court procedures are skipped. We then have to pay for transportation to A.P.I. I think this is a legislative oversight. When there is an involuntary commitment, the patients airfare is paid to Anchorage. We have asked for designated beds. We desperately need a psychiatric unit here in Fairbanks. There are approximately 200 chronically mental ill people in this area. We have no half-way houses or programs. The Community Mental Health Center struggles along on a few dollars. They have a small day treatment program, but it's insufficient for the needs of the community.

421 Denardo: Because of the high cost of travel, meals, hotel accommodations, rent-a-cars, etc., I am only able to visit my son once a month. We feel that the most important part of treatment for the patient is proximity to family and friends.

477 Denardo: Twenty years down the line, we will look at the neuroleptic medications as pharmaceutical labotomies. With this medication, the patients are not cured. They are put into a medicated miasthma. They can't move. Patients say that the medication makes them feel unpleasant, sick, and tired. My own son was taken off the medication because he couldn't get out of bed. This is the condition in which he returns home.

510 Josephson: For the schizophrenic, is it the only thing we have?

559 Denardo: There are no other therapies that professionals are using at this point. At this time, more than 20% of the patients don't respond to this medication. Some patients do come out of their psychotic state, but many others fall into the pharmaceutical labotomies. Eventually, all patients develop a nervous disorder, which is totally irreversable. In many cases, the liver of the patient is ruined.

601 Josephson: Do you have any anxiety that the language, 'a person whose thought processes, perception of reality or judgment is substantially impaired', could be abused by commiting people who are eccentric, etc.?

610 Denardo: No. The screening process is cumbersome and is so comprehensive that I can't see an eccentric person being committed.

621 Josephson: Is your organization part of a national group?

629 Denardo: We are part of The National Alliance for the Mentally Ill.

683 Denardo: There is inappropriate jailing of mental ill patients. People having psychotic crisis are treated as criminals. Once they get into the criminal system, it is quite hard for them to get out of it. They get on probation, they get put into A.P.I. and know that when they are released, they have to return to jail for breaking probation. They, in turn, have no incentive to be released for A.P.I.

740 End of Side A. Turned to Side B

001 Cathleen Nixer, Nurse Manager, Psychiatric Inpatient Unit, Fairbanks Memorial Hospital: Many of the problems we face with the mental health system, is based on a premise that the mental health service delivery system in Alaska is decentralized, when in fact, it is not. When the Mental Health Law was passed in 1981, there was only one in-patient treatment facility in the state, A.P.I. Today, there still remains only one designated in-patient treatment facility in the state.

103 Nixer: The easiest way for a mentally ill person to receive treatment would be through the commitment process. They at least receive care why the legal process is taking place. It's sort of a Catch-22 situation, since we encourage people to accept voluntary treatment, yet we provide no funding for this treatment.

210 Moss: What is the average number of patients in the Fairbanks facility?

216 Nixer: Our average daily count runs around 7 to 8 patients. We have an 11 bed in-patient unit, with a proposal for 1985 for 17 beds.

270 Josephson: What is the longest patient stay you've experienced?

274 Nixer: Approximately 30 days.

305 Moss: Will the 17 beds be additional beds?

308 Nixer: Yes.

318 Moss: Are you receiving any federal funding?

326 Nixer: Sometimes patients are eligible for the standard medicaid programs. We would like to see patients who may voluntarily elect to seek their treatment after a commitment process in Fairbanks, which is close to their home.

458 Maureen Phillips, Board of NARA: The designated bed problem has come up in a recent meeting with the NARA Board. The University of Alaska health coverage for mental illness does not allow for patients to be admitted to anything other than a "designated mental facility", not designated medical floor a hospital. I feel it is important that something be done about the designated bed situation here in Fairbanks.

491 Josephson: That appears to conclude the testimony this afternoon. We will make minutes of this meeting available to our colleagues who are absent today. Thank you very much for coming.

538 Meeting adjourned.

Senate Health, Education & Social Services Committee
October 14, 1983
Anchorage

TOPIC: Mental Health Commitment Bill (Work draft of "An Act relating to the treatment of mentally ill persons.")

ATTENDANCE: Senators J. Josephson (Chairman), R. Halford
Excused - P. Fischer; Absent - V. Fischer, H. Moss

The hearing was commenced at 9:15 by Chairman Josephson.

Introductory remarks by Chairman Josephson:

Previously we've heard testimony in Anchorage and recently in Fairbanks on this issue.

This new draft incorporates ideas from Department of Health and Social Services, family groups and others, particularly those who work with troubled children.

New draft incorporates these changes: involvement of correction system is reduced in terms of dealing with the mentally ill; age change from 14 to 18; time computations changed from 21-90-120 days to 30-90-180 days for commitment periods; commitment period for minors changed from 21 to 30 days; records can be made available to law enforcement agency if substantial concern over any danger to community; qualifier added to right to privacy and personal possessions - if professional in charge determines not in the best interest of patient or will pose a threat to safety, visitors and telephone calls can be denied; approval of psychologist would be added requirement for patient wanting to change from involuntary to voluntary; court proceeding would be as informal as possible; family and guardians would be notified if patient is absent without leave; form consent required of parent or guardian of patient's right relating to alternative treatments; and notification of parent or guardian of discharge plan.

Other areas you may wish to consider today; hearings for minors; equal protection of the law relating to minors; time period commitment for minors; designated facilities; involuntary outpatient commitment; use of correctional system for mentally ill; and transportation costs for voluntary committed people where costs are paid for as required by statutes.

40 Jerry L. Schraider, M.D., Alaska Psychiatric Association

Appreciate the hearing being held, general reaction to working draft is supportive.

Have often been frustrated and confused over commitment law, mental health professionals are not all legalistically minded, don't have available legal counsel when working in these situations (often crisis situation) and must proceed best we can in interest of patient. Because of confusion, believes there's been some people that should've been committed who were not.

Will study draft further and hopes it will be submitted as legislation.

170 Ed Essa, Staff, Rep. Mae Tischer

Submitted letter addressed to Senator Josephson by Rep. Tischer stating that extensive research has suggested that nutritional deficiencies have a correlation with mental illness and that when deficiencies are identified and treated, improvements in the mental health of clients are made. Propose that the draft bill require extensive and mandatory nutritional analysis of each client be made upon admittance. This way the client is treated both mentally and physically.

190 Deborah B. Geeseman, M.D., private psychiatrist (formerly did work with children at API)

Supports most of what's in the bill. Suggested minor changes - 1) Pg 5, ln 19; instead of "21 days" should be 30 days. 2) Pg 4, ln 7; "the person" should be self.

Need a better working relationship with police force and understanding of what goes on with commitment laws.

Admission of minors - child under 14 cannot remain in hospital for evualation or treatment for no more than 21 days (under current law) without having a commitment hearing. An adult who wants to be voluntary committed may stay in hospital as long as they want or treatment facility deems necessary. Then if they want to leave hospital, it becomes a legal issue.

For children, often a good evualation cannot be made until after 3-4 weeks. Limited resources are available for treatment of children in Alaska. Only have one facility for extensive psychiatric treatment. Have some facilities for conduct and behavorial management of children (but full and have a waiting list).

260 Supports change in age from 14-18.

Pg 2, lns 23-29; not sure you need any of these three criteria, one just needs to make sure the person is mentally ill or gravely disabled. Or if it remains in #3 (pg 3, ln 1) should be "deteriorate further if" not "treated" (add not to sentance).

290 Sen. Josephson - While at API you noted that severe psychosis does not appear that often below the age of 14, correct?

Yes.

Sen. Josephson - What additional facilities do you feel Alaska needs for young children?

Difficult in state with our small population and distance from other states (where we could jointly share use of facilities). Presently we don't have a sizeable population of psychiatric young children. When we do, they will need a place, the only facility we have now is API. Would like to see other facilities that would address more extensively psychiatric needs of children.

PART II

As draft now stands, court has to get involved in 30 days, recommends 30 days be taken out, child could be a voluntary patient.

Many times children need evualation when they encounter some trauma (ex: divorce of parents). If that evualation goes beyond the time limit set, they could end up with commitment as legal statement on their record. If it remains on their record, can hamper their future.

Pg 3, Section 47.30.695; support it but has trouble with the wording. #2, lns 18-21, part (a)(b) (lns 22-29) - believes it to imply if child is dangerous, can still discharge them against medical advice. Dosen't feel its consistant. #2, ln 18; should read "treating physician," release of (should be added) "the minor" would be seriously detrimental to child's health that (should be added) "the treating physician may". (b) lns 26-29 the minor is likely to cause serious harm to self or others, or there's reason to believe the release could place the minor in immediate danger (should be added) "refuse to discharge".

60 Joseph Reum, Handicapped Services Coordinator, Municipality of Anchorage

Pg 4, ln 26 - "commitment hearing, to be held if needed", Who determines need?

Sen. Josephson - Depends whether patient is voluntary or involuntary.

80 Dr. Conrad, Superintendent, API

Submitted memorandum on admission statistics for FY'83.

Out of 1013 admissions, 500 were voluntary, 36% came involuntary under Title 47. Out of 100 involuntary patients, 73% have dropped out of involuntary channel before 72 hour limit.

Agree with Dr. Geeseman's comment on page 3 that paragraph 2a is inappropriate, not allowed that option with an adult.

Under present statute, cannot release information on history of violence to law enforcement agencies. In our judgement, release of this information (when there's concern about safety) might be helpful.

140 Patient would be better served by expeditious entry into treatment using physician's certificate. Most times used is after a suicide attempt.

150 Sen. Halford - In analysis of American Psychiatric Association guidelines, we don't allow certain types of evidence, we protect communication between patient and doctor. What kind of a problem does this bring up in involuntary commitment?

Has caused a problem by not allowing hearsay evidence at commitment hearing. Often it's highly relevant and meaningful evidence but due to rules of evidence not allowed because it's hearsay.

180 Often relatives and other people are frightened to testify for fear the person being committed will hold a grudge or seek revenge later. Also consider some people (to testify) live far away (would be expensive for transportation cost).

200 Sen. Josephson - What happens during, example a domestic conflict and people exaggerate testimony or state it falsely?

When it does occur, then don't rely on element of danger but fall back on object of evidence of mental illness. Do not proceed to commitment hearing if lacking evidence of mental illness.

210 In vast majority of cases, most do not go forward to hearing, and where there is mental illness, majority of patients accepts need for treatment. When cases do go to court, public defenders and probate masters become very involved.

240 Sen. Josephson - What is treated as confidential?

Commitment hearing itself is confidential.

260 David D. Samson, M.D., Psychiatric Supervisor, Anchorage Community Mental Health Center.

Mentally ill are more prone to be brought in for disturbing peace, public nuisance kinds of things, where their liberties are not essentially protected.

Concept of outpatient commitment should be addressed. What do you do when outpatients don't show up for their scheduled appointments?

Generally supportive of draft and comments that have also been made.

PART III

Voluntary medication on outpatient is a problem. Sometimes people are crafty enough to manipulate the system and be released (these are the dangerous ones).

30 Natelie Gottstein, Executive Director, Alaska Mental Health Association

Commends Committee for making changes, particularly inclusion of physician to be able to institute commitment procedures and redifinition of gravely disabled.

Pg 2, ln 10; concerned about definition of "timely", what's considered timely?

Dr. Conrad - Would interpret to be 8-12 hours.

70 N. Gottstein - Pg 16, ln 5; definition of mental health professional - important people working in the bush (social workers, etc) be included in this definition. A further clarification of social worker might be in order due to so many areas of social work.

90 Sen. Josephson - There's another bill on licensing of social worker and we may run into some difficulty with that.

100 Sen. Josephson - Is there an official position by Mental Health Association on this?

Not on this, but we will make recommendations before January.

Sen. Halford - What does Association think in terms of communication between doctor and patient, should be available in commitment hearings or not?

Don't have an official position. My opinion - if hearings are closed, then in very specific and well defined instances, that privilege should be opened. In individuals right to receive treatment, the doctor's opinion certainly is an important matter.

Sen. Josephson - Question of changing or relaxing rule of confidentiality, would it have the effect of causing people not to tell doctors what they would otherwise say? Or would it have a useful affect in bringing these matters out into the commitment hearing? The real danger would be if patients refused to give information to their doctors for fear it would be used against them (in court). That people shouldn't be afraid to see a psychiatrist when they have problems.

These relaxations in confidentiality need to be carefully worded, possibly be limited to psychiatric people for involuntary commitment.

Dr. Jay Verkozen, clinical psychologist (private practice)

Pg 13, lns 27-28; issue of psychosurgery, lobotomy, or other comparable forms of treatment. Not specific with other comparable forms. Consider these types of barbarisms and should be done away with. Psychosurgery has been abused.

PART IV

Sen. Josephson - (to Dr. Conrad) Has there been any record keeping in Alaska of psychosurgery or lobotomy given?

Dr. Conrad - No, the only way would be to ask all the neurosurgeons. Electroshock - no one to my knowldege at API has been administered with it.

J. Verkozen - But it does go on regularly at Providence.

Pg 14, lns 19-23; suspension of people's rights; if you're going to do something to someone, need to be clear about it with the person and if it's not in their interest to know about it, then it shouldn't be done.

You can't treat people psychologically unless you get them involved in it. If somebody might be better off with something, it dosen't mean you can force it on them.

Pg 8, ln 20 (#4) "efficient" - efficient for what? For commitment? For civil liberty?

Pg 8, ln 15 (#2); Right to view and copy all petitions - they should be given copies and helped to understand it.

Pg 12, lns 25-27; good point that family or guardian be notified on patient's absence.

Pg 11, ln 14; Disagree with 180 days for commitment, more advantageous for longer length of time.

Pg 5, ln 22; "gravely disabled" - too broad.

Pg 6, lns 4-5; replace "maximum extent possible" with absent of violence.

PART V

Dr. Conrad - Two cases of patients at API treated involuntary: 1. if violent to themself or to others; 2. severly catonic people (who don't eat or drink)

J. Verkozen - Pg 6; objects to (e)(2) and (3), lns 14-18; aren't necessary.

Pg 13, ln 9; objects to 72 hours, procedure should be speeded up rather than be long.

Pg 4; notion of deputizing all physicians in state so they can commit someone. This authority should stay with the police. All physicians shouldn't have this type of power. You're just making a cosmetic change, you're still locking someone up.

Dr. Glade Birch, Acting Director, Anchorage Community Mental Health Center

It's a good document.

Balance of right of people to receive treatment and their civil liberties. That's the balance we're maintaining.

Regarding who has the authority to commit someone, remember we're talking about all Alaska (including the bush). Physician does have degree of training in recognizing mental illness, where police officer dosen't. To protect civil liberties of people, it's better for at least someone qualified in mental health to make determination of commitment.

As a neuropsychologist, be very careful before you write into statute prohibitation against treatments.

Individuals released as outpatients from API, isn't a comfortable solution to it. You may consider transitional living (intermediate type of commitment). (A transitional facility where they could receive supervision.)

Has reservations about having licensed social workers being able to commit someone (pg 4). You may get a social worker who has no actural diagnostic abilities.

Topic of confidentiality. Two solutions: 1) treatment (must maintain confidentiality in this); 2) examination with notice for commitment (person knows it is commitment, does not have to disclose information, takes away effectiveness of examination).

Sen. Josephson - What a person discloses when he wants treatment is going to be in stream of what is revealed in commitment process, no way to unlearn that material.

That's why I tried to make the distinction. The disclosure of patient's statement when presenting himself for treatment needs to be protected. If someone is going to testify at commitment proceeding, may have to be a separate examination by another person.

200 Steve Harrison, Regional Administrator for South Central Region, Division of Mental Health

Agrees with Dr. Birch in including mental health professional in emergency detention. If we use a mental health professional, we should use those with national accreditation for social workers.

Law is workable, changes are good.

240 Frances Purdy, Mental Health Program Coordinator, Behavorial Health Division, Municipality of Anchorage

Thanks for nonsexist law.

Pg 3, Part a; lns 22-25 should be deleted, they should not be able to release someone who is dangerous.

Pg 12, lns 25-27; good idea to notify parents or guardians of patient's absence. May also want to add anyone that has been threatened by patient, also may add immediate notification instead of 3 hours.

Pg 14, lns 24-27; good idea.

Consider what other states have done with mental health professional being the office of involuntary commitment. Probably more important for Anchorage than for the bush. Impractical to have officer in bush for involuntary commitment. In Anchorage, specifically we're beginning to need an area of expertise in just emergency cases. Check into Washington state statutes. They have designated person who is trained to do reading of rights, is impartial, not hired by institution or other agency.

PART VI

Jim Parsons, Manager, Behavorial Health Division, Municipality of Anchorage (former member of licensing board of psychologists)

Concurs with Purdy's opinion of release of minors when we don't do that with adults.

Most of my concerns have been covered.

Pg 16; licensing law for psychiatrist is generic rather than speciality. There are some psychologist trained in areas other than clinical who may not have expertise in mental illness at all. May be a good idea to say licensed by state with adequate clinical training or something similar rather than clinical psychologist since we don't license in that sense.

Mention of social workers appears to be too broad. Perhaps should use national accreditation with it. Too broad to say experienced in field of mental illness rather than having some type of specific training in that area.

30 Cecilia Kleinkauf, Alaska Chapter, National Association of Social Workers

Pg 16; issue of professional social work, as included in definition of "mental health professional" - just received the draft copy and will have to be reviewed by board before Assoc. takes a position on it and makes recommendations.

Admission of minors at API - the bill, as it is, would constitute age discrimination on state in regards to minors. Minor has a constitutional right to liberty equal to adults. Unconstitutional to deprive minor of right to liberty for a greater amount of time than an adult (in institutionalizing). We have repeated this point at every hearing.

One item not covered in bill is protection of court for child's right regardless of his/her parent's right. Does not provide the child the right to a court hearing which court then hears evidence as to institutionalize the child. The bill leaves the right to child's parents and to mental health professional. Sometimes parents don't act in best interest of their children.

There are a number of children institutionalized at API whom mental health professionals say these children are not probably mentally ill but "there's no place else to put them".

The previous director of State Division of Mental Health testified at Senator Parr's Committee stating it is frequently difficult, if not impossible, to make definitive diagnosis with respect to mental illness in children.

Sen. Josephson - Which is an explanation as to why we have a longer period to evualate. I don't think the Constitution requires that you cannot make classification if there is a rational basis for it.

Why is it ok to institutionalize a child without court's protection in mental illness, and in statutes of state, it's not ok to institutionalize without court's protection when it comes to delinquincy?

PART VII

Grandfathering clause on social worker - the language and amendments proposed by National Association Social Work Chapter. Only spoke to baccalaureate level of social work. Individuals will not be grandfathered at master's level of social work with training in any other field. Anyone who is grandfathered, who wishes to be called a social worker and be licensed under social work law, could at maximum, only be licenses as a baccalaureate level. Only level grandfather amendments refer to.

Meeting was adjourned by Chairman Josephson at 12:50 pm.

Dear Senator Josephson:

I have read the proposed draft bill that you are submitting to the legislature in the forth coming session. It contains precisely those very important amendments and stipulations that I have been trying to encourage for a number of years regarding mental health commitments.

If you will check the admission record of Sitka over the past six and a half years, that our clinic has been here; you will see that we have an extremely low admission rate. This is because we have treated people in our local hospitals rather than sending them to API. Often in doing so we have had great difficulty getting under the 72 hour limit before having to go into the court room. Usually within 72 hours, I am able to obtain the person's voluntary commitment but on those few cases where I am not able to do so we end up sending some to API that we could very easily have treated in our local hopitals.

Your bill will very nicely resolve that problem and should, if we in the mental health field do our part, reduce the admission rate to API dramatically.

Congratulations on your good work.

Cordial regards,

S. T. Laughridge

RE: THE MENTAL HEALTH COMMITMENT LAW

Dear Senator Josephson:

We urge you to incorporate the changes proposed by the Department of Health and Social Services and the Alaska Psychiatric Association and in particular the amendment to add licensed psychologists in changing procedures for emergency detention for evaluation in Sec.47.30.705.

In our experience the present state of things in which a peace officer must be convinced that there is probable cause to believe that a person is gravely disabled or is suffering from mental illness and is likely to cause serious harm to himself or others and should be taken into custody for evaluation is highly precarious. Just recently we had a case of a possible suicide and homocide situation in which help was delayed past a critical point because the peace officier did not believe the physician and licensed psychologist who were urging intervention. When it's a matter of arranging a flight before dark every minute is crucial. It is perhaps unfair to expect a peace officer to understand the dynamics of depression or paranoia without any particular training when years of post-graduate training and supervised experience are needed for a psychologist to do so. It is time Alaska made better use of the unique qualifications that psycholcgists do provide for intervention in and prevention of tricky situations.

Sincerely,

Judy Ringenson-Knutsson.

Juneau, Alaska 99811

Dear Senator Josephson,

I am writing relative to Senate Bill No.346 related to certain revisions of Title 47 of the Civil Commitment Statutes.

I am strongly in favor of the revisions relative to admission of minors, changing the age from 14 to 18 years of age.

The procedure for emergency detention for evaluation is improved by allowing the mental health professional in addition to a police office to have an individual taken into custody. The procedure relative to placement or utilization of the jail for protective custody and holding prior to transportation is appropriate and is an accurate description of the need for rural areas such as Kenai.

I am also in favor of the use of a 30 day as opposed to a 21 day commitment procedure.

I sincerely appreciate the opportunity to comment on the revisions in this Statute.

Respectfully Submitted,

Paul E. Turner, Ph.D.

RE: Chronic Mental Ilness

Dear Senator Josephoson:

The enclosed article tells you who I am and what I am about.

During last week's teleconference with our Fairbanks legislators, I addressed short comings in Chapter 84, Laws of Alaska, relating to mentally ill persons.

1. Families should have a greater role in and be consulted with regard to commitment procedures.

2. A broader criteria for commitment should be studied, based on ability to function rather than just being a danger to self or others.

3. Commitment and guardianship procedures should be redefined with a view to creating a less adversarial situation between patient and family.

4. Mentally ill patients should receive better continuity of care as they move from hospital to community and commitment procedures should reflect this need.

In this week's teleconference we will address the glaring lack of hospital space for our chronically mentally ill relatives. While other states are grappling with problems of closed wards and community acceptance, Alaska struggles to get patients out of the corridors and into the wards! The only State facility, Alaska Psychiatric Institute, is perpetually overcrowded.

The Fairbanks Memorial Hospital is willing and able to become a designated treatment facility for psychiatric patients. I don't understand the mechanisms involved in such a designation and would appreciate your telling me. I do understand the urgent need for such a facility in the Interior.

I urge you to work toward this goal as a positive step toward a better mental health delivery system for the entire State of Alaska.

Sincerely,

Ann F. DeNardo

RECOMMENDATIONS FOR AMENDMENTS TO ALASKA'S COMMITMENT ACT

The Commitment Act, Chapter No. 84, Laws of Alaska, has caused a great deal of pain to families already engulfed in an ultimate tragedy--the loss of a loved-one; loss through the ravages of a disease as old as mankind, and for which we know no cause or cure.

We are familiar with the Commitment Act on a experiential level and on paper and make the following recommendations for amendments:

1. Families should have a greater role in and be consulted with regard to commitment procedures.

2. A broader criteria for commitment should be studied, based ability to function when thought processes, perception of reality or judgement is substantially impaired.

3. Commitment procedures should be redefined with a view to creating a less adversarial situation between patient and family.

4. Mentally ill patients should receive better continuity of care as they move from hospital to community and commitment procedures should reflect this need.

5. The courts, the judiciary, should be better apprised of the mental health system.

The above five points are overall conclusions. Some specific changes by page, section, and line were given in testimony before Senators Josephson and Fisher of the Hess Committee in Anchorage on March 19, 1983.

The above five points are still pertinent and present a good summary of the attached material presented in testimony before the HESS committee on September 23, 1983, in Fairbanks, Alaska.

TESTIMONY BEFORE THE SENATE HESS COMMITTEE
Re: Mental Health Commitment Law
September 23, 1983 - Fairbanks, Alaska

The families of severely mentally ill victims have worked with the Mental Health Commitment Law for two years. We wish to convey our position regarding the bill.

Section 47.30.660. This section sets out the powers and duties of the Department of Health and Social Services. Paragraph (4) of this section calls for the Department to designate, operate and maintain treatment facilities...to provide...care and treatment for the mentally ill. A treatment facility is defined in 47.30.915(15). In spite of the directive to designate treatment facilities, the API remains Alaska's only such facility.

Section 47.30.670. This section sets out standards for voluntary admission. A patient who accepts voluntary admission can leave the hospital anytime "against medical advice," or AMA. This is why there are so many voluntary admissions as opposed to involuntary. A psychiatrist might do a screening at this point to determine a patient's ability to function and make these decisions.

Section 47.30.705. This section addresses emergency detention for evaluation. It states that a police officer"...may cause the person to be taken into custody and delivered to the nearest evaluation facility. A correctional facility may be used as an emergency evaluation facility if an evaluation facility is not available... (and) the peace officer shall...be interviewed by a mental health professional at the facility." There are no mental health professionals at the correctional facilities.

Section 47.30.710. Examination. This section states that a person so placed in a correctional facility shall be examined and evaluated within 24 hours. This puts a person in jail for 24 hours because of an illness he cannot control. There is no other illness where, due to the illness itself, a person is incarcerated!

Section 47.30.715. Acceptance of Order. In this section the court is ordered to set a date for hearing and notify the respondent's attorney. There is no directive for the attorney to make an effort to see the respondent. Often the first contact the respondent has with his attorney is in the courtroom itself, immediately preceeding the hearing.

Section 47.30.735. This section sets out the civil procedure for a 21 day commitment. These procedures should be redefined in order to create a less adversarial situation between patient and family. Families become the caretakers following hospitalization in 50-55% of the cases. It is important to understand that hospitals do not cure patients. They are only stabilized with neuroleptic medications and returned to the family with their illness in tact, and the added belief that the family has turned against them.

Judicial procedures are either civil or criminal. Commitment procedures are civil. Families feel it might be possible to create a new area within which commitments could be handled. We request the Judiciary Committee to study this concept with a view toward lessening the adversarial approach.

Section 47.30.790. This section deals with absence without leave. If a patient is absent from a treatment facility without authorization a peace officer is instructed to take the patient into custody and return him to the treatment facility. This section should include a provision that the family or guardian be notified of such absence with a specified time, say 3 hours.

Section 47.30.795. This section addresses involuntary outpatient care. Paragraph (c). It states that if it is determined that respondent needs inpatient care due to a critical condition, oral and written notice that he must return to a treatment facility within 24 hours must be given him. If the patient is experiencing thought disorder this gives him 24 hours to get out of town. This section further states a police officer shall pick up the patient if he has not complied with the notice. The respondent is not a criminal, to be served and treated as a criminal. We object to the constant posture of addressing mental disease as criminal.

Section 47.30.825. This section deals with patient rights. Paragraph (6) of this section prevents psychosurgery, lobotomy, or other form of treatment without specific, informed consent of the patient and a court order. We would like to see a provision included that would also require specific informed consent given by "an adult designated in accordance with 47.30.725". (This is an adult designated by the respondent.)

Again, paragraph (8) of this section should insure a copy of the discharge plan is given to "an adult designated in accordance with 47.30.725". Families rarely know of any discharge plan and it is the nature of the disease that patients will not follow through without help.

Section 47.30.845. This section deals with confidential records. Paragraph (2) of this section makes it possible for an individual to whom the patient has given written consent to receive records and information on the patient. This release of records should be dated within a specified time period,-say-one year. This release of records to a designated individual should not be open-ended, but lapse within a restricted time frame.

Section 47.30.870. This section deals with transportation of patient and escort to the designated facility following involuntary commitment. (In this State, of course, this means a trip to Anchorage.) There is provision authorizing the Department to pay for transportation of patient and escort the API for INVOLUNTARY commitments only. Provision should be made to authorize payment of transportation costs for VOLUNTARY commitments as well. At present the family, or the patient, must bear this cost. This creates a continuing financial burden for families trying to remain "case manager" over the years. The continuing financial burdens encourage families to give up attempts to maintain relationships beneficial to the patient.

Section 47.30.875. This section addresses nonresident patients and the return of a mentally ill resident of this state who has been placed in a facility outside of this state. Paragraph (c) of this section is the only section of this Act which mentions the importance of maintaining family relationships and encouraging visits beneficial to the patient. It is ironic that this important approach to treatment is mentioned only under such subtitle as "nonresident patients". We would like to see the encouragement of more family involvement.

Section 47.30.915. Definitions. Paragraph (7) defines "gravely disabled" and paragraph (10) defines "likely to cause serious harm". It is the contention of everyone involved with this Act that these definitions must be broadened. This is such a complicated and emotional issue that agreement is difficult. As a consequence many people who need mental health treatment desparately are not being served. Instead of waiting for a person to commit a crime, or attempt to commit a crime, we recommend the following criteria to enlarge the definition of a mentally ill person for purposes of providing treatment:

(7) "gravely disabled" means a condition in which a person, as a result of mental illness,...
(B) or is not receiving such care and mental medical treatment as is necessary for health and safety, of a person whose thought processes, perception of reality or judgement is substantially impaired.

2 or 3 other States

We would like to see a study of other states' commitment laws in reference to their criteria for commitment.

ALASKA PSYCHIATRIC ASSOCIATION

ALASKA DISTRICT BRANCH
of
AMERICAN PSYCHIATRIC ASSOCIATION

February 4, 1983

Senator Joseph Josephson
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Josephson:

The Alaska District Branch of the American Psychiatric Association is a professional organization which represents the majority of the physicians in Alaska who are specialist in the field of psychiatry. The membership is composed of psychiatrists who work in both the private and public sector. The members of our organization have an ongoing interest in any subject which affects the treatment of mentally ill individuals. As a result of this interest we were actively involved in the development and passage of the Alaska Statute for the Civil Commitment of the Mentally Ill (AS 47.30). Our national organization has also been very active in monitoring the subject of civil commitment and has recently developed guidelines on this subject which we recently provided you.

The Alaska District Branch supports fully the objectives of the current Alaska Statute on Civil Commitment of the Mentally Ill which became law in October of 1981. After the first year of experience with this new law and after discussion with judicial and civic leaders, we wish to recommend certain amendments to the law which we believe will assure that its worthwhile goals are more effectively achieved. These amendments are provided in the enclosed material.

The experience during the past year has indicated to us that the following refinements are needed:

1. The Definition of "Gravely Disabled" needs to be expanded to recognize that some patients, if left untreated, will needlessly lose their capacity to be self-reliant.

2. There are many instances when physicians have clearly psychotic or suicidal persons under care in an emergency setting, and need to arrange for their hospitalization at the Alaska Psychiatric Institute. The current requirement that a peace officer be called to form an independent judgement and duplicate work already accomplished is unnecessarily cumbersome. Allowing the physician the authority to arrange for emergency detention would simplify this procedure. When family and friends are willing and able to transport the patient, the peace officer would be free for more serious business.

3. The patient and society could be better served if the rules governing evidentiary and procedural matters at commitment hearings under this law were promulgated so as to facilitate a more informal and efficient presentation of all the relevant facts.

4. The definition of "likely to cause harm to self and others" has set such a rigid standard that some of the most dangerous clients have not been committed. The issue of dangerousness is a complex one and the judge must be given the opportunity to weigh both the magnitude of the risk and the magnitude of the harm. Also, the law needs to recognize that harm to others may include property.

5. An unanticipated consequence of the current law, has created an undue hardship in the care and treatment of children under the age of 14. The right to be voluntarily hospitalized and treated, which is available to everyone over the age of 14, is curtailed for children and limited to 21 days. After 21 days, even if the parents, the child, and the treating physician agree that continued treatment is needed, the law forces them to obtain an involuntary commitment.

6. Since very few persons actually require involuntary commitment, it would facilitate their care and treatment if the law recognized that patients in this group lack the necessary understanding to accept treatment voluntarily, and authorize the use of medications and other treatments under the direction of a licensed physician subject to the medical rights already guaranteed the patients in Article 9 of Section 47.30.

7. In some instances the law requires the staff of the hospital to respond "immediately" when, in practice, a "timely" response is all that is practical or needed.

As we gain experience with the new commitment statute, I am sure we will have other suggested changes. However, for the present time, we feel these changes are urgently needed to iron out some of the procedural problems and to improve the care and treatment of the mentally ill. We would be happy to provide any additional documentation you may need. We hope you will consider putting the attached amendments in bill form and submitting them to the Legislature.

Sincerely,

Carla Hellekson, M.D.
President
Alaska Psychiatric Association

HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

October 12, 1983

The Honorable Joe Josephson
Member of the Alaska State Senate
Anchorage, Alaska 99501

Dear Senator Josephson:

Thank you for your kind offer to submit a suggestion to your committee during deliberations on the "Mental Health Commitment Law," scheduled for Thursday, October 13.

I am sorry that House HESS hearings in Fairbanks prevent my discussing this matter with your committee personally; however, I have asked Ed Essa to present this letter to you for your consideration.

In recent years, medical science has come a long way in better understanding mental illness. Research has uncovered some very interesting facts. Perhaps the most intriguing discoveries relate to the effects vitamin and other nutritional deficiencies have on our mental well-being. Extensive research has suggested that nutritional deficiencies have a correlation with mental illness, and that when deficiencies are identified and treated with vitamin therapy, some startling improvements in the mental health of clients are made.

Given this information and with the knowledge that our mental health is tied intricately to our physical health, I am proposing that the draft bill you are considering be adapted to require an extensive and mandatory nutritional analysis of each client upon admittance; and that these findings be used as the basis for appropriate intensive theraputic treatment, along with other applied therapy. In this way, the <u>whole</u> client is treated -- both mentally and physically.

Your favorable consideration of this suggestion may well serve to improve the methods of treating many Alaskans who want to be healthy, while helping to induce a marked decrease in the recurrence of mental illness.

Senator Josephson, thank you for extending me the courtesy to be heard today. I join with many others in seeking a continued dialogue on this encouraging new approach to a long-standing and seemingly worsening

problem that faces our state and our nation.

Respectfully,

Mae

Mae Tischer

Anchorage, Alaska 99501

Dear Senator Josephson,

I am writing to you relative to recent Senate HESS Committee Hearings on the Title 47 Commitment Statute.

I am writing to request that licensed psychologists be given the same prerogatives as physicians within the Statute. For example in 47.30.705, the recommended change is that emergency detention for evaluation can be made by a police office or a physician. Generally, however, licensed psychologists are much more able in terms of training, expertise, education and practice to be able to make determinations of need for emergency detention. It would seem wise to include this independent profession in this activity. There are also other sections that are being amended in Title 47 adding the medical profession as the identified entity, for example 47.30.815(b)(4). In those instances I think that clinical psychologists should also be included.

Thank you very much for this opportunity to correspond with you relative to this issue.

Respectfully,

Paul E. Turner, Ph.D.

Cordova, Alaska 99574

Nov. 5, 1983

Senator Joe Josephson
Pouch V
Juneau, Alaska 99811

Dear Senator Josephson,

I am writing in regard to the proposed changes to the Mental Health Commitment Law. My concern is that the proposed law will not allow a licensed psychologist in Alaska to initiate emergency detention for evaluation (under sec. 47.30.705).

Here in Cordova, our health team includes a licensed psychologist working in a mental health clinic which is a department of the hospital. The psychologist is often the person most immediately involved with patients who might be a danger to themselves or to others. It is imperative that this professional be allowed to initiate emergency detention for evaluation in cases with serious potential. It has been our experience that the psychologist often works closely with the local police department to defuse crisis situations in Cordova.

Thank you for your attention.

Sincerely,

Oliver S. Osborn MD

Oliver S. Osborn, M.D.

October 25, 1983

Senator Joe Josephson
1526 "F" Street
Anchorage AK 99501

Dear Senator Josephson:

It has come to my attention that the Senate Health Education and Social Services Committee is reviewing Alaska's Mental Health Commitment Law of 1981 (SP100). I am essentially in support of the changes which have been proposed.

Under Section 47.30.705 regarding emergency detention for evaluation, I would recommend the following addition to the revised statute:

> "A peace officer or a physician licensed in this state or a psychologist licensed in this state who has probable cause to believe that a person is suffering from a mental illness and is likely to cause serious harm to the person or others of such immediate nature that considerations of safety do not allow initiation of involuntary commitment procedures set out in AS 47.30.700, may cause the person to be taken into custody and delivered to the nearest evaluation facility. A person taken in to custody for emergency evaluation may not be placed in a jail or other correctional facility except for protective custody purposes and only while needing transportation to a treament facility. The peace officer or physician or psychologist shall complete an application for examination of the person in custody and be interviewed by a mental health professional at the facility."

In addition, I would recommend that AS 47.30.815(b) (4) be further ammended to read:

> "A peace officer or physician or psychologist responsible for detaining or transporting a person under AS 47.30.700-47.30.915."

Alaska has a pool of well qualified psychologists whose competency and training have been carefully scrutinized by the Board of Psychologists and Psychological Associate Examiners as well as the Division of Occupational Licensing. Insofar as many rural mental health practitioners in the state are licensed psychologists, it would seem appropriate and expedient to include this professional group in the emergency detention clause. With regard to

familiarity with psychiatric disorders, conducting mental status evaluations, and determining the appropriateness of civil commitment, licensed psychologists are well prepared to handle the responsibilities involved in civil commitment in a professional manner.

Thank you for considering this input to the legislative process. I appreciate your consideration.

Paul L. Craig, Ph.D.
Psychologist, Director

March 6, 1984

RECEIVED

MAR 19 1984

Josephson,

Senator Joe Josephson
Pouch "V"
Juneau, Alaska 99811

Dear Senator Josephson:

The Alaska Mental Health Association commends the Senate HESS committee for undertaking the review of the Mental Health Commitment Statute. As you know, implementation of the current Statute which was enacted in 1981 has revealed some major problems which the current bill addresses. We wholeheartedly support this effort.

Our concern is that the mentally ill of Alaska receive the best available treatment in a timely manner, in their home community or as close as possible. We believe the procedures established by this Statute must protect individual civil/human rights AND provide for the protection of society. These goals must be accomplished in a manner that recognizes that the primary purpose of this statute is to enable individuals who are mentally ill to receive appropriate treatment. On the whole we believe the Bill does this quite well.

When we consider that mental disease is today's most common disabling condition, one of its least understood, one of its most difficult to treat and yet, the major disease group we spend the least amount of research dollars to study, we can see why the central purpose of the Statute must be to provide care and treatment.

We believe that the current Statute needed to be reviewed and improved. Before commenting specifically on the proposed changes in the Statute, we would offer the following proposal:

> Since one of the original purposes of the Statute was to provide for evaluation and treatment as close to the individual's home as possible, we suggest the Legislature conduct a study of the commitments during the past year to determine whether or not this purpose is being met. Another important purpose the Statute attempted to include was to provide for a timely judicial review and supervision of the commitment process. The study should also focus on the actual length of time required for judicial involvement.

With respect to some of the specific proposed changes, in AS 47.30.655-915 we have the following comments and suggestions:

#1 AS 47.30.690 Admissions of minors, line 12:

The limitation on the involuntary admission of a minor should be increased to 60 days. It is generally recognized that therapy with minors, when hospitalization is necessary, requires a longer average length of stay than do adults. Even this requirement will place a needless burden on the facility and the parents if they live in remote portions of Alaska.

#2 Sec. 47.30.705 Emergency detention for evaluations - Line 3:

The extension of the emergency detention's powers to all "mental health professionals" has both advantages and disadvantages. It greatly expands the numbers of people who will have the power in the bush areas. This will create the kind of flexibility that is needed to provide timely and local action. The disadvantage is that many, if not most, non-medical mental health professionals have not received training or experience in the legal and clinical issues involved in the commitment process. As a consequence, we recommend that these powers be somewhat more limited. The law should limit this power to (i) peace officers and (ii) physicians and mental health professionals who have had sufficient training to properly perform this function. In conjunction with this, we would like to see the establishment of a system to train and designate "mental health professionals" who will have the expertise to exercise this function. Although this will require an additional state expenditure, it should not be prohibitive.

#3 AS 47.30.730(b) - 30 day commitment, line 26:

The extension of the commitment to provide 30 days of treatment is recommended because it is a reasonable length of time considering the seriousness of these disorders.

#4 AS 47.30.735(b)(4):

The attorney member of our Board of Directors informs us this section does not make sense because the rules of civil procedure and evidence would not be "informal but efficient presentation of evidence" in that they are formal rules. It appears the intent is for the respondent to be given a choice between (i) the formal rules of evidence and the rules of Civil Procedure and (ii) an informal set of rules. The draft we have reviewed does not make this at all clear.

#5 AS 47.30.845(7) - Confidential Records, Line 7:

We feel that the "presumed mentally ill person" standard is (i) not defined and (ii) too broad. "Presumed" by whom? What does "presumed mentally ill" mean anyway? If the intent is to release records of former mental patients, that is what should be stated. If the intent is something else, that should be stated. In any event, the standard should be in language that is susceptible to clear interpretation and implementation.

#6 AS 47.30915 (7) - Definition of "gravely disabled":

We strongly support the passage of this amended language as many psychotic patients' symptoms prevent them from seeking the treatment which may restore them to a nearly normal state of mind.

#7 AS.47.30.915 (10) - Definition of likely to cause serious harm:

We strongly recommend the amendments to this section since, in our opinion, the former language created a "standard" which was too restrictive and led to persons being released who were actually dangerous.

Sincerely

Dr. Jerry Schrader

The Honorable Bill Sheffield
Governor
State of Alaska
Pouch A
Juneau, AK 99811

Dear Governor Sheffield:

Your Mental Health Advisory Council has been following the developments of Senate Bill Number 346 amending an Act entitled: "An act relating to the treatment of mentally ill persons." We are aware that many public hearings have occurred prior to its introduction January 11, 1984 by Senators Josephson and Halford. Additionally, individual professionals, the Alaska Psychiatric Association and the Alaska Psychological Association have had consultation and input into these revisions with strong support for these amendments. These amendments are thought to represent improvements in the treatment of adolescents and adults from the standpoint of both providers and consumers.

Your advisory Council heard today that this bill is being held "hostage" pending untold bargaining possibilities. Since these amendments would improve the quality of care and likely result in more efficiently and less cost for both the Mental Health and Judicial Divisions, it seems unfortunate to delay its enactment.

Your Mental Health Advisory Council recommends your support for the quick passage of this act. On behalf of all Council Members thank you for your consideration.

Sincerely,

Dear Senator Josephson:

The Legislative Committee of the Alaska Psychiatric Association has reviewed Senate Bill 346 -"An Act relating to the treatment of the mentally ill." We support the proposed amendments. We have one additional suggestion pertaining to page 18, line 24. We believe the inclusion of a period of experience for psychiatric nurses is a good idea, but we do not believe this should serve to eliminate a Masters Degree in Psychiatric Nursing from the list of mental health professionals. A simple "or" in line 24, page 18 would suffice to change this.

Thank you once again for your efforts on the behalf of the mentally ill.

Sincerely,

Jerry L. Schrader, M.D.

Juneau, Alaska 99801

Dear Dennis,

I have reviewed the work draft that would amend the current act relating to the treatment of the mentally ill persons and have the following comments.

Much of this work draft simply cleans up the language of the current legislation. (Apparently the law is going to allow for those rare instances when a female is mentally ill!)

Several areas in the work draft propose significant content changes. In all cases these content changes would significantly improve the current legislation.

1. AS 47.30.915 (7) and AS 47.30.915 (10) change the definition of 'gravely disabled' and 'likely to cause serious harm.' The proposed changes in these definitions, if enacted, would greatly improve the ability of the legal system and providers of mental health care to intervene appropriately in situations where emergency detention is in the best interest of the patient.

2. Section 47.30.705 This proposed change allows a physician to initiate the involuntary commitment procedures. This is an essential addition to the current legislation and entirely appropriate.

3. The other content changes (dealing with the detention and commitment of minors, etc.) also upgrade the current legislation and make it more workable.

Overall there are no objections in the changes proposed by this work draft. The content changes deserve support and would markedly improve the current legislation governing the treatment of the mentally ill.

I would recommend that the Alaska Hospital Association support a bill that reflects the content and intent of the work draft.

Sincerely,

M. J. Emmert, R.N.
Director of Nursing Service

STATE OF ALASKA

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER

BILL SHEFFIELD, GOVERNOR

POUCH H 01
JUNEAU, ALASKA 99811
PHONE: 465-3030

February 3, 1984

DOCUMENT #84-32

The Honorable Joe Josephson
Alaska State Senator
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Josephson:

RE: Senate Bill 346
(Suggested Amendment)

The language listed below is suggested as an amendment to Senate Bill 346 to allow persons under the age of 18 to be voluntarily hospitalized by their parents or guardians for additional 30 day periods. Under the existing statute, children and adolescents may not be voluntarily hospitalized by their parents or guardians for a period longer than 21 days even if they meet the criteria for hospitalization under A.S. 47.30.690. The amendment would rectify this oversight.

On page 4, line 3, Section 5 of Senate Bill 346, we recommend that the following subsection be included:

> "(c) Additional 30-day voluntary admissions of a minor under the age of 18 may be sought by parents or guardians if, in the opinion of the professional person in charge, the conditions under subsections (1), (2), and (3) continue to exist."

This amendment is considered especially important, even critical, in providing the necessary and appropriate level of care for this oftentimes fragile group of patients.

We will be happy to provide you or other members of the Senate Health, Education, and Social Services Committee with any additional information you may require concerning this proposed amendment as well as any questions you may have regarding our Position Paper which was submitted earlier.

Sincerely,

Robert London Smith

Robert London Smith, Ph.D.
Commissioner

American Psychiatric Association

GUIDELINES FOR LEGISLATION ON THE PSYCHIATRIC HOSPITALIZATION OF ADULTS[1]

These Guidelines Deal With:

Emergency Psychiatric Evaluation
Voluntary Admission
Involuntary Hospitalization
Right to Treatment
Right to Refuse Treatment
Patients' Rights
Legal Immunity for Mental Health Personnel

---

[1] These Guidelines for Legislation on the Psychiatric Hospitalization of Adults have been prepared and approved by the American Psychiatric Association in order to assist psychiatrists, legislators and the public in considering possible revisions of civil commitment laws. The American Psychiatric Association believes that these Guidelines constitute a responsible set of proposals which would improve the process of psychiatric hospitalization in many states. However, because local laws, community conditions, and medical practices vary, state and local psychiatric associations and individual psychiatrists may properly support provisions which differ in many respects from these general Guidelines.

ADDENDUM A-1

Section 1. SHORT TITLE

These provisions governing the psychiatric hospitalization of adults may be cited as Title I of the Mental Health Code.[1]

Section 2. LEGISLATIVE PURPOSES

This Act is intended to achieve and shall be construed so as to promote these legislative purposes:

-- To make available psychiatric evaluation, care and treatment to all persons who suffer from severe mental disorders and can benefit from treatment, and to encourage voluntary rather than involuntary admission whenever hospitalization is necessary;

-- To safeguard the legal rights of patients in a manner which will advance and not impede the therapeutic and protective purposes of psychiatric hospitalization;

-- To provide workable procedures for obtaining consent to and administering medications and other treatments;

-- To provide legal immunity for reasonable, good-faith efforts to implement this Act, and legal penalties for knowing, willful efforts to subvert the processes in this Act; and

-- To provide a statutory framework for the promulgation of regulations by the Department of Mental Health.

Section 3. DEFINITIONS

As used in this Act, the terms below shall have the meanings indicated:

"aversive therapy" means any treatment or procedure which, because it is believed to be painful or physically uncomfortable to the patient, is administered in order

---

[1] These Guidelines deal only with persons who may be hospitalized for psychiatric care and treatment under the civil commitment process; they do not deal with persons who may be confined for forensic evaluation or other purposes under the criminal justice process.

to reduce the frequency or intensity of a behavior; except that aversive therapy does not refer to verbal therapies, seclusion or physical restraints used in conformity with Section 10.F., or psychotropic medications which are not used for purposes of aversive conditioning.

"consistent with the least restrictive alternative principle" means that (1) each patient committed solely on the ground that he is likely to cause harm to himself or to suffer substantial mental or physical deterioration shall be placed in the most appropriate and therapeutic available setting, that is, where treatment provides the patient with a realistic opportunity to improve, and which is no more restrictive of his physical or social liberties than is believed conducive to the most effective treatment for the patient; and (2) each patient committed solely or in part on the ground that he is likely to cause harm to others shall be placed in a setting in which treatment is available and the risks of physical injury or property damage posed by such placement are warranted by the proposed plan of treatment.

"court" means the court or judicial officer designated under the laws of this State for the discharge of the functions described in this Act.

"emergency situation" means a situation in which the patient exhibits substantial behavior which is self-destructive, assaultive, or threatens significant damage to the property of others, or which indicates that the patient is suffering extreme anxiety amounting to panic, or sudden exacerbation of his severe mental disorder.

"experimental treatment" means any treatment other than one which is commonly accepted for treatment of the mental disorder involved or is supported by widely accepted scientific studies, and is provided by a qualified health professional; if such treatment poses a significant risk of harm to the patient.

"informed consent to treatment" means a knowing and voluntary decision to undergo treatment, evidenced in writing, and made by a person who has the capacity to make an informed decision, after the treatment facility has explained to the person the nature and effects of the proposed treatment.

"lacks capacity to make an informed decision concerning treatment" means that the person, by reason of his mental disorder or condition, is unable despite

conscientious efforts at explanation, to understand basically the nature and effects of hospitalization or treatment, or is unable to engage in a rational decisionmaking process regarding such hospitalization or treatment as evidenced by inability to weigh the possible risks and benefits.

"likely to cause harm to himself or to suffer substantial mental or physical deterioration" means that as evidenced by recent behavior, the person (1) is likely in the near future to inflict substantial physical injury upon himself, or (2) is substantially unable to provide for some of his basic needs such as food, clothing, shelter, health or safety, or (3) will if not treated suffer or continue to suffer severe and abnormal mental, emotional or physical distress, and this distress is associated with significant impairment of judgment, reason or behavior causing a substantial deterioration of his previous ability to function on his own.

"likely to cause harm to others" means that as evidenced by recent behavior causing, attempting or threatening such harm, a person is likely in the near future to cause physical injury, physical abuse, or substantial property damage to another person.

"patient" means any person receiving evaluation, care or treatment under this Act, except that "patient" for purposes of the rights provided in Section 10 shall refer only to persons in residential treatment programs.

"person" means for purposes of any provision of this Act authorizing the commitment or treatment of a "person," an individual aged eighteen years or more.[2]

"psychosurgery" means any procedure which by direct access to the brain, removes, destroys, or interrupts the continuity of brain tissue which is histologically normal (as distinguished from normal in its physiological or psychological functioning) for the primary purpose of altering behavior or treating a mental disease or disorder. Psychosurgery includes the implantation of electrodes with such an effect and

---

[2] For provisions concerning persons under the age of eighteen, refer to the American Psychiatric Association's "Guidelines for Psychiatric Hospitalization of Minors" (1981).

for such a purpose, with or without subsequent electrocoagulation. Psychosurgery does not include neurosurgical procedures designed to treat reliably diagnosed intractable physical pain or epilepsy.

"severe mental disorder" means an illness, disease, organic brain disorder, or other condition which (1) substantially impairs the person's thought, perception of reality, emotional process, or judgment, or (2) substantially impairs behavior as manifested by recent disturbed behavior.[3]

"treatment facility" means a community mental health facility, a general medical facility providing psychiatric services, or other psychiatric facility or program meeting applicable licensing standards, which has been approved for the provision of services under this Act by the Department of Mental Health; provided that no jail or other correctional facility shall be approved as a treatment facility for any persons other than those who could otherwise lawfully be detained there.

Section 4. EMERGENCY PSYCHIATRIC EVALUATION

4.A. Detention by a Police Officer

1. A police officer may take a person into custody, and transport the person to a treatment facility for emergency psychiatric evaluation if and only if:

a. the person would otherwise be subject to lawful arrest and the police officer believes that the person is in need of emergency psychiatric treatment; or

b. the police officer has probable cause to believe that the person has attempted suicide within the last 48 hours; or

c. the police officer has probable cause to believe, based on his personal observation and investigation, or based on the petition of any interested adult under subsection

---

[3] Mental retardation, epilepsy, or other developmental disabilities do not, in themselves, constitute a severe mental disorder. States may wish to provide by other provisions of law for persons whose use of or addiction to intoxicating substances warrants hospitalization.

4.C. and such corroboration as the police officer deems necessary in the circumstances, that the person is suffering from a severe mental disorder as a result of which he is likely to cause harm to himself or to others or is manifestly unable to care for some of his basic needs, and that immediate hospitalization is necessary to prevent harm to the person or to others; or

d. he is acting upon the certification of a licensed physician under subsection 4.B.

2. Any person taken into custody pursuant to this subsection shall be presented promptly to a treatment facility. Correctional facilities shall not be used as temporary shelter for such persons except for the protective custody of the person pending transportation to a treatment facility.

3. Upon or shortly after taking a person into custody, the police officer shall take reasonable precautions to safeguard and preserve the personal property of the person unless a guardian or responsible relative is able to do so. Upon presenting a person to a treatment facility the police officer shall inform the staff in writing of the facts which caused him to take the person into custody, and specifically state whether the person is otherwise subject to arrest.

4.B. Certification by a Licensed Physician

A person may be taken into custody by a police officer, or accepted by an ambulance service, and transported and presented to a treatment facility for emergency psychiatric evaluation, when a licensed physician certifies in writing that he has examined the patient in the last 72 hours, or that he has ongoing medical responsibility for the person and has knowledge of his current condition, and on such basis he has probable cause to believe that such person is suffering from a severe mental disorder as a result of which: he lacks capacity to make an informed decision concerning treatment; and he is (1) likely to cause harm to himself or to suffer substantial mental or physical deterioration, or (2) likely to cause harm to others; and immediate hospitalization is necessary to prevent such harm.

4.C. Petition by Any Interested Adult

Any interested adult may petition for, or present a person for, emergency psychiatric evaluation by alleging based on personal observation that he has probable cause to believe that such person is suffering from a severe mental disorder as the result of which: he is likely to cause harm to himself or to others or is manifestly unable to care for some of his basic needs; and immediate hospitalization is necessary to prevent harm to the person or to others.

4.D. Treatment Facility Determination

1. Upon the presentation of a person to a treatment facility pursuant to this Section 4, the facility shall accept the person and shall promptly examine him to determine whether he meets the criteria for emergency evaluation and treatment set forth in subparagraph 2.

2. The person shall be admitted for emergency evaluation and treatment only if the examining psychiatrist determines that there is probable cause to believe that the person suffers from a severe mental disorder as the result of which: he lacks capacity to make an informed decision concerning treatment; and he is (1) likely to cause harm to himself or to suffer substantial mental or physical deterioration, or (2) likely to cause harm to others; and immediate hospitalization is necessary to prevent such harm.

3. If the examining psychiatrist determines that there is not probable cause to believe that the person meets the criteria for emergency evaluation and treatment, the person shall be released. If a person was presented to the treatment facility by a police officer and was otherwise subject to lawful arrest, he shall continue under the custody of police officers.

4.E. Advice of Rights

The treatment facility shall advise any person admitted for emergency evaluation and treatment of the purposes and possible duration of emergency evaluation, and of his rights under this Act, as soon after admission as his medical condition permits.

4.F. Hearing on Emergency Evaluation

1. Each person who is admitted to a treatment facility shall receive a preliminary hearing before the court within five business days of admission or be discharged, unless he has, after consultation with counsel, executed a written waiver of such hearing. The hearing shall be informal and subject to such rules as the court sets consistent with fundamental fairness.

2. The court shall determine at the close of the hearing, or within five business days of the patient's admission, whether he should be discharged. A patient shall then be discharged, unless the court determines that there is probable cause to believe that he satisfies the criteria for thirty-day commitment provided in Section 6, and unless within two business days of the court's decision a petition for such commitment is filed with the court.

4.G. Duration of Emergency Evaluation and Treatment

The period of emergency evaluation and treatment shall in no case exceed fourteen days.

Section 5. VOLUNTARY ADMISSION

5.A. Admission

1. A treatment facility may admit a person if after examining the patient a psychiatrist [or: "a physician"]* on the staff or with privileges at the treatment facility believes the person is mentally ill and in need of hospitalization, and if the person gives written consent to admission. Prior to such admission, the person shall be advised orally and given a written statement of his rights under this Act; provided that if his condition upon admission makes such advice infeasible and the medical reasons are entered in the record, such advice may be deferred until the patient's medical condition permits, for not more than 48 hours. Each patient shall be asked to sign an acknowledgement that he has been so advised and has consented to voluntary admission for treatment.

2. Initial consent to voluntary admission for treatment shall be valid for sixty days. Thereafter,

---

* Optional provision.

a patient may remain at the treatment facility for periods of up to one hundred eighty days each upon a signed consent executed after the patient has had an opportunity to consider with such persons as he wishes his need for continued hospitalization and treatment.

3. If the responsible psychiatrist [or: "the responsible physician"][5] has substantial reason to believe that a person seeking to admit himself or to consent to further hospitalization lacks capacity to make an informed decision concerning treatment, he shall obtain in addition to the consent of the patient, the informed consent of the patient's next of kin or guardian. The responsible psychiatrist [or: "the responsible physician"][6] shall renew his effort to obtain the informed consent of the patient if the patient regains the capacity to make an informed decision concerning treatment.

5.B. Discharge or Petition for Thirty-Day Commitment

Any patient who is voluntarily admitted to a treatment facility shall be discharged within five business days of his written request for discharge (and any patient who indicates his desire to be discharged but is unable to write shall be assisted to put his request in writing), unless a petition for thirty-day commitment is filed within that period by the treatment facility or the patient's next of kin or guardian.

5.C. Conversion from Involuntary to Voluntary Status

A patient who is subject to involuntary hospitalization pursuant to Sections 4, 6, or 11 of this Act may at any time convert to voluntary status if the responsible psychiatrist [or: "the responsible physician"][7] agrees that such conversion is made in good faith and that the patient is an appropriate patient for voluntary hospitalization.

---

[5] Optional provision.

[6] Optional provision.

[7] Optional provision.

Section 6. THIRTY-DAY COMMITMENT

6.A. Petition

1. Persons who are present at a treatment facility under voluntary admission but have requested discharge, and persons present at a treatment facility for emergency psychiatric evaluation, may be committed involuntarily for a period of up to thirty days upon a petition filed by the treatment facility or by the next of kin or guardian; and other persons may be so committed upon a petition filed by any interested adult. The petition shall allege that such person meets the criteria set forth in subsection 6.C. The petition shall set forth the facts supporting the allegations, and, in the case of petitions filed by a treatment facility, describe why the patient requires treatment. The petition shall be filed with the court, which shall have copies promptly served upon the patient, the next of kin or guardian, and the patient's attorney if known.

2. The copies of the petition served by the court shall be accompanied by a notice advising of the person's rights concerning the proceeding.

6.B. Summons for Evaluation; Psychiatric Report

1. Upon the filing of a petition for thirty-day commitment of a person who is not currently under emergency evaluation or voluntary admission, the court shall issue a summons to the person to submit to an examination (on an outpatient basis) conducted by a psychiatrist at a treatment facility or a private psychiatrist. The examining psychiatrist shall promptly prepare a report on his examination and file it with the court. The court shall have copies promptly served upon the patient, the next of kin or guardian, and the patient's attorney if known.

2. A person served with a summons to submit to a psychiatric examination may in lieu of such examination submit a report of a psychiatrist stating that he has recently examined the person, or has ongoing medical responsibility for the person and knowledge of his current condition, and that in his opinion the person does not meet the criteria for involuntary commitment. The petition for commitment may then be dismissed by the court, or continued.

6.C. Criteria for Thirty-Day Commitment[1]

A person may be involuntarily committed for a period of up to thirty days if, after the hearing provided in Section 6.D., the court determines, based upon clear and convincing evidence, that:

1. the person is suffering from a severe mental disorder; and

2. there is a reasonable prospect that his disorder is treatable at or through the facility to which he is to be committed, and such commitment would be consistent with the least restrictive alternative principle; and

3. the person either refuses or is unable to consent to voluntary admission for treatment; and

4. the person lacks capacity to make an informed decision concerning treatment; and

5. as the result of the severe mental disorder, the person is (1) likely to cause harm to himself or to suffer substantial mental or physical deterioration, or (2) likely to cause harm to others.

6.D. Hearing on Thirty-Day Commitment

1. Every person as to whom a petition for thirty-day commitment has been filed shall be notified by the court sufficiently in advance to be able to prepare for the hearing, and shall receive a prompt hearing. For persons confined for emergency psychiatric evaluation, or currently under voluntary admission, this hearing shall take place within three business days of the filing of the petition.

2. The respondent shall be present at the hearing unless the court finds (1) that he has knowingly and voluntarily waived such right after consulting with counsel, or (2) that because his behavior at the hearing

---

[1] Refer to the Commentary for a discussion of the disposition of various types of persons who do not meet the criteria in Section 6.C.

is so disruptive, it cannot reasonably continue in his presence. Hearings shall be held in the treatment facility wherever feasible given the other functions of the court.

3. Any respondent who is unable to pay for counsel shall have the right to be provided with counsel to prepare for and represent him at the hearing. [Any respondent who is unable to pay for an examination for purposes of the hearing shall have the right to be provided with one examination by a licensed psychiatrist, at the expense of the (state or local government).][9]

4. The District Attorney or County Counsel shall represent the interests of the State at the hearing. [If the District Attorney or County Counsel fails to proceed with the commitment, the next of kin or a petitioning party may retain counsel to do so in his stead, and the reasonable costs of such counsel shall be paid by the (state or local government).][10]

5. The rules governing evidentiary and procedural matters at hearings under this Act shall be promulgated so as to facilitate informal, efficient presentation of all relevant, probative evidence and resolution of issues with due regard to the interests of all parties. Hearsay evidence may be received, and experts and other witnesses may, consistent with law, testify to any relevant and probative facts at the discretion of the court.

6. Patients shall not have a "right to remain silent" at a psychiatric examination or hearing conducted pursuant to this Act; provided that no patient shall be held civilly or criminally liable for not speaking or testifying. Any information obtained from or disclosed by the patient during the course of evaluation or treatment is admissible in any hearing provided in this Act without regard to whether it would otherwise be privileged; provided that no disclosure made by the patient during the course of evaluation or treatment or in any proceeding conducted under this Act, and no opinion testimony based on such disclosures, may be admitted against the patient on the issue of guilt in a criminal proceeding unless he places his mental condition in issue in such proceeding, and the disclosure or opinion is relevant to such an issue raised by him.

---

[9] Optional provision.

[10] Optional provision.

7. The hearing shall be closed to the public, unless the respondent requests that it be open, or the court determines for other good cause that the hearing should be open. The court shall keep a complete record, written or recorded, of every hearing.

8. At the conclusion of the hearing, or within one business day thereafter, the court shall make its findings, including specific findings as to whether the commitment is warranted because the person is (a) likely to cause harm to others, or (b) likely to cause harm to himself or to suffer substantial mental or physical deterioration, or (c) both (a) and (b). As to any person found likely to cause harm to himself or to suffer substantial mental or physical deterioration, the court shall further make findings as to whether commitment is warranted because the person (1) is likely in the near future to inflict substantial physical injury upon himself, or (2) is substantially unable to provide for some of his basic needs such as food, clothing, shelter, health or safety, or (3) will, if not treated, suffer severe and abnormal mental, emotional or physical distress, and this distress is associated with significant impairment of judgment, reason, or behavior causing a substantial deterioration of his previous ability to function on his own.

9. The court shall enter an order discharging the person unless it finds by clear and convincing evidence that the person satisfies all of the criteria for commitment in Section 6.C., in which event it shall enter an order committing the person for evaluation and treatment for a period of "up to thirty days." If at any time during thirty-day (or any subsequent) commitment a patient is absent without permission, the order of commitment constitutes a continuing authorization to the treatment facility and to any police officer to procure his return.

Section 7. INFORMED CONSENT TO MEDICATION OR OTHER TREATMENT -- VOLUNTARY PATIENTS

7.A. Informed Consent

Except in an emergency situation, a treatment facility shall, prior to beginning any course of medication or other treatment for a patient who is subject to voluntary admission under Section 5, obtain informed consent to treatment. If the patient does not lack

capacity to make an informed decision concerning treatment, the consent shall be his own. If he does lack such capacity, the consent shall be that of his next of kin or guardian, provided that such a patient may receive appropriate medications or other treatments, except as limited by Section 8.C., until such time as the consent or refusal to consent of such next of kin or guardian can be obtained.

7.B. Revocation of Consent

A voluntary patient (or the next of kin or guardian who consented to treatment on his behalf) may revoke consent to treatment at any time by a reasonably clear statement in writing (and patients who indicate a desire to revoke consent but are unable to write shall be assisted to put their statement in writing). If such consent is revoked, the treatment shall be promptly discontinued, provided that a course of treatment may be concluded or phased out where necessary to avoid the harmful effects of abrupt withdrawal.

7.C. Refusal to Consent

Except in an emergency situation, any voluntary patient (himself or through his next of kin or guardian) shall have the right to refuse any and all medications or other treatments. If appropriate medications or treatments are refused, the facility may then discharge the patient, and shall not be liable in any respect for such action.

Section 8. INFORMED CONSENT TO MEDICATION OR OTHER TREATMENT -- INVOLUNTARY PATIENTS

8.A. Consent During Emergency Evaluation

Following admission and during the period of emergency evaluation provided in Section 4, the treatment facility may administer medications or other treatments, except as limited by Section 8.C., to a patient consistent with good medical practice and without the informed consent of the patient or his next of kin or guardian. However, prior to administering any such medication or other treatment, the staff shall explain the purposes, nature, and effects of the treatment and shall request the patient's consent to it, unless the responsible

psychiatrist [or: "the responsible physician"][11] determines that the patient's condition makes doing so infeasible or harmful to him, and enters the reasons for not doing so in the record.

8.B. Consent During Thirty-Day or Subsequent Commitments

It being a prerequisite to involuntary commitment that the person lacks capacity to make an informed decision concerning treatment, the treatment facility shall be authorized to administer medications or other treatments, except as limited by Section 8.C., to such persons consistent with good medical practice without their consent. Although consent to treatment is not required, during the course of treatment the responsible psychiatrist [or: "the responsible physician"][12] shall consult with the patient and his next of kin or guardian, and give consideration to the views they express concerning treatment and any alternatives.

8.C. Special Therapies

Notwithstanding subsections A. and B. above, a treatment facility shall not administer aversive therapy, experimental treatment, psychosurgery, or any other special therapy designated by the Department of Mental Health except as provided by law or in regulations promulgated by the Department of Mental Health.

8.D. Other Medical/Surgical Treatments

Consent for other medical/surgical treatments not intended primarily to treat a patient's mental disorder shall be obtained in accordance with applicable law.

Section 9. PROVISION OF TREATMENT

9.A. General Duty To Provide Treatment

Every patient shall be provided with prompt, competent and appropriate treatment, which offers him a realistic prospect of improvement. Patients shall be afforded treatment by sufficient numbers of duly qualified personnel, in facilities which meet applicable

---

[11] Optional provision.

[12] Optional provision.

licensing and accreditation standards, which conform to applicable regulations of the Department of Mental Health, and which are able adequately to care for and treat the patients they serve.

9.B. Individual Treatment Plan

1. A written individual treatment plan shall be prepared, with the participation of the patient to the extent he is able, during voluntary admission or emergency psychiatric evaluation, or if a person has been subject to neither, then within seven days of a patient's thirty-day commitment. The individual treatment plan shall be approved by the responsible psychiatrist [or: "the responsible physician"],[13] and the course of treatment actually administered shall conform to the plan.

2. The patient's progress in attaining the objectives in the treatment plan shall be noted in his records and revisions in the plan shall be made as appropriate. The patient, and if the patient desires, the next of kin or guardian, shall be afforded an opportunity to participate in considering any substantial change in the treatment plan.

3. The individual treatment plan shall be available upon request to the patient, and to any other person designated by him, provided that the responsible psychiatrist [or: "the responsible physician"][14] may preclude disclosure of the individual treatment plan to the patient or others for a period not to exceed seven days from the request, if he states in writing why disclosure would be harmful to the patient.

9.C. Administration of Medications and Other Treatments

1. Medications and other treatments shall only be prescribed, ordered and administered in conformity with accepted clinical practice. Medication shall be administered only in accordance with the written order of a physician or upon a verbal order, noted in the patient's medical record and subsequently signed by the physician. Medication shall be administered only by a qualified physician, or qualified nurse, or by

---

[13] Optional provision.

[14] Optional provision.

qualified other persons pursuant to procedures approved by the Department of Mental Health. The attending physician shall review regularly the drug regimen of each resident patient under his care and shall monitor any symptoms of harmful side effects. Prescriptions for psychotropic medications shall be written with a termination date not exceeding thirty days thereafter, but may be renewed.

2. Medications and other treatments shall be administered in accordance with all applicable law.

3. If a patient is given any psychotropic or other medication which has an effective duration of action including the day of a court hearing, the facts concerning its administration and effects, and the patient's mental status and behavior in the absence of medication, shall be brought to the attention of the court.

9.D. Other Medical/Surgical Care

All patients shall be provided with prompt, regular and competent medical care for physical ailments under the supervision of a licensed physician. Every patient shall have a reasonably complete physical examination at appropriate intervals.

Section 10. RIGHTS OF PATIENTS

10.A. Preservation of Rights

No right of any person (including but not limited to the right to register and vote at elections; rights to acquire, use and dispose of property including contractual rights; rights to sue and be sued; rights relating to licenses, permits, privileges and benefits under law; and rights concerning domestic relations) shall be denied or reduced solely by reason of his having been evaluated, committed or treated under this Act, except as otherwise specifically provided herein or in other applicable law. A finding of lack of capacity to make an informed decision concerning treatment under Section 6 shall not alone establish lack of competence for any other purpose. A treatment facility may for clinical reasons preclude a patient who is believed to lack competence from making substantial dispositions of his property until his competence can be decided by a court.

10.B. Right to Treatment

Patients shall have a right to treatment to the extent provided in Sections 9, 10.C., and 10.D.

10.C. Healthful and Humane Environment

Every patient shall have the right to a healthful and humane environment. Every treatment facility shall provide a clean, sanitary, safe and comfortable environment in a structure which complies with applicable licensing requirements governing physical facilities, nutrition, health and safety, and medical services, and for aspects of care for which there are not mandatory requirements, with generally accepted professional standards. In addition, every patient shall have a right to a humane psychological environment which protects him from harm or abuse, provides reasonable privacy, promotes personal dignity and provides opportunity for improved functioning.

10.D. Least Restrictive Alternative and Leaves of Absence

1. Every patient shall have the right to treatment consistent with the least restrictive alternative principle.

2. Leaves of absence may be granted in appropriate cases at the discretion of the treating facility. Police officers shall be authorized to and shall, at the request of a treatment facility, take into custody and return to the treatment facility any person who has been committed there and leaves without proper authorization or does not return at the end of an authorized leave of absence.

10.E. Institutional Labor

1. Patients have a right to perform labor as part of a therapeutic program.

2. Patients may not be required to perform labor, except that to the extent they are able, they may be required to perform (1) tasks necessary to care for their personal possessions, (2) routine, nondegrading housekeeping tasks necessary to maintain their living quarters, or (3) other tasks which the responsible

psychiatrist [or: "the responsible physician"][15] approves and which are monitored as part of a therapeutic program for the patient. No patient shall be subjected to any loss of any right under this Act (as distinguished from a privilege which is conferred as part of a therapeutic program) because of his refusal to perform such tasks.

3. Any patient labor which confers an economic benefit upon the institution beyond merely supplementing employee performance of housekeeping tasks shall be compensated on a reasonable basis in accordance with applicable law, and the proceeds of such labor shall be paid to the patient or his designee.

10.F. Restraints and Seclusion[16]

1. Restraints and seclusion may be of therapeutic benefit to some patients and therefore may be administered in conformity with good medical practice.

2. Every patient shall have the right to be free from unwarranted or inappropriate restraints or seclusion.

3. A patient shall be physically restrained or placed in seclusion only at the written order of a physician or upon a verbal order noted in the patient's record and subsequently signed by the physician.

4. During any period in which a patient is restrained or secluded, he shall be periodically checked and cared for properly to assure his well-being.

10.G. Corporal Punishment

Every patient shall have the right to be free from corporal punishment.

10.H. Nutrition

Every patient shall have the right to a nutritionally sound and medically appropriate diet.

---

[15] Optional provision.

[16] These provisions establish only a basic framework for the use of restraints and seclusion. More detailed guidelines are being prepared by the American Psychiatric Association to deal with the many subtle problems which arise.

10.I. Exercise and Recreation

Every patient shall have reasonable opportunities for physical and outdoor exercise and access to recreational areas and equipment. Reasonable limitations may be set by general rules or, for clinical reasons, in particular cases.

10.J. Visitors

Every patient has the right to receive visitors of his choosing with reasonable privacy. Reasonable limitations on access of visitors may be set by general rules or, for clinical reasons, in particular cases.

10.K. Communications

1. Every patient shall have the right to send and receive mail. Reasonable rules governing inspection (but not reading) of incoming mail may be enforced, provided that they are necessary to substantial health care purposes and that they preserve the patient's privacy rights to the extent compatible with his clinical status.

2. Every patient shall have the right to reasonably private access to telephones, including the right to make long-distance calls to the extent he can arrange for payment for such calls.

3. A treatment facility shall provide reasonable assistance to patients in exercising their communication rights. Reasonable limitations on use of the mails and telephones may be set by general rules or, for clinical reasons, in particular cases.

10.L. Practice of Religion

Every patient shall have the right to practice or refrain from practicing religion, and pressure shall in no event be placed on those who do not wish to practice religion. The treatment facility shall provide appropriate assistance so that patients wishing to practice a religion have a reasonable opportunity to do so.

10.M. Personal Possessions

Every patient shall have the right to keep, use and store personal possessions and to maintain and use

bank accounts or other sources of personal funds, unless precluded from doing so by order of a court. Reasonable limitations may be set by general rules or, for clinical reasons, in particular cases.

10.N. Notice of Rights

As soon after admission as his medical condition permits, a patient shall be advised orally and given a written statement of his rights under this Act, and such a statement of rights shall be posted so that it is available to patients.

10.O. Non-Retaliation

No patient shall be retaliated against or subjected to any adverse change of conditions or treatment solely because of his having asserted his rights.

10.P. Access to Counsel

A patient may at any time have a telephone conversation with or be visited by his lawyer.

Section 11. SUCCESSIVE PERIODS OF COMMITMENT

11.A. Sixty-Day Re-Commitment

1. Any person who has been subject to a thirty-day commitment pursuant to Section 6, may be re-committed for up to sixty days upon a petition by the treatment facility or by the next of kin or guardian. The petition may be filed with the court at any time prior to the expiration of the thirty-day commitment. The petition shall include a statement of the treatment facility as to why the person still meets the criteria for involuntary commitment; what treatment has been provided and what progress has been made; why a further period of commitment is warranted; and the identity of the person who has knowledge concerning the case. The petition shall be promptly served by the court on the patient, the next of kin or guardian, and the patient's attorney.

2. The patient shall be entitled to a hearing before the court on the petition on or before the first business day following the expiration of the thirty-day commitment, and shall have all other rights to which he was entitled at the hearing on thirty-day commitment.

3. The court shall order that the person be discharged unless it determines (a) by clear and convincing evidence that the person still satisfies the criteria for involuntary commitment, and (b) that there is a reasonable prospect that a substantial therapeutic purpose would be served by a further period of commitment.

11.B. One Hundred Eighty-Day Re-Commitments

1. Any person who has been subject to sixty-day re-commitment pursuant to Section 11.A. may be re-committed for up to one hundred eighty days upon a petition filed with the court by the treatment facility or by the next of kin or guardian. The petition shall include a statement of the treatment facility as to why the person still meets the criteria for involuntary commitment; what treatment has been provided and what progress has been made; why a further period of commitment is warranted; and the identity of the person who has knowledge concerning the case. The petition shall be promptly served by the court on the patient, the next of kin or guardian, and the patient's attorney.

2. The patient shall be entitled to a hearing before the court on the petition on or before the first business day following expiration of the operative period of commitment and shall have all other rights to which he was entitled at the hearing on thirty-day commitment.

3. The court shall order that the person be discharged unless it determines (a) by clear and convincing evidence that the person still satisfies the criteria for involuntary commitment, and (b) that there is a reasonable prospect that a substantial therapeutic purpose would be served by a further period of commitment.

4. Additional re-commitments for periods of up to one hundred eighty days each may be ordered in accordance with Section 11.B.1-3 when warranted.

11.C. Waiver of Hearings

A patient may waive any hearing to which he is entitled under this Section 11 upon a written waiver which the court finds is knowingly and voluntarily executed by the patient.

Section 12. DISCHARGE

12.A. The responsible psychiatrist [or: "the responsible physician"][17] shall review periodically whether a patient still meets the criteria for lawful commitment, and if he concludes that the patient does not, he shall undertake discharge procedures as provided herein.

12.B. As to a patient committed because he was likely to cause harm to himself or to suffer substantial mental or physical deterioration, if the responsible psychiatrist [or: "the responsible physician"][18] concludes that the patient no longer meets the criteria for lawful commitment, he may discharge the patient directly.

12.C. As to a patient committed solely because, or partly because, he was likely to cause harm to others, if the responsible psychiatrist [or: "the responsible physician"][19] concludes that the patient no longer meets the criteria for lawful commitment, or that the patient's treatment program has been completed or is unlikely to provide further benefits, he shall apply to the court for an order discharging or transferring the patient, as may be appropriate. The application shall set forth the relevant facts. The court may conduct an informal hearing, subject to such procedures as the court sets. Nothing in this subsection shall reduce any rights to hearings which patients have pursuant to other provisions of this Act.

12.D. Discharge of any patient may be delayed for a reasonable period of time in order to arrange transportation or lodging for the patient, or for other good cause.

12.E. A person who has been discharged from emergency evaluation, thirty-day commitment or a subsequent period of commitment may be re-committed only pursuant to the same procedures provided in this Act and upon a showing of some new circumstances warranting such commitment which were not known at the time of discharge.

---

[17] Optional provision.

[18] Optional provision.

[19] Optional provision.

12.F. The responsible psychiatrist [or: "the responsible physician"][28] may, as part of an individual treatment plan for a patient who is involuntarily committed, release such patient to outpatient treatment upon the condition that if the patient fails to follow through with or respond acceptably to such outpatient treatment, he may be returned to inpatient treatment for the remainder of the operative period of commitment.

12.G. Nothing in this Act shall limit any other legal rights or remedies concerning discharge which a patient may have or acquire pursuant to law, regulation or policy, including the right to petition for a writ of habeas corpus.

Section 13. CONFIDENTIALITY AND DISCLOSURE OF INFORMATION

[This Section adopts the American Psychiatric Association's "Model Law on Confidentiality of Health and Social Service Records."]

Section 14. REPRESENTATION OF PATIENTS

14.A. Right to Counsel at Hearings

Every patient shall have a right to counsel to represent him at court hearings under this Act, except that a patient need not be provided with counsel for the preliminary hearing on emergency evaluation provided in Section 4.F.

14.B. Resolution of Grievances in Treatment Facilities

Every treatment facility shall establish a fundamentally fair procedure for the assertion, resolution, and redress of patients' grievances, and shall have a patients' representative or similar person who shall hear patients' grievances, attempt to resolve problems, and protect patients' interests.

14.C. Representation by Next of Kin or Guardian

Any right of patients provided in this Act may be exercised on behalf of a patient who is unable to exercise such right by a next of kin or guardian, in accordance with State law.

---

[28] Optional provision.

Section 15. TRANSPORTATION

Whenever a patient is to be brought to or from a treatment facility, or is to be transferred to another facility or to a home, the court may direct the sheriff, state police or other appropriate authorities to furnish suitable transportation.

Section 16. NON-DEROGATION OF PATIENTS' RIGHTS

Rights conferred upon patients by this Act shall be in addition to, and nothing in this Act shall revoke or reduce, any rights, privileges or immunities which a patient may have or acquire by law, regulation or policy.

Section 17. COSTS OF CARE

In accordance with law, indigent public patients shall receive care and treatment under this Act without charge to them. Patients committed under this Act who are able to pay may be required to pay some reasonable costs of care and treatment, and to that end treatment facilities and the State shall be authorized to recover such costs from them or their estate, their family, custodians of their property, or third parties liable for the costs of their care or treatment, in conformity with law. The liability of patients, their families, and others for the long term care of patients committed as likely to cause harm to others shall be specially limited by regulations of the Department of Mental Health.

Section 18. IMMUNITIES AND PENALTIES

18.A. Immunities

1. In the absence of willful misconduct or gross negligence, no officer, director, staff member or employee of a treatment facility shall be liable for acts or omissions within the scope of his employment related to admission, evaluation, care, treatment, nonadmission, transfer, removal of restrictions upon, or discharge of a person, pursuant to this Act.

2. No other person who, acting in good faith and with a reasonable basis, participates in any of the processes provided in this Act shall be liable for such actions.

3. Notwithstanding any other provision of this Act, no police officer, no officer, director, staff member or employee of a treatment facility, and no other person or entity performing actions pursuant to this Act, shall be liable for any action of a patient who is discharged from or is absent from a treatment facility pursuant to this Act.

4. Under no circumstances shall any person performing actions pursuant to this Act have a duty to, or be liable for failing to, notify, advise or warn anyone concerning the non-admission, transfer, removal of restrictions on, or discharge of any person.

18.B. Penalties

1. Any person who knowingly and willfully gives substantial, false information or takes other wrongful action for the purpose of distorting, corrupting or interfering with the processes provided in this Act shall be subject to a civil fine, and shall be liable for injunctive relief and money damages, in addition to any other liability under law.

2. Any person who takes into custody, admits for evaluation or commitment, detains for a further period of time, discharges, or administers medication or treatment to a patient, or takes other action affecting the substantial rights of a patient, doing so knowingly and willfully in substantial violation of this Act, shall be subject to a civil fine, and shall be liable for injunctive relief and money damages, in addition to any other liability under law. This subsection shall not be invoked in cases of minor, merely technical, or otherwise justifiable breaches of the provisions of this Act.

Section 19. REGULATIONS

The Commissioner of Mental Health is empowered to promulgate regulations to implement this Act which are consistent with its provisions.

Section 20. CONSTRUCTION

20.A. Gender and Number

As used in this Act, pronouns shall refer to both male and female persons equally, and articles shall refer to singular and plural references equally.

20.B. Severability

If any provision of this Act or its application to any person or circumstance is held invalid, it is the legislative intent that such invalidity not affect other provisions or applications which can be given effect apart from that which is invalidated, and to this end the provisions of this Act shall be deemed severable.

20.C. Construction Against Implied Repeal

This Act is intended as a unified, general Act covering its subject matter, and accordingly none of its provisions shall be deemed impliedly repealed by subsequent legislation if such a construction reasonably can be avoided.

ADDENDUM

This addendum contains Guidelines for states which do not wish to undertake a comprehensive revision of their civil commitment laws, but do wish to add provisions for the commitment of persons who are likely to "suffer substantial mental or physical deterioration."

* * *

DEFINITIONS

As used in this Act, the terms below shall have the meanings indicated:

* * *

"consistent with the least restrictive alternative principle" means that (1) each patient committed solely on the ground that he is likely to cause harm to himself or to suffer substantial mental or physical deterioration shall be placed in the most appropriate and therapeutic available setting, that is, where treatment provides the patient with a realistic opportunity to improve, and which is no more restrictive of his physical or social liberties than is believed conducive to the most effective treatment for the patient; and (2) each patient committed solely or in part on the ground that he is likely to cause harm to others shall be placed in a setting in which treatment is available and the risks of physical injury or property damage posed by such placement are warranted by the proposed plan of treatment.

* * *

"lacks capacity to make an informed decision concerning treatment" means that the person, by reason of his mental disorder or condition, is unable despite conscientious efforts at explanation, to understand basically the nature and effects of hospitalization or treatment, or is unable to engage in a rational decisionmaking process regarding such hospitalization or treatment as evidenced by inability to weigh the possible risks and benefits.

"likely to cause harm to himself or to suffer substantial mental or physical deterioration" means that as evidenced by recent behavior, the person (1) is likely in the near future to inflict substantial physical injury upon himself, or (2) is substantially unable to provide for some of his basic needs such as food, clothing, shelter, health or safety, or (3) will if not treated suffer or continue to suffer severe and abnormal mental, emotional or physical distress, and this distress is associated with significant impairment of judgment, reason or behavior causing a substantial deterioration of his previous ability to function on his own.

* * *

"severe mental disorder" means an illness, disease, organic brain disorder, or other condition which (1) substantially impairs the person's thought, perception of reality, emotional process, or judgment or (2) substantially impairs behavior as manifested by recent disturbed behavior.[1]

* * *

EMERGENCY PSYCHIATRIC EVALUATION

Detention by a Police Officer

A police officer may take a person into custody, and transport the person to a treatment facility for emergency psychiatric evaluation if:

* * *

-- the police officer has probable cause to believe, based on his personal observation and investigation, or based on the petition of any interested adult and such corroboration as the police officer deems necessary in the circumstances, that the person is suffering from a severe mental disorder as a result of which he is likely to cause harm to himself or others or is manifestly unable to care for some of his basic needs, and that immediate hospitalization is necessary to prevent harm to the person or to others;

* * *

Certification by a Licensed Physician

A person may be taken into custody by a police officer, or accepted by an ambulance service, and transported and presented to a treatment facility for emergency psychiatric evaluation when a licensed physician certifies in writing that he has examined the patient

---

[1] Mental retardation, epilepsy, or other developmental disabilities do not, in themselves, constitute a severe mental disorder. States may wish to provide by other provisions of law for persons whose use of or addiction to intoxicating substances warrants hospitalization.

in the last 72 hours or that he has ongoing medical responsibility for the person and has knowledge of his current condition, and on such basis he has probable cause to believe that such person is suffering from a severe mental disorder as the result of which: he lacks capacity to make an informed decision concerning treatment; and he is (1) likely to cause harm to himself or to suffer substantial mental or physical deterioriation, or (2) likely to cause harm to others; and immediate hospitalization is necessary to prevent such harm.

* * *

Treatment Facility Determination

Upon the presentation of a person to a treatment facility, the facility shall accept the person and shall promptly examine him to determine whether he meets the criteria for emergency evaluation and treatment set forth below.

The person shall be admitted for emergency evaluation and treatment only if the examining psychiatrist determines that there is probable cause to believe that the person suffers from a severe mental disorder as the result of which: he lacks capacity to make an informed decision concerning treatment; and he is (1) likely to cause harm to himself or to suffer substantial mental or physical deterioration, or (2) likely to cause harm to others; and immediate hospitalization is necessary to prevent such harm.

* * *

CRITERIA FOR COMMITMENT

A person may be involuntarily committed for a period of up to ( )[2] days if after the hearing the court determines, based upon clear and convincing evidence, that:

1. the person is suffering from a severe mental disorder; and

---

[2] Insert the time period under existing law.

2. there is a reasonable prospect that his disorder is treatable at or through the facility to which he is to be committed, and such commitment would be consistent with the least restrictive alternative principle; and

3. the person either refuses or is unable to consent to voluntary admission for treatment; and

4. the person lacks capacity to make an informed decision concerning treatment; and

5. as the result of the severe disorder, the person is (1) likely to cause harm to himself or to suffer substantial mental or physical deterioration, or (2) likely to cause harm to others.

* * *

INFORMED CONSENT TO MEDICATION OR OTHER TREATMENT -- INVOLUNTARY PATIENTS

* * *

It being a prerequisite to involuntary commitment that the person lacks capacity to make an informed decision concerning treatment, the treatment facility shall be authorized to administer medications or other treatments, except special therapies which are subject to particular laws or regulations, to such persons consistent with good medical practice without their consent. Although consent to treatment is not required, during the course of treatment the responsible psychiatrist shall consult with the patient and his next of kin or guardian, and give consideration to the views they express concerning treatment and any alternatives.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811
907 465 3800

MEMORANDUM September 9, 1983

SUBJECT: Mental health commitment laws
(Work Order No. 13-1516)

TO: Senator Joe Josephson
Chairman, Senate Health, Education and
Social Services Committee

FROM: Edward H. Hein EHA
Legislative Counsel

You have asked for a comparison of the American Psychiatric Association's draft guidelines for psychiatric hospitalization of adults with Alaska's mental health commitment laws (AS 47.30.655 - 47.30.915). I have enclosed a section-by-section comparison, with the APA guidelines on the left-hand pages and the corresponding Alaska statutes on the right-hand pages. My comments follow.

In general, there are many similarities between the APA guidelines and Alaska law. Both provide for emergency or involuntary commitments, voluntary commitments, initial periods of detention followed by longer periods of extension, standards, hearings, patient rights, immunities for mental health professionals, and penalties for bad faith commitments. In most cases Alaska law appears to provide equal or better patient protections than those recommended by the APA.

The major specific differences between the guidelines and the statutes are as follows:

1. Emergency detention. Under APA section 4.A.2. a person taken into custody for emergency evaluation may not be placed in a jail or other correctional facility, except for protective custody purposes and only while awaiting transportation to a treatment facility. Under AS 47.30.705. a correctional facility may be used as an emergency evaluation facility if a regular evaluation facility is unavailable.

2. Petition for involuntary commitment. Under APA section 4.C. any "interested adult" may petition for an emergency psychiatric evaluation of another person. The APA does not define what "interested" means. Under AS 47.30.700 "any adult" may petition for involuntary commitment of another person.

3. Deadline for emergency examination. Under APA section 4.D.1. a treatment facility must examine a person under emergency detention "promptly" after arrival at the facility. Under AS 47.30.710 the examination and evaluation must be completed within 24 hours of arrival.

4. Advisement of rights. Under APA section 4.E. a treatment facility must notify a person admitted for emergency evaluation of the purposes and possible duration of the evaluation, as well as the person's legal rights relating to commitment. Under AS 47.30.725 there is no specific requirement of notice relating to the purposes and duration of evaluation. But the Alaska statute requires that notice be both oral and written and in a language the person understands.

5. Hearing after emergency detention. Under APA section 4.F. a person under emergency detention must receive a hearing before a court within five business days after being admitted to a facility. This right to a hearing may be waived in writing upon advice of counsel. The hearing is informal and is conducted under rules set by the court consistent with "fundamental fairness". After the hearing a person may be discharged by the court or committed for 30 days. Under AS 47.30.725 a person under emergency or involuntary detention has a right to a hearing within 72 hours of arrival at the facility. The person may not waive the right to a hearing, but may waive the 72-hour limit if the person is represented by counsel. However, the hearing must be held within seven calendar days of the person's arrival at the facility. The person has a right to communicate, immediately after arrival at the facility, with a guardian or other adult and with an attorney. At the hearing the person has a right to be represented by an attorney, to present evidence and to cross-examine witnesses. Subject to specified exceptions, the person has a right to be free of the effects of medicine or treatment before the hearing. After the hearing the person may be discharged or committed for a period of 21 days. Additional hearing rights are

specified elsewhere in the APA guidelines and the Alaska statutes.

6. Voluntary admission. Under APA section 5.A. a person believed to be mentally ill and in need of hospitalization may be admitted voluntarily if the person consents in writing after being advised of rights. The consent is effective for 60 days, but may be renewed for an unlimited number of periods of up to 180 days each. Under AS 47.30.670 the only requirements are that the person (1) in fact be suffering from mental illness, (2) be 14 years old or older, and (3) "voluntarily" signs the admission papers. A person under 14 years of age may be "voluntarily" admitted for a period of 21 days if (1) the minor's guardian or parent signs the admission papers and (2) the senior mental health professional at the facility concludes that specified criteria are met. Presumably the minor is automatically released after 21 days unless the minor is admitted again under the same requirements as for initial admittance.

7. Discharge from voluntary admission. Under APA section 5.B. any person voluntarily admitted must be discharged within five business days after submitting a written request for discharge, unless the treatment facility or the person's guardian files a petition for 30-day commitment. Under AS 47.30.685 - 47.30.695 a person who was voluntarily admitted to a treatment facility shall be discharged immediately upon submitting a written notice of intent to leave the facility. However, the treatment facility may hold the person for 48 hours after receiving an intent to leave notice in order to initiate involuntary commitment proceedings. In that case, the facility must give the person written notice of its intent to initiate the proceedings by the time the person would otherwise be released. A person who is under 14 years of age must be discharged immediately upon the request of the parent or guardian, unless the minor, if released, is likely to cause serious harm to himself or another as a result of a mental illness.

8. Conversion of status. Under APA section 5.C. a person who was committed involuntarily may change to a voluntary admitee with a psychiatrist's approval. No comparable provision exists in Alaska law.

9. Further periods of commitment. The APA guidelines provide for 30-day, 60-day, 90-day, and 180-day commitments. Alaska law provides for 21-day, 90-day, and 120-day

commitments. Each period of commitment is to be preceded by a hearing under both the APA guidelines and the Alaska statutes. The patient's rights at the hearing vary considerably, however, under the two different schemes. The most noticeable differences are that (1) the APA guidelines allows the use of hearsay evidence so long as it is relevant, while Alaska requires the use of civil rules of evidence; (2) the APA denies a patient's Fifth Amendment right to remain silent, while Alaska law specifically recognizes it; and (3) the APA does not allow the exclusion from evidence of privileged communications between the patient and psychiatrist or physician made during the course of evaluation or treatment, whereas Alaska law recognizes such an evidentiary privilege.

10. Petitions for further periods of commitment. Under both the APA guidelines and Alaska law, all commitments are initiated by the filing of a petition. Under APA section 6.A. a petition for a 30-day commitment of a person already at a treatment facility may be filed by the facility or by the person's "next of kin" or guardian. If the person is not currently committed, any "interested adult" may file a petition for a 30-day commitment of the person. The language of the guidelines does not make clear whether additional petitions may be filed for successive commitments of 30-days each. Under APA section 11.A. a person who "has been subject to" a 30-day commitment may be recommitted for an additional 60-day period upon a petition filed by the treatment facility or the person's "next of kin" or guardian. (The drafting here is imprecise and ambiguous. The phrase "has been subject to" could mean "has ever been subject to" or it could mean "is currently under" or it could mean "has met the criteria for".) Under APA section 11.B., a person committed for any period of time and who is dangerous to himself or herself may be committed for one additional period of "up to 90 days" upon a petition filed by the treatment facility or by the person's next of kin or guardian at any time before the current period of commitment expires. Under APA section 11.C., a person who "was committed for up to 30 days and is subject to 60-day recommitment" and who is likely to harm others may be committed for successive additional periods of 180 days each upon a petition filed by the person's next of kin or guardian, or by the state "upon advice of the treatment facility". Under AS 47.30.730, a petition for a 21-day commitment must be signed by two mental health professionals who have examined the person. It is not clear who may file

the petition. Under AS 47.30.740, a petition for a 90-day commitment may be filed by "the professional person in charge" while the person is under a 21-day commitment. Under AS 47.30.770 the "professional person in charge" may file a petition for a 120-day commitment of a person who is under a 90-day commitment. Successive commitments of 120 days each are authorized.

11. Informed consent. Under APA section 7, a treatment facility must obtain a patient's informed consent before administering medicine or treatment to a voluntary admitee in a non-emergency situation, unless the person lacks capacity to consent. A voluntary admitee may revoke consent in writing at any time except in an emergency. Under APA section 8, an involuntary admitee, or a voluntary admitee in an emergency, may be treated or given medicine without informed consent. Under AS 47.30.825, every mental patient has the right to know the name, purpose and side effects of medicine to be administered. In a "true medical emergency", surgery to save the "life, physical health, eyesight, hearing or member of the patient" may be performed without the consent of the patient, guardian or court. The law specifically recognizes an adult patient's right to not be operated on if the patient knowingly withholds consent on religious grounds.

12. Special therapies. Under APA section 8.C. experimental treatments, psychosurgery, aversive therapy or other special therapy designated by the appropriate state department may not be administered, except as provided by law or regulation. AS 47.30.825 provides that a lobotomy or psychosurgery may not be performed without specific informed consent, a full due process hearing, and a court order. Electro-convulsive therapy or aversive conditioning requires informed consent or, if the patient lacks substantial capacity to give informed consent, a court order. Under AS 47.30.830 experimental treatments involving any significant risk of physical or psychological harm are prohibited.

13. Patient rights. This is one area where the APA guidelines are more thorough than Alaska law. Under both schemes patients have rights to privacy, property, civil rights such as voting, mail, access to attorneys and visitors, and treatment consistent with the "least restrictive alternative" principle. APA section 10, however, also provides a right to "nutritionally sound and medically appropriate diet", a right to exercise and recreation, a

right to perform labor, and a right to be free from corporal punishment.

14. Discharge. Under APA section 12.F. a person may, as part of an individual treatment plan, be released from commitment at a facility to outpatient treatment. The person may, however, be returned to inpatient treatment for failure to comply with the outpatient treatment program requirements. APA section 15 provides that law enforcement or other appropriate authorities shall provide transportation of patients to and from a treatment facility. Under AS 47.30.825, a person upon discharge from a facility must be given a discharge plan suggesting, but not requiring, the kinds and amounts of treatment the person should have to maintain mental health. The person has a right to participate in formulating the discharge plan. Also, under AS 47.30.890 a person is entitled to "suitable clothing" upon discharge, and if indigent, to transportation to the person's permanent residence in the state and "a reasonable amount of money to meet immediate needs". See also AS 47.30.795.

15. Confidentiality. The APA guidelines adopt by reference the "Model Law on Confidentiality of Health and Social Service Records". AS 47.30.845 provides that patient records are confidential and not public records, and specifies the persons or agencies to whom records and information may be disclosed.

16. Grievance procedures. APA section 14.B. requires that treatment facilities establish "fundamentally fair" procedures for patients' grievances. Alaska statutes have no similar provision.

17. Immunities. Under APA section 18.A. employees of a treatment facility are not liable for acts or omissions within the scope of employment, absent willful misconduct or gross negligence. Other persons who act in good faith and with a reasonable basis are not liable for actions provided for under the guidelines. The guidelines disclaim any liability for actions by a patient who is absent from a treatment facility or who has been discharged. Finally, the guidelines disclaim any liability for failure to warn or notify anyone of a patient's discharge. Immunity under Alaska law is much more limited. Under AS 47.30.815 a person is not subject to criminal or civil liability for petitioning for evaluation or treatment of another person in

good faith and upon actual knowledge or reliable information. Also, four classes of officials may not be held civilly or criminally liable for detaining or releasing a person "at or before the end of" the period for which the person was committed, so long as the official acted in good faith and without gross negligence.

18. Penalties. APA section 18.B. provides that a civil fine, injunctive relief and money damages may be imposed or granted if a person (1) "knowingly and willfully gives substantial, false information or takes other wrongful action for the purpose of distorting, corrupting or interfering with the processes provided in this Act" or (2) commits, detains, discharges, or treats a patient, or otherwise affects a patient's "substantial rights" knowingly and willfully in substantial violation of the guidelines. AS 47.30.815 makes it a class C felony to willfully initiate an involuntary commitment procedure without good cause.

19. Miscellaneous provisions. The last four pages of the comparison booklet (enclosed) consist of provisions of Alaska law for which there are no corresponding provisions in the APA guidelines. Note especially AS 47.30.760, providing for placement at the closest facility; AS 47.30.765, providing for appeal of involuntary commitment orders; AS 47.30.875, providing for handling of nonresident patients; AS 47.30.880, adopting the Interstate Compact on Mental Health; and AS 47.30.895 - 47.30.900, disposition of personal property and money of patients who die while in custody or who leave a facility without authority. Note one error: AS 47.30.795, relating to outpatient care and appearing among the miscellaneous provisions, actually corresponds with APA section 12.F. and should have appeared opposite that section.

If you have any questions or comments, feel free to contact me at your convenience.

GIVEN TO PATIENTS AT API
(ALSO IN A LANGUAGE UNDERSTOOD BY PATIENT)

PATIENTS' RIGHTS

Your legislators have tried to protect your rights to freedom and at the same time protect everyone from dangerous people and protect people who are harmful to themselves because of mental illness.

The following are your rights according to law:

1. You may join in developing your treatment plan, and you are entitled to be informed of your medical and psychological condition and prognosis.

2. You will be told the name, purpose, and side effects of any medication you are asked to take.

3. No unnecessary or excessive medication will be given to you. All medication will be given only on the order of a licensed physician.

4. Physical restraint will not be used on you unless you behave in a manner harmful to yourself or others.

5. You will not receive electroconvulsive therapy, aversive conditioning, experimental treatment or psychosurgery.

6. You will be given a discharge plan outlining the kind and amount of care and treatment you should have after discharge.

7. Your civil rights will not be impaired.

8. Your hospital record and I.D. photograph will be confidential.

9. Unless you sign a release of responsibility, your personal property will be inventoried and safe-guarded and returned to you at discharge.

10. You will have private storage space, and will be allowed to wear your own clothing, and keep certain personal possessions and a reasonable amount of your own spending money.

11. You may have visitors during visiting hours.

12. You will have access to letter writing materials and stamps, and may send and receive unopened mail.

13. You will have reasonable access to a phone and may make and receive confidential calls.

14. After discharge you may move to have all court records pertaining to your care expunged.

Under the law certain rights may be restricted by your doctor when it is necessary for the protection of yourself or others.

The following additional information will help you better understand your care here. If you still have questions, ask your nurse or social worker:

1. No matter what your legal status is, the more you want to help yourself and work with the staff in an honest, open manner, the quicker and more effective will be your recovery.

2. You do not have the right to do the following:

   - Injure or threaten others.

   - Damage property

   - Intrude on the rights of others, such as rudeness, shouting, or excessive noise that you can control.

   - Make messes for others to clean up.

   - Bring or use drugs, alcohol or weapons.

   - Do illegal acts (break the law). This includes writing threatening letters or making threatening or obscene phone calls.

If you feel you are being treated unfairly or improperly, please follow these steps:

1) Bring it up in the community meeting.

2) If you are not satisifed with the results of that action, bring it up with your nursing advisor, doctor, or any member of the treatment team.

3) If not satisfied, write down your problem and complaint and forward it to the Superintendent.

4) You always have the right to write to your attorney, the State Ombudsman, the Commissioner of the Department of Health and Social Services, or the Superior Court which may have been involved in your hospitalization.

If you feel you've been discriminated against in any way because of race, color, sex, religion, age, or national origin, you may file a complaint with the Civil Rights Commission. You can get the forms from the Administrator's Office. If you need help in filling them out, see your nurse advisor or the Hospital Administrator's Office.

/ojb/vnc

HALOPERIDOL (Systemic)

Haloperidol (ha-loe-PER-i-dole) is used to treat nervous, mental, and emotional conditions. It is used also to control nausea and vomiting and the effects of Gilles de la Tourette's disease. Haloperidol is available only with your doctor's prescription.

Before Using This Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you have any of the following medical problems:

- Alcoholism
- Blood disease
- Epilepsy
- Glaucoma
- Heart or circulation disease
- Kidney disease
- Liver disease
- Lung disease
- Overactive thyroid
- Parkinson's disease
- Prostate enlargement
- Severe mental depression
- Stomach ulcers
- Urination problems

—if you are now taking any of the following medicines or types of medicine:

- Amphetamines
- Anticonvulsants (seizure medicine)
- Antihypertensives (high blood pressure medicine)
- Asthma medicine
- Epinephrine
- Ulcer medicine

—if you are now taking central nervous system (CNS) depressants such as:

- Antihistamines or medicine for hay fever, other allergies, or colds
- Barbiturates
- Narcotics
- Prescription pain medicine
- Sedatives, tranquilizers, or sleeping medicine
- Tricyclic antidepressants (medicine for depression)

Proper Use of This Medicine

Use this medicine only as directed by your doctor. Do not use more of it, do not use it more often, and do not use it for a longer period of time than your doctor ordered.

If this medicine upsets your stomach, it may be taken with food or milk to lessen stomach irritation.

If you miss a dose of this medicine, take it as soon as possible unless it is within 6 hours of your next scheduled dose. Do not double doses. Instead, go back to your regular dosing schedule. If you have any questions about this, check with your doctor.

Precautions While Using This Medicine

Your doctor should check your progress at regular visits, especially for the first few months you take this medicine.

Sometimes haloperidol must be taken for several days to several weeks before its full effect is reached in the treatment of certain mental and emotional conditions.

Do not suddenly stop taking this medicine without first checking with your doctor. Your doctor may want you to reduce gradually the amount you are taking before stopping completely.

This medicine will add to the effects of alcohol and other medicines that slow down the nervous system such as: antihistamines or medicine for hay fever, other allergies, or colds; barbiturates; medicine for seizures; narcotics; prescription pain medicine; sedatives, tranquilizers, or sleeping medicine; or tricyclic antidepressants (medicine for depression). ***Check with your doctor before taking any of the above while you are taking this medicine.***

This medicine may cause some people to become drowsy or less alert than they are normally, especially as the amount of medicine is increased. Even if you take this medicine at bedtime, you may feel drowsy or less alert on arising. ***Make sure you know how you react to this medicine before you drive, use machines, or do other jobs that require you to be alert.***

Although not a problem for many patients, dizziness, light-headedness, or fainting may occur, especially when getting up from a lying or sitting position. Getting up slowly may help. However, if the problem continues or gets worse, check with your doctor.

Side Effects of This Medicine

Along with its needed effects, a medicine may cause some unwanted effects. Although not all of these side effects appear very often, when they do occur they may require medical attention. Check with your doctor if any of the following side effects occur:

More common

- Shuffling walk
- Stiffness of arms and legs
- Tic-like, jerky movements of head, face, mouth, and neck
- Trembling and shaking of hands and fingers

Less common

- Difficulty in urination
- Dizziness, lightheadedness, or fainting
- Fine, worm-like movements of tongue
- Skin rash

Rare

- Sore throat and fever
- Yellowing of eyes and skin

Other side effects may occur which usually do not require medical attention. These side effects may go away during treatment as your body adjusts to the medicine. However, check with your doctor if any of the following side effects continue or are bothersome:

More common

- Blurred vision
- Constipation
- Dry mouth

TRICYCLIC ANTIDEPRESSANTS (Systemic)

Applies to:
Amitriptyline (a-mee-TRIP-ti-leen)
Desipramine (dess-IP-ra-meen)
Doxepin (DOX-e-pin)
Nortriptyline (nor-TRIP-ti-leen)
Imipramine (im-IP-ra-meen)

Does *not* apply to:
Protriptyline

This medicine belongs to the group of medicines known as tricyclic antidepressants or "mood elevators." It is used to relieve mental depression and depression that sometimes occurs with anxiety. One form of this medicine (imipramine) may be used to treat enuresis (bedwetting). Tricyclic antidepressants are available only with your doctor's prescription.

Before Using This Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you have experienced an allergic reaction to other tricyclic antidepressants.

—if you have any of the following medical problems:

Alcoholism	Heart disease
Asthma (history of)	High blood pressure
Difficult urination	Liver disease
Enlarged prostate	Overactive thyroid
Glaucoma	Stomach or intestinal problems

—if you are now taking any other medicines, including over-the-counter (OTC) or nonprescription medicine, especially the following:

Allergy medicine	Other medicine for depression
Antihistamines	Pain medicine
Barbiturates	Sedatives
Blood pressure medicine	Seizure medicine
Cold remedies	Sleeping medicine
Hay fever medicine	Tranquilizers
Narcotics	

—if you are now taking or have taken within the past 2 weeks monoamine oxidase (MAO) inhibitors such as:

Isocarboxazid	Phenelzine
Pargyline	Tranylcypromine

Proper Use of This Medicine

Take this medicine only as directed by your doctor.

To lessen stomach upset, take this medicine with food, unless your doctor has told you to take it on an empty stomach.

Sometimes this medicine must be taken for several weeks before you begin to feel better.

Keep this medicine out of the reach of children since overdose is especially dangerous in young children.

If you miss a dose of this medicine, take it as soon as possible and then go back to your regular dosing schedule. However, if a once-a-day bedtime dose is missed, do not take that dose in the morning. Instead, check with your doctor.

Precautions While Using This Medicine

It is very important that your doctor check your progress at regular visits.

Do not stop taking this medicine without first checking with your doctor. Your doctor may want you to reduce gradually the amount you are using before stopping completely.

Before having any kind of surgery (including dental surgery) or emergency treatment, tell the doctor or dentist in charge that you are using this medicine.

This medicine will add to the sedative effects of alcohol and other medicines that slow down the nervous system such as antihistamines or medicines for hay fever, other allergies, or colds; barbiturates; medicine for seizures; narcotics; other medicine for depression; prescription pain medicine; sedatives, tranquilizers, or sleeping medicine. *Check with your doctor before taking any of the above while you are taking this medicine and also for several days after you stop taking it.*

This medicine may cause some people to become drowsy or less alert than they are normally. *Make sure you know how you react to this medicine before you drive, use machines, or do other jobs that require you to be alert.*

Dizziness, lightheadedness, or fainting may occur, especially when getting up from a lying or sitting position. Getting up slowly may help. If this problem continues or gets worse, check with your doctor.

Side effects of this Medicine

Along with its needed effects, a medicine may cause some unwanted effects. Although not all of these side effects appear very often, when they do occur they may require medical attention. Check with your doctor if any of the following side effects occur:

More common

Blurred vision	Irregular heartbeat (pounding, racing, skipping)
Constipation	Problems in urinating

Less common

Eye pain	Hallucinations (seeing, hearing, or feeling things that are not there)
Fainting	Shakiness
	Unusually slow pulse

Rare

Seizures	Sore throat and fever
Skin rash and itching	Yellowing of eyes and skin

LITHIUM (Systemic)

Lithium (LI-thee-um) is a medicine used in the treatment of certain mental and emotional conditions. Lithium is available only with your doctor's prescription.

Before Using This Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you are pregnant or if you intend to become pregnant while using this medicine.

—if you are breast-feeding an infant.

—if you have any of the following medical problems:

Heart disease	Severe infection
Kidney disease	Thyroid disease
Parkinson's disease	

—if you drink large amounts of coffee or tea.

—if you are on a low-salt diet.

—if you are now taking any of the following medicines or types of medicine:

Asthma medicine	Haloperidol
Caffeine	Potassium iodide
Chlorpromazine	Sodium bicarbonate (baking soda)
Diuretics (water pills, especially thiazide-type)	

Proper Use of This Medicine

Take this medicine exactly as directed. Do not take more of it, do not take it more often, and do not take it for a longer period of time than your doctor ordered.

Sometimes this medicine must be taken for 1 to several weeks before you begin to feel better.

While taking this medicine, *drink 2 or 3 quarts of water or other fluids each day*, and use a normal amount of table salt in your food, unless otherwise directed by your doctor.

Take this medicine immediately after meals or with food or milk to lessen stomach upset, unless otherwise directed by your doctor.

If you miss a dose of this medicine, take it as soon as possible unless it is 2 hours or less until your next scheduled dose. Do not double doses. Instead, go back to your regular dosing schedule. If you have any questions about this, check with your doctor.

Precautions While Using This Medicine

Your doctor should check your progress at regular visits to make sure that the medicine is working properly and that possible side effects are avoided.

This medicine may cause some people to become drowsy or less alert than they are normally. *Make sure you know how you react to this medicine before you drive, use machines, or do other jobs that require you to be alert.*

Use extra care in hot weather and during activities that cause you to sweat heavily, such as hot baths, saunas, or exercising. The loss of too much water and salt from your body may lead to serious side effects from this medicine.

Do not drink large amounts of caffeine-containing beverages, such as coffee, tea, or colas, while taking this medicine. Since lithium is lost from the body through the urine, the increased urine flow caused by caffeine may lessen the medicine's effect.

Side Effects of This Medicine

Along with its needed effects, a medicine may cause some unwanted effects. Although not all of these side effects appear very often, when they do occur they may require medical attention. Check with your doctor if any of the following side effects occur:

More common

Nausea and vomiting
Shakiness and tremor

Less common

Drowsiness	Swelling of feet and lower legs
Mental confusion	Weakness
Pains in lower Stomach	Slurred speech

Rare

Blurred vision	Jerking of arms and legs

Other side effects may occur which usually do not require medical attention. These side effects may go away during treatment as your body adjusts to the medicine. However, check with your doctor if any of the following side effects continue or are bothersome:

More common

Decreased sexual ability	Dry mouth
Diarrhea	Increased thirst
Dizziness	Increased urination

Less common

Skin eruption or rash

Signs of low thyroid function

Coldness of fingers and toes	Menstrual changes
Constipation	Muscle aches
Dry, puffy skin	Sleepiness
Headache	Tiredness
	Unusual weight gain

BENZTROPINE (Systemic)

Benztropine (BENZ-troe-peen) is a medicine used to treat Parkinson's disease, sometimes referred to as "shaking palsy." By improving muscle control, benztropine allows more normal movements of the body as the disease symptoms are reduced. Benztropine is available only with your doctor's prescription.

Before Using This Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you have any of the following medical problems:

Asthma	High blood pressure
Bronchitis	Intestinal blockage
Difficult urination	Kidney disease
Emphysema	Liver disease
Enlarged prostate	Myasthenia gravis
Glaucoma	Overactive thyroid
Hiatal hernia	Severe ulcerative colitis

—if you are taking any of the following medicines or types of medicine:

Amantadine	Medicine for diarrhea
Antacids	Medicine for Parkinson's disease
Antihistamines or medicine for hay fever, other allergies, or colds	Medicine for sleep
Haloperidol	Nerve medicine
Heart medicine	Sedatives or tranquilizers
	Ulcer medicine

—if you are now taking or have taken within the past 2 weeks monoamine oxidase (MAO) inhibitors such as:

Isocarboxazid	Phenelzine
Pargyline	Tranylcypromine

Proper Use of This Medicine

Take this medicine only as directed by your doctor To lessen stomach upset, take this medicine immediately after meals or with food, unless your doctor has told you to take it on an empty stomach.

If you miss a dose of this medicine, take it as soon as possible. If it is within 8 hours of your next dose, do not take the missed dose at all and do not double the next one. Instead, go back to your regular dosing schedule. If you have any questions about this, check with your doctor.

Precautions While Using This Medicine

This medicine will add to the effects of alcohol and other medicines that slow down the nervous system such as antihistamines or medicine for hay fever, other allergies, or colds; barbiturates; medicine for depression; medicine for seizures; narcotics; prescription pain medicine; sedatives, tranquilizers, or sleeping medicine. *Check with your doctor before taking any of the above while you are taking this medicine.*

Do not take this medicine within 1 hour of taking antacids or medicine for diarrhea. Taking them too close together will make benztropine less effective.

This medicine may cause your eyes to become more sensitive to light than they are normally. Wearing sunglasses may help lessen the discomfort from bright light.

This medicine may cause some people to become drowsy, dizzy, or less alert than they are normally. *Make sure you know how you react to this medicine before you drive, use machines, or do other jobs that require you to be alert.*

Benztropine will often reduce your tolerance of heat, since it makes you sweat less, causing your body temperature to increase. *Use extra care not to become overheated during exercise or hot weather while you are taking this medicine, as this could possibly result in heat stroke.*

Your mouth, nose, and throat may feel very dry while you are taking this medicine. *To help relieve mouth dryness, chew sugarless gum or dissolve bits of ice in your mouth.*

Check with your doctor if you develop intestinal problems such as constipation. This is especially important if you are taking other medicine while taking benztropine, because if the problems are not corrected serious complications may result.

Side Effects of This Medicine

Along with its needed effects, a medicine may cause some unwanted effects. Although not all of these side effects appear very often, when they do occur they may require medical attention. Check with your doctor if any of the following side effects occur:

More common

Constipation

Less common

Difficult urination

Rare

Eye pain
Skin rash

THIOXANTHENES *(Systemic)*

Applies to:
Chlorprothixene (klor-proe-THIX-een)
Thiothixene (thye-oh-THIX-een)

This medicine belongs to the general family of medicines known as thioxanthenes. It is used in the treatment of nervous, mental, and emotional conditions. This medicine is available only with your doctor's prescription.

Before Using This Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you have ever had any unusual reaction to other thioxanthene or phenothiazine medicines.

—if you have any of the following medical problems:

Alcoholism	Lung disease
Blood disease	Parkinson's disease
Glaucoma	Stomach ulcers
Heart or circulation disease	Prostate enlargement
Liver disease	Urination problems

—if you are now taking any of the following medicines or types of medicine:

Amphetamines	Guanethidine (high blood pressure medicine)
Anticonvulsants (seizure medicine)	Levodopa
Epinephrine	Ulcer medicine

—if you are now taking central nervous system (CNS) depressants such as:

Antihistamines or medicine for hay fever, other allergies, or colds	Sedatives, tranquilizers, or sleeping medicine
Barbiturates	Tricyclic antidepressants (medicine for depression)
Narcotics	
Prescription pain medicine	

—if you are now taking or have taken within the past 2 weeks monoamine oxidase (MAO) inhibitors such as:

Isocarboxazid	Phenelzine
Pargyline	Tranylcypromine

Proper Use of this Medicine

Do not take more of this medicine or take it more often than your doctor ordered. This is particularly important when it is given to children, since they may react very strongly to the effects of the medicine.

This medicine may be taken with food or a full glass (8 ounces) of water or milk to reduce stomach irritation.

Sometimes this medicine must be taken for several weeks before its full effect is reached in the treatment certain mental and emotional conditions.

If you miss a dose of this medicine, take it as soon as possible. If it is two hours or less until your next dose, do not take the missed dose at all and do not double the next one. Instead, go back to your regular dosing schedule. If you have any questions about this, check with your doctor.

Precautions While Using This Medicine

Your doctor should check your progress at regular visits, especially for the first few months you take this medicine.

Do not stop taking this medicine without first checking with your doctor. Your doctor may want you to reduce gradually the amount you are taking before stopping completely.

This medicine will add to the effects of alcohol and other medicines that slow down the nervous system such as: antihistamines or medicine for hay fever, other allergies, or colds; barbiturates; medicine for seizures; narcotics; prescription pain medicine; sedatives, tranquilizers, or sleeping medicine; or tricyclic antidepressants (medicine for depression). *Check with your doctor before taking any of the above while you are taking this medicine.*

This medicine may cause some people to become drowsy or less alert than they are normally, especially during the first few weeks the medicine is being taken. Even if you take this medicine only at bedtime, you may feel drowsy or less alert on arising. *Make sure you know how you react to this medicine before you drive, use machines, or do other jobs that require you to be alert.*

Dizziness, lightheadedness, or fainting may occur, especially when getting up from a lying or sitting position. Getting up slowly may help. If the problem continues or gets worse, check with your doctor.

Sometimes, patients may show signs of restlessness and excitement after taking this medicine. If this occurs, stop taking the medicine and check with your doctor.

This medicine will often make you sweat less, causing your body temperature to increase. Use extra care not to become overheated during exercise or hot weather while you are taking this medicine, since overheating could possibly result in heat stroke. Also, hot baths or saunas may make you feel dizzy or faint while you are taking this medicine.

A few people who take this medicine may become more sensitive to sunlight than they are normally. When you first begin taking this medicine, avoid too much sun or too much use of a sunlamp until you see how you react. If you have a severe reaction, check with your doctor.

Do not take this medicine within an hour of taking antacids or medicine for diarrhea. Taking them too close together may make this medicine less effective.

Side Effects of This Medicine

Along with its needed effects, a medicine may cause some unwanted effects. Although not all of these side effects appear very often, when they do occur

ANTIHISTAMINES (Systemic)

Applies to:
Azatadine (a-ZA-ta-deen)
Bromodiphenhydramine (broe-moe-dye-fen-HYE-dra-meen)
Brompheniramine (brome-fen-EER-a-meen)
Carbinoxamine (kar-bi-NOX-a-ameen)
Chlorpheniramine (klor-fen-EER-a-meen)
Dexchlorpheniramine (dex-klor-fen-EER-a-meen)
Dimethindene (dye-meth-IN-deen)
Diphenylpyraline (dye-fen-il-PEER-a-leen)
Doxylamine (doxe-ILL-a-meen)
Pyrilamine (peer-ILL-a-meen)
Tripelennamine (tri-pel-ENN-a-meen)
Triprolidine (trye-PROE-li-deen)

Does not apply to:
Cyproheptadine
Dimenhydrinate
Diphenhydramine
Hydroxyzine
Promethazine
Trimeprazine

Antihistamines are used to relieve or prevent the symptoms of hay fever and other types of allergy. Certain antihistamine preparations are available only with your doctor's prescription. Others are available without a prescription; however, your doctor may have special instructions on the proper dose of the medicine for your medical condition.

Before Using This Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you are breast-feeding an infant.

—if you have any of the following medical problems:

- Enlarged prostate
- Heart disease
- High blood pressure
- Increased eye pressure
- Overactive thyroid
- Stomach ulcer
- Urinary tract blockage

—if you are now taking any central nervous system (CNS) depressants such as:

- Barbiturates
- Medicine for seizures
- Narcotics
- Other antihistamines or medicine for hay or colds
- Prescription pain medicine
- Sedatives, tranquilizers, or sleeping medicine
- Tricyclic antidepressants (medicine for depression)

—if you are now taking or have taken within the past two weeks monoamine oxidase (MAO) inhibitors such as:

- Isocarboxazid
- Pargyline
- Phenelzine
- Tranylcypromine

Proper Use of This Medicine

Antihistamines are used to relieve or prevent the symptoms of your medical problem. Take them only as directed. Do not take more of them or take them more often than your doctor ordered.

Take this medicine with food or a glass of water or milk to lessen stomach irritation.

If you are taking the long-acting tablet form of this medicine, the tablets are to be swallowed whole. Do not break, crush, or chew before swallowing.

Do not give this medicine to premature or newborn infants, unless otherwise directed by your doctor.

Precautions While Using This Medicine

Antihistamines will add to the effects of alcohol and other medicines that slow down the nervous system, such as anesthetics, including dental anesthetics; tranquilizers; medicine for depression; narcotics; prescription pain medicine; medicine for seizures; sleeping medicine; sedatives; or medicine for hay fever, other allergies, or colds. *Check with your doctor before taking any of the above while you are taking this medicine.*

This medicine may cause some people to become drowsy or less alert than they are normally. Even if taken at bedtime, it may cause some people to feel drowsy or less alert on arising. *Make sure you know how you react to this medicine before you drive or do other jobs that require you to be alert.*

Side Effects of This Medicine

Along with its needed effects, a medicine may cause some unwanted effects. The following side effects may go away during treatment as your body adjusts to the medicine; however, check with your doctor if they continue or are bothersome:

More common

- Dizziness
- Drowsiness
- Thickening of the bronchial secretions
- Upset stomach or stomach pain

Less common or rare

- Blurred vision
- Difficult or painful urination
- Dryness of mouth, nose, and throat
- Headache
- Loss of appetite
- Nervousness, restlessness, or trouble in sleeping(especially in children)
- Skin rash
- Unusual increase in sweating
- Unusually fast heartbeat

Other side effects not listed above may also occur in some patients. If you notice any other effects, check with your doctor.

PHENOTHIAZINES (Systemic)

Applies to:
Acetophenazine (a-set-oh-FEN-a-zeen)
Butaperazine (byoo-ta-PAIR-a-zeen)
Carphenazine (kar-FEN-a-zeen)
Chlorpromazine (klor-PROE-ma-zeen)
Fluphenazine (floo-FEN-a-zeen)
Perphenazine (per-FEN-a-zeen)
Piperacetazine (pi-per-a-SET-a-zeen)
Prochlorperazine (proe-klor-PAIR-a-zeen)
Promazine (PROE-ma-zeen)
Thioridazine (thye-oh-RID-a-zeen)
Trifluoperazine (trye-floo-oh-PAIR-a-zeen)
Triflupromazine (trye-floo-PROE-ma-zeen)

Does *not* apply to:
Ethopropazine
Methdilazine
Methotrimeprazine
Promethazine
Propiomazine
Thiethylperazine
Thiopropazate
Trimeprazine

Phenothiazines (fee-noe-THYE-a-zeens) are a family of medicines used to treat nervous, mental, and emotional conditions; some are used also to control anxiety, nausea and vomiting, and severe hiccups. Phenothiazines are available only with your doctor's prescription.

Before Using this Medicine

In order to decide on the best treatment for your medical problem, your doctor should be told:

—if you have ever had any unusual reaction to any of the phenothiazine medicines.

—if you are pregnant or if you intend to become pregnant while using this medicine.

—if you are breast-feeding an infant.

—if you have any of the following medical problems:

Alcoholism	Lung Disease
Blood disease	Parkinson's disease
Glaucoma	Prostate enlargement
Heart or circulation disease	Stomach ulcers
Liver disease	Urination problems

—if you are now taking any of the following medicines or types of medicine:

Amphetamines	Guanethidine (high blood pressure medicine)
Anticonvulsants (seizure medicine)	Levodopa
Asthma medicine	Ulcer medicine
Epinephrine	

—if you are now taking central nervous system (CNS) depressants such as:

Antihistamines or medicine for hay fever, other allergies, or colds	Prescription pain medicine
Barbiturates	Sedatives, tranquilizers, or sleeping medicine
Narcotics	Tricyclic antidepressants (medicine for depression)

—if you are now taking or have taken within the past two weeks monoamine oxidase (MAO) inhibitors such as:

Isocarboxazid	Phenelzine
Pargyline	Tranylcypromine

Proper Use of This Medicine

Do not take more of this medicine or take it more often than your doctor ordered. This is particularly important when it is given to children, since they may react very strongly to the effects of the medicine.

Sometimes this medicine must be taken for several weeks before its full effect is reached in the treatment of certain mental and emotional conditions.

Do not stop taking this medicine without first checking with your doctor. Your doctor may want you to reduce gradually the amount you are taking before stopping completely.

If you miss a dose of this medicine and your dosing schedule is one dose to be taken:

Once a day— Take the missed dose as soon as possible. Then go back to your regular dosing schedule. But if you do not remember the missed dose until the next day, do not take it at all and do not double the next one. Instead, go back to your regular dosing schedule.

Two times a day— Take the missed dose as soon as possible. Then go back to your regular dosing schedule. However, if it is almost time for your next dose, do not take the missed dose at all and do not double the next one. Instead, go back to your regular dosing schedule.

More than two times a day— If you remember within an hour or so of the missed dose, take it right away. Then go back to your regular dosing schedule. But if you do not remember until later, do not take the missed dose at all and do not double the next one. Instead, go back to your regular dosing schedule.

If you have any questions about this, check with your doctor.

Precautions While Using This Medicine

Your doctor should check your progress at regular visits, especially for the first few months you take this medicine.

This medicine will add to the effects of alcohol and other medicines that slow down the nervous system

such as: antihistamines or medicine for hay fever, other allergies, or colds; barbiturates; medicine for seizures; narcotics; prescription pain medicine; sedatives, tranquilizers, or sleeping medicine; or tricyclic antidepressants (medicine for depression). *Check with your doctor before taking any of the above while you are taking this medicine.*

This medicine may cause some people to become drowsy or less alert than they are normally, especially during the first few weeks the medicine is being taken. Even if you take this medicine only at bedtime, you may feel drowsy or less alert on arising. *Make sure you know how you react to this medicine before you drive, use machines, or do other jobs that require you to be alert.*

Dizziness, lightheadedness, or fainting may occur, especially when getting up from a lying or sitting position. Getting up slowly may help. If the problem continues or gets worse, check with your doctor.

Sometimes, patients may show signs of restlessness and excitement after taking this medicine. If this occurs, stop taking the medicine and check with your doctor.

This medicine will often make you sweat less, causing your body temperature to increase. *Use extra care not to become overheated during exercise or hot weather while you are taking this medicine,* since overheating could possibly result in heat stroke. Also, hot baths or saunas may make you feel dizzy or faint while you are taking this medicine.

A few people who take this medicine may become more sensitive to sunlight than they are normally. When you first begin taking this medicine, avoid too much sun or too much use of a sunlamp until you see how you react. If you have a severe reaction, check with your doctor.

Side Effects of This Medicine

Along with its needed effects, a medicine may cause some unwanted effects. Although not all of these side effects appear very often, when they do occur they may require medical attention. Check with your doctor if any of the following side effects occur:

More common (occurring with increase of dosage)

Muscle spasms, especially of neck and back	Tic-like (jerky) movements of head, face, mouth, and neck
Restlessness	Trembling and shaking of hands and fingers
Shuffling walk	

Less common

Fainting	Skin rashes
Fine, worm-like movements of tongue	

Rare

Eye problems	Yellowing of eyes and skin
Sore throat and fever	

Other side effects may occur which usually do not require medical attention. These side effects may go away during treatment as your body adjusts to the medicine. However, check with your doctor if any of the following side effects continue or are bothersome:

More common

Blurred vision	Dry mouth
Constipation	Increased sensitivity of skin to sun
Decreased sweating	Nasal congestion
Dizziness	Unusually fast heartbeat
Drowsiness	

Less common

Changes in menstrual period	Difficult urination
Decreased sexual ability	Swelling of breasts

This medicine may cause the urine to turn pinkish red to red or reddish brown; this is harmless and may be expected. If you have questions about this, ask your doctor or pharmacist.

Other side effects not listed above may also occur in some patients. If you notice any other effects, check with your doctor.

ADDITIONAL INFORMATION

For patients taking this medicine by mouth

This medicine may be taken with food or a full glass (8 ounces) of water or milk to reduce stomach irritation.

Do not take this medicine within an hour of taking antacids or medicine for diarrhea. Taking them too close together may make this medicine less effective.

If you are taking a liquid form of this medicine, try to avoid getting it on your skin or clothing because it may cause a skin rash or other irritation.

If your medicine comes in a dropper bottle, it must be diluted before you take it. Just before taking, measure each dose with the specially marked dropper and dilute it in ½ glass (4 ounces) of tomato or fruit juice, water, soup, coffee, tea, milk, or carbonated beverage.

For patients taking the extended-release tablet form of this medicine

The extended-release tablets or capsules are to be swallowed whole. Do not break, crush, or chew before swallowing.

For patients using the suppository form of this medicine

How to insert suppository: First remove the foil wrapper and moisten the suppository with water. Lie down on side and push the suppository well up into the rectum with finger.

If the suppository is too soft to insert because of storage in a warm place, before removing the foil wrapper chill the suppository in the refrigerator for 30 minutes or run cold water over it.

For patients receiving this medicine by injection

The effects of the long-acting injection form of this medicine may last for up to 6 weeks. The precautions and side effects information for this medicine applies during this period of time.

Article 9. Patient Rights.

Section		Section	
825	Patient rights: Medical	845	Confidential records
830	Prohibition of experimental treatments	850	Expungement of records
835	Civil rights not impaired	855	Posting of rights
840	Right to privacy and personal possessions	860	Notices in languages other than English
		865	Discrimination prohibited

Sec. 47.30.825. Patient rights: Medical. Each patient who is receiving services under AS 47.30.660 — 47.30.915 has the following rights:

(1) A patient, or his counsel, guardian, or the adult designated in accordance with AS 47.30.725 if the patient is mentally incapable of participation, is entitled to participate in formulating his individualized treatment plan and to participate in the evaluation process as much as possible, at minimum to the extent of requesting specific forms of therapy, inquiring why specific therapies are or are not included in his treatment program, and being informed as to his present medical and psychological condition and prognosis. The treating physician may not withhold any of this information from the patient.

(2) A patient has the right to know the name of medication that he is asked to take, what its purpose is, and what side effects may occur with this medication. If the patient is incapable of understanding the purpose and side effects of the medication, the treating physician or mental health professional shall explain it to the patient's counsel or guardian or, if there is no guardian, the adult designated in accordance with AS 47.30.725.

(c) A locked quiet room, or other form of physical restraint, may not be used, except as provided in this paragraph, unless a patient is likely to physically harm himself or others unless restrained. The form of restraint used shall be that which is in the patient's best interest and which constitutes the least restrictive alternative available. When practicable, the patient shall be consulted as to his preference among forms of adequate, medically advisable restraints including medication, and his preference shall be considered. Nothing in this section is intended to limit the right of staff to use a quiet room at the patient's request or with his knowing concurrence when considered in the best interests of the patient. Patients placed in a quiet room or other physical restraint shall be checked at least every 15 minutes or more often if good medical practice so indicates. Patients in a quiet room must be visited by a staff member at least once every hour and must be given adequate food and drink and access to bathroom facilities. At no time may a patient be kept in a quiet room or other form of physical restraint against his will longer than necessary to accomplish the purposes set out in this paragraph. All uses of a quiet room or other restraint shall be recorded in the patient's medical record, the information including but not limited to the reasons for its use, the duration of use, and the names of the staff persons who monitored

(4) A patient has the right to be free from unnecessary or excessive medication. Psychotropic medication shall be administered only on the order of a licensed physician when the physician determines that such medication is in the best interest of the patient or will prevent serious harm to others.

(5) A patient capable of giving informed consent has the absolute right to accept or refuse electro-convulsive therapy or aversive conditioning. A patient who lacks substantial capacity to make this decision may not be given such therapy or conditioning without a court order.

(6) In no event may treatment include psychosurgery, lobotomy, or other comparable form of treatment without specific informed consent of the patient, including a minor unless he is clearly too young or disabled to give an informed consent in which case the consent of his legal guardian is required. In addition, such treatment may not be given without a court order after hearing compatible with full due process.

(7) When, in the written opinion of a patient's attending physician, a true medical emergency exists and a surgical operation is necessary to save the life, physical health, eyesight, hearing or member of the patient, the professional person in charge, or his professional designee, may give consent to the surgical operation if time will not permit obtaining the consent of the proper relatives or guardian or appropriate judicial authority. However, an operation may not be authorized if the patient is not a minor and knowingly withholds consent on religious grounds.

(8) A patient upon discharge shall be given a discharge plan specifying the kinds and amount of care and treatment he should have after discharge and such other steps as he might take to benefit his mental health after leaving the facility. The patient shall have the right to participate, as far as practicable, in formulating his discharge plan. A copy of the plan shall be given to the patient, his guardian, the court if appropriate, and any follow-up agencies. (§ 1 ch 84 SLA 1981)

Sec. 47.30.830. Prohibition of experimental treatments. (a) Experimental treatments involving any significant risk of physical or psychological harm may not be administered to a patient.

(b) If the personnel of an evaluation or treatment facility are uncertain as to whether a proposed treatment is experimental or is experimental as applied to a particular patient or would involve a significant risk of mental or physical harm to the patient, the matter may be referred to the commissioner for a determination. The patient, his attorney, his guardian, if any, and an adult designated by the patient, shall, simultaneously with the referral to the commissioner, be provided with copies of all the documents by which the referral is made and shall have the opportunity to provide evidence to the commissioner on the question.

(c) A determination by the commissioner that a treatment is experimental and entails significant risks of mental or physical harm is binding upon all persons involved in the administration of treatment to a patient. (§ 1 ch 84 SLA 1981)

Sec. 47.30.835. Civil rights not impaired. (a) A person may not deny to a person who is undergoing evaluation or treatment under AS 47.30.660 — 47.30.915 a civil right, including but not limited to, the right to free exercise of religion and the right to dispose of property, sue and be sued, enter into contractual relationships, and vote. A person who violates this subsection commits the crime of interference with constitutional rights under AS 11.76.110.

(b) Court-ordered evaluation or treatment under AS 47.30.660 — 47.30.915 is not a determination of legal incapacity under AS 13.26.005 — 13.26.330. (§ 1 ch 84 SLA 1981)

Sec. 47.30.840. Right to privacy and personal possessions. A person undergoing evaluation or treatment under AS 47.30.660 — 47.30.915 shall

(1) not be photographed without his consent and that of his guardian if a minor, except that he may be photographed upon admission to a facility for identification and for administrative purposes of the facility; all photographs shall be confidential and may only be released by the facility to the patient or his designee unless a court orders otherwise;

(2) at the time of admission to an evaluation or treatment facility, have reasonable precautions taken by the staff to inventory and safeguard his personal property; a copy of the inventory signed by the staff member making it shall be given to the patient and made available to his attorney and any other person authorized by the patient to inspect the document;

(3) have access to an individual storage space for his private use while undergoing evaluation or treatment;

(4) be permitted to wear his own clothing, to keep and use his own personal possessions including his toilet articles if they are not considered unsafe for him or other patients who might have access to them, and to keep and be allowed to spend a reasonable sum of his own money for his own needs and comfort;

(5) be allowed to have visitors at reasonable times;

(6) have ready access to letter writing materials, including stamps, and have the right to send and receive unopened mail;

(7) have reasonable access to a telephone, both to make and receive confidential calls. (§ 1 ch 84 SLA 1981)

Sec. 47.30.845. Confidential records. Information and records obtained in the course of a screening investigation, evaluation, examination, or treatment are confidential and are not public records, except as the requirements of a hearing under AS 47.30.660 — 47.30.915 may necessitate a different procedure. Information and records may be copied and disclosed under regulations established by the department only to

(1) a physician or a provider of health, mental health, or social and welfare services involved in caring for, treating, or rehabilitating the patient;

(2) the patient or an individual to whom the patient has given written consent to have information disclosed;

(3) a person authorized by a court order;

(4) a person doing research or maintaining health statistics, if the anonymity of the patient is assured, and the facility recognizes the project as a bona fide research or statistical undertaking;

(5) the division of corrections in a case in which a prisoner confined to the state prison is a patient in the state hospital on authorized transfer either by voluntary admission or by court order;

(6) a governmental or law enforcement agency when necessary to secure the return of a patient who is on unauthorized absence from a facility where the patient was undergoing evaluation or treatment. (§ 1 ch 84 SLA 1981)

Sec. 47.30.850. Expungement of records. Following the discharge of a respondent from a treatment facility or the issuance of a court order denying a petition for commitment, the respondent may at any time move to have all court records pertaining to the proceedings expunged on condition that he file a full release of all claims of whatever nature arising out of the proceedings and the statements and actions of persons and facilities in connection with the proceedings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.855. Posting of rights. The rights set out in AS 47.30.825 — 47.30.855 shall be prominently posted in all treatment facilities in places accessible to all patients. A patient who does not understand English shall have his rights explained to him in a language he understands. (§ 1 ch 84 SLA 1981)

Sec. 47.30.860. Notices in languages other than English. When practicable all documents and notices required by AS 47.30.660 — 47.30.915 to be served on a respondent, or on his parents, guardian or adult designee, shall be explained in a language the person understands if he is not competent in English. (§ 1 ch 84 SLA 1981)

Sec. 47.30.865. Discrimination prohibited. (a) The fact that a person is or has been evaluated or treated for mental illness may not be a basis for discrimination in

(1) seeking employment;

(2) resuming or continuing professional practice or previous occupation;

(3) obtaining or retaining housing;

(4) obtaining or retaining licenses or permits, including but not limited to a motor vehicle license, motor vehicle operator's and chauffeur's license, and a professional or occupational license.

(b) Applications for positions, licenses, and housing may not contain requests for information concerning evaluation or treatment experiences.

(c) It is unlawful for a person to aid, abet, incite, compel, or coerce the doing of an act forbidden under this section or to attempt to do so. (§ 1 ch 84 SLA 1981)

Article 10. Miscellaneous Provisions.

Section	
870	Transportation
875	Nonresident patients
880	Interstate compact
885	Rights outside state
890	Provision for personal needs upon discharge
895	Disposition of personal property and unclaimed money
900	Disposition of money and personal property subject to claim
905	Fees and expenses for judicial proceedings
910	Liability for expense of placement in a treatment facility
915	Definitions

Sec. 47.30.870. Transportation. When a person is to be involuntarily committed to a facility, the department shall arrange, and is authorized to pay for, the person's necessary transportation to the designated facility accompanied by appropriate persons and if necessary by a peace officer. The department shall pay return transportation of a person, his escorts, and if necessary a peace officer, after a determination that the person is not committable, at the end of a commitment period, or at the end of a voluntary stay at a treatment facility following an evaluation conducted in accordance with AS 47.30.715. When advisable, one or more relatives or friends shall be permitted to accompany the person. The department may pay necessary travel, housing, and meal expenses incurred by one relative or friend in accompanying the person if the department determines that the person's best interests require that he be accompanied by the relative or friend and the relative or friend is indigent. (§ 1 ch 84 SLA 1981)

Sec. 47.30.875. Nonresident patients. (a) The admission papers of a person who is admitted to a treatment facility under AS 47.30.660 — 47.30.915 shall include a statement as to his residence. The department may return a patient who is not a resident of the state to the state of his residence with court approval if the person has been committed. If the state in which he has residence does not accept him as a patient, the person shall be treated as a resident of this state under the provisions of AS 47.30.660 — 47.30.915.

(b) To facilitate the return of nonresident patients the department may enter into a reciprocal agreement or compact with another state providing for the prompt return under appropriate supervision of residents of that state who are mentally ill. A mentally ill resident of this state who has been placed in a facility outside this state may be admitted with the approval of the department to a treatment facility in the state designated by the department. The department may enter into reciprocal agreements or contracts with another state providing for custody, care or treatment, or return of mentally ill residents of this state by the other state and for the custody and care or treatment of mentally ill residents of that state by this state on a reimbursable basis. A resident of this state who has been committed in another state and is returned in accordance with this section shall, within 72 hours of his admission to the designated facility, be examined. After examination the mental health professional in charge shall release him or shall petition for involuntary commitment as prescribed in AS 47.30.740.

(c) In taking action under (a) and (b) of this section, consideration shall be given to the best interests of the patient, particularly to the relationship of the patient to his family, legal guardian, or friends to maintain relationships and encourage visits beneficial to the patient. (§ 1 ch 84 SLA 1981)

Sec. 47.30.880. Interstate compact. This state ratifies and adopts by reference "The Interstate Compact on Mental Health" consisting of 11 articles approved on September 30, 1955, by the Northeast State Governments Conference on Mental Health. The department is designated as compact administrator with full power to carry out the purpose of the compact and to make all necessary regulations to implement the compact. (§ 119(e) ch 87 SLA 1957; added by § 11 ch 127 SLA 1959; AS 47.30.180)

Editor's notes. — This section derives from former AS 47.30.180 and was renumbered by the revisor of statutes under AS 01.05.031 to accord with the revision of the mental health statutes in Chapter 84, SLA 1981.

Sec. 47.30.885. Rights outside state. Nothing in AS 47.30.660 — 47.30.915 alters or impairs the application or availability to a patient, while hospitalized in another state under contractual arrangements entered in accordance with AS 47.30.660 — 47.30.915, of the rights, remedies or safeguards provided by the laws of this state. (§ 1 ch 84 SLA 1981)

Sec. 47.30.890. Provision for personal needs upon discharge. The department shall insure that

(1) a patient is not discharged from a treatment facility without suitable clothing; and

(b) The petition required in (a) of this section shall allege that the respondent is reasonably believed to present a likelihood of serious harm to himself or others or is gravely disabled as a result of mental illness and shall specify the factual information on which that belief is based including the names and addresses of all persons known to the petitioner who have knowledge of those facts through personal observation. (§ 1 ch 84 SLA 1981)

Sec. 47.30.705. Emergency detention for evaluation. A peace officer who has probable cause to believe that a person is gravely disabled or is suffering from mental illness and is likely to cause serious harm to himself or others of such immediate nature that considerations of safety do not allow initiation of involuntary commitment procedures set out in AS 47.30.700, may cause the person to be taken into custody and delivered to the nearest evaluation facility. A correctional facility may be used as an emergency evaluation facility if an evaluation facility is not available. Upon arrival at the evaluation facility, the peace officer shall complete an application for examination of the person in custody and he interviewed by a mental health professional at the facility. (§ 1 ch 84 SLA 1981)

Sec. 47.30.710. Examination. (a) A respondent who is delivered under AS 47.30.700 to 47.30.705 for emergency examination and treatment to an evaluation facility shall be examined and evaluated as to his mental and physical condition by a mental health professional and by a physician within 24 hours after arrival at the facility.

(b) If the mental health professional who performs the emergency examination has reason to believe that the respondent is (1) mentally ill and that condition causes the respondent to be gravely disabled or to present a likelihood of serious harm to himself or others, and (2) is in need of care or treatment, the mental health professional may hospitalize him, or arrange for hospitalization, on an emergency basis. If a judicial order has not been obtained under AS 47.30.700, the mental health professional shall apply for an ex parte order authorizing hospitalization for evaluation. (§ 1 ch 84 SLA 1981)

Editor's notes. — The word "respondent" was substituted for the word "person" in the first sentence of subsection (a) by the revisor of statutes pursuant to AS 01.05.031.

Sec. 47.30.715. Acceptance of order. When a facility receives a proper order for evaluation, it must accept the order and the respondent for an evaluation period not to exceed 72 hours. The facility shall promptly notify the court of the date and time of the respondent's arrival. The court shall set a date, time and place for a 21 day commitment hearing, to be held if needed within 72 hours after the respondent's arrival, and the court shall notify the facility, the respondent, his attorney, and the prosecuting attorney of the hearing arrangements. Evaluation personnel, when used, shall similarly notify the court of the date and time when they first met with the respondent. (§ 1 ch 84 SLA 1981)

Sec. 47.30.720. Release before expiration of 72-hour period. If at any time in the course of the 72-hour period the mental health professionals conducting the evaluation determine that the respondent does not meet the standards for commitment specified in AS 47.30.700, the respondent shall be discharged from the facility or the place of evaluation by evaluation personnel and the petitioner and the court so notified. (§ 1 ch 84 SLA 1981)

Sec. 47.30.725. Commitment proceeding rights; notification. (a) When a respondent is detained for evaluation under AS 47.30.660 – 47.30.915, he shall be immediately notified orally and in writing of his rights under this section. Notification shall be in a language understood by the respondent. His guardian, if any, and if the respondent requests, an adult designated by the respondent, shall also be notified of the respondent's rights under this section.

(b) Unless a respondent is released or voluntarily admits himself for treatment within 72 hours of his arrival at the facility or, if he is evaluated by evaluation personnel, within 72 hours from the beginning of his meeting with evaluation personnel, he is entitled to a court hearing to be set for not later than the end of that 72-hour period to determine whether there is cause to detain him after the 72 hours have expired for up to an additional 21 days on the grounds that he is gravely disabled or mentally ill and as a result presents a likelihood of serious harm to himself or others. The facility or evaluation personnel shall give notice to the court of the releases and voluntary admissions under AS 47.30.700 – 47.30.820.

(c) The respondent has a right to communicate immediately, at the department's expense, with his guardian, if any, or an adult designated by the respondent and the attorney designated in the ex parte order, or an attorney of the respondent's choice.

(d) The respondent has the right to be represented by an attorney, to present evidence, and to cross-examine witnesses who testify against him at the hearing.

(e) The respondent has the right to be free of the effects of medication and other forms of treatment to the maximum extent possible before the 21 day commitment hearing; however, the facility or evaluation personnel may treat him with medication under prescription by a licensed physician or by a less restrictive alternative of his preference if, in the opinion of a licensed physician in the case of medication, or of a mental health professional in the case of alternative treatment, the treatment is necessary to

(1) prevent bodily harm to the respondent or others;

(2) prevent such deterioration of the respondent's mental condition that subsequent treatment might not enable him to recover; or

(3) allow the respondent to prepare for and participate in the proceedings.

(f) A respondent, if he is represented by counsel, may waive, orally or in writing, the 72-hour time limit on the 21-day commitment hearing and have the hearing set for a date no more than seven calendar days after his arrival at the facility. The respondent's counsel shall immediately notify the court of the waiver. (§ 1 ch 84 SLA 1981)

Sec. 47.30.730. Procedure for 21-day commitment; petition for commitment. (a) In the course of the 72-hour evaluation period, a petition for commitment to a treatment facility may be filed in court. The petition must be signed by two mental health professionals who have examined the respondent, one of whom is a physician. The petition must

(1) allege that the respondent is mentally ill and as a result is likely to cause harm to himself or others or is gravely disabled;

(2) allege that the evaluation staff has considered but has not found that there are any less restrictive alternatives available that would adequately protect the respondent or others; or, if a less restrictive involuntary form of treatment is sought, specify the treatment and the basis for supporting it;

(3) allege with respect to a gravely disabled respondent that there is reason to believe that the respondent's mental condition could be improved by the course of treatment sought;

(4) allege that a specified treatment facility or less restrictive alternative that is appropriate to the respondent's condition has agreed to accept the respondent;

(5) allege that the respondent has been advised of the need for, but has not accepted, voluntary treatment, and request that the court commit the respondent to the specified treatment facility or less restrictive alternative for a period not to exceed 21 days;

(6) list the prospective witnesses who will testify in support of commitment or involuntary treatment;

(7) list the facts and specific behavior of the respondent supporting the allegation in (1) of this subsection.

(b) A copy of the petition shall be served on the respondent, his attorney, and his guardian, if any, before the 21-day commitment hearing. (§ 1 ch 84 SLA 1981)

Sec. 47.30.735. 21-day commitment. (a) Upon receipt of a proper petition for commitment, the court shall hold a hearing at the date and time previously specified according to procedures set out in AS 47.30.715.

(b) The hearing shall be conducted in a physical setting least likely to have a harmful effect on the mental or physical health of the respondent, within practical limits. At the hearing, in addition to other rights specified in AS 47.30.660 — 47.30.915, the respondent has the right

(1) to be present at the hearing; this right may be waived only with the respondent's informed consent; if the respondent is incapable of giving informed consent, the respondent may be excluded from the hearing only if the court, after hearing, finds that the incapacity exists and that there is a substantial likelihood that the respondent's presence at the hearing would be severely injurious to his mental or physical health;

(2) to view and copy all petitions and reports in the court file of his case;

(3) to have the hearing open or closed to the public as he elects;

(4) to be proceeded against according to the rules of evidence applicable to civil proceedings;

(5) to have an interpreter if he does not understand English;

(6) to present evidence on his behalf;

(7) to cross-examine witnesses who testify against him;

(8) to remain silent.

(c) At the conclusion of the hearing the court may commit the respondent to a treatment facility for not more than 21 days if it finds, by clear and convincing evidence, that the respondent is mentally ill and as a result is likely to cause harm to himself or others or is gravely disabled.

(d) If the court finds that there is a viable less restrictive alternative available and that the respondent has been advised of and refused voluntary treatment through the alternative, the court may order the less restrictive alternative treatment for not more than 21 days if the program accepts the respondent.

(e) The court shall specifically state to the respondent, and give him written notice, that if commitment or other involuntary treatment beyond the 21 days is to be sought, the respondent shall have the right to a full hearing or jury trial. (§ 1 ch 84 SLA 1981)

Sec. 47.30.740. Procedure for 90-day commitment following 21-day commitment. (a) At any time during the respondent's 21-day commitment, the professional person in charge, or his professional designee, may file with the court a petition for a 90-day commitment of that respondent. The petition must include all material required under AS 47.30.730(a) except that references to "21 days" shall be read as "90 days"; and

(1) allege that the respondent has attempted to inflict or has inflicted serious bodily harm upon himself or another since his acceptance for evaluation, or that he was committed initially as a result of conduct in which he attempted or inflicted serious bodily harm upon himself or another, or that he continues to be gravely disabled, or that he demonstrates a current intent to carry out plans of serious harm to himself or another;

(2) allege that the respondent has received appropriate and adequate care and treatment during his 21-day commitment;

(3) be verified by the professional person in charge, or his professional designee, during the 21-day commitment.

(b) The court shall have copies of the petition for 90-day commitment served upon the respondent, his attorney, and his guardian, if any. The petition for 90-day commitment and proofs of service shall be filed with the clerk of the court, and a date for hearing shall be set, by the end of the next judicial day, for not later than five judicial days from the date of filing of the petition. The clerk shall notify the respondent, his attorney, and the petitioner of the hearing date at least three judicial days in advance of the hearing.

(c) Findings of fact relating to the respondent's behavior made at a 21-day commitment hearing under AS 47.30.735 shall be admitted as evidence and may not be rebutted except that newly discovered evidence may be used for the purpose of rebutting the findings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.745. 90-day commitment hearing rights. (a) A respondent subject to a petition for 90-day commitment has, in addition to the rights specified elsewhere in AS 47.30.350 — 47.30.915, or otherwise applicable, the rights enumerated in this section. Written notice of these rights shall be served on the respondent, his attorney, his guardian, if any, and may be served on an adult designated by the respondent at the time the petition for 90-day commitment is served. An attempt shall be made by oral explanation to insure that the respondent understands the rights enumerated in the notice. If the respondent does not understand English, the explanation shall be given in a language he understands.

(b) Unless the respondent is released or voluntarily admits himself following the filing of a petition and before the hearing, he is entitled to a judicial hearing within five judicial days of the filing of the petition as set out in AS 47.30.740(b) to determine if he is mentally ill and as a result is likely to cause harm to himself or others, or if he is gravely disabled. If the respondent voluntarily admits himself following the filing of the petition, the voluntary admission constitutes a waiver of any hearing rights under AS 47.30.740 or under AS 47.30.685. If at any time during the respondent's voluntary admission under this subsection, the respondent submits to the facility a written notice of intent to leave, the professional person in charge may file with the court a petition for 120-day commitment of the respondent under AS 47.30.770. The 120-day commitment hearing shall be scheduled for a date not earlier than 90 days after the respondent's voluntary admission.

(c) The respondent is entitled to a jury trial upon request filed with the court if the request is made at least two judicial days before the hearing. If the respondent requests a jury trial, the hearing may be continued for no more than 10 calendar days. The jury shall consist of six persons.

(d) If a jury trial is not requested, the court may still continue the hearing at the respondent's request for no more than 10 calendar days.

(e) The respondent has a right to retain an independent licensed physician or other mental health professional to examine him and to testify on his behalf. Upon request by an indigent respondent, the court shall appoint an independent licensed physician or other mental health professional to examine him and testify on his behalf. The court shall consider an indigent respondent's request for a specific physician or mental health professional. A motion for the appointment may be filed in court at any reasonable time before the hearing and shall be acted upon promptly. Reasonable fees and expenses for expert examiners shall be determined by the rules of court.

(f) The proceeding shall in all respects be in accord with constitutional guarantees of due process and, except as otherwise specifically provided in AS 47.30.700 — 47.30.915, the rules of evidence and procedure in civil proceedings.

(g) Until the court issues a final decision, the respondent shall continue to be treated at the treatment facility unless the petition for 90-day commitment is withdrawn. If no decision has been made within 20 days of filing of the petition, not including extensions of time due to jury trial or other requests by the respondent, he shall be released. (§ 1 ch 84 SLA 1981)

Sec. 47.30.750. Conduct of hearing. The hearing under AS 47.30.745 shall be conducted in the same manner, and with the same rights for the respondent, as set out in AS 47.30.735(b). (§ 1 ch 84 SLA 1981)

Editor's notes. — The word "under AS 47.30.745" was added following "hearing" by the revisor of statutes pursuant to AS 01.05.031.

Sec. 47.30.755. Court order. (a) After the hearing and within the time limit specified in AS 47.30.745, the court may commit the respondent to a treatment facility for no more than 90 days if the court or jury finds by clear and convincing evidence that the respondent is mentally ill and as a result is likely to cause harm to himself or others, or is gravely disabled.

(b) If the court finds that there is a less restrictive alternative available and that the respondent has been advised of and refused voluntary treatment through the alternative, the court may order the less restrictive alternative treatment after acceptance by the program of the respondent for a period not to exceed 90 days. (§ 1 ch 84 SLA 1981)

Sec. 47.30.760. Placement at closest facility. Treatment shall always be available at a state-operated hospital; however, if space is

(5) that patients be informed of their legal rights and be informed of and allowed to participate in their treatment program as much as possible;

(6) that persons who are mentally ill but not dangerous to others be committed only if there is a reasonable expectation of improving their mental condition. (§ 1 ch 84 SLA 1981)

Editor's notes. — The parenthetical expression in the first sentence was added by the revisor of statutes pursuant to AS 01.05.031

Sec. 47.30.660. Powers and duties of department. The department is the mental health authority of the state and shall

(1) administer a comprehensive program for the prevention of mental illness and the care and treatment of the mentally ill, including inpatient and outpatient care and treatment and the procurement of services of specialists or other persons on a contractual or other basis;

(2) take the actions and undertake the obligations which are necessary to participate in federal grants-in-aid programs and accept federal or other financial aid from whatever sources for the study, examination, care, and treatment of the mentally ill;

(3) administer AS 47.30.660 — 47.30.915;

(4) designate, operate, and maintain treatment facilities equipped and qualified to provide inpatient and outpatient care and treatment for the mentally ill;

(5) provide for the placement of mentally ill patients in designated treatment facilities;

(6) enter into arrangements with governmental agencies for the care or treatment of the mentally ill in facilities of the governmental agencies in the state or in another state;

(7) enter into contracts with treatment facilities for the custody and care or treatment of the mentally ill;

(8) enter into contracts which incorporate safeguards consistent with AS 47.30.660 — 47.30.915 and the preservation of the civil rights of the patients with another state for the custody and care or treatment of patients previously committed from this state under 48 U.S.C., sec. 46 et seq., and P.L. 830, 84th Congress, 2nd Session, 70 Stat. 709;

(9) prescribe the form of applications, records, reports, requests for release, and consents to medical or psychological treatment required by AS 47.30.660 — 47.30.915;

(10) require reports from the head of a treatment facility concerning the care of patients;

(11) visit each treatment facility at least annually to review methods of care or treatment for patients;

(12) investigate complaints made by a patient or an interested party on behalf of a patient;

(13) delegate upon mutual agreement to another officer or agency of it, or a political subdivision of the state, or a treatment facility designated, any of the duties and powers imposed upon it by AS 47.30.660 — 47.30.915; and

(14) adopt regulations to implement the provisions of AS 47.30.660 — 47.30.915. (§ 1 ch 84 SLA 1981)

Editor's notes. — Section 6, ch 84, SLA 1981, provided "Except as provided in this Act, the provisions of AS 47.30.660 — 47.30.915 enacted by sec. 1 of this Act do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1981, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1981. However, 90 days after October 1, 1981, the provisions of this Act apply to all persons committed under statutes in effect before October 1, 1981."

Article 7. Voluntary Admission for Treatment.

Section

670 Standards for voluntary admission
675 Notice of rights
680 Discharge of voluntary patients
685 Notice of intent to leave facility; commitment
690 Admission of minors under 14 years of age
695 Notice of request for release of minors under 14 years of age from detention and commitment

Editor's notes. — Section 6, ch 84, SLA 1981, provided "Except as provided in this Act, the provisions of AS 47.30.660 — 47.30.915 enacted by sec. 1 of this Act do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1981, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1981. However, 90 days after October 1, 1981, the provisions of this Act apply to all persons committed under statutes in effect before October 1, 1981."

Sec. 47.30.670. Standards for voluntary admission. A person 14 years of age or older may be voluntarily admitted to a treatment facility if he is suffering from mental illness and he voluntarily signs the admission papers. (§ 1 ch 84 SLA 1981)

Sec. 47.30.675. Notice of rights. (a) Upon the application of a person for voluntary admission, or at the time a person admitted under AS 47.30.690 reaches the age of 14, he shall be given a copy of the following documents which shall be explained to him as necessary:

(1) notice of rights as set out in AS 47.30.825 — 47.30.865 and an explanation of any document served upon him; and

(2) notice that should he desire to leave at a time when the treatment facility determines that he is mentally ill and as a result is likely to cause serious harm to himself or others or is gravely disabled, the facility could initiate commitment proceedings against him.

(b) If an applicant for voluntary admission does not understand English, the explanation shall be given in a language he understands. (§ 1 ch 84 SLA 1981)

Sec. 47.30.680. Discharge of voluntary patients. A patient who no longer meets the standards established in AS 47.30.670 shall be discharged from the treatment facility. (§ 1 ch 84 SLA 1981)

Sec. 47.30.685. Notice of intent to leave facility; commitment. A voluntary patient who is 14 years of age or older and who desires to leave a treatment facility must submit to the facility a written notice of intent to leave on a form provided to him by the facility. Upon immediate investigation, the patient shall be evaluated in writing and discharged immediately or given written notice that involuntary commitment proceedings will be initiated against him. The treatment facility may detain the patient for no more than 48 hours after receipt of the patient's notice of intent to leave in order to initiate involuntary commitment proceedings. (§ 1 ch 84 SLA 1981)

Sec. 47.30.690. Admission of minors under 14 years of age. (a) A minor under the age of 14 may be admitted for 21 days evaluation, diagnosis, and treatment at a designated treatment facility if his parent or guardian signs the admission papers and if, in the opinion of the professional person in charge,

(1) he is gravely disabled or is suffering from mental illness and as a result he is likely to cause serious harm to himself or others;

(2) there is no less restrictive alternative available for his treatment; and

(3) there is reason to believe that the patient's mental condition could be improved by the course of treatment.

(b) The minor may be released by the treatment facility at any time during the 21 day period if the professional person in charge or his designated mental health professional determines the minor would no longer benefit from continued hospitalization and the minor is not dangerous. The minor's parents or his guardian must be notified by the facility of the contemplated release and that, unless they initiate involuntary commitment proceedings, the minor will be released. (§ 1 ch 84 SLA 1981)

Sec. 47.30.695. Notice of request for release of minors under 14 years of age from detention and commitment. The parent or guardian of a minor who is less than 14 years of age may request and obtain immediate release of the minor at any time, unless as the result of mental illness, the minor is likely to cause serious harm to himself or others. (§ 1 ch 84 SLA 1981)

Article 8. Involuntary Admission for Treatment.

Section		Section	
700	Initiation of involuntary commitment procedures	760	Placement at closest facility
705	Emergency detention for evaluation	765	Appeal
710	Examination	770	Additional 120 day commitment
715	Acceptance of order	775	Commitment of minors
720	Release before expiration of 72 hour period	780	Early discharge
725	Commitment proceeding rights; notification	785	Authorized absences
730	Procedure for 21 day commitment; petition for commitment	790	Return from unauthorized absence
735	21 day commitment	795	Involuntary outpatient care for committed persons
740	Procedure for 180 day commitment following 21 day commitment	800	Conversion of involuntary outpatient treatment to inpatient commitment

750	Conduct of hearing	810	Habeas corpus
755	Court order	815	Limitation of liability, penalty for false application

---

Editor's notes. Section 1 ch 84 SLA 1981, provided: "Except as provided in this Act, the provisions of AS 47.30.660 — 47.30.815 enacted by sec. 1 of this Act do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1981, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1981. However, 90 days after October 1, 1981, the provisions of this Act apply to all persons committed under statutes in effect before October 1, 1981."

Sec. 47.30.700. Initiation of involuntary commitment procedures. (a) Upon petition of any adult, a judge shall immediately conduct a screening investigation or direct a local mental health professional employed by the department or by a local mental health program that receives money from the department under AS 47.30.520 — 47.30.670 or another mental health professional designated by the judge, to conduct a screening investigation of the person alleged to be mentally ill and, as a result of that condition, alleged to be gravely disabled or to present a likelihood of serious harm to himself or others. Within 48 hours after the completion of the screening investigation, a judge may issue an ex parte order orally or in writing, stating that there is probable cause to believe the respondent is mentally ill and that condition causes the respondent to be gravely disabled or to present a likelihood of serious harm to himself or others. The court shall provide findings on which the conclusion is based, appoint an attorney to represent the respondent, and may direct that a peace officer take the respondent into custody and deliver him to the nearest appropriate facility for emergency examination or treatment. The ex parte order shall be provided to the respondent and made a part of the respondent's clinical record. The court shall confirm an oral order in writing within 24 hours after it is issued.

outpatient basis because he is likely to cause harm to himself or others or is gravely disabled, the provider shall give the respondent oral and written notice that he must return to the treatment facility within 24 hours, with copies to the respondent's attorney, his guardian, if any, the court, and the inpatient treatment facility. If the respondent fails to arrive at the treatment facility within 24 hours after receiving the notice, the professional person in charge may contact the appropriate peace officers who shall take the respondent into custody and transport him to the facility. If it is determined by the professional person in charge to be necessary, a member of the treatment facility staff shall accompany the peace officers when they take the respondent into custody.

(d) If the provider of outpatient care determines that the respondent will require continued outpatient care after the expiration of his commitment period, the provider may initiate further commitment proceedings as if he were the professional person in charge, and the provisions of AS 47.30.660 — 47.30.915 apply, except that provisions relating to inpatient treatment shall be read as applicable to outpatient treatment. (§ 1 ch 84 SLA 1981)

Sec. 47.30.800. Conversion of involuntary outpatient treatment to inpatient commitment. (a) A respondent ordered by the court under the provisions of AS 47.30.700 — 47.30.915 to receive involuntary outpatient treatment may be required to undergo inpatient treatment when the provider of outpatient care finds that (1) the respondent is mentally ill and is likely to cause serious harm to himself or others or is still gravely disabled; (2) the respondent's behavior since the hearing resulting in court-ordered treatment indicates that he now needs inpatient treatment to protect himself or others; (3) there is reason to believe that the respondent's mental condition will improve as a result of inpatient treatment; and (4) there is an inpatient facility appropriate to the respondent's need which will accept him as a patient. Treatment for these respondents shall be available at state operated hospitals at all times.

(b) Upon making the findings specified in (a) of this section, the provisions of AS 47.30.795(b) relating to notice and AS 47.30.745 relating to hearing apply. (§ 1 ch 84 SLA 1981)

Sec. 47.30.805. Computing periods of time. (a) Except as provided in (b) of this section,

(1) computations of a 72-hour evaluation period do not include Saturdays, Sundays, legal holidays, or any period of time necessary to transport the respondent to the treatment facility;

(2) a 21-day commitment period expires at the end of the 21st day after the 72 hours following initial acceptance;

(3) a 90-day commitment period expires at the end of the 90th day after the expiration of a 21-day period of treatment;

(4) a 120-day commitment period expires at the end of the 120th day, after the expiration of a 90-day period of treatment or previous 120-day period, whichever is applicable.

(b) When a respondent has failed to appear or absented himself contrary to any order properly made or entered under AS 47.30.660 — 47.30.915, the relevant commitment period shall be extended for a period of time equal to the respondent's absence if written notice of absence is promptly provided to the respondent's attorney and his guardian, if there is one, and if, within 24 hours after the respondent has returned to the evaluation or treatment facility, written notice of the corresponding extension and the reason for it is given to the respondent, his attorney, his guardian, if any, and to the court. (§ 1 ch 84 SLA 1981)

Sec. 47.30.810. Habeas corpus. Nothing in AS 47.30.660 — 47.30.915 may be construed as limiting a person's right to a writ of habeas corpus. (§ 1 ch 84 SLA 1981)

Sec. 47.30.815. Limitation of liability; penalty for false application. (a) A person acting in good faith upon either actual knowledge or reliable information who makes application for evaluation or treatment of another person under AS 47.30.700 — 47.30.915 is not subject to civil or criminal liability.

(b) The following persons may not be held civilly or criminally liable for detaining a person under AS 47.30.700 — 47.30.915 or for releasing a person under AS 47.30.700 — 47.30.915 at or before the end of the period for which the person was admitted or committed for evaluation or treatment if the persons have performed their duties in good faith and without gross negligence:

(1) an officer of a public or private agency;

(2) the superintendent, the professional person in charge, the professional designee of the professional person in charge, and the attending staff of a public or private agency;

(3) a public official performing functions necessary to the administration of AS 47.30.700 — 47.30.915;

(4) a peace officer responsible for detaining a person under AS 47.30.700 — 47.30.915.

(c) A person who wilfully initiates an involuntary commitment procedure under AS 47.30.700 without having good cause to believe that the other person is suffering from a mental illness and as a result is gravely disabled or likely to cause serious harm to himself or others, is guilty of a felony. (§ 1 ch 84 SLA 1981)

Detaining the Insane

Detention Hospitals, Mental Health, and Frontier Politics in Alaska, 1910-1915

Thomas G. Smith

The strong interest in social history during the last decade has produced several studies on the care and treatment of disadvantaged, dependent, and deviant persons. Significant general works have been undertaken, but local, state, and institutional studies, especially ones set in the 20th century, are lacking. This essay explores the efforts of Alaskans to establish detention hospitals for the mentally ill between 1910 and 1915. Although students of Alaskan history point to poor treatment of the insane as evidence of the federal government's neglect of and indifference toward Alaska, the study reveals that Alaskans themselves must share the blame. In addition, the essay provides insights into mental health policy, Alaskan politics, and federal-territorial relations during the period.[1]

By the turn of the century, the prevalence of mental illness was a growing concern among many Alaskans. As the population surged due to the gold rushes of the 1890s, so did the number of insane. The arduous journey, excruciating work, harsh climate, loneliness, and dashed hopes sometimes proved more than pioneers could endure. In 1900 nine Alaskans were adjudged insane. By 1910 the number had climbed to 130, and a decade later the figure reached 217. Responding to pleas for assistance from Alaskans, the federal government provided for the care of the mentally ill in the civil government bill of 1900. That measure made insanity a criminal offense. The person accused in a written complaint was arrested by the marshal, brought before a district commissioner, and tried by a six-man jury. If found guilty, he was committed to an asylum. Since Alaska had no mental hospital, the governor was empowered to contract with the lowest-bidding institution west of the Rocky Mountains for the care of the insane. From 1904 to 1956 the Morningside Sanitarium (formerly Mount Tabor), near Portland, Oregon, held the contract.[2]

The contract system came under severe attack by residents of Alaska. They complained that it was an archaic and inhumane practice not followed by any other American state or territory. Noncontiguous dependencies such as Hawaii, Puerto Rico, and the Philippines all had asylums that were built and maintained at local or territorial expense. Not until 1912, however, did Alaska win territorial status and its own government; in the meantime, it had to rely on the federal government to care for the insane.[3]

Alaskans also decried the practice of incarcerating the afflicted in jails until they could be transported to Oregon. In interior Alaska the mentally ill often had to spend as long as six months in jail until weather conditions permitted transportation to the "outside." An Alaska asylum was the solution, but Congress rejected the proposal for such an institution because of cost ($75,000 for the building alone). Alaskans next implored the government to establish small hospitals in which the mentally afflicted could be temporarily detained pending removal to Morningside.[4]

---

1. See, for example, Gerald Grob, *Mental Institutions in America* (New York, 1973); Blake McKelvey, *American Prisons* (Montclair, N.J., 1977); David Rothman, *The Discovery of the Asylum* (Boston, 1971), and *Conscience and Convenience: The Asylum and Its Alternatives in Progressive America* (Boston, 1980). For criticisms of the way the federal government dealt with Alaska's insane, see *Alaska Daily Empire* (Juneau), Nov. 6, Dec. 6, 30, 1912; Ernest Gruening, *The State of Alaska* (New York, 1968), 280.

2. For the early treatment of Alaska's insane, see Thomas G. Smith, "The Treatment of the Mentally Ill in Alaska, 1884-1912: A Territorial Study," *PNQ*, Vol. 65 (1974), 17-20. Also see Claus-M. Naske, "Bob Bartlett and the Alaska Mental Health Act," *ibid.*, Vol 71 (1980), 31-39.

3. Apparently Alaskans were not troubled by assigning criminal status to the insane, indigent sick, elderly, etc.; lacking asylums, almshouses, old folks homes, and local charities, they classified social dependents as criminals in order to assure them of government care. The federal government also maintained Indians who were mentally ill (a government asylum was established in 1898 at Canton, S.D.). Canada, like Alaska, transported its insane from remote and sparsely populated areas to provincial hospitals rather than build mental institutions in the Yukon and Northwest Territories. See Henry Hurd, ed., *The Institutional Care of the Insane in the United States and Canada*, 4 vols. (Baltimore, 1916-17), III, 630-32, 871-90; IV, 2-25, 228-36.

4. For introduction of these two measures, see *Congressional Record*, 61st Cong., 2d Sess., 1910, pp. 1498 (H.R. 20111), 5243 (H.R. 24833); for the texts of these bills, *ibid.*, 6853, and 61st Cong., 2d Sess., House Document 637, p. 2 (Serial 5836).

The need for some type of "holding tank" or detention center seemed obvious to the residents of interior Alaska. Detailed descriptions of mental breakdowns appeared frequently in the press. "DANGEROUS LUNATIC NOW AT LARGE" ran a Nome *Nugget* headline in October 1908. The escaped "lunatic" threatened to kill the district judge, marshal, and commissioner. In Fairbanks, a "crazed" woman shot to death the police chief in 1908. A year later in the same city a "madman" tried to kill the proprietor of the Pioneer Hotel by hurling a boulder through the window, and a knife-wielding, "blood-seeking headhunter" went berserk in Dempsey Lewis's saloon before being felled by a pool cue. In Fairbanks, the roster of persons taken into custody included the president of the Washington-Alaska Bank, an Indian woman, a prospector who repeatedly tried to commit suicide, a sourdough who imagined he was being run over by automobiles, and a woodchopper from Fox City who broke down when fire destroyed 12 cords of firewood. The Fairbanks *Daily News-Miner* pointed out that the number of insane in that community in 1909 had doubled over the previous year.[5]

Alarmed by the increasing frequency of insanity, Fairbanksans called for proper detention facilities for the afflicted. The federal jail lacked sufficient space to accommodate both prisoners and mental patients. Attempts to integrate criminals and the insane resulted in "pandemonium." On one occasion an insane man "kept everyone awake . . . by praying loudly and the noise was well calculated to make the rest of the prisoners nervous." The *News-Miner* noted that the number of insane was increasing at such a rapid rate that "separate quarters must necessarily be provided for them." The grand jury of the fourth judicial division at Fairbanks concurred.[6]

James Wickersham, Alaska's delegate to Congress, also advocated proper facilities for the care of the insane. Wickersham was a fiery progressive from Fairbanks who had served as a federal district judge at Eagle, Nome, and Fairbanks before being elected delegate in 1908. In February 1910, he tried to convince Congress to appropriate money for a permanent insane asylum in southeastern Alaska (HR 20111). When that effort failed, he introduced new legislation in April calling for an appropriation of $50,000 to build detention hospitals at Fairbanks and Nome for the temporary care of the insane (HR 24833). The House Committee on Territories recommended passage of the measure, declaring that the mentally afflicted "are entitled to the most scrupulous care, and should not be subjected to commitment in an ordinary jail." With an eye for economy, however, the committee recommended $25,000 instead of $50,000 for the project. The Senate Committee on Territories also approved the measure. Despite stiff opposition from some economy-minded congressmen, the bill was passed into law "In the interest of humanity."[7]

James Wickersham, who wrote the defective hospitals bill, blamed others for the delay in construction. (Whalen Collection, University of Alaska Archives, Fairbanks)

Specifically, the measure called for the establishment of a detention hospital in the second judicial division at Nome and in the fourth judicial division at Fairbanks. Insane persons would receive temporary care in a detention center until trails and waterways thawed sufficiently to permit the U.S. marshal to transport them to the Morningside Sanitarium in Oregon. Each hospital was to cost no more than $12,500. The marshal, the governor of Alaska, and the U.S. district judge, acting as a board of governors, would call for bids and award a contract for construction. Once completed, the detention houses would be administered and maintained by the Department of Justice.[8]

From the beginning, the detention hospitals project encountered difficulties. Although the bill became law on June 25, 1910, the summer expired without any attempt to implement it. Pressed for an explanation by the *Alaska Citizen*, Governor Walter E. Clark stated that, after reading the measure carefully, he had discovered a shortcoming which made it "practically inoperative." According to the governor, the law was defective because it failed to provide for the acquisition of sites on which to build the hospitals. John Rustgard, U.S. district attorney at Juneau, supported the governor's interpretation of the bill and advised him not to proceed without instructions from the Justice Department. Judicial officers from Nome expressed similar views.[9]

But U.S. District Judge Peter D. Overfield of Fairbanks voiced a different opinion. He favored prompt implementation of

James Wickersham, Delegate from Alaska, Hon. W. R. Ellis, M.C., Mr. George Coe, Stanfield, Oregon, March 4 and April *, 6, and 20, 1910*. House Committee on the Territories (Washington, D.C., 1910), 19, 26-28, 31-32.

8. 36 Stat. 852 (1910). In 1910 Alaska was divided into four judicial divisions. In the second and fourth, waterways froze and land routes were virtually impassable for seven or eight months of the year.

9. *Alaska Citizen* (Fairbanks), July 10, 1910; John Rustgard to Walter E. Clark, Oct. 3, 1910, Clark to Peter D. Overfield, Oct. 8, 1910, Overfield to Clark, Oct. 8, 1910, Box 564, File 4-7-2-1, Record Group 129, Department of Justice (DJ), National Archives.

the law and accused Clark and Rustgard of pettiness and needless delay. Although Wickersham had failed to provide for hospital sites when he drafted the bill, the oversight could be remedied. Overfield held, by securing donated land. Residents of Fairbanks were eager to have a detention hospital and would furnish land to the government free of charge. Nome residents would probably follow suit. Clark rejected Overfield's suggestion because he doubted the legality of accepting land as a gift on behalf of the federal government.[10]

Pointing out that on several occasions in the past the federal government had accepted "gratuitous deeds of lands for public purposes," Overfield urged the governor to seek the advice of the U.S. attorney general; if land donation proved unacceptable, Congress might be asked to remedy the problem by authorizing the acquisition of land or by permitting the hospitals to be built as additions to the Fairbanks and Nome jails.[11]

Although the governor agreed to consult the attorney general, he did not agree to present the case objectively. Indeed, besides underscoring the law's legal defects, Clark assured the attorney general that the detention hospitals were "entirely unnecessary" because adequate provisions had been made "for the temporary care of the insane in the modern jails erected at Nome and Fairbanks two years ago." He denounced Overfield's dogged support for the detention houses as political loyalty to Wickersham, who was responsible for the judge's appointment, and he also censured Overfield for showing disrespect for the governor's office by "his conspicuous absence without excuse from a public dinner in my honor at Fairbanks."[12]

In October 1910 the Justice Department declared the hospitals act defective because it lacked provision for the acquisition of land; hence, it found that Governor Clark had properly delayed construction of the hospitals. Since the federal government did not own land in Fairbanks and Nome appropriate for hospital sites, the attorney general recommended referring "the matter back to Congress for a further expression of its wishes." Inexplicably, he failed to rule on whether the federal government could accept hospital sites as a gift from the residents of Fairbanks and Nome.[13]

Governor Clark's objections to the detention hospital law were guided by political as well as legal considerations. Clark and Wickersham were bitter political enemies despite being members of the Republican party. Republicans in Alaska and around the nation were divided into regular and progressive factions. Clark and Lewis W. Shackleford, Alaska's Republican national committeeman, headed the regulars; Wickersham, the progressives.

Disturbed by his independence, GOP regulars referred to Wickersham as a "political harlot" and in the delegate race of 1910 nominated Edward S. Orr, a businessman from Fairbanks, to oppose him. The Socialists also entered a candidate, William O'Connor, a newspaper editor from Tanana. The Democrats, a minority party in Alaska, refused to run a candidate. When the votes were counted, the incumbent, Wickersham, easily retained his seat.[14]

Although the detention hospitals were not an issue in that election, residents of interior Alaska were growing increasingly irritated by the lack of action on the project. In March 1911 the grand jury of the fourth judicial division reported that the federal jail at Fairbanks was "inadequate for the proper care and detention of insane persons, of whom there are several now in custody." Due to overcrowding, it was necessary to confine the sane and insane in the same room. The grand jury found that practice unacceptable from a humanitarian standpoint and urged immediate construction of a detention center.[15]

In May the town council of Fairbanks passed a resolution offering the federal government free of charge a parcel of land on which to erect a detention hospital. Noting that the residents of Fairbanks "are pressing me pretty hard," Governor Clark forwarded the resolution to Attorney General George Wickersham (no relation to the delegate) for an opinion. At the same time, Clark recommended that the detention center be erected as an addition to the Fairbanks jail instead of as a separate facility.[16]

Even as he obstructed implementation of the hospitals act, Governor Walter Clark blamed Wickersham for the delay. (Bunnell Coll., University of Alaska Archives)

Nearly two months elapsed without a decision. Numerous Fairbanksans seethed over the delay and sought scapegoats. Some considered the lack of progress another example of federal indifference toward Alaska. Others, particularly the Republican press in Fairbanks, faulted Wickersham for having drafted a defective bill. In an editorial entitled "Our Detained Hospital," the Fairbanks *Daily Times* criticized the delegate for failing to follow the "businesslike course" of admitting his mistake and introducing legislation to rectify it. Had he introduced corrective legislation, the community "would have a detention hospital built and running today." Wickersham had rejected that course of action, the editor opined, because as a politician he was concerned mainly with retaining office. "He is making political capital out of the fact that the hospital is not built," the newspaper charged. "Such political capital is worth more to him than the hospital would be, so he has deliberately failed to remedy the matter."[17]

Wickersham himself blamed the delay on Governor Clark and District Attorney Rustgard. The delegate claimed that he had purposely omitted provision for the purchase of land sites in the bill because he planned to build the centers on public land. The public domain, he stated, had been utilized in the past for jails, courthouses, and telegraph offices. It could also be used for detention centers. "It would have been considered silly," he explained to the Fairbanks Commercial Club, "for the United States to appropriate money out of its own treasury to buy its own land in Alaska for a United States hospital. Nobody but Governor Clark and Mr. John Rustgard would have ever thought of such a foolish proposition, and they would not have thought of it except for the fact that they wished to make the law a failure."[18]

Pro-Wickersham newspapers such as the *Alaska Citizen* echoed the delegate's charges. The *Citizen* held that there was "no one to blame for the delay" but Clark, who had advanced "the ridiculous proposition that the government could not accept a donated site." That view, the paper continued, was based on Clark's "bitter opposition to the delegate, and his determination that Wickersham shall get nothing for the territory that could in any way enhance his prestige."[19]

The federal jail at Fairbanks housed both prisoners and the insane; the women slept in this 12-by-14-foot room with a sloping ceiling and one window. (National Archives)

Nonetheless, the argument in defense of the law was weak. If the hospitals were to be erected on public land, the act should have so specified. Moreover, its author should have realized that public land was unavailable in Fairbanks and Nome: once a patent is granted for a townsite, the land is no longer public. Instead of introducing corrective legislation, Wickersham stubbornly defended a defective law and blamed his political enemies for sabotaging the hospitals. As the Fairbanks *Daily Times* remarked, "the delegate overlooked an important detail in his bill, and in trying to cover it up is attempting to unload upon the governor whatever blame exists."[20]

In August 1911 the attorney general instructed Governor Clark to proceed with the construction of the Fairbanks hospital. Instead of being constructed on a donated site, the facility would be erected on top of the federal jail. Such a plan would minimize delay and save expense by using the same personnel to operate both institutions.[21]

But the instructions sparked a heated protest from Wickersham. Addressing the Fairbanks Commercial Club on September 28, he ridiculed the idea of housing "poor crazy people" above the "dirty old rotten jail." His plan, he reminded the town's businessmen, was to build the hospitals on public land. Appealing to their booster spirit, he informed his listeners that the Fairbanks detention facility was part of a larger plan to secure a permanent insane asylum in the town. That larger effort would be stymied, he warned, unless Alaskans insisted upon

construction of detention centers separate from the jails at Fairbanks and Nome.[22]

Urged on by Wickersham, the commercial club branded the Justice Department's plan to build the hospital as an addition to the jail "unsafe, unsanitary, and undesirable generally." It forwarded to Washington a petition signed by more than 900 residents protesting the proposal as "an act of injustice." The petitioners demanded a separate facility for the temporary care of the mentally ill.[23]

Other Fairbanks civic groups joined the protest. The Tanana Valley Democratic Club unanimously adopted a resolution condemning the governor for concocting a scheme whereby the "prisoners will be a nuisance to the sick, and the insane a nuisance to the prisoners." Moreover, the town council of Fairbanks announced its displeasure with the proposal by passing an ordinance forbidding the detention of the insane "upon the upper, second or higher story" of any wooden building. The Fairbanks press also lambasted the plan, calling it a "sorry makeshift." To accept a portion of the appropriation and build the hospital above the jail, said the *Daily Times*, would qualify Fairbanksans "to become the first inmates of such a hospital." The editor of the *Daily Times* urged the governor to build a hospital on a donated site and worry later about the legal consequences. Such a move, he declared, "would be worthy [of] the red blood of the pioneer."[24]

The strong protest from Fairbanks brought results. In October 1911, the Justice Department decided to "suspend action" on the construction of the hospital as an upper story to the jail. More than a year passed without further developments.[25]

Meanwhile, the issue continued to provoke controversy between Clark and Wickersham. The delegate repeatedly blamed the absence of a detention center on "one petty man, with a wooden nutmeg heart." Appealing to the emotions of a Fairbanks audience, Wickersham pointed out that if one's mother or wife were arrested because she was mentally ill, she would be confined in a "dirty jail" because the governor was so "spiteful" he refused to spend the money Congress had appropriated for a modern detention facility.[26]

Predictably, Clark denied Wickersham's charges. He reiterated the fact that his position was based not on politics but on his interpretation of the law, an interpretation supported by the Justice Department. It would be foolish, he stated, to proceed with the construction of the hospital on a donated site without prior approval from the federal government. What contractor, he asked, would build a hospital without official authorization? Neither Clark nor Wickersham explained why he did not push for an official decision on the legality of building on a donated site.[27]

Wickersham's opponents used the defective hospitals act against him in the delegate election of 1912 but without effect. Indeed, his successful efforts to obtain for Alaska an elective territorial government more than offset any loss of votes caused by his mishandling of the detention hospitals affair. Running as an independent "Bull Mooser," he was reelected, defeating a regular Republican, a Socialist, and two Democrats.[28]

On the national level, the Republican party, split between regulars and progressives, lost the White House to Woodrow Wilson. Although he was disappointed that Theodore Roosevelt, his idol, had lost, Wickersham was confident that he would be able to cooperate with the new president. And he was encouraged when Wilson's secretary of the interior, Franklin K. Lane, invited his opinions on Alaskan issues, including the appointment of a new governor.[29]

Created in August 1912, Alaska's first territorial legislature took the lead in securing construction of the detention centers, though prohibited by law from dealing with the insane. The territorial government act had left to the federal government responsibility for the care of the mentally ill, which meant that vic-

tims would continue to be farmed out to Morningside Sanitarium and that patients in interior Alaska would be held in jails until detention facilities were constructed. But in April 1913, Alaskan legislators forwarded to Congress a joint memorial protesting the practice of detaining the insane in jails and requesting an appropriation of $4,000 to buy land on which to build two detention houses. The memorial went unheeded.[30]

Despite the lack of congressional action, supporters of the detention hospitals were encouraged when President Wilson named John F. A. Strong to succeed Walter Clark as governor of Alaska. Born in New Brunswick in 1859, Strong had been in Alaska since 1897. He had engaged briefly in mining, then entered the newspaper business, and was editor of the Democratic Juneau *Daily Empire* at the time of his appointment.[31]

In June 1913, the new governor and Wickersham met with Secretary of the Interior Lane to discuss the detention hospitals. Sympathetic, Lane agreed to build the hospitals promptly if Strong could secure donated land. Within three months, the governor had obtained the sites, and Lane had authorized him to advertise for construction bids. Strong's success convinced some Alaskans that the previous delay had been "for political and personal reasons only." It also showed that Washington could be moved to action when Alaskans put aside politics and united behind a project.[32]

Construction of both hospitals began in September and concluded in December 1913. After a delay of more than three years, then, the communities of Fairbanks and Nome possessed detention hospitals. The Fairbanks facility was a 2-story wood[illegible] building, 42 feet square, located on 1.25 acres of land at the corner of Turner Street and Tenth Avenue. It had a porch that ran along the full front of the first floor and a large second-story balcony. The first story contained a kitchen, oak-paneled dining room, seven rooms, a bath, and a padded cell. On the second floor were four rooms, one ward, a shower-bath, and two padded cells. The facility had electric lights and steam heat and could accommodate 15 male and 5 female patients. Local residents described the building as "a thing of

Within six months of assuming office, J. F. A. Strong had delivered the Nome and Fairbanks hospitals; opening them was the next step. (Bunnell Coll., Univ. of Alaska Archives)

beauty" that was "equipped with all modern conveniences." The Nome hospital was similarly appointed, though lacking the large front porch and balcony. The Nome *Nugget* described it as a "monument" to the builder. In Juneau, the *Alaska Daily Empire* editorialized that the "construction of these institutions marks a step forward in caring for unfortunate men and women of the Territory."[33]

Financial considerations, however, prompted Washington to reevaluate its decision to open the hospitals. The money to maintain the centers was to come from an appropriation of $500,000 for support of prisoners in all the states and territories. Marshal Emmet R. Jordan of Nome informed the Justice Department in early 1914 that it would cost $17,500 a year to maintain each of the detention hospitals. The attorney general balked at spending $35,000 yearly to provide temporary care for a handful of patients. It cost only twice that amount, including transportation, to maintain 150 Alaska patients at the Morningside Sanitarium in Oregon.[34]

Marshal Lewis T. Erwin of Fairbanks, who had replaced Henry Love in 1913, took issue with Jordan's figures. Erwin estimated that operation of the Fairbanks hospital would cost only $7,500 per year. Because the two estimates differed so significantly, the Justice Department refused to open the facilities until accurate figures had been secured. On the recommendation of the U.S. superintendent of prisons, the attorney general sent an inspector to Alaska to determine the cost of running the hospitals and the necessity of opening them.[35]

Proud of their new facilities, residents of Fairbanks and Nome were distressed to learn that neither structure might be utilized. "Loss of the detention hospital" would "be a serious blow" to the community, declared the Fairbanks *Daily Times*; "It means that we will be right back where we were before the building of the hospital was authorized, except that we have the structure to remind us of the long fight made to secure the hospital." There was a pressing need for the centers, according to that paper, and townspeople "have every reason to expect the terms of the bill to be carried out, for, after all, the cost of maintenance is a question which should have been investigated before the money for the building was appropriated."[36]

Equipped with electric lights, steam heat, and other conveniences, the Nome facility was hailed as a step forward in the care of the insane. (National Archives)

Meanwhile, Governor Strong, Delegate Wickersham, and Marshal Erwin of Fairbanks pushed Attorney General T. W. Gregory to open the detention hospitals. Erwin was especially insistent. On March 5, he had wired the Justice Department: "Have now three insane, jail not proper place." Four days later he had telegraphed: "Have just taken into custody insane woman in addition to three insane men reported. Hospital much needed." On June 2 he sent yet another message informing the attorney general that he had 14 prisoners in the jail, including two women. One of the women was insane. "No place to keep women except jail attic. Roof covered with tin. Fear women cannot live in such quarters during warmest summer weather. No toilet except men's department. Women taken ladies toilet courthouse. Makes it bad handling raving maniac. Condition insane woman requires three matrons eight-hour shifts." The marshal asked permission to transfer both women to the detention hospital where they could receive proper care. The attorney general refused the request and advised the marshal to install toilet facilities in the jail, fix the roof, and transport the insane woman to Morningside.[37]

That same month, R. J. W. Brewster, the Justice Department's investigator, arrived to inspect the hospitals. After examining the facilities, he recommended against opening them. His reason: expense. He estimated that the yearly operating costs of each institution, including heat, light, food, guards, a cook, repairs, and sundry expenses, would exceed $7,000.

The number of insane in interior Alaska was not large enough to justify the expense of operating two detention centers, Brewster advised. At Nome only three people were adjudged insane during fiscal year 1913-14, and these victims were housed in the jail for a total of 45 days; since the hospital would stand empty most of each year, Brewster recommended that the building be transferred to another government department and put to better use. At Fairbanks he found that 21 individuals had been adjudged insane in fiscal year 1913. "This hospital," he declared, "should never have been built, and although there is more reason for its opening than there is for the opening of the Nome institution, I do not see the *real* necessity which would warrant the expense of operation." To those who argued that modern mental health care practice called for separate facilities for the sane and insane, he replied that the "theory may be beautiful but would be expensive to carry out."[38]

The delay over opening the detention hospitals became a campaign issue in the delegate election of 1914. Running as a "Woodrow Wilson Progressive," Wickersham sought his fourth term as delegate. He was opposed by John M. Brooks, a Socialist from Jack Wade Creek, and Charles E. Bunnell, a Democrat from Valdez who had the support of the Wilson administration. Alaska Republicans did not nominate a candidate.[39]

Throughout the campaign Wickersham reminded his constituents of his past accomplishments, including passage of the territorial government act, the Alaska railway bill, and the detention hospitals measure. That the hospitals remained closed, he asserted, was the fault of Marshal Erwin, a Democrat and political enemy. Wickersham accused Erwin of obstructing efforts to open the hospitals, and he asked Alaskans to consider the "inhumanity of an officer who keeps a sick prisoner in the attic of that dirty, filthy jail when you have a fine detention hospital where she should be kept."[40]

Wickersham's charges against Erwin were unwarranted. The Justice Department advised the marshal to issue a statement "disclaiming all responsibility for the failure to open and occupy the de-

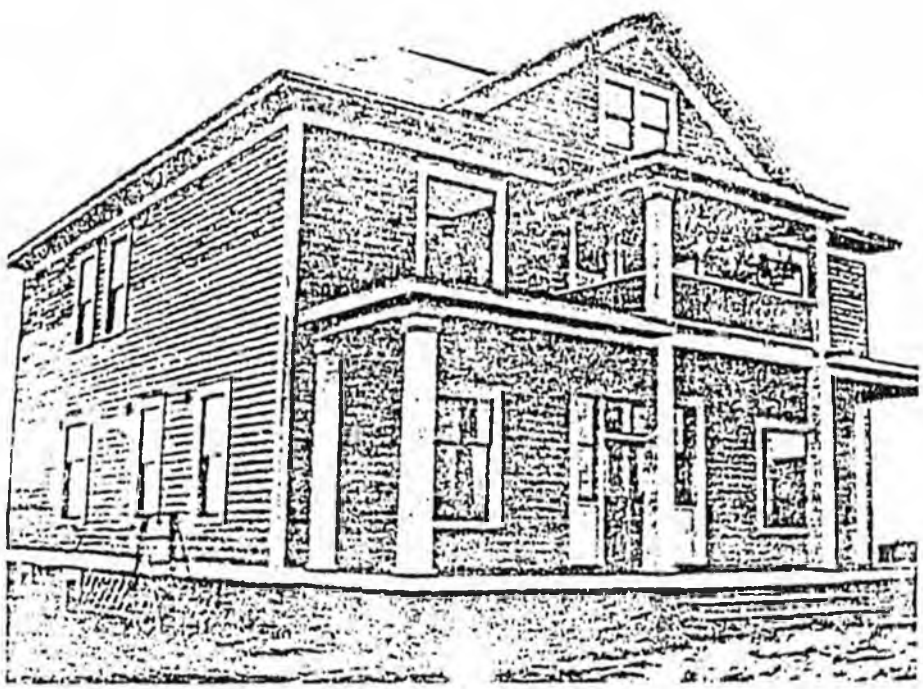
40. Quoted in Erwin to attorney general, Nov. 14, 1914, Box 564, File 4-7-2-1, RG 129, DJ.

tention hospital." Opponents of Wickersham were probably correct when they declared that his attack on the marshal was a smokescreen to cover up his own ineptness. The Democratic Fairbanks *Daily Times* reminded readers that the law "was so clumsily drawn that the hospital never would have been built but for the efforts of Governor Strong and the Democrats of Fairbanks." Despite Wickersham's irresponsible charges, he was reelected with votes to spare.[41]

After his reelection, Wickersham continued to lash out against Erwin for failing to utilize the hospitals. In mid-November 1914, he informed the press that the marshal permitted the caretaker to use the Fairbanks institution as a "chicken coop." Producing a photograph that showed chickens hanging lifeless by their feet from a rope stretched across the hospital's balcony, Wickersham urged Fairbanksans to petition the Justice Department to use the hospital for needy mental patients not dead chickens.[42]



The delegate also censured the Justice Department for its indifference. He informed the Fairbanks Commercial Club on November 9 that "there is no reason in the world why the Department of Justice should not make the necessary appropriation to maintain the institution." Instead of utilizing a modern facility, he noted, the federal government is confining the insane in a "hellhole." He implored club members "to get busy, to do something to force the proper parties to open the hospital and I pledge myself to do all I can to help."[43]

Wickersham made good his promise. On January 6, 1915, he sent a long letter to the attorney general lamenting the policy of holding Alaska's insane in "dirty foul-smelling old jails." He enclosed three photographs taken by the Fairbanks health officer, Dr. J. A. Sutherland, showing the "exact condition of the room in the attic" of the Fairbanks jail where insane women were housed. "In this stinking hole the United States of America keeps the insane women who fall into their clutches," the delegate wrote. "It is a disgrace to the Department of Justice that such a condition may continue to exist." He reminded the attorney general that the detention hospitals act was intended to prevent the "vile arrangement" of housing the mentally ill in jails. Failure to open the institutions for financial reasons, he believed, was unjustified. According to section 2 of the act, the hospital expenses were to be paid "from the same fund as the expenses of the United States jails under the same marshal." Enclosing the "chicken coop" photograph, Wickersham informed the attorney general that the hospital at Fairbanks was being used to accommodate slaughtered chickens instead of mentally afflicted human beings. He exhorted the Justice Department to make proper use of the Nome and Fairbanks structures at once.[44]

Wickersham's hard-hitting letter to Washington was not entirely accurate. He had written on the photograph that the jail was a "dirty-hole," a description that was exaggerated as Erwin, Dr. Sutherland, and several newspapers pointed out. Yet the delegate's main point was on the mark—namely, that the detention hospitals and not jails should be used for the temporary confinement of the mentally afflicted and that the government, in delaying the opening of the facilities, had failed to execute the law. Responding to Wickersham's letter, the attorney general stated that the issue was "under consideration" and would be resolved soon.[45]

Actually, the Justice Department was working diligently to rid itself of both buildings, to "turn them loose" on other government departments. The Bureau of Education in the Interior Department wanted the Nome building as a medical facility for Indians. The deal fell through though when the Justice Department insisted that the Interior Department take

This photograph of the Fairbanks hospital, its balcony festooned with dead chickens, no doubt furthered the campaign to open the facility. (National Archives)

both "white elephants"; having no use for the Fairbanks facility, the secretary of the interior refused the offer.[46]

Residents of Fairbanks were enraged when they learned of the Justice Department's attempts to unload their hospital. The mayor, marshal, district judge, and district attorney sent wires to the attorney general reminding him that the Fairbanks City Council had donated land for a "detention hospital only" and would oppose using the building and grounds for any other purpose. One Fairbanks citizen scored the federal government for being parsimonious toward a land "which has returned so much more than it cost to the government which owns it." The three local newspapers pushed hard for the cause by running editorials that supported the opening of the detention hospital.[47]

The strong protest brought results. In March 1915, nearly five years after Congress passed Wickersham's bill, the attorney general instructed Erwin to open the Fairbanks hospital immediately. That message elicited "great joy" among Alaska's territorial officials. Nomites, on the other hand, had little to cheer about: their facility remained closed. Inspired by the Fairbanks success, however, Nome residents, including the mayor, city council, Western Federation of Miners, and several fraternal organizations, petitioned Washington in June and repeatedly during the next year, but without results. In 1921 the Justice Department transferred the building to the Bureau of Education for use as a residence for teachers.[48]

In Fairbanks the triumph was short lived. Within five months of the hospital's opening, high operating costs caused the Justice Department to contemplate closing it again. Governor Strong admitted that the building required around-the-clock caretakers and that it would "always be a source of continued expense to the Government, whether occupied or not." Yet he advised against shutting down the institution because a "considerable percentage of the patients would recover, and the expense of their transportation to Morningside Sanitarium and their maintenance there would be avoided." Wickersham sided with Strong and blamed the high maintenance costs on the extravagance of Erwin, whom he accused of using the hospital as a place of residence.[49]

Wickersham's charges prompted an investigation by the Department of Justice. Asked for a response, Erwin maintained that he was making every effort to keep expenses at a minimum. He reported that from the opening of the hospital in March 1915 through August, a total of seven patients had been detained for 114 days at a cost of $2,000. Admitting that he lived at the hospital, he claimed that his presence saved the government money by obviating the need for a guard and custodian to watch the patients. He paid his own board and maintained a garden on the grounds that brought the government $625 worth of produce. He also economized by feeding the inmates fish, moose, and mountain sheep, which he provided free of charge. "I have attempted to economize and save the Government all I could at the same time rendering a good service but not a wasteful one," Erwin declared.[50]

Erwin's report convinced the Justice Department that the operation of the facility "has been economical and careful under the circumstances." Yet the paucity of inmates and high cost of their care (approximately $15 per day for each) did not seem to warrant keeping the hospital open on a permanent basis. Nonetheless, the attorney general decided to "continue its operation during the closed period of this winter in order to get a complete list of the cost of its maintenance."[51]

The Justice Department's position proved "disquieting" to Wickersham. Moreover, he continued to attack the marshal for extravagance. In December 1915, he wrote a scathing letter to the attorney general accusing Erwin of reckless spending and graft. He pointed out that for much of the year the hospital contained no patients, yet the cost of a building caretaker and electricity totaled $1,260. This money could have been saved, the delegate contended, had the facility been closed when it was unoccupied. The only reason for a caretaker, he declared, was that the marshal "wants the use of this nice, warm, new, handsome, well lighted building as a private residence: he needs the caretaker and his wife as servants, and he is annoyed that insane persons are intruded upon his privacy."[52]

Once again Wickersham's charges were groundless and probably sparked by political animosity. As most federal officials in Fairbanks realized, the hospital required the services of a permanent caretaker to protect the building and grounds from vandalism. It was necessary to heat the structure to prevent burst pipes and frost damage. Moreover, the institution might be needed at any time to detain an individual who suddenly became insane. To shut down the facility when it was unoccupied seemed senseless. Judge Charles Bunnell and District Attorney R. J. Roth both believed that the marshal's residence in the hospital re-

sulted in an efficient and economical operation. To avoid the appearance of impropriety and to silence Wickersham, however, they recommended that the marshal cease living there. The attorney general agreed.[53]

To secure the permanent operation of the detention hospital, Wickersham stressed the need for humane care of the mentally ill and for following the dictates of Congress. He emphasized that in 1910 Congress passed legislation establishing detention hospitals for patients in interior Alaska who could not be promptly shipped stateside. "Now what authority has an Attorney General, the Marshal, or any one else," he asked, "to disregard and violate that law?" Will the Justice Department return to the archaic practice of keeping the mentally ill in jails? he queried. He advised the attorney general to continue the operation of the institution and to adhere to "humane methods for the care and protection of the insane sick entrusted to your care, as you are instructed to do by Congress."[54]

Wickersham's appeal proved persuasive. The detention hospital was not shut down, and it remained in operation for two decades. In the 1930s the facility served as both a detention hospital and jail until a new federal building was erected in 1933.

Although Alaskans in 1910 sought to provide humane care for the insane by maintaining them in detention centers rather than jails, they achieved modest success only after five years of delay caused by indifference and parsimony at the federal level and political factionalism within Alaska itself. When territorial officials at last united behind Governor Strong in 1913 and 1915, they got two hospitals built and one operating; the second—for lack of patients and excessive maintenance costs—never opened. The detention center episode was one of the early fights in the long crusade for mental health care in Alaska: it would take another 40 years for Alaskans to obtain a permanent asylum. □

E. T. Barnette

E. T. Barnette: The Strange Story of the Man Who Founded Fairbanks. By TERRENCE COLE. (Anchorage: Alaska Northwest, 1981. ix, 163 pp. Illustrations, notes, selected bibliography, index. $7.95)

Terrence Cole has put flesh on a phantom. The year of Barnette's birth is uncertain. When, or where, or from what cause he died is unknown. There are, apparently, only two probable Barnette photographs. In one his face is obscured, and in the other a fur hat and a bushy moustache hide his hairline and mouth. Paradoxically, Barnette was as substantial as he was phantasmal.

Cole's study of the real Barnette is a fine historical narrative and investigation. Barnette established a trading post on the Chena River in 1901. The trading post became Fairbanks, while Barnette became a prosperous merchant, miner, and banker. He was a large man, ambitious, gregarious, and plausible. He invested much of his money in a Kentucky farm and a Mexican plantation. Affable though he was, court suits and controversy swirled around him. He throve until his bank collapsed in 1911, a few months after he had resigned its presidency and left town. The bank failure was the beginning of the end of Barnette's fortune. His Mexican property suffered from the turmoil of revolution, his wife divorced him and won a large property settlement, and his comeback attempts were ineffectual.

Such schemes and adventures call for placement in the context of western and Alaska history, yet Cole's interpretations rarely venture beyond the judgments of contemporaries. Those judgments were possibly too particularistic and severe, delivered as they were from a provincial "sourdough" perspective. For instance, Barnette's manufactured rush to Fairbanks certainly duped some gullible miners. Nevertheless, it was in the tradition of western boom-town promotionalism. Interpretive lacunae aside, Cole writes with verve. He skillfully relates Barnette to the development of Fairbanks and the Alaska-Yukon interior. His book is nicely composed, with many pertinent maps and photographs. Best of all, Cole, a widely published Alaska historian, is not yet out of his twenties. Therefore we may look forward to many more worthwhile studies from the author of *E. T. Barnette*. □

The Division of Mental Health and Developmental Disabilities does not foresee any increase or decrease in expenditures as a result of the passage of SB 346 at this time. The primary purpose of this bill is mainly directed at reducing the procedural requirements of A.S. 47.30.655 - 47.30.915, changing the age of majority from 14 to 18 years of age, changing the period of time for the initial commitment from 21 to 30 days and the third period of commitment from 120 to 180 days, expanding the definition of peace officers to include mental health professionals, and slightly relaxing the standards for commitment.

We do not believe that any of these proposed amendments will increase or decrease the number of mentally ill persons that will require hospitalization. The amendments should, however, make it easier to commit the mentally ill which should result in more professional staff time available to provide direct patient care and treatment rather than excessive time being expended in the commitment process.

MEMORANDUM April 19, 1984

TO: All Members of the House HESS Committee
FROM: Representative Mae Tischer, Chairman, House HESS MT

RE: CSSB 346 (Judiciary), Amended

The House HESS Committee will hear the Senate Judiciary Committee Substitute for Senate Bill 346, Amended, "An Act relating to the treatment of mentally ill persons," on Monday, April 23, at 5:00 p.m. in Capitol Room 112.

I ask that you review the attached background materials in preparation for this hearing. Your cooperation will enable the HESS Committee to act expeditiously on this important legislation.

To save on duplicating costs, please be responsible for bringing these materials to the meeting on Monday.

Re: SB 346

I thought you might be interested in this letter I received from one of my constituents concerning their experience with care of the mentally ill and their support for this bill.

April 6, 1984

Dear Rep. Davis.

I wish to write and voice my support for CSSB 346 which I understand the senate has sent to the House this week.

My first husband suffers from chronic manic depressive illness. His initial break down was a nightmare for myself and his family - and I believe for him. Although he was obviously seriously disoriented we were not able to get help for him against his will. He had to do serious bodily harm to someone else before he could be treated involuntarily. As a result, I had to spend time hiding from him until he finally injured someone. As I was pregnant at the time and caring for our older small child, I could not risk being the person he would injure.

A few years later, he returned to Fairbanks when our oldest child was critically ill in the hospital - and chose that time to experiment with his mental stability by not taking his medication. Knowing he was at risk for another breakdown, I refused to let him visit his son unsupervised. He became angry and later did indeed have another breakdown in the course of which he was jailed twice and finally sent to API.

When he was released from API,

they notified me that he was being released and that he intended to leave for Seattle BUT they made it clear that they had only notified me because he had given his permission as IN THEIR OPINION he was no threat to any of his family members. I thanked them for notifying me, but told them that in light of the then recent Charles Meach murders their opinion of who was and was not dangerous did not have much credibility.

Although our situation resolved itself without anyone being injured, our family experienced a very tense summer with one child in the hospital and the other not allowed to play outside without constant direct adult supervision. I believe that patients do have rights, but I also believe that their family members have rights as well. Living with a mentally ill family member can be exhausting, frustrating, frightening and dangerous, especially when the law offers no protection from the patient.

Thank you for your time,

James Carson-Sellin

RE: Version 3, Proposed House CS for CS for Senate Bill 346 (HESS)

Attached please find a copy of Version 3 of a proposed House HESS CS for CS for Senate Bill 346, "An Act relating to the treatment of mentally ill persons."

The amendments to the bill, indicated with blue highlighting on the attached draft, are found on the pages and lines indicated below. A brief explanation of the effect of each amendment is provided. Please note that page and line references are to Version 3, House CS for CS for Senate Bill 346 (HESS), dated May 15, 1984.

1. Page 1, line 20: This phrase was slightly reworded so as to give added emphasis to the requirement that persons be given ample opportunity to accept voluntary treatment.

2. Page 3, lines 24 - 26: This sentence was rewritten so as to accommodate a couple of substantive and technical amendments: (a) at the request of the Court System, the words "under AS 25.24.310" (circled on line 25 of the draft) were inserted in order to clarify the legal mechanics for the appointment of guardians ad litem as described in this section; (b) the words "as soon as possible" (circled on line 26 of the draft) were inserted so as to require the prompt appointment of a guardian ad litem for each minor.

3. Page 3, lines 28 and 29: As in amendment 2(a) above, the words "under AS 25.24.310" were inserted at the request of the Court System in order to clarify the legal mechanics for the appointment of guardians ad litem under this section.

4. Page 4, lines 11 - 15: This amendment would require a treatment facility to inform as soon as possible the parent or guardian of a minor under 18 years of age if the minor is detained at or admitted or committed to the treatment facility.

5. Page 13, lines 27 and 28: The catch line for AS 47.30.790 was changed so as to more accurately reflect the contents of the section.

6. Page 16, lines 4 - 16: This set of amendments would require a treatment facility to evaluate all patients present in the facility for more than 72 hours to determine if any individual patients have nutritional deficiencies. In conjunction with the original requirement that the treatment facility provide a nutritionally sound diet, this amendment further requires the facility to take appropriate steps to correct any identified deficiencies.

7. Page 20, line 11: This amendment merely returns the language in the bill to the way it appears in present law, deleting the reference to "a psychologist trained in clinical psychology."

8. Page 20, lines 17 - 18: This amendment inserts the word "substantial" before the word "experience," the effect of which would be the application of a higher standard (requiring substantial experience, instead of some possibly lesser degree of experience) when determining the kind of social worker who would be qualified to act as a "mental health professional."

9. Page 20, line 18: This amendment, meant as a purely technical amendment, changes the phrase "experience in the field of mental illness" to "experience in the field of mental health."

10. Page 20, lines 27 - 29; Page 21, lines 1 - 3: This amendment inserts temporary law requiring the division of mental health and developmental disabil-

ities to review the literature concerning orthomolecular psychiatric methods (nutritional therapy) in order to determine their potential uses in the treatment and diagnosis of mentally ill persons in the state; and to submit the report to the legislature by February 1, 1985.

Amendments 1, 2(b), 5, 7, 8 and 9 are found in Version 3 of the proposed House HESS Committee Substitute only. Amendments 2(a), 3, 4, 6 and 10 (in substance) have appeared in one or more of the earlier versions of the proposed House HESS Committee Substitute.

Please review this proposed CS and share your suggestions or comments with me as soon as possible. If there are no additional suggestions or comments, this will be the Version of the bill which we will discuss and hopefully move out during our next HESS meeting. I would appreciate receiving your response as soon as possible.

PROPOSED BAD CHECK CIVIL PENALTIES

PREPARED BY GARY L. JENKINS

NATIONAL FEDERATION OF INDEPENDENT BUSINESS

*Section _. AS 11.46. is amended by adding a new section to read:

Sec. 11.46.290. BAD CHECK CIVIL PENALTIES. (a) In any action against a person who makes any check for the payment of money which has been dishonored, the plaintiff may recover from the defendent damages in an amount equal to $100.00 or triple the amount for which the check is drawn, whichever is greater. However, damages recovered under this section shall not exceed by more than $1,000.00 the amount of the check and may be awarded only if the plaintiff made written demand of the defendant for payment of the amount of the check not less than 15 days before commencing the action and if the defendent failed to tender to the plaintiff, prior to commencement of the action, an amount of money not less than the original amount of the check plus costs incurred by the plaintiff not to exceed $25.00.

(b) A cause of action under this section may be brought in small claims court, if it does not exceed the jurisdiction of that court, or in any other appropriate court.

(c) Subsequent to the commencement of the action but prior to the hearing, the defendent may tender to the plaintiff as satisfaction of the claim, an amount of money equal to the sum of the amount of the check plus the plaintiff's incurred court, legal and service costs, not to exceed $150.00.

(d) In this section

(1) "check" means the same as defined in AS 11.46.280(c)(2);

(2) "dishonored", in addition to meaning the same as defined in AS 11.46.280(b), means a check which is not paid due to a stop payment being issued without cause;

(3) "written demand" means providing a notice in writing to the maker at the address shown on the dishonored check by first class mail or hand delivery advising the drawer that the check has been dishonored and explaining the civil penalties stipulated by this section.

CSSB 360 (L&C)

SECTIONAL ANALYSIS

Section 1

a) Before opening a checking account, the applicant must provide identifiable information, including a driver's license or another identifying document which includes the applicant's photograph.

b) The applicant who falsifies the information is guilty of a class B misdemeanor.

c) A bank may not authorize the checking account if the applicant cannot provide "photo ID". If the applicant is a minor, the parent/ guardian can provide identification.

The bank can waive this requirement if the applicant has had another type of account with the bank for at least a year.

d) The bank shall print checks indicating the month and year the account was opened. If the applicant had a checking account for 2 years or more within 5 years of the date of the new request, the bank can print the month and year of the earlier account.

e) These requirements, except as provided in (c) of this section, do not limit the bank's discretion whether to grant or deny the application.

Section 06.55.020

a) A person who issues a bad check and who fails to pay the amount of the check within 30 days after receiving a written demand for payment is liable for the amount of the check plus 3 times the check value. The damages, exclusive of the amount of the check, may not be less than $100 or more than $500.

b) The check is prima facie evidence if the payee records identifying information on the check and verifies the information against a photo ID.

Section 06.55.500

This section lists a variety of definitions. "Financial institution" is defined as a "bank, savings and loan association, credit union, or other business association authorized to offer transaction accounts in the state.

M E M O R A N D U M

TO: Senator Bill Ray, Chair
Senate Judiciary Committee

FROM: Senator Dick Eliason

RE: SB 360 - "An Act relating to checking accounts"

DATE: April 18, 1984

The Senate Labor and Commerce Committee recently held two hearings on SB 360 - "An Act relating to checking accounts". Two distinct versions of this legislation were considered by the Committee. In both instances the banking community opposed sections of SB 360. However, this does not mean the bankers are against legislation which addresses the problem of "bad check" writers. On the contrary, the Alaska Bankers Association supports the intent and objectives of this legislation.

The original version of SB 360 was based on legislation enacted by the State of Minnesota. This version required the banks to verify an applicant's financial stability before a checking account could be opened. As there is no central data base where an applicant's financial history is recorded, representatives from the banks testified that it would be virtually impossible to accurately and efficiently verify the applicant's information before opening a checking account.

The main objections to a committee substitute drafted by the Senate Labor and Commerce Committee centered on the requirement that a photo ID be a requirement for opening a checking account and the stipulation that each check indicate when the account was opened. Testimony indicated that the absolute requirement for a photo ID may be a potential hardship for bush area customers where some people do not have drivers' licenses.

The stipulation that banks print checks indicating the date in which the account was established would prove unenforceable according to a bank representative. If a customer objects strongly to this requirement, the checks could be printed by any publishing house.

In summary, in recognition of the problem stemming from "bad check" writers, I offer a committee substitute based on legislation recently enacted by California. The major thrust of this version is to increase the civil penalties for writing a NSF check.

The various versions of SB 360 are attached for your consideration.

Proposed bill might put a stop to bad check writing

By DEBBIE REINWAND ROSE
The Juneau Empire

A bill which would require banks to compile information on a potential customer's financial history before issuing that customer a checking account faces re-working by the Senate Labor and Commerce Committee.

Empire 2/9/84

Newspaper

The measure, which was heard by the committee Tuesday, is targeted at decreasing the number of bad checks written in Alaska, said sponsor Sen. Bill Ray, D-Juneau.

"We've been trying for the last five or six years to find a way to combat the NSF (non-sufficient funds) check problem so we can get a handle on it," said Ray. "Minnesota passed a similar law last year and it has cut down their bad check rate by 25 percent."

Under the bill's provisions, in addition to asking for basic vital statistics, banks would have to ask customers for information about their past checking accounts, whether any accounts were closed due to applicants' writing bad checks, and whether applicants had been convicted of writing bad checks in the past two years.

Banks would also be required to issue picture identification cards.

Testimony from local bank officials was primarily against the legislation, although suggestions for changes to the bill were offered.

"We are neither in favor or against the bill, but want to point out the problems with it as written," said B.M. Behrends Bank Executive Vice President Craig Dahl.

"There's nothing wrong with the bill, but the mechanisms don't exist at this time to make this come about. In Minnesota they have check systems set up which means everytime they close a customer's account for an overdraw situation, it is reported," said Dahl. "We have no central system to turn to get this kind of information. Someone could tell us they had never had bad check problems, but we still have to try to confirm their history."

In addition, the delay to "99 percent of the customers who are honest" would be unnecessary, said Dahl.

However, Labor and Commerce Chairman Sen. Dick Eliason, R-Sitka, said banks "are very careful about a person's financial history when it comes to loaning money because they then have something at risk."

During committee work on the measure, which is co-sponsored by Senate President Jay Kerttula, D-Palmer, Eliason hopes to "find some kind of balance we can agree on."

CALIFORNIA CREDIT UNION LEAGUE
TOPS/MANDATORY
TECHNICAL OPERATION PROCEDURES
- A D V A N C E -

T.B. 83-66

August 30, 1983

TO: All Credit Unions

SUBJECT: BAD CHECKS OR DRAFTS (A.B. 1226)

Effective January 1, 1984, if a member writes a bad check or draft made payable to the credit union, you may make a claim for the face amount, plus triple the amount owing. Checks or drafts written prior to January, that are dishonored after the effective date, are subject to the new law.

Regardless of the check or draft amount, you may make a claim for at least $100. You may not, however, make a claim exceeding $500.

Example 1: A member writes a $15 bad check. You may make a claim for $100.

Example 2: A member writes a $100 bad check. You may make a claim for $400 - [$100 + (3 x $100)].

Example 3: A member writes a $300 bad check. You may make a claim for $500.

Claims may be filed in small claims court, or any other appropriate court. Before filing a claim, your credit union must deliver, by certified mail, a written demand for payment in cash. After the demand is delivered, the member has 30 days to pay. If the member doesn't pay, you may then make your claim.

This new law applies not only to members that write bad checks or drafts; it also applies to all other persons or organizations. This law does not allow the credit union to file a claim when a share draft, made payable to a third party and drawn on the credit union, is dishonored.

Assembly Bill No. 1226

CHAPTER 522

An act to add Section 1719 to the Civil Code, relating to commercial paper.

[Approved by Governor July 28, 1983. Filed with Secretary of State July 28, 1983.]

LEGISLATIVE COUNSEL'S DIGEST

AB 1226, Katz. Bad checks: punitive damages.

Existing law makes it a crime to fraudulently write a bad check, knowing that it is made upon insufficient funds.

This bill would create a cause of action for treble the amount owing but in no case less than $100 or more than $500 for failure to pay upon a dishonored check, in cash, within 30 days of demand for payment, as specified.

The people of the State of California do enact as follows:

SECTION 1. Section 1719 is added to the Civil Code, to read:

1719. Notwithstanding any penal sanctions which may apply, any person who makes, utters, draws, or delivers any check, or draft, or order upon any bank or depository, or person, or firm, or corporation, for the payment of money, which refuses to honor the same for lack of funds or credit to pay, or because the maker has no account with the drawee, and who fails to pay the same amount in cash to the payee within 30 days following a written demand therefor delivered to the maker by certified mail, shall be liable to the payee, in addition to the amount owing upon such check or draft or order damages of treble the amount so owing, but in no case less than one hundred dollars ($100), and in no case more than five hundred dollars ($500).

A cause of action under this section may be brought in small claims court, if it does not exceed the jurisdiction of that court, or in any other appropriate court.

011—100 Reprinted 1-20-84 2M 95 50

California Law

Opponents argue that the federal discount rate does not necessarily indicate the cost of funds to financial institutions or businesses. A variety of other factors affect the cost of funds to a particular entity. They argue, therefore, that it is more appropriate to remove all limitations and let market conditions establish the rates.

Bad Check Penalties

3. Do you favor or oppose increased civil and/or criminal penalties as an effective deterrent to the writing of bad checks?

95% Favor (1) 4% Oppose (2) 1% Undecided (3) 19

BACKGROUND: It is well established that bad checks are a problem that every business must deal with to some degree. However, the question has been raised whether the laws of Alaska are presently adequate to deal with the problem. It has been suggested that either or both the civil or criminal penalties should be made stronger to attempt to reduce the impact of this problem.

Bad Check Civil Penalties

4. Should legislation be adopted to require that bad-check writers repay not only the face value of the check and any court costs incurred by the receiver but also civil damages of $100 (minimum) or triple the amount of the check?

86% Favor (1) 10% Oppose (2) 4% Undecided (3) 20

BACKGROUND: Law enforcement officials frequently do not pursue those who write bad checks for small amounts. Thus, the only deterrent to writing a bad check is the receiver's (merchant) collection efforts. Checks written for small amounts, which together may represent a deep cut in a business's profit, frequently cost more to collect than they are worth.

If the merchant was allowed to collect from the bad-check writer a minimum of $100 or triple the amount of the check as damages, in addition to the base value of the check and any court costs incurred, there would be a real incentive for the merchant to collect and a deterrent to bad-check writing.

Check Information

5. Should financial institutions be required to number checks on new accounts beginning at #101 and display on the face of the check the month and year the account was opened?

41% Favor (1) 49% Oppose (2) 10% Undecided (3) 21

5A. Should banks be allowed to disclose to merchants the bank account information of those who issue checks which are returned because of insufficient funds? Such information might include account status, current address, phone number, and history of returned checks.

66% Favor (1) 33% Oppose (2) 1% Undecided (3) 22

BACKGROUND: In the United States, approximately 400,000 worthless checks are written every day. Eighty percent of those checking accounts are six months old or less. Numerical listing and date of account opening would alert merchants to new accounts and to take care in deciding whether to accept those checks. Additionally, several states have given financial institutions permission to disclose account information to either law enforcement officials or merchants who receive a worthless check.

Opponents of the numbering system believe it would create problems for individuals and businesses who for continuity purposes want to continue to number checks from where the old account left off.

LABOR

Mandatory Overtime Wages

6. Should existing law be repealed which requires a business with four or more employees to pay overtime to an employee who works more than 8 hours in one day, but does not work over 40 hours per week?

73% Favor (1) 24% Oppose (2) 3% Undecided (3) 23

BACKGROUND: Most small businesses require that a particular job be accomplished within a certain period. This may require an employee to work more than 8 hours on a particular day. However, the employee is given time off on other days of the week so as not to work more than 40 hours that particular week. Proponents of a change say that law is particularly unfair smaller businesses whose workload heavy at certain times and slack other days of the week. This flexibil of worker time should not impose additional financial burden on smal businesses.

Opponents to changing the law arg that employees working more than hours in any one day should be giv extra compensation in the form overtime pay, whether they work voluntarily or were required to do by their employer. They feel daily ove time pay should be independent of t requirement to pay overtime to an er ployee who works more than 40 hou a week.

GOVERNMENT

Permanent Fund Income

7. Should the unused portion of th income from the Permanen Fund not allocated to the Div dend Program be authorized fo the following?

a. The Longevity Bonus Progran for the elderly

41% Favor (1) 51% Oppose (2) 8% Undecided (3)

Municipal Assistance Program

24% Favor (1) 66% Oppose (2) 10% Undecided (3)

BACKGROUND: During the 198 Legislative Session bills were intro duced which would require that part o the income of the Permanent Fund be held to finance the Longevity Bonus program and/or finance the municipa revenue sharing program. In the past, funding for such programs has been from the state's General Fund.

Proponents of using the income from the Permanent Fund to provide funds for these programs contend that this would not violate the intent of the Permanent Fund financing activities to benefit the maximum number of residents of the state. They argue that programs like the municipal assistance program are helping all communities of the state directly and thus benefit the residents of the various communities indirectly by reducing local taxation and providing needed services.

Opponents argue that the Legislature is merely looking for new sources to fund the expensive programs they have created the past few years which they do

STAFF REVIEW

CS FOR SB 384 (HESS), "An Act relating to food banks," by Senators Ferguson, Kelly, Rodey, et al, amends the Alaska Food, Drug and Cosmetic Act (AS 17.20) by adding language relating to the liability of food banks and individual donors. CSSB 384 (HESS) is identical to CSHB 496 (HESS) by Representatives Koponen and Miller. The Department of Environmental Conservation, Division of Environmental Quality Management, estimates the fiscal impact of CSSB 384 (HESS) to be Zero for FY 85, FY 86, and FY 87 (Please see fiscal note for greater detail).

The bill provides that a donor to a food bank is not subject to civil or criminal liability arising from an injury or death attributable to the condition of donated food if the injury or death is not a result of the gross negligence, recklessness, or intentional misconduct of the donor. The bill specifically states that nothing in the bill prohibits the donation of canned goods with misbrands or missing labels, and food that would not be readily marketable because of appearance or grade, or because it is surplus.

The bill provides that a food bank is not liable for injury or death attributable to the condition of donated food if the food bank inspects the food received in a reasonable manner and if the injury or death is not the direct result of the negligence, recklessness, or intentional misconduct of the food bank. Food banks may accept misbranded food or food with missing labels, or food that would not be readily marketable because of appearance or grade, or because it is surplus.

"Donor" is defined in such a way as to exclude a person who acts in a commercial capacity as a manufacturer, packer, processor, bottler, or similar entity, if that activity is the person's primary activity.

The bill does not provide for an effective date and would therefore become law 90 days after the Governor signs the bill.

MEMORANDUM April 23, 1984

TO: Representative Mae Tischer
FROM: Bill Lovell, Professional Assistant, HESS Committee

RE: Analysis of CSSB 384 (HESS)

I have prepared the following analysis of the Senate HESS Committee Substitute for Senate Bill 384, "[a]n Act relating to food banks."

CSSB 384 (HESS) amends AS 17.20 (Alaska Food, Drug and Cosmetic Act) by adding new sections, the effects of which are described below.

Sec. 17.20.345 provides that a donor to a food bank is not subject to civil or criminal liability for damages resulting from the consumption of donated food, unless such damages are the result of extreme negligence, recklessness, or misconduct by the donor. In other words, gross negligence, recklessness, or misconduct must be proven before a food bank donor is held civilly or criminally liable for damages attributable to the consumption of donated food. This provision subjects food bank donors to a more stringent test than food bank operators when determining negligence, recklessness, or misconduct.

The bill specifically states that nothing in this section prohibits the donation of apparently suitable goods solely because of missing labels, appearance, or lower grade or marketability.

Sec. 17.20.346 provides that a food bank is not subject to civil or criminal liability for damages resulting from the consumption of goods received and distributed by the food bank if, prior to distribution, the food bank had inspected the food in a reasonable manner; if the food bank had had no actual or constructive knowledge that the food was adulterated, tainted, or contaminated; and if the aforementioned damages were not the result of negligence, recklessness, or misconduct by the operators of the food bank. In other words, simple negligence, which is more easily proven than

gross negligence, must be proven before a food bank operator can be held civilly or criminally liable for damages attributed to the consumption of food distributed by the food bank. This provision of the bill subjects food bank operators to a less stringent test than donors when determining negligence, recklessness, or misconduct.

The bill specifically states that nothing in this section prohibits a food bank from distributing apparently suitable food solely because of missing labels, appearance, or lower grade or marketability.

Sec. 17.20.347 defines "donor," as used in AS 17.20.345 and 17.20.346, as including a person, farmer, retailer, slaughter-house under state supervision, freight company, distributor, wholesaler, or similar entity. This provision specifically permits operators of state supervised slaughter-houses to donate suitable meats to food banks.

The section specifically excludes from the definition of "donor," any person who acts in a commercial capacity as a manufacturer, packer, processor, bottler, or similar entity, if that activity is the person's primary activity.

This section further provides that "food bank" means an organization recognized by the state or federal government as a nonprofit organization and that operates principally to collect, inspect, and salvage donated food for free distribution to needy persons.

DATE: April 23, 1984

SUBJ: Senate Bill 384

In Nome, Barrow and Kotzebue we have food donors and banks at many of our churches who, under current law, run the risk of civil and criminal liability for any injury or death arising out of the use of any donated food.

This bill provides protection for honest, civic-minded individuals and businesses who wish to donate edible foodstuffs for those less fortunate. However, should the donor provide food knowing that it could cause injury or death, they would face both criminal and civil liability.

(1) it bears or contains a poisonous or deleterious substance which may render it injurious to health; but in case the substance is not an added substance the food is not considered adulterated under this paragraph if the quantity of the substance does not ordinarily render it injurious to health;

(2) it bears or contains added poisonous or added deleterious substance which is unsafe within the meaning of AS 17.20.030;

(3) it consists in whole or in part of a diseased, contaminated, filthy, putrid, or decomposed substance, or if it is otherwise unfit for food;

(4) it has been produced, prepared, packed, or held under insanitary conditions in which it may have become contaminated with filth, or in which it may have been rendered diseased, unwholesome, or injurious to health;

(5) it is, in whole or in part, the product of a diseased animal or an animal which has died otherwise than by slaughter, or that has been fed upon the uncooked offal from a slaughterhouse;

(6) its container is composed, in whole or in part, of a poisonous or deleterious substance which may render the contents injurious to health.

(b) Food is adulterated if

(1) a valuable constituent has been omitted or abstracted in whole or part;

(2) a substance has been substituted in whole or part for a valuable constituent;

(3) damage or inferiority has been concealed;

(4) a substance has been added or mixed or packed with it to increase its bulk or weight, or reduce its quality or strength, or make it appear better or of greater value than it is.

(c) Confectionery is adulterated if it bears or contains an alcohol or nonnutritive article or substance except harmless coloring, harmless flavoring, harmless resinous glaze not in excess of four-tenths of one per cent, harmless natural wax not in excess of four-tenths of one per cent, harmless natural gum, and pectin. This subsection does not apply to confectionery containing less than one-half of one per cent by volume of alcohol derived solely from the use of flavoring extracts, or to chewing gum containing harmless nonnutritive masticatory substances.

(d) Food is adulterated if it bears or contains a coal tar color other than one from a batch which has been certified under authority of the federal act. (§ 10 ch 129 SLA 1949)

Collateral references. — Trichinosis, proof, 11 Am. Jur. POF, pp. 373-417; botulism poisoning, 16 Am. Jur. POF, pp. 213-271.

Liability of packer, foodstore, or restaurant for causing trichinosis, 90 ALR3d 451.

Sec. 17.20.030. Tolerances for added poisonous ingredients. A poisonous or deleterious substance added to food, except where the substance is required in the production of food or cannot be avoided by good manufacturing practice, is unsafe for purposes of the application of AS 17.20.020(a)(2). When the substance is required or cannot be avoided, the department shall adopt regulations limiting the quantity of it to the extent necessary for the protection of public health. A quantity exceeding the limits fixed is unsafe for purposes of the application of AS 17.20.020(a)(2). While a regulation limiting the quantity of a substance in the case of any food is in effect, the food is not, by reason of bearing or containing an added amount of the substance, adulterated within the meaning of AS 17.20.020(a)(1). In determining the quantity of the added substance to be tolerated in or on food, the department shall consider the extent to which the use of the substance is required or cannot be avoided in the production of each article and the other ways in which the consumer may be affected by that or other poisonous or deleterious substances. (§ 11 ch 129 SLA 1949)

Sec. 17.20.040. Misbranded foods. Food is misbranded if

(1) its labeling is false or misleading in any particular;

(2) it is offered for sale under the name of another food;

(3) it is an imitation of another food, unless its label bears, in type of uniform size and prominence, the word "imitation" and, immediately thereafter, the name of the food imitated;

(4) its container is made, formed, or filled so as to be misleading;

(5) it is in package form unless it bears a label containing (A) the name and place of business of the manufacturer, packer, or distributor; and (B) an accurate statement of the quantity of the contents in terms of weight, measure, or numerical count; however, under (B) of this paragraph reasonable variations are permitted, and exemptions for small packages shall be established by regulations prescribed by the department;

(6) a word, statement, or other information required by or under authority of this chapter to appear on the label or labeling is not prominently placed with the conspicuousness (as compared with other words, statements, designs or devices, in the labeling) and in terms which make it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

(7) it purports to be or is represented as a food for which a definition and standard of identity has been prescribed by regulations as provided by AS 17.20.010, unless (A) it conforms to the definition and standard, and (B) its label bears the name of the food specified in the definition and standard and the common names of optional ingredients other than spices, flavoring, and coloring present in the food as required by regulation;

(8) it purports to be or is represented as (A) a food for which a standard of quality has been prescribed by regulations, and its quality falls below that standard, unless its label bears, in the manner and form the regulations specify, a statement that it falls below that standard; or (B) a food for which a standard of fill of container has been prescribed by regulation as provided by AS 17.20.010 and it falls below the applicable standard of fill of container, unless its label bears, in the manner and form as the regulations specify, a statement that it falls below that standard;

(9) it is not subject to the provisions of (7) of this section, unless it bears labeling clearly giving (A) the common or usual name of the food, if any, and (B) in case it is fabricated from two or more ingredients, the common or usual name of each ingredient; except that however spices, flavorings, and colorings, other than those sold as such, may be designated as spices, flavorings, and colorings, without naming each; however, to the extent that compliance with the requirements of (B) of this paragraph is impracticable, or results in deception or unfair competition, exemptions shall be established by regulations promulgated by the department, but the requirements of (B) of this paragraph do not

apply to food products which are packaged at the direction of purchasers at retail at the time of sale, the ingredients of which are disclosed to the purchasers by other means in accordance with regulations adopted by the department;

(10) it purports to be or is represented for special dietary uses, unless its label bears information concerning its vitamin, mineral, and other dietary properties the commissioner determines to be, and by regulations prescribes as, necessary in order fully to inform purchasers as to its value for those uses;

(11) it bears or contains artificial flavoring, artificial coloring, or chemical preservative, unless it bears labeling stating that fact; however, to the extent that compliance with the requirements of this paragraph is impracticable, exemption shall be established by regulations adopted by the department. (§ 11 ch 129 SLA 1949)

Collateral references. — Validity and construction of regulations dealing with misrepresentation in the sale of Kosher food, 52 ALR3d 959.

Sec. 17.20.045. Misbranding halibut. No person may label or offer for sale any food fish product designated as halibut, with or without additional descriptive words, unless the food fish product is Hippoglossus or Hippoglossus Stenolepsis. A person who violates this section is guilty of misbranding food under provisions of this chapter. (§ 1 ch 59 SLA 1968)

Sec. 17.20.050. Emergency permit control. When the department finds after investigation that the distribution in the state of a class of food may, by reason of contamination with microorganisms during the manufacture, processing, or packing, be injurious to health, and that the injurious nature cannot be adequately determined after the articles have entered commerce, it, in that case only, shall adopt regulations providing for the issuance of permits to manufacturers, processors, or packers of that class of food, to which shall be attached the conditions governing the manufacture, processing, or packing of that class of food, for a temporary period of time as may be necessary to protect the public health. After the effective date of the regulations, and during the temporary period, no person may introduce or deliver for introduction into commerce the food so manufactured, processed or packed by any manufacturer, processor, or packer unless the manufacturer, processor, or packer of it holds a permit issued by the commissioner. (§ 12(a) ch 129 SLA 1949)

Sec. 17.20.060. Suspension and reinstatement of emergency permit. The commissioner may suspend immediately upon notice a permit issued under AS 17.20.050 if it is found that the conditions of the permit have been violated. The holder of a suspended permit may apply for the reinstatement of the permit, and the commissioner, immediately after prompt hearing and an inspection of the establishment, shall reinstate the permit if it is found that adequate measures have been taken to comply with and maintain the conditions of the permit as originally issued or as amended. (§ 12(b) ch 129 SLA 1949)

Sec. 17.20.070. Inspection by department. An officer or employee designated by the commissioner shall have access to a factory or establishment, the operator of which holds a permit from the commissioner, for the purpose of ascertaining whether or not the conditions of the permit are being complied with. Denial of access for inspection is ground for suspension of the permit until access is freely given. (§ 12(c) ch 129 SLA 1949)

Sec. 17.20.072. Enforcement authority. The commissioner is responsible for enforcing AS 17.20.010 — 17.20.075, and may delegate that authority as appropriate. This section does not limit the authority of peace officers. (Executive Order No. 51, § 19 (1981))

Sec. 17.20.075. Definitions. In AS 17.20.010 — 17.20.075,

(1) "commissioner" means the commissioner of environmental conservation;

(2) "department" means the Department of Environmental Conservation. (Executive Order No. 51, § 19 (1981))

proposed repeal or amendment of regulation providing for certification of antibiotic drugs, to state "reasonable grounds" therefor, 22 ALR Fed. 885.

Sec. 17.20.080. Adulterated drugs and devices. (a) A drug or device is adulterated if

(1) it consists in whole or in part of a filthy, putrid, or decomposed substance;

(2) it has been produced, prepared, packed, or held under insanitary conditions in which it may have been contaminated with filth, or in which it may have been rendered injurious to health;

(3) it is a drug and its container is composed, in whole or in part, of poisonous or deleterious substance which may render the contents injurious to health; or

(4) it is a drug and it bears or contains, for purposes of coloring only, a coal tar other than one from a batch certified under the authority of the federal act.

(b) A drug is adulterated if it purports to be or is represented as a drug the name of which is recognized in an official compendium, and its strength differs from, or its quality or purity falls below the standard set forth in the compendium. The determination as to strength, quality, or purity shall be made in accordance with the tests or methods of assay set forth in the compendium, or in the absence or inadequacy of tests or methods of assay, those prescribed under authority of the federal act. A drug defined in an official compendium is not adulterated under this subsection because it differs from the standard of strength, quality, or purity set forth in the compendium, if its difference in strength, quality, or purity is plainly stated on its label. When a drug is recognized in both the United States Pharmacopoeia and the Homeopathic Pharmacopoeia of the United States it is subject to the requirements of the United States Pharmacopoeia unless it is labeled and offered for sale as a homeopathic drug, in which case it is subject to the provisions of the Homeopathic Pharmacopoeia of the United States and not to those of the United States Pharmacopoeia.

(c) A drug is adulterated if it is not subject to the provisions of (b) of this section and its strength differs from, or its purity or quality falls below, that which it purports or is represented to possess.

(d) A drug is adulterated if a substance has been

(1) mixed or packed with it to reduce its quality or strength; or

(2) substituted wholly or in part for it. (§ 14 ch 129 SLA 1949)

Sec. 17.20.090. Misbranded drugs and devices. A drug or device is misbranded

(1) if its labeling is false or misleading in any particular;

(2) if it is in package form unless it bears a label containing (A) the name and place of business of the manufacturer, packer, or distributor; and (B) an accurate statement of the quantity of the contents in terms

of weight, measure, or numerical count; however, under (B) of this paragraph reasonable variations shall be permitted and exemptions for small packages shall be established by regulations adopted by the department;

(3) if a word, statement, or other information required by or under authority of this chapter to appear on the label or labeling is not prominently placed with conspicuousness as compared with other words, statements, designs, or devices, in the labeling and in terms which render it likely to be read and understood by the ordinary individual under customary conditions of the purchase and use;

(4) if it is for use by man and contains a quantity of the narcotic or hypnotic substance alpha-eucaine, barbituric acid, beta-eucaine, bromal, cannabis, carbromal, chloral, coca, cocaine, codeine, heroin, marijuana, morphine, opium, paraldehyde, peyote, or sulphonmethane, or a chemical derivative of any of them, which has been by the commissioner after investigation found to be and by regulations under this chapter designated as habit forming; unless its label bears the name, and quantity or proportion of the substance or derivative and in juxtaposition with it the statement "Warning – May be habit forming";

(5) if it is a drug and is not designated solely by a name recognized in an official compendium unless its label bears (A) the common or usual name of the drug; and (B) in case it is fabricated from two or more ingredients, the common or usual name of each active ingredient, including the kind and quantity or proportion of alcohol, and including, whether active or not, the name and quantity or proportion of bromides, ether, chloroform, acetanilid, acetphenetidin, amidopyrine, antipyrine, atropine, hyoscine, hyoscyamine, arsenic, digitalis glucosides, mercury, quabain, strophanthin, strychnine, thyroid, or derivative or preparation of any of these substances contained in them; however, to the extent that compliance with the requirements of (B) of this paragraph is impracticable, exemptions shall be established by regulations adopted by the department;

(6) unless its labeling bears (A) adequate directions for use; and (B) adequate warnings against use in those pathological conditions or by children where its use may be dangerous to health, or against unsafe dosage or methods or duration of administration or application, in the manner and form necessary for the protection of users; however, where a requirement of (A) of this paragraph as applied to a drug or device is not necessary for the protection of the public health, the department shall adopt regulations exempting the drug or device from these requirements;

(7) if it purports to be a drug the name of which is recognized in an official compendium, unless it is packaged and labeled as prescribed in the compendium; however, the method of packing may be modified with the consent of the commissioner, and when a drug is recognized

in both the United States Pharmacopoeia and the Homeopathic Pharmacopoeia of the United States, it is subject to the requirements of the United States Pharmacopoeia with respect to packaging and labeling unless it is labeled and offered for sale as a homeopathic drug, in which case it shall be subject to the provisions of the Homeopathic Pharmacopoeia of the United States; and not to those of the United States Pharmacopoeia;

(8) if it has been found by the commissioner to be a drug liable to deterioration, unless it is packaged in the form and manner and its label bears a statement of the precautions the department by regulation requires as necessary for the protection of public health; and no regulation shall be established for a drug recognized in an official compendium until the commissioner has informed the appropriate body charged with the revision of the compendium of the need for packaging or labeling requirements and that body has failed within a reasonable time to prescribe the requirements;

(9) if it is a drug and its container is made, formed, or filled so as to be misleading or if it is an imitation of another drug; or if it is offered for sale under the name of another drug;

(10) if it is dangerous to health when used in the dosage, or with the frequency or duration prescribed, recommended, or suggested in its labeling;

(11) if (A) it is a drug sold at retail and contains any quantity of aminopyrine, barbituric acid, cinchophen, pituitary, thyroid, or their derivatives, or (B) it is a drug or device sold at retail and its label as originally packed bears a statement that it is to be dispensed or sold only by or on the prescription of a physician, dentist or veterinarian, unless it is sold on a written prescription signed by a member of the medical, dental, or veterinary profession licensed by law to administer the drug or device, and its label as dispensed bears the name and place of business of the seller, the serial number and date of the prescription, and the name of the member of the medical, dental or veterinary profession, and the prescription shall not be refilled except on the written authorization of the prescribing physician, dentist or veterinarian. (§ 16 ch 129 SLA 1949)

Collateral references. — Failure to warn as basis of liability under doctrine of strict liability in tort. 61 ALR3d 230.

Liability of manufacturer or seller for injury or death allegedly caused by failure to warn regarding danger in use of vaccine or prescription drug. 91 ALR3d 709.

Sec. 17.20.100. Exemptions in case of drugs and devices. A drug sold on a written prescription signed by a member of the medical, dental, or veterinary profession, except a drug sold in the course of the conduct of a business of selling drugs pursuant to diagnosis by mail, is exempt from the requirements of AS 17.20.090(2) and (6) if (1) the member of the medical, dental, or veterinary profession is licensed by

law to administer the drug, and (2) the drug bears a label containing the name and place of business of the seller, the serial number and date of the prescription, and the name of the member of the medical, dental, or veterinary profession. (§ 16 ch 129 SLA 1949)

Sec. 17.20.105. Preparation of drug prescription by pharmacist. (a) In preparing a drug prescription a pharmacist shall indicate on the drug container the name and strength of the drug contained in it, unless specifically directed otherwise by the prescribing physician, osteopathic physician, dentist or veterinarian. If a drug is a mixture of pharmacologically active substances, only the name of the mixture need be indicated on the container, or in the absence of a name, the term "physician's mixture" may be used.

(b) In preparing a prescription, a pharmacist may not substitute a drug for a registered brand or trade name product specified unless the pharmacist obtains permission from the author of the prescription; but if the prescribing physician, osteopathic physician, dentist or veterinarian is temporarily unavailable, the pharmacist may, if unable to supply the drug requested, substitute a drug or preparation of approximately equal therapeutic value so long as the pharmacist notifies the author of the prescription at an early opportunity. (§ 1 ch 17 SLA 1971)

Sec. 17.20.110. Sale of new drugs. A person may not sell, deliver, offer for sale, hold for sale or give away a new drug unless

(1) an application for it has become effective under the federal act, or

(2) when not subject to the federal act unless the drug has been tested and has not been found to be unsafe for use under the conditions prescribed, recommended, or suggested in the labeling of it, and before selling or offering it for sale there has been filed with the commissioner an application setting out

(A) full reports of investigations which have been made to show whether or not the drug is safe for use;

(B) a full list of the articles used as components of the drug;

(C) a full statement of the composition of the drug;

(D) a full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of the drug;

(E) samples of the drug and articles used as components of it which the commissioner requires; and

(F) specimens of the labeling proposed to be used for the drug. (§ 17(a) ch 129 SLA 1949)

Collateral references. — Right of medical patient to obtain, or physician to prescribe, Laetrile for treatment of illness — state cases. 6 ALR4th 219.

Sec. 17.20.120. Application for sale of new drugs. The application provided for in AS 17.20.110 is effective on the 60th day after the filing of it. If the commissioner finds, after notice to the applicant and providing an opportunity for a hearing, that the drug is not safe for use under the conditions prescribed, recommended, or suggested in the proposed labeling, the commissioner shall, before the effective date of the application, issue an order refusing to permit the application to become effective. An order refusing an application to become effective may be revoked by the commissioner. (§ 17(b) (d) ch 129 SLA 1949)

Sec. 17.20.130. Exemptions. AS 17.20.110 does not apply to a drug (1) intended solely for investigational use by experts qualified by scientific training and experience to investigate the safety in drugs provided the drug is plainly labeled "for investigational use only"; or (2) licensed under the Virus, Serum, and Toxin Act of July 1, 1902 (U.S.C. 1934 ed. title 42, chap. 4). (§ 17(c) ch 129 SLA 1949)

Editor's notes. — The Virus, Serum, and Toxin Act has been superseded by 42 U.S.C. 262

Sec. 17.20.132. Enforcement authority. The commissioner is responsible for enforcing AS 17.20.080 — 17.20.135, and may delegate that authority as appropriate. This section does not limit the authority of peace officers. (Executive Order No. 51, § 19 (1981))

Sec. 17.20.135. Definitions. In AS 17.20.080 — 17.20.135,

(1) "commissioner" means the commissioner of health and social services;

(2) "department" means the Department of Health and Social Services. (Executive Order No. 51, § 19 (1981))

Article 3. Cosmetics.

Section	Section
140. Adulterated cosmetics	152. Enforcement authority
150. Misbranded cosmetics	155. Definition

Sec. 17.20.140. Adulterated cosmetics. A cosmetic is adulterated if

(1) it bears or contains a poisonous or deleterious substance which may render it injurious to a user under the conditions of use prescribed in the labeling or advertisement of it, or under conditions of use which are customary or usual; however, this provision does not apply to coal tar hair dye, the label of which bears the following legend conspicuously displayed: "Caution — this product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness." and the labeling of which bears adequate directions for preliminary testing, and for the purposes of this paragraph and (5) of this section the term "hair dye" does not include eyelash dyes or eyebrow dyes;

(2) it consists in whole or in part of a filthy, putrid, or decomposed substance;

(3) it has been produced, prepared, packed, or held under insanitary conditions by which it may have become contaminated with filth or made injurious to health;

(4) its container is composed, in whole or in part, of a poisonous or deleterious substance which may make the contents injurious to health;

(5) it is not a hair dye and it bears or contains a coal tar color other than one from a batch which has been certified under authority of the federal act. (§ 18 ch 129 SLA 1949)

Collateral references. — Liability of seller of cosmetics for injuries on theory of breach of warranty as affected by buyer's or user's allergy or unusual susceptibility to injury from article. 26 ALR3d 968.

Sec. 17.20.150. Misbranded cosmetics. A cosmetic is misbranded if

(1) its labeling is false or misleading in any particular;

(2) it is in package form unless it bears a label containing (A) the name and place of business of the manufacturer, packer, or distributor; and (B) an accurate statement of the quantity of the contents in terms of weight, measure, or numerical count; however, under (B) of this paragraph reasonable variations shall be permitted, and exemptions as to small packages shall be established by regulations adopted by the department;

(3) a word, statement, or other information required by or under authority of this chapter to appear on the label or labeling is not prominently placed on it with conspicuousness as compared with other words, statements, designs, or devices, in the labeling, and in terms which make it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

(4) its container is made, formed, or filled so as to be misleading. (§ 19 ch 129 SLA 1949)

Sec. 17.20.152. Enforcement authority. The commissioner of environmental conservation is responsible for enforcing AS 17.20.140 — 17.20.155, and may delegate that authority as appropriate. This section does not limit the authority of peace officers. (Executive Order No. 51, § 19 (1981))

Sec. 17.20.155. Definition. In AS 17.20.140 — 17.20.155, "department" means the Department of Environmental Conservation. (Executive Order No. 51, § 19 (1981))

Article 4. False Advertising.

Section
160. False advertising generally
170. Specified false advertising
172. Enforcement authority
175. Definitions

Collateral references. — 3 Am. Jur. 2d, Advertising, §§ 2, 4 et seq.; 37 Am. Jur. 2d, Food and Drugs, § 56.

What constitutes "false advertising" of food products or cosmetics within §§ 5 and 12 of the Federal Trade Commission Act (15 USCS §§ 45, 52), 50 ALR Fed. 16.

Sec. 17.20.160. False advertising generally. An advertisement of a food, drug, device, or cosmetic is false if it is false or misleading in any particular. (§ 20(a) ch 129 SLA 1949)

Sec. 17.20.170. Specified false advertising. The advertisement of a drug or device representing that it has an effect on albuminuria, appendicitis, arteriosclerosis, blood poison, bone disease, Bright's disease, cancer, carbuncles, cholecystitis, diabetes, diphtheria, dropsy, erysipelas, gallstones, heart and vascular diseases, high blood pressure, mastoiditis, measles, meningitis, mumps, nephritis, otitis media, paralysis, pneumonia, poliomyelitis (infantile paralysis), prostate gland disorders, pyelitis, scarlet fever, sexual impotence, sinus infection, smallpox, tuberculosis, tumors, typhoid, uremia, or venereal disease is false advertising. An advertisement not in violation of AS 17.20.160 is not false under this section if it is disseminated only to members of the medical, dental, or veterinary profession, or appears only in the scientific periodicals of these professions, or is disseminated only for the purpose of public health education by persons not commercially interested, directly or indirectly, in the sale of the drug or device. However, when the commissioner determines that an advance in medical science has made a self-medication safe as to any of the diseases named in this section, the department shall by regulation authorize the advertisement of drugs having curative or therapeutic effect for the disease, subject to the conditions and restrictions the commissioner considers necessary in the interests of public health. This section shall not be construed as indicating that self-medication for diseases other than those named in this section is safe or efficacious. (§ 20(b) ch 129 SLA 1949)

Sec. 17.20.172. Enforcement authority. The commissioner is responsible for enforcing AS 17.20.160 — 17.20.175, and may delegate that authority as appropriate. This section does not limit the authority of peace officers. (Executive Order No. 51, § 19 (1981))

Sec. 17.20.175. Definitions. In AS 17.20.160 — 17.20.175,

(1) "commissioner" means the commissioner of health and social services;

(2) "department" means the Department of Health and Social Services. (Executive Order No. 51, § 19 (1981))

Article 5. Enforcement.

Section
180. Regulations
190. Hearings
200. Inspections and examinations
210. Reimbursement for expenses
220. Publication of reports and information
230. Detention or embargo of goods
240. Petition for libel for condemnation
250. Destruction of adulterated or misbranded goods
260. Exemption from destruction
270. Immediate destruction of contaminated food
280. Injunction proceedings

Collateral references. — 25 Am. Jur. 2d, Drugs, Narcotics, and Poisons, §§ 7 et seq., 28 et seq.; 35 Am. Jur. 2d, Food, § 63 et seq.

Seizure of food, 9 Am. Jur. Trials, pp. 59-136.

Sec. 17.20.180. Regulations. The Department of Environmental Conservation and the Department of Health and Social Services may adopt regulations for the efficient enforcement of their respective portions of this chapter. Each department may make the regulations conform, in so far as practicable, with those adopted under the federal act. (§ 21(a) ch 129 SLA 1949; am Executive Order No. 51, § 20 (1981))

Effect of amendments. — The 1981 amendment substituted "Department of Environmental Conservation and the Department of Health and Social Services" for "department," substituted "adopt" for "promulgate" preceding "regulations" and added "of their respective portions" following "efficient enforcement" in the first sentence. In the second sentence, the amendment substituted "each" for "the" preceding "department" and substituted "adopted" for "promulgated" following "with those."

Sec. 17.20.190. Hearings. Hearings authorized or required by this chapter shall be conducted under the provisions of the Administrative Procedure Act (AS 44.62). (§ 21(b) ch 129 SLA 1949)

Sec. 17.20.200. Inspections and examinations. (a) The commissioner of environmental conservation or an agent shall have free access at reasonable hours to a factory, warehouse, or establishment in which foods or cosmetics are manufactured, processed, packed, or held for introduction into commerce, or to enter a vehicle being used to transport or hold these foods or cosmetics in commerce, in order to

(1) inspect a factory, warehouse, establishment, or vehicle to determine if the provisions of the commissioner's respective portions of this chapter are being violated, and

(2) secure samples or specimens of a food or cosmetic after paying or offering to pay for the sample.

(b) The commissioner of environmental conservation shall make or have made examinations of samples secured under this section to determine whether or not a provision of the commissioner's respective portions of this chapter is being violated.

(c) The commissioner of health and social services has the same powers and duties with respect to drugs and devices as the commissioner of environmental conservation has with respect to food and cosmetics under (a) and (b) of this section. (§ 22 ch 129 SLA 1949; am § 1 ch 80 SLA 1957; am Executive Order No. 51, § 21 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation" following "the commissioner" and deleted "drugs, devices" following "food" twice in the introductory language of subsection (a). Also in subsection (a), the amendment added "of his respective portions" following "if the provisions" in paragraph (1) and deleted "drug, device" following "food" in paragraph (2). In subsection (b), the amendment added "of environmental conservation" following "commissioner" and added "of his respective portions" following "not a provision." The amendment also added subsection (c).

Collateral references. — Validity of inspection conducted under provisions of Federal Food, Drug, and Cosmetic Act (21 USCS § 374(a)) authorizing FDA inspectors to enter and inspect food, drug or cosmetic factory, warehouse, or other establishment, 18 ALR Fed. 734.

Sec. 17.20.210. Reimbursement for expenses. The Department of Environmental Conservation and the Department of Health and Social Services may make expenditures from money appropriated for the administration of their respective portions of this chapter to reimburse authorized employees or agents for amounts expended without receipt, covering purchases or services obtained in securing evidence of a violation of their respective portions of this chapter, upon vouchers certified by the disbursing and certifying officers of the appropriate department. Disbursement shall not exceed $800 in any biennium. (§ 22 ch 129 SLA 1949; am § 1 ch 80 SLA 1957; am Executive Order No. 51, § 22 (1981))

Effect of amendments. — The 1981 amendment substituted "Department of Environmental Conservation and the Department of Health and Social Services" for "department" near the beginning of the first sentence, added "their respective portions of" preceding "this chapter" twice in the first sentence and added "appropriate" preceding "department" near the end of the first sentence.

Sec. 17.20.220. Publication of reports and information. (a) The commissioner of environmental conservation and the commissioner of health and social services may have published from time to time reports summarizing judgments, decrees, and court orders which have been rendered under their respective portions of this chapter, including the nature of the charge and the disposition of it.

(b) The commissioner of environmental conservation may have disseminated information regarding food and cosmetics which the commissioner considers necessary in the interest of public health and the protection of the consumer against fraud. This section does not prohibit the commissioner from collecting, reporting, and illustrating the results of the commissioner's investigations.

(c) The commissioner of health and social services has the same power with respect to drugs and devices as the commissioner of environmental conservation has with respect to food and cosmetics under (b) of this section. (§ 23 ch 129 SLA 1949; am Executive Order No. 51, § 23 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation and the commissioner of health and social services" following "the commissioner" and added "their respective portions" following "rendered under" in subsection (a). The amendment also added "of environmental conservation" following "commissioner" and deleted "drugs, devices" following "regarding food" in subsection (b) and added subsection (c).

Sec. 17.20.230. Detention or embargo of goods. (a) Whenever the commissioner of environmental conservation finds or has probable cause to believe that a food or cosmetic is adulterated, or so misbranded as to be dangerous or fraudulent within the meaning of this chapter, the commissioner shall affix to it a tag or other appropriate marking, giving notice that it is or is suspected of being adulterated or misbranded and has been detained or embargoed, and warning all persons not to remove or dispose of it by sale or otherwise until permission for removal or disposal is given by the commissioner or the court. A person may not remove or dispose of a detained or embargoed article by sale or otherwise without this permission.

(b) The commissioner of health and social services has the same duty with respect to drugs and devices as the commissioner of environmental conservation has with respect to food and cosmetics under (a) of this section. (§ 6(a) ch 129 SLA 1949; am Executive Order No. 51, § 24 (1981))

Effect of amendments. — The 1981 amendment designated the existing section as subsection (a) and added subsection (b). In subsection (a), the amendment added "of environmental conservation" following "the commissioner" and deleted "drug, device" following "food" in the first sentence.

NOTES TO DECISIONS

Cited in State, Comm'r of Dep't of Health & Social Servs. v. Seward Marine Serv., Inc., Sup. Ct. Op. No. 2113 (File No. 2113), 612 P.2d 1010 (1980).

Sec. 17.20.240. Petition for libel for condemnation. When an article detained or embargoed under AS 17.20.230 has been found by the commissioner of environmental conservation or the commissioner

of health and social services, as the case may be, to be adulterated or misbranded, the appropriate commissioner shall petition the superior court for a libel for condemnation of the article. When that commissioner finds that a detained or embargoed article is not adulterated or misbranded, the commissioner shall remove the tag or other marking. (§ 6(b) ch 129 SLA 1949; am Executive Order No. 51, § 25 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation or the commissioner of health and social services, as the case may be" preceding "to be adulterated" in the first sentence and substituted "that" for "the" preceding "commissioner" in the second sentence.

Sec. 17.20.250. Destruction of adulterated or misbranded goods. If the superior court finds that a detained or embargoed article is adulterated or misbranded, it shall, after entry of the decree, be destroyed at the expense of the claimant, under the supervision of the commissioner of environmental conservation or the commissioner of health and social services, as the case may be. Court costs and fees and storage and other proper expenses shall be taxed against the claimant of the article. (§ 6(c) ch 129 SLA 1949; am Executive Order No. 51, § 26 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation or the commissioner of health and social services, as the case may be" at the end of the first sentence.

Sec. 17.20.260. Exemption from destruction. When the adulteration or misbranding can be corrected by proper labeling or processing of the article, and after entry of the decree and after costs, fees, and expenses have been paid and a good and sufficient bond, conditioned that the article will be properly labeled or processed has been executed, the court may order that the article be delivered to the claimant for labeling or processing under the supervision of the commissioner of environmental conservation or the commissioner of health and social services, as the case may be. The claimant shall pay the expense of supervision. The bond shall be returned to the claimant of the article on representation to the court by the appropriate commissioner that the article is no longer in violation of this chapter, and that the expenses of supervision have been paid. (§ 6(c) ch 129 SLA 1949; am Executive Order No. 51, § 27 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation or the commissioner of health and social services, as the case may be" following "the commissioner" near the end of the first sentence and added "appropriate" preceding "commissioner" in the third sentence.

Sec. 17.20.270. Immediate destruction of contaminated food. Meat, seafood, poultry, vegetable, fruit, or other perishable article in

any room, building, vehicle of transportation or other structure which is unsound, or contains filthy, decomposed, or putrid substance, or a substance that may be poisonous or deleterious to health or otherwise unsafe, is a nuisance. Whenever the commissioner of environmental conservation finds such an article, the commissioner shall immediately condemn or destroy it or in any other manner render it unsalable as human food. (§ 6(d) ch 129 SLA 1949; am Executive Order No. 51, § 28 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation" following "the commissioner" in the second sentence.

Sec. 17.20.280. Injunction proceedings. The commissioner of environmental conservation and the commissioner of health and social services may apply to the superior court for, and the court has jurisdiction to grant, a temporary or permanent injunction restraining a person from violating their respective portions of AS 17.20.290. (§ 4 ch 129 SLA 1949; am Executive Order No. 51, § 29 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation and the commissioner of health and social services" following "commissioner" and added "their respective portions of" following "person from violating."

Article 6. Prohibited Acts and Penalties.

Section
290. Prohibited acts
300. Determination of misleading labeling or advertisement
310. Penalties
320. Effect of written guaranty
330. Liability for dissemination of false advertising

Collateral references. — 25 Am. Jur. 2d, Drugs, Narcotics, and Poisons, § 40 et seq, 35 Am. Jur. 2d, Food, §§ 63 et seq., 74 et seq.

Sec. 17.20.290. Prohibited acts. (a) The following acts and the causing thereof are prohibited:

(1) the manufacture, or sale, or delivery, holding, or offering of sale of food, drug, device, or cosmetic that is adulterated or misbranded;

(2) the adulteration or misbranding of food, drug, device or cosmetic;

(3) the receipt in commerce of food, drug, device, or cosmetic that is adulterated or misbranded, and the delivery or proffered delivery of them for pay or otherwise;

(4) the sale, delivery for sale, holding for sale, or offering for sale of an article in violation of AS 17.20.050 — 17.20.070 and 17.20.100,

(5) the dissemination of a false advertisement;

(6) the refusal to permit entry or inspection, or to permit the taking of a sample, as authorized by AS 17.20.200;

(7) the giving of a guaranty or undertaking which is false, except by a person who relied on a guaranty or undertaking to the same effect signed by and containing the name and address of the person residing in the state from whom the person who relied on the guarantee or undertaking received the food, drug, device, or cosmetic in good faith;

(8) the removal or disposal of a detained or embargoed article in violation of AS 17.20.230 — 17.20.270;

(9) the alteration, mutilation, destruction, obliteration, or removal of the whole or part of the labeling of, or the doing of any other act with respect to, a food, drug, device, or cosmetic, if the act is done while the article is held for sale and results in the article being misbranded;

(10) forging, counterfeiting, simulating, or falsely representing, or without proper authority using a mark, stamp, tag, label or other identification device authorized or required by regulations adopted under AS 17.20.230 — 17.20.270;

(11) the using, on the labeling of a drug or in an advertisement relating to a drug, of a representation or suggestion that an application with respect to the drug is effective under AS 17.20.110 or that the drug complies with the provisions of that section;

(12) the sale or offering for sale of frozen fish as fresh fish;

(13) the improper labeling and drug substitution by pharmacists under AS 17.20.405.

(b) The commissioner of environmental conservation or a designee of the commissioner is responsible for enforcing the provisions of paragraphs (a)(1), (2), (3), (4), (6), (7), (8), (9), and (10) of this section, if the subject of the prohibited act involves food or cosmetics, and the provisions of paragraph (a)(12) of this section. This subsection does not limit the authority of peace officers.

(c) The commissioner of health and social services or a designee of the commissioner is responsible for enforcing the provisions of paragraphs (a)(1), (2), (3), (4), (6), (7), (8), (9), and (10) of this section, if the subject of the prohibited act involves drugs or devices, and the provisions of paragraphs (a)(5), (11), and (13) of this section. This subsection does not limit the authority of peace officers. (§ 3 ch 129 SLA 1949; am § 1 ch 119 SLA 1967; am § 2 ch 17 SLA 1971; am Executive Order No. 51, § 30 (1981))

Cross references. — For adulteration of food and its sale, see AS 17.05.020.

Effect of amendments. — The 1981 amendment added subsections (b) and (c).

Sec. 17.20.300. Determination of misleading labelling or advertisement. If an article is alleged to be misbranded because the labeling is misleading, or if an advertisement is alleged to be false

because it is misleading, in determining whether the labeling or advertisement is misleading, there shall be taken into account among other things representations made or suggested by statement, word, design, device, sound or combination of them, and the extent to which the labeling or advertisement fails to reveal facts material in the light of the representations or material with respect to consequences which may result from the use of the article to which the labeling or advertisement relates under the conditions of use prescribed in the labeling or advertisement or under customary or usual conditions of use. (§ 201 ch 129 SLA 1949)

Collateral references. — Products liability of manufacturer or seller for injury or death allegedly caused by failure to warn regarding danger in use of vaccine or prescription drug. 71 ALR3d 748.

Promotional efforts directed towards prescribing physician as affecting prescription drug manufacturer's liability for product-caused injury. 91 ALR3d 1080.

What constitutes "false advertising" of food products or cosmetics within §§ 5 and 12 of the Federal Trade Commission Act (15 USCS §§ 45, 52), 50 ALR Fed 16.

Sec. 17.20.310. Penalties. A person who violates the provisions of AS 17.20.290, upon conviction, is punishable by imprisonment for not more than six months, or by a fine of not more than $500, or by both. If the violation is committed after a conviction under this section has become final, the person is punishable by imprisonment for not more than one year, or by a fine of not more than $500, or by both. (§ 5(a) ch 129 SLA 1949)

Sec. 17.20.320. Effect of written guaranty. A person is not subject to the penalties of AS 17.20.310 for having violated AS 17.20.290(1) or (3) if that person establishes a guaranty or undertaking signed by and containing the name and address of the person residing in the state from whom the article was received in good faith, to the effect that it is not adulterated or misbranded within the meaning of this chapter. (§ 5(b) ch 129 SLA 1949)

Sec. 17.20.330. Liability for dissemination of false advertising. No publisher, radio broadcast licensee, or agency or medium for the dissemination of an advertisement, except the manufacturer, packer, distributor, or seller of the article to which a false advertisement relates, is liable under AS 17.20.310 for the dissemination of the false advertisement, unless the publisher, licensee, agency or medium has refused the request of the commissioner of health and social services to furnish the name and post office address of the manufacturer, packer, distributor, seller, or advertising agency, residing in the state who caused dissemination of the advertisement. (§ 5(c) ch 129 SLA 1949; am Executive Order No. 51, § 31 (1981))

Effect of amendments. — The 1981 amendment deleted "on" preceding "the request of," added "of health and social services" following "the request of the commissioner" and deleted "the commissioner" preceding "the name and post office address."

Collateral references. — What constitutes "false advertising" of food products or cosmetics within §§ 5 and 12 of the Federal Trade Commission Act 115 USCS §§ 45, 52, 53 ALR Fed 10

Article 7. General Provisions.

Section
340 Scope of provisions dealing with sale
350 Report of minor violations
360 Hearing before report of criminal violation
370 Definitions
380 Short title

Sec. 17.20.340. Scope of provisions dealing with sale. The provisions of this chapter regarding the sale of food, drugs, devices, or cosmetics include the manufacture, production, processing, packing, exposure, offer, possession, and holding of them for sale; the sale, dispensing, and giving of them, and the supplying or applying of them in the conduct of a food, drug, or cosmetic establishment. (§ 2(part) ch 129 SLA 1949)

Sec. 17.20.350. Report of minor violations. Nothing in this chapter requires either the commissioner of environmental conservation or the commissioner of health and social services, as the case may be, to report minor violations of their respective portions of this chapter for prosecution, or for the institution of libel or injunction proceedings, when that commissioner believes that the public interest will be adequately served by a suitable written notice or warning. (§ 8 ch 129 SLA 1949, am Executive Order No. 51, § 32 (1981))

Effect of amendments. — The 1981 amendment added "either" following "chapter requires," added "of environmental conservation or the commissioner of health and social services, as the case may be" following "the commissioner," added "of their respective portions" following "respective portions" and substituted "that" for "the" preceding "commissioner believes that."

Sec. 17.20.360. Hearing before report of criminal violation. The attorney general, to whom the commissioner of environmental conservation or the commissioner of health and social services, as the case may be, reports a violation of this chapter, shall institute appropriate proceedings in the superior court without delay and prosecute them in the manner required by law. Before a violation of this chapter is reported to the attorney general, the person against whom the proceeding is contemplated shall be given appropriate notice and an opportunity to respond to the appropriate commissioner, orally or in writing, in person or by attorney, with regard to the contemplated proceeding. (§ 7 ch 129 SLA 1949, am Executive Order No. 51, § 31 (1981))

Effect of amendments. — The 1981 amendment added "of environmental conservation or the commissioner of health and social services, as the case may be" following "commissioner" in the first sentence and added "appropriate" preceding "commissioner" in the second sentence.

Sec. 17.20.370. Definitions. In this chapter

(1) "advertisement" means a representation disseminated, other than by labeling, for the purpose of inducing, or which is likely to induce directly or indirectly the purchase of food, drugs, devices or cosmetics;

(2) "antiseptic", in the labeling or advertisement of a drug, is a representation that it is a germicide, except in the case of a drug purporting to be, or represented as, an antiseptic for inhibitory use as a wet dressing, ointment, dusting powder, or other use involving prolonged contact with the body;

(3) "contaminated with filth" means food, drug, device, or cosmetic not securely protected from dust, dirt, and as far as necessary by all reasonable means, from foreign or injurious contamination;

(4) "cosmetic" means an article intended to be rubbed, poured, sprinkled, or sprayed on, introduced into, or otherwise applied to the human body for cleansing, beautifying, promoting attractiveness, or altering the appearance, and an article intended for use as a component of an article enumerated in this paragraph; except that the term does not include soap intended for cleansing purposes only;

(5) "device" except when used in AS 17.20.040(6), 17.20.090(3), 17.20.150(3), 17.20.290(10) and 17.20.300 means an instrument, apparatus, and contrivance, including its components, parts, and accessories, intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in man or animal; or to affect the structure or function of the body of man or animal;

(6) "drug" means an article recognized in the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, or official National Formulary; an article intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in man or animal; an article other than food, intended to affect the structure or function of the body of man or animal; and an article intended for use as component of an article specified in this paragraph but does not include devices or their components, parts, or accessories;

(7) "federal act" means the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 301 — 392; 52 Stat. 1040 — 1959;

(8) "food" means an article used for food or drink for man or animal, chewing gum, and articles used for components of either of them;

(9) "immediate container" does not include a package liner;

(10) "label" means a display of written, printed or graphic matter upon the immediate container of an article, however, a requirement made by or under authority of this chapter that a word, statement, or other information appear on the label is not complied with unless the

word, statement, or other information also appears on the outside container or wrapper of the retail package, if there is one, or is easily legible through the outside container or wrapper;

(11) "labeling" means the label and other written, printed or graphic matter upon an article or its container or wrapper accompanying the article;

(12) "new drug" means a drug the composition of which is such that it is not generally recognized among experts qualified by scientific training and experience to evaluate the safety of drugs as safe for use under the conditions prescribed, recommended, or suggested in the labeling of it; or a drug the composition of which is such that the drug, as a result of investigations to determine its safety for use under such conditions, has become so recognized, but which has not, otherwise than in these investigations, been used to a material extent or for a material time under those conditions;

(13) "official compendium" means the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, official National Formulary, or supplements to them. (§ 2(a) — (k) (m) — (p) ch 129 SLA 1949; am § 6 ch 101 SLA 1971; am § 14 ch 208 SLA 1975; am Executive Order No. 51, § 41 (1981))

Revisor's notes. — This section was reorganized in 1983 to alphabetize the words defined.

Effect of amendments. — The 1981 amendment repealed former definitions of "commissioner" and "department."

Collateral references. — Marijuana, psilocybin, peyote or similar drugs of vegetable origin as narcotics for purposes of drug prosecution, 50 ALR3d 1164.

Article 1. Regulation of Manufacture, Distribution, Prescription, and Dispensing of Controlled Substances.

Section
10. Regulations
20. Registration requirements
30. Registration
40. Denial, revocation, and suspension of registration
50. Order to show cause
60. Records of registrants
70. Order forms; prescriptions
80. Unlawful administration, prescription and dispensation of controlled substances

Collateral references. — 25 Am. Jur. 2d, Drugs, Narcotics, and Poisons, §§ 7 et seq., 28 et seq.

Sec. 17.30.010. Regulations. (a) The Board of Pharmacy shall adopt regulations under the Administrative Procedure Act (AS 44.62) which are necessary for the administration of this chapter, and may charge reasonable fees relating to the registration and control of the manufacture, distribution, and dispensing of controlled substances as authorized by federal law in the state.

(b) Regulations adopted under this chapter by the board shall be patterned after federal law so that the legitimate manufacture, distribution, and dispensing of controlled substances is subject to regulations regarding registration, record keeping, order forms and prescription requirements that are identical to those required by federal law or regulations. (§ 4 ch 45 SLA 1982)

Cross references. — For penalty for furnishing false or fraudulent information in or omitting material information from any application, report, record, or other document required to be kept or filed under this chapter, see AS 11.71.040(a)(8). For penalty for failure to make, keep, or furnish any record, notification, order form, statement, notice, or information required under this chapter, see AS 11.71.030(a)(9).

Editor's notes. — Section 21, ch. 45, SLA 1982 provides "Orders issued and regulations adopted under a law amended or repealed by this Act and in effect on January 1, 1983, and not in conflict with this Act continue until amended or repealed."

Sec. 17.30.020. Registration requirements. (a) A person who manufactures, distributes, dispenses, or conducts research with a controlled substance in the state or who proposes to manufacture, distribute, or dispense a controlled substance in the state, shall register annually with the board in accordance with regulations adopted under AS 17.30.010.

SB 384/HB 496

465-3600

June 30, 1980

The Honorable Jay S. Hammond
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Re: SCS CSHB 686 am S
(limiting liability of
donors of food)
Our File: J-88-146-80

Dear Governor Hammond:

This office has reviewed SCS CSHB 686 am S, the principal thrust of which relieves a person donating food to a nonprofit organization of any civil or criminal liability flowing from any adulteration or misbranding of the food, unless the alteration is the result of intentional or grossly negligent conduct on the part of the donor.

"Grossly negligent conduct" is defined as "the intentional failure to perform a duty with reckless disregard of consequences that affect the life or property of another." (The legislature forgot the comma after "duty," thus changing the literal meaning, but we assume that we know what was intended.) A donee may ask the commissioner of health and social services to inspect the food to determine if it is adulterated or misbranded.

The commissioner may delegate this inspection duty, and a broad range of other enforcement and inspection duties, to the Department of Environmental Conservation.

This bill is apparently well intentioned; it is designed to encourage the donation of food to nonprofit

organizations for their use or distribution--presumably to needy persons. However, it exacts too great a price from prospective donees as a reward for the eleemosynary conduct.

The bill's failure to distinguish between donors who are manufacturers, packers, or bottlers and those who are not is, we think, a fatal flaw. It is a well-established principle of law that manufacturers, bottlers, and packers are liable for damages resulting from a failure to exercise that degree of care required to insure that the product is fit for use and is free from taint. See 32A C.J.S. Food, sections 59-60. This bill would relieve those manufacturers from liability for negligence for illness caused by unfit food when they give away rather than sell their products. While it is admirable to encourage the donation of food to needy causes, it is unwise to eliminate the ordinary standard of care and its attendant liability. We can, for example, imagine a manufacturer whose warehouse is laden with food of marginal fitness who would like to donate it for a tax deduction. We do not think it proper to eliminate this person's liability for negligence should one of the donees become ill from adulterated or unfit food. Poor people receiving donated food should have no less protection than people who buy food from the donor.

The class of persons who manufacture food should be held to a uniform standard of care regardless of whether the food is sold or given away. To do otherwise would be to encourage socially irresponsible conduct disguised as beneficent bounty. We would suggest that you veto this bill.

Sincerely,

Wilson L. Condon
Attorney General

GARY C. NEWMAN
S.R. BOX 51233
FAIRBANKS, ALASKA 9[illegible]701

January 23, 1994

House HESS Committee

I am in support of House Bill 496, relating to food banks.

This bill would remove the impediment of liability from the donation by food vendors of surplus or waste food. By doing so, it would allow the use of tons of food for human or animal consumption that is presently being destroyed by the vendors.

For one who has had animals such as pigs, chickens and cows, this bill would allow them to have the waste that is presently thrown away by food vendors. At present, the vendors won't give away food which is waste by their standards even for animal use because there is the chance that the food would really be used for human consumption and they are concerned about the liability question, as I stated earlier.

While this issue may affect only a small proportion of our state's population, it would allow the use of tons of resources that are expensively imported into our state for use for something other than landfill.

I urge your support of this bill.

Gary C. Newman

FOOD BANK OF ALASKA

P.O. Box 3324, Anchorage, Ak 99510
1025 Orca Street, # N8, Anchorage
907-276-4776

January 5, 1984

Dear Friends :

The holidays are over and we have all of you to thank for your support during the 1983 year. It has been a very good year for the Food Bank. I can't give all the details on this short letter, but I will be glad to do so at the Annual Meeting Friday, February 3rd, 1984 at 6:30 pm. The First Christian Church at 3031 LaTouche street will host the meeting. It will begin with dinner. The public is invited to share in the report of 1983 activities. Please phone the Food Bank, 276-4776, with your reservations. Donation for the dinner will be $7.50. Ballots will be mailed to all individuals that have donated $10.00 to the Food Bank and all Agencies that have donated $25.00 during 1983.

The Bureau of Land Management recently had a canned food drive with interdepartmental competition. The total poundage donated to the Food Bank was a shade under 500 lbs. That makes it the largest single food drive in recent history! Thanks to all the employees of the BLM.

The Food Bank has finally bought a Kerosun Heater!! No more freezing in the office for the volunteers or staff. We still need a nice, well running 4X4 to pick up the overflow for the High Cube van. If any one knows of a bargain let us know. (Or if you know of someone who would be willing to donate one)

In the last newsletter I let it be known that we needed snow tires. Well the plea did not go unheard. I would like to thank the Salvation Army for donating two studded tires and the Firestone store on Post Rd for donating three tires and mounting. The Firestone donation was arranged by Allen Bentson of Alaska Sales and Service. Thank you Allen, Salvation Army and Firestone.

The Food Bank is having an activity called "Can Skate" if you can skate then come to the Anchorage Roller Rink on January 24, 1984 with two cans of food and you can skate for free! This has been arranged in cooperation with Mark Dade of the Anchorage Roller Rink. We are hoping for a very good turnout. If you can't skate you can drop off donations there on the 24th anyway.

I hope to see each of you at the annual meeting and at the skating rink. I thank each and everyone of you for your support during the 1983 year and look forward to your continued support.

Sincerely,

Carl M. Larsen
General Manager

P.S. Please RSVP by January 31 for the Annual Meeting.

"Cache and Share / Don't Waste Food"

First Reading

Gleaners fight hunger, salvage food in 11 states

In produce fields and fruit groves scattered across America, hard-pressed Americans are increasingly using a concept as old as the Bible to fight hunger. It is gleaning, the salvaging of food that otherwise would rot in the fields, whether inadvertently left behind or discarded because of blemishes, bruises, or low prices.

Gleaners are gathering some of that food through privately organized efforts in at least 11 states: Arizona, California, Colorado, Florida, Kansas, Maryland, Michigan, Missouri, Oregon, Texas, and Washington. They help fill what Congress' General Accounting Office calls "an unmet need" for food assistance among those not qualifying for government food programs, and GAO says states can help increase the amount of gleaned food.

California and Oregon, for example, give state tax deductions to farmers for the value of food gleaned from their fields. First passed in 1977, California's A.B. 120 this year was extended through 1984.

"It's an incentive for churches and other groups to go out and get the produce and say to a store or grower that he can get a tax deduction," says California Assemblyman David Kelly, who sponsored the renewal. Stores and growers can claim a charitable deduction — in addition to the business expense — for the value of gleaned or discarded food. A study is underway to determine the amount of lost taxes on such food.

In addition, the Food Marketing Institute says that 34 states have passed "Good Samaritan" laws limiting the liability of food donors. Ohio's is illustrative: "No person who in good faith donates perishable food to an agency is liable in civil damages for injury, death, or loss to persons or property that arises because that perishable food . . . is not fit for human consumption," if the food was reasonably considered safe at the time it was donated.

Tax deductions and Good Samaritan laws, the GAO said, are "positively affecting the amount of food being donated."

Gleaning takes its cue from Leviticus 19:9-10: "When you harvest the produce of your field, do not completely mow the edge of your field or gather the gleanings of your harvest . . . leave them for the poor." Today food is also gleaned from supermarket waste.

Gleaners are the needy or volunteers gathering food for others. The needy keep what they can use with the excess going to such places as food banks. "It's not a freebie program — you work for what you get," says Judi Amos, of Everett, Wash., who has labored as a gleaner among potatoes and peaches.

"The program's really helped out my budget," adds Rachel Brown, who supports three children on welfare and food stamps. After years of dependence on others, she says with pride, "I'm helping myself and helping others."

GLEANING HARVEST — Rachel Brown and her nephew, Anthony Miller, stand next to boxes of pears and vegetables that were her share for a day's work of gleaning in Washington state.

In-state preference laws enacted to govern public contract awards

One sidelight of the recent recession is that several legislatures are worried about state and local government contracts being awarded to out-of-state firms. As a consequence, at least 21 legislatures have enacted in-state preference laws.

The "Buy Minnesota" law passed last May, for example, has received nationwide publicity reflecting the generic pros and cons of implementing such protectionist legislation. (These laws differ from "Buy American" laws requiring the purchase of American-made goods and services over those from foreign countries — which don't specify whether they must come from in-state firms.)

According to the author of the Minnesota legislation, State Representative Pat Beard, the law was intended to improve in-state employment and thus increase state tax revenues.

Beard found that 13 other states exercise in-state preference laws that include a 2-15 percent break in bidding on public works jobs against out-of-state contractors. States exercising preference are Alaska, Arizona, Arkansas, Hawaii, Louisiana, Maine, Montana, New Mexico, Oklahoma, South Carolina, Washington, West Virginia, and Wyoming. Among them, the preference law may apply only to state agencies or extend also to municipalities and school districts.

The Minnesota law includes a provision that says any contract awarded by a state agency for engineering services, erection, construction, alteration or repair of any public building or structure, or for any public work improvement, when competitive bidding is not required, must be awarded to a Minnesota resident.

"If competitive bidding is required by law," the statute continues, "the contract must be

Re: H.B. 496 – Food Banks

fm. Rep. Niilo Koponen

Waste not, want not

WASHINGTON, DC

How are America's poor to eat when their unemployment pay runs out, or when they can no longer make do on food stamps and welfare? The recession has provided an answer: a jerry-built, but enviably efficient, system of emergency food centres. This network stretches across the nation, using food that would otherwise go to waste, and shunts it quickly and in large quantities from grower or manufacturer to the various centres that feed the hungry. It is a charitable operation which employs only a few hundred people and is completely decentralised. It has grown with such speed that it has already left the agriculture department's much criticised surplus commodity programme, ensnarled in red tape, far behind.

The emergency food system has its origins in the soup kitchens of the depression and before, but its growth in the past few years has been startling. Although all involved would like to consider it a temporary institution, there is a growing belief that it is here to stay and, if anything, will grow much larger.

Sixty-one regional food banks are the system's backbone. Each consists of a large warehouse equipped with freezers and usually manned by a small, paid staff supplemented by volunteers. These food banks are connected through Second Harvest, a non-profit-seeking organisation, which acts as a food broker. From its base in Phoenix, Arizona, Second Harvest approaches farmers and food manufacturers for donations and then shunts this food through three regional offices out to its members. The member food banks, either individually or through pools, pay the cost of transport, which is also sometimes donated. Once the food reaches a food bank, it is then given out to hundreds of the bank's members: churches, day centres for infants and the elderly, soup kitchens and various other organisations.

The member groups, which would previously have bought food on the open market, now support their food bank by paying a tax of between five and 12.5 cents a pound for the food they take. In this way the budget of the food bank, usually running anywhere from $100,000-250,000 a year, is covered. In some instances food banks are paid for by small donations. In Oklahoma, 600 people send in cheques of from $5 to $25 a month to keep the major local food banks going.

The entire system is private and non-profit seeking. To make sure it stays that way for tax purposes, Second Harvest certifies its member banks, inspects their operations, ensures that they charge no more than 12.5 cents a pound in taxes, and satisfies itself that the bank members in turn are charitable organisations as defined under the tax laws.

No shortage of takers

Second Harvest began as an experimental arm of the now defunct Community Services Administration in the Carter era. Last year it handled 600m lb of food. This year the volume is expected to exceed 1000m lb. Much of the food consists of products that would otherwise be thrown out by the manufacturer, not because they are bad, but because they cannot be sold for other reasons: for example, discolouration or misspelled labels. When a Middle Eastern food broker went out of business, a trailer of macaroni with Arabic labelling was given to a food bank in New Jersey. Second Harvest dispensed 32 train carloads of a cereal which its manufacturer thought too oddly-flavoured to sell. The companies can deduct cost and half the unrealised profit from their taxes when they make such donations.

Some food banks rely heavily on farm surpluses. In northern California, where there are five large food banks, the banks collaborate to find out what crops are in surplus and to carry out exchanges between different areas. The bank in Watsonville, for example, supplies tons of artichokes and lettuce and gets, in exchange, peaches from the bank in Santa Clara and tomatoes from the bank in Sacramento. Farmers give food that would otherwise go to waste. What is left in the fields after harvest is also, in many cases, gathered in by teams of volunteer gleaners who take their pickings to the banks for sorting, cleaning and packing.

A report by a research group in Washington noted a dramatic increase in people coming to programmes served by the food banks. More than half the 181 programmes surveyed said that provision of free meals or food baskets had increased by more than half between February, 1982, and February, 1983. The Community Food Bank of New Jersey in Newark provides a good indication of the trend. Last autumn the bank was handling 10,000 lb of food a month. Now it distributes 200,000 lb a month across the state to 300 different groups which provide food to 30,000 people every day.

Some food banks in the Second Harvest system also distribute federal surplus foods under the government's programme. For the most part these consist of butter, cheese and non-fat dry milk from the government's huge surplus. But some food banks refuse to handle federal foods on the ground that it involves too much paper work. In certain states food banks say they have been deliberately denied federal food shipments, which instead have been handed out through local politicians as patronage.

Salvation Army aims to replenish dwindling food bank

DAVID CLITHEROE
'We don't turn anyone away'

by Chriss Swaney
Times Writer 11/20/84

When a boxer goes down for the 10 count, he usually gets saved by the gong or the referee. That's not the case, however, for the emergency food bank at the Salvation Army's McKinnell House.

The food bank is going down for a 10 count and Salvation Army officials say they don't have the money to revive it.

"We're in bad shape. Our food supplies are so low now that we're trying to decide how long we can stretch things out," said Capt. David Clitheroe, director of social services.

Clitheroe said dwindling emergency food supplies are the result of a 51 percent increase in walk-in clients in the past three years and a 37 percent decrease in food funding.

Normally, the Salvation Army spends $80,000 on its emergency food program. But inflation and an increased number of needy families in Anchorage have whittled funds to $50,000.

Because of the decreases, the normal three-day food box which includes nine meals for a family of four has been cut back to a one-day box of food. There are also serious shortages in meat, dairy products and canned goods.

"These are things we generally try to supply needy families with," Clitheroe said. The flood of needy families has been so great that the Army's food policy of assisting families once every 90 days is frequently extended. "We don't turn anyone away," Clitheroe said. The cost of feeding people has also risen from $7.14 per person in 1982 to $10.50 per person in 1984.

McKinnell House, a short-term shelter for families and an emergency food repository located at 546 E 15th Ave., is operated by the Salvation Army Emergency Services Program. It served more than 9,000 people last year.

"We expect to see even more people this year. But I'm worried about how we can adequately help them," Clitheroe said.

He attributes the massive influx of needy families to three overriding problems: the shaky economy, tighter food stamp regulations and increased migration of younger families to Anchorage.

"Many are still coming to find the great American dream. But once they get here, they're finding the job situation is tight," Clitheroe said.

Take the Bearfield family of Juneau, for example. They came to Anchorage for a better way of life. But they ended up standing in food stamp lines and filling out yards of eligibility forms.

"We applied for food stamps Dec. 5 but didn't get any until February. If it hadn't been for the Salvation Army emergency food program my family would have starved," Bearfield said. The Bearfields have three children: Pamela, 3, Christina, 5, and Wanda, 14.

"We waited months before we got any permanent help," Bearfield said.

For some families, Clitheroe said, the food stamp vigil continues. The Meyer family, who still relies heavily on the Salvation Army emergency food program, applied for food stamps March 8. "We still haven't received any yet," said Sandy Meyer.

"We're living on navy bean soup and the generosity of the Salvation Army," she said. The Meyer family has two children: Brandi, 1, and Marie, 3.

Salvation Army officials claim current overloads are due in part to the lengthy and complex food stamp application process. Legally, the state can spend up to 30 days verifying need.

Jan Hanson, regional manager for southcentral division of public assistance, said applications for food stamps are up. "We're seeing more applications because building starts are down and the fishing industry has been unpredictable for the past two seasons," she said.

Hanson also said that there seems to be a misunderstanding about the entire food stamp program. "We're not an emergency relief service. We are committed to giving long-term assistance. That's why we send people to emergency shelters like McKinnell House," Hanson said.

The overload at McKinnell House is only the tip of the iceberg. Other emergency food providers like St. Francis House at 817 W. Sixth Ave. and Bean's Cafe at 425½ E. Fifth Ave. are seeing more needy people as a result of the already overworked Salvation Army emergency food program.

"I have drawers full of referrals. The only immediate answer is to cut back services. I hope we never get to the point where we can't help at all. Hunger and homelessness in America have reached epidemic levels," Clitheroe said.

ACTION NARRATIVE

TAPE#1, Side A

Recording Number 0001 — Chairman Tischer called the meeting to order at 10:15 a.m., acknowledged members present and introduced HB 496 to the committee.

Number 0017 — Rep. Koponen, sponsor of HB 496 comes to the stand to testify. He said the bill intended to exempt food banks and doners from liability. Alaska is one of three states without this legislation. Significant difference between this bill and similar legislation was vetoed by the 11th Legislature under Governor Hammond. This bill excludes commercial foods. This bill maintains standards for the food.

Number 0070 — Rep. Koponen: We will be looking at changes in this bill which will provide restrictions.

Number 0080 — Chairman Tischer: We ought to look at provisions which allow the giving away of food. Referred to example.

Number 0104 — Chairman Tischer: I've seen folks dig in garbage behind retail grocers and pull out perfectly good food. Seems more humane to let them be given food out of back of a truck.

Number 0114 — Rep. Koponen: I agree, it's a tremendous waste. We want to come up with a bill which will take care of this waste, but provide some standards for this food.

Number 0130 — Rep. Koponen: Food banks are co-op ventures of Salvation Army and other groups. We want looser language which will permit easier distribution of food.

Number 0143 — Chairman Tischer: Cited another example: Got from store food they were going to throw away. Can we provide this legality again?

Number 0166 — Rep. Koponen: Stores discourage that because of liability. Different stores have different policies.

Number 0198 — Carl Larson of Juneau, General Manager of Food Bank Alaska: Thanks for the chance to testify. Many organizations rely on food

banks and food donations for their food. This bill would help incentive to donate. People and commercial organization don't donate for fear of liability.

Number 0250 — Ward of Food Bank said he gives to organizations such as Bean's Cafe and it is tax deductible. These provisions deal with food from surplus.

Number 0273 — Rep. Larson: Trying to determine value of giving away hard to access.

Number 0284 — Rep. Ward: If I were a fisherman with extra fish; could I give them to food bank and deduct from taxes their full value?

Number 0318 — Chairman Tischer: How does your organization function? Are you paid?

Number 0327 — Carl Larson: Food bank started in 1979. We get "Request for Proposal" grants from the municipality, plus others. I get $1400 a month and our driver gets $7.50 an hour.

Number 0412 — Rep. Ward: How many people served last year?

Number 0420 — Mr. Larson: We estimated 6500.

Number 0420 — Rep. Ward: We aren't coordinating what we're trying to do.

Number 0463 — Mr. Larson: There are 10 different Salvation Army Programs, 8 different children's organization and others. We always try to recruit.

Number 0468 — Chairman Tischer: What criteria to get food from you?

Tape 1, Side B
Recording
Number 0006 — Gary Newman from Fairbanks: This bill will allow food to be given to animals too, rather than wasted. Suggested change; we need to be more specific in certain people's exclusion.

Number 0045 — Barbara Smith, Anchorage from FISH Organization: We're emergency food distribution agency staffed by volunteers. We receive food from food bank. We also distribute. We re-package some foods, so

we're concerned about our liability.

Number 0092 — Barbara Smith: We have been serving about 110 families per month. There is no means test, $6,480 of meals per month. This month we have seen a great increase in number of needy families.

Number 0124 — Rep. Ward: Do you have a problem with people getting tax credit for donating?

Number 0140 — Barbara Smith: We encourage our doners to take a tax credit. There are two types: Food of marginal quality and food simply out of date.

Number 0185 — Chairman Tischer: It's incomprehensible for hungry person who receives free food to criticize that food. Maybe we ought to void responsibility of giver. Food receivers eat at their own risk.

Number 0206 — Barbara Smith: I think this bill addresses that. The bill makes it clear that the food bank makes every effort to provide sanitation for its food.

Number 0242 — Rep. Koponen: This bill was vetoed when we had our canned fish problem in Alaska. Canned food probably should not be included in this bill.

Number 0254 — Barbara Smith: We do not accept home canned food. We cannot trust it. We are careful.

Number 0290 — Connie Wallace, Executive Director of Fairbanks Food Bank: We work with several agencies and every church in town. People who need short-term help concern me. That's why we work with pastors.

Number 0343 — 1976 Tax Reform Act addresses Rep. Ward's tax deduction question.

Number 0363 — Connie Wallace; about animal food. In Fairbanks we can use food for animals so that nothing goes to waste.

Number 0424 — Connie Wallace: botulism problem, we make use of city sanitarian. We have people who know lots about food handling. Urge change in excluding manufactures. This will need to be changed in next couple of years.

Tape 2, Side A

Recording Number 0001 — Rep. Ward: Enough salmon rot on beaches in Alaska to feed everyone in the state. Please comment.

Number 0015 — Connie Wallace: I share your concern. Nationally, 137 million tons of food are wasted yearly. There's no reason for anyone in America to be hungry.

Number 0041 — Chairman Tischer: In California, tons of oranges rot each year when there's a bumper crop to help the price up. Anything subsidized by government will do this.

Number 0055 — Beverly Burke from Anchorage: Representing the Abuse, and Aid Shelter; $1000 a month in for those people, 25% food from food bank. This bill is a good balance.

Number 0090 — Bill Barker from Anchorage for Bean's Cafe: Bean's Cafe cooks for 200 people twice daily for street people of Anchorage. The main donator is the food bank.

Number 0120 — Rep. Ward: There's no criteria for price on raw salmon. That's why so much waste. Can't get a tax deduction for giving fish away because of the lack of criteria.

Number 0141 — Bill Barker: Bean's Cafe gets salmon from sport fishermen who empty last year's catch from freezer.

Number 0154 — Rep. Davis: I'm a commercial fisherman. So much goes to waste because it rots so fast. Agree it is a waste, but how to solve is an answered question.

Number 0171 — Chairman Tischer: It seems a simple matter to save this food for hungry people and save liability suits from flying everywhere, we should pass a bill like this.

Number 0204 — Testimony on HB 496 concluded.

Number 0239 — Chairman Tischer introduces HB 32 and welcomes all sites.

Number 0261 — Rep. Furnace: We have obligation to provide student housing for Anchorage City College and University of Alaska, Anchorage. Long-standing agreement with campuses. This bill

calls for $15 million on first come first serve basis.

Number 0293 — Rep. Furnace: Let me repeat. We have an obligation and a long-standing agreement.

Number 0301 — Rep. Ward: This bill is contrary to capital request budget which provides for Juneau campus housing. The design of dorms are very large.

Number 0316 — Rep. Furnace: I hope message is clear to pass this legislation, lets not let this die because of quality of design.

Number 0348 — Rep. Martin: Juneau housing is a gimmick to attract students to that campus. The Anchorage campus needs housing, it has for 11 years. We should be flexible on design. Priority is a question. I hope students will have input about what is priority for who gets housing; rural students, etc. Maybe not first come, first serve, but these details unimportant compared to getting legislation passed.

Number 0429 — Michael McQuinn on behalf of UAA/ACC students: I work primarily with rural students as Orientation Officer at Anchorage Community College. Housing is a primary reason there's a high drop-out rate of Native students.

Tape 2, Side B
Recording
Number 0001 — Michael McQuinn: Help make cultural transition if the Natives could live on campus.

Number 0020 — Rep. Koponen: Have you decided how to split use of housing between ACC/UAA?

Number 0025 — Mr. McQuinn: Seems to be good communication between both Chancellors.

Number 0048 — Rep. Martin: Cost to students in borrowing for loan. Students with available housing to borrow for less than those without housing. We could save $6 million a year by providing housing. Within three years, savings will pay for this new housing.

Number 0078 — Rep. Ward asks Rep. Martin: What will the

on going operation cost of this be if approved?

Number 0082 — Rep. Martin: I could not answer. Addition in operation would be small.

Number 0099 — Mr. McQuinn: Concerned with equal opportunity education for handicapped, from to physically handicapped. My greatest concern.

Number 0110 — David Alcott, Chancellor at University of Alaska, Anchorage: Very pleased with testimony. Concerned with accessibility to education. The money; $15 million to provide housing for 350 students. Type of housing; concerned to provide maximum for minimum dollars. Least operating costs too.

Number 0153 — David Alcott: Hope for $250 a month for student housing.

Number 0168 — Rep. Ward: How many students would utilize dorms if available?

Number 0173 — Mr. Alcott: Housing needs will be between 900 and 1400 students. We will make these figures available. No risk that we'll build too many rooms.

Number 0194 — Ed Bickerstaff, Chancellor at Anchorage Community College; joint partnership is growing between two campuses. Same set of standards for both schools in priority who gets housing.

Number 0270 — Chairman Tischer: Legislature sees duplication of effort from architects in school design. Why not use the functional design already designed?

Number 0293 — Mr. Bickerstaff: Students requests; privacy and cheap cost. Universities are moving increasingly away from traditional housing. Operating costs will fall almost one-half if we go from traditional dorm to the apartment style housing.

Number 0349 — Chairman Tischer: Do we have to have the ancillary help? Can't the students take the place of janitors, etc? Can we take away the frills?

Number 0388 — Rep. Ward: What about the provision for 1%

cost going to art-work? Will this hinder?

Number 0400 — Mr. Bickerstaff: I think some of the art around is an asset. I'm pleased. The art is complimentary to the brick and concrete buildings. If I had choice, I'd rather put that 1% to student housing.

Number 0428 — Rep. Martin: Anchorage has stereotype of students who are older, married and have housing. More freshmen coming, but leaving because of the lack of housing. We want these freshmen.

Tape 3, Side A
Recording
Number 0001 — Chairman Tischer asks the witnesses to keep their testimony short. Offers to accept testimony in writing.

Number 0009 — Roger Wordsley, Vice-Chair of Student Services at ACC: Our housing is not designed for older married students. Rural students coming to ACC is our highest priority.

Number 0024 — Mr. Wordsley: Dorms versus apartment type, we don't plan to furnish extras. We will provide some sort of food service.

Number 0045 — Sandy Berkie, Student at ACC/UAA; urged passage of HB 32. To hold on to our students, we must build housing, education is our best natural resource.

Number 0066 — Rep. Ward: Student Loan Program; should that loan be made if those courses are offered here?

Number 0073 — Sandy Berkie; it should be restricted. Keep resources in this state.

Number 0079 — Chairman Tischer repeats Rep. Ward's question.

Number 0083 — Rep. Ward: I agree with trying to help our students here.

Number 0090 — Bob Baldwin, Chairman of UAA Citizen's Advisory Committee: The priorities are; classroom space and planning money to lay out campus.

Number 0110 — Mr. Baldwin: Student housing; a roadblock in developing the campuses. Regret the Governor's empty promise to support this in his capital budget. The designs are not extravagant, art in public places we strongly support. We have barren campuses.

Number 0161 — Rep. Ward: Public art, optional or mandatory?

Number 0183 — Mr. Baldwin: Committee has no position on that.

Number 0188 — Carol Lund, Director of Student Activities: Students and I support HB 32, cited popularity of bill from last year.

Number 0110 — Harry Nichols, Dean of Students, UAA: Count me as another member of University community who supports this legislation. If the campus will be seen as University, housing must be provided.

Number 0235 — Lee Pickard, Vice-Chairman of Campus Affairs, UAA: I support this bill, I'd like to answer any questions.

Number 0254 — Chairman Tischer: If bill goes, would you need more support staff?

Number 0269 — Lee Pickard: No extra staff required, you can't realistically expect students to do their own cleaning.

Number 0301 — John Herring, Student at UAA; strongly supports HB 32.

Number 0334 — Rep. Ward: Do you know any students who transferred out because of lack of dorms?

Number 0337 — John Herring: I almost transferred because of that.

Number 0370 — Ramona Suetopka-Duerre, President of Alaska Native Education Association: We're very concerned with the problem of the dorms. We strongly support HB 32.

Number 0400 — John O'Shea, Representing UAA Alumni Association: I affirm all prior testimony, rural students are being discriminated against because of lacking housing.

Tape 3, Side B

Recording	
Number 0001	Chairman Tischer: Introduces HB 514 and clarifies the committee is not addressing day care centers and witnesses should confine testimony to specific legislation by name.
Number 0047	Mary Wilson, Teacher, Montessori School: Limit for preschool to (4) hours (in SB 354) has our parents mad. Support HB 514.
Number 0066	Fae Scott, Secretary, Montessori School: She was against the (4) hour limitation. Our schools are very good, a good atmosphere for the citizens of tomorrow.
Number 0093	Fae Scott: We want HB 514 without amendments.
Number 0105	Safiyyah Shaheed, Teacher, Montessori: Supports HB 514 without amendments.
Number 0115	Katherine Miller: In support of HB 514 as is. The (4) hour limit not germane, it's a poor criteria. Recommended deleting amendment on Page 2, Lines 22-25.
Number 0157	Margaret Green, Director, Montessori School: Our paperwork is the same as that for the University. Very controlled. I represent parents of 650 children, the (4) hour limit is unfounded. Susan Clark's past testimony did not represent the University Women. The (4) hour limit do disservice to our school.
Number 0212	Ms. Green: We do have fire safety and other health codes. Please hurry this legislation it has taken much time already.
Number 0221	Rep. Koponen: (4) hour limitation never offered by either house.
Number 0230	Rep. Uehling: Please comment later on your feelings toward SB 354.
Number 0281	Harry Bates, Principle: In favor of CSHB 514 and am against amendments 1 and 2 of CSSB 354.
Number 0332	Mac Culver: Thanked committee for interest and agreed with Mr. Bates' testimony. Substantive changes might negate agreement with Governor and Attorney General.

Number 0378

Bart Carney, Pastor: Handed out a document which he read as testimony to the committee. He supported SB 354 and was concerned with amendment 1 of CSSB 354.

Tape 3, Side B
Recording
Number 0011

Rep. Koponen: We should discuss with the Attorney General to see what the changes will be.

Number 0017

Rep. Uehling: Last three amendments are fine with you? (Yes).

Number 0041

Daniel Glover: Agreed with Mr. Carney's testimony. Parents who go to the trouble of placing their children in these private schools do care about their children, and are capable of choosing wisely for their children.

Number 0084

Kalen Saxton: In support of SB 354 with exception of amendments.

Number 0135

Mary Beth Juday: Concerned that children in day-care facilities have their needs met. children don't belong in academic programs all day long. They won't learn to be children, such as play and socialize, when they are in school all day. In favor of CSSB 354.

Number 0159

Chairman Tischer: Do you want always to reserve the right to choose for your own children? (Yes).

Number 0187

Ms. Juday: Its the government's responsibility to ensure safety and other standards for our children.

Number 0220

Tim Ewell: Restated Mr. Carney's testimony.

Number 0260

Joan Hurst: As a private citizen; she opposed both HB 514 and SB 354. The state is obliged to watch out for school's health and safety, including child/staff ratio. She said she objects to certain school exemptions.

Number 0349

Sister Eileen Brown: Agreed with most of Ms. Juday's testimony, and asked for some clarification with the language on Page 2, Line 8.

Number 0376 — Rep. Koponen clarifies the language.

Number 0422 — Sister Eileen Brown: We are in favor of the government's health and safety requirements and thanks the committee.

Number 0453 — Patty Meritt: Both bills will increase inconsistency in regulations. She was against both bills.

Tape 4, Side A
Recording
Number 0016 — Patty Meritt: Teacher with certain training should be able to teach with bigger ratios of students.

Number 0028 — Rep. Koponen: Any suggestions for regulations?

Number 0032 — Ms. Meritt: Look at other states, many schools have bigger ratio allowances. Age makes a difference to ratio; so does teacher qualification.

Number 0052 — Doug Schmedlen: Agreed with Mr. Carney's testimony. emphasized that amendments 1 and 2 need attention, the original bill HB 514 was a good bill. Referred to concerns about subsidies.

Number 0074 — Lloyd Bellamy: Agreed with Mr. Carney's testimony.

Number 0080 — Edwin Rinner: As parent of four children, he believed this bill is appropriate. Appreciated the Governor's interest and that of the legislators, and also agreed with Mr. Carney's suggestions for changing the amendments.

Number 0100 — Jerry Wainscott: Concurred with Mr. Carney's testimony. Thanked the committee for their work and urged passage of the bills.

Number 0115 — Robert Alley: Concurred with Mr. Carney's statement and thanked the committee members.

Number 0145 — Robert Bryon, Wasilla Children's Center: He supported Mr. Carney's testimony and sending 18 students from Wasilla to Peter's Creek. Next year we hope to help them in our own school in Wasilla, there will be about 40 children.

Number 0166	Walt Arden: Endorses Mr. Carney's testimony.
Number 0183	Chairman Tischer thanked the witnesses for coming to the hearing and the committee will soon put the bill on the floor.
Number 0190	No further business to come before the committee, Chairman Tischer adjourned the meeting at 3:04 p.m.

HOUSE HEALTH, EDUCATION & SOCIAL SERVICES

See HESS minutes of January 28, 1984.

ACTION NARRATIVE

TAPE#1, Side A
Recording
Number 0001 Chairman Tischer called the meeting to order

at 1:20 p.m., and recognized the members present. She announced the committee calendar, welcomed all teleconference sites and stated her intent to move the bill out of committee.

Number 0022 — Rep. Martin moved that CSHB 496 (HES_) be brought up for consideration. No objection, so ordered.

Number 0026 — Chairman Tischer called the first witness to testify, Rep. Koponen who is the sponsor of the bill.

Number 0037 — Rep. Koponen stated that the liability is limited to constructive knowledge of any type of fraud. The committee substitute defines liability as gross negligence rather than legal negligence. The law is written in one section of the bill so people don't have to pick around. The donor section defines donor as farmer, retailer, wholesale, freight company, etc. It excludes manufactures of canned foods, said Rep. Koponen.

Number 0078 — Chairman Tischer asks if Matanuska Maid made sour cream and something happened so the package didn't look good, could they give that to a food bank?

Number 0102 — Rep. Koponen responds yes, that is better than the indigents picking through the garbage bins.

Number 0110 — Joe Cladouhos from the Department of Environmental Conservation stated that the Department supports HB 496 and they had no problems with the present language.

Number 0122 — Representatives Pestinger and Uehling are now present for the committee meeting.

Number 0129 — Elizabeth Shaw from the Department of Law is the next witness to testify. She defines liability of donors; one of the problems for the original bill was that it didn't change the standards that applied to food donors. We wanted the new bill to define standards of negligence, said Ms. Shaw.

Elizabeth Shaw said theory or negligence presupposes a standard of behavior and that's the reasonable and prudent person

standard. The juries use that standard to determine negligence, they want people to act reasonably and prudently at all times - doing what a reasonable and prudent person would do. This encourages donors to give to food banks and this donor would not be liable if he acted reasonably and prudently.

Ms. Shaw continues. This bill has two categories; one is a donor which excludes those of commercial capacities. Retailers, however, would be considered a donor.

Page 1, line 13: previous draft stated injury not be attributed to donor if not a direct result. We questioned the use of direct, said Ms. Shaw.

Page 2, line 7: The in food bank, injury or death is not a direct result. There is an intentional difference between the two standards.

Number 0230 — Chairman Tischer asks for questions.

Number 0233 — Rep. Pestinger moved that CSHB 496 (HESS) be passed out of committee with individual recommendations. No objections, so ordered. Representatives Tischer, Pestinger, Martin, Uehling, Davis and Kohonen signed a "do pass" recommendation.

Number 0254 — No further business to come before the committee, Chairman Tischer adjourned the meeting at 1:58 p.m.

Sec. 11.56.820. Tampering with public records. (a) A person commits the crime of tampering with public records if the person knowingly

(1) makes a false entry in or falsely alters a public record; or

(2) destroys, mutilates, suppresses, conceals, removes, or otherwise impairs the verity, legibility, or availability of a public record, knowing that the person lacks the authority to do so.

(b) Tampering with public records is a class A misdemeanor. (§ 6 ch 166 SLA 1978)

NOTES TO DECISIONS

For case construing former AS 11.30.240 — 11.30.260, relating to mishandling of public records, see Larson v. State, Sup. Ct. Op. No. 1430 (File No. 2433), 564 P.2d 365 (1977).

Sec. 11.56.830. Impersonating a public servant. (a) A person commits the crime of impersonating a public servant if the person pretends to be a public servant and does any act in that capacity.

(b) It is not a defense to a prosecution under this section that

(1) the office the defendant pretended to hold did not in fact exist; or

ANNOTATION

VALIDITY AND CONSTRUCTION OF "TERRORISTIC THREAT" STATUTES

by

Jeffrey F. Ghent, J.D.

Section 211.3 of the American Law Institute's Model Penal Code, Proposed Official Draft (1962), makes it a felony of the third degree to threaten to commit any crime of violence with purpose to terrorize another or to cause evacuation of a building, place of assembly, or facility of public transportation, or otherwise to cause serious public inconvenience, or to make such threats in reckless disregard of the risk of causing such terror or inconvenience.[1]

This annotation collects the cases in which the courts have construed or passed upon the validity of such statutes[2] expressly making "terroristic

---

1. The section entitled "Terroristic Threats" is distinguished in an official note from a related provision pertaining "Criminal Coercion" (§ 212.5), the Institute explaining that the object of § 211.3 is to prevent serious alarm for personal safety, such as may arise from letters or anonymous telephone calls threatening death, kidnapping, or bombing, and that in the case of terroristic threats, there is no occasion to exempt from criminal liability on the ground of the actor's possibly benign ultimate purpose, as is appropriate in connection with the offense of coercion.

2. Since the statutes are included only to the extent that they are reflected in the

threats" a separate and distinct criminal offense.[1] Thus, the present annotation does not include cases involving the offense of extortion, blackmail, or threats generally.[2] Among other offenses involving, or often involving, threats but not designated in terms of "terroristic threats," and therefore beyond the scope of this annotation, are assault,[3] robbery,[4] secition,[5] "night riding" and "whitecapping,"[6] "bomb hoax,"[7] and the specific federal offenses of racketeering,[8] extortionate credit transactions,[9] riots,[10] intimidating witnesses, jurors, or federal officers,[11] threatening the President,[12] extortion by federal officers or employees,[13] using violations of federal law to blackmail[14] inducing kickbacks from public works employees,[15] and mailing, or transmitting in interstate commerce,threatening communications.[16]

In the following cases, the validity of "terroristic threat" statutes, as construed by the courts, was upheld.

A Georgia statute punishing "[a]ny illegal threats and acts, and words showing that a person contains a terroristic design when he threatens to commit any crime of violence, or to injure or damage property, with the purpose to terrorize another, or of causing the evacuation of a building, place of assembly, or facility of public transportation, or otherwise causing serious public inconvenience, or, when he makes such threats in reckless disregard of the risk of causing such terror or inconvenience," was held neither violative of the First Amendment right to free speech nor unconstitutionally vague, at least in pertinent part, in Mason v. State (1970, Ga) 329 F Supp 698, the court granting a defense motion for judgment on the pleadings in an action for injunctive and declaratory relief against enforcement of the statute. As to the contention that the statute prescribes constitutionally protected conduct by

making illegal bare statements without an overt act or attempt to carry out the threat, the court replied that statements alone can be without First Amendment protection; that although the right to free speech entitles an individual to advocate certain ideas regardless of their popularity, it does not extend to the threatening of terror, inciting of riots, or placing another's life or property in danger; and that the indictment against the plaintiff made just such an accusation—that he had threatened in the presence of a third party to burn and damage 11 automobiles owned by another for the purpose of terrorizing the owner. It was further contended that the statute was unconstitutionally vague because it required a man of ordinary intelligence to guess at its meaning, and because some portions of the statute were so ambiguous as to fail to give fair and adequate warning of the conduct proscribed. However, the court pointed out that it was only necessary to consider that portion of the statute under which the plaintiff had been indicted, namely, the provision that a person commits a terroristic threat when he threatens to burn or damage property with the purpose of terrorizing another. Concluding that there was nothing vague or indefinite in this provision, the court stated that no meaningful contention could be made that the provision failed to adequately inform the plaintiff of the conduct prohibited.

A Kansas statute making a terroristic threat a felony, and defining a terroristic threat as any threat to commit violence communicated with intent to terrorize another, or to cause the evacuation of any building, place of assembly, or facility of transportation, or impaired in wanton disregard of the risk of causing such terror or evacuation, was held valid against a contention that it was unconstitutionally vague under both the Kansas Constitution and the Fourteenth Amendment to the United States Constitution, in State v Gunzelman (1972) 210 Kan 181, 502 P2d 703, 58 A.L.R.3d 522, the court reversing on other grounds a conviction for making a terroristic threat to a highway patrol officer. The patrolman had issued a traffic ticket to one of the defendant's truckdrivers, and the alleged terroristic threat, made at the patrolman's home, was apparently intended to prevent further tickets to the drivers.[18] Observing generally that the idea for the new statute; designed to fill a gap in the law, had been drawn from the American Law Institute's Model Penal Code § 211.3, supra, the court recognized that a statute creating a new offense must be sufficiently explicit to inform those who are subject to it what conduct on their part will render them liable to its penalties. However, characterizing the "main thrust" of the defendant's constitutional argument as based upon a failure by the legislature to define the words "threat" and "terroristic," the court pointed out that a general definition section of the Kansas Criminal Code defined a threat as "a communicated intent to inflict physical or other harm on any person or on property." The court also

18. Although not ruling on the sufficiency of the evidence to support the conviction, the court did state the language of the alleged threat as follows: "I am warning you for the last time that you are not pulling my drivers over for no reason and arresting them. . . . You have a wife and family. You had better give some thought to that. You are gone a lot of nights. Where is your bedroom? I will be back."

noted that in a similar case,[19] the word "terrorize" had been defined as "to reduce to terror by violence or threats," and the word "terror" as "an extreme fear or fear that agitates body and mind." Given abiding definitions for the words "threat" and "terrorize," as those terms are understood by men of common intelligence, the court said, the statute proscribing terroristic threats survives any constitutional challenge for vagueness and uncertainty. Finally, the court observed that although the statute might have been directed at campus unrest, fire and bomb threats to public buildings, and acts of mob violence, the main elements of the offense were threats communicated with a specific intent to terrorize another, and that the wording of the statute appeared sufficient to proscribe such threats whether directed generally against one or more persons, and regardless of the purpose which the terrorist had in mind to accomplish.

BILL SHEFFIELD
GOVERNOR

SB 397

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 31, 1984

The Honorable Jalmar Kerttula
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Kerttula:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to extend the life of the Alcoholic Beverage Control Board for four years. The board has gone through four "sunset" reviews in the last five years, and its sunset date was extended from June 30, 1983 to June 30, 1984 during last year's legislative session. I believe that it is time to give the board a four-year extension so that it can continue to fulfill its responsibility for administering our alcoholic beverage control laws.

Sincerely,

Bill Sheffield
Governor

PURPOSE OF THE REPORT

In accordance with the provisions of Alaska Statutes 24.20.271(1) and 44.60.050 (Sunset legislation) an examination of the Alcoholic Beverage Control Board was conducted to determine if the Board has been operating in an efficient and effective manner and if the Board should be reestablished.

As required by legislative intent, this report should be considered during the legislative oversight function in determining if the Alcoholic Beverage Control Board should be reestablished. Per the 1983 amendment to AS 44.66.010(A)(1), the Board is scheduled to terminate on June 30, 1984.

(Intentionally left blank)

Enforcement. The ABC Board currently employs five investigators - three operating from the Anchorage central office, one operating from the Fairbanks field office, and one operating from the Juneau field office. One Anchorage Investigator position is vacant. Services provided include (1) surveillance and inspections of licensed premises, (2) investigations to obtain information to be used in criminal and civil proceedings and investigations into suspected licensing violations, (3) public appearances relating to ABC laws and regulations, and (4) assisting the licensing staff in handling inquiries from the general public.

ORGANIZATION AND FUNCTION

The Alcoholic Beverage Control Board (hereinafter referred to as the ABC Board or the Board) was established in 1959 by Title 4 of the Alaska Statutes as a regulatory, quasi-judicial agency. The Board is vested with the powers, duties, and responsibilities for the control of alcoholic beverages, including the power to propose and adopt regulations, and to hear appeals.

Members are appointed for three-year terms by the Governor and serve at his pleasure subject to confirmation by the Legislature. Membership is limited by statute to five persons (two liquor industry representatives, three non-industry representatives). A director, also appointed by the Governor, serves as executive officer and is responsible for enforcement of Title 4 liquor laws and regulations developed by the Board. Although he is not a member of the Board, the director may cast a tie-breaking vote. Under the direction of the Board, the director may issue, renew, transfer, revoke or suspend licenses or permits.

Title 4 prescribes the type of licenses, fees, and specific activities allowed under each license classification (see schedule of license types and fees in Appendix C). Fees are payable at the time of application. To renew an already existing liquor license, the application must be filed (and the corresponding fees paid) on or before February 28. On January 1, 1984 the Board adopted emergency regulations to set a moratorium on the issuance of certain new license within the State. The primary purpose of the moratorium is to avail time to the Board to reevaluate its current criteria for license application approvals. This moratorium will be in effect until April 30, 1984.

The staff of the ABC Board is divided into three major functions: administration, licensing, and enforcement. A brief description of the services provided by those functions follows.

Administration. The director of the ABC Board provides all administrative support needed by the Board including overseeing all staff functions, preparing budget documents, and directing the preparation and implementation of administrative and public hearings, and directing special enforcement investigations.

Licensing. The licensing staff currently consists of three full-time employees responsible for issuing and receiving application forms, maintaining records and files for all licenses, collecting fees, issuing all licenses and permits authorized by the Board, and answering inquiries from the general public on routine licensing matters.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting those practices are not within the scope of this review but require legislative consideration. In debating these decisions the legislative oversight committees should take into consideration the findings and recommendations presented in this report, so that the potential impact of the policy changes can be evaluated.

Report Conclusions

Title 4 of the Alaska Statutes established the ABC Board to control the manufacture, barter, possession and sale of alcoholic beverages in the State in order to protect the public's health, safety, and welfare. We believe that there is a demonstrated need for this control to continue to exist. In order to operate in a more efficient and effective manner the following recommendations should be implemented:

1. The ABC Board should improve documentation of its enforcement efforts.

2. The ABC Board should strengthen communications with law enforcement officers.

3. The ABC Board should establish procedures to monitor license fee refunds.

4. The ABC Board should improve its activity reporting system.

5. The Department of Revenue should review the ABC Board's transmittal of receipt procedures and establish procedures to transmit funds more efficiently.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The ABC Board should improve documentation of its enforcement efforts.

The ABC Board is mandated by statute to control the manufacture, barter, possession, and sale of alcoholic beverages in the State. When a violation is observed or reported, the ABC Board staff would issue a notice of violation, initiate an investigation, or file a criminal complaint. An enforcement file is maintained by the ABC Board to document actions taken. Our review of these files disclosed weaknesses in the following areas:

Investigations

Upon completion of an investigation by the enforcement staff a written report is prepared. The report is reviewed by the enforcement supervisor and submitted to the Director and/or Board for final action. Our review disclosed that adequate documentation is not maintained on enforcement activity. For instance, 16 of 25 enforcement files reviewed did not contain documentation of final action resulting from the Director and/or Board review. In addition, a review of 25 administrative files maintained by the Director showed that 17 files did not contain documentation of the informal conference held with the licensee and final resolutions made.

In order to improve the efficiency and effectiveness of operations, the ABC Board should implement procedures to ensure files are complete. Enforcement files should contain documentation of enforcement activity from inception to final resolution.

Notice of Violation (NOV)

The ABC Board utilizes an NOV to communicate to licensees that a violation allegedly occurred. NOVs of an by themselves carry no penalty, and present regulations do not require the licensee to respond to the NOV. Our review of 25 NOVs showed only 9 responses were received from licensees.

An NOV or an accumulation of NOVs could lead to the filing of an accusation or could initiate an investigation. In addition, NOVs may be reviewed by the Board in considering whether to suspend, revoke, or renew a license.

To provide for fair and balanced consideration by the Board, Director or enforcement officers, all licensees should be required to provide a written response to an NOV. The response should become a part of the decision on whether or

not additional action is warranted. Consideration should also be given to the assessment of a penalty to the licensee when no response is received after the issuance of an NOV.

Recommendation No. 2

The ABC Board should strengthen communications with law enforcement officers.

Our review of the ABC Board's law enforcement activities showed that the staff relies primarily on the services of local law enforcement officers to aid in enforcing liquor laws. To promote local enforcement, annual license fees, excluding wholesale fees, collected from licenses issued within a municipality are refunded semi-annually to the municipality.

Total license fees refunded to 40 municipalities in Fiscal Year 1983 was $809,980. According to the ABC Board staff, they are unsure of what services are provided by several municipalities. No reports have been submitted by 20 of the 40 municipalities.

Alaska Statute 04.11.610(b) states that if the officers of a municipality fail to actively enforce local ordinances, laws of the United States and the State, and the regulations relating to the manufacture and sale of alcoholic beverages, the Commissioner of Revenue may deny the refund, until the Board finds the enforcement of the ordinances, laws and regulations is resumed. Alaska Statute 04.11.610(c) also provides for the recovery of any amount erroneously refunded.

As of January 1984, the ABC Board implemented procedures to monitor the number of reports received from law enforcement officers. We encourage the Board to continue this effort. In addition, the Board should review its enforcement requirements and inform all municipalities of the types of reports and/or services expected from each to ensure liquor law enforcement.

Recommendation No. 3

The ABC Board should establish procedures to monitor license fee refunds.

If an application for an alcoholic beverage license or permit is denied by the ABC Board, the applicant is required by Board procedures to submit a claim for a refund of the license fee paid. Upon receipt, the claim is reviewed and endorsed by the ABC Board's staff. The claim is then forwarded to the Department of Revenue for processing.

A review of the ABC Board's records showed that no reconciliation is performed between the amount requested and the amount disbursed. In addition, no accounting is maintained of the number and amount of unclaimed refunds. Discussion with the ABC Board's staff disclosed that several applicants are long overdue in submitting their claims. For example, four claims processed in Fiscal Year 1983 totalling $2,200 were for refunds resulting from denials made prior to 1979.

Unclaimed refunds are a liability to the State and should be accounted for accordingly. Therefore, we recommend that the ABC Board establish procedures to automatically refund licensee fees when the denial action taken by the Board is known to be final. Supervisory review and approval should be required on all refunds processed. Refunding procedures should also include a summary of outstanding refunds, and a reconciliation of the amount requested to the amount disbursed.

Recommendation No. 4

The ABC Board should improve its activity reporting system.

Statistical information summarizing Board actions, licensing activities and enforcement activities is compiled annually by ABC Board's staff. These statistics are utilized as performance indicators for in-house and budgetary reporting. Our review of Fiscal Year 1983 summaries disclosed the following weaknesses:

A. Enforcement activity summaries do not adequately reflect staff performance. For example, investigations are reported when completed. The man-hours required to conduct each investigation varies directly with the purpose and scope of the investigation. One investigation may take several months to complete, however no accounting is maintained on the man-hours required.

B. Activity summaries are not accurate. Two material reporting errors were found as a result of our review. Total licenses revoked by the Board were erroneously reported at thirty-seven instead of four. The reported figure included thirty-three actions which should have been classified as denials or non-renewals. In addition, total investigations were reported at seventy-four, however only fifty were recorded.

The ABC Board should develop and implement policies and procedures to adequately measure staff performance and to promote accurate reporting of its activities.

Recommendation No. 5

The Department of Revenue should review the ABC Board's transmittal of receipt procedures and establish procedures to transmit funds more efficiently.

Revenues collected by the ABC Board consisting of application and license fees are deposited approximately once a week in a non-interest bearing bank account. Due to staff limitations and time allotted for bank verification, a check for the amount deposited is not prepared until several days later and forwarded to the Division of Treasury.

A review of the ABC Board's bank statements showed that the average monthly balance for Fiscal Year 1983 was $87,828. Interest income is lost as a result of transmittal delays by the ABC Board. The Department of Revenue should establish procedures to have funds wire transferred to the Division of Treasury upon deposit or authorize the establishment of an interest bearing depository account to be maintained by the ABC Board.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analysis indicates both positive and negative attainments of the ABC Board and how its activities relate to the public need factors defined by AS 44.66.050. This analysis is not intended to be comprehensive in nature.

I. The extent to which the board, commission or program has operated in the public interest.

Public protection gained through licensing to control the manufacture, possession and sale of alcoholic beverages has been adequately provided by the ABC Board. However, operational efficiency and effectiveness should be improved. See Recommendations 1 through 5 of this report.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personal matter.

The 1980 revisions to Title 4 have, for the most part, been beneficial to the operation of the ABC Board. However, those sections which deal with suspension and revocation of licenses and permits place severe restrictions upon the ability of ABC to suspend and revoke licenses for the illegal act of licensee employees.

The Board is also restricted in meeting its statutory responsibilities in protecting the public health, safety and welfare by the size of the enforcement staff which consists of one agent in Juneau, one in Fairbanks and three, including a supervisory agent in Anchorage. Including the supervisory agent, there are only five agents with inspection and enforcement responsibilities for 1,513 licensed premises. However, one other Anchorage Investigator position is vacant.

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

The last major revisions to Title 4 of the Alaska Statutes were the result of action by the 1980 session of the Legislature. The ABC Board participated in the process of developing those revisions

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

The ABC Board has met an average of ten times during 1982 and 1983. During each year they have met at least once in each of the four judicial districts. Each meeting has been adequately advertised and open to all interested persons. Staff of the ABC Board are located in Anchorage, Juneau and Fairbanks and are available to answer inquiries of the general public during all normal business hours. We believe this has provided an adequate forum for allowing public input on Board regulations and decisions.

V. The extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

As noted in IV above, the Board has provided an adequate forum for obtaining input from the public.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

As noted in past reviews the number of formal hearings continue to be few in number. However, the ABC Board has the authority to hold its own hearings on protests which it exercises as a part of its regularly scheduled meetings. Hearings in this manner have been accomplished in a timely manner since the Board meets at least ten times each year.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

Our review of licensing activity of the ABC Board to determine whether all statutory qualifications of licensees were being met revealed no exceptions. The Board has therefore, presented qualified applicants to serve the public.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

No discrepancies were noted during our review of the ABC Board affirmative action program.

IV. The extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to I and II above and to the previous section, Findings and Recommendations.

LEGISLATIVE
AUDIT

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, AK 99811

Dear Mr. Wilkerson:

This letter is in response to recommendations contained in your Performance Report of the Alcoholic Beverage Control Board dated January 30, 1984.

Recommendation No. 1 - The A.B.C. Board should improve documentation of its enforcement efforts.

We agree. Conclusions for and final actions from investigations, informal conferences and administrative hearings will be more precisely documented and recorded in pertinent files.

Recommendation No. 2 - The A.B.C. Board should strengthen communications with law enforcement officers.

We agree. This is an ongoing task for the board and its staff. We hope the monitoring procedures implemented recently will produce improved communications with other agencies.

Recommendation No. 3 - The A.B.C. Board should establish procedures to monitor license fee refunds.

We agree. Procedures to process and assess disposition of denied applications and related refund of license fees will be established.

Recommendation No. 4 - The A.B.C. Board should improve its activity reporting system.

We agree.

Item A. A man-hour reporting system for investigators is in place.

Item B. The discrepancy for total investigations reported resulted from "information only" notations by investigators on their daily reports erroneously recorded by clerical staff as "completed" investigations. Improved communication and control within the enforcement staff has begun to prevent this kind of error from reoccurring.

Recommendation No. 5 - The Department of Revenue should review the A.B.C. Board's transmittal of receipt procedures and establish procedures to transmit funds more efficiently.

We agree. The department is vigorously reviewing cash receipt management in all departments at the present time.

On behalf of the A.B.C. Board and its staff we commend your staff who performed this audit for their professionalism and conduct. Thank you for your constructive and appropriate recommendations.

Sincerely,

Robert D. Heath
Commissioner of Revenue

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 6, 1984

The Honorable Jalmar Kerttula
Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Kerttula:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill appropriating a total of $314,205 to the Alaska Court System.

The first section of the bill appropriates $285,000 from the general fund to offset the deficit created by underfunding the FY 84 cost-of-living pay increase. When funds were appropriated for that increase, the level of funding was set at approximately 75 percent of the estimated cost of the increase for existing employees. In addition, pay increase funds were not provided for the eight new positions received by the trial courts in FY 84. The court system has attempted to reduce the deficit by extending vacancies, eliminating overlaps, and reducing overtime to the extent possible. Through these efforts, the trial courts will have realized a savings of $400,000 by the end of this fiscal year.

The second section of the bill appropriates $29,205 from the general fund to pay FY 83 outstanding obligations for library materials. Inadvertently, invoices were not processed in a timely manner, and the court system has actually lapsed sufficient funds to cover these claims.

Additional backup material will be furnished to the finance committee.

Sincerely,

Bill Sheffield
Governor

Alaska Court System
State of Alaska

OFFICE OF ADMINISTRATIVE DIRECTOR

303 K Street
Anchorage, Alaska 99501

ROBERT G. FISHER
Manager of Fiscal Operations

January 23, 1984

Carolyn Martin
Senior Budget Analyst
Office of Management & Budget
Pouch AM
Juneau, AK 99811

Dear Carolyn:

Accompanying this letter is the Court System's request for a supplemental appropriation in the amount of $285,000 for the trial court budget request unit for fiscal year 1984. The additional funds are requested to offset the deficit in the current year budget, which was created by the underfunding of the FY 8384 general cost-of-living pay increase.

When funds were appropriated for the pay increase, the level of funding was set at approximately 80% of the estimate cost of the increase for existing employees. Additionally, pay increase funds were not provided for the new positions received by the trial courts in FY 84. The requested funds will cover the projected underfunding deficit in the current year. The Court System has requested funds in the FY 85 operating budget to cover the on-going cost of the pay increase in the next fiscal year.

The Court System has made every effort to reduce the deficit through other means. However, no other funds are available and full staffing is needed in the trial courts to keep pace with the high rate of growth in caseload.

Sincerely,

Robert G. Fisher
Fiscal Officer

ROBERT G. FISHER
Manager of Fiscal Operations

January 23, 1984

Carolyn Martin
Senior Budget Analyst
Office of Managment & Budget
Pouch AM
Juneau, AK 99811

Dear Carolyn:

The Court System is requesting a supplemental appropriation for $30,000 for several unpaid prior year bills for library materials from Commerce Clearing House. The bills originated in fiscal years 1982 and 1983. The unpaid amounts are $803.85 and $29,205.00, respectively. The Court System lapsed sufficient funds in each fiscal year to cover the unpaid claims.

Due to changes in personnel, I have not been able to ascertain the reason the bills were not paid in a timely manner. Nevertheless, the charges are valid and must be paid. A statement is enclosed, which provides information on the unpaid bills. The statement has been amended to reflect the correct amount due.

It is requested that these obligations be included in the FY 84 Miscellaneous Claims Supplemental Appropriation.

Sincerely,

Robert G. Fisher
Fiscal Officer

REPEAL OF POOLED MUSIC COPYRIGHT LAW

AS 45.50.330-.460

It is recommended that Alaska's 1939 pooled music copyright law, AS 45.50.330-.460, be repealed. The law is archaic, obsolete, imposes massive useless paperwork burdens on State agencies, and is of doubtful validity in light of subsequent federal legislation and court decisions.

1. Obsolete. The law was adopted by the Alaska Territorial Legislature in 1939 in response to conditions and practices then existing in the licensing and use of copyrighted musical compositions. In the forty-three years since then, the industry has changed dramatically, but the Alaska law remains as an anachronism.

2. Repeals by Other States. In the late 1930's several states adopted similar statutes. These statutes have now been repealed in Washington, Florida, Montana, Nebraska, Tennessee and Wyoming.

3. Conflict with Federal Law. The validity of the Alaska law is doubtful in light of post-1939 developments in federal statutory and case law. These developments include a comprehensive revision of copyright law under the Federal Copyright Act of 1976, which pre-empted State copyright laws, and two consent decrees governing licensing of copyrighted musical works.

4. Useless Collection and Accumulation of Paperwork. The Alaska law requires that massive amounts of paperwork be filed with and retained by the Department of Administration, none of which serves any useful purpose. The filings create expensive and unnecessary administration and storage problems and have not been used by either the public or the State. Comparable information is available to the public from the Federal Copyright Office.

Re: SB 427
Repeal of
AS 45.50.330-.460
Our File 3300.16

Dear Senator Ray:

Thank you for meeting with Gordon Evans and me last Tuesday regarding SB 427.

I trust that you found our answers to your questions responsive. And I hope that the background we provided with respect to the U.S. Copyright Law and the history of our client's operations fully explained the context of ASCAP's interest in the repeal of AS 45.50.330 through .460.

I would like to emphasize once again that ASCAP has no "ulterior motives" in wishing to see SB 427 passed. Its earlier passage would not have affected in the least our client's activities in Alaska or the litigation in which its members have engaged in Alaska. Its passage hereafter will not affect in any way our pending litigation (we have only one suit unresolved at this time). In short, our interest in the passage of SB 427 is as simply explained as we said: ASCAP would like to be relieved of a filing requirement which serves no public interest of any kind. The balance of the existing statutory scheme is generally procedural or redundant with federal law, would generally be made irrelevant by the repeal of the filing requirements, and should, we believe, be repealed also.

Thank you again for meeting with us. If you have any further questions of any kind, I hope you will not hesitate to call me. And I do hope that you will agree that SB 427 should be passed.

Sincerely,

ELY, GUESS & RUDD

Re: Senate Bill No. 427 (Our File No. 1221/01249)

Dear Senator Ray:

The enclosed letter explains in somewhat more detail why SB 427 (repealing Alaska's 1939-vintage law on pools for licensing the public performance of copyrighted music) should be passed.

My initial reaction if I were in your position would probably be to do nothing with this legislation unless I was sure in my own mind that there was no further need for these laws and that the interests of the Alaskan public would not be compromised by such a repeal, so I can understand it if your feelings are similar. However, there really are sound reasons for repealing these laws, and the public will not be harmed by doing so. With all respect, I urge you to schedule a hearing of the Judiciary Committee on this bill in the near future, so that you can satisfy yourself whether such is the case or not. Additional reasons for repeal, besides those in my letter, could also be presented and explained at such a hearing.

Very truly yours,

BOGLE & GATES

Re: SB 427

Dear Chairman Eliason:

We have received your inquiry of March 6, asking for our comments on SB 427, which would repeal AS 45.50.330 -- 460, the pooled music copyright law. In response to your request, we have reviewed the state law, federal copyright law, and applicable case law. We conclude that AS 45.50.330 -- 460 is obsolete and should be repealed.

The pooled music copyright law was enacted by the Alaska Territorial Legislature in 1939. The law was similar to legislation adopted at about that same time in several states. The purpose of these laws was to prevent certain practices that existed in the music industry at that time. Since then, because of changes in the industry itself and in federal law, each of the states that enacted a pooled music copyright law has repealed its legislation, except Alaska.

The pooled music copyright law has, for the most part, been pre-empted by federal copyright law. It offers no protection to the copyright owner or to the general public beyond that available under the federal statutes. The one purpose it might now serve is providing information to owners and the public, but even that function is covered by the federal copyright act. The information that the law requires the Departments of Revenue and Administration to file is readily available in printed form from the U.S. Copyright Office.

We find no reason to retain the pooled music copyright law. Its only remaining function appears to be to create an ad-

ministrative burden for two agencies of the state. We recommend its repeal.

Sincerely yours,

NORMAN C. GORSUCH
ATTORNEY GENERAL

DATE: March 9, 1984

RE: SB 427 - "An Act repealing the pooled music copyright law"

As requested I reviewed the above-referenced legislation and I am now reporting my findings to you.

This legislation will repeal AS 45.50.330-45.50.460, which requires persons holding certain pooled copyrights on musical works to file lists of these copyrights with the State. The purpose of these filings is to allow the public to "avoid using the copyrighted compositions and to avoid conflict with them". In fact, however, no one ever examines these filings any more. In 1983 only one person examined the files in the Department of Revenue or the duplicate files at the Department of Administration.

Repeal of the state law would not make the information unavailable to the Alaskan public. Federal copyright laws require the same information to be filed with the Copyright Office, and copies of the lists of copyrighted materials may be purchased from the Federal Superintendent of Documents. A new list is published every six months.

Additional back-up information is attached.

Analysis for SB 427

The Department of Revenue is in favor of repeal of sections AS 45.50.330-45.50.460. In the last five years the department has had only one request for information pertaining to these statutes. It is important to note that Alaska is the only state in the Union that continues to have such a law on its books.

Position Paper

SB 427

February 28, 1984

This bill will repeal AS 45.50.330-45.50.460, which requires persons holding certain pooled copyrights on musical works to file lists of these copyrights with the State.

The Department of Administration believes that AS 45.50.330-45.50.460 should be repealed and, therefore, favors passage of this legislation.

We feel that the statute is unnecessary and of no significant benefit. In the past eight months only one person has inquired about filing information. We anticipate no staff reduction due to passage since it is one of the minor miscellaneous duties of a secretary.

Re: Senate Bill No. 427
(Our File No. 1221/01249)

Dear Mr. Chairman:

I am writing for myself and on behalf of our client, Broadcast Music, Inc. ("BMI"), to advise that we support the passage of SB 427, which would repeal Alaska's pooled-music copyright law (AS 45.50.330 - 45.50.460). This law, which was passed in 1939, has become badly outdated as circumstances have changed and the federal copyright statutes have been comprehensively rewritten in the 45 years since then.

The Alaska law applies to societies or organizations like BMI and ASCAP, which are formed by owners of the copyrights to copyrighted musical works to license the public performance of those works on behalf of the copyright owners. Such organizations then collect royalties from the public performances and distribute them back to the copyright owners.

Essentially, the Alaska law requires each such organization to file each year a list of all the copyrighted musical compositions that it licenses. The purpose of these filings is to allow the public to "avoid using the copyrighted compositions, if they so desire, and [to] avoid conflict with them, and avoid committing innocent infringements of the works." AS 45.50.360. In fact, however, no one ever examines these filings any more. In 1983 not one person examined the files at

the Department of Revenue or the duplicate files at the Department of Administration.

Repeal of the state law would not make the information unavailable to the Alaskan public. Federal copyright laws require the same information to be filed with the Copyright Office, and copies of the lists of copyrighted materials may be purchased from the federal Superintendent of Documents. A new list is published every six months.

A further reason for repealing the Alaska law is the great change in conditions from those in 1939. At that time there was only one organization licensing the performance of copyrighted music, and its dominant position allowed abuses that prompted Florida, Montana, Nebraska, Tennessee, Wyoming and Washing, as well as Alaska, to enact remedial legislation in the late 1930s. Since that time other licensing organizations have been formed, so that there is more competition and less opportunity for monopolistic abuse. Moreover, the two largest organizations, ASCAP and BMI, operate under direct supervision of the federal courts, pursuant to their respective consent decrees that were entered in federal antitrust litigation against them.

In 1976 Congress passed a comprehensive revision of the federal copyright statute, effective January 1, 1978. This legislation replaced the dual system of copyright laws, one federal and the other by the states, and created a unified federal system instead. This complete federal system eliminates the need for state laws to "fill in the gaps" that had been left in prior federal copyright law. Congress not only eliminated the need for state copyright laws with the enactment of its comprehensive federal system, but it also eliminated the state laws themselves by exercising its preemption power (see. 17 U.S.C. § 301) under the Supremacy Clause of the United States Consitution.

As the result of these changes, the states that enacted legislation in the late 1930s to remedy the then-prevailing abuses with music copyrights have repealed their statutes, except for Alaska. It it time for us to recognize these changes as our sister states have done.

Finally, it is not easy or cheap to prepare these filings with the State. Each report by ASCAP, for example, takes up about half of a full-sized drawer in a filing cabinet. By the same token, it is not cheap for the State to keep these voluminous files. Yet the continued presence of these laws on the books requires both the filers and the Departments of Revenue and Administration to suffer these needless expenses.

Had I been personally aware of this situation when I was still Commissioner of Revenue, I would have advocated repealing these statutes as a prime example of wasteful, pointless paperwork imposed by state government on the public. It is our understanding from the officials in the State of Washington that they have been pleased by the repeal of that state's pooled-music law in 1982 and by being relieved from keeping the massive files required under that law. I believe the Departments of Revenue and Administration would likewise wish to be spared the time, expense and space that are needed for their files under Alaska's law.

The biggest problem with a bill like SB 427 is that there is no large constituency to support it. Clearly, the public is indifferent to whether these filings continue or not, since no one ever looks at them. There is only a small handful of organizations that are subjected to the burden of filing. Without a constituency to support such a bill, the easiest course is simply not to advance it out of committee.

I respectfully urge you not to let the bill die, but to hold a hearing on it before your committee. If possible, please schedule such a hearing in the near future so that, if you are satisfied that these statutes are no longer necessary to protect and promote the interests of the public, there will still be time for the bill to have a realistic chance of passage during this Session.

Please do not hesitate to call me at 276-4557 or to write me at the address above, if you have any questions on this subject or if you decide to hold a hearing on the bill. I can arrange for testimony before the committee on behalf of BMI if there is to be a hearing.

Very truly yours,

BOGLE & GATES

Ms. Gladys Williamson
Department of Administration
Pouch "C"
Juneau, Alaska 99811

Re: American Society of Composers, Authors and Publishers
Our File No. 3300.10

Dear Ms. Williamson:

This letter is written with reference to our recent telephone conversations regarding the documents and other materials filed each year on behalf of the American Society of Composers, Authors and Publishers (ASCAP). Under requirements of AS 45.50.330-.460, the original of the filing is delivered to the Department of Revenue and a duplicate copy is filed with the Commissioner of Administration for public review.

It is my understanding that apparently there has been little, if any, public review of these documents since the law was enacted. The Alaska statute had been based on the Washington state law, which was repealed this year apparently because nobody had made use of the public review provision. Accordingly, it may be appropriate to consider possibly seeking repeal of the Alaska statute for the same reason, thus cutting down on the paperwork and archival requirements of the State. Any such repeal effort, however, would not be undertaken until the 1984 legislative session.

In the meantime, and in order to help ascertain whether in fact any use is being made of the documents on file for public review, it would be appreciated if you would attach to the documents in your office a sign-up/tally sheet similar to the enclosed sample. It would merely have any person reviewing the documents note this fact and the date of his or her review so that early in 1984 a compilation of that

information could be provided to the Legislature to support the repeal effort.

Thank you in advance for your assistance in this matter. If you have any questions, please let me know.

Very truly yours,

ELY, GUESS & RUDD

JUNEAU BAR ASSOCIATION

February 22, 1984

Senator Bill Ray
Chairman, Senate Judiciary Committee
Alaska State Legislature
Pouch V(MS 3100)
Juneau, Alaska 99811

Re: Senate Bill No. 453, "An Act relating to the Commission on Judicial Conduct; and providing for an effective date."

Dear Senator Ray:

The Juneau Bar Association has been asked to comment upon Senate Bill 453 relating to the Commission on Judicial Conduct currently pending before your Committee. After reviewing this bill and discussing it with other members of the Juneau Bar as well as members of the Commission on Judicial Conduct, we strongly recommend the passage of this legislation. I have asked Mr. Michael M. Holmes to present this letter to your Committee as part of his testimony pertaining to the bill.

Thank you for the opportunity to comment on this legislation.

Very truly yours,

John F. Clough, III
President, Juneau Bar Association

JFC:gp

SENATE BILL 453

AN ACT RELATING TO THE COMMISSION ON JUDICIAL CONDUCT AND PROVIDING FOR AN EFFECTIVE DATE.

Section 1. Changes the name and make-up of the Commission on Judicial Qulifications
Name will be the Commission on Judicial Conduct
3 Judges or Justices
3 members who have practiced law for 10 yrs.
3 public members

Section 2. Provides that the Commission shall inquire into an allegation that a judge, within a period of not more than 6 yrs. before the start of the current term, committed an act that constituted conduct in violation of the Code of Judicial Conduct.

Section 3. Substitutes AS 44.62.310 (d), relating to Agency meetings public, for AS 44.62.310 (c) (2) ****(SEE ACCOMPANYING STATUTES)

Section 4. Provides that the commission may informally and privately admonish the judge or recommend counseling.

Section 5. Provides that acts of the commission are not valid unless concurred in by a majority of the members serving on the commission at the time the act is taken.

Section 6. New Section.....

(b) Makes all records, files and reports of the commision confidential unless:

(1) Judge, in writing, waives confidentiality;
(2) the subject matter of the hearing has become public; then provices what the commission shall do.
(3) formal charges have been filed;
(4) there is an inquiry by the Alaska Judicial Council, then provides that the Judicial Council shall maintain the confidentiality of the information it receives.

Section 7. New section which provides that the commission may request the judge to submit to a physical or mental examination. If the judge refuses, the fact that he refused may affect the decision on the hearing,adversely.

new

Section 8. Changes the name from Commission on Judicial Qualifications, to Commission on Judicial Conduct.

Section 9. July 1, 1984 effective date.

Quoted in Ketchikan Retail Liquor Dealers Ass'n v. State, ABC Bd., Sup. Ct. Op. No. 1963 (File No. 3697), 602 P.2d 434 (1979).

Stated in Kingery v. Chapple, Sup. Ct. Op. No. 858 (File No. 1554), 504 P.2d 831 (1972).

Article 6. Agency Meetings Public.

Section

310. Agency meetings public
312. State policy regarding meetings

Sec. 44.62.310. Agency meetings public. (a) All meetings of a legislative body, of a board of regents, or of an administrative body, board, commission, committee, subcommittee, authority, council, agency, or other organization, including subordinate units of the above groups, of the state or any of its political subdivisions, including but not limited to municipalities, boroughs, school boards, and all other boards, agencies, assemblies, councils, departments, divisions, bureaus, commissions or organizations, advisory or otherwise, of the state or local government supported in whole or in part by public money or authorized to spend public money, are open to the public except as otherwise provided by this section. Except when voice votes are authorized, the vote shall be conducted in such a manner that the public may know the vote of each person entitled to vote. This section does not apply to any votes required to be taken to organize the afore-mentioned bodies.

(b) If excepted subjects are to be discussed at a meeting, the meeting must first be convened as a public meeting and the question of holding an executive session to discuss matters that come within the exceptions contained in (c) of this section shall be determined by a majority vote of the body. No subjects may be considered at the executive session except those mentioned in the motion calling for the executive session unless auxiliary to the main question. No action may be taken at the executive session.

(c) The following excepted subjects may be discussed in an executive session:

(1) matters, the immediate knowledge of which would clearly have an adverse effect upon the finances of the government unit;

(2) subjects that tend to prejudice the reputation and character of any person, provided the person may request a public discussion;

(3) matters which by law, municipal charter, or ordinance are required to be confidential.

(d) This section does not apply to

(1) judicial or quasi-judicial bodies when holding a meeting solely to make a decision in an adjudicatory proceeding;

(e) Reasonable public notice shall be given for all meetings required to be open under this section.

(f) Action taken contrary to this section is void. (§ 1 art VI (ch 1) ch 143 SLA 1959; am § 1 ch 48 SLA 1966; am § 1 ch 78 SLA 1968; am § 1 ch 7 SLA 1969; am §§ 1, 2 ch 98 SLA 1972; am § 2 ch 100 SLA 1972; am § 1 ch 189 SLA 1976)

Effect of amendment. — The 1976 amendment added the second and third sentences of subsection (a).

A meeting of the board of governors of the Alaska Bar Association in Hawaii in 1978 was not subject to the requirements of this section. Horowitz v. Alaska Bar Ass'n, Sup. Ct. Op. No. 2059 (File Nos. 4310, 4311), P.2d (1980).

Am. Jur. 2d reference. — 2 Am. Jur. 2d, Administrative Law, §§ 281, 282.

Sec. 44.62.312. State policy regarding meetings. (a) It is the policy of the state that

(1) the governmental units mentioned in AS 44.62.310(a) exist to aid in the conduct of the people's business;

(2) it is the intent of the law that actions of those units be taken openly and that their deliberations be conducted openly;

(3) the people of this state do not yield their sovereignty to the agencies which serve them;

(4) the people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know;

(5) the people's right to remain informed shall be protected so that they may retain control over the instruments they have created.

(b) AS 44.62.310(c)(1) shall be construed narrowly in order to effectuate the policy stated in (a) of this section and avoid unnecessary executive sessions. (§ 3 ch 98 SLA 1972)

Revisor's note. — AS 44.62.312(a) is based on Cal. Gov't C.A., sec. 54950.

504

(DID NOT PASS WITH BILL)

D R A F T

Letter of Intent

The Judiciary Committee has considered and heard testimony regarding SB 504, an act relating to unauthorized access to or use of computer and telecommunications services. The version of the bill approved by the committee provides that a person may be prosecuted for theft of services if the person obtains cable, subscription, or pay TV services, known to be available only for compensation, by deception or other means to avoid payment for the services. AS 11.46.200(a)(1).

Section 2 of the bill, however, provides that a person may not be prosecuted for theft of cable, subscription, or pay TV services if the service was obtained through the use of a device designed to receive electromagnetic signals directly from a satellite, commonly referred to as a "home earth station". This means that, under state law, a person who owns a home earth station (now or in the future) may watch whatever signals the earth station will pick up - including signals broadcast by cable or pay TV distributors. The bill would not affect the application of any federal laws which may regulate this behavior.

With the exception of services obtained through a home earth station, the bill makes it a crime (theft) for a person to view, without payment of a fee, cable or pay TV services which are known to be available only for compensation. The bill does <u>not</u> prohibit the possession or use of any electronic device, except the use of a "descrambler", (whose only function is to descramble signals which have been scrambled to prevent unauthorized receipt or viewing). For example, a person may use an antenna in the 2 GHz range to listen to amateur radio transmissions, or to listen to broadcasts from a space shuttle. But the use of the same antenna to receive programming services broadcast by Multivisions in Anchorage <u>would</u> constitute theft of services if the person lives in an area where Multivisions service was available through the payment of a fee.

MultiVisions

Re: Proposed Anti-Theft Legislation

Dear Clark:

Per your request, I have reviewed a proposed work draft of a bill dealing with theft of telecommunications services. My comments on this draft are as follows:

1. The proposed addition of AS 11.46.200(c) would be extremely detrimental to any theft of service program. This subsection would allow, as a defense to prosecution the fact that a telecommunications provider (for whatever lawful reason) might choose not to sell to particular groups or individuals. For example, many premium movie services such as HBO prohibit exhibition of their programming in certain areas such as public viewing areas. Companies such as MultiVisions (MVL) are therefore precluded from selling HBO in some situations. As I read the bill, a person could demand HBO service from MVL, be refused and then be insulated from prosecution if he intercepted our signal.

   Similarly, 11.46.200 c (1) (B) seems to say that any non-commercial use of intercepted programming is permissable. This is, of course, totally unacceptable. Copyright laws, our contracts with program suppliers and, in some cases, FCC requirements prohibit companies such as MVL from allowing unauthorized interception of signals for <u>any</u> purpose.

2. 11.46.200 (c) (2) would exempt from prosecution all "pirate" microwave antennas such as those used to steal Visions programming in Anchorage. Under present state law and federal law, <u>any</u> unauthorized interception of microwave or other telecommunication signals is illegal. Interception of signals that are delivered in any part by wire or cable is also in violation of federal wiretap statutes. The proposed wording of AS 11.46.200 would be contrary to all of this present legislation.

4792 Business Park Blvd.
Anchorage, Alaska 99503
907/562-2400

3. The proposed new AS 11.46.482 (a)(3) would make sale of pirate microwave antennas Class C felony. I agree with this approach and believe ACTA should support this provision.

4. Section 7 of the proposed bill would clarify the definition of "services" for purposes of theft of services statutes to specifically include CATV and microwave communications. This clarification is well drafted and should be adopted.

Apparently, the reason for the proposed language discussed in 1 and 2 above is a desire to avoid interference with "home earth station" users in rural areas who cannot otherwise access satellite programming. Two comments are in order. First, there is no doubt under present law that many satellite signals can be lawfully received by home earth stations. Second, in the case of copyrighted material such as Home Box Office (HBO), nothing in the proposed state legislation can avoid the fact that unauthorized reception of such material is unlawful under federal law. As a practical matter, no cable operator or MDS or STV system is going to harass earth station users outside of their service areas. In fact, by trying to legitimize theft of copyrighted programming, the proposed bill may encourage HBO and other suppliers to take action against such individuals.

The proposed bill as presently drafted is unacceptable and would be a setback for theft of service efforts in Alaska. ACTA should work with the Administration to obtain legislation clearly prohibiting theft of service in all forms. It should be relatively easy to protect legitimate home earth station users and I would be happy, on behalf of ACTA, to meet with the appropriate people in the Administration to discuss this matter and to assist in preparing a revised draft. Please feel free to contact my office with any questions on the above.

Sincerely,

Theodore D. Berns

NCTA BOARD OF DIRECTORS' MEETING

THE MADISON HOTEL
WASHINGTON, D.C.
SEPTEMBER 22-23, 1983

THEFT OF CABLE SERVICE

Theft of service has become a major problem for the cable industry. NCTA estimates that as much as $400 million in revenues were lost to cable pirates in 1982. In New York City alone, it believes that some 5,000 illegal hookups are depriving Manhattan Cable of $1 million per year.

As theft of cable service has increased, cable operators have become more aggressive in trying to root out the problem. Cox Cable has conducted a massive public relations campaign to curb cable theft in San Diego. Cox has also employed New York's theft of service statute to prosecute several individuals for unauthorized reception of Cox's service. Cablevision in New Jersey and ARTEC in Virginia have utilized their respective states' theft of service statutes to prosecute cable pirates. Storer Cable relied upon Florida's theft of service statute to gain damages and an injunction against an individual who was selling and installing equipment that was being used to receive Storer's cable service at net cost.

Finally, Manhattan Cable recently brought a federal lawsuit against 27 individuals and 3 taverns who were illegally receiving Manhattan Cable's services. In addition to relying upon New York's theft of service law, Manhattan Cable claims that the defendants violated Section 605 of the Communications Act and the federal wiretap law.

The cable industry's efforts in this area have been hampered by the fact that the law has not kept pace with the theft of service problem. This report will examine the existing federal and state theft of service laws, the weaknesses of those laws, and the steps that are being taken to correct them.

Federal Laws

There are primarily two federal laws governing unauthorized reception of communications -- Section 605 of the Communications Act and the federal wiretap statute. Section 605 outlaws unauthorized interception of radio communications which are not intended for reception by the general public. Private parties can enforce this provision by bringing a civil damage suit against the intercepter. Section 2511 of the wiretap law prohibits interception of any wire or oral communications. Moreover, Section 2512 criminalize the manufacture, possession, distribution or advertising of equipment or

devices that are primarily useful for the surreptitious interception of wire or oral communications. Finally, Section 2520 of the statute authorizes parties whose communications have been intercepted to sue for damages.

These two statutes, however, may be of limited use in combating theft of cable service. For example, although cable service is not intended for reception by the general public, it is questionable whether cable services are "radio communications" for the purpose of Section 605. Although it can be argued that cable should fall within Section 605, there is no case law on the issue.1/ The wiretap law is inadequate because it does not cover the interception of visual communications, such as video or text.2/

To correct these deficiencies in existing law, the Senate included theft of service language in S.66. Section 610(a) of that bill outlaws unauthorized reception of broadband (cable) services. A cable operator could rely on this provision in a civil damage action against a cable pirate. Additionally, Section 610(b) of the bill states that cable services are "wire communications" for the purposes of the wiretap statute. This change, of course, would subject pirates to civil and criminal liability under that law. Equally important, the Senate proposal would permit cable operators to use Section 2512 of the wiretap statute to reach those who manufacture, possess, distribute and advertise unauthorized converters, decoders and similar equipment.

S.66 having passed the Senate, the House Telecommunications Subcommittee is currently drafting cable deregulation legislation. NCTA has been assured that the draft bill will contain comprehensive language concerning theft of cable service, but the Association has not yet seen any specific proposals. Cox Cable is working on an equally comprehensive theft of service legislative proposal that could be tacked on to cable deregulation legislation or introduced as a separate bill.

1/ Courts have ruled that Section 605 applies to theft of MDS and STV signals. Those over-the-air radio offerings, however, clearly fall within the class of "radio communications" protected by Section 605.

2/ Also, although the statute refers to "wire communications," it only applies where the wire is provided by a common carrier which cable, of course, is not.

State Laws

Although all fifty states have theft of service laws, state statutes have not always been effective against cable pirates. Only 28 states, for example, have specifically outlawed theft of cable service. As a result, cable operators in other states face the troublesome task of seeking relief under statutes which outlaw theft of "telecommunications" or "public utility" services. Further, many state theft laws make intent to steal an essential element of the offense, thus encumbering the cable operator with difficult problems of proof. Many of those laws also do not reach the possession, sale or distribution of equipment that can be used to steal cable service. Finally, most state theft laws prescribe criminal penalties which can only be enforced by the state attorney general.

Fortunately, many states are moving to correct these defects in their theft of service laws. In the past two years, for example, six states have enacted specific cable theft of service laws 3/. Additionally, many states are amending the mechanics of their theft of service statutes to make it easier for a cable operator to protect his services from unauthorized reception. New York, for example, recently enacted theft of cable service legislation which (1) prohibits the manufacture, possession, or distribution of any equipment with the knowledge that it will or could be used to steal cable service; (2) states that the possession, distribution, or manufacture of equipment that can be used to steal cable service without written consent of the cable operator shall be prima facie evidence of intent to steal service; and (3) authorizes cable operators to bring civil actions to enforce the statute. Seventeen other states have recently considered bills that would provide similar protections to cable operators.

NCTA has compiled a handbook of the various state theft of service laws. The Association is also drafting a model theft of cable service law for use by state cable associations.

INTRODUCTION

Theft of cable services has been an ever increasing problem to the cable industry. No cable system is without it. The more program channels the cable system adds to its service, the more desirable the product becomes. Cable TV has now become something that people understand. The public has become more sophisticated in how cable works and how to get it without paying for it. Everyone knows at least one other person who pirates cable TV signals in one form or another. From unauthorized connections to tampered or illegal converters, the problem is growing.

The NCTA has estimated that the cable industry is losing 700 million dollars annually to an estimated 6.75 million illegal users. There will always be cable theft, but there is something that can be done to reduce it. It starts with legislation, tougher cable theft laws, and a willingness on the part of cable management to use the tools at its disposal to crack down on cable piracy.

The following report outlines the steps that can be taken to reduce/eliminate theft of service, including a review of California Penal Code Section 593d and its effect on one system.

THE PROBLEM OF ONE CABLE TV SYSTEM:

- PROFILE
  - -- 370;000 Homes Passed
  - -- 225,000 Basic Subscribers
  - -- 12.3% Unauthorized Hookups = 45,000
  - -- Estimated 30,000 Tampered Decoders

- EQUIPMENT
  - -- Basic Oak T-35
  - -- Pay Oak MC-35 (HBO/Showtime/Galavision)
    Oak TC-35/56 (Playboy/Cinemax)

- SYSTEM REVENUE LOSS

-- 45,000 x $19.37 x 12	$10,460,000
-- 30,000 x $ 8.00 x 12	2,880,000
TOTAL	$13,340,000

THE PROBLEM, NATIONWIDE - 1983

- 30,000,000 Basic Subscribers
- 12.3% Unauthorized Hookups = 3,690,000
- 5% Estimated Tampered/Defeated Decoders = 1,500,000
- Nationwide Revenue Lost:

-- 3,690,000 x $17.00 x 12	$752,760,000
-- 1,500,000 x $ 8.00 x 12	144,000,000
TOTAL	$896,760,000

RECOGNITION OF THE THEFT OF SERVICE PROBLEM:

Before any cable system can begin to tackle a theft of service problem, there first must be an acceptance by management that the problem exists to an extent that something must be done about it. Generally, management has a tendency to down play the extent of service theft because of other "higher priorities." System maintenance, customer service, installation and marketing programs are part of the cable system's day to day operation. At some time in the system's growth, there comes a realization that the penetration of services is not meeting the budget objectives. When revenue is effected, it may be time to analyze the extent of cable piracy, its causes and effect on the system. The data on the preceding page shows that service theft is a monumental problem for all cable systems.

ANALYSIS OF THE PROBLEM:

In order to calculate the extent of cable piracy in the system, some measurements must be taken. Sample street or tap audits will have to be performed. Converter security should be investigated by doing random converter exchanges and inspections. The random samples should be large enough and reflect a cross section of the system's demographics. Once this data has been compiled and applied to the homes passed figures, a theft of service profile can be developed and a dollar revenue loss can be calculated.

PLAN DEVELOPMENT:

After service theft losses have been calculated, the system can assign the proper priority to a plan designed to reduce theft and recover revenue losses. In order to develop an effective plan, the system needs to identify the causes of service theft and their effect on the system. A long-range plan should be implemented that will both fix the problem internally and develop a theft of service campaign that ideally seeks voluntary compliance by the cable system's homes passed base before legal action is taken.

SYSTEM SECURITY:

Before any external theft of service campaign can be developed, a thorough internal program must be implemented to eliminate the cable system's own contribution to cable theft. This includes:

-- Investigations into employee theft, with resulting terminations, prosecution and restitution.

-- Pre-employment screenings and background checks on new employees.

-- Procedures cleaned up to close loopholes in inventory control, field control, returned boxes, etc.

-- Cable drop/tap security, particularly in multi-unit complexes and high churn areas.

-- Improve decoder/converter security thereby reducing tampering.

-- Consolidation and synchronization of converter tracking data bases.

-- Improvement of installation/disconnect control procedures.

-- Cable drop relabeling and identification procedures, particularly in multi-unit complexes.

-- Where economically feasible, change decoders or traps to addressable products.

In addition, a system security/audit program should be established to police the system and uncover theft of service situations or conditions that contribute to it. Before a cable system looks toward implementing any external theft of service campaign, it must have made major inroads toward eliminating its internal contribution to the service theft problem.

REVIEW OF THE CABLE THEFT LAW:

In 1982, the California Legislature passed an amendment to PC 593d that provides for significant criminal and civil penalties for those who manufacture, sell, distribute or use illegal cable equipment. The law became effective on January 1, 1983 and now provides every California cable system with the tools necessary to recapture lost revenue. Violators can receive jail sentences of up to one year and fines that total $25,000 for the most serious violations. (See attached copy of Amended Penal Code Section 593d.)

GAINING LAW ENFORCEMENT/COMMUNITY SUPPORT:

As a corporate citizen in the communities that we do business, cable systems have the right to seek protection under the umbrella of the law and should do so. In order to obtain real protection, the cable system will have to enlist support from the community authorities. The most effective method to gain support is to make a presentation of the system's theft of service problems to the community's highest ranking officials. Ask for their support and for protection under the law. Suggest forming a task force with high ranking law enforcement officers to develop a plan to attack the problem. Be sure to outline the steps the system has already taken to reduce service theft situations internally. Offer to assign key system employees to do much of the leg work of the task force to keep community time and costs at a minimum.

The results of the cable theft task force meetings should be the formation of the steps, procedures, stages and responsibilities that each party will perform in the plan to crack down on cable piracy. It should be determined what and how evidence of cable theft should be obtained and what form the complaint should take. Agreement on the timing of each phase of the plan should be established.

CAMPAIGN OBJECTIVES:

The primary objectives of a theft of service campaign should be to eliminate service theft through voluntary compliance and the recovery of lost revenue through the purchase of cable services from those involved in service theft.

To accomplish these objectives, the public must be made aware of the intent of the cable system to crack down on signal theft by prosecution of violators. Cable pirates must be given an opportunity to avoid prosecution and to save face. A "no questions asked" form of amnesty should be offered for violators who voluntarily comply with the cable system's offer to resolve the theft of service situations through either a converter exchange program or billing for those who do not have a service account.

The cable system's sales force should be used to man some type of converter exchange booth on the company's property. Most of the cable pirates will be receptive to subscribing to additional services at the time of voluntary compliance, providing the atmosphere is of a positive nature.

PUBLIC NOTICE:

As previously mentioned, the public must be made aware of the rules of the game and the consequences of not complying. A public awareness campaign must be launched to reach as many people as possible. The first step in this phase should be an open letter to subscribers outlining the extent of the service theft problem, the effect it is having on honest subscribers who, in effect, are subsidizing neighbors who have chosen not to pay. The letter should announce the launching of the theft of service campaign and the cable system's intentions to get tough with violators.

The campaign launch date should begin with a press conference. The local media, as well as community officials, should be invited. A prepared statement should be available that tells the extent of cable theft, both locally and nationally. It should explain the losses the cable system is experiencing, the effect on the honest subscriber and the franchise tax losses to the community. Attempt to have the District Attorney or some other top law enforcement official make a statement to the press on his or her support of the campaign and their intent to enforce the cable theft law by prosecuting violators.

A local ad campaign should immediately follow the press conference using as much newspaper print, radio and TV spots as is feasible. The more publicity from the campaign, the better the results will be.

PUBLIC IMAGE/ATTITUDE:

Plan ahead for the resulting coverage by the news media. Some inquiries will be positive, while some may be negative. Avoid having the cable system obtain the image as being the "bad guy" using scare tactics to get the "little guy."

Over the years, the public has developed the attitude that cable theft is a minor unenforceable infraction. They think of it as a challenge to beat the system; nobody wants to pay for TV. The campaign should be designed to change the public attitude. The theme should take the stand that cable signal theft is "no laughing

matter." It is theft, a crime just like shoplifting. Those who are stealing cable services are not only ripping off the cable system, but even more so--the general public. A business can absorb theft by adjusting prices, but in the end, it is the general public who ends up being the victim.

Public attitude is generally against big business, big government and public utilities. The support is not there for a cable system to make more money by making the "little guy" pay. The news media is aware of this and will seek the opportunity to do an investigative report showing the cable system to be the "bad guy." If the cable system is not careful, a negative image could develop from the campaign.

Public relations should be the guiding force in a campaign of this type. The public attitude must be changed and be developed into supporting the effort of the cable system to eliminate cable theft. Cable theft has reached the point that it no longer can be ignored. If the cable system is stunted, if it can no longer grow to its full potential, then who is the loser? Everyone is the loser.

APPENDIX - COX CABLE RESULTS

RESULTS THROUGH 7/15/83

- 9,900 DECODERS TURNED IN SINCE 2/21/83
- 3,200 ILLEGAL DECODERS DISCARDED (EST.)
- 6,100 ADDITIONAL SERVICES PURCHASED (62%)
- 1,300,000 RECOVERED TO DATE
  - -- 3,200 x $19.37 x 12 $ 743,000
  - -- 6,100 x $ 8.00 x 12 586,000

  TOTAL $1,329,000
- 45 WARRANTS SERVED ON ILLEGAL HOOK-UPS
  - -- 18 CASES IN COURT AS OF 7/15/83

    - o 3 YEAR PROBATION
    - o FINGERPRINTS ON FILE

Senate Bill No. 1505

CHAPTER 1342

An act to amend Section 593d of the Penal Code, relating to unauthorized cable television connections.

[Approved by Governor September 23, 1982. Filed with Secretary of State September 24, 1982.]

LEGISLATIVE COUNSEL'S DIGEST

SB 1505, Montoya. Unauthorized cable television connection.

Existing law provides that every person who knowingly and willfully makes unauthorized connections, whether physically, electrically, or inductively or attaches any unauthorized device or devices to any cable, wire or other component of a franchise cable television system or to a television set for the purpose of intercepting any program carried by a franchised cable television system is guilty of a misdemeanor punishable by a fine not exceeding $200 or imprisonment in the county jail not exceeding 30 days.

This bill would extend such prohibition to the making or maintaining of any modification or alteration to any device installed with the authorization of a franchised or otherwise duly licensed cable television system, for the purpose of intercepting or receiving any program or other service carried by the system. A violation of the provision would constitute a misdemeanor punishable by a fine not exceeding $1,000 or by imprisonment in the county jail not exceeding 90 days or both. Each connection or attachment would constitute a separate violation.

The bill would also do all of the following:

(1) Prohibit every person who, without authorization, knowingly and willfully manufactures, imports into the state, distributes, sells, offers to sell, possesses for sale, or advertises for sale any device, or plan or kit for a device, or printed circuit, designed to decode, descramble or otherwise make intelligible any encoded, scrambled or other nonstandard signal carried by that cable television system. It would make a violation a misdemeanor punishable by a fine not exceeding $10,000 or by imprisonment in the county jail, or both. A second or subsequent conviction would be punishable by a fine not exceeding $20,000 or by imprisonment in the county jail for up to one year, or both.

(2) Permit any franchise cable television system to bring an action against the person who committed the violation for specified damages.

(3) Permit a franchise or otherwise duly licensed cable television system to bring an action to enjoin and restrain specified violations.

(4) Provide that it is not a necessary prerequisite to such actions that the plaintiff suffer, or be threatened with, actual damages.

3723-100 Reprinted 10-15-82 1,600

Article XIII B of the California Constitution and Sections 2231 and 2234 of the Revenue and Taxation Code require the state to reimburse local agencies and school districts for certain costs mandated by the state. Other provisions require the Department of Finance to review statutes disclaiming these costs and provide, in certain cases, for making claims to the State Board of Control for reimbursement.

However, this bill would provide that no appropriation is made and no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 593d of the Penal Code is amended to read:

593d. (a) Every person who knowingly and willfully makes or maintains an unauthorized connection or connections, whether physically, electrically, or inductively, or purchases, possesses, attaches or maintains the attachment of any unauthorized device or devices to any cable, wire or other component of a franchised or otherwise duly licensed cable television system or to a television cable or set, or makes or maintains any modification or alteration to any device installed with the authorization of a franchised or otherwise duly licensed cable television system, for the purpose of intercepting or receiving any program or other service carried by a franchised or otherwise duly licensed cable television system which such person is not authorized by that cable television system to receive, is guilty of a misdemeanor punishable by a fine not exceeding one thousand dollars ($1,000), or by imprisonment in the county jail not exceeding 90 days, or both. For the purposes of this section, each such purchase, possession, connection or attachment shall constitute a separate violation of this section.

(b) Every person who, without the express authorization of a franchised or other duly licensed cable television system, knowingly and willfully manufactures, imports into this state, distributes, sells, offers to sell, possesses for sale, or advertises for sale any device, or any plan or kit for a device or for a printed circuit, designed in whole or in part to decode, descramble or otherwise make intelligible any encoded, scrambled or other nonstandard signal carried by that cable television system, is guilty of a misdemeanor punishable by a fine not exceeding ten thousand dollars ($10,000) or by imprisonment in the county jail, or both. For the purpose of this subdivision, "encoded, scrambled or other nonstandard signal" shall include, without limitation, any type of signal or transmission that is not intended to produce an intelligible program or service without the aid of a decoder, descrambler, filter, trap or some similar device. A second or subsequent conviction is punishable by a fine not exceeding twenty thousand dollars ($20,000) or by imprisonment in the county jail for up to one year, or both.

(c) Any person who violates the provisions of this section shall be

liable to the franchised or otherwise duly licensed cable television system for the greater of the following amounts:

(1) Five thousand dollars ($5,000).

(2) Three times the amount of actual damages, if any, sustained by the plaintiff, plus reasonable attorney's fees.

(d) Any franchised or otherwise duly licensed cable television system may, in accordance with the provisions of Chapter 3 (commencing with Section 525) of Title 7 of Part 2 of the Code of Civil Procedure, bring an action to enjoin and restrain any violation of this section, and may in the same action seek damages as provided in subdivision (c).

(e) It is not a necessary prerequisite to an action pursuant to this section that the plaintiff has suffered, or be threatened with, actual damages.

SEC. 2. No appropriation is made and no reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution or Section 2231 or 2234 of the Revenue and Taxation Code because the only costs which may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, changes the definition of a crime or infraction, changes the penalty for a crime or infraction, or eliminates a crime or infraction.

O

SECTION 1. Section 69580 of the Government Code is amended to read:

69580. In the County of Alameda there shall be 28 judges of the superior court.

SEC. 2. The sum of one hundred eighty thousand dollars ($180,000) is hereby appropriated from the General Fund to the State Controller for allocation and disbursement to local agencies pursuant to Section 2231 of the Revenue and Taxation Code to reimburse such agencies for costs incurred by them pursuant to this act.

CHAPTER 974

An act to add Section 593d to the Penal Code, relating to cable television.

[Approved by Governor September 22, 1975. Filed with Secretary of State September 23, 1975.]

The people of the State of California do enact as follows:

SECTION 1. Section 593d is added to the Penal Code, to read:

593d. Every person who knowingly and willfully makes unauthorized connections, whether physically, electrically, or inductively, or attaches any unauthorized device or devices to any cable, wire or other component of a franchised cable television system or to a television set, for the purpose of intercepting any program carried by a franchised cable television system which such person is not authorized to receive, is guilty of a misdemeanor punishable by fine not exceeding two hundred dollars ($200) or by imprisonment in the county jail not exceeding 30 days.

SEC. 2. Notwithstanding Section 2231 of the Revenue and Taxation Code, there shall be no reimbursement pursuant to this section nor shall there be any appropriation made by this act because the Legislature recognizes that during any legislative session a variety of changes to laws relating to crimes and infractions may cause both increased and decreased costs to local government entities and school districts which, in the aggregate, do not result in significant identifiable cost changes.

CHAPTER 975

An act to amend Section 4305 of, and to repeal Chapter 4 (commencing with Section 4501) of Division 2 of, the Public Utilities Code, relating to transportation.

EXECUTIVE SECRETARY
BILLY G. BERRIER

March 1, 1984

Senator Bill Ray, Chairman
Alaska Legislative Council
Pouch V, State Capitol
Juneau, Alaska 99811

RE: (1) a bill relating to principal and income of trusts; (HB 693/SB 511)
(2) a bill relating to administration of decedents' estates; (HB 694/SB 512)
(3) a bill relating to renunciation of of rights in decedents' estates; (HB 695/SB 513)
(4) a bill relating to married persons' rights in a family home; and (HB 696/SB 514)
(5) a bill relating to the uniform disposition of certain property rights at death (HB 697/SB 515)

Dear Senator Ray:

Pursuant to AS 24.20, the Alaska Code Revision Commission has prepared the enclosed bills and respectfully asks that they be introduced in the legislature.

They are technical bills the commission has been working on with the probate committee of the Alaska Bar Association. They relate generally to rights at death and to property arrangements that usually have their inception in death.

At its last meeting, the Legislative Council agreed to introduce the bills.

One of the bills, the bill on disposition of certain property rights at death, was previously in the legislature but received little notice. It is revived at the request of the probate committee of the Alaska Bar Association, and that

committee has advised the commission that it will actively support the bill.

A commentary on each bill is enclosed.

Very truly yours,

John W. Abbott

ALASKA CODE REVISION COMMISSION COMMENTARY TO ACCOMPANY BILL ON RENUNCIATION OF RIGHTS IN DECEDENTS' ESTATES

This bill deals with refusal to accept property or an interest in property from a decedent's estate. Referred to as "renunciation" or "disclaimer", it is a valuable option for estate planning to avoid a taxable transfer.

The right to renounce is provided for in AS 13.11.295 (Section 2-801 of the Uniform Probate Code). This bill would make three changes to facilitate estate planning:

(1) The right to renounce would survive the death of the person having it;

(2) The permissible disclaimer period would be extended from six to nine months after a death; and

(3) Accepting one interest in property would not prevent renouncing another interest in the same property.

The concept of the changes proposed by this bill is in the Uniform Disclaimer of Transfers by Will, Intestacy or Appointment Act (1978). Because Alaska has already adopted the Uniform Probate Code contained in AS 13, minimal changes to AS 13.11.295 will give Alaska the main benefits of the uniform disclaimer statute. The bill does not extend beyond disclaimer of transfers resulting from death. Disclaimer of other kinds of transfers could be the subject of another bill.

The changes in (b) extend the time for renunciation to the nine months period in which renunciation is permitted under the Internal Revenue Code, 26 U.S.C., Sec. 2518. The current version of the Uniform Probate Code recommends that states conform their laws to the nine month period. Failure to do so may deny to Alaskans the full period the federal law permits for taking advantage of a tax planning tool.

Sometimes an heir with a right to disclaim will die within this nine month period. For example, an elderly husband and wife may not outlive each other by nine months. In that situation, a disclaimer would avoid an extra taxable transfer before property is inherited by their children. The changes in (a) would allow a personal representative (executor of the estate

of the second to die) to exercise the right of disclaimer. However, the period for disclaimer would not be extended: the personal representative of the second to die would have ot act within nine months of the first death.

The changes in (d) would permit disclaiming one interest in property without forfeiting the right to accept another interest in the same property. Under federal Internal Revenue law, it is possible for a beneficiary to refuse to accept an income interest in property while accepting transfer of the principal asset, or to refuse a transfer of a principal asset while accepting an income interest in the asset. The change in (d) would delete language that infers that the acceptance of any interest in property would totally bar a renunciation of any other interest in the same property.

AS 13.11.295(f) is deleted as obsolete law. A similar section is not needed as temporary law in this bill because the changes in AS 13.11.295 liberalize renunciation, do not restrict it.

Analysis

March 13, 1984

SB 513

This bill was requested by the Code Revision Commission to amend the Uniform Probate Code to provide that:

(1) the right to renounce would survive the death of the person having it;

(2) the permissible disclaimer period would be extended from six to nine months after a death; and

(3) accepting one interest in property would not prevent renouncing another interest in the same property.

Renunciation of rights in decedents' estates is a valuable option for estate planning to avoid the taxable transfer of estates. Because this measure deals only with an individual's right to renounce an estate interest, it will not have a fiscal impact on state government operations.

Fiscal Note
Analysis
HB 696

March 13, 1984

This bill was requested by the Code Revision Commission to remove certain anachronisms and would repeal certain statutory provisions that cause uncertainty in titles to Alaska real property. The protections afforded a widow by the right of dower are now afforded by various options under the Uniform Probate Code, as are the protections afforded a widower under the related "curtesy" right. This bill would repeal some of the protections once afforded a married person under common law dower and curtesy. Because the bill only deals with private property rights, it will not have a fiscal impact on state government operations.

ALASKA CODE REVISION COMMISSION COMMENTARY TO ACCOMPANY BILL RELATING TO MARRIED PERSONS' RIGHTS IN A FAMILY HOME

This bill would remove certain anachronisms and would repeal certain statutory provisions that cause uncertainty in titles to Alaska real property. The principal provisions to be repealed are AS 34.15.010(b), (c) and (d), subsections that deal with conveyances of "the family home or homestead".

The other two sections to be repealed by the bill deal with dower, a common law concept that has not been recognized in Alaska in its pure form since 1900 (Bechtol v. Bechtol, 2 Alaska 397 (1905)). Its altered, statutory form was removed from Alaska law in 1963 (sec. 30, ch. 38, SLA 1963). The protections once afforded a widow by the right of dower are now afforded by various options under the Uniform Probate Code adopted in Alaska in 1972, as are the protections afforded a widower under the related "curtesy" right. The official comment to the Uniform Probate Code includes:

> "The provisions of this Code replace the common law concepts of dower and curtesy and their statutory counterparts."

The main subjects of this bill, AS 34.15.010(b), (c) and (d), are subsections enacted over a period of time, apparently in a patchwork effort to approach some of the protections once afforded a married person under common law dower and curtesy.

Common law dower was a life estate given a widow in one-third of the lands her husband owned at any time during the marriage. Her husband could not transfer away her right. But Alaska's statutory dower only applied to real property owned by the husband at the husband's death. Common law curtesy was similar to dower but was a right given a husband in lands of his wife. In its statutory form (sec. 482, Compiled Laws of Alaska 1913, since repealed) it applied only to lands owned by the wife at the wife's death.

To compensate for the lesser protection afforded in the statutory forms of dower and curtesy, the legislature required the signature of both spouses on every deed to "a family home or homestead" (ch. 107, SLA 1933; now AS 34.15.010(b)).

Unless both spouses' names appear on the title

documents, a purchaser down the chain of title usually will have no way of knowing whether a precedessor was married and usually will have no way of knowing whether real property was a married couple's "home or homestead". Therefore, the 1953 legislature (ch. 145, SLA 1953) engrafted further provisions on the statute in an effort to clear titles clouded by what now is AS 34.15.010(b).

The confused and contradictory state of these subsections of AS 34.15.010 can best be shown by setting them out in full:

> (b) In a deed or conveyance of the family home or homestead by a married man or a married woman, the husband and wife shall join in the deed or conveyance.
>
> (c) The requirement that a spouse of a married person join in a deed or conveyance of the family home or homestead does not create a proprietary right, title or interest in the spouse not otherwise vested in the spouse.
>
> (d) Failure of the spouse to join in the deed or conveyance does not affect the validity of the deed or conveyance, unless the spouse appears on the title. The deed or conveyance is sufficient in law to convey the legal title to the premises described in it from the grantor to the grantee when the deed or conveyance is otherwise sufficient, and (1) no suit is filed in a court of record in the judicial district in which the land is located within one year from the date of recording of the deed or conveyance by the spouse who failed to join in the deed or conveyance to have the deed or conveyance set aside, altered, changed, or reformed, or (2) the spouse whose interest in the property is affected does not file, within one year in the office of the recorder for the recording district where the property is situated, a notice of his interest in the property.

Inconsistencies in the subsections make them extremely difficult to interpret. All that is clear is that there are title problems whenever only one person is record owner of real property, and that person conveys an interest in the property by a document that does not show whether he or she is a single person. At best, the title is clouded during the year of limbo provided under AS 34.15.010(c) and (d).

By proposing this bill, the code revision commission is suggesting (1) that any worthwhile purpose there may be in retaining AS 34.15.010(b), (c) and (d) in the law is far outweighed by the uncertainty in land titles the subsections cause, and (2) that the options afforded a married person under the Uniform Probate Code provide adequate protection.

AS 09.45.480(a)(1) relates to determining value of an "estate in dower". AS 09.45.720 relates to "actions to recover possession by a tenant in dower". The sections should be repealed because the dower right no longer exists in Alaska, as noted above.

Alaska Code Revision Commission

DATE: April 30, 1984

RE: SB 514 on married persons' rights in a family home (identical to HB 696)

As you know SB 514 which passed the Senate and was referred to House Judiciary today is an identical bill to HB 696 which was passed out of the House Judiciary Committee on April 4, 1984. I trust it can go through House Judiciary promptly (or that the referral can be waived).

SB 514 passed the Senate with no dissenting vote. However, I thought there should be more background on the bill in the hands of Senator Fritz Pettyjohn who was scheduled to carry the bill on the floor, so I prepared a memorandum on the policy reasoning that went into the bill. It is enclosed.

Also enclosed is a miniature summary of the bill in case you would like to have it in hand when the bill comes up in the House.

Attachments: 1. Miniature summary
2. Memorandum to Sen. Pettyjohn dated 4/27/84

HB 514 ON

MARRIED PERSONS' RIGHTS IN A FAMILY HOME

Alaska's statutory form of dower, the right of a widow to use real property owned by her husband at the time of his death, was removed from state law in 1963. Compensating rights are in our Uniform Probate Code.

This bill repeals procedural sections that are based on the dower right that no longer exists in Alaska law.

One of the repealers concerns the names of husband and wife on conveyances. Repeal is desirable because (1) the remedy for failure to comply with the statute is based upon the dower right and therefore is obsolete and unusable; and (2) the section creates clouds on title to property that it was never intended to affect.

RE: SB 514 on married persons' rights in a family home

I see SB 514 is scheduled for second reading in the Senate today.

House and Senate Joint Journal Supplement No. 21, dated March 1, 1984, explains the bill. A copy is attached.

In Senate HESS Senator Josephson raised some questions about repeal of AS 34.15.010(b), (c) and (d). I leave to your discretion whether, after reading this further discussion of the bill, you wish to pass a copy on to Senator Josephson. Perhaps it would answer his questions.

SB 514 was developed by the code revision commission with representatives of the bar's probate committee. It originated with a request from the Attorney General's representative on the commission.

The journal supplement explains the background of the bill. Here I set out more on the pro and con practical questions that come up in deciding whether AS 34.15.010(b), (c) and (d) should be repealed. In committee hearings we pointed out that repeal of AS 34.15.010(b), (c) and (d) involves a policy choice. In the Judiciary Committee the legal flaws in (b), (c) and (d) were discussed, but we did not dwell on policy. This, therefore, can supplement that discussion.

The subsections cause clouds on title to vacant land, business property and residential property that has never been the home of the owner or the owner's spouse. They cause clouds on title transferred by persons who have never been married but neglect to provide on their deeds that they are single persons.

The problem is that the documents in the recorder's office don't show much. A property description on a conveyance looks the same whether property is an ancestral home or a gas station.

Title to most family homes of married persons has been transferred to them as tenants by the entirety. Their names appear on the conveyance. AS 34.15.010(b), (c) and (d) have no meaning for tenants by the entirety. Whether or not (b), (c) and (d) are repealed, when persons are named in the conveyance by which they receive title, the same persons will have to sign any document that transfers an interest in the property (a deed, mortgage, lease, option, etc.).

AS 34.15.010(b), (c) and (d) must be read together. In spite of confusing language, it is clear that a spouse who did not join in a conveyance of the family home is given apparent remedies in (d) that must be employed within one year after the conveyance. No one the code revision commission could locate had seen anyone even try to use the remedies since dower was removed from Alaska law in 1963. The commission believes there is no longer a legal basis for either of the remedies in (d). Since dower and curtesy rights no longer exist in Alaska, we know of no clear interest that could be claimed in a suit filed under (d)(1) or that could be claimed in an affidavit under (d)(2).

Even though the remedies in (d) probably have no life as remedies, they do have a continuing effect: Title companies will not certify clear title during the year in which there is a remote possibility that a conveyance could be defeated under (d).

The result is that financing or resale of property is delayed or stopped when only one name is on a conveyance as grantor, unless the conveyance shows on its face that the grantor is a single person. (The term "grantor" is used here to include the person who is selling, mortgaging, lease, contracting to sell, or giving an option or any other interest in real property.)

Because the title company's report will list an exception to clear title, the parties involved must find the original grantor to get a corrected conveyance showing on its face that the grantor is single, or, if the grantor is married, getting the other spouse included in the conveyance.

There may be times when the statute causes second thoughts by the grantor and when it has a desirable effect of permitting each spouse to stop a transaction that affects the family home. This, even though the legal remedies in the statute are obsolete and unworkable.

Most of the time, though, when the statute comes into play it is only an impediment to legitimate transactions. It can defeat a transaction because of the delay it causes, or it can block development of land that has been purchased because the original grantor cannot be located or is reluctant to sign more papers to correct title defects. It can be used as a basis for harassment when husband and wife are feuding or separated and the property involved has never been a family home. And it can be an annoyance in the relatively common situation where one party to a marriage owns a home before the marriage, and the parties wish the marriage to have no effect on that ownership.

On balance, the code revision commission saw many reasons for repealing the subsections and few for retaining them, especially since the remedy for violation of the subsections is now no more than a fiction.

ANALYSIS

I. Assumptions:

Enactment of Senate Bill No. 539 would expand authority for requiring persons guilty of crimes to perform community work, and would standardize the upper and lower limits of hours of community work to which a defendant could be sentenced according to the classification of the offense. The bill also specifies that the work be performed for and under the supervision of the State, a political subdividion of the State, or a non-profit organization.

It is assumed that enactment of this bill would:

A. Increase the number of persons required to perform community work over that which now exists;

B. Require effort by either the Department of Law or the Department of Corrections to develop/coordinate community work programs; and

C. Increase the time-accounting activities required as a result of increased number of participants.

Therefore, it is assumed that there will be incremental costs generated as a result of this legislation, if passed.

II. Program Summary:

With the information available at this time, it is not possible to predict the extent of fiscal impact on the Department of Corrections. Community Counselors may be required to work with political subdivisions or non-profit organizations to develop and/or expand meaningful work projects. Depending on the time during the sentence of an incarcerated person, additional supervision may be necessary to accomplish the community work program. An adequate record keeping system must be kept to assure that all hours required for community work are performed (recording of hours worked; running balance of hours of work remaining, etc.).

It is the considered opinion of the Department of Corrections that it will take a year of tracking to measure the fiscal impact of this bill. There will be a fiscal impact, but the magnitude cannot be estimated at this time.

III Economic Impact:

Enactment of this bill would not have any significant impact on the State's economy.

IV. Impact on Local Governments:

Enactment of this bill may have a slight impact on local governmental units supervising community work programs, but this impact should be offset by the product of the work program.

Juneau, Alaska 99811

POSITION PAPER
Senate Bill No. 539

"An Act relating to community work as a part of a criminal sentence."

Senate Bill No. 539 would expand authority for the community work program for sentenced offenders and establish the minimum/maximum numbers of hours a defendant could be sentenced to community work in the various classes of criminal offenses.

The general public would benefit as a result of the performance of the community work projects at little or no cost. It could also result in a slight reduction in the number of inmate days of care when performance of community work is done in lieu of incarceration.

The Department of Corrections agrees in concept with this proposed legislation and supports its passage.

The Honorable Thomas E. Schulz
Presiding Judge
First Judicial District
415 Main St.
Ketchikan, AK 99901

Re: Community Work Service Guidelines

Dear Judge Schulz:

I want to thank you for your time when I was in Ketchikan on February 16. Our discussion on the community work service program renewed my hope that some of the problems we are experiencing can be rectified and that this program will achieve its full potential as an alternative disposition for offenders. I apologize for not getting back to you earlier on this matter, however, with the Legislature in session it seems as though some of my normal responsibilities get relegated to the back burner.

As you are aware, the Pretrial Services Section of the Criminal Division, Department of Law is responsible for the placement and monitoring of offenders in community work service. As an adjunct to employment of community work service for diverted offenders, we contracted with the Adult Corrections Agency to provide a similar service for sentenced felons. At the time we entered into this agreement, we sought a consolidation of work under this program in order to promote uniformity in its application. As we undertook to perform these contracted duties, we likewise decided to offer our services to the district courts for sentenced misdemeanants. As we were under no duty to offer this service, it became our lowest priority, and we would undertake it to the extent of our available resources. We believed that this would offer a greater range of constructive alternatives to the courts at sentencing while, likewise continuing the uniform standards that are necessary to an efficient and successful program. Until recently we have been very satisfied with the cooperation between the community work service staff and the judiciary, and we feel that, at least in the First Judicial District, the program

is working well. However, as of lately, we are beginning to experience some difficulties, particularly with the service offered to District Court. I am disinclined to discontinue this service, however, unless the problems are rectified, I will find it necessary to do so. As you suggested, I have reviewed the problems we are experiencing, and offer the following standards for your consideration. I feel if these standards are utilized throughout the First Judicial District, the community work service program will continue to be an efficient and successful alternative program.

The nature of the problems we are encountering is wide. District court judges are ordering the performance of community work service in lieu of the payment of fines. While not an objectionable practice, obvious abuses are coming to light. For example, performance of a single hour of community work service in lieu of a $10 fine amounts to a significant waste of my staff's time, not to mention the difficulty I have in believing that an offender didn't have $10, and had no prospects of procuring $10 within the foreseeable future.

It is becoming evident that the inquiry and examination of offenders sentenced to pay fines under AS 12.55.035 is not being conducted. Routinely, offenders are ordered to pay fines and immediately upon denial of the ability to pay the fine, they are given community work service in lieu thereof. AS 12.55.035(d) provides a procedure whereby the court can permit an offender to pay a fine over a period of time. Awareness and employment of this provision would vest some integrity in AS 12.55.035, and foreclose obvious abuses. Additionally, I believe the court has the inherent power to bring an offender who is "unable" to pay a fine back before it and have that offender voluntarily execute an assignment of a permanent fund dividend to satisfy an outstanding fine. Finally, on this issue, I believe that it is implicit in the Court of Appeals decision in Brezenoff v. State, 658 P.2d 1359 (Alaska 1983) that the court needs to fully explore an offender's claimed inability to pay before it makes that determination.

Another problematic area is the failure of the courts to follow through on those individuals who fail to perform community work service. While it may be somewhat inconvenient for some judges to do so, the fact that an

offender has ignored the court's judgment to perform community work service should not be dismissed. Time and again, my staff has attempted to put some teeth into the court's orders by unfavorably terminating offenders who fail to perform community work service. To our knowledge, in Ketchikan, nothing ever happens to these offenders (In Sitka and Juneau, Orders to Show Cause are issued, and offenders are held to answer for failure to comply). Rather, offenders in Ketchikan are either rereferred for community work service or the court merely dismisses the judgements without satisfaction. Needless to say, in smaller communities such as Ketchikan, word of the court's disinclination to back up its judgments becomes common knowledge within the community and operates to destroy the effectiveness of programs such as community work service.

Consistent with your request, I have discussed the operation of the community work service here in Southeast with my staff. We offer for your consideration the following minimum standards which need to be met to ensure a successful program:

1. Minimum Number of Hours. Considering there is a certain amount of time which we must invest in each referral for screening, placement and monitoring functions, as well as paperwork for each referral which we require of placement agencies, it is not cost-effective to work with any offender who has less than eight hours of community work service to perform.

2. Community Work Service in Lieu of Fines. C.W.S. should not be allowed as an alternative to a fine except (a) when a thorough examination of the offender is made to ascertain the inability to pay the fine; (b) the offender is unlikely to be able to pay the fine in the future under AS 12.55.-035(d); and (c) there is a substantial reason why the offender is unable to assign his permanent fund dividend to satisfy the fine. Only if this procedure is followed will community work service in lieu of fines be a legitimate alternative. Once an offender is found to be unable to satisfy a fine and community work service is ordered, the offender should not be permitted to "buy" his way out of Community Work Service by suddenly

"finding" sufficient funds to satisfy the fine. Realistically, if a thorough examination of the offender occurs before ordering performance of community work service in lieu of a fine, then this should not be a problem. It is problematic in terms of monitoring offenders to have them change from community work service to payment of the fine, especially when my staff is rarely notified of this occurrence.

3. Time Limits. When an offender is ordered to perform community work service, a time limit in which the work must be performed should be set. This reinforces in the offender the connection between community work service and the offense. Usually for misdemeanants or violators, a time period of three months, is sufficient although an extension of that period under legitimate circumstances should be allowed. For most minor offenders who rarely receive more that fifty hours, this amounts to one day per week for no more than half the thirteen week period. It is quite inconceivable that an offender cannot schedule that type of available time. And, as I preciously stated, when the offender does have other legitimate activities which preclude performance within this period, adjustments in the time period can be arranged.

4. Unfavorable Terminations and Enforcement of the Court's Order. The major problem administering this program occurs with offenders who fail to perform. On numerous occasions, offenders ordered to perform community work service either fail to ever appear, or having appeared and been placed, fail to follow through. For example, a recent placement in Ketchikan was so unreliable and unsatisfactory in his performance that the referral agency has discontinued using Community Work Service offenders.

This type of offender is regularly terminated from the program with the cases being referred back to the court for further action. In Juneau and Sitka, these unfavorable terminations result in the offender being brought back before the court;

and additional consequences normally ensue. This is generally in the form of either jail time or additional community work service hours for contempt of court. In Ketchikan, there are generally no additional consequences, and the offender is rereferred to my staff for another chance. This type of offender is not any more responsive than previously. There has even been a case brought to my attention wherein the court just vacated its previous sentence. Needless to say, the credibility and integrity of the program are severely damaged. Absent consequences, especially in a community the size of Ketchikan, our ability to instill responsibility or otherwise motivate the more obdurate offender is strictly limited. Even a "You'll perform, or else" approach won't work when the offender knows the "or else" is meaningless. Only if the "or else" truly results in more severe consequences can this program be successfully and properly administered.

5. Referral of Municipal Cases. Although we generally do not make the distinction between the original source of a case referred for community work service, there is an exception. In that we are constantly in need of referral agencies which can absorb a large number of offenders and which will provide the greatest benefit to the largest number of people, we have utilized municipal governments for placements. However, there have been a few municipalities that have refused to accept referrals, not out of a lack of need for additional help, but only because they disagree with State policy regarding sharing any financial liability that may result from placement of these offenders. As a result of this position, we have likewise assumed the policy of not accepting cases involving municipal offenses in these communities. In the First Judicial District, only Ketchikan is affected by this policy, therefore we do not accept Ketchikan municipal cases.

6. Uniformity. In administering this program statewide, I have noted a large disparity in the ordering of community work service. In your role as head of the sentencing guidelines committee, I

know you'll understand the offensiveness of disuniformity in sentencing practices. While this issue is not a "bottom line," it is one that needs to be addressed, and I would welcome any suggestions you might offer in seeing that some consistency occurs in ordering community work service.

The first problem in this area concerns the number of hours of community work service ordered as a reflection of the severity of the offense. I am enclosing a copy of the standards we employ within the diversion program when requiring community work service, as well as a copy of legislation I worked on a number of years ago on the same subject. If these numbers are agreeable to you, perhaps their implementation here would be the first step in instituting uniform guidelines for community work service.

The second area of concern involves the rate of exchange when an offender performs community work service in lieu of a fine. In Fairbanks, Anchorage, Juneau and Sitka, conversion is at the rate of $5.00 per hour. In Ketchikan, the rate is $10.00 per hour. The biggest anomaly occurs in Saxman, where community work service is performed at a rate of $10.00 per hour, with our major referral agency being the City of Saxman. That municipality allows other residents to work off utility debts, performing the same work as the community work service referrals, but at a rate of $7.00 per hour. Needless to say, this creates some problems.

I'm not sure of the resolution to these problems, but any assistance you can offer would be appreciated.

In conclusion, I again want to thank you for your time and your efforts. Imposition of these standards throughout the First Judicial District will ensure a legitimate community work service program.

Sincerely,

NORMAN C. GORSUCH

MEMORANDUM
LEAGUE OF WOMEN VOTERS OF ALASKA

TO: House Judiciary Committee DATE: May 20, 1983

FROM: Paula Ziegler, President, League of Women Voters of Alaska

SUBJECT: SJR 1

The League of Women Voters of Alaska is appreciative of the House Judiciary committee's hearing SJR 1. The League strongly supports passage of this resolution.

The Equal Rights Amendment will provide a constitutional guarantee of equal protection under the law to women and men. This means that any protection extended to one sex under the law must be extended to both sexes. The basic principle is that gender should not be a factor in determining the legal rights and responsibilities of people.

The economic facts are indisputable:

* 43% of the American work force is comprised of women.
* Women earn only 59¢ for every $1.00 earned by men.
* Women work for the same reason as men: economic necessity.
* 66% of all women work at low-paying, traditionally "female" jobs.
* 33% of all female-headed families live in poverty.

The Equal Rights Amendment will not automatically erase the centuries of discriminatory attitudes and practices that have kept women economically dependent, nor will it automatically make jobs and opportunities available. But it will provide the constitutional foundation and public mandate necessary to the effective enforcement of laws already on the books as well as to future legislation addressing economic equity for women.

Reports from states with equal rights amendments (such as Alaska) refute the claims of opponents that dire things will come to pass with ERA. The terrible perils of coed bathrooms, rampant homosexual marriages, massive family instability and interference in the privacy of family relationships have simply not materialized.

We are all proud of the Alaskan tradition of individualism and opportunity. Remembering that "individuals" means men and women, help maintain opportunity for both by passing SJR 1.

Thank you.

Paula Ziegler

Testimony on SJR #1 and HJR #6 May 20, 1983

I urge you to oppose the passage of SJR #1 and HJR #6 relating to the proposal by Congress of an Equal Rights Amendment.

Do you know that sex discrimination is already constitutional prohibited? Discrimination is a matter of enforcement, not a lack of laws.

Do you know that negative effects have resulted from the State ERA? It has disrupted families and recently a study showed that women develop a housewife depression sydrome because feminists have told them they are deprived!

Do we want more loss of freedom for state's rights? ERA would take away the law making function of the State and give the Supreme Court the power to interpret and decide on this issue. After 100 years, the Supreme Court is still finding meanings in the 14th Amendment never imagined by its drafters.

Is this as simple as it appears?

Alice Bergdoll

Sue Miller, President
Eagle Forum
Juneau Douglas Chapter

Testimony, May 20th, House Judidiary

We are opposed to SJR#1 because it will send an inaccurate message to Congress.

You may not have received all of the messages from across the state opposing SJR 1 because many of the people thought you were considering HJR #6 today, which is the identical resolution as SJR 1 without the traditional family statement. Therefore, I ask you to consider the opposition to HJR#6 as the same as to SJR#1.

What we all object to is the wrong message you would be giving Congress. Even though lines 1 and 2 of page 2 state "Whereas adoption of this resolution does not minimize the state's support of and belief in traditional family values.", the whole resolution would negate this statement as experience has already nullified that statement.

<u>There is no way, you can have ERA without affecting the traditional family.</u>

In the Senate House Judiciary, many of us gave testimony showing negative effects from the State ERA, all of which affected the values of the traditional family, whether so=stated or not. Our testimony also made a lie out of lines 17-24, page 1 of this resolution. For example:

We gave testimony which proved that rather than enhancing the ability of all citizens to achieve their full potential, it hindered the ability of many to achieve that potential. (lines 17-19)

We gave testimony that proved negative results of the state ERA that affect us today to such an extent that there are now seven organizations in the State that we know of and many individuals fighting this resolution and the reintroduction of this subject into Congress.(lines 20-22)

We gave testimony that proved not only has the 1972 amendment created difficulties but it has also created discrimination and harassment of women by women. (lines 21-24)

On the attached page you will find a partial listing of some of the negative results we testified to in the senate.

One Senator stated that because his wife and children hadn't suffered any negative effects, therefore there were none. Naturally, if a family holds feminist views, they will not feel any negative effects. Being married, with children at home, does not automatically make your family traditional. It is your convictions and lifetstyle that count.

We also have many single, divorced, widowed and elderly people who hold our views - they are the views of our great Judeo-Christian heritage for which we are fighting.

Kindly consider all the messages you have heard against HJR#6 and SJR #1 and reject this resolution since it does not send a true picture of the feelings of the people of Alaska to Washington

Partial Listing of Negative Results

(a) Break-up of homes from counseling, by tax-payer funded counseling groups, dedicated to anti-/traditional family views.
(b) Creation of a network of tax-payer funded organizations, all dedicated to political advocacy of anti-traditional family views.
(c) Invasion of privacy and religious conviction and on-the-job harassment as in the O'Brien case.
(d) The invasion into education of committees which took out of school textbooks teachings showing traditional men-women roles, religion and patriotism, substituting or leaving in only views which reflect the BBA philosophy.
(e) The creation of the ailment, "housewife syndrone", a major mental health problem documented by Dr. Harold Voth, a prominent psychiatrist and psychoanalyst at the Menninger Foundation in Topeka, Kansas, and Dr. Herbert Freudenberger, co-author of Situational Anxiety.
(f) Taxpayer supported day-care facilities which remove parents farther from their responsibilites and creates an ever growing dependency upon govt. to resolve all needs.
(g) Taxpayer funding of abortions because of their equalization principle, a corner-stone principle of socialism.
(h) Tax-payer funding of family planning services, which interfere between parent and child relationships.
(i) Affirmative action in job-hiring practices, a form of discrimination itself.
(j) Attempts to reduce womens(preferential car insurance rates.
(k) Advocacy for homosexual/lesbian activities, trying to call these preferences rights.
(l) The insistence in use of unwieldy non-sexist terms as "chairperson", due to their inflexible attitude against terms which mean all mankind.
(m) The extreme expense the State has had to bear to promote the views of one group of women over another.
(n) The pitting of women against women and causing a major division and disruption in society.

Kindly review tertimony given before Senate House Judiciary for testimony of personal negative results.

Lee Miller

My name is Barbara Tyndall. I am a wife and the mother of five children, ges three to thirteen.

I am here today in opposition to Senate Joint Resolution #1, the Equal Rights Amendment. I see no reason for this bill. It's purpose and intent cannot be to protect women in the working world. I have before me over twenty pages of laws and listed agencies that protect women from everything from equal pay for equal work to sexual harrassment on the job. These agencies are both state and federal.

Because of the vague language of the Equal Rights Amendment, many of us fear it could be interpreted to give rights to homosexuals and lesbians, work toward creating a unisex society, and force our daughters into military service. This fear is particularly real to us since many feminist organizations, such as Now, have proclaimed these very things as their goals and desires for the future and look to the Equal Rights Amendment as a tool to acheive these goals.

I have heard many verbal promises that these things will never happen and the Equal Rights Amendment will never be interpreted in this negative way. Will these verbal agreements stand up in court? Will they protect me and my family from the negative aspects of the ERA? No, they will not. I have looked for some qualifying statements to be added to this bill to protect the traditional family from the possible harmful aspects ~~of this bill~~. Senator Bill Bay attempted to alleviate some of these fears and attach an amendment that would guarantee us protection in these areas. The fact that this amendment was all but eliminated has increased my fears even further. Is it possible that "gay" rights, a unisex society and the death of the traditional family are really the goals and purposes behind this bill? I believe they are.

I am tired of this issue. For ten years we have been squabbling as a nation over the Equal Right s Amendment. It has been defeated. Why are we resurrecting it again? It can only hurt and divide us.

Please seriously cast your vote against SJR 1 and see that this bill is defeated in the House. Thank you very much.

Barbara T. Tyndall

Barbara B. Tyndall

Good afternoon ladies and gentlemen. My name is Betsy Swartz. I am speaking on behalf of myself and future generations.

Section 1 of the Equal Rights Amendment states that equality of rights shall not be denied or abridged on account of sex. I think this will be interpreted to mean that what is required of men will also be required of women and what is provided for men will likewise be provided for women. Clearly, we want equal pay for equal work. But ERA will also mean equality in the draft for women including Mother, the loss of protective laws for women such as weight ~~restrictions~~ lifting requirements on the job, not provide, separate toilet and living quarters. I think ERA will actually remove of protective laws + rights that we have today.

On April 15, 1975 Judy Wilson in Pennsylvania denied unemployment compensation + time she refused to apply for a job which required lifting 40 + 150 lbs.

On Wards and Pa. Law under state ERA, whether they have children to care for or not, are legally responsible for family support.

The Dow Jones Times Report has already acknowledged the necessity for more child care centers as women are faced by ERA to work outside the home.

ERA will eliminate a wife's right to draw S.S. on her husband's earnings.

It will be illegal, under ERA, to give lower auto and life insurance rates to women simply because they are women, even tho they statistically have a lower risk factor.

~~It will be illegal to give lower auto and life~~

The crime laws which protect the fabric of our society, such as seduction laws, statutory rape laws and manifest danger laws would not be permitted under ERA

The "separate but equal" doctrine would not be permissible for the male and female, married or not, under ERA. This means public bathrooms in schools for our children, universities, colleges, hospitals, all government subsidized operations. This is already evident in the Alaska Native Claims Act where employee shall bathrooms and stations.

These are all realities admitted by both pro-ERA and anti-ERA proponents. Representative Edith Green, the author and sponsor of Title IX has admitted that it has been used for ridiculous rulings never ~~intended~~ intended by Congress.

The Supreme Court is still finding new meanings in the 14th Amendment, ratified 100 years ago. The implications and possibilities for ERA are staggering and endless.

If you think these concerns are invalid and extreme, I would like to ask you this:

When the abortion amendment was ratified in 1973, do you think the proponents intended that babies would be aborted thru the 9th month of pregnancy; skin, breathing, and crying and left in a bucket to die? Ladies and gentlemen, this is happening today, all across America..

Thank you.

Re: James Goodman adv. United States

Gentlemen:

We are co-counsel with Kay, Christie, Fuld and Saville of Anchorage, Alaska for Dr. James Goodman. We have been asked to respond to a letter dated March 23, 1983 addressed to Senator Pettyjohn from Ms. Sue Ellen Tatter concerning Senate Resolution No. 19. Before responding to Ms. Tatter's letter, we believe it helpful to analyze the issue.

As we understand it, Senate Resolution 19 would, among other matters, commend Goodman for pardon to the President of the United States. We urge adoption of the resolution. Analysis of Ms. Tatter's letter, in light of the issue pending before you, illuminates its predominately irrelevant remarks.

There can be no question but that Goodman was indeed convicted by a jury. There would, of course, be no need for pardon in the absence of such a conviction. Therefore, it is unpersuasive on the question whether to adopt the resolution to suggest that Goodman has been convicted.

However, if the question is whether to commend Goodman for pardon because he did not receive a fair trail, then examination of some of the pretrial and trial events may be of assistance. Ms. Tatter relies heavily in her letter upon the notion that a jury rejected Goodman's defense. Of the men and women chosen for jury service, one individual was Mr. Geczy. Prior to selection as a trial juror, Geczy had been sued by Goodman's trial counsel, Mr. Kalamarides of Anchorage, Alaska. Imagine, if you will, Goodman's consternation when he learned that one of the people who determined his guilt had been a party adverse to Goodman's own lawyer, Kalamarides. How it came to pass that Geczy was permitted to remain on the jury without Goodman's knowledge is quite beside the point. If the jury verdict is advanced as a rationale for opposing Senate Resolution 19, one need only examine the membership of that jury to decide that the verdict is not all that it is made out to be.

Similarly, assuming Geczy had not been a juror, it is not likely that Goodman would have been acquitted in any event. This is so because critical evidence demonstrating billing errors in favor of the Government, as opposed to billing errors in favor of Goodman, were not presented. This failure of proof arose from two dichotomous problems. The dental work subject of dispute was predominately rendered to children. Their mouths change quickly by reason of maturation and dental care by others. Goodman received no notice that the Government intended to seek an indictment against him alleging false claims before the indictment was returned. While the Government was spending thousands and tens of thousands of dollars travelling about the State of Alaska looking for proof that Goodman filed false claims, Goodman continued to render dental care. He did not seek evidence supporting the notion that billing errors had been made in favor of the Government. By the time the indictment was returned, the Government had obtained its evidence and, by and large, it was too late for Goodman to gather his. The children's mouths had, by that time, changed and dental care had been rendered the children by other dentists.

Furthermore, in the post-indictment setting, no significant effort was made by Goodman's defense team to find billing errors in favor of the Government. In fact, it was not until after the jury verdict of guilty was returned and new counsel employed that anyone suggested to Goodman that evidence of billing errors in favor of the Government would have been relevant and material defense evidence in the trial of the case. Having been shown errors exclusively in favor of Goodman, it was doubtful that any could have acquitted Goodman of all counts. Therefore, suggesting that the Government's case was strong and the defendant's case was weak as a rationale for rejecting Senate Resolution 19 misses the mark.

It is indeed true that Goodman dismissed his appeal from the judgment and sentence of the Court. That decision was based on two facts -- economics and emotions. The trial of this case significantly drained Goodman and his family of their economic and emotional stores. The best result which could be achieved on appeal was reversal of the conviction with a remand for new trial. Goodman would then again be in a position of having to pay -- financially and emotionally -- for a second round. In light of the fact that the trial judge granted probation and recommended that his license to practice dentistry not be revoked, we pushed Goodman very hard toward abandoning an emotionally and financially expensive appellate process in favor of an end to Government litigation and a rebuilding of his emotional and financial condition. With great reluctance, he accepted our advice.

Almost immediately, the Government brought its civil action seeking $100,000, or thereabouts, from Goodman. That civil action called into question the same issues raised in the criminal proceeding. The Government had already obtained its facts and was in a position simply to move forward. Goodman would be faced with the obligation of producing the contrary evidence needed to persuade the trier of fact not to impose civil liability. Once again, out of economic and emotional necessity, Goodman accepted our advice to settle. He and his family could not and cannot afford, financially or emotionally, a further war with the Government. The Government apparently has unlimited resources and unlimited time to litigate with one of its citizens. I dare say there isn't

a member of your august body who can financially and emotionally afford a war of attrition with the United States Government. Therefore, the civil case was settled. However, to suggest that settlement of the civil case is somehow relevant to the decision that you must make with respect to Resolution 19 is simply irrelevant. The settlement documents disclose Goodman's continuing denial of wrongdoing and a payment by him to settle litigation. They show nothing else.

Ms. Tatter's letter suggests that, contrary to Goodman's position, the prosecution in this case was not instituted vindictively, in retribution for Goodman's dispute with the Public Health Service. Unfortunately, Goodman's position on this basic issue was not presented to the trial court for resolution by Goodman's defense team before trial. There is, of course, much precedent for the view that the Government may not institute a criminal prosecution out of vindictiveness or retribution. See, for example, United States v. Gallegos-Curiel, 681 F.2d 1164 (9th Cir. 1982). In fact, no significant effort was made during trial to establish the motive of the Public Health Service dentists for testifying as they did in terms of Goodman's dispute with them. We note that Ms. Tatter does not deny in her letter to you that a serious dispute occurred before the investigation began between Goodman and the Public Health Service.

Salted throughout Ms. Tatter's letter is the notion that this was a serious fraud case. The seriousness of white collar offenses is ordinarily measured by the extent of the damage incurred. The amount in controversy with respect to the counts on which Goodman was convicted totalled $1393. Ms. Tatter suggests that with respect to the claims for relief in the civil lawsuit, there was approximately $2600 of overpayments to Goodman. The Government admits to having spent, in costs alone, $28,000. In fact, the Government sought considerably more -- a sum in excess of $40,000 as costs in the criminal case. If one compares the amount in controversy with the amount spent in pursuing the criminal litigation, that is, $30-40,000 for costs, plus the salary of the Public Health Service doctors, FBI agents, and prosecutors, with the amount claimed to have been lost by the Government -- a number between $1500 and $3000, it is not hard to understand Goodman's assertion that the prosecution was undertaken vindictively. Moreover, it is truly difficult to give credence to the assertion that this was a serious fraud case in light of the dollars involved.

Apparently recognizing this problem, Ms. Tatter has suggested that native American children did not receive dental care because of Goodman's false claims. One wonders whether the lack of care arose from Goodman's false claims or from the months of time that Public Health Service dentists were out in the bush looking for another 25 or 50 dollar error in a billing statement. In any event, the children are getting free care now. Without any order of a court, but out of a sense of responsibility to see to it that his innocent errors are corrected, Goodman has, on almost every Friday since his conviction, rendered free dental care to native Americans. We again note that Ms. Tatter ignores this fact in her letter.

We perceive the Government--Goodman litigation, both criminal and civil, as wholly unnecessary. Regardless of one's view of Goodman's intent, the sums involved are literally insignificant in terms of the overall scheme of things. If the Government truly wanted justice, as opposed to Goodman's hide, this dispute would have followed an entirely different scenario. For example, when the Government's investigation showed that Goodman had over-billed the Government, demand could have been made for immediate repayment and a termination of Goodman's Public Health Service contract. In addition, other forms of relief beyond money damages could have been obtained -- the Government could easily have requested that Goodman render free care for a period of time to even the scales of justice a bit.

Instead, the Government has spent more than $250,000 prosecuting a case in which it lost a maximum of $2500. Now, to advance its cause of "justice" to its ultimate conclusion, the Government seeks to deny Goodman a pardon and threatens to seek further relief before the Dental Board in terms of a license revocation. The history of the litigation between Goodman and the Government, along with Ms. Tatter's letter on behalf of the Government,

demonstrate to the reasonable mind that the Government has had enough and more than enough from Goodman, whatever his misdeeds. We urge adoption of the resolution.

Sincerely,

JORDAN GREEN

March 23, 1983

The Honorable Fritz Pettyjohn
The State Senate
Pouch V - State Capitol
Juneau, Alaska 99811

Dear Sir:

In response to your letter to Michael Spaan, United States Attorney, I am outlining the position of this office with respect to proposed Senate Joint Resolution No. 19 concerning Dr. Goodman. Many of the assertions in Senate Resolution No. 19, are not factually correct; they involve assertions of Dr. Goodman which were presented to the trial jury and rejected.

1. Criminal Charges - Summary

Dr. Goodman was indicted for 33 felony counts of presenting false claims to the Public Health Service. Under this charge, the United States is required to prove deliberate fraud for each count. The judge instructed the jury that the government had to prove Goodman intended to defraud. Mistakes, bookkeeping errors or unintentional overbilling were legitimate defenses, as described to the jury by the trial judge.

At trial, Dr. Goodman presented a defense of "mistake" or unintentional error. The jury heard the evidence and convicted him of 22 felony counts. The judge refused to grant Dr. Goodman a new trial. Dr. Goodman voluntarily dismissed his appeal to the Ninth Circuit Court of Appeals prior to any briefing.

2. Evidence at Trial

a. Discovery of the Fraud

The charges for which Dr. Goodman stands convicted involve serious fraud. The Senate resolution alleges the prosecution was initiated because of a "heated discussion" between Dr. Goodman and a Public Health Service dentist. This allegation is false. The charges arose because a

private dentist, Dr. Richard Siry of Wasilla, discovered Dr. Goodman had billed for major procedures in children's mouths which had not been performed when Dr. Siry treated them. Dr. Siry checked the children's mouths against copies of Dr. Goodman's bills. Dr. Siry informed the Public Health Service dentist, Dr. H. Douglas Smole, that the Public Health Service should investigate Dr. Goodman's billing.

Dr. Siry testified at trial that Dr. Goodman's false claims were for major procedures. Dr. Goodman's false claims had a high frequency. Dr. Siry checked for mere transpositions and other clerical[1/] or minor errors. In his opinion, the absent procedures for which Dr. Goodman billed were not the result of "mistakes."

b. The Government's Evidence

Dr. Smole and Dr. Robin Lenaker, another dentist now in private practice, audited the work of Dr. Goodman and three other dentists who contracted for "bush" work. They found a high percentage of serious errors in Dr. Goodman's case and only one or two clerical-type errors per other dentist. They checked for lost fillings or lost teeth.

The government presented testimony of Public Health Service dentists, two private dentists and a government dentist who privately consults for the Dental Health Plan as an auditor. None of these persons exhibited any personal animosity toward Dr. Goodman. In fact, they had never met him. They described only professional concern that a dentist was billing for procedures clearly not performed, such as repeated billings for repeat visits for the same unperformed work, in circumstances which make unintentional mistakes unlikely. In addition, the government

---

1/ "Clerical" errors would be mere transpositions of work done to another side of the mouth, or mis-numbered teeth where restorative work was done on another tooth. In contrast, Dr. Goodman's fraudulent claims included the bill for Lorita Paul, a four year old, whose mouth, including all of her baby teeth, were intact, with no dental work and no fillings, at the time of trial. Dr. Goodman billed for three baby tooth fillings for Lorita Paul. For numerous children, Dr. Goodman billed for stainless steel crowns, an elaborate procedure requiring preparation of the tooth, when the childrens' mouths contained no such crowns nor preparations. In one case, the patient testified that Dr. Goodman did the work after Goodman was indicted, and not when the bill was submitted.

presented slides and X-rays of the children's teeth, so that even a lay person could understand the nature of the false claims. Further, the government's charge of deliberate falsity were supported in some cases by Dr. Goodman's own X-rays and charts. Dr. Goodman, working in an isolated situation in the "bush," where detection was unlikely, billed for major procedures which he did not perform in the mouths of small Native children.

c. Dr. Goodman's Defense and the Government Rebuttal

Dr. Goodman did not testify at trial to any vendetta or "heated discussion" as described in the Senate resolution. He did not dispute at trial that many of his claims were false. He and his expert at trial recognized that many of these procedures were absent. Dr. Goodman and his staff alleged, in certain cases, that these procedures were performed on patients other than the ones named in the bills. In one case, the government introduced evidence to show that the "other patient" did not exist. In another case, the government showed that the "other patient" was in continual court-ordered custody in a state children's home when Dr. Goodman was supposed to have treated her and that Dr. Goodman did not treated her as claimed.

In some cases the defense alleged that the false claims occurred because of Dr. Goodman's frantic office pace or poor bookkeeping. However, as the government pointed out, Dr. Goodman saw many of these patients repeatedly and never corrected his "errors." Nor did he testify to one instance where he made an "error" against his own interest.

Some patients testified personally that they either did not receive any fillings from Dr. Goodman or that Dr. Goodman did the work he billed for after he was indicted for false billing. There was testimony that these were memorable, traumatic procedures, even from Dr. Goodman's own witnesses.

The Senate resolution indicates Dr. Goodman was convicted because of arguably corroded fillings whose age could have been disputed by experts. This is not true. Dr. Goodman presented several experts at trial. He was not convicted of the counts where his experts disputed the Public Health Service opinions. Where he disputed the interpretation of the bills, such as the corroded fillings cases, the jury gave him the benefit of the doubt and did not convict him.

The trial testimony has been described and is available if the Committee is concerned with factual accuracy. I am certain the facts described in the Senate

resolution are not accurate reflections of the testimony under oath at trial.

3. The Sentence

The United States feels that the judge gave a fair sentence. Dr. Goodman was placed on probation and received a fine in lieu of jail time. This fine was punitive. It did not serve to reimburse the government or the defrauded health program.

The children in the villages served by the Public Health Service are entitled by Act of Congress to receive health care from the United States. The Public Health Service dental program has limited funds. There are children in the village who cannot have cavities or absesses treated because the money was used up, partially to pay for Dr. Goodman's false claims.

4. Public Interest

It was important for the United States to bring this case against a public contractor, paid by the taxpayers, for deterrent purposes. The government in Alaska is forced to rely on many professionals who contract with the government. Many of these persons do work in the "bush" where false billing is difficult to detect. It is very expensive for the government to examine every single patient or every single contract performed by a government contractor. In this case, only a dentist could detect the falsities. In fact, the falsities were discovered not by Public Health Service dentists, but by a private dentist who worked on the children's teeth in the village of Mentasta. In such circumstances, the government believes it must occasionally undertake a thorough investigation to root out fraud.

We sincerely hope no legislator takes the position that the government should prosecute crimes that are easy to detect, and let clever professionals escape liability because they possess special knowledge and a special trust relationship with the patient. Violation of the special trust relationship here between patient and dentist makes the fraud especially serious.

Dr. Goodman's case was not easy to prosecute, but it certainly did not involve a disproportionate amount of government expense. It was only one of several other criminal fraud trials I handled in 1982, in addition to many civil and appellate cases. Dr. Goodman's case was one of numerous criminal cases prosecuted by this office: it was not singled out for unusual treatment by this office or the FBI.

The government did bear the cost of transporting all the patients to the trial because Dr. Goodman refused to stipulate concerning what was in the childrens' mouths. Once the children appeared at court, Dr. Goodman's attorney changed his mind in many cases and did not dispute the patient's mouth configurations. The cost of bringing the witnesses was approximately $28,000. The expense was due solely to Dr. Goodman's initial evidentiary position.

5. The Civil Fraud Suit

The federal government sued Dr. Goodman for presenting false claims to a government agency under the Civil Fraud Statute. This is a permissible method of proceeding, approved by our elected representatives in Congress. Its purpose is to make the government whole. The civil concept allows recovery for cases where the burden of proof is less strict than in a criminal case where many rights are given to the accused.

The civil fraud suit involved claims in addition to those presented to the criminal trial jury. Further, in the course of preparing for this civil lawsuit, the Public Health Service dentists are discovering even more false claims made by Dr. Goodman.

Dr. Goodman has, at present counting, submitted false claims for 26 patients totaling approximately $2600 or an average of $100/patient. He treated about 150 Public Health Service patients. Thus, it is likely there are still more false claims that are difficult and expensive to detect.

One of the purposes of the civil fraud statute is to permit recovery where there have been numerous fraudulent claims -- and the likelihood of many more -- but where the fraud is difficult or expensive to detect.

Mr. Spaan believes we would be remiss in our duties to the taxpayers and to the general treasury if we did not pursue all avenues to reimburse the government for false claims and their attendant cost, particularly, the cost of detection. If we pursue collection remedies against those who default on student loans, VA loans or SBA loans, even where the borrower is in difficult circumstances, it is unfair to exempt a wealthy dentist from his statutory duties described by Congress.

The civil suit is in the final stages of settlement negotiations. The government is considering a substantial settlement offer proposed by Dr. Goodman's attorneys. If Dr. Goodman believes the suit is unjust, his proper avenue is in the courts.

We believe it will be prejudicial to both parties to discuss the case more at this point, but the results will become a matter of public record soon.

6. Conclusion

The jury was convinced beyond a reasonable doubt that Dr. Goodman was guilty of 22 counts of intentional fraud. The jury thus did not accept his explanations of "mistake," "professional disagreement" or "bookkeeping errors." Dr. Goodman has elected not to pursue his appeal. Thus any claim of innocence is not supported by the record.

The United States has taken no position on any State Dental Board proceedings. However, if any doubt remains about the fraudulent nature of Dr. Goodman's intent, after the jury verdict, after Dr. Goodman dismissed his appeal and after compromise of the civil suit then perhaps presentation to the Dental Board will resolve any lingering doubts.

The transcript of the criminal trial, as well as all pleadings in both the civil and criminal cases, are a matter of public record and available for you or your Committee to examine. We believe that if the matter is investigated by yourselves or the Dental Board, impartial persons will see, as did the jurors, that indefensible fraud was perpetrated upon the Public Health Service, the American taxpayers and upon the children whom Dr. Goodman was paid for treating.

Thank you for your attention.

Very truly yours,

MICHAEL R. SPAAN

April 4, 1983

Senator Bill Ray
Chairman Senate Judiciary Committee
C/O Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Senator Ray:

I am appalled by Senate Joint Resolution Number 19 which represents a presidential pardon for Dr. Goodman. I am appalled not by the appeal but by what it is based on. Several very important aspects of it are absolutely incorrect! I find it difficult to believe that a legislator could print erroneous information in a document that is to be presented before the state legislature.

First of all, and least of all, the amount of falsified claims totalled $1800.00 not $900.00 as alleged in the resolution. Secondly, no prosecution of these claims was ever initiated until a thorough quality review had been performed on five contract dentists, all working in the TOK area, Dr. Goodman being one of them.

Finally, the reason that an inquiry was performed was that another private contract dentist had noted a discrepancy with work Dr. Goodman had claimed to have performed and alerted the chief of Dental Services of the USPHS, Dr. Smole of this. At that point an investigation ensued which uncovered numerous billings for work never performed that had been paid for by US. tax dollars.

The most abusive portion of this resolution is the part that states that Dr. Smole has or had a personal vendetta against Dr. Goodman. I not only assisted Dr. Smole in the five day assessment in the TOK area that uncovered the discrepencies, but worked along side him for over two years at the Alaska Native Medical Center in Anchorage. He has always dealt fairly with individuals whether they be fellow PHS officers or private contact dentists. Dr. Smole has always adhered to honorable cognitive approaches to all problems requiring reasonable judgments.

I feel, and have told him so, that court action should be pursued for the defamation of character remark made in this resolution as well as other degrading statements made in papers in the last few months.

Delta dentist settles suit with government

BY SHEILA TOOMEY
Daily News reporter

Delta Junction dentist James Goodman, convicted of defrauding the federal government by charging for dental work he didn't do, has settled a civil suit filed against him by the federal government with a $20,751.60 check.

The sum will partially repay the government for the cost of detecting Goodman's fraud, said Assistant U.S. Attorney Sue Ellen Tatter. Tatter originally had sought to recover $87,000 from Goodman to cover the cost of the investigation and trial that led to his arrest and conviction.

The amount of the check, received at the U.S. Attorney's office on Tuesday, was arrived at by Goodman's attorneys through a series of calculations, Tatter said. Neither Goodman nor the government admits any liability in the settlement.

Goodman was convicted by a jury on June 16 of 22 fraudulent billings to the U.S. Public Health Service. The jury acquitted him on 10 similar charges, and one charge was dismissed by the judge during the trial.

In reaching their decision, jurors rejected Goodman's defense that the fraudulent billings were inadvertent and due to sloppy bookkeeping by himself, his wife, Jane, and his staff.

Goodman was sentenced to five years probation and fined $31,500.

The state board that licenses dentists has asked for the transcript of Goodman's trial. The board is expected to discuss at its June meeting whether or not his license to practice in Alaska should be revoked, said Harry Treager, director of the Division of Occupational Licensing.

Tatter said Tuesday's settlement closes the government's case against him and will end a continuing investigation into other billing claims raised against the dentist since the filing of the original charges.

"We could keep investigating more and more of these claims," Tatter said, "but it's very expensive and it ties up the dentists from the Native Health Center."

Goodman treated about 150 Public Health Service patients between 1979 and 1981, according to Tatter. Investigators uncovered 26 patients charged for work not done totaling $2,600 in billings, she said.

The government agreed to settle with Goodman to avoid incurring any further costs and because they think the sum is a reasonable compromise, Tatter said. "We're very glad to get it," she said. "To date the civil case has cost us very little to pursue. It would cost us more to go further."

Goodman said he agreed to settle not because he felt he did anything wrong, but to save his family and friends the ordeal of another trial.

The Goodman prosecution — especially Tatter's decision to file a civil suit after the criminal trial — has angered some people in the Delta Junction area where the dentist lives and practices.

Three hundred people contributed $3,400 at a Feb. 25 pro-Goodman rally to lobby Congress and President Reagan to pardon Goodman. And a local group has written a song picturing Goodman as a victim of overzealous law enforcement.
