small increments of loss rather than to allow individuals to suffer radical shifts in their economic status.[78] Under the doctrine of vicarious liability, society must eventually shoulder the loss incurred by an individual injured by a negligent employee; the loss is reflected in the goods purchased from the employer, and thereby society pays the true cost of the goods.[79] Likewise, victim compensation programs allow the loss suffered by a crime victim to be reflected as a true cost of living in society, either directly, through the imposition of taxes, or indirectly, by the assessment of criminal fines.[80]

III. Controversial Restrictions in the Texas Act

The assumption that loss-spreading is the primary justification of the state's duty to compensate victims of crime raises questions concerning the validity of some of the major restrictions on recovery included in the Texas Act. Certain provisions bear no relation to either the loss-spreading or the state obligation theories. These provisions include the exclusion of victims who live in the same household with the criminal,[81] and the requirement that the victim, regardless of the size of his loss, show that he will suffer financial stress as a result of his injury.[82] These two requirements are particularly important because of the breadth of their application. This Comment, therefore, examines these restrictions in light of the reasons offered for their support and the detrimental effects they may cause.

A. *Financial Stress*

Perhaps the most contentious issue concerning victim compensation legislation today is whether recovery should be contingent upon a showing of financial need or stress. Those in favor of such a requirement claim that fiscal limitations demand a restriction on program outlays because a needs requirement will cut back on the total amount awarded and thereby ensure compensation for the neediest individuals.[83] The proponents of need requirements are invariably the legislators, perhaps because legislators are naturally most sensitive to the potential budgetary ramifications of proposed legislation.[84] Objective commentators and experienced victim compensation program administrators,[85] however, have rarely favored

80. The method of funding adopted by Texas, the imposition of additional fines upon criminal offenders, Tex. Rev. Civ. Stat. Ann. art. 8309—1, § 14(c) (Vernon Supp. 1980), may be seen as a partial recapture by society of the loss suffered as a result of the crimes. In a sense, under the Texas method, society pays the cost of victim compensation in advance.

85. In an opinion survey taken of 20 victim compensation program administrators, only three felt that the victim's need should be a prerequisite in making an award. Brooks, *Crime Compensation Programs: An Opinion Survey of Program Administrators*, 11 Criminology 258, 269-70 (1973).

requirements of financial need or stress; in fact, many ardently oppose such provisions.[86] Nevertheless, approximately half of the states with victim compensation plans use some sort of financial means test.[87] The Texas Act includes a typical provision: "The board shall deny the application if: . . . the claimant will not suffer financial stress as a result of the pecuniary loss arising out of the criminally injurious conduct."[88] The generally accepted reason for the inclusion of such a provision is the anticipated reduction in expenditures.[89] Whether it is reasonable to anticipate a substantial reduction in expenditures is a question that this Comment addresses later in this section, after the general undesirability of financial stress tests is examined.

General Undesirability of a Financial Stress Test. A financial stress test is undesirable for a number of philosophical and practical reasons. The requirement that a claimant show financial need essentially changes the focus of the program from the compensation of crime victims to the provision of welfare.[90] As mentioned earlier, one of the primary goals of a victim compensation program should be to spread effectively the losses resulting from crime related injuries,[91] and this goal can only be achieved by adopting a restitutionary approach that ignores the economic status of the victim. Instead of functioning as a loss-spreading device, an act including a financial stress test serves to reallocate wealth by limiting eligibility for recovery to those who meet a certain standard of need. While compensation programs are admittedly enacted to benefit the general welfare, they should not be transformed into welfare programs because victims of crime are not limited to any one income group.[92] The drafters of the Uniform

CODE art. 26A, § 12(f)(1) (1973 & Supp. 1979); MICH. COMP. LAWS ANN. § 18.361(5) (West Supp. 1967-1979); N.Y. EXEC. LAW § 631.6 (McKinney 1972); TEX. REV. CIV. STAT. ANN. art. 8309—1, § 6(c)(3) (Vernon Supp. 1980); VA. CODE § 19.2-368.13 (Supp. 1979); WIS. STAT. ANN. § 949.06(b) (West Supp. 1979-1980) use financial means tests. ALASKA STAT. § 18.67.080(3)(c) (1974 & Supp. 1979), allows consideration of financial need, but does not require a showing of need.

88. TEX. REV. CIV. STAT. ANN. art. 8309—1, § 6(c)(3) (Vernon Supp. 1980). Financial stress is defined in *id.* § 3(6):

> (6) "Financial stress" means financial hardship experienced by a claimant as a result of pecuniary loss from criminally injurious conduct giving rise to a claim under this Act. A claimant suffers financial stress only if he or she cannot maintain his or her customary level of health, safety, and education for himself or herself and his or her dependents without undue financial hardship. In making its finding, the board shall consider all relevant factors, including:
>
> (A) the number of the claimant's dependents;
>
> (B) the usual living expenses of the claimant and his or her family;
>
> (C) the special needs of the claimant and his or her dependents;
>
> (D) the claimant's income and potential earning capacity; and
>
> (E) the claimant's resources.

Crime Victims Reparations Act recognized the danger of this transformation: "If the test is included, however, a real threat to the integrity of the program is posed because a strict 'needs' requirement will limit benefits of the program to persons already on welfare and thus be merely an exercise in bookkeeping."[93]

In addition to these problems, the financial stress test creates substantial practical difficulties. Instead of focusing on the claimant's injury, the Board will spend a great deal of time investigating the claimant's wealth. The amount of administrative effort directed at the determination of financial need should not be underestimated. The New York Crime Victims Compensation Board consistently reported that the most difficult problem faced was the determination of serious financial hardship.[94] Thus, the financial stress test certainly will substantially increase the time required to process each claim, as well as distract the administrators from other investigatory tasks. Perhaps more importantly, the procedure for determining financial stress is necessarily demeaning.[95] Each applicant will be forced to divulge whatever private financial information the Board considers necessary for its decision.[96] The victim cannot help feeling that he is on trial when he is put in the uncomfortable position of proving he is poor enough to deserve recovery.[97] A California Board official charged with coordinating the determination of need stated:

> [I]t's making the program exceedingly unpopular because the people come in again and again and say because I was frugal, because I saved a dollar, I'm being deprived of my compensation, whereas the man who threw the money away, or the woman who threw it away, is going to get money from you. This story you hear over and over again, and the Board is getting sick of it.[98]

The public sentiment expressed against the programs using a need requirement bears on another issue. One of the recognized benefits of victim compensation programs is the anti-alienating effect on individual victims.[99] Theoretically, state-provided compensation for victims should help dissipate the disillusionment of individuals who, having suffered criminal injuries, suffer additionally through losses of time and income incurred as a result of their attempts to cooperate in prosecution efforts.[100] If victims who innocently suffered are denied compensation because their income level is not low enough, this achievement is likely to go unrealized. In fact, the experience of other states suggests that, if anything, the programs that use a financial stress test increase alienation.[101]

101. The chairman of the New York Board has been quoted as remarking at a confer-

The Fiscal Benefit. Although the detrimental effects of the financial stress requirement are widely recognized, Texas and a large number of other states have included such provisions in their victim compensation statutes. As previously mentioned, the popularity of the stress requirements can be attributed to the legislative perception that such restrictions will result in substantial fiscal savings. On the whole, however, the savings to be achieved from these provisions have been greatly overestimated. First, the administrative costs associated with the financial stress test are perhaps the highest of any one phase of the investigatory procedure.[102] In addition to the time spent analyzing financial data submitted by the claimant, officials will necessarily spend a great deal of time cross-checking this information with employers, banks, and other sources.[103] The Board will have to make an individual judgment in each case, weighing the factors specified in the Act as well as any additional standards it may choose to adopt.[104] Secondly, those individuals who would be excluded by a financial stress test are very likely to be compensated by some collateral source, such as insurance, medicare, or workers' compensation.[105] Thus, to the extent of the collateral compensation, these victims would be precluded from recovery irrespective of the financial stress test.[106] Furthermore, wealthier victims are less likely to be willing to go through the compensation process to recover a relatively small loss.[107]

The combination of the substantial increase in administrative cost and the fact that a large number of those who would be excluded by the financial stress test would also be excluded by other restrictions indicates that the fiscal benefits of the test are not likely to be very large. The New York Board has estimated that the elimination of the stress test from the New York program would result in only an additional $150,000 in overall expenditures, an increase of ten percent.[108]

The decision to adopt or retain a financial stress test involves a comparison of the fiscal benefits of the provision with the potential detrimental effects. Considering the probability that a relatively small increase in costs would result from an abandonment of the test, the victim alienation and the inequitable denials of recovery that will accompany the test should compel the abandonment of the financial stress requirement. The majority

of administrators of existing programs, as well as most commentators, oppose basing victim compensation programs on need and recognize that it is preferable that administrators spend their limited time processing claims instead of prying into innocent victims' private affairs.[109] This Comment, therefore, proposes that the financial stress provision of the Texas Act be deleted.

B. *The Relational Exclusion*

Almost every compensation program in existence contains some type of relational[110] exclusion provision.[111] These provisions establish a class of victims who, regardless of the severity of their need, are denied compensation solely because a statutorily prescribed relationship exists between them and the criminal responsible for their injury. In some states this relationship is defined by degrees of consanguinity.[112] A number of states deny recovery to victims involved in sexual relationships with the criminal,[113] while others limit the exclusion to those victims residing in the same household as the criminal.[114] These three provisions are sometimes combined within a single statute.[115] The Texas Act uses the household exclusion: "The board shall deny the application if . . . the victim resided in the same household as the offender or his or her accomplice."[116] Unfortunately, the Act does not define "household,"[117] nor does it specify whether

109. Texas narrowly missed disqualification for federal subsidization under the 1979 Victims of Crime Act bill, H.R. 957, 96th Cong., 1st Sess. (1979). H.R. 957 is the result of conference committee compromises of the 1977 bill, H.R. 7010, 95th Cong., 1st Sess. (1977). The Senate had proposed an amendment to H.R. 7010 that would exclude from federal subsidization states using means tests.

> The conferees note that Senator Kennedy, one of the managers on the part of the Senate, believes quite strongly that States receiving funds under this Act should not impose financial means tests when determining eligibility. He believes that no innocent victim of a crime should be required to bear the economic burden of a crime, that a uniform standard of eligibility should be used nationwide, that means tests are not only arbitrary but also demeaning, that such tests may have the effect of discouraging claimants from applying for compensation, and that there has been no conclusive showing that such tests are cost effective.

H.R. REP. No. 1762, 95th Cong., 2d Sess. 11 (1978). The conference committee decided not to adopt the Senate amendment, however, reasoning that in light of the relatively small (25%) federal contribution to the state programs, the states should be free to make their own determinations concerning the desirability of a means test. *Id.*

110. The term "relational" is used in this Comment to describe exclusions based on some relationship between the victim and the criminal. These exclusions are sometimes referred to as familial, but this term fails to describe the variety of relationships that may give rise to exclusion.

111. Only California and Delaware do not have relational exclusions.

the exclusion applies only to those residing together at the time of the incident or to those who have resided together at any time in the past.[118] For example, whether the exclusion would apply to a wife assaulted by her husband when the couple had separated one week before the incident is unclear.

The household exclusion may yield a harsh result. The most obvious example occurs in the case of interspousal murder. When a husband murders his wife, the children suddenly find themselves alone, their mother dead and their father in jail. No victims are more innocent nor more deserving of society's aid than such children. Yet because these victims of crime resided with their parents, they are denied funds that the state distributes to others in far less need.[119]

The household exclusion does not contribute to the program's goal of loss-spreading because there is no reason to assume that pecuniary loss suffered as a result of a crime committed by a co-resident should be less severe than a loss accompanying an injury suffered at the hands of a stranger. Commentators, however, generally advance four justifications to support the policy of relational exclusion: (1) prevention of fraud and collusion;[120] (2) prevention of the criminal from benefiting from his crime;[121] (3) limitation of expenditures;[122] and (4) avoidance of grants to victims who are partially responsible for the crime.[123] While these arguments all involve valid considerations, they either are based on assumptions that have proven invalid in light of experience, or focus on problems that can adequately be solved through more equitable alternative methods.

Fraud, Collusion, and Indirect Benefit. The first two arguments in favor of relational exclusions are conceptually linked. Those who favor a relational exclusion fear that the relative or co-resident responsible for the injury will ultimately benefit from his or her act through the compensation allowed the victim. Similarly, when the victim and the offender are acquainted, the proponents of relational exclusions perceive a greater opportunity for fraud and collusion. Little if any merit attaches to either of these arguments, however, especially since the problems of fraud and indirect benefit are adequately prevented by other provisions of the Act.

In the first place, the victim must suffer physical injury in order to be eligible,[124] and then he can recover only for documented pecuniary loss

excludes domestic employees from the household exclusion. MICH. COMP. LAWS ANN. § 18.354(2)(e) (West Supp. 1979).

118. The statutes of other states are generally quite clear as to the time of cohabitation that will cause an exclusion. *See, e.g.*, ALASKA STAT. § 18.67.130(b)(2) (1974 & Supp. 1979) (cohabitation at time of incident).

such as medical expenses.[125] The number of people willing to injure themselves seriously enough to require medical attention in order to defraud the program is likely to be negligible. If an individual wanted to defraud the program by seeking recovery for an accidental injury, he could blame an imaginary stranger instead of a relative.[126]

The Act's requirement for cooperation with the local law enforcement agency,[127] however, most strongly rebuts both the indirect benefit and fraud arguments. In order to be eligible for compensation, a claimant must report the crime within seventy-two hours[128] and fully cooperate with the police.[129] Presumably, this cooperation involves filing a complaint and aiding in all prosecutorial efforts. In order to benefit from his crime, therefore, the criminal would first sacrifice his freedom. Furthermore, the victim's willingness to prosecute should operate to create a rebuttable presumption of a lack of collusion.[130]

Finally, those who cling to the indirect benefit theory can be satisfied by an alternative to relational exclusions that does not result in the exclusion of a large class of innocent and needy victims. The drafters of the Uniform Crime Victims Reparations Act have abandoned the relational exclusion in favor of a more equitable test: "Reparations may not be awarded to a claimant who is the offender or an accomplice of the offender, nor to any claimant if the award would unjustly benefit the offender or accomplice."[131] In addition to the unjust benefit clause, the Uniform Crime Victims Reparations Act includes an optional addendum that creates a presumption of unjust benefit in certain relational situations. This section is to be used or omitted "according to the legislative appraisal of the options involved."[132] Although this addendum could cause a hardship in certain circumstances,[133] it is preferable to the absolute exclusions in common usage, for it gives the Board an option:

> [Unless the Board determines that the interests of justice otherwise require in a particular case, reparations may not be awarded to the spouse of, or a person living in the same household with, the offender or his accomplice or to the parent, child, brother, or sister of the offender or his accomplice.][134]

North Dakota[135] and Ohio[136] have both adopted the Uniform Crime

Victims Reparations Act exclusions, and the head of the North Dakota program has evaluated the provision as valuable and equitable.[137]

Fiscal Considerations and the Participatory Theory. Members of society generally perceive that a high proportion of violent crimes occur in domestic settings.[138] Garnering additional support from the indirect benefit theory, legislators have included relational exclusions with the view that the elimination of this large class of claimants will ease the constraints of a limited budget. Yet the experience of the New York program, which employs a familial exclusion,[139] suggests that such financial benefits have been overestimated. In the first four years of the program, of 3,238 claims filed, 1,380 were denied.[140] Only seventeen of these 1,380 denials were based on the relationship between the offender and the victim.[141]

Nevertheless, the emendation of the household exclusion undeniably would result in an increase in administrative costs, even though the actual increase in claims may be negligible. An increase in administrative costs is likely because it is probable that more administrative time will be spent in examining the possibility of victim participation in an interfamilial crime than in a crime committed by a stranger.[142] In fact, the idea that the victim of an interfamilial crime is usually partially responsible for the crime is a multifarious concept underlying the exclusions.[143] When a wife has been severely beaten by her husband, the police, the courts, and the community too often believe that " 'she must have done something terrible to provoke such a response.' "[144] The public perception of victim participation in interfamilial crimes, however, cannot justify the relational exclusion because the Act already includes a provision for reducing recovery to the extent that the victim precipitated the crime, and every claim will be examined in this light.[145] Although the Board possibly might choose to devote more time to the determination of victim precipitation in interfamilial crimes, precluding a sizeable class of victims from recovery on the mere suspicion

137. Gross, *supra* note 12, at 35. Indiana has responded directly to the inequitable potential of the relational exclusion by limiting exceptions to the exclusion of legal non-spousal dependents of the criminal:

> A person who commits a violent crime upon which an application is based, or an accomplice of that person or a member of the family of that person, is not eligible for assistance under this chapter. However, if the victim is a legal non-spousal dependent of the person who commits a violent crime, compensation may be awarded where justice requires.

that the investigation of their claims will prove more costly than another group of claimants is unjust.

In summary, no valid reason exists for the exclusion of the broad classes of victims affected by the relational exclusion provisions. The fears of fraud and collusion are rendered nugatory by the requirement for cooperation in the apprehension and prosecution of the victim. The possibility of indirect benefit to the criminal is also lessened by the cooperation requirement and may be eliminated completely by the adoption of the Uniform Crime Victims Reparations Act proposal.[146] The fiscal benefits accruing to a program from relational exclusions are minimal, and neither the slight decrease in claims nor the reduction of administrative costs associated with an undocumented perception of victim precipitation justifies the exclusion of a large class of innocent victims.

IV. The Need for Adequate Publicity and Effective Claim Forms

While the need for adequate publicity cannot be termed a legal issue, the extent of public education and information largely determines the effectiveness of any compensation statute. How the public is informed, the ease of access to the application forms, and the nature of the forms themselves can have a substantial impact on the number of claims filed and the amount of administrative effort spent in processing claims.

The experience of the New York program demonstrates the relation between public awareness and the number of victims aided. The New York program was underpublicized; after four years some prosecutors were unaware of its existence.[147] Even today, there is no statutory provision for publicity and, although initially several short-lived media "blitzes" were attempted,[148] the chairman of the compensation board has admitted that the largest number of claims arise from knowledge of the program obtained by word of mouth.[149] In 1969, the third year of the program's operation, only 929 claims were filed.[150] In that same year, New York law enforcement agencies received 40,049 reports of murder, manslaughter, rape, and aggravated assault.[151] Despite the benevolent intent underlying compensation programs, if the victims themselves are not informed of the availability of state compensation, the programs will be "nothing more than public placebos, tranquilizing showpieces aimed at placating the public and protecting the politician, all for a negligible price."[152]

Fortunately, Texas has taken steps to avoid this problem. Sections 10(e) and (f) of the Texas Act provide:

(e) Every hospital licensed under the laws of this state shall display prominently in its emergency room posters giving notification of the existence and general provisions of this Act. The board shall set standards for the location of the display and shall provide posters, application forms, and general information regarding this Act to each hospital and physician licensed to practice in the State of Texas.

(f) Every local law enforcement agency shall inform victims of criminally injurious conduct of the provisions of this Act and provide application forms to victims who desire to seek assistance. The board shall provide application forms and all other documents that local law enforcement agencies may require to comply with this section. The attorney general shall set standards to be followed by local law enforcement agencies for this purpose and may require them to file with him or her a description of the procedures adopted by each agency to comply.

These provisions closely resemble those adopted by California after that state experienced difficulties similar to those of New York.[153]

While the Texas Act is admirable for its inclusion of such a provision, it is crucial that the provisions be vigorously applied. Furthermore, law enforcement agencies must develop an efficient procedure for the dissemination of information. Finally, in addition to the statutorily prescribed publicity, the Board should use mass media to publicize the Act and develop adequate screening procedures to cope with the number of claims generated from such publicity.

Apart from the lesson learned from the New York experience, two other factors demonstrate that publicity requires particular attention. First, although the statute speaks in unequivocal language, directing that "[e]very hospital . . . *shall* display . . . [and] [e]very local law enforcement agency *shall* inform . . . ,"[154] it provides no sanction for noncompliance with these duties. The absence of a statutory sanction requires the close monitoring of the compliance of hospitals and law enforcement agencies. If cooperation is not received, perhaps a penalty for noncompliance should be added to the statute. Secondly, the Act divides the control of publicity between the Board and the attorney general. Although the Board is in charge of providing application forms to the law enforcement agencies,[155] the attorney general is responsible for setting the standards for the distribution of these forms.[156] Since the manner of distribution and procedural organization has a substantial impact on the choice of the claim form,[157] the attorney general and the Board must work closely together to assure a smooth operation. At one time the California program involved the same division of authority.[158] Apparently, the split proved unwieldy in practice,

for California amended its act in 1977 by placing all authority for law enforcement publicity procedures in the hands of the administrative agency in charge of the compensation program.[159]

For the present, the Texas attorney general controls the procedure by which Texas law enforcement agencies distribute information.[160] Since the Act places a duty upon every local law enforcement agency to provide information and application forms to every victim of criminally injurious conduct, the police are essentially the public representatives of the Board, and their efforts are likely to account for the majority of claims filed. The procedures adopted for the distribution of this information will influence the effectiveness of the program, but the limited manpower and budget of law enforcement agencies conflict with the need for widespread distribution of information and applications. Faced with this conflict, California has developed a system for the dissemination of information that promises to be effective as well as efficient, and Texas should consider the adoption of a similar plan. In a memo sent to all local law enforcement agencies, California Attorney General Younger outlined the standard procedure:

> (1) Law enforcement officers are required to provide to victims of [*sic*] their families a sheet describing the victim program and where to obtain application forms. This sheet shall also identify a Victims of Violent Crime Liaison Officer and his telephone number. Every reporting officer shall indicate in his police report the date when potential claimants were provided with the sheet. Alternatively, a law enforcement agency may devise a system whereby potential claimants are notified by mail of the availability of the program and are advised of the name of the Liaison Officer from whom further information may be obtained;
>
> (2) All law enforcement agencies shall appoint a Victims of Violent Crime Liaison Officer. This officer will coordinate closely with the State Board of Control and shall obtain from the Board application forms which are to be disseminated to the interested public;
>
> (3) The program shall be discussed in general agency meetings and new and trainee officers shall be made aware of the program's existence.[161]

The establishment of a liaison officer serves several purposes. The local agency will benefit from this centralization of responsibility because less time will have to be spent on the education of the entire force. The public will benefit because such an officer will become well-versed in the provisions of the Act and, as a result, will be able to respond to specific inquiries with greater accuracy. The Board will benefit because a liaison officer can serve as a watchdog by checking that the information is being distributed in accordance with the statutory mandate.

Although the statutory delegation of publicity duties to law enforcement

agencies establishes an efficient device for information distribution, the police can only inform those who report a crime. Over fifty percent of all personal victimizations go unreported.[162] The Act attempts to lower this percentage in Texas by conditioning eligibility on a report of the crime to the appropriate agency within seventy-two hours.[163] If this ancillary goal of increased crime reporting is to be reached, information about the Act, and the seventy-two hour provision in particular, should be conveyed by sources other than the police. In all likelihood, the best way to reach those who would otherwise choose to avoid involvement with law enforcement agencies is through extensive media coverage. The wide reach of the media, however, creates additional problems. The New York Board discovered that media "blitzes" resulted in a deluge of claims filed by individuals clearly ineligible for recovery—persons seeking a government handout, or persons looking for lost property.[164] These claims resulted in serious administrative backlogs, and the media efforts were quickly discontinued.[165]

The problems experienced by the New York Board may perhaps be avoided, however, by the adoption of a simple claim procedure. Besides eliminating the increase in applications of ineligible individuals, this procedure generally will reduce the amount of screening that would otherwise be performed by the limited staff of the Board. This procedure, already used in North Dakota and Minnesota,[166] consists of a two-stage claim process. Before a potential claimant is allowed to fill out a claim form, he or she must fill out a "declaration of eligibility."[167] This declaration would

DECLARATION OF ELIGIBILITY

NAME_____ PHONE____

ADDRESS_____ ZIP____

By completing this form you determine whether you are eligible to apply for compensation under the Texas Crime Victims Compensation Act. Check the statements that apply in your case. If you cannot truthfully check all statements, you are not eligible for compensation through the Act and you will not receive a claim form.

__ 1. The incident for which I am declaring my eligibility for compensation occurred on or after January 1, 1980.
__ 2. The claimant (and/or victim) suffered bodily injury (or death) as a result of the criminal actions of another.
__ 3. This injury (or death) was not the result of an automobile accident.
__ 4. The incident occurred in Texas.
__ 5. The incident was reported to law enforcement officials within 72 hours or would have been reported except for a valid excuse.
__ 6. The claimant (and/or victim) cooperated with law enforcement officials during their investigation of the incident.
__ 7. The person whose death or injury gives rise to this claim did not knowingly and willingly participate in the criminal incident.
__ 8. The claimant (and/or victim) did not reside in the same household as the criminal offender or his or her accomplice.

consist of a series of statements concerning threshold eligibility, such as "The incident occurred in Texas." The applicant could only receive a claim form after responding affirmatively to each of the statements on the declaration of eligibility form. Each form should also include a warning to the applicant that it is a class A misdemeanor knowingly to respond falsely to the questions posed in the form.[168] The use of the declaration of eligibility form would screen out the obviously ineligible applicants, and thereby facilitate the use of the media by preventing a deluge of frivolous claims from reaching the administrative stage. In addition, this procedure should lower administrative costs and thus increase the availability of funds to victims.

Efforts directed toward publicity are likely to have a direct effect on the success of the Texas program, and the Texas Act reflects recognition of that fact. The publicity provisions of the Act must be administered with a strong hand, however, and the attorney general should consider adopting a procedure for police publicity and application distribution similar to that of California. Moreover, the Board should take advantage of the mass media to assure full exposure and to help increase police cooperation. The adoption of a declaration of eligibility claim form would ease the extra administrative burden that media exposure can cause.

V. THE SON OF SAM PROVISION

enactment of these sections establishes in Texas a modified version of New York's controversial "Son of Sam" law.[171] These sections are inappropriate in a victim compensation statute because they create no new substantive rights or remedies for victims.[172] Instead, the Son of Sam sections prevent the criminal from disposing of assets received from his crime-related literary efforts so that the victim will be able to pursue an ordinary civil remedy with the assurance that the defendant will not be judgment proof. Underlying this practical consideration is the sentiment that criminals should not profit from their misdeeds. Despite the admirable motives behind these sections, the Son of Sam provision presents potential constitutional problems.[173]

Sections 16 through 18 provide that any person contracting with an accused[174] or convicted criminal with respect to the reenactment of the crime in a book, movie, or other medium, or merely with respect to the criminal's thoughts or feelings about the crime, must pay the Board the money that would otherwise be paid to the criminal under the contract.[175] The Board is then to establish an escrow account with that money, which will be available for the satisfaction of any civil judgment awarded to a victim for damages caused by the crime.[176] Unless the money is used to satisfy a judgment for the victim, it will be returned to the criminal after five years.[177]

---

if the court in which the judgment is taken finds that the judgment is for damages incurred by the victim caused by the commission of the crime.

Maintenance of escrow account

Sec. 18. The board shall pay money in an escrow account to the accused person if he is acquitted of the crime. The board shall pay the money in the account to the accused or convicted person if five years elapse from the date when the account was established and the money has not been ordered paid to a victim in satisfaction of a judgment.

171. N.Y. EXEC. LAW § 632-a (McKinney Supp. 1972-1979). Section 632-a is commonly referred to as the Son of Sam law because the proposal of the bill was directly motivated by the series of random murders committed by a person calling himself Son of Sam and the willingness of publishers to pay large amounts of money for the murderer's story. *See* Comment, *Compensating the Victim From the Proceeds of the Criminal's Story—The Constitutionality of the New York Approach*, 14 COLUM. J.L. & SOC. PROB. 93, 94 n.6 (1978) (statement of justification by sponsor of § 632-a).

172. Victim compensation programs distribute funds directly to the victims, thus creating an alternate source of recovery. The Son of Sam sections merely impose upon the criminal's rights by preventing him from disposing of the profits from his crime related literary efforts, thereby ostensibly augmenting the victim's chances for traditional civil recovery.

173. *See* notes 185-90 *infra* and accompanying text.

174. TEX. REV. CIV. STAT. ANN. art. 8309—1, § 16 (Vernon Supp. 1980). There is no definition of the term "accused" in § 16. The problems of free speech and due process mentioned later in this Comment are aggravated by the inclusion of accused persons in § 16. *See* Comment, *supra* note 171, at 114.

175. TEX. REV. CIV. STAT. ANN. art. 8309—1, § 16 (Vernon Supp. 1980).

176. *Id.* § 17.

177. *Id.* § 18. The five-year time limit specified in § 18 may be interpreted as establishing not only an escrow period, but a new cause of action, because in most cases the statute of limitations will have expired long before the five-year deadline. The Appellate Division of the New York Supreme Court took this position in Barrett v. Wojtowicz, 66 A.D.2d 604, 414 N.Y.S.2d 350 (1979). In *Barrett* a bank robber, whose profits from the movie "Dog Day Afternoon" had been put into escrow by the New York Crime Victims Compensation Board, was sued for assault and false imprisonment by one of his hostages. Although the

The New York statute, upon which the Texas provision is based, has been the focus of much controversy.[178] The constitutionality of the statute has been questioned by the Library of Congress' legal research service, a House Judiciary subcommittee staffer, and the New York Civil Liberties Union,[179] but at this date, the New York statute still stands. The adoption of the Texas provision may be attributed to the several victim compensation bills introduced into Congress during the last few years.[180] At one time a strong possibility existed that one of the prerequisites for federal subsidization of state victim compensation programs would be a Son of Sam act in the state.[181] The 1979 bills,[182] however, are based generally on a conference committee compromise of the 1977 bill,[183] in which the conference committee recognized that since the constitutionality of the Son of Sam act was uncertain, a bill conditioning state subsidization on the adoption of such a statute was undesirable.[184]

At least two aspects of the provision present constitutional difficulties. First, sections 16 through 18 contain no provisions for a hearing of any kind. No procedure is provided to determine whether a criminal's efforts come within the scope of the section, and the individual obligated to pay the criminal must decide at his own risk whether to pay the Board instead.[185] Because the Act may effectively deprive the criminal of his property without a hearing, it is in potential contravention of the due process requirements of the fourteenth amendment.[186] The second area of possi-

suit was brought long after the statute of limitations had run, the court refused to dismiss the suit, holding that N.Y. EXEC. LAW § 632-a (McKinney Supp. 1972-1979) established a new in rem cause of action with a five-year limitation. 414 N.Y.S.2d at 357. The New York statute, however, states that money from the account will be paid provided that the "victim, within five years of the date of the crime, brings a civil action" and recovers a judgment. N.Y. EXEC. LAW § 632-a(1) (McKinney Supp. 1972-1979). The Texas statute does not link the five-year limit with the victim's civil recovery, but treats each in a separate section. TEX. REV. CIV. STAT. ANN. art. 8309—1, §§ 17-18 (Vernon Supp. 1980). This distinction may prove crucial in the interpretation of the effect of the Texas Act on the statute of limitations.

178. *See, e.g.*, Comment, *supra* note 171; Comment, *Criminals-Turned-Authors: Victims' Rights v. Freedom of Speech*, 54 IND. L.J. 443 (1979).

182. *See, e.g.*, H.R. 957, 96th Cong., 1st Sess. (1979). For treatment of past and present federal victim compensation legislation, see note 18 *supra*.

183. H.R. 7010, 95th Cong., 1st Sess. (1977).

184. H.R. REP. No. 1762, 95th Cong., 2d Sess. 10 (1978).

185. TEX. REV. CIV. STAT. ANN. art. 8309—1, § 16 (Vernon Supp. 1980), places the burden on the individual contracting with the criminal to decide if the contract falls within the provisions of the statute.

186. The due process ramifications of prejudgment seizures are still unsettled; the Supreme Court has alternatively expanded and contracted the process that is due a debtor under state prejudgment garnishment or replevin statutes. *See* North Ga. Finishing, Inc. v. Di-Chem, Inc., 419 U.S. 601 (1975); Mitchell v. W.T. Grant Co., 416 U.S. 600 (1974); Fuentes v. Shevin, 407 U.S. 67 (1972). Although the Supreme Court has shifted its view of the precise requirements of due process in such situations, most notably with regard to the timing of a hearing, the Court has uniformly held that a hearing is essential to due process when property is seized before judgment. *E.g.*, North Ga. Finishing, Inc. v. Di-Chem, Inc., 419 U.S. 601, 606 (1975). TEX. REV. CIV. STAT. ANN. art. 8309—1, §§ 16-18 (Vernon Supp. 1980) operates so that the escrow account can be established and dispersed without an op-

ble difficulty involves the first amendment. Although Senator Gold, the sponsor of the New York bill, was technically correct in stating that "[w]e don't stop a prisoner from writing,"[187] a statute authorizing the publisher of a criminal's literary efforts to pay money owed the criminal into a five-year escrow account is a clear disincentive for the criminal.[188] To the extent that the criminal will refrain from seeking publication of his work, or insofar as he attempts to confine his efforts to topics not prescribed by the statute, the public will be deprived of the right to be informed.[189] For example, a criminal's expressions of his thoughts at the time of the commission of a capital crime could be valuable to the study of the deterrent effect of capital punishment.[190] Thus, the statute appears to have a chilling effect both on the criminal's right to free speech and on the public's right to know.

The Texas version of New York's Son of Sam act is likely to cause more problems than it will solve.[191] The provision is certain to encounter strong constitutional challenges, and the litigation of the first and fourteenth amendment issues may devour more state funds than the statute will make available to victims.[192] Because there is no longer a serious threat that federal subsidization will be contingent upon the existence of such a provision, sections 16 through 18 should be repealed.

VI. Conclusion

The Texas Crime Victims Compensation Act creates a practical means of recovery for the victims of violent crimes, supplementing the relatively ineffectual alternatives of civil recovery, insurance, and restitution. The legislature has taken strong action in attempting to alleviate the plight of the victim, and this progressive legislation has the potential to bring about substantial public benefits. By taking a hybrid approach, the drafters of the Act had the opportunity to select the provisions that have proven most desirable in the light of experience. For the most part, they were successful in this selection process; of particular merit are the provisions for distribu-

portunity for a hearing of *any* kind. For a comprehensive treatment of this issue, see Comment, *supra* note 171, at 99-105.

187. Smith, *supra* note 179, at 6.

188. *See* Comment, *supra* note 171, at 110-11.

189. The Supreme Court has indicated that it is "the heart of the natural right of members of an organized society . . . to . . . acquire information about their common interests." Grosjean v. American Press Co., 297 U.S. 233, 243 (1936); *see* Comment, *supra* note 171, at 105-09.

190. Comment, *supra* note 171, at 109.

191. From a practical standpoint, the statute may even prove to be somewhat self-defeating. To the extent that criminals are discouraged from writing because of their inability to collect profits, there will be *less* money available to satisfy the judgments held by victims. Thus, the opportunities for victim recovery actually may be reduced by the statute, a result that the legislature probably did not consider when it hurriedly enacted §§ 16-18. *See* Comment, *supra* note 171, at 109.

192. The number of victims whose injuries result from a crime that attracts enough public attention to merit a contract with the criminal is extremely small. Senator Gold, the sponsor of the New York act, estimated that his act might affect one person every two years. Smith, *supra* note 179, at 6.

tion of applications and information, the lack of a minimum claim requirement, and a high maximum award. Several provisions were included, however, despite widespread acknowledgment of their detrimental capacity.

Perhaps the main weakness of the Act is the financial stress requirement. The financial stress test imposes a substantial administrative burden on the Board and involves an unwarranted invasion of the victim's financial privacy. The investigation of financial stress is neither fiscally justified nor related to the primary goal of loss-spreading.

Another flaw in the Act is the household exclusion, because the exclusion of victims living in the same household as the criminal responsible for their injuries results in substantial injustices when applied to innocent children. The arguments advanced to justify the household exclusion are eviscerated by the presence of provisions that prevent fraud and the compensation of victims partially to blame for the crime. The unjust benefit exclusion of the Uniform Crime Victims Reparations Act is an adequate alternative to the household exclusion.

The Son of Sam provision raises constitutional problems that may consume more funds through litigation expenses than the provision will make available to crime victims. Although the provision serves the noble purpose of preserving the criminal's crime-related profits for the victim's civil recovery, the means adopted to serve this purpose may violate the first and fourteenth amendments to the Constitution. While the lack of due process may perhaps be remedied by the provision for a hearing, the Son of Sam provision's chilling effect on speech cannot easily be alleviated.

Notwithstanding these imperfections, the Texas Crime Victims Compensation Act is a laudable effort that ranks among the best of the state victim compensation acts. If the program is sufficiently publicized and adequately staffed, the Act promises to benefit substantially the criminally injured. States that have not yet enacted victim compensation legislation would be well advised to follow the progress of the Texas program and to adopt the most successful provisions for their own acts.*

---

* Author's Note: At the time this Comment went to print, the Board was able to report the following statistics, covering the period between January 1 and April 10, 1980:

Claims filed	306
Claims finalized	38
Awards made	13
Total amount awarded	$32,094
Amount collected in Fund	$151,000
Claims rejected	25
Grounds for Rejection:	
Failure to cooperate with authorities	9
No financial stress	7
Behavior of victim	6
Participation in event	2
Residing in same household	1

The only publicity efforts made by the Board at present are the statutorily required distribution of posters and forms to hospitals and physicians, and responses to media inquiries. Telephone conversation with Bud Donnelly, examiner for Crime Victims Compensation Division of the Board, April 22, 1980.

EXECUTIVE SUMMARY

Restitution, both monetary and public service, is an age-old procedure widely used in a variety of ways by both juvenile court and criminal court judges. Restitution does not have to be combined with a residential program to be valid. Some offenders, however, can gain more benefits from a residential restitution program than from incarceration in a prison. From a cost point of view, restitution centers are in the state's interest because incarceration costs are usually less than for prisons.

The Georgia restitution centers are offender-focused rather than victim-focused. Thus, they differ from state victim compensation programs. Victim compensation refers to money or services provided to a victim by the state, whereas restitution refers to money or services provided to the victim by the offender.

In Georgia, 10 restitution centers serve designated judicial districts. The district court judge makes the decision to place an offender in a restitution center rather than a prison. The centers serve as an alternative to prison incarceration, not as an alternative to probation supervision. Georgia's restitution centers have relieved prison overcrowding.

The preferred method of intake, after an offender has been sentenced to a term of imprisonment, is for center staff members to interview offenders in the county jail while they await transportation to the state prison. If the offenders and center staff members believe a restitution center program would be appropriate, a recommendation is made to the sentencing judge who may then modify the original sentence to placement in a residential restitution center as a condition of probation.

The centers' programs operate 24 hours a day, seven days a week. Offenders are employed and relinquish their paychecks to center staff members for division according to a contract. Restitution includes monetary payment for damages and public service activities.

A typical participant in the program is a 19-year-old offender who was convicted of a property offense, and who has been on probation for an earlier offense. Average length of stay in the center is about four months.

A major cost benefit of Georgia's restitution centers program is the short-term leasing of center facilities. Uneconomical tourist courts located on state highways now bypassed by interstate highways are favorite lease locations.

The key to successful operation of a correctional residential restitution center is community acceptance. The restitution center needs to be viewed by community leaders as *their* program.

I. A SEARCH FOR ALTERNATIVES

The steadily rising crime rate during the past decade has prompted a variety of responses from all levels of government across the nation. Funding for criminal justice agencies has increased, and the federal Omnibus Crime Control and Safe Streets Act provided millions of grant-in-aid dollars to state and local agencies. Some state legislatures have enacted new laws that mandate determinate and sometimes longer prison terms for a variety of crimes. Many judges, responding to increased public agitation about crime, are issuing stiffer prison sentences.

Nationwide, the prison population has grown dramatically. In 1977 over 275,000 prisoners were incarcerated—an increase of 25,000 over 1976 (see Table 1). Various theories have been advanced to explain this increase in prison populations. The depressed state of the economy, longer prison sentences, better law enforcement and prosecution, and the "baby boom" are factors often cited for the increased prison population. Whatever the cause, rapid growth has placed enormous pressure on existing state correctional facilities. Lack of beds, proper sanitary facilities, and recreation areas are only a few of the conditions often found in overcrowded prisons. Conditions in some state prisons have become so bad that federal judges have issued orders preventing the state from accepting new inmates until conditions are improved.

Traditionally, state legislators have been reluctant to allocate funds for prison construction. But, the continued growth in prison population and the resultant overcrowding of old, outdated facilities have forced a number of states to initiate the planning and building of new facilities. The construction and maintenance of a new prison, however, is an expensive undertaking. The National Clearinghouse for Criminal Justice Planning and Architecture in 1977 calculated that the construction of a typical prison costs about $30,000 per cell. Add the initial capital expense to the Clearinghouse's estimated annual cost for operating a prison, usually between $1 million and $2 million for a 400-bed facility, and it readily becomes apparent that prisons are not cheap.

Most state officials recognize the need for prisons in order to protect society from habitually dangerous individuals, but many also realize that committing every individual convicted of a crime to prison is not economically feasible or socially desirable. Certain offenders, due to the nature and circumstance of their crime, could benefit from some form of punishment other than incarceration. While probation is an alternative for many offenders, its effectiveness sometimes is limited. Probation staffs are usually overloaded with cases, and the supervision they offer each individual is minimal. In cases where something more than probation is advisable as a criminal sanction, in many states the only alternative is incarceration.

An Alternative

Community-Based Correction

Growing skepticism among correctional administrators and elective officials about the likelihood of rehabilitating offenders in large, oppressive prisons, and the increasing costs of constructing and maintaining these institutions, have prompted state officials to search for alter-

natives to institutionalization. One avenue being examined by various states is community-based correction. (For example, see Dick Howard and Mike Kannensohn: "A State-Supported Community Corrections System: The Minnesota Experience," The Council of State Governments. February 1977.) Community-based correction advocates stress that keeping offenders within the community increases the chances of reorienting them to society's values. Continued residence in the community strengthens the offender's family ties, enhances vocational and educational opportunities and provides treatment for any psychological and emotional problems in a community setting.

Restitution

Corresponding with the interest in establishing community-based corrections programs has been an increased awareness of the plight of crime victims. This concern has led to legislation in a number of states which compensates or provides restitution to victims. While compensation and restitution often are used interchangeably, they do have different basic definitions. Victim compensation refers to money or services granted a victim by the state, whereas restitution refers to money or services provided to a victim by the offender.

Restitution is a sanction becoming increasingly a part of community corrections programs. Restitution most frequently is used by judges as a condition of probation, in connection with the use of a suspended sentence, or as a part of the program of community corrections centers. Restitution performed before sentencing is considered a mitigating circumstance in the final imposition of sentence by most courts. In some instances, restitution is used in pretrial diversion programs. Restitution is seldom used with offenders sentenced to security institutions. The limited opportunities for earning income because of low or nonexistent inmate wages in most security institutions generally preclude the use of monetary restitution in most jurisdictions.

Recently, several states have enacted statutes establishing standards and guidelines for restitution. In 1973, Iowa made restitution a condition of a deferred sentence or probation (Senate File 26, 65th General Assembly, 1973, State of Iowa). In 1976, Colorado permitted courts to order restitution in conjunction with fines, probation, imprisonment or parole. (Colorado Crime Victim Restitution Act, Second Regular Session, 50th General Assembly, 1976).

In Minnesota and Georgia, the idea of merging the concept of restitution with a community-based residential program has been implemented. The Minnesota Restitution Center Program was initiated in 1972. In 1975, Georgia instituted a community-based restitution program in four cities as an alternative to prison incarceration.[1]* Table 2 presents descriptive data on a number of restitution programs.

The Need for Change in Georgia

The condition of Georgia's correctional system was described by one state official as "bleak and disheartening." In 1975, the Georgia Department of Corrections and Offender Rehabilitation (DCOR) identified major problems as "over-crowded conditions, a high recidivism rate, a lack of adequately trained staff, a need for expanded, centralized coordination, and a lack of objective data for program planning and evaluation."[2] By 1977, Georgia's prison population was over 11,000 and was projected to reach 16,000 by 1980. The percentage of individ-

uals 18-44 years of age in prison represents the highest per capita incarceration rate of all 50 states.[3]

The problems of a large prison population in overcrowded and inadequate facilities were compounded by the condition of the probation and parole programs. In 1976, the total probation/parole caseload was over 33,000 and the average caseload was 132 per counselor. (In 1977, parole supervision was removed from the DCOR and established in a separate and autonomous agency—the Parole Board. This, however, did not solve the problem of large caseloads; it just transferred the responsibility.) In the past five years, the probation/parole caseload has increased 83 percent. Due to the size of caseloads handled by counselors, judges became increasingly reluctant to place some offenders on probation. If an offender was not placed on probation, the only alternative a judge had was incarceration, but incarceration only exacerbated the overcrowding in state correctional facilities.

After identifying and examining the problems confronting the Georgia correctional system, the DCOR developed a long-range plan called Operation Performance which was designed to correct deficiencies in the system and to make offenders directly responsible for the consequences of their own behavior. One part of the plan was development of a network of community-based residential restitution centers.

II. ESTABLISHING COMMUNITY RESTITUTION CENTERS IN GEORGIA

The initiation of community restitution centers in Georgia followed the general reorganization of state government in 1972. An Executive Reorganization Plan created the Department of Corrections and Offender Rehabilitation (DCOR) and authorized it to "administer the supervision of parolees, probationers, and other offenders who are being treated outside correctional institutions." In addition, the Georgia Probation Act (1968) states: "The courts shall determine the terms and conditions of probation and may provide that the probationer shall remain within a specific location and shall make reparation or restitution to any aggrieved person for the damage or loss caused by his offense in an amount determined by the court..." (Ga. Laws 1968, p. 324).

On the basis of the above statutory language, in October 1975 the DCOR established the community resitution center program by making residence at a center and participation in the program a special condition of the probation order. Initially, four community restitution centers were established with financial support from the Law Enforcement Assistance Administration. In addition to the restitution centers, the state also was developing five community-based adjustment centers. These residential adjustment centers were used to house probationers, and the program design had a rehabilitation focus with a strong emphasis on counseling. The restitution centers influenced the adjustment centers. The adjustment centers began using restitution as the core of their program. As federal support of the restitution centers diminished, the two programs were merged and the state legislature voted to begin funding the restitution centers in the 1977 fiscal year in addition to the adjustment centers which were reprogrammed as restitution centers. Currently, there are 10 restitution centers in the state, the tenth having opened in early 1978 at Thomasville.

Organization of the Georgia Corrections System

The Georgia Department of Corrections and Offender Rehabilitation is composed of two administrative and three field divisions. The DCOR Community Facilities Division administers the residential restitution program and several other community-based programs (e.g., pre-release centers, transitional centers, work release centers).

Although the Community Facilities Division is responsible for the operation of the centers, the success of the program depends on the assistance of a number of individuals inside and outside the DCOR. The cooperation of judges, probation officers, local officials and community residents is necessary to establish and maintain a restitution center. Judges are responsible for selecting offenders who will reside at the center and for determining the amount of financial restitution. Many judges also monitor the performance of offenders they place in a center. Probation officers, who are DCOR employees, oversee the activities of an offender discharged from a center. Local officials advise the department in selecting a center location. Local officials and community residents sit on restitution center advisory boards and help locate and provide resources needed by the residents. The size of the boards varies

from one center to another. They perform a valuable function in advising the center director about problems and in conveying information to citizens in the community about the center. The boards provide both a public relations function and an advisory function to the center director. Some centers have a formalized community advisory board while others rely on ad-hoc arrangements according to need. Although forms, contracts, case folders, and other items are similar in content for all centers, they vary in format according to the style of the director.

Location of Restitution Centers

The 10 community restitution centers in Georgia are located in Albany, Athens, Atlanta (2), Augusta, Cobb County, Gainesville, Macon, Rome and Thomasville.

Eventually, the DCOR hopes to establish one community restitution center in each of the state's 42 judicial districts. Selecting the location and establishing management procedures for the first four centers, however, raised certain procedural and intergovernmental questions. The DCOR had no previous experience with a residential restitution program and there was a lack of information concerning methods and standards. In addition, the department had not determined the formal agency and governmental linkages required to maintain and operate a center. Consequently, the first year was a period of development and experimentation. Each center developed in its own way resulting in differences in operation. On the positive side, these differences reflected the uniqueness of the communities. From this experience, the DCOR was able to develop and standardize specific policies and procedures where increased uniformity was considered desirable.

In locating the first four facilities (Albany, Atlanta, Macon and Rome), the department selected judicial districts in which judges had expressed a strong interest in the restitution concept. Once a center was established in a judicial district, the center staff concentrated on serving the offenders from that district. Judicial and community support of the original centers prompted citizens and judges in other districts to seek the establishment of a restitution center in their communities. Presently, the demand for new centers is greater than the funds available to the DCOR for meeting the requests.

Center Size and Staff

All 10 restitution centers operate 24 hours a day, seven days a week. Maximum residential capacity ranges from 20 to 40 offenders, with an average capacity of about 36 (see Table 3). Because an offender usually resides at a center for only four or five months, each center can serve between 112 and 130 offenders per year. For fiscal year 1978, the legislature allocated $1,140,460 to operate eight centers. The other two centers are financed with federal funds. For fiscal year 1979, the DCOR is requesting $2 million for 10 facilities, an average of $200,000 per center.

All the facilities used to house the residents are leased by the department. Motels, vacant dormitories, and large houses are among the types of buildings that have been converted into restitution centers. The department has discovered that old, unprofitable motels on secondary highways offer excellent accommodations. Usually, only minimal alteration is required. In many cases a center is located in an area that is a mixture of residential and commercial or light industrial uses. While DCOR officials prefer a center that has central kitchen facilities, a few

centers are located in buildings that are not equipped to prepare meals. Alternate arrangements are made for food service.

State DCOR staff members vary from 8 to 13 per center. A typical staffing pattern would include one superintendent, one business manager, one clerk typist, one probation supervisor, one counselor and four counselor aides or correctional officers. Centers with kitchen facilities also employ a cook. The cook works on a split shift and prepares breakfast and a bag lunch for those who work during the day, and then returns to prepare dinner. Administrative staff work the 8 a.m. to 5 p.m. shift while most residents are at work. Counselors are available to provide education and counseling services in the afternoon and evenings. Security is supplied by a night duty correctional officer. Supervisory staff are present and share cooking responsibilities with the residents on the weekends.

In order to supplement the basic counseling staff, a number of centers use Comprehensive Employment and Training Act (CETA) employees, VISTA workers, student interns and citizen volunteers to provide supervision and program assistance. These individuals enable a center to provide additional educational and counseling services it is not financially able to provide. Community residents who volunteer to assist the center staff also form a valuable contact between the community and the center.

Table 3
OPERATING BUDGET AND CAPACITY OF RESTITUTION CENTERS

CENTER	OPERATING BUDGET FISCAL YEAR 1978	MAXIMUM CAPACITY
Albany Restitution Center	$135,775	28
Athens Adjustment/Restitution Center*	230,271	40

Rome Restitution Center	123,874	32
Total State and Federal	$1,612,694	325
Total State	$1,140,460	245

*These centers are financed with federal funds. In fiscal year 1979 the state will assume responsibility for funding the centers. The Thomasville Center opened in early 1978, thus figures are not included.

III. OPERATING A RESTITUTION CENTER

The procedure for selecting individuals to participate in the residential restitution program and the service provided to an offender vary to some degree from center to center. The DCOR has established operational standards and policies, but department officials recognize the need for each center to have a certain amount of flexibility. Staff capabilities, the needs of a constantly changing offender population, and the physical environment of a center all will have an impact on the type of program operated by a restitution center.

Selecting Participants

The requirements for admission to the residential restitution program vary slightly among the 10 centers. Most of these variations reflect the different conditions in the judicial districts where centers are located. One policy area in which they do not differ is that none of the centers accept offenders who have been convicted of committing a violent crime. In addition, due to the lack of facilities and drug treatment programs, a center will not admit an individual who has a history of drug addiction or alcohol abuse. A typical participant in the program is 19 years old, has been convicted of a property offense, and has been previously placed on probation for an earlier offense. The following are criteria used by the staff at many of the centers to identify offenders eligible to enter the program:

—Offender would have otherwise been incarcerated, had the program been unavailable,

—Offender has committed a property crime not involving the use of a weapon or any act of violence and has not been arrested for a violent crime for the preceding five years,

—Offender's crime involves the victim in a fashion whereby restitution can be made using a payment schedule compatible with the amount of restitution to be paid and the time he is to serve at the facility,

—Offender is 17 years of age or older,

—Offender is not regarded as a professional criminal (to be determined by his previous record of offenses),

—Offender's level of intelligence is not below a point (usually I.Q. 60) precluding employment and participation in the center's program, and

—Offender is willing to enter into a contract with the center establishing objectives which must be achieved before release.

In addition to the above criteria, center staff members employ several subjective indicators for screening out offenders who would not benefit from the restitution program or who would pose a threat to the community. At most district courts the screening process takes place between conviction and sentencing and is part of the pre-sentence investigation process conducted by probation personnel. Some offenders are eliminated from further consideration after this investigation because they do not meet the previously stated objective requirements of the center. Other cases may be excluded as inappropriate for the restitution program after discussion with the local district attorney and the

offender. The remaining cases are then presented to the court with a restitution recommendation and with a proposed restitution plan. The judge can accept, modify, or reject the restitution recommendation and levy another type of sentence. An offender who is sent to a restitution center is placed as a condition of probation and is under the jurisdiction of the court. If the offender fails to make satisfactory progress or repeatedly violates the center's rules, the offender can be returned to the court for probation revocation. In nearly every revocation case the offender is sent to a state prison.

In one judicial district, Cobb County, the selection process is slightly different, reflecting the preferences of the presiding judge. Program staff reviews the cases of all offenders after they have been sentenced to prison from the Cobb Judicial Circuit Court and while they are awaiting jail transportation to the prison. Based on an examination of the offender's record and interviews with the district attorney, defense attorney, probation personnel, family, employer, and the offender, the center staff members select for program participation the nondangerous offenders who can be safely supervised in a community facility environment. The judge is then asked to amend the sentence to probation conditional upon the offender successfully completing the Cobb Center program. This program has the added merit of insuring that restitution is used as a substitute for incarceration since participation is at the instigation of the DCOR, though the judge makes the final decision.

The Program Contract

Once accepted in a restitution center, the offender enters a two-week orientation period. During this time a contract is negotiated between the staff and the resident. The amount of restitution occasionally is determined between the prosecuting attorney and defense attorney and approved by the judge at the time of sentencing.

Rarely does a resident have a job prior to admittance to the restitution center. During orientation, obtaining a job is the primary task. Each center has access to daily job listings issued by the Georgia Department of Labor. In addition, each center has developed its own "job bank" from staff contacts with employers. The resident is referred to job openings. When accepted for employment, the amount of pay is determined. The contract that is developed between the staff and the resident addresses the division of the resident's paycheck. DCOR policy calls for the resident to pay $4 a day for room and board. This amount was set administratively in 1975 before the DCOR had any experience with the program. It has not been changed. It does not cover the cost of room and board. The contract determines the amount to be deducted from each paycheck for restitution. The contract includes an amount to be deducted for savings and an allowance for the resident's weekly expenses. The contract also designates the program activities the resident will participate in during his stay in the center.

All paychecks are turned over to center staff. The dollars are divided according to the contract. In general, restitution dollars will accumulate until the offender completes the program. The amount of restitution collected is then submitted to the court for transfer to the victim. On occasion, there is face-to-face encounter between the offender and victim and payment is made direct. This is an exceptional practice, however, and is done only when deemed a therapeutic experience for both victim and offender.

Another aspect of the contract is public service restitution. The resident agrees to serve a specified number of hours in public service in

addition to the monetary restitution. During fiscal year 1977, more than 8,000 hours were spent in public service restitution activities.

Some examples of community service activities in which offenders participate include: helping in mental hospitals and health centers, repairing the houses of elderly pensioners to prevent condemnation, maintaining the grounds for youth recreation groups, assisting civic and charity organizations in money-making projects, constructing playground equipment for church and neighborhood child care centers, collecting and repairing toys for needy children at Christmas, and conducting community clean-up projects.

Daily Life in the Center

The basic program in essentially the same for each center but there is variation. Some centers allow residents access to automobiles while others do not. The type of classes taught at the restitution centers generally depends on a center's access to volunteers.

A typical day for a resident begins with room cleaning. Breakfast is then served and the resident picks up a sack lunch. The resident will provide some service in the upkeep and maintenance of the center during the day. This might occur in the morning or after he returns from work. The resident then goes to work. In some centers residents drive their own automobiles to work; in others, the resident relies on public transportation. Upon return from the job, the resident may have some recreation time or may be assigned to a work detail. After the evening meal, the resident participates in an evening program of group discussion, counseling, classes, or tutorial sessions.

Evening classes may involve GED preparation, tutoring, or orientation to the world of work. The schedule for a particular resident is part of the negotiated contract.

A point system for reward and discipline also is employed in the centers. Points are received for room inspections, punctuality and attendance at assigned programs, and satisfactory completion of work details. Points are also earned by residents for meeting the obligations of their contracts. Points are deducted for disciplinary reasons, for not complying with contracts, or for an altercation with another resident. The points earned result in specified numbers of hours for weekend passes. Weekend passes range from 12 hours to an entire weekend. All residents on passes return to the center Sunday evenings. On an average, a resident will spend four months in the center before resuming regular probation supervision. Release to regular probation supervision is decided by the judge on the recommendation of center staff.

IV. ASSESSMENT

Importantly, citizens in the communities view the state-operated restitution centers as their own community programs. Judges see the centers as extensions of court services—a sentencing alternative to incarceration. Police have been cooperative and amicable. Even colleges see the center as a resource for intern learning experiences. Although the centers maintain low profiles, clearly center directors devote a good deal of time to cultivating and maintaining good relationships with key persons in the community. Many restitution centers view the judge as the key. "He can make us or break us," one center director said. Some centers serve more than one circuit court and in these instances, the director must maintain relationships with several judges. As noted earlier, the demand for new centers is greater than the funds available to the DCOR for this purpose.

Some centers maintain a structured community advisory group with quarterly meetings. This device provides information to the community and permits the center program to tap community resources.

State probation staff support the restitution centers, but some negative feelings by probation staff were reported. These persons criticized the centers for not keeping offenders long enough. When offenders return to regular probation supervision before restitution is fully paid, an additional assignment for the probation officer is to supervise the collection of restitution. Probation officers believe they have enough to do without these additional responsibilities.

How do you measure success? In general, the DCOR staff decided to reject the idea of recidivism, however defined, as a criteria of success.

The original goals for a residential restitution center were to:

(1) Reduce the projected increase in prison population by diverting eligible offenders to the restitution program,

(2) Involve citizen volunteers in the rehabilitation of offenders from their local community,

(3) Demonstrate various effective methods of offender restitution, and

(4) Determine the cost/benefit factors associated with a residential restitution program.

To a considerable extent, the objectives were met. In 1976, Georgia had the highest percentage of prison inmates in the 18-44 age bracket of all 50 states.[4] Over two-thirds of the admissions to the restitution centers successfully avoided prison incarceration. Although the prison population was not reduced, it would have increased even more without the centers. During the first year of operation, Cobb County, for example, reduced the number of prisoners sentenced to prison by 51 percent.

Volunteers were recruited, trained, and involved in center activities, but citizen involvement varied from one center to another.

During the 12-month period ending June 30, 1977, $128,437 in restitution was paid to victims. The other method of offender restitution used to date, community service, has resulted in 8,372 hours of work. It is difficult to put a value on this time, but at the minimum wage of $2.65, it totals $22,185.

The cost/benefits are more difficult to assess. The per-diem cost of

prison incarceration and center residency is essentially the same, excluding capital construction costs for prisons and rental fees for the centers. If these figures were added to the per-diem cost, the centers would be considerably cheaper. Another cost factor is the turnover of population in a center compared to the turnover in a prison. In a center, the average stay is about four months. For similar offenses, prison stays are at least 12 months, and average closer to 15 months before parole. Thus, total costs of care per individual are much cheaper for the center than for the prison.

There are other cost/benefits. The offender is employed, paying taxes, and supporting his family. There is a savings in welfare costs. A total of $164,472 was paid in state and federal taxes for the 12-month period ending June 30, 1977. Income to the state in the amount of $206,880 was paid during this period for room and board. Further, during this same period of time, an estimated $208,922 was spent in the community by residents for clothing, transportation, recreation, and personal items (see Table 4).

The DCOR estimates that 35 percent of new admissions to the Georgia prison system meet the objective criteria for entrance into a restitution center and the state does plan to expand the number of restitution centers.

Transferability

The Georgia restitution center concept should have wide appeal to other states which have overcrowded prisons and are looking for alternatives to prison incarceration. Even with county-operated probation departments, a state could subsidize county-operated restitution centers as a strategy to reduce population. It is important, however, to remember that the residential restitution program is offender-focused rather than victim-focused.

In the fall of 1977, the second National Restitution Symposium was held in St. Paul, Minnesota. Several speakers at this conference warned of the undesirable effect of "widening the nets" with restitution programs. Kenneth Schoen, Director of the Minnesota Department of Corrections, cautioned that "restitution may have the unintended effect of 'widening the net' of control by the system over the offender." In Georgia, if a resitution center is used as an alternative to a suspended sentence or probation, this would be an example of "widening the net" of control. Thus, of major importance in any state's consideration of restitution centers are built-in safeguards against inappropriate intake into a residential setting when alternative sanctions are less expensive and more appropriate to the offense.

The Georgia experience has illustrated that the best safeguard against inappropriate intake into restitution centers is an intake decision which is made after the judge has already sentenced the offender to a period of time of imprisonment. The Cobb County Restitution Center is illustrative of this practice. Sentenced prisoners in the county jail waiting to be picked up and transferred to the prison comprise a pool of potential residents for the restitution center. The center staff members interview prisoners, study case files with particular attention to the pre-sentence investigation report compiled by the probation staff, and, when deemed appropriate for entry into the restitution center, make recommendations to the judge who sentenced the prisoners. The judge rarely disagrees with such recommendations and new court orders are issued changing sentences to placement in the restitution center as a condition of probation. Again, Georgia's Cobb County pro-

gram insures that judges do not use the restitution program as an alternative to probation. There is some indication that in some of the other districts offenders who would otherwise be placed on probation sometimes are placed in restitution centers. There are other economic reasons for insuring that restitution is not used as a substitute for probation. In a paper prepared two years ago, Bill Read of the General Services Division of the DCOR explained:

> The importance of diversion certainty for a residential diversion-from-incarceration program can easily be seen by considering a few basic cost figures. The annual cost of operating a 30-resident restitution center has proven to be approximately $116,000.* The annual cost of supervising 30 offenders on probation...($205/offender/year) is $6,150. The annual cost of incarcerating 30 offenders ($4,045/offender/year) is $121,350. It is, therefore, quite clear that a residential restitution center cannot be basically cost-effective if it serves offenders diverted from probation. For example, a restitution center serving 50 percent divertees from probation and 50 percent divertees from incarceration would have a basic comparative cost-effectiveness of $116,000 versus $63,750 ($3,075 for field supervision cost plus $60,675 for incarceration cost). In short, the restitution center would not be cost-effective. Therefore, a primary objective in diversion from incarceration programs is an offender selection method which guarantees 100 percent diversion certainty (i.e., post-sentence selection method using either a judicially amended sentence or a conditional parole).[5]

One of the major cost savings of Georgia's restitution centers is the short-term leasing of facilities in contrast to capital cost outlays in purchasing or constructing a community residential facility. Uneconomical tourist courts located on state highways now bypassed by interstate highways are to be found in most communities of any size. The Georgia experience has demonstrated high utility of these tourist courts as well as downtown hotels.

Although per diem costs in Georgia between prisons and restitution centers are about the same, the shorter turnaround time of an individual offender in a restitution center also represents a cost savings in contrast to the longer amount of time an incarcerated offender spends in prison. Mr. Read also mentioned this aspect of restitution centers in his previously cited paper:

> The importance of the offender turnover rate can also be easily seen by again considering the previous basic cost figures. If we make the fair assumption that most property criminals who are sentenced to prison will normally serve a minimum of 12 months, it is clear that a restitution center can dramatically increase its basic cost-effectiveness by increasing its turnover rate. For example, since the annual cost of operating a 30-resident center will remain essentially constant, a center with an average turnover rate of six months can serve 60 offenders in 12 months at a cost of $116,000. However, assuming 100 percent diversion from incarceration, the comparative cost of incarcerating these 60 offenders for 12 months is $242,700. Likewise, comparative figures for a center with an average three-month turnover rate are $116,000 versus $485,400 for incar-

*Present restitution center costs are projected at $200,000 annually.

ceration. Obviously then, an increased turnover rate represents a substantial increase in cost-effectiveness. Thus, another primary objective of a residential restitution program is an offender selection method which allows program staff to be somewhat selective of referral eligibles. In this way, program staff can use priority selection criteria which would operate to increase the total percentage of offenders who could be stabilized relatively quickly and could finish making their restitution on a non-residential basis.

The Georgia restitution centers have been successful in attracting resources from other state and federal programs for both core services and supplemental resources supported by state appropriations. VISTA volunteers, CETA employees, and library services are just a few examples of some of these resources. Volunteers are valuable in the program. Service clubs are attracted to sponsor certain aspects of the restitution program. These resources also exist in other states.

The key to the successful operation of a correctional residential facility is community acceptance. Key community leaders, particularly judges, must be involved in the beginning stages of planning for a restitution center. The restitution center needs to be viewed by community leaders as *their* program. And by making the program voluntary, the state corrections agency avoids trying to implement a restitution center in a community where it is not wanted. Additionally, the public service restitution aspect of the program has large appeal to community agencies, organizations, and political leaders. The concept of restitution itself has appeal to persons with both conservative and liberal political views. The former like restitution as a means to secure justice for the victim; the latter also appreciate its quality as an alternative to incarceration. Although for different reasons, it would seem that in selling the concept of a restitution center to a community, the concept itself goes a long way toward selling itself. In Georgia, in several communities with restitution centers, there is now a demand for a center for women.

Another lesson learned from the Georgia experience is that the state agency must allow each center flexibility in its operations and procedures as each community differs, political structures vary, judges have different views as to how offenders should be treated, and job markets are not the same. For the center to be adopted by the community as its own, the center program must reflect the uniqueness of that particular community. The availability of employment opportunities is a key factor in deciding on a site location of the center. Without the income derived from employment, offenders' restitution to victims is not possible. Thus, placement of restitution centers in remote areas may not be advisable. Of course, if public transportation is not available, alternative transportation modes must be considered. Georgia officials restrict travel to jobs to within the metropolitan area where the center is located. In Atlanta, this sometimes means a distance of 15 miles; in smaller towns, much less.

The need to find jobs for offenders; the need to locate other community resources such as volunteers, assistance from service clubs, library services, counseling; and the need to work closely with community leaders, especially judges, are important considerations in staffing residential restitution centers. Georgia's experience suggests that the center directors should have community organization skills, and such skills are probably more important than penology/criminal justice expertise. In this connection, Georgia-type restitution center advisory boards can also be quite useful.

Obviously, a state interested in establishing restitution centers must

determine if enabling legisiation is required or if existing statutes allow for establishment of restitution centers. In recent years, most states reviewing their criminal codes specifically have listed restitution as a legitimate sanction. Residential centers that emphasize restitution as a key component of their programs seldom are specified in the statute. Many of the statutes, however, are broadly conceived and can easily be construed to include a residential center.

Conclusions

Restitution is an increasingly popular concept both as a sole sanction and as a condition of probation. Residential centers are not necessary for a restitution program, but those states with prison overcrowding might consider this alternative. Residential centers are viewed as an alternative to incarceration and a cost-effective response in reducing prison population.

FOOTNOTES

1. Other states reporting restitution programs are: California, Colorado, Connecticut, Florida, Iowa, Minnesota, Mississippi, Ohio, Oklahoma, South Dakota, Tennessee, Utah, and Washington. For the most part, these restitution programs are not combined with residential programs. In the past [illegible], three more states passed statutes allowing restitution—North Carolina, Texas, and Virginia.

When criminals repay their victims:

a survey of restitution programs

by Joe Hudson, Bert Galaway and Steve Chesney

Restitution to crime victims is an ancient concept that is receiving new attention in the criminal justice system today. The idea itself, of course, was part of a variety of pre-modern legal systems,[1] and historically its proponents include such famous writers as Sir Thomas More, Jeremy Bentham, Herbert Spencer, Raffaele Garofalo and Margery Fry.[2]

Recently, the idea has received endorsement from the National Advisory Commission on Criminal Justice Standards and Goals,[3] the American Bar Association,[4] The American Law Institute,[5] The Model Sentencing Act,[6] the 1972 Annual Chief Justice Earl Warren Conference on Advocacy in the United States,[7] and the Law Reform Commission of Canada.[8] And two states, Iowa and Colorado, have already enacted laws emphasizing the importance of restitutive sanctions. In 1974, Iowa made restitution a condition of a deferred sentence or probation,[9] and in 1976, Colorado said courts could order restitution in conjunction with fines, probation, imprisonment or parole.[10]

Most important, perhaps, the idea of restitution has become a reality through formal restitution programs in a number of places across the country. The prototype for many restitution programs, the Minnesota Restitu-

tion Center, was established in 1972 by the Minnesota Department of Corrections.[11] The residents, who have all committed property crimes, become part of the program only when they have completed four months of their sentence in prison. They live in the center, work in the community and make the agreed-upon restitution. In 1975, Georgia opened four restitution shelters for probationers and parolees.[12]

We recently completed a survey of nineteen restitution programs in the United States and Canada, mainly through telephone interviews. We do not know the total number of restitution programs, but our telephone survey clearly did not reach all of them. Thus, the information we gathered reflects tendencies which may or may not apply to all such programs. (We will also present information from a recent study of restitution as a condition of probation.)

We think that unless critical attention and careful investigation is given to the most appropriate way to implement restitution, the classes of offenders from whom to require it, and its effects on victims and offenders, this practice could become another in a long line of criminal justice sanctions which promises more than it delivers.

At least four major questions should be asked about any contemporary restitution program: What should be the nature of the restitution? How should the amount of restitution be determined? What should be the relationship of restitution to other criminal justice sanctions? And should the victim be involved in the restitution decision? This article will address each of these questions in turn.

Nature of restitution

Two areas of confusion arise in defining a restitution sanction—first, confusion between restitution and victim compensation and, second, confusion about the various forms which restitution may take. Victim compensation usually involves a state-administered form of insurance designed to provide at least partial reimbursement for a specified class of crime victims for their losses. The arrest or conviction of an offender is not a prerequisite for compensation payments, and such schemes usually operate outside the criminal justice system.[13] Restitution, as distinct from victim compensation, involves the offender paying the victim, either directly or through third parties, as redress for damages.

Restitution may take diverse forms. Unlike victim compensation schemes, a restitution program provides benefits to crime victims. But restitution is generally not an efficient mechanism for providing compensation to crime victims because most crimes are not solved by an arrest, and many do not result in convictions. Even when convictions are secured, restitution may not be an appropriate sanction. In short, restitution is likely to provide compensation for only a very limited number of crime victims.[14]

Most of the operational restitution programs we surveyed appear to recognize this fact. Ten of the nineteen programs stated that their primary purpose was offender rehabilitation, and only four indicated that providing reparations to crime victims was their major aim.

While restitution most commonly takes the form of money, many programs also use service restitution, in which offenders work for either the crime victim or larger community. Community service restitution is more common than direct service restitution by the offender to the crime victim. Nine of the nineteen restitution programs estimated that community service was required in at least 80 per cent of all service restitution cases.

Community service restitution schemes commonly require the offender to provide services to public or private social welfare agencies. Typical services include repairing homes for the elderly, working with youth in organized recreational pro-

and volunteer counselling work with drug abuse programs. Direct service restitution to victims could take several forms, such as a vandal repairing the damage he did.

Amount of restitution

Restitution programs usually require some procedure for determining the amount of restitution to be made. An obvious problem in using service restitution is equating the value of the services with the damages done. This is most often accomplished by using minimum wage rates or the hourly wages the offender might command in legitimate employment.

A second problem is assessing the accuracy of the damage claims reported by victims. Programs commonly report concern that victims may inflate their claims and almost unanimously note problems in determining and validating the amount of restitution to be made. This concern is shared by offenders and, in the case of juvenile offenders, their parents.[15]

While victims may inflate their losses, however, offenders may tend to underestimate the extent of loss, either out of ignorance or self-justification. A recent study of juvenile offenders found that the damage estimates of parents, victims probation officers and police officers were relatively consistent, but the juveniles themselves tended to report substantially lower loss estimates.[16]

Two procedures are commonly used to determine the required amount of restitution. One is to use a third party such as a probation officer, judge or other criminal justice official to weigh the different claims and arrive at a fair determination. The other is to bring the victim and offender together in a negotiation process with an agent of the criminal justice system acting as a mediator to arrive at a loss figure. The Minnesota Restitution Center has had considerable success in directly involving victims with offenders in face-to-face negotiations over the extent of damages. Once the parties concur, they develop a written agreement and if the parole board approves it, the offender is released on parole to the program.[17]

In addition to the question of determining the amount of damages, there is the question of whether 100 per cent restitution should always be required. Are there circumstances in which the required restitution should be less than the total damages? Or are there circumstances in which it may be fair to require restitution exceeding the actual amount of damages?

Most existing programs appear to favor full restitution and try to equate the restitution with the actual extent of damages.

How one judge uses alterna

In states that lack formal restitution programs, some judges promote a similar [idea] through "alternative sentencing" in which the offender must help others as a condition of probation. Here's one example.

In an appropriate case, alternative sentencing can be imaginative and just.

In an embezzlement case, for example, a defendant in San Francisco had taken funds where between $1000 and $4000 from the government by falsifying overtime claims. He resigned a career civil service position as a result of the conviction. The court ordered that his sentence be suspended and that he be placed on probation for five years under these conditions:

1. He must pay a fine of $5000. (He did by selling much of his furniture and household furnishings.)

2. In lieu of one year in the county jail he must work four hours a day, five days a week for one year at St. Anthony Dining Room. (He did.)

St. Anthony Dining Room is run by the gentle and compassionate Franciscan priest the Reverend Alfred Boeddeker, and it

...s difficult to set down exact and precise ...elines for the use or nonuse of alterna- ...sentencing. The judge must make his ...sion in relation to the particular facts of ...se. Obviously, crimes of violence and ...s involving the use of lethal weapons ...d proper subjects of such sentencing.

The value of such sentencing is fourfold.

1. It is a benefit to the people served, such as the poor, the ill, the severely handicapped and the mentally retarded.

2. It makes the defendant realize that many are less fortunate than he. He serves his fellow man.

3. It saves taxpayers the cost of food, clothing, bedding, cleaning and medical services at the county jail, where the daily cost of maintaining a prisoner is about $27.

4. Because of these benefits, it makes for a closer attainment of pure justice—the ultimate objective of our judicial system.

Alternative sentencing does not make sentencing easier, but it could make punishment a more worthwhile experience for the offender and a less costly one for society. And through alternative sentencing, the offender can return to society knowing that in some sense his efforts entitle him to reassume his place there.

Properly used, imaginative sentencing is good for all of us. □

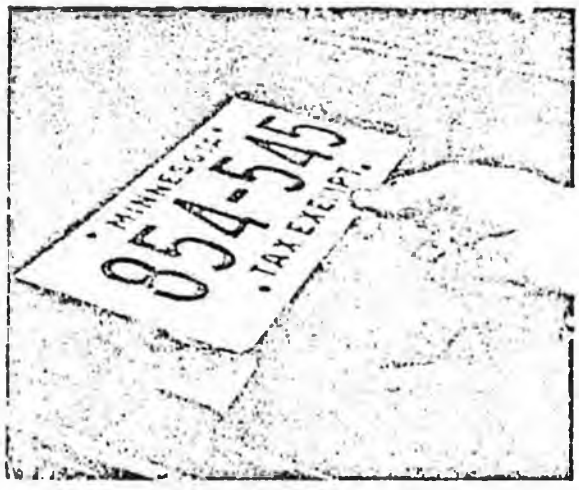
Experiments show that peo- ...are more likely to make restitution when ...can give back an amount equal to what they have taken.[18] If they can give back only an excessive amount (or an insufficient amount), they tend to justify their original conduct.



A different perspective on this issue has been raised by Stephen Schafer[19] and Kathleen Smith[20] who have recommended that

restitution should exceed the damages done. Schafer has advocated the explicitly punitive use of restitution on the grounds that restitution as the sole sanction might allow some serious offenders to purchase their freedom with a relatively mild sanction. Similarly, Kathleen Smith's concept of the self-determinant sentence involves a restitution requirement supplemented by a discre-

PHOTO BY BILL POWERS

tionary fine imposed by the court. To the extent that they are used in conjunction with restitution, fines have the effect of requiring excessive restitution—the offender is required to repay both the victim and society.

It can be argued, however, that in some cases where exceedingly large dollar losses resulted from the offense, full restitution may impose such undue hardships as to be unjust. Several policy proposals and standards have recommended partial restitution on such grounds. Clearly, however, most of the available evidence concerning the amount of loss resulting from criminal victimizations suggests that full restitution would not impose an undue hardship for most offenders. For example, the 1974 Uniform Crime Reports indicates that the average dollar loss in a burglary was $391 while the average value of property stolen in a theft was $156.[21]

A related issue concerns the specific criminal offenses for which the individual is to be held officially responsible. Should restitution be limited to offenses for which the offender was found guilty? If so, restitution might not cover a wide range of offenses settled by plea bargaining or ones that do not proceed through adjudication for whatever reason. From the victim's perspective, at least, the result would be partial restitution.

Alternative sanctions

What is the appropriate relationship of restitution to other criminal justice sanctions? To what extent does restitution interfere with the use of other sanctions and objectives of the criminal justice system? Available evidence suggests that while probation officers and judges in Minnesota tend to think restitution helps rehabilitate the offender, there is concern that restitution may reduce the offender's ability to care for himself and family.[22] In this instance, restitution may work against the rehabilitative objectives of corrections programs. But since offenses against property result in such limited damages, it seems legitimate to ask whether in most cases restitution is a sufficiently severe sanction.

Although restitution is occasionally imposed as a sole sanction, most jurisdictions appear reluctant to use it except in conjunction with other sanctions and treatments. The survey of Minnesota probation practices suggests that victims desire sanctions in addition to restitution.[23] Similarly, Galaway and Marsella found that when given a choice of a single sanction, victims, probation officers and police overwhelmingly preferred supervised probation to restitution. When asked to combine sanctions, the respondents overwhelmingly chose supervised probation with restitution.[24]

Similarly, most operational restitution programs tend to add restitution to existing sanctions or treatments. For example, restitution is most commonly employed in conjunction with supervised probation as a condition of pretrial diversion programs or as a condition of participation in a resi-

community-based corrections program. In each case, the usual pattern is to impose participation in some form of treatment activity such as group or individual counseling in addition to the restitution requirement.

The relative benefits of restitution as a sole sanction or in conjunction with other sanctions is an important question requiring serious examination. The increasing cost and questionable effectiveness of presently available criminal justice sanctions suggest the need to explore alternative sanctions for specified classes of offenders. Restitution may be one practical alternative.

The victim's role

Another set of questions concerns the appropriate role of the victim in a restitution scheme. Some approaches avoid making the victim part of the decision-making process for restitution; others encourage participation.

In the Minnesota probation services, victims generally do not become involved with offenders in restitution schemes, and in a substantial number of cases, victims were not even aware that they would receive restitution.[25] The probation officer apparently arranged for restitution without the victims' knowledge and, when ultimately collected, the restitution would be forwarded to the victims. Of the nineteen restitution programs we surveyed, only five usually involved the victim with the offender in developing a restitution agreement. Nine programs stated that such involvement occurred only occasionally, and five stated that it never occurred.

Data from the study of Minnesota probation practices indicate that direct victim-offender contact is overwhelmingly discouraged by judges on the grounds that such a practice would be against the wishes of the victims or might lead to further victimization.[26] Contrary evidence can be found to suggest that personal contact between victim and offender can minimize the offender's use of rationalization concerning the harm that he has done.[27] In short, [illegible] arguments can be made for or against [illegible] involvement in restitution programs, [illegible] empirical evidence exists to support [illegible] position. It is known, however, that [illegible] restitution programs emphasizing [illegible] offender contact and involvement in [illegible] development of restitution agreements [illegible] major problems have been reported. No [illegible] gram forces victim involvement, alth[illegible] we do not know the extent to which [illegible] may feel pressure from the program to [illegible] with the offender.

Another question concerns the weight [illegible] be given the views of the victim on whether [illegible] the offender should be offered an opportunity to participate in a restitution plan. [illegible] becomes particularly important if restitution [illegible] is perceived as a less severe sanction than [illegible] the alternative. For example, the [illegible] County Attorney's Adult Diversion Project [illegible] in Tucson has instituted the principle [illegible] victim approval as a prerequisite for the use [illegible] of restitution.[28] Apparently, victims [illegible] veto the admission of offenders into the [illegible] program. It is not clear, however, whether [illegible] cases likely to be vetoed are screened out [illegible] program staff.

Our survey of restitution programs [illegible] that only four programs allowed victims [illegible] exercise veto power. In general, then, the [illegible] pattern is one of not providing victims [illegible] the power to veto and substituting community service restitution in those cases where [illegible] victims do not wish to receive restitution [illegible] be otherwise involved.

To what extent will the fairness and appropriateness of the restitution requirement vary with the nature of the victims? Should restitution be limited to situations in which the victim is an individual, or should it [illegible]

...d when victims are large busi... insurance companies? If so, is ...anger that the restitution require... lead to the victimization of the ...

...Nader has expressed concern that ... will perpetuate a pattern of "in...donial imperialism" in which indi...ffenders are held accountable for ...restitution to corporate victims ...any corresponding requirement that ...offenders make restitution to indi...victims.[29] The obvious solution to ...ractice, of course, is to make both ...ties responsible for making good ...nal damages.

...ome of the relative extent to which ...im is functionally responsible for ...timized is receiving increased at... and raises further questions about ...of the victim in a restitution scheme. ...e past several years, a considerable ...of evidence has accumulated to sug...t the criminal act can most fully be ...ood as resulting from the behavior of ...tim and offender.[30] Either through ...ce or culpability, individuals may ... their own victimization. To what ...should such considerations influence ...s regarding the amount and type of ...on to be made?

...question has been largely neglected ...ational restitution programs; seven...nineteen programs said they made no ...ent of victim responsibility in arriv... either the form or the amount of ...d restitution. Similar findings were ...d in the survey of Minnesota proba...tices.[31]

...mplications of victim culpability are ...t. It is reasonable to suggest however ...in situations provoked by victims, ...s choose from among a variety of ...ve behaviors and should therefore be held accountable for the behavior that is chosen.

Conversely, program managers might consider using the concept of contributory negligence to permit reduction of restitution in relation to the culpability of the victim. Victim compensation programs generally provide that compensation payments can be decreased or denied on the basis of victim culpability.[32] At the same time, however, administrators of compensation programs note great difficulty in assessing culpability and report few denials or reductions of payments on this basis.

In this article we have identified and discussed several major questions arising from the use of restitution within criminal justice programs: the nature of the restitution sanction, the amount of restitution to be ordered, the role of the victim in a restitution scheme, and the relationship of restitution to other criminal justice sanctions. Gaps are apparent in both the operational use of the idea and in the evaluation and assessment of it. Given the limited amount of research evidence available, we simply lack an adequate basis for assessing the utility of the idea.

While a host of program and research needs are apparent, several areas deserve immediate attention. First, we must clarify what we mean by restitution. In particular, we need case studies of how restitution is implemented in different programs. Second, we need information and assessment of the use of restitution as the sole sanction, not supplemented by other treatments and criminal justice sanctions. Finally, we must develop ways in which victims can participate in restitution schemes and assess the benefits of their involvement for the victim, the offender, and the system of justice. □

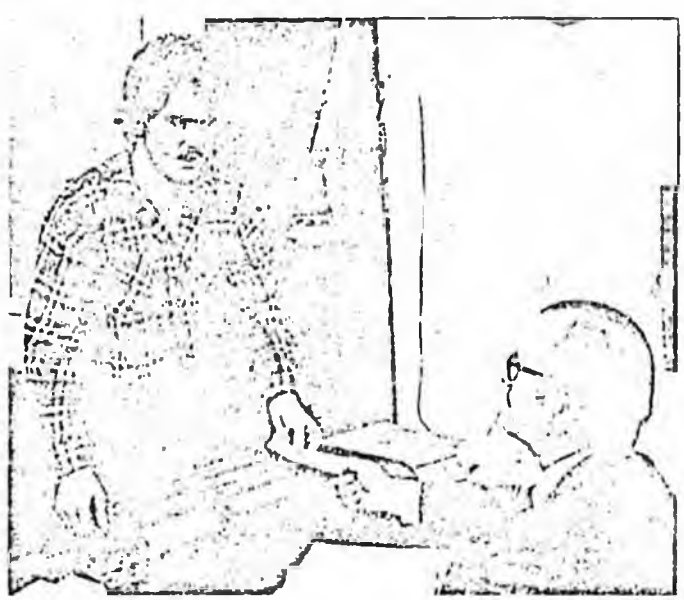
How restitution works in Georgia



By Bill Read

most states, Georgia has traditionally
the restitution sanction through un-
ured local programs. Restitution in
gia has most frequently been used as a
tion of probation or in connection with
pended sentence and is administered
by the judiciary and the Adult Proba-
Division.

Although recommendations regarding the
opriateness of restitution are often
by district attorneys and probation
visors in presentence investigation re-
the judiciary has historically received
or no state-level guidance in making
ution decisions. Before 1975 there were
ormal programs within which to use
ution.

In the last two years, the Georgia Department of Corrections/Offender Rehabilitation (DCOR) has begun to formally structure the use of the restitution sanction and to experiment with residential and nonresidential restitution programs. In 1975, DCOR initiated a two-year, LEAA-funded, pilot residential restitution program designed to divert offenders from incarceration. This program allows courts and the parole board to require

A Minnesota offender signs a restitution ment.

An offender in one of Georgia's residen- estitution centers turns in his paycheck to enter's business manager. The offender s a weekly living allowance and the busi- manager supervises regular restitution ents to victims via check. The rest of the eck goes for room and board at the center, support and savings.

offenders to make financial and/or community service restitution while living at the restitution center under close supervision.

This program proved so popular both with citizens and criminal justice personnel that the Georgia legislature voted—in a year of austerity budgeting—to assume state funding of the program beginning in fiscal 1977. Most of the DCOR's other residential community facilities have since been modified to incorporate the restitution program policies and procedures developed by the pilot grant.

The second restitution program, also funded by a two-year LEAA pilot grant, is intended to develop a formal, research-based, nonresidential restitution system. This program draws heavily upon experience gained from the residential program. It is applicable to a wide variety of offenders, it can be implemented at any time from presentence to post-incarceration, and it can be easily expanded in Georgia or replicated in other states.

Residential restitution

The original two-year discretionary grant established residential centers in four metropolitan areas: Albany, Atlanta, Macon and Rome. The goals of the program were (1) to reduce the prison population by diverting eligible offenders to the restitution program; (2) to involve citizen volunteers in the rehabilitation of offenders from their own community; (3) to demonstrate effective methods of offender restitution; and (4) to determine the cost-benefit factors of residential restitution.

Offender eligibility: The program is open to "any male offender whom the judiciary or the parole board would normally incarcerate in lieu of program participation and for whom restitution would be appropriate." Referrals are obtained through direct court sentencing, direct parole, and revocation proceedings. Thus, the restitution program is a diversion from prison for eligible probationers and parolees.

The Restitution Center Program began under the legal auspices of existing legislation which enabled the DCOR to make participation in the restitution program a special condition of the probation order or parole decree. If an offender fails to participate satisfactorily in the restitution program, his parole or probation may be revoked and he may be imprisoned.

Program administration: The four centers have capacities ranging from twenty-seven to thirty-three offenders. The total residential capacity is 120. Each center has a basic staff of nine—usually a superintendent, a business manager, a typist, a probation/parole supervisor, a counselor, and four correctional aides and/or correctional officers.

This core staff is supplemented by various volunteers, student interns, and citizen volunteers. Citizen volunteers take on a variety of responsibilities. Individuals provide direct one-to-one contact with offenders; schools, churches, and civic organizations give general support and sponsorship to the restitution center program.

Each restitution center is encouraged to develop specific treatment programs based on the needs and abilities of their residents and staffs and the resources of their communities. Staff members help offenders to find jobs in the community and to develop a realistic budget. The offender must turn all his pay checks to the business manager who disburses the money into specific budget category accounts against which the offender draws on a regularly scheduled basis.

Close surveillance of an offender's behavior and activities continues throughout his residence at the center. He must sign out each time he leaves the center, report his destination and return to the center at a specified time. He can visit his family overnight periodically if he has obeyed center rules and satisfactorily participated in treatment programs.

Each offender receives basic counseling

Below: *The Athens center is located in a renovated suburban house. It typifies the kind of community facility the Georgia Department of Corrections and Offender Rehabilitation is striving to promote.*

from center staff, and he can get specialized help from community resource agencies. Also, citizen volunteers are actively involved in in-house educational and informational programs and in helping individual offenders in a variety of ways. Every effort is made to involve the local community in the treatment and rehabilitation of local public offenders and to increase the offender's awareness of community responsibility.

Mechanisms of restitution: The Restitution Center Program uses both financial and community service restitution. With probationers, the judge determines whether the probationer must make full or partial financial restitution. The probationer then begins residence at the restitution center and allots a certain amount of each paycheck toward restitution. Sometimes he is required to live at the center until the total restitution has been paid. More often, however, a probationer who has demonstrated adequate stability and responsibility for several months will be allowed to complete his restitution on a non-residential basis. Probationers may be required to make community service restitution in lieu of or in addition to financial restitution.

Eligible parolees are typically required by the parole board to live at the restitution center for a specified period of time, to maintain stable employment, and to participate in unpaid community service after work on evenings or weekends. The center staff determine the actual nature and extent of the community service to be required. To date, numerous forms of community restitution have been used. Residents have worked in mental hospitals and health centers, repaired the houses of aged pensioners to prevent condemnation, worked with children in recreational programs, assisted in volunteer counseling with juvenile offenders, and conducted community clean-up projects.

Victim involvement: The extent of victim/offender contact in the Restitution Center Program has been minimal. Most victims prefer simply to recover their losses without meeting the offender. Consequently, the victim typically is sent a letter explaining that the enclosed check represents financial restitution being made by the offender. In occasional cases in which confrontation is feasible and is deemed important, center staff will arrange for the offender to repay the victim face-to-

Every effort is made to involve the community in the treatment and rehabilitation of local offenders.

Most such confrontations have been received by both victims and offenders.

Professional reactions: Professional reactions to the Restitution Center Program have been extremely positive. Judges like the program because it gives them an intermediate sentencing alternative stronger than regular probation and less harsh than prison. The parole board likes the program because it can release eligible parolees to a transitional experience in the community—a better alternative than regular parole supervision or release without supervision at the end of sentence. Probation/parole supervisors like the program because it is a meaningful alternative which they can recommend to the judge in lieu of revocation to incarceration. And the supervisors who work directly in the Restitution Center Program enjoy the opportunity to work intensively with their men. Social workers like the Restitution Center Program because it doesn't disrupt the family relationship; the social worker can help the offender and his family within the local community, and the offender can continue to support his family so they don't become dependent upon welfare.

Community reaction: Community reaction to the Restitution Center Program concept has also been strongly positive. Citizens particularly appreciate the fact that the Restitution Center Program may make it possible for them to obtain either

estitution of their losses if they ever a victim. They also like the idea of working constructively, paying al partially defraying the cost of rehabilitation. Generally, citizens restitution concept as a much more response to crime than prisons he state spends money to support virtual idleness.

wever, most offenders seem to genuppreciate an opportunity to redress tial unacceptable behavior through ent direct and relevant positive be-

ram statistics: Almost all offenders d in the Restitution Center Program en property offenders. The most offenses are burglary, theft, and Eighty-five per cent of the residents mmitted felonies; 15 per cent are restitution for misdemeanors. wo per cent are probationers; 18 per e parolees. Fifty-seven per cent are 3 per cent are black. Of the 504 rs accepted into the program through 976, 120 remain in residential status, have left the program. Sixty-three of these were positive terminations chieved release or release to nontal supervision), and 37 per cent egative terminations (they were re- they absconded).

eal 1976, offenders making restitutesidential centers:

- aid $62,500 to victims.
- Paid $172,500 in state and federal
- eturned $256,800 to the state in projcome (room and board maintenance
- ent $336,300 in the local communiliving expenses such as food, clothsportation, and personal items.
- d $113,100 for financial support of milies, thus reducing state welfare
- ved $61,600 as nest eggs to use when released from residential supervi-

effectiveness: Three basic factors diaffect the program's overall costness. These factors are diversion certainty, turnover rate and efficiency rate. All figures used here are based on current DCOR statistics.

1. *Diversion certainty.* The importance of diversion certainty can easily be seen by considering a few basic costs. The annual cost of operating a thirty-resident restitution center is about $116,000. The annual cost of supervising thirty offenders on probation or parole (at $205 per offender per year) is $6,150. The annual cost of imprisoning thirty offenders (at $4,045 per offender per year) is $121,350.

Therefore, a residential restitution center cannot be basically cost-effective if it serves only offenders diverted from probation. Thus, a restitution center in which half the residents are divertees from probation and half are divertees from prison will cost $116,000—far more than the $63,750 that usual sanctions cost ($3,075 for field supervision cost plus $60,675 for incarceration cost).

Therefore, a primary objective in diversion-from-prison programs is to ensure that the method of selecting offenders guarantees that program participants are people who would otherwise be imprisoned. Such a method would either have judges subsequently amend the prison sentence of those chosen for the program or have parole boards give parole conditional upon participating in the program.

2. *Turnover rate.* A restitution center can dramatically increase its basic cost-effectiveness by increasing its turnover rate. For example, since the annual cost of operating a thirty-resident center will remain essentially constant, a center with an average turnover rate of six months can serve sixty offenders in twelve months at a cost of $116,000. If we make the assumption that most property criminals who are sentenced to prison will normally serve a minimum of twelve months, then the comparative cost of imprisoning those sixty offenders is $242,700. Thus, another primary objective of a residential restitution program is to select offenders who could be stabilized relatively quickly and could finish making their restitution on a nonresidential basis.

3. *Efficiency rate.* The efficiency rate, or

the percentage of program successes versus program failures (revocations and absconders), is another important factor in cost-effectiveness. Program failures reduce both diversion cost-effectiveness (failures are imprisoned, thus reducing comparative imprisonment cost-savings) and turnover rate cost-effectiveness (failures consume space and time, thereby reducing the number of successful program participants who can flow through the program). Here again, one important key to increasing program efficiency is to ensure that the program staff controls admissions of eligible offenders to the center. Efficiency should increase only because of increased selectivity, also because of a greater staff commitment working with those offenders who are personally selected.

Of course, reality is much more complex than these examples. These three factors interact constantly, and there are many other factors, both subtle and overt, that influence the ultimate cost-effectiveness of the program. But a residential restitution center which ignores these three basic factors will probably never be cost-effective and is courting fiscal disaster.

These restitution center residents are working on a community service project—repairing the [illegible] of aged pensioners to prevent their condemnation for building code violations. The construction materials are either donated by charities or supplied by the homeowners.

esidential restitution

s nonresidential Sole Sanction Res- Program began in fiscal 1977 as a search grant to the DCOR from the . The goals of this grant program are develop a research-based restitution which realistically addresses and the needs of the criminal justice victims, and offenders; and (2) to research into the costs and benefits a program.

is program, restitution is the sole probation supervision continues til restitution has been made. The emphasizes citizen-supervised nity service restitution for indigent rs, and it redefines the role of the on supervisor as a community organ- izen manager.

gram administration: The Sole Sanc- estitution Program is being imple- at both the sentencing and post- eration levels in four of Georgia's wo judicial circuits and involves a seventeen. At the state level, the an is coordinated by a planner, a re- r, and a secretary. They are respon- r the overall planning, development, mplementation of both program and h objectives and they work with personnel, the parole board, and the to accomplish grant goals.

ach of the four judicial circuits, three implement the program—a restitu- pecialist, a correctional casework aide, typist. They develop the program in d and help collect research data. They directly with offenders, victims, and minal justice system.

the field prison level, the program is mented by one restitution specialist typist who serve as liaisons between ole board, the DCOR, and field cir- rsonnel. They screen incoming pris- from the four experimental circuits at orgia Diagnostic and Classification and develop restitution plans which ole board will review.

nder selection procedure: Admission program is restricted to those offend- in the four experimental judicial cir- who have committed non-violent crimes for which restitution is suitable and who can realistically complete restitution within eighteen months. Grant personnel conduct presentence or post-incarceration investigations on all offenders who meet program consideration criteria and work with the offender to develop a proposed restitution plan to submit to the court or parole board. Random selection is used to generate comparable experimental and control groups.

The restitution plan: The restitution plan consists of a performance agreement which specifies the extent of restitution—both the amount and the type—which the offender agrees to make. The restitution specialist develops this plan with the offender and submits it for court or parole board approval, at which time the restitution specialist acts as an offender advocate. If the court or parole board modifies the plan in a way the offender will not accept, he can choose not to participate in the program. (For probationers, the restitution agreement is made a part of the conditions of probation.)

Once his restitution plan is approved, the inmate receives a conditional reprieve from the parole board, and his parole depends upon completing restitution. Normally, the performance agreement specifies that completing restitution will end the offender's involvement with the criminal justice system. Monthly progress reports on the offender's progress go to the court or parole board, and any offender who fails to keep his agreement is returned to the criminal justice system for appropriate disposition.

Financial restitution: Full financial restitution is paid by those offenders who have the earning power to make such restitution and still meet their financial obligations. Those offenders who can afford to make only partial financial restitution must complete the remainder of their obligation through community service restitution. The restitution specialist helps the offender in budget planning, debt consolidation, and vocational counseling, including agency referrals.

Community service restitution: When an offender cannot make full financial restitution, he can substitute community service restitution—unpaid work for the good of the

general local community. The dollar value of restitution owed is converted to equivalent hours of service restitution based on the type of service performed, in a manner which reflects fair market value. Service restitution may be either "in-kind" or general service restitution. "In-kind" restitution is

Through service restitution, the public offender becomes a community resource, rather than a community liability.

an activity related to the original offense (working on a community beautification project after a conviction for littering); general service restitution is an activity unrelated to the original offense (working on community beautification after a conviction for disorderly conduct). To avoid the risk of further victimization or lawsuits, offenders never make service restitution directly to victims.

The restitution specialist organizes citizen advisory committees of local community leaders from all walks of life—businessmen, labor officials, ministers, members of volunteer and charitable organizations, and others. The committees identify suitable tasks which offenders can perform to benefit the local community. Since people recognize the value of these tasks, the public offender becomes a community resource and asset rather than a community liability.

All community service activities are formally sponsored by local community organizations. A "key volunteer" member of each organization works along with the offenders to supervise the tasks. Supervision may be continuous, intermittent, or nominal, depending on the nature of the task. It is only necessary that a few people in service organization know the offender' tus; he himself need not reveal his stat anyone. This arrangement eliminates s stigma so that community service can positive experience for the offender. program tries to find offenders who shown an interest in performing a partic type of community service as a mean making restitution. Then they try to m sure he realizes that the community va his efforts.

Victim involvement: After determi the nature and extent of restitution t made, the restitution specialist notifies victim by letter of the outcome of the and what restitution he can expect. W the offender is making restitution, the vic is kept informed of the offender's progr If the offender is making financial rest tion, his payments serve as the prog reports. If the offender is making serv restitution, the restitution specialist se the victim quarterly progress reports al the activities. If the offender defaults u his agreement, the restitution specialist t the victim what happened and what to pect (delayed payment, revocation proce ing, etc.). Each victim, of course, can wi draw at any time from further contact w the restitution program.

Potential impact: Like all pilot progra this grant program is small in relation Georgia's total problems and has had lit initial impact on the problems facing t DCOR. But, a well-planned experimen program, like a tiny acorn, can lead to impressive outcome in a fertile enviro ment.

This grant program could reshape a revitalize the traditional use of the restit tion sanction in Georgia. By making t probation supervisor a community organiz or citizen manager who ensures restitutio by offenders, the supervisor acquires a vehi cle to enlist citizen support of communit correctional efforts. If a truly effective mea of offender restitution can be develop through this program, the presently loo and varied use of the restitution concept Georgia can be consistently structured stat wide as the program concept expands int

...e directions

...orgia DCOR is already expanding ...tion programming. We hope to even... ...establish one restitution program in ... Georgia's forty-two judicial circuits. ...ly such expansion will require time, ... and local community support. To ...e that support, we plan to emphasize ...at the community can participate in ...gram. The DCOR has already begun ...ize local civic and community lead... ...serve on Citizen Advisory Boards for ...nty correctional programs in their ... We are also encouraging the establish... ... Community Correctional Associa... ... local communities to help generate ... for improved community correc... ...programs of all types.

...lso plan to increase the use of com... ...service restitution both alone and in ...tion with financial restitution. The typically low earning power of the offender and his frequent inability to make full financial restitution is the primary reason for this shift in program emphasis. Furthermore, community service restitution appears to be the area within which the rehabilitative potentials of restitution programming can best be realized.

Finally, we plan to use ongoing research to improve the efficiency of specific restitution programs. We need to determine the costs and social benefits of these programs so that future programs can maximize services while minimizing costs. Research will show what kinds of participants benefit most from each type of restitution program. Thus, we will know whom to select for each program and what results to expect.

The Georgia DCOR—grappling with excessive probation caseloads, seriously overcrowded prisons, and a narrow range of sentencing alternatives—is presently acknowledged to be largely ineffective. But DCOR administrators are dedicated to providing the leadership required to correct deficiencies in the current system and to make each offender directly responsible for the consequences of his own behavior. This long-range plan emphasizes pretrial diversion programs, a broad range of specialized alternatives to traditional criminal justice sanctions, a positive and objective system of contracting with inmates whereby they must *earn* their release from prison, and pre-release/aftercare programs designed to reintegrate ex-offenders into society.

Thus, restitution programming is only one aspect of the comprehensive system which Georgia is building. Since the DCOR firmly believes that offenders must be held responsible and accountable for their behavior, the development and expansion of meaningful restitution programs as an integral part of the improvement of the criminal justice system in Georgia seems inevitable. □

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 212 Date on Bill: 2/17/83
Title: An Act relating to crime victim compensation; providing effective date
Sponsor: Pestinger and Clocksin
Requestor: HOUSE JUDICIARY

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

	FY 83	FY 84	FY 85	FY 86
Capital				
Operating	120.4	333.6	351.1	362.1
Total	120.4	333.6	351.1	362.1

b. Revenues:

Revenue	

2. Source of funds to offset fiscal impact of bill:

Not indicated by sponsors of bill

3. Assumptions:

If the proposed legislation is enacted, it is anticipated there would be an increase of approximately 50 claims. It is estimated we would receive 40 assault claims (the statute covers only Assault I and II) of which we estimate 26 claims would receive compensation, and we would receive 10 death claims and 5 would be awarded, including 2 claims with one dependent per incident and 3 claims with multiple dependents. There will be additional hearings as with the change in the statute, the Board will want to be certain the offender will not receive any of the compensation.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

	Part Time/Seasonal				
	Non-Perm				
	Months	4	12	12	12

ANALYSIS:

If the proposed legislation is enacted, it is anticipated there would be an increase of approximately 50 claims. It is estimated we would receive 40 assault claims (the statute covers only Assault I and II) of which we estimate 26 claims would receive compensation. The average award is $4500.00 per claim so 26 claims would total $117,000. It is estimated the program would receive 10 death claims and 5 would be awarded: 2 claims at one dependent per incident would be $50,000 and 3 claims for multiple dependents would be $120,000 for a total estimated grant money of $287,000.

Because there will be an increase of claims, it is determined it will be necessary to have one more board meeting at a cost of $1500.00. Because of the repeal of the statute it is anticpated there would be 8 hearings at $800 for travel per hearing. The reason for more hearings is because of the change in the statute, the Board will want to be certain the offender will not receive any of the compensation and because of circumstances in some cases, they may order a hearing prior to a final determination by the Board.

The current staff for the Violent Crimes Compensation Board consists of two persons. This change in the statute would necessitate the addition of a clerk typist (range 8) and associated costs, including equipment.

(continued)

Under contractual services, there would be a need for a terminal only for the IBM displaywriter at $3000.00 per year. There would be the cost of hearing officers' fees for 8 hearings at $700 per hearing and a total cost of $5600. Since this will be a major change in the statute, the public must be made aware through TV spots, radio and newspapers. Production of the TV spots will be a one time expense as will the radio spots. These spots should cost around $6500 plus another $1000 for public notices in newspapers around the state.

The costs are assumed to begin 3/1/83.

JUSTIFICATION

The number of claims received annually by the Violent Crimes Compensation Board has doubled since 1976 and is projected to double again during the two-year period ending 6/30/84. Yet the program has only the same two-person staff it had in 1973.

It is anticipated the change in the statute will increase the number of claims by 50. This increase, on top of the existing understaffing, will necessitate the addition of a clerk-typist and associated costs, including equipment.

Since this is a major change in the statute, all the applications, brochures and posters will have to be redone. The public must be made aware of the changes through TV, radio and newspapers, again much clerical work. There will be an increase in hearings, which must be transcribed verbatim.

The equipment costs include a desk, chair, file cabinet, table, calculator and transcriber.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 212 Date on Bill: 2/17/83
Title: An Act relating to crime victim compensation; providing effective date
Sponsor: Pestinger and Clocksin
Requestor:

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital								
Operating			120.4	333.6	351.1	362.1		
Total			120.4	333.6	351.1	362.1		

b. Revenues:

Revenue								

2. Source of funds to offset fiscal impact of bill:

Offender Programs

3. Assumptions:

If the proposed legislation is enacted, it is anticipated there would be an increase of approximately 50 claims. It is estimated we would receive 40 assault claims (the statute covers only Assault I and II) of which we estimate 26 claims would receive compensation, and we would receive 10 death claims and 5 would be awarded, including 2 claims with one dependent per incident and 3 claims with multiple dependents. There will be additional hearings as with the change in the statute, the Board will want to be certain the offender will not receive any of the compensation.

4. Disclaimer:
This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

VIOLENT CRIMES COMPENSATION BOARD
POSITION PAPER
ON
HB 869 (HALFORD & CLOCKSIN)

"An Act relating to crime victim compensation; and providing for an effective date."

The majority of the Board (one member was unavailable for comment) supports this bill, with the exception of 18.67.130(a)(2) and 18.67.135, to which they are opposed. The Board feels these two amendments would unfairly penalize certain claimants, who because of fear of the offender, may move to dismiss criminal charges. This is particularly true in cases where both parties reside in a small, isolated community and the offender is expected to receive an extremely light sentence or will be released on bail, a common occurrence.

The Board presently has the discretion to deny claims in cases where the victim does not cooperate in prosecuting the offender, and would prefer to retain this discretion so that those few victims who can show just cause for dismissing charges are not arbitrarily denied. While the Board agrees compensation should not be awarded on a "revolving door" basis to victims of domestic violence, they feel it would be inappropriate to make a blanket exclusion such as these amendments.

The Board would prefer 18.67.135 be amended to delete the portion dealing with dismissal and forfeiture of awards, while retaining the restriction on subsequent incidents involving the same offender when the victim initiates dismissal of criminal charges.

It should be emphasized, however, that this position does not include the opinion of the Chairman of the Board, who is the member unavailable for comment prior to the hearings on this bill.

The Department of Public Safety supports in concept HB 869.

POSITION PAPER

HOUSE BILL NO. 869

AN ACT RELATING TO CRIME VICTIM COMPENSATION

This Bill would amend the present Violent Crimes Compensation Act in order to include family members.

The Council on Domestic Violence and Sexual Assault agrees that innocent victims should be compensated no matter what their relationship is to the assailant. Therefore, the Council supports this Bill

The Council believes that Sec. 3 (a)(2), line 25 is a reasonable protection for the use of state funds and may be an incentive for people not to initiate dismissal of criminal charges.

William R. Nix, Chair

16LH

SENATE HEALTH & SOCIAL SERVICES
EXHIBIT PAPER / Department of Health & Social Services

POSITION PAPER
ON
CS FOR HOUSE BILL NO. 345 (HESS)

"An Act relating to compensation for victims of violent crimes; and providing for an effective date."

The Department's former concern that legislation was necessary so the perpetrator did not receive the compensation has been resolved by the compensation being paid directly to the provider in domestic violence crimes. Section 3 (c) limiting compensation to $25,000 per victim per incident also seems reasonable.

The Department of Health and Social Services supports the Committee Substitute for House Bill No. 345.

M E M O R A N D U M

TO: Representative Charlie Bussell DATE: February 9, 1983

FROM: Representative Don Clocksin SUBJECT: HB 104 Violent Crimes Compensation

This memo is to request action on HB 104.

Basically, the bill allows victims of domestic violence to receive compensation under the Violent Crimes Compensation Program. The present law prohibits compensation where the victim lives with the attacker or is related to him. See AS 18.67.130 (b) (1) and (2).

The present exclusion for domestic violence victims is unfair, and denies to victims of these crimes the funds necessary to pay for treatment of their injuries. Protection from fraudulent claims is provided in this bill by the provision allowing vender payments, e.g. directly to the hospital to pay the emergency room charges.

The bill expands the rights of victims of crime, and is, in my opinion, good public policy.

We have requested a fiscal note and will provide it to you as soon as possible. Last year the Violent Crime Compensation Board and the Department of Public Safety supported a similar bill.

Thank you.

DATE: March 9, 1983

FROM: Rep. Don Clocksin

SUBJECT: HB 104-Violent Crimes Compensation

On February 9 I sent you a memo requesting action on HB 104 and indicating that I would provide a fiscal note to you as soon as it is available. Attached is the fiscal note provided by the Violent Crimes Compensation Board.

That fiscal note is too high.

For an almost identical bill filed by me in 1982, the same person estimated a fiscal impact of $199,800. The fiscal note for HB 104 is $333,600. Included in the fiscal note is almost $50,000 in additional staff and equipment. This bill does not necessitate those expenditures. My bill should not be used as an excuse to increase the budget of the Violent Crimes Compensation Board because of other, unrelated workload problems.

OF COUNSEL

April 13, 1983

Representative Charlie Bussell
Alaska State Legislature
Pouch V (MS 3100)
Juneau, AK 99811

Dear Sir:

This is in regard to a matter which greatly concerns me and a number of other attorneys practicing in the Third Judicial District, containing Anchorage and the surrounding area.

There is a very real problem with flooded court calendars, overworked judges, and trailing calendars. The problem is that each judge in Anchorage is assigned over 900 cases and because of the work load, the judges are putting in many more hours than they should be expected to. This has also created a crisis in court calendaring in the sense that major civil cases are now being calendared up to 12 months from the time of the pre-trial conference. This results in clients who become angry with the inordinate length of time in resolving civil disputes, and when they ask us why, we tell them that we don't have enough judges in town to try the cases.

This is a request then, for a legislative appropriation which would permit the Alaska Court System to fund the creation of two additional superior court judgeships. As you may recall, the last superior court judgeships to be created in the Third Judicial District was three years ago, in 1980. In that interim three-year period, we have seen a phenomenal growth in the population of the Municipality of Anchorage, along with increased commerce, business, and crime. The increase in crime has resulted in superior court judges assigned to try the felony case load who have been unable to absorb these additional criminal cases which have been spread out among the superior court judges assigned to try civil cases. I would therefore request your help in securing funds to allocate two additional superior court judgeships in the Third Judicial District.

Thank you for your attention to this matter, and please contact me if I may provide any further information. With kindest personal regards, I remain,

Very truly yours,

Roy W. Matthews III, J.D.

April 27, 1983

Mr. Roy W. Matthews, III, Esquire
HAGANS, BROWN & GIBBS
310 "K" Street
Anchorage, Alaska 99501

Dear Mr. Matthews:

Thank you for bringing to my attention the very serious matter of the overcrowded calendar of court cases in the Anchorage area. In general, I believe the public is well aware that an adequate number of judicial officers are needed under the conditions of population increase, crime increase and back-logged civil cases that you describe.

This year the Alaska Court System did not request any additional judgeships be created as you perhaps know. However, Representative Bette Cato of Valdez introduced a bill, HB 214, that would elevate the position of District Court to that of Superior Court in her area. This measure was passed out of the House Judiciary Committee on April 8th and is now in the House Finance Committee.

Without denigrating any need for more far-reaching judicial services in Valdez, your letter points out that the real crunch appears to be in the Anchorage area. I am having my staff look into this matter more closely and perhaps staff counsel will be in touch with you.

Incidentally, would you be adverse to the idea of creating a single-level trial court in this State? I understand there is more than one way that can be accomplished, such as (1) increasing the jurisdiction of District Court Judges to both civil and criminal cases; and (2) elevating all District Judges to a position with some new name or designation, such as "Associate Superior Court Judges."

Under (1) above, it might be that more District Judges would have to be added, but they could assist in the criminal area and in the civil backlog if they were to have the same jurisdiction (for example, perhaps by assignment for

hearing felony cases or civil matters beyond their present jurisidictional limit of $10,000 as the amount in controversy). Under (2) above, an "Associate" Superior Court Judge could be assigned to hear felony matters from start to finish including trial and sentencing and to civil matters of great impact as well.

Please let me know your further thoughts on these matters that could be of assistance to me and/or the Committee.

Thank you for involving yourself in the legislative process.

Very truly yours,

Representative Charlie Bussell
Chairman, Committee on Judiciary

CB:lyn

LETTER OF INTENT

HOUSE JUDICIARY COMMITTEE
April 8, 1983

It is the intent of the House Committee on Judiciary that the superior court judgeship in Valdez shall not be filled until the Supreme Court eliminates the Valdez district court judgeship.

April 8, 1983

HB 214--By Rep. Cato

Statistics phoned in from Anchorage today:

In the past 16 months, to date, there have been 9 trips from Anchorage by Superior Court judges to hold court sessions in Valdez and Cordova. (Four trips to Cordova, Five to Valdez)

Five different Superior Court judges of Anchorage were involved in handling the nine trips.

Total number of days scheduled for them was 36 working days, although one of the 5-day schedules was canceled, making 31 actual days expended by a judge away from Anchorage.

For May, June & July, 1983, there are three five-day trips scheduled, two to Valdez and one to Glennallen, for a total of 15 projected work days. (These will be handled by Judge Cutler, out of Palmer).

3/8/83

FY 84 COST OF IMPLEMENTING HB 214

PERSONNAL SERVICES:

Salary (Superior Court Judge - Valdez)	$ 82,368
Benefits (Retirement, variable & fixed)	80,129
Total Cost of Superior Court Judge	$162,515
Less: Budgeted funds for exisiting District Court Judge position.	141,157
Net cost of upgrading Valdez court to superior court level.	$ 21,358

ANALYSIS:

This bill would upgrade the district court judge position in Valdez to the superior court level. The fiscal impact is limited to the increased costs of salary and benefits. There appears to be adequate clerical support in Valdez at the present staffing level.

While it would be beneficial to the court to add a law clerk ($38,000/year total cost) this is not requested at this time.

HB 214
Analysis

This bill would establish a superior court judge position in Valdez, Alaska. The prosecution of criminal cases in Valdez is currently handled through the maintenance of a small office staffed by a paralegal in Valdez, and the services of an attorney from the District Attorney's office in Palmer. An assistant district attorney now travels to Valdez approximately once a month, and stays there for about one week. If a superior court judge were permanently assigned to Valdez, it is estimated that the increased workload would require that this assistant district attorney travel to Valdez twice a month for about a week each time.

Caseload statistics indicate that the Palmer District Attorney's office can satisfactorily service the Valdez area through periodic visits. Some members of the Valdez community have expressed a desire for a fully staffed district attorney's office located in their area, however. At a minimum, the opening of a complete district attorney's office in Valdez would require the addition of one full-time prosecuting attorney, one full-time secretary, more office space, and basic legal research materials.

HB 214
Fiscal Analysis

It is estimated that the establishment of a superior court in Valdez will increase district attorney travel to Valdez from one week each month to two weeks per month. Current annual travel expenses for Valdez are estimated at $15,000 including witness subsistence expenses. A doubling of this effort would require an additional $15,000 in travel funds. This is the total amount being requested in this fiscal note.

Caseload statistics indicate that the Valdez area can be satisfactorily serviced from other offices until such time as the caseload warrants a full-time resident prosecutor. At the present time Valdez is being handled by our two attorneys from the Palmer office where Valdez cases represent only 20% of their total caseload.

Creation of a full service prosecutor's office at Valdez would require the addition of one Attorney V and one Legal Secretary I, as well as associated support costs for expanded office space, equipment, word processing, a small law library, and increased communications. The following additional costs would be incurred to establish such an office on a 10 month year start-up basis:

Personel Services	94.2
Travel (single time transfer cost)	7.5
Contractual (expanded office space & communications)	10.0
Commodities - on-going	4.0
Commodities - single time	6.0
Equipment - single time	17.5
Total	$139.2

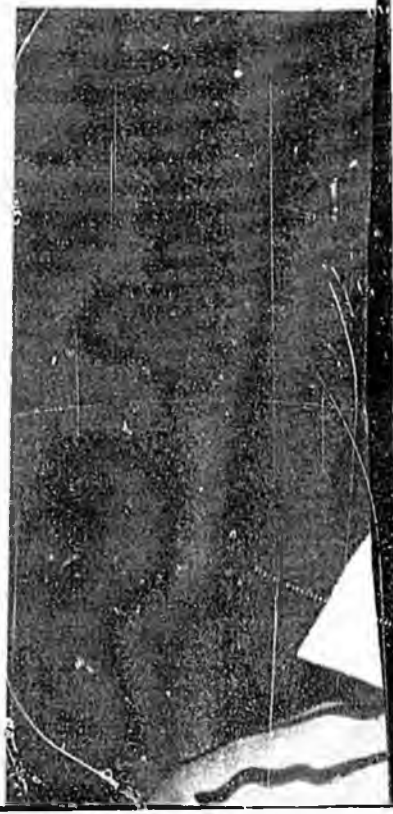
Teens tried as adults in House measure

The Associated Press

JUNEAU — The House has approved a measure requiring some juveniles accused of violent crimes be tried as adults.

The measure would let 16- and 17-year-olds accused of such crimes as murder, rape and arson be tried in adult court.

Rep. Don Clocksin, D-Anchorage, on Friday tried to have the bill (CSHB109) amended so that the charge on a 16- or 17-year-old would not dictate that the person automatically would be sentenced as an adult if convicted of a lesser offense.



But bill sponsor Rep. Sam Pestinger, R-Anchorage, said a section of the bill gives a judge discretion on whether to sentence someone as an adult.

House Minority Leader Mike Miller, D-Juneau, said that one of the laudable things about the judicial system is that persons are innocent until proven guilty and the bill would destroy that.

Miller said that if a jury or judge finds the teen-ager guilty of a lesser crime, then the state shouldn't want to sentence as an adult.

House Majority Leader Ramona Barnes, R-Anchorage, said that the section giving the judge discretion also precludes presumptive sentencing.

Clocksin, after his amendment failed on a 17-20 vote, said the

Bill would send home stranded

3-30-83

by Bill White
Times Juneau Bureau

Juneau — Stranded Outsiders may get one-way tickets out of Alaska courtesy of the state under a bill approved by the House Judiciary Committee Tuesday.

The bill would create an office under the attorney general whose staff would seek out and identify stranded nonresidents who might request assistance and whose immediate departure is in the best interests of the state."

Before the stranded alien could get aid, a judge, magistrate or police chief must consent, under the bill.

The proposal is an "effort to save the state a lot of money and at the same time help some people who may will be in desperate need of help," said Rep. John Lindauer, R-Anchorage, the bill's sponsor.

Lindauer has offered a companion bill that would let the governor pardon a released prisoner if that person leaves the state within 14 days of release and doesn't return to Alaska for

See Bill, page A-

Bill offers way out

Continued from page A-1

three years.

Rep. Charlie Bussell, the committee chairman, said the second bill didn't move today because the panel is waiting for information on the measure's cost.

Lindauer's bill was endorsed by the head of Alaska Psychiatric Institute and by officials of the Salvation Army in Alaska.

Dr. Harold Conrad, head of API, said that one year 121 of the patients referred to his hospital had been in Alaska less than a year. And 42 of them were in the state less than a month.

The average stay in API is 30 days, which costs about $6,000, he said. The cost of shipping out those who want to leave the state is about $500 each, he added.

Capt. David Clitheroe of the Salvation Army in Anchorage said the bill "is something that is definitely needed." He averages 30 requests a month for one-way tickets Outside, none of which he can grant unless a private donor gives the money, he said.

Capt. Floyd Bacon of the Salvation Army in Juneau said he gets six to 10 such requests a month.

Rep. Don Clocksin, D-Anchorage, said told his fellow committee members he didn't "think the bill is necessary. The only thing that's necessary is some money."

The Department of Law, which would run the program, apparently is lukewarm to the idea.

"Grant funds to return just 1,000 stranded nonresidents would cost $330,000. This number of stranded nonresidents may seem excessive, but it may prove very low once the state signals that it is willing to subsidize the cost of job hunting to the unemployed living outside the state," Richard Pegues, budget chief for the Law Department, said in a note that estimates the effort will cost $740,300 next year.

But Lindauer said the requirement that a judge or police chief approve the aid is enough to avoid abuse.

"I'm referring to the young man who came up here thinking he's going to work in construction or up at Prudhoe Bay," Lindauer said. "He loses his job, cannot find another one and holds up a Qwik Stop (store). He's caught in a vicious cycle of poverty and degradation — no place to stay and live, stays out on the streets, gets in trouble, goes to jail, gets involved in narcotics or other problems, gets back on the street — is caught in this vicious cycle. It's a way to break this vicious cycle, allow the people who wish to leave the freedom to leave," he said.

Island

Continued from page A-1

And according to Sohio Intercom, the firm's employee newspaper, the gravel doesn't surrender easily. In permafrost, it is being blasted loose, plowed with ripper blade-equipped tractors, then loaded onto the trucks for the 14-mile haul.

The first six of those 14 miles are over a tundra ice road that is at least six inches thick. After the trucks reach the coast, the haul is on an ice road scraped on the surface of the frozen Beaufort Sea.

Sohio exploration manager Roger Herrera said $100 million will be spent in building Mukluk, including erection of a portable camp near Oliktok for equipment operators and support staff.

'Get-out-of-state' bill faces legal questions

by Bill White 4/13/85
Times Juneau Bureau

Juneau — A second House committee has approved a bill to give some stranded Outsiders one-way tickets out of Alaska despite a warning that the proposal might be unconstitutional.

The Finance Committee Tuesday voted to send the bill to the Rules Committee so it can be scheduled for a floor vote.

The bill would create an office under the attorney general whose staff would "identify stranded non-residents who might request assistance and whose immediate departure is in the best interests of the state."

Before the state would buy a ticket for a stranded Outsider, a judge, magistrate or police chief must consent, under the bill.

Rep. John Lindauer, sponsor of the proposal, lauded its virtues.

The bill could cut the crime rate, ease overcrowding of prisons, save the state money and help people who want to leave but can't afford to. Anchorage has a similar program for getting stranded villagers back home, he said.

But the Department of Law said the bill also could be unconstitutional.

The department also warned that the program could lure to Alaska job hunters who might request a free trip home. The annual cost of the program was pegged at $740,000.

Rep. Joe Flood, R-Anchorage, said he was concerned that "we're going to get a reputation as Alaska's boat people."

But Lindauer asked, "Why should we at our own expense spend a fortune helping a person who doesn't want to be helped?"

The bill offers an opportunity to "break the vicious cycle of poverty and degradation" that infects the lives of some people in Alaska, Lindauer said.

It would "let these young people on Fourth Avenue and comparable areas be able to return to their home instead of going out to Eagle River (rehabilitation center) or holding up a Qwik Stop or deteriorating into some kind of social problem," he has said.

Salvation Army officials have testified in favor the proposal Capt. David Clitheroe of the Salvation Army in Anchorage said he averages 30 requests a month for one-way tickets Outside, none of which he can grant unless a private donor gives the money.

Dr. Harold Conrad, head of the Alaska Psychiatric Institute, also has endorsed the bill. The average stay in API is 30 days, which costs about $6,000, he said. Airplane tickets home might cost $500 and do the patient a lot of good, he said.

RE: House Bill 221: "An Act relating to the creation of a program for stranded nonresidents."

People tend to become stranded nonresidents when they run out of work and money. These are the people who may turn to crime.

We have a social duty and financial interest in helping those who request our assistance to return to their homes and families.

STATE OF ALASKA
PRELIMINARY STATEMENT OF FISCAL IMPACT

Bill No: HB 221 Date on Bill: 2/23/83
Title: "An Act relating to the creation of a program for stranded nonresidents."
Sponsor: Representative Lindauer
Requestor:

1. Estimated fiscal impacts on:

a. Expenditures:

(Thousands of Dollars)

			FY 83	FY 84	FY 85	FY 86		
Capital								
Operating				740.3	790.5	837.9		
Total				740.3	790.5	837.9		

b. Revenues:

Revenue								

2. Source of funds to offset fiscal impact of bill:

No information provided.

3. Assumptions:

This bill would establish a program in the Office of the Attorney General to provide aid, in the form of transportation to Canada or to the other states, to stranded nonresidents. The bill requires that the department seek out, identify and screen stranded nonresidents, and that the department staff and administer the program with an Assistant Attorney General. The bill's primary criteria for eligibility is that a nonresident lacks or is otherwise unable to obtain the resources to return to Canada or the other states, requests the state's assistance, and that it is in the best interests of the state that he or she immediately depart.

4. Disclaimer:

This statement has not been reviewed by the OMB in the Office of the Governor. It therefore does not represent the final estimate of fiscal impact.

Prepared By: Richard I. Pegues, Director Phone: 465-3672
Division: Administrative Services Division Date: 3-10-83

Approved by Commissioner: Richard I. Pegues/for Norman C. Gorsuch, Attorney General Date: 3-10-83
Department: Department of Law

5. Distribution:

2/15/83

The funds necessary to operate such a program could be considerable. In addition to an Assistant Attorney General, support staff and other resources would be necessary to handle outreach and public information efforts, establish and maintain eligibility controls and to provide grants-in-aid accounting services.

There is no accurate means of determining the number of people who might be eligible for the assistance that the bill would provide. It is easily supposed, however, that the promise of a free trip home will encourage a large number of job seekers from the other states, which are now experiencing the most unemployment since the great depression. A survey of airfares between Seattle and Alaska employment centers such as Anchorage, Fairbanks, Juneau, Ketchikan, Kodiak, Dillingham, and Unalaska reveals that the average one-way airfare is $330. Grant funds to return just 1,000 stranded nonresidents would cost $330,000. This number of stranded nonresidents may seem excessive, but it may prove very low once the state signals that it is willing to subsidize the cost of job hunting to the unemployed living outside the state.

The department therefore recommends that a minimum amount of $500,000 be provided for relocation grants if this bill becomes law. The department cautions that if this amount is insufficient, a supplemental appropriation may be necessary during 1984 Legislative Session.

HB

223

Legislators enter fray over overtime pay

by Bill White
Times Juneau Bureau

Juneau — A bill that would deny oilfield workers from $5 million to $50 million in back pay has become the battleground for labor and management forces in this year's legislative session.

"This is the most obnoxious piece of special interest legislation that I have seen in my 11 years in the legislature," said Rep. Hugh Malone, D-Kenai, of the bill.

But backers of the bill say the pay rules were changed unfairly, with little notice to them.

If the bill fails to pass, "the impact on the business climate in Alaska could be nothing less than devastating," warned Chuck Becker of the Alaska Support Industry Alliance, in a hearing on the measure.

The bill would forgive oil industry businesses for paying their workers too little overtime between 1978 and when the proposal becomes law.

That forgiveness provision is "unfair and arbitrary," according to the state Labor Department. It is likely unconstitutional, said Ron Lorensen, deputy attorney general, and Tom Sofo, a lawyer for the legislature.

Rep. Charlie Bussell, R-Anchorage, introduced the bill last February. When asked why, he said, "I didn't know anything about it until I got into it." He said he sponsored it at the urging of Dresser Industries officials and Mitch Gravo, lobbyist for the Petroleum Equipment Suppliers Association.

Bussell is chairman of the Judiciary Committee, which passed out the bill last week.

Its next stop is the Labor and Commerce Committee. But as soon as that panel got the proposal, its chairman, Rep. Walt Furnace, R-Anchorage, asked permission for the bill to skip his committee and go right to the full House. That request caused a furor among opponents of the measure, and Furnace withdrew his request.

The issue came up in 1979 when Clyde Woody, through the Labor Department, sued Dresser Industries Inc. over $3,957 in back pay.

Woody was paid under what is known as the flexible work week arrangement and by the other 49 states. But it was outlawed in Alaska in a 1978 regulation.

FWW is a method of computing overtime pay in the oil industry. Normally, a worker who is paid $10 an hour is paid $15 — one an one-half times his regular pay — for every hour over 40 he works. He would get $475 for 45 hours of work.

But under FWW, he would be paid $467 for that 45-hour week. That figure is derived by dividing the 45 hours into $400 — the total if he'd worked only 40 hours — to get an hourly rate of $8.89, not $10. He would get $13.34 an hour — one an one-half times the $8.89 — not $15 an hour for overtime.

Under FWW, the more hours he works, the less money he is paid.

Woody won his case in September 1981 in the state Supreme Court.

But while his case was in court, Dresser and other companies continued to pay according to FWW.

Eight lawsuits, three of them class action suits, have been filed against businesses that use FWW.

Tony Sholty, a lawyer with the firm that is representing the workers, estimates the businesses owe between $5 million and $10 million in back pay. That figure would be doubled because businesses that break the regulations must pay twice the actual damages.

Becker and other industry spokesmen estimate they might owe as much as $50 million, or $100 million when the double liability is factored in.

The regulation "has created an enormous managerial and employee compensation problem that is not conducive to a healthy business climate. This regulation has created a potentially disastrous unjust economic impact on my firm and others operating in this state," John Martin, area manager for Dresser Atlas, told lawmakers

"The nature of the oil and gas service business makes work hours next to impossible to predict," he said. "The fluctuating work week system lends itself perfectly to this work environment."

Bussell said he didn't pay much attention to the bill as it cruised through his committee. But now, as reporters have begun asking questions about the bill, he is well versed in the proposal.

"I am now convinced that the Department of Labor did something improperly" in issuing the regulations in 1978, he said. The department inadequately notified the businesses using FWW the regulations were coming, and after the new rules were final they did a poor job of announcing the fact, Bussell said.

Labor Department records concerning the regulations have disappeared mysteriously, he charged. The announcement in 1978 of public hearings on the then-proposed regulations used the word "overtime" rather than the more familiar "flexible work week," he said.

When asked why the department would conspire to dupe the industry, Bussell said he didn't know.

Charter Co. Increases Tesoro Petroleum Stake

By a WALL STREET JOURNAL Staff Reporter

SAN ANTONIO, Texas — Charter Co. raised its stake in Tesoro Petroleum Corp. closer to an agreed limit of 30% by buying 948,800 common shares, according to a filing with the Securities and Exchange Commission.

According to SEC figure, the purchase raised Charter's stake in Tesoro to 30.2%, but according to Tesoro's calculations, the Charter holding is 26.2%. The difference is in the way the SEC and the company count preferred shares, a Tesoro spokesman said.

Charter's filing said it holds 2,397,285 shares of Tesoro common plus 2,875,000 preferred shares convertible into 2,500,100 common shares. Charter is based in Jacksonville, Fla.

In Jacksonville, a Charter spokeswoman said the oil and insurance company raised its stake for investment purposes and doesn't intend to take over Tesoro.

Legislative Hearing on House Bill No. 223

House Bill No. 223 poses two alterations in the present Wage and Hour Act. First, Section 2 of the Bill allows an employer to avoid liquidated damages through ignorance of the Wage and Hour laws. Secondly, the Bill would retroactively extinquish hundreds of employee's wage claims sought from several employers found in violation of the Wage and Hour Act.

Senate Bill 223 follows Senate 886(1982) as the second attempt made to excuse several employer's unlawful wage formulas. This legislation would retroactively reverse the decisions of the Alaska Department of Labor, the Supreme Court for the Third District, the Alaska Supreme Court and the United State Supreme Court. Despite the arguments of Attorneys Harper and Kuhn of Houston, Texas, the employee's claims and

the Alaska Wage and Hour Act itself were upheld and affirmed. A retroactive attack on these decisions by its proponents is an abuse of our legislative process with serious constitutional implications.

The Wage and Hour Act has prohibited the use of the fluctuating work week as a means of determining a person's wage. The public policy behind this wage protection is to safeguard existing minimum wage and overtime standards which are necessary to maintain the health, efficiency and general well being of workers against unfair wagecutting competition. This proposed Bill is directly contrary to this policy.

Theoretically, the fluctuating work week would accomodate employees with work hours that may vary above or below a 40 hour workweek by providing a regular salary basis. If the amount of hours differ the employee still receives the same straight-time compensation by, after the fact, readjusting the hourly rate of pay so that it computes to the basic sum. Therefore an employee may earn a different hourly rate each and every week.

In practice however, virtually <u>every</u> use of the fluctuating work week approach has been used to <u>lower</u> an employee's hourly rate. This system is only utilized by those companies who employ their worker well <u>beyond</u> a 40 hour work week.

Regarding Section 2 of the Bill, which detracts from the present liquidated damage provisions, the practical impacts are obvious. From experience, I can say that requiring the employee to also show a bad faith motive for an employer's failure to pay the proper wage will seriously weaken protection and enforcement of a worker's rights. Proof of this element will require costly litigation for employees and discourage voluntary compliance and settlement, thereby placing further demands on the Department of Labor's resources. And, to say the least, it would encourage employer ignorance of the Wage and Hour laws as a means of defense to wage claim actions.

Respectfully submitted,

Kevin Dougherty
General Counsel
Alaska State District
Council of Laborers

HB 223

AFOGNAK LOGGING, Inc.

P.O.Box 682 Kodiak, Alaska 99615 (907) 486 - 3544

April 19, 1983

The Honorable Charlie Bussell
Chairman
Alaska State House of Representatives
Committee on Judiciary
Pouch V (Mail Stop 3100)
Juneau, AK 99615

Dear Representative Bussell:

Afognak Logging is an Alaska corporation involved in logging timber on Afognak Island near Kodiak, Alaska. We support House Bill 223 and urge you that you should actively support it as well. We also support the Committee Substitutes which eliminate Section 1 and which would allow flexible pay plans to be used in Alaska.

In the logging industry, as with other industries in Alaska which require employees at remote locations, some flexibility in the pay system is an absolute must. In some job classifications an employee spends only a few hours a day doing actual work. There is little for him to do in his own free time and, therefore, a flexible pay method benefits both him and his employer.

House Bill 223 will eliminate an unfair situation for many companies unaware that the payment methods they had used for years had been changed without their knowledge. House Bill 223 with its "good faith" sections is definitely needed and makes common sense.

I ask your support for this bill, and am sure that you will agree that to impose a devastating financial burden on employers in this state, and then to automatically double that burden, is grossly unfair.

Please vote in favor of House Bill 223. Please actively urge everyone you can to support it.

Very truly yours,

AFOGNAK LOGGING, INC.

RE: House Bill 223

Dear Mr. Bussell:

I have read the House Bill 223 and wish to state my objection to it. House Bill 223 legalizes what has been illegal since 1978. That is, the use of the fluctuating work week formula. That formula allows an employee who is hired on a weekly pay basis to have his overtime computed by dividing the number of hours which he works into his weekly wage. Thus, under this formula the rate at which overtime is paid decreases as the employee's hours increase. This is presently illegal and should not be adopted. Employees of this State deserve better treatment.

Subsection 3 also is appalling. It allows all those employers who have intentionally violated the current law to escape liability for large sums of money that are due and owing employees. In considering this bill, I would urge that you examine all the factors in question, especially the effect on employees in the State.

Sincerely yours,

KALAMARIDES, MACMILLAN & RICHARD

Re: House Bill 223

Dear Chairman Bussell:

John and Robert Eshleman, who met with you on the afternoon of March 10, asked me to write to you concerning some of the comments you made to them about HB 223. A close reading of the bill indicates that it may, in its current form, have some highly undesirable impacts.

First, the Eshlemans received the impression that you felt HB 223 would not affect anything which was "in adjudication". If the quoted phrase is intended to encompass law suits which have already been filed and are now pending in the courts, then I think the statement is incorrect. HB 223 does affect pending litigation. Section 3 states:

> An employer is not liable in a civil or criminal action if the employer used methods prohibited in sec. 1 of the Act during the period beginning December 9, 1978, and ending on the effective date of this Act unless the action was pending on the effective date of this Act, <u>in which case the employer is liable for costs of the action and reasonable attorney fees.</u>

Section 4 makes sections 1, 2 and 3 retroactive to December 9, 1978 and extinguishes "any penalty, forfeiture or liability incurred or right accruing or accrued" under the current law which, among other things, makes illegal the use of a fluctuating work week overtime compensation scheme.

Without question, sections 3 and 4 would take away from the employee who has a lawsuit pending the overtime wages he was entitled to be paid under the law and was not paid. The employee's wages would be kept by the employer who illegally failed to pay them to its employee. The only recovery section 3 would leave to the wronged employee is the costs of litigation and reasonable attorney's fees the employee incurred because his employer violated the law. Of course, if the employer had obeyed the law, the employee would never have incurred those expenses.

The effect of HB 223 can be dramatically demonstrated by an example. An employee works, between January 1, 1979, and December 31, 1980, for an employer who illegally computes overtime according to an FWW scheme. The difference, over those two years, betwen the amount actually paid to the employee and the amount the employee was entitled to be paid under the law is $20,000. In June, 1981, the employee sues for $20,000. Between June, 1981, and the date HB 223 becomes law, the employee incurs $3,000 in legal expenses and attorney's fees. Once HB 223 becomes law, the employee can recover his $3,000 in legal expenses, which presumably he will pay to his lawyer, he loses the $20,000 he had earned under the law, and the employer keeps the $20,000 which rightfully belongs to the employee.

Second, the Eshlemans indicated you thought wronged employees, such as the Eshlemans, would be entitled to representation by the State on their overtime compensation claims if HB 223 passes. While that is a desirable result, HB 223 does not accomplish this. HB 223 says nothing about State representation of employees. The Alaska Wage and Hour Act, at AS 23.10.110 authorizes the Commissioner of Labor to take an assignment of an employee's claim for violation of the Wage and Hour Act. The Commissioner is not required to take the assignment. The regulation promulgated under AS 23.10.110 limits the ability of the Commissioner to accept assignments of claims. 8AAC15.175(b) states:

> The department will not accept an assignment of a claim under AS 23.10.050-23.10.150 in excess of $5,000, excluding liquidated damages.

HB 223 does nothing to alter this regulation.

Finally, you indicated that prohibiting FWW by statute rather than regulation would give the prohibition more teeth. If that is all HB 223 would do, there would be no problems with it. As discussed above, HB 223 does much more. And the

regulation itself does have teeth. See the enclosed Alaska Supreme Court decision, which upheld the regulation prohibiting FWW.

I appreciate your consideration of these comments. I would be very happy to further discuss this with you, or your staff, at a time convenient to you.

Very truly yours,

Tony Sholty

Regarding House Bill 223

Dear Chairman Bussell:

By now you should be receiving large contingencies of support for House Bill 223. As I review the opposition, I see only plaintiffs anticipating windfall gifts and attorneys from one firm seeking avenues of profitability through glitches in our governmental system.

The Wage and Hour Administration of the Department of Labor has created a monstrous problem through the promulgation of a poorly planned and administrated regulation. This type of promulgation is an insult to industry operating in and supporting our state.

I assure you that there is strong support for the passage of HB 223, not only from the support industry, but also from other astute business people in our community. Public Opinion Messages and letters should be confirming this fact.

I fully realize your schedule is hectic and prioritizing must be extremely difficult. I encourage you to do whatever you can to hastily push HB 223 through your committee and on through the House system for ratification.

Best regards,

John R. Martin

RECEIVED
MAR 1983

March 21, 1983

Dear Rep. Charlie Bussell

I would like to take this opportunity to express my support of House Bill No. 223. This bill is an opportunity for the Legislature to create a more positive business climate in Alaska.

House Bill 223 would:

1. Make the Alaska labor laws more consistent with the laws of the other 49 states.

2. Eliminate penalties against employers that in good faith entered into agreements with employees and paid a fair wage.

3. Not deprive employees of the right to recover unpaid overtime or unpaid minimum.

Your favorable consideration to this bill would be perfectly appreciated.

Yours truly,

J.A. Parks
District Manager

JAP/gk

Honorable Charlie Bussell
Representive
House of Judiciary
Capitol Room 126
Juneau, Alaska 99811

Subject: House Bill 223

I wanted to let you know that I support House Bill 223. I feel that the employees of these companies have been paid fair and equitable wages and had full knowledge of these wages and type of pay when they took their respected jobs.

We have too many workers today that expect a days pay without a days work. This has brought our country to its knees. I think it is time we stand up and get things back in perspective and get a days work and then the days pay.

Sincerely,

John P. Davis
Alaska Regional Manager

Dear Chairman Bussell:

I have heard through the Alliance and PESA associations that House Bill 223 will have a Judicial Committee hearing sometime during the week of April fourth. This is great! Testimonies have already been drafted and practice sessions taking place.

On other matters, as one of your district's constituents, I want to assure you of my support. I appreciate your obvious follow through of campaign commitments concerning a straight forward, practical and factual approach to government. You are proving Charlie Bussell will not bow down to the "status quo" that runs so rampant through most of our legislative and subsequent governmental affairs.

Keep up the good work, you have a lot of folks waving your flag.

Best regards,

John R. Martin

JRM:tjs

Arctic Hosts, inc.

March 18, 1983

Charlie Bussell, Representative
State Capitol
Pouch V
Juneau, AK 99811

Dear Representative Bussell:

Through our affiliation with the Alaska Support Industry Alliance, it has been brought to our attention that the House Judiciary Committee is currently holding a hearing on HB223 which is a bill that will correct a great injustice that has been done to several members of the oil support industries. Even though Arctic Hosts, Inc. is not affected by this bill, we feel very strongly that your support of this bill is necessary to maintain a reasonable work environment for corporations and companies doing business in the State of Alaska.

HB223 addresses a problem with the fluctuating work week method of computing overtime payment that has been an acceptable method of payment under Federal Wage and Hour Acts for many, many years and was very commonly in use throughout the United States including Alaska for many years prior to 1978. However, in December of 1978 the State Department of Labor instituted a change in their regulations which prohibited the use of this plan; later some employees filed suit against various support companies who had used this plan and are claiming absurd amounts of past overtime pay due. All of these employees had been more than fairly compensated for their wages and the companies felt that they were legally and morally correct in the way they were paying them. It is simply a case of some prior employees trying to capitalize on a quirk in the regulations

Your support of HB223 is very much desired, and we will sincerely appreciate your efforts in vote on this matter.

Sincerely,

William F. Webb
President

To: Representatives,
Charlie Bussel
John Lindauer
Patrick Rodey
Arlis Sturgulewski
AK State Legislature
Pouch V
Juneau, AK 99811

From: Tom Standley
6841 Cheryl
Anchorage, AK 99502

This letter is being written to ask for your support of House Bill 223. My reasons are as follows:

A. The legislation enacted in 1978 23.10.060 through 23.10.110 was poorly publicized with only one hearing held and no attendes available to date to confirm attendance.

B. Should the bill not be approved, the oil service industry and ultimately the oil companies themselves will be adversly affected in a substantial manner.

C. Past employees and current employees such as myself worked under the FWW plan of pay and were more than fairly paid. My pay for 77'-35K, 78'-38K, 79'-40K, with many other known employees making in excess of 50K in 81' to date under FWW.

D. The current law creates a windfall profit of 250K+ EA for present and past employees who worked under the plan.

E. Only in Alaska is FWW banned.

F. Current law creates a pay system whereby employees cannot count on a minimum livable salary as we could with FWW.

In summery, please support this bill. I have worked in the oil industry since 1972 as a warehouseman, serviceman, expeditor, etc., what I see happening is not fair. This not only to the worker who has chosen not to take advantage of these windfall profits and remain loyal to their employer, but also to the industry as a whole that is now seeing the most dramatice downturn ever.

Please consider this request with much thought as much as we may or may not like it, oil has made our lives much nicer in Alaska.

Sincerely,

T. Standley

Pouch U
Juneau, Alaska 99811

Dear Charlie Bussell:

We need your support for HB223. The state took away basic security for our work force when they out lawed FWW pay plans.

Under the FWW our work force had a weekly pay check even when they were not working. It was nice to be able to have a check even when they were sick or on days off. They do not enjoy that security now.

Please support HB223. Why penalize companys who in good faith paid FWW wages?

Dear Mr. Bussell,

As the Alaska Manager for Baker Packers, I feel it is in the best interest for the non-salaried field employee to see HB 223 enacted as soon as possible.

Our field people work on equal time on job and equal time off. This relates to six months on and six months off.

Under the present law when the men are off, they receive absolutely no salary or wages.

If any class action suit for wage settlements were made against Baker, it would only result in reduction of people and higher prices for our commodities, and this would be of no help to the vast majority of our employees.

Sincerely,

W. J. Deen

Dear Represenatative/Senator Barbie Bussell & Walt Gurnace.

I want you to know that we/I/our firm strongly supports the passage of House Bill 223. We believe that this is an important step in bringing about an even-handed balance to Alaska's labor laws. Passage of the Bill will ensure proper notice for all employers in Alaska that the Fluctuating Work Week ("FWW") and Belo Plan pay methods are improper. It also permits an employer to raise a good faith defense to a claim for double liquidated damages for unpaid overtime.

As you no doubt know, FWW and the Belo pay methods are legal under federal law. We personally believe they should be legal in Alaska. If, however, that is not to be the case, then, at the very least, they should be prohibited prospectively after passage of a law, and not by adoption of regulation which receives little or no publicity.

This Bill doesn't take anything away from an employee, except for a windfall that he never expected.

As an employer in Alaska, we are tired of dealing with regulations which seem bent on stopping or preventing business. This Bill helps to counter that movement. We ask that you give it your full support.

Very truly yours,

David Jordan President

FROM: KELLY B. BROWN
PO BOX 3336
PALMER, 99645

MESSAGE NO. 3

INSTEAD OF FACING UP TO THEIR RESPONSIBILITY TO PAY IN ACCORDANCE WITH THELAW, THEY HAVE TURNED TO THE LEGISLATURE TO BAIL THEM OUT OF THEIR PROBLEM. HB223 IS A POKE IN THE EYE OF THE WORKING PEOPLE OF THIS STATE. THE IDEA THAT LAWS CAN BE BROKEN IN THIS MANNER AND THE WRONGED EMPLOYEE BE UNABLE TO RECOVER THE WAGES HE OR SHE HAS EARNED, MUCH LESS DAMAGES FOR BEING DEPRIVED OF THESE WAGES FOR SO LONG, HITS ME WRONG.

****

FROM: KELLY B. BROWN
PO BOX 3336
PALMER 99645

MESSAGE NO. 4.

RE: HB223
THIS BILL, IF ADOPTED, WOULD TAKE AWAY MORE THAN MONEY. IT WOULD TAKE AWAY THE RIGHT OF A WORKER TO BE PROTECTED BY THE LAW, FROM UNFAIR AND ILLEGAL PAY PLANS. I THINK THIS IS A QUESTION THAT WAS ANSWERED PLAINLY IN HIGHEST COURT. IF THERE ARE VIOLATIONS OF THE ALASKA WAGE AND HOUR LAWS, THERE IS A PENALTY OF DOUBLE DAMAGES. THE DETERRENT AGAINST NOT PAYING AN EMPLOYEE THE WAGES HE OR SHE IS GUARANTEED BY LAW, IS A PENALTY.

****

FROM: KELLY BROWN
PO BOX 3336
PALMER 99645

MESSAGE NO. 2
IN SUCH A CASE, THE STATE OF ALASKA ON BEHALF OF HARLEY WOODY, TOOK DRESSER INDUSTRIES TO COURT IN OCTOBER 1979. THAT COURT RULED IN FAVOR OF MR. WOODY, AS DID THE SUPERIOR COURT AND THE UNITED STATES SUPREME COURT IN SEPTEMBER 1981 ALL UPHELD THE ANTI FWW REGULATION. DURING THIS LITIGATION, DRESSER INDUSTRIES AND A NUMBER OF OTHER COMPANIES CONTINUED TO USE THE FWW FORMULA. NOW THERE ARE AS MANY AS FIVE CASES PENDING ON THIS SAME QUESTION.

****

FROM: KELLY B. BROWN
PO BOX 3336
PALMER 99645
MESSAGE NUMBER 1.
I AM WRITING TO EXPRESS MY OPINION ON HOUSE BILL 223. I BELIEVE THIS BILL WOULD HAVE UNDESIREABLE IMPACTS ON THE PEOPLE IN ALASKA IF ADOPTED.
UNDER THE PRESENT ALASKA WAGE AND HOUR REGULATIONS, IT IS ILLEGAL TO USE A FLUCTUATING WORK WEEK FORMULA IN COMPUTING OVERTIME PAY. SINCE DECEMBER 1978 WHEN THE DEPARTMENT OF LABOR ADOPTED THIS LAW, SOME COMPANIES IN THIS STATE HAVE ILLEGALLY USED THE FWW PAY SCHEME. BECAUSE OF THEIR FAILURE TO COMPLY WITH THIS LAW, SOME OF THE COMPANIES HAVE BEEN SUED BY THEIR EMPLOYEES FOR OVERTIME WAGES NOT PAID IN COMPLIANCE WITH THE LAW.
EOM #1.

****

MSNG 6072 MARTIE/MATSU 4/06 12:55 PM

TO: REPS. [redacted] LISKA, HEYES, BARNES, MALONE, CLOCKSIN, AND WENDTE

FROM: KELLY B. BROWN
PO BOX 3336
PALMER 99645

MESSAGE NO. 5

RE: HB 223

WHAT PROTECTION COULD THERE BE IF NO PENALTY EXISTS TO ENSURE THAT THE LAW IS ENFORCEABLE? HB 223 WOULD SERIOUSLY AFFECT AN EMPLOYEE'S CHANCES FOR RECOVERY OF WAGES EARNED FOR HOURS WORKED UNDER THE ILLEGAL FLUCTUATING WORK WEEK FORMULA. THIS BILL WOULD BENEFIT A FEW COMPANIES WHICH ARE UNWILLING TO COMPLY WITH THE ALASKA WAGE AND HOUR REGULATIONS. THOSE PEOPLE EMPLOYED BY THIS GROUP AND ANYONE ELSE WHO WORKS OVERTIME WOULD NLOSE THE CURRENT LAW'S PROTECTION.

I APPRECIATE YOUR TAKING THE TIME TO CONSIDER MY COMMENTS IN THIS AND PRECEDING MESSAGES, AND HOPE YOU WILL HELP.
KELLY B. BROWN

From: Alaska Division

Subject: Alaska State Legislature Senate Bill # 886

As I believe you are all aware, we have recently changed our Operator Pay Package in Alaska to comply with a recent Supreme Court ruling outlawing the previous fluctuating work week method. This ruling was retroactive to January 1, 1979. This leaves a very high potential liability for back wage payment. Because we believe our method of wage payment has always been fair and just to our employees, we are presently lobbying in the Alaska Legislature to reduce this liability. In conjunction with an organization called Petroleum Equipment Suppliers Association (PESA), we are introducing Senate Bill # 886 to the State Legislative session to remove this back wage payment liability. April 28th is the last day of this session so our time is very short to get our bill passed. To facilitate this passage, we are encouraging all of our Management personnel to support this bill by actively informing our legislature of our feelings on this issue.

A wire or telex may be sent to our legislators by calling either of the following numbers and expressing your support for S.B. #886:

278-3668

or

Zenith-9500 (Operator Assisted)

We encourage your support as Schlumberger Managers to inform any or all of the people listed below of your feelings on this issue:

Robert Hulcahy	Chairman of Senate Labor Committee
Vic Fischer	Chairman of State Affairs Committee
Jalmar Kerttula	President of the Senate
Mike Colletta	Senator
Patrick Rodey	Senator
Robert Ziegler	
Mitch Abood	
Mike Beirne	
Joe Paynes	
Terry Martin	

Thank you for your support on this issue.

April 26, 1983

The Honorable Charlie Bussell
House of Representatives
Chairman, House Judiciary Committee
Alaska State Legislature
Capitol, Room 124
Pouch V
Juneau, Alaska 99811

Dear Sir:

I would like to express my support for H.B. 223 which is now pending in your committee. When the work schedules were set up with the F.W.W. or Belo pay plan, there were no complaints and people were happy to have employment. This is another case of some opportunist lawyer trying to make a case out of something that was approved by the past employee. If the employee did not approve of the plan, then he should have resigned.

Sincerely,

Roger J. Seibert

Anchorage, AK 99502

I.

FACTUAL BACKGROUND

The flexible work week (hereafter FWW)[1/] method of computing overtime payment has been recognized as an acceptable method of payment under the Federal Wage and Hour Act since 1968. 29 C.F.R. 778.114 specifically allows the use of the fluctuating work week payment method. This method of payment is particularly suited to resource development and service industries where there is frequently a considerable amount of standby service time at remote locations and a variety in the number of hours of work available from week to week. The plan generally provides employees greater certainty in planning their financial budgets and guarantees them a specific amount in their pay checks each pay period thus easing the ups and downs in income which would result from a straight overtime pay plan method. This continuity of income allows employees to reflect a more stable cash flow to loan institutions when qualifying for home loans and the like and also serves to reduce the likelihood of a potentially devastating interruption of income to the employee. Without the FWW plan an employee may find himself returning to work from a two week R&R at a time when work is unexpectedly slack and then leaving on his next two week R&R when work picks up. Thus six weeks may pass

---

1/ There are accounting differences in the various plans generally referred to as FWW plans or BELO plans which do not affect the questions raised herein. Both FWW and BELO plans will hereafter be referred to as FWW.

while his bills pile up before he can scramble back to catch up if his next two weeks on the job happen to coincide with an increase in work hours.

Prior to 1978 the use of the flexible work week method of payment was legal under Alaska law. See AS 23.10.060; Attorney General Opinion February 10, 1978. On December 8, 1978, the Department of Labor instituted a change by adopting a new regulation, 8 AAC 15.100, which declared that these flexible work week plans were no longer in compliance with the overtime provisions of Alaska's wage and hour laws.

This change in the administrative regulations was poorly publicized, with little if any input from Alaskan employers. The primary industries affected by the new regulation are the oil and gas support industries with additional effect on mining and other industries. It is estimated that, since this regulation was adopted in 1978, possibly as many as 100 Alaska businesses, unaware that the long standing custom and practice in their industry has been changed by administrative regulation, have continued using the same flexible work week plan they had used for years and, in doing so, may have incurred substantial liability.

In October, 1979, almost a year after the regulatory change, Dresser Industries (the first company to be sued) was named as a defendant in a suit filed by a former employee for $4,000 in back wages. The case was opposed on constitutional

grounds and appealed to the Alaska Supreme Court. In September 1981, the Alaska Supreme Court upheld the power of the Department of Labor to promulgate regulations on this subject. The U.S. Supreme Court later declined to review the case. Dresser paid the judgment and the case was closed. In November 1981, Dresser was sued by another former employee who agreed to stay action on his case awaiting a U.S. Supreme Court decision on whether to review the case. The case for this one individual has since been settled and dismissed.

In December 1981, two years after the regulatory change, Dresser was again sued, this time in a class action filed by a third employee seeking back wages on behalf of all Dresser employees in an amount exceeding $15,000,000. At least three other companies, including FMC and Schlumbeger, have since been sued. All of these cases are in the preliminary stages, no trial dates have been set at this time and none of the lawsuits have as yet resulted in a judgment against any of the defendant companies.

In addition to the financial liability created by the flexible work week prohibition, Alaska law provides for mandatory liquidated damages which doubles any back wage or overtime award regardless of the good faith efforts on the part of the employer to abide by the wage and hour statutes. AS 23.10.110; AAI, Inc. v. Mussara, 602 P.2 1240 (Alaska 1979). Even if an employer relies on the Department of Labor's opinion or otherwise makes an innocent error in computation of pay, the court has no choice but to award double the amount of damages. The accumulated liability

resulting from the 1978 administrative action coupled with Alaska's double damage statute has resulted in a potential economic disaster for many Alaskan employers.

II.

PROPOSED REMEDY

A multitude of companies and organizations proposed during the latter part of the 1982 legislative session that the FWW administrative prohibition be amended to include a good faith exception and provide that any liability arising out of the regulatory prohibition be extinguished retroactively. A bill to accomplish this, SB 886, was introduced in the Senate.

The bill, as proposed, would have the following effects. The proposed regulation will have no effect on the two individuals who have already brought suit and either received a final judgment from which appeal cannot be taken or settled their case. As to those people who have filed suit, either individually or on behalf of a class of employees, and whose suit is still pending awaiting trial or on appeal, their cases would be dismissed subject to the right of employees to recover expenses of litigation. Companies would be given a period of time to convert over from the FWW pay systems and relieved of the massive potential liability raised by the regulation. Past employees would not receive a windfall gain.

III.

QUESTIONS PRESENTED

1. Does the Alaska legislature have the power to repeal the administrative regulation?

2. Does a retroactive repeal of the regulation constitute an unconstitutional impairment of the right to contract by taking away vested contractual rights of employees?

Question 1 above has been directly addressed by the Alaska courts. Under AS 44.62.320 (Legislative Annulment of Regulations and Review), the legislature was granted the authority to annul a regulation of an agency by concurrent resolution. In 1980 the Alaska Supreme Court in State v. A.L.I.V.E., 606 P.2d 769 (Alaska 1980) held that the legislature could not annul a regulation by concurrent resolution but did set out the proper procedure by which the legislature could annul a regulation. In the A.L.I.V.E. case the Alaska Supreme Court indicated that by a vote of both houses and passage of a new Act the legislature does have the power to annul an agency regulation by following normal legislative procedures. AS 01.10.090 requires that in order for the statute annulling the regulation to have retrospective effect, it must expressly declare in the statute that it is intended to be retrospective. In addition, under AS 01.10.100 (Effect of Repeal or Amendments) the legislature has been specifically granted the power to annul a regulation, the only qualification being that if the annulment is to be retroactive and is to affect any penalty or liability incurred, it must expressly state that this is the legislative intent.

As to question #2 above, the argument that a retroactive repeal or annulment of a regulation and the consequent extinguishing of liability on the part of employers for penalties, forfeitures or back wages is an unconstitutional denial of due process because it violates the fifth amendment prohibition against impairment of contracts or Article I, § 10 of the Constitution has been raised numerous times in the past in various cases and has over the years been resoundingly rejected by literally hundreds of court decisions.

In 1947 the United States Congress faced a situation similar to the problem now facing the Alaska legislature. The United States Supreme Court in Anderson v. Mt. Clemens Pottery Co., 328 U.S. 680 interpreted the existing Fair Labor Standards Act as requiring payment for time spent in preliminary and incidental activities on the employer's premises prior to actually beginning work at the employees' work stations. This decision changed the existing custom and practice in industry and between July of 1946 and January of 1947, some 2,000 cases were filed in Federal Court alone seeking back pay in excess of five billion dollars. (House Committee on the Judiciary Report No. 71, Feb. 25, 1947.)

In response to this situation, Congress passed the Portal to Portal Act of 1947 which specifically extinguished any claim arising out of the Fair Labor Standards statutes and relieved employers from liability and punishment from existing claims

whether commenced prior to, or on or after the date of the Act. The Act provided that unless an activity was covered by an express provision of a written or nonwritten contract between the employee and his employer or was a custom or practice in effect at the time of employment, any liability for existing or future claims would be extinguished.

The report of the House Committee on the Judiciary specifically addressed the constitutionality and vested contract right question in passing the Portal to Portal Act and noted that:

> Claims for minimum wages, overtime compensation, liquidated damages and penalties are not vested property rights within the protection of the Fifth Amendment. They are purely statutory rights which may be withdrawn by the Congress at any time before they have ripened into a final judgment from which appeal cannot be taken. (citations omitted).

In the years following passage of the Portal to Portal Act the constitutionality of the retroactive grant of immunity from liability has been challenged many times in many courts. It has been upheld consistently.

In Seese v. Bethlehem Steel Co., 168 F.2d 58 (4th Cir. 1948) the court noted at page 61 that the constitutionality of the Portal to Portal Act was beyond question:

> Its constitutionality has been upheld by the circuit court of appeals of the sixth circuit . . . and by more

> than 100 decisions of federal district courts and state courts to which our attention has been called. We list below those available in the federal supplement which we had opportunity to read.

The plaintiffs in Seese argued that the statute violated the constitution because:

> . . . they deprived plaintif s of vested rights under existing contracts in violation of the due process clause of the fifth amendment.

The court's response to this contention was clear:

> We think that both contentions are entirely without merit.
>
> * * *
>
> The question raised under the fifth amendment is that the statute takes property without due process in that it strikes down vested rights under existing contracts. The answer is that even rights arising out of contract cannot fetter congress in the exercise of a power granted it by the constitution, and that the rights stricken down by the statute are not rights arising out of contract at all, but rights created by statute as an incident of the statutory regulation of commerce.

The court held that the Fair Labor Standards Act does not provide payment for employees engaged in the commerce which Congress sought to regulate but rather provides a means by which wages may be regulated. The Court stated that when it becomes apparent that the instrument of regulation is about to be used in such a way as to

Draft Copy For REVIEW ONLY

injure the very commerce it is designed to help it is idle to say that the legislature is without power to amend it in such a way as to avoid the evil that is threatened.

The proposed bill before the Alaska legislature will not strike down any right which is based on a contract, a custom or a practice. What is sought to be taken away is purely a statutory right. This is clearly constitutional:

> What was taken away was the right to recover on claims of purely statutory origin, claims given by statute not as compensation for labor performed but as a means of regulating wages and hours of work in interstate commerce. (Seese, supra, at p. 64, citations omitted.)

By both logic and legal reasoning, since the legislature may repeal its own Act, it clearly has the right to take away something which has no existence save by virtue of that Act.

Looked at in another way, the legislature is merely validating contracts and agreements between employers and employees which were only made invalid by reason of the regulation in effect during a period of the employment contract. The legislature's power to validate prior contracts which were invalid by statute has been upheld repeatedly by the U.S. Supreme Court. Westside Belt R Co. v. Pittsburg Construction Co., 219 U.S. 92; McNair v. Knott, 302 U.S. 369.

The argument that the provisions of the Alaska regulation prohibiting FWW must be read into the contract of employment and that the right to recover compensation in accordance with the terms of the regulation becomes a part of the contract and accrues upon the rendering of services provides no basis for rendering a repealing statute unconstitutional.

> . . . that act validates the real contract between the parties and merely takes away a statutory remedy given by the prior act. Even if the provisions of the Fair Labor Standards Act be read into contracts of employment, so also must be read the constitutional power of congress to change that act . . . not only are existing laws read into contracts in order to fix obligations as between the parties, but the reservation of essential attributes of sovereign power is also read into contracts as a postulate of the legal order. (Seese, supra, at 65, citations omitted.)

The Alaska Supreme Court has directly addressed this issue and in Bidwell v. Sheele, 355 P.2d 584 (Alaska 1960) joined the array of State, Federal and Supreme Court decisions upholding the power of the legislature to retroactively extinguish statutory rights. Dealing with the repeal of section 16-1-131, Alaska Compiled Laws Annotated 1949, which abolished the requirement for a bond in title dispute cases, the Court addressed the constitutionality of the repeal in the face of challenges based on both the 14th Amendment of the U.S. Constitution and Section 7, Art. 1 of the Alaska Constitution. The Court noted that:

> In 1871 the Supreme Court of the United States ruled that a party cannot have any

Draft Copy For
REVIEW ONLY

> vested right in a remedy conferred by an act of Congress to prevent Congress from modifying it or adding new conditions to its exercise, or from withdrawing the remedy altogether.

The Portal to Portal Act does not stand alone as an example of the constitutionality of legislative action extinguishing prior liabilities. The question has been argued and has been upheld by a staggering majority of Courts in other areas as well.

In American Can Co. v. Davies, 559 P.2d 898 (Or. 1977), the Supreme Court of Oregon upheld the power of the public utilities commissioner to change rates already set by a private contract with the utility. The company contended that:

> Crown contends that the power of the Commissioner to change rates or other conditions memorialized in a written contract between a public utility and one of its customers constitutes an impairment of the contract rights, and as such is in violation of Aritcle 1, § 10 of the United States Constitution.

The Court answered the argument first with legal authority:

> We disagree. In Midland Co. v. K. C. Power Co., 300 U.S. 109, 57 S.Ct. 345, 81 L.Ed. 540 (1937), the court said:
>
> > . . . [T]he State has power to annul and supersede rates previously established by contract between utilities and their customers. It has power to require service at nondiscriminatory rates, to prohibit service at rates too low to yield the cost rightly attributable to it, and to require utilities to publish their rates and to adhere to them.

In Louisville and N.R. Co. v. Mottley, 219 U.S. 467, the court dealt with an act of Congress which retroactively struck down a contract made in settlement of a personal injury case and upheld Congress' power. In Norman v. Baltimore and O.R. Co., 294 U.S. 240 the U.S. Supreme Court noted that Congress has the power to retroactively strike down gold clauses in private contracts and that such power is not unconstitutional. In National Car Loading Corp. v. Phoenix-El Paso Express, 176 S.W.2d 564, the Supreme Court of Texas dealt with the Interstate Commerce Act, 49 U.S.C.A. § 1001 et seq., which wiped out any punishment or liability imposed upon freight forwarders who may have violated existing ICC tariff regulations and upheld its constitutionality in the face of identical arguments. In McNair v. Knott, 302 U.S. 369 the United States Supreme Court upheld the constitutionality of Congress' grant of retroactive validity to invalid pledges of securities by national banking associations.

In Moss v. Hawaiian Dredging Co., 187 F.2d 442 (9th Cir. 1951) the appellate court considered Public Law 393, popularly known as the Overtime-on-Overtime Act. The Act provided in substance that retroactive amendments would validate prior invalid or illegal contracts which were only invalid or illegal by virtue of wage and hour statutes. The argument was again made that such a retroactive enactment was void as it resulted in a deprivation

COPY FOR NEW CITY

and second with common sense reasoning:

> Furthermore, were such an argument upheld, then the whole public interest in utility regulation would become meaningless, since by making separate contracts with all or any of its individual customers, the utility and the customer could effectively bypass all or any relevant part of the public utility regulatory statutes and the regulations governing the public utility.

The same logical conclusion would flow from the argument that the legislature is unable to alter contracts in the wage and hour field. Employer and employee would be free to bypass any regulation by the simple expedient of making a contract about it. For that reason legislative enactments in this area are valid, notwithstanding by their terms, they apply to and affect antecedent contracts for the performance of services. 16A C.J.S. Constitutional Law § 349.

Whether plaintiffs have sought to argue that the legislature is prohibited by the due process clause of the Constitution or by Article 1, § 10 from interferring with vested rights of private employment contracts, the result has always been the same. -- No matter how the obligations or rights are denominated, imposed or insured with respect to wages and overtime compensation they are:

> . . . subject to change or abrogation, and are not subject to any of the juridical principles applicable to contractual rights or statutory rights. May v. General Motors Corp., 73 F. Supp. 878.

of property without due process of law in violation of the fifth amendment. The argument was again defeated. The plaintiffs based their right to recover on the following familiar arguments:

> 1. These, they say, were vested rights, contractual in nature.
>
> * * *
>
> 2. . . . became part and parcel of their employment contracts, and hence immune to retroactive legislation modifying those provisions.
>
> * * *
>
> 3. What is here sought, it is said, is no windfall result of a surprise decision . . .

The court resoundingly dealt with these arguments and again reaffirmed that prior decisions:

> . . , establish that if it may be said that private rights, contractual in nature, arose from the overtime provisions of the Fair Labor Standards Act, yet the character and quality of such rights are such that they must yield to the sovereign power to regulate commerce by legislation . . .

The court finally concluded that:

> There is nothing in law or in reason which forbade congress to give validity to these contracts retroactively, . . .

VI.

CONCLUSION

The constitutionality of a retroactive invalidation of a statutory right appears unassailable in light of the repeated

REVIEW ONLY

REVIEW ONLY

court opinions over the years. So long as the legislative action does not interfere with a written contract between individuals but deals purely with a statutory granted right, the fact that that right is considered a part of an employment contract will not affect the legislature's power. The legislature has a constitutional right to give and to take away what it has given and that right is not affected even if what it has given has by law become part of a contract. As stated by Chief Justice Hughes of the U.S. Supreme Court in Norman v. Baltimore and O. Ry. Co., 294 U.S. 240:

> Parties cannot remove their transactions from the reach of dominent constitutional power by making contracts about them.

The proposed remedy is constitutional.

DATE: October 24, 1977

SUBJECT: Request for Opinion
re: AS 23.05.160 and
AS 23.10.060

The Department of Labor respectfully requests of the Department of Law, an interpretation of whether "Flex-time" would or would not be an acceptable condition of employment under AS 23.05.160 and AS 23.05.060. It has always been the Department of Labor's position that flex-time would be contrary to the intent of the Alaska Wage & Hour Act as we read it. This would appear to be supported by the stronger law provision under the FLSA.

We would very much appreciate an early determination of this issue as it bares directly to the outcome of case now pending before the Department of Labor and will have a related effect on other employers, particulary in the oil industry.

We have attached position papers, re: the instant case of Kluting, R. vs. Dowell Division of Dow Chemical Company. In our investigation of this complaint, Investigator Don Wilson of our Wage and Hour Division, Anchorage, has worked closely with Assistant Attorney General, Pat Kennedy of your staff for legal guidance.

Thank you for your attention and the continuing cooperation we enjoy with the Department of Law.

Wage & Hour Division
Department of Labor
650 W. Int'l Airport Road
Suite 100 Int'l Bldg. Annex
Anchorage, Alaska 99502

The Anchorage Regional Office is currently processing a wage claim as captioned above.

This is a claim in which the department, as assignee for the claimant, disputes the validity, under Alaska Statutes, of a wage payment plan known as the "Fluctuating Workweek."

On August 19, 1977 we met with legal counsel for the defendant corporation and agreed, as a means to reconcile this matter, to submit our separate position statements to the Attorney General's Office for their interpretation of Alaska Statutes and specifically to the validity of the "Fluctuating Workweek," in Alaska.

Therefore, enclosed are the position statements for your review with our request that these positions be forwarded to the Department of Law for their review and opinion.

There is a pay plan under Federal Wage and Hour Law which provides for an irregular workweek (fluctuating hours) for fixed weekly pay. This plan is more commonly known as the "Fluctuating Workweek, (FWW)," and is addressed in Title 29, Part 778 of the "Code of Federal Regulations," Section 778.114.

While the department concedes that the "FWW," is a valid pay plan under Federal Regulations, the department contends that the plan is not now, nor has it ever been recognized as valid for employers engaged in commerce or business within the state of Alaska. We have no specific "Case," upon which to base this conclusion, but instead use the Alaska Statute, Title 23 and "Common Knowledge" to support our rationale.

Specifically, AS SEC. 23.10.060. Payment of Overtime. states:

> No employer who employs employees engaged in commerce, or other business, or in the production of goods or materials in Alaska may employ an employee not acting in a supervisory capacity, either male or female, for a workweek longer than 40 hours or for more than eight hours a day, except that if an employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for overtime at the rate of one and one-half times the regular rate of pay shall be paid, and this provision is considered included in all contracts of employment.

Additionally, AS SEC. 23.05.160. Notice of Wage Payments. states:

> An employer shall notify his employee in writing at the time of hiring of the day and place of payment, and the rate of pay, and of any change with respect to these items on the payday before the time of change. An employer may give this notice by posting a statement of facts, and keeping it posted conspicuously at or near the place of work where the statement can be seen by each employee as he comes and goes to his place of work.

Since Alaska Statute, for the purpose of overtime, incorporates the eight hour law along with the Federal 40 hour law, overtime payment would have to be made for weeks of less than 40 hours where days in excess of eight hours were worked. It would therefore work to the employer's detriment since if the wage rate slides downward after 40 hours it would have to slide upward for

WAGE & HOUR DIVISION
ALASKA DEPARTMENT OF LABOR
INTERNATIONAL BLDG. ANNEX, SUITE 100
650 WEST INTERNATIONAL AIRPORT ROAD
ANCHORAGE, ALASKA 99502

weeks where less than 40 hours were worked, but days in excess of eight hours were worked.

Additionally, since Alaska Statute contains a provision that requires an employer to make notification of changes of the rate of pay, in writing, on the payday before the date of change, an employer attempting to use the "FWW," could not possibly comply with AS 23.05.160.

Accordingly, the "FWW," since it requires continuous rate changes, (everytime overtime is required, or less than 40 hours are worked) cannot be in compliance with the legal requirements to notify employees as set forth in AS SEC. 23.05.160.

Final reference is made to AS SEC. 23.10.095. Adoption of Federal Regulations. We have made diligent search through our department and can find no instance where any commissioner, including the current administration, has adopted that portion of the Code of Federal Regulations that addresses the FWW. To the contrary, and in support of our rationale of "Public Knowledge," we would invite your attention to the attached letter from the U.S. Department of Labor as Enclosure #1.

Subject: Fluctuating work week pay plans

To: Mr. Doh R. Wilson
Alaska State Department of Labor
Wage and Hour Division
Suite 100, International Bldg. Annex
650 W. International Airport Road
Anchorage, Alaska 99502

Dear Mr. Wilson:

I am in receipt of your letter of September 15th regarding my instructions or comments to employers concerning the fluctuating work week pay plan.

The fluctuating work week pay plan is a valid pay plan under the Fair Labor Standards Act and employers or employees who ask about it are so advised. I have also made it a practice to advise them that even though it is a legal system under the federal law it is not a valid plan under the State of Alaska labor law and that they should contact the State Wage and Hour Division.

I trust that this letter will answer your questions regarding my comments to persons or firms regarding the applicability of the federal labor laws.

If I can be of further assistance please contact me.

Very truly yours,

Jack E. Harty

RE: Alaska Wage and Hour Act
Fluctuating Workweek Question

Dear Sirs:

This position paper is being submitted to the Office of the Attorney General on behalf of the Dowell Division of the Dow Chemical Company ("Company"), pursuant to an agreement between Dowell and the Wage and Hour Division of the Alaska Department of Labor. It is requested by Dowell and the Wage and Hour Division that the Attorney General render a legal opinion regarding the controversy which has arisen between the two parties and which is more fully disclosed below.

INTRODUCTION

On May 19, 1977, the Wage and Hour Division of the Alaska Department of Labor in Anchorage issued a wage claim against the Dowell Division of the Dow Chemical Company. The claim, filed on behalf of Mr. Randy Kluting, asserted that Dowell had failed to provide the claimant with his full overtime pay entitlement while he was in the Company's employ as a service operator from March 3, 1976 until April 28, 1977.

The claim asserted by the Alaska Department of Labor is part of what appears to be a broad challenge to the method by which the Company had paid its employees for several years -- the so-called "fluctuating workweek method". This method of compensation is geared to the special problems confronted by employers and employees in businesses where work schedules vary considerably from day to day and week to week. The uncertain and drastically variable conditions of operations within the oil industry in Alaska have made such

a plan especially suited to the needs of Dowell and many other companies engaged in oil production.

The fluctuating workweek method is essentially a salary plus overtime plan. It provides a guaranteed weekly salary to an employee regardless of the number of hours which he actually works. For example, whether an individual employee works 30 hours or 50 hours in a given week, he is guaranteed to receive his previously specified salary for that week's work.

In addition to that guaranteed salary, however, the employee, under federal and state law, is also entitled to overtime compensation for those hours which he works in excess of 40 per week or 8 per day. The amount of this additional compensation is determined by multiplying the number of overtime hours by one-half of the employee's hourly rate for that week. This is done because the employee, under the fluctuating workweek method, is deemed to have been fully compensated, on a straight time basis, for any overtime hours worked.

The hourly rate of pay for an individual employee under this system is the focal point of the present dispute. Under the fluctuating workweek method the hourly rate, also known as "regular rate of pay", varies from week to week as a function of the number of hours actually worked in that week. In other words, for the purpose of calculating overtime, it is necessary to determine an employee's regular rate of pay during the week in question. This is accomplished by dividing the guaranteed weekly salary by the number of hours actually worked during that week. Once this regular rate of pay has been determined, it is merely divided in half and multiplied by the number of hours of overtime worked by the employee for that week. This result is then added to the weekly salary to arrive at the employee's total compensation for that particular week.

assumes hours worked by employee whose salary may be worth less than one who works only a few hours

The legitimacy of the fluctuating workweek method has consistently been recognized by the federal courts and in federal regulations adopted pursuant to the Fair Labor Standards Act. For this reason, and because it is so well suited to the particular circumstances of employment in the oil industry in Alaska, many companies throughout the state have implemented the fluctuating workweek method as the standard wage formula for employee compensation.

The fluctuating workweek method of compensation is attractive both to employers, and to employees who work weeks of irregular hours. It enables both parties to make reasonable forecasts with regard to the amount of weekly wages that will be paid. This is especially convenient for employees and their families who otherwise would be uncertain from week to week how much compensation they could expect to receive.

In the present matter, the Alaska Department of Labor is claiming that the fluctuating workweek method is not valid under applicable Alaska wage and hour statutes. Such a determination by the Department of Labor has potentially far reaching ramifications because of the large number of companies currently using the fluctuating workweek method. In this particular action the Department is seeking recovery of the amount of overtime pay which Mr. Kluting would have received under applicable wage and hour statutes if the fluctuating workweek method had not been utilized.

At a meeting on August 19, 1977, in Anchorage, Dowell and the Wage and Hour Division agreed that the Office of the Attorney General would provide an impartial forum for evaluation of the arguments opposing and in support of the fluctuating workweek method of compensation. Since the ultimate resolution of this matter rests upon sophisticated legal analysis and construction of various statutes and other authority, it was agreed that an Attorney General's Opinion should be procured before the Wage and Hour Division expands the application of its internal decision.

II.

ISSUE PRESENTED

Is the fluctuating workweek method of compensation acceptable under the Alaska Wage and Hour Act and/or have companies operating in Alaska, including Dowell, justifiably relied upon the plain language of that statute in utilizing the fluctuating workweek method?

III.

ARGUMENT

A. The Alaska Wage and Hour Act Expressly Recognizes That Its Administration and Construction Are to Be Governed by Prevailing Federal Authority Concerning the Federal Fair Labor Standards Act and the Regulations Adopted Under It

The Alaska Wage and Hour Act is codified in the State statutes in §§23.10.050 - .150. Section 23.10.060 of those statutes sets forth the State's payment for overtime provisions, in pertinent part as follows:

> "No employer who employs employees engaged in commerce, or other business, or in the production of goods or materials in Alaska may employ an employee not acting in a supervisory capacity, either male or female, for a workweek longer than 40 hours or for more than eight hours a day, except that if the employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid, and this provision is considered included in all contracts of employment." [Emphasis added.]

here we my rate is weekly not hourly

Later in the Wage and Hour Act, §23.10.145 provides:

> "Terms used in §§50-150 of this chapter shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it."

Clearly the operative language in the first above-quoted section is the underlined term "regular rate of pay". Under §23.10.060, overtime compensation is absolutely dependent upon the amount of pay deemed included in an employee's "regular rate". The fluctuating workweek question with which we are here concerned is also intimately connected with that term. The fluctuating workweek approach is essentially a method of ascertaining an employee's regular rate of pay. The corresponding "regular rate" term in the

federal Fair Labor Standards Act has always been defined to include the fluctuating workweek method as acceptable under that statute.

The question to be resolved, therefore, is whether the term "regular rate of pay" in Alaska statute §23.10.060 encompasses the fluctuating workweek method. The answer is clearly provided in §23.10.145. That section unambiguously states that the terms utilized in the Wage and Hour Act are to be defined as they are defined in the federal Fair Labor Standards Act or the regulations adopted under it.

The only possible complication connected with §23.10.145 arises from the "where applicable" phrase contained therein. Nevertheless, there is no merit in a contention that the term "where applicable" gives the State Department of Labor the discretion to ignore clear and unambiguous federal pronunciations regarding specific provisions of the Act.

Section 23.10.145 contains language which is clearly mandatory and not discretionary. It states that terms used in the Wage and Hour Act "shall be defined" as they are defined under federal law. It is well recognized in the law that the word "shall" in a legislative enactment demonstrates the legislature's intention that the body charged with administration of that statute is obligated to perform the stated function. The fact that this section of the Wage and Hour Act contains such mandatory language is strong evidence that the legislature of Alaska did not intend to grant any particular discretion to the Department of Labor in regard to the definition of terms.

The inclusion of the term "where applicable" does nothing to require a different conclusion. It should be read as though the legislature were saying that if federal law has defined a particular term which appears in the Wage and Hour Act, that federal definition should be applied by the Department of Labor in administering the Alaska statute. Support for this interpretation is found in the definition of the words used in that statutory section. Webster's Dictionary defines the word "applicable" primarily as "capable of being applied." This definition of "applicable" was approved in Thomas v. City of Huntington, 80 Ind. App. 476, 141 N.E. 358, 359 (1928), and Hodges v. Canal Ins. Co., Miss. 223 So.2d 630, 633 (1969). That definition does not contain a discretionary element. In the present context it

merely indicates that if a federal definition can possibly be applied, it must be applied. Any other interpretation of the words "where applicable" would be without foundation.

It is obvious, therefore, that in accordance with §23.10.145 guidance must be sought from the federal Fair Labor Standards Act regarding the definition of "regular rate of pay".

B. The Fair Labor Standards Act and Its Regulations Explicitly Recognize and Support the Use of the Fluctuating Work Week Method of Compensation

Section 7 of the Fair Labor Standards Act provides that overtime must be paid to an employee for all hours worked in excess of 40 hours in a single workweek at a rate not less than one and one-half times the "regular rate" at which he is employed. Extensive regulations have been promulgated by the Federal Department of Labor to explain and define Section 7's "regular rate" term. Those explanations and definitions are codified in Title 29 of the Code of Federal Regulations, beginning at Section 778. As stated in Section 788.1, those regulations constitute "the official interpretation of the Department of Labor with respect to the meaning and application of the maximum hours and overtime pay requirements contained in Section 7 of the Act."

The actual definitions of the "regular rate" term begin with Regulations Section 788.108. It is there stated:

> "The 'regular rate' of pay under the Act cannot be left to a declaration by the parties as to what is to be treated as the regular rate for an employee; it must be drawn from what happens under the employment contract."

Section 778.109 states:

> "The 'regular rate' under the Act is a rate per hour. . . . The regular hourly rate of pay of an employee is determined by dividing his total remuneration for employment (except statutory exclusions) in any workweek by the total number of hours actually worked by him in that

workweek for which such compensation was paid. The following sections give some examples of the proper method of determining the regular rate of pay in particular instances."

Section 778.114 of the Regulations contains the example of the proper method of determining the regular rate of pay in instances where fixed salaries are paid for fluctuating hours of work. That section provides:

"(a) An employee employed on a salary basis may have hours of work which fluctuate from week to week and the salary may be paid him pursuant to an understanding with his employer that he will receive such fixed amount as straight time pay for whatever hours he is called upon to work in a workweek, whether few or many. Where there is a clear mutual understanding of the parties that the fixed salary is compensation (apart from overtime premiums), for the hours worked each workweek, whatever their number, rather than for working 40 hours or some other fixed weekly work period, such a salary arrangement is permitted by the Act if the amount of the salary is sufficient to provide compensation to the employee at a rate not less than the applicable minimum wage rate for every hour worked in those workweeks in which the number of hours he works is greatest, and if he receives extra compensation, in addition to such salary, for all overtime hours worked at a rate not less than one-half his regular rate of pay. Since the salary in such a situation is intended to compensate the employee at straight time rates for whatever hours are worked in the workweek, the regular rate of the employee will vary from week to week and is determined by dividing the number of hours worked in the workweek into the amount of the salary to obtain the applicable hourly rate for the week. Payment for overtime hours at one-half such rate in addition to the salary satisfies the overtime pay requirement because such hours have

already been compensated at the straight-time regular rate, under the salary arrangement.

"(b) The application of the principles above-stated may be illustrated by the case of an employee whose hours of work do not customarily follow a regular schedule but vary from week to week, whose overtime work is never in excess of 50 hours in a workweek, and whose salary of $80.00 a week is paid with the understanding that it constitutes his compensation, except for overtime premiums, for whatever hours are worked in the workweek. If during the course of 4 weeks this employee works 40, 44, 50 and 48 hours, his regular hourly rate of pay in each of these weeks is approximately $2.00, $1.82, $1.60, and $1.67, respectively. Since the employee has already received straight-time compensation on a salary basis for all hours worked, only additional half-time pay is due. For the first week the employee is entitled to be paid $80.00; for the second week, $83.60 ($80.00 plus 4 hours at 91 cents, or 40 hours at $1.82 plus 4 hours at $2.73); for the third week $88.00 ($80.00 plus 10 hours at 80 cents, or 40 hours at $1.60 plus 10 hours at $2.40); for the fourth week approximately $86.72 ($80.00 plus 8 hours at 84 cents or 40 hours at $1.67 plus 8 hours at $2.51).

"(c) The 'fluctuating workweek' method of overtime payment may not be used unless the salary is sufficiently large to assure that no workweek will be worked in which the employee's average hourly earnings from the salary fall below the minimum hourly wage rate applicable under the Act, and unless the employee clearly understands that the salary covers whatever hours the job may demand in a particular workweek and the employer pays the salary even though the

> workweek is one in which a full schedule of hours is not worked. Typically, such salaries are paid to employees who do not customarily work a regular schedule of hours and are in amounts agreed on by the parties as adequate straight-time compensation for long workweeks as well as short ones, under the circumstances of the employment as a whole. Where all the legal prerequisites for use of the 'fluctuating workweek' method of overtime payment are present, the Act, in requiring that 'not less than' the prescribed premium of 50 percent for overtime hours worked be paid, does not prohibit paying more. On the other hand, where all the facts indicate that an employee is being paid for his overtime hours at a rate no greater than that which he receives for non-overtime hours, compliance with the Act cannot be rested on any application of the fluctuating workweek overtime forumla."

It is absolutely clear from the regulation quoted above that the fluctuating workweek method is included within, and is an integral part of, the definition of "regular rate of pay" under the Fair Labor Standards Act. It is equally clear that since the Alaska Wage and Hour Act looks to the federal Fair Labor Standards Act for its definition of that term, the "regular rate of pay" term in the Alaska statute also includes the fluctuating workweek method. The logic of this reasoning is inescapable.

C. The Lawfulness of the Fluctuating Workweek Method has Consistently Been Upheld Under Federal Case Law

The above conclusion has been strongly and consistently supported by the decisions of the federal courts. Almost immediately after the Fair Labor Standards Act of 1938 was enacted, the United States Supreme Court was confronted with a challenge to the fluctuating workweek method of compensation. That challenge was identical to the present case in that the controversy focused on the meaning of the term "regular rate of pay." In Overnight Transportation Company v. Missel, 316 U.S. 572 (1942), the employee worked

as a "rate clerk" for a corporation engaged in interstate motor transportation as a common carrier. An agreement had been entered into between the company and the employee whereby the employee received a fixed weekly wage for irregular hours, and a rate equal to one and one-half times his "regular rate of pay" for all hours in excess of the statutory maximum. In upholding the use of the phrase "regular rate of pay" interpreted as the total weekly compensation divided by the total number of hours worked (the FWW interpretation), the Court stated:

> "No problem is presented in assimilating the computation of overtime for employees under contract hours which are the actual hours worked, to similar computations for employees on hourly rates. Where the employment contract is for a weekly wage with variable or fluctuating hours, the same method of computation produces the regular rate for each week. As that rate is on an hourly basis, it is regular in the statutory sense inasmuch as the rate per hour does not vary for the entire week, though week by week the regular rate varies with the number of hours worked. It is true that the longer the hours the less the rate and the pay per hour. This is not an argument, however, against this method of determining the regular rate of employment for the week in question. Apart from the Act, if there is a fixed weekly wage, regardless of the length of the workweek, the longer the hours the less are the earnings per hour. This method of computation has been approved by each circuit court of appeals which has considered such problems. It is this quotient which is the 'regular rate at which an employee is employed' under contracts of the types described and applied in this paragraph for fixed weekly compensation for hours, certain or variable." 316 U.S. at 580.

Numerous federal cases have been guided by the principle established in Overnight Transportation Company. The interpretation of Section 7 of the Fair Labor Standards

Act made in that case has been repeatedly utilized to sanction fluctuating workweek programs. In the Ninth Circuit, for example, "regular rate of pay" was similarly defined in Robertson v. Alaska Juneau Gold Mining Company, 157 F.2d 876 (9th Cir. 1946). In striking down a particular pay plan which provided a "regular rate" for seven hours of the working day and so-called "overtime" for the additional one hour of the working day, the court described the plan as "artificial." In finding that the scheme was designed to circumvent the application of the Act, the court stated:

> "The Act [FLSA] does not necessarily require an increase of wages, nor does it forbid a decrease, so long as the wages paid are above the statutory minimum. But it does require that all wages or things of value forming part of the normal working income be used to determine the 'regular rate,' and that that regular rate be applied to the first 40 hours worked, and for all hours worked in addition a rate one and one-half times the regular rate must be paid."

In another much cited case, Landreth v. Ford, Bacon & Davis, 147 F.2d 446 (8th Cir. 1945), the Eight Circuit Court of Appeals also held that the fluctuating workweek method, employing the term "regular rate of pay", is immune from attack in federal courts:

> "If his [an employee's] employment is for a fixed weekly compensation for a week of variable or fluctuating hours, the employee's regular rate of pay must be determined by dividing his fixed weekly compensation by the number of hours actually worked in any workweek; and in cases of employment at a fixed weekly compensation for a workweek of fluctuating hours, the regular rate of an employee will necessarily vary from week to week according to the number of hours worked."

Accord, Mumbower v. Callicot, 526 F.2d 1183 (8th Cir. 1975); Masters v. Maryland Management Co., 493 F.2d 1329 (4th Cir. 1974); Usery v. Godwin Hardware, Inc., 426 F.Supp. 1232 (S.D. Mich. 1976). See, Conkland v. Hofgesang, 407 F.Supp. 1090 (W.D. Ky. 1975).

The same interpretation of the "regular rate" phrase as it is used in §7 of the FLSA has also been adopted in regulations promulgated under the Act, 29 C.F.R. §778.114, which are cited above.

In short, it is inescapable that the drafters of the Alaska statute, by using the key phrase "regular rate of pay" and by expressly stating that the federal interpretation of the terms of the statute should govern, envisioned fluctuating workweek plans similar to those consistently upheld under federal law. Since the meaning of the phrase "regular rate of pay" is beyond dispute under federal law, and since no Alaska statutes or regulations suggest a contrary interpretation, the federal definition should prevail and the use of the fluctuating workweek method of compensation should be acceptable under Alaska law.

D. The Fact That Alaska Requires the Payment of Overtime for Hours Worked in Excess of Eight Hours in a Single Workday, Unlike the Federal Fair Labor Standards Act, Has No Impact Whatsoever on the Use of the Fluctuating Workweek Method

As indicated above, the Fair Labor Standards Act requires overtime to be paid for hours worked in excess of 40 hours in a single workweek. Many state laws, Alaska's included, provide for overtime payments for hours worked in excess of 40 hours in a single workweek or eight hours in a single workday. This is a difference without a distinction as far as the fluctuating workweek question is concerned.

Two federal statutes specifically provide for the payment of overtime for all hours worked after 40 hours in a single week or eight hours in a single day. Those statutes are the Walsh-Healey Public Contracts Act, 41 U.S.C. §§327-333 (covering federal government suppliers) and the Contract Work Hours and Safety Standards Act, 40 U.S.C. §§327-333 (covering federal government construction and service contractors). Both of those statutes rely upon the Fair Labor Standards Act, in the same manner as the Alaska Wage and Hour Law does, for a definition of "regular rate of pay" or similar terms, and both of those statutes recognize the applicability of the fluctuating workweek method.

Walsh-Healey Act Regulations codified at 41 C.F.R. §50.201.103 provide:

> "(a) Employees engaged in, or connected with the manufacture, fabrication, assembling, handling, supervision, or shipment of materials, supplies, articles, or equipment used in the performance of the contract may be employed in excess of 8 hours in any one day or in excess of 40 hours in any one week, provided such persons shall be paid for any hours in excess of such limits [at] the overtime rate of pay which has been set therefor by the Secretary of Labor.
>
> "(b) Until otherwise set by the Secretary of Labor, the rate of pay for such overtime shall be one and one-half times the basic hourly rate received by the employee. The 'basic hourly rate' means an hourly rate equivalent to the rate upon which time and one-half overtime compensation may be computed and paid under Section 7 of the Fair Labor Standards Act of 1938, as amended." (CCH WH ¶26,200.010.)

These Walsh-Healey Act regulations, just like the Alaska Wage and Hour Act, adopt the Fair Labor Standards Act definition for "regular rate of pay". They, therefore, also adopt the fluctuating workweek method which is embodied within the FLSA definition of "regular rate of pay".

Case law and administrative rulings under the Walsh-Healey Act have also specifically approved the use of the fluctuating workweek method of determining overtime. In re Noble Street Motors, Inc., 15 W.H.Cases 517 (1962); In re Richland Lime Co., 10 W.H. Cases 365 (1951); In re B.&W. Sportswear, Inc., 6 W.H. Cases 1224 (1947); Kelly Steel Works, Inc., Ruling of the Secretary of Labor, P.C.-228, March 21, 1947; Edwin & Louis Bry, Inc., Ruling of the Secretary of Labor, P.C.-199, August 26, 1946, CCH WH ¶26,104.27.

The United States Labor Department has similarly determined that the "basic rate of pay" under the Contract Work Hours and Safety Standards Act is to be computed in the same manner as the regular rate of pay is computed under the Fair Labor Standards Act and has expressly recognized the applicability of the fluctuating workweek method under that

statute. CCH WH ¶27,056; BNA WHM §99:345; U.S. Department of Labor Compliance Manual.

The two federal Acts discussed above have the same overtime provisions as the Alaska Wage and Hour Act. Also like that Alaska statute, they rely upon the Fair Labor Standards Act for a definition of the term, "regular rate of pay". In this manner they incorporate the fluctuating workweek method which is embodied in the FLSA "regular rate of pay" definition. The mere fact that these statutes have eight-hour overtime provisions, unlike the Fair Labor Standards Act, does not in any way affect this adoption of the fluctuating workweek method.

Arguments that state eight-hour overtime provisions establish a higher standard which must take precedence over Fair Labor Standards Act procedures are similarly unconvincing. There is no question that Fair Labor Standards Act provisions do not excuse noncompliance with higher statutory overtime standards. The Fair Labor Standards Act itself so provides in 29 U.S.C. §218(a), which reads:

> "No provision of this chapter or of any order thereunder shall excuse non-compliance with any federal or state law or municipal ordinance establishing a minimum wage higher than the minimum wage established under this chapter or a maximum workweek lower than the maximum workweek established under this chapter."

See also, Brennan v. State of New Jersey, 364 F.Supp. 156 (D. N.J. 1973); State v. Comfort Cab, Inc., 118 N.J.Super. 162, 286 A.2d 742 (1972).

Applying the fluctuating workweek method to the Alaska statute, however, would not in any way derogate from that state's eight-hour overtime requirement. The fluctuating workweek method is totally consistent with eight-hour overtime provisions as is demonstrated by its use in connection with the Walsh-Healey and Contract Work Hours Acts. The fluctuating workweek is simply a method for determining an employee's regular rate of pay. Once that regular rate of pay is determined, it can be utilized just as readily in connection with a 40-hour, eight-hour overtime provision like the Alaska statute as it can in connection with a mere 40-hour requirement such as the Fair Labor Standards Act.

Under an Alaska-type statute, overtime would be paid for all hours worked in excess of eight hours in a single day even under the fluctuating workweek method. The only difference is that the regular rate of pay would be determined by dividing total remuneration by total hours worked that week instead of by a standard 40 hours, as the Alaska Department of Labor wishes to do. There is no obstacle whatsoever to utilizing a fluctuating workweek method under both daily and weekly overtime requirements.

E. Because the Statutory Language Involved in the State Statute Is Clear and Unambiguous on Its Face, Dowell Was Entitled to Rely Upon the Facts of the Statute Absent Any Contrary Interpretations of the Act by the State of Alaska

As indicated above, the prevailing interpretation of the term "regular rate of pay" is clear and unambiguous. No cases, statutes, or regulations exist in Alaska or elsewhere which suggest in any way that the regular rate of pay definition under the Fair Labor Standards Act is not applicable to the Alaska Wage and Hour law. That being the case, Dowell and other companies operating in Alaska are totally justified in relying upon the face value of the Alaska statute and taking the position that the fluctuating workweek method may be utilized under the State's Wage and Hour law.

The only authority which has even come close to addressing this particular issue in the State of Alaska is the case of Cameron v. Chickagof Min. Co., 82 F.Supp. 665, 12 Alaska Rpts. 103 (N.D. Alaska 1948). There, consistent with prevailing authority, the district court in Alaska held that "rate of pay" under the Fair Labor Standards Act is determined by dividing the fixed weekly compensation by the number of hours actually worked. It stated that:

> "The [U.S.] Supreme Court has repeatedly pointed out that the regular rate must be the quotient of the amount actually paid divided by the number of hours actually worked; that it must be the actual, not fictitious rate agreed upon and paid." (Citations omitted.) 12 Alaska Rpts., at 108.

Of course, while reported in Alaska, this case was determined in federal court under the federal Fair Labor Standards Act. Nevertheless, it is the only authority of any type reported in Alaska from which guidance could be sought by Dowell and other companies currently using the fluctuating workweek concept. In view of this fact, Dowell, and the other similarly situated companies, could reasonably rely upon the facet of the Wage and Hour Act as justifying their use of the fluctuating workweek method.

It would surely place an onerous burden upon Dowell and those other companies if it were held at this time that they were liable for backpay despite their good faith reliance upon the explicit provisions of the Wage and Hour Act and despite the fact that there has never been any previous indication that the Fair Labor Standards Act definition of "rate of pay" would not apply under the Alaska act. Such a holding would also contravene governing Constitutional due process requirements.

F. Since An Employee's Rate of Pay Can Always Be Determined by Utilizing the Appropriate Formula, There Is No Merit in an Argument That the Fluctuating Workweek Method is Rendered Unacceptable by the Terms of Alaska Statute §23.05.160 as a Pay Rate Change Without Prior Notification

Alaska statute §23.05.160 was relied upon by the Wage and Hour Division of the Department of Labor in its initial condemnation of the fluctuating workweek method. That section reads as follows:

> "An employer shall notify his employee in writing at the time of hiring of the day and place of payment, and the rate of pay, and of any change with respect to these items on the payday before the time of change. An employer may give this notice by posting a statement of the facts, and keeping it posted conspicuously at or near the place of work where the statement can be seen by each employee as he comes or goes to his place of work."

It was contended that this section bars the use of the fluctuating workweek method because under that system of

computation, an employee's rate of pay will be subject to change from week to week. There are three reasons why such an argument cannot be supported.

First, §23.05.160 is not a part of the Alaska Wage and Hour Act. The Wage and Hour Act is found in §§23.10.050 to 23.10.150. Because it is not included in the Act, §23.05.160 cannot serve as an independent basis upon which the Wage and Hour Division can rely in precluding the use of the fluctuating workweek method. This conclusion is clear from the terms of §23.10.075 which creates and empowers the Wage and Hour Division of the Department of Labor. There, and in §23.10.085, the scope of the Wage and Hour Division's authority is expressly limited to administering §§50 to 150 of the Wage and Hour chapter. It does not have jurisdiction to implement a section which is outside of the statutory scope of its powers.

Second, even assuming arguendo that §23.05.160 could be a sufficient ground, it is apparent that the express terms of that section do not, in any way, preclude the use of the fluctuating workweek method. All that §23.05.160 requires is that an employee be informed of the rate of pay he will receive at the time of his hiring, and that he be notified of any changes in his rate of pay which might occur subsequent to that time. Section 23.05.160 is, therefore, essentially a notice statute. Its primary focus is to guarantee that an employee is given sufficient prior notice of any change in his wage rate.

Despite Wage and Hour Division assertions to the contrary, under the fluctuating workweek method, the requirements of this section are satisfied. It should be kept in mind that the fluctuating workweek method is basically a salary approach to employee compensation. As indicated previously, employees working under that method receive a guaranteed weekly salary which remains the same even though the amount of hours they work per week may fluctuate. of course, the rate per hour under such a system may differ from week to week depending on the number of hours worked, but this is true of all salary compensation programs. While the hourly rate may fluctuate, the salary remains the same.

Of course, the calculation of overtime compensation may cause differences in the amount of an employee's weekly compensation, but this, once again, is a situation typical of all employees. Overtime compensation of necessity

fluctuates for all employees depending upon whether, and to what extent, overtime is worked.

Third, §23.05.160 cannot be a bar to the fluctuating workweek method since it has been held not to bar Belo plans. The Alaska Department of Labor has on several occasions indicated that it finds no problem in accepting the use of a Belo plan method of compensation. A Belo plan, like the fluctuating workweek method, involves a system whereby an employee's hourly wage rate changes on a weekly basis relative to the number of hours worked that week. But the guaranteed salary remains the same, just as under the fluctuating workweek method. The theory behind the two methods is identical. If the Belo plan is not precluded by §23.05.160 then logically the fluctuating workweek method should not be subject to attack on this ground.

IV

CONCLUSION

The procedural understanding between Dowell and the Wage and Hour Division calls for the simultaneous submission of position papers to the Attorney General's Office. The decision of the Attorney General's Office is to be based upon those position papers and any additional information which the parties may be called upon to submit. Dowell hereby requests that prior to the issuance of any decision adverse to its position set forth above, it be granted an opportunity to submit additional information, either by further documentation or by an oral presentation, to address points contained in the tentative decision of the Attorney General's Office.

If you have any questions regarding this matter, or if we can supply any additional information whatsoever, please do not hesitate to contact me.

Very truly yours,

Garry G. Mathiason

The Honorable Charlie Bussell
Representative
Chairman, Committee on Judiciary
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: Materials relating to subject of House Bill 223

Dear Representative Bussell:

This responds to your two letters of March 30, 1983 requesting information from the Department of Law concerning certain regulations of the Department of Labor (8 AAC 15.100) regarding flexible-work-week employment.

Since I was the attorney in the Department of Law who worked with the Department of Labor in adopting those regulations back in 1978, I thought it appropriate that I respond to your inquiry directly. Pursuant to your request of this morning, I will make myself available to the Committee to address the issues raised in HB 223. I will also be asking Assistant Attorney General Gary Amendola, who now works with the Department of Labor, to attend your Committee's hearings on the bill.

In response to your questions:

1. The Department of Law has not issued any opinions regarding the constitutionality of the current regulations regarding flexible-work-week employment (8 AAC 15.100). However, the Alaska Supreme Court did address the validity of those regulations in 1981 in its decision of Dresser Industries, Inc. v. Alaska Department of Labor 633 P.2d 998. A copy of that decision is attached for your information. Also, back in early 1978 I did prepare a formal opinion to the Department of Labor advising them on their authority to adopt regulations dealing with flexible-work-week employment. A copy of that February 10, 1978 opinion is also attached. As you will note, the Alaska Supreme Court agreed with my analysis.

2. In response to your request for documentation of the process which led to the adoption of the Department of Labor's regulations on this subject, I am attaching copies of the relevant materials contained in the Lt. Governor's files. These include Affidavits of Publication from the Southeast Alaska Empire, the Fairbanks Daily News Miner, and the Anchorage Daily News, an Affidavit of Oral Hearing indicating that a hearing on these proposed regulations was held in Anchorage on September 15, 1978, an Affidavit of Notice of Adoption of Regulation indicating that the requirements of AS 44.62.190 regarding provision of notice of proposed adoption of regulations was complied with by the Department of Labor, and the memorandum by the Department of Law's regulations attorney, Arthur Peterson, approving these regulations for filing with the Lieutenant Governor. The original of all these documents is on file with the Lieutenant Governor and can be reviewed in his offices.

I hope this information will be of assistance to you and the Committee in your deliberations on HB 223.

Sincerely,

NORMAN C. GORSUCH
ATTORNEY GENERAL

regarding cancellation of the contract on two weeks' notice. The argument based on Davis's claim that he was the band's leader can be disposed of summarily: no evidence has been produced from which it can be inferred that this statement induced Johnson to enter into the contract. *See Restatement (Second) of Contracts* § 309 (Tent. Draft No. 11, 1976). The second argument, based on Davis's alleged promise that the band's engagement could be cancelled on two weeks' notice, must fail for the same reason. Even granting that failure to warn a party of his possible misapprehension of a contract term may constitute a misrepresentation,[8] we are unable to conclude that Johnson may have been passively misled in that fashion. She fails to assert any assumption on her part that the written agreement embodied the purported oral promise. No evidence was presented from which it can be inferred either that she failed to read the contract or, having read it, failed to understand its terms. Her affidavit indicates neither that she in any way misapprehended the content of the written agreement nor that she was induced to sign it by any deception, active or passive, on Davis's part. Absent any evidence that Johnson was induced to enter into the contract on the basis of a misrepresentation as to the terms it contained, the district court was correct in granting summary judgment in favor of the band on this ground.

We agree with the district court's conclusion that Johnson's evidence, even interpreted in the light most favorable to her, was insufficient to support her defenses to enforcement of the written contract. That court's entry of summary judgment in favor of the band members must therefore be AFFIRMED.

DRESSER INDUSTRIES, INC., Appellant,

v.

ALASKA DEPARTMENT OF LABOR, Appellee.

No. 5625.

Supreme Court of Alaska.

Sept. 18, 1981.

Employer appealed from entry of summary judgment by the Superior Court, Third Judicial District, Anchorage, Seaborn J. Buckalew, Jr., J., upholding validity of

8. Restatement (Second) of Contracts § 301 (Tent. Draft No. 11, 1976) defines a misrepresentation as "an assertion that is not in accord with existing facts." Section 303 provides that:

> A person's non-disclosure of a fact known to him is equivalent to an assertion that the fact does not exist only if
>
> . . . . . .
>
> (b) he knows that disclosures of the fact would correct a mistake of the other party as to a basic assumption on which that party made the contract and if non-disclosure of the fact amounts to a failure to act in good faith and in accordance with reasonable standards of fair dealing, or
>
> (c) he knows that disclosure of the fact would correct a mistake of the other party as to the contents or effect of a writing, evidencing or embodying an agreement in whole or in part . . . .

This section is clarified in Comment e as follows:

> *Known mistake as to a writing.* One party cannot hold the other to a writing if he knew that the other was mistaken as to its contents or as to its legal effect. He is expected to correct such mistakes of the other party and his failure to do so is equivalent to a misrepresentation which may be grounds either for avoidance under § 306 or for reformation under § 308. . . . The failure of a party to use care in reading the writing so as to discover the mistake may not preclude such relief (§ 314). In the case of standardized agreements, these rules supplement that of § 237(d), which applies, regardless of actual knowledge, if there is reason to believe that the other party would not manifest assent if he knew that the writing contained a particular term. Like the rule stated in Clause (b) that stated in Clause (c) requires actual knowledge and is limited to non-disclosure by a party to the transaction.

regulation promulgated by Department of Labor which prohibited flexible work week. The Supreme Court, Rabinowitz, C. J., held that: (1) Director of Wage and Hour Division of Department of Labor was authorized to promulgate regulation, and (2) regulation did not exceed power delegated by legislature and was reasonable and not arbitrary method of furthering policies of wage and hour statutes requiring increased overtime compensation and promoting spreading of employment.

Affirmed.

1. States ⇐9

Text of Alaska Statehood Act makes it clear that federal legislative enactments were to be carried over unless overruled by State Constitution or state legislature, but Act did not automatically incorporate and maintain federal case law, or administrative law, unless and until changed by legislature. Alaska Statehood Act, § 8(d), 48 U.S.C.A. prec. § 21.

2. Labor Relations ⇐1101

Section of Wage and Hour Act which manifests intent to safeguard existing minimum wage and overtime standards is expression of general public policy and not specific prohibition of change. AS 23.10.050.

3. Labor Relations ⇐1101

Although section of Wage and Hour Act governing definitions directs courts to apply federal regulatory definitions "where applicable," such definitions are "applicable" only when Director of Wage and Hour Division and Commissioner of Labor have refrained from defining terms of state regulations, pursuant to their discretionary authority under sections of statute governing scope of administrative regulations and adoption of federal regulations. AS 23.10.085(b), 23.10.095, 23.10.145.

4. Labor Relations ⇐1101
States ⇐9

Alaska Statehood Act did not automatically incorporate federal case law or administrative law unless and until changed by legislature, provision of Wage and Hour Act which manifests intent to safeguard existing minimum wage and overtime standards is not prohibition of change, and direction to court to apply federal regulatory definitions "where applicable" means that such definitions are applicable only when Director of Wage and Hour Division and Commissioner of Labor have refrained from defining terms of state regulations; thus, Director was authorized to promulgate regulation which prohibited flexible work week. Alaska Statehood Act, § 8(d), 48 U.S.C.A. prec. § 21; AS 23.10.050, 23.10.085(b), 23.10.095, 23.10.145.

5. Stipulations ⇐3

Stipulations as to law are not binding upon court.

6. Labor Relations ⇐1425

Sections of Wage and Hour Act governing scope of administrative regulation and adoption of federal regulations constitute delegation of authority from legislature to agency to formulate policies, leaving to agency discretion issue of whether federal definitions of regular rate of pay and other terms can be applied consistently with Wage and Hour Act; thus, standard of review in determination of validity of regulation prohibiting flexible work week was whether regulation was reasonable and not arbitrary. AS 23.10.085, 23.10.095.

7. Labor Relations ⇐1439

While under standard hourly wage salary, as worker's overtime hours increase, average hourly wage increases, under flexible work week, as worker's overtime hours increase, average hourly wage decreases in contravention of policies requiring increased overtime compensation and promoting spreading of employment; thus, regulation of Department of Labor which defined "regular rate of pay" so as to exclude use of flexible work week was consistent with, and reasonably necessary to carry out purposes of statute governing wages and hours, did not exceed power delegated by legislature, and was reasonable and nonarbitrary method of furthering statute's policy. AS 23.10.050 et seq.

John K. Norman and Wev W. Shea, Hartig, Rhodes, Norman & Mahoney, Anchor-

age, and A. J. Harper II and Jeffrey S. Kuhn, Fulbright & Jaworski, Houston, Tex., for appellant.

Elizabeth Page Kennedy, Asst. Atty. Gen., Anchorage, and Wilson L. Condon, Atty. Gen., Juneau, for appellee.

Before RABINOWITZ, C. J., and CONNOR, BURKE, MATTHEWS and COMPTON, JJ.

OPINION

RABINOWITZ, Chief Justice.

This is an appeal from a summary judgment granted by the superior court. Its sole issue is the validity of 8 AAC 15.100(d)(3),[1] a regulation promulgated by the Department of Labor which prohibits the "flexible work week" (FWW), purportedly under the authority of the Alaska Wage and Hour Act. The superior court concluded

1. This regulation reads:

(d) The following are not acceptable methods of complying with the payment of overtime provisions of AS 23.10.060:

. . . . . .

(3) flex-time or flexitime plans established under 29 C.F.R. 778.114 providing a fixed salary for fluctuating hours up to a predetermined maximum number of hours in a workweek.

The federal regulation referred to, 29 C.F.R. 778.114, reads as follows:

§ 778.114 *Fixed salary for fluctuating hours.*

(a) An employee employed on a salary basis may have hours of work which fluctuate from week to week and the salary may be paid him pursuant to an understanding with his employer that he will receive such fixed amount as straight time pay for whatever hours he is called upon to work in a workweek, whether few or many. Where there is a clear mutual understanding of the parties that the fixed salary is compensation (apart from overtime premiums) for the hours worked each workweek, whatever their number, rather than for working 40 hours or some other fixed weekly work period, such a salary arrangement is permitted by the Act if the amount of the salary is sufficient to provide compensation to the employee at a rate not less than the applicable minimum wage rate for every hour worked in those workweeks in which the number of hours he works is greatest, and if he receives extra compensation, in addition to such salary, for all overtime hours worked at a rate not less than one-half his regular rate of pay. Since the salary in such a situation is intended to compensate the employee at straight time rates for whatever hours are worked in the workweek, the regular rate of the employee will vary from week to week and is determined by dividing the number of hours worked in the workweek into the amount of the salary to obtain the applicable hourly rate for the week. Payment for overtime hours at one-half such rate in addition to the salary satisfies the overtime pay requirement because such hours have already been compensated at the straight time regular rate, under the salary arrangement.

(b) The application of the principles above stated may be illustrated by the case of an employee whose hours of work do not customarily follow a regular schedule but vary from week to week, whose overtime work is never in excess of 50 hours in a workweek, and whose salary of $250 a week is paid with the understanding that it constitutes his compensation, except for overtime premiums, for whatever hours are worked in the workweek. If during the course of 4 weeks this employee works 40, 44, 50, and 48 hours, his regular hourly rate of pay in each of these weeks is approximately $6.25, $5.68, $5, and $5.21, respectively. Since the employee has already received straight-time compensation on a salary basis for all hours worked, only additional half-time pay is due. For the first week the employee is entitled to be paid $250; for the second week $261.36 ($250 plus 4 hours at $2.84, or 40 hours at $5.68 plus 4 hours at $8.52); for the third week $275 ($250 plus 10 hours at $2.50, or 40 hours at $5 plus 10 hours at $7.50); for the fourth week approximately $270.88 ($250 plus 8 hours at $2.61 or 40 hours at $5.21 plus 8 hours at $7.82).

(c) The 'fluctuating workweek' method of overtime payment may not be used unless the salary is sufficiently large to assure that no workweek will be worked in which the employee's average hourly earnings from the salary fall below the minimum hourly wage rate applicable under the Act, and unless the employee clearly understands that the salary covers whatever hours the job may demand in a particular workweek and the employer pays the salary even though the workweek is one in which the full schedule of hours is not worked. Typically, such salaries are paid to employees who do not customarily work a regular schedule of hours and are in amounts agreed on by the parties as adequate straight-time compensation for long workweeks as well as short ones, under the circumstances of the employment as a whole. Where all the legal prerequisites for use of the 'fluctuating workweek' method of overtime payment are present, the Act, in requiring that 'not less than' the prescribed premium of 50 percent for overtime hours worked be paid, does not prohibit paying more. On the other hand, where all the facts indicate that an employee is being paid for his over-

ed the regulation was valid, and Dresser Industries (Dresser) has appealed. We affirm.

The case was presented to the superior court on the basis of the parties' "Stipulations of facts, issues, and procedure," providing in part:

1. Dresser Industries, Inc. is doing business in the State of Alaska and is subject to the jurisdiction of this court.

2. The person on whose behalf the action has been instituted is Clyde Woody (herein claimant), who has assigned his rights to the Department of Labor pursuant to AS 23.05.220.

3. The Department of Labor is the proper party plaintiff to bring this suit under AS 23.05.230 and suit has been timely and properly instituted.

4. The court has jurisdiction of the subject matter and the parties.

5. This action arises under the provisions of the Alaska Wage and Hour law (AS 23.10.050 *et seq.*) and the regulations of the Department of Labor promulgated thereunder (8 AAC 15.100).

6. The interpretative regulation at issue was properly promulgated in accordance with the Alaska Administrative Procedure Act (AS 44.62).

7. Claimant is due the sum of $3,956.76 if the position of plaintiff is sustained and is not due any monies if the position of defendant is sustained.

8. This case is ripe for adjudication on the stipulated facts and issues and the parties agree this stipulation shall constitute cross-motions for summary judgment.

9. The predicates which served as the Administrator's basis in adopting the challenged regulation were:

(A) The 'fluctuating work week' is not applicable under the Alaska Act because,

(1) AS 23.05.160 requires an employee to be told of his 'rate of pay' at the time of hire and of any changes therein before payday; and

(2) AS 23.10.060 requires that employers have to pay overtime for hours worked over eight (8) hours per day, even if less than forty (40) hours per week are worked, and this is to the employer's detriment.

Dresser presented two arguments in support of its contention that 8 AAC 15.100(d)(3) is invalid. It asserted, first, that the definition of "regular rate of pay" in the federal regulations, which countenances use of the FWW, *see* note 1 *supra*, is binding upon the State Wage and Hour Division under two statutory provisions: section 8(d) of the Statehood Act [2] and the Alaska Wage and Hour Act itself, specifically AS 23.10.050 [3] and AS 23.10.145.[4] Second, Dresser

time hours at a rate no greater than that which he receives for nonovertime hours, compliance with the Act cannot be rested on any application of the fluctuating workweek overtime formula.

2. The entire text of section 8(d) of the Statehood Act reads:

(d) Upon admission of the State of Alaska into the Union as herein provided, all of the Territorial laws then in force in the Territory of Alaska shall be and continue in full force and effect throughout said State except as modified or changed by this Act, or by the constitution of the State, or as thereafter modified or changed by the legislature of the State. All of the laws of the United States shall have the same force and effect within said State as elsewhere within the United States. As used in this paragraph, the term 'Territorial laws' includes (in addition to laws enacted by the Territorial Legislature of Alaska) all laws or parts thereof enacted by the Congress the validity of which is dependent solely upon the authority of the Congress to provide for the government of Alaska prior to the admission of the State of Alaska into the Union, and the term 'laws of the United States' includes all laws or parts thereof enacted by the Congress that (1) apply to or within Alaska at the time of the admission of the State of Alaska into the Union, (2) are not 'Territorial laws' as defined in this paragraph, and (3) are not in conflict with any other provisions of this Act.

Alaska Statehood Act, P.L. 85-508, § 8(d).

3. AS 23.10.050 reads, in relevant part: "It is the public policy of the state to ... (2) safeguard existing minimum wage and overtime compensation standards ...."

4. AS 23.10.145 reads:

Definitions. Terms used in §§ 50–150 of this chapter shall be defined, where applica-

argued that even if the State Wage and Hour Division was authorized to promulgate 28 AAC 15.100(d)(3), the regulation is inconsistent with the state Wage and Hour Act and unreasonable and arbitrary, and thus cannot withstand judicial review.

A. *Carry-over of federal law.*

It is undisputed that the FWW is sanctioned under federal wage and hour law. *See Overnight Motor Transport Co., Inc. v. Missel*, 316 U.S. 572, 62 S.Ct. 1216, 86 L.Ed. 1682 (1942). Early federal regulations specifically endorsed its use, under the provisions defining "regular rate of pay." 29 C.F.R. 778.3 (1950).

Dresser asserts that this federal definition of "regular rate of pay" carried over into state law because no change in that definition was made by the state legislature. Pointing to the section of the Statehood Act which continued in full force and effect all Territorial laws except as modified or changed by the Statehood Act itself, by the state constitution, or by the legislature of the new state, Dresser argues that coverage, meaning, and interpretation of the Alaska Act should parallel that of the Fair Labor Standards Act absent a clear legislative directive to the contrary. Dresser's position seems to be that although the state can choose to diverge from federal law in this area, it should only be able to do so by virtue of legislative enactment, and that in this action the burden is on the state to show that statutory provisions passed by the state legislature mandated issuance of the regulation at issue. Otherwise, Dresser contends, the state agency could not, merely by issuing regulations, overrule the treatment of the FWW under federal/Territorial law, carried over into state law by the Statehood Act.

[1] We do not find this argument persuasive. We think that the text of section 8(d) of the Statehood Act made it clear that federal legislative enactments were to be carried over unless overruled by the state constitution or the state legislature.[5] We do not interpret it as having automatically incorporated and maintained federal case law or, as Dresser argues, administrative law, unless and until changed by the legislature. This court has not held itself bound by federal judicial rulings entered prior to the date of statehood, regardless of whether or not the state legislature has acted in a given area.[6] We think it would be equally awkward to hold state agencies bound by federal regulations extant as of statehood. Such a result would unduly restrict state agencies and inordinately burden the legislature.

[2] Nor are we convinced that the terms of the Alaska Wage and Hour Act evince an intent to bind the State Wage and Hour Division to federal regulatory definitions. It is true that AS 23.10.050 manifests an intent to safeguard "existing" minimum wage and overtime standards, but we cannot give this the strained reading of having petrified wage and hour law as of the time of its enactment. That provision is an ex-

ble, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it.

5. The language of section 8(d), *see* note 2 *supra*, indicates that its primary concern was with "laws enacted by Congress."

6. *See, e. g., Howarth v. Pfeifer*, 443 P.2d 39, 44 (Alaska 1968) ("What may be considered a just disposition of a dispute at one stage of history may not be the same at another stage, considering changing social, economic, and other conditions of society.... Thus, we hold under the principles we have discussed in this opinion that one may now maintain an action for negligent misrepresentation, even though that may not have been the case under the common law in years gone by."); *In re Mackay*, 416 P.2d 823, 837 (Alaska 1964) ("We do not agree with the respondent's contention that there should be read into section 8(d) of the Alaska Statehood Act an intent to limit the powers of the Supreme Court of Alaska.... Congress cannot limit this court's power to discipline Alaskan lawyers either directly or by continuing in force the provision of a territorial statute claimed by the respondent to have that effect."). *Cf. Surina v. Buckalew*, 629 P.2d 969 (Alaska 1981) (prosecutor's non-statutorily based promise of immunity in return for testimony is binding under Alaska Constitution regardless of federal rule).

expression of general policy, not a specific prohibition of change.

[3] Dresser's next argument is based upon AS 23.10.145, which indicates that "[t]erms used in [the Alaska Wage and Hour Act] shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it." On its face, this provision presents a strong indication that the federal definition of "regular rate of pay" is binding on the State Wage and Hours Division. However, two other statutory provisions undercut this position. AS 23.10.085(b) provides that the state regulations to be issued by the Wage and Hour Division "may . . . define terms used in [the Alaska Wage and Hour Act]";[7] and AS 23.10.095 provides that the state Commissioner of Labor "may adopt regulations and interpretations which are made by the administrator of the Wage and Hour Division of the federal Department of Labor and which are not inconsistent with [the Alaska Wage and Hour Act]."[8]

We must interpret the statutory scheme as a whole and in such a way that separate provisions do not conflict.[9] Here, we agree with the state's argument that AS 23.10.145 directs the courts to apply federal regulatory definitions "where applicable," and that such definitions are "applicable" only when the state director of the Wage and Hour Division and the Commissioner of Labor have refrained from defining terms in the state regulations, pursuant to their discretionary authority under AS 23.10.085 and 23.10.095.[10] We reject Dresser's contention that AS 23.10.145 is a mandatory directive to both courts and agencies, to be overruled only by the legislature. Such an interpretation would substantially nullify AS 23.10.085 and 23.10.095.

[4] For the above reasons, we conclude that the Director was authorized to promulgate 8 AAC 15.100(d)(3).

7. AS 23.10.085 reads:

Scope of administrative regulations. (a) The director may issue, amend or rescind such administrative regulations not inconsistent with the purposes and provisions of §§ 50–150 of this chapter which are necessary for the administration of §§ 50–150 of this chapter.

(b) The regulations may, without limiting the generality of (a) of this section, define terms used in §§ 50–150 of this chapter, and the restriction or prohibition of industrial homework or of the other acts or practices which the director finds appropriate to carry out the purpose of §§ 50–150 of this chapter, or to prevent the circumvention or evasion of §§ 50-150 of this chapter.

(c) The regulations may permit deductions by an employer from the minimum wage applicable under §§ 50–150 of this chapter to his employees for the reasonable cost, as determined by the director on an occupation basis, of furnishing board or lodging if board or lodging is customarily furnished by the employer and used by the employee.

8. As 23.10.095 reads:

Adoption of federal regulations. The commissioner may adopt regulations and interpretations which are made by the administrator of the Wage and Hour Division of the federal Department of Labor and which are not inconsistent with §§ 50–150 of this chapter.

9. *See In re Estate of Hutchinson*, 577 P.2d 1074, 1075 (Alaska 1978); *State v. City of Anchorage*, 513 P.2d 1104, 1110 (Alaska 1973).

10. This interpretation is consistent with our ruling in *McGinnis v. Stevens*, 543 P.2d 1221, 1238–39 (Alaska 1975), where we held that a prison inmate was not entitled to the minimum wage for institutional jobs. We relied partially on AS 23.10.065:

> AS 23.10.065 is based on the federal Fair Labor Standards Act of 1938 and the terms used in the Alaska statute are defined in the same way as in the federal act. A prisoner is not an 'employee' of the state under the federal act, and therefore is not so by virtue of AS 23.10.065. Moreover, even were we to regard the inmates here as employees, state employees are excluded, by virtue of AS 23.10.055(5), from the operation of the statute. Finally, the legislative history indicates that Congress did not intend the Fair Labor Standards Act to cover prisoners, and we find no indication that the state statute was not meant to have parallel 'non-coverage.' We simply cannot say that the distinction between prisoners in institutions and free citizens on the labor market is suspect.

Id. (footnotes omitted). *McGinnis* did not involve a state regulation explicitly rejecting the FLSA rule on prisoners, however, so our application of the federal definition there was in accordance with our present holding.

B. *Validity of 8 AAC 15.100(d)(3).*

The parties have attempted to stipulate to two matters affecting the scope of this court's review: (1) that 8 AAC 15.100(d)(3) is an interpretative regulation, and thus subject to review under the independent judgment standard; and (2) that the sole statutory provisions which form the basis for the regulation are AS 23.05.160 and AS 23.10.060.

[5] Although the parties' efforts toward simplifying the issues in a case are always appreciated, stipulations as to the law are not binding upon the court. "Counsel ... may agree as to the facts, but they cannot control this court by stipulation as to the sole or any question of law to be determined under them." *San Francisco Lumber Co. v. Bibb*, 139 Cal. 325, 73 P. 864, 865 (1903).[11] This rule regarding stipulations of law is particularly appropriate where, as here, the case involves a matter of public policy. *See generally* Annot., 92 A.L.R. 663, 666 (1934). We think these considerations require us to look beyond the parties' stipulation in our analysis of the applicable law.

[6] We conclude that the regulation here is "quasi-legislative". In *Kelly v. Zamarello*, 486 P.2d 906, 909–11 (Alaska 1971), (footnotes omitted), we distinguished between quasi-legislative and interpretative rule-making:

> Professor Davis characterizes the difference in judicial attitude toward certain administrative rules as a distinction between 'legislative regulations' and 'interpretative regulations.' He has defined 'legislative rule' as 'the product of an exercise of legislative power by an administrative agency, pursuant to a grant of legislative power by the legislative body.' 'Interpretative rules,' he states, 'are rules which do not rest upon a legislative grant of power (whether explicit or inexplicit) to the agency to make law.' The distinction is not always easy to draw, since as Davis points out, 'Interpretative rules sometimes rest upon statutory authority to issue them. • • •'
>
> ....
>
> [T]he distinction between legislative and interpretative rule-making is a helpful one when reviewing regulations adopted by state administrative agencies. We hold, therefore, that when a regulation has been adopted under a delegation of authority from the legislature to the administrative agency to formulate policies and to act in the place of the legislature, we should not examine the content of the regulation to judge its wisdom, but should exercise a scope of review not unlike that exercised with respect to a statute.
>
> ....
>
> Thus, where an administrative regulation has been adopted in accordance with the procedures set forth in the Administrative Procedure Act, and it appears that the legislature has intended to commit to the agency discretion as to the particular matter that forms the subject of the regulation, we will review the regulation in the following manner: First, we will ascertain whether the regulation is consistent with and reasonably necessary to carry out the purposes of the statutory provisions conferring rule-making authority on the agency. This aspect of review insures that the agency has not exceeded the power delegated by the legislature. Second, we will determine whether the regulation is reasonable and not arbitrary. This latter inquiry is proper in the review of any legislative enactment.

We think it clear that AS 23.10.085 and 23.10.095[12] constitute a delegation of authority from the legislature to the agency to formulate policies, leaving to the agency's discretion the issue whether federal definitions of "regular rate of pay" and

11. *See also Anchorage v. Geber*, 592 P.2d 1187, 1191-92 & 1192 n.8 (Alaska 1979), where we overruled as "ill advised" that portion of *Layland v. State*, 535 P.2d 1043 (Alaska 1975) suggesting that parties' concessions regarding interpretations of law are binding upon the courts.

12. *See* notes 7 and 8 *supra*.

other terms can be applied consistently with Alaska's Wage and Hour Act. Thus, we hold that the "reasonable and not arbitrary" test is applicable.

[7] The parties stipulated to the specific statutory provisions upon which the state relies to justify the regulation. These are AS 23.05.160,[13] which requires that an employee be informed of his rate of pay at the time of hiring and of any change in that rate on the payday prior to the change, and AS 23.10.060,[14] which requires the one and one-half overtime rate not only for hours worked over forty per week, but also for hours worked over eight per day.

Dresser argues that 8 AAC 15.100(d)(3) furthers neither of these statutory provisions; and indeed, our assessment of the parties' arguments indicates that the regulation is related only tenuously, if at all, to these provisions. However, the state's brief argues that the regulation is grounded in policy considerations beyond those contained in the two statutes. Although Dresser argues that this disregard of the stipulation is improper, we have concluded for the reasons noted above that the stipulation is not binding upon this court. In another case in which the parties had attempted to stipulate to the purpose of a legislative enactment, the New York Court of Appeals noted:

> We are not bound by stipulations in respect of the purpose of legislation. Laws are not to be declared invalid upon the consent of parties. We must determine their purpose and tendency for ourselves.

E. Fougera & Co., Inc. v. City of New York, 224 N.E. 269, 120 N.E. 642, 643 (1918).

The public policy underlying the Alaska statutory scheme is given as follows in AS 23.10.050:

> *Public Policy.* It is the public policy of the state to
>
> (1) establish minimum wage and overtime compensation standards for workers at levels consistent with their health, efficiency and general well-being, and
>
> (2) safeguard existing minimum wage and overtime compensation standards which are adequate to maintain the health, efficiency and general well-being of workers against the unfair competition of wage and hour standards which do not provide adequate standards of living.

On the basis of these policy pronouncements, the state argues that the basic concern of the legislature was protection of the worker's well-being against unfair wage and hour standards, and that this concern is of particular importance in Alaska, where the cost of living is higher than in other states. The state also argues that prohibiting the FWW would be to the worker's advantage, and cites the present case as an illustration: claimant Woody would be entitled to $3,956.76 if the regulation were upheld.

More specifically, the state argues that as the number of hours worked in a particular week increases, the "regular rate of pay" decreases; as the "regular rate" decreases, the resultant "overtime rate" decreases; and thus the effect of allowing the FWW is counter-productive to the stated purposes of the Act. The state insists, further, that the FWW makes it financially advantageous

13. As 23.05.160 reads:

> *Notice of wage payments.* An employer shall notify his employee in writing at the time of hiring of the day and place of payment, and the rate of pay, and of any change with respect to these items on the pay day before the time of change. An employer may give this notice by posting a statement of the facts, and keeping it posted conspicuously at or near the place of work where the statement can be seen by each employee as he comes or goes to his place of work.

14. The applicable portion of AS 23.10.060 reads:

> *Payment for overtime.* No employer who employs employees engaged in commerce, or other business, or in the production of goods or materials in Alaska may employ an employee not acting in a supervisory capacity, either male or female, for a workweek longer than 40 hours or for more than eight hours a day, except that if the employer finds it necessary to employ an employee in excess of 40 hours a week or eight hours a day, compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid, and this provision is considered included in all contracts of employment.

for an employer to hire an employee to work long overtime hours rather than to hire more workers, contrary to one purpose of the overtime provision, which was to force employers to spread employment by hiring more persons.[15]

We are persuaded that the state's position is correct. Under a standard hourly wage salary, as a worker's overtime hours increase, the average hourly wage increases. Under the FWW, as a worker's overtime hours increase, the average hourly wage decreases. This contravenes the policies of requiring increased overtime compensation and promoting the spreading of employment.

Thus, we must conclude that the regulation's definition of "regular rate of pay" so as to exclude use of the FWW is consistent with, and reasonably necessary to carry out, the purposes of the relevant statutory provisions. The regulation does not exceed the power delegated by the legislature. Further, 8 AAC 15.100(d)(3) is a reasonable and non-arbitrary method of furthering the statute's policies.[16]

Dresser raises several collateral arguments concerning the regulation's prohibition of the "Belo" pay plan, *see Walling v. A.H. Belo Corp.*, 316 U.S. 624, 62 S.Ct. 1223, 86 L.Ed. 1716 (1942); 29 U.S.C.A. § 207(f), and the permissibility of piece-work and commission pay plans. The validity of these provisions is not before us, and we perceive no inconsistency so blatant as to render the prohibition of the FWW unreasonable or arbitrary.

The judgment of the superior court is AFFIRMED.

15. The United States Supreme Court has repeatedly emphasized this point. In *Bay Ridge Operating Co. v. Aaron*, 334 U.S. 446, 460, 68 S.Ct. 1186, 1194, 92 L.Ed. 1502, 1514 (1948), the Court said, "The purpose was to compensate those who labored in excess of the statutory maximum number of hours for the wear and tear of extra work and to spread employment through inducing employers to shorten hours because of the pressure of extra cost."

16. The parties have not addressed, and we express no opinion concerning, the question whether there may be any conflict between 8 AAC 15.100(d)(3) and AS 23.10.060(17) and (18), enacted in ch. 31, § 1, SLA 1980.

David LEUCH, Appellant,

v.

STATE of Alaska, Appellee.

No. 5255.

Supreme Court of Alaska.

Sept. 25, 1981.

Defendant was convicted, pursuant to guilty pleas, before the Superior Court, Fourth Judicial District, Fairbanks, James R. Blair, J., of two counts of grand larceny, and he appealed sentence. The Supreme Court, Rabinowitz, C. J., held that: (1) where an offense is against only property, involving no physical threats or violence, where it is the offender's first felony conviction, and where there is no background of unsuccessful paroles or probations which would indicate that probation is unsuitable to protect the public, to deter the offender, and to further his rehabilitative process, probation, coupled with restitution, is the appropriate sentence unless other factors militate against it, and (2) concurrent sentences of eight years with four suspended was excessive and upon remand defendant should receive concurrent sentences which, including any period of suspension and probation, did not exceed five years in total length.

Sentence reversed and remanded.

Matthews, J., dissented and filed opinion in which Burke, J., joined.

1. Criminal Law ⇐986.2(1)

Absent a conviction, an indictment is absolutely no evidence of guilty conduct.

OPINION NO. 7

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K—STATE CAPITOL
JUNEAU 99811

February 10, 1978

Edmund N. Orbeck
Commissioner
Department of Labor
P.O. Box 1146
Juneau, Alaska 99802

Re: Use of Flex-Time Contracts under State Wage and Hour Act; A.G. File J-66-263-78

Dear Commissioner Orbeck:

You have asked our opinion as to whether certain methods for compensating employees, referred to generally as "flex-time", "flexitime", or "fluctuating workweek" plans, may be used by employers in Alaska consistent with the payment for overtime provision of the state's Wage and Hour Act, AS 23.10.060. We understand these plans are used frequently by employers to provide a steady income level to employees whose hours of work vary considerably from week to week. Your question arises because these "fluctuating workweek" pay plans are specifically recognized as valid under the Fair Labor Standards Act of 1938, as amended (FLSA), 29 U.S.C. § 201 et seq., the federal counterpart to the state's overtime provisions. However, these kinds of plans are not addressed under

relevant state laws or regulations dealing with overtime. At least one employer in the state is presently using flex-time plans to compensate certain of its employees, and the Wage and Hour Division of your department has taken the position that the employer's use of those plans is inconsistent with the state's Wage and Hour Act, AS 23.10.050 - 23.10.150.

The fact that flex-time is permissable under the FLSA does not, in and of itself, require that the State of Alaska also permit its use by employers within the state. The FLSA prescribes only minimum requirements with which all covered employers in the United States must comply, however, it does not prohibit the states from adopting wage and hour requirements more stringent than those established in the FLSA. See, sec. 18(a), FLSA; 29 U.S.C. § 218(a); also 29 C.F.R. § 778.5. The question, then, is whether the state has in fact adopted a more stringent approach to the payment of overtime than that taken under the FLSA. It is our conclusion that the state has not done so. We believe, however, that your department may prohibit the use of flex-time plans in Alaska through proper adoption of appropriate regulations.

The basic payment of overtime provisions of the state and federal law are quite similar. /1 Sec. 7(a)(1) of the FLSA, 29 U.S.C. § 207(a)(1) provides, in pertinent part, as follows:

> [N]o employer shall employ any of his employees . . . for a workweek longer than forty hours unless said employee receives compensation for his employment in excess of the hours above specified at a rate not less than one and one-half times the regular rate at which he is employed. (emphasis added)

AS 23.10.060 provides in pertinent part:

> No employer . . . may employ an employee . . . for a workweek longer than 40 hours . . . except that if the employer finds it necessary to employ an employee in excess of 40 hours a week . . . compensation for the overtime at the rate of one and one-half times the regular rate of pay shall be paid. (emphasis added)

/1 The state act does require that overtime be paid for hours worked in excess of eight in one day in addition to the requirement of both acts that overtime be paid for work in excess of 40 hours in a week, however that difference is not at issue here.

Under both statutes the employee's "regular rate of pay" must be determined before his overtime entitlement can be computed. By way of regulation, the U.S. Department of Labor has stated that "flex-time" pay plans are an acceptable method of determining the employee's "regular rate". 29 C.F.R. § 778.114. It has been suggested that your department must also recognize flex-time as a valid method of compensating for overtime as the result of AS 23.-10.145 which provides:

> Terms used in §§ 50-150 of this chapter shall be defined, where applicable, as they are defined in the federal Fair Labor Standards Act of 1938, as amended, or the regulations adopted under it.

For two reasons, we do not read this provision as requiring the adoption of flex-time in Alaska, however. First, 29 C.F.R. § 778.114, the "fluctuating workweek" provision, is not a "definition" of a term. It is merely one of many "interpretations" recognized by the federal government in implementing the FLSA. The federal regulations, themselves, explicitly state that the various provisions of 29 C.F.R. § 778, of which "fluctuating workweek" is a part, are "the official interpretation of the Department of Labor with respect to the meaning and application of

the maximum hours and overtime pay requirements of section 7 of the [FLSA]." (emphasis added). The state Wage and Hour Act specifically recognizes this distinction between "definitions" and "interpretations". AS 23.10.095 authorizes, but does not require, adoption of regulations and "interpretations" made under the federal act, while AS 23.10.145 clearly requires adoption of federal definitions, "where applicable".

But even if 29 C.F.R. § 778.114 could be described as a "definition" for purposes of AS 23.10.145, it would still only be binding on the state if it is "applicable". We take the statute's use of "where applicable" to mean if it fits a given situation; if it is fit, suitable, pertinent, appropriate, or capable of being applied; if it is applicable to the habits and conditions of society. McQueeney v. Catholic Bishop of Chicago, 159 N.E.2d 43, 47 (App.Ct. Ill. 1959); Whitney v. American Fidelity Company, 215 N.E.2d 767, 768 (Mass. 1966); Fuchs v. Goe, 163 P.2d 783, 792 (Wyoming 1945). Therefore, the department could determine upon examination that a given definition contained in the FLSA or the regulations adopted under it does not adequately or appropriately address working conditions or the work situation in Alaska. Once the department has made that determination, it may properly adopt a different definition, appropriate to Alaska. In doing so, however, it must

adopt that definition as a regulation under the procedures prescribed in the State's Administrative Procedure Act (AS 44.62) if it is to have any enforceable effect.

The preceding discussion sets out some of the general parameters of the relationship between the FLSA and the state's Wage and Hour Act. The state act specifically looks to the federal provisions for substance. In adopting this legislative scheme, we think the Legislature evidenced a clear intention to follow the federal approach to wages and hours closely, except in those situations where the Department of Labor determines that the federal provisions are inadequate or inappropriate when applied to working in Alaska. Consequently, if the state determines that certain aspects of its Wage and Hours Act should be applied in a manner more stringent than required under the FLSA and the regulations adopted under it, the areas of difference between the federal and state laws should either be set out clearly in the Act or in the department's regulations adopted under the Act.

Nothing in the state's current statutes or regulations indicates that flex-time is not an acceptable method of compensating for overtime work under the Alaska act. At the same time, the federal regulations clearly permit flex-

time under the FLSA, after which the state act is closely patterned. Under those circumstances, the department may not simply make independent ad hoc determinations of acceptable methods of overtime compensation. Unless the state act is clear on its face, the department must either establish its own standards (regulations) or follow those established under the FLSA.

There are at least two independent reasons for the department adopting its own wage and hour standards. First, properly adopted and enforceable regulations implementing the state Wage and Hour Act will assure that employers have adequate notice of the requirements with which they must comply in Alaska. In the absence of state standards, Alaska employers have only the federal law and regulations for determining how to comply with applicable wage and hour laws. Second, established standards also insure that the department's wage and hour enforcement activities will be consistent throughout the state.

Since the only standards for overtime entitlement currently in existence are those adopted under the federal FLSA, we must conclude that the department may not presently

refuse to recognize flex-time plans established under 29 C.F.R. § 778.114. The state act does not, on its face, prohibit flex-time plans. As indicated above, the state and federal overtime provisions are quite similar, and the federal provision has been interpreted to permit flex-time. We have no doubt, therefore, that the state provision can also be so interpreted. We are also of the opinion that the department could, through adoption of an appropriate regulation, interpret the state act as not permitting flex-time plans. However, until the department adopts regulations which either specify exclusive standards for the determination of overtime entitlement or reject specific portions of the federal standards, employers in Alaska are entitled to rely on their compliance with the federal standards as also constituting compliance with the state's Wage and Hour Act.

Sincerely yours,

AVRUM M. GROSS

NOTICE OF PROPOSED CHANGES IN THE REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.085, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.150, as follows:

11 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.

Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.

Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.

Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.

Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.

Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguements relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 18, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P.O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

The Honorable John Cowdery
Representative
Capital, Room 409
Juneau, Alaska 99811

Re: HB 223

Dear Representative Cowdery:

We represent the Alaska Wage Security Association, a newly formed association concerned about House Bill 223. Sections 3 and 4 of HB 223 would retroactively eliminate civil and criminal liability of employers who illegally used a fluctuating workweek plan to pay their employees less in overtime than they were entitled to be paid under the Alaska wage and hour law. This legislation would violate the Constitution by denying the employees their existing contract right to payment in accordance with the law.

The Association's members include employees who, if HB 223 passes in its present form, will lose the overtime compensation they have already earned under the law. It also includes individuals who simply believe that it is unjust to take away what Alaskans have earned through their hard labors and to excuse past violations of the law by mainly large, non-Alaskan companies. Among the members are former Senate President Chancy Croft and former Commissioner of Labor Gil Johnson.

Briefly, the law which the companies violated went into effect in January, 1979. The affected companies were given notice before the law became effective, and the Wage and Hour Division of the Department of Labor wrote to three of the largest companies, Otis Engineering, Dresser Industries, and Dowell Division of Dow Chemical, informing them of the new regulation concerning overtime. Nevertheless, the companies chose to ignore the law. Dresser was sued in October, 1979, by the Department of Labor, and lost in both the Superior and Supreme Courts. Incredibly, only in November, 1981, did Dresser finally decide it should comply with the law.

Since the first lawsuit, additional lawsuits have been brought against the companies. The precedent set by the litigation brought by the Department of Labor provides a clear indication that the companies will lose again. Thus, having violated the law, having been sued because of it and having lost, and now facing additional lawsuits which they will lose, the companies seek to evade the law and the judicial process through HB 223.

The precedent that would be set if the current version of HB 223 passes bears close scrutiny. Essentially, the bill asks the Legislature to choose sides in the pending litigation, and to choose the side of large, non-Alaskan companies that have violated the law. The judiciary is the appropriate branch of government to decide the litigation, not the Legislature. If the Legislature involves itself in these lawsuits, it will set a precedent which will be looked to by other parties involved in litigation which they believe they will lose, and by others who have violated the law and seek an easy way out.

We ask only that before you vote, you consider seriously the implications HB 223 has for our systems of law and justice. If you have any questions or need further information, I encourage you to contact me. The members of the Association and others who will unfairly be affected by this legislation are also anxious to discuss this with you.

Very truly yours,

FAULKNER, BANFIELD, DOOGAN
& HOLMES

By Anthony M. Sholty

ALASKA WAGE AND HOUR ACT
BRIEFING PAPER - THE FLUCTUATING WORK WEEK

Several inaccurate and misleading claims are being made in support of the position that the Alaska Wage and Hour Act should be amended to eliminate employee claims which are currently pending in court. The employees' claims are for overtime wages which were never paid because of their employers' use of an unlawful payment formula known as the fluctuating work week (FWW). The questions raised by these arguments are discussed below

1. Did Employers Have Reason to Know of the FWW Regulations?

Prior to adoption of the regulation, the Department of Labor mailed notices of the proposed rule-making directly to affected businesses. Hearings were then held in Juneau, Fairbanks and Anchorage. Shortly after the regulation was adopted, Donald R. Wilson, the Department's Wage and Hour investigator in Anchorage, wrote letters to three oilfield service companies -- Otis Engineering, the Dowell Division of Dow Chemical, and Dresser Industries -- informing them of its adoption.

In October 1979 the Department of Labor sued Dresser Industries, one of the companies now being subjected to a class action, claiming a violation of the regulation. In October 1980 the Superior Court entered a judgment in favor of the Department. In September of 1981 the Supreme Court affirmed this judgment. Dresser did not bring its payment system into compliance with the law until November 1981.

Evidence discovered in a class action lawsuit filed against Schlumberger Limited seeking unpaid wages arising from that company's use of an FWW scheme indicates that awareness of the regulation and the litigation seeking to enforce it was wide-spread among employers. A memorandum obtained from Schlumberger and dated January 23, 1981, states that Schlumberger was assisting with Dresser's legal fees through the Petroleum Equipment Suppliers Association (PESA), an industry trade organization. Another Schlumberger memorandum, dated June 25, 1980, discusses an in-house study "to determine the impact of discontinuing FWW", though this memo does not specifically mention the Dresser lawsuit. Schlumberger did not modify its FWW system until March 1982, five months after the Supreme Court upheld the validity of the FWW regulation.

2. Are Employers Facing "Open-Ended" Liability?

Assuming that somehow employers could have reasonably remained ignorant of the FWW regulation in spite of the public rule-making proceedings and PESA's financing of Dresser's litigation, any excuse for remaining ignorant ended in September 1981, when the Supreme Court upheld the regulation. Since the Wage and Hour Act contains a two years statute of limitations, employers who brought their systems into compliance with the law in a timely fashion and who have not been sued will soon be insulated from liability entirely.

3. Will Employees Receive a Windfall if the Proposed Bill is not Passed?

If an employer tells a worker he will be paid less than the minimum wage or that he will not receive extra compensation for overtime and is then sued for his unlawful conduct, he cannot defend against the lawsuit by arguing that the employee had no basis for expecting to be paid more. Employees have a right to expect that their employers will obey the law when determining their regular and overtime compensation. It is ridiculous to argue that employees, like those who are seeking to recover overtime wages which remain unpaid because of use of the FWW regulation, are somehow obtaining a windfall. They are, of course, merely seeking to obtain what they had a right to receive in their original paychecks.

ALASKA WAGE AND HOUR ACT
BRIEFING PAPER - LIQUIDATED DAMAGES

It has been argued that the mandatory liquidated damages provision is unfair and that Alaska should adopt the "good faith" standard applied by the federal government since 1947. In 1959, when the Alaska legislature adopted a mandatory double damages provision, it wisely chose not to imitate the federal approach. The consequences of adopting the federal standard now will be that employees with small or moderate sized claims will face economic hurdles which will prevent them from enforcing their rights under a statute which depends, in large part, on private enforcement efforts. Adoption of a "bad faith" requirement for double damages will also eliminate an important deterrent to violations. These factors are discussed in greater detail below.

1. The Economic Hurdles.

Though the Department of Labor can prosecute claims for cases involving $5,000.00 or less in unpaid wages [see, 8AAC §15.175(b)], claims in excess of 5,000.00 must be pursued through private attorneys. A "good faith" standard would be extraordinarily difficult to prove to the satisfaction of the court without conducting complex and expensive pre-trial depositions and document searches. Absent "smoking pistols" obtained during pre-trial discovery, many employers will, no doubt, elect to take their chances at a trial at which the employee will bear the burden of proving bad faith. Few people nominally covered by the protection of the Wage and Hour Act would be able to afford such an expensive and lengthy process. Though at the present time, lawyers frequently take such cases on a contingent fee the Code of Professional Responsibility governing attorney conduct requires the client to be ultimately responsible for litigation and discovery expenses, regardless of the outcome. Furthermore, lawyers would soon learn that the imprecision and elasticity of a "good faith" standard make it uneconomical to handle small or moderate claims. The obvious result of these economic disincentives is that many people will simply be unable to enforce their rights.

2. Private Enforcement of the Wage and Hour Act.

Though the Department of Labor has authority to enforce the Wage and Hour Act, it cannot be expected to monitor all activities of all employers of the State and to prosecute all potential wage claims, at least not without an extensive and costly expansion of its current bureaucracy. The current double damages provision in the Wage and Hour Act makes it more economically realistic for private parties to obtain the legal assistance required to redress violations, and, thus, creates an efficient, privately funded enforcement mechanism.

3. Deterrence.

As noted above, it would be difficult to disprove an employer's claim that it was acting in good faith when it underpaid its employees. The current double damages provision encourages employers to educate themselves as to the law's requirements. It also encourages employers to monitor changes in the regulations and in the Wage and Hour Act and to speedily adapt their compensation systems to these changes. The need for such encouragement is demonstrated by the behavior of employers involved in the fluctuating work week litigation, for some of these employers delayed months beyond the issuance of the Supreme Court's final decision adjudicating the validity of the FWW regulation before actually changing their pay systems.

The proposed elimination of mandatory liquidated damages would create a different incentive by encouraging employers to cultivate ignorance of the Wage and Hour laws enacted for the protection of their employees.

HB 223
April 7,1983

Members present: Bussell, Liska, Hayes, Wendte
Members absent: Barnes, Clocksin, Malone

003 The roll was taken, visitors and guests welcomed. Chairman Bussell stated that the business for the day was HB 223, An Act relating to methods for the payment of overtime; and providing for an effective date. States that the intention of the Chair is to meet till 3:00 p.m., recess till 7:00p.m. and continue with the testimonies to accommodate those that have come from out of town.

065 Mr. Chuck Becker is called to testify. He is in support of HB 223. (He written testimony and explanation of the Alliance is attached.)

THE ALLIANCE
P.O. Box 100 / Anchorage, Alaska 99510 / (907) 277-0010

MR. CHAIRMAN, MEMBERS OF THE COMMITTEE, I AM CHUCK BECKER, EXECUTIVE DIRECTOR OF THE ALASKA SUPPORT INDUSTRY ALLIANCE. THE ALLIANCE IS A BUSINESS LEAGUE INCORPORATED UNDER THE STATE'S NON-PROFIT STATUTE AS A 501(c)(6) CORPORATION, AND REPRESENTS OVER 150 FIRMS WHICH PROVIDE EQUIPMENT, SUPPLIES AND SERVICES TO ALASKA'S OIL, GAS AND MINING INDUSTRIES.

THE GOAL OF THE ALLIANCE IS TO FOSTER THOSE ACTIONS REQUIRED TO ESTABLISH ALASKA'S POSITION AMONG OTHER STATES AS A GOOD PLACE IN WHICH TO DO BUSINESS. THE ALLIANCE SUPPORTS POLICIES WHICH ARE DESIGNED TO STIMULATE ECONOMIC DEVELOPMENT IN ALASKA - DEVELOPMENT INITIATED BY THOSE FIRMS CURRENTLY OPERATING IN THE STATE AND BY NEW FIRMS WHICH MIGHT BE ATTRACTED AS A RESULT OF THOSE POLICIES.

WE HEARTILY APPLAUD THE ACCOMPLISHMENTS ACHIEVED DURING THE PAST THREE LEGISLATIVE SESSIONS WHICH WERE CLEARLY AIMED AT SPURING INVESTMENT IN ALASKA. BOLD FIRST STEPS HAVE BEEN TAKEN IN CREATING A POSITIVE BUSINESS CLIMATE IN ALASKA. OUR CONGRATULATIONS AND THANKS TO EACH OF YOU WHO HAD A ROLE IN THESE ACHIEVEMENTS.

THESE ACCOMPLISHMENTS, ALONG WITH OTHERS WHICH HAVE BEEN PROPOSED FOR THIS YEAR - INCLUDING HB 223 - ARE DESTINED

TO SUBSTANTIALLY IMPROVE ALASKA'S IMAGE AMONG CORPORATE DECISIONMAKERS, BOTH FOREIGN AND DOMESTIC, AS WORD OF THESE INITIATIVES IN STATUTORY AND REGULATORY REFORM SPREADS AMONG THE NATION'S BUSINESS COMMUNITY, ALASKA IS SURE TO BE PLACED ON THE LIST OF STATES AS LOGICAL PLACES FOR CORPORATE INVESTMENT.

AND WORD WILL SPREAD QUICKLY. I ASK THE COMMITTEE'S INDULGENCE WHILE I READ INTO THE RECORD EXERPTS FROM AN ARTICLE WHICH APPEARED IN THE MARCH 3 ISSUE OF THE WALL STREET JOURNAL. IT IS HEADLINED...WEST VIRGINIA TRIES TO CHANGE ITS IMAGE. "WEST VIRGINIA IS TRYING TO CHANGE THE IMPRESSION THAT IT IS A POOR PLACE TO DO BUSINESS. THE LEGISLATURE RECENTLY LIMITED THE SCOPE OF A CONTROVERSIAL 1978 COURT DECISION THAT ALLOWS WORKERS TO SEEK PUNITIVE DAMAGES - DAMAGES THAT GO BEYOND ACTUAL COMPENSATION FOR LOSS - FOR ON-THE-JOB INJURIES. MORE THAN 200 LAWSUITS TOTALING BILLIONS OF DOLLARS IN CLAIMS HAVE BEEN FILED AGAINST EMPLOYERS SINCE THE COURT RULING. UNDER THE NEW LAW, EMPLOYEES, OR SURVIVORS OF WORKERS KILLED ON THE JOB, MAY STILL COLLECT COMPENSATORY DAMAGES IF A COURT FINDS THAT EMPLOYERS HAVE FAILED TO MEET A NUMBER OF SAFETY REQUIREMENTS".

"THE NEW LAW TAKES EFFECT IN MAY. AN IMPROVEMENT IN THE EYES OF EMPLOYERS, WEST VIRGINIA IS STILL MORE GENEROURS TOWARD WORKER INJURY CLAIMS THAN MOST STATES, WHERE WORKER'S COMPENSATION IS THE SOLE REMEDY EXCEPT IN CASES OF CRIMINAL INTENT TO DO HARM".

"THE STATE IS ALSO TAKING A CLOSE LOOK AT ITS BUSINESS AND BANKING LAWS. PART OF A PROPOSED TAX OVERHAUL COULD INVOLVE REPLACING AN UNPOPULAR TAX ON GROSS SALES WITH A PROFITS TAX. A BANKING REFORM LAW PASSED LAST YEAR PERMITS BANKS TO BRANCH, MERGE AND FORM MULTIBANK HOLDING COMPANIES". THE ARTICLE CONCLUDES, "FINALLY, WEST VIRGINIA BOOSTERS TAKE MODEST PLEASURE IN THE STATE'S SHOWING IN AN ANNUAL SURVEY CONDUCTED BY THE ACCOUNTING FIRM OF ALEXANDER GRANT AND COMPANY OF HOW STATES RATE AS SITES FOR MANUFACTURING. WEST VIRGINIA MOVED TO 39th PLACE FROM DEAD LAST A YEAR AGO." END OF QUOTE..

WE SUBMIT THAT THESE INITIATIVES UNDERTAKEN BY THE WEST VIRGINIA STATE LEGISLATURE WERE JUDGED TO BE IN THE BEST INTEREST OF ALL CITIZENS OF THAT STATE - THAT SUCH ACTIONS ARE EXPECTED TO MAKE WEST VIRGINIA AN ATTRACTIVE PLACE FOR CORPORATE INVESTMENT, LOGICALLY LEADING TO EMPLOYMENT OPPORTUNITIES FOR ITS RESIDENTS AND TO A REINVIGORATED ECONOMY.

MOREOVER, WE SUBMIT, THAT YOU HERE TODAY, HAVE A SIMILAR OPPORTUNITY BEFORE YOU IN HB 223.

WE ARE HERE TODAY TO TESTIFY IN SUPPORT OF HB 223. WE ARE PREPARED TO OFFER A RECOMMENDATION FOR AN AMENDED VERSION OF HB 223 WHICH WOULD ELIMINATE SECTION 1 OF THE BILL. MR. FLEISCHER WILL PRESENT THAT AMENDMENT TO THE COMMITTEE DURING HIS PRESENTATION. SINCE THE PROHIBITION IN THE REGULATIONS ALREADY HAS THE EFFECT OF LAW, WE

DESIRE TO SEE THAT SECTION DROPPED FROM THE COMMITTEE'S REVISED VERSION. NEEDLESS TO SAY, IT HAS BEEN DIFFICULT TO EXPLAIN TO OUR MEMBERSHIP PRECISELY WHY WE WOULD SUPPORT THE PROHIBITION WHEN MANY ARE, IN FACT, OPPOSED TO IT.

IN 49 OTHER STATES IN THESE UNITED STATES, THE FLUCTUATING WORK WEEK PAY PLAN IS PERFECTLY LEGAL AND OPERATES TO THE BENEFIT OF BOTH EMPLOYEES AND EMPLOYERS.

ALTHOUGH THE ALLIANCE HAS ENDORSED THE BILL AS IT HAD BEEN ORIGINALLY INTRODUCED, WE DID SO IN THE BELIEF, BASED ON CONVERSATIONS HELD LAST YEAR, THAT THE STATE DEPARTMENT OF LABOR WOULD TACITLY SUPPORT THE MEASURE IN ITS ENTIRETY. FROM WHAT I HAVE RECENTLY LEARNED, IT WOULD APPEAR THAT A MISCOMMUNICATION HAS OCCURRED SOMEWHERE ALONG THE LINE.

MOREOVER, WERE THIS BODY TO TAKE ACTION TO CODIFY THE REGULATION, THE DOOR TO RECONSIDERATION OF THE MERITS OF THE PAY PLAN, MIGHT BE FIRMLY CLOSED. THIS COMMITTEE MIGHT WELL BE HEARING FROM THOSE WHO WOULD ADVOCATE LEGALIZING, ONCE AGAIN, THE FLUCTUATING WORK WEEK PAY PLAN AS A VIABLE OPTION IN ALASKA. I WOULD CALL TO THE ATTENTION OF THE COMMITTEE A BRIEF REPORT CONTAINED IN THE PUBLICATION, HIGHLITES OF NATIVE BUSINESS, WHICH COMMENTS ON A STUDY UNDERTAKEN BY THE UNIVERSITY OF ALASKA WITH THE SUPPORT OF A GRANT FROM THE FEDERAL GOVERNMENT. THE STUDY IS EXPLORING METHODS TO MAKE IT POSSIBLE FOR ALASKA NATIVES TO ENTER THE JOB MARKET WITH THE LEAST POSSIBLE CULTURAL DISTURBANCE. THEY PROPOSE TO DO THIS BY STUDYING WAYS OF ALTERING HIRING PRACTICES AND WORK RULES. FOR EXAMPLE, ONE WAY MIGHT BE TO

MAKE INDUSTRIAL PRACTICES MORE LIKE TRADITIONAL SUBSISTENCE ACTIVITIES. IT IS SUGGESTED THAT NATIVES MIGHT BE EMPLOYED FOR PERIODS OF 14 - 16 HOURS A DAY FOR TWO WEEKS, FOLLOWED BY 5 - 6 WEEKS OFF THE JOB, WHICH CORRESPONDS TO THE INTENSE EFFORTS OF THE ALASKA NATIVES DURING WHALING AND FISH RUN PERIODS.

AN INITIATIVE TO OVERTURN THE PROHIBITION AGAINST THE FLUCTUATING WORK WEEK PAY PLAN, HOWEVER, WILL NOT BE ESPOUSED BY THE ALASKA SUPPORT INDUSTRY ALLIANCE. WE HAVE SUFFICIENT CONCERN SIMPLY FOCUSING OUR ENERGIES ON EXTINGUISHING CLAIMS OF EMPLOYEES FOR UNFAIR WINDFALL COMPENSATION AND DOUBLE DAMAGES. TO PERMIT ENFORCEMENT OF THESE CLAIMS WOULD, WE BELIEVE, SET ALASKA APART AS AN UNSTABLE AND UNPREDICTABLE BUSINESS ENVIRONMENT. WE ARE CONVINCED THAT WOULD BE UNHEALTHY FOR THE STATE'S ECONOMY AND FOR EMPLOYERS AND EMPLOYEES ALIKE, NOT TO MENTION THE STATE TREASURY.

AT THE TIME THE STATE DEPARTMENT OF LABOR PROPOSED TO PROHIBIT THE FLUCTUATING WORK WEEK PAY PLAN IN ALASKA, NOTICE OF THE PROPOSED PROHIBITION WAS POORLY PUBLICIZED WITH LITTLE, IF ANY. INPUT FROM ALASKA EMPLOYERS OR EMPLOYEES IN THE SINGLE HEARING HELD ON THE SUBJECT. OUR MEMBERS, THE OIL, GAS AND MINING SUPPORT COMPANIES, WERE MOST AFFECTED BY THIS PROHIBITION. IT IS ESTIMATED THAT SINCE THIS REGULATION WENT INTO EFFECT IN 1978, POSSIBLY AS MANY AS 100 ALASKA BUSINESSES, UNAWARE THAT THE LONG-STANDING CUSTOM AND PRACTICE IN THEIR INDUSTRY HAD BEEN BANNED ADMINISTRATIVELY, HAD CONTINUED USING THE FLUCTUATING WORK WEEK PAY PLAN THEY HAD USED LEGALLY FOR YEARS AND MAY HAVE

INCURRED SUBSTANTIAL LIABILITY INADVERTENTLY. THE MAGNITUDE OF THAT LIABILITY HAS BEEN ESTIMATED TO APPROACH AND EXCEED $100 MILLION WERE PENALTIES TO BE INCLUDED

A CHANGE IN THE REGULATIONS, INDEED IN THE LAW, WHICH IS SO SIGNIFICANT AND HAS SUCH AN IMMENSE IMPACT ON ALASKA BUSINESS SHOULD NOT HAVE BEEN ACCOMPLISHED ADMINISTRATIVELY WITH A MINIMUM OF NOTICE, BUT RATHER SHOULD HAVE BEEN FULLY DEBATED IN THIS LEGISLATIVE BODY. MOREOVER, THE DEPARTMENT OF LABOR CLEARLY MUST HAVE HAD SOME UNDERSTANDING OF THE EXTENT OF USE OF THE FWW PAY PLAN AND THOSE FIRMS WHICH WERE USING THE METHOD AT THE TIME THE DEPARTMENT PROPOSED TO PROHIBIT THE METHOD. SURELY A FORM LETTER FROM THE STATE TO THOSE COMPANIES AND EMPLOYEES WHO WERE DESTINED TO BE AFFECTED BY THE CHANGE, WOULD HAVE BEEN IN ORDER.

INDEED, EVEN AFTER THE BAN WENT INTO EFFECT, THE DEPARTMENT OF LABOR FAILED TO ENFORCE THE PROHIBITION. ASSUMING THE DEPARTMENT HAD SOME INKLING OF THOSE FIRMS WHICH WERE USING THE FLEXIBLE WORK WEEK, IT COULD READILY HAVE GONE TO THOSE FIRMS TO ENFORCE THE PROHIBITION OR THE DEPARTMENT COULD HAVE FILED SUIT AGAINST THEM. THEY TOOK NO SUCH ACTION.

INSTEAD, THIS SMALL AD - DEVOID EVEN OF THE TERM FLUCTUATING OR FLEXIBLE WORK WEEK - NOTICED ONE HEARING TO BE HELD AT THE DIVISION OF AVIATION CONFERENCE ROOM ON WHAT ALMOST APPEARS TO BE THE SUBJECT OF MINIMUM WAGE. I WILL TELL YOU THAT THE ISSUE OF MINIMUM WAGE IS AS ALIEN TO OUR MEMBERS TODAY AS IT WAS DURING THE WINTER OF 1978-79. THEIR EMPLOYEES WERE EARNING NEARLY $50,000 A YEAR WORKING ONLY ONE HALF TO 2/3 OF THE YEAR.

SO THE HEARING WAS HELD - WE ASSUME - HOWEVER THE DEPARTMENT HAS TOLD US THAT NO EVIDENCE OF A RECORD CAN BE FOUND IN THEIR FILES - THE REGULATION BECAME LAW AND ABOUT A YEAR LATER ONE OF OUR MEMBERS WAS SLAPPED WITH A SUIT BY A FORMER EMPLOYEE FOR BACK WAGES. THAT, I RESPECTFULLY SUBMIT, IS ONE HECK OF A WAY TO RUN A GOVERNMENT.

DISTINGUISHED MEMBERS OF THE COMMITTEE - MEMBERS OF THE ALASKA SUPPORT INDUSTRY ALLIANCE ARE - TO USE AN ACCEPTABLE UNDERSTATEMENT- EXTREMELY DISAPPOINTED OVER THIS UNFAIR PREDICAMENT THE STATE ADMINISTRATION GOT THEM INTO AND ARE LOOKING TO YOU TO GET THEM OUT OF IT.

THANK YOU FOR YOUR TIME.

The Alliance is an association of businesses, many of which vigorously compete with each other in the marketplace, but are able to unite under the common goal of making Alaska a good place in which to do business. Should HB 223 fail to be enacted, the impact on the business climate in Alaska would be nothing less than devastating. I happen to be the Chairman of the Anchorage Chamber of Commerce Economic Development Committee. My group is working to establish a comprehensive initiative designed to attract industry - principally manufacturing firms - to Alaska. This effort will place Anchorage in a big league ballgame in which the competition is intense. We want to be ale to point with pride to legislative and administrative policies and actions which will capture the attention of corporate decisionmakers and cause them to seriously consider opening up operations in Alaska. Enactment of HB 223 will go far towards assisting us in our mission.

Throughout the decade of the 70s, the predatory taxation initiatives targeted at Alaska's oil industry, coupled with perceptions of a government philosophy which overtly and covertly appeared to discourage development, crippled the image worked so hard on by Alaska's early pioneers - a message which said to all that Alaska was a land of opportunity and welcomed those who were capable of making our state a great state. That anti-development, anti-business philosophical trens has been reversed both by the Legislature and by the new administration. I earnestly ask that nothing be done to tarnish that perception. Failure to adopt HB 223 would do just that.

instance was any evidence turned up by any firm to demonstrate any warning that their traditional pay plans were about to be declared illegal.

We surveyed a number of our members in an attempt to determine if they had any record whatever of the hearing which led to the prohibition against the fluctuating work week pay plan. We asked that they not only check their files in their Alaska offices but also to have their corporate headquarters review their files. In no

255 Wendte - Do you know of any presentation by the oil and gas industry that does not indicate that the business climate in Alaska is not appropriate for the oil and gas industry.

Becker - I can not answer that because this is the first time I have appeared in Juneau to testify for a piece of legislation.

Wendte - Your alliance main purpose is to improve the business situation in Alaska and make it a fair and equitable place in which to live.

Becker - Yes, of course.

280 Wendte - the deletion of section 1, as you have suggested, would be to removed the liability and any financial obligation from firms.

Becker - that is right.

Bussell - states that there is copies of the statutes as they were in 1978

297 Wendte - how much money is at stake here.

Becker - as far as we have been able to determine is 100 million.

They converse back and forward regarding the amount of money due to the employees. The point of whether the firms were notified by the Dept. of Labor correctly. Becker states that the company did not become aware of the new regulation until they were faced with a law suit over a year later.—

340 Wendte - asks if the alliance is in favor of keeping the regulation as is.

Becker - we will not attempt to overturn the regulation. States that the company has redone the pay system and it is now is accordance with the laws of the state of Alaska.

360 Bussell states that we must move on to expand the record.

371 John Martin from Dresser Atlas takes the chair to testify. (attached is written testimony.

Good afternoon Mr. Chairman, Committee members, and guests. My name is John Martin. I am the Area Manager for Dresser Atlas, a division of Dresser Industries. I have resided and have been registered as an Alaska citizen for the past six years.

I am here today, in that I strongly believe that a 1978 Alaska Department of Labor regulation prohibiting the use of the fluctuating work week pay plan has created an enormous managerial and employee compensation problem that is not conducive to a healthy business climate. This regulation has created a potentially disastrous unjust economic impact on my firm and others operating in this state.

Dresser Atlas employs the fluctuating work week plan in all of the United States where we operate. It is proven to be the best pay plan suitable to the oil and gas service business for both the employee and employer. Dresser Atlas' largest Alaskan core of operation is on the North Slope. Our employees work one week on duty and one week off. During the week on, our employees may be dispatched to a remote location where they may remain on standby waiting in a camp, sleeping, eating or relaxing for hours before they are actually called for to perform the well logging or perforating services. Often the direct true productive working time on the job is minimal compared to the unproductive waiting time. The nature of the oil and gas service business makes work hours next to impossible to predict. The

unpredictability of the Arctic weather and normal drilling problems creates actual job timing merely guess work. This inherent industry problem is fully appreciated by all that have knowledge of the business.

The fluctuating work week system lends itself perfectly to this work environment. First of all, it guarantees the employees a base steady income, even when they are off duty at their homes. Our average Senior Operator was guaranteed $530.00 per week in 1981 whether they were off duty or on duty. This enabled them to maintain standard income levels even when they were off work whether it be due to their days off or low activity periods which are inherent to our business. When they were on the job, they received a guaranteed 16 hours per day, C.O.L.A., isolated location allowance and job bonuses. In 1981, our average Operator made $60,678.00 and a Senior Operator made $67,829.00. Please keep in mind this is unskilled labor, most of which is hired in Alaska. They are also making over double what their Lower 48 counterparts make and have much more personal time off. There was also never a complaint about the fluctuating work week system and each employee was well versed on computation of his earnings.

The unpredictable nature of hours and remoteness makes it virtually impossible to hire additional personnel to spread out the total hours over more employees. As a businessman, what would you think about changing out your employees every eight

hours when the shift coming in had been sleeping in a camp for their eight hours of work? And what about the high cost of flying the personnel back and forth every eight hours and the safety implications of flying in Alaska, frankly, it is totally unacceptable; both economically and from a safety standpoint.

Through some infinite wisdom, the Alaska Department of Labor determined it should abolish the fluctuating work week system. Dresser Atlas was not asked, or any other company to my knowledge our opinion of the use of the fluctuating work week system in determining why it should be banned. It seems incredible to me, how one state agency could make a judgement on the validity of a pay plan that is acceptable in the other forty-nine states and approved by the Federal Government. Such a gross adjustment from the normal accepted and proven way of doing things in the United States would appear to me to be a responsibility of the state legislature.

To make matters worse, the Alaska Department of Labor did not notify our company or any other company, to my knowledge, of the fluctuating work week abolishment. Dresser Atlas management and corporate management has absolutely no record or knowledge of any correspondence either written or oral from the Alaska Department of Labor informing us of such a drastic change in wage administration. Attorneys on several occasions have formally requested that the Alaska Department of Labor furnish correspondence records depicting the

Department's notices before and after the regulation. The only correspondence discovered was a short hearing notice published in the Anchorage Daily News on August 30, 31 and September 1 of 1978. It is also incredible that the words fluctuating work week were not mentioned in the small print common to public hearing notices.

This entire matter did not come to Dresser's attention until the Department of Labor filed a $4,000 suit against Dresser Swaco in 1979 for an employee who was paid under the fluctuating work week plan. Dresser chose to challenge the Department of Labor's suit regarding the validity of the regulation. When losing in the State Supreme Court, Dresser immediately had no choice but to bow down and submit to the Alaska Department of Labor's regulation prohibiting the use of the fluctuating work week pay plan. We changed pay plans seven weeks after the State Supreme Court ruling. Within one month after changing pay plans, we were served a summons in the form of a class action lawsuit. Within a very few months, four other companies were served class action suits for past use of the fluctuating work week plan. These suits are all being handled by one law firm. Two of these suits alone called for judgements in excess of thirty five (35) million dollars!

An Alaska Department of Labor spokesman has estimated that there may be up to 90 companies affected with an excess of 100 million dollars in liability.

H.B. 223 would prohibit retroactive recovery by employees who were paid under the fluctuating work week system during the period the regulatory prohibition was being appealed in the courts.

I encourage you to strongly consider the possible consequences if H.B. 223 does not pass. It would create a definite windfall profit for many past and present employees. Definite windfall, because facts prove these employees were paid fair and equitable wages, which were fully agreed upon and expected by our employees. Who else may profit? One law firm! What is 33.3% of 100 million dollars?

I cannot say I enjoy being here today. I have a business to run as you do a state government. Please keep in mind that my firm and many others have a lot to lose on this issue and the opposition has only to gain. To conclude, I must add that it is totally ironic that in the State of Alaska under the fluctuating work week plan, Dresser had the lowest turnover rate of operators in all of the United States. But yet it is the only state where this fair and just pay plan has been banned and consequently our business stands in financial jeopardy.

I feel your fair and moral judgement will lead you to support H.B. 223.

Thank you for this opportunity to testify.

480 Hayes asks the name of the law firm.

Martin - The Banfield, Logan, Bates. they are in Juneau.

490 Wendte - Comments on when the regulations took effect, Dec. 9, 1978. the bill is asking that we forfeit liability from the date of effect.

Martin - my statement was to distinguish the liability from the test case. Many companies sat back and watched what happened with us. When they saw that the case was lost they then changed their pay systems.

Wendte - you did not changed your pay system at that time, why?

Martin - we thought that we had a good case and a fair chance of winning. We did not want to take away the employees security of knowing what their salary was going to be. The pay system was changed on Nov. 6, 1981. States that the company became aware of the regulations at the time of the Woody case being filed. About six months after the regulations came into effect.

525 Wendte - speaks of the time of the firm knowing of the regulations and the time the firm switched the pay plan. It was actually only from Dec. 1978 to the summer of 1979, which was the time the Woody case was filed.

Martin - states that they did pay their employees fair and square. The majority of them earned over $60,000 a year. Their firm had the least amount of turn overs in the states. States that changing a complete pay plan is a very complicated operation. It took weeks. There had to be time for the employees to make adjustments in their personal lives. They did not have a guaranteed salary.

575 Hayes asks if the salary for an operator under the new pay plan will exceed the pervious $60,000 plan, if not is the 100 million dollar liability a result of the overtime interruption.

Martin states it was difficult to change since there was many ways of paying. When the changed was made they did not intend to pay them any more than before. Some are making a little more, some a little less so it is averaging out.

They converse.

620 Hayes asks if the new way is more cost effective.

Martin replies that in some insistences it is in other not. Because now the employee does not get any compensation when they are off work.

633 Bussell asks is there any work done by the firm concerning cost plus work for the oil industry.

Martin replies no.

644 Hayes follows up on comments of Rep. Wendte on concerning the pay. Would the employees make the same amount of money on either plan.

Martin answers that the cost would be about the same and the company would not have had to pay out any more money.

(turn of tape)

027 Liska how many hours do your employees average.

Martin that is easy to answer now. Before it was any where up to 16 hours a day, they were guaranteed that much. But they are now averaging about 12 to 13 hours a day.

060 Wendte asks if the pay is about the same they must have more employees at this time and asks about the relation of it to the oil and gas companies.

Martin comments on the reason for the stable amount of pay due to the fact of the overtime that was paid. Talks of the way it is now easier and more beneficial for the people to live out of state. Does not believe that it has much to do with the oil company.

Hayes comments.

144 Theodore [illegible]. Fleischer gives testimony. (a basic outline is attached, it was briefly revised before the reading of it, some of which are not included)

TENTATIVE DRAFT - REVISED BEFORE TESTIMONY

TESTIMONY OF THEODORE E. FLEISCHER

My name is Theodore E. Fleischer. I am a partner in the law firm of Ely, Guess & Rudd. I have been retained by Petroleum Equipment Suppliers Association, which I will refer to as PESA, to provide a legal opinion on the constitutionality of legislation under consideration by the Committee. I will get to that in a moment, but first I will briefly describe PESA.

PESA is a trade association with approximately 340 members in the petroleum equipment, service and supply industry. Depending on industry demand, which can be seasonal in nature, several dozen or more of PESA's members are typically active in Alaska. PESA does not of course represent its members in litigation, and therefore is not a party to the lawsuits filed by employees against various of its members which seek overtime compensation and liquidated damages.

You have heard testimony from witnesses describing events since December 8, 1978, to the present on which date the Department of Labor adopted the regulation prohibiting FWW plans. A lawsuit was filed in 1979 by an employee seeking damages, based on the Department of Labor regulation. In September of 1981, after the Supreme Court upheld the Department's authority to

promulgate the regulation, various companies in the petroleum support industry, which had become defendants in ~~similar~~ these lawsuits, decided to seek a legislative remedy. A bill was introduced near the end of the 1982 session of the Legislature, but was not enacted.

During this period PESA became increasingly aware of the potential economic impact of class action lawsuits on its members with Alaska operations. Since then the association has coordinated the efforts of its Alaska members in seeking a legislative solution to what is now seen as an industry-wide problem in the state.

I have been retained as special counsel to PESA to review the proposed legislation, which was drafted last year, and to provide a legal opinion on whether such legislation would be constitutional. PESA desired an opinion from an independent firm not otherwise involved in the litigation; my firm does not represent any party which is a defendant in the lawsuits filed by employees. I have now completed my research and submitted my opinion to PESA. At its request I have provided copies of that opinion to the Committee. After briefly summarizing the opinion I will make several recommendations for revisions in the present version of HB 223.

My analysis focuses on the section of the bill which extinguishes the claims of employees who worked under FWW plans since December 8, 1978. Other witnesses have addressed the question of whether it is wise, fair or necessary to do so. I will address only the issue of whether the legislation, if enacted by the Legislature, would be constitutionally valid.

In connection with preparing my opinion, I have reviewed a letter from Thomas A. Sofo of the Legislative Counsel to ~~Chairman Bu~~ Rep. Walt Furnace ~~sell~~ dated March 2, 1983. Mr. Sofo briefly notes several possible challenges to the constitutionality of the bill, and concludes, without citing any case law or authority, that he is "not convinced that the Alaska Supreme Court would be persuaded" to uphold the legislation. I have also been provided a copy of a letter from counsel for the Alaska Wage Security Association, whose members apparently include employees who have sued to collect overtime compensation. The letter asserts that the legislation violates the constitution, but it provides no argument or authority in support of that statement. In any event, I have examined the legislation to determine whether it could be upheld, if challenged on any of the grounds typically asserted by a plaintiff in challenging legislation which has retroactive effect.

I should first report that I have found no case decided by any court which presents exactly the same scenario as present here. I would have been surprised if I had found such a case. On the other hand, there is a considerable body of case law in which courts have ruled on the constitutionality of legislation which retroactively changes the rights and obligations of private individuals who have entered into contracts. And there are cases involving legislative action to extinguish past claims of employees for overtime compensation and damages in which the fact situations are quite similar to those presented here.

In many of these cases, though certainly not all, courts have upheld the legislature's constitutional power, under certain circumstances, to reach backwards in time and to change and even abrogate the rights of private individuals. For example, courts have upheld the legislature's power to impose taxes retroactively, to modify the rights of mortgage holders, and to limit the right of depositors to make withdrawals from building and loan associations. Obviously, then, the legislature is not precluded as a matter of constitutional law from enacting a law which retroactively affects the rights of individuals.

The question, therefore, is not whether the legislature can enact retroactively effective laws. Clearly the legislature can do so. The pertinent question is whether the proposed legislation, which abrogates the claims of employees to overtime compensation and liquidated damages, would withstand a challenge on the grounds of constitutionality.

A legal challenge to a retroactive law is ordinarily brought under the Contract Impairment Clause of the United States Constitution or the equivalent provision in a state constitution. The Federal Constitution provides that "no state shall . . . pass any law impairing the obligation of contracts." Often a plaintiff will also assert a Fifth Amendment Due Process claim, arguing that the state has, by retroactively affecting his rights, taken his property without due process of law. For practical purposes, the analysis under the Contract Clause and the Due Process Clause are substantially the same and the court deals with them in the same fashion and I will not attempt to distinguish them in my discussion.

On its face, the Contract Clause appears to be an absolute prohibition against any impairment of a contract. However, the Contracts Clause has not been interpreted by the Supreme Court of the US to prevent use of legislative power to carry out legislative purposes which, on balance, are believed to be reasonable. The

Supreme Court has often upheld statutes which impair the obligation of contracts, where the legislature has reasonably exercised its legislative power in order to achieve a legitimate policy goal.

In reviewing the cases it becomes quickly apparent that courts have not developed a formula or test to which the facts in our case can be applied, which will mechanically produce a result. Courts look at many factors when considering challenges to retroactive laws, but arrange them in various combinations depending on the circumstances. For the sake of convenience, in my opinion I have grouped my review of the factors considered by courts into two categories: one is "public interest" and the other is "fairness to the affected individuals". I want to discuss each of these areas briefly.

When considering a challenge to a retroactive law, a court looks to see what state policy was served by enactment of the law. To the extent that there is any legislative history available reflecting legislative intent, the court will review this. In effect, courts look for answers to these questions: does the law affect the state, its economy, and one or more industries operating in the state, or merely one company or individual or a small group? Did the legislature act reasonably in tailoring the law to remedy the problem? Did the

legislature know who would be affected by the law when it adopted it? The answers to these questions will help a court to determine whether the legislature acted reasonably to implement a significant state policy, rather than acting in ignorance of the individuals who would be impacted by the law. Following are examples of some state policies which courts have held could be implemented by retroactively effective legislation: promotion of the integrity of land titles, protection of the financial health of savings institutions, and relieving commercial enterprises of potential adverse impact of lawsuits by employees.

In addition to probing the public policy behind retroactive legislation, courts will look closely at what the contracting parties actually expected when they entered into a contract, which is later modified by legislative action. There have been situations where the parties to a contract have entered into the contract in violation of, or in ignorance of, a legal requirement, and as a result the contract is illegal and unenforceable according to the terms agreed to by the parties. In such cases legislatures have on occasion changed the law, and made the change retroactive, in order to validate the contract as agreed to by the parties. Courts have routinely upheld this type of exercise of legislative power. The result is that the party's reliance on their agreement, and

their reasonable expectations, are confirmed. For example, courts have upheld legislation which validated retroactively a usurious loan, a defective power of attorney, and an invalid pledge of security by a bank.

It is also important to determine the nature of the right which is extinguished by retroactive legislation. Certain types of rights, such as property rights, are ranked as more deserving of protection, although even these are subject to modification and even destruction by a legislative enactment. One particular species of rights is peculiarly subject to revision by the legislature. These are rights created, in statutes, by the legislature itself. Rights given by the legislature can later be taken away by the legislature. Alaska's Supreme Court ruled that a defense to a lawsuit, set out in a statute, could be repealed by the legislature. Other examples include a retroactive change in usury laws, which make a loan contract legal, which was illegal when originally entered into. The point is that the legislature is free to deprive individuals of rights which the legislature itself originally granted, if it acts reasonably in doing this.

A series of cases decided by courts in the late 1940's are particularly relevant, and bring together the factors considered above (the public interest and the reliance of the

parties). After the Second World War the United States Supreme Court decided a case in which it interpreted the Fair Labor Standards Act to require payment, including time and one-half for overtime, for certain activities which previously had not been considered compensable work. For example, changing into work clothing on the employer's premises. This interpretation of the law created a potential liability to employers numbering in the billions of dollars. Congress responded with the Portal-to-Portal Act of 1947 which provided that no employer would be subject to liability for failure to pay wages for such incidental activities, unless there was an express contract provision providing for such payment or it was the custom at the establishment where the employee worked to pay wages for these activities.

Workers attacked the constitutionality of the act as violating the Due Process Clause. In ~~literally~~ over hundreds of cases, courts universally held that the Act was constitutional. They held that where the right to recover on claims is of purely statutory origin, as in the case of claims for overtime compensation, the legislature may later change the law to take away the claim originally granted by law, if it concludes this would produce a fair and equitable result. After looking at the legislative history of the Portal-to-Portal Act, the courts determined that Congress was

justified in preventing a serious adverse economic impact on industry by extinguishing the rights of employees to receive "windfall" payments for activities that they did not expect to be compensated for when they were performing them.

In a somewhat similar situation several years later Congress enacted what became known as the Overtime-on-Overtime LAW Act. This law retroactively extinguished employer liability for overtime claims and liquidated damages which would otherwise clearly have been due to employees. That case has a fact situation even closer to the facts presented to the Legislature than Portal to Portal here. There employees had asserted claims, and filed lawsuits against employers, pursuant to an interpretation of the statute in their favor issued by a wage and hour administrator. Unlike the Portal-to-Portal cases, only several millions of dollars were involved, and only a small segment of industry exposed to liability. Nevertheless, the Ninth Circuit Court of Appeals followed the holdings in the Portal-to-Portal cases. The court held that the statute was constitutional for substantially the same reasons as expressed by numerous courts in the Portal-to-Portal cases. It should be noted that the court followed the ruling in the Portal-to-Portal cases despite the fact that millions of dollars, rather than billions, were at stake, and the impact was on only one industry in California, rather than nationwide in scope.

State Supreme courts also apply the above principles. For example, the California Supreme Court in 1982 upheld a statute which retroactively invalidated claims against lenders for damages for charging unlawful interest rates. In 1978 the high court in Massachusetts held constitutional a statute by which the Massachusetts Legislature retroactively re-wrote clauses in insurance contracts, since the Legislature concluded that it would be unfair to enforce the clauses which had been agreed to by customers with insurance companies. Thus the principles of law discussed above are not merely of ancient origin and application, but have continued vitality in courts today.

It is against the above legal backdrop that the legislature must act on the proposed legislation. In my opinion, the legislature can retroactively extinguish employees claims for compensation and liquidated damages, if it makes certain findings based on testimony and facts available to it. I suggest that the findings should be along the following lines:

First, the Legislature could determine that payment by employers of pending and potential claims of employees for overtime and damages would pose adverse economic consequences on an industry important to the state's economy, and perhaps to the state itself;

Second, it could find that from December 8, 1978 to the present employees and employers voluntarily entered into employment contracts by which employees would be compensated under FWW plans; both unaware of the Department of Labor regulation because there was no widespread publicity directed at informing employers or employees of the drastic change in that law; and Finally employees expected to be paid pursuant to the terms of their agreement and not on some other basis.

In my opinion, if the Legislature makes findings such as these, then the Legislature is free to balance the claims of employees for strict enforcement of the Department of Labor regulation against the adverse economic impact on, and unfairness to, the industry, and possibly the state itself. If in the Legislature's opinion the balance weighs in favor of the industry's position, as opposed to permitting a limited class of employes to collect "windfall" compensation and penalties, then the Legislature can constitutionally extinguish those claims.

The attached opinion is more detailed than the testimony I have presented here. ~~In summary, I have concluded that the legislature can, if it makes certain findings, retroactively extinguish employee claims for overtime compensation and liquidated damages.~~ It comes to the same conclusion that I have stated here. If the ~~legislature~~ legislature

decides to do so, I recommend that it, through its committee reports, clearly state its intent and the policy reasons for adopting the legislation. In the event of a legal challenge, I believe this will materially assist the court to determine that the Legislature acted reasonably to implement a legitimate public purpose in adopting the legislation.

I have recommended several revisions to HB 223 to PESA and have prepared a committee substitute incorporating these:

1. Section 1, which prohibits FWW, has been deleted. This deletion has been explained in earlier testimony. ~~As noted~~, it has no practical effect because of the ~~the~~ Department of Labor regulation presently accomplishes the same purpose in any event.

2. Section 2, which was inadvertently made retroactively effective, is to be effective for the future only.

3. The title has been amended to give notice of the bill's purpose of extinguishing the existing claims of employees for overtime compensation and liquidated damages.

4. The immediate effective date clause has been removed.

5. There are other minor language clarifications, which do not change the substance of the original bill.

Thank you for the opportunity to appear today.

450 Wendte comments that since there was some conflicting statements made by Fleischer in relation to Mr. Sofo comments perhaps it would be a good idea to hear from Mr. Sofo at this time. Mr. Sofo is the legal counsel that drafted the bill.

Bussell states that there is only ten minutes are left and we will be able to talk Mr. Sofo at a later time. The committee will again be meeting at 7:00p.m. this evening.

Bussell comments on the responsibility of the Dept. of Labor to notify the individuals which are involved. Asks what he feels is the obligation of the Dept. of Labor.

505 Fleischer states that during the court cases the thought of whether the regulation was properly litigated was never brought up.

They discuss this point.

530 Wendte asks about the advertising of bids by large companies for work and relates it to this in the area of the person complaining to the firm.

Fleischer I believe that a person that feels he was dealt with unfairly would go to the company. And on the other had the obligation of the government to notify is totally different than a private firm's obligation.

548 Wendte asks concerning if there is any state statutes that cover the area of notification.

Fleischer there is a law that states that the affected individuals have to be contacted.

Bussell comments on the people trusting the Dept. to notify them of such things.

They discuss the notifying of the Dept. of Labor.

590 The Committee discusses the recess of the Committee and reconvening.

612 The meeting is recessed till 7:00. The time is 2:56.

The meeting is called back to order by Chairman Bussell at 7:00p.m. Members present: Bussell, Liska, Wendte, Malone. Speaker Hayes entered shortly after the meeting begun.

Tape #52

004 Roll, welcome, etc.

033 Jim Robison, Dept. of Labor. States he will be brief to allow to have to two attorneys to testify one for each point of view. Refers to the package of materials that the Dept. delivered to the Committee. Believes that all the proceedings started with a law suit with Dowell back in 1976 having to do with the FWW. That action was put in limbo to decide on the action to take in relations to the regulations. States that there was letters sent to Dowell, Dresser in relation to this matter as soon as the issue was set into place.

100 Bussell asks if he has copies of the those letters. He states he does not but there are people to testify to the fact under oath that they were sent thus the companies were notified.

110 Wendte asks on the time frame of the letters. He states that it was after regulations were enacted, late 1979 early 1980.

117 Robison states that they have no problem with the deletion of section 1, as already mentioned they do have those regulations. There are some problems with the other sections. They had Gary Amendola research. He will testify. Asks where everyone is coming up with the 100 million dollar figure. The dept. has not been able to come with any figures at this time.

150 Wendte comments on the legal aspect of the Department's notice of the regulation. Relates it to the case of Dresser in the stipulation of the regulation.

Bussell comments on this and states that it is not the issue before us.

182 Gary Amendola, Dept. of Law representing the Dept. of Labor. Will restrict the comments to sections 3 & 4. There are 3 serious conflicts with the constitutional provisions. (1) Is the impairment of contract Article 1 Section 15. There has been some cases upheld in this area. Some states do uphold FWW ours do not. Refers to AS 23.10.060 which refers to the overtime provisions. This states that it is part of all contracts within the state. (2) Article 2 Section 19 is probably the most important with deal with Special Legislation. Does the legislation deals with general public interests and public purpose? This is a question to put to the test to see if they apply. The Committee has determine if this is a state wide concern and not just an specific area. He feels there are equal protection problem. Because those that used the FWW during the period in question would be exempt from liability those that did not used it would be liable for the overtime payment. Also the employees will have a reason to file due to the fact whether he worked for an employer that had FWW or not. Those with the FWW could recover funds. (3) there is conflict with AS 23.10.050 which is the public policy statement by the legislature. Also 23.10.130 is that statute of limitations.

370 Bussell refers to 23.10.055 states that it covers a broad range of people and firms. Comment on the impairment of contract cause. The employees had contracts with their employers and so when the regulation was issued it then violated those contracts, so wouldn't those be impaired. Should this work both ways.

395 Amendola refers to the point of the legislature passing regulations and they override the contracts.

420 Ron Laursen, Deputy Attorney General with the Dept. of Law. Worked for the Dept. of Labor at the time the regulations were adopted. Believes the wage claim was in 1976 in part of Dowell Corp. The firm and Dept. of Labor had disagreement as to the FWW. Dowell thought FWW was right. Dowell and Dept. of Labor came to agreement to submit a brief of their standpoint on the FWW. They reviewed the arguments. He issued an opinion in February of 1978 that Dowell was right because the Dept. of Labor at the time did not have regulation about FWW. The Dept. of Labor could state that FWW was not in the best interest of the state but would have to do it threw regulations. The first publication of the regulation was in August, 1978. Talks of the notice to be given to interested parties were complied with as in AS 44.62.190. States that that is when the suit against Dresser was brought up.

530 Talks of Section 3 dealing with the retroactive provisions. HB 223 deals with four issues really One should or should not continue FWW. Second whether or not modify liquefy damages or penalties in reference to pay Section 2 provides lead way for the employer that did not mean to take advantage of the employee but did due to lack of knowledge of the regulation. Section 3 says that any one that did not comply with the regulation from Dec. 9, 1978 is off the hook. section 4 goes about getting people off the hook for the FWW and violation of the wage and hour act. If this is past the constitutionality will be brought before the court until the Supreme decides on it. Comments on the thought of the constitutionality of this. States the courts will be faced with this question. States that there is far greater likelihood that where you are taking away or changing a penalty that previously existed that that will be held constitutional. It is less than a contract right that has been established as employee right against their employer. States that the people will not stand for being told that they can not collect funds for their past overtime.

615 Wendte directs question to all. Did the legislature have the power to repeal the regulation in 1978.

Lauren state that the legislature has the power to repeal any regulations.

630 Wendte asks if there is a date as to when the Dresser case was filed.
No I do not.

635 Lauren comments on the people who abide by the law and those who did not abide by the law

650 Turn of tape #52

003 Bussell comments on his personal experience in business.. States that he knows more about the regulations now than he has during his twenty years of doing business. Reminds the meeting that the cost factor of the pay did not change. The employer treated them the same. The only thing different was the way of contracting. States it did not affect him. He does a lot of cost plus contracts. The change over would have had ruined him in that issue. He is displeased with the effort by the Dept. of Labor and the Dept. of Law to notify people and firm before and after the fact.

082 Malone comments that the dates of publication was given.

They talk of the notification.

150 The committee talks of the equal amount of pay under both plans.

210 Bussell states that the reference to the oil companies is out of place due to the fact that there is not one oil company present here today and probably will not be.

230 Marlene Neve' represents AFL-CIO. Against the Bill. States HB 223 purposes two alternations to the present wage and hour act. First section 2 allows employers to avoid liability because lack of knowledge of the wage and hour laws. Secondly the bill retroactively distinguish thousands of claims of employees now filed. This is the second try to do this. FWW would help the employees that have different hours per week, a little higher or a little lower than 40 hours. But usually the FWW is used to lower the pay of the employees. It is used in areas where the employees work well over 40 hours per week. Request teleconference for the employees that can not afford to fly to Juneau. Hopes the Committee is as concerned about the employees as the employers.

296 Wendte asks about the part that the Superior Court, state and US. They basically had four chances to change over during the process.

310 Liska asks about the number of employees that are involved.

She states that there are a great number that can not afford to file the claims.

340 They talk of a teleconfernce. Bussell states that the POM's are basically from Anchorage. States that he called several of them and they all said that they did not know what they said and that their foreman told them to do so. Neve' states that the foreman's job is to protect the employees.

410 Michael Barcott, lawyer for the employees for the claims on the FWW. States that this bill if actual for FWW, but is just asking to be forgiven for past sins. Claims Dresser knew the impact of this regulation at the beginning. They had the best lawyers went all the way to the US Supreme Court. States that they could have changed their system as easily in 1979 as they did in 1981. Refers to the Woody case. The company just sat back to see what would happen. If Dresser Industries and others had changed their pay system in 1979, all claims would have been void due to the statute of limitations. States they knowingly violated the laws of the state. The only windfall with be for the firms. Dresser is one of the seven largest firms in the world.

Does not believe that this bill is constitutional. If this bill passes the ground will be shakey. States this committee has great responsibilities in this state. If this passes, many people will see if they can violate the laws of the state and try to see if the legislature will bail them out. This is exactly what the companies are doing now. A stable state in which to do business is that the business know what are and abide by the laws of the state. He wishes the claim of 100 million dollars was true. It only has potential amount of this from the time of the regulation coming into effect. Half of the claims have been dismissed due to the fact of the statute of limitations. States that the claims from Dresser employees are 75-80, from Slumberjack, 75-80 and a few from other firms, maybe totaling two hundred in all. The amount of the claims actually are only about 10-20 million dollars. States that if the Committee wants to give the future businesses an impression of lawlessnes, then pass this bill because that is what it does.

550 Wendte comments on the number of employees and amount of claims. They discuss.

560 They talk of cases filed and the dates thereof.

580 Barcott comment on the difference of the hours and the wage then and now. If the employees worked the same amount of hours they would be making more money. The companies cut back the time that the employees put in now. That is why they claim that it is the same.

The Committee discusses the cost now and then.

646 Bussell comments on the notification by the Dept. of Labor.

658 Change of tape.

Tape #53.

003 Barcott states he had nothing to do with the notification. But firmly believes that it was done properly.

The Committee talks of the knowledge of the firms of the regulation.

155 Wendte ask if these are union. Barcott state they are not, that they are individual contracts. Most are just verbal contracts. Wendte asks if the employees filing claims are still working for the companies. It is noted that some are and some are not.

186 Liska asks if he was familiar with the first bill dealing with this.

Barcott was familiar. It is noted that none of the 3 attempts were passed from the first committee of referral.

210 John Eshleman, opposes the bill. Member of the Alaska Wage and Security. Former employee of Dresser. He describes his former position, feels that he was a skilled laborer. States that when he went to work he did not know the exact amount of his pay. He was told it was very complicated. It would average about $50,000 a year. He did file a claim against the firm. He feels he was discriminated against and they tried to get him to terminate. Relates the story of why he filed. At the time of the pay change, John Martin told them that the firm did not feel that they owed the employees no additional money and if they thought otherwise they should go see a lawyer. He proceed to go to Mr. Barcott. Passes out a example of how they were paid.

300 He describes the pay system. Gives examples that the people on the new plan do indeed make more money, he did. Urges them not to pass HB 223.

367 Wendte asks if he had a written contract.

J. Eshleman no I didn't. It was just estimated at $50,000 year.

375 Wendte comments then all that needed to be done is to state that there was going to be a pay change. Eshleman agrees. States that most like the new system

394 Hayes confirms that he worked under the new and old system for Dresser. Comments on the wage he received. They talk of the hours that are worked. His wage was $12.94 when he left. There is bonus paid and then additional on the bonus.

440 Bussell was this the first time you worked in this system. Yes, states that he changed because of the better time scheduled. At the previous job he knew exactly how much he was paid. Bussell talks of why he took the job that he did not know how much he was being paid. States that all the electricians know exactly how much he will be paid and can figure it out.

477 Robert Eshleman former Dresser employee. Representing himself. Is a plaintiff with Dresser. Opposes HB 223. He was not paid on FWW he was paid as a salary exempt employee. It was a verbal contract. At the beginning had no question to pay. States the overtime was figured on the Huston base. He was asked to represent all the salary exempt employees from the North Slope. They wanted to go to a week to week schedule, they wanted their overtime changed and they wanted an eye care package. The firm felt 2 and 1 was fair. They stated the employees did have a valid claim as to the overtime. It was stated that it would checked into. States Dresser was not union. They did change the pay plan. Their pay almost doubled. The discrimination followed. He was terminated due to poor job performance. States he made the same in less that 10 months working less time than in a year of working almost twice as much. He believes that he dealt fairly with Dresser in his claim because he did not file at the first possible moment. He tried to negotiate with them. He feels that Dresser knowingly disobeyed the law. His statute of limitations is almost up. He urges the Committee not to pass the legislation.

580 Liska comments on the fact that many of the people are lower 48 individuals. Asks what percentage of Alaskans are affected by this.

Eshleman feels that most of the are Alaskans affected and those that are from out state decided to stay.

The point that the employees are mostly Alaskans is clarified by Mr. Barcott. And that the companies are primarily outside companies.

600 Bussell asks if he feels he is a professional. He feels that he is a semi-professional.

607 Bussell asks what is a salary exempted employee.

Eshleman there are several. Some are on hours some get salary and are allowed overtimed. Bussell reads the statute concerning this.

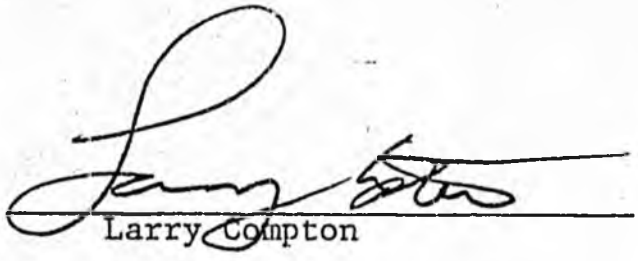
The Committee and Eshleman discuss the term professional employees. And they talk of the terms fair and equitable. Eshleman does not feel that he was dealt with in that manner.

654 turn of tape.

015 Malone asks to be excused to check on his constituent teleconference.

050 Jerry Sheelon, Alaska Division Manager of Gearhart, Industries. He feels that all that he has wanted to say has been said. States he was never informed of the changed of the regulation till the claims. He supports the bill. He talks of his system of pay. That their employees always knew their pay. Relates some examples. States that Arco and Sohio now will not allow the employees to stay on the job more than 12 hours a day. He does not feel that the legislature should be held responsible for this. Hopes that the Dept of Labor will keep people informed from now on. His company's pay expenses have stayed the same.

170 End of testimony. There is short comments on the 12 hours of legislature.



181 Bussell asks how many employees in Alaska. 50. How long in business. Since 1969. Were you ever notified of the change. Never.

They discuss the pay system and notification.

240 Mr. Becker reads a statement written by Larry Compton. Mr. Compton had to fly back to Seattle. (Attached.)

TESTIMONY ON HB 223

Mr. Chairman, Members of the Committee, my name is Larry Compton, President and Owner of Time Saver Grocery INC., I have lived in Alaska since 1954 and may I add have no connections with the Gas and Oil Industry. I regret that I was unable to stay and testify in person. I have nothing to gain by this passage of HB 223. However, I do feel I have some thing to lose if it fails. I will lose faith in a system that has beenfair and equitable in my eyes for 30 years. A system that is supposed to deal fairly with Employee and Employer alike. I only ask that you continue to apply that same fairness in the future by passing HB 223.

Larry Compton

259 Richard Crull is Regional Operations Manager for Alaska. Has been in position for seven months. Can not add much more than what has been said. He does support the bill.

262 Wendte asks if he is a member of the Alliance. Yes. When was it formed. 1979. Are you a member of PESA. Yes.

307 Wendte is Dowell part of the lawsuit. Not that I am aware of.

310 Bussell asks if the Committee asked for information from their company in relation to this matter. Mr. Crull would assume yes.

They discuss the possible information that may be obtained in relation to Dept of Labor notification and the FWW.

387 Paul Preston, Halliburton Services, Supports HB 223. Everything has been said we add our support.

394 Hayes if Halliburton Services part of the lawsuit. No Sir.

400 Thomas Sofo (transcribed testimony attached.)

Testimony of Thomas Sofo
April 7, 1983

My name if Tom Sofo, I am employeed by the Legislative Affair Agency, as a legislative counsel in the Legal Services Division across the street. We drafted the subject bill. There really is no need at this point I think, in my opinion, to go into any complicated legal analysis. The office would basically agree with everything Mr. Laursen has said. I think that there has been some misimpressions created as to certain ways that we might be able to address this and improve on the bill.

First of all, it is of course not in the policy of us to comment on the position of the bill. We do not comment on whether there should be a FWW or not we have no opinion on the issue, neither do we have an opinion whether the people on the slope are being overpaid or underpaid under either of the two plans. Neither do we have any legal analysis that we have done regarding section two of the bill which involves the penal provisions although we would add that. In our view that provision is less likely than a toss up to withstand a court challenge. I believe Mr. Laursen said that that would be 50/50 on a constitution matter. We would probably give it an one chance out of three if those things can be quantified.

As you know I am the attorney for each of you at this table. And the function we have is to protect the work of the Legislature. I would just reiterated what Mr. Laursen has said, this is a loser. You are at least buying a law suit by passing it and you are probably, most every attorney that would review this bill across the street, would predict, which all we can do is predict, maybe the thing to do is pass it and give it its day in court. but if we were advising clients this is the kind of case that we would consider almost a certain loser.

Now there have been a couple of impressions created by testimony that I think that did not directly state these facts but these are the impressions that I came away with. One was that if we could include the proper amount of findings or purpose as an addendum to this bill on the front end of it, that we could some how cure the unconstitutionality if it is indeed unconstitutional. And I will try to remember to say "if" because we do not have any statement to that effect.

Now by the judicial form that we are bound by and I do agree with Mr. Fleischer statement earlier when he submitted a summary of his brief that there are no cases directly on point. So in one sense this is a issue that the court could look at anew. But if they follow the authority that seems to be in the field they will probably strike it down as unconstitutional. And we who deal in these areas as to legislative findings and intent and purpose are aware of a long line of cases which shows on various subjects that it is seldom if ever the case that you can cure the unconstitutionality of a bill by merely stating that the legislature finds X and X to be the case. Not when the flaw in it is of a constitutional magnitude.

There is another impression that I am not sure as to where I came by this information. It was in the course of drafting and listening to testimony today I have heard the Cee's case referred to several times as one of the primary cases that is most likely to be used in an argument to support the bill and I agree that it would be used in support. It is one of the strongest cases in support of this kind of legislation. Although I do not have a full copy of the case as a matter of fact I do not believe that I even have a summary of the case with me. I have read the case and although no one has misstated statements in the case, they have neglected to tell you that the Portal to Portal which was sustained in that case did not allow for the withdrawal of the remedy if there was a written contract governing that right under question. No one has stated that it did, but everyone has failed to state that that was one of the exception. That if there was a written contract which protected that right even the Portal to Portal Act did not preport to revoke that right.

And the other thing that I think I would like to focus the Committee's attention on is that the constitutionality of this bill does not depend at all on the amount of money that is involved. Does not matter what any one is getting paid and it doesn't matter whether the damages are $10 or 10 million dollars. The court in question to which this may end up going would decide if there are indeed damages. It may be unconstitutional even if there is no recovery. And I think a lot of the discussion has involved what the amount is and although that is of some interest, for instance on a public policy purposes it might be relevant. Really for the kinds of defects in the bill that we see, the impairment of contracts, probably an equal protection argument and special legislative, which I believe have been discussed fully before. Almost all of those arguments will not be effected if the recovery is $1 or 1 million dollars.

The office has not really responsed to any requests to research this choroughly. We have nothing like a thirty page memorandum. I did not know that we were going to be asked to testify here till 4:30 yesterday. So we are prepared to answer questions or do the appropriate research if any one cares to pose a question that we can not answer at this time. That is the only statement that we were prepared to make at this time.

467 Wendte states that there has been interest shown that this is special interest legislature.

Sofo states it may be considered as such. He did not know the names of the defendants involved until testimony was given. He does not know whose special interest it would served.

490 Bussell asks him who had requested him to come and testify.

Mr. Clocksin.

496 Liska asks if he had drafted the bill.

The version that you are using now, yes.

506 Liska asks how much research actually went into this.

Sofo states that is usually brief unless that someone asks for a special brief and the red flags that they point out.

527 Tom Cashen, lobbyist for the electricians. The union does not think that this is good legislation and hopes that it dies in Committee.

538 Bussell asks if he ever took a job that he did not know what he was being paid. Never.

546 James Wakefield, Lobbyist for Local 942. Most has been said. They are against the bill. Feel it is bad legislation and would set a poor example.

563 Bussell states that there will be a teleconference set up.

569 Adjourns the meeting. The time is 9:50.

STATE OF ALASKA
THE LEGISLATURE
LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907 465 3800

MEMORANDUM February 3, 1983

SUBJECT: Retroactivity of overtime pay provisions (Work Order No. 13-0714)

TO: Representative Charlie Bussell

FROM: Thomas A. Sofo
Legislative Counsel

The subject work order includes a request for a retroactive clause to the attached draft bill concerning methods of overtime payment. A retroactive clause may make the bill subject to legal challenge.

I do not know enough about the facts surrounding the proposal contained in the draft bill to advise you in precise terms, but would caution you that the retroactive portion of the bill may be challenged on constitutional grounds. One basis for challenge would be the prohibition against impairment of contracts, found in both the United States and the Alaska Constitutions (U.S. Constitution, Article I, section 10; Alaska Constitution, Article I, section 15). Another basis would be the due process guarantees in the Fifth and Fourteenth Amendments of the U.S. Constitution and Article I, section 7 of the Alaska Constitution.

If challenged on these grounds, the court would likely examine the rights and expectations affected by the bill, whether those rights and expectations were substantial and whether those rights or expectations were unfairly defeated by the bill. Some vested rights are immune from legislative interference, but, as indicated above, we are not able to ascertain whether such rights are involved here since we do not have sufficient factual information.

If you wish to discuss this facet of the bill further, please give me a call at your convenience.

TAS:ljb

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF LABOR

OFFICE OF THE COMMISSIONER

P.O. BOX 1149
JUNEAU, ALASKA 99802
PHONE: (907) 465-2720

April 5, 1983

Honorable Charlie Bussell
Chairman, Committee on Judiciary
House of Representatives
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Bussell:

In response to your letter dated March 30, 1983, enclosed are copies of the following documents pertaining to the December 9, 1978 amendments to the Department's wage and hour regulations in 8 AAC 15.

Enclosure #1: Regulations as proposed on 8/21/78 including the notice of proposed changes.

Enclosure #2: Affidavit of notice of adoption of proposed regulation.

Enclosure #3: Affidavits of Publication from the Anchorage Daily News, Southeast Alaska Empire, and Fairbanks Daily News Miner.

Enclosure #4: Affidavit of oral hearing, and the hearing attendance roster indicating that no one appeared to testify.

Enclosure #5: Proposed regulations as submitted to the Department of Law on 10/9/78 for final review and filing by the Lt. Governor's office.

Enclosure #6: Regulations as filed by the Lt. Governor and the signed order of adoption.

Enclosure #7: Regulations in effect prior to the December 9, 1978 amendments.

07-G9LH

These enclosures include copies of the correspondence between the Departmentof Labor and Department of Law on these regulations.

If you have further questions concerning the promulgation of these regulations, please let me know.

Sincerely,

Jim Robison
Commissioner

Enclosures

ENCLOSURE # 1

NOTICE OF PROPOSED CHANGES IN THE
REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.085, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.050 - AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.

Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.

Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.

Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.

Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.

Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 15, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P. O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

Date 8/2/78

Wm. Spear.

William E. Spear
Deputy Commissioner
Department of Labor

ARTICLE 1.

MINIMUM WAGES AND OVERTIME

Section
100. Payment for overtime
105. Minimum wage

8 AAC 15.100 PAYMENT FOR OVERTIME. (a) An employee's regular rate is the basis for computing overtime. The regular rate is an hourly rate figured on a weekly basis. Employees need not actually be hired at an hourly rate; they may be paid by piece-rate, salary, commission or any other basis agreeable to the employer and employee. However, the applicable compensation basis must be converted to an hourly rate when determining the regular rate for computing overtime compensation.

(b) The regular rate referred to in (a) is that fixed hourly amount determined from an employee's hourly wage, salary, commission, piece-rate or other basis of compensation that he is to be paid for all contract hours up to the daily or weekly maximum, established under AS 23.10.060, that he is regularly employed to work during a work week.

(c) When computing an employees hours for the purpose of determining overtime, the employer shall count all hours the employee worked during that week including periods of "on call" and "standby or waiting time" required for the convenience of the employer which were a necessary part of the employee's performance of his employment. However, if the employee is completely relieved from all duties for a certain period during which he may use the time effectively for his own purposes, then these hours need not be counted.

(d) The following are not acceptable methods of complying with the payment of overtime under the provisions of AS 23.10.060:

(1) guaranteed weekly pay for variable hours plan ("Belo" contracts) established under sec. 7(f) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 207(f) as implemented in 29 C.F.R. 778-402-778.414;

(2) compensatory time off in lieu of payment for overtime; and

(3) flex-time or flexitime plans established under 29 C.F.R. 778.114 providing a fixed salary for fluctuating hours up to a predetermined maximum number of hours in a work-week. (Eff. / / , Register)

Authority: AS 23.10.060
AS 23.10.085

8 AAC 15.105. MINIMUM WAGE. As used in AS 23.10.065, "prevailing Federal Minimum Wage Law" means that rate established in Sec. 6(a)(1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 206(a)(1)) as the minimum wage generally applicable to employees subject to that Act. (Eff. / / , Register)

Authority: AS 23.10.065
AS 23.10.085

ARTICLE 2.

EXEMPTIONS

Section
120. Minimum wage exemption for handicapped persons
125. Minimum wage exemption for student learners
130. Exemption for searching for placer or hard rock minerals
135. Exemption for individuals under 18 who are part time employees
140. Determining the number of employees for purposes of AS 23.10.060(1)
145. Small mining operations

8 AAC 10.120. MINIMUM WAGE EXEMPTION FOR HANDICAPPED PERSONS. (a) An application to employ a person at less than the minimum wage established under AS 23.10.065 must be made either on a form provided by the department or by filing an application for a special certificate to employ a handicapped person (29.C.F.R. Part 525) with the Regional Director of the Wage and Hour Division, U.S. Department of Labor, 909 First Avenue, Seattle, Washington, 98104.

(b) An application filed with the department must set out the facts showing that the person's productive capacity to do the work he is to perform is impaired by physical or mental deficiency, age or injury. A medical certificate will be required in all cases in which the handicap is not clearly obvious. The information in the application must be complete and must be certified by a responsible person who has knowledge of the facts.

(c) If the commissioner determines from the information provided in the application that the person would otherwise be deprived of employment opportunity, he will in the exercise of his discretion, approve a wage rate lower than established under AS 23.10.065 based on that information. With the exception of very extreme cases where the person is so seriously impaired that he is unable to engage in competitive employment, that rate will not be less than 50 percent of the minimum wage established under AS 23.10.065.

(d) If an approval is issued under (c) of this section, it will specify the approved wage rate and the period for which it is effective. An application for renewal of an exemption must be made in the same manner as the original but must also include an evaluation of that person's productivity, comparing the degree of productivity between the initial application and the renewal.

(e) As a general rule, approval for payment of a wage lower than that established under AS 23.10.065 to persons with a temporary handicap will not be granted.

(f) Persons undergoing rehabilitation treatment or therapy relating to narcotics or alcoholism are not considered handicapped for the purposes of AS 23.10.070 and this section. (Eff. / / , Register)

Authority: AS 23.10.070(1)
AS 23.10.085

8 AAC 15.125 MINIMUM WAGE EXEMPTION FOR STUDENT LEARNERS. (a) An exemption for student learners from the minimum wage requirement of AS 23.10.065 is available when the student learner is enrolled in a course of study and training in a cooperative vocational training program under a recognized state or local educational authority or in a substantially similar program conducted by a private school.

(b) An application for an exemption under (a) of this section must be made on a form provided by the department. The information required must be complete and must be signed by the employer and the student learner's school coordinator or principal. To qualify for the exemption, the employment must meet all the requirements set out in AS 23.10.325-370 and Chapter 5 of this Title relating to the employment of children.

(c) A wage rate authorized under this section will not be less than 75 percent of the minimum wage established under AS 23.10.065.

(d) The exemption from minimum wages for full-time students established by Sec. 14(b) of the Fair Labor Standards Act of 1938, as amended, (29 U.S.C. 214(b)) as implemented in 29 C.F.R. 519.1 - 519.2 does not apply to employment subject to the provisions of AS 23.10.065. (Eff. / / , Register)

Authority: AS 23.10.070(3)
AS 23.10.085

8 AAC 15.130 EXEMPTION FOR SEARCHING FOR PLACER OR HARD ROCK MINERALS. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(10) applies to those activities commonly referred to as "prospecting" and does not apply once development of and production from a known mineral source has been begun. (Eff. / / , Register)

Authority: AS 23.10.055(10)
AS 23.10.085

8 AAC 15.135 EXEMPTION FOR INDIVIDUALS UNDER 18 WHO ARE PART TIME EMPLOYEES. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(11) does not apply during any work week in which an individual normally within the ambit of AS 23.10.055(11) is employed in excess of 30 hours. (Eff. / / , Register)

Authority: AS 23.10.055(11)
AS 23.10.085

8 AAC 15.140 DETERMINING THE NUMBER OF EMPLOYEES FOR PURPOSES OF AS 23.10.060(1). In determining the number of employees that an employer employs for purposes of AS 23.10.060(1), all officers of a corporation who actively engage in the business and all part time employees will be counted regardless of the number of days or hours worked.

Authority: AS 23.10.060(1)
AS 23.10.085

8 AAC 15.145 SMALL MINING OPERATIONS. (a) A mining season, for purposes of AS 23.10.060(5), means the cumulative period of time during which mining operations are carried on during a calendar year, but not exceeding 20 weeks.

(b) The exemption from the payment for overtime requirements of AS 23.10.060 for employers engaged in small mining operations provided by AS 23.10.060(5) is available to the employer for a maximum of 14 consecutive weeks, commencing on the first day the mine begins active operations in a calendar year. In determining the available period of exemption, periods during which the mine is not actively engaged in mining operations for such reasons as, but not limited to, assessment work and repair or construction of buildings or equipment are not part of the exemption period.

(c) During the exemption period described in (b), an employer engaged in small mining operations remains responsible for payment of overtime at the rates established by AS 23.10.060 for work performed by an employee in excess of 12 hours a day or 56 hours a week. (Eff. / / , Register)

Authority: AS 23.10.060(5)
AS 23.10.085

ARTICLE 3.

DEDUCTIONS FROM WAGES

Section
160. Deductions from an employees wages

8 AAC 15.160. DEDUCTIONS FROM AN EMPLOYEE'S WAGES. (a) AS 23.10.085(c) does not limit the right of an employer and employee to enter into a written agreement to provide for deductions of monetary obligations of an employee other than the cost of board or lodging. However, a written agreement for deductions is not valid if it would have the effect of reducing an employee's wage below the statutory minimum wage or requiring an employee to reimburse the employer for any of the following:

(1) customer checks returned due to insufficient funds or any other reasons;

(2) non-payment for goods or services as a result of customers walk-out or defaulting on credit;

(3) cash or cash register shortages for which the employee does not acknowledge responsibility;

(4) lost or stolen property or alleged theft by the employee for which the employee does not acknowledge responsibility;

(5) damage or breakage costs unless they are clearly due to willful conduct on the part of the employee, the responsibility for which has been acknowledged by the employee.

(b) Written agreements for deductions from wages are not required for any lawful deduction otherwise authorized or required by state or federal law or by order of a court of competent jurisdiction.

(c) An employer subject to AS 23.10.050-23.10.150 shall furnish each person employed by him who is not exempted from the coverage of those sections by AS 23.10.055 a statement of earnings and deductions for each pay period. The statement of earnings and deductions shall contain the following information:

(1) employee's rate of pay;

(2) the beginning and ending dates of the pay period and the weekly hours actually worked during the period;

(3) federal income tax deductions;

(4) federal insurance contribution act deductions;

(5) Alaska income tax deduction;

(6) Alaska school tax deduction;

(7) Alaska employment security act contributions;

(8) board and lodging costs;

(9) advances; and

(10). other authorized deductions. (Eff. / / , Register)

Authority: AS 23.10.085

ARTICLE 4.

PROCEDURES RELATING TO VIOLATIONS, INVESTIGATIONS OR HEARINGS

Section
175. Assignment of claims
180. Investigations, conference and persuasion

8 AAC 15.175. ASSIGNMENT OF CLAIMS. (a) A person who believes that he has not been paid wages due him under AS 23.10.050 - 23.10.150 may assign his claim to the department for collection.

(b) The department will not accept an assignment of a claim under AS 23.10.050 - 23.10.150 in excess of $5,000, excluding liquidated damages. (Eff. / / , Register)

Authority: AS 23.10.085
AS 23.10.110(b)

8 AAC 15.180. INVESTIGATIONS, CONFERENCES AND PERSUASION. (a) The wage and hour division will investigate potential violations of AS 23.10.050-150 on its own motion or on the assignment to it of a claim under sec. 175 of this chapter.

(b) If after investigation the division finds that probable cause exists for believing that a violation of AS 23.10.050 - 23.10.150 has occurred, it will attempt to correct the unlawful practice by conference and persuasion as follows:

(1) the division will provide the employer believed to have violated AS 23.10.050 - 23.10.150 with a copy of the assignment or a description of the alleged violation and inform him of the results of its investigation; and

(2) the division will schedule an informal conference with the employer to discuss the matter and attempt to eliminate the alleged violations.

(c) If the informal conference succeeds in correcting the alleged violation, no further action will be taken by the division against the employer.

(d) If an alleged violation is not rectified by the informal conference or if the employer fails to attend the conference without good cause shown, the director may, at his discretion;

(1) conduct a further investigation into the matter;

(2) enforce the claim through initiation of an adjudicative hearing under provisions of the Administrative Procedures Act (AS 44.62);

(3) enforce the claim through filing of an action in court of competent jurisdiction.

(e) If the director determines under (d)(1) of this section that a further investigation into the matter should be conducted, he may provide that it be carried out by initiation of an investigative proceeding conducted in accordance with secs. 10 through 30 of chapter 25 of this title. (Eff. / / , Register)

Authority: AS 23.10.080
AS 23.10.085
AS 23.10.090

ARTICLE 5.

GENERAL PROVISIONS

Section
195. Place of employment for purposes of recordkeeping
200. Definitions

8 AAC 15.195. PLACE OF EMPLOYMENT FOR PURPOSES OF RECORDKEEPINC. For purposes of AS 23.10.100, the place where an employee is employed means a central office of the employer located within the state. However, the employer may keep duplicate records at the sites or premises where the work is performed. (Eff. / / , Register)

Authority: AS 23.10.085
AS 23.10.100

8 AAC 15.200. DEFINITIONS. In this chapter and in AS 23.10.050 - 23.10.150, unless the context requires otherwise:

(1) "administrative" means an employee;

(A) whose primary duty consists of work directly related to management policies or supervising the general business operations of his employer;

(B) who customarily and regularly exercises discretion and independent judgment;

(C) who performs his work under only general supervision;

(D) who is paid on a salary or fee basis;

(E) who regularly and directly assists a proprietor or an exempt executive employee of the employer; and

(F) who performs work along specialized or technical lines requiring special training, experience or knowledge and does not devote more than 20 percent of his weekly hours to activities which are not described in this paragraph or paragraphs (7) or (11) of this section.

(2) "casual employee" as used in AS 23.10.065(15), means an employee engaged in an activity which occurs without regularity and is not in the usual course of trade, business, occupation or profession of his employer.

(3) "commissioner" means the commissioner of labor.

(4) "department" means the Alaska Department of Labor.

(5) "director" means the director of the wage and hour division of the department or his designee.

(6) "domestic service in or about a private home" as used in AS 23.10.055(4), means a person employed in or about a private home of a person by whom he is employed and who performs such services or activities as a babysitter, a cook, a butler, a valet, a maid, a housekeeper, a governess, a janitor, a launderess, a caretaker, a handyman, a garderner, a footman, a groom or a chauffeur of automobiles for family use.

(7) "executive" means an employee:

(A) whose primary duty consists of the management of the enterprise in which he is employed or of a customarily recognized branch, department or subdivision of the enterprise;

(B) who customarily and regularly directs the work of two or more other employees;

(C) who has the authority to hire or fire or effect any other change of status of other employees or whose suggestions or recommendations regarding these kinds of changes is given particular weight;

(D) who customarily and regularly exercises discretionary authority;

(E) who does not devote more than 20 percent of his weekly hours to activities which are not directly and closely related to the work described in this paragraph or paragraphs (1) or (11) of this section; and

(F) who is compensated on a salary basis.

(8) "nonprofit" as used in AS 23.10.055(6), means an organization no part of the income or profit of which is distributable to its members, directors or officers and the status of the enterprise has been determined by the U.S. Internal Revenue Service as nonprofit.

(9) "on call" means time that an employee is required to remain on call on the employer's premises or so close to them that he cannot use the time effectively for his own purposes, but does not include the time an employee is not required to remain on or near his employer's premises but is merely required to leave word at his home or with the employer where he may be reached.

(10) "outside salesman" means a person who is employed for the purpose of making sales, contracts for sales, consignments or shipments for sale or obtaining orders for services or for use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (12) do not exceed 20 percent of the hours worked in the workweek.

(11) "professional" means an employee, except for the classifications of registered nurse and licensed practical nurse;

(A) whose primary duty is:

(i) to perform work requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education or from an apprenticeship or from training in the performance of routine mental, manual or physical process; or

(ii) to perform work that is original and creative in character in a recognized field or artistic endeavor (as opposed to work which can be produced by a person with general manual or intellectual ability and training), and the result of which depends primarily on the invention, imagination, or talent of the employee; or

(iii) to teach, tutor, instruct, or lecture in the activity of imparting knowledge, and who is employed and engaged in this activity as a teacher certified or recognized as such in a school or other educational establishment or institution; and

(B) whose work:

(i) requires the consistent exercise of discretion and judgement in its performance;

(ii) is predominately intellectual and varied in character (as opposed to routine mental, manual, mechanical, or physical work) and is of such character that the output produced or the result accomplished cannot be standarized on a time basis; and

(iii) is compensated on a salary or fee basis.

(12) "salesman employed on a straight commission basis" means a person who is regularly employed on the business premise of his employer and is compensated on a straight commission basis for the purpose of making sales, contracts for sales, consignments or shipments for sale or in obtaining orders for services or the use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (10) do not exceed 20 percent of the hours worked in the workweek.

(13) "standby or waiting time" means time that an employee is required to be at or near his post or place of employment and is required to wait for work or an assignment or because of shutdown or repair and during which he cannot use the time effectively for his own purposes.

(14) "supervisory capacity" means those primary duties performed, except for the classifications of registered nurse and licensed practical nurse, by an employee who is employed solely for the purpose of regularly assigning and directing the activities of other employees, and is responsible for results of the work performed, and who does not perform duties regularly performed by the employees supervised, except for brief periods of time not to exceed 20 percent of the hours worked in the workweek. For the purpose of AS 23.10.060, it does not apply to any employee required by the employer to perform such activities on an intermittent or substitute basis during the course of his employment.

(15) "workweek" means a fixed and regularly recurring period of 168 hours, i.e. seven consecutive 24 hour periods. It may begin on any day of the week and need not coincide with the calendar week. An individual employee's workweek is the statutory or contract number of hours that he is to regularly work during that period. The workweek may not be artificially adjusted for the purpose of avoiding the payment of overtime, however the workweek may be changed for any other purpose in the manner provided in AS 23.05.160. NOTICE OF PROPOSED CHANGES IN THE REGULATIONS OF THE DEPARTMENT OF LABOR

Notice is hereby given that the Alaska Department of Labor, under the authority vested by AS 23.10.025, proposes to repeal and adopt regulations in Title 8 of the Alaska Administrative Code to implement AS 23.10.050 — AS 23.10.150, as follows:

(1) 8 AAC 15 is amended by repealing sections 010 through 070 in their entirety and adopting and replacing with new sections as follows:

ARTICLE 1.
Article 1 stipulates minimum wages, maximum hours and computation of overtime applicable to employment in Alaska.

ARTICLE 2.
Article 2 provides certain exemptions from the payment of minimum wages or overtime.

ARTICLE 3.
Article 3 stipulates those deductions from an employee's wages that are permissable and those deductions that are prohibited.

ARTICLE 4.
Article 4 establishes the procedures for assignment of claims and/or the conduct of investigative hearings and conferences.

ARTICLE 5.
Article 5 defines miscellaneous terms as used in this chapter and AS 23.10.

Notice is also given that any interested party may present oral or written statements or arguments relevant to the action proposed at a hearing to be held at the DIVISION OF AVIATION BUILDING CONFERENCE ROOM, 4111 AVIATION AVENUE, (next to Lake Hood) Anchorage, Alaska 99502 at 1:30 p.m. o'clock on September 15, 1978.

Copies of the regulations may be obtained by writing to: Wage and Hour Division, Alaska Department of Labor, P.O. Box 630, Juneau, Alaska 99811.

The Department of Labor upon its own motion or at the instance of any interested person, may after September 30, 1978 adopt the proposals substantially as described above without further notice or may decide to take no action on them.

ENCLOSURE # 5

October 9, 1978

Arthur H. Peterson
Assistant Attorney General
and Regulation Attorney
Department of Law

THRU: William E. Spear
Deputy Commissioner

Dale W. Cheek
Director
Wage and Hour/Mechanical
Engineering Division
Department of Labor

8 AAC 15. as adopted by
the Department of Labor

Please find enclosed, original and 3 copies of 12 pages of regulations adopted by the Department of Labor concerning Wages and Hours under TITLE 23. Alaska Wage and Hour Act with related affidavits and documents as required under the provisions of AS 44.62.

We respectfully request your final review and transmittal of the regulations and documents to the office of the Lieutenant Governor for filing.

Thank you.

DWC/rh

Enclosure

ORDER REPEALING AND ADOPTING, REGULATIONS
OF THE DEPARTMENT OF LABOR

The attached twelve (12) pages of regulations, dealing with 8 AAC 15. Alaska Wages and Hours, are hereby adopted and certified to be correct copies of the regulations which the Department of Labor repeals and adopts, under authority vested by AS 23.10.085 and after compliance with the Administrative Procedure Act (AS 44.62), specifically including notice under AS 44.62.190 and 44.62.200 and opportunity for public comment under AS 44.62.210.

This order takes effect on the 30th day after it has been filed by the Lieutenant Governor as provided in AS 44.62.180.

DATE: 13 October 1978

Wm Spear
William E. Spear
Deputy Commissioner

I, _____, Lieutenant Governor for the State of Alaska, certify that on _____, 197___, at_____.m., I filed the attached regulat'ons according to the provisions of AS 44.62.040 - 44.62.120.

ARTICLE 1.

MINIMUM WAGES AND OVERTIME

Section
100. Payment for overtime
105. Minimum wage

8 AAC 15.100 PAYMENT FOR OVERTIME. (a) An employee's regular rate is the basis for computing overtime. The regular rate is an hourly rate figured on a weekly basis. Employees need not actually be hired at an hourly rate; they may be paid by piece-rate, salary, commission or any other basis agreeable to the employer and employee. However, the applicable compensation basis must be converted to an hourly rate when determining the regular rate for computing overtime compensation.

(b) The regular rate referred to in (a) is that fixed hourly amount determined from an employee's hourly wage, salary, commission, piece-rate or other basis of compensation that he is to be paid for all contract hours up to the daily or weekly maximum, established under AS 23.10.060, that he is regularly employed to work during a work week.

(c) When computing an employee's hours for the purpose of determining overtime, the employer shall count all hours the employee worked during that week including periods of "on call" and "standby or waiting time" required for the convenience of the employer which were a necessary part of the employee's performance of his employment. However, if the employee is completely relieved from all duties for a certain period during which he may use the time effectively for his own purposes, then those periods need not be counted.

(d) The following are not acceptable methods of complying with the payment of overtime provisions of AS 23.10.060:

(1) guaranteed weekly pay for variable hours plan ("Belo" contracts) established under sec. 7(f) of the Fair Labor Standards Act of 1938, as amended (29U.S.C. 207(f) as implemented in 29 C.F.R. 778-402-778.414);

(2) compensatory time off in lieu of payment for overtime; and

(3) flex-time or flexitime plans established under 29 C.F.R. 778.114 providing a fixed salary for fluctuating hours up to a predetermined maximum number of hours in a work-week. (Eff. / / , Register)

Authority: AS 23.10.060
AS 23.10.085

8 AAC 15.105. MINIMUM WAGE. As used in AS 23.10.065, "prevailing Federal Minimum Wage Law" means that rate established in Sec. 6(a)(1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 206(a)(1)) as the minimum wage generally applicable to employees subject to that Act. (Eff. / / , Register)

Authority: AS 23.10.065
AS 23.10.085

ARTICLE 2.

EXEMPTIONS

Section
120. Minimum wage exemption for handicapped persons
125. Minimum wage exemption for student learners
130. Exemption for searching for placer or hard rock minerals
135. Exemption for individuals under 18 who are part time employees
140. Determining the number of employees for purposes of AS 23.10.060(1)
145. Small mining operations

8 AAC 10.120. MINIMUM WAGE EXEMPTION FOR HANDICAPPED PERSONS. (a) An application to employ a person at less than the minimum wage established under AS 23.10.065 must be made either on a form provided by the department or by filing an application for a special certificate to employ a handicapped person (29.C.F.R. Part 525) with the Regional Director of the Wage and Hour Division, U.S. Department of Labor, 909 First Avenue, Seattle, Washington, 98104.

(b) An application filed with the department must set out the facts showing that the person's productive capacity to do the work he is to perform is impaired by physical or mental deficiency, age or injury. A medical certificate will be required in all cases in which the handicap is not clearly obvious. The information in the application must be complete and must be certified by a responsible person who has knowledge of the facts.

(c) If the commissioner determines from the information provided in the application that the person would otherwise be deprived of employment opportunity, he will, in the exercise of his discretion, approve a wage rate lower than that established under AS 23.10.065. With the exception of very extreme cases where the person is so seriously impaired that he is unable to engage in competitive employment, that rate will not be less than 50 percent of the minimum wage established under AS 23.10.065.

(d) If an approval is issued under (c) of this section, it will specify the approved wage rate and the period for which it is effective. An application for renewal of an exemption must be made in the same manner as the original but must also include an evaluation of that person's productivity, comparing the degree of productivity between the initial application and the renewal.

(e) As a general rule, approval for payment of a wage lower than that established under AS 23.10.065 to persons with a temporary handicap will not be granted.

(f) Persons undergoing rehabilitation treatment or therapy relating to narcotics or alcoholism are not considered handicapped for the purposes of AS 23.10.070 and this section. (Eff. / / , Register)

Authority: AS 23.10.070(1)
AS 23.10.085

8 AAC 15.125 MINIMUM WAGE EXEMPTION FOR STUDENT LEARNERS. (a) An exemption for student learners from the minimum wage requirement of AS 23.10.065 is available when the student learner is enrolled in a course of study and training in a cooperative vocational training program under a recognized state or local educational authority or in a substantially similar program conducted by a private school.

(b) An application for an exemption under (a) of this section must be made on a form provided by the department. The information required must be complete and must be signed by the employer and the student learner's school coordinator or principal. To qualify for the exemption, the employment must meet all the requirements set out in AS 23.10.325-370 and chapter 5 of this title relating to the employment of children.

(c) A wage rate authorized under this section will not be less than 75 percent of the minimum wage established under AS 23.10.065.

(d) The exemption from minimum wages for full-time students established by Sec. 14(b) of the Fair Labor Standards Act of 1938, as amended, (29 U.S.C. 214(b)) as implemented in 29 C.F.R. 519.1 - 519.2 does not apply to employment subject to the provisions of AS 23.10.065. (Eff. / / , Register)

Authority: AS 23.10.070(3)
AS 23.10.085

8 AAC 15.130 EXEMPTION FOR SEARCHING FOR PLACER OR HARD ROCK MINERALS. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(10) applies to those activities commonly referred to as "prospecting" and does not apply once development of and production from a known mineral source has been begun. (Eff. / / , Register)

Authority: AS 23.10.055(10)
AS 23.10.085

8 AAC 15.135 EXEMPTION FOR INDIVIDUALS UNDER 18 WHO ARE PART TIME EMPLOYEES. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(11) does not apply during any work week in which an individual normally within the ambit of AS 23.10.055(11) is employed in excess of 30 hours. (Eff. / / , Register)

Authority: AS 23.10.055(11)
AS 23.10.085

8 AAC 15.140 DETERMINING THE NUMBER OF EMPLOYEES FOR PURPOSES OF AS 23.10.060(1). In determining the number of employees that an employer employs for purposes of AS 23.10.060(1), all officers of a corporation who actively engage in the business and all part time employees will be counted regardless of the number of days or hours worked.

Authority: AS 23.10.060(1)
AS 23.10.085

8 AAC 15.145 SMALL MINING OPERATIONS. (a) A mining season, for purposes of AS 23.10.060(5), means the cumulative period of time during which mining operations are carried on during a calendar year, but not exceeding 20 weeks.

(b) The exemption from the payment for overtime requirements of AS 23.10.060 for employers engaged in small mining operations provided by AS 23.10.060(5) is available to the employer for a maximum of 14 consecutive weeks, commencing on the first day the mine begins active operations in a calendar year. In determining the available period of exemption, periods during which the mine is not actively engaged in mining operations for such reasons as, but not limited to, assessment work and repair or construction of buildings or equipment are not part of the exemption period.

(c) During the exemption period described in (b), an employer engaged in small mining operations remains responsible for payment of overtime at the rates established by AS 23.10.060 for work performed by an employee in excess of 12 hours a day or 56 hours a week. (Eff. / / , Register)

Authority: AS 23.10.060(5)
AS 23.10.085

ARTICLE 3.

DEDUCTIONS FROM WAGES

Section
160. Deductions from an employee's wages

8 AAC 15.160. DEDUCTIONS FROM AN EMPLOYEE'S WAGES. (a) AS 23.10.085(c) does not limit the right of an employer and employee to enter into a written agreement to provide for deductions of monetary obligations of an employee other than the cost of board and lodging. However, a written agreement for other deductions payable to the employer or person acting in the employer's behalf or interest, other than the cost of board or lodging, is not valid if it would have the effect of reducing an employee's wage rate below the statutory minimum wage or requiring an employee to reimburse the employer for any of the following:

(1) customer checks returned due to insufficient funds or any other reasons;

(2) non-payment for goods or services as a result of customers walk-out or defaulting on credit;

(3) cash or cash register shortages for which the employee does not acknowledge responsibility;

(4) lost or stolen property or alleged theft by the employee for which the employee does not acknowledge responsibility;

(5) damage or breakage costs unless they are clearly due to willful conduct on the part of the employee, the responsibility for which has been acknowledged by the employee.

(b) Nothing in (a) prohibits deductions from earnings based on a written agreement whereby the employer has been directed by the employee to pay a sum for the benefit of that employee to a creditor, donee, or other thrid party and neither the employer nor any person acting in his behalf or interest derives any profit or benefit from the transaction.

(c) Written agreements for deductions from earnings are not required for any lawful deduction otherwise authorized or required by state or federal law or by order of a court of competent jurisdiction.

(d) An employer subject to AS 23.10.050-23.10.150 shall furnish each person employed by him who is not exempted from the coverage of those sections by AS 23.10.055 a statement of earnings and deductions for each pay period. The statement of earnings and deductions shall contain the following information:

(1) employee's rate of pay;

(2) the beginning and ending dates of the pay period and the weekly hours actually worked during the period;

(3) federal income tax deductions;

(4) federal insurance contribution act deductions;

(5) Alaska income tax deduction;

(6) Alaska school tax deduction;

(7) Alaska employment security act contributions;

(8) board and lodging costs;

(9) advances; and

(10) other authorized deductions. (Eff. / / , Register ,)

Authority: AS 23.10.085

ARTICLE 4.

PROCEDURES RELATING TO VIOLATIONS, INVESTIGATIONS OR HEARINGS

Section
175. Assignment of claims
180. Investigations, conference and persuasion

8 AAC 15.175. ASSIGNMENT OF CLAIMS. (a) A person who believes that he has not been paid wages due him under AS 23.10.050 - 23.10.150 may assign his claim to the department for collection.

(b) The department will not accept an assignment of a claim under AS 23.10.050 - 23.10.150 in excess of $5,000, excluding liquidated damages. (Eff. / / , Register)

Authority: AS 23.10.085
AS 23.10.110(b)

8 AAC 15.180. INVESTIGATIONS, CONFERENCES AND PERSUASION. (a) The wage and hour division will investigate potential violations of AS 23.10.050-23.10.150 on its own motion or on the assignment to it of a claim under sec. 175 of this chapter.

(b) If after investigation the division finds that probable cause exists for believing that a violation of AS 23.10.050 - 23.10.150 has occurred, it will attempt to correct the unlawful practice by conference and persuasion as follows:

(1) the division will provide the employer believed to have violated AS 23.10.050 - 23.10.150 with a copy of the assignment or a description of the alleged violation and inform him of the results of its investigation; and

(2) the division will schedule an informal conference with the employer to discuss the matter and attempt to eliminate the alleged violations.

(c) If the informal conference succeeds in correcting the alleged violation, no further action will be taken by the division against the employer.

(d) If an alleged violation is not rectified by the informal conference or if the employer fails to attend the conference without good cause shown, the director may, at his discretion;

(1) conduct a further investigation into the matter;

(2) enforce the claim through initiation of an adjudicative hearing under provisions of the Administrative Procedures Act (AS 44.62);

(3) enforce the claim through filing of an action in a court of competent jurisdiction.

(e) If the director determines under (d)(1) of this section that a further investigation into the matter should be conducted, he may provide that it be carried out by initiation of an investigative proceeding conducted in accordance with secs. 10 through 30 of chapter 25 of this title. (Eff. / / , Register)

Authority: AS 23.10.080
AS 23.10.085
AS 23.10.090
AS 23.10.110

ARTICLE 5.

GENERAL PROVISIONS

Section
195. Place of employment for purposes of recordkeeping
200. Definitions

8 AAC 15.195. PLACE OF EMPLOYMENT FOR PURPOSES OF RECORDKEEPING. For purposes of AS 23.10.100, "the place where an employee is employed" means a central office of the employer located within the state. However, the employer may keep duplicate records at the sites or premises where the work is performed. (Eff. / / , Register)

Authority: AS 23.10.085
AS 23.10.100

8 AAC 15.200. DEFINITIONS. In this chapter and in AS 23.10.050 - 23.10.150, unless the context requires otherwise:

(1) "administrative" means an employee;

(A) whose primary duty consists of work directly related to management policies or supervising the general business operations of his employer;

(B) who customarily and regularly exercises discretion and independent judgment;

(C) who performs his work under only general supervision;

(D) who is paid on a salary or fee basis;

(E) who regularly and directly assists a proprietor or an exempt executive employee of the employer; and

(F) who performs work along specialized or technical lines requiring special training, experience or knowledge and does not devote more than 20 percent of his weekly hours to activities which are not described in this paragraph or paragraphs (7) or (11) of this section;

(2) "casual employee" as used in AS 23.10.065(15), means an employee engaged in an activity which occurs without regularity and is not in the usual course of trade, business, occupation or profession of his employer;

(3) "commissioner" means the commissioner of labor;

(4) "department" means the Alaska Department of Labor;

(5) "director" means the director of the wage and hour division of the department or his designee;

(6) "domestic service in or about a private home" as used in AS 23.10.055(4), means a person employed in or about a private home of a person by whom he is employed and who performs such services or activities as a babysitter, a cook, a butler, a valet, a maid, a housekeeper, a governess, a janitor, a launderess, a caretaker, a handyman, a gardener, a footman, a groom or a chauffeur of automobiles for family use;

(7) "executive" means an employee:

(A) whose primary duty consists of the management of the enterprise in which he is employed or of a customarily recognized branch, department or subdivision of the enterprise;

(B) who customarily and regularly directs the work of two or more other employees;

(C) who has the authority to hire or fire or effect any other change of status of other employees or whose suggestions or recommendations regarding these kinds of changes are given particular weight;

(D) who customarily and regularly exercises discretionary authority;

(E) who does not devote more than 20 percent of his weekly hours to activities which are not directly and closely related to the work described in this paragraph or paragraphs (1) or (11) of this section; and

(F) who is compensated on a salary basis;

(8) "nonprofit" as used in AS 23.10.055(6), means an organization no part of the income or profit of which is distributable to its members, directors or officers and whose status has been determined by the U.S. Internal Revenue Service as nonprofit;

(9) "on call" means time that an employee is required to remain on call on the employer's premises or other place of employment or so close to them that he cannot use the time effectively for his own purposes, but does not include the time an employee is not required to remain on or near his employer's premises or other place of employment but is merely required to leave word at his home or with the employer where he may be reached;

(10) "outside salesman" means a person who is employed for the purpose of making sales, contracts for sales, consignments or shipments for sale or obtaining orders for services or for use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (12) do not exceed 20 percent of the hours worked in the workweek;

(11) "professional" means an employee, except for the classifications of registered nurse and licensed practical nurse;

(A) whose primary duty is:

(i) to perform work requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education or from an apprenticeship or from training in the performance of routine mental, manual or physical processes; or

(ii) to perform work that is original and creative in character in a recognized field of artistic endeavor (as opposed to work which can be produced by a person with general manual or intellectual ability and training), and the result of which depends primarily on the invention, imagination, or talent of the employee; or

(iii) to teach, tutor, instruct, or lecture in the activity of imparting knowledge, and who is employed and engaged in this activity as a teacher certified or recognized as such in a school or other educational establishment or institution; and

(B) whose work:

(i) requires the consistent exercise of discretion and judgment in its performance;

(ii) is predominately intellectual and varied in character (as opposed to routine mental, manual, mechanical, or physical work) and is of such character that the output produced or the result accomplished cannot be standardized on a time basis; and

(iii) is compensated on a salary or fee basis;

(12) "salesman employed on a straight commission basis" means a person who is regularly employed on the business premise of his employer and is compensated on a straight commission basis for the purpose of making sales, contracts for sales, consignments or shipments for sale or in obtaining orders for services or the use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (10) do not exceed 20 percent of the hours worked in the workweek;

(13) "standby or waiting time" means time that an employee is required to be at or near his post or place of employment and is required to wait for work or an assignment, whether or not because of shutdown or repair, and during which he cannot use the time effectively for his own purposes;

(14) "supervisory capacity" means those primary duties performed, except for the classifications of registered nurse and licensed practical nurse, by an employee who is employed solely for the purpose of regularly assigning and directing the activities of other employees, and is responsible for results of the work performed, and who does nct perform duties regularly performed by the employees supervised, except for brief periods of time not to exceed 20 percent of the hours worked in the workweek. For the purpose of AS 23.10.060, it does not apply to any employee required by the employer to perform such activities on an intermittent or substitute basis during the course of his employment;

(15) "workweek" means a fixed and regularly recurring period of 168 hours, i.e. seven consecutive 24 hour periods. It may begin on any day of the week and need not coincide with the calendar week. An individual employee's workweek is the statutory or contract number of hours that he is to regularly work during that period. The workweek may not be artificially adjusted for the purpose of avoiding the payment of overtime, however the workweek may be changed for any other purpose in the manner provided in AS 23.05.160. ARTICLE 1.

MINIMUM WAGES AND OVERTIME.

Section
100. Payment for overtime
105. Minimum wage

8 AAC 15.100 PAYMENT FOR OVERTIME. (a) An employee's regular rate is the basis for computing overtime. The regular rate is an hourly rate figured on a weekly basis. Employees need not actually be hired at an hourly rate; they may be paid by piece-rate, salary, commission or any other basis agreeable to the employer and employee. However, the applicable compensation basis must be converted to an hourly rate when determining the regular rate for computing overtime compensation.

(b) The regular rate referred to in (a) is that fixed hourly amount determined from an employee's hourly wage, salary, commission, piece-rate or other basis of compensation that he is to be paid for all contract hours up to the daily or weekly maximum, established under AS 23.10.060, that he is regularly employed to work during a work week.

(c) When computing an employee's hours for the purpose of determining overtime, the employer shall count all hours the employee worked during that week including periods of "on call" and "standby or waiting time" required for the convenience of the employer which were a necessary part of the employee's performance of his employment. However, if the employee is completely relieved from all duties for a certain period during which he may use the time effectively for his own purposes, then those periods need not be counted.

(d) The following are not acceptable methods of complying with the payment of overtime provisions of AS 23.10.060:

(1) guaranteed weekly pay for variable hours plan ("Belo" contracts) established under sec. 7(f) of the Fair Labor Standards Act of 1938, as amended (29U.S.C. 207(f) as implemented in 29 C.F.R. 778-402-778.414);

(2) compensatory time off in ~~lieu~~ place of payment for overtime; and

(3) flex-time or flexitime plans established under 29 C.F.R. 778.114 providing a fixed salary for fluctuating hours up to a predetermined maximum number of hours in a work-week. (Eff. / / , Register)

ARTICLE 2.

EXEMPTIONS.

Section
120. Minimum wage exemption for handicapped persons
125. Minimum wage exemption for student learners
130. Exemption for searching for placer or hard rock minerals
135. Exemption for individuals under 18 w are part time employees
140. Determining the number of employees for purposes of AS 23.10.060(1)
145. Small mining operations

8 AAC 10.120. MINIMUM WAGE EXEMPTION FOR HANDICAPPED PERSONS. (a) An application to employ a person at less than the minimum wage established under AS 23.10.065 must be made either on a form provided by the department or by filing an application for a special certificate to employ a handicapped person (29.C.F.R. Part 525) with the Regional Director of the Wage and Hour Division, U.S. Department of Labor, 909 First Avenue, Seattle, Washington, 98104.

(b) An application filed with the department must set out the facts showing that the person's productive capacity to do the work he is to perform is impaired by physical or mental deficiency, age, or injury. A medical certificate will be required in all cases in which the handicap is not clearly obvious. The information in the application must be complete and must be certified by a responsible person who has knowledge of the facts.

(c) If the commissioner determines, from the information provided in the application, that the person would otherwise be deprived of employment opportunity, he will, in the exercise of his discretion, approve a wage rate lower than that established under AS 23.10.065. With the exception of very extreme cases where the person is so seriously impaired that he is unable to engage in competitive employment, that rate will not be less than 50 percent of the minimum wage established under AS 23.10.065.

(d) If an approval is issued under (c) of this section, it will specify the approved wage rate and the period for which it is effective. An application for renewal of an exemption must be made in the same manner as the original but must also include an evaluation of that person's productivity, comparing the degree of productivity between the initial application and the renewal.

(e) As a general rule, approval for payment of a wage lower than that established under AS 23.10.065 to persons with a temporary handicap will not be granted.

(f) Persons undergoing rehabilitation treatment or therapy relating to narcotics or alcoholism are not considered handicapped for the purposes of AS 23.10.070 and this section. (Eff. / / , Register)

Authority: AS 23.10.070(1)
AS 23.10.085

8 AAC 15.125 MINIMUM WAGE EXEMPTION FOR STUDENT LEARNERS. (a) An exemption for student learners from the minimum wage requirement of AS 23.10.065 is available when the student learner is enrolled in a course of study and training in a cooperative vocational training program under a recognized state or local educational authority or in a substantially similar program conducted by a private school.

(b) An application for an exemption under (a) of this section must be made on a form provided by the department. The information required must be complete and must be signed by the employer and the student learner's school coordinator or principal. To qualify for the exemption, the employment must meet all the requirements set out in AS 23.10.325-23.10.370 and chapter 5 of this title relating to the employment of children.

(c) A wage rate authorized under this section will not be less than 75 percent of the minimum wage established under AS 23.10.065.

(d) The exemption from minimum wages for full-time students established by Sec. 14(b) of the Fair Labor Standards Act of 1938, as amended, (29 U.S.C. 214(b)) as implemented in 29 C.F.R. 519.1 - 519.2 does not apply to employment subject to the provisions of AS 23.10.065. (Eff. / / , Register)

Authority: AS 23.10.070(3)
AS 23.10.085

8 AAC 15.130 EXEMPTION FOR SEARCHING FOR PLACER OR HARD ROCK MINERALS. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(10) applies to those activities commonly referred to as "prospecting" and does not apply once development of and production from a known mineral source has ~~been~~ begun. (Eff. / / , Register)

Authority: AS 23.10.055(10)
AS 23.10.085

8 AAC 15.135 EXEMPTION FOR INDIVIDUALS UNDER 18 WHO ARE PART TIME EMPLOYEES. The exemption from AS 23.10.050-23.10.150 provided by AS 23.10.055(11) does not apply during any work week in which an individual normally within the ambit of AS 23.10.055(11) is employed in excess of 30 hours. 8 AAC 15.140 DETERMINING THE NUMBER OF EMPLOYEES FOR PURPOSES OF AS 23.10.060(1). In determining the number of employees that an employer employs for purposes of AS 23.10.060(1), all officers of a corporation who actively engage in the business and all part time employees will be counted regardless of the number of days or hours worked. (Eff. / / , Register)

Authority: AS 23.10.060(1)
AS 23.10.085

8 AAC 15.145 SMALL MINING OPERATIONS. (a) A mining season, for purposes of AS 23.10.060(5), means the cumulative period of time during which mining operations are carried or during a calendar year, but not exceeding 20 weeks.

(b) The exemption from the payment for overtime requirements of AS 23.10.060 for employers engaged in small mining operations provided by AS 23.10.060(5) is available to the employer for a maximum of 14 consecutive weeks, commencing on the first day the mine begins active operations in a calendar year. In determining the available period of exemption, periods during which the mine is not actively engaged in mining operations for such reasons as, but not limited to, assessment work and repair or construction of buildings or equipment are not part of the exemption period.

(c) During the exemption period described in (b), an employer engaged in small mining operations remains responsible for payment of overtime at the rates established by AS 23.10.060 for work performed by an employee in excess of 12 hours a day or 56 hours a week. (Eff. / / , Register)

Authority: AS 23.10.060(5)
AS 23.10.085

ARTICLE 3.

DEDUCTIONS FROM WAGES.

Section
160. Deductions from an employee's wages.

8 AAC 15.160. DEDUCTIONS FROM AN EMPLOYEE'S WAGES. (a) AS 23.10.085(c) does not limit the right of an employer and employee to enter into a written agreement to provide for deductions of monetary obligations of an employee other than the cost of board and lodging. However, a written agreement for other deductions payable to the employer or person acting in the employer's behalf or interest, other than the cost of board or lodging, is not valid it it would have the effect of reducing an employee's wage rate below the statutory minimum wage or requiring an employee to reimburse the employer for any of the following:

(1) customer checks returned due to insufficient funds or any other reason ;

(2) non-payment for goods or services as a result of customers walking out or defaulting on credit;

(3) cash or cash register shortages for which the employee does not acknowledge responsibility;

(4) lost or stolen property or alleged theft by the employee for which the employee does not acknowledge responsibility;

(5) damage or breakage costs unless they are clearly due to willful conduct on the part of the employee, the responsibility for which has been acknowledged by the employee.

(b) Nothing in (a) of this section prohibits deductions from earnings based on a written agreement whereby the employer has been directed by the employee to pay a sum for the benefit of that employee to a creditor, donee, or other third party and neither the employer nor any person acting in his behalf or interest derives any profit or benefit from the transaction.

(c) Written agreements for deductions from earnings are not required for any lawful deduction otherwise authorized or required by state or federal law or by order of a court of competent jurisdiction.

(d) An employer subject to AS 23.10.050-23.10.150 shall furnish each person employed by him who is not exempted from the coverage of those sections by AS 23.10.055 a statement of earnings and deductions for each pay period. The statement of earnings and deductions ~~shall~~ must contain the following information:

(1) employee's rate of pay;

(2) the beginning and ending dates of the pay period and the weekly hours actually worked during the period;

(3) federal income tax deductions;

(4) federal insurance contribution act deductions;

(5) Alaska income tax deduction;

(6) Alaska school tax deduction;

(7) Alaska employment security act contributions;

(8) board and lodging costs;

(9) advances; and

(10) other authorized deductions. (Eff. / / , Register)

Authority: AS 23.10.085

ARTICLE 4.

PROCEDURES RELATING TO VIOLATIONS, INVESTIGATIONS, OR HEARINGS.

Section
175. Assignment of claims
180. Investigations, conference and persuasion

8 AAC 15.175. ASSIGNMENT OF CLAIMS. (a) A person who believes that he has not been paid wages due him under AS 23.10.050 - 23.10.150 may assign his claim to the department for collection.

(b) The department will not accept an assignment of a claim under AS 23.10.050 - 23.10.150 in excess of $5,000, excluding liquidated damages. (Eff. / / , Register)

Authority: AS 23.10.085
AS 23.10.110(b)

8 AAC 15.180. INVESTIGATIONS, CONFERENCES AND PERSUASION. (a) The wage and hour division will investigate potential violations of AS 23.10.050-23.10.150 on its own motion or on the assignment to it of a claim under sec. 175 of this chapter.

(b) If, after investigation, the division finds that probable cause exists for believing that a violation of AS 23.10.050 - 23.10.150 has occurred, it will attempt to correct the unlawful practice by conference and persuasion as follows:

(1) the division will provide the employer believed to have violated AS 23.10.050 - 23.10.150 with a copy of the assignment or a description of the alleged violation and inform him of the results of its investigation; and

(2) the division will schedule an informal conference with the employer to discuss the matter and attempt to eliminate the alleged violations.

(c) If the informal conference succeeds in correcting the alleged violation, no further action will be taken by the division against the employer.

(d) If an alleged violation is not rectified by the informal conference or if the employer fails to attend the conference without good cause shown, the director may, at his discretion;

(1) conduct a further investigation into the matter;

(2) enforce the claim through initiation of an adjudicative hearing under provisions of the Administrative Procedures Act (AS 44.62);

(3) enforce the claim through filing of an action in a court of competent jurisdiction.

(e) If the director determines under (d)(1) of this section that a further investigation into the matter should be conducted, he may provide that it be carried out by initiation of an investigative proceeding conducted in accordance with secs. 10 through 30 of chapter 25 of this title. GENERAL PROVISIONS

Section
~~900~~ 195. Place of employment for purposes of recordkeeping
~~910~~ 200. Definitions

8 AAC 15.~~195~~ 900. PLACE OF EMPLOYMENT FOR PURPOSES OF RECORDKEEPING. For purposes of AS 23.10.100, "the place where an employee is employed" means a central office of the employer located within the state. However, the employer may keep duplicate records at the sites or premises where the work is performed. (Eff. / / , Register)

Authority: AS 23.10.085
AS 23.10.100

8 AAC 15.910. DEFINITIONS. In this chapter and in AS 23.10.050 - 23.10.150, unless the context requires otherwise:

(1) "administrative employee" means an employee;

(A) whose primary duty consists of work directly related to management policies or supervising the general business operations of his employer;

(B) who customarily and regularly exercises discretion and independent judgment;

(C) who performs his work under only general supervision;

(D) who is paid on a salary or fee basis;

(E) who regularly and directly assists a proprietor or an exempt executive employee of the employer; and

(F) who performs work along specialized or technical lines requiring special training, experience or knowledge and does not devote more than 20 percent of his weekly hours to activities which are not described in this paragraph or paragraphs (7) or (11) of this section;

(2) "casual employee," as used in AS 23.10.065(15), means an employee engaged in an activity which occurs without regularity and is not in the usual course of trade, business, occupation or profession of his employer;

(3) "commissioner" means the commissioner of labor;

(4) "department" means the Alaska Department of Labor;

(5) "director" means the director of the wage and hour division of the department, or his designee;

(6) "domestic service in or about a private home" as used in AS 23.10.055(4), means a person employed in or about a private home of a person by whom he is employed and who performs such services or activities as a babysitter, a cook, a butler, a valet, a maid, a housekeeper, a governess, a janitor, a launderess, a caretaker, a handyman, a gardener, a footman, a groom, or a chauffeur of automobiles for family use;

(7) "executive employee" means an employee:

(A) whose primary duty consists of the management of the enterprise in which he is employed or of a customarily recognized branch, department, or subdivision of the enterprise;

(B) who customarily and regularly directs the work of two or more other employees;

(C) who has the authority to hire or fire or effect any other change of status of other employees or whose suggestions or recommendations regarding these kinds of changes are given particular weight;

(D) who customarily and regularly exercises discretionary authority;

(E) who does not devote more than 20 percent of his weekly hours to activities which are not directly and closely related to the work described in this paragraph or paragraphs (1) or (11) of this section; and

(F) who is compensated on a salary basis;

(8) "nonprofit" as used in AS 23.10.055(6), means an organization no part of the income or profit of which is distributable to its members, directors, or officers and whose status has been determined by the U.S. Internal Revenue Service as nonprofit;

(9) "on call" means time that an employee is required to remain on call on the employer's premises or other place of employment or so close to them that he cannot use the time effectively for his own purposes, but does not include the time an employee is not required to remain on or near his employer's premises or other place of employment but is merely required to leave word at his home or with the employer where he may be reached;

(10) "outside salesman" means a person who is employed for the purpose of making sales, contracts for sales, consignments, or shipments for sale or obtaining orders for services or for use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (12) do not exceed 20 percent of the hours worked in the workweek; → of this section

(11) "professional" means an employee, except for the classifications of registered nurse and licensed practical nurse,

(A) whose primary duty is:

(i) to perform work requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education or from an apprenticeship or from training in the performance of routine mental, manual, or physical processes; or

(ii) to perform work that is original and creative in character in a recognized field of artistic endeavor (as opposed to work which can be produced by a person with general manual or intellectual ability and training), and the result of which depends primarily on the invention, imagination, or talent of the employee; or

(iii) to teach, tutor, instruct, or lecture in the activity of imparting knowledge, and who is employed and engaged in this activity as a teacher certified or recognized as such in a school or other educational establishment or institution; and

(B) whose work:

(i) requires the consistent exercise of discretion and judgment in its performance;

(ii) is predominately intellectual and varied in character (as opposed to routine mental, manual, mechanical, or physical work) and is of such character that the output produced or the result accomplished cannot be standardized on a time basis; and

(iii) is compensated on a salary or fee basis;

(12) "salesman employed on a straight commission basis" means a person who is regularly employed on the business premise of his employer and is compensated on a straight commission basis for the purpose of making sales, contracts for sales, consignments, or shipments for sale or in obtaining orders for services or the use of facilities for which a consideration will be paid by the client or customer and whose hours of work of a nature other than that described in this paragraph or paragraph (10) of this section do not exceed 20 percent of the hours worked in the workweek;

(13) "standby or waiting time" means time that an employee is required to be at or near his post or place of employment and is required to wait for work or an assignment, whether nor not because of shutdown or repair, and during which he cannot use the time effectively for his own purposes;

(14) "supervisory capacity" means those primary duties performed, except for the classifications of registered nurse and licensed practical nurse, by an employee who is employed solely for the purpose of regularly assigning and directing the activities of other employees, and is responsible for results of the work performed, and who does not perform duties regularly performed by the employees supervised, except for brief periods of time not to exceed 20 percent of the hours worked in the workweek; For the purpose of AS 23.10.060, it does not apply to any employee required by the employer to perform ~~such~~ activities on an intermittent or substitute basis during the course of his employment;

(15) "workweek" means a fixed and regularly recurring period of 168 hours, i.e. seven consecutive 24 hour periods. It may begin on any day of the week and need not coincide with the calendar week; An individual employee's workweek is the statutory or contract number of hours that he is to regularly work during that period; The workweek may not be artificially adjusted for the purpose of avoiding the payment of overtime, however the workweek may be changed for any other purpose in the manner provided in AS 23.05.160. 8 AAC 15.070. DEFINITIONS OF MISCELLANEOUS TERMS USED IN AS 23.10.050 – 23.10.150. (a) "Administrative," as used in AS 23.10.055(9), means an employee whose primary duty consists of work directly related to management policies or supervising the general business operations of his employer and who customarily and regularly exercises discretion and independent judgment and who performs his work under only general supervision and who does not devote more than 39 percent of his workweek to general or routine tasks performed by other employees of his employer.

(b) "Casual employee," as used in AS 23.10.060(15), means an employee engaged in an activity which occurs without regularity and is not in the usual course of trade, business, occupation or profession of his employer.

(c) "Domestic service in or about a private home," as used in AS 23.10.055(4), means a person employed in or about a private home of the person by whom he is employed and who

performs such services or activities as a babysitter, a cook, a butler, a valet, a maid, a housekeeper, a governess, a janitor, a launderess, a caretaker, a handyman, a gardener, a footman, a groom, or a chauffeur of automobiles for family use.

(d) "Executive," as used in AS 23.10.055(9), means an employee

(1) whose primary duty consists of management of the enterprise in which he is employed and whose hours worked in a workweek do not exceed 20 percent in activities not essential to the management of the business operations of his employer; or

(2) who customarily and regularly exercises discretionary power and regularly directs the work of other employees of the enterprise or a recognized department or division of the enterprise and who has the authority to hire or fire, or accomplish any other change of status, including advancement or promotion of other employees or whose recommendations regarding change of status are given particular weight.

(e) "Nonprofit," as used in AS 23.10.055(6), means an organization no part of the income or profit of which is distributable to its members, directors or officers.

(f) "Outside salesman," as used in AS 23.10.055(9), means a person who is employed for the purpose of and who is customarily and regularly engaged away from his employer's place of business in making sales, contracts for sale, consignments or shipments for sale or in obtaining orders for services or for use of facilities for which a consideration will be paid by the client or customer and whose hours worked in a workweek do not exceed 20 percent in activities performed by nonexempt employees.

(g) "Professional," as used in AS 23.10.055(9), means an employee, except for the classifications of registered nurse and licensed practical nurse, whose primary duty consists of

(1) work requiring knowledge acquired through prolonged study of an advanced or specialized nature and neither routine in process or gained through general academic education or apprenticeship training; or

(2) work which is inventive or creative and dependent upon the talent of the employee and which does not require more than 20 percent of the hours in a workweek of the employee to be devoted to activities which are not an essential part of, or a necessary incident to the employee's specialized work.

(h) "Supervisory," as used in AS 23.10.060, means a person, except for the classifications of registered nurse and licensed practical nurse, who directs the activities of other employees and who does not perform duties which are regularly performed by the employees supervised, except for brief periods of time not to exceed more than 8 hours in the supervisor's workweek. POSITION PAPER/Department of Health & Social Serv

POSITION PAPER

House Bill No. 235 a.m.

"An Act relating to authorizing an advisory vote by the qualified voters of the state on instituting death penalty for first degree murder; and providing for an effective date."

The capital punishment issue has historically been one of controversy nationwide. Placing the advisory question as to whether the Alaska Legislature should enact laws to institute death penalty for first degree murder on the ballot is viewed as an appropriate approach to resolving this issue.

IV. ANALYSIS

The placement on a ballot of an advisory question which would institute death penalty for first degree murder would not result in any expenditures for Corrections.

If the advisory vote would result in legislation being passed to institute death penalty, there would be costs related to the legislation. These costs, however, would be identified on a fiscal for the specific bill as presented.

Capital punishment

Dear Editor:

The position of the Moral Majority and certain Christian organizations in Anchorage in favor of the death penalty is puzzling. Rather than argue that this attitude does not comport with the teachings of the Prince of Peace, perhaps we would emulate the state-sanctioned death of their leader and execute here by means of crucifixion.

Sylvia L. Short
Anchorage

Rights

Dear Editor:

This evening's TV news report pictured Sen. Joe Josephson stating, "We must be very very careful to protect the rights of the A.P.I. residents to be different."

The recent murders of four teen-agers in Russian Jack Park is the finest example of protecting their rights to be different.

I wold like to remind him that he should be equally careful to protect my right not to be murdered.

Edward M. Boyd

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

House Bill No. 235

"An Act relating to authorizing an advisory vote by the qualified voters of the state on instituting capital punishment for first degree murder; and providing for an effective date."

The capital punishment issue has historically been one of controversy nationwide. Placing the advisory question as to whether the Alaska Legislature should enact laws to institute capital punishment for first degree murder on the ballot is viewed as an appropriate approach to resolving this issue.

HB 235
Fiscal Note
Analysis

This bill provides for an advisory vote for instituting capital punishment for first degree murder. The bill itself, which only authorizes a vote, will not have a fiscal impact on the Department of Law. The department cannot speak to the cost of capital punishment legislation until such legislation is written and its [illegible] form and substance are known.

Obviously if capital punishment is reinstituted there will be significant fiscal impact felt by Law, Public Safety, the Courts and, to a lesser degree, Corrections. For instance, Utah's Attorney General has two attorneys who are assigned solely to capital punishment appeals. Based on this experience, we could probably expect that our department would have to annually expend between $200.0 and $250.0, in attorney costs, for its own appeals effort.

Open hostility flares on judiciary panel

NEWS 4/20/83

By HARRY McFARLAND
The Associated Press

JUNEAU — Open hostility flared in a House Judiciary Committee meeting when a minority Democrat protested the lack of debate on one bill and the absence of testimony on another.

Rep. Don Clocksin, D-Anchorage, found himself looking at a committee substitute on a measure (HB247) he said he hadn't read. Judiciary Chairman Charlie Bussell, R-Anchorage, asked immediately for a vote, saying that the information on the bill was contained in the member's packet.

"You're not even going to allow debate?" Clocksin asked.

Bussell said the committee had debated the bill, and the committee substitute was the result of testimony. The measure was approved on a 4-1 vote.

A second measure (HB163) was introduced to the committee, with Bussell stating he saw no real need to have testimony.

"This is a travesty on the legislative process," Clocksin said. "It's a railroad."

Backed by other members of the majority — including House Speaker Joe Hayes and House Majority Leader Ramona Barnes, both R-Anchorage — Bussell won his way, and the measure was approved on a 5-2 vote.

After the meeting, an angry Clocksin stormed up to Bussell, using foul language, demanding to know why he was being treated in such a manner.

OCTOBER 15, 1982

FOR RELEASE ONLY UPON DELIVERY

Mr. Chairman:

I am here today to discuss with you the events surrounding the recent contamination of Extra-Strength Tylenol capsules and to share with you our thoughts and concerns regarding this tragic event. On behalf of Secretary of Health and Human Services Richard Schweiker and myself, I would like to acknowledge the excellent cooperation we have received from industry, State and local authorities, and the Federal Bureau of Investigation who have responded swiftly and effectively to this emergency.

Based on the September 30, 1982 report of deaths in Chicago by a Cook County medical examiner, the manufacturer of Tylenol, McNeil Consumer Products Co. of Fort Washington, Pennsylvania immediately removed the lot from the marketplace nationwide which had been linked to the deaths. On October 1, the manufacturer removed a second lot from the marketplace nationwide which had been linked to an additional death. In the greater Chicago area, all Extra-Strength Tylenol capsules were withdrawn.

At the same time, the Food and Drug Administration (FDA) issued press releases on September 30 and October 1 (a press conference was also held on October 1) advising consumers not to use Extra-Strength Tylenol capsules until circumstances surrounding the deaths could be clarified. Additionally, FDA began sampling Extra-Strength Tylenol nationally on October 1. Sampling in the Chicago area had begun immediately upon learning of the Tylenol-related deaths on September 30.

FIELD ACTIONS

During the next four days, over a million and a half Tylenol capsules were sampled and tested. Over 1,100 FDA field personnel were committed to collecting and analyzing samples of Tylenol capsules and immediately investigating all reports of deaths or illnesses which might have been associated with the use of Tylenol. Samples were collected in practically all of the States and forwarded to our district laboratories for analysis. I would like to make special mention of the enormous task our analysts faced. Each individual capsule was physically examined and its ingredients chemically analyzed. It was truly an extraordinary effort.

In one instance, our field efforts may have, indeed, prevented an additional death. One bottle taken from the shelves by FDA in the Chicago area proved to be contaminated with cyanide. This was the only bottle containing cyanide that was not associated with a death. None of the capsules outside the Chicago area showed cyanide contamination.

In addition, both plants where the lots involved had been produced were inspected to insure that the contaminant had not been introduced into the product during the manufacturing process. The Philadelphia District Office began inspecting the Fort Washington, Pennsylvania plant on September 30 and the Houston District Office inspected the Round Rock, Texas plant on October 1. We concluded that the contamination was the result of tampering after the capsules had been

shipped to distribution points and, most likely, after they reached the retail shelves. Some of the reasons were:

-- The only cases of injury and death associated with cyanide-contaminated capsules were in the Chicago area and had all occurred within three days--September 29 to October 1.

-- The control numbers directly associated with the injuries and deaths were produced in two widely separated plants at three different times: Fort Washington, Pennsylvania and Round Rock, Texas in January, March, and April 1982.

-- There was no uniformity in the amount of cyanide present in the capsules that were analyzed.

-- FDA laboratory testing of capsules containing cyanide revealed that the gelatin capsule begins to deteriorate 6 to 7 days after being in contact with the cyanide, and samples of capsules collected and analyzed by FDA from a Schaumberg, Illinois drug store and FDA analysis of capsules from victims' bottles revealed beginning stages of such deterioration.

-- The first two control numbers implicated were both shipped to the Chicago area in mid-August 1982. The third lot was first shipped to distribution points in Pennsylvania in May 1982. Subsequent shipments of code 1801 MA were after that date and therefore all were available for adulteration in Chicago at about the same time.

-- The bottle of capsules implicated in one death contained both Regular Strength and Extra-Strength capsules. Only the Extra-Strength capsules contained cyanide. Inspection of the plants revealed distinctly separate processes for the manufacture of the two kinds of capsules and these processes are physically separated one from the other.

-- Local law enforcement agencies have announced that they believe at this time that the tampering took place after the product left the manufacturing plant.

By October 4, FDA also had checked reports of more than twelve deaths or illnesses in areas other than Chicago and none proved to be related to Tylenol. On that same date FDA issued another press release to provide this updated information and to continue to advise against the use of nonprescription Tylenol capsules. Also, from the day the deaths were first reported, my colleagues and I utilized national TV and radio news programs, press conferences and other available means of communication to convey this message to the public.

As authorities continued to investigate the cyanide poisoning deaths in the Chicago area, a report of a Tylenol-related illness involving an Oroville, California man was received by FDA late on Monday evening, October 4. Field investigators were immediately assigned to the area to investigate the incident and acquire samples. Although the man recovered, subsequent analysis of the Extra-Strenth Tylenol capsules from the bottle he had used revealed the presence of strychnine. At this time, although all contaminated Tylenol products were Extra-Strength Tylenol, retailers were notified nationwide on October 5 by the manufacturer to withdraw both Extra- and Regular Strength Tylenol capsules from their shelves. FDA also issued another press release on that date summarizing McNeil's announcement regarding the Oroville situation and restating its warning to consumers to avoid Extra-Strength and Regular nonprescription Tylenol capsules nationwide.

As of today, over 150 reports of deaths or illnesses that might have been related to the use of Tylenol capsules have been received by FDA from across the country. We have investigated each of these reports and have been unable to prove that any subsequent cases have been linked to the taking of contaminated Tylenol. We are continuing to monitor and follow up on additional reports we receive.

HEADQUARTERS ACTIONS

In addition to the efforts undertaken in the field and because of the continuing serious emergency involving the tampering with nonprescription drug products, I utilized our existing emergency procedures for headquarters personnel and 24-hour coverage was provided by the staff. I also created a formal emergency Task Force devoted to the Tylenol problem. The group met at least twice daily to review, discuss and direct the activities of headquarters and field personnel.

These events have, quite understandably, generated concern about package integrity and product security. After discussion with the Secretary, I conferred with The Proprietary Association, a trade association which represents a large number of nonprescription drug manufacturers, on October 3 suggesting that they organize an industry task force to address this problem. They agreed to do so and immediately established the Joint Committee on Product Security. I met with the Committee on October 5 to explore measures to improve product packaging in order to discourage tampering.

Further, a special Expert Technical Committee was appointed to develop standards for tamper-resistant packaging. This group met on

October 7 and 11 and reviewed technologies available to deal with this problem, and a number of packaging types were identified as tamper resistant by a definition developed by the group. An integral part of these discussions has been the availability of necessary packaging that are agreed upon. In addition, individual drug companies have been examining their own packaging to determine what can be done to develop and implement additional tamper-resistant procedures. As you know, the Board of Directors of The Proprietary Association met yesterday and received the report from the Expert Technical Committee. I am advised that Mr. Cope will discuss the substance of that report in his testimony.

There is a need for a Federal standard to implement the packaging requirement. Such requirements and their technical feasibility are the subject of discussion within FDA and The Proprietary Association.

Of concern to us has been the development of State and local laws or proposals to require some form of tamper-resistant packaging. These laws or proposals are an understandable response in the face of this tragic situation. It is important, however, that there not be conflicting laws affecting nationally distributed products in such a way that it is impracticable to market such products. Therefore on October 5, Secretary Schweiker requested FDA to immediately begin drafting a regulation that would require some kind of tamper-resistant packaging for nonprescription drugs. The Secretary stressed the need for uniform consistent standards that adequately protect the public while assuring the availability of nonprescription drug products nationwide.

FDA currently possesses the legal authority to promulgate regulations governing the design of containers to discourage or indicate the occurrence of tampering. Specifically, section 501(a)(2)(B) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. sec. 351(a)(2)(B)] authorizes FDA to issue good manufacturing practice regulations (GMPs) for drug products.

GMPs are those measures that manufacturers take to assure that their drug products are of adequate quality, including measures to assure that products remain of adequate quality throughout the chain of distribution. This GMP authority has been used to require drug containers to guard against foreseeable external factors that could cause product deterioration or contamination. These regulations were not intended to cover tampering. Tampering has been uncommon and sporadic, and has therefore not been considered, until now, to be the type of threat to product integrity for which an industry-wide response is necessary. But, in the light of the recent events in Chicago and Oroville, it is clear that good manufacturing practices should now include the use of tamper-resistant packaging to discourage or indicate the occurrence of tampering. Such packaging is necessary to assure that over-the-counter (OTC) drug products meet Federal requirements for safety, quality, and purity at the time of purchase by the ultimate consumer.

It must be recognized that the initiatives described above will not happen overnight. Although we expect to publish the regulation in the near future, it is going to take time for industry to get the equipment in place in the plants and to begin marketing these products. It

should also be emphasized that a tamper-proof package is not possible. However, we believe that we can improve upon the packaging for these products using existing and developing technologies by making them more resistant to tampering of any sort. At the same time, we must help to educate consumers to be alert to signs that indicate tampering. Our goal in these efforts is to reduce the risk of injuries or deaths to consumers now and in the future. I want to assure you that Secretary Schweiker and I give this matter the highest priority.

CONSUMER INITIATIVES

Initiatives are underway by health professionals, the industry and FDA to develop ways in which we can best inform and educate the public about how critical it is for all of us to be as observant as possible with regard to the condition of the products we buy. We will be building upon our existing programs through cooperation with the private sector to develop ways to disseminate information and to impress upon consumers that they have a personal responsibility to heighten their sense of awareness in this area. In fact, the National Council on Patient Information and Education plans to form a group which will deal with various aspects on patient and consumer responsibility. We are working closely with the Council. The Council, headed by former Congressman Paul Rogers, held its first meeting on October 12, 1982.

INTERNATIONAL COMMUNICATIONS

We also undertook to disseminate information to the international community.

On Friday, October 1, the text of Dr. Novitch's statement at the noon press conference was sent by telegram to the World Health Organization (WHO) offices in Geneva, Copenhagen, and Washington. An all-post telex was sent Friday evening by the Department of State. That evening, a telex explaining events up to that time was also sent to 64 government drug regulatory authorities and WHO.

Over the next two days, we continued to provide WHO and the State Department with additional information as it became available and requested that the various health ministries be provided with this updated information. Another telex was sent to international drug regulatory authorities.

Further, on October 8, we again contacted the State Department updating domestic information on the Tylenol situation, listing the 11 foreign countries in which Tylenol capsule products are manufactured and/or marketed, and providing information on the Johnson and Johnson preferred method of disposing of bottled Tylenol capsules. We provided a list of the 11 foreign affiliates of Johnson and Johnson and explained that these affiliates had already established communications with the local health ministries regarding sales of Extra-Strength Tylenol capsules. We transmitted this same information to WHO Headquarters, WHO regional offices, and the European Economic Community. This information was also transmitted to international drug regulatory authorities.

The willful contamination of products intended to benefit consumers is repulsive to us all. I can assure you that the Secretary and I are personally committed to moving quickly to provide additional safeguards to help protect the public.

Thank you Mr. Chairman. This concludes my prepared testimony. I will be happy to answer any questions you may have.

HHS NEWS

MAR 2 6 1983

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
FOR RELEASE AT 8:00 A.M., EST
Thursday, November 4, 1982

Claire Dorrell - (202) 245-6343

HHS Secretary Richard S. Schweiker said today he has formally approved and sent to the Federal Register for publication uniform standards for nonprescription drug manufacturers to follow in providing tamper-resistant packaging for their products--effective within 90 days in many cases.

Manufacturers could choose among various techniques--seals, shrink bands, and bubble or strip packs, for example--but would be required to highlight the barrier with a distinctive design that would be hard to duplicate. Each product would also have to prominently display an advisory that the product should not be purchased or used if the seal or barrier was not intact when the product was bought.

FDA Commissioner Arthur Hull Hayes Jr., M.D., said the regulation "allows manufacturers flexibility as to which methods of tamper-resistant packaging will be used. We realize new methods are being developed all the time, and we want to encourage new protection methods," said Dr. Hayes.

"While it is virtually impossible to make any package tamper-proof, it is possible to manufacture packages in such a way that tampering is much more difficult, and that if a product is tampered with, it can more easily be detected by a careful consumer," Schweiker said. "That is the intent of this regulation."

The regulation is a result of the tampering--the opening and refilling of Tylenol capsules with cyanide after they left the manufacturer--which killed seven people in the Chicago area at the end of September and other reports of product tampering since that time.

The regulation becomes effective in steps. The first effective date, in 90 days, requires tamper-resistant packaging on most nonprescription capsule and

(More)

liquid drugs (including eyedrops), except topical dermatologic products. The new packaging would also be required in 90 days on certain cosmetic products that may be susceptible to tampering, such as mouthwashes.

In 180 days tablets and suppositories--which are considered less susceptible to tampering--would be required to have tamper-resistant packaging, too. The delay is designed to ensure that the more susceptible products, such as liquids and capsules, have priority in obtaining the technology and machinery needed to make them secure.

Also at 180 days, the label statement and the distinctive design for barriers would be required. This delay recognizes the practical difficulties these features may pose, although some manufacturers may be able to beat the deadline by months. In fact some expect to begin marketing products in new tamper-resistant packages within the next few weeks. In 15 months, no over-the-counter drug could be sold without tamper-resistant packaging.

Since the Chicago deaths, FDA and the major manufacturers of nonprescription drugs have been working together to review what technology and machinery is available, and how to most effectively protect the public from product tampering.

"The manufacturers of over-the-counter drugs have been extremely cooperative in moving quickly toward better protection. They have acted responsibly and in good faith, and I believe this regulation will give them the uniform national standards they need," said Schweiker.

Tamper-Resistant Packaging Requirements; Certain Over-the-Counter Human Drugs and Cosmetic Products; Contact Lens Solutions and Tablets; Final Rules

HB 247

(Effective January 1, 1980)

Sec. 11.46.480. Criminal mischief in the first degree. (a) A person commits the crime of criminal mischief in the first degree if, having no right to do so or any reasonable ground to believe he has such a right,

(1) with intent to cause a substantial interruption or impairment of a service rendered to the public by a utility or by an organization which deals with emergencies involving danger to life or property, he damages or tampers with property of that utility or organization and causes substantial interruption or impairment of service to the public;

(2) with intent to damage property of another by the use of widely dangerous means, he damages property of another in an amount exceeding $100,000 by the use of widely danagerous means; or

(3) he intentionally damages an oil or gas pipeline or supporting facility.

(b) Criminal mischief in the first degree is a class B felony. (§ 4 ch 166 SLA 1978)

IV. ANALYSIS

There is no statistical data regarding the activity which would become a crime under this act. The Division has no information regarding the annual number of occurrences, arrests, or convictions for tampering with an item in commerce that is a food, drug, device, or cosmetic where physical injury is intended. Therefore, no estimate can be made regarding the fiscal impact of this proposed legislation.

HB 247
Analysis

This bill makes tampering with an item in commerce that is a food, drug, device, or cosmetic a class B felony. There is no history of such tampering occurring in the state. After such tampering as the Tylenol poisoning in Chicago, however, this bill could serve to help prevent future similar occurrences from happening in Alaska by providing strict penalties for any tampering. Prosecutors believe that the incidence of tampering will be slight and, consequently, no measurable fiscal impact will result due to enactment of this legislation.

MEMORANDUM

TO: Representative Milo Fritz
✓ Representative Charlie Bussell

FROM: Representative Al Adams AA

SUBJ: Alternative Solutions to the Peremptory Disqualification Problem

For your information only, I would like to draw to your attention the enclosed bill, introduced by Senator Ray last Friday. It would help to alleviate the problem illustrated by Judge Hornaday's experience in Homer. The bill would not allow a district court judge to serve outside of his district for more than 90 days without his consent. Thus, a judge could not be transferred permanently to another location unless he consents to such an arrangement.

Another solution, which I also think merits further attention, would be to raise minimum sentence levels for drunk driving convictions. This would go a long way towards achieving stricter penalties for drunk driving --- which I believe is the real impetus for public outcry regarding Judge Hornaday's transfer. Mitch Abood's HB 6 is an excellent vehicle for this kind of solution.

ANALYSIS FOR FISCAL IMPACT: CS FOR HB 261

The CS for HB 261 (Judiciary) stipulates that "a district judge who has been assigned to an established court within a judicial district may not be permanently reassigned by the presiding judge to another court within that judicial district." In the third judicial district, the presiding judge has stated that he plans to permanently reassign the Homer district judge to Anchorage. If this legislation prohibits the permanent reassignment of the Homer judge, the court will incur additional travel and per diem expenses to transport the Homer judge to Anchorage and Anchorage judges to Homer to cover disqualifications. The estimated cost of this travel and per diem is $10,000/year.

and House Bill 262

WHY DOES ALASKA NEED TOUGH CHILD PASSENGER SAFETY LEGISLATION?

1. THE GREATEST KILLER of KIDS is the CAR/TRUCK

   a. More children are killed by motor vehicles than by the next two greatest killers combined--more than birth defects, congenital heart lesions, brain malformations, leukemia, cancer, etc. together.

   b. Children under age 6 are PHYSICALLY more susceptible to HEAD INJURY. Twenty-five percent of children's weight is in their head (compared to 9 percent for adult). When the vehicle slows suddenly, the child is thrown HEADFIRST into the dashboard like an arrow. The child's SKULL is more FRAGILE, and BRAIN DAMAGE occurs more easily.

2. WOULD INTENSE EDUCATION ACHIEVE GOOD RESULTS?

   a. No. Several other states have spent hundreds of thousands of dollars on TV, newspaper, pediatric office teaching, etc. with NO MEASURABLE DIFFERENCE IN USAGE or death rate, because young people (parents) naively believe accidents always happen only to other people.

3. WOULD A TOUGH LAW INCREASE USAGE and SAVE LIVES?

		Pre-Law	With Law
Yes.	Massachusetts Usage:	14%	70%

		Pre-Law	With Law
Yes.	Tennessee:	12 deaths/year	1 death/year

Yes. Washington: Death rate over 10 years and 39,600 accidents is 13 times greater for children riding loose than restrained.

270

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

CS for SS for House Bill No. 270

"An Act relating to child pornography."

CS for SS for House Bill No. 270 raises the penalty for exploitation of a minor from a Class C felony to a Class B felony in AS 11.41.455. House Bill No. 270 also adds a new section, Sec. 11.61.125, to Alaska State Statutes which makes distribution of child pornography a Class C felony. The Department estimates that one additional medium security bed will be necessary to house offenders convicted of unlawful exploitation of a minor and/or distribution of child pornography.

3/8/83

IV. ANALYSIS

A. Assumptions

Based on conversations with Department of Law staff, it is assumed that there will be one additional Class B felony conviction and four Class C felony convictions per year. It is assumed all will be first time offenders. Therefore it is estimated that 50% of the Class B and 20% of the Class C felony offenders will receive terms of confinement. This will result in approximately 1.5 person years per year of jail time will be served.

It is further assumed that the distributors of child pornography will remove these materials from their visible stock and convictions for distribution of child pornography will decrease from the original estimate of four per year.

Therefore, it is estimated that one additional medium security bed will be required if this proposed legislation is enacted.

B. Program Summary

1. Positions - An average of one position is required for every 2½ beds. Since only one bed is requested in the fiscal note, no positions are identified as being needed.

2. Other expenditures

a. Contractual Services
Medical care and counseling services $2400

b. Commodities
Food and clothing $2500

c. Grants
Inmate gratuities for kitchen, janitorial or other assigned tasks $200.

C. Impact

There will be no significant economic or local government as a result of passage of this bill.

ADMINISTRATIVE OFFICES
325 WEST POTTER DRIVE, ANCHORAGE, ALASKA 99502

Judiciary Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

April 30, 1983

Further reference House Bill # 270.
This is addendum to Book Cache packet dated April 23, 1983.

Attached is a copy of page S 316 of The Congressional Record of January 26, 1983 containing S.57, A bill to amend title 18 of the United States Code relating to the sexual exploitation of children; to the Committee on the Judiciary in the United States Senate.

I have highlighted that portion of the Congressional Record that deals with the reference we have made in our letter of April 23 regarding Senator Spector's proposal for an affirmative defense.

We continue to be concerned about protection of children. We are also concerned about the protection of the First Amendment rights of all citizens. Since it appears that the amendment proposed to the U.S. Senate will be adopted, it would seem appropriate that similar language be included in either HB 270 or SB 221.

If further information can be of assistance please call.

Sincerely,

Russ Riemann
President

(2) thousands of children including large numbers of runaway and homeless youth are exploited in the production and distribution of pornographic materials; and

(3) the use of children as subjects of pornographic materials is harmful to the physiological, emotional, and mental health of the individual child and to society.

SEC. 3. Chapter 110 of title 18, United States Code, is amended to read as follows:

"CHAPTER 110—SEXUAL EXPLOITATION OF CHILDREN

"Sec. 2251. Definitions for chapter.
"Sec. 2252. Sexual exploitation of children.
"Sec. 2253. Certain activities relating to material involving the sexual exploitation of minors.
"Sec. 2254. Defense.

"§ 2251. Definitions for chapter

"For the purposes of this chapter, the term—

"(1) 'minor' means any person under the age of eighteen years;

"(2) 'sexually explicit conduct' means actual or simulated—

"(A) sexual intercourse, including genital-genital, oral-genital, anal-genital, or oral-anal, whether between persons of the same or opposite sex;

"(B) bestiality;

"(C) sado-masochistic abuse (for the purpose of sexual stimulation);

"(D) masturbation; or

"(E) lewd exhibition of the genitals or public area of any person;

"(3) 'simulated' means the explicit depiction of any conduct described in clause (2) of this section which creates the appearance of such conduct and which exhibits any uncovered portion of the genitals or buttocks;

"(4) 'producing' means producing, directing, manufacturing, issuing, publishing, or advertising; and

"(5) 'visual or print medium' means any film, photograph, negative, slide, book, magazine, or other visual or print medium.

"§ 2252. Sexual exploitation of children

"(a) Any person who knowingly employs, uses, persuades, induces, entices, or coerces any minor to engage in, or who has a minor assist any other person to engage in, any sexually explicit conduct for the purpose of producing any visual or print medium depicting such conduct, shall be punished as provided under subsection (c), if such person knows or has reason to know that such visual or print medium will be transported in interstate or foreign commerce or mailed, or if such visual or print medium has actually been transported in interstate or foreign commerce or mailed.

"(b) Any parent, legal guardian, or person having custody or control of a minor who knowingly permits such minor to engage in, or to assist any other person to engage in, sexually explicit conduct for the purpose of producing any visual or print medium depicting such conduct shall be punished as provided under subsection (c) of this section, if such parent, legal guardian, or person knows or has reason to know that such visual or print medium will be transported in interstate or foreign commerce or mailed or if such visual or print medium has actually been transported in interstate or foreign commerce or mailed.

"(c) Any person who violates this section shall be fined not more than $75,000 or imprisoned not more than 10 years, or both, but, if such person has a prior conviction under this section, such person shall be fined not more than $150,000 or imprisoned not less than 2 years nor more than 15 years, or both.

"§ 2253. Certain activities relating to material involving the sexual exploitation of minors

"(a) Any person who—

"(1) knowingly transports or ships in interstate or foreign commerce or mails any visual or print medium, if—

"(A) the producing of such visual or print medium involves the use of a minor engaging in sexually explicit conduct; and

"(B) such visual or print medium depicts such conduct; or

"(2) knowingly receives any visual or print medium that has been transported or shipped in interstate or foreign commerce or mailed, if—

"(A) the producing of such visual or print medium involves the use of a minor engaging in sexually explicit conduct; and

"(B) such visual or print medium depicts such conduct;

shall be punished as provided in subsection (b) of this section.

"(b) Any person who violates this section shall be fined not more than $75,000 or imprisoned not more than 10 years, or both, but, if such person has a prior conviction under this section, such person shall be fined not more than $150,000 or imprisoned not less than two years nor more than 15 years, or both.

"§ 2254. Defense

"In any prosecution brought under this chapter for the production or distribution of a visual or print medium depicting sexually explicit conduct as defined in section 2251 (1)(2)(D) or (E), it shall be an affirmative defense that the medium, when taken as a whole, possesses serious literary, artistic, scientific, social, or educational value.".

SEC. 4. Section 1961 of title 18, United States Code, is amended in clause (1)(B) by inserting after "section 1955 (relating to the prohibition of illegal gambling businesses)," the following: "sections 2252 and 2253 (relating to the sexual exploitation of children),".

SEC. 5. Section 1964 of title 18, United States Code, is amended in subsection (c) by striking out "his business or" and inserting in lieu thereof "his person, business, or".

By Mr. SPECTER:

S. 58. A bill to authorize incarceration in Federal prisons of convicts sentenced to life imprisonment under the habitual criminal statute of a State; to the Committee on the Judiciary.

S. 58—INCARCERATION UNDER HABITUAL OFFENDER STATUTES

Mr. SPECTER. Mr. President, I now send to the desk two bills which are meant to supplement the Armed Career Criminal Act of 1983, which I just introduced.

The first of these bills, S. 58, grants the Attorney General authority to incarcerate in Federal facilities persons convicted and sentenced to life imprisonment in State courts under their habitual offender statutes.

Permitting these persons to be transfered to Federal prisons will encourage more prosecutions under State career-criminal statutes. These statutes normally allow judges to sentence habitual offenders for significant periods in order to keep them from engaging in further criminal activity. Often, local district attorneys have task forces specially created to target career criminals. Unfortunately however, long-term incarceration of these criminals is nearly impossible due to already crowded State prison conditions. Prisoners are sometimes set free early to make room for the continuing stream of newly convicted persons.

By holding persons sentenced to life imprisonment under a State's career criminal statute, the Federal Government is reducing the burden of overcrowding caused by prisoners serving long sentences.

Recent statistics show that the State prison population continues to increase at an alarming rate. Since 1975 the total U.S. prison population grew by only 1.2 percent. In the first 9 months of 1982, the State prison population exploded with a 10.4-percent rate of increase over 1981 prison population figures. Over the same 9 month period, the Federal prison population increased only 4.5 percent, much of that attributed to unsentenced prisoners under the jurisdiction of the U.S. Immigration and Naturalization Service.

The States need help from the Federal Government to reduce overcrowded conditions. This bill provides this assistance by allowing special targeting efforts to be directed at career criminals.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 58

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) Congress finds that—

(1) career criminals commit a large percentage of the violent and major felonies afflicting society, causing immeasurable physical injury to innocent persons and damage, destruction, or loss to their property estimated at billions of dollars annually, thereby terrorizing law-abiding citizens, disrupting the community, and undermining respect for law;

(2) the continuing criminal activity of career criminals adversely affects interstate commerce;

(3) despite prior convictions for serious offenses, many repeat offenders are placed on probation or sentenced to unduly short terms of imprisonment by State judges, to the detriment of public safety;

(4) many repeat offenders cannot reasonably be rehabilitated and, unless incarcerated for life, will commit further felonies;

(5) many States have "habitual criminal" statutes providing for life sentences for repeat offenders, upon subsequent felony convictions;

(6) many State prison systems are severely overcrowded, understaffed, and unable to confine convicts sentenced to life imprisonment under such statutes in a safe, secure, and humane manner;

(7) State judges may be deterred by the lack of sufficient prison space, staff, and funding from imposing life sentences for repeat offenders as provided by State law, and the legislatures in those States without habitual criminal statutes may be dissuaded by such considerations from enacting such statutes;

(8) the interests of justice and public safety would be served if State authorities felt free to impose life sentences for repeat major offenders unrestrained by such considerations;

9/14/83

State of Alaska

Fiscal Note

HB 279

IV Analysis: This is a revised fiscal note for HB 279.

- o This bill would effect PERS by reducing PERS cost to the court systems by 13.18% of magistrates covered payroll of $966,690 ($21,015 average X 46 magistrates) for FY 84.
- o This bill would effect JRS by increasing JRS cost to the court systems by 65.82% of the magistrates covered payroll of $966,690 for FY 84.
- o The net effect of this bill would be an increase in cost to the state of 52.64% (65.82% - 13.18%) of the magistrates covered payroll or $508,900 ($966,690 X 52.64%) for FY 84.
- o This revision is a result of new salary data provided by the Alaska Court System.

Position Paper

HB 279

The Department strongly opposes this bill. This bill would transfer the magistrates from the PERS to the Judicial Retirement System. It would serve no apparent, useful public purpose to offset the much higher costs to the State. The rationale which has been advanced for the extraordinary benefits provided judges and justices--that they are necessary to attract and retain first-rate attorneys who would earn more money in private practice--does not appear to apply in the case of Magistrates. Magistrates are presently provided adequate coverage under the PERS.

Juneau, Alaska 99811

Dear Representative Bussell:

Re: House Bill #279
Magistrate's Retirement

I wish to thank you for introducing the subject bill on behalf of the Alaska Association of Magistrates. It is a good feeling to know that the magistrates have your support.

If you wish information from me as to why I feel magistrates should be included in the judicial retirement system, I would be more than happy to send copies of letters I have sent to individual legislators this year as well as in the past. I am hesitant to burden you with more reading material than time will permit.

Again, my appreciation for your support of this bill.

Sincerely,

Iris A. Lathrop

Senator Robert H. Ziegler, Sr.
pouch V
Juneau, Alaska 99811

Dear Senator Ziegler:

Enclosed are copies of a letter and Senate Bill 20 which were sent to each magistrate in the state. I am also enclosing copies of the information received from Alaska Court System fiscal officer Bob Fisher and Supreme Court Order No. 544 relating to magistrate salaries.

It seems the lack of enthusiasm for this bill is based on the thought that magistrates are not judges, per se, and an aversion to the administrative paperwork which would inevitably follow passage of the bill. We feel we are judges and would hazard a guess that most persons who have come before us would be of the same opinion. In support of our stand we offer the following:

Buckalew v Holloway 604 P2d 240 (1979)
Alaska Supreme Court determination that magistrates are "judges" within the meaning of Article IV, Section 4 of the Alaska Constitution.

AS 22.15.020
Number of district court judges and magistrates listed for the district court of each judicial district.

AS 22.15.100 and 22.15.110
Lists functions, powers and additional duties of district court judges and magistrates.

AS 22.15.120
Limitations on proceedings which a magistrate may hear.

AS 22.15.220(c)
Requirement that district judges and magistrates must file an affidavit monthly to receive salary.

AS 22.15.240
Appeals from magistrate judgments are handled the same as those from a district court judge judgment.

AS 22.20.010

Judicial officer defined. "The term 'judicial officer' means a supreme court justice, including the chief justice, a judge of the court of appeals, a judge of the superior court, a district court judge and a magistrate."

Criminal Rule 56(b)

Definitions. "Magistrate" includes magistrates, district court judges, superior court judges and any other judicial officer authorized by law to conduct a preliminary examination of a person accused of a crime.

Administrative Rule 21(b)

Requirement of magistrate to wear black judicial robe as do all other judges.

Administrative Rule 24(f)

Assignment of Judicial Officer. "In this rule, 'judicial officer' means a superior court judge, district court judge or magistrate."

Administrative Rule 28(b)

Judicial vacations and leave outlined for district court judges and magistrates.

AS 22.25.010(g)

Magistrates not included as "judges" under the judicial retirement system.

The last citation is the only one which excludes magistrates as judges. We feel the duties we perform are those of a district court judge with some jurisdictional limitations. We are on 24-hour call, as required by statute and rule, to perform "judicial" functions. Many of us sit as masters in superior court matters and are standing masters in children's cases.

I have copied those sections of the statutes and rules pertaining to jurisdiction, duties, etc,, and would make these available to you if you so desire.

Mr. Van Doran has agreed to supply me with a copy of the fiscal note on this bill as soon as your office receives it. I spoke with Bob Fisher yesterday and he said the fiscal note should be in Juneau by tomorrow.

Thank you for you continued support of the magistrates.

Sincerely,

Linda Hartshorn

Linda Hartshorn
Magistrate

THE SUPREME COURT OF THE STATE OF ALASKA
ORDER NO. 544

Relating to Magistrate Salaries.

IT IS ORDERED:

Supreme Court Order No. 451 is rescinded and the following is adopted as the magistrate salary schedule:

1. There are established six salary levels for magistrate posts. The base annual salary for each level is as follows:

Magistrate I	$10,161
Magistrate II	$14,335
Magistrate III	$20,430
Magistrate IV	$31,291
Magistrate V	$39,832
Magistrate VI	$46,476

Geographic cost of living adjustments shall be provided in accordance with applicable statutes.

2. Each magistrate location has been assigned to a salary level based on the number of hours which the court system expects the magistrate at that location to work in order to accomplish the estimated court workload at that location. The minimum number of hours of work required of the magistrates in each salary level are as follows:

Salary Level	Hours Per Week (annual average)
Magistrate I	15
Magistrate II	20
Magistrate III	27.5
Magistrate IV	37.5
Magistrate V	37.5
Magistrate VI	37.5

This is an annual average of the weekly work hours. Seasonal variations in workload at certain locations will require the magistrates at those locations to work longer hours during some parts of the year and shorter hours during other parts of the year.

The salaries listed in section 1. above are for the number of hours per week listed in section 2. plus 24-hour on-call availability for emergencies. These salaries also include compensation for full-time attendance at all required training courses.

3. Magistrate positions are allocated to the salary levels as follows:

Magistrate VI

Kenai Kodiak Palmer

Magistrate V

Glennallen Seward Sitka

Magistrate IV

Barrow	Haines	Tok
Bethel	Kotzebue	Unalaska
Cordova	Nenana/Healy	Wrangell
Craig	Nome	
Dillingham	Petersburg	

Magistrate III

Cold Bay	Hoonah
Ft. Yukon	Naknek
Galena	Yakutat

Magistrate II

Aniak	Selawik	Skagway
Delta Jct.	Seldovia	

Magistrate I

Angoon	Kiana	Pt. Hope	Shungnak
Emmonak	McGrath	Sand Point	Tununak
Gambell	Mekoryuk	Savoonga	Unalakleet
Hooper Bay	Mt. Village	St. Mary	Whittier
Kake	Noorvik	St. Paul Island	

4. Step increases.

A. Frequency and amount.

All magistrates are eligible for step increases of 3.5% annually for the first five years of their service. The procedure for granting step increases shall be patterned after that which applies to classified employees except that part-time magistrates will not be required to work 1,950 hours before being eligible to receive an annual raise. There will be a total of five steps of annual increases followed by longevity steps after the seventh, ninth, fourteenth and eighteenth years of continuous employment at one salary level.

If a magistrate's salary level is raised, the magistrate's salary step within the higher level will be determined by the same method used for classified employees (see Personnel Rule 6.02.03).

B. Criteria for receiving step increases.

1. Tenure - one year.
2. Written approval by presiding judge stating that the magistrate is performing adequately.
3. Passing scores on all correspondence courses required for that level in that region of the state (required by either the presiding judge or the administrative director).

4. For Magistrates I through V: written verification by the presiding judge that the following are being adequately maintained:
   a. dockets
   b. indexes
   c. library books (that is, that the Statutes, Administrative Code and Rules are kept up to date)
   d. case files and the case numbering system
   e. tape recordings of formal hearings and the binder for duplicate copies of all log notes
   f. accounting records (receipts, revenue deposits, trust deposits, trust checks and proper recording of all accounting data on the case dockets)

C. Implementation.

All magistrates who are in office on January 1, 1981 will start at Step A of their designated salary level. The anniversary date for all such magistrates will be January 16. The anniversary date of all magistrates hired or promoted after January 1, 1981 will be the 16th of the month following their date of hire or promotion.

5. Review of Classification.

All magistrate positions shall be reviewed annually by the director of personnel to assure correct classification. These reviews shall be based on statistical evaluation of duties accomplished by each magistrate. The magistrate salary at every location must be re-evaluated by the director of personnel whenever a vacancy occurs. Vacancies may not be advertised until the salary for that position has been re-evaluated and any recommended changes for reclassification of the position have been approved by the chief justice.

6. Change in Classification.

The director of personnel shall recommend to the chief justice salary increases based upon reclassification of magistrate positions after first conferring with the area court administrator and the presiding judge of the judicial district in which the magistrate is located. The director of personnel shall recommend to the chief justice that a magistrate position be refilled at a lower level upon the position becoming vacant, after first conferring with the area court administrator and presiding judge for that judicial district.

7. Compensation for part-time magistrates asked to do extra work.

If a part-time magistrate (Levels I, II and III) is asked to serve in another court location to replace another magistrate or a district court judge for a period of time, the part-time magistrate must receive compensation for the additional hours worked.

Dear Fellow Magistrates:

As most of you know, the Association of Alaska Magistrates has had a bill in the legislature the past several years to include magistrates in the Judicial Retirement System. Senator Robert Ziegler has introduced Senate Bill 20 in the thirteenth legislature on our behalf. A copy of that bill is enclosed for your information.

The contribution rate under the Judicial Retirement System (JRS) is 7% as compared to the 4.25% we currently pay under the Public Employees Retirement System (PERS). Under SB 20, to receive credit for service as a magistrate prior to July 1, 1983, the magistrate must:

1) withdraw from PERS
2) receive a refund of contributions under PERS
3) elect to receive credit for service prior to July 1, 1983, and
4) make retroactive contributions for service as a magistrate after January 3, 1959.

Retroactive contributions may be set up as a payroll deduction over a reasonable period of time.

Following is my understanding of the differences between PERS as outlined in AS 39.35 and JRS as outlined in AS 22.25:

PERS - Contribution rate is 4.25% of base salary
Benefits paid:
1) Age 55 with 5 years of service; or
2) 30 years of service; or
3) Early retirement at 50 years of age and 5 years of service with adjustment for early retirement

Computation of benefits:
2% of average monthly wage for 3 high years times years of service
PLUS COLA (if remain in Alaska) of $50.00 or 10% of the benefit, whichever is greater
PLUS medical insurance coverage

JRS - Contribution rate is 7% of base salary
Benefits paid:
1) Mandatory retirement at 70 years of age
2) Age 60 with 5 years of service
3) Early retirement at 55 years of age or 20 years of service with adjustment for early retirement

Computation of benefits:
5% for each year of service (up to 15 years or 75%) times base monthly wage paid incumbents at the time of the benefit payment
PLUS medical insurance coverage

Please read the statutes cited above for further information on the two plans.

Examples of approximate monthly retirement benefits based on 5 years of service and current base monthly salaries are:

		PERS	JRS
Magistrate I	(15 hours/week)	$ 84.60	$211.50
Magistrate II	(20 hours/week)	119.40	298.50
Magistrate III	(27.5 hours/week)	170.20	425.50
Magistrate IV	(37.5 hours/week)	260.70	651.75
Magistrate V	(37.5 hours/week)	331.90	829.75
Magistrate VI	(37.5 hours/week)	387.30	968.25

The information provided to me indicates that the average age of the magistrates is 42 years with an average length of service of 6.8? years. There are 49 positions authorized by Supreme Court Order No. 54? and they are distributed as follows:

Magistrate I	19
Magistrate II	5
Magistrate III	6
Magistrate IV	13
Magistrate V	3
Magistrate VI	3

The Senate Judiciary Committee has set up a teleconference with the magistrates at 11:30 A.M. on March 25, 1983 in Anchorage. They will hear testimony at that time from one or two magistrates but we ask that everyone attend, if possible. This was coordinated at our request and will determine if Senate Bill 20 goes from the Judiciary to the Finance Committee with a "do pass" recommendation.

We will have a meeting of the Association of Alaska Magistrates in the early part of the conference week and can discuss the issue further at that time. Please jot down any other issues you wish to discuss.

I look forward to seeing all of you at the conference. It promises to be a good experience with varied topics and beneficial discussion periods.

Sincerely,

Linda Hartshorn

Linda Hartshorn
Secretary/Treasurer
Association of Alaska Magistrates

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. To fund this bill, the state cost would be 65.82% of the FY 84 covered payroll for magistrates.

2. Estimate the FY 84 covered payroll of magistrates to be $1,187,720.

3. Estimate 46 magistrates with an average of 6.5 years service per member would be affected.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. This bill would reduce the state cost to PERS by 13.18% of covered payroll for magistrates.

2. Estimate the FY 84 covered payroll of magistrates to be $1,187,720.

HB 84 TAPE 16 - SIDE 1

SENATE JUDICIARY COMMITTEE

Meeting Minutes
March 25, 1983

The meeting was called to order at 1:30 p.m. by Senator Ray, Chairman. All members were present except Senator Josephson, who was excused.

The first order of business was Senate Bill 20--An Act authorizing participation by magistrates in judicial retirement system--as to which Senator Ray acknowledged the presence of House Judiciary Committee Chairman Bussell and Representatives Liska and Malone, along with the staff of other members of the House Judiciary Committee.

Senator Ray turned the scheduled teleconference with Anchorage over to subcommittee chairman Ziegler.

By teleconference from Anchorage, Sheldon Sprecker, a magistrate in Glenallen and president of the Magistrates' Association, testified in favor of the bill and stated that about 30 magistrates and district court judges were present in Anchorage to listen to and participate in the teleconference. Mr. Sprecker also emphasized that magistrates are judges under a number of relevant criteria, including the recent Holloway decision.

By teleconference from Anchorage, Linda Hartshorn, a magistrate in Wrangell, testified in favor of the bill. Senator Ray asked Ms.Hartshorn some questions, to which she responded and discussion was had.

By teleconference from Anchorage, Steven Cline, a District Court Judge in Fairbanks, testified in favor of the bill pointing out that he has been a magistrate training judge for approximately five years and that the functions and duties of magistrates are essentially similar to those of judges and involve extreme hardships,such as having social activities restricted and being exposed to harsh, sometimes dangerous, working and living conditions. Senator Ray asked Judge Cline a question, to which the Judge responded and discussion was had, whereupon Representative Bussell asked the witness a question, to which the Judge responded and discussion was had. Judge Cline also stated that Fairbanks District Court Judge Cruchfield was present and was fully in favor of the bill.

From Juneau, Lee Paulson of the A.P.E.A., testified in opposition to the bill and stated that his organization's views were shared by a teachers' union, the N.E.A. As the main reasons for opposing it, Mr. Paulson emphasized the high cost of the bill in reference to the limited number of people benefiting therefrom; the fact that funds are desperately needed for cost of living adjustments to senior citizens' benefits; and that under existing law magistrates are not required to be attorneys or

have any other type of special training. Representative Bussell asked a question, to which Mr. Paulson responded and discussion was had, whereupon, by teleconference from Anchorage, Sheldon Sprecker responded to and pointed out several "inaccurate points" in Mr. Paulson's prior testimony. Furthermore, Magistrate Sprecker stated that he feels the fiscal note amount of approximately $650,000.00 is a reasonable figure and, as an example of the terrible hardships magistrates have to endure, Magistrate Sprecker pointed out that he recently had to handle the identification and physical carrying of the bodies of the victims of the McCarthy killings.

Senator Ray asked a question about whether or not, and how much, Magistrate Sprecker was paid for carrying out his duties in McCarthy, to which a response was made.

From Juneau, Ken Humphreys, Director of the Division of Retirement and Benefits, testified in response to questions posed by Senator Ray. Mr. Humphreys verified and explained the accuracy of the fiscal note figures, whereupon Senator Eliason asked a question about magistrates receiving a retirement credit for military service, to which Mr. Humphreys stated that as PERS employees magistrates should receive such credit and any assertion to the contrary must be in error. Senator Eliason also asked whether the same reasons for enacting generous judiciary retirement benefits apply to retirement benefits for magistrates. Mr. Humphreys responded by stating that, from the employer's standpoint, the basic rationale of retaining qualified people doesn't seem to apply to magistrates.

Representative Malone asked a question about the current PERS cost figures in the fiscal note, to which Mr. Humphreys responded and discussion was had, whereupon Senator Ray asked a question regarding the same subject, to which Mr. Humphreys also responded and discussion was also had.

Senator Eliason asked Senator Ziegler about how other states handled this type of problem, and Senator Ziegler responded, whereupon the teleconference was terminated. Chairman Bussell and the other House Judiciary Committee members and staff then left the meeting.

The second order of business was new sub-committee assignments as follows:

SB 147	Relating to safeguarding self-identity and address of motor vehicle operators involved in accidents	Josephson
SB 208	Extending the termination date of the Alcoholic Beverage Control Board	Ray

The third order of business was the following announcements:

By Senator Ray: The Committee meeting on April 4, 1983 will start at 1:00 p.m.;

By Senator Pettyjohn: leave to take up SJR 19 at the Committee hearing on April 8, 1983 was requested and granted.

There being no further business the meeting adjourned at 2:14 p.m.

7/0404-16-4/HDGSF1

POSITION PAPER
HOUSE BILL 281

If this bill is passed, employers who fail to pay employees' wages within three working days of termination may be penalized an amount up to 90 working days of the employee's wages. It would also expressly provide that where wages are in dispute, the employee will be notified of the undisputed part and paid that amount timely.

An express retention by the employee of all remedies to which the employee might otherwise be entitled under Chapters 5 and 10 of Title 23 has been added. Finally, a housekeeping section provides that terms used in AS 23.10.050 to 23.10.150 which are not defined in Title 23 shall be defined consistent with the federal Fair Labor Standards Act, as amended.

We are neutral with respect to passage of this bill. The statutes being amended do not apply to the State, as an employer, so this bill would not affect the Department of Administration.

BILL SHEFFIELD
GOVERNOR

HB 211

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 18, 1983

The Ho[illegible]le Joe L. Hayes
Speak[illegible]e House
Alas[illegible] Legislature
Pouc[illegible]
June[illegible]ska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the payment of wages. This bill would make discretionary the imposition of the wage claim penalty under AS 23.05.140(d) against an employer who fails to pay wages to an employee within three days of the date of termination. In addition, the bill would strengthen the protection given an employee who has been offered a partial payment of a wage claim on the condition that he release the employer from paying the entire amount of wages claimed. The bill would void such a release which is given contingent on part payment of the wage claim.

The final provision of the bill would limit the application of the definitions in the federal Fair Labor Standards Act, 29 U.S.C. 203, to only those terms used in the Alaska Wage and Hour Act which are not defined by state law or regulation.

Sincerely,

Bill Sheffield
Governor

EXAMPLES OF NON-SERIOUS VIOLATIONS

1. Failure to adopt and post in a conspicuous location at each jobsite office, a code of safe practices and procedures which applies to the firm's operation and embraces applicable safety and health standards.

2. Failure to provide a first aid kit readily available to employees at the worksite, and/or in every vehicle used to transport employees.

3. Failure to provide in the absence of an infirmary, clinic, hospital, or physician which is reasonably accessible in terms of time and distance to the worksite, and is available for the treatment of injured employees, a person who has a valid certificate in first-aid training from the U.S. Bureau of Mines, the American Red Cross, or equivalent training that can be verified by documentary evidence, shall be available at the worksite to render first aid.

4. Failure to conspicuously post the telephone numbers of physicians, hospitals, or ambulances.

5. Failure to assure that in indoor storage areas, oil soaked rags, paint saturated clothing, waste, excelsior and combustible refuse are deposited in noncombustible covered receptacles.

6. Failure to prohibit smoking in indoor general storage areas, except in locations prominently designated as smoking areas; and/or to post "No Smoking" signs in prohibited areas.

7. Failure to keep all places of employment in a clean, orderly and sanitary condition.

8. Failure to assure that portable fire extinguishers are not obstructed or obscured from view; or where visual obstruction cannot be completely avoided, that the location and intended use of extinguishers are conspicuously indicated.

9. Failure to assure that any receptacle used for decayable solid or liquid waste or refuse is so constructed that it does not leak and may be thoroughly cleaned and maintained in a sanitary condition.

10. Failure to provide individual hand towels or sections thereof, of cloth or paper, warm air blowers or clean individual sections of continuous cloth toweling convenient to the lavatories.

3/3/83

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 18, 1983

The Honorable Joe L. Hayes
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to notices for occupational safety and health violations.

This bill would allow the Department of Labor to issue a notice, rather than a citation, to an employer for an occupational health and safety violation which is not serious, if the employer agrees to remedy the violation within a reasonable time. If the employer fails to remedy the violation, then a citation is issued in accordance with the procedures for serious violations.

The bill would accomplish several things. It would free occupational safety and health compliance officers from cumbersome administrative responsibilities which attend the issuance of citations, and thereby allow them to devote more time to inspections, while also saving clerical time. (Currently, inspectors can only inspect approximately eight percent of the state's work sites a year). The bill would also promote speedier correction of hazards, since much of the paperwork that must flow between employer and agency in the citation-issuance process would be eliminated. The department strongly urges passage of this bill, and it has the support of unions and employer organizations as well.

Sincerely,

Bill Sheffield
Governor

RE: [redacted]

Dear Representative Ward:

I am responding to your March 25 letter with reference to the above-captioned legislation.

The issue of the office's jurisdiction over the Alaska Bar Association traces back to two complaints, A79-0641 and A79-0642, filed against the association in June, 1979. The two complaints were generally directed against the association's grievance procedures and charged financial and other irregularities involving members of the board of governors and employees of the association.

The matters involved my predecessor, Frank Flavin, so I do not have direct understanding of past events to guide my response. I am advised that the bar association refused access of the ombudsman's office to certain files essential to the conduct of the investigation. The ombudsman sought enforcement of the subpoena in the superior court. Judge Moody denied the relief requested because Mr. Flavin was a member of the association and had access to the records independently of his official position. The argument whether the association was or was not subject to the ombudsman's jurisdiction was not resolved.

Some effort was made to address the issue in conjunction with a 1980 "sunset review" of the association by the Alaska Legislature. In 1980, the Legislature apparently concluded that the bar association should terminate, with a delayed date of one year (i.e. a lapse date of June 30, 1981). Because of action to terminate the association, the then-pending ombudsman's complaints were discretionarily discontinued in mid-1980.

In 1981, legislation was offered that continued the existence of the Alaska Bar Association. At least one early version of that

legislation specifically stated that the association was to be regarded as a state agency subject to the ombudsman's jurisdiction. The final version, Ch. 52, SLA 1981, omitted any mention of the matter. As regards the issue of jurisdiction, the law has not been amended to provide clearly, one way or the other, on the matter of jurisdiction.

Complaints against the bar association are not numerous. The office received nine in 1979 (all discretionarily discontinued in light of the disposition of the litigation and the then-pending sunset termination), six in 1980, three in 1981, five in 1982, and none to date in 1983. None has culminated in an investigation.

I do not understand the association to have changed its position that it is not subject to the office's jurisdiction. Staff in my offices have cautioned persons who call an ombudsman's office with complaints against the bar association that, until the issue of jurisdiction is decided, action on the merits or substance of the complaint will be delayed. With that explanation, most realize that our chances of completing an investigation or providing assistance in a matter involving the bar association lay somewhere between "slim" and "none".

Since my appointment to this office, I have not pursued clarification of this matter through Opinion of the Attorney General, litigation, or legislation.

The matter deserves clarification by legislation. Please understand that I am not committed to making the association subject to our jurisdiction. The legislature could as well conclude that the association was not subject to our jurisdiction. I have enough "business" from complainants dissatisfied with agencies, boards, commissions and other entities for which there is no jurisdictional challenge. As a management philosophy, I am inclined to assert jurisdiction in instances where a complaint is received and a question of jurisdiction raised, until I am advised or otherwise conclude that jurisdiction to examine an act or decision of the agency is lacking.

The question to be considered in this instance, to my mind, is whether there is an existing remedy by which alleged errors or misconduct by the bar association may be systematically reviewed. If the legislature identifies an alternative, the jurisdiction of this office need not include the bar association; if the legislature's inquiry discloses no such review mechanism, does the legislature wish to commit that responsibility to the office of the ombudsman as a matter of law. Your legislation initiates a dialogue on the issue.

I am reminded that Bart Rozell, a partner in the Juneau firm of Faulkner, Banfield -- a past president of the state bar association -- may have familiarity with the litigation I describe and with the previous recent efforts to resolve the matter through legislation. May I respectfully suggest that you contact him.

Thank you for the opportunity to comment.

Sincerely,

John B. Chenoweth
Ombudsman

Juneau, AK 99811

Dear Mr. Chenoweth:

In the Annual Report to the Office of the Ombudsman for 1981-1982, in your review of the Court System you describe the jurisdiction of your office. On page 103 of that report it is stated, "Investigation of grievances concerning the Alaska Bar Association, whose membership comprises attorneys admitted to practice in the State's courts, remains unresolved."

Please advise me of the background of this issue. Have grievances been filed against the Association? Has any formal ruling been requested as to your jurisdiction? What would be the recommendation of your office for clarifying this area?

Yours very truly,

Jerry Ward

Jerry Ward
State Representative

Court System

The State's judicial system consists of the Alaska Supreme Court, the court of appeals, superior court, and district court. Final appellate jurisdiction is assigned by the Alaska constitution to the state supreme court. Appellate jurisdiction in specified proceedings is granted by statute to the three-judge court of appeals. The superior and district courts have a jurisdiction over a wide range of civil and criminal matters. The superior court has jurisdiction on appeals of agency decisions when appeal is provided by law. The judicial system in rural areas and in urban communities is anchored by magistrates holding office under appointment of a presiding judge of the superior court.

The ombudsman may not investigate the act or decision of a justice, judge, or magistrate, nor may he inquire into the substantive content of a judicial order, decision, or opinion. Subordinate agencies of the judicial system—the court administrative system, clerical support staff, the Judicial Council, and the Council on Judicial Qualifications—can be investigated by the ombudsman. Investigation of grievances concerning the Alaska Bar Association, whose membership comprises attorneys admitted to practice in the State's courts, remains unresolved.

COMPENSATION FOR JUROR SERVICES [J82-0082]. The complainant, a member of the jury in *State v. Hohman*, asserted that the court system had not properly computed and compensated the members of that jury for their services. Investigation disclosed that conduct of the trial generally began in the early afternoon hours and usually concluded for the day after 5:00 p.m. and, often, close to 6:00 p.m. The jurors were not advised in advance that the jury fee payable would be computed based only on one-half day's service and without reference to the portion of daily jury service that exceeded four hours. The initial determination was made with reference to court rule that recognized service based only on full- and half-day service without reference to jury service extending beyond normal hours of court. The ombudsman suggested that additional compensation was due the jurors and recommended com-

Alaska Ombudsman Statutes

Sec. 24.55.010. OFFICE OF THE OMBUDSMAN. There is created in the legislative branch of the state the office of the ombudsman.

Sec. 24.55.020. APPOINTMENT OF THE OMBUDSMAN. (a) A candidate for appointment as the ombudsman shall be nominated by the ombudsman selection committee composed of three members of the senate appointed by the president of the senate and three members of the house of representatives appointed by the speaker of the house. One member of the minority party caucus in each house shall be appointed to the selection committee.

(b) The ombudsman selection committee shall examine persons to serve as ombudsman regarding their qualifications and ability and shall place the name of the person selected in nomination. The appointment is effective if the nomination is approved by a roll call vote of two-thirds of the members of the legislature in joint session and approved by the governor. However, the governor may veto the appointment and return it, with a statement of his objections, to the legislature. Upon receipt of a veto message the legislature shall meet immediately in joint session and reconsider approval of the vetoed appointment. The vetoed appointment becomes effective by an affirmative vote of two-thirds of the membership of the legislature in joint session. The vote on the appointment and on reconsideration of a vetoed appointment shall be entered in the journals of both houses.

(c) The appointment of the ombudsman becomes effective if, while the legislature is in session, the governor neither approves nor vetoes it within 15 days, Sundays excepted, after its delivery to him. If the legislature is not in session and the governor neither approves nor vetoes the appointment within 20 days, Sundays excepted, after its delivery to him, the appointment becomes effective.

Sec. 24.55.030. QUALIFICATIONS; PROHIBITION AGAINST POLITICAL ACTIVITY. (a) No person may serve as ombudsman

(1) within one year of the last day on which he served as a member of the legislature;
(2) while he is a candidate for or holds any other national, state, or municipal office; nor may the ombudsman become a candidate for national, state or municipal office until one year has elapsed from the date he vacates the office of ombudsman;
(3) while he is engaged in any other occupation for which he receives compensation;
(4) unless he is at least 21 years of age and is a qualified voter who has been a resident of the state for at least three years.

(b) It is essential that the nonpartisan nature, integrity and impartiality of the ombudsman's functions and services be maintained. The ombudsman and members of his staff may not join, support or otherwise participate in a partisan political organization, faction or activity, including but not limited to the making of political contributions. However, this subsection does not restrict the ombudsman or members of his staff from expressing private opinion, registering as to party, or voting.

Sec. 24.55.040. TERM OF OFFICE. (a) The term of office of the ombudsman is five years. An ombudsman may be reappointed but may not serve for more than three terms.

(b) If the term of an ombudsman expires without the appointment of a successor under this chapter, the incumbent ombudsman may continue in office until a successor is appointed. If the ombudsman dies, resigns, becomes ineligible to serve, or is removed or suspended from office, the deputy ombudsman becomes acting ombudsman until a new ombudsman is appointed for a full term.

Sec. 24.55.050. REMOVAL. The legislature, by a concurrent resolution adopted by a roll call vote of two-thirds of the members in each house entered in the journal, may remove or suspend the ombudsman from office, but only for neglect of duty, misconduct, or disability.

Sec. 24.55.060. COMPENSATION. The ombudsman is entitled to receive an annual salary equal to that of a superior court judge.

Sec. 24.55.070. STAFF AND DELEGATION. (a) The ombudsman may appoint a deputy ombudsman; he shall also appoint assistants and clerical personnel necessary to carry out the provisions of this chapter.

(b) The ombudsman may delegate to his deputy or assistants any of his duties except those specified in secs. 190-200 of this chapter; however, during the ombudsman's absence from his principal business offices, the ombudsman may delegate the duties specified in secs. 190-200 of this chapter to his deputy for the duration of his absence. Those duties specified in secs. 190-200 of this chapter shall be performed by the deputy ombudsman when he is serving as acting ombudsman under sec. 40(b) of this chapter.

(c) The ombudsman and the staff appointed by him are in the exempt service under AS 39.25.110.

Sec. 24.55.080. OFFICE FACILITIES AND ADMINISTRATION. (a) The Alaska Legislative Council shall provide suitable office space and equipment for the ombudsman and his staff.

(b) The salary and benefits of the ombudsman and his permanent staff shall be paid through the same procedures used for payment of the salaries and benefits of other permanent legislative employees.

(c) The ombudsman shall submit a budget for each fiscal year to the finance committees of the legislature and shall annually submit an estimated budget to the governor for information purposes in the preparation of the executive budget.

Sec. 24.55.090. PROCEDURE. The ombudsman shall, by regulations adopted under the Administrative Procedure Act (AS 44.62), establish procedures for receiving and processing complaints, conducting investigations, and reporting his findings. However, he may not charge fees for the submission or investigation of complaints.

Sec. 24.55.100. JURISDICTION. (a) The ombudsman has jurisdiction to investigate the administrative acts of agencies.

(b) The ombudsman may exercise his powers without regard to the finality of an administrative act.

Sec. 24.55.110. INVESTIGATION OF COMPLAINTS. The ombudsman shall investigate any complaint which is an appropriate subject for investigation under sec. 150 of this chapter, unless he reasonably believes that

(1) there is presently available an adequate remedy for the grievance stated in the complaint;
(2) the complaint relates to a matter that is outside the jurisdiction of the ombudsman;
(3) the complaint relates to an administrative act of which the complainant has had knowledge for an unreasonable length of time before the complaint was submitted;
(4) the complainant does not have a sufficient personal interest in the subject matter of the complaint;
(5) the complaint is trivial or made in bad faith;
(6) the resources of the ombudsman's office are insufficient for adequate investigation.

Sec. 24.55.120. INVESTIGATION ON THE OMBUDSMAN'S MOTION. The ombudsman may investigate the administrative act of an agency on his own motion if he reasonably believes that it is an appropriate subject for investigation under sec. 150 of this chapter.

Sec. 24.55.130. NOTICE TO COMPLAINANT. (a) If the ombudsman decides not to investigate a complaint, he shall inform the complainant of that decision and shall state his reasons.

(b) If the ombudsman decides to investigate a complaint, he shall notify the complainant of his decision.

Sec. 24.55.140. NOTICE TO THE AGENCY. If the ombudsman decides to investigate a complaint, he shall notify the agency of his intention to investigate unless he believes that advance notice will unduly hinder the investigation or make it ineffectual.

Sec. 24.55.150. APPROPRIATE SUBJECTS FOR INVESTIGATION. (a) An appropriate subject for investigation by the ombudsman is an administrative act of an agency which the ombudsman has reason to believe might be

(1) contrary to law;
(2) unreasonable, unfair, oppressive, arbitrary, capricious, an abuse of discretion, or unnecessarily

(4) based on improper or irrelevant grounds;
(5) unsupported by an adequate statement of reasons;
(6) performed in an inefficient or discourteous manner; or
(7) otherwise erroneous.

(b) The ombudsman may investigate to find an appropriate remedy.

Sec. 24.55.160. INVESTIGATION PROCEDURES. (a) In an investigation, the ombudsman may

(1) make inquiries and obtain information as he considers necessary;
(2) enter without notice to inspect the premises of an agency, but only when agency personnel are present; and
(3) hold private hearings.

(b) The ombudsman shall maintain confidentiality with respect to all matters and the identities of the complainants or witnesses coming before him except insofar as disclosures may be necessary to enable him to carry out his duties and to support his recommendations.

Sec. 24.55.170. POWERS. (a) Subject to the privileges which witnesses have in the courts of this state, the ombudsman may

(1) compel by subpoena, at a specified time and place, the appearance and sworn testimony of a person who the ombudsman reasonably believes may be able to give information relating to a matter under investigation; and
(2) compel a person, by subpoena, to produce documents, papers, or objects which the ombudsman reasonably believes may relate to the matter under investigation.

(b) If a person refuses to comply with a subpoena issued under (a) of this section, the superior court may, on application of the ombudsman, compel obedience by proceedings for contempt in the same manner as in the case of disobedience to the requirements of a subpoena issued by the court or refusal to testify in the court.

Sec. 24.55.180. CONSULTATION WITH AGENCY. Before giving an opinion or recommendation which is critical of an agency or person, the ombudsman shall consult with that agency or person.

Sec. 24.55.190. PROCEDURE AFTER INVESTIGATION. (a) The ombudsman shall report his opinion and recommendations to an agency if he finds, after investigation, that

(1) a matter should be further considered by the agency;
(2) an administrative act should be modified or cancelled;
(3) a statute or regulation on which an administrative act is based should be altered;
(4) reasons should be given for an administrative act;
(5) any other action should be taken by the agency;
(6) there are no grounds for action by the agency; or
(7) the agency's act was arbitrary or capricious, constituted an abuse of discretion, or was otherwise erroneous or not in accordance with the law.

(b) The ombudsman may request the agency to notify him, within a specified time, of any action taken on his recommendations.

Sec. 24.55.200. PUBLICATION OF RECOMMENDATIONS. Within a reasonable amount of time after the ombudsman reports his opinion and recommendations to an agency he may present his opinion and recommendations to the governor, the legislature, a grand jury, the public or any of these. The ombudsman shall include with his opinion any reply made by the agency.

Sec. 24.55.210. NOTICE TO THE COMPLAINANT. After a reasonable time has elapsed, the ombudsman shall notify the complainant of the actions taken by him and by the agency.

Sec. 24.55.220. MISCONDUCT BY AGENCY PERSONNEL. If the ombudsman believes there is a breach of duty or misconduct by an officer or employee of an agency in the conduct of his official duties, the ombudsman shall refer the matter to the chief executive officer of the agency or, when appropriate, to the grand jury or to another appropriate official or agency.

Sec. 24.55.230. **ANNUAL REPORT.** The ombudsman shall submit to the legislature and the public an annual report of his activities under this chapter.

Sec. 24.55.240. **JUDICIAL REVIEW.** A proceeding or decision of the ombudsman may be reviewed in superior court only to determine if it is contrary to the provisions of this chapter.

Sec. 24.55.250. **IMMUNITY OF THE OMBUDSMAN.** No civil action may be brought against the ombudsman or a member of his staff for anything done, said or omitted in performing his duties or responsibilities under this chapter.

Sec. 24.55.260. **OMBUDSMAN'S PRIVILEGE NOT TO TESTIFY.** The ombudsman and his staff may not testify in a court regarding matters coming to their attention in the exercise or purported exercise of their official duties except as may be necessary to enforce the provisions of this chapter.

Sec. 24.55.270. **LETTERS TO OR FROM OMBUDSMAN.** A letter to the ombudsman from a person held in custody by an agency shall be forwarded immediately, unopened, to the ombudsman. A letter from the ombudsman to a person held in custody by an agency shall be delivered immediately, unopened, to the person.

Sec. 24.55.275. **CONTRACT PROCEDURES.** The ombudsman shall adopt by regulation procedures consistent with AS 24.23 to be followed by the office of the ombudsman in contracting for services. However, the procedure for requests for proposals does not apply to contracts for investigations under AS 24.55.100.

Sec. 24.55.280. **TIME FOR JUDICIAL REVIEW OF AGENCY ACTION.** This chapter in no way extends the time limit in which judicial review of agency action must be sought.

Sec. 24.55.290. **PENALTY.** A person who wilfully hinders the lawful actions of the ombudsman or his staff, or who wilfully refuses to comply with their lawful demands, or who wilfully violates sec. 270 of this chapter, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $1,000.

Sec. 24.55.300. **ADMINISTRATIVE PROCEDURE ACT.** The administrative acts of the ombudsman are not subject to the provisions of the Administrative Procedure Act (AS 44.62) except as provided in sec. 90 of this chapter.

Sec. 24.55.310. **CONFLICT OF INTEREST.** The ombudsman, the deputy ombudsman and their professional staff are subject to AS 39.50 (conflict of interest).

Sec. 24.55.320. **MUNICIPALITIES.** A municipality may by ordinance elect to become subject to the jurisdiction of the ombudsman appointed under this chapter. If a municipality so elects, it shall notify the ombudsman of that election and shall thereafter be considered an agency for the purposes of this chapter. If a municipality subjects itself to the jurisdiction of the ombudsman, the municipality shall pay its pro rata share of the cost of the operation of the office of the ombudsman based on the number of complaints or the case load emanating from that municipality, as prescribed by the ombudsman. If a municipality elects to remove itself from the jurisdiction of the ombudsman, it shall do so by ordinance, shall notify the ombudsman of that election and shall not thereafter be considered an agency for the purposes of this chapter.

Sec. 24.55.330. **DEFINITIONS.** In AS 24.55.010 - 24.55.340

(1) "administrative act" means an action, omission, decision, recommendation, practice, policy, or procedure of an agency, but does not include the preparation or presentation of legislation or the substantive content of a judicial order, decision or opinion;

(2) "agency" includes a department, office, institution, corporation, authority, organization, commission, committee, council or board of a municipality or in the executive, legislative or judicial branches of the state government, and a department, office, institution, corporation, authority, organization, commission, committee, council or board of a municipality or of the state government independent of the executive, legislative and judicial branches; it also includes an officer, employee or member of an "agency" acting or purporting to act in the exercise of his official duties, but does not include the governor, lieutenant governor, a member of the legislature, justice of the supreme court, judge of the court of appeals, a superior court judge, district court judge, magistrate, member of a city council or borough assembly, elected city or borough mayor, or a member of an elected school board;

(3) "municipality" means a home rule or general law borough or city including but not limited to a unified municipality organized under AS 29.68.010 - 29.68.580.

Sec. 24.55.340. **SHORT TITLE.** This chapter may be cited as The Ombudsman Act.

Any proceeding on such act

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K-STATE CAPITOL
JUNEAU, ALASKA 99811

April 26, 1982

Honorable Bettye Fahrenkamp
Chairwoman, Senate Resources Committee
Alaska State Senate
Twelfth Legislature
Pouch V
Juneau, Alaska 99811

Re: SB 835 (National Petroleum Reserve-Alaska Trust Fund). Our File No. 366-619-82

Dear Senator Fahrenkamp:

SB 835, which would establish a trust fund account for revenues the state receives from the federal government from federal oil and gas leasing in the National Petroleum Reserve-Alaska, presents a number of serious legal questions in its current form.

The first question is raised under Article IX, Section 7 of the Alaska Constitution, which provides in pertinent part: "The proceeds of any state tax or license shall not be dedicated to any special purpose, except as provided in Section 15 of this article or when required by the federal government for state participation in federal programs." The Department of Law and the Legislative Counsel have disagreed over the reach of this prohibition. Our department has construed the prohibition broadly to apply to all "public revenues" (e.g., taxes, license fees, revenues from the sale or disposition of natural resources, etc.); the Legislative Counsel has interpreted it narrowly as reaching only tax and license revenues. On April 23, 1982, the Alaska Supreme Court adopted the Department of Law's broader interpretation in State v. Alex, ___ P.2d ___, Op. No. 2488 (Alaska, April 23, 1982). See Slip Op. at p. 20. As a result, we believe the revenues which the bill addresses -- i.e., those that the state would receive from the federal government as the result of federal oil and gas leasing in NPR-A -- are subject to the prohibition.

However, there is an exception to the dedicated fund prohibition "when required by the federal government for state participation in federal programs." The pertinent portion of

P.L. 96-514, 94 Stat. 2964, which directs payment of the money to the state, attaches certain conditions to the state's receipt of that money: The state may use it "for (a) planning, (b) construction, maintenance, and operation of essential public facilities, and (c) other necessary provisions of public service: Provided further, That in the allocation of such funds, the State shall give priority to use by subdivisions of the State most directly or severely impacted by development of oil and gas leased under this Act." In other words, the funds received from the federal government must be dedicated to planning, construction, maintenance, and operation of essential public facilities, and other necessary provisions of public service. In addition, impacted political subdivisions must be given priority in the allocation of the funds.

We believe the establishment of a trust fund into which all the federal revenues are placed immediately upon receipt from the federal government is both permissible under Article IX, Section 7 of the Alaska Constitution and desirable in that it will ease the administrative task of demonstrating to the federal government that the funds received have been expended for the purposes and in the manner required by the federal Act. However, it also is our opinion that the explicit provisions of the law establishing the trust fund cannot impose conditions on the use of the money which exceed those "required by the federal government for state participation" in the federal program -- i.e., those in the federal Act. Since it is only the federal conditions which except the funds from the general dedicated fund prohibition, we believe the only conditions which may be attached to the funds are those required by the federal Act.

As a result, we believe the directive in Section 2(c) of SB 835 to pay a minimum of 50 percent of amounts in the fund to the North Slope Borough violates the dedicated fund prohibition because the federal Act does not require it for state participation. In addition, the directive in Section 2(d) that remaining amounts in the fund may be spent only "in conjunction with the exploration of the National Petroleum Reserve in Alaska and a program of competitive leasing of oil and gas from that reserve" also violates the prohibition, again because the federal Act does not require it. The federal Act simply does not impose these restrictions on the use of the funds received by the state.

Another question raised by SB 835 stems from Article II, Section 19 of the Alaska Constitution, which provides in pertinent part: "The legislature shall pass no local or special act if a general act can be made applicable." The problem here is that SB 835 specifically names the North Slope Borough as a recipient of amounts from the fund established. However, nothing in the federal Act requires that the North Slope be named, and it is obvious that a general act can be made applicable and satisfy the terms of the federal Act simply by "giv[ing] priority to use by subdivisions of the State most directly or severely impacted by development of oil and gas leased under this Act." That is the language of the federal Act, so using that language would satisfy that condition of the federal Act. It is language of general applicability to all subdivisions which might be impacted by NPR-A development, and therefore would be a general (not local or special) act within the meaning of the Alaska Constitution. (We also would point out that the North Slope Borough may not be the only political subdivision impacted by oil and gas leasing in NPR-A. In the reserve, Barrow is a first class city and Wainwright and Nuiqsuit are second class cities. Moreover, development in NPR-A may have an impact on other political subdivisions along the pipeline corridor or, it is conceivable, any other route chosen to transport the oil and gas produced -- i.e., Nome, etc. This potential impact on other political subdivisions demonstrates the advisability of couching the bill in terms of a general act, not a local or special act directed only to the North Slope Borough.)

Another problem stems from Article II, Section 13 of the Alaska Constitution, which provides in pertinent part: "Bills for appropriations shall be confined to appropriations." The problem in SB 835 is the Section 2(c) directive to pay money to the affected subdivisions (in the bill's current form, only the North Slope Borough). Specifically, Section 2(d) describes that directive as an appropriation. If it is an appropriation, it is an appropriation in a general act and not in a bill confined to appropriations as required by the Constitution. This conclusion is reinforced by the provision in Section 2(d) that amounts remaining in the fund after the payment to the subdivisions cannot be expended without appropriation by the legislature. To avoid this problem, the bill could be amended simply to require appropriation by the legislature prior any expenditure of funds in the trust account, giving the legislature discretion to appropriate funds to impacted subdivisions or for other purposes permitted under the federal Act.

Following my testimony on SB 835 at the Senate Resources Committee meeting on April 23, 1982, I met with Tom Smythe and Robert DuPere, representing the North Slope Borough, and Rena King of the Committee staff. We seemed to reach general agreement that some minor modifications to the bill would satisfy the constitutional concerns while remaining true to the basic thrust of the proposed bill. My notes indicate that the following changes were contemplated:

1. Page 1, lines 12-15 should be amended to read (material to be deleted is capitalized and in brackets; new material is underlined): "(1) The United States Congress, by P.L. 96-514 (94 Stat. 2964, December 12, 1980), [APPROPRIATED $107,001,000 FOR A PROGRAM OF] provided that the state shall receive 50 percent of receipts derived from competitive leasing of oil and gas in the National Petroleum Reserve in Alaska;" This change would eliminate any confusion regarding the $107,001,000 federal appropriation which is for administration of the leasing program, not an appropriation to the state. The state will only receive money under the federal Act after the program begins generating lease revenues.

2. Page 1, lines 24-26 should be amended to read: "The fund shall consist of funds [APPROPRIATED TO IT BY THE LEGISLATURE EQUAL TO THE AMOUNT OF FUNDS] received by the state from the federal government under P.L. 96-514." This would establish the constitutionally-permissible dedicated fund.

3. Subsection (c) of Section 2, which begins on page 1, line 29, and continues to page 2, line 4, should be deleted in its entirety and replaced with the following:

> (c) The commissioner of revenue shall pay to the subdivisions of the state most directly or severely impacted by development of oil and gas leased under the federal Act the amount appropriated by the legislature from the fund for that purpose. It is the intent of the legislature that the amount appropriated for payment to the subdivisions equal 50 percent of the amount received from the federal government under the federal Act, and that this percentage be reviewed every five years following passage of this Act.

This would indicate the legislative intent of sharing the revenues with impacted political subdivisions without violating the dedicated fund prohibition by imposing conditions beyond those required by the federal Act. It also avoids the local and special legislation problem, as well as the problem regarding an appropriation in a bill not confined to appropriations.

4. Page 2, lines 5-10 should be amended to read: "(d) Amounts received by the state under (a) of this section [WHICH ARE NOT APPROPRIATED IN ACCORDANCE WITH (c) OF THIS SECTION] shall be used by the state, subject to appropriation by law, for the following activities and services [IN CONJUNCTION WITH THE EXPLORATION OF THE NATIONAL PETROLEUM RESERVE IN ALASKA AND A PROGRAM OF COMPETITIVE LEASING OF OIL AND GAS FROM THAT RESERVE]:" This avoids any dedicated funds problem by eliminating those conditions which exceed those required by the federal Act.

5. Subsection (e) of Section 2, appearing on page 2, lines 15-20, should be deleted in its entirety.

6. Subsection (f), beginning on page 2, line 21, and ending on page 3, line 1, should be amended to read:

> "(f) amounts paid to [THE NORTH SLOPE BOROUGH] subdivisions under (c) of this section shall be used by the [NORTH SLOPE BOROUGH] subdivisions only for the following activities and services in conjunction with [THE EXPLORATION] development on the National Petroleum Reserve in Alaska and a program of competitive leasing of oil and gas from that reserve:
>
> "(1) planning;
>
> "(2) construction, maintenance, and operation of essential public facilities by the [NORTH SLOPE BOROUGH] subdivisions; and
>
> "(3) other necessary public services provided by the [NORTH SLOPE BOROUGH] subdivisions."

This change is necessary to avoid the local and special legislation problem.

In addition, it was suggested that a committee letter of intent be drafted to the effect that, at the present time, the North Slope Borough is the only political subdivision of the state which will be most directly or severely impacted by oil and gas leasing in NPR-A.

I believe these comments accurately reflect the concensus of our work group. However, the other individuals present may have some further suggestions for change.

Finally, I must indicate that these comments are not intended to represent the Administration's policy position on this bill. Rather, they are provided in the nature of a drafting service to overcome the constitutional and other legal problems which we believe are presented by the bill in its current form. If we can be of further assistance in this regard, please contact us at your earliest convenience.

Sincerely,

WILSON L. CONDON
ATTORNEY GENERAL

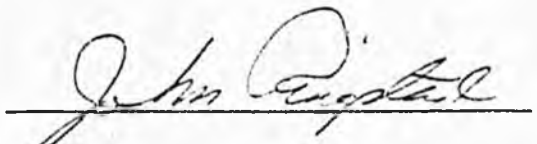
LETTER OF INTENT
TO ACCOMPANY
CSHB 298 (Resources)

It is the intent of the Legislature that the Department of Revenue rely on the following analysis of Committee Substitute for House Bill 298 (Resources) and P.L. 96-514, Title 1, Sec. 100 when administering this Act. In particular, it is the intent of the Legislature that the Department determine if a subdivision is "most directly or severely impacted" by oil and gas development in the National Petroleum Reserve - Alaska for purposes of Sec. 2(c) of this Act in a manner consistent with the analysis of such impacted communities provided in this letter of intent.

CSHB 298 (Res) implements the revenue-sharing provisions of P.L. 96-514, Title 1, Sec. 100 (1380) dealing with the Interior Department's oil and gas leasing program in the National Petroleum Reserve - Alaska. This leasing and revenue sharing program was part of the Interior Department Appropriations Act of 1981.

CSHB 298 (Res) establishes a state program which carries out the legislative intent of the federal act, which states as follows:

> "That 50 per centum thereof (rentals, bonuses, royalties, etc.) shall be paid by the Secretary of the Treasury ... to the State of Alaska for (a) planning; (b) construction, maintenance, and operation of public facilities; and (c) other necessary provisions of public service.
> PROVIDED FURTHER, that in the allocation of such funds, the State shall give priority to use by subdivisions of the state most directly or severely impacted by development of oil and gas leased under this section." 42 U.S.C. Sec. 6508



The purpose of this provision is to provide a source of funds for dealing with impacts related to the NPR-A oil and gas leasing program. The provision states that the funds are to be used for "planning," for "construction," and "operation of public facilities" and for "other necessary" public services. The purpose was also to allocate these funds to communities where the impacts are "most directly or severely" felt. The provision requires the state to give "priority" to subdivisions "most directly or severely impacted" by the NPR-A leasing program in "the allocation of such funds." This will rule out the possibility of a statewide revenue-sharing program or even one designed to ameliorate oil and gas development impacts in general. The purpose is restricted by federal law to communities suffering the effects of the NPR-A leasing program.

The federal provision does not expressly define further than this which communities could qualify for impact funds. Certainly the North Slope Borough would qualify since the program affects the Borough in the most "direct" way possible, being entirely inside of it. This is

consistent with the statutory predecessor to the federal revenue-sharing provision. P.L. 94-258 (1976), which transferred jurisdiction over the NPR-A from the Navy to the Interior Department, authorized the Secretary to assist impacted communities "located on or near the reserve as a direct result of the exploration and study activities, Sec. 107.

The language in the 1980 Act allows the State more leeway in allocating funds to local communities than the 1976 Act; nonetheless, the intention is to abide by the limitation that funds be allocated to communities "most severely or directly impacted." This bill should be implemented with the degree of flexibility necessary to cover such eventualities, but restrained by the purpose of the federal provision.

This approach would also be consistent with similar interpretations of the courts of federal law and federal programs. The U.S. Supreme court recently interpreted the Coastal Zone Management Act's "directly affecting" language in the SECRETARY OF THE INTERIOR v. CALIFORNIA. The court found that for an affect to be direct there had to be a significant, physical alteration of an area; in this case, California's coastal zone. When Congress adopted the Coastal Energy Impact Program (16 U.S.C. 1456 (a)) it limited loans and grants to coastal states and local governments actually in the coastal zone. Also, Senator Stevens' OCS revenue-sharing bill, S.800, would qualify only coastal local governments to receive OCS revenue-sharing funds. Thus, in other, similar situations, both Congress and the courts narrowly relate direct affects on a geographic basis, providing a sound, factual underpinning to federal revenue sharing for adverse affects of specific federal programs.

MEMORANDUM

TO: ✓Representative John Ringstad, Co-Chairman
Representative Dick Shultz, Co-Chairman
House Resources Committee

FROM: Representative Al Adams AA

SUBJECT: House Bill 298 - Establishing a National Petroleum Reserve, Alaska, Special Revenue Fund

HB 298 is pending in House Resources. I would appreciate the committee's consideration of the legislation at the earliest possible date.

In 1980, Congress approved Public Law 96-514 which contained language requiring that 50% of the royalties received from oil and gas leases in the National Petroleum Reserve - Alaska shall be paid to the State of Alaska. Part of that stipulation also provided that the priority use of these funds would be by the subdivisions of the state that were most directly impacted by the development of oil and gas leases in the NPR-A. I have introduced HB 298 to establish the special revenue fund into which these monies will be deposited. It is in this manner that I believe we can best assure the state's compliance with the intent of the federal Act. You may recall that last session, a comparable piece of legislation passed both houses of the Legislature but was vetoed by the Governor. I have attached a copy of the Attorney General's letter in which he advised the Legislature of necessary changes in order to comply with constitutional and statutory requirements. I believe you will find that HB 298 satisfies the concerns raised by the past Administration.

For the committee's further review, I have attached copies of letters and testimony concerning the federal legislation, as well as comments offered by the Mayor of the North Slope Borough. Should you like any additional information, please let me know.

HOUSE BILL 298

Establishing a National Petroleum Reserve, Alaska Special Revenue Fund

Section 1. FINDINGS.

(1) The U.S Congress provided by law (P.L. 96-514) that Alaska shall receive 50% of the royalties derived from competitive oil and gas leases in the NPRA:

(2) Nearly all of NPRA NPR-A lies within the boudaries of the North Slope Borough; and

(3) Because of the nature of the congressional appropriation, this bill establishes a fund to comply with the federal Act's provisions.

Section 2. NATIONAL PETROLEUM RESERVE, ALASKA, SPECIAL REVENUE FUND.

(a) Establishes the NPRA Special Revenue Fund consisting of money received from the federal government under P.L. 96-514.

(b) The fund shall be managed by the Commissioner of Revenue.

(c) The commissioner is directed to pay the funds, as appropriated by the legislature, to the subdivisions most severely impacted by oil and gas leases. It is the intent of the legislature that 50% of the revenues received from the federal government under this las shall be appropriated for this purpose. The percent of funds for this purpose shall be reviewed by the legislature every five years.

(d) The remaining 50% shall be used by the state, as appropriated by the legislature, for planning, construction, maintenance and operation of essential public facilities, and other necessary public services.

(e) The subdivisions receiving funds may only use them for purposes that are in conjunction with development of NPRA and with competitive oil and gas leasing program. These shall also include planning, construction, maintenance and operation of essential public facilities and other necessary public services.

Section 3. Immediate effective date.

MEMORANDUM

TO: Mayor Eben Hopson
North Slope Borough

Edward Hopson
President
Arctic Slope Regional Corporation

FROM: G. William Frick GWF

RE: Summary of NPR-A Meeting

This memorandum will summarize the meeting held with representatives of the Arctic Slope Regional Corporation, North Slope Borough and others in Anchorage on December 7, 1979. The persons who attended the meeting are on the attached list.

A. Arctic Gas Pipeline

The first item of discussion was a presentation by Jack Bachman (907-276-2900), the Alaska representative of Northwest Pipeline, who provided an update on the Salt Lake City meeting between Mayor Hopson and other Borough representatives, and John McMillian and Northwest Pipeline staff. Bachman indicated that Northwest Pipeline was pleased with the interest of the North Slope Borough to participate in some manner in the project and was interested in providing an opportunity for the local as well as state involvement if possible. He did note that state actions thus far had been disappointing. He indicated that Northwest Pipeline hoped to begin civil construction in 1981, begin laying pipe in 1982, and finish the line in the warm weather of 1985.

He pointed out that the Northwest Pipeline Company has no direct responsibility for the conditioning plant, although it is extremely interested in its construction as an essential part of the overall system. While the state has indicated it wants to do "something" on the conditioning plant, it has not yet formulated a position. Bachman did note that moving the conditioning plant to Fairbanks would prevent the pipeline from being built. Northwest Pipeline is looking at producers as "overrun insurance," who will be turned to if necessary for completion of the line; the Department of Justice has problems with producers owning the line. Larry Dinneen pointed out that ARCO has expressed interest in knowing what the North Slope Borough and ASRC plan to do regarding the conditioning plant.

Mayor Hopson expressed concern about the failure of the North Slope Borough to have been consulted on issues surrounding the conditioning plant and the pipeline that affect the North Slope Borough. He also emphasized that while NSB had proposed having some involvement, it was subject to further decisions and negotiations involving the NSB and ASRC.

Follow-up actions from the discussion with Bachman are:

1. This firm is to contact Howard Butner, Vice President for Finance of Northwest Alaska Pipeline in Washington. Butner apparently has a variety of studies and other documents regarding various financial schemes for financing the pipeline that may be of use to the NSB in reviewing its potential participation.

2. This firm is to develop a brief analysis summarizing what has transpired with the gas pipeline to date and to prepare recommendations to the Borough on what future actions to take on this issue.

B. NPRA Legislation

The next item discussed was the position of ASRC and NSB on the NPRA legislation now being drafted by the Department of the Interior. Under this legislation NPR-A would be designated a "National Conservation Area." Mayor Hopson emphasized that the North Slope Borough supported any effort, including private leasing, that would open up NPR-A for exploration and development as the North Slope Borough's contribution to the national goal of improving energy supplies. Mayor Hopson emphasized that the Borough has always supported onshore development.

There was general agreement with the basic statutory positions that DOI had indicated would be included in the legislation.

Conrad Bagne suggested that the bill include provisions allowing local access to non-commercial and commercial discoveries found near communities on the North Slope. Herb Bartel pointed out that the BLM had already developed several years of planning analysis and data on NPR-A and that this experience should not be lost in the transition to the NCA management scheme. In particular, with respect to the four areas that were to be given special attention, the governmental offices charged with responsibility for those special areas, assuming it is not BLM, should be required to utilize BLM analysis.

Jon Buchholdt noted that the four areas cited for special consideration are possibly the most promising for private leasing; the boundaries, terms, and access of those areas should be examined carefully to insure development is not precluded. Herb Bartel also observed that the protection for fishing sites should not be limited to designated sites but rather to "systems" that would allow movement within fishing areas as the fish populations, and other influences on fishing, change.

With respect to the leasing systems, it was pointed out that a "nominating" system should be used in order to give the Borough, as well as the federal government, advance notice of what areas should be studied to determine the need for environmental or other protection. There was general agreement that any leasing system should, to the maximum extent possible, utilize bids that would internalize non-economic factors such as environmental protection and local hire. In addition, local considerations and provisions encouraging participation by small companies should be included into a system. Senator Gravel apparently is looking into developing such a program independently of the Department of the Interior. It was also pointed out that the Teshekpuk Lake had already been identified as an area that should be protected for the Native community. This should be kept in mind as the provisions regulating the Teshekpuk Lake area are formulated.

Senator Stevens joined the meeting at this point and made the following comments:

1. He considers the letter of Acting Secretary Joseph, regarding the legislative program of NPR-A, to be balanced but is concerned about those areas that DOI proposes to "set aside." He also feels that any provisions relating to the Mineral Leasing Act may present problems.

2. He is concerned about the revenue sharing provisions and feels it may be hard to hold the 50% now proposed

to be allocated to the state because of the large royalty already received by the state from Prudhoe Bay. Provisions guaranteeing local share from the revenues to the state would help maintain this provision.

3. He supports the NCA being administered by the BLM but is concerned about BLM continuing to apply the approaches they have traditionally followed under the Mineral Leasing Act. Stevens indicated he was meeting with Guy Martin on the legislation on December 10.

4. He is quite committed to keeping this bill separate from D-2 and indicated that this was the view of Secretary Andrus. Senator Stevens cautioned about trying to put D-2 related Native amendments on the bill when it comes from the House.

5. Senator Stevens vigorously emphasized the need to slow the Beaufort Sea sale. He is very concerned about drilling in the Beaufort Sea and feels that the international situation will result in a compressing of the time for leasing of NPR-A.

6. He is very interested in getting small companies involved in the development of NPR-A.

7. He supports the efforts to find a new agency or agencies to fund and administer NARL. He mentioned also the possibility of turning over the gas field at Barrow to the North Slope Borough and providing authority for requiring federal facilities to pay for gas from the field.

In the afternoon we were joined by representatives of the Department of the Interior: Gerry Gilliland, Curt McVie, Irene Rowan, Jim Wicks, and Ed Eisenson.

Gerry Gilliland outlined the Department's views on the legislation. He emphasized that the legislation is to encourage oil and gas development while protecting the unique surface values and lifestyle of the native residents. BLM is to administer the area in a multiple use manner and the local residents are to assist BLM in land use planning and in its lease program. He noted also that the bill included language that would lead to transfer of the Barrow gas field to the North Slope Borough.

With respect to leasing, the Department hopes to have a minimum time schedule that would result in the first lease within twenty months of the legislation. The legislation would provide

broad leasing authority to the BLM to establish terms and conditions. He emphasized that the authority would allow stipulations to protect the environment and require access yet he noted that the proposal did not have any corridors specifically set aside. He said that the bill would provide the Secretary with discretionary authority to lease minerals but only local leasing of coal would be specifically allowed. The report from Gilliland basically coincided with the information provided in Undersecretary Joseph's letter.

Gilliland indicated that the legislation was being reviewed within the Administration but that there had been no major changes proposed. The only objections from other agencies involved issues unrelated to the direct administration of NPR-A, e.g., the Department of Justice was concerned about anti-trust language, some agency was concerned about the size of the tracts being too large and thereby inhibiting participation by local companies, and there was concern over the name of the NCA. Gilliland does not know the exact timetable for submission of the bill to Congress but expects it to happen before January. He felt it was too late for any additional input at this time from the local community although the Department remains interested in the local reaction.

With respect to the four special areas he emphasized that the bill would only have Congress stating that BLM is to give those areas special consideration; it would be left up to the BLM, after consultation with an Advisory Committee, to determine exactly what those special considerations should be. BLM proposes to use the Federal Land Policy Management Act (FLPMA) planning process to establish appropriate restrictions. He also pointed out that Section 603 of FLPMA would not apply nor would the 1876 Mineral Act. This would preclude hard rock mining and provide no protection of existing claims. It was pointed out by Charlie Edwardson that there might be some outstanding claims that existed before the formulation of NPR-A.

Gilliland agreed that the leasing approach authority in the bill would allow internalization of costs but such leasing would not be mandated by the legislation.

Mayor Hopson emphasized the importance of sharing information from prior exploration of NPR-A inasmuch as the data is a key factor affecting exploration on the Slope. Mayor Hopson expressed his desire that the legislation should turn over leasing totally to private companies so that the Federal government would not be involved in the actual exploration.

Gilliland agreed that the applicability of the North Slope Borough ordinances to activities taking place in NPR-A would be part of the planning process. This means that the BLM could decide to apply them but that they were not automatically incorporated into the plan. He also noted that there was no local hire provision in the bill, which produced substantial discussion about the need for such provision. Gilliland and Curt McVie agreed that this was a point that deserved additional examination and indicated a willingness to have the Department consider taking a position on such a provision in the letter of transmittal of the bill to Congress or in the testimony of the Administration on the bill, inasmuch as it was too late to make any change to the legislation at this point.

Follow-up activities.

1. We should draft for the Department of the Interior an analysis of the need for an affirmative action program mentioning the adverse economic as well as societal impacts of not utilizing local residents. We should also draft appropriate language for such provision.

2. We should write to the Department requesting that they include reference to such a provision in their testimony or in the letter of transmittal to Congress.

3. We should attempt to have included in the legislation a specific guarantee of a portion of the state's revenue being allocated to the North Slope Borough.

4. We should examine other National conservation areas, and BLM regulations regulating activities in those areas, to identify deficiencies in the management program that should be addressed in the legislation or in Report langaage.

RE: Summary of NPR-A Meeting

This memorandum will summarize the meeting held with representatives of the Arctic Slope Regional Corporation, North Slope Borough and others in Anchorage on December 7, 1979. The persons who attended the meeting are on the attached list.

A. Arctic Gas Pipeline

The first item of discussion was a presentation by Jack Bachman (907-276-2900), the Alaska representative of Northwest Pipeline, who provided an update on the Salt Lake City meeting between Mayor Hopson and other Borough representatives, and John McMillian and Northwest Pipeline staff. Bachman indicated that Northwest Pipeline was pleased with the interest of the North Slope Borough to participate in some manner in the project and was interested in providing an opportunity for the local as well as state involvement if possible. He did note that state actions thus far had been disappointing. He indicated that Northwest Pipeline hoped to begin civil construction in 1981, begin laying pipe in 1982, and finish the line in the warm weather of 1985.

He pointed out that the Northwest Pipeline Company has no direct responsibility for the conditioning plant, although it is extremely interested in its construction as an essential part of the overall system. While the state has indicated it wants to do "something" on the conditioning plant, it has not yet formulated a position. Bachman did note that moving the conditioning plant to Fairbanks would prevent the pipeline from being built. Northwest Pipeline is looking at producers as "overrun insurance," who will be turned to if necessary for completion of the line; the Department of Justice has problems with producers owning the line. Larry Dinneen pointed out that ARCO has expressed interest in knowing what the North Slope Borough and ASRC plan to do regarding the conditioning plant.

Mayor Hopson expressed concern about the failure of the North Slope Borough to have been consulted on issues surrounding the conditioning plant and the pipeline that affect the North Slope Borough. He also emphasized that while NSB had proposed having some involvement, it was subject to further decisions and negotiations involving the NSB and ASRC.

Follow-up actions from the discussion with Bachman are:

1. This firm is to contact Howard Butner, Vice President for Finance of Northwest Alaska Pipeline in Washington. Butner apparently has a variety of studies and other documents regarding various financial schemes for financing the pipeline that may be of use to the NSB in reviewing its potential participation.

2. This firm is to develop a brief analysis summarizing what has transpired with the gas pipeline to date and to prepare recommendations to the Borough on what future actions to take on this issue.

B. NPRA Legislation

The next item discussed was the position of ASRC and NSB on the NPRA legislation now being drafted by the Department of the Interior. Under this legislation NPR-A would be designated a "National Conservation Area." Mayor Hopson emphasized that the North Slope Borough supported any effort, including private leasing, that would open up NPR-A for exploration and development as the North Slope Borough's contribution to the national goal of improving energy supplies. Mayor Hopson emphasized that the Borough has always supported onshore development.

There was general agreement with the basic statutory positions that DOI had indicated would be included in the legislation.

Conrad Bagne suggested that the bill include provisions allowing local access to non-commercial and commercial discoveries found near communities on the North Slope. Herb Bartel pointed out that the BLM had already developed several years of planning analysis and data on NPR-A and that this experience should not be lost in the transition to the NCA management scheme. In particular, with respect to the four areas that were to be given special attention, the governmental offices charged with responsibility for those special areas, assuming it is not BLM, should be required to utilize BLM analysis.

Jon Buchholdt noted that the four areas cited for special consideration are possibly the most promising for private leasing; the boundaries, terms, and access of those areas should be examined carefully to insure development is not precluded. Herb Bartel also observed that the protection for fishing sites should not be limited to designated sites but rather to "systems" that would allow movement within fishing areas as the fish populations, and other influences on fishing, change.

With respect to the leasing systems, it was pointed out that a "nominating" system should be used in order to give the Borough, as well as the federal government, advance notice of what areas should be studied to determine the need for environmental or other protection. There was general agreement that any leasing system should, to the maximum extent possible, utilize bids that would internalize non-economic factors such as environmental protection and local hire. In addition, local considerations and provisions encouraging participation by small companies should be included into a system. Senator Gravel apparently is looking into developing such a program independently of the Department of the Interior. It was also pointed out that the Teshekpuk Lake had already been identified as an area that should be protected for the Native community. This should be kept in mind as the provisions regulating the Teshekpuk Lake area are formulated.

Senator Stevens joined the meeting at this point and made the following comments:

1. He considers the letter of Acting Secretary Joseph, regarding the legislative program of NPR-A, to be balanced but is concerned about those areas that DOI proposes to "set aside." He also feels that any provisions relating to the Mineral Leasing Act may present problems.

2. He is concerned about the revenue sharing provisions and feels it may be hard to hold the 50% now proposed

to be allocated to the state because of the large royalty already received by the state from Prudhoe Bay. Provisions guaranteeing local share from the revenues to the state would help maintain this provision.

3. He supports the NCA being administered by the BLM but is concerned about BLM continuing to apply the approaches they have traditionally followed under the Mineral Leasing Act. Stevens indicated he was meeting with Guy Martin on the legislation on December 10.

4. He is quite committed to keeping this bill separate from D-2 and indicated that this was the view of Secretary Andrus. Senator Stevens cautioned about trying to put D-2 related Native amendments on the bill when it comes from the House.

5. Senator Stevens vigorously emphasized the need to slow the Beaufort Sea sale. He is very concerned about drilling in the Beaufort Sea and feels that the international situation will result in a compressing of the time for leasing of NPR-A.

6. He is very interested in getting small companies involved in the development of NPR-A.

7. He supports the efforts to find a new agency or agencies to fund and administer NARL. He mentioned also the possibility of turning over the gas field at Barrow to the North Slope Borough and providing authority for requiring federal facilities to pay for gas from the field.

In the afternoon we were joined by representatives of the Department of the Interior: Gerry Gilliland, Curt McVie, Irene Rowan, Jim Wicks, and Ed Eisenson.

Gerry Gilliland outlined the Department's views on the legislation. He emphasized that the legislation is to encourage oil and gas development while protecting the unique surface values and lifestyle of the native residents. BLM is to administer the area in a multiple use manner and the local residents are to assist BLM in land use planning and in its lease program. He noted also that the bill included language that would lead to transfer of the Barrow gas field to the North Slope Borough.

With respect to leasing, the Department hopes to have a minimum time schedule that would result in the first lease within twenty months of the legislation. The legislation would provide

broad leasing authority to the BLM to establish terms and conditions. He emphasized that the authority would allow stipulations to protect the environment and require access yet he noted that the proposal did not have any corridors specifically set aside. He said that the bill would provide the Secretary with discretionary authority to lease minerals but only local leasing of coal would be specifically allowed. The report from Gilliland basically coincided with the information provided in Under-secretary Joseph's letter.

Gilliland indicated that the legislation was being reviewed within the Administration but that there had been no major changes proposed. The only objections from other agencies involved issues unrelated to the direct administration of NPR-A, e.g., the Department of Justice was concerned about anti-trust language, some agency was concerned about the size of the tracts being too large and thereby inhibiting participation by local companies, and there was concern over the name of the NCA. Gilliland does not know the exact timetable for submission of the bill to Congress but expects it to happen before January. He felt it was too late for any additional input at this time from the local community although the Department remains interested in the local reaction.

With respect to the four special areas he emphasized that the bill would only have Congress stating that BLM is to give those areas special consideration; it would be left up to the BLM, after consultation with an Advisory Committee, to determine exactly what those special considerations should be. BLM proposes to use the Federal Land Policy Management Act (FLPMA) planning process to establish appropriate restrictions. He also pointed out that Section 603 of FLPMA would not apply nor would the 1876 Mineral Act. This would preclude hard rock mining and provide no protection of existing claims. It was pointed out by Charlie Edwardson that there might be some outstanding claims that existed before the formulation of NPR-A.

Gilliland agreed that the leasing approach authority in the bill would allow internalization of costs but such leasing would not be mandated by the legislation.

Mayor Hopson emphasized the importance of sharing information from prior exploration of NPR-A inasmuch as the data is a key factor affecting exploration on the Slope. Mayor Hopson expressed his desire that the legislation should turn over leasing totally to private companies so that the Federal government would not be involved in the actual exploration.

Gilliland agreed that the applicability of the North Slope Borough ordinances to activities taking place in NPR-A would be part of the planning process. This means that the BLM could decide to apply them but that they were not automatically incorporated into the plan. He also noted that there was no local hire provision in the bill, which produced substantial discussion about the need for such provision. Gilliland and Curt McVie agreed that this was a point that deserved additional examination and indicated a willingness to have the Department consider taking a position on such a provision in the letter of transmittal of the bill to Congress or in the testimony of the Administration on the bill, inasmuch as it was too late to make any change to the legislation at this point.

Follow-up activities.

1. We should draft for the Department of the Interior an analysis of the need for an affirmative action program mentioning the adverse economic as well as societal impacts of not utilizing local residents. We should also draft appropriate language for such provision.

2. We should write to the Department requesting that they include reference to such a provision in their testimony or in the letter of transmittal to Congress.

3. We should attempt to have included in the legislation a specific guarantee of a portion of the state's revenue being allocated to the North Slope Borough.

4. We should examine other National conservation areas, and BLM regulations regulating activities in those areas, to identify deficiencies in the management program that should be addressed in the legislation or in Report langaage.

NORTH SLOPE BOROUGH

Regarding

SENATE BILL NO. 835

on

April 20, 1982

Despite the fact that commercial petroleum prospects for NPRA have been substantially downgraded by the United States Geological Service and Department of Natural Resources as a result of past Federally sponsored drilling programs the potential impacts, in fact, may be greater. Past drilling indicates the possibility of a reasonably large number of smaller fields rather than the giants or super giants forecast in the past. If this is the case, production would probably await the development of groups of smaller fields which would collectively represent a commercial undertaking. Collectors would link these small fields to a pipeline running to TAPS. The tracts receiving bids during the January 27, 1982 NPRA lease sale and their pattern substantiate this belief. This type of development scenario necessarily would disturb a larger area as well as being more difficult to service.

In contrast to Prudhoe Bay, the impacts of NPRA development will be at the doorstep of four of the eight permanent Borough communities (Barrow, Nuiqsut, Atkasook, and Wainwright). The indirect or secondary impacts of the Prudhoe Bay development, discounting primary impacts, created drastic cultural, social and economic disruptions for the permanent Inupiat population. Impacts forced change upon the resident population, not at their own making, and required them to organize a local governmental unit to represent their interests. With the development of NPRA the

pressures will be more direct and perhaps more devastating unless mitigation measures can be taken.

Senate Bill 835 will provide a portion of the funding required to address forthcoming impacts. With Prudhoe Bay and the Kuparuk experience, future Borough approaches to industrial impacts will involve direct yet cooperative State/industry/Borough planning and provision of basic consolidated services within the fields as well as within the communities. The result of Borough involvement promoting consolidation of facilities and services will result in more efficient, less disruptive development and therefore less detrimental impact.

The Federal law, Department of Interior and Related Agencies Appropriations Act of 1980, contains the following language:

> Provided, that . . . (9) all recipients from sales, rentals, bonuses, and royalties on leases issued pursuant to this Act shall be paid into the Treasury of the United States: Provided, that 50 per centum shall be paid by the Secretary of the Treasury semiannually, as soon as practicable after March 30 and September 30 each year, to the State of Alaska for (a) planning, (b) construction, maintenance and operation of essential public facilities, and (c) other necessary provision of public service: Provided further, that in the allocation of such funds the State shall give priority to use by subdivisions of the State most directly or severely impacted by development of oil and gas leased under this Act.

was in part a result the cooperative effort of the State and

the North Slope Borough in working with the Administration and the Congress.

Since NPRA is Federal reserve lands, there was no requirement for Federal revenue sharing. In fact, there was local opposition from influential Administrative and Congressional officials to sharing with the State. The Administration considered draft language to include only the Borough since NPRA lies almost totally within the Borough. However, Governor Hammond's opposition to direct revenue sharing rather than a pass through and the Borough's belief that the Borough alone would be limited to the 25 percent precident for local revenue sharing established in worldlife range and refuge law, prompted the Borough to jointly seek revenue sharing with the State. The joint State/Borough effort resulted in the State receiving 50 percent of the net Federal receipts with a proviso that the State would pass through funds to directly or severely impacted local governmental units.

Although the Administration introduced legislation in both the House and the Senate, Senator Stevens, in a sophisticated legislative maneuver, extracted the appropriate NPRA lease sale language from the Administration bill and included it as a part of Interior Appropriations. NPRA leasing was permitted and the revenue sharing preserved. However, the remainder of the Administration bill which dealt in large part with environmental constraints and enforcement provisions is dormant and

probably will not be resurrected. This places a great burden upon the State and the Borough to ensure efficient, environmentally sound development.

In summary, the North Slope Borough urges the prompt enactment of Senate Bill 835 to provide the Borough with the means of ameliorating impacts occasioned by the development of petroleum leases in NPRA. In providing this pass through of funds, the Borough will use these funds for the planning, construction, maintenance and operations of public facilities and other necessary provisions of services resulting from NPRA lease sales.

REPORT LANGUAGE FOR HR 7724

Provisions Affecting Exploration of

National Petroleum Reserve in Alaska

The bill provides $194,251,000 to initiate and carry out the leasing of the National Petroleum Reserve in Alaska, a Federal land holding of 23 million acres which is entirely located on the North Slope of Alaska. In addition to providing funds, the House bill provides substantive requirements directing the Secretary how such leasing is to be carried out. The Committee has agreed to the House provisions, with certain changes. The Committee believes that private leasing of the NPRA is extremely important and that it should proceed as expeditiously as possible. It is important, however, that the Congress also provide guidance to the Secretary on how that leasing should take place.

The social, economic, and environmental conditions in the Arctic are extremely fragile. The sudden influx of workers and money into an area can be extremely disruptive to the local community and put a strain on governmental services. There is also great potential for harm to the environment from the equipment and other activities associated with the exploration and development. Therefore, it is extremely important that the Secretary develop and implement a leasing program that gives proper consideration to the effects on the local community and political jurisdiction whose lands involved will be most directly

affected by the economic and social impacts. Because of these concerns, the Committee has made several changes in the House bill.

First, the House bill exempted the lease program from Sections 202 and 603 of the Federal Lands Policy and Management Act of 1976. While the Committee agrees that those sections of FLPMA should not operate to delay the leasing program, the sections would also have provided authority for important interaction between the Secretary and the State and local governments. The Committee considers it very important that the Secretary consult with the State and local jurisdictions regarding the lease program and insure important State and local decisions regarding land use control, environmental protection and preservation of subsistence use by local residents are made part of any leasing program. The Committee amendment would require the Secretary to recognize and insure application of these local requirements, even though the FLPMA sections are otherwise not applicable. The Committee believes that this will not delay the lease program in any way.

Second, the Committee has added language that will lead to greater participation in the jobs and business contracts associated with the leasing program by disadvantaged Native groups. Natives have historically gained the least from the economic activity associated with oil and gas development. Efforts were made in connection with construction of the Trans-Alaska pipeline

and the proposed Alaska Natural Gas Transportation System to encourage hiring of Natives. The unemployment rate for Natives in the North Slope is perhaps the highest in the country and it is appropriate that they have a role in the development of the resources from the area in which they live. This amendment makes more explicit the Federal goal that Natives have a preference in the employment and contracts that will be generated by the leasing program of NPRA authorized by the bill.

Third, the Committee recognizes that the impacts of oil and gas development increases costs for local governmental units. In addition, the Committee considers it important that such local jurisdictions share in the financial rewards associated with the development of resources of land within their jurisdictions, even though fee ownership may still be with the Federal government. The House bill provides that 50% of the lease sale proceeds, the royalties, and other income from the NPRA be returned to the State of Alaska, with a directive that the State allocate the funds to benefit the jurisdictions most affected by the development of NPRA.

The Committee supports the concept of returning funds to local jurisdictions but is concerned that those funds be available to benefit the jurisdictions most directly affected by the development and the activities that produce the income. The State is subject, understandably, to pressures from jurisdictions throughout the state for distribution of its revenues; past

experience indicates that certain areas, particularly those less populated, may not receive distribution appropriate to their needs or to the impacts that they have suffered. Furthermore, the State has restricted the authority of local jurisdictions to raise revenues by taxing property associated with oil and gas development. This has had its most serious impact on those locations where the oil and gas exploration and development is taking place and substantial amounts of property are located. Consequently, the Committee has preserved the 50% allocation to the State and its local jurisdictions but has directed distribution within the state so that a reasonable portion goes to the North Slope Borough, the local jurisdiction most affected by development of NPRA; the NPRA is composed of lands located totally within the North Slope Borough boundaries. Given the priority set forth in the House bill that the funds go to the jurisdictions most impacted by development, the Committee considers it appropriate to make the allocation explicit in the bill.

Finally, the Committee has rejected the request by the Administration that the bill require transfer of the Barrow gas field, which at present is under the jurisdiction of the Secretary of the Interior. The gas from that field is essential to life in Barrow, our northernmost community. The gas is used for heat and electricity, and a reliable supply of gas is necessary during the severe Arctic winters. While the Committee agrees that the source and cost of long-term energy supplies for

Barrow, as well as other North Slope Borough Villages, should be examined by the Secretary and discussed with the local community, it is inappropriate for the Congress to direct that a transfer take place in advance of studies and other data that demonstrate how energy supplies can best be funded. The Committee wants to avoid hurriedly choosing an unrealistic operating situation which might endanger the continued supply of fuel for heat to the community.

The leasing of NPRA provides a good opportunity for the Secretary to study energy needs on the North Slope and determine how North Slope Villages, including Barrow, can gain access to indigenous energy supplies. While the Barrow gas field would obviously not be included in any leasing program, the Secretary should consider lease conditions on tracts which will be leased that will guarantee access to any discovered oil or gas by the villages. Following development of such information, the Congress will be better able to respond in an appropriate manner to the Administration's request for transfer of the Barrow gas fields.

HB 312
Fiscal Note
Analysis

The intentional harming of a police dog is such a rare occurrence that any fiscal impact to the department will be relatively insignificant.

Kotzebue

1 dog
not subject to harassment or threats

Alaska State Troopers

3 Search & Rescur Dogs
2 Narcotics Dogs

Support the legislation. Were to call back saturday with info re: harassment

Did not call back

Ketchikan Police Department

1 Narcotics Dog - Not subject to threats or harassment

Support the legislation

Kenai Police Department

1 Street Dog - Not aware of harassment. Dispatcher could not comment on the bill

Juneau Police Department

No Dogs

Fairbanks Police Department

No Dogs

Anchorage Police Department

3 Street Dogs
2 Narcotics Dogs

Support the legislation. Their dogs (all of them) have be harassed and threatened. One dog was threatened wednesday (April 27) with a knife.

The department feels that it would be very difficult to convince the prosecutors to file charges under the Criminal Mischief Statute because it covers such a broad range of offenses. If there were specific statutes relating to harassment or injuring a police dog it would be much easier to convince the prosecution to prosecute.

The department has never attempted to file charges under the criminal mischief statute as they felt there would be no chance of prosecution.

FROM: Cynthia Nelson
Administrative Assistant

SUBJECT: Proposed CS for HB 312 (Judiciary)
"An Act relating to harming a police dog."

On April 20, 1983 I spoke with Deputy Chief Audie of the Anchorage Police Department. The Anchorage Police Department strongly supports this legislation and hopes that it will act as a deterrent to the threats which have been made towards their police dogs.

The Anchorage Police Department presently owns and maintains five (5) police dogs. Four (4) are classified as "Street Dogs" and are used for building searches and in situations where there would be a substantial danger to a police officer. In addition, "Street Dogs" are used for search and rescue situations locating lost persons.

The additional dog owned by the Anchorage Police Department is classified as a "Narcotics Dog". This particular dog was imported from Germany and is used to locate narcotics by smell. This dog in particular has been subjected to numerous threats of harm.

These dogs represent an investment of approximately $12,000 each which includes an eight week training session with it's designated police officer "handler". This figure does not include salary and per diem paid to the officer while in training at the outside school.

There is not only a substantial financial investment in these dogs but a great deal of time investment. However, the value of these dogs to the life and safety of the public and to the police officers they serve would be difficult to measure.

SUBJECT: Harming police dogs
(CSHB 312 (Judiciary))

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: James H. Lear
Legislative Counsel JHL

You have asked our office to compare the penalties under the existing law and the penalties under CSHB 312 (Judiciary) associated with the crime of harming a police dog. Under AS 11.46.486 (Criminal mischief in the fourth degree) the prosecution would have to establish that the offender "tampered" with a police dog with reckless disregard for the risk of harm or with intent to cause substantial inconvenience to another person; or that the offender damaged a police dog in an amount less than $50 and with the intent to cause such damage. Criminal mischief in the fourth degree is a class B misdemeanor.

Comparing criminal mischief in the fourth degree with proposed Sec. 11.56.710 (Harming a police dog in the second degree), one would observe that under the proposed statute it would be unnecessary to establish damage to a police dog. It would be sufficient for the prosecution to establish that the offender tormented, kicked, struck, stoned, or tampered with a police dog, knowing the dog to be a police dog. Such conduct would be punishable as a class A misdemeanor, a greater penalty than that imposed for criminal mischief in the fourth degree.

Under AS 11.46.484 (Criminal mischief in the third degree) the prosecution would have to establish that the offender intentionally damaged a police dog in an amount of $50 or more but less than $500. If the prosecution were successful, the offender would be facing a class A misdemeanor charge. Again, comparing this with the proposed section of harming a police dog in the second degree, the prosecution

must establish damage to the police dog to prevail under the existing law, while under the new provision the offender may be punished even though he inflicts no physical injury to the police dog.

Under AS 11.46.482 (Criminal mischief in the second degree) the prosecution would have to establish that the offender intentionally damaged a police dog in an amount of $500 or more in order to impose penalties as a class C felony. Compared with Sec. 11.56.705 (Harming a police dog in the first degree), one would observe that an offender is subject to penalties for a class C felony violation if the offender intentionally kills or causes serious physical injury to a police dog. Under the existing law the prosecution would have to establish that the intentional killing or infliction of serious physical injury amounted to more than $500 in damages.

In short, a comparison of existing law with proposed CSHB 312 (Judiciary) shows that it would be easier to prosecute an offender under the proposed bill and in certain instances higher penalties could be attached upon conviction.

If you have any further questions, please feel free to contact our office.

HB312

RE: POLICE DOG PROTECTION BILL

I was given a copy of your draft bill amending AS 11.56 to protect police dogs.

I and the Police Department, and I am sure the City Fathers, thank you for this much needed legislation.

It is definitely a measure of protection for the dog and a protection to the large investment made by the City of Kotzebue and hopefully will act as a deterent.

In reviewing the draft legislation, the two stumbling blocks I see is the phrase "knowing the dog to be a police dog" and the language following to the end of the sentence in Section 11.56.705 and Section 11.56.710.

By necessity the dog becomes a part of the Officers family and it is generally agreed that this is when the dog is most vulnerable. Police Department that have used dogs over a great period of time have found that the dogs are poisoned, shot at and injured mostly when "off duty".

All Police dogs are the property of the handlers employer and like an officer, are "on duty" 24 hours a day.

Might it be possible to revise the language to reflect these concerns.

Sincerely,

Don Buehler

Bill would protect police dogs

NEWS 5-8-83

The Associated Press

JUNEAU — The House has sent to the Senate a measure to penalize anyone who killed or tried to harm a police dog.

The measure (HB312) was introduced by Rep. Al Adams, D-Kotzebue, because of a problem in his area. The police dog has been threatened several times, according to testimony in the House Judiciary Committee.

Rep. Don Clocksin, D-Anchorage, said the measure was unneccessary because penalties for killing a dog were covered by criminal mischief statutes.

Adams countered that the bill was needed, because it would specifically identify a crime.

He said the dogs provide public protection and crime detection and should be protected.

Killing a police dog would be a Class C felony, punishable by up to five years imprisonment and a fine of up to $50,000.

Harming a police dog would be a Class A misdemeanor, punishable by up to a year in jail and a fine of up to $5,000.

Alaska State Legislature

Representative Mitch Abood
CHAIRMAN

House Committee on State Affairs

SECTIONAL ANALYSIS OF: HB 323

"An Act relating to residency and residency requirements; and providing for an effective date."

Section 1 amends AS 01.10 by adding a new section defining bona fide residency in the State of Alaska. A person establishes residency in the State by being physically present in Alaska with the intent to remain in Alaska indefinitely and to make a home in the State. Under (b)(1) in the section, a person must maintain a principal place of abode in the state for at least 30 days or for a longer period if a longer period is required by law or regulation.

Section 2 repeals and reenacts AS 08.04.110, relating to the personal requirements of certified public accountants. The present residency requirement has been deleted to correct a constitutional problem.

Section 3 amends AS 08.08.207 (a), by removing the requirement that an individual be a resident of Alaska in order to be a law clerk.

Section 4 amends AS 08.88.171, for receiving a real estate broker's license; an associate broker's license, or a real estate salesman's license. The one-year residency requirement has been deleted to correct a constitutional problem.

Section 5 amends AS 09.55.130, deleting the one-year residency requirement for the annulment of a marriage. Under current law, if a person was not married in Alaska, that marriage could only be annuled if the plaintiff had been a resident for at least one year prior to the commencement of an action. The one-year requirement is probably unconstitutional.

Section 6 amends AS 16.05.400(b), by deleting the 30-year consecutive residency requirement to a one-year requirement for a hunting, fishing or trapping license exemption for persons 60 years of age. The 30-year requirement is clearly unconstitutional.

Section 7 amends AS 16.35.130, by deleting the one-year residency requirement in the section dealing with the non-payment of bounty on certain animals. Presently, in order for bounty to be paid, an individual was required to maintain a place of abode inside the game management unit or in part of the game management unit for one year preceeding the time the animal was taken and the bounty paid, or, no bounty would be paid to a person who had not continually maintained his legal residence in Alaska. The one-year residency requirement has been replaced by simple residence (30 days) in order to correct a constitutional problem.

Section 8 amends AS 18.56.101 (1)(B), dealing with the eligibility for the one-percent veteran's interest rates, by deleting the five-year residency requirement and substituting a one-year requirement. The present law requires a person who was not a resident of Alaska at the time of entry into the service, to be a resident of Alaska for one year at the time of the date of application for a loan and also requires the applicant to have been a resident of Alaska for five years. There were constitutional problems with those requirements.

Section 9 amends AS 21.27.090 (a)(2), dealing with the qualifications for insurance agent and broker licenses, by deleting the one-year residency requirement and substituting simple residence (30 days). Presently, an individual must reside continuously in Alaska for one year immediately prior to the issuance of an agent or broker's license. There is no change in fee differential.

Section 10 amends AS 26.15.130 (a), dealing with the eligibility for veteran's loans, by deleting the five-year residency requirement and inserting a one-year requirement. To receive a loan under current law if a veteran was not a bona fide resident of the State or Territory of Alaska at the time of entry into the service, the veteran was required to have been a resident of the State or territory for five years. There was a constitutional problem with that requirement.

Section 11 amends AS 38.08.030 (a)(2), dealing with applications for the homesite entry, by deleting the three-year residency requirement and the 20-year requirement, and substituting a one-year requirement. Under current law an individual must submit proof that he/she has been a resident of Alaska for three years immediately preceding the date of application, or, that the person has been an Alaskan resident for a total of 20 years. There were constitutional problems with those requirements.

Section 12 amends AS 44.81.210 (a)(20), dealing with limited entry permit loans (CFAB), by deleting the five-year residency requirement and substituting a two-year requirement. Under current law, a person

must be a resident of Alaska for a continuous period of five years immediately preceding the date of application for the loan and who has had a crew member or commercial fishing license under AS 16.05.480 or a permit under AS 16.43.010 - 380, for any one of the past five years. That person must also have actively participated in the fishery during that period. There are constitutional problems with these requirements.

Section 13 repeals the following laws:

AS 08.54.110(2), relating to the qualifications for obtaining a registered guide license.

Action Taken: " (2) is a resident of the state and maintains a permanent place of abode in the state," is repealed in order to correct a constitutional problem.

AS 08.54.140(2), relating to the qualifications for obtaining an assistant guide license.

Action Taken: " (2) is a resident of the state;" is repealed in order to correct a constitutional problem.

AS 08.54.142 (a)(1), relating to the qualifications for obtaining a transporter license.

Action Taken: "(1) is a resident of the state;" is repealed in in order to correct a constitutional problem.

AS 14.54.142 (a)(1), relating to the qualifications for obtaining a registered guide license.

Action Taken: The granting of loans based on accumulated points as determined by the length of residency in Alaska is repealed in order to correct a constitutional problem.

AS 18.55.470 (4), relating to low-cost housing preference.

Action Taken:

In the definitions section:"(4) 'resident' means a person who has lived in the state continuously for any one year;" is repealed. The one-year requirement is probably unconstitutional. Simple residence (30 days) will apply in this section.

AS 21.27.220 (1), relating to the qualifications for issuing an insurance solicitor license.

Action Taken:

" (1) is a bona fide resident of Alaska and has been a continuous resident for at least one year immediately before issuance of a license;" is repealed in order to correct a constitutional problem.

AS 29.63.065.(d)(1), relating to the senior citizen special assessment exemption.

Action Taken:

" (1) 'resident' means a person who for 12 consecutive months has maintained his permanent place of abode in the state;" is repealed in order to correct a constitutional problem. Simple residence (30 days) will apply in this section.

AS 38.08.040 (b), relating to the issuance of homesite entry permits.

Action Taken:

" (b) If the number of applicants qualified for homesite entry exceeds the number of available homesites offered, or if several applicants apply and qualify for the same homesite, priority in award of an entry permit shall be accorded to that applicant showing proof of the longest residency in the state." is repealed in order to correct a constitutional problem.

AS 39.25.155 (g), relating to the vocational substitution program.

Action Taken:

" (9) In this section 'resident' means a person who has been domiciled in Alaska for at least one year immediately before filing his application." is repealed. The one-year requirement is probably unconstitutional. Simple residence (30 days) will apply in this section.

AS 38.05.058, the land purchase price discount program.

Action Taken :

The land purchase price discount program, which is the discount on the purchase price of land at the rate of five per cent of the purchase price for each full year that an individual is a resident of Alaska is repealed. The residency-based program is probably unconstitutional.

AS 43.26.095, (b)(3), relating to industrial tax credits.

Action Taken:

" 'resident,' at the end of the first year of tax credit, means a person who has been domiciled in Alaska for at least one year immediately before the granting of the tax credit to the business; 'resident,' at the end of the second and third year of tax credit, means a person who has been domiciled in Alaska for at least one year either immediately before the granting of the tax credit to the business." is repealed. The residency requirement is probably unconstitutional. Simple residence (30 days) will now apply in this section.

MEMORANDUM

TO: Honorable Mitch Abood
Chairman, House State Affairs Committee

FROM: Susan A. Burke SAB

RE: Residency Requirements

You have asked me to review the Alaska statutes that presently impose residency requirements and to recommend to the Committee the amendment or repeal of those residency requirements that more than likely would be held unconstitutional if challenged in court. You have also asked me to draft a statute defining "bona fide" residence. That draft is attached, along with comments.

In reviewing the residency requirements imposed under current law, I was primarily concerned with two questions -- first, whether it is constitutionally permissible to impose any kind of residency requirement having the effect of excluding nonresidents, and second where the statute imposes a durational residency requirement longer than 30 days, whether the period of residency specified is within

constitutional limits.[1] The statutes which contain residency provisions fall into several broad subject matter categories. Attached is a chart prepared by the Department of Law which lists all of the statutes containing residency requirements, with the statutes organized according to subject matter. The chart also includes an assessment of the constitutional problems, if any, presented by each statute. Rather than duplicate this work, I have used this chart as the basis for my review. The review will discuss the statutes listed in each subject matter category in the chart prepared by the Department of Law.

I. Residency Requirements for Eligibility to Hold Public Office

The durational residency requirements established for public office holding range from six months in the case of magistrates (AS 22.15.160(b)) to 10 years for members of the Judicial Qualifications Commission (Alaska Const. art IV, sec. 10; AS 22.30.010). Durational residency requirements for public

---

1/ In general, a person is entitled to claim residency in Alaska if the person is physically present in the state with the intent to remain here indefinitely and make a home here. With rare exceptions, a durational residency requirement will be valid only if it used as a way of testing whether the person actually has the necessary "residential" intent. For some programs, like welfare or medical care, and for fundamental rights such as voting, the state may impose only the shortest durational period necessary to make residency determinations. This period has been held to be no more than 30 days for voting and welfare. For other programs, as discussed below, a longer period of residency is permissible to require.

office holding have been challenged both in Alaska and elsewhere.[1a/] These durational residency requirements have almost universally been upheld (even fairly lengthy ones), on the theory that they are a legitimate way to measure whether a person has sufficient knowledge of local problems and concerns to be qualified for public office and to insure that the voters have had a sufficient period of time in which to become familiar with the candidate. This same rationale would apply with equal force to durational residency requirements imposed for eligibility to serve on certain boards and commissions. While some questions

---

1a/ Gilbert v. State, 526 P.2d 1131 (Alaska 1974); Chimento v. Start, 414 U.S. 802 (1973).

might be raised as to the reasonableness of the length of residency required in a particular instance, it is probable that none would be struck down if challenged. I do not recommend that any amendments be made to these statutes.

II. Residency Requirements for Occupantional Licensing

With only a few exceptions, I agree with the conclusions contained in the Department of Law's survey as to the serious constitutional problems presented by the statutes which require persons to be residents in order to be licensed to engage in certain professions. The recent Alaska Supreme Court decision in Noll v. Alaska Bar Association, 649 P.2d 241 (Alaska 1982), makes it almost certain that these requirements would be struck down if challenged. Close review of the statutes, however, suggests that in some instances, the residency requirements may have been prompted by perfectly legitimate concerns -- such as the difficulty or added expense of disciplining nonresident practitioners. Further, it appears that in some instances residency requirements may have been imposed as a "quick" way of insuring that persons who practiced certain professions in the state had some degree of "local" knowledge. After Noll, it seems likely that even though these are legitimate problems, they may not be solved by simply barring nonresidents from licensure. By the same token, there may be ways of dealing with these problems that do not raise constitutional questions. For instance, in the case of disciplining nonresidents, a higher fee could be charged to nonresidents to

offset additional costs that may be associated with disciplining nonresidents. "Local knowledge" concerns could be addressed through additional testing procedures. In any event, despite the serious constitutional problems with these statutes, it may be undesirable simply to repeal the residency requirements without providing solutions to whatever problems may be posed by granting licenses to nonresidents. The Committee might want to consider repealing the residency requirements, but having a delayed effective date until perhaps June 30 of 1984. Persons who wish to recommend alternative ways of addressing the kinds of concerns I have suggested would then have time to bring their recommendations to the legislature next year before the repeal of the residency requirements took effect.

III. Public Rights and Benefits

A. General.

I agree with the Department of Law's conclusion that a one year durational residency requirement for annulment of marriage may be unconstitutional, though I would rate this as "probably" rather than "maybe" unconstitutional. The Alaska Supreme Court in 1974 struck down a one year durational requirement for obtaining a divorce. State v. Adams, 522 P.2d 1125 (Alaska 1974). The state's interests in requiring one year residence to obtain an annulment of a marriage are more than likely identical to those advanced in support of the one year requirement for divorce. The court did not find

those interests sufficiently important to justify a one year requirement for divorce. Although the Alaska Supreme Court seems to be moving toward a much less restrictive view of durational residency requirements,[2/] it is unlikely that it would overrule its earlier decision in Adams, if the annulment statute were challenged. I would recommend that this statute be amended to require that a person simply be a resident.

I also agree with the Department's assessment of the other statutes listed in the "General" category, which impose one year durational requirements, and recommend that these statutes be amended to require that a person simply be a resident.

B. Loan and Grant Programs

The statutes governing the various loan programs impose durational residency requirements ranging from one to five years. I agree that the five year requirements are almost

---

2/ In State v. Adams, 522 P.2d 1125, 1131 (Alaska 1974), the Alaska Supreme Court stated:

> . . . all such [durational residency] requirements are prima facie invalid and will be countenanced only when they serve a compelling state interest.

However, in Williams v. Zobel, 619 P.2d 448 (Alaska 1980) (permanent fund dividends), the court retreated from its earlier view in Adams, and indicated that unless the requirement affected fundamental rights (such as voting) or basic necessities of life (like welfare or medical care), the court would henceforth use a "balancing" approach to durational residency statutes. The importance of the state's interests will be weighed against the importance of the benefit denied or delayed by the durational requirement.

certainly unconstitutional.[3] The question is whether a durational requirement beyond 30 days would be constitutional, and if so, what is the maximum length that could be imposed within constitutional limits. Apart from public office holding, the United States Supreme Court has upheld durational residency requirements of up to one year in two cases -- eligibility for preferential resident tuition at state universities, and as a prerequisite to filing for divorce.[4] These cases were decided under the United States Constitution, and the Alaska Supreme Court may, and has, interpreted the Alaska Constitution in similar cases as imposing stricter requirements.[5] As noted above, the Alaska Supreme Court has until recently maintained the view that any durational residency requirement will be struck down unless the state can demonstrate that the requirement is necessary to further a compelling state interest. This is an extremely difficult burden to meet, and except in very rare instances it is an impossible burden. Because it appears that the Alaska court

---

3/ A different question is presented by the five year local mining experience requirement for mining loans under AS 27.09.020. This may be a permissible requirement, particularly if it is demonstrated that it does not operate as a practical matter to exclude persons who are currently residents, but who gained their Alaska mining experience as nonresidents.

4/ Vlandis v. Kline, 412 U.S. 441 (1973) (university tuition); Sosna v. Iowa, 419 U.S. 393 (1975) (divorce).

5/ For example, the Alaska court struck down a one-year residency requirement for divorce under the Alaska constitution, State v. Adams, 522 P.2d 1125 (Alaska 1974). One year later the U.S. Supreme Court upheld an identical requirement in Iowa's statute. Sosna v. Iowa, supra, note 4.

is moving toward a less restrictive approach toward durational residency, our court would probably uphold durational residency requirements of reasonable length for loan programs.

Under this less restrictive approach, the Alaska Court would balance the state's interests in imposing a durational residency requirement for a state loan against the importance of the challenger's interest in obtaining a loan before the requirement had been met. In the case of the loan programs, the state's interest is in assuring that state funds are not used to benefit nonresidents. Since resident status depends in large part on a person's state of mind, it is extremely difficult to know with certainty whether a recent arrival in fact has the requisite "residential" intent, and it is extremely difficult to disprove a false claim of residency. Further, it is costly to require the state to make individualized determinations of residency. There are in most instances alternative sources of loan funds through commercial lenders, and it is likely that our court would find that the state's interest in assuring that its benefits are not granted to persons who are not bona fide Alaska residents outweigh the slight inconvenience that a newly arrived resident might suffer by having to wait for some period of time in order to qualify for a state loan.

A more difficult question is what period of residency would be permissible. The state is currently in litigation in the Federal District Court in Alaska, defending the two

year durational residency requirement under the student loan program. The state has argued that the two year requirement is reasonable in light of the transience of student populations, the generous loan amounts under the Alaska program and the fact that there is no requirement that the loan funds be used at an Alaska institution. The plaintiff in that case has conceded that a one year requirement would be reasonable. Assuming the Alaska Supreme Court continues in its present trend in durational residency cases, a one year durational residency requirement for the loan programs would more than likely be upheld.[6/] A two year requirement might be upheld, but it carries a much higher risk of being struck down than would a one year requirement. The Committee may want to defer proposing any amendments to the two year residency requirement for student loans until the pending litigation is resolved. The Committee may also want to defer action on the other loan programs until after the Alaska Supreme Court renders its decision on the one year residency requirement for participation in the Kenai land disposal lottery (Gilman v. Martin). That decision may provide some indication as to how our court would rule on a one year residency requirement for state loans.

6/ The one loan program for which a one year residency requirement would most likely not be upheld is the AHFC program for home mortgages -- at least as long as there continues to be a requirement that the loans will be made only for owner-occupied dwellings. As has been noted earlier in this memorandum, with rare exceptions, durational residency requirements may be used only as a way of measuring whether a person has the intent to remain in the state and make his or her home there. Purchasing a dwelling under a loan program requiring owner occupancy as a condition of the loan is such a strong indication that a person's claimed residential intent actually exists, that a court would most likely find that there was no valid state purpose in imposing an additional one year residency requirement.

I would, however, recommend that the sliding scale preference for accepting student loan applications that is based on years of residency be repealed, even though it has apparently never been applied. This provision is so similar to the dividend plan struck down in Zobel v. Williams that it is virtually certain to be struck down on the same constitutional grounds. On the other hand, the provisions of AS 14.40.763(j), providing for graduated forgiveness of portions of student loans based on continued residence in Alaska after graduation seem to be based on an entirely different rationale. Those provisions are not based on past residency, but seek to affect future behavior. Providing graduated loan forgiveness seems closely tied to the purpose of encouraging students to return to or remain in Alaska after they have received their educations. I believe that that provision would most likely be upheld if it were to be challenged, and that there is no need to repeal it because of constitutional vulnerability.

C. Land Disposal Programs

As mentioned above, the Alaska Supreme Court now has under consideration a case in which the Kenai land disposal program has been challenged. (Gilman v. Martin.) The Kenai ordinances governing its program are almost identical to the state's land lottery provisions in AS 38.05.057 and AS 38.05.058. Thus, the decision in Gilman will almost

certainly answer any constitutional questions that might be raised concerning the state's program. I agree with the assessment of the constitutional problems with these statutes contained in the Department of Law's chart. I believe that a one year residency requirement to participate in either the land lottery or the homesite entry program would probably be upheld. I have serious doubts about the constitutionality of the provision under which discounts of the purchase price are granted based on years of residency in the state. The committee may, however, wish to defer proposing amendments to this provision until after the decision in Gilman is rendered, since the residency based discounts are also at issue in that case.

D. Special Old Age Programs

I also agree with the assessment made by the Department of Law as to the durational residency requirements contained in the programs providing benefits or preferences to older residents of the state. With respect to the one year residency requirement for the senior citizen special assessment exemption under AS 29.63.065(d)(1), I have doubts about whether that requirement would be upheld, for the same reasons I outlined concerning a one year residency requirement for AHFC loans in footnote 6, above. A one year requirement for the senior citizen exemption from the fishing license requirement would probably be upheld; a 30 year requirement is clearly unconstitutional.

I also agree that the residency requirements for the longevity bonus are almost certainly unconstitutional. There are arguments that could be made in defense of the Pioneers' Home residency provisions, but it is far from certain that those requirements would be upheld. (The arguments in support of the Pioneers' Home residency requirements are contained in the November 26, 1982 opinion by Wilson Condon, a copy of which is among the Committee's files.) However, any recommendation as to how the residency requirements for these two programs might be amended to meet constitutional requirements necessarily has tremendous fiscal implications. The residency questions in these two programs are so intertwined with the structure and operation of the programs, that they cannot be dealt with separately, but can be addressed only as part of a total structural and operational review of those programs. That kind of review is, as I understand it, beyond the scope of the work that the Committee has asked me to perform.

SAB:yw

Amend AS 08.04.260 to read:

If an applicant for a certificate as a certified public accountant meets all the requirements for a certificate and the applicant's application is pending or if an applicant meets all the requirements for a certificate except [THE RESIDENCE REQUIREMENT, OR] the requirement that the applicant has a place of business in the state or be an employee regularly employed in this state, the board may issue a temporary certificate as a certified public accountant. This certificate is effective until the board notifies the applicant that the applicant's application has been granted or rejected. A temporary certificate is effective for a period not exceeding six months. No fee may be charged for the issuance of a temporary certificate.

Amend AS 08.42.050(a) (4) to read:

Have completed at least one year of apprenticeship as a [RESIDENT] trainee under a licensed embalmer.

Amend AS 08.42.110(4) to read:

"[RESIDENT] trainee" means a person who has met the qualifications set out in AS 08.42.050(a)(1) and (2) and is engaged in learning the practice of embalming under the direction and control of a person properly licensed to practice embalming, or a person who has met the qualifications set out in AS 08.42.050(b)(1) and (2) and is engaged in learning the practice of funeral directing

under the direction and control of a person properly licensed to practice funeral directing.

AS 08.24.110(1) and AS 08.54.240(3) are repealed.

Amend AS 26.10.080(d)(1)(B) to read:

Who, not being a bona fide resident of the territory or the state at the time of entry into the service, had been a resident of the territory or state for at least one year at the time of death [AND HAD BEEN A RESIDENT OF THE TERRITORY OR STATE FOR AT LEAST FIVE YEARS]; and

Make Section 8 consistent with HB 302.

Three thousand is needed to initially design and print applications and the permanent I.D. card and to order enough laminating jackets for the fiscal year. Each subsequent fiscal year, we will have the cost of additional laminating jackets. The equipment cost is for three laminating machines; one for the Public Services Counter in Anchorage, one for Fairbanks, and one for Juneau. The travel expenditure is for the Records & Licensing Supervisor to go to Anchorage and Fairbanks and instruct the counter employees.

According to data received from the Department of Labor and the Committee for Older Alaskans, the percentage rate of senior citizens in our state is fairly stable from year to year.

Using FY 82 as the base, it is estimated that there will be a six percent increase in resident sales every year. It is also estimated that three percent of the resident sales are sold to residents sixty years or older.

We are recommending that this bill be amended to include an effective date of January 1, 1984, because license changes traditionally take place at the beginning of a calendar year. If implemented in the middle of the year, some licensees who could be eligible would have already purchased their license. Middle of the year implementation would also require special printing and mailing costs. Time is also needed to properly inform the public of the new law so that all who are eligible can apply.

Assuming that the bill goes into effect 1/1/84, there will be no effect in FY 83. There will be losses to both the Sport Fish and Game Funds in each subsequent fiscal year. FY 84 has a much smaller loss because only half of the fiscal year will be effected.

CS HB 323 Addendum

The 1980 Census showed 19,640 Alaskans ages 60 and over. It also showed 32,260 Alaskans aged 55 and over. Assuming the age spread is even, 2524 Alaskans will reach age 60 each year between 1980 and 1985. Population estimates adding the Alaskans reaching 60 and an overall 5% population growth would be as follows:

FY 84	28,573
FY 85	31,223
FY 86	33,873

Using a conservative estimate, assume that 15% of the population fishes and 11% hunts, we would forego the following revenue.

	Sport Fish $10. license	Game $12. license
FY 84	42.9	37.7
FY 85	46.8	41.2
FY 86	50.8	44.7

STATE OF ALASKA

Judiciary Referral

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY
OFFICE OF THE COMMISSIONER

POUCH N
JUNEAU, ALASKA 99811
PHONE: 465-4322

April 27, 1983

The Honorable Charlie Bussell
Chairman
House Judiciary Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Bussell:

The Department of Public Safety is opposed to HB 321, as written, for the following reasons:

As proposed, House Bill 324 would eliminate the ability of any police department to record a conversation without a search warrant. This would include the 911 emergency lines which come into police departments throughout this state. To first stop a caller to advise them that they are being tape recorded is both disruptive and may cause the caller to loose their train of thought. Most of these calls are an emergency. The reason the calls are recorded is to be able to supervise the manner in which the call was handled, respond to citizens complaints when they feel the dispatchers were rude, and to re-check addresses and phone numbers in the event that they were mis-written by the dispatcher. They are also used as evidence in court for filing false reports (hoax phone calls) or an individual making threatening or terroristic comments.

It appears that if a person is contacted by phone, is threatened, bribed, or is harassed with an obscene phone call, the call cannot be recorded. Certainly, none other than the intended call recipient may listen to a phone call or radio message. The impact on a potential kidnapping or hostage situation is obvious, additionally, it would appear that under the language of AS 42.20.300(b) that even if the call is not recorded, the conversation cannot be divulged without the authorization of all parties.

12-L2LH

In section 42.20.310(1), the police are prohibited from using an eaves dropping device without the consent of all parties. This would eliminate our use of video recording for drunk drivers. It would eliminate the use of recording devices during interrogation.

The courts throughout the United States have ruled that persons that speak to Police Officers have no right to an expectation of privacy. The best evidence as to the conversation which occurred is a tape recording.

Our officers are often accused of soliciting bribes or abusing suspects. Suspects often state that they have not fully been advised of their rights. If a tape recording of this conversation was made this evidence can be presented to the jury for their determination. Without this type of evidence it's one person's word against anothers.

Recently a case was made in another jurisdiction which made the national news. In this particular case an individual had been harassed by his fiancees ex-husband. Because of this harassment he hid a tape recorder on his person when the ex-husband was coming to visit his child. The ex-husband killed the man and his fiancee. Due to the tape recorder running, the entire murder was recorded and was used against the suspect. This bill would prohibit that from occurring.

The Alaska Supreme Court has strongly suggested that all confessions be recorded. This is to provide proof beyond a doubt that the individual made the statement voluntarily after being fully advised of his rights by the police.

We feel that the best evidence should be presented before a court of law to allow jurors to make the proper decision regarding any accusations. The best evidence may well be retained on electronic memory.

We do not feel that the police abuse the use of electronic recording equipment and we feel that the present law is adequate to protect the rights of the citizens.

Sincerely,

Robert J. Sundberg
Commissioner

HB

326

Queen of N., Inc. v. LeGrue, Sup. Ct. Op. No. 1670 (File No. 3512), 582 P.2d 144 (1978).

The effect of a valid confirmation order is to insulate the sale procedure from subsequent challenge based upon a mere irregularity in the conduct of the sale, e.g. that the conduct of the sale did not comply with AS 09.35.160. Lunsford v. Kaiser Gypsum Co., Sup. Ct. Op. No. 961 (File No. 1915), 516 P.2d 151 (1973).

Failure to list liquor license in public notice of sale and failure to sell license as directed by decree of foreclosure constitute a substantial irregularity in the sale for purposes of this section. Queen of N., Inc. v. LeGrue, Sup. Ct. Op. No. 1670 (File No. 3512), 582 P.2d 144 (1978).

Burden of proving commercial reasonableness of a sale was on the secured party, especially where the creditor purchased the property. Queen of N., Inc. v. LeGrue, Sup. Ct. Op. No. 1670 (File No. 3512), 582 P.2d 144 (1978).

This section specifies no standard for appellate review of a trial court confirmation of sale. Queen of N., Inc. v. LeGrue, Sup. Ct. Op. No. 1670 (File No. 3512), 582 P.2d 144 (1978).

Cross references. — For general provisions concerning execution, see AS 09.35.

Editor's notes. — Section 1, ch. 62, SLA 1982, provides: "It is the intent of the legislature to modernize the procedures for execution on a judgment and to afford to a judgment debtor adequate protection of the debtor's personal property and income necessary to provide for the debtor's own needs and the needs of the debtor's dependents while remaining independent of further public assistance."

Section 15, ch. 62, SLA 1982, provides: "All writs of execution, claims of exemption, sales, confirmations of sales, rights of redemption and priorities of redemption issued or filed under any law repealed under this Act and in full force and effect on the effective date of this Act [August 26, 1982], shall remain in full force and effect for the term issued or until revoked, vacated, or modified under the provisions of this Act."

Sec. 09.38.010. Homestead exemption. (a) An individual is entitled to an exemption as a homestead of the individual's interest in property in this state used as the principal residence of that individual or the dependents of that individual, but the value of the homestead exemption may not exceed $27,000.

(b) If property owned by the entirety or in common is used by one or more individual owners or their dependents as their principal residence, each owner is entitled to a homestead exemption of that owner's interest in the property as provided in (a) of this section. The aggregate value of multiple homestead exemptions allowable with respect to a single living unit may not exceed $27,000. If there are multiple owners of property exempt as a homestead, the value of the exemption of each individual owner may not exceed that individual owner's pro rata portion of $27,000.

(c) If property that includes a homestead is sold under an execution, the sale becomes effective upon confirmation by order of the court. The court shall enter the order of confirmation unless, within 60 days after the sale, the individual repurchases the property under this section or the court extends the time for confirmation upon the filing of a timely motion by a party in interest. The individual may repurchase property, including that individual's homestead, at a sale on execution before confirmation by paying into court the costs of the sale plus the lesser of either (1) the difference between the highest bid and the amount of the exemption in the property, or (2) the amount of the creditor's claim. If the individual does not exercise the repurchase right under this subsection, the clerk of the court shall first remit an amount determined to be exempt to the individual from the proceeds of sale and the balance less the cost of the sale to the creditor. For the purpose of collecting an amount remaining unpaid on a judgment after repurchase of property by an individual under this subsection, the creditor or the creditor's assignee may not make another levy on the property repurchased.

(d) Upon entry of the order of confirmation under (c) of this section and expiration of the time period for repurchase, the clerk may execute a deed to the property and when delivered it shall be sufficient to convey all title of the individual in the premises sold to the purchaser at the sale. (§ 2 ch 62 SLA 1982)

Cross references. — For provisions exempting homestead held by tenants by the entirety from execution on debts to the value specified under subsection (b) of this section, see AS 34.15.140(b).

NOTES TO DECISIONS

Construction of former statute, providing for rural and urban homesteads. — See Dalton v. Interior Credit Bureau, Inc., Sup. Ct. Op. No. 2158 (File No. 4265), 615 P.2d 631 (1980).

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.015. Property exempt without limitation. (a) An individual is entitled to exemption of the following property:

(1) a burial plot for the individual and the individual's family;

(2) health aids reasonably necessary to enable the individual or a dependent to work or to sustain health;

(3) benefits paid or payable for medical, surgical, or hospital care to the extent they are or will be used to pay for the care;

(4) an award under AS 18.67 (Violent Crimes Compensation Board) or a crime victim's reparations Act of another jurisdiction;

~~(5) benefits paid or payable as a longevity bonus under AS 47.45;~~

~~(6)~~ compensation or benefits paid or payable and exempt under federal law;

~~(7)~~ liquor licenses granted under AS 04;

~~(8)~~ limited entry permits granted under AS 16.43, except as provided in that chapter.

(b) The right to benefits held by the state on behalf of an individual which may become payable by reason of disability, unemployment or illness, amounts held in the teachers' or public employees' retirement system, and child support collections made by the child support enforcement agency are exempt.

(c) Property of the state, a general law or home rule municipality, the Alaska State Housing Authority, the Alaska Municipal Bond Bank Authority, or other state public corporation is exempt.

(d) Real property held by a cemetery association established under AS 10.30 for the purpose of a cemetery and not exceeding 80 acres is exempt. (§ 2 ch 62 SLA 1982)

Cross references. — As to the applicability of the exemptions from execution in income assignment orders for child support, see AS 09.65.132(g). For provisions exempting teachers' retirement salaries and certain other amounts from garnishment, execution or levy, see AS 14.25.200. For provisions exempting unemployment compensation benefits from levy to enforce collection of a debt, see AS 23.20.405(e). For provisions exempting workers' compensation benefits from levy to enforce the collection of a debt, see AS 23.30.160(b). For provisions exempting amounts held in the public employee pension fund and public employee retirement benefits from levy to enforce the collection of a debt, see AS 39.35.500(b). For provisions exempting longevity bonuses from levy to enforce collection of a debt, see AS 47.45.120(b). As to applicability of the exemptions from execution in proceedings to enforce payment of child support, see AS 47.23.250.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

NOTES

Legislative intent as to liqu licenses. — Former AS 09.35.087 [see n (a)(7) of this section] indicated an over legislative intent that one general credit of a liquor license holder should not allowed to place himself in a preferr position over other general creditors. C. Inc. v. Brown, Sup. Ct. Op. No. 1569 (Fi No. 2781), 574 P.2d 1274 (1978).

Liquor licenses not exempted fro coverage under Article 9 of th

Sec. 09.38.020. Exemptions value limitations. (a) An indiv property not to exceed an aggr individual from the following ca

(1) household goods and wear one household;

(2) if reasonably held for the dependent, books and musical in

(3) family portraits and heirloc the individual.

(b) An individual is entitled to $500 in aggregate value, if held f or a dependent.

(c) An individual is entitled to aggregate value, of implements, trade.

(d) An individual is entitled to of a value not exceeding $500.

(e) An individual is entitled to the extent of a value not exceedin vehicle does not exceed $10,000.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity

NOTES TO

Editor's notes. — Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No. 3996), 597 P.2d 969 (1979), was decided under former AS 09.35.080.

Liberal construction. — Exemption laws are remedial in character and should be liberally construed in favor of the debtor. Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No. 3996), 597 P.2d 969 (1979).

NOTES TO DECISIONS

Legislative intent as to liquor licenses. — Former AS 09.35.087 [see now (a)(7) of this section] indicated an overall legislative intent that one general creditor of a liquor license holder should not be allowed to place himself in a preferred position over other general creditors. C.Y., Inc. v. Brown, Sup. Ct. Op. No. 1569 (File No. 2781), 574 P.2d 1274 (1978).

Liquor licenses not exempted from coverage under Article 9 of the Uniform Commercial Code (AS 45.09). — See Gibson v. Alaska Alcoholic Beverage Control Bd., 377 F. Supp. 151 (D. Alas. 1974), decided under former AS 09.35.087.

As to immunity of real property of University of Alaska from lien attachment or foreclosure, see University of Alas. v. Simpson Bldg. Supply Co., Sup. Ct. Op. No. 1113 (File No. 2196), 530 P.2d 1317 (1975), decided under former AS 09.35.080.

Sec. 09.38.020. Exemptions of personal property subject to value limitations. (a) An individual is entitled to an exemption in property not to exceed an aggregate value of $1,500 chosen by the individual from the following categories of property:

(1) household goods and wearing apparel reasonably necessary for one household;

(2) if reasonably held for the personal use of the individual or a dependent, books and musical instruments; and

(3) family portraits and heirlooms of particular sentimental value to the individual.

(b) An individual is entitled to exemption of jewelry, not exceeding $500 in aggregate value, if held for the personal use of the individual or a dependent.

(c) An individual is entitled to exemption, not exceeding $1,400 in aggregate value, of implements, professional books, and tools of the trade.

(d) An individual is entitled to the exemption of pets to the extent of a value not exceeding $500.

(e) An individual is entitled to an exemption of one motor vehicle to the extent of a value not exceeding $1,500 if the full value of the motor vehicle does not exceed $10,000. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

NOTES TO DECISIONS

Editor's notes. — Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No. 3996), 597 P.2d 969 (1979), was decided under former AS 09.35.080.

Liberal construction. — Exemption laws are remedial in character and should be liberally construed in favor of the debtor. Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No. 3996), 597 P.2d 969 (1979).

Exemption statute should not be interpreted in a way which completely eliminates a debtor's exemption rights in an item of property within an exempt category because that item's value exceeds the statutory allowance. Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No. 3996), 597 P.2d 969 (1979).

Purpose of personal and household property exemptions. — Personal and

household property exemptions are designed to ensure that debtors will have necessary items for living in reasonable comfort and for earning a living. Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No. 3996), 597 P.2d 969 (1979).

The proceeds of exempt property are exempt to the debtor for a reasonable time, to enable him to invest the money in other exempt property. Gutterman v. First Nat'l Bank, Sup. Ct. Op. No. 1876 (File No 3996), 597 P.2d 969 (1979).

Sec. 09.38.025. Exemption of unmatured life insurance and annuity contracts. (a) Except as provided in this section, an individual is entitled to exemption of unmatured life insurance and annuity contracts owned by the individual. If the contracts have accured dividends and loan values available to the individual aggregating more than $5,000, a creditor may obtain a court order requiring the individual debtor to pay the creditor, and authorizing the creditor on the debtor's behalf to obtain payment of, the amount of the accrued dividends and loan values in excess of $5,000 or the amount of the creditor's claim, whichever is less.

(b) A judgment creditor or other claimant of an insurer may not levy upon any of the assets or securities held in this state as a deposit for the protection of the insurer's policyholders or policyholders and creditors. Deposits under AS 21.09.270 may be levied upon if provided in the order of the director of insurance, Department of Commerce and Economic Development, under which the deposit is made. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.030. Exemption of earnings and liquid assets. (a) Except as provided in (b) and (c) of this section and AS 09.38.050, an individual debtor is entitled to an exemption of the individual debtor's weekly net earnings not to exceed $175. The weekly net earnings of an individual are determined by subtracting from the weekly gross earnings all sums required by law or court order to be withheld. The weekly net earnings of an individual paid on a monthly basis are determined by subtracting from the monthly gross earnings of the individual all sums required by law or court order to be withheld and dividing the remainder by 4.3. The weekly net earnings of an individual paid on a semi-monthly basis are determined by subtracting from the semi-monthly gross earnings all sums required by law or court order to be withheld and dividing the remainder by 2.17.

~~(b) An individual who does not receive earnings either weekly, semi-monthly or monthly is entitled to a maximum exemption for the aggregate value of cash and other liquid assets available in any month of $700, except as provided in AS 09.38.050. The term "liquid assets" includes deposits, securities, notes, drafts, accrued vacation pay, refunds, prepayments, and receivables.~~

Supplement

~~(b)~~ (c) A creditor may levy upon earnings exempt under (a) and (b) of this section if the creditor's claim is

(1) enforceable against exempt property under AS 09.38.065(a)(1); or

(2) enforceable under an order of a court of bankruptcy under chapter XIII of the Bankruptcy Act (11 U.S.C., sec. 1301 et seq.).

~~(c)~~ (d) If the individual debtor is a nonresident, the limitations on garnishment imposed under 15 U.S.C. 1673 apply.

~~(d)~~ (e) The following property, unless exempt without limitation under AS 09.38.015, ~~upon receipt by and while it is in the possession of the individual~~, shall be treated as earnings, ~~income, cash, or other liquid assets under this section:~~

(1) benefits paid by reason of disability, illness, or unemployment;

(2) money or property received for alimony or separate maintenance;

(3) proceeds of insurance, a judgment, or a settlement, or other rights accruing as a result of bodily injury of the individual or of the wrongful death or bodily injury of another individual of whom the individual was or is a dependent;

(4) proceeds or benefits paid or payable on the death of an insured, if the individual was the spouse or a dependent of the insured; and

(5) amounts paid under a stock bonus, pension, profit-sharing, annuity, or similar plan or contract, providing benefits by reason of age, illness, disability, or length of service. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.035. Continuing lien on wages. (a) In the case of a garnishment of earnings, when the garnishee's answer reflects that the defendant is employed by the garnishee, the judgment or balance due as reflected on the writ of garnishment shall become a lien on earnings due at the time of service of the writ to the extent that they are not exempt from garnishment, and that lien shall continue as to subsequent nonexempt earnings until the total subject to the lien equals the amount stated on the writ of garnishment, except that the lien on subsequent earnings shall terminate sooner if the employment relationship is terminated, if the underlying judgment is vacated, modified, or satisfied in full, or if the writ is dismissed.

(b) A garnishee shall pay into court all nonexempt earnings of the defendant subject to the continuing lien under (a) of this section. Accrued interest on the judgment or balance due as reflected on the writ of attachment may be garnished under a supplemental writ of garnishment after the principal amount stated on the original writ of garnishment has been paid. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.040. Priorities between continuing liens. A lien obtained under AS 09.38.035 has priority over any subsequent garnishment lien or wage assignment. A writ creating a continuing lien served upon an employer while a continuing lien imposed by a previous writ is still in effect shall be answered by the employer with a statement that the employer is holding no funds and with a further statement stating when all previous liens are expected to terminate. The subsequent writ has full effect from the termination of all prior liens or until it is otherwise terminated under AS 09.38.035. However, a subsequent writ is not effective if a writ in the same cause of action is pending at the time of service of garnishment. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.045. Effective date of continuing lien. The effective date of a writ creating a continuing lien is the date of service upon the garnishee. However, if there are, on that date, liens by virtue of previous writs, the effective date is the date all previous writs terminate. (§ 2 ch 62 SLA 1982)

~~**Sec. 09.38.050. Increased exemption amount.** (a) An individual debtor who is in possession of money that was obtained as payment for an injury or disability may request the court to order an increase in the exemption amounts under AS 09.38.030. The individual debtor shall submit affidavits or offer testimony in support of the request as required by the court. The court shall determine the exemption amount after consideration of the individual's responsibilities and all the present and anticipated property and income of the individual, including that which is exempt.~~

~~(b) The exemption amounts under AS 09.38.030 may be increased when the individual submits an affidavit, under penalty of perjury, stating that the individual's earnings alone support the individual's household; by so doing, the maximum part of the individual's aggregate disposable earnings for any week subject to execution may not exceed the amount by which the individual's disposable earnings for that week exceed $275, or, if the individual is claiming an exemption for cash or other liquid assets under AS 09.38.030(b), a maximum amount of $1,100 available in any month is exempt. (§ 2 ch 62 SLA 1982)~~

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.055. Bankruptcy proceedings. In a proceeding under the Bankruptcy Act (11 U.S.C.) only the exemptions under AS 09.38.010, 09.38.015(a), 09.38.020, 09.38.025 and 09.38.030 apply. (§ 2 ch 62 SLA 1982)

Sec. 09.38.060. Tracing exempt property. (a) If property, or a part of it, that could have been claimed as an exempt homestead under AS 09.38.010, a burial plot under AS 09.38.015(a)(1), a health aid under AS 09.38.015(a)(2), or personal property subject to a value limitation under AS 09.38.020(a)(1), (2) or 09.38.020(c), has been taken or sold by condemnation, or has been lost, damaged, or destroyed and the owner has been indemnified for it, the individual is entitled to an exemption of proceeds that are traceable for ~~12~~ six months after the proceeds are received. An individual is entitled to an exemption of proceeds from the voluntary sale of an exempt homestead under AS 09.38.010 that are traceable for ~~one~~ three months after the proceeds are received. The exemption of proceeds under this subsection does not entitle the individual to claim an aggregate exemption in excess of the value limitation otherwise allowable under AS 09.38.010 or 09.38.020.

~~(b) Money or other property and proceeds exempt under this chapter are traceable under this section by application of the principle of first in, first out, last in, first out, or any other reasonable basis for tracing selected by the individual claiming the exemption. (§ 2 ch 62 SLA 1982)~~

Sec. 09.38.065. Claims enforceable against exempt property. (a) Notwithstanding other provisions of this chapter,

(1) a creditor may make a levy against exempt property of any kind to enforce a claim for

(A) child support;

(B) unpaid earnings of up to one month's compensation or the full-time equivalent of one month's compensation for personal services of an employee; or

(C) state or local taxes; and

(2) a creditor may make a levy against exempt property to enforce a claim for

(A) the purchase price of the property or a loan made for the express purpose of enabling an individual to purchase the property and used for that purpose;

(B) labor or materials furnished to make, repair, improve, preserve, store, or transport the property; and

(C) a special assessment imposed to defray costs of a public improvement benefiting the property.

(b) Except as provided in AS 09.38.070 limiting the enforcement of certain security interests, this chapter does not affect any statutory lien or security interest in exempt property.

(c) A creditor having a claim enforceable under (a) of this section against exempt property, before, at the time of, or a reasonable time after making a levy on property of an individual, shall serve on the individual a notice of the levy and of the basis for the creditor's right to make a levy on exempt property. (§ 2 ch 62 SLA 1982)

Sec. 09.38.070. Limitation on enforcement of certain security interests in exempt goods. (a) This section applies to a security interest, except a purchase-money security interest, or a security interest in a motor vehicle, in an item of goods (1) possessed by an individual, (2) being used by that individual or a dependent, and (3) exempt under AS 09.38.020(a) — (d).

(b) Unless the individual, after receiving written notice of the individual's rights under this section, voluntarily surrenders to the secured creditor possession of an item of goods to which this section applies, the creditor may not take possession of the item or otherwise enforce the security interest according to its terms without an order or process of court.

(c) The court may order or authorize process respecting any item of goods to which this section applies only after a hearing, upon notice to the individual of the hearing and of the individual's rights at it. The notice shall be as directed by the court. The order or authorization may prescribe appropriate conditions as to payments upon the debt secured or otherwise. The court may not order or authorize process respecting the item if it finds upon the hearing both that the individual lacks the means to pay all or part of the debt secured and that continued possession or use of the item is necessary to avoid undue hardship for the individual or a dependent.

(d) The court, upon application of the creditor or the individual and notice to the other and after a hearing and finding of changed circumstances, may vacate or modify an order or authorization under this section. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 62, SLA 1982.

Sec. 09.38.075. Special procedures relating to limited value exemptions. (a) Unless a creditor is seeking collection of a claim enforceable against exempt property under AS 09.38.065, the creditor may obtain a levy on an individual's property of a kind listed in AS 09.38.020 only by complying with this section. Before levy, the creditor shall file with the court out of which the process issues

(1) an affidavit stating that the creditor has reason to believe the individual has property of a kind listed in AS 09.38.020 that is not exempt, identifying the property, setting out facts constituting the basis for believing the property is not exempt; and

(2) a request for an order

(A) of the creditor's claim as nonexempt,

(B) of the individual's rigl to levy by filing with the cle the court, but not exceeding written objection to the prop for the objection and of the setting its value,

(C) of the possible consequ provided in (c) of this sectio

(D) of the information rec

(b) Notice of an order issu of this section, together with the individual. The order sh encumbering, damaging, or in AS 09.38.020 for 30 days reduces, extends, or otherw the 30-day period.

(c) If exemption of propert vidual under (b) of this sectio describe the property in th amount of any indebtedness within the time allowed by t notice served under (b) of t debtor has nonexempt prope court may order the individu location, and value of the in to appear and disclose the in vidual waives objection to th

Editor's notes. — This sectio redrafted by the revisor of statu remove personal pronouns in conf

(2) a request for an order by the court notifying the individual

(A) of the creditor's claim of a right to levy on the property identified as nonexempt,

(B) of the individual's right to contest the creditor's claim of a right to levy by filing with the clerk of the court, on or before a date fixed by the court, but not exceeding 15 days after the issuance of the order, a written objection to the proposed levy and a statement of the grounds for the objection and of the right to describe the property in lieu of setting its value,

(C) of the possible consequences of failure to respond to the notice as provided in (c) of this section, and

(D) of the information required by AS 09.38.085(a).

(b) Notice of an order issued in accordance with a request under (a) of this section, together with the creditor's affidavit, shall be served on the individual. The order shall restrain the individual from removing, encumbering, damaging, or disposing of any property of the kind listed in AS 09.38.020 for 30 days after receipt of the order, unless the court reduces, extends, or otherwise modifies the restraining order during the 30 day period.

(c) If exemption of property identified in a notice served on an individual under (b) of this section depends on its value, the individual may describe the property in the responsive statement and indicate the amount of any indebtedness chargeable against it. If the individual, within the time allowed by the order of the court, fails to respond to a notice served under (b) of this section that the creditor believes the debtor has nonexempt property of a kind listed under AS 09.38.020, the court may order the individual to appear and disclose the description, location, and value of the individual's property. If the individual fails to appear and disclose the information specified in the order, the individual waives objection to the creditor's levy on property of that kind.

(d) Except to the extent the procedure is prescribed by this section, AS 09.38.080(c) governs a proceeding for the determination of a contest in respect to a claim to exemption of property under AS 09.38.020.

(e) Costs incurred in making, or proposing to make, a levy on property of a kind listed in AS 09.38.020 shall be paid out of the proceeds of a sale of property of that kind. If the proceeds of a sale of the property are insufficient to cover the costs incurred in proceedings commenced under this section, the creditor shall pay the costs and may not recover them from the individual, notwithstanding any agreement of the parties to the contrary.

(f) The burden of proving the validity of an exemption by a preponderance of the evidence is upon the individual claiming the exemption. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.080. Procedures applicable to a levy on property of an individual. (a) Except in a proceeding under AS 09.38.065, a creditor shall comply with this section in obtaining a levy on property of an individual. In a proceeding to levy on personal property of a kind listed in AS 09.38.020, a creditor shall comply with this section and AS 09.38.075.

~~(b) Before, at the time of, or within three days after levy against property of an individual, the creditor shall file with the court from which the process issued an affidavit stating that the creditor has reason to believe the individual has property that is not exempt, identifying the property, and stating facts constituting the basis for that belief.~~

~~(c)~~ (b) Before, at the time of, or within three days after levy, the creditor shall serve on the individual a notice under AS 09.38.085, ~~including a copy of the affidavit filed under (b) of this section.~~

~~(d)~~ (c) A bid for property that is less than the amount of the exempt value is not acceptable at a sale of property under a levy. If indebtedness secured by a valid lien is chargeable against the proceeds of the sale, the bid must exceed the amount of the indebtedness secured plus the amount of the exempt value. If sufficient bid is not received, the officer shall file a notation of the fact with the clerk of the court and return the property to the individual. The costs incurred during levy, offering the property for sale, and returning the property shall be assessed against the creditor and are not recoverable from the individual, notwithstanding any agreement of the parties to the contrary.

~~(e)~~ (d) If any question arises as to the rights of an individual entitled to an exemption under this chapter, an interested person may file with the clerk of the court from which the process issued a statement of the claim of exemptions and the question raised. The statement shall be referred to the court as soon as practicable thereafter. The court shall order that notice of a hearing be given. After hearing the matter, the court shall make findings and issue an appropriate order. The court may award to the prevailing party costs of a proceeding under this subsection.

~~(f)~~ (e) An objection to levy on the ground that the property seized is exempt must be filed with the clerk of the court within 15 days after the levy. The burden of proving the validity of an exemption by a preponderance of the evidence is upon the individual claiming the exemption. Failure to file a timely objection ~~may~~ shall be held to be a waiver of a claim to exemption in the property, unless for cause shown the court excuses the failure. (§ 2 ch 62 SLA 1982) Failure to file an objection prior to sale shall be an absolute waiver of exemption rights.

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 68, SLA 1982.

(6) a statement in lay terminology of the rights of persons other than the individual as provided in AS 09.38.090.

(b) The supreme court may prescribe forms to be used by creditors, debtors and court officers under this chapter.

(c) A notice substantially complying with this section is effective even though the notice contains errors if those errors do not result in substantial prejudice to the rights of the individual debtor or of the dependents of the individual debtor. (§ 2 ch 62 SLA 1982)

Editor's notes. — Subsection (c) was enacted as the second sentence of subsection (b) but was redesignated by the revisor of statutes pursuant to AS 01.05.031(b).

This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.090. Assertion of rights by another. If an individual fails to select property entitled to be claimed as exempt or to object to a levy on the property or to assert any other right under this chapter, the spouse or a dependent of the individual or any other person authorized by law may make the claim or objection or assert the rights provided by this chapter. (§ 2 ch 62 SLA 1982)

~~**Sec. 09.38.095. Judicial relief.** (a) An individual or the spouse, a dependent of the individual, or any other person authorized by law is entitled to injunctive relief, damages, or both, against a creditor or other person to prevent or redress a violation of this chapter as provided in the Alaska Rules of Civil Procedure. A court may award costs and reasonable attorney fees to a party entitled to injunctive relief or damages.~~

~~(b) For cause shown the court may relieve a person from the consequences of failing to take timely action to assert rights under this chapter. (§ 2 ch 62 SLA 1982)~~

Sec. 09.38.100. Debtor's property owned with another. (a) If an individual and another own property in this state as tenants in common or tenants by the entirety, a creditor of the individual, subject to the individual's right to claim an exemption under this chapter, may obtain a levy on and sale of the interest of the individual in the property. A creditor who has obtained a levy, or a purchaser who has purchased the individual's interest at the sale, may have the property partitioned or the individual's interest severed.

~~(b) A partner's right in specific partnership property is exempt except on a claim against the partnership. If partnership property is attached for a partnership debt, the partners or any of them or the representatives of a deceased partner may not claim an exemption for that property under this chapter. (§ 2 ch 62 SLA 1982)~~

Cross references. — For provisions making homestead held by tenants for the entirety liable for the debts of either tenant after petition of tenancy, see AS 34.15.140(b).

Sec. 09.38.105. Waiver of exemption. A waiver of exemption executed in favor of an unsecured creditor before levy on an individual's property is unenforceable, but a valid security interest may be given in exempt property. (§ 2 ch 62 SLA 1982)

Sec. 09.38.110. Federal requirements. If a federal department or agency issues a formal ruling that a section of this chapter relating to public assistance will cause a state plan for the delivery of services or benefits to be out of conformity with federal requirements, the section will not apply to the extent that it causes the program to be out of conformity with federal requirements. (§ 2 ch 62 SLA 1982)

~~**Sec. 09.38.115. Adjustment of dollar amounts.** (a) The dollar amounts in this chapter change, as provided in this section, according to and to the extent of changes in the Consumer Price Index for all Urban Consumers for the Anchorage Metropolitan Area compiled by the Bureau of Labor Statistics, United States Department of Labor (the index). The index for January of the year in which this section becomes effective is the reference base index.~~

~~(b) The dollar amounts change on July 1 of each even-numbered year if the percentage of change, calculated to the nearest whole percentage point, between the index for December of the preceding year and the reference base index, is 10 percent or more, but~~

~~(1) the portion of the percentage change in the index in excess of a multiple of 10 percent is disregarded and the dollar amounts change only in multiples of 10 percent of the amounts appearing in this chapter on the effective date of this chapter; and~~

~~(2) the dollar amounts do not change if the amounts required by this section are those currently in effect as a result of earlier application of this section.~~

(c) If the index is revised, t

from subjection to process or

~~(c) If the index is revised, the percentage of change is calculated on the basis of the revised index. If a revision of the index changes the reference base index, a revised reference base index is determined by multiplying the reference base index applicable by the rebasing factor furnished by the United States Bureau of Labor Statistics. If the index is superseded, the index referred to in this section is the one represented by the Bureau of Labor Statistics as reflecting most accurately changes in the purchasing power of the dollar for Alaskan consumers.~~

~~(d) The Department of Labor shall adopt a regulation announcing~~

~~(1) on or before April 30 of each year in which dollar amounts are to change, the changes in dollar amounts required by (b) of this section; and~~

~~(2) promptly after the changes occur, changes in the index required by (c) of this section, including, if applicable, the numerical equivalent of the reference base index under a revised reference base index and the designation or title of any index superseding the index.~~

~~(e) The Department of Labor shall also provide notification of a change in exemption amounts required under (c) of this section to the clerks of court in each judicial district of the state. (§ 2 ch 62 SLA 1982)~~

Sec. 09.38.120. Protection of property of residents and nonresidents. (a) Residents of this state are entitled to the exemptions provided under this chapter. Nonresidents are entitled to the exemptions provided by the law of the jurisdiction of their residence.

(b) The term "resident" means an individual who is physically present in the state and who intends to maintain a permanent home in Alaska. (§ 2 ch 62 SLA 1982)

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.500. Definitions. As used in this chapter, unless the context otherwise requires,

(1) "burial plot" means a parcel of real estate used for burial of human remains and which is located within an area designated for cemetery purposes by the state or a general law or home rule municipality;

(2) "debt" means a legally enforceable monetary obligation or liability of an individual, whether arising out of contract, tort, or otherwise;

(3) "dependent" means an individual who derives support primarily from another individual;

(4) "earnings" means money received by an individual for personal services and denominated as wages, salary, commissions, or otherwise;

(5) "exempt" means protected, and "exemption" means protection, from subjection to process or a proceeding to collect an unsecured debt;

(6) "household goods" includes those items that make a residence habitable according to modern standards;

(7) "judicial lien" means a lien on property obtained by judgment, levy, sequestration, or other legal or equitable process or proceeding instituted for the purpose of collecting an unsecured debt;

(8) "levy" means the seizure of property under a writ of attachment, garnishment, execution, or any similar legal or equitable process issued for the purpose of collecting an unsecured debt;

(9) "lien" means a security interest, or a judicial, statutory, or common-law lien, or any other interest in property securing payment of a debt or performance of an obligation;

(10) "principal residence" means the actual dwelling place of an individual or dependents of the individual and includes real and personal property;

(11) "security interest" means an interest in property created by contract to secure payment or performance of an obligation;

(12) "serve notice" means to give the person to be served a written personal notice in the same manner a summons in a civil action is served, or to mail the notice to the person's last known address by first-class mail and by using a form of mail requiring a signed receipt;

(13) "statutory lien" means a lien arising by force of a statute under specified circumstances or conditions, but does not include a security interest;

(14) "value" means fair market value of an individual's interest in property, exclusive of liens of record;

(15) "wearing apparel" means clothing and garments intended and adapted to be worn on the person to protect the person against the elements or to provide personal comfort or decency, or serving to ornament the person but does not include jewelry. (§ 2 ch 62 SLA 1982; AS 09.38.125)

Editor's notes. — This section was enacted as AS 09.38.125 but was renumbered by the revisor of statutes pursuant to AS 01.05.031(b).

This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Sec. 09.38.510. Short title. This chapter may be cited as the Alaska Exemptions Act. (§ 2 ch 62 SLA 1982; AS 09.38.130)

Editor's notes. — This section was enacted as AS 09.38.130 but was renumbered by the revisor of statutes pursuant to AS 01.05.031(b).

HB 326
Fiscal Note
Analysis

This bill deals with commercial transactions, which are primarily between private parties. Because the number of these matters involving the Department of Law is relatively insignificant, there will not be a fiscal impact.

HB

334

MEMO

TO: Rep. Bussell, Chmn; Rep. Liska, Vice Chmn; Reps. Barnes, Clocksin, Hayes, Malone & Wendte

FROM: Staff Counsel

TOPIC: HB 334--"An Act relating to stays during appeals of administrative orders under the Administrative Procedures Act, (AS 44.62.570." --By Labor & Commerce Committee

1--This bill would amend paragraph (g) of existing law, AS 44.62.570, Scope of Review, which reads:

> (g) No stay may be imposed or continued if the court is satisfied it is against the public interest.

2--In one form or another, the proposed language has been used or referred to in court decisions over the years, However, the most strikingly similar language is expressed in Powell v. City of Anchorage, 536 P. 2d 1228 (decided 1973). (attached)

This case is Xeroxed and in Committee files. The language referred to is on the 2nd page, in footnote 2, which I bracketed and underlined for your reference. (I did not include the dissent which is twice as long as the opinion).

(The case dealt with topless and bottomless dancers which the city ordinance prohibited. The Superior Court first enjoined enforcement of the ordinance, later dissolved the injunction--so it would be enforced--and the dancers at The Embers appealed. THe Supreme Court agreed with the Superior Court, and nude dancing in Anchorage was banned--for a while).

3--The bill simply clarifies and puts in legislation guidelines courts actually have been using in staying orders of lower tribunals.

HB 334
Fiscal Note
Analysis

This bill clarifies the standards of review whereby the courts may grant stays during appeals of administrative orders under the Administrative Procedure Act. The Department of Law's legal staff believes that this clarification will assist the courts to make more timely and equitable rulings when stays are requested, saving both the public and regulatory agencies time and expense. This bill will not have a fiscal impact on the Department of Law.

Darlon POWELL et al., Petitioners,

v.

CITY OF ANCHORAGE, Respondent.

No. 2001.

Supreme Court of Alaska.

Decided June 27, 1973.

June 13, 1975.

Released for Publication June 13, 1975.

On appeal from an order of the Superior Court, Third Judicial District, Anchorage, Edmond W. Burke, J., dissolving a preliminary injunction against enforcement of a municipal ordinance which, in effect, prohibited nude dancing in premises licensed for sale or consumption of intoxicating liquor, appellant applied for an order staying the order of the Superior Court pending appeal. The Supreme Court, Rabinowitz, C. J., held that stay would be denied where appellants did not first present their application for a stay to the Superior Court and did not explain such failure.

Motion denied.

Connor, J., with whom Erwin, J., joined, dissented and filed opinion.

1. Appeal and Error ⇨458(1), 479(2)

Judgments in action for injunction are not stayable as of right; rather, whether a stay pending appeal of an order granting or dissolving an injunction will be granted is a question directed to the sound discretion of the court. Rules of Civil Procedure, rule 62(c); Rules of Appellate Procedure, rule 7(d)(2).

2. Appeal and Error ⇨478

In considering whether to grant a stay pending appeal, the lower court must consider criteria much the same as it would in determining whether to grant a preliminary injunction. Rules of Civil Procedure, rules 62(c), 65(d).

3. Appeal and Error ⇨478

In the unusual case when application for stay pending appeal is made in the Supreme Court without having previously been denied by the court below, there should be some explanation for failure to apply to the court below. Rules of Appellate Procedure, rules 7(d)(2), 25(b).

4. Appeal and Error ⇨477

In the usual case, the trial court should be given the first opportunity to consider an application for a stay of a judgment granting or denying an injunction, but exceptions should be made where the applicant makes a showing that relief in the superior court is unavailable, or that relief to be effective must be immediate and that it is improbable that the superior court can afford such immediate relief. Rules of Civil Procedure, rule 62(c); Rules of Appellate Procedure, rules 7(d)(2), 25(b).

5. Appeal and Error ⇨478

Stay pending appeal of order dissolving preliminary injunction against enforcement of allegedly unconstitutional city ordinance prohibiting, in effect, nude dancing in premises licensed for sale or consumption of intoxicating liquor would be denied where application for stay was not first presented to the superior court and there was no explanation for such failure, particularly where there was an almost total lack of showing on issue of irreparable injury and no contention was made before the Supreme Court in briefs and affidavits that denial of stay pending appeal would infringe First Amendment Rights. Rules of Civil Procedure, rule 62(c); Rules of Appellate Procedure, rules 7(d)(2), 25(b); U.S.C.A.Const. Amend. 1.

Stanley P. Cornelius, Cornelius, Inc., Anchorage, for petitioners.

John R. Spencer, City Atty., Anchorage, for respondent.

Before RABINOWITZ, Chief Justice, and CONNOR, ERVIN, BOOCHEVER and FITZGERALD, Justices.

ORDER *

RABINOWITZ, Chief Justice.

Petitioner Darion Powell owns an Anchorage cocktail lounge known as The Embers. The Embers, and several other local bistros, have in recent times gained a measure of notoriety by providing for their customers' viewing pleasure "topless and bottomless" dancers. Section 4-3(g) and (r) of the Code of Ordinances of the City of Anchorage prohibits a person from either appearing or authorizing another person to appear "in a licensed premises in which intoxicating liquor is offered for sale or consumed" while so "costumed or dressed so that the genitalia or pubic area is wholly or substantially exposed to view." On October 28, 1972, Powell, Powell's bartender petitioner George Goolsby, and petitioner Sheila Diane Bell were all arrested following a dance by Ms. Bell. The complaint charged, *inter alia*, that Bell had performed her dance in a licensed liquor establishment while "dressed or costumed" in a fashion prohibited by the ordinances.

The petitioners, shortly thereafter, filed a civil action against the City of Anchorage in which they asked the court to declare the ordinances unconstitutional and to permanently enjoin the City from further arrests and prosecutions under those ordinances. The superior court granted petitioners a preliminary injunction on November 27, 1972. Then on May 24, 1973, the superior court granted the City's motion for summary judgment, dismissed the petitioners' complaint with prejudice, and dissolved the preliminary injunction. Notice of appeal was filed on May 25, 1973. Petitioners have now presented this Court with an application for an order staying the May 24, 1973, order of the superior court. We deny petitioners' motion.

[1, 2] Judgments in actions for injunctions are not stayable as of right. Under Alaska Rule of Civil Procedure 62(c) the superior court is empowered to "suspend, modify, restore or grant" an injunction pending an appeal from a final judgment granting or denying an injunction. Whether a stay of an injunction pending appeal will be granted is a question directed to the sound discretion of the court.[1] In considering whether to grant such an injunction, the lower court must consider criteria much the same as it would in determining whether to grant a preliminary injunction.[2]

[3] The Supreme Court may also, in the exercise of its jurisdiction and "as part of its traditional equipment for the administration of justice," stay the enforcement of a judgment pending the outcome of an appeal.[3] Alaska Rule of Appellate Proce-

* This case was not placed in the Pacific Reporter at the time it was decided. Because various counsel have made reference to it in connection with other cases, it is now being published.

1. Shinholt v. Angle, 90 F.2d 297 (5th Cir. 1937); Kim v. China, 20 Cal.2d 12, 123 P.2d 438 (Cal.1942).

2. *See* 7 J. Moore, Federal Practice ¶ 62.05, at 62-24 (2d ed. 1972). Professor Moore suggests a four factor test:

(1) the likelihood that the petitioner will prevail on the merits of the appeal,
(2) irreparable injury to the petitioner unless the stay is granted,
(3) no substantial harm to other interested persons, and
(4) no harm to the public interest.

7 J. Moore, *supra* ¶ 62.05, at 62-25. *See also* Perry v. Perry, 88 U.S.App.D.C. 337, 190 F.2d 901 (1951); A. J. Industries, Inc. v. Alaska Public Service Commission, 470 P.2d 537 (Alaska 1970). Professor Moore observes that it may be the unusual case in which the trial judge would arrive at the conclusion that appellant is likely to prevail on appeal. But, that may occur in areas of the law where doubt clouds the correctness of the decision; and, there the court may stay an injunctive order.

Civil Rule 65(d) requires that *every* order granting an injunction shall set forth the reasons for its issuance.

3. State v. Norene, 457 P.2d 926, 927 (Alaska 1969) (quoting with approval Scripps-Howard Radio v. Federal Communications Comm'n, 316 U.S. 4, 9-10, 62 S.Ct. 875, 879, 86 L.Ed. 1229, 1234 (1942)).

dure 7(d)(2) regulates the procedure for seeking stays of judgments of the superior court pending appeal. That rule requires that an application for a stay of a judgment should first be made to the superior court and that ordinarily an original application to this court for a stay of judgment pending appeal will not be entertained unless it has previously been denied by the court below.[4] As we held in *State v. Norene*,[5]

> . . . [T]his rule does not require in all cases that applications for stay must be made to the superior court, . . . [nevertheless] departure from the rule should be accompanied by some explanation for the failure to apply to the superior court.[6]

No application was made to the superior court in this case, and the petitioners offer no explanation for their failure to do so.

[4, 5] As Professor Moore states, "[t]he stay or suspension of such judgments often involves a delicate balancing of the equities that only the court thoroughly familiar with the case is able to make."[7] We think that in the usual case the trial court should first consider an application for a stay of a judgment granting or denying an injunction. The Supreme Court, in *Cumberland Telephone and Telegraph Co. v. Public Service Commission*,[8] noted the desirability of having the trial court first pass on the application for a stay:

> [T]he court which is best and most conveniently able to exercise the nice discretion needed to determine this balance of convenience is the one which has considered the case on its merits, and therefore is familiar with the record.[9]

We think that it is a sound policy for the superior court to first consider applications for stays of judgment. Exceptions from this rule should be made where the applicant makes a showing that relief in the superior court is unavailable; or that relief to be effective must be immediate, and that it is improbable the superior court can afford such immediate relief.[10] Since the petitioners did not present their application for stay to the superior court and since they did not explain this failure, we deny their motion.

We further note the almost total lack of showing offered by petitioners going to the issue of irreparable injury. Here there is no showing that economic hardship or artistic handicaps will flow to petitioners if, pending final resolution of the merits, Bell performs her dance routine in a somewhat more modest fashion than heretofore. Nor has any contention been made before this court by petitioners in their briefs and affidavits that the operation of the injunction pending disposition of the appeal will in any manner infringe First Amendment rights.[11]

4. Appellate Rule 25(b) places the same requirement upon the party seeking a stay or an injunction of a judgment.

5. 457 P.2d 926 (Alaska 1969).

6. *Id.* at 929 (footnote omitted).

7. 9 J. Moore, Federal Practice ¶ 208.04, at 1409 (2d ed. 1973).

8. 260 U.S. 212, 43 S.Ct. 75, 67 L.Ed. 217 (1922).

9. *Id.* at 219, 43 S.Ct. at 77, 67 L.Ed. at 223. *See also* People *ex rel.* San Francisco Bay Conservation and Development Commission v. Town of Emeryville, 69 Cal.2d 533, 72 Cal. Rptr. 790, 446 P.2d 790 (Cal.1968).

10. *See* 9 J. Moore, Federal Practice ¶ 208.07, at 1423 (2d ed. 1973).

11. We note in passing that applicants fail to make the following necessary allegations in support of an application for stay of judgment granting or denying injunctive relief: they do not argue the likelihood of success on appeal, nor do they assert that the balance of hardships tips in their direction. *See supra* n. 2.

However, nothing we have said in this order precludes petitioners from moving the superior court to stay its final order. In the event that such a motion is denied, they are free again to seek review from our court.

MEMO

TO: Rep. Bussell, Chmn.; Rep. Liska, Vice Chmn.; Reps. Barnes, Clocksin, Hayes, Malone & Wendte

FROM: Staff Counsel

TOPIC: HB 338--by Rep. Fritz--"An Act relating to the payment of overtime and providing for an effective date."

1--The bill would add an exemption to existing overtime payment law, (AS 23.10.060) relative to overtime...The letter from Al Gay of Seair in Committee files explains it would be intended to be used as "trade days" only, without the necessity of filing with the Dept. of Labor.

2--The Deputy Director, Monty Henninger, Div. of Labor Relations, Dept. of Administration, was to have a position paper here today (Wed., May 4) favoring the bill, but first has to check with Mrs. Rudd, Commissioner and was having hold-ups in the typing pool and paper flow.

3--The statute, 23.10.060, was amended in 1980 with subparagraphs (17) and (18)(A) and (B), but that appears to permit the 4-day, 10-hour work week only and refers to nothing else.
Note: The 1980 amendments speak of the "flexible work hour plan" not flexible work week.

(There might even be a good argument that the "flexible work hour plan" language in subparagraph (17), standing alone, could be construed, or stretched, into a flexible work week, but the likely SUpreme Court interpretation would be contra, even though the Court noted in a decision there might be conflict with 23.10.060)

4--Note letter from Seair, Al Gay, indicates the "four tens" work week doesn't seem to work.

SEAIR

The Spirit of the Sky

RECEIVED
MILO H. FRITZ, M.D.

David: Can you look into this?
D

March 18, 1983

The Honorable Milo Fritz
Alaska State Legislature
Pouch "V"
Juneau, Alaska 99811

Dear Mr. ~~Fritz:~~ MILO

After talking to many employees in the airline industry, including other airlines than our own, we would like to have included in the Alaska statutes a "trade day", where employees could trade hours or days of work with another employee without falling under the overtime law now in effect (Section 23.10.060).

It is very difficult for an employee living in Alaska to go anywhere on a trip with only two days off (Saturday and Sunday), whereas if they could trade days with another employee, they could have three, four or more consecutive days off, thus allowing them more free time to travel outside or within Alaska. It is my understanding that the airlines which are presently under a separate bargaining agreement, such as a union, can do this now since they are not under the Alaska statutes. Enclosed is a copy of an employee request for substitution that is presently being used by Western Airlines.

I am told a simple paragraph can be inserted under Section 23.10.060, to read:

(19) Work performed under a trade day work plan wherein employees may agree to trade time or days worked between themselves.
(A) (The language necessary, such as the sample form, per attached.)

We have tried the ten-hour day, four-day week, and it simply does not work. The only reasonable and sensible substitute is an amendment to the Alaska statutes such as I have stated above.

Hopefully, you will sponsor a bill like this. I will give you all the support I can.

Best personal regards,

SEAIR

A. E. Gay, President

PART VII. JUDGMENT

Rule 32. Sentence and Judgment.

(a) Sentence. Sentence shall be imposed without unreasonable delay. Pending sentence the court may commit the defendant or continue or alter bail as provided in Rule 41(a), Alaska Rules of Criminal Procedure. Before imposing sentence the court shall afford the defendant an opportunity to make a statement in his own behalf and to present any information in mitigation of punishment. If the defendant is being sentenced following a plea of guiity or nolo contendere the court shall question the defendant to ascertain that he understood the meaning of his plea, and that it was freely and voluntarily entered.

(b) **Judgment—Execution.**

(1) *Execution.* The judgment of conviction shall set forth the plea, the verdict or findings, and the adjudication and sentence. At the time of imposition of sentence, the judge or magistrate shall make a statement on the record explaining his reasons for imposition of the sentence. If the defendant is found not guilty or for any other reason is entitled to be discharged, judgment shall be entered accordingly. The judgment shall be signed by the judge or magistrate and entered by the clerk. When the judgment has been entered, the clerk shall forthwith deliver to a peace officer a certified copy of the judgment for execution. The peace officer shall note on the copy of the judgment the date of its delivery to him. When the judgment has been executed, the peace officer shall promptly return the copy to the clerk with his proceedings endorsed thereon.

(2) *Conviction of a Corporation.* If a corporation is convicted of any criminal offense the court may give judgment thereon and shall cause such judgment to be enforced in the same manner as a judgment in a civil action, or as otherwise provided by law.

(c) **Pre-Sentence Investigation.**

(1) *When Made.* The probation service shall make a pre-

sentence investigation and report before the court imposes sentence or grants probation. The report shall not be submitted to the court or its contents disclosed to any one except counsel unless the defendant has tendered a plea of guilty or nolo contendere or has been found guilty. The court may utilize the report in determining if a bargained sentence recommendation will be followed pursuant to Rule 11. In the event the attorneys for the parties request the preparation of a presentence report to aid them in plea bargaining the court may order such report to be made prior to the time stated in this rule.

(2) *Report.* The report of the pre-sentence investigation shall contain any prior criminal conviction including a finding of delinquency of the defendant and such information about his characteristics, his financial condition, and the circumstances affecting his behavior as may be helpful in imposing sentence or in granting probation or in the correctional treatment of the defendant, and such other information as may be required by the court. No record of arrest or other police contacts shall be included in the report. The report shall be made available to the state's attorney and to the defendant's attorney in all cases and to the defendant unless the court enters on the record findings of reasons why the report would prove detrimental to the rehabilitation of the defendant or safety of the public. Unless otherwise ordered, further disclosure of the report shall be limited to the reviewing court on appeal and to the agencies having charge of the defendant's rehabilitation.

(d) **Sentencing Referrals to Three-Judge Panel.**

(1) If the trial court finds that extraordinary circumstances exist under AS 12.55.165, the case shall be transferred forthwith to a three-judge sentencing panel of the superior court. All pertinent files, records and transcripts shall be transmitted to the sentencing panel by the clerk of the court within 30 days of the date of the order transferring the case.

(2) Three judges of the superior court shall be appointed by the chief justice to be the regular members of the sentencing panel. Two other judges of the superior court shall be appointed by the chief justice as first and second alternate mem-

bers of the sentencing panel. At least one of the three regular members and one of the two alternate members of the sentencing panel shall reside outside of Anchorage. The term of appointment of the regular and alternate members of the sentencing panel shall be two years, except that the first three regular members appointed shall serve staggered terms of one, two, and three years. The chief justice may appont additional alternate members of the sentencing panel to serve on a case-by-case basis in the event of the disability or disqualification of more than two judges.

(3) The chief justice shall appoint one of the three regular members to be administrative head of the sentencing panel and his or her office shall serve as the administrative repository for all papers and documents pertaining to cases submitted to the sentencing panel.

(4) Both the prosecuting attorney and the defendant may exercise in a timely fashion a challenge for cause, or a peremptory challenge if not previously exercised, to one judge or the sentencing panel in accordance with AS 22.20.022 and Rule 25(d)(1), Alaska Rules of Criminal Procedure. In the event that a judge on the sentencing panel is the same judge who made the finding under subsection (1) of this rule, that judge shall be automatically disqualified.

(5) The sentencing panel shall either sentence the defendant or remand the case to the court within 60 days from the date that the case was transmitted to the sentencing panel. The sentencing panel shall provide a written statement of its findings and conclusions in support of any order remanding a case to the trial court.

(6) If the sentencing panel elects to take testimony or sentence the defendant under AS 12.55.175(b) or (c), both the prosecution and the defendant shall have the right to be present in court during the proceedings. The defendant shall have the right to address the sentencing panel personally before sentence is imposed. The proceedings shall be held in a location best suited to the convenience of the parties and the court as determined by the sentencing panel.

(7) If the three-judge sentencing panel imposes sentence on the defendant, any further sentencing proceedings, includ-

ing proceedings relating to sentence modification, shall occur before the same three-judge panel, who shall be considered the sentencing court. If at the time further proceedings are requested any of the three judges is no longer available, one or more alternate members shall sit in the same fashion as provided for in AS 12.55.175(a).

(8) The right to bail of a convicted defendant is neither conferred nor enlarged by this rule.

(e) **Transcript of Sentencing Proceeding.** A transcript of any sentencing proceeding at which the defendant is committed to serve in excess of 6 months on one or more charges shall be prepared and furnished to the state attorney, defendant, and the Alaska Parole Board. (Amended by Supreme Court Order 157 effective February 15, 1973; by Amendment No. 5 to Supreme Court Order 157 effective July 1, 1974; by Supreme Court Order 330 effective January 1, 1979; by Supreme Court Order 418 effective August 1, 1980; and by Supreme Court Order 436 effective October 21, 1980)

(a) **CROSS REFERENCES:** AS 12.55.010; Crim. Form 38
(d) **CROSS REFERENCES:** Crim. Forms 39, 40

Rule 32.1 Appeal From Conviction of Sentence—Notification of Right to Appeal.

A person convicted of a crime after trial shall be advised by the judge or magistrate:

(a) That he has the right to appeal from the judgment of conviction within 30 days (or 15 days in appeals from the district court made under Rule 217, Alaska Rules of Appellate Procedure) from entry of the judgment of conviction by filing a notice of appeal with the clerk of court.

(b) That in accordance with Appellate Rule 215, the defendant may appeal the sentence on the ground that it is excessive, that upon such appeal the court may reduce or increase the sentence, and that by appealing the sentence, the defendant waives the right to plead that by a revision of the sentence resulting from the appeal he has twice been placed in jeopardy for the same offense.

(c) That if he wants counsel and is unable to pay for the services of an attorney, the court will appoint an attorney to represent him on the appeal. (Added by Supreme Court Order 157 effective February 15, 197.; amended by Supreme Court Order 218 effective January 15, 1976; and by Supreme Court Order 536 effective October 1, 1982)

Rule 32.2 Sentence Appeal.

(Added by Supreme Court Order 157 effective February 15, 1973. Rescinded by Supreme Court Order 218 effective January 15, 1976)

AMENDMENT #1

Offered in the Judiciary Committee By Clocksin

TO: HB 345

Page 1, line ~~27~~ 14 (inserted) - page 2, line 4-7 (replace)

Delete all material and insert "(5) in the case of a conviction for a felony offense, verified information stated in a nonargumentative style assessing the financial, social, psychological, and medical impact upon and cost to any person who was the victim of the offense committed by the defendant. The report shall also include a statement of any need of the victim for restitution and and such other information as may be required by the court."

AMENDMENT #2

Offered in the Judiciary Committee By CLocksin

TO: HB 345

Page 2, line 11 - page 3, line 6

Delete all material and insert:

Sec.3. AS 12 is amended by adding a new chapter to read:

CHAPTER 61. RIGHTS OF VICTIMS AND WITNESSES

Sec. 12.61.010. RIGHTS OF VICTIMS AND WITNESSES. (a) Victims and witnesses of crimes have the following rights:

(1) the right to be informed by the appropriate law enforcement agency or the prosecuting attorney of the final disposition of the case in which the victim or witness is involved;

(2) the right to be notified that a court proceeding to which the victim or witness has been subpoenaed will not occur as scheduled, in order to save the person an unnecessary trip to court;

(3) the right to receive protection from harm and threats of harm arising out of cooperation with law enforcement and prosecution efforts, and to be provided with information as to the level of protection available;

(4) the right to be informed of the procedure to be followed to apply for and receive any witness fees or victim compensation to which the person may be entitled;

(5) the right to have any stolen or other personal property expeditiously returned by the law enforcement agency unless it is unlawful to return the property;

(6) the right to cooperate with the criminal justice process without loss of pay and other employee benefits and without interference in any form by the employer of the victim or witness of crime; and

(7) the right to access to immediate medical assistance and not to be detained for an unreasonable length of time by a law enforcement agency before having medical assistance administered; however, an employee of the law enforcement agency may, if necessary accompany the person to a medical facility to question the person about the criminal incident if the questioning does not hinder the administration of medical assistance.

(b) Law enforcement agencies, prosecutors, and the courts shall make a reasonable effort to assure that victims and witnesses of crimes have the rights set out in (a) of this section.

(c) The family members of a homicide victim shall be afforded all of the rights established under (a)(1) - (7) of this section. For purposes of this subsection, "family members" include a spouse, child, brother, sister, parent, or legal guardian.

AMENDMENT #5

Offered in the Judiciary Committee

TO: HB 345

Page 3, lines 7-12

Delete all material and insert:

Sec. 4. AS 12.55.185 is amended by adding a new paragraph to read:

(11) "victim" means the victim of the offense or, in the case in which the victim has died, the term includes a spouse, parent, child, brother, sister or legal guardian of the victim.

Page 3, lines 15-17

Delete "the evidence presented and opinions expressed by the victim or the victim's immediate family in accordance with AS 33.15.065," and insert "comments received from the victim as defined by AS 12.55.185(11),".

all pertinent information that will enable the board to make a determination.

*Sec. 6. AS 33.15 is amended by adding a new section to read:

Sec. 33.15.065 RIGHT OF VICTIM TO COMMENT ON PAROLE OF PRISONER. upon request of the victim)

(a) Notice of a hearing to review or consider the parole eligibility or the setting of a parole date for a prisoner in a state prison who is convicted of a crime against a person as set out in AS 11.41, except custodial interference under AS 11.41.320 and AS 11.41.330, or a crime against a person in this or another jurisdiction having elements substantially identical to those of a crime against a person as set out in AS 11.41, except custodial interference under AS 11.41.320 and AS 11.41.330, shall be sent to the victim of the crime ~~to the victim's immediate family~~ as defined in AS 12.55.185(11), at least 30 days prior to the scheduled hearing, unless the victim ~~or the victim's family~~ has indicated that ~~they don't~~ he or she does not wish to be notified.

(b) It shall be the responsibility of the victim ~~the victim's immediate family~~ to keep the board apprised of ~~their~~ his or her most current mailing address. If the Board has not been kept apprised of the most current mailing address, notice required under (a) of this section shall be sent to the last known address of the victim ~~or the victim's immediate family~~. The address of the victim ~~or the victim's immediate family~~ shall in no circumstances be disclosed to the prisoner or the prisoner's attorney.

(c) The victim, ~~or the victim's immediate family~~, has a right to comment in writing on the proposed action of the board. Copies of those comments shall be provided to the ~~Copies to Atty~~ defendant's attorney.

(d) The board, in deciding whether to release the prisoner on parole shall consider the comments presented under (c) of this section.

(e) If the board decides to release a prisoner who is convicted of a crime against a person as set out in (a) of this section on parole, notification of that decision shall be sent to the victim, ~~or the victim's immediate family,~~ prior to the prisoner's release date. Notification under this subsection shall include the expected date of the prisoner's release, the geographic area in which the prisoner is required to reside, and any other pertinent information concerning the prisoner's conditions of parole that may impact the victim. The board shall make every reasonable effort to notify the victim ~~or the victim's immediate family~~ of the pending parole of the prisoner unless ~~they have~~ (the victim has) indicated that ~~they~~ he or she ~~don't~~ does not wish to be notified.

*Sec. 7. AS 33.30.250 is amended by adding a new subsection to read:

(h) In the case of a prisoner convicted of a crime against a person as set out in AS 11.41, except custodial interference under AS 11.41.320 and AS 11.41.330, or a crime against a person in this or another jurisdiction having elements substantially identical to those of a crime against a person as set out in AS 11.41, except custodial interference under AS 11.41.320 and AS 11.41.330, notice of the commissioner's

the prisoner for release under (a) of this section shall be sent (if requested) to the victim, ~~or the victim's immediate family~~ as defined in AS 12.55.185 (11). The victim, ~~or the victim's immediate family~~ may comment in writing on the intent of the commissioner to release the prisoner in work furlough status. The commissioner shall consider the comments of the victim, ~~or the victim's immediate family~~ prior to making a final decision to release a prisoner under (a) of this section. The victim, ~~or the victim's immediate family~~ shall keep the commissioner apprised of the person's current mailing address. The commissioner shall make every reasonable effort to notify the victim, ~~or the victim's immediate family~~ of an intent to consider a release of a prisoner under (a) of this section, unless the victim ~~or the victim's family~~ has indicated that ~~they don't~~ he or she does not wish to be notified. The notice shall contain the expected date of the prisoner's release and the geographic area in which the prisoner will reside.

*Sec. 8. AS 33.30.260 is amended by adding a new subsection to read:

(b) In the case of a prisoner convicted of a crime against a person as set out in AS 11.41, except custodial interference under AS 11.41.320 and AS 11.41.330, or a crime against a person in this or another jurisdiction having elements substantially identical to those of a crime against a person as set out in AS 11.41, except custodial interference under AS 11.41.320 and AS 11.41.330, notice of the commissioner's intent to consider the prisoner for release under (a) of this section shall be sent (if requested) to the victim, ~~or the victim's immediate~~

~~family~~ as defined in AS 12.55.185(11). The victim, ~~or the victim's immediate family~~ may comment in writing on the intent of the commissioner to release the prisoner in rehabilitation furlough status. The commissioner shall consider the comments of the victim, ~~or the victim's immediate family~~ prior to making a final decision to release a prisoner under (a) of this section. The victim, ~~or the victim's immediate family~~ shall keep the commissioner apprised of the person's current mailing address. The commissioner shall make every reasonable effort to notify the victim, ~~or the victim's immediate family~~ of an intent to release a prisoner under (a) of this section, unless the victim ~~or the victim's immediate family~~ has indicated that ~~they don't~~ he/she does not wish to be notified. The notice shall contain the expected date of the prisoner's release and the geographic area in which the prisoner will reside.

*Sec. 9. The effect of Section 1 of this act is to amend Rule 32(d)(2) of the Alaska Rules of Criminal Procedure by adding a requirement for a Victim Impact Statement as part of a court ordered Presentence Report.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

House Bill No. 345

"An Act relating to a victim's rights in the sentencing and parole hearings and furlough determinations of a person convicted of a felony; and making changes in sentencing procedures."

Section 1. AS 12.55.025 (a) amended to require that victim's or the immediate family of victim's evidence and opinions be included as part of the presentence report.

Section 2. AS 12.55.155 (c) is amended by adding "(27) the defendant's conduct caused substantial physical, emotional, or financial harm to the victim or, if the victim has died as a result of the defendant's conduct, to the victim's immediate family." as an aggravating circumstance under presumptive sentencing procedure.

Section 3. AS 12.55.155 (f) is amended to require the defendant to provide written notice to the victim or immediate family of the victim if the defendant seeks to establish a factor in mitigation in proceedings. This notice must be filed ten days prior to the date set for imposition of sentence. The victim or victim's immediate family may appear personally or by counsel at aggravation or mitigation proceedings and sentencing proceedings.

Section 4. AS 12.55.155 (h) adds a definition of "immediate family" which includes a spouse, child, parent, brother, sister, parent-in-law, brother-in-law, or sister-in-law.

Section 5. AS 33.15.060 (a) is amended to require the parole board to consider evidence presented and opinions expressed by the victim or the victim's immediate family in parole determinations.

Section 6. AS 33.15 is amended by adding a new section, AS 33.15.065, which requires the parole board to send notification of hearing to review or consider parole eligibility or the setting of a parole date to the victim or the victim's immediate family 30 days before the hearing. It is the responsibility of the victim or the victim's immediate family to keep the board informed of the person's current address.

Section 7. AS 33.30.250 (g) is amended by adding a new paragraph which would prohibit a prisoner from being placed on furlough status if the victim or the victim's immediate family submits a written statement outlining the objections and supporting evidence to the Commissioner.

Section 8. AS 33.30.250 (g) is amended by adding a new section which requires the commissioner to notify the victim or victim's immediate family of intention to release the prisoner on work furlough unless the Commissioner receives a written statement outlining the objections and supporting evidence, if any, advocated by the victim or

POSITION PAPER/Department of Health & Social Services

the victim's immediate family.

Section 9. AS 33.30.260 is amended by giving the victim or victim's immediate family the right to object to rehabilitation furlough under the conditions and procedures set out in AS 33.30.250 (h).

Summary

The Department supports the concept of evidence and statements of the victim being included in sentencing, parole hearings, and furlough determinations. However, the bill, as written (Sections 7, 8, and 9), give victims or immediate family of victims the authority to prohibit prisoners from being granted furlough by objecting in writing to the Commissioner. The Department opposes to this authority being placed with victims because, constitutionally, the Department is charged with the responsibility of reformation of offenders. Furlough is an intricate part of the reformation process. Because of ineligibility or lack of program space, all prisoners do not participate in furlough programs. However, those prisoners referred to in section 7, 8, an 9 would be determined furlough eligible prior to contacting the victim or the victim's immediate family. The victim or the victim's immediate family could by objecting in writing prohibit the prisoner's participation in the furlough program whether or not the objections have merit.

It should be noted that furlough determinations are based on factual information regarding the prisoner's suitability for furlough release. The Department does not oppose including opinions, evidence and facts being presented by the victim or victim's immediate family as part of the furlough determination process, but placing the authority to veto furlough participation with the victim or the victim's immediate family is not acceptable. The Department recommends the language in sections 7, 8, and 9 be changed to indicate the victim's right to provide statements and evidence to the Commissioner to be used in the consideration of furlough determination.

IV. ANALYSIS

A. Assumptions

1. Sections 1, 2, and 3

These sections set up a legal process by which victims or their survivors can present testimony which will have bearing on mitigating/aggravating factors and sentencing. It is the opinion of this writer that this procedure will result in longer sentences for some persons convicted of felony offenses. It is believed that sentencing judges will be persuaded to give longer terms of incarceration as a direct result of such testimony. This opinion is subjective and there is no way to measure to ultimate impact on the State's inmate population.

2. Section 4

No effect.

3. Sections 5 and 6.

This section requires the Parole Board to consider "evidence presented and opinions expressed by the victim or the victim's immediate family . . ." The provisions of this section could result in some parole candidates not receiving parole based on the testimony presented by the victim. Again, there is no way to measure the potential impact on the inmate population.

4. Sections 7, 8, and 9.

These three sections will directly affect the number of persons who are released on either work or rehabilitation furloughs. Sections 7 and 9 will allow for a victim to automatically bar a prisoner from the work or re habilitation furlough programs by submitting a written objection. It is assumed that a significant number of victims would submit a statement of objection to furlough release for the inmate.

It is assumed that approximately 300 felons are released each year into the furlough porgrams. Based on the above, it is assumed that 25% of the eligible candidates will be prevented from entering the furlough programs due to victim objections. Thus, 75 prisoners will be required to serve out the remaining sentence period in a state correctional center. The typical furloughee has 120 days of residual incarceration at the time entering the furlough program. Therefore, there will be 75 times 120 days or 9000 person days (24.7 person years) of added jail time generated by these provisions of House Bill No. 345.

Since there is currently a waiting list of persons eligible for entering the furlough program, it would not be accurate to indicate the need for the additional 25 beds. Enactment of this bill would, however, reduce by 25 the number of community beds which could be used as an alternative to incarceration in a state correctional center.

B. Program Summary

An estimate for additional operating costs cannot be made without more quantifiable data.

C. Economic Impact

Passage of this bill should have little impact on the State's economy.

D. Impact on Local Governments

This bill should have no fiscal impact on local governments.

Official Business

MEMORANDUM

TO: Representative Joe Flood

FROM: Mark K. Johnson
Staff Counsel

SUBJECT: Proposed Victim's Legislation

Attached is a draft of legislation that would establish certain basic rights for the victims of felonies at the sentencing phase of a criminal trial as well as during hearings for parole and furlough.

The legislation is modeled after provisions of Arizona law that were adopted by that state's legislature in 1982. Similar language was added to California law through the initiative process in June of 1982.

Section 1 of the legislation would provide that in sentencing individuals for felonies, the presently required pre-sentence report would also include "evidence and opinions expressed by the victim...concerning the physical, emotional, or financial harm caused the victim" as a result of the defendant's conduct.

Section 2 of the proposed legislation would establish an additional aggravating factor to be considered by the court in passing sentence upon a person convicted of a felony. This aggravating factor relates to the harm caused the victim as a result of the crime.

Section 3 would provide that the victim of a felony shall be notified at least 10 days before the sentencing of the defendant and that at this phase of the proceedings the victim would have the right to appear and participate. At that time, the victim, appearing personally or through counsel, may present evidence or opinions concerning the harm suffered by the victim or his immediate family as a result of the crime. The court would be required to consider this testimony in sentencing the offender.

Section 4 would define "immediate family", as used in the first three sections of the bill relating to sentencing.

Section 5 would require the Parole Board to consider the evidence and opinions offered by the victim at the sentencing hearing during the parole process.

Section 6 extends to the victim of the crime the right to receive notice of a parole hearing for an offender, the right to appear and present evidence and opinions at that hearing, and provides that the Parole Board shall consider

those statements in their deliberation on the decision to grant parole.

Section 7 would add the harm caused to the victim to a list of relevant considerations to be used by the Commissioner of Health & Social Services in determining whether an offender should be released on furlough.

Section 8 extends the notice and testimonial rights mentioned in sections 3 and 6 of the bill to the victim of a felony in a furlough determination to be made by the Commissioner of Health & Social Services.

Section 9 grants the victim of a felony the right to object to the granting of a furlough by the commissioner.

In each of the new provisions, if the victim has died as a result of the defendant's conduct, the victim's immediate family shall have the rights granted to the victim.

While far broader legislation on the subject of victim's rights is certainly possible, the provisions of this legislation are some strong and positive efforts to afford greater consideration to the victims of crimes. A copy of a Newsweek article on this subject is attached.

Marietta Durkin (left), her mother on couch: A grieving family fights back

Giving Victims a Say in Court

The marriage of Tiberiu and Norma Nistor had dissolved long before Norma fired seven shots into her husband, pausing once to reload. He had come home to collect his books; Norma shot him before he could leave. Then she called a friend who remembers Norma saying, "I killed him. He deserved it." For the Tucson, Ariz., police, the murder was an open-and-shut case. But when it reached the Pima County prosecutor's office, other factors came into play—Norma's agitated emotional state and a history of domestic violence. Exercising his discretion, an assistant county attorney struck a deal with Norma's lawyers that allowed her to plead "no contest" to the homicide charge and receive a prison term of no more than seven years.

When this news reached Tiberiu's relatives in Pennsylvania, they were furious. "Our initial reaction was utter disbelief," recalls Robert Durkin, Tiberiu's brother-in-law. But the prosecutors, who now admit they made a mistake, were trapped: they could not legally disown a completed plea bargain. Durkin's remaining card was Arizona's new victims' rights law, which gives crime victims, or their families, independent standing to appear before a sentencing judge. In the first test of the law, Durkin and his wife, Marietta, Tiberiu's sister, demanded a hearing to overturn the deal. Over the objections of both Norma's lawyer and the prosecutor, Durkin's attorney argued that accepting a no-contest plea—which did not even automatically bar Norma from inheriting Tiberiu's $345,000 in life insurance—amounted to a miscarriage of justice. Four weeks later, Judge William Druke agreed; a murder trial will probably begin this spring. Says Durkin: "We feel vindicated."

Durkin's vindication may recalibrate the scales of justice. Until recently, the crime-victims' movement has concentrated on obtaining compensation for victims and encouraging private lawsuits against criminals. Now victims are lobbying legislatures to give them a voice in the criminal courts. Already, Connecticut and California have joined Arizona in granting victims the right to have their say—what lawyers call "the right of allocution." At least nine other states and Congress have directed trial judges to consider written "victim impact statements" before sentencing guilty defendants. And President Reagan's Task Force on Victims of Crime has gone further, calling for a constitutional amendment to give victims the right "to be present and be heard at all critical stages of judicial proceedings."

Competing Interests: These proposals represent a fundamental shift in the conventional courtroom calculus. Prosecutors serve the state, defense lawyers worry only about their clients and judges try to mete out justice. The victim, unless called as a witness, plays no role in the process. Until recently, the assumption was that the prosecutor represented the victim's interest. But as Yale law Prof. Abraham Goldstein points out, often that is not the case. "To the prosecutor, the victim is one among many competing interests," he says, among them unclogging court dockets. "We can't leave the victim to the prosecutor's discretion anymore," says Lois Haight Herrington, head of the Victim's Task Force and a former prosecutor.

Nistor: No deal

Giving a victim a say may also serve as good therapy. "If they don't have an opportunity to express their pent-up anger, they carry it with them for the rest of their lives," says John M. Bailey, chief prosecutor in Hartford County, Conn.

But proposals granting victims the right to speak are more controversial than they seem. Some defense lawyers fear that an emotional appeal by a flesh-and-blood victim may improperly sway a judge as well as cause further court congestion. A more practical issue is when the victim should be heard. If he waits until a sentencing hearing, it may be too late to affect the outcome: many plea bargains are really "sentence bargains" that the judge has tacitly agreed to in advance—before the victim gets his day in court.

Including victims in the system may also place extra burdens on them. "The victim may be on the spot, feeling like a failure if he doesn't get a triple-digit sentence out of the judge," says University of Chicago law Prof. Franklin Zimring. And, says Harvard law Prof. Alan Dershowitz, the proposals may only lead to more unequal justice, "returning us to the day when each victim's life was worth a different amount." He argues that judges will become more concerned with "attractive" victims, while the law should demand that all victims be treated equally. Dershowitz prefers a system that would encourage victims to bring civil suits against their assailants. That is what the parents of Ronnie Joan Garland, a Yale student murdered by her college boyfriend, did. They recently won a $30,000 judgment against Richard Herrin, who killed her.

Modest Expectations: Expanding the rights of victims in courts seems likely in the short run, if only because legislators, who are powerless to stem high crime rates, can at least do something by taking up the victims' cause. But as with other reforms in criminal justice, modest expectations are in order. Experiments indicate that few victims actually appear in court to advise judges of their views, except in homicide cases where surviving relatives often closely track a case. Philadelphia Judge Lois Forer, author of "Criminals and Victims," says that while she routinely invites victims to sentencing hearings, they seldom choose to speak; in Connecticut, court officials estimate that victims appear at no more than 3 percent of the sentencing hearings. And when they do come to court, victims are often more interested in alternative sentences that involve restitution; they seldom demand pure vengeance. That's a comforting thought, and may be the best reason for allowing victims to join the cacophony in the criminal courts.

April 29, 1983

The Honorable Charles Bussell
Chairman, House Judiciary Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Bussell:

Attached is a proposed committee substitute for H.B. 345. After conferring with your committee's counsel, Joseph Brewer, I prepared my amendments in this form rather than as amendments. I have discussed this proposed committee substitute with Ms. Forsythe, of the Court system, with Mr. Trivette of the Parole Board, and with Ms. Amy Webb of the Division of Adult Corrections. It was my intent to strengthen the provisions of the bill while retaining the prime sponsor's original intent, clear up possible legal problems, and produce a final bill that would have a zero fiscal note. All the parties consulted agree that this has been accomplished.

You may have questions regarding this proposed substitute, as you or your fellow committee members may likewise have further questions regarding my testimony on this bill. Unfortunately, I will be out of town from April 30 through May 6. If my presence is required for further hearing on this matter, I will be available on the afternoon of May 6.

I trust this proposed committee substitute is in agreement with your committee's desire on this legislation. If I can be of further assistance, do not hesitate to contact me.

Sincerely,

NORMAN C. GORSCH
ATTORNEY GENERAL

The Honorable Charles Bussell
Chairman, House Judiciary Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Bussell:

Attached is a proposed committee substitute for H.B. 345. After conferring with your committee's counsel, Joseph Brewer, I prepared my amendments in this form rather than as amendments. I have discussed this proposed committee substitute with Ms. Forsythe, of the Court system, with Mr. Trivette of the Parole Board, and with Ms. Amy Webb of the Division of Adult Corrections. It was my intent to strengthen the provisions of the bill while retaining the prime sponsor's original intent, clear up possible legal problems, and produce a final bill that would have a zero fiscal note. All the parties consulted agree that this has been accomplished.

You may have questions regarding this proposed substitute, as you or your fellow committee members may likewise have further questions regarding my testimony on this bill. Unfortunately, I will be out of town from April 30 through May 6. If my presence is required for further hearing on this matter, I will be available on the afternoon of May 6.

I trust this proposed committee substitute is in agreement with your committee's desire on this legislation. If I can be of further assistance, do not hesitate to contact me.

Sincerely,

NORMAN C. GORUSCH
ATTORNEY GENERAL

The Honorable Charlie Bussell
Chairman
House Judiciary Committee
Pouch V
Juneau, Alaska 99811

Dear Chairman Bussell:

I have carefully reviewed the proposed committee substitute for HB 345 that has been prepared by the Department of Law. I would appreciate it if you and the committee would consider the following comments on this proposed substitute.

First of all, I would like to indicate that I do not believe that the changes made to the legislation by the department are necessarily hostile to my original intentions in introducing this measure. In many instances the changes improve upon the provisions of the original bill and make it more workable under Alaska law. It is important to keep in mind that the provisions of the original bill were borrowed from other jurisdictions, primarily Arizona and California, and accordingly may require some changes in order to conform them to Alaska law.

Section 1 of the departments proposal would add to the presentence report the requirement that a "victim impact statement" be prepared by the probation officer. This material would then be considered by the court in making a sentencing decision. By and large, this new provision is consistent with my original intention but raises two major problems:

(a) The process set up by the department through sections 1,2, and 3 of the proposed substitute would not allow the victim, or the victim's family the right to appear personally, or through counsel, at the sentencing hearing. Thus, the sentencing hearing would continue to be a setting in which only the court the prosecutor, and the defendant would be parties to the discussions. Quite frankly, while I would prefer that the right to appear continue to be a part of the legislation, I don't know which of the procedures is a better one. I would therefore urge that the committee very carefully consider and discuss this situation before taking action.

(b) The addition of the "victim impact statement", would raise the issue of the need for a change in court rules. See section 9 of the proposed substitute. As you know, under the state constitution, a change in court rules requires a

two-thirds vote in both bodies to be effective. The problem with changes in court rules is that too often the determination of whether or not such a change will occur or is necessary is made by a legal draftsman and not the legislature. If such a determination is to be made in this case, it should be made by the committee on the basis of a careful analysis of the proposal that it has before it, and not by a draftsman. Furthermore, I believe that it is relevant to understand that I am interested in placing provisions such as those contained in the original bill in the statutes during this legislative session. To intentionally amend the measure to require that it be approved by a two-thirds majority in the legislature does not appear to contribute to this goal. Once again, I would urge the committee to carefully consider the effect of this proposed change before acting.

Section 2 of the proposed substitute deletes from section 1 of the original bill the language: "...and other factors relating to the crime, the defendant, disposition of the defendant upon sentencing,...". While I am not aware of the department's motivation in deleting this language, it would appear that the change is intended to remove terms which do not have a specific meaning under Alaska law and might render this section ambiguous. I do not oppose this change.

Section 3 of the proposed substitute conforms the new aggravating factor used in determinate sentencing to the amendments suggested above. One issue that should be considered by the committee is whether the deletion of the reference to physical harm to the victim is an appropriate change. While my first reaction is that this reference should not be dropped, the department may be able to offer some rationale for this change.

In essentially dropping section 3 of the original bill, the department also deletes the requirement that notice of the sentencing hearing be served on the victim or the victim's family. Absent a good explanation by the department for this change, I would oppose this change.

Section 4 of the proposed substitute re-defines "immediate family" to exclude in-laws and include guardians. I do not oppose this change.

The remaining sections of the proposed departmental substitute would basicly remove from the bill a victim's right to appear at and object to parole and furlough proceedings and determinations. I have discussed this proposed change with the department and am inclined to agree with them that to give a victim, or his immediate family, the right to object to these determinations may pose significant due process problems. In my view, once an individual has served a period of incarceration, circumstances have changed to an extent that the rights of the victim or the victim's family may be appropriately weighed against those of the offender. Granting to the victim, or the victim's immediate family, the right to comment on a pending release and requiring the decision-maker to consider those comments in reaching a decision seems to be an appropriate way to balance these interests. Given the possibility of due process objections, I would endorse these proposed changes.

In closing, I would like to make clear to the committee that I believe that this legislation should be given expedited consideration during this session of the legislature. While the committee should take a tough stance in those instances where the proposed departmental substitute would undermine the intentions of the legislation, it should accommodate the suggestions of the department in those instance were it does not harm the intention of the legislation. The important goal, in my mind, is to give victims of crimes and their immediate families some sort of meaningful impact on sentencing, parole and furlough decisions this year. I hope the committee will work with the department, the court system and myself in achieving this goal.

Thank you for the opportunity to comment on the proposed departmental substitute.

Sincerely,

Joe Flood

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

HOUSE BILL NO. 352

"An Act relating to the definition of death; and providing for an effective date."

BACKGROUND

A Uniform Definition of Death has been endorsed by the National Conference of Commissioners on Uniform State Laws, the American Medical Association, the American Bar Association, the President's Commission for the Study of Ethical Problems in Medical and Biomedical and Behavioral Research as well as by the American Academy of Neurology and the American Electroencephalographic Society. The Uniform Definition is as follows:

> "An individual who has sustained either (1) irreversible cessation of circulatory and respiratory functions, or (2) irreversible cessation of all functions of the entire brain, including the brain stem, is dead. A determination of death must be made in accordance with accepted medical standards."

According to information received from the Commissioners on Uniform State Laws, 19 states have now adopted this definition, up from two states in 1981.

DISCUSSION

The definition proposed in this Bill, differs from the Uniform Definition in several respects:

1. In the Bill, "person" is substituted for "individual". The Uniform Definition purposely included the term "individual" to conform to the standard designation of a human being. The term "person" was not used because it is sometimes used by the law to include a corporation. Although that particular confusion would be unlikely to arise, the narrower term "individual" is more precise and thus avoids possibility of confusion.

2. In the Bill, the phrase "medically and legally dead" is used. The Uniform Definition prefers the phrase "is dead" since the broader provisions were considered to be misleading. The President's Commission stated, "A law setting a general standard without explicit limitations would be assumed to apply for all legal purposes; to say so in the statute, however, only raises needless questions (e.g., what does 'all legal purposes' leave out? For example, proceedings in equity?)"[1]

[1/] Defining Death. Medical, Legal and Ethical Issues in the Determination of Death. President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. Pg. 79. Government Printing Office, Washington, D.C., 1981.

3. The Bill sets the standard for establishing death as "ordinary standards of medical practice", while the Uniform Definition adopts "accepted medical standards". This difference is probably not important.

4. The Bill adds a provision that death may be pronounced "before artificial means of maintaining respiratory and cardiac function are terminated." The Uniform Definition avoids the necessity for such a provision by simply stating that an individual "is dead" when either "irreversible cessation of circulatory and respiratory function or irreversible cessation of all functions of the entire brain, including the brain stem" has occurred. When either of these circumstances prevails, the appropriateness of stopping medical intervention is apparent.

POSITION

While the Department considers the definition proposed in the Bill to be better than the current statutory definition, it would prefer that the Uniform Definition of Death be adopted.

ANALYSIS

HB 360

1. Passage of HB 360 will require a full time, seasonal, Tax Examiner to handle a minimum of 150 applications. Each application and attendant Financial Statement requires 1.5 to 2.0 hours of processing and in addition clerical time of approximately one hour per application is required.

   To insure equitable compliance wth the law, a full time investigator will be needed and audit and investigation will require a minimum of eight field trips per year.

   Supplies and commodities include new forms, mail outs and miscellaneous clerical supplies. All instruction and forms will require immediate revision and reprint.

   New office equiptment will be required for both requested positions.

4/29/83 Times

Monte-Carlo nights

Dear Editor:

The other nigth I read about someone in Juneau deciding that the Fur Rendexvous Monte-Carlo night was illegal because cards, tables and other gambling accessories are used at them.

I worked with my Jaycee chapter (Gold Rush Jaycees) at the Iditarod Trail Committee's Monte-Carlo Night in Wasilla. Everyone had fun, the public who came to play as well as the people who helped us pull it off. Prizes, donated by local businesses, were auctioned off during that night (bought with the play money won at the tables). The real money taken in that night went to help keep the Iditarod and the Jaycees in the business of helping others.

This is all well known. What I would like to know is why Monte-Carlo nights are in question. I am sitting here watching channel 11, the show is "world of poker." On this show I saw an interview with one of the players (a prominent furrier from Anchorage), who was saying how thrilling it all was. The winner has just won $520,000 (real money).

Why is it that charities and long established fund raiser programs are illegal?

Wake up legislators and think hard about this one. Who's ganibling?

III ANALYSIS:

There are no guidelines in the bill for amount or level of staff or for amounts of travel and per diem. It is necessary, therefore, to establish a set of assumptions on which to build a fiscal note.
Using input from various legislators who worked on the bill, I have made the following assumptions:

Assumption 1: There will be no permanent staff at this time. Personal services and professional services will be contracted as needed; therefore, no office space or equipment will be needed. The commission will determine how the central files are to be kept.

Personal Services Contracts	20.0
Professional Services Contracts	20.0
Other Contractual Services	10.0
	50.0

Assumption 2: To establish a good average for travel costs, I have hypothetically assumed that the Commission is to be made up of members living in Nome, Bethel, Fairbanks, Anchorage, Kodiak, Juneau, Ketchikan, and will travel coach fare: 3 roundtrips to Juneau; 4 roundtrips to Anchorage; and 5 roundtrips to Fairbanks for meetings. There will be no more than an average of three days per month of travel and per diem for meetings. There be no more than an average of one meeting per month.

Per Diem ----------	$18,720
Travel ----------	$25,385
TOTAL Trvl/PD	$44,105

Assumption 3: Additional costs, if any, for reports or copies made by other agencies for the Commission will be absorbed in that agency's operation budget.

Assumption 4: The Legislative Affairs Agency print shop can print the semi-annual summaries of decisions and advisory opinions.

Conflict suggested with oil contracts

By HAL SPENCER
Associated Press Writer

Rep. John Cowdery, R-Anchorage, today suggested Gov. Bill Sheffield's support of a proposed long-term royalty oil contract with Tesoro Alaska Co. could be a conflict of interest.

Cowdery, in a letter to Sheffield that he also distributed to reporters, asked the governor to disclose whether he had received campaign contributions from Tesoro or Charter Oil Co., a firm with a 30 percent stake in Tesoro.

Al Parrish, head of the Sheffield-McAlpine campaign, said today that Tesoro in January gave the campaign $2,000. Parrish said he has checked and rechecked the books and found no contributions from Charter. But he did not rule out the possibility there was a contribution, saying the campaign had received from 800 to 900 contributions since January.

Cowdery, an active critic of the state's proposal to sell a total of 54,000 barrels a day of Prudhoe Bay royalty oil to Tesoro and Chevron U.S.A., said he felt the question of a conflict of interest should be discussed because the governor is pressing hard for the contracts.

"The Legislature must know whether the Sheffield-McAlpine campaign directly or indirectly benefited from Tesoro or Charter so that an evaluation can be made as to whether there is any appearance of a conflict of interest in the administration'a efforts to approve the long-term contracts," he said.

Sheffield was in a meeting and could be not be reached. But press secretary Pete Spivey said he would respond later.

Cowdery later said "I understand" that the governor raised money from Tesoro and Charter during his controversial trip outside Alaska in January.

A special prosecutor appointed by the governor, Seattle lawyer Fredrick Tausend, is investigating that trip, which involved a series of oil company- sponsored fund-raisers, to determine if it was a conflict of interest under state law.

"While I realize the investigation into your fund raising trip is on-going and certain material is not available for public scrutiny, it is necessary to know if you have received any contributions toward retiring your campaign debt from either Tesoro or Charter affiliated companies since Jan. 1, 1983.

Cowdery said reports from the Alaska Public Offices Commission show only contributions up to Dec. 31. Theda S. Pittman, director of the APOC, said Sheffield needn't file a report of contributions received since Jan. 1 until year's end.

Legislator hired son's firm for sound system at seminar

The Associated Press

JUNEAU — Fairbanks Rep. Bob Bettisworth contracted with a company owned by his son to provide the sound system for a legislative seminar April 23 in Anchorage.

The arrangement, involving less than $500, apparently violated no state laws nor legislative rules, although it may have run afoul of a new legislative ethics codes under consideration by lawmakers, according to a report in the Fairbanks Daily News-Miner.

The workshop, on the export of Alaska oil, was organized by the Legislative Budget and Audit Committee, a powerful oversight panel chaired by Bettisworth.

The Republican sponsored the seminar using state money in hopes of educating both lawmakers and Alaska businessmen to the advantages of exporting state oil.

At Bettisworth's choosing, the Anchorage firm Alaska Sound Labs provided the sound system for the seminar. The system included microphones for participants and the audience as well as a sophisticated speaker network and double tape recorders.

The firm is owned by Bettisworth's son Kenneth.

Not responsible

I would just like to say that Fairbanks has more than its share of eccentrics, proselytizers, Libertarians, kooks, criminals, radicals, reactionaries and random digits, but thank the Lord and all that is merciful we are not responsible for Ramona.

FISCAL NOTE
HB NO. 368
ANALYSIS

The costs outlined on the previous page covers money necessary to have the two Board members attend the regularly - scheduled parole hearings as well as the additional hearings anticipated pursuant to the out-of-court settlement in the Cleary lawsuit. Although having two more members would likely slow down the hearing process, costing additional money for more days of hearings, this figure is difficult to estimate.

Requiring a minimum of 5 votes to grant a parole will almost certainly result in fewer prisoners being paroled. This would put a major stress on the already extremely overcrowed Alaska correctional facilities, which are now under court order to reduce prison populations. If corrections is required to build any new beds, the costs are likely to escalate into the millions of dollars.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
HOUSE BILL NO.368

The Department of Health and Social Services recommends H.B. No. 368 remain in committee until the next session of the Legislature when the Legislature and Administration can work together to draft a comprehensive bill revising the Alaska parole statutes.

The issues raised in this bill were discussed extensively by various committees of the Alaska House and Alaska Senate in 1979-82 when the Parole Board was going through the "sunset review" process. Similar language was eliminated from the bill passed by both the House and Senate in 1982. These issues can be best resolved in the context of an overall revision of the parole administration act, which is contemplated in 1984.

5 communities vie for new prison

3-11-83

By KIRK McALLISTER
Empire Staff Reporter

It's coming down to the wire.

Palmer and Seward are fighting for the lead, Haines and Kenai are mired with internal problems and Cordova is trailing the field as a late entry.

It's not 'Alaska Handicap,' but rather the race to see what Alaska community lands the state's proposed $45 million maximum security prison.

A decision on where to locate the prison will probably be made in the next three weeks and the five towns in the running are lobbying hard to have the facility located in their respective communities.

The 400-bed maximum security prison would provide an economic boost wherever it is located as it would require a staff of 125, with about three-quarters of that number hired locally, said Roger Endell, director of the Division of Corrections.

It's a valuable economic carrot being dangled before Alaska communities, many of which are suffering from high unemployment and economic stagnation.

"A few years ago we couldn't give away a prison," Endell said. "But now, with a depressed economy, more communities see a correctional facility as a stable base for their economy."

Endell has been traveling the state in recent weeks talking to community leaders interested in the prison and trying to gauge public opinion in each town.

Currently, he is awaiting the results of technical evaluations of each site by the Department of Transportation and Public Facilities. When the evaluations are completed, Endell will combine that information with what he learned in visiting the towns to produce a "prioritized list" to Gov. Bill Sheffield.

While he wouldn't say if there were any official frontrunners in the prison race, Endell did give a clue: "Seward and Palmer appear to have the act together and are presenting a united front."

Criteria to be used in making a decision on the prison site includes the amount of land available for the correctional facility, water and sewer service, transportation, access to court facilities, public opinion, the stance of city officials and business leaders and the economic impact on the community.

Palmer and Seward apparently have strong public support for the proposed prison while Haines and Kenai are divided on the issue. Cordova is also interested but is only in the preliminary stages of investigating a prison proposal.

Haines Mayor Jon Halliwill told the Empire despite the divided public opinion on the issue, city officials will continue to press for locating the prison in that Southeast community about 90 miles north of Juneau. A poll released in Haines this week showed the community evenly divided on the issue.

Haines has plenty of land available for the jail and could easily provide for the added population it would bring, Halliwill said. In addition, Haines has good marine

Continued on Page 2

Prison...

Continued from Page 1

and air transportation and relatively easy access to the Juneau court system, he said.

Kenai public opinion is also divided on the prison issue. The proposal in that area calls for the prison to be located at the old Wildwood Air Force Base northwest of the city. A three-story concrete building there would be remodeled to house the prison.

While the city council and chambers of commerce of Kenai favor the project, opinion was about evenly split at a public hearing on the issue March 3, said city manager Bill Brighton.

In Palmer, Gary Thurlow, manager of the Matanuska-Susitna Borough, said there was "overwhelming support" for the prison although opinion was divided in the community of Sutton, the area nearest one proposed prison site, about seven miles northeast of Palmer. A site at the old Goose Bay missile facility is also being considered.

"We're lobbying for it," Thurlow said. "A state facility like this would make a good contribution to the community and the prison should be close to the area where a majority of the criminals come from. After all, half of all Alaska prisoners come from Anchorage."

Thurlow emphasized that his community was willing to provide work programs for prisoners and that Palmer afforded easy access to court facilities in Anchorage.

"Prisons are a clean industry and a renewable resource," Thurlow quipped. "It's the type of industry we like to attract to the area."

In Seward, there is not only a great deal of support for the proposed prison but the city is willing to assist the state in locating the facility there, said city manager Ron Garzini.

"I think we're the superior site," Garzini said. "The city might be willing to help build the facility and lease it to the state — there's plenty of land."

The Alaska Vocational Technical Center is another factor favoring Seward as training and rehabilitation programs of the prison could be incorporated with the school, Garzini said.

Cordova has also expressed interest in having the prison located in their community. Perry Lovett, city manager, and leaders of the two Native corporations in Cordova were in Juneau Thursday seeking more information about the prison.

Cordova Mayor James Poor told the Empire his community is looking for more job opportunities for local young people and a year-around industry that is compatible with fishing, Cordova's main industry.

Following Endell's decision on the prison site, construction of the facility is expected to take two or three years provided funding is approved by the legislature.

HB 217
4R

Haines residents split on wanting new prison

3-11-83

By KIRK McALLISTER
Empire Staff Reporter

Just 90 miles north of Juneau in the Lynn Canal community of Haines, the prison proposal has become the most controversial issue dividing the town since the fight over the fate of the bald eagles of the Chilkat Valley.

Haines city officials have pushed for the the location of the $45-million maximum security prison to boost the town's economy. The Schnabel Lumber Co. recently closed and is up for sale and there is concern by some in the community that more jobs are needed.

The City of Haines has hired lobbyist Wally Kubley to help convince the state that Haines is the best site for the correctional facility and a task force was set up to provide local support for the project.

However, many residents remain unconvinced that locating a state prison in Haines is in the best interests of the community. Some residents worry that the prison would bring increased crime and unchecked growth and adversely effect the town.

A group called Citizens Concerned for the Future of Haines has been formed to oppose the prison.

Public meetings on the issue have been well-attended and often heated,

Continued on Page 2

Haines...

Continued from Page 1

according to the Lynn Canal News.

A recent public opinion poll conducted by radio station KHNS in Haines showed 240 residents against the prison, 234 in favor and 12 undecided. About 28 percent of the Haines area population voted.

Haines Mayor Jon Halliwill told the Empire that despite the divided public opinion, the City of Haines would continue to press for locating the prison there.

"The poll was not very representative of public opinion since it was only 28 percent of the voters," Halliwill said. "In public meetings held by the city there was overwhelming support for it. Over 400 people have signed a petition in support of the prison. Haines is a good site for the facility and we're still supporting it very enthusiastically."

Patricia Blank, a spokesman for the anti-prison group, told the Empire there was "definitely not overwhelming support" for locating the prison in Haines and that opinions were divided at the public meetings.

"The main concern of our group is that we feel the governor should show effective leadership and assess the facts presented by his task force on corrections that recommended that the maximum security prison be located in Southcentral Alaska," Blank said.

"The governor should look at the recommendation of the task force experts and follow it," said Blank. "Anything else is a waste of time and the taxpayers money."

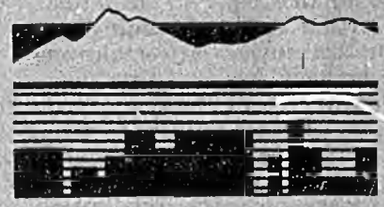
Police

Lawyer attacks state's prison-building plan to relieve overcrowding

By TOM KIZZIA 3-6-83
Daily News reporter

A state plan to build new prisons to relieve overcrowding among inmates contains less than meets the eye, according to the lawyer whose class-action suit against jail conditions prompted the plan.

"The report was lacking in particulars and substance," said Timothy Stearns, who added he would ask Superior Court Judge Douglas Serdahely to request another plan that is "more comprehensive and more fully addesses the issues."

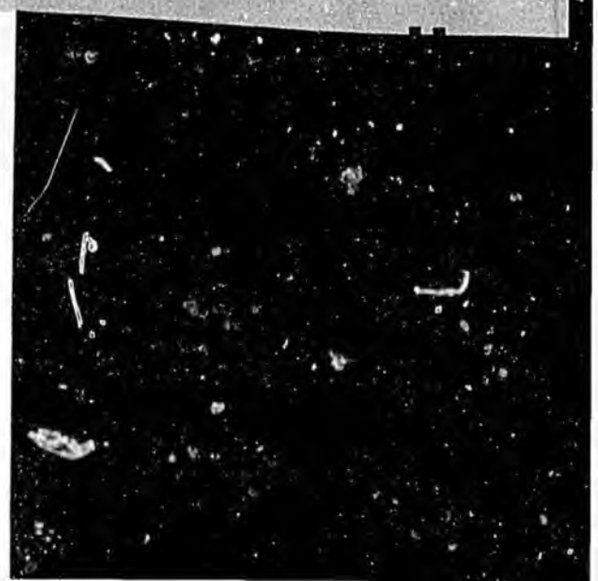


The overcrowding plan was submitted Wednesday by Director of Corrections Roger Endell as part of a settlement of the class-action suit. In it, the state said it would attempt to bring on line three new medium-security prisons by the fall of 1984.

Endell said the plan could eliminate overcrowding by January, at which point the state projects an inmate population of between 1,700 and 1,800.

Adding up the new beds proposed in the plan shows the state being at least 243 beds shy of the demand by that date, Stearns said.

Stearns also complained the plan did not adequately discuss plans to increase furlough programs, to develop community service and community placement alternatives, and to revise procedures by which inmates build up good time toward their release dates.



The plan promised to improve management techniques within the division, but did not say how better techniques

would address overcrowding, Stearns said.

The state has proposed to build prisons quickly at federal surplus facilities at Wildwood near Kenai, at Goose Bay on the north side of Knik Arm, and at Chiniak near Kodiak.

Longer range plans call for a 250-bed classification facility in Anchorage, probably near the municipal sewage treatment plant at Point Woronzof, and a maximum-security prison for 300 to 400 inmates, either at Palmer, Seward, Kenai or Haines.

Prison outline for Wildwood released

The "Functional Program Statement; Wildwood Correctional Center," released Thursday by the state's Division of Corrections, is preliminary and basic, and defines the possible operation of the proposed prison only in outline.

That is essentially what Roger Endell, director of corrections, Thursday told Kenai area citizens they would find when any of them read the document.

Endell presented the document, dated March 3, at the public hearing he held on that date at Kenai City Hall. About 125 people attended the hearing. Several people protested the lack of prior public access to such a report.

Endell answered that it was being worked on earlier and had only just been completed. He added that its main function was to help architects and engineers with preliminary planning, but the public was welcome to review it.

The document is 78 pages long. Endell provided copies to the Peninsula Borough Assembly and the news media. Kenai City Manager Bill Brighton, who chaired the hearing, afterward said he planned to make an extra copy to have on file at City Hall.

The first 25 pages cover the main public concerns. The second section is a short and technical fire marshal's report; the third is a long and technical listing of established correctional standards; the fourth and last is a very technical collection of graphs and charts detailing space management standards and functions.

The following specifics are reported in the first 25 pages:

- The Wildwood site, if chosen and converted for a medium-security prison, would be used for "220 custody beds" in Building 10.
- The site is 10 acres on the former Wildwood Air Force Station, and a prison might include Buildings 7 and 8, "the commissary and maintenance shops."
- Up to 50 prisoner spaces would be segregated from the prison proper and maintained for "pre-trial" inmates, persons awaiting trial.
- "The main entry point to the institution will be what is now known as the fire station." This would afford indoor space for the loading and unloading of prisoners. Visitors would not be allowed in the building while

See WILDWOOD, page 3

...Wildwood prison plan

Continued from Page 1

prisoners were being loaded.

• Medical services would be provided "on a contract basis" and prisoners would be taken outside "under staff escort" when necessary for surgery.

• "Prisoners will spend from 8 to 23 hours per day in their sleeping areas depending upon status... Because of the amounts of time that prisoners may spend in their rooms, the rooms should be as pleasant as possible, while being durable and difficul breach." There would be "two inmates per room or cell."

• Rooms would each have locks with electrical override controls.

• Suspects awaiting trial and sentenced prisoners would be absolutely segregated, and the pre-trial inmates would be more closely supervised than sentenced prisoners.

• Visitations with family and friends would be allowed twice a week without physical separation in the visiting room and with personal contact allowed under "open visual supervision." Physical contact might not be allowed in some cases.

• "Unsupervised work release programs will not operate at the Wildwood facility." Work programs within the prison are planned, however, and there is the possibility of supervised work crews being established for local government agencies for "services such as brushing trails, cleaning streams, maintaining roads, and other similar services."

The program statement makes no mention of maximum-security prisoners being housed at Wildwood, except as a reader might infer that some pre-trial inmates might rate maximum-security status.

There are a couple of references to maximum-security prisoners in the context of excerpts from a correctional task force report dealing with that report's determined need for maximum-security prisons in the "Matanuska-Susitna or Kenai Borough site, or both," but Endell said that recommendation has nothing to do with Wildwood.

The program statement also makes no reference to conjugal visits. Endell said at the hearing Thursday that the state has no provision for conjugal visits and he does not know whether it will provide for them in the future.

The program statement makes no attempt to define the terms "medium," "maximum" or "minimum" security.

There is also no reference to leasing costs or any possible "lease-purchase option" that might be negotiated with the land owner, the Kenai Natives Association.

Mixed views heard at prison meeting

By JOHN QUINLEY
Assistant Editor

Testimony by 31 Kenai area residents Thursday night about whether a medium-security prison should be put at Wildwood was roughly split between those in favor of the facility and those opposed.

In addition to oral testimony, Roger Endell, director of the state Division of Corrections, received written opinions and petitions promoting both sides of the issue.

Opponents to the prison plan said they submitted petitions with more than 350 names opposed to the project. Resolutions of support for the 220-bed facility have come from groups such as the Kenai Chamber of Commerce, the Kenai City Council and the Kenai Natives Association, which owns Wildwood.

Endell spent much of the three-hour hearing explaining what a prison at Wildwood would consist of, why the state wants the 10-acre site and its large, concrete and steel buildings, and what comes next in the decision process.

Public comments focused on security, the possiblity of increased crime and on economic benefits of the prison.

Assemblyman Dave Carey said the state's presentation was "an attempt to buy off with employment and salaries." He added, "You talk about cost. How much money will be paid to victims of crimes from escaped convicts?"

Harold Dale, a Kenai insurance salesman, took an opposite view. "I've got a lot of kids and grandkids around this place. I saw the fencing and the wire. I sure wouldn't try to escape. I think instead of pushing against prison, we should push for a properly managed one."

See PRISON, Page 8

Roger Endell, director of the division of corrections, took testimony at Kenai City Hall Thursday on a proposed medium-security prison in Wildwood. He also answered questions during a public hearing. (Photos by John Quinley)

...Prison hearing draws c

Continued from Page 1

Kenai Police Chief Rick Ross reminded people who expressed fear the area would see rapes, robberies and murders if a prison were established, that those crimes are here now.

"If we had a medium-security prison today, of the 200 prisoners, probably 150 of them would be from the peninsula," Ross said. "If the state built a 40-bed jail (there is now a 14-bed jail in downtown Kenai), it would hold people sentenced for less than 15 days. We're sending three-day sentences to Anchorage," he said.

To questions of whether maximum-security prisoners would be housed at the prison, Ross noted that recently when a four-man cell at the city jail was filled the least dangerous man was charged with assault with a deadly weapon. The other three faced murder charges.

Assemblyman Kean Stephens said the Kenai Natives Association was trying to unload "a white elephant." He said he resented the state's approach of contacting "businesses first. You didn't come and ask the people, you dangled the money first. This has been railroaded through."

Ruby Coyle recalled the 1940s when Kenai was small and crime was practically nonexistent. "I'd like to say, 'Folks, go home.' But let's stay and take care of what crime we have and not push it on Juneau or Anchorage. Do you want to start another capital move? If that's what you want, then fellas get out your pocketbooks." A prison would "take care of the needs and our responsibility," she said.

"I favor a medium-security prison," said lawyer Ken Cusack. "It's a chance to save the state some money. Now when they have court appearances in Kenai, they fly back to Anchorage. I'm more worried about security in the airport and transporting them back and forth."

The state has listed Wildwood as one of three future medium-security prison sites in its response to a court case on prison overcrowding.

Assemblyman John Douglas said he and others "got a secure feeling" in knowing that prisoners in the Kenai Jail are not "residing there for a long time. They're on their way somewhere else."

He added that "there's no assurance that the next director might not want to make Wildwood a maximum-security prison."

The first third of the meeting allowed Endell to give the audience an overview of what is planned for Wildwood if a deal can be made. The last third of the meeting had Endell fielding questions from the audience.

Responding to Stephens, Endell said his speaking trips to local chambers of commerce and other groups were at the groups' invitations, not at his request.

He noted that "very serious crimes are being committed" on the peninsula already. "With further economic development, the crime rate will go up. Also correllated with crime is the unemployment rate."

Other responses and comments made by Endell included:

• To allegations that a deal has already been made — "The state has not made up its mind. There is no piece of paper with a signature. We're not trying to cram anything down your throats."

• On public input — "It's within my power to appoint a citizens advisory board, and I intend to do so."

• On local hire — "Of the 71 employees, about half will need to be experienced correctional officers. You can't run a center with inexperienced people. About 30 to 35 people could be hired locally and trained."

• On security provisions — "There will be two 18-foot fences, 20 feet apart, topped by razor wire. There will be a facility on the roof for observation, and possibly trained dogs between the fences."

• On economic impacts — "There will be about 71 staff people with an average wage of $40,000. People who work for us must live in the area. The site will cost about $3 million to get ready for corrections. For most of the work, we'll hire private contractors."

• On the types of people housed — "You're looking at someone serving one-to-five years, primarily for property crimes and some personal crimes. The very violent criminal, is going to be a longer-term prisoner."

Endell also explained that as prisoners progress toward their release dates, they are generally moved to less secure institutions. No prisoners, except those serving the kind of short jail term now served in the Kenai jail, would be released directly from Wildwood, he said.

Medium-security prisoners, as they near their release, would move to minimum security and then community centers or halfway houses. No minimum-security or halfway house is planned for the Kenai-Soldotna area, Endell said.

"Our objective is not to warehouse people, but to change them so they don't break the law again. Statewide we have a 66 percent success ratio. You can turn that around and call it a one-third failure rate, too, I suppose, but we want to make law-abiding citizens. They come in at the bottom of the ladder, and we try to boost them up."

Endell said any final decision is still many weeks away. Comments on the prison plan may be sent to Division of Co... Pouch H03, Juneau, 99803.

U.S. sues Hawaii for prison 'brutality'

by Michael J. Smith
Associated Press

3-5-83
Times

Washington — The Reagan Administration charged in an unprecedented civil suit on Friday that two Hawaii state prisons subject inmates to cruel and unusual punishment in violation of the Constitution.

Attorney General William French Smith personally signed the suit, filed in U.S. District Court in Honolulu, and said the two prisons have "egregious or flagrant conditions" and cause inmates "to suffer grievous harm."

Named as defendants were Gov. George R. Ariyoshi, four other state officials and the state government itself.

It was the first suit ever filed by the Justice Department under the Civil Rights of Institutionalized Persons Act, passed by Congress in 1980.

Among the government's charges were that inmates were illegally segregated on the basis of race or national origin, were exposed to a "pattern and practice of brutality" by prison staff members, that they were inadequately protected from assault, rape and extortion inflicted by other inmates, that female inmates were inadequately protected "against sexual abuse by prison guards."

In Honolulu, the state said the suit was illegal because the Justice Department had not met legal requirements of the law under which it was filed.

Deputy Hawaii Attorney General James H. Dannenberg called the suit "laughable".

It was no coincidence that the suit was directed against a state controlled by Democrats, he said.

Court qualifies presumptive sentencing

The Associated Press

The state Court of Appeals has ruled Alaska's presumptive sentencing laws are constitutional, when applied with the court's interpretation of their provisions.

It held the legislature intended that all prior felony convictions be counted separately for the purposes of imposing a presumptive sentence for a subsequently committed crime.

But the court said Friday that a prior conviction is one for which a sentence had been imposed prior to the commission of a subsequent offense.

The presumptive sentencing statute sets definite prison terms for repeat felony offenders, and those terms may be altered only if aggravating or mitigating factors are present.

The ruling stemmed from a Kodiak case involving Nicholas Z. Rastopsoff, who committed three crimes during the period June 4 through Sept. 13, 1980.

Superior Court Judge Roy H. Madsen sentenced Rastopsoff for the first offense, forgery, on Oct. 27, 1980. He imposed sentences for the second and third offenses, burglary and robbery on one occasion, and assault and burglary on the other, on Feb. 24, 1981.

Madsen applied the presumptive sentencing statute in sentencing Rastopsoff for the second and third offenses, but he said he did so only reluctantly because he felt it was unfair in Rastopsoff's case.

In its ruling, the Court of Appeals said since Rastopsoff was not convicted and sentenced for any of the offenses until after all had been committed, for sentencing purposes he should be considered a first-time offender.

Opinion

Prison hearing is the main event

The main event today in the Kenai area is this evening's public hearing on the proposal to locate a state medium-security prison at Wildwood.

The hearing will take place beginning at 7:30 p.m. at Kenai City Hall.

Obviously, if many people attend, not all will be able to speak. For this reason, supporters and proponents should consider bringing printed statements or petitions to leave with the state officials tonight in lieu of oral testimony.

People who want to express support, people who want to express opposition and people whose minds are unset but who want to hear questions and answers should all be there.

Roger Endell, state director of corrections, will be there; Bill Brighton, Kenai city manager will be there. Numerous other officials will be there.

What they hear will have an immediate bearing on the Wildwood proposal and, certainly, an indirect bearing on other proposals that might be considered. Kenai, for instance, is one of a number of locations, including Seward, that might be considered for construction of a maximum-security prison.

Endell has made it clear that he favors the Wildwood site, offered by its owner, Kenai Natives Association.

He also made it clear that the support of the community or the lack of it will have a bearing on the Wildwood decision.

Wayward court

NEARLY 150 YEARS AGO a famous European sociologist visiting America (Alexis de Tocqueville) observed that "Americans have the strange custom of seeking to settle any political or social problem by a lawsuit." The courts have responded to this "strange custom" by effectively becoming a continuous constitutional convention.

In Anchorage there was a demonstration of this court response last week when a judicial officer effectively overrode the constitutional separation of powers in government by ordering the legislative and executive branches to change the state prison system.

A Superior Court action obligates the state to spend $45 million for a maximum-security prison and orders the officials to bring back to Alaska the prisoners now housed in federal institutions Outside.

STATE LAW authorizes the commissioner of corrections to contract for the care of prisoners in any state, territory or possession of the United States.

The legislature has the power to set the standards for the care of prisoners and if they are inadequate the legislators are the ones who should correct them. It's the commissioner's job to enforce the standards set by the legislature, not the court's.

The law specifies that he can contract with the federal government, any state government or a political subdivision — which might include even a county in another state — for the care of prisoners.

The law is not peculiar to Alaska. It is in the Western Interstate Corrections Compact to which every state of the union is a signatory. Sending prisoners to facilities outside the prisoner's home state is a common practice that has been accepted nationwide for generations.

That Alaska law has been upheld in the courts.

The state appears to have a sound basis for challenging the legality of last week's decision.

THE GOVERNOR should challenge the right of the courts to encroach on the powers of the other two branches of goverment.

The Alaska courts have virtually taken charge of the prison system. Judges have been known to decide by their edict what color prison walls must be painted, the square feet of space that must be provided each prisoner, the type of furnishings in his quarters, the availability of television programs and other frills and perks.

The executive branch has had to scratch every time a judge itched and it sometimes seems that a judge itches every time a prisoner expresses some complaint or displeasure.

The courts are constantly creating demands for additional public resources without meeting the responsibility for raising those resources and without regard to any limits on those resources.

The activism of judges is imposing significant costs upon society. Some new rights for a few are created at the expensive of the established rights of many.

Building Prisons Is Madness, Says Ex-Nixon Aide

SYRACUSE POST-STANDARD/Friday, May 7, 1982/

By EDWARD P. DUNN

Charles W. Colson, the one-time Watergate "hatchet man," came to Syracuse Thursday with good words about the Lord and bad words about the United States prison system.

"Prisons do not work. It's one of the myths of our time," said the former Nixon aide who now bids good-bye to acquaintances by saying, "God bless you."

"It's madness" to presume more prison cells will prevent crime, he said.

"You'll go bankrupt if you keep building prisons."

The answer, he maintained, is a system of "punishment that is constructive." In cases involving non-violent crimes, he favors mandatory community service work rather than punishment by incarceration.

Colson said he was glad to see New York residents voted down a $500 million prison bond issue in last year's election.

The resolution, which called for the construction of new prisons and renovation of others, was a "rip-off" that would have amounted to a "monument" to bureaucracy, Colson said.

Victims of crimes are victimized twice, Colson said: once by the crime itself, and again by the high costs of an ineffective penal system.

He said in New York State the construction costs for each new jail cell amount to $90,000, and it costs $17,000 a year to keep one person in prison.

Colson visited Syracuse Thursday to promote the non-profit Prison Fellowship, a Christian reform group he started in 1976. The fellowship has volunteer groups inside prisons and is active outside the walls in advocating changes in the penal system.

He said he'd like to start a Prison Fellowship chapter in New York.

Colson's knowledge of jail life includes firsthand experience. He spent seven months in federal penitentiaries in 1974.

He was sentenced to prison after admitting a charge of disseminating derogratory information to the press about Vietnam War opponent Daniel Ellsberg. At that time Ellsberg was awaiting trial on charges of theft and publication of classified documents in connection with release of the Pentagon Papers.

Shortly after he left prison, Colson wrote "Born Again," to describe his awakening to Christianity. His second book, "Life Sentence," chronicles his growth as a Christian and the beginning of Prison Fellowship.

"I've devoted my life to going into prisons and spreading the good news of the Lord," Colson, 50, told newsmen at a press conference Thursday.

Prisons: Radical reforms are needed

By WILLIAM F. BUCKLEY JR.
Universal Press Syndicate

CHARLES COLSON, arguably the most exuberant sinner during the whole Watergate business, may have a difficult time outliving his reputation as a man who said he would walk over his grandmother to help Richard Nixon.

Buckley

That's the trouble with a nice aphorism, particularly if it's a little iconoclastic.

The point is that Charles Colson has already done much more important things than ever he did to help to destroy the Nixon administration. He has founded something called the Prison Fellowship. It has a staff of 100 people, and it could just possibly be the agent of the most important prison reforms of the century.

SOMETIME in August of 1973, Charles Colson experienced Christianity. One is drawn to his matter-of-fact documentation of this datum, which — although he is certainly willing to expand on the impact of Christianity on him — he treats as a datum, pure and simple, as in: date of birth ... date of graduation from college ... date of marriage ... date of Christianization.

Asked whether he would be living the life he lives except that he is animated by Christianity, he will tell you, no, he would not spend his days in prisons, conducting seminars, evangelizing, agitating for reform — except that he is driven by a concern to please God. But he concedes that the specific reforms he favors can be argued for using an exclusively secular vocabulary.

Colson is much influenced by Yochelson and Samenow's masterwork, "The Criminal Personality," in which Samenow, a practicing Jew, concludes that criminals are for the most part criminals because that is their nature, and that in order to change they need to expose themselves to "deliberate conversion ... to a more responsible lifestyle." This is, as a matter of fact, best accomplished by a religious conversion; but Colson is prepared to admit that the possibility exists that criminals can change their appetite for crime by experiencing a transformation outside of any religious orthodoxy.

THAT MUCH having been disposed of, Colson explains his ministry, which is one part devoted to persuading criminals to believe in Christ, the other to persuading the American public to listen to reason. To wit:

- The prison population is expanding 15 times as fast as the national population, notwithstanding that only two out of 100 agents of crime are apprehended, convicted and put away.
- The prisons are bursting at the seams, with over 200,000 more criminals inhabiting quarters than our prisons were designed for, resulting in a gruesome intensification of the experience of prison and a resulting increase in recidivist crime.
- The annual cost of keeping someone in prison is about twice the cost of keeping a student at Harvard University.
- An interesting statistical coincidence: About 53 percent of the men behind bars are there for having committed crimes that did not involve violence or cause physical danger. Meanwhile, 53 percent of Americans report that they are afraid to walk one mile from their residences after dark. To some extent, then, it can be said that half of America is imprisoned in virtue of the impulses of half the criminal population.

Colson: A sinner turned crusader

What does this all add up to?

Not, Colson insists, more prisons; though that is the $3-billion direction federal and local governments are heading toward. We should empty the prisons by one-half, Colson says — for the sake of dangerous criminals (the horror of their living conditions is mitigated, making less likely the stimulation of their bestial instincts); for the sake of non-dangerous criminals (they are costing society $20,000 a year in upkeep and depriving society of the use of their talents); and for the sake of the public, which stands to gain by a lessened tax load and by a likelier reintegration into society of non-dangerous felons.

THE ACCENT of Charles Colson is on how usefully to deal with criminals who are non-dangerous, in the physical sense of the word. A companion in Colson's own penitentiary, for instance, had served as chairman of the board of trustees of the American Medical Association, got involved in an embezzlement and was spending three years in jail. Why not, instead, sentence that man to three years of free medical service for the needy? Why not the same for lawyers? Or carpenters? Or, indeed, anyone; giving them access at night to their families, who are innocent victims of existing patterns of penology?

It is strange that in an age when one is encouraged to think radically, so little radical thought is given to the subject of prison reform. Colson's crusade is profoundly conceived, existentially appealing, splendid in ambition. We are already in his debt for the Prison Fellowship. The whole country would be indebted to him if his reforms were effected.

Paul Harvey

Put Convicts To Public Work

What to do with our exploding prison population?

Granted, little criminals jammed in with big ones come out worse than before.

The suicide rate in prisons is 16 times what it is outside.

Rebellious cons are wrecking what prisons we have, and we have too few.

Some far-fetched experiments have been tried. California tried releasing convicted rapists and child molesters for outings in town.

From Patton State Hospital convicted rapists and child molesters were allowed to go into San Bernardino, Calif., to visit discotheques--to mingle with women—in the name of "therapy."

In one month seven escaped.

I have heard no better option for violent criminals than a lockup.

For non-violent criminals, there may be something better.

Chuck Colson's Prison Fellowship Program seeks reform for individual prisoners and for the prison system.

As a missionary behind bars he seeks to redirect misdirected lives through a Christian commitment.

At the same time, Colson has sought and got the cooperation of prison authorities in releasing non-violent criminals to do "outside work."

On his responsibility, six prisoners were recently released from Eglin Federal Prison in Florida.

For two weeks they helped two elderly people in Atlanta--one an aged blind widow—to insulate their modest home against the oncoming winter.

The six, two Hispanics, two blacks, two whites, are committed Christians in whom Colson has enough confidence so that they were not guarded while on furlough. They lived in Christian homes in the area.

Work that might have cost $21,000 was completed for a fraction of that. The men did behave themselves.

If non-violent criminals, instead of being sentenced to prison, can be sentenced to compulsory community service—or to work in jobs until they make restitution to their victims and to the state—then the punishment would fit the crime.

And they would pay taxes instead of taxpayers supporting them.

Colson's Prison Plan Worth Study

ONE IS inclined to be skeptical when Charles W. Colson suggests a plan for reducing prison populations. First, we are not for coddling convicts. Secondily, Colson is an ex-con, having served seven months in federal prisons for Watergate-related crimes.

Colson was a senior adviser to former President Nixon. He is a "born-again Christian" and founder of Prison Fellowship, a growing organization of prison inmates, ex-offenders and their families. That speaks better of Colson but does not automatically make us want to approve his plan.

But we read it. And it does have some strong points in its favor.

The plan is outlined in a Prison Fellowship publication entitled, *Is There a Better Way? A Perspective on American Prisons.*

As background, it points out that for thousands of years prisons were used mainly to keep political offenders, hold lawbreakers until trial or execution, or detain insolvent debtors until their debts were paid.

Punishment for the convicted offender used to include public beheadings and hangings and lesser penalties such as branding, flogging, the rack and the stocks. This probably deterred some crime but did not stamp it out.

In 1790, the publication states, Pennsylvania enacted laws making imprisonment the ordinary punishment for crimes, and that system spread.

Colson would not do away with prisons. He believes prisons are necessary "for that roughly 20 percent of the prison population convicted of dangerously violent crimes . . . for the protection of the general public."

Colson contends, however, that prisons fail to rehabilitate and instead harm the offender, his family and, in the long run, society. He recommends alternative punishment for non-violent offenders.

The alternatives include placing the offender on a schedule requiring him to repay the crime victim for losses; ordering the offender to pay his debt to society by performing community services; placing him under "house arrest" except when out earning a living for himself and his family; and putting him on strict probation. Other alternatives are also suggested.

Colson also calls for some prison reforms, including weekend sentences, separating violent and non-violent offenders, and protecting inmates against brutal acts by other inmates.

He does not consider his plan a cure-all. He is more practical than that. His publication states:

"Many earlier prison reform efforts have come to nothing, or ended up leaving offenders worse off in prison and society less safe from crime. Thus it is proper to be modest and cautious in proposing a new reform campaign."

Colson points out his plan could save money, could keep offenders employed and producing, could keep them with their families and could work in thousands of cases.

With crime increasing daily, we think the plan is worth further study and consideration.

Anchorage may get new prison

By TOM KIZZIA
Daily News reporter 2-20-83

The idea of building a new prison in Anchorage was revived last week at a meeting between Director of Corrections Roger Endell and Mayor Tony Knowles.

Endell said Saturday construction of a 250-bed facility would allow the state to retire the antiquated Third Avenue and Sixth Avenue jails.

Endell said a likely location for the new jail would be a remote site near Point Woronzof that was selected by Knowles and former Gov. Jay Hammond last year. The biggest problem with the area is poor soils that would increase the cost of a facility there, Endell said.

A proposed expansion of court office space in downtown Anchorage could include some additional pretrial jail cells, saving the cost of transporting prisoners, Endell said.

The next new prison to come into service and help relieve overcrowding in the state system could be the Wildwood Center in Kenai, he said.

A public hearing has been scheduled for March 4 there on the idea of creating a medium-security prison at the former Air Force base, now owned by the Kenai Native Association.

Report backs prison jobs

2/20/82
Anch Daily News

By TOM KIZZIA
Daily News reporter

A state commission has recommended that prison inmates in Juneau take over the laundry contract for the Alaska Marine Highway System, while prisoners in Palmer should do body and fender work on state vehicles and grow their own vegetables.

But the Correctional Industries Commission decided after a public hearing Friday against a plan to have inmates do all laundry for prisons in the Anchorage Bowl. About three-quarters of the annual $206,000 laundry bill for Anchorage area prisons is now handled by two contractors, Alaska Cleaners and Quality Cleaners, and the commission decided a switch would hurt those businesses.

The new jobs for prison inmates have been proposed under 1982 legislation designed to give inmates a chance to develop employment skills and save up "gate money" for when they are released. Alaska is the last state to establish such a program, according to prison industry manager Wally Roman.

Under a wage plan now being drawn up, prisoners would be paid between 65 cents and $1.15 an hour for working on a voluntary basis. Some of the money could be withheld by the state for restitution of victims, reimbursement of the cost of prosecution or support of dependents.

The three new industry programs will need the approval of Director of Corrections Roger Endell, Commissioner of Administration Lisa Rudd, and Commissioner of Health and Social Services Robert Smith. "If the commission received good input from the public, that is probably the way we will go," Endell said Saturday.

☐ Anchorage may yet be site for new prison. Story, Page B-2.

The recommended programs could provide jobs for 34 to 52 inmates, according to staff estimates.

In coming up with ways to employ inmates, the state has been careful about competing with the private sector or taking away established contracts — at least with Alaska businesses.

The commission recommended that laundry for the ferry LeConte continue to be handled by a local Juneau laundry. However, construction of a new addition in the coming year would allow Juneau's Lemon Creek Correctional Center to take over the other 95 percent of the ferry system's dirty linen that is now washed in Prince Rupert, British Columbia, and Seattle.

At the Palmer Correctional Center, 13 acres of land are being tilled, primarily for potatoes. The commission recommended expanding that area to 20 acres this summer and producing a more varied crop of vegetables.

But the commission decided to hold off on a proposal to set up some kind of food processing, possibly a cannery, that could provide yearround food for Alaska's prisons. Further study of smallscale food processing was required, the commission said.

No body shops commented during Friday's public hearing on the proposal to do state work in Palmer, despite extensive advertising about the meeting, Roman said. Around $70,000 a year in body and fender work is now done on state-owned and stateleased vehicles in the Anchorage region.

Seven Alaska towns want new prison

By DEBBIE REINWAND ROSE
Empire Staff Reporter

Eeny, meeny, miney, moe — where will Alaska's new prison go?

While several Alaska communities have scorned a $45 million proposed maximum security prison, seven towns are now clammering for the facility — and the income it would bring to their areas.

To the north, both Haines and Skagway have expressed an interest in the facility, which would require a staff of 125, according to Roger Endell, director of the Division of Corrections.

About three-quarters of the staff could be hired locally, he added.

With the outlook dim for operation of the White Pass Railroad this summer, Skagway officials, including Mayor Rand Snure, have cast an interested eye at the possibility of locating the facility in that town.

"It's something we might need to boost employment," city council member Chris Rohlf said at a council meeting this month.

However, Skagway may not have the necessary land suitable for a maximum security prison, Endell said.

Haines also has a good reason for

Continued on Page 2

Prisons...

Continued from Page 1

seeking an employment boost as the Schnabel Lumber Mill recently announced plans to close.

Communities that have said they're interested in the facility include Seward, Kenai, Palmer, Cordova, Valdez, Skagway and Haines, according to Endell. Of those, Haines, Seward and Kenai appear at first glance to be the most suitable.

To encourage construction of the facility, Haines has offered free port facilities during construction and a cheaper industrial water rate, while Seward has anted-up 100 acres, a paved road and utilities to the prison.

Although some residents in the two Southeast towns say they'd welcome the prison, Endell has been studying locations in the Kenai area intensely, spending much of his time in the Southcentral part of the state.

Just as important as the logistic needs when considering a prison site, however, are the economic needs of the community, the prison director added.

In an effort to "work closely" with the citizens who would be impacted, Endell will make a stop in Haines Monday to talk at a town meeting.

Some Haines residents are upset at what they call a lack of communication between the public and city fathers who are anxious to get the prison for their area.

At a meeting Tuesday, several residents asked for a town vote, or poll to see whether public sentiment is favorable to the construction of the prison.

Haines city administrator Darrell Maple, who put together the town's prison proposal, defended his open-arms offer to the state, saying he had to work under the state's time frame.

"I can't contact all 1,700 people (in Haines)," he said in the Lynn Canal News. "We have to react according to the governor's and the Legislature's time schedule."

Wherever the prison ends up, it will take two or three years before construction is complete, according to Endell, providing legislative approval is granted to the facility.

A maximum security prison has been a high priority in sessions past, is backed by Gov. Bill Sheffield, and will likely be given the go-ahead.

State prisoners in Outside jails will be coming home

By GREG GADBERRY
Daily News reporter

A Superior Court judge Friday signed a long-debated court settlement that requires the state to bring home almost 200 Alaskans in federal prisons Outside and seek funds to build a new prison here to house them.

Signed by Judge Douglas Serdahely, the settlement is part of a wide-ranging court suit filed by inmates both in and out of Alaska seeking better prison conditions.

That suit is gradually being decided after two years of on-again, off-again court battles.

Still waiting to be settled are sections of the lawsuit dealing with complaints made by in-state prisoners against the state.

Judge signs agreement calling for return of state inmates now held in Outside prisons

Continued from Page A-1

The portion settled Friday had been negotiated during the Hammond administration. Assistant Attorney General Michael Stark said the Sheffield administration decided to accept it. However, Roger Endell, state corrections chief, said earlier he probably would have "chosen a different path" toward settlement with the prisoners.

Friday's 14-page agreement deals only with inmates now behind bars in more than 20 federal prisons Outside. Fedral regulations allow only 200 Alaskans to be housed in federal Bureau of Prison facilities Outside. About 188 Alaskans are now in federal prisons.

The settlement orders the state to remove Alaskan prisoners from federal facilities no later than Dec. 31, 1987 although inmates who wish to remain in Outside prisons may do so.

The mandate, however, hinges on the state's ability to build a prison in Alaska capable of housing 300 inmates. Funding for such an institution will be up to the legislature.

The settlement also lists a number of guidelines that the state must use for deciding how long inmates must wait before their return to Alaska.

Inmates whose lives are endangered or who have less than two years left on their sentences must be returned to the state within 60 days of a new Alaska prison being built.

Prisoners from rural backgrounds, who have good records in federal prison or who have a "family crisis" in Alaska, also will be given priority for return to state jails.

Also included in the settlement are provisions that give inmates Outside better access to legal materials, attorneys and to the state's Parole Board.

Stark told the court the state already is making plans to send a quorum of the Parole Board to various federal prisons to meet with Alaska inmates.

action suit involving in-state prisoners.

The state has agreed to partial settlement with in-state prisoners, but grievances concerning medical care, rehabilitation, visitation and prison staffing are still being debated.

Under earlier plans, Stark said, up to $9 million would be needed to alleviate those grievances. The Sheffield administration, however, hopes to make those changes for much less money, he said.

Stark and the inmates' attorney, Charlene Lichtmann, said that some inmates opposed the settlement.

Many of them were concerned they would lose some privileges — including recreational facilities — they now enjoy in the federal system, Lichtmann said. At the same time, those inmates want treatment afforded to prisoners now in Alaska.

However, Lichtmann said a majority of those who commented on the agreement approved it.

While the new state administration has accepted the settlement for federal prisoners, Stark said several points are still to be decided on a class

Palmer inmates complain

By ED TRUITT
Daily News correspondent

PALMER — Boredom and frustration provoked five weekend escapes from medium and minimum security units at the Palmer Correctional Center, other inmates said Monday.

"People like to paint this place as a country club," said one member of the medium security unit's inmate council. "They point to the pool table, the TVs, gym and ping pong table and say we have it easy, but you can only play so much pool a day, and there's 100 guys and one table.

"There are only about 60 jobs for a population of about 278 in both units, no rehabilitation, and not much education, few activities. It's not much to get you ready to go back Outside."

At a meeting Monday night, jail superintendent Stan Zaborac told the inmates about changes in jail supervision, including the addition of a correctional officer in every 20-man dormitory 24 hours a day. Zaborac said the changes had been requested since the new unit opened in April, 1981.

"But there's no doubt five escapes in one weekend speeded things up a bit," he said.

Additional money and staff shaken loose from the Department of Corrections on Sunday will enable some positive changes, such as the long-delayed opening of a prison craft shop now expected next week, Zaborac promised.

The inmates saw placing officers in each dorm as a positive step, offering them more access to the staff, although the move was designed to tighten security, one inmate said.

Inmates at the meeting on Monday asked not to be identified.

"What about more counselors?" another inmate asked, pointing out that there are only four counselors and one psychologist serving both prisons. In the minimum security unit, they have case-

Anchorage Daily News Tuesday, January 25, 1983 a-16

# of boredom, frustration

loads of 140 each.

Zaborac couldn't promise more trained counselors, but said three more probation officers were being hired to work in the prison.

Inmate complaints Monday night ranged from the usual grip s — poor food and a lumpy pool table — to questions of why grievances were not pursued and shortcomings in educational programs.

"Sure, there's a lot of little stuff," said another inmate. "But it piles up and piles up, and nothing is ever done about it. You file grievances, you run it through the inmate council and get the big 'okey dokey' on it from the administration, and nothing is ever done. Even the littlest things take months," explained another council member.

The new security classification system being tried by the Palmer Correctional Center in the past month was probably another frustration leading to the escapes, a friend of one of escapee said.

Instead of going before a three-member review board to decide whether a prisoner can move to minimum security or a halfway house, the new method applies a point system that rates everything from prior criminal records to psychological adjustment.

The problem, the inmate said, is that the point system arbitrarily penalizes inmates with longer sentences or juvenile records while virtually ignoring any real progress he might have made.

Zaborac agreed the point system has caused some discontent, but argued it is more objective and fair than the committee system. "They're being judged by the same criteria, but now they know what the criteria are," he said.

Administrators also have been frustrated with the lack of progress, Zaborac said. "With only enough staff to provide minimal security, we haven't been able to do things like job training that eats up staff time."

Lawyer leery of prison pact

by Beth Barrett
Times Writer

Some Third Avenue jail inmates are protesting a proposed state settlement with Alaska's prisoners, saying implementation may take too long, Anchorage lawyer Timothy Stearns said today.

But Stearns, who represents the state inmates in seven Alaskan institutions, said today he intends to recommend court approval of the partial agreement worked out last month with the state. He said he has received more than 40 prisoner responses to the agreement, and "most indicated approval."

Superior Judge Douglas Serdahely today at 3 p.m. is to review the state inmates' comments and may sign the proposed agreement.

According to Stearns, some of the about 100 prisoners in the Third Avenue jail argued it could take months under the settlement to upgrade the living conditions in their downtown facility. Described by Stearns as "one of the worst institutions in the state," he said the problems there range from overcrowding, to faulty heating, lighting and ventilation systems.

Stearns said he will emphasize the complaints of the Third Avenue jail inmates — primarily felons awaiting sentencing — and will urge repairs and other improvements be made there quickly.

The lawsuit against the state was filed by Stearns on behalf of the state's prison population over a year ago. It included allegations of overcrowding, poor living conditions and inadequate medical care. The court subsequently ordered the negotiation with the state of a settlement.

But only a partial settlement was worked out last month, with over $6 million in programs and staff still to be agreed upon, said a Division of Corrections official Wednesday.

Those items were left out, because state officials agreed Gov. Bill Sheffield's administration should make the new policy decisions, according to assistant attorney general Michael Stark, who represents the Division of Corrections.

One of the most controversial, unresolved issues is medical care, Stearns said.

Among the other "big money" programs yet to be resolved are psychological counseling for inmates and other rehabilitative services, Stearns said.

It's uncertain when those questions — about 15 percent of the settlement, according to Stark — will be addressed.

The partial settlement, if signed by Serdahely today, would force the state to continue its efforts to decrease overcrowding in Alaskan jails.

The Divisor of Corrections already is seeding about $119 million from the state Legislature next year to build several jail facilities.

They include a 300-bed maximum-security prison, possibly near Sutton, north of Palmer. It is to be built by 1985, with another 100-bed wing added in 1987. A 250-bed medium-security jail in an Anchorage setting. An 80-bed pre-trial detention facility in Fairbanks. A 50-bed pre-trial holding facility in Juneau. Additional jail space — up to 216 beds — in a new pre-trail institution on Post Road in Anchorage.

Jail populations also would be reduced by expanding alternatives to arrest and confinement in appropriate cases.

The settlement also calls for more rehabilitative programs, including high school and college courses, counseling programs, and employment training.

State inmates would rather stay in jail

by Jeff Berliner
Times Writer

1/12/83

About 150 state prison inmates eligible for parole haven't asked for it.

The state would like them to, because parole is one way to make room in the crowded jails, which now hold 200 more inmates than they can handle.

The state parole board, at the request of a task force that was headed by current corrections chief Roger Endell, has begun interviewing all 150 parole-eligible inmates to find prisoners who can legally be set free and relieve the overcrowding.

However, the board cannot order the early release of a prisoner who does not request parole. And parole officials are trying to discover why inmates are not seeking release on parole as soon as they become eligible, said parole board executive director Sam Trivette. Those who are eligible for parole are being encouraged to apply, he said.

Trivette said Endell's recommended evaluation now is about two-thirds complete. About 90 inmates have been interviewed and the rest will be contacted by the end of the month, he said.

What the board is finding, Trivette said, is that inmates distrust the parole board and misunderstand parole policies. Also, many inmates would rather serve their time in jail and get out unconditionally than be released early under the conditions of parole.

"I would rather 'flat my time' than go out on conditions," one inmate said, meaning that he will pass up parole — and all the rules that go with it — for a later but unconditional release.

"Supervision of parole is worse in this state," another convict said. "There is no leeway to live a normal kind of life. They can violate you on a whim and send you back to jail. I can't move, I can't change

See Parole, page A-4

Parole

However, most state jail inmates have shorter terms to serve and Trivette said an average parole-eligible inmate might be

State may be bound to inmate suit pact

By TOM KIZZIA 1/7/83
Daily News reporter

The state has already signed a partial settlement of a lawsuit filed by prison inmates and may be legally bound to it, even though Roger Endell, the new Director of Corrections, wants to scrap the agreement.

Superior Court Judge Douglas Serdahely on Thursday postponed the effective date of the partial agreement until Jan. 21. It had been scheduled to go into effect today, but the state had asked for a delay in the face of mounting opposition from within the Sheffield administration.

At the Jan. 21 hearing, Serdahely will rule on the inmates' contention that the Sheffield administration can't back out of the agreement.

Attorney Timothy Stearns, who is representing the inmates, said he might be willing to agree to change some deadlines on the partial agreement, which covers such areas as prisoner exercise and access to legal materials. But he said the attorney general's office had signed the partial agreement and should stick to it.

Assistant Attorney General Mike Stark said the state may technically be bound by the agreement, but added that without support from the administration and the legislature, any agreement would be meaningless.

"It can't be dealt with in isolation as a legal question," Stark said. "It is also a human and political problem."

In October, the state backed out of a wider settlement, deciding to withhold commitment to costly items until the legislature agreed. Stark then worked with Stearns to come up with a partial agreement.

Final action on the agreement was extended 30 days in December so the Sheffield administration could review the agreement.

This week, however, a Sheffield task force on corrections headed by Endell recommended that even the partial agreement be scrapped.

Endell, who was appointed Thursday as the new director of corrections, said members of the task force were "shocked by some of the commitments in the proposed agreement." He cited as examples the need to hire law librarians for prisoners and to provide inmates in isolation with jogging or bicycling machines for exercise.

Panel advises no settlement on prisoners' suit

By TOM KIZZIA
Daily News reporter

The state should abandon efforts to settle a class-action suit over prison conditions and slug it out with inmates in court instead, a state corrections task force has recommended.

The task force also is urging Gov. Bill Sheffield to give up efforts to build a modular jail at Point Woronzof in Anchorage. Task force chairman Roger Endell said it would be cheaper and more efficient to purchase existing facilities in the Kenai Peninsula and the Matanuska-Susitna boroughs and convert them into 100-bed prisons.

The task force made no specific site recommendations, but Endell, a professor at the University of Alaska, Anchorage Criminal Justice Center, said the two proposed facilities could be opened with modular units in six months to a year.

Sites that have been considered by the Division of Corrections include the former missile site at Goose Bay north of Knik Arm, the Wildwood Center in Kenai and Ohlson Mountain in Homer.

Attorneys for prisoners and the state have worked for months on a pretrial partial settlement of the so-called Cleary suit against prison conditions, and final hearings are scheduled in Superior Court for late next week.

"There are problem areas, but they are manageable and don't require court action," Endell said. "We were shocked by some of the commitments in the proposed agreement."

Endell cited as examples the requirement to hire law librarians for prisoners and to provide prisoners in isolation with jogging or bicycling machines for exercise. "We seriously doubted if these were constitutional issues," he said.

The task force also recommended temporarily keeping several jails open that the state had been eager to close. Among the specific changes proposed:

• The new Cook Inlet Pretrial Facility on Post Road should not open until staff are fully trained. With the jails bursting, corrections had planned to open the new jail as soon as Feb. 1, housing low-risk prisoners there while staff were being trained.

• Ridgeview Correctional Center on Old Seward Highway should not be abandoned when the new jail opens. Instead, the old jail should be studied for conversion into a halfway house or a facility for low-risk short-term or pretrial prisoners.

• Mentally disturbed offenders should remain at Alaska Psychiatric Institute until a special unit can be designed either at API or within a prison. They should remain under control of the Division of Mental Health.

• The new Meadow Creek Correctional Center for women in Eagle River should be expanded with a less expensive design. The task force called the center "an example of architectural extravagance where simplicity and a more spartan environment would have sufficed."

• Plans for building new jails in Nome and Bethel should move ahead "as quickly as possible." The task force said that funds already allocated for a Bethel jail "have deteriorated in value due to mismanagement of site selection and building design delays."

• Like other existing facilities, the Third Avenue Jail in Anchorage should remain in use until more prison space is built.

• The Careage House in Anchorage, which holds drunken driving offenders, should be used instead as headquarters for the state's prison system.

Under the proposed partial settlement of the Cleary suit, the state had agreed to close the Third Avenue Jail in 18 months rather than spend up to $4.5 million to bring it up to fire code. The state offered in the meantime to assume liability for the facility, which had been condemned by the city fire marshal.

Endell said the specific fire code problems had not been addressed by the task force, but expressed optimism about keeping the 28-year-old jail open.

The task force also recommended construction of a maximum-security facility in Alaska and elevating corrections to departmental status.

Endell predicted Sheffield would take action on the report within a week.

Partial settlement of jail suit OK'd

By TOM KIZZIA
Daily News reporter

The on-again, off-again attempts to resolve a lawsuit against prison conditions in Alaska was back on Friday, as the Sheffield administration agreed to a partial settlement.

The agreement, signed by Superior Court Judge Douglas Serdahely, immediately changes disciplinary procedures for prisoners. Beginning Monday, some prisoners will be given better opportunities for recreation, telephone calls and access to legal advice.

The agreement also commits the state to bringing Serdahely a plan for relieving overcrowding in state jails, which officials said are now receiving additional prisoners at the rate of 180 a year.

But portions of the agreement that could be expensive for the state have been dropped. Sheffield administration officials indicated Friday they will either work out new agreements in these areas with the backing of the legislature or take the issues to court.

Tim Stearns, attorney for the prisoners, said the agreement would mean greater emphasis in the jails on rehabilitation and training, "so the public will be safer when the prisoner gets out than when he went in."

"I would have probably chosen a different path toward settlement had I been in charge from the start," said Roger Endell, head of Sheffield's newly created Department of Corrections. But he said a few last-minute changes made the partial settlement acceptable.

Endell also said Friday he was not interested in putting a prison at a former pipeline camp at Isabel Pass, a location he described as "one of the most remote sites we could possibly consider." Endell said support services essential to prison operation would make it necessary to keep a prison nearer to population centers.

An effort to have the state buy the Isabel Pass camp in 1981 resulted in misdemeanor conflict-of-interest charges against former state Sen. Ed Dankworth, and Thursday another appropriation bill to buy the camp was introduced in the state legislature.

Serdahely postponed until Feb. 4 a final hearing on a portion of the prisoner class-action suit that could require the

See Page B-2, PRISON

Prison suit partial settlement approved

Continued from Page B-1

state to bring 188 Alaska prisoners back from federal prisons in the Lower 48. The agreement, worked out with the administration of former Gov. Jay Hammond, would require only that the administration urge the legislature to provide funding for a maximum security prison here.

A number of prisoner requests in the class-action suit against the state corrections system remain unsettled, including development of new rehabilitation programs, longer visiting hours, and more reliable transportation to outside medical appointments.

A large area which may have to be fought out in court concerns improving medical care in the institutions. A consultant's report prepared last year concluded that Alas-

ka would have to spend $1 million more on medical care every year to meet minimum standards for prisoner care set by the American Medical Association, the American Bar Association, and the American Correctional Association.

Under Friday's partial settlement, prisoners will no longer be locked away in solitary for petty offenses, while punishment for more serious infractions may increase. "The new agreement means more discretion for officials and more fairness for prisoners," said assistant attorney general Mike Stark.

The agreement will require compliance officers in each jail whose sole responsibility, at least for a few months, will be to see that the agreement is lived up to. Attorneys said this provision was one of the few that would require extra funding from the legislature.

Endell initially recommended rejecting the proposed settlement, but concluded he had to accept it because the Hammond administration had signed off on it. Among the minor changes added this week, the right of prisoners to specific exercise equipment was made more general, and their right to a specific number of phone calls per week was changed to provide for a specific number of hours of phone access.

Prisons officials admit cover-u

Anch Times

by Jeff Berliner
Times Writer

State Department of Corrections lawyer Michael Stark and assistant director of corrections Ted Corey allegedly violated court rules last week when they sought to increase court-imposed limits on inmate populations and then concealed what they had done.

In an interview, Stark acknowledged that what he and Corey did was "improper," and stated he will have to figure out how to explain it at a Friday court hearing where a judge will be asked to find Stark in contempt of court.

In acknowledging that he may have broken the rules of civil procedure, Stark said he apologized to state Superior Court Judge Victor Carlson and then reprimanded Corey for his actions.

What happened is not in dispute:

Last Wednesday, Corey called Carlson and asked him to lift the court-ordered 100-inmate limit at the Sixth Avenue jail. Corey told Carlson it was an emergency. Carlson granted the request and issued an order lifting the ceiling to 115 inmates.

Neither Stark, an assistant attorney general, nor inmate attorney Timothy Stearns was notified.

After receiving Carlson's order, Corey told Stark what he had done. Stark told Corey he had acted "improperly" and "in a pending action he should notify me."

Carlson said he expected Stark to notify Stearns since he represents the inmates. Stark conceded that he failed to notify the other parties.

Two days after the order was issued Friday, Stark called Stearns and told him that jails were overcrowded and he wanted to raise a 65-person limit at the Third Avenue jail. Stark said corrections needed about 18 more beds beyond the court-ordered limits. Stearns agreed — not knowing what Stark knew: that corrections had already gotten the extra jail beds it needed.

Only after Stearns agreed to lift the inmate population ceiling at Third Avenue did he learn that corrections already had obtained the extra beds.

Stark received permission to raise the number of inmates housed at Third Avenue from Judge Douglas Serdahely. Carlson and Serdahely were unaware of each other's orders.

In papers filed in court Tuesday, Stearns charged that Stark used "fraudulent concealment and deceit" to get a court orde jail population at Third Av concealing the earlier orc raised prison population Sixth Avenue jail.

In the affidavit, Stearns "Mr. Stark advised me that not tell me about Judge Ca order during any of our thre phonic conversations on J Jan. 28, 1983 because he fe knew about Judge Carlson's I would not agree to increa population at the Third A correctional center. Mr. clearly and apologetically dicated that he was awa

See Cover-up, pag

Cover-up

(Continued from page A-1)

Judge Carlson's order at the time ... and conceded that he withheld this information from me."

Stearns now wants Judge Serdahely to rescind Stark's motion to increase Third Avenue jail population because Stark obtained the motion by "fraud." Stearns also asked the court to find Stark in contempt, to fine him $500 plus attorney's fees and to impose "other appropriate sanctions."

"I'm surprised Stearns wasn't informed by Stark. I probably should have notified him of my order," Carlson said, adding, "I guess Judge Serdahely will have to sort that out."

After learning what happened, Carlson said he thought Stearns and Stark "have just cause" to be angry with Corey and that Stearns has reason to be upset with Stark.

When asked why he tried to secure double the number of inmate beds and keep it a secret from the inmates' lawyer and the court, Stark replied, "That's a good question. I'm going to have to think about it."

But today, in a follow-up interview, Stark said he expected the Friday court hearing to be canceled because corrections decided to drop plans to raise the inmate population at Third Avenue. He said furnace problems at the jail prevent moving in more inmates.

Jail escapes lead to state of 'emergency'

by Jeff Berliner
and Al Campbell
Times Writers

Sutton — A state of emergency was declared Sunday at the Palmer Correctional Center after five inmates escaped in two separate incidents Saturday.

All five escapees are now back in custody and face additional charges of escape.

Following a meeting Sunday between prison superintendent Stanley Zaborac and the state's assistant director of corrections, Ted Corey, an emergency was declared and security was beefed up.

The emergency order calls for all 40 correctional officers to work mandatory overtime until new security staff can be hired. And a 24-hour guard will be placed in each of the 20-man housing units at the prison for the first time.

Zaborac said "emergency" funds are being sought to hire a dozen new guards immediately.

The 24-hour guard in each prison housing unit is something Zaborac said he has sought for some time, and Corey authorized it Sunday.

"We're getting a jump on emergency funding requests we have in the mill," Zaborac said.

Other security measures also are being considered, including a fence around the minimum security section of the prison. Construction of a second fence around the prison's medium security wing has halted because the money has run out, he said. An alarm system at the prison should be complete by April. And a new mandatory head count policy is in effect.

Zaborac said he has increased the number of people on each shift from eight to 13. He said Corey promised to lend the prison more staff from other institutions by the end of the week if necessary.

The prison — designed to hold 206 inmates — now has 242 prisoners, 142 of them in minimum security.

The beefed up security at the prison has resulted in "noticeable changes," according to inmates.

Four of the five escapees are now at the Sixth Avenue jail while the fifth, David Williams, 30, is under guard at Humana Hospital Alaska in serious condition after crashing a stolen getaway car in a high-speed chase Saturday.

Williams was serving a 390-day sentence for resisting arrest and several traffic violations, and had an April release date.

Steven Wassen, 22, and Lawrence Prokopiof, 19, escaped with Williams Saturday morning from the unfenced minimum security area. Wassen was serving seven years for criminal trespass and Prokopiof was serving six years for burglary and theft but had a July parole release set.

Later Saturday, two inmates pried a fence apart and fled from the medium security section. John Volsin, 20, and Valance Clark, 19, were captured early Sunday, apparently heading home to Fairbanks, when they were caught at Sheep Creek less than four hours after they cut their way through the fence at the Palmer Corrections Center here.

Delay ordered in settlement of prisoner suit

By TOM KIZZIA
Daily News reporter

The conclusion of a settlement between the state and prisoners has been delayed for a month to allow the Sheffield administration a chance to review the agreement.

The delay was ordered Thursday by Superior Court Judge Douglas Serdahely at the request of Assistant Attorney General Mike Stark. Timothy Stearns, attorney for the prisoners, said he was "real upset" by the postponement, because it meant a delay in prison reforms, including changes to existing disciplinary procedures that Stearns called unconstitutional.

Comments on the proposed settlement from the prisoners who are party to the class-action suit against the state prison system have been positive, Stearns said, except for prisoners at the Third Avenue Jail. Prisoners there were nearly 4-to-1 against approval of the settlement. They complained that the language was too vague and gave the state Division of Corrections too much latitude to skirt the agreement, according to Stearns.

The state already has backed out of a wider agreement, leaving major cost items in the suit to be decided by the new administration.

Under Thursday's decision, the state will have until Jan. 7 to review the proposed partial settlement. Serdahely may sign the agreement at a Jan. 14 hearing.

A separate portion of the suit, involving state prisoners held in federal institutions in the Lower 48, may be resolved when the judge hears comments from the prisoners on Jan. 13. Early comments from the prisoners in federal jails mostly opposed the proposed agreement, complaining that it pinned too much on hopes that the state legislature would be willing to pay for new prisons.

City ombudsman says recall petition legal

By KARIN DAVIES
Daily News reporter

A recall petition against Anchorage Assemblyman Gerry O'Connor should have gone to a vote of Eagle River residents, the municipal ombudsman said Friday.

The petition was recently invalidated by municipal clerk Ruby Smith, who said the document cited insufficient grounds for recalling the Eagle River representative.

Ombudsman Wayne Mabry said state law does not allow the municipal clerk to reject a recall petition for such reasons. He added, however, the only way for petitioner Tom Staudenmaier to reverse the clerk's decision is to challenge it in court.

See Page B-2, RECALL

Recall

Continued from Page B-1

In response to a complaint filed by Staudenmaier, Mabry urged the Alaska Legislature to revise state law to clarify the rules on recall petitions.

O'Connor said he is prepared to stand for a recall ballot. "I'm ready to have at it." He said he plans to run for re-election this fall.

Staudenmaier, chairman of the Alaska Conservative Political Action Committee, gathered 509 signatures on a petition that claimed O'Connor's support of a 34 percent increase in the municipal tax rate qualifies as proof of incompetence and failure to perform in office. Both are grounds for recall under state law.

Smith rejected the petition, saying the way an assembly member votes on a municipal budget "does not constitute incompetence or failure to perform prescribed duties."

Although he said the petition should have gone to a vote of Eagle River residents, Mabry said "the recall effort was premature if based on a municipal tax increase" because the budget does not automatically raise taxes. Mill rates are set by the assembly in the spring.

Staudenmaier could not be reached Friday for comment.

Anch. News 2/9/83

Doing time in comfort

THE NEW LAW in California calling for manadatory 48-hour jail sentences for drunk drivers has led to an overflow of prisoners. Alaska has a similar problem with its 72-hour sentence requirement.

Los Angeles is handling some of its prisoners in a unique way by allowing them to serve their time in community jails in nearby Redondo Beach and Torrance, where conditions are considered much better than in the county jail.

THERE'S A HITCH. The inmates must pay for the privilege — $75 a night — so the towns' taxpayers won't be burdened financially. Those who have served their 48 hours in the community jails say it's worth the money. Redondo is booked on weekends through May.

In the county jail prisoners have to share cells with four or five other people and associate with hard-core criminals. In the town jails they have private cells and are kept away from other inmates.

California also plans to erect some tent cities this spring to accommodate these drunk drivers, presumably the ones who either will not or cannot pay the tab for better conditions.

ALASKA corrections officials could get some ideas from California's approach to the overcrowded jails. Drunk drivers generally are not a menace to society except when they are behind the steering wheel. Doing their three days in a super-secure, $100,000 cell is just not necessary. A tent city ringed by a chain-link fence with some barbed wire on top could well be the answer here, for part of the year at least.

The state could buy or lease an old hotel and make it reasonably secure. First-conviction drunk drivers could be given the option of serving their time there if they were willing to pay a per-night charge for it. The charge would help defray the cost of upkeep.

The expensive cells should be saved for the prisoners who must be kept away from society. Elite jails could serve only a small segment of the prison population, but enough to relieve the terrible overcrowding that now exists.

Professor has 2 roles in jail study

5-21-83

By BETSY BRENNEMAN
Daily News reporter

JUNEAU — A University of Alaska professor trying to persuade the legislature that the town of Anderson is the best site for a new maximum-security prison also is being paid by the legislature to study the state prison system.

Dr. Gary Copus, assistant professor of criminal justice at the University of Alaska-Fairbanks, was awarded a $22,000 contract by Sen. Don Bennett, R-Fairbanks, to study the state prison system. The contract was awarded without competitive bidding.

The contract runs from March 1 until the end of the year, and Copus will be paid a $15,000 fee and $7,000 for expenses by the Senate Advisory Council, which does research for the Senate leadership.

Earlier this year, Copus was paid $75 an hour by the city of Anderson to study the potential of Anderson as a maximum-security prison site. He presented the study while actively pressing the case for Anderson during recent legislative hearings.

Anderson City Manager Vern McCorkle also said the city has paid for some of

See Back Page, PROFESSOR

Professor has 2 roles in study

Continued from Page A-1

Copus' expenses to help argue its case while Copus is in Juneau.

McCorkle maintains Copus is not a paid lobbyist, but merely is available to provide backup on the technical aspects of Anderson's qualifications as a prison site. Copus keeps both projects separated and hasn't talked to McCorkle about his legislative contract, McCorkle said. "He's got pretty high ideals and standards."

Anderson is about 80 miles southwest of Fairbanks.

Bennett said Copus had been hired to gather information about the workings of the state correctional system, because "we're not happy with the prison system, the way it is now."

The Fairbanks lawmaker cited overcrowding, misclassification of prisoners and the pending Cleary case settlement — a class action suit brought by inmates against the state — as problems the legislature needs to know more about.

Bennett added there is no need to solicit proposals for contracts less than $25,000 and said very few people in the state have expertise in the field of corrections.

He said he saw no problem with Copus being paid to lobby the legislature at the same time the legislature has him under contract. The legislative study is about conditions in the prisons and has nothing to do with facility sites, Bennett said.

However, state corrections director Roger Endell is concerned about Copus' dual role. The Division of Corrections is willing to cooperate with the legislature on its research project, Endell said, but he's worried about perceptions that the division might be involved in questionable interaction with Copus.

"If there is a question, it needs to be clarified right now, because I don't want any part of it," Endell said.

Copus could not be reached for comment Friday.

At least seven communities are being considered as possible sites for a new 400-bed, $45 million state facility for prisoners sentenced to serve an average of five years or longer.

A number of bills have been introduced favoring one site over another.

City council, residents want proposed prison to be built in Seward

By RONNIE CHAPPELL
Daily News correspondent

SEWARD — The Seward City Council unanimously has agreed to ask the Division of Corrections to locate the state's first maximum-security prison in this Resurrection Bay community.

Almost 100 people turned out for a special meeting Monday at which the vote was taken, said City Manager Ron Garzini.

"People were overwhelmingly positive," Garzini said. "Only two people expressed reservations about the prison, and no one said they were opposed to it."

Garzini said letters advising Gov. Bill Sheffield, Corrections Chief Roger Endell and legislators of the council vote, were mailed Tuesday.

Wally Roman, who represented the Division of Corrections at the council meeting, was surprised by the public response, Garzini said.

Garzini, too, was surprised by the degree of support. "I had expected some negative comment," he said.

Seward wants the state to build the proposed $40 million prison on city-owned land next to the Fourth of July Creek Marine Industrial Park. Electric transmission lines run to the site, which also has road access.

"We've offered to provide them that ground for as long as the state continues to operate a prison there," Garzini said.

Seward has even offered to supervise construction of the prison for the state. Under the plan, the state would still underwrite the cost of the facility, but the city would assume responsibility for getting the job done.

"To my knowledge, we're the first community in the state to go through this exercise," Garzini said. "We're optimistic. We're the best possible site for a maximum-security prison.

"It's my understanding that the Sutton site is mostly muskeg," he said.

A number of Alaska communities are competing for the proposed prison. Although opinion in Sutton is divided, other Matanuska-Susitna Valley communities would like to see the prison built there. Cordova, Haines and Kenai have also expressed interest in having the facility.

Palmer-area prison OK'd

5-11-85
Times

Associated Press

Juneau — A bill requiring that Alaska's proposed $45 million maximum-security prison be situated in the Palmer-Sutton area cleared the Senate Finance Committee today.

The committee, acting at the request of lawmakers from the Delta area, amended the measure to provide that if Alaska built a second maximum-security jail, it would be located in Anderson.

The bill is sponsored by Senate President, Jay Kerttula, D-Palmer.

Approval came amid an active lobbying campaign on the part of several Alaska communities to win the prison facility with its promise of scores of jobs.

See Panel, page A-5

Panel approves site

Continued from page A-1

Sen. Joe Josephson, D-Anchorage, defended the measure as justified by two studies that he said found the Palmer-Sutton area to be a good location.

He also criticized recent comments by Corrections Director Roger Endell that the legislature should stay out of the question of siting for the prison. Endell argued that it should not be a political decision, and said if it were to be located in the Mat-Su Valley, a better location would be at an abandoned missile site at Goose Bay.

Josephson said the decision is a political one by the Sheffield administration as much as it is by the legislature.

Democratic Sen. Pappy Moss and Republican Rep. Dick Shultz, both of Delta Junction, persuaded addition of the Anderson amendment, although it was pointed out that it wouldn't necessarily bind future legislators.

The Sheffield administration has proposed a fiscal 1984 appropriation of $3.6 million for the prison, which wouldn't be completed for several years. Alaska does not have a maximum-security prison and sends its convicted felons to federal penitentiaries.

Charlie Bussel Representative
House of Representatives
Pouch V
Juneau, Ak. 99811

Dear Rep. Bussell

Enclosed for your information is a copy of a news story which ran on the front page of the Anchorage Times Sunday, May 15th. This story is not new! The residents of Sutton have continually voiced opposition to the location of another prison facility in their area. As the news article points out this is not just a few unhappy individuals, it is several hundred. There are only a few who seemingly are for its location there. The Valley newspapers have had a regular showing of letters to the editor from the Sutton people who do not wish any more prison facilities located in their area. The Governor's Office, Division of Corrections officials have stated equlvocally that the prison site would not be located in an area where the people did not want its being built.

Seward became interested in this matter when it was withdrawn by the past administration because of Sutton residents complete opposition to the prison. As a matter of fact, until the City of Seward contacted the Division of Corrections and the Governor's Office to say that Seward was very interested in having the facility located here, there was not one community in the State that wanted the new prison built in it. Seward has very carefully over several months, held public meetings and public hearings for our citizens to learn about what a prison being built in the community would bring to it. These hearings have produced only 3 people who spoke against it. The meetings were well attended. Reports were written and filed by Division of Corrections who were in attendance at several of the meetings (2 of which had 100 people or so at them).

Seward has a population of over 2000 and another 2000 in the outlying area adjoining it. With this kind of attitude or enthusiasm on having Seward selected as the location of the maximum security prison, we cannot understand why certain elected officials seem bent on forcing the administration to select Sutton which is adamantly opposed to its location there.

We ask that you seriously think about these points raised and allow the administration of Division of Correction officials to look objectively at the sites nominated for the prison. Politics, we feel should not be the crowning factor on a decision as important as this one is. Thank you.

Willard E. Dunham, Chairman
Seward Citizens Task Force for location of
Spring Creek Facility in Seward

Rep. Charlie Bussell
Pouch V.
Juneau, Alaska 99811

Dear Rep. Bussell,

We would like you to consider putting the maximum security prison in the Palmer-Sutton Area. We know the majority of people in this area are for the facility being located here.

It is by far the most cost effective, as was determined by the Division of Health and Social Services several years ago. We are near the center of the population, major court systems, medical facilities, and transportation costs taking the prisoners to and from the Courts would be a great savings. It would also make it more convenient for the families of the prisoners to visit.

The state already owns the property, so there would be no need for money to be expended for the land. The roads and utilities are already in, and most of the land is already cleared, so the buildings would be able to be built much faster. The cost of building in this area is also far less than in other areas of the State.

It would give this area a stable economy, which we really need at this time.

Please take these thoughts into your consideration when the decision as to location comes before you. Thank you for every consideration.

Sincerely,

Mary E. Combs

Prison plan not popular in Sutton

by Al Campbell
for The Times

Sutton — Almost everybody, it seems, wants to build the state's proposed maximum-security prison on the grounds of the existing minimum- medium-security jail near this Glenn Highway community.

Legislators, local politicians, the business community — all support the Sutton-area location for the proposed $42 million lockup.

All, that is, except the people here, who remain almost unanimously opposed to 300 murderers, rapists, robbers and assorted other felons being housed.

See Sutton, page A-4

Sutton residents fear prison would be dangerous for town

Continued from page A-1

in their midst.

They feel that way despite overtures from two state administrations and assurances from prison officials and law enforcement officers that having 300 bad guys locked up nearby leads to a safer environment than having them running around loose.

With only a handful of exceptions, the 400-500 people who live in the unincorporated community reamin unconvinced.

Linda Olson, president of the Alpine Community Council, acknowledges that she does not speak for the town, but says she has no doubt whatsoever of the local consensus: "There are no benefits to us, and there could be a lot of problems."

The community council, the closest thing to organized government here, has recently reemphasized its opposition to the construction plans with a 6-1 vote by directors to "back the community" in opposing the maximum-security addition to the existing site.

"This is not just a few people, this is everybody against the idea," says Olson.

Generally, residents here oppose the high security prison because they fear escapes, and they feel escapees would somehow victimize local residents, perhaps by stealing their cars, their weapons or other property.

Some also fear physical harm from any individual or group that managed to break out. An incident years ago that saw a young woman molested by a walkaway from the minimum-security section has contributed to that fear.

But the opposition here goes even deeper than that. "We don't want the stigma," says Grant Olson, husband of the community council president.

At a public hearing here several months ago, protestors complained they did not want to be known as "the Leavenworth of Alaska," a reference to the notorious federal penitentiary that put that Kansas community on the map.

The same concern among the Eagle River business community prompted successful lobbying by Eagle River people to change the name of the facility there from the Eagle River State Jail to Hiland Mountain Correctional Center.

Residents here, too, object not only to the proposed in-prison population, but also to the friends and relatives of inmates who may frequent the area — and even to the corrections staff who may choose to live in the vicinity.

"Who wants a bunch of their (prisoners') buddies cruising around, waiting for visiting hours or bringing in booze and dope?" asked one resident who asked not to be named. "These are not the best people in the world, after all," she said.

The staff would have a considerable impact on the area, says Linda Olson. "This is a small, rural community with our own way of life . . . even a few more people here would alter that way of life considerably."

She and other protestors say for all the assurances from the state and Matanuska-Susitna Borough governments, no official has pledged any assistance in planning, schools or general economic impact aid to help cope with what could be a doubling of the local population.

"But basically," Olson says, "we just don't see anything to benefit us. It sounds selfish but I am sure most other people in other areas would feel the same way."

Sutton-area people are aware that the $42 million construction job would undoubtedly go to a major contractor, with union labor. There are few union tradespeople now living in Sutton.

They have been told by state officials that as corrections and support staff expanded, they may be employed at the new site. But they have also been told that local hire preference is illegal.

Meanwhile the Greater Palmer Chamber of Commerce, the borough government and the area's legislative delegation continue to press for the Sutton area as the site for the expanded prison system.

The chamber has pledged to raise up to $10,000, from private and local government sources, and has a full-time lobbyist currently working in Juneau for the Sutton site.

"We are confident we will get it," says Mike Combs, head of the chamber's prison subcommittee.

The borough government has raised $3,000 for a cost-benefit study, and concluded that the Valley site would be practical, convenient and otherwise suitable for locating the new facility.

Assemblyman John Musgrove, who represents the Sutton area, says he is aware and "sympathetic" with his constituents here who oppose the prison.

But Musgrove says the benefits, particularly the estimated millions of dollars annually in labor and material purchases, outweigh the possible drawbacks.

"We have become convinced the prison would be as safe as possible," Musgrove says. "And we absolutely need the economic benefits that would come."

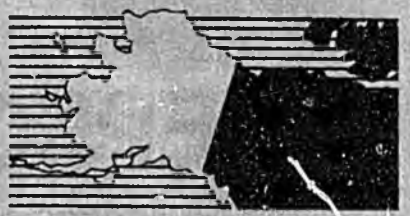
Linda Olson says given that kind of argument, people here are more or less resigned to the ultimate selection of Sutton as the site.

"Most of us went to every public hearing we could, and fought against it," she said. "But now, while we will continue to be against it, we are beginning to feel it is inevitable."

She said a recent telephone survey of about 100 local people turned up not one respondent in favor of the prison here.

"We have even asked people who might favor it to come forward and explain it to us, maybe they have some knowledge we can use," she says. "But all we hear from are the business people and the politicians. It looks like that is going to be enough to put it here."

Olson and others say they will ask that the expanded jail, if built, be identified with Palmer, not Sutton.



"Calling it the Palmer Correctional Center is just fine with us," she says. "We don't need the publicity."

State defends its plan to add new jails

By TOM KIZZIA 4/2/83
Daily News reporter

Saying prisoners' demands for fast relief from jail crowding reflect "a high degree of political naivete," the state this week defended its plan to add new jails over the next few years.

Prisoners' attorney Timothy Stearns had called the court-ordered plan submitted by the state inadequate, but Assistant Attorney General Michael Stark said that detailed planning was impossible until the state Division of Corrections knew how much money it was going to get this year from the legislature.

"To expect defendants to propose a plan now which will deal with all eventualities in light of the present uncertainties as to funding and pending legislation is totally unrealistic," Stark said.

The prisoners "ignore the political realities of declining revenues in the state and the fact that there are at least 15 other executive agencies, many of which provide direct services to the people of Alaska, vying for pieces of an increasingly smaller fiscal pie," Stark wrote in a court brief.

Stark said the state agreed with population goals proffered by the prisoners and was not trying to avoid problems of prison overcrowding. He said the Sheffield administration had approved an operating budget for corrections next year of $57 million — up from $41 million this year, though less than the $63.5 million requested by the division.

Stark said the legislature also is considering emergency overcrowding legislation and capital funding for new prisons. He said the legislature's delay in creating a new Department of Corrections had been an obstacle to the state's attempt to provide "improved management structure," he said.

The state proposed to provide a more detailed plan to Superior Court Judge Douglas Serdahely two weeks after the end of the legislature. However, Serdahely earlier set a trial date of June 9 for unresolved issues in the class-action suit against the state prison system.

Stearns said Friday he was "more disappointed than ever" in the state's response and would request a prompt hearing from Serdahely on the overcrowding plan.

Chairman, House Judiciary Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Bussell:

This is in response to your request for a Position Paper on HB 375. The Department of Public Safety supports passage of this legislation. Employers should be able to request records of convictions of all sex crimes or crimes dealing with contributing to the delinquency of a minor, of persons applying for positions involving supervision or disciplinary power over minors. The enactment of this Bill will help protect employers from unknowingly hiring a person with prior convictions in this area.

Sincerely,

Robert J. Sundberg
Commissioner

MEMORANDUM April 6, 1983

SUBJECT: Definition of minority in Rule 1(e)

TO: Senator Rick Halford

FROM: Billy G. Berrier
Director
Division of Legal Services

You have requested wording for a suggested definition of "minority" for the purposes of Rule 1(e) essentially as we discussed.

I would suggest:

> For the purposes of this rule a minority is a group of members who have declared themselves to be a caucus not later than the day following the election of the presiding officers and who are not members of the majority. If there is more than one group who would meet these requirements, the larger group is the minority.

I believe this meets the concept you desired.

CSHB 7 (Judiciary)
Effect of Amendments

The proposed Judiciary committee substitute makes the following changes:

Clarifies that the provisions of this law relate to 'motor' vehicles as defined in the statutes.

Includes a certificate of self insurance as one means of proving financial responsibility. This is typically used by commercial companies to insure a fleet of vehicles. The certificate is defined by AS 28.20.400.

Clarifies that a person seeking a license must only show proof of insurance only on vehicles which are both registered in that persons name and owned by the person which must be located within the state.

Changes the propsed liability limit increases from 100/300/50 to 50/100/25. Currently the limits in law are 25/50/10.

Adopts the language suggested by the Court system relating to issuance of a citation by a peace officer.

Deletes provisions which allowed a peace officer to impound a vehicle on the spot if he had cause to believe an insurance policy was not in effect.

Changes the responsibility for notifying parties in a forfeiture incident from the "court" to the Department of Law as suggested by the Court System.

Changes the date for submission of the first annual report from February 1986 to 1988 and changes report from Dept. of Commerce and Economic Development to a JOINT report with Department of Public Safety.

Adds new effective date of January 1, 1984 for the provisions which mandate that insurance companies offer uninsured and underinsured insurance. These sections would now take effect before any other provision in the law.

House bill seeks to reveal child molesters

Times Juneau Bureau

Juneau — House conservatives have sponsored a bill to give employers access to some criminal records of workers who deal with minors.

The Governor's Commission on the Administration of Justice would be required to disclose to employers of workers who deal with minors records of all convictions for contributing to the delinquency of a minor or for sex crimes, under the bill.

"I hope I can close one small gap in a law that often times has assisted the sexually perverted to ply their trade with children," said Rep. Ramona Barnes, R-Anchorage, main sponsor of the proposal.

Current law permits release of these criminal records only to law enforcement agencies, she said.

"This information should also be provided employers and supervisors who recruit for positions whose main responsibility is supervising or disciplining minors.

The bill would require the commission to supply fingerprints to the employer, who also could fingerprint employees or job applicants.

The commission would be required to destroy the request for information six months after it is answered.

"The confidentiality of a criminal record rates way below my concern for innocent, trusting children who fall prey to child molesters," Barnes said.

IN THE HOUSE BY THE JUDICIARY COMMITTEE

CS FOR HOUSE BILL NO. 375 (Judiciary)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to access to certain criminal justice information."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 12.62.030(a) is amended to read:

(a) Except as provided in (b) and (c) of this section and in AS 12.62.035, access to specified classes of criminal justice information in criminal justice information systems is available only to individual law enforcement agencies according to the specific needs of the agency under regulations established by the commission under AS 12.62.010. Criminal justice information may be used only for law enforcement purposes or for those additional lawful purposes necessary to the proper enforcement or administration of other provisions of law as the commission may prescribe by regulations established under AS 12.62.010. No criminal justice information may be disseminated to an agency before the commission determines the agency's eligibility to receive that information.

* Sec. 2. AS 12.62 is amended by adding a new section to read: as defined in subsection (e)(2)

Sec. 12.62.035. ACCESS TO CERTAIN CRIME INFORMATION. (a) Notwithstanding any other provision of law, an interested person may request from the commission records of all convictions involving contributing to the delinquency of a minor and any sex crimes of a person who holds or applies for a position in which the person would have supervisory or disciplinary power over a minor. The commission shall authorize the disclosure of the information to the requesting person

and shall provide a copy of the information to the applicant.

(b) A request for records under (a) of this section may include the applicant's fingerprints and any other data specified in regulations established by the commission. The request shall be on a form approved by the commission, and the commission may charge a fee to be paid by the requesting person for the actual cost of processing the request. The commission shall destroy an application within six months after the requested information is sent to the requesting person and applicant.

(c) Negligent disclosure of information by the state under this section is not actionable in a court of law.

(d) The commission shall adopt regulations to implement the provisions of this section.

(e) As used in this section

(1) "contributing to the delinquency of a minor" means a conviction for a violation or attempted violation of AS 11.51.130(a)-(1), (3), or (5) or for a violation or attempted violation of an offense committed outside the state if the offense would have been a crime in this state under AS 11.51.130(a)(1), (3), or (5) if committed in the state;

(2) "interested person" means a corporation, company, partnership, firm, association, organization, business trust, or society, as well as a natural person that ~~solicits~~ employs or solicits the employment of a person to serve with or without compensation in a position in which the person would have supervisory or disciplinary power over a minor;

(3) "sex crime" means a conviction for a violation or attempted violation of AS 11.41.410 - 11.41.455, AS 11.51.130(a)(4), or AS 11.66.100 - 11.66.130 or for a violation or attempted violation of an offense committed outside the state if the offense would have

been a crime in this state under one of the above sections if committed in the state.

Suspects arrested in sex cases

by Jeff Berliner
and Carl Gidlund
Times Writers

A man who allegedly used state agencies to procure juveniles for sex has been jailed.

Police and prosecutors say he gave the youths alcohol and drugs then sexually molested them. The man acted under the guise of helping youths he had obtained through legitimate channels, police said.

Held on $40,000 bail is Hensley L. "Pat" Patterson, 33. He is charged on two felony counts of sexual abuse of a minor, one felony count of contributing to the delinquency of a minor and five misdemeanor charges of contributing to the delinqeuency of a minor.

Patterson reportedly got access to the youths — all boys age 14 to 17 — through his work under the authority of the state juvenile probation office and as a state-approved foster parent.

"Patterson used state agencies as a way of maintaining contact with the boys," said Paul Olson, an assistant district attorney here who specializes in prosecuting sex crimes.

Police and prosecutors said they stopped another case of an adult man sexually molesting

See Arrest, page A-5

Arrest

(Continued from page A-1)

male juveniles in a second unrelated arrest Friday.

In that c[illegible] Robert Elstad, 41, was jaile[illegible] $35,000 bail and charged with [illegible] counts of sexual abuse of a minor and lewd and lascivious acts toward children.

Both men were arraigned Friday. The cases were put together by the sex crimes units of the Anchorage Police Department and the district attorney's office.

Authorities say that in addition to using state agencies to get custody of the youths, Patterson had other ways of coming into seemingly legitimate contact with young boys.

Olson said Patterson was director of the Cook Inlet Native Association Youth Center and also worked at the Fairview Community Center. In both jobs he came into contact with boys about the age of those he is accused of molesting.

A foster parent from 1973 to 1975 and again from 1977 to 1979, Patterson was given legal custody of juveniles and was an officially approved guardian, Olson said.

Patterson was a so-called "pass partner" for youths held at McLaughlin Youth Center and for youngsters on probation, Olson said, adding that the state "juvenile probation office allowed him to be with kids on probation."

Juvenile probation officers have the power to authorize approved individuals, such as Patterson, to take the youths out of an institutional setting or out of other custodial situations and act as the guardian of the youths while they are assigned to him.

Officials at McLaughlin and in the Department of Health and Social Services could not be reached for comment Friday. However, Anchorage police Lt. George Novaky said the department's investigation began last December when a youth in custody at McLaughlin told investigators of his involvement with Patterson. The youngster provided information that led to the other boys, he said.

Although the criminal complaint against Patterson lists only five victims, Olson said it is "generally thought that more kids are involved."

The felony contributing-to-the-delinquency-of-a-minor charge alleges that Patterson induced a juvenile to commit a sex act with him. Five misdemeanor contributing-to-the-delinquency-of-a-minor charges state that Patterson supplied drugs and alcohol to the youngsters. The incidents are said to have occurred from 1979 to 1982 at Patterson's home.

In a similar case, police recently charged that the assistant director of the Boys Club of Alaska was using his job to come into contact with boys he allegedly molested sexually.

Venson Brown still faces trial on those charges. And although he has pleaded not guilty, court documents state that Brown has confessed "in substantial part" to the allegations on tape. He goes to trial next month.

Elstad, a businessman who operates a contracting firm, allegedly molested boys age 12 to 15 in incidents that occurred from 1980 through 1982. He lured the boys into his home at 6525 McGill St. without force and then sexually assaulted them, police reported.

Lt. Novaky said the department's investigation of Elstad began last October while officers were pursuing another case — not related to sexual conduct — that involved him. Investigators pursued leads that lead them to seven other alleged victims, several of whom were in McGlaughlin, he said.

Patterson and Elstad face grand jury indictments and will be returned to court next week.

A CHILD'S CRUEL DEATH SPURS HER GRANDMOTHER TO WAR AGAINST CHILD MOLESTERS

Pictured here at 2, Amy Sue fell victim to a sadistic killer. "I was never aware of child molesting," says her grandmother.

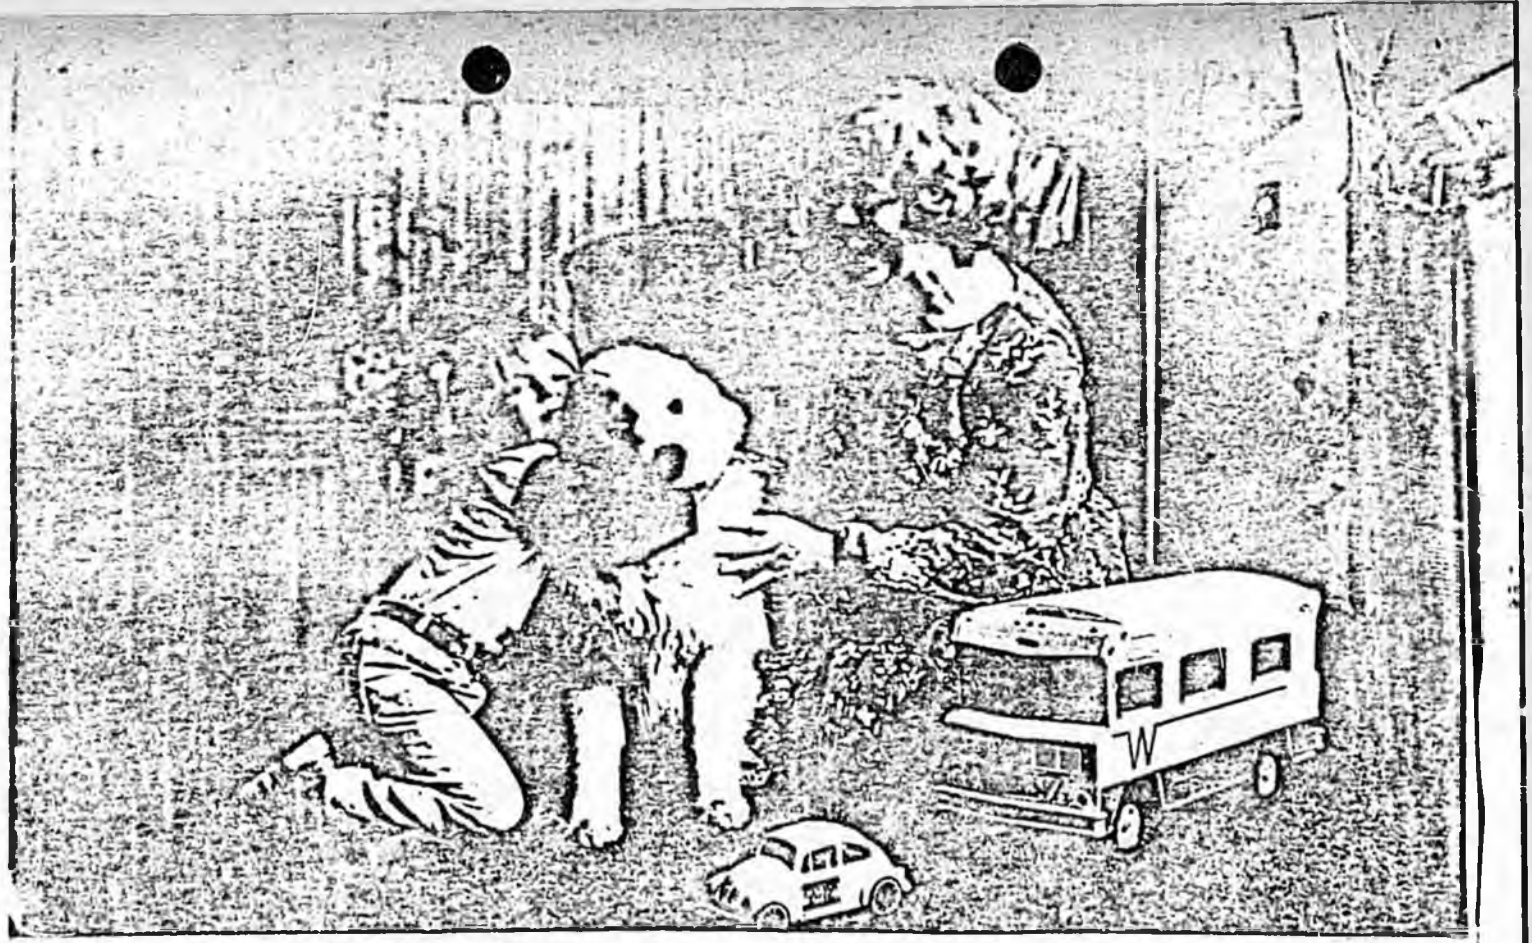
Photographs by Nancy Ellison/Sygma

Six weeks before he killed Amy, habitual molester Frank, 43, was freed by psychiatrists who believed he had "recovered."

1978 was a mild spring in the rural Southern California community of Camarillo, where [illegible]-old Amy Sue Seitz was playing in the backyard of her aunt's house. The aunt, Delfina, often looked after Amy Sue during the day while her mother, a single parent, worked as an electronics assembler. In this quiet neighborhood, Delfina felt safe leaving her niece unattended for a few minutes while she went inside to change clothes.

It was a mistake with horrible consequences. When Delfina looked outside, Amy Sue had vanished without a trace. For two days her relatives joined with neighbors and police in a futile search. Then, on the third day, a toddler's mutilated body was found in a nearby canyon. Of course, it was Amy Sue.

Ten months later police charged a man named Theodore Frank with the loathsome crime. Just the day before, he had been sentenced for the kidnapping and molestation of two preteen girls. Frank, 43, an unemployed laborer, has admitted to molesting as many as 150 children over a 23-year period. Until he was convicted of Amy Sue's murder in December 1979 and sentenced to die in San Quentin's gas chamber, he had served less than two years in prison and almost nine years in state hospitals for his sex crimes. Even as he committed Frank to Death Row, Judge Byron K. McMillan stated that he considered the sentencing an empty exercise: "I think he'll die of old age—on the streets in about 15 years. I'd bet on it."



That prediction may prove true: Frank is appealing his death sentence, claiming that the crime was not premeditated and that the state used inadmissible evidence. Lawyers for both sides agree that a final resolution of the case may take years. Judge McMillan's baleful view of the judicial process produced at least one positive effect—it motivated Amy Sue's grandmother, Patti Linebaugh, to try to make sure that future Theodore Franks would not be dealt with lightly. "I couldn't believe that the judge who put him away, even in this state, even though we had capital punishment, was saying that Theodore Frank would be out on the streets in 15 years," says Linebaugh, 47. "I felt that the families of Frank's prior victims had a responsibility. If they had only fought to create some pressure on law enforcement, this man wouldn't have been free. Maybe Amy Sue would still be alive."

Along with Irv Praeger, who prosecuted the Frank case, and another friend, Linebaugh founded SLAM—Society's League Against Molestation. "What began as a murder investigation became an investigation of our system of dealing with child molesters," says

CONTINUED

"First we were victims of Theodore Frank," says Patti Linebaugh of her granddaughter's killer. "Then we were victims of the court system."

Playing with grandson Michael, 3, and family pet Nikki, Patti observes, "I look at the little ones and know I have to do something."

Praeger. Statistics show that when a molester is arrested, he has probably attacked some 19 other children. "Only about 5 percent of the attacks are reported," according to Praeger, "and, of the molesters convicted, less than 10 percent went to prison."

Shaken by her grief and those figures, Linebaugh began a petition drive that garnered 140,000 signatures and pressured California legislators into adopting tough new anti-molester laws, which took effect last January. Among the provisions: mandatory long-term prison sentences without hope of probation for virtually all serious or repeat offenders; an extension of the statute of limitations to six years in molestation cases, since victims are often unable to discuss the assault for years afterward; and minimum terms of three years for each count, plus five additional years for each previous conviction of child molestation and 20 years to life for a third offense. "Who's responsible for the death of Amy Sue—Frank?" Linebaugh asks. "Our judicial system. I came to realize that laws could be passed to prevent men like Theodore Frank from getting out on the streets again."

Indeed, Theodore Frank is an example of modern penology and jurisprudence gone gravely awry. Described by one of his former doctors as "a chronic, habitual child molester," Frank was first arrested in 1958. He subsequently served several terms in prisons and hospitals, emerging each time to commit new assaults, and treating his victims with escalating violence and cruelty. Just six weeks before he killed Amy Sue, Frank had been released from the Atascadero State Hospital, a mental hospital for criminals, after serving more than three years of a four-year sentence for kidnapping and molesting a 4-year-old Bakersfield girl. Frank, who, according to Praeger, took a correspondence course in psychology while in prison, won his release from Atascadero by masquerading as a reformed man. He hoodwinked the hospital psychiatrists so thoroughly that they petitioned Illinois authorities to drop child-molesting charges pending against him there. Frank admitted the deception before being sentenced for assaulting the two preteen girls. "When convenient," he wrote, "I have used my extensive knowledge of psychotherapy as an ongoing game of manipulation."

One of the country's leading authorities on child molestation believes that pedophiles like Frank are not treatable. "There's no percentage for the molester to give it up," explains Dr. Roland Summit, an assistant professor of clinical psychiatry at the University of California at Los Angeles. "He doesn't want to stop or come to the surface or be identified. He doesn't want to close off his option." While researchers have not found a single cause of pedophilia, says Summit, studies indicate that the childhood victim of molestation may become a molester in adult life.

Amy Sue's relatives are trying to put themselves back together. Her mother, Sherry, has married a noncommissioned officer in the U.S. Navy, a man whose strength brought her through the trauma; they now live in an Eastern city where Sherry recently gave birth to twins. Patti Linebaugh likewise perseveres. "Every time I start to back off," she says, "I realize I can't live with myself if I don't create an awareness—make other people understand what must be done."

There are now 44 chapters of SLAM in California alone, and 12 in nine other states. Linebaugh is frequently asked to address interested groups across the country. "I've never done anything like this," she says of herself. "I've just been a mom and a wife and that was it. Yet from somewhere I've had the strength to fulfill a promise to a little baby."

MEMORANDUM

To: Representative Mae Tischer

From: Leonard Steinberg, Research Staff

Re: Estate Taxes -- Research Request 83-154

Gail Thibodeau of your office asked for the following state and federal estate tax information:

1) the justification for the taxes;

2) the amount of income received from these taxes for the last four years;

3) the percentage of total revenue represented by estate taxes;

4) the amount of estate tax revenue collected by Alaska from residents and non-residents; and

5) the hardships that may result from estate taxes.

Justification for Estate Taxes

Estate taxes originated with the Populist political movement in the United States; the goal was to reduce certain excise taxes by taxing the wealthy. The federal government has levied a tax on the transfer of wealth at death continuously since 1916.

The primary reasons Congress passed the estate tax in 1916 were:

1) redistribution of wealth by breaking up large concentrations of wealth at the time of death; and

2) raising additional revenue for the federal government.

Another justification for estate taxes is that the appreciation in value that occurs between the time property is acquired and a person's death is income which normally escapes income taxation; estate taxes recoup part of this loss.

Following its imposition, individuals avoided the new estate tax by giving away large portions of their wealth prior to their death. Consequently, Congress has imposed a gift tax since 1932. The gift tax rate was substantially less than the estate tax rate until the two were unified by the Tax Reform Act of 1976.

The justifications for state estate taxes are the same as for federal estate taxes. However, according to Mr. Joe Donohue, Deputy Commissioner of Revenue, Alaska has the additional justification that its tax brings in revenue to the State without increasing the tax liability of an estate. Mr. Donohue explained that Alaska's estate taxes are credited, dollar for dollar, against the taxes that would otherwise be paid to the federal government. Therefore, until federal estate tax law is changed, a reduction in Alaska's estate taxes will not present a savings to the estate but only increase the revenues paid to the federal government.

Estate Tax Revenues

The amount and number of State estate tax collections, their percentage of total State revenue, and the amount of State revenues are listed below in Table 1. In fiscal year 1982, 325 estates filed tax returns with the Department of Revenue; 317 (86 percent) of the filed returns received a certificate of non-tax liability while 52 (14 percent) had taxes to pay. The estate tax revenues received in 1982 are not directly related to the 1982 returns because estates have 15 months to make their payments and are frequently granted 10-15 year extensions. Estate taxes during the period 1978-1982 have always been substantially less than one-half of one percent of the State's total unrestricted revenues.

Table 1

State Estate Taxes and Unrestricted State Revenues -- FY1978-1982

	1982	1981	1980	1979	1978
# of State Estate Tax Returns*	325	369	382	407	334
# of Paying Returns* †	52	42	N/A	57	55
State Estate Taxes Collected	$334,676	$453,492	$197,592	$136,685	$244,143
State Unrestricted Revenues($millions)	$4,108.4	$3,718.2	$2,501.2	$1,133.0	$764.9
Estate Taxes as a % of State Revenues	.008%	.012%	.008%	.012%	.032%

* These figures are for calender years and are based on the number of certificates issued for tax and non-tax liability.

† Eighty to ninety percent of state estate tax returns result in the the Department of Revenue issuing certificates of non-tax liability; those returns which actually impose State estate tax liability are listed in this column.

According to Ms. Eloise Herrick of the Department of Revenue, State estate tax records do not break down the revenues collected by residency status. However, Ms. Herrick stated that in her opinion, very little revenue is collected from non-residents. A more accurate determination of how much money was collected from residents and non-residents would require corrolating the revenues received with individual returns and reviewing each individual return to determine residency status; because this would require substantial time and effort, we have not pursued this information at this time.

Table 2 below illustrates the number of federal estate tax returns and the revenues collected by the federal government from both Alaska and the nation. The table also shows the percentage of total federal revenue represented by estate taxes. For example, in federal fiscal year 1982, 159 estate tax returns were filed with the federal government from Alaska and 134,965 were filed nationally. The federal government collected approximately three million dollars in estate taxes from Alaskans and eight billion dollars nationally in 1982. Estate taxes contributed 1.3 percent of the total federal revenue received in 1982.

Table 2

Federal Estate Taxes -- Federal FY1978-1982

($ in thousands)

	1982	1981	1980	1979	1978
# of Alaska Federal Estate Tax Returns	159	152	145	156	129
Total # of Estate Tax Returns Filed	134,965	145,617	148,228	159,404	160,152
Estate Taxes Paid by Alaskans	$3,081	$2,097	$2,285	$2,689	$2,412
Total Estate Taxes Paid	$8,035,335	$6,694,641	$6,282,247	$5,344,176	$5,242,080
Estate Taxes as a % of Total Revenue	1.3%	1.1%	1.2%	1.2%	1.3%
Total Federal Revenue	$626.8* (bil.)	$599.3 (bil.)	$517.1 (bil.)	$463.3 (bil.)	$399.6 (bil.)

* Estimate

Federal gift taxes, because they were created to stop estate tax avoidance, are often evaluated in conjunction with federal estate taxes. Table 3 presents information on federal gift taxes. As Table 3 illustrates, gift taxes add relatively little to federal revenue collections.

Table 3

Federal Gift and Estate Taxes and Total Revenues -- 1978-1982

($ in thousands)

	1982	1981	1980	1979	1978

* Estimate

Hardship Cases

Information regarding the frequency of cases in which a family must sell everything to pay estate taxes is not readily available. Large real estate holdings, such as farms, pose the most common hardships; families have reportedly been required to sell farms to pay estate taxes. However, due to the urgency of completing this request, we have not been able to provide a substantive response to this question. Please let us know if you would like additional research performed on this issue.

Several changes to federal tax laws have attempted to reduce the hardships that may result from estate taxes. The Tax Reform Act of 1976 made the following changes:

- increased the value of estates which can escape taxation from $60,000 to $175,000;

- allowed farms and other closely held businesses to be valued at less than fair market value; and
- increased marital deductions.

The Economic Recovery Tax Act of 1981 also attempted to reduce hard ships by:

- further increasing the value of estates exempt from taxation to $600,000;
- increasing the amount by which farms and closely held businesses can be undervalued; and
- allowing for unlimited transfers of property among spouses.

Furthermore, the 1981 Act extended the payment period for certain estate taxes to 15 years, and lowered the tax rates from a maximum of 70 to 50 percent.

* * * * *

We hope this information is helpful to you. Please let us know if you would like us to do any additional research.

PART-TIME	-	-	-	-	-	-
TEMPORARY	-	-	-	-	-	-
	-	-	-	-	-	-

III. SOURCE OF FUNDS TO OFFSET FISCAL IMPACT OF BILL:

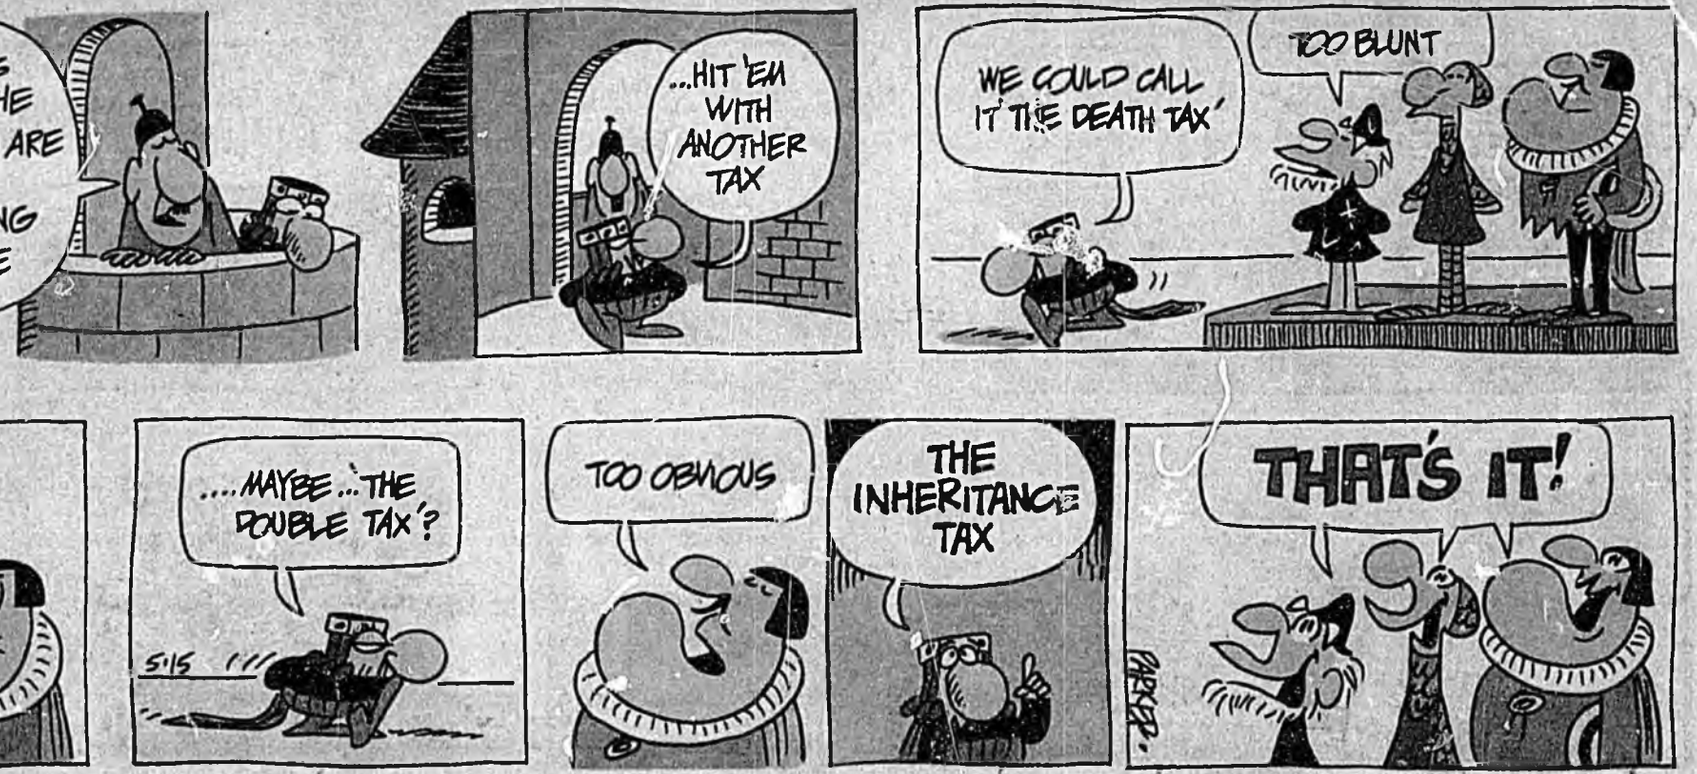
The repeal of AS 43.31 would reduce general fund tax receipts by approximately $300,000 per year based on past the five-year average. However, there would be no reduction in the tax paid by the estate. The repeal would only result in the tax being paid to the Federal Government rather than the Department of Revenue.

IV. ANALYSIS: Attach a separate page for any Analysis.

Prepared By: Robert W. Elliott (Robert W. Elliott) Phone: 465-2173
Division: Revenue - Research Date: 5/12/83

Approved by Commissioner: Joseph H. Donohue Date:
Department: Revenue

Distribution:
Original to Legislative Finance
Copy to Office of Management and Budget (for Legislature introduced bills)
Copy to Department (for Governor introduced bills)
Copy to Sponsor
Copy to Requestor (if different from Sponsor)



IV. Analysis

None of AS 13.16.610 should be repealed as there still is an apportionment of federal estate taxes required.

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM January 13, 1984

SUBJECT: Sectional Analysis of House Bill 402

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Russ Josephson
Legislative Counsel

You have asked for a sectional analysis of HB 402. The analysis is as follows:

Section 1. Section 1 of the bill requires the Department of Public Safety to request from another state the records of a person previously licensed in that state and now applying for a driver's license in this state. Presently, if a driver has been licensed elsewhere previously the department may request the records, but it is not required to do so. Section 1 also clarifies that the driver's record from the other state becomes a part of the driver's record in this state. (See Section 3.)

Section 2. This section amends the existing statutory provision that a driver's license expires on the licensee's date of birth in the fifth year following the issuance of the license. With this amendment, expiration would be a year earlier, in the fourth year.

Section 3. Section 3 is a new section of law. It requires the Department of Public Safety to examine the record of a person applying for a license in this state, to make note of any offenses in other states with elements substantially similar to those of offenses in this state for which points are assigned, and to assign the person points on the person's record in this state, accordingly. Further, the department must follow the procedures it would follow for a driver who accumulated points in this state, including notifying the driver if the driver is determined to be a problem driver under AS 28.35.231(a), or declaring the applicant unqualified for a driver's license, as

appropriate. In addition, section 3 requires the department to treat offenses committed in another state by a driver licensed in this state as if the offenses had been committed in this state. This is done by assigning points to the driver's record in this state for offenses committed in another state when those offenses have elements substantially similar to the elements of offenses in this state for which points are assigned.

Section 4. This section amends an existing provision that allows the Department of Public Safety to maintain certain files. With this amendment, the department would be required to maintain a file of all accident reports, abstracts of court records of convictions of vehicle, driver, and traffic offenses, and other information which the department considers necessary to carry out the purposes of the motor vehicle statutes.

Section 5. Section 5 amends existing law that allows the Department of Public Safety to send to another state the records of a person licensed in that other state when the person has been convicted of a motor vehicle-related offense or has lost the driving privilege in this state. The amendment would require the department to send the record to the other state.

Section 6. This section increases the fees for drivers' ~~licenses~~ and permits.

L3/081

SECTIONAL ANALYSIS OF
HOUSE BILL NO. 402 BY REP. ABOOD
"AN ACT RELATING TO DRIVERS' LICENSES AND RECORDS"

It has become imperative that the State of Alaska identify the problem driver before he is a menace on the highways. This bill is designed to assure driver's license information reciprocity with all other States; that when issuing a driver's license to an individual from a previous jurisdiction, (an out-of-state individual who moves to Alaska), that the driving records of that individual are verified by the preceding jurisdictions at the request of the Department of Public Safety, State of Alaska to pinpoint possible problem drivers. This bill also changes duration of an Alaskan driver's license from 5 to four years, and shortens the "grace period" allowed to renew an expired license. Further, it clarifies the awarding of "points" for previous driving offenses to an individual from another jurisdiction requesting a license in the State of Alaska, and provides points to be awarded to the driver licensed in Alaska, when offenses are committed outside the jurisdiction of Alaska.

SECTION 1 - AS 28.15.061 (c):

When an application is received from an individual previously licensed in another jurisdiction, the department would now be required to request a copy of the applicant's driving record from the previous jurisdiction(s). (The Department should routinely send back to the issuing states all licenses received from the applicants obtaining Alaska licenses, with a request for forwarding the driving records of the applicant.)It then becomes a part of the driver's record, if the violations from the previous jurisdiction(s) have "similar elements" to those of Alaska law. (See AS 28.15.116) At the present time, the only time driving records are requested from other jurisdictions is when the individual's license has been suspended or revoked. The Department must take the person's word for his previous actions.

The DLC (Drivers License Compact) is a formal interstate agreement, requiring legislative enactment which attempts to regulate only those aspects of driver licensing law which relate to the "one license concept, the one record concept and reciprocity in sharing and acting upon information regarding interstate traffic offenders". Thirty states are now participating in this formal interstate agreement. Although Alaska is not a member of this Compact, most of the 49 other states give driver's license record information readily. In effect, this bill would enact the same legislation that would occur if Alaska entered into the DLC.

Currently, the Federal Government is in the process of updating an on-line computer system known as NDR, (National Driver Register), and it should be functional by 1986. Alaska participated in this system until last year because of funding cutbacks. Any state issuing a license can send an inquiry to this system to determine if that person's driving priviledges were withdrawn in another state. At the present time, the inquiry and response are via mail. (See Section 6 relating to "FEES".) Fiscal consideration should be given to additional staffing in the Juneau office to maintain records properly; for the driver improvement program and field office screening, staffing is also required.

SECTION 2 - AS 28.15.101 (a) - EXPIRATION OF LICENSE:

Commissioner Sundberg has recommended that an Alaska Driver's License should expire four (4) years after issuance, (versus the current 5 year expiration date), and that the one year grace period should be changed to a 90 day grace period. A majority of states now carry a 4 year expiration date on driver's licenses. Alaska is the only state carrying a 5 year expiration date.

SECTION 3 - AS 28.15.116 - EFFECTS OF VIOLATIONS IN OTHER STATES:

The Alaska Statutes become contradictory of each other when referring to AS 28.15.221 (a), (violation is counted in Alaska only if it applies to Alaska State Law), and AS 28.15.061 (c), (which states that all violations transfer to Alaska when an individual applies for an Alaska State Driver's License from another jurisdiction). Currently, the problem arises when comparing Alaska laws to the laws of other jurisdictions.

This new section requires that the Department assign points to the applicant's record for offenses committed in other states with laws similar to those of Alaska. If it is determined that the applicant is a "problem driver", (that is, has 50% of the points allowed), this section requires the applicant may be required to appear for a driver improvement interview. The Department may disqualify the applicant if the information from the other jurisdictions proves that the level of points awarded exceeds the maximum allowed. (See AS 28.15.221 (b) - 12 or more points awarded in a 12 month consecutive period, or 18 or more points awarded during any 24 month period.) If the information received from the previous jurisdiction(s) after issuance of a license is unfavorable, the Department can then cancel the license.

When an individual licensed in Alaska violates a traffic law in another jurisdiction, that violation becomes part of his Alaska driving record if the violation has "similar elements" to that of Alaska State Law.

SECTION 4 - Files:

The Department is required to maintain a file of all accident reports, etc. and all other information that the Department considers necessary to carry out the driver's license statute requirements.

SECTION 5 - AS 28.15.171 (b) - Out-of-State Drivers:

If the Department receives a record of the conviction of a person licensed in another jurisdiction, (another state), the department is required to forward the records to the motor vehicle administrator for the jurisdiction in which the person convicted has his license. This corresponds with AS 28.15.160 (b).

SECTION 6 - AS 28.15.271 (1) - FEES:

License fees are to be increased as follows:

All classes of driver's license:	from $5 to $10 (5 year to 4 year)
Motor-driven cycles:	from $2 to $10 (5 year to 4 year)
Instruction Permit:	from $1 to $3
Duplicate Driver's License	from $2 to $3
Temporary license & renewal of permit:	from $1 to $3
School bus driver's permit:	from $2 to $3

The increase in fees outlined in Section 6 of the bill will approximately double the revenue to the state for issuance of driver licenses. These increases in fees have been recommended by Commissioner Sundberg. It is felt that although the fees go directly into the General Fund, the fiscal impact of new positions to facilitate the implimentation of the above will be offset by the increase in fees. If the new fee schedule went into effect July 1, 1984, it is perceived the revenue would increase an additional $404.7 in FY85. The projected increase for FY86, FY87, and FY88 is based on an assumption of a driving population increase of 4% annually.

FY89 will be the first year any increase in revenue will be realized as a result of Section 2 of the bill, which changes license validation period from five years to four years.

This legislation will strengthen driver's licensing procedures which are of great value in keeping dangerous and unqualified drivers off Alaska Highways.

1/13/84

The Driver License Compact was made possible by the Beamer Resolution (Public Law 85-684) adopted by the United States Congress in 1958. That resolution noted the problems and the need for cooperative effort on the part of the states, and it provided advance consent to state action in the following terms:

> Resolved ... that the consent of Congress is hereby given to any two or more of the several states to enter into agreements or compacts -

> (1) for cooperative effort and mutual assistance in the establishment and carrying out of traffic safety programs ... and
> (2) for the establishment of such agencies, joint or otherwise, as they deem desirable for the establishment and carrying out of such traffic safety programs.

The first major response to the Beamer Resolution came in 1960 when The Council of State Governments started work on what would become the Driver License Compact. The work was begun following resolutions of the Western Interstate Committee on Highway Policy Problems and the Western Governors' Conference's urging that such an agreement be developed. The Council convened an interstate group which included representatives from a variety of governmental and private interests to be responsible for drafting the agreement. State motor vehicle administrators and the American Association of Motor Vehicle Administrators cooperated closely in the drafting of the compact. The Interstate Compact committee of the National Conference of Commissioners on Uniform State Laws and representatives of major national organizations active in highway safety matters assisted in the effort by commenting on successive drafts of the agreement. Legislators from a variety of states also were involved intimately in the compact drafting process. The fruit of these efforts was the Driver License Compact, which was offered to the states for legislative enactment in early 1961. It has now been adopted by thirty states.

The Compact seeks to obtain cooperation among the states in the exchange of driver offense information as a means of aiding driver enforcement programs and in reducing accidents. The agreement is directed toward the exchange of information about certain serious offenses. It also encourages procedural uniformity in state handling of license revocations and other processes involving offenses in states other than the licensing state. Specifically, the compact aims to help accomplish three major objectives:

- Implementation of the "one license concept";
- Implementation of the one record concept;
- Insure uniform and predictable treatment of drivers regardless of state of residence.

Implementation of the "One License Concept"

Nationwide Implementation of the "One License Concept"

The goal is to prevent individual drivers from obtaining multiple licenses from different states and to prevent the use of such multiple licenses to retain driving privileges despite conduct and convictions warranting revocation or suspension. Under the Compact an individual is allowed to have only one license at any particular time. That license is to be issued and controlled by the state in which the driver resides. Any driving which that driver wishes to do in another state is to be based upon his home state license. Under the Compact such a driver is not eligible to receive a license from another state until his existing license is surrendered.

Implementation of the "One Record Concept"

This second major goal of the DLC is to insure that an individual's entire driving record, including offenses in all states in which he has driven, is used to determine his driving eligibility in his home state and all other states. Ideally this complete driving record would follow the driver from state-to-state. It would be used by all states to determine his driving eligibility when he applies for a license and his continued eligibility during licensure. Under the Compact, a driver's complete driving record (including offenses in all party states) would be on file in his home state. It would accompany him if he moved to another state.

Uniformity of Treatment

The DLC also seeks to insure uniform and predictable treatment of drivers convicted of serious traffic offenses wherever the offense and conviction occurs. The philosophy behind the DLC provisions is that a driver's license should be suspended, revoked, or limited if his driving conduct in another state was such that if it had occurred in the state of his residence it would have called for suspension, revocation, or limitation. However, the Compact drafters were concerned about the varying definitions of offenses and the varying administration of traffic laws among the states. Accordingly, the mandatory language of the Compact is limited to convictions of driving conduct universally recognized to be extremely serious. Those offenses specified in the Compact are (1) manslaughter or negligent homicide, (2) driving while intoxicated, (3) conviction of a felony in which a motor vehicle was used, and (4) conviction of failure to stop and render aid in an accident resulting in death or personal injury. It is important to note that the action taken pursuant to the Compact would be taken by the driver's own home state officials. It would be based upon home state law and not on the laws and policies of the state where the offense(s) occurred. The state where an offense occurred could take unilateral action against the foreign driver's right to drive there, but action against the home state privileges would remain the responsibility of the home state.

MEMBERSHIP AND REACTION TO DLC

Figure 1 shows the geographical distribution of DLC states. It is evident that all the western states are members except Alaska. After that, with the exception of small clusters of non-compact members, there does not appear to be a strong geographical pattern.

The thirty states [1] which are currently parties to the DLC are:

Alabama (1966)	Indiana (1967)	New Mexico (1963)
Arizona (1063)	Iowa (1965)	New York (1965)
Arkansas (1969)	Kansas (1965)	Oklahoma (1967)
California (1963)	Louisiana (1968)	Oregon (1963)
Colorado (1965)	Maine (1963)	Tennessee (1965)
Delaware (1964)	Mississippi (1962)	Utah (1965)
Florida (1967)	Montana (1963)	Virginia (1963)
Hawaii (1971)	Nebraska (1963)	Washington (1963)
Idaho (1963)	Nevada (1961)	West Virginia (1971)
Illinois (1963)	New Jersey (1966)	Wyoming (1977)

Reaction to and support of the DLC since its promulgation in 1961 has been favorable. Organizations which have endorsed the Compact include the American Association of Motor Vehicle Administrators (AAMVA), The Council of State Governments and various of the regional Governors' Conferences, the Highway Users Federation, the International Association of Chiefs of Police, and the President's Committee for Traffic Safety. Criticisms of the Compact will be discussed in detail in this report. The position of the U. S. Department of Transportation in the past has been that "each state enact or comply" with the DLC, which may be termed an endorsement of the DLC goals if not an endorsement of the specific mechanism. Support for the DLC among the states is evidenced not only by the endorsements of organizations representing state officials, but also by the fact that 60 percent of the states have enacted the Compact. The party states also contain approximately 60 percent of the nation's driving population. One important conclusion of this study is that whatever opposition arose to the DLC may have been due principally to lack of information and failure of communication rather than to substantive opposition to its principles. This conclusion will be considered in detail later in this report.

[1] The year each state adopted the Compact is shown in parenthesis.

Dear Representative Abood:

In response to your comments of January 19, 1983, attached is a memorandum from Robert J. Rowan, Director of the Division of Motor Vehicles concerning reciprocal agreements.

Even though you did not make a specific request for this information at the time, you did raise my curiosity.

I hope this information is of some value to you.

Sincerely,

Robert J. Sundberg
Commissioner

SUBJECT: Reciprocal Agreements
Driver's License Records

This replies to your January 25, 1983 memorandum regarding Representative Abood's interest in this subject. I hope the following information answers your questions.

Alaska does not have reciprocal agreements with any other state which would require that state to send us a driving record when an individual possessing a driver's license from that state becomes licensed in Alaska, or vice-versa. Alaska Statute 28.05.021 states, in part,: "Compacts or agreements affecting state finances or driving privileges must be approved by adoption of a concurrent resolution approved by a majority vote of each house of the legislature before it becomes effective." Normally this type of agreement is a working arrangement between the state motor vehicle administrators, and there is no formal agreement.

It is generally the policy of the majority of states to automatically send a driving record to the new licensing state upon receipt of the surrendered license. Example: If a person with an Oregon license received an Alaska license, we require surrender of the Oregon license. If we returned that license to Oregon, they would send the driving record for that individual to Alaska.

We currently require the surrender of any out-of-state license, however we do not return it to the state of issue. We currently don't have the manpower to reciprocate, nor to enter any driving record returned.

Also AS 28.15.221(a), as written, prohibits point assignment for any conviction which is not in violation of an Alaska statute, regulation, or municipal ordinance. This section is in direct conflict with AS 28.15.061(c), which reflects that upon receipt of a driving record from another state it becomes a part of the driver's record in this state with the same effect as if the record originated in this state. A request to review AS 28.15.221(a), with recommended change, accompanies the bill analysis and fiscal note to HB-6 and SB-61.

If AS 23.15.221(a) were amended and we had sufficient manpower, we could return surrendered licenses to the state of issuance and enter any records received from that state. I believe the majority of

states would begin to reciprocate immediately if we agreed to send them driving records for individuals with an Alaska license who surrendered same upon becoming licensed in that state. At the present time we receive numerous Alaska licenses surrendered to other states, however we do not return a driving record due to insufficient manpower to handle this function. Whether or not Alaska had a law making it mandatory that other states send us driving records upon the return of one of their licenses, it would not increase the number of participating states.

There is one exception to reciprocity with other states. At the present time, if an individual with an Alaska license is involved in an accident in another state, and that state suspends the license, we reciprocate, and vice-versa.

At the present time, a law enforcement officer and/or DMV can send an inquiry via NLETS (National Law Enforcment Teletype System) to any state and determine an individual's license status. Most states have such inquiries computerized, therefore the response is generally within a reasonable time frame. We use this when an applicant gives us a YES answer to the question "Has your license ever been suspended, revoked, denied or cancelled?"

The Federal Government operates a system called the NDR (National Driver Register). This is a batch computer system in which several states send notices whenever any driver's license is suspended or revoked in their state. (Alaska participated in the NDR by advising them of all license actions until this fiscal year when we dicontinued doing so because of funding cutbacks.) Then any state issuing an original license can send an inquiry to the NDR to determine if that person's driving privileges were withdrawn in another state. Such an inquiry and the response is via mail. The Federal Government is in the process of updating the NDR, and plan on implementing an on-line computer system by 1986. At that time all of our terminal offices will be able to see if the applicant is suspended anywhere.

Thirty states are parties to an interstate compact known as the Drivers License Compact (DLC). The DLC is a formal interstate agreeement which attempts to regulate only those aspects of driver licensing law which relate to the one license concept, the one record concept, and reciprocity in sharing and acting upon information regarding interstate traffic offenders. The DLC does require legislative enactment. The last state to do so was Wyoming in 1977. Even though some states are not members of the DLC, they still reciprocate in regard to driving violations.

MEMORANDUM

TO: Commissioner Robert Sundberg
Department of Public Safety

FROM: Representative Mitch Abood

RE: DRIVING RECORD RECIPROCITY

DATE: April 13, 1983

The following are some comments are based on some research that has been done on the issue referenced above. I have also enclosed a copy of the Bill Draft on Driver's Licenses. Please review the following and call me with your comments.

AS 28.15.061 (c)

"When an application is received from a person previously licensed in another jurisdiction, the department may request a copy of the applicant's driving record from the other jurisdiction. Upon receipt of that record by the department, it becomes a part of the driver's record in this state with the same effect as if the record originated in this state."

In this case, MAY should be changed to SHALL.

At the present time, when an out-of-state driver applies for an Alaska State Driver's license, the Department of Licensing simply throws away the out-of-state license, rather than returning it to the State of origination. According to Bill Brown, Chief of Driver Services, Department of Public Safety in Juneau, Alaska, it would require manpower that is not presently available because of lack of funding to automatically track all out-of-state driver's records when they apply to the State of Alaska for a driver's license.

However, every state in the nation has an NCIC (National Crime Information Center) computer system that can send driver information intrastate, and the cost for using this system remains the same whether you request 5 driver's records or 5,000 per month. Ordinarily, the State of Alaska requests driver's information by mail, but the NCIC system would speed up the process of processing all out-of-state driver information in a timely and cost-effective manner. Also, according to Robert J. Rowan, Director, Division of Motor Vehicles, Department of Public Safety, a law enforcement officer and/or DMV can send an inquiry via NLETS, (National Law Enforcement Teletype System), to any state and determine an individual's license status. Most states have such inquiries computerized, so the response time is pretty reasonable.

Alaska participated in the NDR (National Driver Register) batch computer system that sends notices to several states whenever a driver's license has been suspended, or revoked in their state. Any state issuing an original license can send a request into NDR to review that person's driving history. The inquiry and reponse are via mail. The Federal Government is planning an on-line computer system by 1986.

The DLC (Drivers License Compact) is a formal interstate agreement, not requiring legislative enactment which attempts to regulate only those aspects of driver licensing law which relate to the "one license concept, the one record concept and reciprocity in sharing and acting upon information regarding interstate traffic offerders." Thirty states are now participating in this formal interstate agreement, but a state does not necessarily need to become a member to participate. As a further note, Alaska cancelled their participation in this system last year because of funding cutbacks.

At the present time, the only time driving records are requested is when an individual's license has been suspended or revoked by another state/jurisdiction. The Department of Licensing takes the individual's word for his previous actions. Reference an individual who is charged with drunk driving, or an habitual violator of driving laws in another jurisdiction. At the present time, this particular individual can lie about his previous record, and state that he/she has lost their license. They will be required to take a written test and an actual on-the-road driving test, but neither of these tests can prove that the individual in question was a danger to the highways.

This issue of driving record reciprocity brings up a number of issues: -

In researching various drivers license figures, the State of Alaska is the only state in the nation to renew driver's licenses on a 5 year period - all the rest of the states in the US re-issue licenses on a 2 to 4 year basis. Alaska State law could be changed to require an individual to renew their license at least once every 3 to 4 years. If it is a questions of funding, the State should charge an additional $3.00 or so, (or whatever it takes) to assure adequate staffing for the Department. I am checking into this with the Department.

At the present time, if the Department of Licensing discovers that the out-of-state individual who has applied for an Alaska State license is

guilty of violations and/or has had his/her license suspended/revoked, the Department then notifies the individual who has been accused and the individual has 30 days to appeal the decision with the jurisdiction holding the driving records. (AS 28.15.031 (1) to (8)).

As an additional recommendation to amend the current Alaska Satutes, the Department of Licensing could, after requesting and receiving a copy of the out-of-state applicant's driving record, mail the new Alaska license to the licensee, rather than issuing the license immediately as the applicant applies for his license. The applicant should be issued a temporary license for a period of 30 days, (Nevada and Washington works on this method), until his driving record could be reviewed, and if violations shown are 50% of accumulated points allowed for a year's period, this person would be identified as a "problem driver", and would be required to appear for a driver improvement interview before the license would be issued (See AS 28.15.221 (b) referencing Point System).

The Alaska Statutes become contradictory of each other when referring to AS 28.15.221 (violation is counted in Alaska State only if it applies to Alaska State Law), and AS 28.15.191, and AS 28.15.061(c), which states that all the violations automatically transfer to Alaska State when an individual applies for an Alaska State driver's license from another jurisdiction. If AS 28.15.061 (c) were changed to reflect that all driving records should be forwarded to the new state of issue, then points should be "awarded automatically" from a previous jurisdiction's violations. The problem arises when comparing Alaska State laws to the laws of the jurisdiction in question - what if (for example), Mississippi has a law that says that you may not make a right hand turn on a red light after stopping? The Mississippi driver who has a violation for this offense applies for an Alaska Driver's license - Alaska laws allow for a driver to make a right hand turn on a red light after stopping. Would this person's violation continue to be on record in Alaska, even though Alaska law allows for turning right on a red after stopping? At the present time, the law is contradictory.

Ultimately, there should be instituted into Federal law a rule that all states comply to driver's record reciprocity. This issue goes hand in hand with the drunk driving issue so prominent at this time. I believe the Barnes Law will have some effect on this.

One item that has not been covered by the draft of this Bill is that of reciprocating the driver's license information to other states when another jurisdiction has notified Alaska that they are licensing an individual previously licensed in Alaska. If the NDR system were used nationwide, this would automatically be in effect.

Please give me a call when you have had a chance to review the above information.

cc: Robert J. Rowan
Deputy Commissioner
Department of Public Safety

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - HB 402

Support

January 16, 1984

HB 402, An Act relating to drivers' licenses and records.

The department supports this piece of legislation, with the condition the fiscal note is approved to enable us to handle the increase in workload.

Basically what this bill does is bring Alaska in line with the majority of the other states in regard to the exchange and use of driving record information.

Alaska has not, for some time, used out-of-state traffic convictions in an attempt to identify drivers who have the greatest likelyhood of being in an accident so action can be taken that will hopefully cause these individuals to drive more safely. Out-of-state violations also have not been used to remove from the road, by cancellation of the drivers license, those who are ineligible, or who prove unable to improve their driving enough to assure a reasonable level of safety for others. This bill takes a large step in the direction of correcting those deficiencies, which are due partly to conflicts in the statutes, which this bill will correct, and partly due to funding shortages.

		TOTAL	127.6

REVENUE:

The increase in fees outlined in Section 6 of the bill will approximately double the revenue to the state for issuance of driver licenses. The FY85 budget projects FY85 revenue for license fees to be $404.7. If the new fee schedule went into effect July 1, 1984, it is perceived the revenue would increase an additional $404.7 in FY85. The projected increase for FY86, FY87 and FY88 is based on an assumption of a driving population increase of 4% annually.

FY89 will be the first year any increase in revenue will be realized as a result of Section 2 of the bill, which changes license validation period from five years to four years.

ASSUMPTIONS:

Effective date of July 1, 1984. Cost of living caluclated at 6%.

GENERAL COMMENTS:

We have not, for some time, used out-of-state violations in an attempt to identify drivers who have the greatest likelihood of being in an accident so action could be taken that will hopefully cause these individuals to drive more safely. Out-of-state violations also have not been used to remove from the road, by cancellation of the drivers license, those who are ineligible or who prove unable to improve their driving enough to assure a reasonable level of safety for others.

This bill takes a large step in the direction of correcting those deficiencies with our present method of operation. Our present deficiencies are due partly to conflicts in the statutes, which this bill corrects, and partly due to funding shortages.

HB

404

Opinion

Governor's Bill Would Loosen Controls In Fish and Game Dept.'s Use of Poison

By JOE La ROCCA

JUNEAU — The Sheffield administration has quietly endorsed a controversial proposal to relax the use of poison to kill wild game animals, such as wolves, a proposition which has been consistently rejected by the legislature for nearly a decade.

The provision, which is buried deep within a 12-page bill introduced by the governor recently, would enable the boards of fisheries and game to promulgate regulations authorizing the use of poison to control wildlife population and predators.

Under existing law, the Dept. of Fish and Game cannot use poison to kill animals in Alaska unless it gets the written consent of either the board of fisheries or game for a specific, one-time application.

But the proposed legislation would give the department standing authority to use poison whenever and wherever it pleases, without consulting the boards.

The measure, House Bill 404, purports to be a housekeeping measure, designed merely to clarify and update the state's fish and game code.

For example, in his cover letter accompanying the bill, the governor told the legislature that the bill would "provide for the statutory clarification," and "correct some anomalies . . . by repealing outdated sections and clarifying ambiguities."

The governor added: "We have tried to eliminate all the controversial or unpopular provisions of versions of this bill introduced in earlier years."

But in fact, the bill — which the governor probably signed off on without reading — proposes a number of substantive changes in the fish and game code. The most egregious of them is the provision to relax controls on the use of poison for predator control and other purposes.

The current law, which has been on the books since 1968, was sponsored by former Gov. Jay Hammond, when he was a member of the State Senate.

Prior to that time, the department had the same freedom to use poison for predator control which HB 404 now seeks to restore.

But because of controversy stemming from the use of poison to kill wolves in Southeast Alaska in order to protect diminishing blacktail deer herds here, then-Sen. Hammond pushed through the law now on the books prohibiting the use of poison without the explicit and written consent of what was then the Board of Fish and Game.

Ironically, during Hammond's second term in office, the Dept. of Fish and Game sought a bill similar to the one now pending which also masqueraded as a housekeeping bill making purely technical changes in the fish and game code.

But in fact, it proposed a number of substantive changes, including — without Hammond's knowledge or consent — the repeal of the clamp-down on the use of poison for predator control authored by Hammond while he was in the Senate.

The cumulative effect of these proposed changes then, as now, was to increase dramatically the powers of the commissioner of fish and game, at the expense of the boards of fish and game.

The use of poison to control predatory species of fish and game is a legitimate management tool. But its use should be closely monitored by a broad range of decision makers.

Because of the powerful emotional impact its use generates, decisions to implement poison for predator control should not be left to the narrow discretion of fish and game specialists and technicians. Nor should it be used without public hearings each time its use is contemplated.

But under the bill introduced by the governor, both the broad decisional and public hearing processes would be circumvented. For these and other reasons, this unsavory provision in HB 404 should be killed, by poison or any other means at the legislature's disposal.

State Publishes 1982 Mining Report

JUNEAU — A report summarizing mining activity in Alaska during 1982 has been released for public distribution.

The total value of 1982 expenditures for exploration and development, and production statistics are reported.

Exploration expenditures, which are sensitive to general economic conditions, were predictably lower in 1982, falling

M E M O R A N D U M

February 3, 1984

SUBJECT: House Rescurces Committee substitute for SSHB 404

TO: Representative John Ringstad and
Representative Richard Schultz
Co-Chairmen, House Resources Committee

FROM: Edward H. Hein EH
Legislative Counsel

1. The provisions of CSSB 101 (Resources) are merged into the committee substitute at sections 1, 6, and 15. (See attached sectional analysis of CSSB 101 (Res) for details of that bill).

2. Section 5 of the CS reverts back to the mandatory language of existing law, but allows a peace officer discretion to issue a citation or a warning when, in the officer's judgment, "it is in the state's best interest".

3. In section 8 (page 6, lines 26 - 27) and section 10 (page 8, lines 22 - 23), the CS reinserts "stocking" within the scope of regulations that may be adopted by the boards of fisheries and game.

4. The CS deletes amendments to AS 16.05.870(b) that appeared in section 17 of SSHB 404.

5. Sections 9 and 11 add new language that requires the boards of fisheries and game to provide a written explanation of reasons for rejecting proposals for regulations submitted to the boards.

6. Section 16 amends AS 16.05.495 to redefine the area covered by the vessel license exemption.

7. All other changes reflected in the CS are technical changes required by the legislative drafting manual.

MEMORANDUM February 3, 1984

SUBJECT: Sectional analysis of CSSB 101 (Resources)

TO: Representative John Ringstad
Representative Richard Shultz
Co-Chairmen, House Resource Committee

FROM: Edward H. Hein EH
Legislative Counsel

Section 1 adds a new section, AS 16.05.165, to the fish and game code that provides that a peace officer investigating a misdemeanor violation of the code or a regulation adopted under it may issue a citation as provided in AS 12.25.180, notwithstanding the provisions of AS 16.05.160, which requires a peace officer to arrest any person committing a code violation in the officer's presence. Note that SSHB 404 would amend AS 16.05.160 to make such arrests discretionary, but would expand the arrest authority to include violations of all of AS 16 except AS 16.51 and 16.52. Section 1 also directs the supreme court to establish a bail schedule for fish and game misdemeanor violations and provides for paying fines by mail, similar to what is done with traffic tickets.

Section 2 amends AS 16.05.410, which provides for revocation of licenses for conviction of sport fishing and hunting license violations. The amendment provides that the existing revocation provisions do not apply to violations for which a forfeitable bail amount is established under AS 16.05.165. Two convictions of such an offense, however, could result in a peace officer filing a civil action to have the person's license revoked. A non-jury court hearing is required. If the court finds that the person's actions demonstrate a disregard for the preservation of the state's fish or wildlife resources, the license may be revoked for a mandatory one-to-three year period.

Section 3 amends AS 12.25.190(c) to provide that a person receiving a citation under AS 16.05.165 is not required to

give a written promise that he or she will appear in court in response to the citation.

J3/050

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 17, 1984

The Honorable Joe Hayes
Speaker of the House
Pouch V
Juneau, AK 99811

Dear Representative Hayes:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a sponsor substitute for HB 404, providing for the statutory clarification and reform of AS 16. HB 404 was introduced on May 6, 1983 (1983 Hse. Jrnl., pg. 1211). The section-by-section analysis which accompanied the original HB 404 at the time it was introduced (1983 Hse. Jrnl., pp. 1212 -- 1217), describes the effect of the bill and the reasons why the amendments contained in it would substantially benefit effective management of the fish and game resources of the state.

The attached sponsor substitute differs from the original HB 404 in only minor ways. It changes the title to a more appropriate one, and inserts the word "means" in sec. 10. It deletes the original sec. 14 (amending AS 16.05.-340(b)), since ch. 23, SLA 1983 corrected the problem addressed there, and the original sec. 26, because the amendment to AS 16.30.012 in that section was accomplished by ch. 123, SLA 1982. The remaining sections of the bill are renumbered accordingly. AS 16.05.632, mandating an identification system for crab pots, is deleted from the repealer section; the Board of Fisheries and the Department of Public Safety have determined that the repeal would not be appropriate since the board has concluded that pot limits are biologically justified, and department personnel can enforce pot limits. AS 16.05.-940(28) (the definition of "visitor") is deleted; in sec. 12 of the original HB 404 "nonresident" is used instead of "visitor," but the repeal of the definition of "visitor" was overlooked. Finally, the sponsor substitute adjusts some discrepancies between the language of current statutes and the language of the original HB 404.

We have tried to eliminate all the controversial or unpopular provisions of versions of this bill introduced in earlier years, and the sponsor substitute is consistent with that aim. I therefore urge your passage of this bill this year.

Sincerely,

Bill Sheffield
Governor

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - CSSSHB 404 (RES)

Support

The Department of Public Safety supports passage of CSSSHB 404 (RES). This bill authorizes the Supreme Court to establish a bail schedule for specific misdemeanor offenses.

Under existing law, peace officers have the authority to issue citations for misdemeanors instead of arrest under AS 12.25.180; however, once a citation is issued, the offender must ordinarily appear in court, even if he does not wish to contest the charge. The Bill adopts a procedure similar to that found in the motor vehicle code (AS 28.05.151) which allows the offender to post and forfeit bail if he does not wish to contest the charge.

Passage of this will benefit both law enforcement and the person cited for relatively minor offenses. The person will avoid the time and expense associated with a court appearance, while law enforcement will be able to concentrate its resources on serious resource offenses.

An added benefit will be a reduction in offenses requiring action by the Department of Law and a correspondence reduction in the court calendars.

Robert J. Sundberg
Commissioner

SPONSOR SUBSTITUTE FOR HOUSE BILL 404

AN ACT MAKING MISCELLANEOUS AMENDMENTS
REGARDING FISH AND GAME

SECTION-BY-SECTION ANALYSIS

Sections 1, 3, 4, 5, 6, 19, and 21 would change the word "chapter" to refer to the appropriate chapters of AS 16 so that the powers and duties of the boards, commissioner and department, and definitions, apply to the appropriate chapters of that title. The Legislature enacted AS 16.05 in 1959. Some other old provisions were apparently overlooked, and, when new provisions were added, the various powers or obligations established in AS 16.05 should have been, but were not, amended to cover other chapters. This oversight has left gaps in the statutes which need to be corrected.

Section 2 would expressly authorize the Commissioner of Fish and Game to conduct research and enter into cooperative agreements and contracts.

In addition to cooperative agreements, it is also appropriate for the department to enter into contracts or to make grants for specific projects. Section 2 also would require the commissioner to establish criteria governing department grants and contracts to ensure that those expenditures are a wise use of public money.

Sections 4 and 5 would authorize peace officers to enforce the provisions of AS 16 except AS 16.51 and AS 16.52, and to arrest persons violating the fish and game title. Section 6 would permit the officers to execute warrants. The word "chapter" is changed to refer to AS 16 except AS 16.51 and AS 16.52, which relate to the Alaska Seafood Marketing Institute and the Fishery Industrial Technology Center, respectively, so that uniform enforcement procedures will apply to almost all of Title 16. Also, the requirement that offenders be brought before a magistrate "immediately" is dropped. This would delete an unnecessary burden imposed on protection officers. Finally, the mandatory requirement that deputies arrest all offenders is stricken because an arrest for certain minor violations may not be appropriate and could result in unnecessary expenditures for enforcement and prosecution.

Sections 7 and 9 set out the authority of the Board of Fisheries and the Board of Game, respectively, to set quota and bag limits. No express authorizations exist for harvest levels or sex and size limitations, even though regulations of this nature are basic to resource management and have been adopted based on interpretations of other board powers. That authority is made express in sections 7 and 9, as a legal safeguard.

Sections 8 and 11 would remove the authority of the boards to adopt regulations for engaging in biological research, since biological research is a departmental function.

Section 10 would amend existing law to reflect the true function of the Board of Game. Despite the current language of AS 16.05.255(a)(6), the board does not adopt regulations regarding investigation of predators, which is an administrative function of the department. The board does, however, establish methods and means and harvest levels for the taking of predators or other competitors through regulations.

Sections 12 and 14 would eliminate the burden upon sport fishing license vendors who must distinguish between long-term nonresidents and short-term sojourners when issuing 14-day and three-day licenses. The problem arose because the definition of "visitor" included only temporary nonresidents and did not include long-term nonresidents or those awaiting residency status. Thus a person who had not yet lived here for one year was required to pay the higher nonresident license fee, even if only a few days remained in a fishing season. The proposed change is fair and will be more efficient to administer.

Section 13 would make minor technical amendments to AS 16.05.340(a)(9), to clarify the meaning of existing law.

In section 15, language in AS 16.05.685(c)(2) which describes areas no longer used in the management of king crab would be deleted.

Section 16 would clarify AS 16.05.831(a) which was enacted in 1975 to prohibit the waste of salmon. That section now contains language that could be considered ambiguous, and thus reduce the law's effectiveness. The clarification expressly provides that no salmon intended for sale, whether to a private individual or a commercial buyer, may be wasted.

Section 17 would make gramatical changes in the anadromous fish protection statute to correct an apparent deficiency. Currently, only a person or agency desiring to use, divert, obstruct, pollute or change the flow or bed of an anadromous fish stream must first notify the commissioner. In order to make AS 16.05.870 more enforceable, notification would be required before beginning any activity which may change the stream or pollute the stream.

Section 18 would restrict the criminal sanctions in AS 16.05.900 to apply only to AS 16.05.870--16.05.895, relating to anadromous fish protection. The basic penalty section

for Title 16 would be moved to a new section (AS 16.05.925, contained in section 20 of the bill) under the "general provisions" article, where it more logically belongs.

Sections 19 and 20 deal with the basic prohibition of Title 16 that it is unlawful to possess fish and game unless permitted by a statute or a board regulation. This prohibition and the accompanying penalty are AS 16.05.920(a) and 16.05.900(a), respectively. Section 20 would set out the general penalty section separately in AS 16.05.920(a). Through apparent oversight which resulted from enactment of AS 16.20 well after enactment of AS 16.05, certain prohibitions were created by regulation without an enforceable penalty. The new AS 16.05.925 would provide a uniform penalty for the violation of a regulation adopted under AS 16.05 or AS 16.20. The penalty is made a class A misdemeanor, to conform with sentencing under AS 12.55.035 and 12.55.135. Also, sec. 19 of the bill changes "made" to "adopted," with regard to regulations, for the sake of consistent terminology.

Section 21 amends AS 16.05.940 which is the basic definition section for AS 16.05--AS 16.40. Four of the definitions contained in this section would be amended as follows:

(9) the definition of "fish" would be amended to include parts of the fish; this would affect enforcement, for example, when salmon roe is sold separately from the carcass;

(13) the definition of "fur dealing" would be rewritten for clarity and to correct punctuation errors;

(14) the definition of "game" would be amended to include reptiles; this would provide regulatory authority to control the importation of undesirable snakes and other reptiles into the state; and

(28) the definition of "visitor" would be repealed, which only appears in Title 16 in conjunction with the "visitor's special sport fishing license" in AS 16.05.340(a)(6); that designation would be changed by section 12 of this bill to "nonresident special sport fishing license."

Section 22 would add a criminal sanction for wasting herring. Existing law prohibits this waste but does not clearly specify a criminal penalty.

Section 23 would amend AS 16.10.280 to allow the department's determination of a price dispute to be based on an estimate of the number of fishermen involved. During a recent Bristol Bay price dispute, the department's role in setting up mediation was hampered by the need to actually

"certify" that one-third of the registered fishermen were involved in a price dispute, as provided under existing law. Given the information available, this is not always possible.

Section 24 would correct a technical error in the land description of the Susitna Flats State Game Refuge, established by ch. 140, SLA 1976.

Section 25 would amend AS 16.35.200 to require that the use of poison to kill an animal be governed by regulations adopted by the Board of Fisheries or Board of Game as appropriate. Currently only written consent of the appropriate board is required. The requirement of regulation will provide for full public comment. The use of poison within a building, or to kill rodents at dumps or landfills, is exempt from board regulation.

Section 26 would repeal the following laws:

(a) AS 16.05.251(a)(9) and 16.05.255 (a)(8). These provisions empower the boards to adopt regulations for cooperative agreements to promote research and education and to train persons for management. These are administrative functions and do not require board regulations. The repeal of these sections will permit the separation of the rulemaking functions of the boards from the administrative functions of the commissioner of fish and game.

(b) AS 16.05.903. This section, which created the Alaska Big Game Photo Contest, was enacted in 1975. The original intent was that the revenues from entry fees and the sale of a published volume of the winning photographs would generate enough money to pay for cash prizes and operating expenses. Unfortunately, the revenues from the sale fell far short--less than 20 percent of the costs were recovered during the first year. The 1975 legislation created public criticism of the department with respect to spending priorities and proper use of taxpayer's money. The repeal will not affect the continuation of the department's annual Wildlife Photo Contest.

(c) AS 16.10.230(1). This section provides exemptions to the unlawful taking of migratory fish and shellfish in high seas areas designated by the International Pacific Salmon Fisheries Commission. That commission no longer exists and enactment of the federal Fisheries Conservation and Management Act (P.L. 94-265) makes the other exemptions set out in the statute obsolete. Therefore, this subsection should be repealed.

(d) AS 16.15.010-16.15.090. This chapter created the Alaska Fisheries Experimental Laboratory, which no longer exists.

(e) AS 16.35.010--16.35.180. These sections relate to bounties which are no longer paid. The bounties on seals are in conflict with the Marine Mammal Protection Act of 1972, which preempted these state laws. In addition, AS 16.05.255 provides that the Board of Game may establish bounties through the adoption of regulations. The remainder these sections pertain to employment of trappers and hunters for predator control, and have become obsolete.

MANUAL

OF

LEGISLATIVE DRAFTING

1984

FOR THE USE OF LEGISLATIVE STAFF

Prepared
by

LEGISLATIVE AFFAIRS AGENCY

True exceptions should be few and very specific. They should be introduced with "except that," "but," or "However," or by starting a new sentence. If the exceptions could logically be grouped in a subsection or section apart from the general rule, it is useful to the reader for the drafter to introduce the general rule with language such as "Except as provided in (c) of this section (or AS XX.XX.XXX)...."

(h) "May," "shall," "must"

Use the word "shall" only to impose a duty upon someone. Use the word "must" when describing requirements related to objects such as forms or criteria. (Use "must" sparingly, however, because most sentences using it can probably be written more clearly to impose a duty on a person, in which case "shall" would be the proper word.) Use the word "may" to grant a privilege or discretionary power. Use the words "may not" to impose a prohibition upon someone. For a further discussion, see Dickerson, The Fundamentals of Legal Drafting (1965), pp. 130 and 131. For example:

> The commissioner shall issue a license..., i.e., it is the commissioner's duty to do so.
>
> The form must specify that..., i.e., the form is required to have something in particular on it.
>
> The commissioner may inspect records..., i.e., the commissioner may if it is necessary or proper, but the commissioner is not obligated to do so.
>
> The commissioner may not issue a license..., i.e., under the defined circumstances, it is beyond the power of the commissioner to issue the license.
>
> A person may not operate a ... without a license..., i.e., under the circumstances, a person is not permitted to do the specified act without a license.

Do not use "must" or "shall not." Also, do not use the "No... may" construction; use "may not." For instance, avoid "No fish trap may be.. ," and use "A fish trap may not be...."

(i) Numerals

Numbers from one through nine are written in words only:

one, two, three, four, etc. first, second, third, etc.

Numbers over nine are written in figures only:

10, 11, 12, 13, 14, etc. 10th, 11th, 12th, 13th, etc.

When referring to money, use figures only:

GENERAL COMMENTS:

Last year the Division of Motor Vehicles held approximately 230 driver's license suspension or revocation hearings, and 150 motor vehicle title revocation and determination hearings. About 25% of all these hearings were found in favor of the citizen. Due to the fact this bill authorizes the state to pay attorney fees if the decision is in favor of the private citizen, it is felt more people will demand hearings than in the past. Therefore, the two positions requested are to handle that additional workload.

Attorney time on driver's license hearings is estimated at 4 hours for each hearing, and for motor vehicle titles at 6 hours each. The reimbursement for attorney fees will be paid by the Department of Administration, so this expense should be covered in their fiscal note.

JUSTIFICATION

This position will be required to provide clerical support for one full time hearing officer, and three department employees who hold hearings on a part-time basis. With the normal annual increase the hearing workload for FY84 is expected to exceed 800 hearings.

This position will be responsible for scheduling hearings, sending certified notice of hearing, reviewing legal documents submitted as evidence, transcribing the hearings as necessary, and maintaining complete and accurrate records. Because of the complexity of the hearings, and due to the consequences of these hearings on the private citizen, a level of Clerk IV is justified. Loss of a motor vehicle or driving privileges could be the result of these hearings, therefore, accuracy is essential.

JUSTIFICATION

With the passage of HB-408 hearings would probably number 800 in FY84, and increase by 10% a year thereafter. The hearings are now held by departmental employees whose primary duty are other than being hearing officers.

With the normal increase in regular workload, and number of hearings that can be expected with passage of this bill, it will be necessary to have a full time hearing officer. This hearing officer will travel as necessary to conduct hearings at other locations. Annual case load for this hearing officer is expected to be 450 hearings per year.

Libertarians hit election limit plan

Tai news 5-17-83

Legislation aimed at limiting names on the general election ballot to two parties—the top cumulative vote-getters in the primary—was blasted this morning at a press conference by Libertarian Dick Randolph.

The former state legislator and current party chairman said (HB 409) is designed to keep Libertarians off the ballot and is being pushed through the Legislature at "breakneck" speeds.

"I think it's an extreme example of the arrogance-of-power politics," Randolph said.

HB 409 passed from the House Judiciary Committee Monday and is scheduled to be considered by the full house today.

If adopted, candidates would appear on the general election ballot if their parties won the largest or second largest votes for their candidates as a group.

For example, if three Republicans, three Democrats and three Libertarians ran for a House seat, votes from all three candidates in each party would be totalled to see which parties appeared on the ballot. Under that scenario, the top vote-getter could fail to make the general election if his party was outpolled.

Randolph, a former Libertarian House member and unsuccessful candidate for governor, said HB 409 is moving faster than any other piece of legislation this session. The bill was referred to only one committee, and the full House calender was held Monday to allow it to be added, Randolph said.

"Only one hearing was held without any notice to us," Randolph said.

As evidence of Republican Party desire for its passage, Randolph quoted a letter reportedly circulated by Republican State Chairman Kenneth O. Stout:

"House Bill 409 is probably the most significant piece of legislation for Republicans that we will have in this decade," the letter said. "This legislation is desperately needed to protect the major parties from begin diluted (sic) by lesser party candidates to the point that confusion is the order of the day."

"Clearly it's an orchestration between the party and their hacks in the Legislature," Randolph said.

The three Democrats on the committee voted against referring the bill out of committee.

Randoph said Alaska election law ought to be rewritten, but not to protect major parties from competition.

News 5-21-83

House kills measure to reduce candidates

By HARRY McFARLAND
The Associated Press

JUNEAU — The House by a 23-16 vote Friday defeated a measure aimed at reducing the often-crowded general election ballot facing Alaska voters. Under the measure, the two candidates receiving the most votes would have competed in the general election.

Currently, the top vote-getters in Alaska's three recognized parties — Democratic, Republican and Libertarian — and any candidates who qualify by petition advance to the general election.

The bill, however, would have precluded candidates who qualify by petition from having their names on the general election ballot.

An amendment by House Judiciary Chairman Charlie Bussell and Rep. Mae Tischer, both R-Anchorage, would have allowed the possibility of two Democrats or two Republicans running against each other in the general election. The amendment was adopted on a 21-17 vote, then lawmakers beat down the measure.

House lawmakers argued that the bill would reduce the choices given to voters in elections and thus thwart the presentation of ideas.

Former Libertarian gubernatorial candidate and state lawmaker Dick Randolph, in a press release, called the bill (HB409) a Republican priority and said it was pushed through the legislature at "breakneck speed."

Randolph promised to challenge the measure's constitutionality in court if it passed the legislature.

Randolph's press release included a May 11 form letter from Ken Stout, chairman of the Republican Party of Alaska, to lawmakers. In the letter was the statement that "this legislation is definitely needed to protect the major parties from being deluted (sic) by lesser party candidates to the point that confusion is the order of the day. We experienced this during our last election with some rather ludicrous candidates going into the General Election and being a constant source of agitation to all concerned, not to mention the enormous expense to the state that we incurred."

Bussell had the bill held for another vote when he gave a notice of reconsideration.

A bill written to be unfair

House Bill 409 is a bill in dire need of amendment.

Anyone who believes in fair play should agree.

HB 409 is about taking references to gender out of the election codes, *plus* a tidy little section about primary elections.

What the plus provides is that only the leading candidates of the two parties that gather the most votes in a primary election can be on the general election ballot. The key word there is *parties*. The primary would produce no more than two winners, and they would be from the parties that accumulated the most votes. It would turn the primary into a semifinal, qualifying heat with handicaps for small parties.

A little imagination applied to the last gubernatorial race could provide a tally sheet like this one:

Republican - Tom Fink	33,000
Republican - Terry Miller	32,000
Democrat - Bill Sheffield	29,000
Democrat - Steve Cowper	28,000
Libertarian - Dick Randolph	35,000

HB 409 would return Randolph and other Libertarians into the oblivion from which they only recently emerged.

The point here is not to suppport Randolph or the Libertarian Party, or any other party, but to sound the call on behalf of equality and fair play.

The Libertarians, despite winning no public offices, finally won in the last general election more than 10 percent of the vote and legal status as a political party in the state of Alaska. That means they are eligible for the first time to enter candidates in the primary election for selection as general election candidates.

Some of the Libertarians' political foes just can't abide that possibility.

So some of the members of the House Judiciary Committee concocted HB 409. It has the committee's name as its sponsor, a fact that provides a little political camouflage.

But the committee has voted on 409. Speaker of the House Joe Hayes, Majority Leader Ramona Barnes, Judiciary Chairman Charlie Bussell and Rep. John Liska -- all Anchorage area Republicans — voted to recommend the bill to the House. Democrats Hugh Malone of Kenai, Don Clocksin of Anchorage and Ron Wendte of Ketchikan voted against it.

HB 409 got referred on to the Rules Committee, where it sits now. The Rules Committee — Hayes and Barnes are two of its nine members — ought to amend it or kill it. Whether it will, is another question.

The bill's purpose, as written, is obvious. In the scenario imagined above, the voters would wind up getting to choose only between the second and fourth votegetters and No. 1 would go begging for writeins, if anything.

Randolph says measure would 'kill' Libertarians

HB 409

by Bill White
Times Writer

HB409 5-11-83 Times

Juneau — A bill that could wipe out the Libertarian Party and other minor political parties is scheduled for action in the House of Representatives next week.

As introduced by the Judiciary Committee, the bill would let no more than two candidates run for each office in general elections.

The two political parties — not candidates — that received the greatest number of votes for an office in the primary would field their best candidate in the general election, under the bill.

The House majority has targeted the proposal for passage this year.

"I haven't read it thoroughly, but it looks like a 'kill the Libertarian bill,' " said Dick Randolph, a former state legislator from Fairbanks and now head of the Libertarian Party.

"Major parties would be in a position to shut out the minority parties," said Randolph, who ran third in last fall's gubernatorial election.

"A bill like this would kill us off," he said.

Anchorage Rep. Charlie Bussell, chairman of the Judiciary Committee, said the bill appears to have been drafted improperly.

The measure is intended, he said, to require just two names on the general election ballot so the candidate who wins can get a majority of the votes cast.

Only once since statehood has the governor been elected by a majority of the voters, he said. Last fall, Bill Sheffield won the gubernatoral office with about 45 percent of the vote.

Rep. Ramona Barnes, R-Anchorage, a member of the committee, said the last draft she saw of the bill wouldn't have shut out the Libertarian Party. She said the proposal might be changed at hearings next week.

Several amendments are awaiting the bill in the Judiciary Committee.

One amendment would give independents and write-in candidates a shot at the general election. But members of political parties still would have an advantage. The total votes for all members of a party running for an office would be counted together and matched against total votes for an independent or write-in candidate.

2-party election vote set

HB 409

5-17-83

by Bill White
Times Juneau Bureau

Juneau — The House is scheduled to vote today on a bill that, according to the state's top Libertarian, would give the Democratic and Republican parties "a stranglehold on Alaska politics."

The bill would let the names of only two candidates appear on the general election ballot for any state office.

Those candidates would be determined by a method unique to American politics. Total votes cast for candidates from a political party in a primary election would be matched against total votes for candidates of other parties and for independents and write-ins.

For example, in an six-person primary race, an independent might get 10,000 votes, a Libertarian 9,000 votes, two Democrats get 8,000 and 4,000 (for 12,000 total), and Republicans 7,000 and 5,000 (also a 12,000 total). Selected for the general election ballot would be the top Democratic vote-getter and the top Republican.

"The right to vote and to asso-

See Bill, page A-4

Bill would limit candidates

Continued from page A-1

ciate freely are fundamental to the ideal of American government. They should not be trampled upon in such a brazen fashion as contemplated by this bill," said former Fairbanks Rep. Dick Randolph, head of the Libertarian Party, in a statement presented to the Judiciary Committee Monday.

Randolph called the bill "plainly unconstitutional," an effort "to legislate these alternative viewpoints off the ballot" and "an arrogant slap in the face of Alaskan voters."

"They (voters) should have the right to decide which approach to issues best suits them. If competition is good in the marketplace, why isn't it desirable in politics?" said Randolph, whose statement was read by a local Libertarian.

The bill has been on a fast track since the Judiciary Committee introduced it eight days ago. The committee had been working for months on how to limit general election ballots to just two candidates per office.

Libertarians received no notice that the bill would be introduced, Randolph said.

The bill was scheduled for a floor vote today even before the committee approved it on a 4-3 Republican vs. Democrat vote.

Republican State Chairman Ken Stout in a May 11 letter urged his party's legislators to support the bill. Calling it "the most significant piece of legislation for Republicans that we have in this decade," Stout said it is needed to protect "major parties from being diluted by lesser party candidates."

The letter was made public by Libertarians Tuesday.

In the letter, Stout said some "rather ludicrous candidates" were a "constant source of agitation" in the last general election. This is the only piece of legislation he has lobbied for during this session, he added.

Sen. Fritz Pettyjohn, R-Anchorage, said that because more than two candidates ran in general elections, just once since 1962 has the governor been elected with a majority of the votes cast. One of the 20 senators and eight of the 40 representatives also were not picked by most of the voters, he said.

More than half the voters in Alaska belong to no political party.

SUBJECT: Primary and general election
(CSHB 409 (Judiciary))

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Richard A. Bradley
Legislative Counsel

You have requested a sectional analysis of the above described bill.

As a preliminary matter, I must advise you that a sectional analysis or summary of a bill should not be considered an authoritative statement of the contents of the bill; the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please address a specific request to this office.

Section 1 of the bill amends AS 15.15.030(5). AS 15.15.030 deals with the preparation of the official ballot. The amendment to sec. 30(5) is intended to delete the requirement of present law that "no-party" candidates have their names appear on the general election ballot. As will appear as the bill is examined, these candidates will now be voted on at the primary election.

Section 2 amends AS 15.25.010. The section provides that candidates will be nominated under the provisions of AS 15.25.010 - 15.20.200. Since a new section 201 is being added by the bill which will also regulate the nomination process, the amendment is necessary.

Section 3 adds a new Sec. 15.25.025. It changes the thrust of existing law by stating affirmatively that the director "shall place the names and political group affiliation of person who have been properly nominated under this chapter on the primary election ballot." As you recognize, under

present law, "no-party" candidates are nominated under that chapter (AS 15.25) but do not go on the primary election ballot.

For a full explanation of what it means to be nominated under this chapter, see the comments on AS 15.25.201, below.

In connection with this section, note the repeal (in section 11) of AS 15.25.190; the latter section provides:

> Sec. 15.25.190. PLACEMENT OF NAMES ON GENERAL ELECTION BALLOT. The director shall place the names and the political group affiliation of persons who have been properly nominated by petition on the general election ballot.

Section 4 amends AS 15.25.030(14). That section is a portion of the section that provides for the contents of the "Declaration of Candidacy" of candidates of political parties. Apart from the changes required by Chapter 58, SLA 1982, the changes to this section requires a candidate to state that the candidate is not a candidate for any other office to be voted on at the "primary [OR GENERAL] election". As suggested, under existing law party candidates appear on the primary election ballot; "no-party" candidates appear on the general election ballot only. The purpose of existing law is to prevent an individual from seeking two offices simultaneously. Since candidates may not appear on the general election ballot in any case under this law unless they are nominated, the bill eliminates the reference to the general election.

Section 5 amends AS 15.25.060. Existing law provides that no write-in votes may be counted at the primary election. See AS 15.25.070. This bill repeals AS 15.25.070 in sec. 11 and reverses the policy stated in this section by directing the director to provide spaces for write-in votes on the primary election ballot.

Section 6 repeals and reenacts AS 15.25.180(7). AS 15.25.180 regulates the contents of the nominating petition of no-party candidates. The existing provision provides, in context:

> Sec. 15.25.180. Requirements for Petition. The petition shall state in substance

* * *

(7) the date of the election at which the candidate seeks election,

The amendment simply makes clear the fact that "no-party candidates will have their names appear on the primary election ballot."

Section 7 amends AS 15.25.180(15). AS 15.25.180(15) is a "no-party" counterpart to the party nominee requirement discussed above at sec. 4, amending AS 15.25.030. It requires the "no-party" candidate to certify that no other office is being sought at the primary election. Since candidates may go to the general election ballot only by nomination at the primary, the reference to the possibility of being a candidate at the general election is eliminated.

Section 8 amends AS 15.25.200. The section amends law regulating withdrawal of a "no-party" candidate's name. Because the candidate will be voted on at the primary election in place of the general election, a modification of the scheme of the section was necessary. The section deals affirmatively with a subject that the law is presently silent on: the effect on the candidacy of a team of candidates for governor and lieutenant governor when only one dies or withdraws. The amendment permits the remaining member of the team to submit a replacement name.

Section 9 establishes a new AS 15.25.201. The section is the heart of the bill.

Sec. 201(a) provides that only two candidates are nominated at the primary election for each office for which there will be a vacancy. To determine who those candidates are, the director counts the votes cast for each "no-party" candidate, each write-in candidate, and each candidate of a political party. The director then cumulates the votes of all candidates of each "political party" (as defined in AS 15.60.010(20) and as amended in sec. 10 of the bill. From these totals, the director will determine "which candidate or political party received the largest and the second largest number of votes cast." Then, if "a no-party candidate or a write-in candidate received the largest or second largest count, that candidate shall appear on the general election ballot. If a political party received the largest or second largest count, the candidate of that party who

received the largest number of votes shall appear on the general election ballot."

Sec. 201(b) provides that to determine the parties that have nominated candidates for governor and lieutenant governor, the votes cast for candidates for lieutenant governor are disregarded and the votes for candidates for governor in each party are cumulated.

Section 10 amends AS 15.60.010(20). It changes the definition of "political party" to conform to the requirements of the Supreme Court decision in Vogler v. Miller. It reduces to five percent (from the former ten percent) the number of votes required for a political party candidate for governor at the previous general election for continued status as a political party.

Section 11 repeals AS 15.25.070, 15.25.100, and 15.25.190.

Those sections now provide:

> Sec. 15.25.070. SPECIAL PROVISIONS ON COUNTING BALLOTS. No voter may vote for a person whose name is not on the ballot. Votes cast for a person whose name is not on the ballot shall not be counted, but writing in a candidate's name does not invalidate the entire ballot.
>
> Sec. 15.25.100. PLACEMENT OF NOMINEES ON GENERAL ELECTION BALLOT. The director shall place the name of the candidate receiving the highest number of votes for an office by a political party on the general election ballot.
>
> Sec. 15.25.190. PLACEMENT OF NAMES ON GENERAL ELECTION BALLOT. The director shall place the names and the political group affiliation of persons who have been properly nominated by petition on the general election ballot.

If I may be of further assistance, please advise.

CS HJR 9 (CS1HJR 8 (S))
By the Judiciary Comm.

Comments by the Division of Elections

CS HJR 9 "Proposing an amendment to the Constitution of the State of Alaska relating to elections for candidates for Governor and Lieutenant Governor and for members of the legislature."

ANALYSIS : This bill would require that any candidate for state elective office (executive and legislature) receive 50% of the votes cast for the office plus one vote, in the general election. If a candidate for office does not receive this amount, a runoff election shall be held between the top two vote getters.

A review of the 1982 legislative races shows that, if this law were then in effect, one (1) Senate race and eight (8) House races would require runoff elections. It should be noted that in every one of these nine races there were strong Libertarian and Independent candidates.

	Senate #15&16	House #5 A	House #5 B	House #10 B	House #14 B
winner %	41%	45%	49%	48.2%	49%
ack #	-876	-504	-101	-145	-95

	House #16 B	House # 18	House # 19	House # 17
winner %	36%	41%	48.7%	42%
ack #	-1529	-425	-66	-363

Additionally, for point of reference, there were two (2) Senate races won with 50% plus 6 and 12 votes respectively, four (4) Senate race won between 51% and 55%, and four (4) House races won with barely more than 50% (plus 12, 34, 60 and 63 votes respectively)

As was noted previously in comments on the original HJR 9, all gubernatorial races except 1970 would have required a runoff election. Even the decisive 17,000 vote margin of the1982 race left the winner with 45% of the ballots cast for that race, again due to the strong showing of the Libertarian and Independent candidates.

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - HB 421

Support

This bill will provide another law enforcement tool toward reducing the drunk drivers on the road.

Making it a violation to have an open container in the passenger compartment of a motor vehicle should reduce the tendency to drink while in the process of driving, which now is the only violation related to alcoholic beverages in a vehicle.

SUBJECT: House Bill 421

At the present time, there is no open container statute on the books. Under 13AAC 02 545, drivers are prohibited from drinking while driving but there is nothing which prohibits the driver from being in a car where there is an open alcoholic beverage container.

Nineteen other states have an open container law(see attached analysis). Some of these states have had such a law on the books since the 1930's. Two that are relatively frequent (Hawaii and Utah) were contacted by House Research.

Utah enacted their law in 1981, mainly to make a statewide statement of illegality. They have counties and the counties were locally enacting their own laws about drinking and driving and it caused confusion -- you could drive from one county to another and the law would change. It was also not hgihly enforced because of the confusion.

Hawaii enacted their open container law in 1981. They have never had municipal ordinances. Their law was in response to the county police who, time and again, responded to accidents and found empty alcohol containers at the scene.

SUBJECT: Sectional analysis of SSHB 444

TO: Representative Charlie Bussell

FROM: Keith B. Levy KBL
Legislative Counsel

You have requested a sectional analysis of HB 444, "An Act relating to unlawful restraint of a minor." Since your request was submitted, Representative Liska has introduced a sponsor substitute for HB 444, so this analysis follows the sponsor substitute rather than the original bill.

SSHB 444 creates the crime of unlawful restraint of a minor, a class A misdemeanor. The offense is committed if a person takes, entices, or restrains a child under the age of 12 with intent to conceal the child from the child's lawful custodian, under circumstances not amounting to kidnapping (AS 11.41.300) or custodial interference (AS 11.41.320 and 11.41.330). It is an affirmative defense to unlawful restraint of a minor that the defendant acted to protect the child from physical harm.

KBL:ojb
J2/026

Proposed definition of "entice" for SSHB 444, if Committee members should want to use it----Staff.

*Sec. 2. AS 11.41.370 DEFINITIONS is amended by adding a paragraph to read as follows:

(4) "entice" means to solicit, persuade, procure, allure, attract, coax or induce another person to accompany or remain with the person doing the enticing.

Fiscal Note
Analysis
SSHB 444

January 18, 1984

This bill will provide class A misdemeanor punishment of individuals who unlawfully take, entice or restrain a child under 12 years of age, without rising to the level of child molesting or sexual abuse. The Municipality of Anchorage has a similar ordinance and municipal prosecutors report that they prosecute 20 to 25 such cases each year, based upon the evidence they are able to develop. The incidence of enticement complaints, in the municipality, is much higher averaging about 35 complaints per month.

The department estimates that 40 to 50 of these offenders will be prosecuted each year if this bill is enacted. Because restraint and enticement is not yet unlawful, in most of the state, no hard data on the statewide incidence rate is available. Cases involving young victims are difficult to prove because these victims are usually the prosecution's principal witnesses. Therefore developing these cases can often take a substantial amount of attorney time. The department believes, however, that use of a paralegal trained in assisting the victims of sensitive crimes will be just as effective in developing evidence and far more efficient in terms of state resources. A paralegal assistant, at Anchorage, will be needed, if the bill is enacted.

Fiscal Analysis - SSHB 444

This analysis assumes the addition of a Paralegal Assistant II (SR16), at Anchorage, to develop the evidence needed to prosecute unlawful restraint and enticement of children under 12 years of age. The position will be available to most of Southcentral Alaska and a modest travel budget is provided for that purpose. Costs beyond FY 85 have been calculated with a 6% inflation factor.

Personal Services	40,569
Travel - Paralegal travel 200 pm = 2,400 Witness travel 200 pm = 2,400	4,800
Contractual - Staff communications/copying 250 pm = 3,000 Witness fees 25 each X 10 per mo. = 3,000	6,000
Commodities - Ongoing - expendables and library - 250 pm = 3,000	3,000

JUSTIFICATION

A paralegal assistant will be required to develop evidence to prosecute the crime of unlawful restraint or enticement of children under 12 years of age, if HB 444 is enacted. These cases are difficult to prosecute because of the young age of the victims who are normally the prosecution's principal witnesses. A paralegal, trained in the special techniques necessary to interview and prepare young victims for trial, is best suited for this task.

Necessity and sufficiency of showing, in kidnapping prosecution, that detention was with intent to "secretly" confine victim, 98 ALR3d 733.

Sec. 11.41.300. Kidnapping. (a) A person commits the crime of kidnapping if

(1) the person restrains another with intent to

(A) hold the restrained person for ransom, reward, or other payment;

(B) use the restrained person as a shield or hostage;

(C) inflict physical injury upon or sexually assault the restrained person or place the restrained person or a third person in apprehension that any person will be subjected to serious physical injury or sexual assault;

(D) interfere with the performance of a governmental or political function; or

(E) facilitate the commission of a felony or flight after commission of a felony; or

(2) the person restrains another

(A) by secreting and holding the restrained person in a place where the restrained person is not likely to be found; or

(B) under circumstances which expose the restrained person to a substantial risk of serious physical injury.

(b) In a prosecution under (a)(2)(A) of this section, it is an affirmative defense that

(1) the defendant was a relative of the victim;

(2) the victim was a child under 18 years of age or an incompetent person; and

(3) the primary intent of the defendant was to assume custody of the victim.

(c) Except as provided in (d) of this section, kidnapping is an unclassified felony and is punishable as provided in AS 12.55.

Cross references. — For punishment, see AS 12.55.125(b).

Effect of amendments. — The 1980 amendment inserted "or sexually assault him" following "injury upon him" near the beginning of subparagraph (a)(1)(C), and added "or sexual assault" at the end of subparagraph (a)(1)(C).

Legislative history reports. — For a report on Chapter 102, SLA 1980 (HCS CSSB 511), see 1980 Senate Journal Supplement, No. 44, May 29, 1980, or 1980 House Journal Supplement, No. 79, May 28, 1980.

NOTES TO DECISIONS

Editor's notes. — Many of the cases cited in the notes below were decided under former AS 11.15.260.

The crime of kidnapping is designed to protect the general personal security of citizens both in their persons and property. Ladd v. State, Sup. Ct. Op. No. 1480 (File No. 2475), 568 P.2d 960 (1977), cert. denied, 435 U.S. 928, 98 S. Ct. 1498, 55 L. Ed. 2d 524 (1978).

Constitutionality of former statute. — See Levashakoff v. State, Sup. Ct. Op. No. 1446 (File No. 2830), 565 P.2d 504 (1977).

Scope of former statute. — See Crump v. State, Sup. Ct. Op. No. 2309 (File No. 4546), 625 P.2d 857 (1981).

For discussion of elements that were required to be proved under former AS 11.15.260, see Davis v. State, Ct. App. Op. No. 23 (File No. 5100), 635 P.2d 481 (1981).

Exemption. — The new criminal code, which states that it is an affirmative defense that defendant was a relative of the victim, provides for a broader exemption from the kidnapping statute than the absolute exemption for the abduction of a minor by his parent under former AS 11.15.260. Crump v. State, Sup. Ct. Op. No. 2309 (File No. 4546), 625 P.2d 857 (1981).

For case discussing the parental exemption contained in Alaska's former kidnapping statute, AS 11.15.260, Lythgoe v. State, Sup. Ct. Op. No. 2235 (File No. 4497), 626 P.2d 1082 (1980).

Liability of agent for person not entitled to custody of child. — Where a person, while acting as an agent for a parent not entitled to custody, takes a child from one entitled to custody, the person can be convicted of both the substantive crime of kidnapping and conspiracy to kidnap. Crump v. State, Sup. Ct. Op. No. 2309 (File No. 4546), 625 P.2d 857 (1981).

Conspiracy to kidnap. — Conspiracy to kidnap is no longer defined as an offense in Alaska under the newly revised criminal code. Lythgoe v. State, Sup. Ct. Op. No. 2235 (File No. 4497), 626 P.2d 1082 (1980).

Separate crimes. — Rape, assault with a dangerous weapon, and kidnapping were separate crimes with separate elements. Lacy v. State, Sup. Ct. Op. No. 2039 (File No. 3741), 608 P.2d 19 (1980).

Separate sentences were called for where defendant's conduct in kidnapping and raping his victim and assaulting her with a deadly weapon constituted the commission of three distinct offenses, each of which violated a different societal interest. State v. Occhipinti, Sup. Ct. Op. No. 1453 (File No. 3084), 567 P.2d 348 (1977).

Sentences upheld. — See Morrell v. State, Sup. Ct. Op. No. 1577 (File No. 2790), 575 P.2d 1200 (1978); Post v. State, Sup. Ct. Op. No. 642 (File No. 2851), 580 P.2d 304 (1978); Davis v. State, Ct. App. Op. No. 23 (File No. 5100), 635 P.2d 481 (1981); Williams v. State, Ct. App. Op. No. 139 (File No. 5676), 652 P.2d 478 (1982).

Sentence found excessive. — See Hintz v. State, Sup. Ct. Op. No. 2334 (File No. 3541), 627 P.2d 207 (1981).

Applied in Nukapigak v. State, Ct. App. Op. No. 90 (File No. 5820), 645 P.2d 215 (1982); Bidwell v. State, Ct. App. Op. No. 199 (File No. 6290), 656 P.2d 592

(1983); Baker v. State, Ct. App. Op. No. 202 (File No. 6961), 655 P.2d 1324 (1983); Reynolds v. State, Ct. App. Op. No. 262 (File No. 6890), 664 P.2d 621 (1983).

Cited in Nukapigak v. State, Sup. Ct. Op. No. 2667 (File No. 5820), P.2d (1983); Johnson v. State, Ct. App. Op. No. 267 (File No. 6662), 665 P.2d 566 (1983).

Sec. 11.41.320. Custodial interference in the first degree. (a) A person commits the crime of custodial interference in the first degree if the person violates AS 11.41.330 and causes the victim to be removed from the state.

(b) Custodial interference in the first degree is a class C felony. (§ 3 ch 166 SLA 1978)

Collateral references. — Fiction of loss of services as condition of action for abduction of child, 72 ALR 847.

Kidnapping or other criminal offense by taking or removal of child by, or under authority of, parent or one in loco parentis, 77 ALR 317.

Sec. 11.41.330. Custodial interference in the second degree. (a) A person commits the crime of custodial interference in the second degree if, being a relative of a child under 18 years of age or a relative of an incompetent person and knowing that the person has no legal right to do so, the person takes, entices, or keeps that child or incompetent person from a lawful custodian with intent to hold the child or incompetent person for a protracted period.

(b) Custodial interference in the second degree is a class A misdemeanor. (§ 3 ch 166 SLA 1978)

Sec. 11.41.370. Definitions. In AS 11.41.300 — 11.41.370, unless the context requires otherwise,

(1) "lawful custodian" means a parent, guardian, or other person responsible by authority of law for the care, custody, or control of another;

(2) "relative" means a parent, stepparent, ancestor, descendant, sibling, uncle, or aunt, including a relative of the same degree through marriage or adoption;

(3) "restrain" means to restrict a person's movements unlawfully and without consent, so as to interfere substantially with the person's liberty by moving the person from one place to another or by confining the person either in the place where the restriction commences or in a place to which the person has been moved; a restraint is "without consent" if it is accomplished

(A) by acquiescence of the restrained person, if the restrained person is under 16 years of age or is incompetent and the restrained person's lawful custodian has not acquiesced in the movement or confinement; or

(B) by force, threat, or deception. (§ 3 ch 166 SLA 1978)

Why innocent children are in danger

WHEN I was a child 30 years ago, I lived in a quiet suburb with a small road at the front and a large YMCA sports field at the back. We children played both on the road and in the field in confident safety. Cars drove slowly when children were about and everyone connected with the YMCA was considered to be trustworthy. From the age of six, I walked to school alone, I often struck up conversations with strangers. No harm ever came to me.

"You cannot bring up children wrapped in cotton wool," is an old saying, and a reasonable one. Dr Spock and the other child experts warn mothers against the dangers of over-protecting their children. Over-protection turns children into anxious and neurotic adults. Children must learn independence and self-confidence by dealing with life at large.

The recent spate of appalling child murders in the north of England—as well as the rape and assault of little girls in London parks—has served to remind parents of a chilling truth that is gradually becoming obvious in our times: The days of safe childhood seem to be over. We cannot, it seems, raise our children with the freedom of movement and social trust that prevailed in our own childhood. We are gradually realising that children today have to be accompanied to and from school until they are 11 or 12; perhaps with girls until they are [illegible].

Parents are coming to understand, in identifying with the suffering of the little victims' parents, that young children are no longer safe anywhere without adult supervision: not in parks, not on country roads, not in the most ordinary sorts of places. Even Welfare playgrounds especially designed for children need a protective adult eye. Children cannot be sent on shopping errands with an easy mind any more.

Sanguine advice from the child experts about not being neurotically over-protective towards children is all very reasonable and balanced; but the world we are coming to inhabit seems no longer either balanced or reasonable. We may have no choice but to see our children grow up anxious and insecure from over-careful protection: the alternative is to risk their not growing up at all.

This spreading attitude of cautiousness is exemplified by a Home Office film soon to be shown in schools, called "Say No to Strangers." It replaces the more mildly named earlier film, entitled "Never Go With Strangers." The film warns [illegible] never to accept [illegible] from a stranger; never [illegible] a lift from a [illegible] to play out [illegible] to loiter on [illegible] school.

Even so, some teachers and parents consider the film too bland, since it doesn't spell out in stark detail what can happen to a child in sexual assault or murder. And psychologists point out that not all children are assaulted or killed by *strangers*, sometimes the attacker is a person they know. Can you teach children to be wary about speaking even to an apparent friend of the family without imbuing in them a wholehearted misanthrophy, a complete distrust of everyone, and a destruction of the innocence that is the sweetest aspect of the child?

Obviously, children have always had to learn prudence. Many traditional fairy-tales are elliptical warnings to children about the dangers of the big wide world. The child psychologist Bruno Bettelheim thinks it is essential that girls be told "Little Red Riding Hood," because it is such an effective way of explaining, through metaphor and symbol, that there are wicked wolves around who will prey on small girls unless they take precautions. "Hansel and Gretel," "Goldilocks," and "Beauty and the Beast" all express childish fears which are very real; the fear of losing the protection of adults, the fear of being alone in an alien world, the fear of the animal aspect of the male which must be neutralised through some magic power. The child has always had to learn to come to terms with the dangers of life, but there must also be trust: there must also be safe havens, good fairies, helping hunts[illegible] woodcutters who [illegible] kindly godmothers [illegible] princes.

It is when all of life [illegible] threatening and frigh[illegible] that it becomes such [illegible] outlook for children.

Part of the reason [illegible] world has become a [illegible] place for children ste[illegible] the sex revolution [illegible] afraid. The ethic [illegible] revolution is that [illegible] should be free [illegible] sions; sexuality itse[illegible] be "value-free." [illegible] in itself is: neither [illegible] evil . . . it simply exi[illegible] sexual activity betwe[illegible] senting individuals, [illegible] its nature, is 'unna[illegible] This states a recent [illegible] bearing the endorseme[illegible] several doctors, plus [illegible] Alma Birk, counsellor [illegible] Greengross and agony [illegible] Claire Rayner. When [illegible] given out with such au[illegible] that sexuality has no [illegible] basis, it must have a s[illegible] loven[illegible] effect on sick minds.

Similarly, the National Council for Civil Liberties is campaigning for a lowering of the age of consent, and for the removal of some incest taboos—such as that between brother and sister. However well-meaning their aim, there is bound to be a response among a sizeable minority that we really have come to the point where "anything goes." There are adults whose sexual fantasies revolve around children—the pornography is there to prove it, as is the Paedophile Information Exchange — and there are people whose urges lead them to kill. Such people must be affected by a climate of opinion that denounces repressions. When fundamental taboos are stripped away uncontrolled individuals may tend to ask themselves "Why should not I too, do my own thing?"

The libertarian argument that the problems arising in a free society are worth the freedoms. But freedom is always a matter of balancing conflicting rights and interests. And what many people feel is that we are experiencing today, a massive decrease in the freedom of the majority to raise their families with trust in people and the optimism that the whole human being is good. Every day, more evidence against this accumulates.

8.05.160 Enticement. Anch. Municipal code

It is unlawful for any person to accost another person or persons and entice or attempt to entice such other person or persons into any automobile, building, bushes, wooded or secluded area, or any remote public or private place for any unlawful purpose. (Adapted from CAAB 18.05.010M).

Crime heats up in warm weather

by Mary Kaye Ritz
Times Writer

Indecent exposure and child enticement are a couple of the seasonal crimes that soar as the weather warms.

Certain crimes flourish under the cloak of darkness. Investigators call crimes such as burglaries and armed robberies "winter" crimes.

On the other side of the equinox, "spring" crimes include indecent exposure, child enticement and assaults on joggers and bicyclists.

In a sample two-week period in March, police were called to investigate 15 cases of sexual assault or attempted sexual assault on adults, and an additional seven involving children.

Last week, police investigated two separate cases of child enticement, the luring of children for illicit purposes.

In one case, a man near a construction site uttered obscenities and performed indecent acts in front of children, police said.

This spring, cases of child enticement already are on the rise, Officer Jim Rehmann said.

Enticement cases are most frequent during the months of March through May, said former juvenile unit officer, Maggie Borrecco.

Now that spring is here, parents are more likely to warn children about "bad men," and means of luring children into possible danger have become more creative, Lt. David L. Sherbahn said.

Sherbahn, who heads the police department's sexual assault unit, said the familiar "candy, little

See Crimes, page A-4

Crimes

Continued from page A-1

girl?" approach has given way to "help me catch my bunny rabbit in the woods." There have been cases of persons posing as religious representatives luring children as well, he said.

Children are not the only victims of spring criminals.

Anchorage police investigators Sherbahn and William Dennis work on cases of sexual assault, a crime they say is not isolated in spring, but more likely to occur in spring-like weather.

Both investigators and Alaska State Trooper investigator Sgt. Wayne Starr said the reason is simple: more women and children are outside as the weather warms up.

Joggers are also likely to be targets of attack.

Female joggers and bicyclists who wander from well-lit, open areas in the early morning and late evening are prime targets, Dennis said.

The best way to avert the danger of assaults, Dennis said, is to jog with someone else.

Boy offered ride

Anchorage police reported a case of child enticement in South Anchorage Friday involving a 10-year-old boy.

The boy said a man offered him a ride home, but he became frightened and jumped from the car. The boy hid in the woods until the suspect left.

Feb. 1

Abduction attempted

An unidentified man tried to abduct an 8-year-old girl at a bus stop Thursday afternoon.

The girl told Anchorage police that she had just gotten off a People Mover bus at 3:39 p.m. near Lake Ridge Road when the man stopped his car and motioned her over to his car.

As the man began to leave the car, the girl ran to her house and told her parents. The father then called police.

The girl said man was about 40-years-old and drove a blue Dodge pickup that was dirty and had several small dents.

2 sentenced for crimes committed while drunk

April 2, 83

By JANE PRICHARD
Daily News reporter

Two men were sentenced in unrelated cases Friday for crimes they committed during what they claimed were alcohol-induced blackouts.

In one case, Isom Chaney, 49, was sentenced to two years in jail and four years probation for arson. Chaney doused his ex-wife's trailer with 10 gallons of gasoline last July, causing an explosion and a fire.

"After this ordeal I know I want to stop drinking," Chaney told sentencing Judge J. Justin Ripley.

"Society won't tolerate simpleminded alcoholic-induced vengeance," Ripley said before imposing Chaney's sentence, which includes a $36,000 restitution payment.

In the other case, Rex Weston, 23, was sentenced to one year in jail and 18 months probation for grabbing a jogger and a child in a park last September.

According to court papers, Weston accosted a woman jogger but let her go when another runner appeared. He later snatched a 7-year-old girl and carried her upside down toward the woods.

Witnesses chased Weston and he dropped the girl.

Youngsters outside must remain alert

Knight-Ridder Newspapers

With missing-children cases receiving more publicity these days, concerned officials involved in child care are making a greater effort to alert children and parents to possible problems and how to avoid them.

Here are 12 safety tips that parents might want to share with their children.

- Walk tall, look strong and be alert to your surroundings.
- Avoid walking alone. Walk with friends when possible.
- Occasionally vary your route home, but be sure to discuss any changes with parents in advance.
- Do not wear earphones on the street. They block out street noise and make you a good target.
- Do not go into empty buildings. Do not go into any building if you think you are being followed.
- Check to see if you are being followed by looking at reflections in store windows or by crossing the street.
- Never talk about how much money you are carrying.
- Do not hesitate to give up your possessions if someone threatens you.
- Trust your instinct. If you get a funny feeling something might be wrong.
- Know where local stores are in your neighborhood. They are a good place to run to when you need help.
- Know that it's all right to say "no." Don't answer questions from strangers over the telephone.
- It's OK to run away and to scream, bite, hit or kick someone who is trying to hurt you.

'Candyman' gets 8-year term

Robert Sauer, who earned the nickname "Candyman" for enticing young girls with candy and money, was sentenced to eight years in prison Thursday on four counts of sexual abuse of a minor.

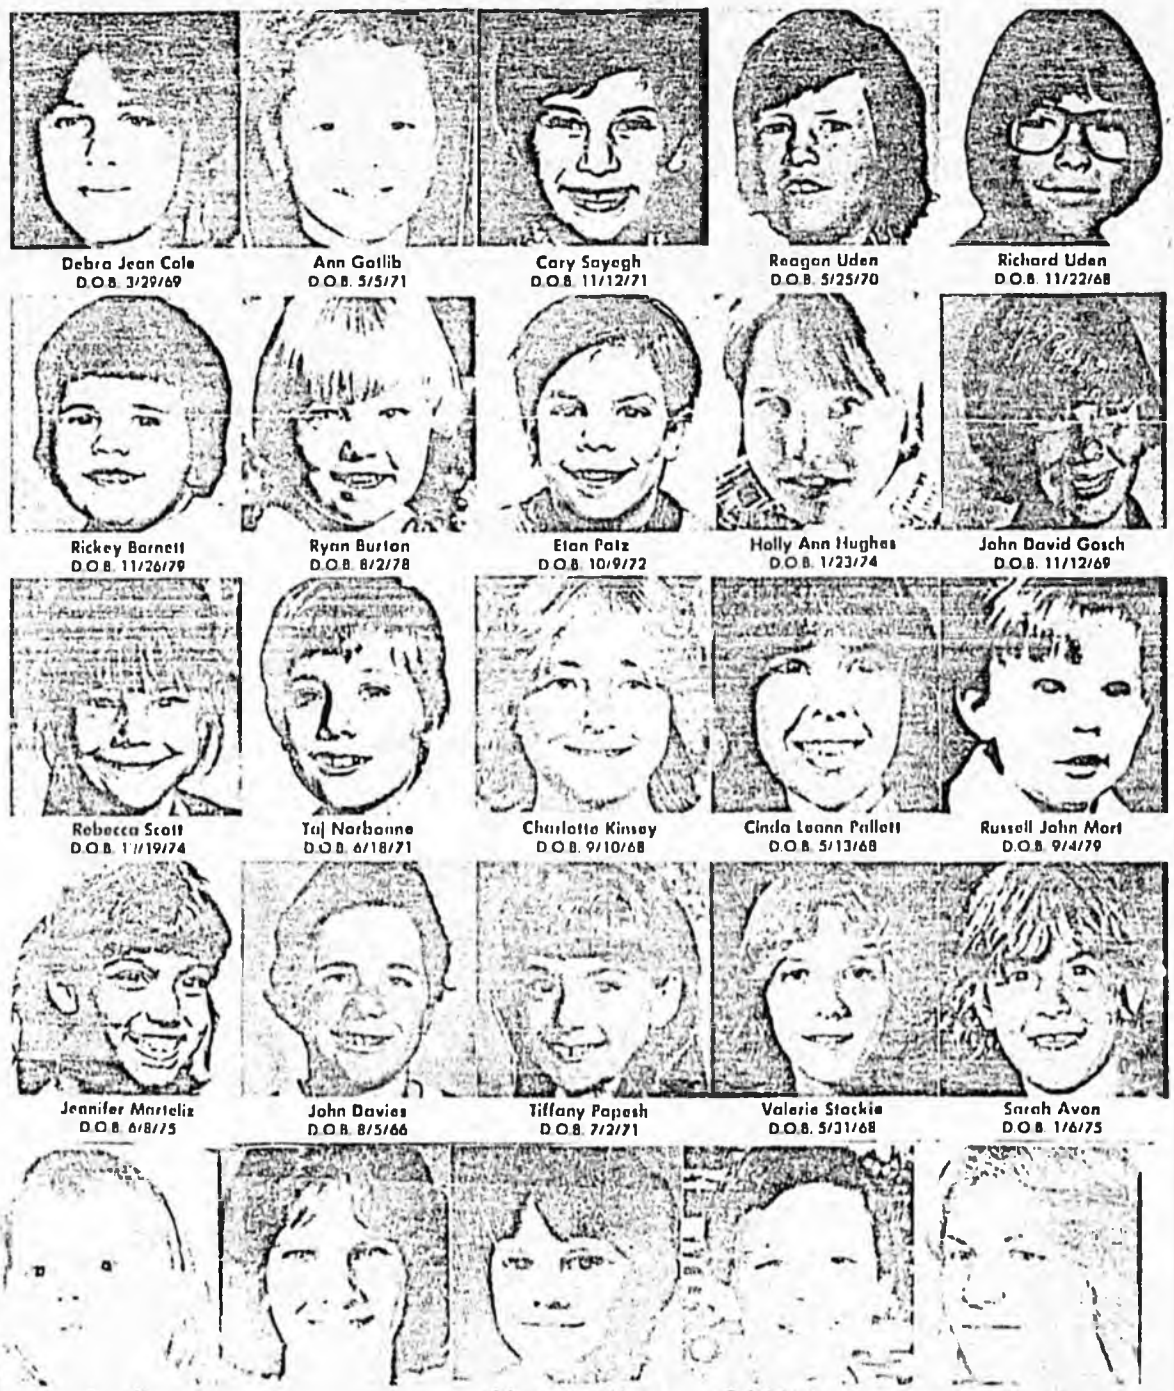
Superior Court Judge Ralph Moody told Sauer, 63, "This is one of the most severe child molestation cases I've ever seen."

Moody said the prospects of rehabilitation were questionable for a man of Sauer's age, adding there was a clear need to remove him from the public.

"We can't tolerate crimes against children," he said.

Sauer, who was convicted by a jury Oct. 29, was sentenced to 14 years in prison, then ordered to serve eight years and placed on probation for the other six.

He was charged with engaging in sexual acts with four girls ranging in age from 7 to 11 from late 1981 until mid-1982.



These children appeared on the role call at the conclusion of the television movie

Rodriquez lured students, witness says

by Jeff Berliner
Times Writer

Carlos "Chico" Rodriquez enticed West High School students into his web of pornography, burglary, drugs and sex, the jury in the Rodriquez trial was told Tuesday.

A former West High School student took the witness stand and declared that Rodriquez had told him, "I get a whole bunch of people from West."

The youth, now 21, said he had just had sex — at the invitation of Rodriquez — with a girl described as a West High student but a stranger to the boy, when Rodriquez made the remark.

The 1302 W. 26th Ave. home where Rodriquez lived and allegedly directed his ring of juvenile burglars, prostitutes and pornography stars is just a short distance rom West High.

Now an Anchorage college student, the witness described how he willingly engaged in sex with Rodriquez after the man picked him up in a chance encounter. The young man said he had just left work at midnight one summer night in 1978 and was walking to an all-night store when Rodriquez offered him a ride.

The youth acknowledged smoking marijuana with Rodriquez and consenting to have sex first with the girl Rodriquez had in his bedroom and then with Rodriquez himself. He said he returned later for more drugs and sex.

But it turned out that the Rodriquez house was apparently under surveillance. The young man, then 16 and enrolled in an Alaska State Trooper youth training program, was confronted by troopers about drug use and later picked out of a surveillance photo showing him entering Rodriquez' house.

However, this youth was characteristically different than the other prosecution witnesses who have testified against Rodriquez. Dressed in a three-piece suit and speaking articulately and forthrightly, the then-trooper trainee offered details about the several sexual encounters in no uncertain terms. He also described the movie studio set-up Rodriquez had to show and make pornographic films.

The student's testimony was in contrast to that of other prosecution witnesses who, down and out, said they found refuge with Rodriquez and reluctantly traded sexual services for money and drugs. Or, in some cases, they said they were raped or tried to fight off the man's sexual advances. Most were homeless and in trouble with the law.

Tuesday Superior Court Judge Ralph Moody charged Defense Lawyer Mitchel Schapira with delving too deeply into the backgrounds of the troubled youths. Schapira, in an attempt to discredit the prosecution witnesses, has gone over and over their drug-using habits and their run-ins with authorities.

Moody ordered the jury out of the courtroom Tuesday morning while he threatened Schapira with legal sanctions if he continued a line of questioning, which made it appear as if the witnesses were on trial and not his client.

Rodriquez faces 28 felonies in the case and all 12 victims named in the indictment have testified. Prosecutor Paul Olson is calling to the stand other witnesses to corroborate the stories told by the victims.

The only girl to testify became confused about which neighborhood the man she knew as "Romeo" really lived in and, although she could remember few details about the month she reportedly lived with Rodriquez, she told jurors she remembered his tattoo.

Another witness Tuesday told jurors that Rodriquez came to his aide at Chilkoot Charlie's when his car wouldn't start. He returned with Rodriquez to the older man's house to get some cables to jump-start the boy's car. But instead, the boy testified, Rodriquez jumped him. Rodriquez allegedly ripped down the boy's pants before the youth was able to knock the man down, run back to the bar and summon police. Officers found the boy hysterical and the Rodriquez home dark and deserted.

The teen told jurors that Rodriquez' house was full of drug paraphenalia and "looked like a whorehouse inside."

SUBJECT: Sectional analysis of HB 445

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Keith B. Levy KBL
Legislative Counsel

You have requested a sectional analysis of HB 445, "An Act relating to attorney fees." Under present law (AS 09.60.010) the Supreme Court has the discretion to determine by rule or order what attorney fees may be ordered to the prevailing party in civil cases. Under the authority of that section, the Supreme Court enacted Civil Rule 82. Civil Rule 82 does not deal with attorney fees in public interest cases. However, in a number of cases, the Court has determined that in a genuine public interest case, it is an abuse of discretion for the trial court to award attorney fees against the plaintiff if the defendant prevails. See Gilbert v. State, 526 P.2d 1131 (Alaska 1974); Anchorage v. McCabe, 586 P.2d 986 (Alaska 1977); Thomas v. Croft, 614 P.2d 795 (Alaska 1980); and SEACC v. State, ___P.2d___, No. 2662, (Alaska 1983).

House Bill 445 provides that in a civil suit against a non-governmental party, it is not an abuse of discretion to award attorney fees, even if it is a genuine public interest case.

Fiscal Note
Analysis
HB 445

January 19, 1984

This bill appears to adopt by statute the criteria established by Alaska Supreme Court decisions over the past several years. Because this criteria for awarding attorney fees in public interest lawsuits is already being followed by the courts, no additional fiscal impact is expected to result by enactment of this legislation.

SUBJECT: The public interest exception to the award of attorney's fees (Work Order No. 13-1434)

TO: Representative John J. Liska

FROM: Keith B. Levy KBL
Legislative Counsel

You have asked a number of questions in regard to the public interest exception to the award of attorney's fees in court actions. Specifically, you have asked:

1. What is the state law on attorney's fees?

2. Does CSSB 196 (Rules) am protect the non-governmental defendant from the potential financial burden of a public interest law suit when the plaintiff loses?

3. If not, how can the non-governmental defendant in this type of case be adequately protected?

I will address each of these questions separately.

1. State law on attorney's fees

AS 09.60.010 provides:

> Except as otherwise provided by statute, the supreme court shall determine by rule or order what costs, if any, including attorney fees, shall be allowed the prevailing party in any case.

Under the authority of this section, the Supreme Court has adopted Civil Rule 82. Rule 82 sets out a schedule of attorney's fees to be awarded the prevailing party, "unless the court, in its discretion, otherwise directs." Rule 82 also provides

> Should no recovery be had, attorney's fees for the prevailing party may be fixed by the court in its discretion in a reasonable amount.

The public interest exception to Rule 82 states that "it is an abuse of discretion to award attorney's fees against a losing party who has in good faith raised a question of genuine public interest before the courts." Gilbert v. State, 526 P.2d 1131, 1136 (Alaska 1974). The exception is not provided for by statute or court rule, rather, it is a matter of public policy established by the Alaska Supreme Court in a number of cases. See Gilbert v. State, 526 P.2d 1131 (Alaska 1974); Anchorage v. McCabe, 586 P.2d 986 (Alaska 1977); Thomas v. Croft, 614 P.2d 795 (Alaska 1980); and SEACC v. State, ___ P.2d ___, No. 2662, (Alaska 1983). Citing these cases, the court in SEACC, supra, stated that the policy behind the public interest exception is

> . . . to encourage plaintiffs to raise issues of public interest by removing the awesome financial burden of such a suit.
>
> * * *
>
> . . . a plaintiff who in good faith seeks to vindicate matters infused with strong public policy concerns should not be penalized by having attorney's fees taxed against it unless its suit is frivolous.

SEACC, supra, at 24. Thus, the award of attorney's fees in the state is governed by statute, court rule, and public policy as determined by the Supreme Court.

2. The effect of CSSB 196 (Rules) am

CSSB 196 (Rules) am amends AS 09.60.010 by adding a new subsection to read:

> (b) The supreme court shall by rule or order provide that the court in its discretion may compel a plaintiff in an action to post a bond or other acceptable surety with the court in an amount determined by the court to be reasonable under (a) of this section.

This section merely gives the court the discretion to require a plaintiff to post a bond or other surety to cover any costs or attorney's fees that may be awarded against the

plaintiff. Since the court may not award attorney's fees against a losing plaintiff in a genuine public interest case anyway, the new section does nothing for the winning defendant. Thus, even if CSSB 196 (Rules) am is enacted, it will have no affect on the public interest exception to the award of attorney's fees.

3. Providing adequate protection for winning non-governmental defendants in public interest cases

The court in SEACC, supra, ruled that the public interest exception applies in cases involving non-governmental defendants as well as governmental defendants. As noted above, the purpose of the public interest exception is to avoid penalizing a public interest plaintiff with heavy attorney's fees if the law suit is not frivolous. Citing Kenai Lumber Co. v. Leresche, 646 P.2d 215 (Alaska 1982), the court in SEACC, supra, pointed to the following criteria which must be met before the public interest exception can be asserted by a losing plaintiff:

> "(1) Is the case designed to effectuate strong public policies?
>
> "(2) If the plaintiff succeeds will numerous people receive benefits from the lawsuit?
>
> "(3) Can only a private party have been expected to bring the suit?
>
> "(4) Would the purported public interest litigant have sufficient economic incentive to file suit even if the action involved only narrow issues lacking general importance?"

SEACC, supra, at 25. The Supreme Court feels that these criteria are sufficient to ensure that a plaintiff may not freely harass an innocent defendant with a frivolous law suit under the cloak of the public interest exception without suffering the consequences. It would appear that the criteria successfully do just that. They effectively limit the public interest exception to situations where a private plaintiff is bringing a meritable law suit in the genuine public interest with no opportunity for financial gain to itself. It is difficult to imagine a plaintiff bringing a law suit merely for harassment under such circumstances. Accordingly, I would conclude that non-governmental

defendants in public interest law suits are already adequately protected under the law.

If your intent is to protect non-governmental defendants from frivolous law suits, an amendment to the current law is unnecessary. However, if you wish to eliminate the public interest exception as it applies to non-governmental defendants, that could be done by amending AS 09.60.010 to limit the court's discretion in awarding attorney's fees in these cases.

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES
RESEARCH AGENCY

Pouch Y, State Capitol
Juneau, Alaska 99811
(907) 465-3991

October 24, 1983

MEMORANDUM

TO: Representative John Liska

FROM: Nancy Pease
Legislative Analyst NP

RE: Public Interest Exemption Lawsuits
Research Request 83-200

Linda Edgeworth of your staff asked for information on public interest lawsuits in Alaska courts with regard to the exemption of attorney's fees. She indicated that you were specifically interested in public interest cases since 1978 in which the defense prevailed, and for such cases, the available information on the costs to the defendants and plaintiffs.

The general rule for attorney's fees in Alaska courts is that the losing party in a lawsuit may be ordered to pay, at the court's discretion, part of the prevailing party's attorney's fees as a compensatory gesture. The amount of attorney's fees charged to the losing party is determined by the court, either in accordance with a fee schedule based on the amount of the money judgement recovered in the case or, if there is no monetary recovery, "a reasonable amount" relative to the prevailing party's costs in trying the case [Alaska Rules of Court, Civil Rule 82].

The Alaska Supreme Court in Gilbert v. State, (Alaska 1974), established a "public interest" exception to this rule by holding that " it is an abuse of [the court's] discretion to award attorney's fees against a losing party who has in good faith raised a question of genuine public interest before the courts" [526 P.2d at 1136]. Thus, the exception is designed to encourage plaintiffs to bring issues of public interest to the courts.

Ed Hein of the Legislative Affairs Agency's Legal Services Division explained to me that the Alaska Supreme Court has identified four criteria for determining whether a case may be designated as public interest litigation:

1. Does the case have the potential to affect public policies?

2. Will numerous people receive benefits from the lawsuit if the plaintiff succeeds?

3. Could only a private party be expected to bring this suit?

4. Did the plaintiff have sufficient economic incentive to bring the lawsuit regardless of any issues of public interest involved?

If the court can answer "yes" to the first three questions and "no" to the fourth question, then the case will be designated a public interest lawsuit, the exception to Rule 82 will apply, and the court will not charge the losing party with the prevailing party's attorney's fees.

Many of the highly-publicized class action lawsuits that involve Alaska are brought in federal courts. The federal court either awards attorney's fees at their discretion or in accordance with Alaska Rules, according to Joanne Meyers, Clerk of the Court at the Federal District Court in Anchorage. Ms. Meyers said there was no general rule analagous to Alaska Rule 82 for award of attorney's fees in federal courts. There may be federal statutes governing award of fees in specific types of suits, for example, the Civil Rights Attorney's Fees Awards Act (42 U.S.C. § 1988). These statutes may be raised in State court, as was the above Act in the public interest case of Tobeluk v. Lind, 589 P2.d 873 (Alaska 1979).

To identify public interest exemption cases, I reviewed law journals and talked with many people in the legal system, but I was unable to obtain all of the desired information. Unfortunately, there is no practical system for identifying public interest lawsuits in Alaska that have not been appealed to the Alaska Supreme Court. At the trial court level, each judicial district in Alaska maintains its own files of cases, indexed by the parties' names but not by the issues contested in the cases. The only reference to cases which were closed in the trial courts is the recall of people involved in the legal system. To this end, I have contacted agencies that frequently initiate class actions (the Sierra Club Legal Defense Fund, the Alaska Resources Defense Council, Alaska Legal Services Corporation, Alaska Human Rights Commission, AkPIRG, etc.). However, all of the unsuccessful class actions that I found in this way were eventually appealed to the Alaska Supreme Court.

Another problem in identifying public interest lawsuits is that unless the exemption from award of fees was contested in an appeal, a lawsuit involving issues of public concern may not be widely recognized as a public interest case.

Attached is a list of lawsuits appealed to the Alaska Supreme Court since 1978 in which the losing plaintiff argued for application of the public interest exception. I have provided a short summary of the issues in the original trial, and the grounds for appeal. The first set of cases closely parallels the suit involving Schnabel Lumber Co., which Ms. Edgeworth mentioned in her correspondence. In these cases, the losing public interest plaintiffs were all exempted from paying the winning defendants' legal fees.

In the next set of cases, the court found sufficient economic incentives for the plaintiff to have brought the case regardless of any public issues involved. In these cases, the court ordered the losing plaintiffs to pay the defendants' fees, despite their service to the public in raising genuine public issues. The final two cases also involved issues of genuine public interest, but special exceptions governed the payment of legal fees.

In this same period, the Supreme Court has rejected as "private disputes" other appeals in which the plaintiff argued for the public interest exemption. These cases, which did not meet criteria #1-3, are cited briefly at the end of the list.

I have been able to report on the costs to the litigants in only a few cases. Unfortunately, parties contacted were usually unable or unwilling to report their costs to us.

I hope this information is helpful. If you have further questions on this issue, please let us know how we can assist you.

ALASKA SUPREME COURT CASES

ALASKA SUPREME COURT CASES
INVOLVING PUBLIC INTEREST CLAIMS

I. Cases in which the public interest exception applied:

Anderson v. State, 584 P.2d 539 (Alaska 1978)

Appellants: Oris O. Anderson and Aiko Anderson.
Appellee: State of Alaska, Department of Highways.

The Andersons sued the State for allegedly committing fraud when it did not properly notify them of the condemnation of a strip of their land for a road right-of-way.

The plaintiffs lost their case but were not required to pay part of the defendants attorney's costs because they raised issues of public importance. The legal staff of the State Attorney General's office was unable to estimate the State's legal expenses. The plantiffs funded their suit personally.

City of Yakutat v. Ryman, 654 P.2d 794 (Alaska 1980)

Appellant: City of Yakutat.
Appellee: Frank L. Ryman, Jr.

Ryman charged the city with failing to comply with the statutory requirements for levying property taxes. He sued to obtain a refund of his general property taxes for a three year period.

He was awarded the refund for two of the three years and part of his costs for that portion of the case. The city appealed, and Ryman cross-appealed.

Ultimately, the City of Yakutat paid the plaintiff's costs for the issues it lost, and was denied collection of its own costs for the issues it won because Ryman was acting in the public interest. The City's law firm would not disclose their charges in this case despite the City's permission to do so.

Thomas v. Croft, 614 P.2d 797 (Alaska 1980)

Appellants: Lowell Thomas, Jr., Lieutenant Governor of Alaska; Patty Ann Polley, Director, Division of Elections, et al.
Appellee: Chancy Croft.

In the original suit, two losing gubernatorial candidates sued the successful primary candidates, Croft and Hammond, and State election officials. They charged that improprieties in the State's conduct of the election might have been sufficient to change the outcome. The State lost and appealed. The Supreme Court reversed the decision, ruling that the misconduct and irregularities in the election were not sufficient to have changed the outcome.

Croft could not collect his legal costs from the public interest plaintiffs, but he collected $15,000 from his co-defendant, the State, since their actions and not his own had prompted the suit. The attorney general's office was unable to estimate the cost to the State of defending the election officials. .

Douglas v. Glacier State Telephone, 615 P.2d 580 (Alaska 1980)

Appellant: John H. Douglas and Jean Douglas.
Appellees: Glacier State Telephone Co. and Kenai Peninsula Borough.

The Douglases challenged a local sales tax on interstate phone calls charged to phones within the Kenai Borough. They claimed that the tax violated the Commerce Clause, and that the Borough had violated equal protection laws by not collecting the tax from customers of a certain utility.

The telephone company prevailed, but the Douglases were exempted from paying the company's attorney's fees which totalled $8,800.

Whitson v. Anchorage, 632 P.2d 233 (Alaska 1980)

Appellant: Carl Whitson, Individually and as Officer, Agent, or Employee of the Libertarian Party, and the Libertarian Party.
Appellee: Anchorage, a Municipal Corporation.

The City challenged Whitson's petition to place on the ballot an initiative allowing voters to block tax increases. The City won and was awarded attorney's fees. Whitson appealed the award of fees, claiming he deserved a public interest exemption.

The Supreme Court denied the City its attorney's fees, which totalled $5,778.

Falke v. Fairbanks North Star Borough, 648 P.2d 599 (Alaska, 1982)

Appellant: Wolfgang Falke
Appellees: Fairbanks North Star Borough and the State of Alaska.

Falke claimed that the service area provisions of a State statute violated the constitutional rights of Borough residents. Falke lost the case, but was exempted from paying the Borough's attorney's fees.

The Fairbanks Borough Attorney estimates the Borough's legal costs in this case at $10,000 for the trial and appeal. The plaintiff funded his suit against the Borough himself.

Hammond v. North Slope Borough, 645 P.2d 750 (Alaska, 1982)

Appellants: Jay Hammond, Governor of the State of Alaska; Robert E. LeResche, Commissioner of the Department of Natural Resources; Frances C. Ulmer, Director, Division of Policy Development and Planning; Amoco Production Co.; Atlantic Richfield Co.; other oil companies; et al.
Appellees: North Slope Borough, Eben Hopson, Sr., Jacob Adams; City of Barrow; Village of Nuiqsut; et al.

Several Alaska villages and individuals charged that the State's decision to lease offshore tracts for oil and gas exploration would harm the natural environment and the Inupiat Eskimos' traditions and lifestyle. The State prevailed, but the plaintiffs were not required to pay the State's attorney's fees because of the public interest issues raised by the case.

Again, the attorney general's office could not estimate the State's legal expenses. The plaintiffs were represented by the Alaska Legal Services Corporation.

SEACC v. LeResche, not yet published in the law digest, (Alaska 1983)

Appellant: Southeast Alaska Conservation Council.
Appellee: Robert E. LeResche, Commissioner of the Department of Natural Resources; other officials of the State of Alaska; and Schnabel Lumber Company.

SEACC charged the State's Department of Natural Resources with signing an illegal contract with Schnabel Lumber. SEACC, represented in court by the Sierra Club Legal Defense Fund, alleged that the contract violated the State's principals of sustained-yield timber management. SEACC lost the case and the Superior Court ordered SEACC to compensate Schnabel for $25,000 of its attorney's fees. SEACC was released from this order when they appealed.

The attorney general's office couldn't estimate the State's legal expenses. Bill Oliver of Schnabel Lumber Co. listed the direct legal costs of the case as $210,00, raised from the following sources: Schnabel Lumber Company paid $70,000; various groups and individuals across the state donated $20,000; the City of Haines paid $32,000 as amicus cureae (a friend of the court); and the Borough of Haines levied a 1% sales tax, raising $98,000. Schnabel Lumber was ordered to pay $10,000 toward the legal fees of SEACC for its appeal to the Supreme Court.*

---

* Mr. Oliver listed the following indirect costs of the suit:

Loss of bonding. Bonding companies became nervous over the suit and withdrew bonding. When Schnabel could not fulfill a $2.6 million contract with the U.S. Forest Service because of the delays of the suit, the Forest Service sued for default. The Forest Service last week agreed to settle for $200,000, but not before Schnabel had incurred additional legal expenses. Schnabel also had to default on a contract with a Chinese firm because of a stay issued in the case.

Loss of jobs. According to Mr. Oliver, fifty mill workers, 35 loggers, 40 longshoremen, and 35 office and other workers were laid off during the suit. The payroll lost to the community totalled $3 million.

Additional losses included maintenance costs to the mill during the shutdown of $30,000 per month.

II. Cases for which the court denied the public interest exemption based on the economic incentive for the lawsuit (criterion #4):

Gold Bondholders Protective Council v. Atchison, Topeka and Santa Fe Railway Co., 658 P.2d 776 (Alaska 1983)

Appellants: Gold Bondholders Protective Council; Richard L. Randolph; David Brenner; Karl L. Flaccus; and Lee R. Ellenberg.
Appellees: Atchison, Topeka & Santa Fe Railroad.

The Bondholders sued the bond issuers seeking to enforce a clause in the bonds dating back to 1895 which promised interest payments in gold coin. The bond issuers defended successfully and were awarded $15,521 in legal expenses. The Bondholders appealed the award.

Fees were charged to the losing plaintiff despite the issues of genuine public concern that the plaintiff raised.

Weaver Bros., Inc. v. Alaska Transporation Commission, 588 P.2d 819 (Alaska 1978)

Appellant: Weaver Bros., Inc.
Appellees: Alaska Transporation Commisssion; K & W Trucking Co. Inc; and O. G. Ness doing business as O. G. Ness Truck Company.

Weaver Bros. protested the Transportation Commission's approval of the transfer of a motor carrier permit between two competitive firms. The Supreme Court affirmed the Commission's decision and ordered Weaver Bros. to pay its competitors' attorneys' fees despite the issues of genuine public concern that Weaver Bros. lawsuit had raised.

Sisters of Providence v. Department of Health and Social Services, 648 P.2d 986 (Alaska 1982)

Appellant: Sisters of Providence in Washington, Inc.
Appellees: Department of Health and Social Services, State of Alaska and Lake Otis Clinic, Inc.

Providence Hospital challenged DHSS's decision concerning a competitor's certificate of need. The Superior Court ruled for the competitor and charged the competitor's fees to Providence Hospital. Providence appealed.

Because of the competetive business advantage at stake in this case, fees were charged to the losing plaintiff despite the issues of genuine concern that the plaintiff had raised.

Kenai Lumber Co. v. LeResche, 646 P.2d 215 (Alaska 1982)

Appellant: Kenai Lumber Co., Inc.
Appellees: Robert LeResche, Commissioner of the Department of Natural Resources of the State of Alaska; Geoffrey Haynes, Director of Division of Lands of the Department of Natural Rescources, et al; and South-Central Timber Development, Inc.

Kenai Lumber claimed that DNR and a competitive timber firm had illegally circumvented the State's competitive bidding process by negotiating amendments to a long term timber contract.

Because competitive business advantages may have motivated this suit, the court charged the winner's fees to the losing plaintiff despite the issues of genuine public concern that the plaintiff raised.

III. Cases in which special exceptions applied to the award of fees:

Tobeluk v. Lind, 589 P.2d 873 (Alaska 1979)

Appellants: Anna Tobeluk and Henry A. Tobeluk, minors, by their father and next friend John Tobeluk, et al.
Appellees: Marshall L. Lind, as Commissioner of Education, et al.

Alaska Native schoolchildren brought action to compel the State to build secondary schools in their villages. Following settlement of this issue, the Tobeluks' motion for costs and attorney's fees was denied by the Superior Court, and the Tobeluks appealed.

The court ruled that neither party clearly prevailed and declined to award fees.

Horowitz v. Alaska Bar Association, 609 P.2d 39 (Alaska 1980)

Appellants: Bruce Horowitz, William Parker, James Love; David Loutrel; Wilson A. Rice; John E. Duggan; Donald E. Clocksin; Thomas G. Beck; Elizabeth Ratner; Randall Simpson; Phillip R. Voland; and Jeffrey Lowenfels.
Appellee: The Alaska Bar Association.

A group of attorneys charged that a business meeting of the ABA board of governors had violated federal and State due process rights and the Alaska open meeting statute.

Fees are rarely awarded in suits involving the ABA because the ABA acts as an arm of the judiciary to uphold court rules. ABA declined to specify its expenses.

IV. Cases which did not meet criteria #1-3 to qualify as public interest cases:

F/V American Eagle v. State, 620 P.2d 657 (Alaska 1980).

Rouse v. Anchorage School District, 613 P.2d 263 (Alaska 1

Hilbers v. Municipality of Anchorage, 66 P. 2d 31 (Alaska 19

White v. Alaska Insurance Guaranty Association, 592 P.2d 367 (A a l

ioses specified in the decree.

) Except for specific constitutional and statutory age requirements oting and use of alcoholic beverages, a minor whose disabilities are oved for general purposes has the power and capacity of an adult. uding but not limited to the right to self-control, the right to be iciled where one desires, the right to receive and control one's ings, to sue or to be sued, and the capacity to contract. (§ 2 ch 233 \ 1976)

NOTES TO DECISIONS

I. General Consideration.
II. Right to Costs.
A. Generally.
B. Prevailing Party.
III. Award.
A. Generally.
B. Attorney's Fees.

I. GENERAL CONSIDERATION.

Applied in Brand v. First Fed. Sav. & Loan Ass'n, Sup. Ct. Op. No. 658 (File Nos. 1119, 1154), 478 P.2d 829 (1970).

Quoted in Albritton v. Estate of Larson, Sup. Ct. Op. Nn. 413 (File No. 793), 428 P.2d 379 (1967); Thomas v. Croft, Sup. Ct. Op. No. 2135 (File No. 4719), 614 P.2d 795 (1980).

Cited in Guin v. Hu, Sup. Ct. Op. No. 1810 (File No. 3742), 591 P.2d 1281 (1979); Stone v. Stone, Sup. Ct. Op. No. 2522 (File No. 5674), P.2d (1982).

II. RIGHT TO COSTS.

A. Generally.

The right to costs is purely statutory. Mutual Benefit Health & Accident Ass'n v. Moyer, 9 Alaska 235, 94 F.2d 906 (9th Cir.), cert. denied, 9 Alaska 292, 304 U.S. 581, 58 S. Ct. 1054, 82 L. Ed. 1543 (1938).

And no such right existed at common law. Mutual Benefit Health & Accident Ass'n v. Moyer, 9 Alaska 235, 94 F.2d 906 (9th Cir.), cert. denied, 9 Alaska 292, 304 U.S. 581, 58 S. Ct. 1054, 82 L. Ed. 1543 (1938).

The authority to make awards of attorney fees is derived from this section, which is of relatively ancient origin, dating from an Act of Congress of June 6, 1900, 31 Stat. 415-18, which was amended in 1923 by the Territorial Legislature of Alaska to expressly permit the courts to impose reasonable attorney's fees. Stepanov v. Gavrilovich, Sup. Ct. Op. No. 1823 (File No. 3236), 594 P.2d 30 (1979).

Rule 82(a), which allows for the recovery of reasonable attorney's fees, is supported

by legislation which specifies that the supreme court shall determine when attorney's fees are to be awarded. Thus, the award of attorney's fees is authorized, though not mandated, by statute. Klopfenstein v. Pargeter, 597 F.2d 150 (9th Cir. 1979).

There is no statute authorizing awards of attorney's fees in child in need of aid proceedings, nor has any rule or order authorizing such an award been promulgated. Cooper v. State, Sup. Ct. Op. No. 2453 (File Nos. 4906, 4970), 638 P.2d 174 (1981).

Civil R. 82 established pursuant to delegation of authority in section. — Civil R. 82, authorizing awards of attorney's fees to the prevailing party in civil litigation, apart from eminent domain proceedings, was established by the supreme court pursuant to a legislative delegation of authority found in this section. Crisp v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1771 (File No. 3318), 587 P.2d 1168 (1978).

B. Prevailing Party.

No party is entitled to costs until he prevails in the suit, in other words, until judgment is entered. Mutual Benefit Health & Accident Ass'n v. Moyer, 9 Alaska 235, 94 F.2d 906 (9th Cir.), cert. denied, 9 Alaska 292, 304 U.S. 581, 58 S. Ct. 1054, 82 L. Ed. 1543 (1938).

The prevailing party is entitled to costs. Owen Jones & Sons v. C.R. Lewis Co., Sup. Ct. Op. No. 795 (File No. 1460), 497 P.2d 312 (1972).

The prevailing party is entitled to costs, including an award for attorney's fees. De Witt v. Liberty Leasing Co., Sup. Ct. Op. No. 818 (File No. 1638), 499 P.2d 599 (1972).

No costs allowed where both prevail. — Where both parties prevailed in part in an action under the Miller Act (40 USC 270b) no costs should be taxed to either party. United States ex rel. Miller & Bentley Equip. Co. v. Kelly, 192 F. Supp. 274 (D. Alas. 1961).

"Prevailing party". — The prevailing party to a suit is the one who successfully prosecutes the action or successfully defends against it, prevailing on the main issue, even though not to the extent of the original contention. He is the one in whose favor the decision or verdict is rendered and the judgment entered. De Witt v. Liberty Leasing Co., Sup. Ct. Op. No. 818 (File No. 1638), 499 P.2d 599 (1972); Cooper v. Carlson, Sup. Ct. Op. No. 907 (File No. 1769), 511 F.2d 1305 (1973).

A party does not have to prevail on all of the issues in the case to be a "prevailing party." Malvo v. J.C. Penney Co., Sup. Ct. Op. No. 901 (File No. 1630), 512 P.2d 575 (1973).

A litigant who is successful in defeating a claim of great potential liability may be the prevailing party even though the other side is successful in receiving an affirmative recovery. Cooper v. Carlson, Sup. Ct. Op. No. 907 (File No. 1769), 511 P.2d 1305 (1973).

Where a party prevailed on every liability issue, and was unsuccessful only in his argument that he was entitled to nominal damages on his counterclaim, he was the prevailing party. Cooper v. Carlson, Sup. Ct. Op. No. 907 (File No. 1769), 511 P.2d 1305 (1973).

As a general rule, the "prevailing party" is considered to be the party who has successfully prosecuted or defended against the action, the one who is successful on the "main issue" of the action and in whose favor the decision or verdict is rendered and the judgment entered. In re V.M.C., Sup. Ct. Op. No. 1103 (File No. 2107), 528 P.2d 788 (1974).

The determination of which party prevails in certain cases is, like the award of attorney's fees, within the discretion of the trial judge. Owen Jones & Sons v. C.R. Lewis Co., Sup. Ct. Op. No. 795 (File No. 1460), 497 P.2d 312 (1972); In re V.M.C., Sup. Ct. Op. No. 1103 (File No. 2107), 528 P.2d 788 (1974).

The determination of which party prevailed is committed to the discretion of the trial court and is reviewable on appeal only for abuse. De Witt v. Liberty Leasing Co., Sup. Ct. Op. No. 818 (File No. 1638), 499 P.2d 599 (1972); State ex rel. Palmer Supply Co. v. Walsh & Co., Sup. Ct. Op. No. 1583 (File No. 2816), 575 P.2d 1213 (1978).

Affirmative recovery not determinative. — It is not an immutable rule that the party who obtains an affirmative recovery must be considered the prevailing party. Owen Jones & Sons v. C.R. Lewis Co., Sup. Ct. Op. No. 795 (File No. 1460), 497 P.2d 312 (1972).

Prevailing party not determined by amount of recovery. — Judgment was entered for plaintiff and the defendant's counterclaim was dismissed therefore plaintiff was the prevailing party within the purview of this section, even though it did not recover the full measure of the relief it prayed for. Buza v. Columbia Lumber Co., Sup. Ct. Op. No. 254 (File No. 453), 395 P.2d 511 (1964).

An incidental recovery is not a sufficient recovery to bar a party who has defended a large claim from being considered a prevailing party. Owen Jones & Sons v. C.R. Lewis Co., Sup. Ct. Op. No. 795 (File No. 1460), 497 P.2d 312 (1972).

III. AWARD.

A. Generally.

Apportionment of costs. — If the problem involved in the litigation is one of general interest and the prevailing party is not wholly without benfit because of the instigation of the proceedings it may be proper to apportion the costs on an equitable basis and each may be made to bear his own. Kederick v. Heintzleman, 16 Alaska 333, 141 F. Supp. 633 (D. Alas. 1956).

Where part of the defendants are successful and part are unsuccessful the cost of bringing the successful defendants into court should be taxed against plaintiff and not against the unsuccessful defendants. Humphries v. Starns, 12 Alaska 535, 87 F. Supp. 374 (D. Alas. 1949).

Waiver. — Parties to an action may by stipulation waive their respective rights to costs and attorney's fees. Jones v. Fuller-Garvey Corp., Sup. Ct. Op. No. 172 (File No. 344), 386 P.2d 838 (1963).

Costs in habeas corpus proceeding. — Where a habeas corpus proceeding is found to be without merit, the courts have taxed costs, apparently on the basis of the necessity and merit of the proceedings. Application of Spracher, 17 Alaska 144, 150 F. Supp. 565 (D. Alas. 1957).

Liability of state for costs. — See Reynolds v. Wade, 16 Alaska 221, 140 F. Supp. 713 (D. Alas. 1956); Fidalgo Island Packing Co. v. Phillips, 16 Alaska 621, 147 F. Supp. 883 (D. Alas. 1957).

Allowance of witness fees. — See Humphries v. Starns, 12 Alaska 535, 87 F. Supp. 374 (D. Alas. 1949).

The award is discretionary. — See notes under same catchline under analysis line III B, "Attorney's Fees."

Amount of the award of costs and fees held not unreasonable. — See In re V.M.C., Sup. Ct. Op. No. 1103 (File No. 2107), 528 P.2d 788 (1974).

B. Attorney's Fees.

Allowance of attorneys' fees as costs. — See Baker v. Marvel Creek Mining Co., 5 Alaska 348 (1915); Forno v. Coyle, 75 F.2d 692 (9th Cir. 1935); Pilgrim v. Grant, 9 Alaska 417 (1938); Columbia Lumber Co. v. Agostino, 13 Alaska 34, 184 F.2d 731 (9th Cir. 1950); United States ex rel. Brady's Floor Covering v. Breeden, 14 Alaska 214, 110 F. Supp. 713 (D. Alas. 1953); Jonas v. Bank of Kodiak, 17 Alaska 755, 166 F. Supp. 739 (D. Alas. 1958); Varnell v. Swires, 261 F.2d 891 (9th Cir. 1958).

Statutory authorization for the allowance of attorney's fees is of relatively ancient origin. McDonough v. Lee, Sup. Ct. Op. No. 378 (File No. 674), 420 P.2d 459 (1966).

The award of attorney's fees as costs is governed by the Rules of Civil Procedure. McDonough v. Lee, Sup. Ct. Op. No. 378 (File No. 674), 420 P.2d 459 (1966).

Attorney's fees not covered by literal requirements of Civ. R. 79(b). -- While attorney's fees are costs, they are not covered by the literal requirements of Civ. R. 79(b), which specifies items allowed as costs. State v. University of Alaska, Sup. Ct. Op. No. 2303 (File No. 4579), 624 P.2d 807 (1981).

Federal law governs allowance of attorney's fees in case involving construction of federal statute. — In cases involving the construction of federal statutes the federal law rather than the law of the state in which the action is brought governs with regard to the allowance of attorney's fees. Gilliam v. A. Shyman, Inc., 205 F. Supp. 534 (D. Alas. 1962).

The allowance of attorney's fees in diversity cases is governed by state law, except that the amount thereof should be governed by the federal rules of court. Danzas, Ltd. v. National Bank, 222 F. Supp. 671 (D. Alas. 1963), modified, 226 F. Supp. 928 (D. Alas. 1964).

Full reimbursement not automatically to be awarded. — The prevailing party in each case should not automatically be awarded the full amount of the attorney fees incurred. Malvo v. J.C. Penney Co., Sup. Ct. Op. No. 901 (File No. 1630), 512 P.2d 575 (1973).

If a successful litigant were to receive full reimbursement for all expenses incurred in the case with no requirement of justification and no consideration of the "good faith" nature of the unsuccessful party's claim or defense, there would be a serious detriment to the judicial system. Malvo v. J.C. Penney Co., Sup. Ct. Op. No. 901 (File No. 1630), 512 P.2d 575 (1973).

Public interest plaintiffs. — The trial court may, in its discretion, award full attorney's fees to public interest plaintiffs. City of Anchorage v. McCabe, Sup. Ct. Op. No. 1490 (File No. 2737), 568 P.2d 986 (1977).

The basis for awards of attorney's fees to public interest plaintiffs is to encourage plaintiffs to raise issues of public interest by removing the awesome financial burden of such a suit. City of Anchorage v. McCabe, Sup. Ct. Op. No. 1490 (File No. 2737), 568 P.2d 986 (1977).

It is an abuse of discretion to award attorney's fees against a losing party who has in good faith raised a question of genuine public interest before the courts. City of Anchorage v. McCabe, Sup. Ct. Op. No. 1490 (File No. 2737), 568 P.2d 986 (1977).

Attorney's fees may be awarded against plaintiffs who litigate good-faith claims. — See Stepanov v. Gavrilovich, Sup. Ct. Op. No. 1823 (File No. 3236), 594 P.2d 30 (1979).

Reliance upon invalid zoning ordinance. — It would be unfair to impose attorney's fees on a party who had relied on a zoning ordinance which was found to be invalid. City of Anchorage v. McCabe, Sup. Ct. Op. No. 1490 (File No. 2737), 568 P.2d 986 (1977).

Use of in-house counsel. — There is no express prohibition against awarding attorney's fees when a party's active representation in litigation is by in-house counsel rather than by retained counsel. Greater Anchorage Area Borough v. Sisters of Charity of House of Providence, Sup. Ct. Op. No. 1550 (File No. 3223), 573 P.2d 862 (1978).

Where teacher's dismissal is affirmed. — Application of Civ. R. 82, relating to awards of attorney's fees, was not extended to allow an award of attorney's fees against a teacher whose dismissal is affirmed. Crisp v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1771 (File No. 3318), 587 P.2d 1168 (1978).

Given a teacher's statutorily guaranteed right to contest his dismissal in the courts, it would be manifestly unreasonable to penalize the exercise of that right by allowing an award of any attorney's fees to the school district dismissing him. Crisp v. Kenai Peninsula Borough School Dist., Sup. Ct. Op. No. 1771 (File No. 3318), 587 P.2d 1168 (1978).

The award is discretionary with the trial judge and is reviewable on appeal only for abuse. Cooper v. Carlson, Sup. Ct. Op. No. 907 (File No. 1769), 511 P.2d 1305 (1973).

The matter of awarding attorney's fees is committed to the discretion of the trial court. The supreme court shall interfere with the exercise of that discretion only where it has been abused. Malvo v. J.C. Penney Co., Sup. Ct. Op. No. [illegible] (File No. 1630), 512 P.2d 575 (1973).

The award of costs and fees to the prevailing party is clearly within the broad discretion of the trial court. In re V.M.C., Sup. Ct. Op. No. 1103 (File No. 2107), 528 P.2d 788 (1974).

The supreme court has recognized that the trial judge has wide discretion in awarding attorney's fees to a prevailing party. City of Anchorage v. McCabe, Sup. Ct. Op. No. 1490 (File No. 2737), 568 P.2d 986 (1977).

Trial judge need not make formal findings of fact and conclusions of law to justify his decision denying attorney's fees. An oral explanation on the record is sufficient. Larry v. Dupree, Sup. Ct. Op. No. 1652 (File No. 3714), 580 P.2d 3[illegible] (1978).

Abuse of discretion. — An abuse of discretion is established where it appears that the trial court's determination as to attorney's fees was manifestly unreasonable. De Witt v. Liberty Leasing Co., Sup. Ct. Op. No. 818 (File No. 1635), 499 P.2d 599 (1972); Malvo v. J.C. Penney Co., Sup. Ct. Op. No. 901 (File No. 1630), 512 P.2d 575 (1973); Cooper v. Carlson, Sup. Ct. Op. No. 907 (File No. 1769), 511 P.2d 1305 (1973).

While the supreme court has made it clear that the award of attorney's fees to the prevailing party is not mandatory, it is equally clear that the denial of a motion for such fees may not be arbitrary or capricious or for some improper motive. Cooper v. Carlson, Sup. Ct. Op. No. 907 (File No. 1769), 511 P.2d 1305 (1973).

Only upon a clear abuse of discretion can the supreme court interfere with its exercise, such abuse being established only where it appears that the court's determination is manifestly unreasonable. In re V.M.C., Sup. Ct. Op. No. 1103 (File No. 2107), 528 P.2d 788 (1974).

The supreme court will interfere only where the trial court's determination as to attorney's fees appears to be "manifestly unreasonable." City of Anchorage v. McCabe, Sup. Ct. Op. No. 1490 (File No. 2737), 568 P.2d 986 (1977).

Discretion not abused. — The trial court did not abuse its discretion by permitting the request for attorneys' fees 13 days after the judgment. State v. University of Alaska, Sup. Ct. Op. No. 2303 (File No. 4579), 624 P.2d 807 (1981).

Award excessive. — An award of attorney's fees over 90 percent of what was requested, where there was no evidence that the other party's claim was frivolous, excessive. State v. University of Alaska, [illegible] P.2d 807 (1981).

Sec. 09.60.015. Attorney fees in small tort actions. (a) In any action for damages where the amount pleaded is $1,000 or less, and the plaintiff, when represented by counsel, prevails in the action, the plaintiff shall be allowed a reasonable amount to be fixed by the court as attorney fees for the prosecution of the action as a part of the costs of the action if the court finds that written demand for the payment of the claim was made on the defendant 20 days or more before the commencement of the action. However, no attorney fees shall be allowed to the plaintiff if the court finds that the defendant tendered to the plaintiff before the commencement of the action, an amount not less than the damages awarded to the plaintiff.

(b) If the defendant, when represented by counsel, pleads a counterclaim which does not exceed $1,000, and the defendant prevails in the action, the defendant shall be allowed a reasonable amount to be fixed by the court as attorney fees for the prosecution of the counterclaim as part of the costs of the action. (§ 1 ch 18 SLA 1972)

Sec. 09.60.020. Liability of guardian ad litem for costs. No person appointed guardian ad litem by a court for an infant or incompetent defendant is liable for the costs of the action. (§ 5.08 ch 101 SLA 1962)

Sec. 09.60.030. Guardian's responsibility for allowance against infant plaintiff. When costs or disbursements are adjudged against an infant plaintiff or incompetent, the guardian by whom the plaintiff appeared in the action is responsible for the payment, and payment may be enforced against the guardian as if the guardian were the actual plaintiff. (§ 5.09 ch 101 SLA 1962)

Sec. 09.60.040. Costs where party is a representative. In actions in which an executor, administrator, trustee of an express trust, or a person authorized to represent a party is a party, costs may be allowed as in other cases. However, when costs are allowed against that party, they are chargeable solely upon the estate, fund, or party represented unless the court orders the costs to be paid by that party personally for mismanagement or bad faith in the conduct of the action. (§ 5.10 ch 101 SLA 1962)

Sec. 09.60.050. Costs awarded against state, borough, city or other public agencies. When the state or a borough, city, or other public agency or entity or an officer thereof in an official capacity is a party, costs shall be awarded against it on the same basis as against any other natural person or party. However, when the action is brought upon the information of a natural person, that person shall be liable for costs awarded against the state. The costs shall not be recovered from the state until after execution has issued for the costs against that person and has been returned unsatisfied in whole or in part. (§ 5.11 ch 101 SLA 1962)

Rule 82. Attorney's Fees.

(a) Allowance to Prevailing Party.

(1) Unless the court, in its discretion, otherwise directs, the following schedule of attorney's fees will be adhered to in fixing such fees for the party recovering any money judgment therein:

ATTORNEY'S FEES IN AVERAGE CASES

	Contested	*Without Trial*	*Non-Contested*
First $2,000	25%	20%	15%
Next $3,000	20%	15%	12.5%
Next $5,000	15%	12.5%	10%
Over $10,000	10%	7.5%	5%

Should no recovery be had, attorney's fees for the prevailing party may be fixed by the court in its discretion in a reasonable amount.

(2) In actions where the money judgment is not an accurate criteria for determining the fee to be allowed to the prevailing side, the court shall award a fee commensurate with the amount and value of legal services rendered.

(3) The allowance of attorney's fees by the court in conformance with the foregoing schedule is not to be construed as fixing the fees between attorney and client.

(4) Attorney's fees upon entry of judgment by default shall be determined by the clerk. In all other matters the court shall determine attorney's fees. Awards not pursuant to the schedule set forth in subparagraph (1) of this Rule shall be made only upon motion.

(b) Allowance in Mental Cases. In proceedings under the Mental Health Act, the attorney appointed to represent the patient shall be allowed and paid a fee of $25.00, unless the judge, in his discretion, orders otherwise. A lay advisor appointed in such proceedings shall be allowed and paid a fee of $10.00, unless the judge, in his discretion, orders otherwise. (Amended by Supreme Court Order 497 effective January 18, 1982)

William Sidney GILBERT, Appellant,

v.

STATE of Alaska and H. A. Boucher, Lieutenant Governor, Appellees.

No 2290.

Supreme Court of Alaska.

Sept. 30, 1974.

Action for declaratory judgment by potential candidate for state senator, seeking declaration that requirement of three-year residency in state and one-year residency in election district for election to legislative office violated the candidate's equal protection rights. The Superior Court, Third Judicial District, Anchorage District, P. J. Kalamarides, J., denied the petition, awarded attorney's fees to the state, and candidate appealed. The Supreme Court, Erwin, J., held that the residency requirement served a compelling state interest and thus did not deny candidate equal protection; but that it was an abuse of discretion to award attorneys' fees against the candidate who had in good faith raised a question of genuine public interest before the courts.

Affirmed in part and reversed in part.

1. Constitutional Law ⇨83(1), 211
Elections ⇨21

Residency requirements for state legislative candidacy of three years in state and one year in election district serve compelling state interests, and thus neither violated potential candidate's rights to equal protection or to freedom of interstate travel, nor did they violate voters' rights to participate in elections. Const. art. 1, § 1; art. 2, § 2; AS 15.25.030; U.S.C.A.Const. Amend. 14.

2. Constitutional Law ⇨209

Where statute challenged as violative of equal protection burdens fundamental or basic right, it can be sustained only upon showing that it promotes compelling governmental interest. U.S.C.A.Const. Amend. 14.

3. Elections ⇨7

Constitutional residency requirements for legislative candidates should be viewed with strict judicial scrutiny, i. e., whether they serve compelling state interest. Const. art. 2, § 2.

4. Costs ⇨172

Award of attorney's fees to state against potential candidate for legislature who in good faith raised issue of constitutionality of residency requirements was abuse of discretion. Rules of Civil Procedure, rule 82.

5. Costs ⇨172

It is not purpose of award of attorney's fees to penalize party for litigating good-faith claim but rather partially to compensate prevailing party where such compensation is justified. Rules of Civil Procedure, rule 82.

6. Costs ⇨172

It is abuse of discretion to award attorney fees against losing party who has in good faith raised question of genuine public interest before courts. Rules of Civil Procedure, rule 82.

John W. Wood, Anchorage, for appellant.

Norman C. Gorsuch, Atty. Gen., Juneau, Timothy G. Middleton, Asst. Atty. Gen., Anchorage, for appellees.

Before RABINOWITZ, C. J., and CONNOR, ERWIN, BOOCHEVER, and FITZGERALD, JJ.

OPINION

ERWIN, Justice.

This appeal involves a challenge to the constitutionality of article II, section 2 of the Alaska Constitution and AS 15.25.030, which collectively conditions eligibility for seeking legislative office upon three years residency in the state and one year in the election district

Appellant is a citizen of the United States and has been a resident of Alaska

We see no viable alternative means of advancing these important interests alleged by the state. Appellant suggests that these interests may be met by imposing some sort of subjective test upon potential legislators. We disagree. To create a subjective test of candidates' knowledge, understanding or character would necessarily place undue power in the hands of those who would implement such a standard. We think it better that a relative few be delayed from realizing their political aspirations for a relatively brief period than that some group of persons pass upon the fitness of all candidates before they are permitted to present themselves to the voters.

Nor can these interests be protected by relying solely upon the electoral process itself. Voters are, in a sense, "consumers" of the product portrayed by the persons they elect to office. In these days of "packaged" media candidates, they often cannot know what is in the package until they have made their selection and observed the utility of the product. In adopting their constitution, the voters of Alaska chose to protect themselves from unknown deficiencies in their candidates by imposing objective standards upon those who would hold legislative office.

We conclude that while objective tests for candidacy unavoidably place a burden upon the privilege of running for political office, the burden is both temporary and slight and is necessary to promote governmental interests which are compelling.

[4] We turn to the question of whether the award of attorneys' fees to the state by the trial court was a proper exercise of discretion by the trial court pursuant to Civil Rule 82. Appellant alleges that the issues litigated here relate to a matter of public interest and contends that awarding fees in this type of controversy will deter citizens from litigating questions of general public concern for fear of incurring the expense of the other party's attorneys' fees.

[5, 6] It is not the purpose of Rule 82 to penalize a party for litigating a good faith claim but rather partially to compensate the prevailing party where such compensation is justified.[33] We have previously intimated that denial of attorneys' fees might be appropriate in a proper case where the public interest is involved.[34] As a matter of sound policy, we hold that it is an abuse of discretion to award attorneys' fees against a losing party who has in good faith raised a question of genuine public interest before the courts. Accordingly, we reverse the award of attorneys' fees to the state in this matter.

Affirmed in part and reversed in part.

Supreme Court affirms public interest exemption

By MARK BAUMGARTNER
Empire Staff Reporter

Alaska's non profit public interest groups can breathe a little easier after the state Supreme Court overturned a Juneau court ruling that the Southeast Alaska Conservation Council must pay attorney fees in a case it lost.

SEACC in 1979 sued the state's Department of Natural Resources, charging the agency broke the law when it signed a contract with the Schnabel Lumber Co. of Haines. SEACC said the contract was illegal because it violated principles of sustained-yield timber management.

Then-Juneau Superior Court Judge Allen T. Compton ruled the contract was valid. He also did something which hadn't been done before; he ordered SEACC, a non-profit public interest group, to partially reimburse Schnabel for his 'orney fees.

SEACC appealed Compton's ruling on the grounds public interest groups are exempt from a state rule requiring losing parties to pay the prevailing party's attorney fees.

The Supreme Court on April 29 affirmed Compton's ruling on the legality of the timber contract. Justice Warren W. Matthews wrote the court's opinion approving the contract. Justice Jay A. Rabinowitz wrote a dissenting opinion, arguing the state used an incorrect definition of sustained yield when it determined an acceptable harvest level.

But the high court also found it was "an abuse of discretion" to award attorney fees against SEACC because the group in good faith raised a question of genuine public interest.

Compton has since been appointed to the Supreme Court. He did not participate in the Supreme Court's hearing of SEACC's appeal.

"We're delighted we didn't have to pay the $25,000," said SEACC executive director Jim Stratton, referring to the amount Compton had awarded Schnabel Lumber Co.

The group found a benefactor to put up a $25,000 bond, he said, payable if SEACC lost the appeal. Its status as a non-profit organization means the group relies on contributors to finance most its day-to-day operations, he said.

$25,000 represents one-third of SEACC's operating budget for this year, he said.

SEACC was represented in the May, 1982, Supreme Court appeal by Stephan Volker, an attorney with the Sierra Club Legal Defense Fund. Volker told the court that taxing a losing public interest group with attorney fees would have a "broad chilling effect on public interest litigation."

The lower court ruling "scared a lot of people, made them cautious," said Eric Smith, director of Trustees for Alaska, an Anchorage-based public interest law firm, in a recent interview.

Smith said he was unaware of a public interest group deciding not to sue because of the ruling. But the precedent makes them think twice, he said.

Justice Allen Compton: His 1979 Superior Court ruling that a non-profit organization must pay attorney fees in a case it lost has been overturned by the Alaska Supreme Court.

"If you define 'chilling effect' as having a psychological influence than I think that's the case," he said.

"Clients always want to know what they're undertaking" when they consider a lawsuit, Smith said. "They want to know if it will cost them anything."

Most of Trustees for Alaska's cases are in federal court, Smith said, and the group interprets federal law as providing a public interest exemption from an assessment of attorney fees in losing cases.

Stratton said Compton's ruling didn't deter SEACC from bringing litigation.

In his ruling, Compton found SEACC acted in good faith in sueing DNR and so he declined to tax SEACC with the state's attorney costs.

He acknowledged the public interest exemption but said Schnabel, as a private intervener in the case, received no benefit from SEACC's action.

In fact, Compton said, Schnabel was harmed by the lawsuit. He ordered SEACC to reimburse Schnabel for part of the company's attorney fees.

That ruling should stand, according to the Supreme Court opinion in the case, unless there was an "abuse of discretion."

The court ruled the award to Schnabel of attorney fees was an abuse of discretion, and therefore reversed the ruling.

In making its finding the Supreme Court reiterated the reason for the public interest exemption is "to encourage plaintiffs to raise issues of public interest by removing the awesome financial burden of such a suit."

The court affirmed its support of the policy behind the public interest exemption to Civil Rule 82 (used to fix attorney fees).

"Since the policy seeks to encourage the vindication of the public interest, we perceive no reason to distinguish between the public or private character of the defendant in a public interest lawsuit," the opinion states.

Here's the crux of the opinion — "It is the interest that the plaintiff seeks to protect and not the public or private character of the defendant that is the touchstone" of the public interest exemption to Rule 82.

The court said every Alaskan would have benefitted from the lawsuit had there been a finding timber was not being harvested according to sustained yield forestry.

Furthermore, the court said, since the timber contract was between the state and a private logger no public entity could have been expected to bring this suit. It took a private group — SEACC — to do it. It's case was neither frivolous nor in bad faith, the court found, and SEACC had no economic incentive for bringing the suit.

In other words, SEACC and other private non-profit groups meeting these tests must not be discouraged by the threat of having to pay attorney fees if it brings a losing case to court.

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM January 20, 1984

SUBJECT: Relationship between HB 445 and Civil Rule 82

TO: Representative Charlie Bussell
Chairman, House Judiciary Committee

FROM: Keith B. Levy KBL
Legislative Counsel

You have requested an opinion on the effect HB 445, "An Act relating to attorney fees," will have on the award of attorney fees in public interest cases in light of the existing Civil Rule 82. Specifically, you have asked whether, under Rule 82, an award of attorney fees will be mandatory in every public interest case in which the plaintiff prevails against a nongovernmental entity, if HB 445 is enacted. For the reasons set out below, it is my opinion that under Rule 82, if HB 445 is enacted, an award of attorney fees will not be required in every case and the trial judge will have the discretion to make this determination within certain limits.

HB 445, by repealing the "public interest exception" to the award of attorney fees, makes Rule 82 applicable in public interest cases. Rule 82(a)(1) clearly makes the award of attorney fees within the discretion of the trial judge. It sets out a schedule of suggested fees for the party recovering a money judgement, but provides that the court may in its discretion ignore the schedule. Rule 82(a)(1) further provides:

> Should no recovery be had, attorney's fees for the prevailing party may be fixed by the court in its discretion in a reasonable amount.

Thus, it is clear from the language of Rule 82(a)(1) that the award of attorney fees, whether there is a money judgement or not, is within the discretion of the trial judge. However, Rule 82(a)(2) seems to provide for certain situations in which the award of attorney fees is not discretionary, but mandatory. It provides:

> In actions where the money judgement is not an accurate criteria [sic] for determining the fee to be allowed to the prevailing side, the court shall award a fee commensurate with the amount and value of legal services rendered. (Emphasis added).

The use of the word "shall" seems to indicate that in cases in which there is no apparent relationship between the money judgement and the attorney's fee, the award of attorney fees is mandatory. A careful reading of the case law on Rule 82 leads me to the conclusion, however, that this would be an erroneous interpretation of the rule. The cases indicate that, subject only to the limitation that the award not be "manifestly unreasonable," attorney fees under rule 82 are not mandatory, but discretionary.

The Alaska Supreme Court has said in a number of cases that the denial of attorney fees altogether under Rule 82 is not necessarily an abuse of discretion. Cooper v. Carlson, 511 P.2d 1305 (Alaska 1973); Larry v. Dupree, 580 P.2d 326 (Alaska 1978). The trial judge has wide discretion in awarding attorney fees and the supreme court will overturn the trial judge's decision only of it is "manifestly unreasonable." Malvo v. J.C. Penney Co., 512 P.2d 575 (Alaska 1973).

Although it is not always clear from these cases whether the Court made its decision under Rule 82(a)(1) or (a)(2), a more recent case indicates that the determination of whether Rule 82(a)(2) comes into consideration at all is within the discretion of the trial judge. In Arctic Slope Native Association v. Paul, 609 P.2d 32 (Alaska 1980), the Supreme Court considered whether or not an award of full attorney fees was appropriate. After citing rule 82(a)(2), the Court said

> In this case the trial judge concluded that the money judgement was not an accurate criterion for establishing the appropriate fee.

Thus, the trial court made its own determination of the attorney fees. The Supreme Court agreed with this assessment by the trial judge, indicating that the determination of whether Rule 82(a)(2) comes into play at all is within the discretion of the trial judge. In other words, the award of attorney fees under Rule 82(a)(2) is not mandatory in the sense that the trial judge has discretion

to determine whether 82(a)(2) applies. Once the trial judge determines that 82(a)(2) applies, some attorney fees must be awarded. But the trial judge has the discretion to ignore 82(a)(2) as long as that decision is not manifestly unreasonable.

In conclusion, HB 445 does not make an award of attorney fees in public interest cases mandatory by making Civil Rule 82 applicable. Although Rule 82(a)(2) does seem to make an award of attorney fees mandatory, the award under Rule 82(a)(1) is discretionary, and the trial judge has the discretion to determine whether to apply Rule 82(a)(1) or (a)(2).

FROM: Russ Josephson
Legislative Counsel

You have asked for a sectional analysis of HB 446. This bill consists of a single section. It adds a new section of law to the motor vehicle statutes to fill a gap in the existing law. Very simply, it requires a person to stop a motor vehicle when pursued by a law enforcement vehicle that is using lights or a siren to indicate that the peace officer would like the pursued driver to stop.

MEMORANDUM

TO: Representative John Liska

FROM: Deb Pomeroy
Administrative Assistant

RE: Stopping for a Police Officer
Research Request 83-199

Linda Edgeworth, of your staff, asked whether or not there is a statute requiring a motorist to stop when flagged down by a police officer. She also asked for information regarding a case in which a defendent was charged with failure to stop for a police officer. The defendant was acquitted because no statute set out this requirement. I spoke with the Gretchen Derr in the Commissioner's Office of the Department of Public Safety, who provided the attached correspondence pertaining to this issue.

The case the defendant won occurred prior to April 28, in Soldotna. A motorist had failed to stop when the police officer turned on the flashing lights and siren, and was subsequently charged with violating 13 AAC 02.140. I spoke with the District Attorney's Office in Kenai and requested the judge's decision as well as any pertinent documents. These will be forwarded to you as soon as we receive them.

The Alaska Adminstrative Code 13 AAC 02.140 (attached) states that "upon the approach of an authorized emergency vehicle...or a police vehicle making use of either a visual or an audible signal, the driver of every vehicle...shall yield the right-of-way by slowing, stopping, changing lanes or pulling to the right-hand edge of the roadway clear of an intersection to await passage of the emergency vehicle" (emphasis added). It appears that 13 AAC 02.140 pertains mostly to emergency situations.

Judge Anderson of Anchorage, who heard the case, ruled that the State had "made a half hearted attempt" in writing the regulation when it defined what a motorist must do when approached by a police vehicle with visual lights in a non-emergency situation. He went on to state that the police officer was attempting to stop a suspected violator when there was no existing emergency, and that the violator was therefore not required to stop.

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - SSHB446

Support with Amendment

January 16, 1984

SSHB446 - "An Act relating to the duty to stop at the direction of a peace officer.

This legislation deals with the public's responsibility to follow the directions of peace officers in emergency situations. Some confusion has existed on this subject on the part of the public due to the inconcise wording of present regulations (13.AAC.02.140). This proposed legislation clarifies the duty of the public without infringing upon their rights.

The wording in Sec. 28.35.184 requires that a person guilty of flight from a police officer is guilty of a class C felony. This is felt to be too severe a penalty and we request that it be amended to a class B misdemeanor. The original wording would result in many individuals having felony records that now only face misdemeanor violations. Additionally, the numerous violations of the section may place an unnecessarily heavy burden upon the Criminal Justice System.

Commissioner William R. Nix
Department of Public Safety
Pouch N
Juneau, AK. 99811

Dear Commissioner Nix,

Request your staff review 13 AAC 02140(a) for possible language changes. As the section is presently interpreted by the local court any one of several possible actions is sufficient to comply with the yield requirement.

If the intent is to require that whenever possible the motorist is to yield to an emergency vehicle by pulling over to the right and stopping, then the other language should possibly be modified or deleted.

If after your review, you determine that this appears to be a local court interpretation, and not a statewide problem or concern, please advise.

Sincerely,

Richard A. Ross
Chief of Police
Kenai Police Dept.

Commissioner Robert Sundberg
Department of Public Safety
Pouch N
Juneau, AK 99811

Dear Commissioner Sundberg:

I am requesting that your staff review 13 AAC02.140 (a) for possible changes. Recently Soldotna had a case ruled on by Judge Anderson from Anchorage. The judge ruled that the State had "made a half hearted attempt" in writing the regulation when it defined what a motorist must do when approached by a police vehicle with visual lights on in a non-emergency situation.

The judge went on to say that in the case of Soldotna where the police officer was attempting to stop a suspected violator there was no existing emergency and the suspected violator was not required to stop. The judge then dismissed the citation that had been issued under the authority of 13 AAC02.140.

I am including in this letter a copy of a similar request made by Chief Ross of the Kenai Police Department. In the case of Kenai our local judge also dismissed a citation because the way the regulation is worded. It seems there is concern from more than one court about this regulation.

I have one other concern about the rules of the road contained in 13 AAC. Presently there is no regulation titled "Excessive Acceleration" or some other similar language. A problem comes up frequently when you have a motorist who spins his tires intentionally under heavy acceleration.

The only possible citation that can be issued in this situation is negligent driving. Our court has consistently ruled that absent other factors such as fishtailing, loss of control, etc. the elements of negligent driving are not satisfied.

It would seem to me that a new regulation could be written to cover this type of driving. This type of regulation would be most helpful in curtailing this sort of driving.

Thank you for your time and consideration.

Sincerely,

Duane D. Udland

Re: 13 AAC02.140 (a)

Dear Chief Ross:

Your letter to Commissioner Nix dated August 25, 1982 has been forwarded to me for reply.

As the above cited regulation is now written, it would appear that any of the required actions now listed in the regulation would suffice to comply with it's requirement. The Uniform Vehicle Code clearly sets out that a motorist must drive to the right-hand edge or curb and stop until an emergency vehicle has passed. Though most of the basic regulation was originally taken from the Uniform Vehicle Code, for some reason 13 AAC02.140 (a) was not strictly followed and perhaps should be changed.

I will forward your suggestion to the Commissioner's committee for regulatory changes for its consideration.

Sincerely yours,

Mr. Joseph D. Balfe
Assistant Attorney General
for Law Enforcement

MEMORANDUM State of Alaska

TO: Robert J. Sundberg
Commissioner
Department of Public Safety

DATE: May 3, 1983

FILE NO:

TELEPHONE NO: 465-4322

FROM: Inspector Frank N. Gorham
Assistant to the Commissioner
Department of Public Safety

SUBJECT: Chief Udland Letter
re: Failure to Stop

As requested, research was done on the requirements, or more, the lack of requirements for a person to stop when signaled to do so by a police officer.

I could find but one area of the State Statutes that requires a person (driver of a vehicle) to obey the signals of an officer. Even at that, it only relates to the condition of directing traffic. See attached AS 28.35.180.

The 13 AAC 2.140 does not directly require a vehicle to stop but makes it an option when an emergency vehicle of any type is approaching. Nor does the companion, 13 AAC 2.195, related to pedestrians.

Also attached is a proposed addition to either the Administrative Code or State Statutes that should serve the purpose. Not being a legal beagle, I am not sure how many holes it has in it.

SUBJECT: Failure to Stop

Please draft a change in our regulations requiring an individual to stop when lawfully directed to do so by a peace officer.

Return the draft to me and I will begin the procedures necessary to change the traffic regulations.

Since this problem could involve situations not involving a vehicle, we should also propose changes in the statutes. That recommendation should be held until the Administration requests proposed changes through legislation.

STATE OF ALASKA

BILL SHEFFIELD, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY

OFFICE OF THE COMMISSIONER

POUCH N
JUNEAU, ALASKA 99811
PHONE: 465-4322

November 4, 1983

Ms. Mary Whitman
Administrative Assistant
Legislative Affairs Agency
Pouch V
Juneau, AK 99811

Dear Ms. Whitman:

This is in reference to your request related to input from this department on HB 446, "An act relating to stopping a motor vehicle at the direction of a peace officer."

I have enclosed some statutes from other states, and the I.A.C.P. model "Uniform Vehicle Code" recommendation on the subject. The statutes sources were from the states of California, Oregon, and Washington. As can be seen, there are a variety of approaches, but all with the same theme.

As for this State, as reflected in a previous internal memorandum of this department, of which you have a copy, there are no requirements for a person, under any circumstances, to stop at the request of, or lawful command of a peace officer except when he is actually regulating or directing traffic (AS 28.35.280). Nor do any administrative code provisions require a person, under any circumstances, to stop as the result of a lawful order of a peace officer (13 AAC 02.140 and 13 AAC 02.195).

The department's desire, and I am sure you would find it the entire law enforcement community's desire, is to develop an all encompassing obedience statute covering a person, vehicle, boat, or aircraft. Whether this can be achieved is another matter.

House Bill 446, as it is now written, meets a portion of law enforcement needs, but may be somewhat vague and broad as it relates to "law enforcement vehicle."

If not being presumptive, and keeping in mind that the author is not trained in the legalized framing of statutes, the following is, at least, a draft revision of HB 446 for

12-L2LH

consideration that would meet the law enforcement needs. The draft is not in proper form.

Sincerely,

ROBERT J. SUNDBERG

ATTEMPTING TO FLEE OR ELUDE POLICE OFFICER
1964

WHEREAS, The International Association of Chiefs of Police advocates and supports adoption of sound traffic regulations, couched in clear and effective terms so as to merit approval by the courts; and

WHEREAS, For this purpose the International Association of Chiefs of Police consistently supports efforts of the National Committee on Uniform Traffic Laws and Ordinances to develop and maintain the Uniform Vehicle Code to the highest degree of perfection as representing the best example of legislation recommended to the various states for adoption by their legislatures; and

WHEREAS, It is in the furtherance of this purpose that the various provisions of the Uniform Vehicle Code be made as legally sound as possible and be amended as and when necessary and advisable in order to correct defects therein which become apparent in practice from time to time; and

WHEREAS, Traffic officers often find themselves confronted with the problem of drivers who refuse to obey police commands to stop, and who flee from such officers, usually at high speed, sometimes extinguishing their lights at night, or otherwise seek to elude the officer; and

WHEREAS, Some states, including Colorado, Delaware, Oregon, Utah and Washington, have recently enacted legislation making such actions a misdemeanor of serious nature, some calling for mandatory revocation of the driver's license of persons convicted under such statutes; and

WHEREAS, Members of the International Association of Chiefs of Police are primarily concerned with such violations and directly affected by such driver actions and conduct, it is appropriate that the International Association of Chiefs of Police take the lead in formulating a standard or model form of law defining the offense of fleeing from or attempting to elude a police officer; and

WHEREAS, It is in the interest of promoting uniform legislation of this kind, and in the interest of more effective police patrol performance, that such legislation be recommended for adoption by all states; and

WHEREAS, The Uniform Vehicle Code is the proper

medium by which such legislation may be so recommended; now, therefore, be it

RESOLVED, That the International Association of Chiefs of Police hereby recommend to the Council of State Governments and the National Committee on Uniform Traffic Laws and Ordinances that the following new section be added to the Uniform Vehicle Code:

> "Fleeing or attempting to elude police officer. (a) Any driver of a motor vehicle who, having been given a visual or audible signal by a police officer directing said driver to bring his motor vehicle to a stop, willfully fails or refuses to obey such direction, increases his speed, extinguishes his lights, or otherwise flees or attempts to elude the officer, shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not less than ($50 - $100 - $200) nor more than ($500), or by imprisonment for not less than (10 - 30 - 60) days nor more than (6) months, or both such fine and imprisonment. The signal given by the police officer may be by hand, voice, emergency light or siren. Provided, the officer giving such signal shall be in uniform, prominently displaying his badge of office and, if driving a vehicle, such vehicle shall be appropriately marked showing it to be an official police vehicle. (b) Upon receiving notice of such conviction the department may forthwith suspend the operator's or chauffeur's license of the person so convicted for a period of not more than (six) months."

whether the person is a problem drinker or drug-dependent person, as defined in ORS 482.477; and

(b) Complete a treatment program or information program designated by the court and paid at the expense of the person convicted. [1955 c.451 §87; 1979 c.744 §43; 1981 c.861 §15; 1981 c.898 §3]

487.545 Use of chemical analysis to show intoxication. (1) At the trial of any civil or criminal action, suit or proceeding arising out of the acts committed by a person driving a motor vehicle while under the influence of intoxicants, if the amount of alcohol in the person's blood at the time alleged is less than .10 percent by weight of alcohol as shown by chemical analysis of the person's breath, blood or urine, it is indirect evidence that may be used with other evidence, if any, to determine whether or not the person was then under the influence of intoxicants.

(2) Not less than .10 percent by weight of alcohol in a person's blood constitutes being under the influence of intoxicating liquor.

(3) Percent by weight of alcohol in the blood shall be based upon grams of alcohol per one hundred cubic centimeters of blood. [1955 c.451 §88; 1977 c.867 §54; 1981 c.898 §4]

487.550 Reckless driving. (1) A person commits the crime of reckless driving if the person recklessly, as defined in ORS 161.085 (9), drives a vehicle upon a highway in a manner that endangers the safety of persons or property.

(2) Reckless driving is a Class A misdemeanor. [1955 c.451 §91; 1981 c.898 §5]

487.555 Fleeing or attempting to elude a police officer. (1) A driver of a motor vehicle commits the crime of fleeing or attempting to elude a police officer if, when given visual or audible signal to bring the vehicle to a stop, he knowingly flees or attempts to elude a pursuing police officer.

(2) The signal given by the police officer may be by hand, voice, emergency light or siren.

(3) As used in this section, "police officer" means a sheriff, municipal policeman or member of the Oregon State Police in uniform, prominently displaying his badge of office or who is operating a vehicle appropriately marked showing it to be an official police vehicle.

(4) Fleeing or attempting to elude a police officer is a Class A misdemeanor. [1955 c.451 §91]

487.560 Driving while suspended or revoked or beyond license restriction. (1) A person commits the crime of driving while suspended or revoked if the person drives a motor vehicle upon a highway during a period when the person's license or permit to drive a motor vehicle or the person's right to apply for a license to drive a motor vehicle in this state has been suspended or revoked by a court or by the division or if the person drives a motor vehicle outside the restrictions of a license issued under ORS 482.475 or 482.477.

(2) In a prosecution under subsection (1) of this section, it is an affirmative defense that:

(a) An injury or immediate threat of injury to human or animal life and the exigency of the circumstances made it necessary for the defendant to drive a motor vehicle at the time and place in question, or

(b) The defendant had not received notice of the defendant's suspension or revocation as required by ORS 482.570 or in the manner provided in paragraph (c) of subsection (3) of this section.

(3) The affirmative defense under paragraph (b) of subsection (2) of this section shall not be available to the defendant if:

(a) The defendant refused to sign a receipt for the certified mail containing the notice; or

(b) The notice could not be delivered to the defendant because the defendant had not notified the division of the defendant's address or a change in the defendant's residence as required by ORS 482.290 (3); or

(c) At a previous court appearance, the defendant had been informed by a trial judge that the judge was ordering a suspension or revocation of the defendant's license, permit or right to apply; or

(d) The defendant had actual knowledge of the suspension or revocation by any means prior to the time the defendant was stopped on the current charge.

(4) Any of the evidence specified in subsection (3) of this section may be offered in the prosecution's case in chief.

(5) Except as provided in subsection (6) of this section, driving while suspended or revoked is a Class A misdemeanor.

(6) Driving while suspended or revoked is a Class C felony if the suspension or revoca-

tion was [illegible] son is an [illegible] 484.730 or [illegible] lowing offe

ORS 488.011 to 488.180 and 488.990. [1959 c.696 §26; 1961 c.185 §1]

488.020 Regulations establishing minimum specifications for rented boats; inspection; cancellation of certificate of boats not meeting specifications. (1) The board shall provide by regulations minimum specifications of design, construction, material and condition of boats rented or chartered to the public. The regulations shall be made in accordance with ORS 183.310 to 183.550.

(2) Designated representatives of the board may annually, each spring inspect all rental boats as to material condition and seaworthiness. Any approval sticker or decal shall be placed in clear view of the operator on all boats which equal or exceed the minimum specifications provided by the board.

(3) After a hearing upon 10 days' notice to the owner of the boat, the board may cancel or revoke the certificate of number for any boat rented or chartered to the public if it does not equal or exceed the minimum specifications provided by the board. [1959 c.696 §27; 1975 c.564 §9; 1979 c.284 §41]

488.027 Peace officers to enforce chapter. (1) The sheriff of each county and all other peace officers shall be responsible for the enforcement of this chapter and the regulations made by the board pursuant thereto. In the exercise of this responsibility, a peace officer may stop any boat and direct it to a suitable pier or anchorage for boarding.

(2) No person, while operating a boat on any waters of this state, shall knowingly flee or attempt to elude any law enforcement officer after having received a signal from a law enforcement officer to bring the boat to a stop. [1959 c.696 §28; 1965 c.581 §2; 1967 c.170 §1; 1985 c.620 §17; 1987 c.564 §10]

488.028 Contrary local laws prohibited. No political subdivision of this state may enact or enforce any law contrary to the provisions of this chapter. [1959 c.696 §41]

488.030 [1959 c.696 §29; repealed by 1977 c.867 §20]

488.031 Personal flotation devices. (1) All boats shall carry at least one United States Coast Guard approved personal flotation device in good and serviceable condition for each person on board. Each device shall be of an appropriate size for the person for whom it is intended and shall be readily accessible whenever the boat is in use. As used in this subsection, a personal flotation device is not "readily accessible" if it is stowed in a locked compartment or locker or is otherwise not immediately, physically available to persons on board the boat in case of an emergency.

(2) The board by regulation will classify types of devices and classify which types are approved for various classes of vessels. The regulations will be consistent with, but shall not exceed those regulations promulgated by the United States Coast Guard. [1967 c.467 §1; 1969 c.696 §30; 1967 c.151 §1; 1971 c.520 §1; 1975 c.564 §1; 1977 c.77 §1]

488.040 [1959 c.696 §30; repealed by 1977 c.867 §20]

488.041 Lights. (1) Except as provided by the regulations adopted by subsection (3) of this section, every boat shall carry and show the following lights when underway between sunset and sunrise:

(a) Manually propelled boats, a lantern capable of showing a white light which shall be temporarily displayed in sufficient time to prevent collision.

(b) (A) Motorboats less than 26 feet in length, a white light aft showing all around, visible for at least two miles, and a combination 20 point light in the forepart of the boat, lower than the white light aft, showing green to starboard and red to port, visible for at least one mile.

(B) Motorboats 26 feet or longer, a white light aft showing all around, visible for at least two miles, two separate 10 point sidelights visible for at least one mile and a 20 point white light in the forepart of the boat, lower than the white light aft, visible for at least two miles.

(c) Boats propelled by sail, a white 12 point light aft, visible for at least two miles and two separate 10 point sidelights visible for at least one mile.

(2) As used in this section, "visible" means visible on a dark night with clear atmosphere.

(3) On all waters of the state, every boat shall carry and exhibit the lights required by inland rules for preventing collisions, promulgated by the United States Coast Guard, May 1, 1959 (Part 80, Title 33, Code of Federal Regulations of the United States of America, as amended). [1967 c.467 §1; 1971 c.686 §§10a, 10b; 1987 c.154 §1]

488.050 [1959 c.696 §31; repealed by 1977 c.867 §20]

488.051 [1967 c.467 §3; repealed by 1971 c.686 §12]

488.020 [Repealed by 1957 c.467 §50]

488.021 Application of ORS 488.011 to 488.180 and 488.990. (1) Except as provided in subsection (2) of this section, ORS 488.011 to 488.180 and 488.990 apply to all boats operated on the waters of this state, except when inconsistent with any applicable laws or regulations of an agency of the United States or when such laws or regulations otherwise prevail.

(2) ORS 488.011 to 488.180 and 488.990 do not apply to the following boats, except as herein or provided in this section:

(a) A boat that has a valid document issued by the Bureau of Customs of the United States or by a federal agency that succeeds to the duties of issuing marine documents.

(b) Foreign boats operated temporarily in the waters of this state.

(c) A boat owned and operated by the United States or by an entity of the United States.

(d) A ship's lifeboat used solely for lifesaving purposes.

(e) A boat belonging to a class of boats which is exempted from the provisions of ORS 488.715 to 488.740 and 488.745 to 488.760 by the board as provided in ORS 488.715 (4).

(3) Subsection (2) of this section does not exempt the following boats:

(a) Vessels of passenger vessels of less than [illegible] gross tons.

(b) Commercial vessels that are not required to be inspected under federal law or

(c) [illegible] owned recreational vessels [illegible] 1981 c.421 §84; 1983 c.102 §2]

488.022 Operating boat in violation of chapter prohibited. No person shall operate a boat in violation of any provision of this chapter. [1959 c.656 §2]

488.024 Operating improperly equipped boat prohibited. No person shall operate or give permission for another person to operate a boat which is not equipped as required by ORS 488.011 to 488.180 and 488.990 [illegible]

488.025 Operator of boat livery to provide properly equipped boats. No operator of a boat livery shall permit any boat be hired to depart from the boat livery premises unless the boat is equipped as provided under ORS 488.011 to 488.180 and 488.990. [1959 c.656 §10; c.185 §1]

488.026 Regulations establishing minimum specifications for rented boats; inspection; cancellation of certificate of boats not meeting specifications. (1) The board shall provide by regulations minimum specifications of design, construction, material and condition of boats rented or chartered to the public. The regulations shall be made in accordance with ORS 183.310 to 183.550.

(2) Designated representatives of the board may annually, each spring inspect all rental boats as to material condition and seaworthiness. Any approval sticker or decal shall be placed in clear view of the operator on all boats which equal or exceed the minimum specifications provided by the board.

(3) After a hearing upon 10 days' notice to the owner of the boat, the board may cancel or revoke the certificate of number for any boat rented or chartered to the public if it does not equal or exceed the minimum specifications provided by the board. [1959 c.656 §37; 1973 c.564 §9; 1979 c.87 §21]

488.027 Peace officers to enforce chapter. (1) The sheriff of each county and all other peace officers shall be responsible for the enforcement of this chapter and any regulations made by the board pursuant thereto. In the exercise of this responsibility, a peace officer may stop any boat and direct it to a suitable pier or anchorage for boarding.

(2) No person, while operating a boat on any waters of this state, shall knowingly flee or attempt to elude any law enforcement officer after having received a signal from a law enforcement officer to bring the boat to a stop. [1959 c.656 §39; 1965 c.501 §2; 1967 c.156 §2; 1967 c.501 §17; 1973 c.564 §10]

488.028 Contrary local laws prohibited. No political subdivision of this state may enact or enforce any law contrary to the provisions of this chapter. [1959 c.656 §41]

488.030 [Repealed by 1957 c.467 §50]

488.031 Personal flotation devices. (1) All boats shall carry at least one United States Coast Guard approved personal flotation device in good and serviceable condition for each person on board. Each device shall be of an appropriate size for the person for whom it is intended and shall be readily accessible whenever the boat is in use. As used in this subsection, a personal flotation device is not

CHAPTER 46.61—RULES OF THE ROAD

Abandoned junk motor vehicles: RCWA 46.52.145-46.52.160.
18 Am Jur Trials p 443 (unwitnessed automobile accident cases).
Ops Atty Gen 1972 No. 3 (application of provisions of this chapter to United States Forest Service roads).
4 ALR Fed 6 (Federal Tort Claims Act: Automobile negligence cases).

OBEDIENCE TO AND EFFECT OF TRAFFIC LAWS

46.61.005 Provisions of chapter refer to vehicles upon the highways —Exceptions

Actions of an individual in driving an unlicensed pickup rapidly in circles in a field owned by his parents while under the influence did not fall within purview of RCWA 46.61.506 prohibiting driving while intoxicated in light of fact that it would have been an unreasonable exercise of police power to extend prohibition to defendant's conduct, defendant was posing no threat to public, vehicle was unlicensed and defendant was not on or even near a public road, land on which he was driving was privately owned, and public had no right to be there nor was public expected to be on the property. State v Day (1981) 96 Wn 2d 646, 638 P2d 546.

46.61.010 Required obedience to traffic laws—Penalties

Amended by Laws 2nd Ex Sess 1975-76 ch 95 § 1, effective March 13, 1976, and repealed by Laws 1st Ex Sess 1979 ch 136 § 109, effective January 1, 1981.
Reviser's note: RCWA 46.61.010 was repealed by 1979 ex.s. c 136 § 109, effective July 1, 1980; the effective date of 1979 ex.s. c 136 was delayed until January 1, 1981, by 1980 c 128 § 9. For later enactment, see RCWA 46.63.020.

Ops Atty Gen 1976 No. 19 (traffic offenses as crimes; commitment for contempt for failure to comply with order to pay costs).
Ops Atty Gen 1979 No. 1 (although the privilege from arrest in Article II, § 16 of the Washington constitution extends beyond the term of a legislative session, it relates to the possibility of civil arrest only and is not a privilege from arrest for the commission of a crime; therefore, Article II, § 16 does not preclude the arrest of a member of the Washington state legislature for the commission of a traffic offense within the purview of RCWA 46.61.010).

Sheriff who observed defendant's automobile following another vehicle too closely, defendant's suspicious movements in the automobile after he became aware of sheriff's presence, defendant's intoxicated condition, and out-of-date temporary license possessed by defendant, was justified in arresting defendant for misdemeanor offenses relating to defendant's conduct. United State v McCambridge (1977) 551 F2d 865.

After having stopped defendant's automobile and arrested defendant for various misdemeanor offenses relating to defendant's operation of the automobile, sheriff was entitled to enter and secure the automobile, which, left by itself on the highway, would have been subject to vandalism and might have threatened public safety and convenience. United States v McCambridge (1977) 551 F2d 865.

46.61.015 Obedience to police officers, flagmen, or fire fighters

No person shall willfully fail or refuse to comply with any lawful order or direction of any duly authorized flagman or any police officer or fire fighter

invested by law with authority to direct, control, or regulate traffic. [Amended by Laws 1975 ch 62 § 17.]

Severability—1975 c 62: See note following RCW 36.75.010.

Washington Court Rules: Bail in traffic offense cases—Mandatory appearance—JCrR 2.09.

In ordinary circumstances, responsibility of police in directing traffic is to maintain due regard for safety of all who would be affected by discharge of such responsibility. Anthony v C. D. Amende Co. (1982) 31 Wn App 21, 639 P 2d 231.

In action for personal injuries arising from car accident which allegedly was caused by negligence of employees of department of transportation in directing traffic on wrong side of street around another accident, trial court erred in imposing upon state burden to exercise higher degree of care than ordinary care. Anthony v C. D. Amende Co., (1982) 31 Wn App 21, 639 P2d 231.

46.61.020 Refusal to give information to or cooperate with officer

Washington Court Rules: Bail in traffic offense cases—Mandatory appearance—JCrR 2.09.

46.61.021 Duty to obey law enforcement officer—Authority of officer

(1) Any person requested or signaled to stop by a law enforcement officer for a traffic infraction has a duty to stop.

(2) Whenever any person is stopped for a traffic infraction, the officer may detain that person for a reasonable period of time necessary to identify the person, check the status of the person's license and the vehicle's registration, and complete and issue a notice of traffic infraction.

(3) Any person requested to identify himself to a law enforcement officer pursuant to an investigation of a traffic infraction has a duty to identify himself, give his current address, and sign an acknowledgement of receipt of the notice of infraction.

[Added by Laws 1st Ex Sess 1979 ch 136 § 4, effective January 1, 1981.]

Effective date—Severability—1979 1st ex.s. c 136: See notes following RCWA 46.63.010.

CJS Arrest §§ 38, 40.

Key Number Digests: Arrest ⇨63.5(6).

46.61.022 Failure to obey officer--Penalty

Any person who wilfully fails to stop when requested or signaled to do so by a person reasonably identifiable as a law enforcement officer or to comply with RCW 46.61.021(3), is guilty of a misdemeanor.

[Added by Laws 1st Ex Sess 1979 ch 136 § 5, effective January 1, 1981.]

Effective date—Severability—1979 1st ex.s. c 136: See notes following RCWA 46.63.010.

Washington Court Rules: Bail in traffic offense cases—Mandatory appearance—JCrR 2.09.

CJS Motor Vehicles §§ 606 et seq.

Key Number Digests: Automobiles ⇨335.

46.61.024 Attempting to elude pursuing police vehicle

Any driver of a motor vehicle who wilfully fails or refuses to immediately bring his vehicle to a stop and who drives his vehicle in a manner indicating a wanton or wilful disregard for the lives or property of others while attempting to elude a pursuing police vehicle, after being given a visual or audible signal to bring the vehicle to a stop, shall be guilty of a class C felony.

The signal given by the police officer may be by hand, voice, emergency light, or siren. The officer giving such a signal shall be in uniform and his vehicle shall be appropriately marked showing it to be an official police vehicle.

[Added by Laws Ex Sess 1979 ch 75 § 1; Amended by Laws 1st Ex Sess 1982 ch 47 § 25.]

Severability—1982 1st ex.s. c 47: See note following RCWA 9.41.025.

CJS Motor Vehicles §§ 606 et seq.

Key Number Digests: Automobiles ⊂⊃335.

Offense of felony flight was decriminalized from January 1, 1981 until April 16, 1981. State v Taylor (1982) 97 Wn 2d 724, 649 P2d 633.

No crime is committed under RCWA 46.61.024 if one being pursued by a police vehicle merely fails to immediately stop his vehicle, since to violate the statute one must also engage in conduct that indicates wanton and wilful disregard for life and property of others. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

Police power may lawfully extend to prohibiting flight from unlawful detention where such flight indicates wanton and wilful disregard for life and property of others. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

Constitutional right to be free from unreasonable searches and seizures does not create a constitutional right to react unreasonably to illegal detention. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

Although RCWA 46.61.024, proscribing attempt to elude pursuing police vehicle, is directed at unreasonable resistance to both legal and illegal detentions, it is not for such reason overbroad. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

RCWA 46.61.024, proscribing attempt to elude pursuing police vehicle, provides fair notice of conduct that is prohibited and is drafted so as to avoid punishment of constitutionally protected behavior. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

While defendant, charged with attempting to elude pursuing police vehicle, argued that the statute in question is vague and overbroad because it does not require knowledge that the pursuing vehicle is a police vehicle, the statute does require that defendant wilfully fail and refuse to stop his vehicle while attempting to elude a pursuing police vehicle, and wilfulness in this context is identical with knowledge. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

RCWA 46.61.024, proscribing attempt to elude pursuing police vehicle, was not unconstitutionally vague or overbroad by reason of the fact that it does not require pursuing officer to have probable cause to stop vehicle. State v Mather (1981) 28 Wn App 700, 626 P2d 44.

Respondents were not denied due process on ground that they did not have proper notice of proscribed conduct because a person reading one chapter would reasonably conclude that "eluding" had been decriminalized and would not be referred to another chapter where "eluding" was listed as a felony exception to RCWA 46.63.020 decriminalizing traffic offenses. State v Dalnard (1982) 31 Wn App 828, 644 P2d 1222.

RCWA 46.61.024, governing eluding of a pursuing police vehicle, continues to be an excluded felony exception to RCWA 46.63.020, decriminalizing traffic offenses. State v Dalnard (1982) 31 Wn App 828, 644 P2d 1222.

Constitutional prohibition against being twice put in jeopardy precluded multiple punishment of defendant who was convicted of both reckless driving and reckless endangerment following high speed police chase, because the state necessarily had to prove reckless driving to prove reckless endangerment. State v Potter (1982) 31 Wn App 883, 645 P2d 60.

Trial court, in prosecution for reckless driving and reckless endangerment involving incident in which police gave chase to defendant's car, properly permitted police officer to testify that 22 months earlier defendant had been in-

§ 2600. Members of Reciprocity Commission

The Reciprocity Commission is composed of the Lieutenant Governor, the Director of Motor Vehicles, the Director of Transportation, the State Controller, and the Commissioner of the California Highway Patrol.

Amended Stats 1974 ch 345 § 155.

Amendments:

1974 Amendment: Substituted "Transportation" for "Public Works".

§ 2800 *and following sections—general references:*

Cal Jur 3d Schools § 330.

§ 2800. Obedience to Traffic Officers

It is unlawful to willfully fail or refuse to comply with any lawful order, signal, or direction of any peace officer, as defined in Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code, when that peace officer is in uniform and is performing duties under any of the provisions of this code, or to refuse to submit to any lawful inspection under this code.

Amended Stats 1981 ch 644 § 1.

Amendments:

1981 Amendment: Substituted "peace officer, as defined in Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code, when that peace officer is in uniform and is performing duties under any of the provisions of this code," for "traffic officer".

Optional appearance before a magistrate by anyone arrested for specified offenses: § 40303.

Cal Jur 3d Automobiles § 195, Criminal Law §§ 3197, 3206.

A passenger in a vehicle stopped by officers who suspected the driver to be under the influence of alcohol was guilty of violation of Veh. Code, § 2800, where he failed to remain in the vehicle as requested by the police, prevented one of the officers from "administering the walk-the-line test" to the driver, and refused to move back to the vehicle so that the investigation of the driver could continue. Within the meaning of the language in Veh. Code, § 2800 that it is unlawful to wilfully fail or refuse to comply with any lawful order, signal, or direction of any traffic officer, an order the disobedience of which is illegal under the statute includes a lawful order, wilfully disregarded or disobeyed, that is relevant to and reasonably necessary in the performance by a traffic officer of the duties imposed on him under Veh. Code, § 625, respecting the enforcement of the rules of the road. People v Ritter (1981) 115 CA3d Supp 1, 170 Cal Rptr 901.

In a prosecution of defendant, on the basis of the same misconduct, for violation of Pen. Code, § 148, specifying the offense of wilfully resisting, delaying, or obstructing a public officer in the discharge of any duty of his office, and for violation of Veh. Code, § 2800, for disobedience of a lawful order of an officer issued in aid of his performance of duties involving enforcement of the rules of the road (Veh. Code, § 625), acquittal of the charge of violation of Pen. Code, § 148, did not require a finding of not guilty on the charge of violation of Veh. Code, § 2800, where defendant had refused an officer's request to stay in a car in which he was a passenger, stopped because the police suspected the driver was intoxicated. The request had been made to enable investigation of the driver without defendant's interference. Although violation of Veh. Code, § 2800, is a lesser offense than violation of Pen. Code, § 148, a Veh. Code, § 2800, offense is not a necessarily lesser included offense within the offense defined in Pen. Code, § 148, since it is possible to violate Pen. Code, § 148, without violating Veh. Code, § 2800. As to offenses for disobedience of an officer's order, many types of offenses can occur when an officer is discharging a duty having nothing to do with a traffic offense. People v Ritter (1981) 115 CA3d Supp 1, 170 Cal Rptr 901.

§ 2800.1. Flight from peace officer

Any person who, while operating a motor vehicle and with the intent to evade, willfully flees or otherwise attempts to elude a pursuing peace officer's motor vehicle, is guilty of a misdemeanor if all of the following conditions exist:

(a) The peace officer's motor vehicle is exhibiting at least one lighted red lamp visible from the front and the person either sees or reasonably should have seen the lamp.

(b) The peace officer's motor vehicle is sounding a siren as may be reasonably necessary.

(c) The peace officer's motor vehicle is distinctively marked.

(d) The peace officer's motor vehicle is operated by a peace officer, as defined in Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code, and that peace officer is wearing a distinctive uniform.

Added Stats 1982 ch 947 § 2.

Former Section: Former § 2800.1, similar to the present section, was added by Stats 1977 ch 1104 § 1, amended by Stats 1978 ch 504 § 1, Stats 1981 ch 600 § 2, and repealed by Stats 1982 ch 947 § 1.

Flight causing bodily injury or death: § 2800.2.

Review of Selected 1977 California Legislation, 9 Pacific LJ 434.

Review of Selected 1978 California Legislation, 10 Pacific LJ 439.

In an action by a policeman against a motorist for injuries incurred while plaintiff was in pursuit of defendant for speeding, defendant's alleged violation of various statutory provisions did not preclude enforcement of the fireman's rule prohibiting recovery by a policeman for injuries sustained in the course of his duty. While Veh. Code, § 2800.1, makes it a misdemeanor willfully to disregard an officer's siren and red light and to attempt to flee or attempt to elude pursuit, and Pen. Code, § 148, proscribes willful resistance, delay or obstruction of a police officer, and Pen. Code, § 834a, forbids using force or a weapon to resist arrest, none of the statutory provisions were specifically designed to protect persons in plaintiff's class. Hubbard v Boelt (1980) 28 C3d 480, 169 Cal Rptr 706, 620 P2d 156.

In a prosecution of defendant for attempt to evade a pursuing peace officer (Veh. Code, § 2800.1), the trial court correctly instructed the jury that defendant's state of intoxication was relevant in determining whether he had the specific intent necessary to convict him of an attempt to evade a pursuing peace officer. People v Finney (1980) 110 CA3d 705, 168 Cal Rptr 80.

§ 2800.2. Flight from peace officer causing death or bodily injury

Whenever willful flight or attempt to elude a pursuing peace officer in violation of Section 2800.1 proximately causes death or bodily injury to any person, the person driving the vehicle, upon conviction, shall be punished by imprisonment in the state prison, by imprisonment in the county jail for not less than 30 days nor more than six months, or by a fine of not less than one hundred seventy dollars ($170) nor more than five hundred dollars ($500), or by both that fine and imprisonment.

Added Stats 1982 ch 947 § 3.

§ 2801. Obedience to Firemen

Cal Jur 3d Automobiles § 14, Criminal Law §§ 3197, 3206.

§ 2802. Load Inspection

(a) Any traffic officer having reason to believe that a vehicle is not safely loaded or that the height, width, length, or weight of a vehicle and load is unlawful may require the driver to stop and submit to an inspection, measurement, or weighing of the vehicle. The weighing may be done either by means of portable or stationary scales and the officer may require that the vehicle be driven to the nearest scale facility, in the event the scales are within five miles.

(b) Selected inspection facilities and platform scales operated by the Department of the California Highway Patrol may, at the discretion of the commissioner, be open for extended hours, up to and

Fiscal Note
Analysis
HB 447

February 3, 1984

Although not quantifiable at this time, this bill has the potential for causing a significant fiscal impact on the Department of Law, the Public Defender and the Court System. A problem will arise as the criminal defense bar, which now disqualifies some judges 30% to 40% of the time, and some even more, begins to seek disqualification for cause. This latter form of disqualification will be the only course left to the bar, to have an action heard before a judge they believe will be more favorable for their case, if the statutory right of peremptory disqualification, granted by AS 22.20.022 is repealed. As a result, a substantial motion practice will develop that could require a significant amount of prosecutor time. Additionally, enactment of this bill will also result in numerous appeals to the State Supreme Court questioning whether or not the repeal of AS 22.20.022 requires a two-thirds majority vote of the legislature because of the bill's effect of repealing Criminal Rule 25.

Without any prior experience to guide us, the department is hesitant to speculate on the actual cost that this bill might cause. The department does believe that this bill will have the effect of hampering its overall ability to prosecute criminal offenses, by diverting already diminished resources from more critical matters currently handled such as violent crimes, sexual assault, child abuse and DWI. Any cost estimate at this time would be speculative. However, if just 5% of our available district attorney time were lost to unnecessary motion practice, at a weighted cost of $120,000 per attorney, including support costs, the cost would be about $360,000. This is a very conservative figure and the actual cost may be substantially greater.

RE: Peremption of Judges
Research Request 84-026

Jim Wood of your staff requested information on the peremption of judges in Judicial District 3. He specifically asked for a breakdown of total peremptions by judge according to criminal and civil cases. The requested information follows:

District 3 Peremptions by Judge
Calendar Year 1983

District Court Judges

Judge	Location	Criminal Case	Civil Case
Hornaday	Homer	234	1
Bosshard	Valdez	1	0
Anderson	Anchorage	9	2
Andrews	Anchorage	11	0
Finn	Anchorage	8	1
Fuld	Anchorage	12	1
Mason	Anchorage	4	1
Tucker	Anchorage	121	5
Subtotal--District Court		400	11

Superior Court Judges

Judge	Location	Criminal Case	Civil Case
Cranston	Kenai	0	20
Madsen	Kodiak	19	9
Cutler	Palmer	0	18
Buckalew	Anchorage	3	14
Carlson	Anchorage	22	133
Johnstone	Anchorage	0	79
Moody	Anchorage	46	13
Moore	Anchorage	0	3
Hanson	Anchorage	3	44
Ripley	Anchorage	34	3
Rowland	Anchorage	0	12
Serdahley	Anchorage	0	7
Shortell	Anchorage	0	32
Soutor	Anchorage	1	27
Subtotals--Superior Court		128	289
TOTAL--District & Superior Courts*		528	300

*These figures indicate the total peremptions reported to the Administrative Director's Office of the Alaska Court System. The totals also include 16 recusals, cases in which a judge disqualifies himself or herself because of interest or prejudice.

RE: Peremption of Judges
Research Request 84-003

To respond to your request for information concerning the incidence and cost of the peremption of judges in Alaska for 1983, we contacted the administration of the Alaska Court System. However, because we found that no central records are kept on peremption rates or costs, we contacted the presiding judges and court administrators in each of Alaska's four judicial districts. Most area court administrators in the individual judicial districts were able to provide us with accurate estimates of the total peremptions for 1983; however, District 2 did not have any records of peremptions and therefore was only able to supply an educated guess.

Review of Peremption Provisions in Alaska

Currently, there are two means by which a party may perempt a judge without proving cause in district and superior courts. First, under Alaska Statute 22.20.022, if a party or a party's attorney files an affidavit alleging under oath that a fair and impartial trial cannot be obtained under the assigned judge, the presiding district court judge, without requiring proof, must assign the case to another judge in that district. If another judge in the appropriate court is not available, then the chief justice of the supreme court will assign a judge to the case. No more than one affidavit each may be filed by the prosecution or defense.

Second, under Alaska Rules of Court, Criminal Rule 25 and Civil Rule 42, both the prosecution and defense are entitled as a matter of right to one change of judge in actions pending in the district and superior courts. This provision applies in both civil and criminal cases. A person wishing to exercise his or her right is required to file a Notice of Change of Judge; however, the party is not required to specify the grounds for changing. A Notice of Change of Judge must be filed before the commencement of the trial and within five days after

notice that the case has been assigned to a specific judge (see attachment A for copies of the statute and specific Rules of Court). The intent of House Bill 447, as you described it, is to reduce the number of peremptions without cause by repealing AS 22.20.022. The impact this legislation would have on the incidence of peremptions is difficult to predict. However, according to attorney Don Bauermeister of the Alaska Court System, people could still perempt an assigned judge without proving cause by filing a Notice of Change of Judge under Rules 25 and 42 of the Alaska Rules of Court. Consequently, to eliminate all provisions for peremption without cause, it would be necessary to repeal AS 22.20.022, as well as rescind Rules 25 and 42 of the Alaska Rules of Court. Because Alaska Rules of Court are promulgated by the Alaska Supreme Court, rescinding the court rules would require a two-thirds vote of the members in both the Senate and the House, under the State Constitution, Article IV, Section 15 (see attachment B).

Number of Peremptions

As indicated earlier in this memorandum, Alaska is divided into four judicial districts. District 1 includes judges in Ketchikan, Juneau, Sitka, Wrangell and Petersburg. District 2 includes judges in Nome, Bethel, Barrow and Kotzebue. The superior and district court judges in District 3 are located in Anchorage, Kodiak, Palmer, Kenai, Homer and Valdez. In District 4, the superior and district courts are all located in Fairbanks; however, the Fairbanks judges also cover peremptions in Bethel.

In 1983, there were a total of 1,770 peremptions in Alaska district and superior courts. This total does not include recusals which accounted for an additional 188 changes in case assignments. Recusals refer to instances in which a judge disqualifies himself or herself from hearing a lawsuit because of interest or prejudice. In District 1, 398 peremptions occurred, 331 in District Court and 67 in Superior Court. In District 2, area court administrator Mike Hall estimated that judges were perempted approximately 44 times; however, he was not able to provide a breakdown of the total for superior and district courts. Superior and district judges in District 3 accounted for a total of 937 peremptions, 407 in district court and 530 in superior court. Finally, in District 4, judges were perempted 391 times, 250 in district court and 141 in superior court. This information is also presented in Table 1.

For purposes of comparing the number of cases perempted to the number of total cases, we collected the number of nontraffic case filings from each district. We did not include the traffic filings because they are comprised mainly of traffic tickets, which rarely involve

peremptions. The total filings for fiscal year 1983 in all four judicial districts is 59,854 cases. Therefore, peremptions were involved in approximately three percent of all cases in Alaska in 1983.*

Prepared by House Research Agency, January 1984.

Peremptions are not distributed evenly among districts or among judges within each district. For example, District 1 has five superior court judges and two district court judges; however, in 1983, Judge Williams, a district court judge in Juneau, accounted for 320 of the total 398 peremptions in District 1. Furthermore, six judges accounted for 61 percent of all the peremptions statewide, or a total of 1,086 of the 1,770 peremptions in 1983. Those judges, their locations and number of peremptions are as follows:

---

*Total case filings were recorded on a fiscal year basis, whereas the number and costs of peremptions and recusals were reported on a calendar-year basis. However, we believe the information from the calendar-year roughly parallels that of the fiscal year.

District 1:	Judge Williams, Juneau	320
District 3:	Judge Hornaday, Homer	235
	Judge Carlson, Anchorage	155
	Judge Tucker, Anchorage	126
		516
District 4:	Judge Cline, Fairbanks	150
	Judge Connelly, Fairbanks	100

According to several of the judges we contacted, peremption rates may vary greatly from year to year. For example, Judge Cook of the superior court in Bethel contended that the response of an individual judge to particular kinds of cases has a lot to do with the incidence of peremptions. Consequently, it is not possible to say that the number of peremptions in 1983 will be matched again in 1984. In addition, because of the lack of available data on peremption rates, we are not able to determine if the rate for 1983 was representative of the rates in previous years.

Cost of Peremptions

Information on the cost of peremptions in 1983 was extremely difficult to find. First, little information is collected on the cost of travel and per diem for peremptions. Second, many of the costs of peremption, such as lost efficiency, calendaring and other administrative problems are difficult to quantify. In an attempt to provide you with an estimate of the costs of peremptions in 1983, we contacted the area court administrators in each district, and Mr. Robert Fisher, Fiscal Officer for the Alaska Court System.

Chris Carlisle, area court administrator for District 1, had fairly in-depth records on costs of travel and per diem for Judge Gucker in 1983. Judge Gucker is the District Court Judge in Ketchikan; however, he routinely sits in the Juneau District Court one week every month because of the high number of peremptions incurred by Judge Williams of Juneau. As indicated earlier, Judge Williams was perempted 320 times in 1983. In 1983, the costs of per diem for the days Judge Gucker presided in the Juneau District Court amounted to $6,379. This amount also included the cost of transportation while in Juneau. In addition, the court spent $2,417 on his travel to and from Juneau. In 1983, the total costs of travel and per diem for Judge Gucker to cover Judge Williams' peremptions amounted to $8,796.

Al Szal, area court administrator for District 3, estimated the costs of Judge Hornaday's peremptions in the Homer District Court as approximately $10,000 per year. This figure includes travel and per diem for both the judge who travels from Anchorage to replace Judge Hornaday, and in some instances for Judge Hornaday to travel to Anchorage

to cover his replacement's cases. Judge Horneday's peremptions usually result in a judge traveling from Anchorage one week out of each month of the year. Mr. Szal estimated that hearing a case in Homer usually involves a three to four-day stay for the substitute judge. Mr. Szal cautioned that the actual costs of peremptions for Judge Hornaday could be more or less than $10,000 depending on the distances traveled by the replacement judges as well as on their length of stay.

Peremptions are usually more costly in rural locations such as Bethel. Mac Gibson, area court administrator for District 4 which covers peremptions in Bethel, did not have a record of money spent on perempted cases in Bethel. However, he was able to estimate the costs of covering the 20 cases perempted in Bethel in 1983. According to Mr. Gibson, a round trip ticket from Fairbanks to Bethel costs $436. However, because of the flight schedule, a judge traveling to Bethel must usually overnight in Anchorage, and receives a per diem of $85 to cover that expense. While in Bethel, the judge pays $100 per night for a hotel and receives $40 a day for meals. The average length of stay in Bethel to hear a case is three days. The judge is then able to fly directly back to Fairbanks on the evening of the third day.

Given those figures, Mr. Gibson calculated that it costs approximately $841 per trip for a Fairbanks judge to preside over cases perempted in Bethel. In some instances this figure is doubled because the Fairbanks judge is required to bring an in-court clerk along. However, to calculate the total costs of covering perempted cases in Bethel for 1983, Mr. Gibson mulitiplied the cost per trip for an individual judge times the 20 cases perempted in 1983 and arrived at $16,820.

The estimated costs of travel and per diem for covering the peremptions in Homer, Bethel, and in Juneau's district court for three judges amounted to approximately $35,616. It should be noted that Judge Williams and Judge Hornaday have the two highest number of peremptions for 1983, and that the costs of peremptions in Bethel are usually the highest in the state because of the distance and cost of living there.

After obtaining the above information from individual districts, we contacted Robert Fisher, Fiscal Officer for the Alaska Court System. Mr. Fischer estimated that $25,000 was spent per year for peremptions statewide. He explained that the accounting office of the Alaska Court System arrived at that estimate after conducting a study of all travel and per diem claims filed by superior and district court judges between July 1, 1982 and December 31, 1982. The claims which involved peremptions were totalled, and then that amount was doubled to come up with a yearly cost of $25,000 for FY 83.

Mr. Fisher believes that the estimate is accurate even if it appears low. He notes that the court system avoids greater costs by calendaring

several perempted cases together in one area, so that a judge traveling to that area may hear several cases per trip. In addition, he maintained that many of the total peremptions occur in Anchorage and Fairbanks, which allows for perempted judges to swap cases at no cost to the State because of the many judges in these locations.

However, according to Judge Tunley, Presiding Judge for District 2, swapping cases is not always feasible because of the 120-day limit within which some cases must be heard. In addition, he points out that individual cases progress at different rates, and that some perempted cases involve several trips for pre-trial, sentencing and other hearings.

Mr. Fisher agreed that the $25,000 estimate does not reflect all of the costs involved in peremptions. He pointed out that down time for judges, such as the time spent on airplanes and in transit to and from airports, also costs the State money. For example, Mr. Fisher estimated that the State pays a superior court judge approximately $86.00 per hour. If that judge spends two hours on a round trip flight from Anchorage to Homer and back, plus an additional two hours of the work day preparing to leave, traveling to the airport, and waiting for a plane, the State pays the judge for four hours of foregone court work; this amounts to a total of $344.00 per trip. Judge Hornaday was perempted 235 times in 1983; however, it is not evident how many trips resulted from those peremptions. But if, for example, those 235 peremptions resulted in 20 trips, down time could have cost the State approximately $6,880 for one judge's peremptions.

The peremption of judges also results in other costs which are not easily quantified. For example, Judge Schultz, Presiding Judge for District 1, notes that the estimated total cost of peremptions in District 1 for 1983 does not reflect the administrative costs of (1) rescheduling Judge Gucker's cases in his own court when he is hearing cases perempted in Juneau, (2) the costs incurred when the magistrate in Ketchikan leaves his job to cover some of Judge Gucker's caseload while he's gone, or (3) the cost of lost efficiency. Judge Schultz contends that the normal disposition rate for a case in District 1, or the time it takes to reach a final settlement is 90 days. However, he asserted that the disposition rate in Juneau has increased to 140 days because of the high number of peremptions in the district court there, and the time each peremption involves.

We regret that we are unable to supply you with a single estimate of the costs of peremptions for 1983. The data is not available, and we are not in a position to estimate those costs with the information we have to date. If you would like us to attempt to gather additional information about the costs of peremptions, we will do so.

We hope the information we collected is useful to you. Please contact us if you have any further questions regarding this topic or any other topic of interest to you.

Attachment A

Rule 25. Judge—Disqualification or Disability.

(a) **Before Trial.** Where a judge of the superior court is disqualified or for any other reason is unable to sit in the trial or hearing of any pending matter, the presiding judge or the chief justice of the supreme court shall designate another judge of the judicial district in which the matter is pending, or a judge temporarily assigned thereto, to hear the matter.

(b) **During Trial.** If a judge holding superior court be prevented during a trial from continuing to preside therein, the presiding judge or the chief justice of the supreme court shall designate another judge of the superior court to sit in such court to complete such trial, as if such other judge had been present and presiding from the commencement of such trial, provided, however, that from the beginning of the taking of testimony at such trial a stenographic or electronic record of such trial shall have been made so that the judge so continuing may familiarize himself with the previous proceedings at such trial.

(c) **After Verdict.** If by reason of absence from the district, death, sickness or other disability, the judge before whom the action has been tried is unable to perform the duties to be performed by the court after a verdict or finding of guilt, any other judge regularly sitting in or assigned to the court may perform those duties; but if such other judge is satisfied that he cannot perform those duties because he did not preside at the trial or for any other reason, he may in his discretion grant a new trial.

(d) Change of Judge as a Matter of Right. In all courts of the state, a judge may be peremptorily challanged as follows:

(1) *Entitlement.* In any criminal case in superior or district court, the prosecution and the defense shall each be entitled as a matter of right to one change of judge. When multiple defendants are unable to agree upon the judge to hear the case, the trial judge may, in the interest of justice, give them more than one change as a matter of right; the prosecutor shall be entitled to the same number of changes as all the defendants combined.

(2) *Procedure.* At the time required for filing the omnibus hearing form, or within five days after a judge is assigned the case for the first time, a party may exercise his right to change of judge by noting the request on the omnibus hearing form or by filing a "Notice of Change of Judge" signed by counsel, if any, stating the name of the judge to be changed. A judge may honor a timely informal request for change of judge, entering upon the record the date of the request and the name of the party requesting it.

(3) *Re-Assignment.* When a request for change of judge is timely filed under this rule, the judge shall proceed no further in the action, except to make such temporary orders as may be absolutely necessary to prevent immediate and irreparable injury before the action can be transferred to another judge. However, if the named judge is the presiding judge, he shall continue to perform the functions of the presiding judge.

(4) *Timeliness.* Failure to file a timely request precludes a change of judge under this rule as a matter of right.

(5) *Waiver.* A party loses his rights under this rule to change a judge when he agrees to the assignment of the case to a particular judge or participates before him in an omnibus hearing, any subsequent pretrial hearing, a hearing under Rule 11, or the commencement of trial. No provision of this rule shall bar a stipulation as to the judge before whom a plea of guilty or of nolo contendere shall be taken under Rule 11. (Amended by Supreme Court Order 185 effective July 1, 1974; and by Supreme Court Order 292 effective February 21, 1978)

(b) CROSS REFERENCE: Crim. Form 34

1. Simplification of the issues.

2. Possibility of obtaining admissions of fact and documents which will avoid unnecessary proof.

3. The number of expert witnesses or character witnesses or other witnesses who are to give testimony of a cumulative nature.

4. Such other matters as may aid in the disposition of the proceeding.

DATED: _____

_____
Superior Court Judge

34. Order Transferring Case to Another Judge [Cr. R. 25(b)]

The Honorable _____, Judge of the Superior Court for the _____ Judicial District, having been prevented from presiding further in the trial of this action, it is hereby

ORDERED that pursuant to Criminal Rule 25(b), the Honorable _____, Judge of the Superior Court for the _____ Judicial District be designated to complete the trial in the same manner as if he had been present and presiding from the commencement of such trial, and it is further

ORDERED that a stenographic or electronic record of such trial from the beginning of the taking of testimony at such trial shall be made available by the clerk of the court to the Honorable _____ so that he may familiarize himself with the previous proceedings at such trial.

DATED: _____

_____
[Chief Justice of the Supreme Court
or
Presiding Judge]

Rule 42. Consolidation—Separate Trials—Change of Judge.

(a) **Consolidation.** When actions involving a common question of law or fact are pending before the court, it may order a joint hearing or trial of any or all the matters in issue in the actions; it may order all the actions consolidated; and it may make such orders concerning proceedings therein as may tend to avoid unnecessary costs or delay.

(b) **Separate Trials.** The court, in furtherance of convenience or to avoid prejudice, or when separate trials will be conducive to expedition and economy, may order a separate trial of any claim, cross-claim, counterclaim, or third-party claim, or of any separate issue or of any number of claims, cross-claims, counterclaims, third-party claims, or issues, always preserving inviolate the right of trial by jury as declared by the Alaska Constitution and Statutes of Alaska.

(c) **Change of Judge as a Matter of Right.** In all courts of the state, a judge or master may be peremptorily challenged as follows:

(1) *Nature of Proceedings.* In an action pending in the Superior or District Courts, each side is entitled as a matter of right to a change of one judge and of one master. Two or more parties aligned on the same side of an action, whether or not consolidated, shall be treated as one side for purposes of the right to a change of judge, but the presiding judge may allow an additional change of judge to a party whose interests in the action are hostile or adverse to the interests of another party on the same side. A party wishing to exercise his right to change of judge shall file a pleading entitled "Notice of Change of Judge." The notice may be signed by an attorney, it shall state the name of the judge to be changed, and it shall neither specify grounds nor be accompanied by an affidavit. A judge may honor an informal request for change of judge. When he does so, he shall enter upon the record the date of the request and the name of the party or parties requesting change of judge. Such action shall constitute an exercise of the requesting party's right to change of judge.

(2) *Filing and Service.* The notice of change of judge shall

be filed and copies served on the parties, the presiding judge, and the area court administrator, if any, in accordance with Rule 5, Alaska Rules of Civil Procedure.

(3) *Timeliness.* Failure to file a timely notice precludes change of judge as a matter of right. Notice of change of judge is timely if filed before commencement of trial and within five days after notice that the case has been assigned to a specific judge. In a court location having a single resident judge of the level of court in which the case is filed, the case shall be assigned to that judge when it is at issue upon a question of fact and the clerk shall immediately notify the parties in writing of such assignment. Where a party enters an action after the case has been assigned to a specific judge, a notice of change of judge shall also be timely if filed by the party before the commencement of trial and within five days after he appears or files a pleading in the action.

(4) *Waiver.* A party waives his right to change a particular judge as a matter of right when he knowingly participates before that judge in:

(i) Any judicial proceeding which concerns the merits of the action and involves the consideration of evidence or of affidavits; or

(ii) A pretrial conference; or

(iii) The commencement of trial; or

(iv) If the parties agree upon a judge to whom the case is to be assigned. Such waiver is to apply only to the agreed-upon judge.

(5) *Assignment of Action.* After a notice of change of judge is timely filed, the presiding judge shall immediately assign the matter to a new judge within that judicial district. Should that judge be challenged, the presiding judge shall continue to assign the case to new judges within the judicial district until all parties have exercised or waived their right to change of judge or until all superior court judges, or all district court judges, within the judicial district have been challenged peremptorily or for cause. Should all such judges in the district be disqualified, the presiding judge shall immediately notify the administrative director in writing and request that he obtain from the Chief Justice an order assigning the case to

another judge.

If a judge to whom an action has been assigned later becomes unavailable because of death, illness, or other physical or legal incapacity, the parties shall be restored to their several positions and rights under this rule as they existed immediately before the assignment of the action to such judge. (Amended by Supreme Court Order 186 effective July 1, 1974; by Supreme Court Order 258 effective November 15, 1976; by Supreme Court Order 262 effective December 31, 1976; and by Supreme Court Order 465 effective June 1, 1981)

torial role. Keel v. State, Sup. Ct. Op. No. 1290 (File No. 2883), 552 P.2d 155 (1976).

C. Paragraph (a)(6).

Maintenance of appearance of impartiality. — Paragraph (a)(6) of this section does not provide for disqualification where the sole concern is maintenance of the appearance of impartiality. However, in light of the importance of promoting public confidence in the integrity and impartiality of the judiciary, it would be well to permit disqualification under such circumstances. Amidon v. State, Sup. Ct. Op. No. 1999 (File No. 3664), 604 P.2d 575 (1979).

Review of decisions under paragraph (a)(6). — The supreme court rejected the argument that the disqualification standards under paragraph (a)(6) are wholly subjective and therefore not amenable to appellate review. Clearly, review is contemplated on a challenge for cause grounded in bias. The supreme court's duty to assure that judicial proceedings comply with due process mandates appellate scrutiny of allegations of bias. Coffey v. State, Sup. Ct. Op. No. 1732 (File No. 3602), 585 P.2d 514 (1978), modified on rehearing on other grounds, 596 P.2d 10 (1979).

Since the initial determination under paragraph (a)(6) of this section has been placed in the discretion of the trial judge, that judge's decision should be given substantial weight. When the judge does not recuse himself or herself, the decision should be reviewable on appeal only if it amounted to an abuse of discretion. Amidon v. State, Sup. Ct. Op. No. 1999 (File No. 3664), 604 P.2d 575 (1979).

Disqualification of judge for bias against counsel for litigant. 23 ALR3d 1416.

Disqualification of original trial judge to sit on retrial after reversal or mistrial. 60 ALR3d 176.

Disqualification of judge by state, in criminal case, for bias or prejudice. 68 ALR3d 509.

Membership in fraternal or social club or order affected by a case as ground for disqualification of judge. 75 ALR3d 1021.

Sec. 22.20.022. Peremptory disqualification of a superior court judge. (a) If a party or a party's attorney in a district court action or a superior court action, civil or criminal, files an affidavit alleging under oath the belief that a fair and impartial trial cannot be obtained, the presiding district court or superior court judge, respectively, shall at once, and without requiring proof, assign the action to another judge of the appropriate court in that district, or if there is none, the chief justice of the supreme court shall assign a judge for the hearing or trial of the action. The affidavit shall contain a statement that it is made in good faith and not for the purpose of delay.

(b) No judge or court may punish a person for contempt for making, filing or presenting the affidavit provided for in this section, or a motion founded on the affidavit.

(c) The affidavit shall be filed within five days after the case is at issue upon a question of fact, or within five days after the issue is assigned to a judge, whichever event occurs later, unless good cause is shown for the failure to file it within that time.

(d) A party or a party's attorney may not file more than one affidavit under this section in an action and no more than two affidavits in an action. (§ 2 ch 48 SLA 1967; am § 6 ch 143 SLA 1968; am § 1 ch 116 SLA 1971)

Cross references. — For the court rules on change of judge as a matter of right, see Civ. R. 42 (c) and Cr. R. 25 (d). Civil R. 42 (c) provides that a notice of change of judge . . . "shall neither specify grounds nor be accompanied by an affidavit."

Editor's notes. — This section was redrafted by the revisor of statutes to remove personal pronouns in conformity with AS 01.05.031(c) and § 4, Chapter 58, SLA 1982.

Legislative history reports. — For report on ch. 48, SLA 1967 (SB 66), see 1967 House Journal, p. 311.

NOTES TO DECISIONS

I. General Consideration.
II. Application of Right of Peremptory Challenge.
III. Procedure.

I. GENERAL CONSIDERATION.

Constitutionality. — A litigant is entitled to a fair hearing before a tribunal which is disinterested, impartial and unbiased, and a statute which affords that right by providing some means for showing bias or lack of impartiality does not offend the principle of separation of powers of government. Channel Flying, Inc. v. Bernhardt, Sup. Ct. Op. No. 530 (File No. 1082), 451 P.2d 570 (1969).

Where no affidavit is necessary, a judge may be disqualified for good cause, bad cause, or no cause at all. But where an affidavit is required, the assertion of bias or prejudice under oath is at least some showing or an imputation of the fact that the judge is disqualified, and this is sufficient to save the statute from successful attack on constitutional grounds. Channel Flying, Inc. v. Bernhardt, Sup. Ct. Op. No. 530 (File No. 1082), 451 P.2d 570 (1969).

This section is not constitutionally invalid as an attempt to usurp the rule-making powers of this court insofar as it provides for a peremptory disqualification of a judge. Channel Flying, Inc. v. Bernhardt, Sup. Ct. Op. No. 530 (File No. 1082), 451 P.2d 570 (1969); Gieffels v. State, Sup. Ct. Op. No. 1295 (File No. 2787), 552 P.2d 661 (1976); Wamser v. State, Sup. Ct. Op. No. 1768 (File No. 4166), 587 P.2d 232 (1978).

This section does not merely regulate procedure. With or without it the particular action in court takes the same course. The statute rather creates and defines a right — the right to have a fair trial before an unbiased and impartial judge. This is something more than merely prescribing a method of enforcing a right. The main subject matter of the statute is substantive in nature and was within the province of the legislature to deal with. Channel Flying, Inc. v. Bernhardt, Sup. Ct. Op. No. 530 (File No. 1082), 451 P.2d 570 (1969).

Legislative history. — See Peterson v. State, Sup. Ct. Op. No. 1411 (File No. 2642), 562 P.2d 1350 (1977).

This section reflects a fundamental tenet of the Alaska system of justice that every litigant shall have his rights adjudicated by a judge who is disinterested, impartial, and unbiased. In re G.K., Sup. Ct. Op. No. 796 (File Nos. 1627, 1654, 1674), 497 P.2d 914 (1972).

This section codifies a fundamental tenet of the Alaska system of justice, the right to a hearing by a fair and impartial judge. Kvasnikoff v. State, Sup. Ct. Op. No. 1153 (File No. 2363), 535 P.2d 464 (1975).

This section is designed to further the substantive right of a litigant to a fair trial before an unbiased judge. Riley v. State, Sup. Ct. Op. No. 2038 (File No. 4672), 608 P.2d 27 (1980).

Constitution of the State of Alaska

Attachment B

officers of the State.

(The amendment to this section was approved by the voters of the state August 27, 1968 and became effective October 11, 1968. The words "and the commission on judicial qualifications" were incorporated in this section.)

Restrictions

SECTION 14. Supreme court justices and superior court judges while holding office may not practice law, hold office in a political party, or hold any other office or position of profit under the United States, and the State, or its political subdivisions. Any supreme court justice or superior court judge filing for another elective public office forfeits his judicial position.

Rule-making Power

SECTION 15. The supreme court shall make and promulgate rules governing the administration of all courts. It shall make and promulgate rules governing practice and procedure in civil and criminal cases in all courts. These rules may be changed by the legislature by two-thirds vote of the members elected to each house.

Court Administration

SECTION 16. The chief justice of the supreme court shall be the administrative head of all courts. He may assign judges from one court or division thereof to another for temporary service. The chief justice shall, with the approval of the supreme court, appoint an administrative director to serve at the pleasure of the supreme court and to supervise the administrative operations of the judicial system.

(The amendment to this section was approved by the voters of the state August 25, 1970 and became effective October 10, 1970. The amendment substituted "the pleasure of the supreme court" for "his pleasure" in the last sentence.)

December 9, 1982

Judge Mark C. Rowland
303 K Street, Courtroom D
Anchorage, AK 99501

Dear Judge Rowland,

Your office and the judicial system are held in high regard by us and our children. We value justice as one of the key ingredients in our democratic way of life. We regularly instruct our children to respect the law and to deal in a just way with their companions and fellow citizens.

In this context we cannot understand why you should order Homer District Court Judge James Hornaday transfered to Anchorage against his will and against the overwhelming wishes of our community. As we understand, there is no precedence for this.

Therefore, we ask — for justice sake — that Judge Hornaday be retained as our District Court Judge. Secondly, you should know that we wholeheartedly endorse the policies of Judge Hornaday in sentencing DWI offenders. Finally, we request that the whole peremption policy be reviewed in light of these circumstances.

A judge serves his community in an exceptional manner. His policies are supported by the people he serves. He is an outstanding example for our children. Yet, he is transfered against his will. That seems a strange reward — even stranger justice.

Speaking for the Christian Ministers Association, I am

Sincerely yours,

J Schmidt

The Rev. John D. Schmidt, President

Dear Judge Rowland:

The community and surrounding areas of Homer is greatly dismayed to learn of your decision to transfer Judge James C. Hornaday from Homer to Anchorage. We strongly urge your reconsideration in this matter.

Judge Hornaday has been an excellent judicial representative for Homer for many years. His home and family are here. We do not want to lose Judge Hornaday to this area.

This community has steadfastly supported Judge Hornaday's courageous stand against the crime of drunken driving and we wholeheartedly support his sentencing procedures.

Please find attached petitions of support in favor of Hornaday being retained as District Judge in this area.

Sincerely,

HOMER CHAMBER OF COMMERCE

RESOLUTION

SOUTH PENINSULA MENTAL HEALTH ASSOCIATION, INC.

December 11, 1982

Whereas, Judge James Hornaday has proven to be an effective and competent District Court Judge serving the Homer Court, and

Whereas, Judge Hornaday was overwhelming endorsed by the residents of his jurisdiction during the recent election, and

Whereas, the right of the State Judicial system to move a Judge without public hearing or other procedural considerations is currently being questioned,

Be it hereby resolved that the South Peninsula Mental Health Association requests the retention of Judge Hornaday in the Homer District Court, and

Be it further resolved that the judicial pre-emption statutes in Alaska should be thoroughly reviewed and that the procedures for moving a Judge from one jurisdiction to another should be standardized through promulgation of appropriate regulations.

Resolution passed at the Board of Directors meeting on December 11, 1982.

Dear Milo:

This letter is prompted by the article concerning your position on certain legal reforms you have proposed which appears in the December 20 issue of The Clarion.

You were quoted as indicating that you expected the legal profession to oppose your bill removing the right of peremptory challenges. I know of very few attorneys who have ever exercised their right to file a peremptory challenge against a judge. I, myself, have never filed one and I agree that no such right should exist. I have not made a study of other jurisdictions but would be very surprised if the right exists in very many states. Presumably, the law was originally passed by well meaning individuals who enjoy tinkering with the system. I wish you well in pushing the legislation and offer you my support.

I was surprised that you were quoted as indicating your interest in enacting legislation which would impose a limit on attorney's fees in probate matters. Although I do not do any probate work myself at the present time, it has been my experience in the past that after the passage of the Uniform Probate Act and the institution of simplified probate procedures, many attorneys are now charging fees which are lower than they were in the past. In the case of a large estate I would suggest that a fee based upon the percentage of that estate would be unconscionable. From the attorney standpoint, it generally does not cost any more to probate a large estate than to probate a small one. Prior to the passage of the Uniform Probate Act, that was not the case.

Philosophically, I am opposed, as I am sure you are,

to the State interfering in contract relationships between professionals and their clients. I would suggest that a legislature which would concern itself with fees charged by an attorney to his client would also not hesitate in interfering with the fees charged by a physician to his patient. As a practical matter, a client who is overcharged by an attorney presently has recourse to the fee arbitration panel which operates under the auspices of the Alaska Bar Association. In light of the foregoing, I would request that you rethink your position on supporting a limit on attorneys fees.

Thank you for your attention to my comments. I wish you well in Juneau this year.

Very truly yours,

Rick

The Honorable Mark Rowland
Presiding Judge of the Superior Court
303 "K" Street
Anchorage, AK 99501

Dear Judge Rowland:

We, as a community, strongly oppose the transfer of Judge James Hornaday. Judge Hornaday's stance on drunk driving is looked upon as a favorable public service in the community. Perhaps the laws of pre-emption should be closely scrutinized and amended out of necessity in administering a trial court system.

Jim Hornaday is an active participant in community affairs, an impeccable family man, and contributes strong support to this rural community. The type of program he advocates serves the individual rights of our citizens to travel the streets of Homer with less probability of being harmed by drunk drivers.

As Mayor of Homer, I petition you to cancel the transfer order removing Judge Hornaday from this community as District Court Judge.

Sincerely,

Erle Cooper
Mayor

RESOLUTION 82-20(S)

A RESOLUTION SUPPORTING A STIFF SENTENCING POLICY FOR DRIVING WHILE INTOXICATED (DWI).

WHEREAS, the absence of sidewalks in Homer requires pedestrians to walk along the traveled ways, subjecting themselves to potential vehicle associated accidents; and,

WHEREAS, studies which have been conducted show that the higher the blood alcohol level, the greater the likelihood of an accident; and,

WHEREAS, there has been an increase in D.W.I. cases of some seventy-seven percent (77%) between 1980 and 1981 in the Homer District Court; and,

WHEREAS, the City Council of the City of Homer wishes to have life, liberty and property protected from potential injury by person(s) who drive while under the influence of alcohol;

NOW THEREFORE, BE IT RESOLVED that the Common Council of the City of Homer, Alaska, supports a stiff sentencing policy for Driving While Intoxicated (DWI).

BE IT FURTHER RESOLVED that copies of this resolution be directed to the State legislators of Alaska.

DATED in Homer, Alaska this 14th day of June, 1982.

TESTIMONY OF JUDGE JAMES D. HORNADAY, HOMER
February 2, 1983

Mr. Chairman and ladies and gentlemen of the Committee, thank you for holding this hearing and inviting me to address the Committee. I hope I am not the monster judge that everyone has been talking about. My name is James D. Hornaday and from a perspective of nearly 20 years in Alaska I am speaking to you today as a judge. The judicial cannons permit and even require that judges speak out for the improvement of the administration of justice. And with all of the comments by many of my lawyer friends I feel a little like David when he went up against Goliath. The men and women of good will can and do differ in their opinions, and it does remind a little of the old Alaska adage that if the lawyers are against something it must be worthwhile. I wish it were someone else who was on the line rather than me, frankly I would rather be playing basketball or working on a legal history project. But the question of the peremptory challenge is involved with the independence of the judiciary and the decreasing respect for the judiciary. First of all, the peremptory challenge is not a fundamental constitutional right; it does not even exist anywhere in the Federal system, and there are Federal judges in every state and territory. Apparently it does not even exist in the vast majority, about two-thirds of the states. Alaska is in the extreme minority. It did not exist in Alaska until a few years ago when some lawyers pushed it through the Legislature. The Federal system and the majority of states get along just fine without it. Now as one example, drunk driving cases are the most serious problem facing the Alaska Court System. Over half of all the jury trials in the entire Court System are drunk driving cases. Drinking was involved in over 80% of the traffic fatalities; over 200 thousand are killed or injured annually on our nation's highways. Let's make clear what the Legislature has already done; the Legislature has passed legislation providing for up to one year in jail and $5,000 fine, revocation of licenses and community work. Now the statutes specifically states that for the first offense a defendant is to receive not less than 72 consecutive hours. It is too serious a problem to leave in the hands of the attorneys and that is the none effect of the peremptory challenge without cause. Judges are concerned about the peremptory challenge; it is affecting sentences. The Chief Justice has stated publicly that the peremptory challenge moderates sentences and that a judge has to walk a fine line and if they get too far over they will be removed by the peremption. I was told by the presiding judge that I had to take peremptions into consideration when I sentence. It is the most frequent topic of conversation at the Annual Judicial Conference. The leading authority on court delay called the Alaska peremptory challenge an absolute abomination, those were his words. Representatives of the National Center of State Courts were amazed at the existence of the removal without cause. I have heard judges tell the Chief Justice they are concerned about the peremption. It is a problem state-wide, not just in Homer. You have heard the lawyer in Bethel and the problems there. You've heard the judges in Fairbanks. It exists in Kodiak, Ketchikan, Juneau and all over the state, even in multi-judge areas. Now we announced a pattern of sentencing in drunk driving cases in Homer about a year ago which was effective, but sentences were clearly within the sentences permitted by the Legislature. Fifteen days is less than 5% of the maximum penalty. Although the announced pattern is no longer in effect and was rescinded when the higher court ruled that it could not be applied. There are sentencing patterns in Alaska, attorneys keep records of the sentences of judges. So there are patterns but known only to the judges and the lawyers. The public, including the potential defenders, do not know the patterns. It is time to open up the System and bring it out from behind the closed doors of the

legal profession. Now I was a lawyer for 10 years and you are never going to satisfy the lawyers on sentencing. About 6 years ago we initiated the first work program, alternate work program, for drunk drivers in Alaska. Some lawyers supported, but other complained that work was a cruel and unusual punishment. Now the program has been reinstituted pursuant to the community work which the Legislature has made a sentencing tool. Now the lawyers are complaining that we are giving too much community work. Also the argument that the System would be flooded with time consuming challenges for cause is questionable, as several attorneys have indicated that they would not use challenges for cause. Further the presiding judge denied a challenge because against me on hearing a DWI case after the announced policy was rescinded. The hearing took all of 10 minutes. The Court System and the people of Alaska should not be held held hostage by attorneys threating to plug the System with challenges for cause. Further judges will disqualify themselves if for some reason they should not hear a case. There is already a procedure for this approach that is in effect. However, again note that a judge has to give a reason why they are disqualifying themselves. Related to the peremptory challenge is another deep concern which I have as a 20 year Alaskan and as a lawyer and a judge and a citizen, and that is the growing lack of respect for the Alaska Judiciary among the members of the public. Reportedly, concern over the Justice System trailed only the capitol move and subsistence in intensity in the recent election. Almost half of the voters in the Third District voted not to retain the trial judges last November. This negative vote is up nearly 10% in only 4 years. How many years will it be before all judges are defeated? Some of the longer serving judges remember when they received 85% approval ratings. For the first time in nearly 20 years in the legal profession, so many people told me they were voting against all of the judges that I lost count. And note that, at least to-date, that most of the people, most of the lay people, testifying to you are against the peremption, only the lawyers are testifying before you in favor of it. That should tell you something. We pride ourselves in Alaska on the merit selection appointment procedure for judges. The Judicial Council recommends, the Governor appoints and the people vote, and yet the present situation with the peremptory challenge is worse than the most partisan political election of judges, and that a very few attorneys can remove a judge a hold the System hostage. The cost to the public and the wasted expense and time is high. The selection process of which we are so proud and the public vote means absolutely nothing. Just as an example, I was required to move to Homer to take the judgeship in Homer. The Judicial Council recommended me for Homer and the Governor specifically appointed me to Homer. The family moved here and has put down deep roots; we have children in school of all ages. I received good ratings from the lawyers and the highest rating from the Alaska Peace Officers and was retained overwhelmingly by the voters in the November election in my home area by a 2 to 1 margin. And although I appreciate Mrs. Barnes' invitation to Anchorage, I would prefer frankly to remain in Homer. I did live in Anchorage for a couple years and I have, we have, a lot of friends up there, however we are pretty deeply rooted in Homer at the present time. Two weeks after the election I was asked to transfer to Anchorage because of the peremptions. I have been assured that there is no other reasons for my transfer, only the peremptions. None of my sentences have ever been reversed as excessive. Now there are checks and balances that are far more appropriate than peremptions without cause, and they are numerous. If a judge is doing something improper turn them over to the Judicial Qualifications Commission, or challenge the judge for cause, or test the judge in the retention elections, or appeal the judge's decision, or ask the judge to voluntarily disqualify himself. The message is going out loud and clear to the judges in Alaska, to the attorneys and to the public that inspite of the vote of thousands that vote means nothing, and a handful of attorneys can accomplish the transfer

of a judge, and threaten other judges through peremptions for which they do not even have to give a reason. All the attorneys have talked about before you, are the rights of their clients, and these are important rights, no one would say that they are not. But what about the rights of the victims? What about the rights of society? The Constitution clearly requires a judge to sentence to protect society and reformation. No where in the Constitution, in the statutes or in the case law is there any indication that a judge is to sentence in order to avoid peremptions. And yet the Chief Justice of the Alaska Supreme Court has stated publicly that this is happening, and any judge who will level with you will tell you the same. The tail is wagging the dog at the present time as the attorneys are in effect controlling sentencing, and are now even controlling the transfer of judges. Thank you.

TESTIMONY OF ATTORNEY HENRY CAMAROT, ANCHORAGE
February 3, 1983

Gentlemen and (unable to hear the period of 4 log numbers due to static in the teleconference) except for a short period when I left Alaska I practiced in the State of Oregon. I presently represent District Judge James Hornaday in respect to an order that was issued by the Honorable Mark Rowland, presiding Superior Court Judge for the Third Judicial District. In that order, Judge Hornaday had been directed to move from Homer, Alaska, his place of residence for some seven years, to Anchorage, Alaska to permanently fill the office of District Judge in the Anchorage area. I come in favor of repealing the perempt statute. Alternatively I wish to make several other comments and I think they can be interpreted as clear recommendations. The consideration of the perempt statute repeal perhaps can be invaluated against the framework of the true factual situation that currently exists; infact, I got the impression as I was listening to some of the witnesses testify, that this law seems to be directed all towards Judge Hornaday, when I believe the issue is far greater than Judge Hornaday.

Some eight years ago more or less Judge Hornaday gave up a successful 10 year law practice to accept an appointment as the acting district judge in Homer. The condition of his employment at thr time that he moved to Homer. He moved to Homer. The Legislature established a Homer District Judge position. He applied to the judicial council for that office in Homer. His name was forwarded to the Governor for that office and that office began in Homer. He was appointed by the Governor for that specific office. The Judicial council twice recommended him for retention and he has twice been overwhelming retained by the vote in the election of the Third District. More recently, in the election of 1982, more people turned out to testify on his behalf before the judicial council meetings held in Homer than for any other judge in the state. He also passed with the lawyers in the bar poll and received the highest rating of any judge with the Alaska Peace Officers Association.

Judge Hornaday has established deep roots in Homer. His wife, Karen, teaches violin to many children and serves as chairperson on the Homer Parks and Recreation Commission. She serves on many church and civic activities and just recently helped passed the bond issue of the building of the new high school in Homer. His daughter, Mary, is a sophomore
in college and his son, Dan, is a high school sophomore who worked his way up to the staring quarterback on the football team. He also plays on the basketball team. Dan is usually on the honor roll. Their son, Joshua, is in the third grade and is into music, Little League and Cub Scouts. Five year old Matthew has just started kindergarten. The Judge is active in Little League matters, Chamber of Commerce matters and plenty of other activities. When he left the private practice and accepted the appointment as the district judge in Homer, he made substantial financial sacrifices. He was required to sell his home and a commercial building that had been partially set aside as a retirement income. When he moved to Homer, he bought a home there. That was to be his home and that was to be his community for years to come.

We have all heard about how in early 1982, the first part of 1982, Judge Hornaday decided to do something about the drunk driving. He was deeply concerned about this continuing highway travesty, which he was aware resulted in the killing and maiming of over 200,000 Americans a year. It was frustrating to him. Apparently, drunk driving cases constitute over 50% of all the jury trials in the Alaska court system. For many reasons, and because he also serves at times as a coroner and probate judge, because of times when he has come in direct contact with auto crash results, leaving maimed bodies and grieved families or person who have suffered injuries, thereby, felt he had to do

something. He wanted to do it, not by legislative action, but what he wanted to do was in a true effort to be fair, give notice beforehand that persons convicted of a drunk driving in his court would receive a 60 day sentence with 45 suspended and 15 days actually having to be served. Now at the outstead let me point out this is not the maximum sentence, as some people have suggested. The maximum sentence under AS28.35.030 is $1000 or by imprisonment for not more than one year or by both. Now it is not the minimum sentence, which is 72 consecutive hours in the first instance. But what he was really doing, was, he was really giving fair warning beforehand to attorneys and drivers, particularly those consuming alcohol and driving under the influence, that this is what he would do. Now that resulted in an increase in Judge Hornaday being perempted. This is not to say that Judge Hornaday had not been perempted on prior occasions, but this announced policy seemed to have resulted in a definite increase in the peremptions that he experienced prior to the spring of 1982. Let me stop here and note that he was not legislating at that time. He was not attempting to. But what he was doing again just simply identifing the symptom patterns. Now when it was called to his attention that the public statement could not be followed, that he had to consider matters on a case to case basis, he acknowledged that. He publicly recinded the policy and he did sentence on a case-by-case basis. And he did not give 15 days in every insistence. He did go back to the 72 hours, frequently. But the peremptions continued. Continued to the point that Presiding Judge Mark Rowland determined, as he put it, it became administratively a nightmare and was costly to the system. And the system is one of the things I want to talk about.

Now the statistics put together by the court administrator regarding Judge Hornaday and our statistics will be at odds. Truthfully speaking, we don't think that there is comparable statistics that show that one District Judge or Superior Court Judge, particularly in areas where there is only one judge, that experience any more or less peremptions than Judge Hornaday had been experiencing. We don't know to what degree the peremptions compare. But we do know that there are problems and there are serious problems and the problems are going to continue in our opinion with the peremption statute in other areas as they have happened in the past in Wrangell, Petersburg, Ketchikan, Juneau and Kodiak. In any event, Judge Rowland believes that Judge Hornaday's peremptions in Homer were occurring to such a degree that he determined that he had to move Judge Hornaday out of Homer. I don't suggest that Judge Rowland is not acting in good faith. He was very candid when he said that it is the exercising of the peremption by counsel out of the current statute and the resulting costs of bringing in another judge from Anchorage, which is causing him to issue his order. Judge Rowland is attempting to follow obligations imposed on him as the presiding judge to properly administer the court system. And also to be concerned about the costs endowed in his responsibility.

In that regard, as I understand it from Judge Hornaday, Judge Hornaday was advised that he should consider peremtory challenges in sentencing persons before him as a particular consideration. I am sure this is done to avoid having the expense of the cost of having to send another District Judge to Homer when Judge Hornaday was perempted. Chief Justice Burke in a public hearing in Homer indicated perempts had to be considered in sentencing. So, I think we ought to recognize the issue that peremptions affect sentencing, that with the statute as it exists, the system should acccept that the consequences and cost and, threaten, the independence of the judiciary. So it's understood, are we challenging Judge Rowland's order on Judge Hornaday's behalf because I believe that there are serious constitutional and legal arguments on whether he has the authority to take the action he did. But aside from that, and if it be found that Judge Rowland does have the power and authority to remove a District Judge

from his place of residence and the office to which he is assigned, then the problem will still remain. Let's turn for a moment to the defense attorneys or primarily to the ones that are utilizing the perempt statutes.

I have talked with defense attorneys, quite a few of them, and I recognize what they are saying. They can not claim that Judge Hornaday has been more stern in his sentencing practices than other judges. They contend they are under ethical duties to advise the client that he or she has a right to perempt Judge Hornaday. I hear what those defense counselors are saying. But I also know that this constitutes and is just as clear an act as judge-shopping as any other act would be if not for the perempt statute. Even if the attorney contended that he had a ethical responsibility, it's judge shopping. In other instances in my opinion, they are using the perempt for purposes of delay in coming to trial. The delay is always an act that has to do with the defendant because anything can happen between the time of the charge and the actual time of the trial. But what is truly more troubling is, and what must be troubling to an elected official, be he legislator or otherwise, be he judge or otherwise, regarding what the justification might be claimed in respect to the perempt statute, the bottom line is not withstanding thousands of voters particularly those voters in the Homer area voting in favor of the man, Judge Hornaday. There will still be a few members of the bar who are mainly able to sufficiently prevail upon the presiding judge so as to require Judge Hornaday to be removed from one area to another. I don't say they are making personal contact, I say they are doing that through the perempt statute. In my mind as it has already been indicated, the perempt statute and peremption rule interferes with the judicial process under the Constitution and the court responsibility to perform the duties endowed upon them. It also destroys the independence of the judge and to a degree I believe it interferes with the oath of office that each judge takes that he will support the state and federal constitution and will faithfully discharge the duties of his office as a judge of the court to which he is appointed, to the best of his ability. It destroys the independence of the judge. I sincerely believe that it is very wrong to remove a judge who is regarded as judicially competent and I would like to make a note that the major incidents that I have heard in respect to Judge Hornaday has nothing to do with his ability in a civil case, nothing to do with his ability during the course of a trial, presumably it has to do with his sentencing in DUIL cases and some pretrial motions, other than that attorney after attorney have told me he is a very competent, capable judge. But the clutch of the issue comes down to this, if the peremption statutes are to stay in existance and Judge Rowland's order is to remain in effect, then every judge appointed to a district judge area is subject to be reassigned depending on how his rulings and sentencing practices are viewed by the attorneys. I suggest that the precedent being established here is extreme for the reasons already stated. It should be a matter of a state-wide concern. What happens to the next District Judge that goes to Homer. He accepts that office in the wake of Judge Hornaday's reassignment, if that occurs. He knows that the presiding judge doesn't want to have make another reassignment. He does know that he has to avoid peremptions and to avoid peremptions he obviously must not follow the practices followed by Judge Hornaday. Peremption has an effect on sentencing without a question. The matter of degree perhaps in Homer is a matter of degree anywhere. I know that there are many judges today in Alaska who are very concerned about this order. I think it is a matter for new judicial candidates to consider as part of the input as to whether or not they want to become judges. They are invited to place themselves, as now, in front of the judicial council for particular judicial office. They have to realize they maybe reassigned. Against this background I wish to make the following recommendations. I thought a lot about

the perempt statute and I believe that it has one part of it that makes me feel that it should be repealed and its the view of it being unfair.

I submit to you that whether its the filing of an affidavit or a simple notice of a change of judge of Criminal Rule 25 and Civil Rule 43, the accusation is that litigants can not receive a fair and impartial trial. If the judge has no opportunity to defend himself against that charge, although it clearly imputes his integrity. In my opinion the judge, whether it's Judge Hornaday or any other judge is denied due process, he cannot defend his integrity which is so important to a judge. I would suggest in the first inistance, therefore, that the particular AS22.20.022 be repealed.

Then I have an alternative suggestion. I have a lot of respect for my brethren. I see the attorneys here in mass. I've heard them. Accordingly, realistically speaking, that perempt statute cannot be repealed. I would like to give you perhaps a compromise. I would suggest that there would be a statute passed or present statute amended, rejecting the reassignment of any Superior Court or District Judge from the area of his residence to any other location. It is not say that a judge cannot be temporarily assigned, as the Constitution recognizes, and it takes place periodically, so long as there is a time limit on each assignment each year. I think the wholesome affect of this type of law is that if the perempt statute is to be continue as part of the Alaska Judicial processes that it be recognized as part of the overall system, including the cost of reassigning a judge to the area where the peremption right is imposed. It will also reassure other members of the judiciary or future potential members, that have to give that fact their consideration. They are weighing the pros and cons of continuing or becoming a judge.

Another alternative, the second alternative, I would suggest would be given serious consideration, would be to limit the perempt statute to those areas that have more than one judge serving a community, such as Anchorage and Fairbanks, and deny the invoking of the peremptory challenge for no cause where there are single judges, whether they be Superior or District Court Judges in other areas.

I realize that this would not be as popular and be subject to constitutional attack. However, I believe that it could withstand that constitutional attack.

I wish to thank the committee for allowing me to make this presentation. I sincerely hope that reservation in supporting this and that the recommendations maybe of some assistance to the committee. Needless to say, in the final analysis, in the case of Judge Hornaday, that any action taken by the legislature, I sincerely hope, will allow him to stay in Homer. Thank you.

HB 79---PEREMPTORY CHALLENGE OF JUDGES REPEAL--

REMARKS BY REPRESENTATIVE JOHN LISKA

THANK YOU MR. SPEAKER:

I RISE TO SPEAK IN FAVOR OF HB 79. I PARTICIPATED, AS A MEMBER OF THE JUDICIARY COMMITTEE, IN HEARING THE MANY WITNESSES TESTIFY BOTH IN FAVOR AND AGAINST THE BILL ON THE TWO DAYS THE HEARINGS WERE HELD.

I ESPECIALLY NOTED THAT JUDGES WERE ALMOST UNIVERSALLY FAVOR OF THE BILL. ONE JUDGE STATED THAT AS AN ATTORNEY SHE WOULD BE OPPOSED, BUT THAT AS A JUDGE IT CERTAINLY MADE HER ROLE MORE DIFFICULT.

NOT ALL THE ATTORNEYS WERE OPPOSED TO THE BILL EITHER. IN PARTICULAR, ONE ATTORNEY FROM BETHEL, ONE OF THE VERY FIRST WITNESSES, SPOKE QUITE STRONGLY IN FAVOR OF PASSAGE OF HB 79. IT APPEARED SIGNIFICANT TO ME THAT SO MANY ATTORNEYS WERE OPPOSED TO THE BILL, AND SO MANY JUDGES AND LAYMEN WERE IN FAVOR OF IT, THAT IT APPEARS TO ME THAT THE ATTORNEYS MUST HAVE SOME DECIDED ADVANTAGE WHICH THEY ARE JEALOUSLY GUARDING AND DON"T WANT TO BE TAKEN AWAY FROM THEM.

WE WERE ESPECIALLY APPRECIATIVE OF THE REMARKS BY MS. KAREN HUNT OF ANCHORAGE, FORMERLY PRESIDENT OF THE BAR ASSOCIATION. NEAR THE CONCLUSION OF HER TESTIMONY I ASKED HER IF THE SITUATION AT HOMER, ALASKA WAS SUCH THAT SO MANY PEOPLE ARE IN FAVOR OF THE BILL AND SHOWED SUCH SUPPORT FOR IT, COULD THE PEOPLE BE WRONG OR COULD THE LAW BE WRONG? SHE PROMPTLY REPLIED THAT THE LAW IS WRONG!!

TESTIMONY FROM WITNESSES, MR. SPEAKER, WAS ALMOST EVENLY DIVIDED, FOR AND AGAINST THE BILL. I FAVOR PASSAGE OF THIS BILL BECAUSE I FEEL A JUDGE SHOULD BE ALLOWED TO FOLLOW THE DICTATES OF HIS CONSCIENCE IN UPHOLDING THE LAW AND DISCHARGING THE DUTIES OF THE OFFICE, WITHOUT FEAR OF BEING TOSSED OFF THE BENCH BECAUSE A H+NUMBER OF ATTORNEYS WISH TO HAVE A CHANGE OF JUDGE WITHOUT HAVING TO BE RESPONSIBLE FOR GIVING THE REASONS FOR THAT CHANGE. WE HEARD TESTIMONY, MR. SPEAKER, THAT THE FACT THAT CHALLENGES TO A JUDGE ARE POSSIBLE HAS A DECIDED IMPACT ON DECISIONS THE

THE JUDGE IS, BY LAW, REQUIRED TO MAKE. IT IS ATROCIOUS TO ME, MR. SPEAKER, TO HAVE A SITUATION IN OUR STATE WHERE OUR JUDGES ARE HAMPERED BY HAVING TO CONSIDER WHETHER OR NOT THEIR SENTENCING PRACTICES WILL LEAD TO CHALLENGES OR EVEN TO REMOVAL FROM ONE LOCATION TO ANOTHER. IT IS CLEAR THAT THE CHIEF JUSTICE HAS INDICATED THAT JUDGES HAVE TO BEAR THIS IN MIND. WITH THE PASSAGE OF THIS BILL, SUCH WOULD NO LONGER BE THE CASE AND JUSTICE WOULD BE BETTER SERVED. THANK YOU, MR. SPEAKER.

TESTIMONY IN FAVOR OF PASSAGE OF HB 79

THANK YOU, MR. CHAIRMAN.

I AM REP. MILO FRITZ FROM ANCHOR POINT, NEAR HOMER ALASKA.

THE FIRST COURT OF JUSTICE IN ALASKA WAS ESTABLISHED BY THE U.S. IN 1900 UNDER JUDGE JAMES WICKERSHAM IN EAGLE ON THE YUKON RIVER. SINCE THEN, THE COURT SYSTEM HAS GROWN IN SIZE AND COMPLEXITY TO MEET THE CHANGING NEEDS OF THE TIMES AND THE INCREASE IN POPULATION.

GENERALLY SPEAKING, THE LEGAL NEEDS OF THE PEOPLE OF ALASKA, EXCEPTING THE DISSIDENTS AND ECCENTRICS PRESENT IN ANY AGE, WERE ADEQUATELY MET. UNTIL 1967, PEREMPTORY DISQUALIFICATION OF A JUDGE COULD ONLY BE INVOKED FOR CAUSE, THAT IS, FOR A GOOD, TRENCHANT REASON. AND I BELIEVE, MR. CHAIRMAN, THAT NO REASONABLE PERSON CAN OBJECT TO THAT.

IN 1967, ACCORDING TO THE SESSION LAWS OF ALASKA FOR THAT YEAR AND APPEARING IN ALASKA STATUTES, THAT IS THE LAWS OF ALASKA KNOWN AS AS 22.20.022, AN ADDITION WAS MADE, MAKING IT POSSIBLE FOR THE PETITIONER, THAT IS THE LAWYER OR THE CLIENT TO DISQUALIFY A JUDGE WITHOUT PROVIDING ANY REASON WHATSOEVER. AND IT IS THE PURPOSE OF HB 79 TO STRIKE THIS 1967 AMENDMENT TO ALASKA LAW FROM THE BOOKS MAKING PEREMPTORY CHALLENGE OF A JUDGE POSSIBLE ONLY FOR CAUSE, THAT IS, FOR A VALID REASON.

IN THE ELECTION OF NOVEMBER 2, 1982, THE VOTERS IN THE THIRD JUDICIAL DISTRICT VOTED 57,000 TO 38,000 TO RETAIN JUDGE JAMES C. HORNADAY ON THE BENCH. ON THE KENAI PENINSULA, WHERE

JUDGE HORNADAY RESIDES AND HOLDS COURT IN THE SMALL CITY OF HOMER, THE VOTE WAS 6000 TO 3000 IN FAVOR--AN IMPRESSIVE VOTE.

NOW IT HAPPENS THAT JUDGE HORNADAY HANDS OUT TOUGH SENTENCES TO THOSE CONVICTED OF DRUNK DRIVING. SO QUITE NATURALLY, THE TRANSGRESSOR AND HIS LAWYER, QUITE LOGICALLY AND WITHOUT HAVING TO GIVE A REASON, PEREMPTORILY CHALLENGED JUDGE HORNADAY ASKING THAT THE CASE BE HEARD BEFORE ANOTHER JUDGE SINCE, OF COURSE, THE SENTENCE ~~CAN'T LEGALLY BE~~ IS NOT GENERALLY MADE ANY MORE SEVERE AND MIGHT QUITE POSSIBLY BE LIGHTER. ANY GOOD LAWYER WHO DOES THIS IS QUITE WITHIN HIS RIGHTS, SINCE IT HIS DUTY TO OBTAIN FOR HIS CLIENT THE LIGHTEST POSSIBLE SENTENCE. IN OTHER WORDS, THE LAWYER IS NOT AT FAULT, THE LAW IS, AND THAT IS WHY I ASK YOU AND YOUR COMMITTEE TO REMEDY THIS DEFECT BY FAVORABLY PASSING OUT HB 79.

NOW, IN A STATEMENT AT A HEARING REGARDING JUDGE HORNADAY HELD IN HOMER ON JANUARY 5, 1983, SUP. COURT JUDGE MARK ROWLAND TESTIFIED THAT JUDGE HORNADAY WAS PEREMPTORILY CHALLENGED IN ABOUT 80% OF THE CASES COMING BEFORE HIM, ONLY A SMALL PERCENTAGE OF WHICH HAD TO DO WITH DRUNKEN DRIVING. IN OTHER WORDS, BY ACCIDENT OR DESIGN, MOST OF THE LAWYERS ON THE KENAI PENINSULA INDULGED IN A VENDETTA AGAINST JUDGE HORNADAY PEREMPTORILY DISQUALIFYING HIM. IN EFFECT, THESE LAWYERS SAID, "OKAY, SO YOU ARE GOING TO HAND OUT MAXIMUM SENTENCES AGAINST OUT DRUNK DRIVING CLIENTS. THEREFORE, WE WILL PEREMPTORILY DISQUALIFY YOU FOR ALL OUR CASES." OF COURSE, THIS LEFT JUDGE HORNADAY WITH LITTLE TO DO AND MADE IT NECESSARY FOR SUP. COURT JUDGE

MARK ROWLAND TO DISPATCH A JUDGE FROM ANCHORAGE AT NEEDLESS EXPENSE TO HOMER TO HEAR JUDGE HORNADAY'S CASES. AND SINCE HORNADAY HAS BEEN RENDERED INEFFECTIVE, ROWLAND HAS TRANSFERRED HIM TO ANCHORAGE AS OF JUNE 1, THUS QUITE LEGALLY TRANSGRESSING THE WILL OF THE PEOPLE OF THE KENAI PENINSULA. JUDGE ROWLAND IS NOT WRONG; THE LAWYERS ARE NOT WRONG; THE LAW IS WRONG AND HB 79 RECTIFIES THE SITUATION.

IN ANCHORAGE, PEREMPTORY DISQUALIFICATION OF JUDGE HORNADAY WOULD COST NOTHING SINCE THERE ARE SEVERAL JUDGES OF JUDGE HORNADAY'S RANK AVAILABLE.

THEREFORE, IT SEEMS THAT PEREMPTORY CHALLENGE OF A JUDGE WITHOUT CAUSE SHOULD BE STRICKEN FROM THE BOOKS SINCE IT SERVES LAWYERS AND TRANSGRESSORS AND NOT THE ADMINISTRATION OF JUSTICE. REM ACU TETIGISTI.

IF, MR. CHAIRMAN, THIS 13TH STATE LEGISLATURE PROMPTLY PASSES OUT HB 79 WHICH WOULD ELIMINATE PEREMPTORY DISQUALIFICATION WITHOUT CAUSE, THE PEOPLE OF THE KENAI PENINSULA WILL KEEP THE JUDGE WHOSE ACTIONS THEY APPLAUDED BY VOTING FOR HIS RETENTION 2 TO 1.

PASSAGE OF THIS MEASURE WILL ALSO PREVENT THIS FROM OCCURRING IN OTHER one-JUDGE JURISDICTIONS WHERE, FOR FRIVOLOUS REASONS OR NO REASON AT ALL, A JUDGE MAY BE PEREMPTORILY DISQUALIFIED. THE JUDGES ARE NOT WRONG, THE LAWYERS ARE NOT WRONG, THE PEOPLE ARE NOT WRONG--THE LAW IS WRONG. LET US REPEAL IT BY PASSING HB 79.

I THANK YOU, MR. CHAIRMAN.

Pre-emption of judges 'disruptive'

by J[illegible] Berliner
Times [illegible]er

Times 2-6-83

A handful of state judges are "disrupting" the state court system because they are removed from cases so frequently, says state court administrator Art Snowden.

Court records show that one Anchorage judge and five other judges from around the state are excused from cases far more than their colleagues.

Although the current debate over pre-emptions has focused on Homer District Court Judge James Hornaday, he is not the only judge regularly excused from cases by lawyers. There are 42 trial judges in the state, (the eight appellate judges may not be pre-empted), and lawyers routinely excuse six of them."

According to court records, in addition to Hornaday, the judges being regularly bumped from

See Judges, page A-l

Judges

(Continued from page A-1)

cases are Juneau District Court Judge Gerald Williams, Fairbanks District Court Judge Stephen Cline, Anchorage Superior Court Judge Karl Johnstone, Juneau Superior Court Judge Roger Pegues, and Wrangell Superior Court Judge Henry Keene.

By law, attorneys have a right of pre-emption, called peremptory challenge, which means that each side in a case may excuse the judge assigned to that case one time. The parties involved do not have to state the reason. Lawyers have five days from the initiation of a case to file a notice for a change of judge. The legislature is now considering a bill to repeal lawyers' right to pre-empt a judge.

Court officials have called the pre-emption an "administrative nightmare" because of the problems in reassigning judges.

"It is more efficient without it," Snowden said, adding that the court system has not taken a policy on the peremptory challenge and is probably split on the issue.

Snowden called it "a disruption" that costs the state court system an average of $30,000 yearly in extra costs of reassigning cases to other judges.

The biggest expense, Snowden said, is paying travel and expense money to have judges journey to one-judge areas to fill in where the only judge in town has been legally removed from a case.

That has happened so much in Homer that Hornaday has been ordered to pack up, leave town, and don his judicial robes in Anchorage. Even if lawyers pre-empt him there, the reasoning is, there are other judges to fill in. Presiding Judge Mark Rowland ordered Hornaday to move to Anchorage by June 1 to fill a judicial vacancy here.

Hornaday has been pre-empted from about 84 percent of the criminal cases assigned to him. His lawyer, Henry Camarot, claims that Hornaday is pre-empted 8 percent of the time when all his cases are considered.

Cline, Williams and Johnstone are taken off cases up to half the time. All four of the most pre-empted judges have been retained in office by voters in recent elections.

Johnstone, the only Anchorage judge regularly excused, is also the only judge who hears civil cases almost exclusively. The others regularly hear criminal cases, too. Johnstone is pre-empted three times more than all the other Anchorage Superior Court civil judges put together, and his pre-emptions climbed to a high of 20 in December. Judges are assigned between 30 and 40 new cases monthly. Johnstone was pre-empted 153 times in 1982, up from 71 in 1981. And although Johnstone said last summer that his pre-emptions were going down, court records show they are on the rise.

But in Anchorage, the state's biggest judicial district, Johnstone's cases are simply reassigned to another Anchorage judge. That can't be done in Homer, where Hornaday is the only judge. His removal means that court administrators have to send in another judge to hear Hornaday's cases.

Last week the House Judiciary Committee held two days of hearings on the bill to abolish the pre-emption. Lawyers argued against the bill, claiming the pre-emption is used to excuse a judge who may not give their client a "fair shake."

Both defense attorneys and Anchorage municipal prosecutor Allen Bailey argued for keeping pre-emptions around so they have a tool to excuse a judge they think is either too lenient or too harsh when it comes to sentencing.

Hunting charge dropped

FAIRBANKS — A felony charge alleging a man defrauded Belgian hunters by setting up illegal hunts in Alaska has been dismissed. Assistant Attorney General Tom Wickwire said the charge against Melville Morris, 58, was dropped because it would have been too expensive to fly the hunters to Alaska on three occasions to testify against him. Charges of guiding without a license and 13 other misdemeanor hunting and fishing violations still are pending against Morris. District Court Judge Jane Kauvar reduced his bail from $25,000 to $12,000 following dismissal of the felony charge.

Judge gives 15 days minimum for DWI

(6

By JAN O'MEARA
Special to The Daily News

HOMER — A Homer District Court judge last week announced a new sentencing policy that will increase to 15 the minimum number of days first offenders convicted of drunken driving must serve in jail.

"The situation has become so serious in Homer that something must be done immediately," said Judge James Hornaday in revealing the new policy.

Hornaday said that in addition to the minimum jail term, persons convicted of drunken driving will be fined, be required to work 10 days in a community service program, lose their driving privileges except for limited uses, and be required to enroll in an alcoholism screening and rehabilitation program.

The previous minimum jail term required for first offenders was three days.

The judge said if a convicted drunken driver refuses to participate in the community service program or the alcohol screening program, "they'll sit in jail 60 days."

Hornaday said drunken driving cases in Homer increased 70 percent in January over the same month in 1981. "Drunk drivers kill people," he said. "This (new sentencing policy) is not a war on alcohol. It's an attempt to solve a very serious problem in Homer."

Increased jail time has been linked to an 80 percent reduction in moose poaching on the Kenai Peninsula, Hornaday said.

Hornaday said he decided to increase the minimum jail term for drunken drivers after consulting with other judges, law enforcement officers, attorneys and alcoholism counselors.

"I certainly do not like to put people in jail, but hopefully the word will get out that driving under the influence will no longer be tolerated in Homer," he said.

Judge blames lawyers for high disq

Empire 2-3-83

Lawyers counter that challenges are needed to guarantee fairness

By CHRIS JARVIS
Empire Staff Reporter

Lawyers, not judges, are to blame for the high frequency with which some judges are disqualified from cases, Juneau District Court Judge Gerald O. Williams said today.

Williams is frequently disqualified from hearing cases because, in his opinion, "Alaska is the most lawyer-whipped state in a lawyer-whipped country."

Williams and Juneau Superior Court Judge Rodger Pegues have been named as two of six Alaska trial judges most frequently disqualified from cases. Pegues is on vacation and was unavailable for comment.

Alaska Court Administrator Art Snowden said the peremptory challenges, which allow lawyers to ask for a different judge without stating a reason, are an "administrative nightmare," noting it costs the state an estimated $20,000 a year to fly judges into a jurisdiction to hear a case.

Williams, a former Alaska State Trooper and members of the bench should not b[e] blamed.

Williams said it is his responsibility t[o] make sure a person accused of a crime is brought to trial within 120 days of h[is] arrest, he said. He thinks peremptor[y] challenges are often used to prolong th[e] time before trial.

Lawyers generally disagree.

"I don't know of any attorney" who us[es] peremptory challenges o[r] to prolo[ng]

qualification rate

cases, said lawyer Richard Burnham.

According to current rules, an attorney on either side of a case can request a judge be disqualified without giving a reason.

Requiring attorneys to say why a judge should be disqualified would present problems if a judge is not disqualified and the attorney must then argue a case before him, Burnham said.

Although acknowledging it costs money to fly a judge to hear the cases of a disqualifed judge, Burnham said there are other solutions to the problem. For example, he said, a superior court judge could hear district court cases or, if that is not possible, another district judge could be hired.

"It doesn't seem to me the goal of the judicial system is to run cheaply. It's to give people their day in court," Burnham said.

Williams, however, said if a case is prolonged long enough, eventually a case

Continued on Page 2

Judge...

Continued from Page 1

could be dismissed because the time limit for trial has been passed.

Admitting he is sometimes curt when on the bench, Williams said he finds it difficult to "put someone in jail in a nice way."

He defended his record, saying he treats everyone who is convicted in his court in the same way.

"I've still got friends who are mad at me (for sentencing them to jail), but it goes with the turf," he said.

"I admit I'm old fashioned," Williams said. He seldom likes to grant delays in court proceedings because cases often end up dismissed when delayed too long, he said.

Peremptory challenges are often used by attorneys in a "tactical and strategic" manner, Williams said.

Of defense attorneys, Williams said, "it is in their interest to prolong to avoid a trial."

However, it is not always in the best interest of the defendent, Williams said. Peremptory challenges and continuances might result in an attorney's client staying in jail, if not able to make bail, he said.

It is the court's responsibility to assure efficiency in the system especially with criminal case loads in Juneau almost doubling in four years, he said.

Sometimes 30 to 60 days will have elapsed days since a person's arrest before making the first court appearance. That leaves as few as 60 days before the case may go to trial, Williams said, noting motions for continuances, if granted, could extend beyond the 120 day limit.

Although some people who see Williams on the bench for the first time might see him as "a combination of Attila the Hun and Genghis Kahn," he said it is because his experience has taught him he must be absolute when passing judgement.

"I may appear curt in court but I've learned through experience that you've got to do it," he said.

Tough new drunk driving sen
raise flap; Homer judge stands firm

by Jan O'Meara
Staff Writer

Homer District Court Judge James Hornaday was disqualified from presiding over a drunk driving trial this week because of his newly adopted 15-day mandatory sentence policy.

Anchorage Judge Mark Rowland, presiding judge for the Superior Court, Third Judicial District, disqualified Judge Hornaday on Monday, based upon the motion and contention of Alan Beiswenger, attorney for defendant Stephen Seelye, that the 15-day sentence indicated a bias on the part of Judge Hornaday.

Mr Beiswenger had originally filed a motion asking Judge Hornaday to disqualify himself for bias, but the judge denied the motion.

Under Alaska law, Judge Hornaday was then required to submit the motion to the presiding superior court judge

Court procedure gives every defendant the right to challenge a judge, once only, so long as the challenge is made within five days of the judge's assignment to the case Mr Beiswenger made such a motion, but the five days had lapsed. Mr Beiswenger said, and Judge Hornaday denied that motion also

Mr Beiswenger said that his challenge was based on the theory that in establishing his own mandatory sentencing policy, Judge Hornaday was focusing solely on deterrence rather than reform or any other consideration as required by state statute

Judge Rowland declined comment Tuesday.

His law clerk, Richard Foley, speaking of the decision, said, "The legislature sets policy and has set a presumptory sentence of three days minimum. It's not up to a judge to change that policy." A judge must weigh each case on its own

Judge Hornaday said Tuesday that he intends to file a motion for reconsideration of Judge Rowland's decision within the week. If the disqualification holds, another judge will be sent to Homer to hear Mr. Seelye's case.

Even if he is disqualified on this case, Judge Hornaday said he intends to continue the policy he adopted last week. "I will stand on the procedure that's been initiated."

Alaska law contains no provision for forcing a judge to change a sentencing policy so long as it is within the range established by statute. Alaska statutes provide for a mandatory minimum sentence of three days and a maximum of one year.

If a judge is challenged, the court system must provide another, which in the case of Homer would mean bringing a judge in from Kenai or Anchorage. That has led some court system observers to speculate that Judge Rowland, as chief administrator for the judicial district, may rebel at the time, travel, scheduling and expense involved in continually supplying alternate judges to Homer for DWI cases.

Bill would give $750 in cash to Alaskans

JUNEAU (AP)--Every Alaskan would get about $750 in cash under a bill introduced by House Majority Leader Rick Halford and Rep. Vern Hurlbert to take effect if the U.S. Supreme Court outlaws Alaska's permanent fund dividend program.

Under the bill proposed by Halford, R-Chugiak, and Hurlbert, D-Sleetmute, every resident would be eligible for the one-time payment. A person would be considered a resident if he or she has lived in Alaska for at least 30 days as of the date the court issues a ruling.

The bill (HB743) calls for the $300 million already set aside for dividend payments to be paid out

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Although not quantifiable at this time, this bill has the potential for causing a significant fiscal impact on the Department of Law, the Public Defender and the Court System. The department rarely uses peremptory disqualification and the department's Criminal Division probably does so only 10 or 12 times each year. The problem will arise from the private criminal defense bar which disqualifies some judges 30% or 40% of the time. If the private bar continues to seek this same level disqualification, based on cause, our prosecutors will then have to devote substantial portions of their time participating in a two-tier disqualification hearing process. Without any prior experience to guide us, the department is hesitant to speculate on the actual cost that this bill might cause. The department does believe that this bill will have the effect of hampering its

6. SELECTION, TERM AND REMOVAL

This chapter examines the important issues of how the Attorney General is selected, how long he serves, how he can be removed, and how a vacancy in the office can be filled. Some of these issues, particularly that of election or appointment, have been subject to controversy since the first state governments were established. This report discusses existing practices and presents the arguments on both sides of these issues.

Method of Selection

Table 6 shows methods of selecting the Attorney General. He is popularly elected in forty-two states. He is appointed by the Governor in six states (Alaska, Hawaii, New Hampshire, New Jersey, Pennsylvania, and Wyoming), the three territories (Guam, Samoa and the Virgin Islands), and the Commonwealth of Puerto Rico. In Maine, he is selected by the Legislature and in Tennessee, by the Supreme Court. Now elected

The Attorney General is the most prevalent elective official in state governments except for the Governor, who is elected in all jurisdictions. The Treasurer is elected in thirty-nine jurisdictions, the Secretary of State in thirty-eight, the Auditor in twenty-five, and the Superintendent of Public Instruction in nineteen, compared to forty-two states in which the Attorney General is elected.[87] The 1970s witnessed a marked acceleration of the trend toward election of the Governor and Lieutenant Governor on a single ballot and such a practice is now followed in twenty-two jurisdictions. Thus, the Attorney General is actually the most common official who is elected on a single ballot. Where very few, but more than one, state executive officials are elected, the Attorney General is usually included among these few. He is, for example, among the three executive officials elected in Virginia, among the four elected in Maryland, Michigan and New York, and among the five elected in Rhode Island, Colorado, and Utah. However, he is not one of the two elected officers in Alaska, Hawaii, Guam, and the Virgin Islands, the four in Pennsylvania, nor the five in Wyoming.

Historically, the Attorney General has been an appointive, rather than elective, official. In England, he was appointed by the Crown and only incidentally acquired elective status through a seat in Parliament. In Colonial America, Attorneys General were usually appointed by the Governor of the Colony. The Attorney General of the United States still serves at the pleasure of the President with the advice and consent of the Senate.

Most of the first state constitutions specified that the legislature would choose the Attorney General. The concept of universal suffrage had not yet taken hold, nor had the idea of direct election of many officials.

Andrew Jackson's administration brought a new ethic to American government. The common man was considered competent to vote and to hold office, and direct election of officials became the rule. State constitutions provided for election of numerous officials, usually including the Attorney General.

A study published in the Law Library Journal[88] showed how methods of selecting Attorneys General developed in nineteen states; of these, eight provided for legislative selection prior to 1843, but none finally retained this method. Prior to 1845, twelve states provided by constitution or legislation for the appointment of an Attorney General by the Governor, the legislature, or other authority. The trend then turned toward election. For example, North Carolina's 1776 Constitution provided for appointment by the legislature; its 1868 Constitution provided for election. Louisiana's 1812 Constitution provided for appointment by the Governor; its 1852 Constitution provided for election. Michigan's 1835 Constitution provided for appointment by the Governor; the 1850 Constitution provided for election. Virginia's 1776 Constitution provided for selection by the legislature; its 1902 Constitution provided for election. Kentucky's 1792 Constitution provided that the Governor would appoint the Attorney General, with the consent of the Senate; the 1850 Constitution made the office elective.

Wyoming, in 1899, became the first "new" state to provide for appointment of the Attorney General, thereby ending the trend toward popular election. Alaska's 1959 Constitution and Hawaii's of 1960 provided for Gubernatorial appointment, following the policy set by their territorial conventions in 1950 and 1956.

Strong arguments can be advanced for either system of selection. There is not necessarily a correlation between the selection process and the extent of the Attorney General's actual powers. For example, the Attorney General is elected in Delaware and appointed in Alaska, but in both jurisdictions he has control over all legal and prosecutorial functions. In some states, the Attorney General is independently elected, but he exercises little power at either the state or local level. Thus, a "strong" department of justice can be developed under either system of selection, but is not guaranteed by either.

Proponents of an appointive Attorney General usually base their arguments primarily on the need to strengthen the executive. As one view, the commentary on the Model State Constitution developed by the National Municipal League says that:

> All authorities on executive organization agree with the position embraced by the Model State Constitution for more than 40 years that administrative power and responsibility should be concentrated in a single popularly elected chief executive. There is growing recognition that the governor, as the representative of all the people,

88. Lewis Morse, Historical Outline and Bibliography of Attorneys General Reports and Opinions, 30 LAW LIBRARY JOURNAL 39-245 (1937).

should be equipped with the constitutional status necessary to exercise constructive leadership as the chief lawmaker and political head of his state.[89]

The Model Executive Article for state constitutions recommended by the Committee on Suggested State Legislation of the Council of State Governments limits statewide elective officials to the Governor and Lieutenant Governor, who are elected jointly. This article was developed by the Committee on Constitutional Revision of the National Governor's Conference.[90] Studies on administrative reorganization usually argue that fragmentation leads to irresponsibility, but a single chief executive can be held accountable through the electoral system and, as a consequence, can make the administration more responsive. Proponents of an appointive Attorney General argue that his function is to advise the Governor, who should be permitted to choose his advisors. They believe that the two officials are more likely to maintain the close and harmonious relationship that is necessary for effective liaison if the Attorney General is appointed.

Advocates of appointment also contend that the elective process may not assure professional competence. The pressures of politics and the time involved in campaigning limit an Attorney General's abilities to serve effectively, and many highly competent people would not be willing to undergo the election process. They also argue that the Attorney General's primary function is to interpret the law, which is a technical task and should not involve the political process.

The arguments for an elective Attorney General were cogently summarized by Attorney General Louis J. Lefkowitz in a position paper submitted to the New York Constitutional Convention in 1967. General Lefkowitz reviewed the Attorney General's duties in some detail, pointing out they were predicated upon his role as an independent official, and concluded that:

> To sum it up-- an elected Attorney General has a measure of independence and a sense of personal and direct responsibility to the public. The elected official has a natural and impelling desire to be creative and to exercise broader initiative in the service of the public. He is free of the fear of dismissal by any superior official if he should exercise contrary independent judgment. He is in the best position to render maximum service to the People and impartial advice to the Governor, the Legislature and State departments and agencies. He can appear in Court without fear or favor-- an attorney in the fullest and finest sense of the word.[91]

89. National Municipal League, MODEL STATE CONSTITUTION (6th ed.) 65-66 (1963).

90. The Council of State Governments, 1970 SUGGESTED STATE LEGISLATION, 3-4.

91. Attorney General Louis J. Lefkowitz, Position Paper of Louis J. Lefkowitz Attorney General, to Constitutional Convention, Committee on the Executive Branch, June 1, 1967, Albany, N. Y.

An equally strong position in favor of election was taken by Attorney General William J. Scott before an Illinois Constitutional Convention; he stressed that the Attorney General's roles of "government watchdog" and "attorney for the people" required independence from the Governor.[92]

The primary argument for an elective Attorney General is that he is an attorney for all the people, and should be chosen by them. He is the Governor's advisor, but not exclusively; the Governor is merely one among many clients. By making the Attorney General directly responsible to the electorate, he remains subject to the ultimate source of power and will be more responsive to public needs. As discussed elsewhere in this report, the courts increasingly recognize that the Attorney General is responsible to the people, not just to the government. It is further argued that the Attorney General has important administrative and legal functions, such as programs in consumer protection and environmental control. In executing these functions, an Attorney General is acting as an advocate for the people, not as agent of the executive branch. His duties usually include prosecution of election violations, collection of debts, and bringing of suits in the name of the people; these responsibilities are outside the scope of the Governor's duties.

Many arguments for election center around the fact that the Attorney General's duties are of the highest order and he should enjoy the same independence as a member of the judiciary. He should not be a creature of the Governor, but should render opinions solely on the basis of law. He should not be the advocate for a particular administration, but should be free to oppose policies which he considers inconsistent with the law and to investigate apparent wrongdoing.[93]

In reference to the argument that an appointed Attorney General is a non-political technician, it should be noted that appointment does not necessarily remove the office from politics. Some appointed Attorneys General have been politically active as potential candidates for other office or on behalf of the Governors they serve. At the federal level, Presidents have frequently named as Attorneys General persons who had been active in their campaigns. This has also been true in some states.

In his remarks to a legislative committee which was considering a constitutional amendment to make the office appointive, former Attorney General Meyer of Nebraska mentioned several arguments in addition to those usually advanced by proponents of election. These included the following points: the Governor can appoint men with legal training to his staff if he feels he needs lawyers of his own choosing. Much of the Attorney General's work is in areas in which the Governor has little or no interest,

---

93. See summary of arguments presented to New York's constitutional conventions in Robert H. Gordon, The Relationship Between the Attorney General and Agency Counsels in New York State, (Unpublished Ph.D. Dissertation, Syracuse U.), Ch. 1 (1966).

such as advising county attorneys and handling routine criminal appeals. The Governor is only one of many state officials whom the Attorney General advises.[94]

Confirmation of Appointment

In all six states where the Governor appoints the Attorney General on a regular basis, the appointment is confirmed by either the Senate (Hawaii, New Jersey, Pennsylvania, Wyoming), both houses of the Legislature (Alaska), or by the Council (New Hampshire). Confirmation in Pennsylvania requires a two-thirds vote of all the members of the Senate.

In Puerto Rico and the Virgin Islands confirmation is also by the Senate. In Guam, appointments are made with the "advice and consent" of the legislature, but in Samoa appointment is by the Governor with no requirement for confirmation. Although all Pennsylvania Attorneys General of recent years have been in the same political party as the Governor, the requirement of approval of two-thirds of all elected members of the Senate for confirmation of the Attorney General gives the minority party considerable leverage over appointments. However, there has been no indication that this has caused problems.

The various model constitutional provisions that have been proposed differ on the need for confirmation. The Advisory Commission on Intergovernmental Relations' suggested constitutional provision for a short ballot for state officials provides for Senatorial confirmation of gubernatorial appointments. The Model State Constitution of the National Municipal League does not mention confirmation. There is no extensive literature on the precise manner in which appointments are to be confirmed.

Length of Term and Succession

Forty-four states presently provide a 4-year term for the Attorney General and four states a 2-year term. Tennessee sets the term at 8 years and New Hampshire at 5. In Guam, Puerto Rico, and the Virgin Islands, the Attorney General is appointed for an indefinite term. In Samoa the term is also of an indefinite length, although there is a minimum of 2 years for an initial appointment. Table 6 indicates the length of Attorneys General's terms and the statutory or constitutional rules on succession.

The trend is clearly toward longer terms. Most states initially limited terms of officals to 1 or 2 years, on the theory that frequent elections kept government closer to the people and prevented the accretion of power by elected officials. Many states prohibited successive terms on the grounds that official power must be limited. These arguments may have been cogent at a time when Attorneys General had relatively few duties to

94. Letter from Attorney General Clarence A. H. Meyer to Patton G. Wheeler, November 24, 1970.

perform, and those duties were relatively well-defined. Present Attorneys General, however, cannot effectively operate with a 2-year term, which does not allow time to master the duties and responsibilities of the office. Neither should they be subjected to the continuing campaign requirements imposed by an election every 2 years. For these reasons, NAAG has recommended that the Attorney General should be elected or appointed for a minimum term of 4 years and should be allowed to succeed himself.

The number of Attorneys General serving 2-year terms has declined drastically in recent decades. In 1937 there were twenty-one, but this number fell to nine by 1970, and then to four by 1976. Arizona went from 2 to 4 years in 1970, and Wisconsin and New Mexico in 1971. The 1972-73 legislative biennium saw four more states-- Iowa, Kansas, South Dakota, and Texas-- shift to a 4-year term for the Attorney General. Apparently only one jurisdiction has ever gone from a 4-year to a 2-year term; this occurred under Missouri's 1865 Constitution, which was adopted during Reconstruction; its 1875 Constitution later restored the 4-year term. Voters in Rhode Island, however, rejected a 1972 proposal which would have extended from 2 to 4 years the terms of all executive officers, including the Attorney General.

Succession to Office

There are few restrictions on Attorneys General serving successive terms. There are restrictions on Attorneys General succeeding themselves in only three states: Kentucky, New Mexico, and Alabama. Only Kentucky absolutely prohibits immediate succession by the Attorney General. Until 1968 Alabama allowed only one term, but an amendment that year permitted the limited succession. New Mexico restricts the Attorney General to two terms of 2 years each.

The Model State Constitution permits succession in the office of Governor because:

> The main argument favoring restriction in the term of the governor is fear of bossism or perpetuation through use of the powers of the office. This is always a possibility but the better argument seems against any form of restriction. Limitations of this kind restrict the right of the people to pass judgment upon the quality of the gubernatorial service performed for them and thus eliminates from the field the one candidate about whom the voters usually know the most. From a program policy point of view, a restriction on service in office affects the governor's ability to develop and implement a long-range plan.[95]

These arguments apply with equal validity to the office of Attorney General.

95. National Municipal League, MODEL STATE CONSTITUTION (6th ed.) 66 (1963).

Removal from Office

There are several mechanisms for removing Attorneys General: impeachment, recall, or removal by the Governor, the legislature, or the courts. Information is not available on how often these methods have been used or how well they operated.

Of the fifty-four jurisdictions, thirty-six provide for impeachment. It is the only method of removal provided in twenty-one of these jurisdictions. Impeachment processes vary, but proceedings are usually instituted by the lower house and, if it votes to impeach, the charges are tried by the upper house. In New York, the judges of the court of appeals, the state's highest court, sit with the members of the Senate as a court of impeachment. In Nebraska, impeachment charges are proferred by the unicameral Legislature and tried before the state supreme court. In Missouri, impeachments are tried before the supreme court after charges are filed by the House of Representatives.

An impeachment proceeding is rare, and is used only under the most extraordinary circumstances. Apparently, the last impeachment trial of an Attorney General was in Kansas in 1934. That action resulted in an acquittal.[96] Whatever grounds are prescribed grounds for impeachment, the method is not a common means of removing officials. It can be utilized only when the legislature is in session and is quite time-consuming.

Fifteen states which provide for impeachment also provide alternative removal processes. In the ten jurisdictions where the Governor appoints the Attorney General, he may also remove him. In Hawaii, the Senate must consent to such removal. In New Jersey, the Attorney General can be removed by the Governor for cause only after an opportunity to be heard has been granted. In New Hampshire, the Governor and the Council may remove the Attorney General on address of both branches of the legislature. Five other states provide for Gubernatorial removal of the Attorney General. In Maine, the Governor and Council may remove on address of both branches of the legislature. In New York, removal is by the Governor and the Senate. The Governor of Arkansas, upon address of two-thirds of the members of each house of the legislature, may for good cause remove the Attorney General. In Michigan and West Virginia, the Governor may remove him without the consent of another authority.

The legislature stands alone as a removing authority in proceedings other than impeachment in seven states. Recall may be used to remove the Attorney General in Arizona, Colorado, Louisiana, North Dakota, Oregon, Washington, and Wisconsin; he is an elective officer in all of these states. Louisiana reports that the district court may remove the Attorney General, and Maryland indicates that removal is attendant to any conviction in a court of law.

As a result of a court decision, an Arizona Attorney General was removed from office in 1947, having been adjudged guilty of conspiring to violate the gambling laws of the state. The Governor considered the office

96. New York Times, February 7, 1942, at 17.

term in 1894. Further, it mentioned that vacancies would be filled by Gubernatorial appointment until the next general election, when an Attorney General would be chosen to fill out the term or commence a new term. The Governor appointed an Attorney General in 1891. The question of the case was whether there was to be an election to fill out the first "quasi-term" in the general election of 1892. The court ruled that there was to be such an election.

The Supreme Court of Georgia reached the opposite conclusion in a 1939 case.[99] It held that the office of Attorney General was created under the judicial article, hence the rule that provisions for elections to fill vacancies in executive positions did not apply to it. The Gubernatorial appointee to fill a vacancy created by a resignation was to serve out the full 4-year term of office without standing for election.

99. Wood v. Arnall, 189 Ga. 362, 6 S.E.2d 722 (1939).

vacant and appointed a new Attorney General. The former Attorney General, however, refused to vacate his office. Subsequent court action affirmed the validity of an act which provided that an office would be vacant if its incumbent was convicted of a felony. The court reasoned that the powers of impeachment were an added protection for the public, not the sole protection.[97]

Filling Vacancies

Vacancies in the office of Attorney General may be filled by appointment of the Governor, the legislature, or the supreme court. An overwhelming majority of the jurisdictions indicate that the Governor fills vacancies as soon as they occur. In Maine, Massachusetts, New York and Virginia, the legislature fills vacancies; however, if it is not in session, the Governor makes the appointment. In Maine, he must have the approval of the Council. Tennessee provides that the Supreme Court will fill vacancies, since it normally appoints the Attorney General. In two states, Louisiana and New Jersey, the First Assistant or Deputy Attorney General becomes Attorney General until a successor is elected or appointed.

Where the Attorney General is appointed, it would seem proper that the appointing agent also fill vacancies, as is the case in all such jurisdictions. The rationale for filling vacancies when the office is elective is less clear. All but four of the states which have an elective Attorney General permit the Governor to make appointments. Three permit the legislature to name an Attorney General, and in one the deputy is promoted. Allowing the Governor to fill vacancies in an elective office seems contrary to the chief arguments for election, those concerning independence from the executive. It is also questionable whether a Governor of one party should be allowed to fill a vacancy in an office which was held by a member of the opposite party.

An Assistant or Deputy Attorney General is often promoted to fill a vacancy, even if this is not required by law. If the Deputy Attorney General is promoted to fill a vacancy, the chances of continuity in office programs are greater; however, the Attorney General may select his chief deputy according to different criteria from those he would use in selecting his own replacement.

Vacancy appointments for elective offices usually are valid only until the next general or next biennial election. At that time, if the original term has not elapsed, a short-term Attorney General is elected. This point was litigated in Oregon.[98] The statute creating the Oregon office in 1891 provided that the Attorney General would be elected for a full 4-year

POSITION PAPER

of

LOUIS J. LEFKOWITZ

ATTORNEY GENERAL

to

CONSTITUTIONAL CONVENTION,

COMMITTEE ON THE

EXECUTIVE BRANCH

in support of

PROPOSITION THAT THE PRESENT

CONSTITUTIONAL PROVISION FOR

THE ELECTION OF THE ATTORNEY

GENERAL SHOULD BE RETAINED

POSITION PAPER

Submitted to the Constitutional Convention,
Committee on the Executive Branch,
at hearing held on June 1, 1967
at the State Capitol, Albany, New York

PROPOSITION

THE PRESENT CONSTITUTIONAL PROVISION FOR THE ELECTION OF THE ATTORNEY GENERAL SHOULD BE RETAINED.

HISTORICAL BACKGROUND AND COMPARATIVE ANALYSIS

In the early years of the Colony of New York (17t' century), the Attorney General was an appointee of the Royal Governor who was, himself, an appointee of the English Crown. About 1700 the intermediary was dropped and appointment of the Attorney General was vested directly in the Crown.

In 1777 the first Constitutional Convention established the State of New York, appointed all the State officers deemed necessary in the establishment of the new state, and provided for a Council of Appointment to make future appointments. Under this system, appointment of State officers was the rule rather than the exception. The Attorney General could be removed at any time and frequently was removed. There was neither difficulty nor hesitancy in removing him when a majority of the Council was of the opposite political faith. The fact of the matter is that under this system the average tenure was less than 2-1/2 years.

At the Constitutional Convention of 1821 a proposal was made that the Attorney General be appointed by the Governor with the consent of the Senate. This was rejected by the Convention and, instead, provision was made that the Attorney General, together with other important State officials, be elected by the Legislature.

By 1846 there was an overwhelming demand for the popular election of the Attorney General. This was recognized by the Constitutional Convention of 1846 and made a part of our Constitution.

Historically, traditionally, and as a matter of basic constitutional mandate, we have continued to elect our Attorneys General in New York State for the past 121 years. This is not to say that the question has not been raised or the problem re-assessed from time to time in the light of vastly changed conditions. As a matter of fact, at every Constitutional Convention since 1846 the question was reconsidered and in each instance the Convention adhered to the elective system.

Comparatively considered, and without going into the historical background of each case, it may be noted that in forty-two of the fifty States the Attorneys General are elected by the people. Interestingly, included among the States which follow the elective system are many of the most populous states in the Union (for examples: New York, California, Illinois, Ohio, Michigan and Massachusetts).

POINTS IN SUPPORT OF AN ELECTED ATTORNEY GENERAL

1. Independence.

While the history of the office of the Attorney General of New York includes efforts to make the Attorney General an appointed officer, it is significant that for upwards of one hundred years without interruption that office has survived as one to be filled by the elective process. Thus, retaining the Attorney General as an independent constitutional officer to be elected by the People of the State not only reserves to the People their traditional right to select a candidate of their choice as the State's highest ranking legal official, but has the added advantage characteristic of a democratic government of greater assurance that the laws of the State will be construed and applied objectively and without favor.

Exactly 100 years ago, at the Constitutional Convention of 1867, when that issue was considered, the report of the discussion states in part:

"The Attorney General holds a dignified position; he has important functions and acts on his own judgment and responsibility" and further, "It was not the Governor alone, but the people who wanted an Attorney General. He was to look after the interest of the people in the State and take care of their money so far as action in the courts was concerned * * *," and again, "If he (the Attorney General) does his duty it matters little to the people whether he is

in accord with the Governor or not." "Indeed," observed a delegate, "it may be to the interest of the people that the Attorney General should not always be in accord with the Governor," and more, "that he should be a man who could not be ordered by anybody. His opinions should be above any fear of the loss of his office. His duties are of the highest order * * * as high as those of any judicial officer; and he should be as independent as any judge. The Governor should have no more power to remove the Attorney General than he has to remove the Chief Judge of the Court of Appeals. His opinions are upon great questions, affecting the great questions of the State. He ought not be a mere creature of the Governor to supervise his vetoes and obey his dictation."

This independence of action and expression is particularly significant with respect to opinions of the Attorney General concerning the construction of statutes and the validity and propriety of acts thereunder by other departments and agencies of the State.

All of the various departments and agencies of government turn to the Attorney General for legal advice and for the rendering of Official Opinions. Such opinions are acted upon daily and a great deal of the operation of the State government depends upon the nature of the advice that is so rendered. These Opinions are rendered to all departments of the State government, those under the direction

and supervision of the Governor and those under the direction of other elected officials. It is important to note that the Opinions have a direct and significant impact upon the People in their daily life. Here is a compelling reason why the Attorney General should continue to be independently elected. If the Attorney General is appointed by the Governor, then of necessity his opinions must reflect the philosophy of that Governor or the relationship would not be a compatible one.

An Attorney General does not give partisan advice; he gives legal advice. There is no such thing as "Democratic" law, "Republican" law, "Conservative" law or "Liberal" law. There is simply "law" — and the Attorney General, with the same degree of impartiality and objectivity as a Judge, calls it as he sees it.

The independent status of the Attorney General — the fact that he is the People's choice and is accountable to no one else — is implicit in the wide range of his official activities and duties which are based on the concept of his independence. Thus, he is, ex officio, a member of several boards and commissions, the other members of which are usually representatives of the administration. Thus, it is his duty to defend in Court the constitutionality of an act of the Legislature regardless of whether the current administration, as a matter of policy, supports it or not. And thus, with regard to proposed legislation, it is his duty impartially

to consider its constitutional validity and statutory interpretation and advise the Governor accordingly, regardless of the latter's policy consideration of such bills. If the Attorney General were an appointee of the Governor such functions may be rendered anomalous because the objectivity and impartiality inherent in his independence would necessarily fall with the destruction of his independence.

Furthermore, the responsibility for the effective protection of the consumer and the investor entrusted to the Attorney General (the prototype for similar authority in the Attorney General in many states in the Union) is predicated upon the existence of an independently elected Attorney General who will not be deterred (as during my tenure) in taking the initiative for affirmative action by the opposition of other governmental departments or agencies, the heads of which are appointed by the Executive. My own experience in the past ten years as Attorney General is illustrative of this fact. Thus, the creation in 1957 of the Consumer Frauds and Protection Bureau in the Department of Law was resisted on the ground that there would be duplication of some of the functions of the Banking Department. Similarly, the establishment of the Real Estate Syndication Bureau in the Department of Law was effected despite executive resistance on the ground that the Attorney General would thereby be performing a function in an area presumably

policed by the State Division of Housing. The creation of the Civil Rights Bureau in 1957 was opposed on the ground that it overlapped and duplicated existing functions of the State Commission Against Discrimination. These three bureaus were created by an elected Attorney General who acted on his own initiative in behalf of the people. The important fact is that they were created without clearance from the Executive.

The basic statutes (Executive Law § 63[12] and Business Corporations Law §§ 109 and 1101) confer authority upon the Attorney General to investigate and secure judicial disposition restraining any illegal and fraudulent acts. This power is not circumscribed or qualified by the existence of concurrent jurisdiction in a limited area by other government officials. Such authority of the Attorney General obviously bespeaks an independent Attorney General.

Similar independence is called for in the invocation and enforcement of the State's anti-trust law. The vigorous enforcement in the last ten years of this statute, aided by the expanded powers authorized by the Legislature, has been so singularly impressive as to receive national attention and commendation. The intensity of such activity should not, as is the case elsewhere, be made subject to the decision of a Governor who may be influenced by many factors alien to proper anti-trust considerations. Such enforcement must be left to an independent Attorney General responsible only to

the People for the implementation of the State's anti-trust policy.

My views are based on ten years of close affiliation with all branches of State Government — with the Governor and his Counsel, with the Legislature and its Committees, leaders and members, with the executive departments and agencies and their counsel, with the Judiciary, and with Authorities and local subdivisions and their officers and counsel. The activities of the State are so vast in magnitude, so varied and complex in character — the actions of its constituent elements being occasionally at cross-purposes — that, in the best interests of the People of the State there must necessarily be premised as greater assurance of independence, impartiality and objectivity, an Attorney General who is elected.

In West Virginia, where the Attorney General is elected, the incumbent Attorney General said:

> "I've been an elected Attorney General for two terms, and in the exercise of my duties I could not have fairly represented the agencies of government or the citizens of this State had I been subject to the whims of the executive or subject to political pressures other than the voters.
>
> "* * * In every occasion wherein one would have the authority of appointment, he also would have the 'hammer' on tough questions of policy. No Attorney General should be forced to operate under such an

> arrangement. The mere fact that it would be possible should be precluded."*

The overwhelming weight of opinion in favor of the elective process, predicated on the concept of the independence of the office, is exemplified by expressions of official views throughout the United States. Thus, at the Constitutional Convention of the State of Michigan, held as recently as 1963, in adhering to the elective process, it was said:

> "We favor election of the attorney general, the chief law enforcement officer of the state. In a representative government, appointment of the chief law enforcement officer would place him in a position of obligation which would make his duties more difficult. If the attorney general were appointed, he could be subjected to the influences of the appointing authority. Presently, he is able to make an independent legal judgment which might differ from the political decisions of other members of the executive branch. * * * [T]he governor has to make many decisions. Many of them are political decisions. I don't think that the best interests of the state can be served if the attorney general is appointed so that he must confirm the political decision of the governor. I think that the people of the state of Michigan have a right to the service of an attorney general who can say no, when the law and the interpretation of the law demands that he say no."

The Attorney General of Maine, who is appointed by the Legislature, said:

---

* At my invitation the Attorneys General of virtually all of the States have stated their positions on the proposal here under discussion. Copies of their replies have been submitted to your Committee.

> "[I]f the Attorney General is appointed by the Governor, there is always the question of whether or not he becomes in the nature of a legal rubber stamp and convenient oracle of the law for the Governor's purposes."

Oregon's Attorney General states that "the elected Attorney General is the people's best guarantee of vigorous and impartial interpretation and administration of state law."

Perhaps the most forthright statement of all has come from the Attorney General of Nevada:

> "When you place the chief legal office of the state under the appointing power of the Governor you rob him of the complete independence that is his when elected by the people.
>
> "It is this very independence which results in the fearless and efficient administration of justice."

Although no elective Attorney General has favored an appointive process, it is interesting to note that two appointive Attorneys General are in favor of the elective system. Maine's Attorney General, appointed by the Legislature, has said:

> "I think I am of those who would like to see the Attorney General in Maine elected at large by the people * * *."

And the Attorney General of Alaska, who is appointed by the Governor, has said:

> "Again, from my own experience, if I were given the choice I would be inclined to favor the elective position over the appointive for the simple reason that I believe that a lawyer can function more

> effectively if he has freedom of action in his own specialized field."

It has been argued that the elective process may result in a Governor of one political party and an Attorney General of another, with possible resultant disharmony and friction in the running of the State government. Of course, as a matter of abstract theory, implicit in the concept of independence is the concept of potential disagreement. And it is always possible that incumbents who are influenced solely by political motivations are capable of disruptive tactics. But experience has shown that men who have the knowledge, experience, character and maturity to have attained the high office of Attorney General can be relied on to have a sufficient sense of responsibility and responsiveness to the public need to make such accommodations as the law will permit.

It should be noted that in those jurisdictions in which the Attorney General is appointed, because it is believed that the Governor and the Attorney General should be of the same political faith, the Attorney General is merely a part of the Executive branch of the state. An elected Attorney General, as in New York, is more than merely a part of the Executive branch.

While harmonious relations between the Governor and the Attorney General are unquestionably desirable, it seems that harmony merely for its own sake is too high a price to pay for the loss of the independence which gives greater assurance of effective government in the public interest.

It has been said that the Governor should at all times have an Attorney General with whom confidential matters can be transacted; that the Governor should not be compelled to retain his own counsel. But this is based on the erroneous concept that the Attorney General is the Governor's counsel. He is not the Governor's counsel in the normal sense of the term; he is the People's counsel. This is recognized even in States, like New Jersey, where there is Counsel to the Governor despite the fact that the Attorney General is appointed by the Governor.

The diverse functions of the Attorney General and the Governor's counsel may be succinctly summarized as follows:

(a) Attorney General

1. Litigation in all courts.

(a) Court of Claims - Representing the State and its agencies and officials in all claims based on contracts, torts and appropriations.

(b) All other Courts - Representing the State, the Governor, State Departments, Agencies and Authorities, the Judiciary, and the Legislature.

(c) Defending the validity of statutes which are attacked as unconstitutional.

(d) Habeas corpus matters - criminal and civil.

(e) Affirmative actions in all courts on behalf of the People in such matters as consumer frauds, anti-trust, civil rights, security frauds, realty investment frauds, and theatrical financing and charity frauds.

2. Renders opinions and advises the State, the Governor, the Legislature, and all State departments, agencies and officials.

3. Submits memoranda to the Governor on bills passed by the Legislature.

4. Renders advice on an informal basis to political subdivisions of the State.

5. Exercises criminal jurisdiction under the Executive Law and other statutes.

6. Supersedes District Attorneys when directed by the Governor.

7. (a) Administers registration of brokers, dealers and salesmen who deal in securities, and exercises enforcement powers.

   (b) Supervises public offerings of real estate (syndication, investment trusts condominiums, and cooperatives) and theatrical financing, and exercises enforcement powers.

   (c) Administers registration of theatre box office ticket-selling personnel, and exercises enforcement powers.

   (d) Administers registration of charitable foundations and trusts, and exercises enforcement powers.

   (e) In dealing, in court or otherwise, with estates and trusts in which the People are possible beneficiaries, he appears on behalf of the People.

(b) Counsel to the Governor

1. Advisor to the Governor.
2. Prepares annual message and special messages of the Governor.
3. Prepares Governor's legislative program.
4. Assists in the preparation of the departmental legislative programs.
5. Handles complaints against officials.
6. Extradition.
7. Clemency.

A further distinction in function between the Attorney General and Governor's counsel resides in the affirmative work of the Attorney General on behalf of the People which is constitutionally and statutorily imposed upon him. Thus, to name but a few of his functions, some of which have been mentioned, he acts affirmatively in matters of consumer protection, civil rights, anti-trust matters and charity frauds. Constitutionally, he acts under Article I § 6 of the Constitution against public officers and employees who refuse to waive immunity or testify in grand jury investigations. There are other statutory provisions, too numerous to mention, under which the Attorney General is required to take affirmative action. The most recent of those provisions, as an example, is the new Public Employees' Fair Employment Act (Laws of 1967, Chap. 392) under

which the Attorney General is now placed in the highly important field of public labor relations.

Obviously, because of the overriding primary allegiance of the Attorney General to the People, rather than to the Governor, the basis of the independence which is the hallmark of the office of the Attorney General, it is perfectly proper that the Governor have his own counsel. There is no antipathy between the two offices. Despite some unavoidable duality of operation, they complement each other.

That the existence of both positions does not create a problem of unavoidable friction is attested to by actual experience in our own State when we had a Democratic Governor with Counsel of his political persuasion and a Republican Attorney General. Dean Daniel Gutman, former Counsel to Governor Harriman, wrote to me as follows:

> "During the four years in which I served as Counsel to the Governor, I enjoyed a compatible and co-operative relationship with the Attorneys General, - first, the present Senator Javits and then yourself.
>
> "On occasions we found ourselves in disagreement. This occurred very rarely, and it served to reinforce my opinions on the more numerous occasions when we were in complete accord.
>
> * * *
>
> "In my opinion the broad scope of the Attorney General's activity, his

> great and varied responsibilities and the volume of business, particularly in a State such as ours, requires that this official be elected rather than appointed. I see nothing worthwhile that can come from a change in the present system that has been in existence here as in most other States, for so many years."

Judge Samuel I. Rosenman, who was counsel to Governor Roosevelt, observed that perhaps ten per cent of his time was devoted to legal matters. He added:

> "Neither the Counsel to the Governor nor Counsel to the President can render any official opinion. Official opinions can come only from the Attorney General; so it is not quite accurate to say that the Counsel takes the place of the Attorney General in serving the Chief Executive."

Although Judge Rosenman leaned toward the appointive method, he conceded:

> "Having said all the above, presenting the pros and cons, I don't think I am completely convinced on either side. It is as Oscar Hammerstein said in THE KING AND I a 'puzzlement.'"

Governor Poletti, who was counsel to Governor Lehman, observed:

> "I do not favor the discontinuance of the Attorney General as an elected official and his appointment by the Governor."

Pointing out that, since the Governor and the Lieutenant Governor are elected as one, the only two remaining statewide officials who are elected are the Attorney General

and the Comptroller. With perspicacity born of a lifetime of experience Governor Poletti added:

> "The people are smart enough to vote for each of these officials, and there is serious danger in reducing the scope of participation by the people in their government.
>
> * * *
>
> "* * * In all events, I believe the State greatly benefits from the independence of the Attorney General and Comptroller."

2. Separation of Powers - Checks and Balances.

As a corollary to the concept of the independence of the office is the fundamental concept of a democracy respecting the separation of powers--the system of checks and balances. "Appointment" of the Attorney General is incompatible with the doctrine of the separation of powers. There is nothing intrinsically wrong with the concept of a Governor of one political party and an Attorney General from another. They can and do often act as a "check" upon one another and if, as a result, there is occasional friction, this is a healthy phenomenon which a viable and dynamic political society can survive and, indeed, probably be the better for it. In certain situations, given a weak or ineffectual Legislature and a strong and forceful Governor, the only effective balancing and checking power may come

from an Attorney General who publicly espouses a responsible opposing point of view.

The Attorney General of Kansas expressed the point well:

> "[T]he elected attorney general is a further extension of the system of checks and balances which was incorporated into the form of government initiated by our founding fathers and which has flourished in the United States since its beginning."

To the same effect is the statement of the Attorney General of Minnesota:

> "[T]he office of Attorney General has developed in state government in a unique way. State legislatures do not have the broad investigative power that the Federal Congress has. In most states — one of the most important statewide investigative officials is the Attorney General. If an Attorney General was to be appointed by the administration he then becomes solely dependent upon it and tends to overlook problems which develop within that administration.
>
> * * *
>
> "* * * [U]ntil there is some alternative form of check and balance on state government, a broadly based elected Attorney General is preferable to one appointed by the Governor."

The Attorney General of the State of Washington, an elected official, has said:

> "The reason I would like to see the Auditor and Attorney General elected by the people is because I believe in

> government there are two necessary ingredients--money and law. These are so important that I think an official personally responsible to the electorate should be chosen by the people to provide the necessary check and balance.
>
> * * *
>
> "The law is the whole touchstone of our Democratic form of government. The man or woman who says the law is or is not being followed should be, in my belief, directly responsible to the people."

Vermont's Attorney General has stated:

> "Having an independent Attorney General, elected by the people of the state as a whole, is but another check and balance in state government that in the all important realm of legal and constitutional interpretations is essential to the sound functioning of state government, * * *."

The Ohio Attorney General believes that the elective status of the office "constitutes one of the more effective balances of the Executive Department of the State." He adds:

> "The Attorney General's office should be run as a law office, with a completely objective approach to the legal problems of an administration, and should not be relegated to a position of house counsel finding ways and means to support executive policy. By being elected the Attorney General is responsible only to the people of the state and this, to my way of thinking, is as it should be."

Maryland's Attorney General summarized the situation very succinctly:

> "From a historical point of view Maryland's system of electing both the Governor and the Attorney General appears to have effectively served the best interests of the people of this State. That system is but another example of the checks and balances so carefully written in the Constitution of Maryland. It is my opinion that to take away from our citizens the right to elect the Chief Legal Officer of the State is to lessen their direct participation in affairs of government, and I vigorously oppose any such change in our traditional practices."

Election results, both on the State level and in the City of New York, reveal that our sophisticated electorate does not always choose a straight party ticket. At the level of Governor and Attorney General, the people should have the right to split their ticket and choose the best candidates even though they are not necessarily of the same political party. Indeed, the split ballot is proof positive that the people, themselves, are not concerned with whether the Attorney General is of the same political persuasion as the Governor.

3. <u>The elected Attorney General has a direct responsibility to the People</u>.

Also as a facet of the "checks and balances" concept and a further corollary of the "independent" status of the

office is the underlying premise, which has historical, traditional and logical validity, that only the People should be in a position to command the Attorney General's undeviating allegiance and loyalty. The correlative of this concept is that the Attorney General's prime and direct responsibility is to the People.

An elected Attorney General is imbued with a deeper sense of direct responsibility to the public from whom he has received a mandate than is the appointed official whose authority springs singularly from one individual. The elected official innately senses this strong personal and direct responsibility to the People and is thereby inspired to a greater degree of creativity, a broadened initiative and an increased desire to innovate in their behalf. The reaction is almost intuitive. As a result, he is free to act without clearing a matter with the executive hierarchy or obtaining the Governor's approval. I have already detailed my experience in this regard when I established the Consumer Frauds and Protection Bureau, the Real Estate Syndication Bureau and the Civil Rights Bureau in the Department of Law. Also, in this connection, I wish to point out that the Department of Law prepared and had introduced during my tenure, without executive clearance, our own legislative program, in the public interest, to protect

the consumer, the investor and the legitimate business man, as well as bills to reinforce civil rights.

The Attorney General of Wisconsin expressed the concept well:

> "An Attorney General also performs numerous functions independently of any state agency. I refer particularly to his activity in such fields as consumer protection and anti-trust enforcement. I believe that an Attorney General who is responsive to the needs of the people can better fulfill these duties which have been entrusted to him by the people.
>
> "It is my firm opinion that a State Attorney General should be an elected official. He should represent and be responsive to all of the people of the state. I believe that the activity of the Attorney General in the field of consumer protection alone is an outstanding example of the way in which elected Attorneys General respond to the needs of their constituents. Appointed officials who are not directly responsible to the voters are not nearly as sensitive nor as responsive to their needs."

Virtually all of the Attorneys General stress "accountability" to the People, rather than to the appointing officer; that the Attorney General should be clothed with an independency of action in protecting the public interest; that, even at the expense of potential lack of harmony, he should enjoy a freedom that is unfettered by any domination whatsoever; and that as a lawyer he should not be an employee, but rather should be allowed freely to exercise his proper

functions both as an officer of the court and as an attorney, bound only by the ethics of his profession and his oath of office.

4. People's right of recall.

Because of the fact that an elected Attorney General bears the burden of direct responsibility to the electorate which give him their mandate, he is subject to the "recall" prerogatives of the electorate. If they are dissatisfied with the performance of their elected Attorney General, they can replace him at the ensuing election. An appointed Attorney General would deprive the electorate of this substantial and salutary power.

The correlative of the right to recall an incompetent incumbent is the right to retain a competent incumbent. This is lost in the case of an appointed Attorney General because, no matter how efficient, competent or successful an appointed Attorney General may be, upon a change of administration he is usually turned out of office.

CONCEPT OF A "DEPARTMENT OF JUSTICE"

I am aware of Proposition No. 49 (introduced by Mr. Hull) which provides for the appointment of the Attorney General by the Governor and for a Department of Justice to be headed by the Attorney General and which further provides that "the legislature shall pass appropriate legislation for the implementation of this department." I am also aware of Resolution No. 24 (introduced by Mr. Sand) to direct the Committee on the Executive Branch to prepare and present a proposition to establish a Department of Justice, "into which shall be consolidated all of the functions, powers, duties and responsibilities of state government in connection with or relating to law enforcement, including, but not limited to, the prevention and investigation of crime, and the detection, identification, apprehension, prosecution, custody and rehabilitation of persons accused or convicted of crime."

Proposition No. 49 is too general and, therefore, difficult for present comment because it leaves everything to legislative implementation. Resolution No. 24 seems to indicate that all police departments, local as well as State, all Sheriffs and District Attorneys, all Correctional, Reform and Prison facilities, as well as the State Division of Parole, shall be under the jurisdiction of the proposed Department of

Justice. It does not define the projected department with sufficient particularity nor reflect the magnitude or complexity of the proposal. Nothing is said of the existing broad civil jurisdiction of the Department of Law.

However, I do have some recommendations which are more appropriate for legislative action:

(1) I am in favor of the greatest coordination and cooperation in the field of law enforcement — in a program such as is conceived under the recently created Crime Control Council (Laws of 1967, Chap. 167), under which Governor Rockefeller has provided an impressive and extensive program. Ex officio, the Attorney General or his designee should be a member of the Crime Control Council.

(2) Another area of interest is the relationship of the Attorney General and the District Attorneys. I am not in favor of appointed District Attorneys under the jurisdiction of the Attorney General. I believe that the District Attorneys should continue to be elected public officials.

However, I am of the opinion that there is room for a closer relationship between the Attorney General and the District Attorneys; this would result in better enforcement of the criminal laws. The Attorney General could be authorized to provide a forum for inter-county cooperation between District Attorneys. Periodic meetings could be mandated at

which attendance by District Attorneys or their representatives would be required. The Attorney General could prepare and disseminate information of common interest and bring law enforcement to new peaks of efficiency and excellence.

(3) Some local prosecutors are ill-equipped to handle complex criminal appeals because of a limited staff. The prosecutors should be permitted to call on the Attorney General for advice, cooperation and aid in appellate matters. To this end, provision could be made for the handling of criminal appeals by the Attorney General if requested to do so by the District Attorneys.

When specific and concrete provisions defining the jurisdiction and powers of a "Department of Justice" are presented, I shall be pleased to submit another Position Paper in which I shall make comments on the proposals.

CONCLUSION

In the interest of uniformity and consistency, the Attorney General should be constitutionally designated as the sole and exclusive representative of his public clients in all courts. In this connection I strongly support Proposition No. 365 (introduced by Mr. Reidy), which provides that -

> "The attorney-general shall be required and it shall be his duty to represent and appear for the state and all branches of the state government and all state departments, agencies, bureaus, officers and authorities in all litigation in which they shall be involved in all courts, and they shall be represented in the courts by no other persons than the attorney-general or a member of his staff."

The basic duties and powers of the Attorney General should remain intact with the addition set forth in Proposition No. 365. The Attorney General's activities as the State's chief legal officer are vital to the Legislature, to the various departments and agencies of State Government and, above all, to the People of the State of New York.

All can be accomplished, however, only if the Attorney General has the independence of an elected public official. That the elective status is productive of the best results is attested to by my immediate predecessors in the office of Attorney General. Our tenure covers the period of the past thirty-five years, during which we have experienced the deepest economic recession in our history as well as the longest period of economic well-being, during which we have had global conflicts, and during which we have come into the nuclear and the space age. Attendant upon these vast and fundamental changes have come a myriad of novel problems with which the Attorneys General have had to cope and for the most part they have successfully and vigorously responded

to the challenges. During these past thirty-five years, the Attorneys General of New York State have been John J. Bennett, Nathaniel L. Goldstein, Jacob K. Javits and I. My three immediate predecessors have authorized me to state that they favor the retention of the office on an elective basis. And so do I.

To sum it up - an elected Attorney General has a measure of independence and a sense of personal and direct responsibility to the public. The elected official has a natural and impelling desire to be creative and to exercise broader initiative in the service of the public. He is free of the fear of dismissal by any superior official if he should exercise contrary independent judgment. He is in the best position to render maximum service to the People and impartial advice to the Governor, the Legislature and State departments and agencies. He can appear in Court without fear or favor - an attorney in the fullest and finest sense of the word.

Dated: Albany, New York, June 1, 1967

Respectfully submitted,

LOUIS J. LEFKOWITZ
Attorney General

ADDENDUM

Former Attorney General Nathaniel L. Goldstein, after declaring that he is for an elective Attorney General, stated:

> "During my tenure as Attorney General, I did render opinions in opposition to the wishes of the Administration when, in due conscience, I felt that my interpretation was the legal and proper one. Had I been subject to the Governor's appointive and removal powers, I might have found myself in a very difficult and awkward position."

HOUSE BILL NO. 456

COPY

Early last session Representative Uehling and Representative Ward sponsored HJR 7 which proposed amendments to the Constitution of the State of Alaska relating to the election of the Attorney General. The legislation passed the House but failed to pass the Senate.

Subsequently, [illegible] has been introduced which would authorize an advisory vo[illegible] registered voters of the State. This would allow the legislat[illegible]uge the feelings of the public and act accordingly.

Submitted by Rep. Jerry Ward's Office

STATE OF ALASKA

Bill Sheffield, Governor

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K – STATE CAPITOL
JUNEAU, ALASKA 99811
PHONE: (907) 465-3600

January 19, 1984

The Honorable Mitchell Abood
Chairman, House State
Affairs Committee
Alaska State House of
Representatives
Pouch V
Juneau, AK 99811

Re: Elected AG
House Bill 456

Dear Representative Abood:

I do not oppose the concept of having the people express their opinion to the Legislature in an advisory vote on the issue of whether or not the attorney general should be elected. However, I would like to comment on the merits of the underlying question of whether or not we should elect the attorney general.

I have lived and practiced law in our state for most of my adult life. I am absolutely convinced that the needs of all Alaskans are best served by having an appointed attorney general. Election of one cabinet level official makes no more sense than the election of some or all other commissioners.

Historically, the Attorney General has been an appointive, rather than elective, official. In England, the Attorney General was appointed by the Crown and only incidentally acquired elective status through a seat in Parliament. In Colonial America, Attorneys General were usually appointed by the Governor of the colony. The Attorney General of the United States still serve at the pleasure of the President with the advice and consent of the Senate. 1/

1/ Our research indicates that the Attorney General is popularly elected in forty-three states. The Attorney General is appointed by the Governor in five states (New Hampshire, Alaska, Hawaii, New Jersey and Wyoming), three territories and the Commonwealth of Puerto Rico. In Maine, the Attorney General is a "constitutional officer" selected by the Legislature while Tennessee's Attorney General is selected every eight years by the Supreme Court of that state.

The governor, as the state's principal executive officer, needs to have a responsive and reliable Department of Law. I think good management requires an appointed attorney general, but more importantly common sense suggests that the attorney general selection be made by appointment. The delegates to our Constitutional Convention recognized a quarter century ago that, in our vast state with its disparate interests and citizens, the administration of state government requires a strong governor. This still holds true today. The last thing our state needs is an elected attorney general who may have a personal or political agenda which varies from the position of the governor. The friction between the two elected administrative officials can lead to a less responsive state bureaucracy and an unclear accountability of the executive branch to the electorate.

I could relate anecdotes which illustrate this from other jurisdictions having elected attorneys general. Instead, I would rather provide a quotation from the National Municipal League:

> All authorities on executive organization agree with the position embraced by the Model State Constitution for more than 40 years that administrative power and responsibility should be concentrated in a single popularly elected chief executive. There is growing recognition that the governor, as the representative of all the people, should be equipped with the constitutional status necessary to exercise constructive leadership as the chief lawmaker and political head of his state. 2/

Studies on administrative reorganization usually argue that fragmentation leads to irresponsibility, but that a single chief executive can be held accountable through the electoral system and, as a consequence, can make the administration more responsive. In my opinion, the Governor of Alaska needs the flexibility and discretion that is implied in an appointed attorney general. Anything less will inevitably drive a wedge between the Governor and the Department of Law to the detriment of the citizens of our state.

2/ National Municipal Leagues, MODEL STATE CONSTITUTION (6th ed.) 55-66 (1963).

In addition to the practical problems caused by an elected attorney general, experience in other states with an elected attorney general suggests that the Governor's office will incur substantial costs with respect to the use of separate and additional counsel for the Governor. I am of the opinion that this use (and cost) depends on the relationship between the Governor and the elected Attorney General. In a situation where an elected Attorney General and Governor are cooperative, cordial and share a similar political philosophy, the need for additional Governor's counsel will be reduced. Regrettably, this is not always the situation. A 1976 study by the National Governors' Conference explored the role of Governors' legal advisors. The study, which was based primarily on a questionnaire to these counsel, found problems in this relationship:

> In many states, the relationship between the Governor and the Attorney General is not a smooth one. In addition to whatever political differences there may be between them, there are several operational areas of potential conflict. These include conflicts over the extent to which the legal talent employed by state agencies should report to the Attorney General or to the agencies; concern that the Governor cannot easily deal with the Attorney General because the Attorney General normally provides "yes-no" answers rather than discussions of the legal risk of various options; and the possible frictions that may normally occur in an attorney-client situation. 3/

While I cannot estimate the actual use and cost of additional counsel to oversee the elected Attorney General on behalf of the Governor, I am convinced there will be some extra cost incurred by the Governor's office to hire and use legal counsel even in the best of times. I sadly regret that the citizens of our state will be required to pay for this additional layer of legal bureaucracy.

In addition, in states where the attorney general is elected, the heads of executive departments often hire their own attorneys. In jurisdictions with elected attorneys general, there is often a proliferation of house counsel on the staff of major departments. Historically, such counsel have been employed

---

3/ National Governors' Conference, Center for Policy Research and Analysis, LEGAL ADVICE FOR THE GOVERNOR, 7 (November, 1976).

by executive branch agencies to give department heads a "second" opinion in controversial matters in states having an elected attorney general. Such counsel usually do not have the authority to litigate, but they do provide legal advice to department heads. Without centralized legal service and advice, each agency will rely on advice from its own lawyers. Therefore, agencies will receive differing interpretations as they raise legal issues. This in turn will make consensus among different agencies on issues more difficult to achieve. The result is that public policy decisions in the executive branch will be delayed to the detriment of the public and the legislature. In addition, these house counsel frequently submit amicus briefs in litigation affecting their department's programs. It is not unusual in states with an elected attorney general to see four or five separate briefs filed in a single matter, representing the varying viewpoints of different agencies, in addition to the attorney general's brief. If nothing else, this needless duplication insures that the courts and the public will be confused about state policy on many issues.

In my estimation, the cost for such additional counsel in Alaska could easily exceed $1.0 million annually, within a few years. This cost is simply not warranted by any rational criteria and should be further questioned in light of diminishing revenues. We have many more basic needs in Alaska which command the state government's immediate attention. Surely we do not want a needless layer of extra lawyers embedded in state agencies.

In summary, it is my opinion that electing the Attorney General will split administrative responsibility and executive authority, diffuse the political accountability of the executive branch to the public, add more attorneys to state government, contribute to more intense bureaucratic infighting among agencies, delay the resolution of executive branch policy decisions, and create a higher rate of growth in the state operating budget.

Please call upon me at your earliest convenience if I can provide additional information on this matter.

Sincerely,

Norman C. Gorsuch
Attorney General

Another good reason

ONE WAY for Alaska to avoid having legislative lawyers sue administration lawyers is to elect an attorney general who is beholden to neither.

Add that to a long list of reasons to make the attorney general one of the very limited number of elected officials in the State of Alaska. As a matter of fact, there are only two — the governor and the lieutenant governor. Commissioners who head the various administrative departments are appointed by the governor.

This extremely restricted opportunity for the people to elect the public officials who presumably serve them is a unique provision of the Alaska Constitution. It was deliberately adopted, for the reason that those who were here at the time the new state was created wanted a powerful chief executive.

They wanted leadership and accountability. When it came to steering this new ship of state, those Alaskans back in the middle '50s wanted a single captain on the bridge.

IT WAS a good idea. There was need for a powerful hand at the helm of a state with little income, a small population and a million needs. The governor had marching orders to assemble a team and get the show on the road — with the concurrence, of course, of the legislative branch.

It had a fine beginning. For the most part, the executive and legislative branches worked in concert toward a common goal during years of economic struggle.

But not even the visionary constitutional delegates, and the voters who applauded their work in those dimming last days of the territory, could have perceived the day when Alaska would be rolling in money and a single field could produce a trillion dollars worth of oil.

The coming of that wealth produced a Mount St. Helens eruption in the Juneau bureaucracy. Not only did executive agencies swell in size and number, the legislature ballooned as well. It added offices and staffs and interim agencies and even went so far as to hire its own legal counsel, separate from the attorney general's office.

OVER THE YEARS, the attorney general became more the lawyer of the governor than of the state government as a whole. That produced an adversary situation with the legislators who often wanted a different legal opinion than they could expect from the Department of Law.

Their answer was to hire lawyers who would provide opinions supporting the legislature's interests. The result is that public funds are used to finance one set of state lawyers doing battle with another set.

An independent attorney general's office, headed by an elected chief not beholden either to the governor or the legislature, could provide both with unbiased and unfettered legal guidance. The people, as well as state officials, would be better served.

Let the voters decide

IN FORTY of the 50 states, the attorney general is elected to his post.

It is a system that obviously works well, because the people are the ones who decide who should fill this high office. And an attorney general answerable to the people is one who is responsive and responsible.

It's strange, therefore, to see the burning vigor that marks the opposition to letting the people of Alaska choose their attorney general. Yet there are those who apparently fear the people.

For example:

"I can think of no single change that would be more damaging, more harmful, more dangerous to the character of government."

THAT'S THE astonishing view of Superior Court Judge Thomas Stewart of Juneau, who testified the other day before a legislative hearing on a proposed constitutional amendment that would require the election of Alaska's attorney general, who is now an appointee of the governor and answerable only to him.

More damaging? More harmful? More dangerous?

How can this be? What is being proposed is part and parcel of the democratic form of government in which the people have the right to elect their leaders. Are elections damaging, harmful and dangerous to the character of our government?

We confess to lacking the judicial wisdom that graces members of Alaska's Superior Court. But all along we thought the character of our government was rooted in the elective process.

There are many Alaskans — and we're among them — who believe the present system of having the attorney general appointed, rather than elected, has proved less than satisfactory.

We don't buy the argument of former Attorney General Norm Gorsuch that "legal competence and electablity are not necessarily equal." The statement is incomplete. The rest of it is that "legal competence and appointability are not necessarily equal, either."

IT'S QUITE POSSIBLE that an incompetent lawyer might be elected attorney general. But his shortcomings would be readily evident and it's a sure thing that he would serve only a single term.

It's also quite possible — in fact, very likely — that some extremely capable men and women would seek election to the office, were it up to the people to decide. An elected attorney general would be his or her own person, with his or her reputation on the line. And he or she would be no lackey to any governor, or any legislature.

There's no doubt that were the office an elected position, it would be used by many as a stepping stone to higher office — the governorship, for example, or a seat in the U.S. House or U.S. Senate. But what's wrong with that?

Rep. Fred Brown, the Fairbanks Democrat who heads the House Judiciary Committee sponsoring this constitutional change, sees this as a means of strengthening government. So do we. And we hope he prevails so that this matter can be brought to the ballot for a vote of the people.

The better way

IT'S TOO BAD that former Attorney General Avrum Gross doesn't think it's a good idea for Alaskans to elect their attorney general. But just because he feels that way detracts not one iota from the merit of the proposal.

It would be astonishing were Mr. Gross, who now teaches a couple of courses at Stanford University law school, to come out for an elected attorney general. His public career has been as an appointed legal spokesman for Gov. Jay Hammond.

Fortunately, there are other legal experts — whose qualifications and public service careers are are least as good as those of Mr. Gross — who feel precisely the opposite. They offered testimony contrary to that of Mr. Gross by satellite communication facilities in a hearing last week before the House Judiciary Committee.

The attorneys general of Pennsylvania and Colorado and the assistant attorney general of California told the committee that an elected attorney general is more independent of the governor and administration and thus less vulnerable to political repercussions from decisions.

FORTY of the nation's 50 states elect their attorney general. Alaska is one of only five states where the office is filled by appointment of the governor. In the other five the selection is made in a variety of ways, including legislative appointment.

Mr. Gross, however, thinks the Alaska way is best. Were it otherwise, he contended, the governor would attempt to shift blame for administration failures onto the attorney general rather than have a clear responsibility himself.

That's a pretty feeble defense of the present system.

If anything goes wrong in the administration of any program, regardless of the attorney general, any governor is going to be politically adept enough to dance out of the line of responsibility.

THE ATTORNEY general of Pennsylvania told members of the Judiciary Committee that Pennsylvanians voted overwhelmingly in favor of a constitutional amendment to make the office elective because they felt the attorney general was "not responsive to public needs" and that there was a "cozy arrangement" between the attorney general and the governor.

Colorado's attorney general said an elected attorney general carries "at least the aura of having an independent political base" and can say no to the governor "when the governor ought to be said 'no' to."

An assistant California attorney general said an elective attorney general is more efficient than an appointive one and "is not necessarily a threat to the functioning of the governor."

Those comments make sense for Alaska. And the legislature should take steps to bring this constitutional change to the ballot.

There seems little doubt that the amendment would be approved, if the legislature would only give the people a chance to vote.

Memo to politicians

STATE OFFICIALS who depend on votes of Alaskans for their public offices would be wise to arrange for the attorney general to be elected. A statewide poll by Dittman shows that public support is overwhelming.

In response to one simple question "Should the attorney general be elected?" 61 percent responded affirmatively and 27 percent preferred appointment.

That was the quick reaction from Alaskans scattered far and wide. The idea of electing that important official was favored by 73 percent of those in rural areas, 63 percent in Central Alaska (Fairbanks), 56 percent in Southcentral, 67 percent in Anchorage.

Only in Southeast Alaska was the response different. There it was 41 percent for appointment and 42 percent for election.

A SECOND QUESTION put to the same respondents built up still more the case in favor of the elective process.

It cited some of the powers that go with the office of attorney general. Upon hearing them, the respondents were 71 percent for and only 21 percent against.

That question put it this way: "If you knew that the attorney general of Alaska, who is appointed, also appoints all state prosecutors and district attorneys throughout the state, would you support having the attorney general remain an appointed position or would you support the attorney general becoming an elected position?"

Those favoring election gained 10 points while those for appointment lost 6 points.

TWO MESSAGES are handed to the politicians in that poll. The first is that a substantial majority of Alaskans want their attorney general elected, not appointed. The second is that the proposal gains strength when Alaskans are reminded of the power that lies in the office.

A politician can readily see the significance. He is disappointing his constituents if he ignores the proposal and he may discover his reelection in jeopardy if the day comes when a candidate campaigns against him on that issue.

In rural areas the final lineup was 8& percent for election. In Central Alaska 75 percent. In Southcentral 71 percent and in Anchorage 74 percent. Even in Southeast Alaska many voters changed their minds on the second question. The final tally there was 54 percent for election and only 34 percent for appointment.

No matter how you cut it

THE UNIVERSAL preference of the majority of Alaskans for electing the state's attorney general was pointed up in many different ways in a Dittman poll that showed 71 percent in support and only 21 percent opposed.

Dittman reported that the election proposal has overwhelming support in almost every bracket of the population, be it based on age, sex, income, educational attainment, party registration.

AMONG ALASKANS who have registered as Democrats or Republicans, 72 and 73 percent, respectively, favor election. Non-partisans were 69 percent in favor. Alaskans aged 18 to 24 are 77 percent in favor, those 56 and over, 75 percent and those in between range from 68 to 72 percent. . .

The poll showed 76 percent of the women and 66 percent of the men favor election. Homemakers are 75 percent for it. Private and public sector employees as a whole favor it 71 to 74 percent. Among state employees, however, the idea is not so popular. Yet more than half (56 percent) are for it.

Support of the election proposal declines as family incomes increase but the majority in all categories favor it. In low income groups 77 percent favor it while in higher income households 67 percent do.

Curiously, the idea of electing the attorney general is more popular among those who don't bother to register, and hence probably don't vote, than among those who do. Those not registered showed 73 percent for election while registered voters were 71 percent favorable.

THE RESULTS of that Dittman survey will be engraved on the minds of those who plan political campaigns. And Dittman's final analysis might inspire some of them to get on the bandwagon to amend the constitution so as to give the people the elective power they want.

That analysis was, "Presenting information regarding the attorney general's powers and responsibilities causes a strong shift to the elected option — especially among the 'undecided' respondents. In total, the undecided percentage declines from 12 to 7½ and more than 5 percent of those who favored the current appointed status changed their minds to support the elected provision when it was learned that the attorney general has broad appointive powers of his own."

Weak arguments

RIGHT OFF THE BAT, there was a loud objection to the Anchorage Crime Commission's proposal that Alaska's attorney general and the local prosecuting attorneys should be elected. The complaints came from the appointed attorney general and one of his appointed district attorneys.

The flaws they see in the proposal are worthy of public review.

For one thing, they said, electing such officials would bring the justice system into politics. They would become subject to pressure from members of the public with axes to grind.

For another, they argue, lawyers would run for attorney general and district attorney in hopes of using the positions as stepping stones to higher political office.

BUT THOSE aren't necessarily flaws. On the contrary, it's possible to argue that those prospects would offer an enormous improvement in the way things are done in Alaska.

Take the second objection first. Under the Alaska constitution, only two state government officials are elected statewide — the governor and the lieutenant governor. Everybody else in the system, including the judges, is appointed by the governor or by department heads appointed by him.

The only other elected officials in Alaska are the city or borough mayors, elected locally; 60 members of the legislature, elected in local districts, and the three members of the state's congressional delegation, elected statewide. Not much of a stepladder on which people interested in public service can climb toward higher office.

An elected attorney general naturally would be looked upon as a potential candidate for governor or U.S. senator or congressman. What's wrong with that? It might be a powerful incentive for the one occupying that spot to do an outstanding job.

AS TO THE COMPLAINT that an elected attorney general might be subject to public pressure, again the advantages are compelling.

Why shouldn't the attorney general have to dance on a hot public griddle if the people become alarmed over deficiencies in the administration of justice?

The system as it now exists makes the attorney general the personal lawyer of the governor, his political defender and his legal arm in waging political warfare against the legislature and the public.

So long as he remains protected by the governor's skirts, the attorney general is immune from public pressure. All kinds of policies can be legitimatized, even though they might infuriate wide segments of the public and frustrate the aspirations of the people.

Legal opinions issued by the attorney general bind state agencies. They can be tools of the governor to guide, maneuver, control and stop all kinds of enterprises — economic and otherwise.

An attorney general answering to the public through the political process would have the freedom to respond to public concerns in ways that are not possible now.

The Honorable Mitch Abood
Chairperson
State Affairs Committee
Alaska House of Representatives
1024 West Sixth Avenue
Anchorage, AK 99501

RE: House Bill 456

Dear Representative Abood:

I understand that the House State Affairs Committee is holding hearings this afternoon on HB 456 which would authorize an advisory vote by the citizens of the State of Alaska concerning the wisdom of electing the State's Attorney General.

In that regard, I request that the attached letter be submitted as a part of the Committee's record of testimony on HB 456. The attached letter, sent by then Alaska Bar President Karen Hunt to Representative Barnes, details the results of an advisory poll conducted by the Bar Association of its members concerning not only the election of the Attorney General, but the election of district attorneys and judges as well.

I ask that the members of your Committee, during its deliberations, consider the findings of that poll and the many reasons given for finding that the election of the Attorney General does not serve the public interest.

Should you have any questions, please do not hesitate to contact me. I have provided you with a sufficient number of copies for each member of your Committee. Let me thank you in advance for your consideration of the attached information.

Respectfully yours,

ALASKA BAR ASSOCIATION

Re: Election of Attorney General, District Attorneys and Judges

Dear Mrs. Barnes:

The Board of Governors of the Alaska Bar Association limits its legislative activities to those issues which impact on the administration of justice and the delivery of legal services to the public. One set of such issues is whether the present system should be changed to provide for the election of the Attorney-General, District Attorneys and/or judges. Below is a very brief discussion of the results of a February poll taken of the members of the Alaska Bar Association on those issues. The Board has directed that I communicate these results to you for your information. Thirty-five percent (35%) of the attorneys responded as follows:

1)	elect Attorney General :	No 71 %, Yes 29 %
2)	elect District Attorney:	No 79 %, Yes 21 %
3)	elect Judges:	No 82½%, Yes 17½%

Each respondent was given an opportunity to comment and repeatedly the following concepts were discussed.

The judicial branch of government in Alaska was deliberately not made a representative, elected body. It is an integral part of a three-branch, checks and balance

system of government. Further, judges should not interpret the law because of a temporary, single, explosive political issue: the need for predictibility and uniformity in our laws is too vital to the welfare of Alaskans. Likewise, judges should be able to uphold "unpopular laws" which safeguard the rights of individuals or groups who are not a part of the electorate who supported the people elected.

Of equal concern to the respondents was the realization that special interest groups could unduly influence court decisions and District Attorney prosecutions because of the amount of compaign contributions they could raise or the "party machinery" they could control. Likewise, concern was expressed about the backlog and system slowdown that would occur while judges and district attorneys planned for, solicited funds for and conducted an election campaign. This could be particularly harmful in small communities which have only one judge or District Attorney. Additionally, concern was expressed about the lack of uniformity of law enforcement that would result because district attorneys would be elected on different "platforms".

The concerns expressed about election of the Attorney General included possibility (in Alaska perhaps probability) of the Attorney General and Governor being of two different parties thereby introducing non-productive dissention in the administrative branch. The Attorney General's office becoming primarily a stepping stone to running for Governor was also mentioned as a disruptive possibility.

The confirmation by the legislature was viewed by some respondents as encouraging scrutinty of the Attorney General by elected representatives thereby giving the voters final say about the Governor's selection. Likewise, the retention election of judges provides voter acceptanc or rejection of the performance of judges. This process was viewed as a good balance and check on the initial appointment process.

Of particular interest are the uniform comments from attorneys who have practiced law and lived in states where judges and/or district attorneys and/or the Attorney

General are elected. Each respondent who so indictated such experience was opposed to changing our present system. The states of California, Illinois, Florida, Idaho and Oregon were specifically mentioned.

One example was emphasized where (in Florida) a new law school graduate entered the race for a judgeship at the last minute raising substantial campaign funds by attacking the judge's decision which had upheld a statute of the state legislature. He won thereby removing a judge with much experience and a solid reputation for fairness and efficiency on the the bench. He was thereby committed to a particular interpretation of a statute regardless of the facts of the case that might come before him. This result is contrary to the genius of our Anglo-Saxon system of justice which begins with the unalterable proposition that each party before the court has an absolute right to have his case decided solely upon the facts before the court.

The most repeated concept expressed by respondents who said judges, district attorneys and the Attorney General should be elected was that governmental decision makers should be elected by the voters.

We will try to provide such additional information or further discussion you may desire to the extent that we know or can ascertain the views of our members.

Yours very truly,

Karen L. Hunt
President

Analysis
HB 456

January 18, 1984

This bill authorizes an advisory vote, at the next general or special election, whether the legislature should propose a constitutional amendment that, if approved by the qualified voters of the state, would permit the election of the attorney general. Because this bill only authorizes an advisory vote, its enactment will not have a fiscal impact on the department's operations.

HB 456

Grants Pass, Oregon
February 19, 1983

TO MY FRIENDS IN THE ALASKA LEGISLATURE:

Almost thirty years ago I proposed that the state of Alaska elect its attorney general. Although my proposal was finally rejected by the Constitutional Convention in 1956, I have never abandoned my conviction that the attorney general should be "the people's attorney," elected by and responsible to the citizens of Alaska.

For that reason, I am pleased to support House Joint Resolution 7, which proposes an amendment to the state constitution providing for the election of the attorney general. HJR 7, if approved by both houses, would allow the electorate to determine the nature of the state's highest law enforcement officer.

I urge every legislator to fully consider this important bill. If you decide that your constituents deserve a truly impartial attorney general who is ultimately responsible to the people, then I encourage you to support the passage of HJR 7.

Thank you for your attention.

Respectfully,

Frank Barr

Analysis of Fiscal Note for Bail Schedule legislation

Present System - Each person cited for a violation of a park regulation must go to court. If a Park Ranger cites an Anchorage person for a minor violation in Ninilchik, approximately ten days later the Ranger and the individual must attend the court session in Kenai. Both individuals spend at least one day in the Kenai court plus the cost of meals, lodging and transportation. These expenditures and inconveniences do not include the costs of a judge, court clerks, District Attorney and the correspondence necessary to document the case, which generally run $300-400 for each arraignment.

Proposed System - A bail schedule would establish a predetermined fee for violation of regulations or statues and the person would have the option of not contesting the citation and sending in the fee or challenge the violation and ask for a court appearance. It is anticipated that most people will elect not to challenge the citation and simply send in the fee. This would save money for the individual, the District Attorney's office, the courts and parks staff. The only cost we anticipate on this matter is for the printing of citation forms at an annual cost of $1000.00 to $2000.00. This is approximately what is spent on the existing citation program, so no real new costs should occurr. Because of the savings in costs for the state, the individual, and more efficient management of our Park Rangers, the Bail Schedule will be a cost-effective program.

Re: CS HB 479

Committee staff, after reviewing HB 479, has discovered several statutory problems with the bill, thus felt it necessary to draft a committee substitute that has the very same intent, but with much cleaner language.

Section 1 of CS HB 479 writes language into the criminal code (AS 12.25) which allows an acception for people who have received a citation to not have to appear in court. This gives clear acception, where the original bill did not do this.

Section 2 clearly gives the park ranger enforcement authority to issue citations. This was not present in the original bill.

Section 3, -subsection (a) allows a peace officer arresting and citing authority in a state park or recreational facility.

-subsection (b) requires the State Supreme Court to establish a bail schedule for those offences committed inside a state park. This is the same as in the original bill, but new language allows for the DNR to aid in establishing the bail schedule (citation amount).

-subsection (c) is the same as in the original bill, but clarify the problem of people who forget to sign the citation. In the original bill, if a person forgot to sign the citation, but sent in the penalty money, the court could not deposit the money.

-subsection (d) is the same as in the original bill. This says that when you pay your bail, you are then formally convicted of the misdemeanor which you committed.

-subsection (e) is the same, less the last sentence, which is addressed in new subsection (f). Subsection (e) says that if a person fails to pay the bail amount, the citation then is considered a summons.

-subsection (f) is new language that just makes sure that the penalty imposed will not exceed the bail amount. With the original bill language, there was a question as to whether a judge could impose a higher penalty if the person lost his/her case.

Re: HB 479

This afternoon's meeting will consider HB 479, by Representatives Hayes and Liska, which would allow a Department of Natural Resources arresting or citing officer to issue a citation when a person is arrested or cited for the commission of an offense that is a misdemeanor within a state Park.

Section 1 (a) provides arresting and citing power to an officer, if a person commits an offense that is a misdemeanor within a park.

Section 1 (b) requires the state Supreme Court to determine by rule or order what offenses that may be disposed of without a court appearance. Also the Court is to establish a schedule of bail amounts, which are not to exceed fines prescribed by law.

Section 1 (c) allows the person cited to mail or personally deliver to the clerk of the court, within 15 days of being cited, the bail amount, which the officer has written on the citation.

Section 1 (d) provides that when a cited person forfeits his/her bail, a judgement of conviction shall be entered. In other words, when you pay your bail, you are then formally convicted of the misdemeanor which you committed. This section also states that bail forfeited and forfeit of items seized from the offender is a complete satisfaction for the offense.

Section 1 (e) provides for the situation where an offender fails to pay the bail amount. If this happens, the citation issued shall be considered a summons as for a charge of a misdemeanor and the offender shall be proceeded against in the manner prescribed by law. Note however, the maximum penalty may not exceed the bail amount for that offense set out in the bail schedule, as determined by the Supreme Court.

ANCHORAGE, ALASKA 99501
PHONE: (907) 276-2653

November 8, 1983

The Honorable Joe L. Hayes, Speaker
Alaska House of Representatives
P. O. Box 1821
Anchorage, Alaska 99510

Dear Representative ~~Hayes~~ Joe,

I appreciated the opportunity to meet with you recently. I'm specifically excited over the possibility of your introducing legislation to authorize the State Supreme Court to establish a bail fee schedule for park violations.

Our rangers occasionally apprehend persons vandalizing recreation facilities, operating vehicles in closed areas, building fires in closed areas under dangerous circumstances--to name a few violations. Without a bail schedule, both the violator and usually the ranger must appear before a judge or magistrate. This simply uses up valuable staff time, inconveniences the minor violator, clogs our courts.

I've enclosed a question and answer sheet and draft legislation. I would sincerely appreciate your efforts to see this draft bill become law. If there is anything I can do for you, let me know.

Sincerely,

Neil C. Johannsen
Director

Fact Sheet on Bail Legislation

The State Division of Parks is proposing legislation which would allow the Supreme Court to set a bail forfeiture schedule for violations of State Statutes and Alaska Administrative Codes which apply to State Parks.

1. Why is a bail schedule for violation of park regulations necessary?

   At the present time any citation issued for violation of State Park Regulations means a mandatory court appearance -- usually in the court nearest where the violation occurs. This means that a person -- perhaps an Anchorage resident -- who receives a citation for exploding fireworks in a Kenai Peninsula park, must return to Kenai to make the mandatory appearance.

2. What does the court system think about the problem?

   The courts are very crowded. Presently they must schedule time to see each individual regardless of how he/she intends to plead. On small violations this is an obvious waste of time to all parties.

3. Why is this legislation needed?

   Under present law a bail schedule for violations is only allowed for traffic regulations. This new legislation would allow and instruct the Supreme Court to set a bail schedule for violation of park regulations.

4. Would a bail schedule eliminate court appearances in all cases?

   No, the park ranger/peace officer issuing the citation could still summon an individual to a mandatory court appearance if the violation were of unusal significance. Any individual could still plead not guilty and request a court appearance.

5. Is this new for Alaska?

   No, the most notable example is the bail schedule for traffic violations. Traffic court would be literally overwhelmed without this help. The Fish & Wildlife Protection Division is also requesting legislation for a bail schedule on fish and game violations.

6. Does the Federal Government have a bail schedule?

   Yes, the National Park Service has a bail schedule which they revised in 1982 and will revise again in the fall of 1983. The attached schedule includes such items as: camping over the time limit - $100.00; pets not on leash - $50.00; fireworks - $50.00, etc. The U.S. Fish & Wildlife Service has a very similar schedule and they say it saves the public a great deal of money in travel costs (to and from court) alone.

7. Would a bail schedule be favored by the Department of Natural Resources/Division of Parks?

Yes, park enforcement people need to retain descretionary authority to use the bail schedule or cite into court, but they, too, would be able to spend a great deal more time in the field if they were not tied up in court appearances. Additionally, fewer court appearances would result, thus helping to alleviate the glut of work facing the Alaska Court System and unnecessary demands upon state park rangers.

DENALI NATIONAL PARK AND PRESERVE

(d)	Throwing or dropping a lighted cigarette, match, or other burning material, etc.	$150.00
(e)	Smoking in areas closed to smoking	$ 50.00
(f)	Staring a fire in areas closed to fires	$ 50.00

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER - HB 479

Support

January 25, 1984

HB 479 - "An Act relating to issuance of citations ... within state parks and recreational facilities."

By allowing officers in the Department of Natural Resources to issue citations, the Alaska State Troopers and other law enforcement agencies are relieved of a responsibility that they have never been staffed to do properly.

Robert J. Sundberg
Commissioner

HB 477, (cont'd)

Introduced January 9 and referred to Health, Education & Social Services, Finance.

1983 Permanent Fund Dividends (extending application period)

HOUSE BILL NO. 478, by Reps. Adams, M. M. Miller, Duncan, Grussendorf & Uehling. Would extend up to May 15, 1984 the time period for which an Alaska resident may apply for the 1983 Permanent Fund dividend. Applicants must have met the six month residency requirement on March 31, 1983. The dividend may not be paid from money appropriated or otherwise allocated for years other than 1983. The Department of Revenue could not pay 1983 dividends to late applicants until after March 1, 1984. The Department would be responsible for adoption of regulations to implement the extended deadline. Provides Act takes effect immediately.

Introduced January 9 and referred to State Affairs, Finance.

State Parks (citations for violations)

HOUSE BILL NO. 479, by Reps. Hayes and Liska. Would require a Dept. of Natural Resources arresting or citing officer to issue a citation when a person is arrested or cited for the commission of an offense that is a misdemeanor committed within a state park or recreational facility subject to the Department's supervision.

Require the state Supreme Court to determine by rule or order those offenses that are amenable to disposition without court appearance and to establish a schedule of bail amounts, not to exceed fines prescribed by law, for each offense.

If the offense for which the citation is issued is one that may be disposed of without court appearance, the citing officer shall write on the citation the amount of bail applicable to the cited offense. Would allow the person cited to mail or personally deliver to the clerk of the court the bail amount. Provides that when bail has been forfeited, a judgment of conviction shall be entered. Bail forfeited and the forfeit of items seized is a complete satisfaction for the offense, and the offender is to be given a receipt stating that fact. If the cited person fails to pay the bail amount or appear in court as required, the citation shall be considered a summons as for a charge of a misdemeanor and the offender shall be proceeded against in the manner prescribed by law. The maximum penalty may not exceed the bail amount for that offense set out in the bail schedule, as determined by the Supreme Court.

Does not provide for an effective date (becomes law 90 days following Governor's signature).

Introduced January 9 and referred to Resources, Judiciary, Finance.

Regulations (reasons for/ expiration)

HOUSE BILL NO. 480, by Reps. Bettisworth and Liska. Would require that the notice for the proposed adoption, amendment or repeal of a regulation include ". . . the reason for the proposed regulation; (7) a general statement of anticipated impacts

FISCAL NOTE

SECTION IV ANALYSIS

This legislation provides funds for the construction of a 17,000 square foot Statewide Crime Laboratory in Anchorage. The attached Schedule I details the Capital Cost and Schedule II details the Operating Costs. The vast majority of the Operating Costs represents a shift in direction for the Crime Lab from a limited service A.S.T. facility to becoming a full-service operation designed to meet the needs of all law enforcement agencies in the state. Personal Services costs for FY'85 reflect the hiring of the seven new staff members at various dates throughout the year. (See supporting schedules.) and other costs at 75% of a full years' cost.

FY'86 and each subsequent year reflect an anticipated 6% inflation rate and the cost of maintenance contracts on the new equipment.

By FY'88 it is anticipated that advances in technology will require replacement or new equipment to meet court evidence requirements each year.

SCHEDULE I

ANCHORAGE COMBINED FACILITY

CAPITAL COSTS

1)	Construction Costs			
	Crime Lab - 17,000 sq. ft.		$3,825.0	
	DOT/PF Overhead, Architect, Planning Contingency, etc.	$1,147.0		
	CS SS HB 33	(402.0)	745.0	
	Subtotal			$4,570.0
2)	Equipment			962.0
3)	Commodities - Initial Stock			71.0
	TOTAL			$5,603.0

SCHEDULE II

ANCHORAGE COMBINED FACILITY

FY'85 OPERATING COSTS

100 Personnel Services

See attached schedule	$195,403

200 Travel

In-state & out-of-state travel needed to attain and maintain professional expertise $10,000 per full year x 75% =	7,500

300 Contractual Services

Telephone	$ 12,500		
Electricity	9,100		
Other Utilities	3,500		
Building Repairs & Maintenance	4,900		
Subtotal	30,000	X 75%	22,500

(Note: Costs of maintenance agreements of an estimated $40,000 yearly will begin in FY'86.)

400 Commodities

Heating Fuel	$ 17,600		
Miscellaneous	1,100		
Subtotal	18,700	X 75%	14,025
TOTAL			$239,428

THE DEVELOPMENT of a CRIME LABORATORY in ALASKA*

During the 1983 Legislative Session, $402,000 was authorized for the architectural and engineering aspects of a modern crime laboratory to analyze evidence found at the scene of a crime. To be located adjacent to the existing Trooper headquarters in Anchorage and managed by them, the proposed 17,000 square foot facility would provide tests and analyses of crime scene evidence to all law enforcement agencies in Alaska, at no cost to those agencies.

The contract has been signed with an Anchorage Architectural and Engineering firm. Site survey and soils testing has been completed by the Department of Transportation and Public Facilities. Progress has been so rapid that the Department of Transportation believes construction could begin in the Spring of 1984, if construction funds can be made available. Nationwide advertising for a Professional Laboratory Director has been completed and the successful applicant will be hired in early 1984. An appropriations bill (HB-487) has been prefiled by Representative Walt Furnace (D) Anchorage for introduction in the 1984 session of the Legislature for funding of the construction and first years operating cost of $5.842 million.

* * * * * * * * * * * * * * *

Within the last decade or so, a series of Supreme Court decisions relative to search and seizure, interrogation, and confessions have had the effect of limiting the scope of permissible investigative activities by law enforcement agencies nationwide. This situation has resulted in the increased analysis of physical evidence by crime laboratories and subsequent use of test results in courtroom trials, which often becomes a crucial part of judicial proceedings.

The analyses and tests performed upon crime scene evidence assists both the investigator and the prosecutor in their efforts to reconstruct and explain the crime, the crime scene and information about the possible offender. The results of crime lab tests provide facts contributing to the exoneration of the innocent and the establishment of proof of the guilty.

* This paper summarizes the more extensive report issued by the Department of Public Safety in September 1982 entitled "The Development of a Full Service Forensic Laboratory for Law Enforcement in Alaska". Copies are available upon request thru the Director, Alaska State Troopers, Anchorage.

The modern lab requires highly skilled scientists and technicians who use costly materials and sophisticated instrumentation in an expensive environment, for there can be no compromise in the quality of the work they perform.

A modern, fully equipped Crime Lab presents a wide array of expertise.

Some of these are:

* Toxicology: A Toxicologist detects and identifies the presence of drugs or poisions in body tissues, fluids and organs. These tests are used in determining the presence and extent of alcohol that may have contributed to a death, as one example.

* Firearms and Tool Marks Examination: The Examiner can match a spent bullet to the gun that fired it by examination of the microscopic markings on the bullet caused by the irregularities on the inner surface of the gun barrel, among other capabilities. As a Tool Marks Specialist, he can identify the tire iron or other implement found in the suspect's car as the one that did or did not pry open the window or door of the victim's home by using a microscope to compare and match the nicks on the blade of the tire iron to the impressions left in the window sill.

* Forensic Serology: The Forensic Serologist, through analyses of body fluids found at the crime scene, can limit the population group of the assailant to those within certain blood groups, thus eliminating persons with other blood groups and characteristics as suspects in a given crime.

* Questioned Documents Examination: The Questioned Documents Examiner can ascertain the source or authenticity of a document through the many characteristics of an individual's handwriting, as well as through the variations in typewriter letters as a function of the use and wear to the machine's moving parts, and through the analyses of inks and different types of paper.

* Forensic Chemistry: The Forensic Chemist tests and analyzes unknown substances. By testing substances thought to be illegal drugs, he can determine the type drug, its relative purity and the substances that may be mixed with the drug. He can also identify small amounts of accelerants from a suspected arson fire by testing charred and burned materials found at the fire, as well as other tasks requiring chemical analysis.

* Trace Evidence Examination: The Trace Evidence Examiner can narrow the origin of minute bits of evidence such as human hair and fibers, that are exchanged during a fight or rape, to a group that includes (or excludes) the suspect. The paint chips and broken headlights of a hit and run fatality may be analyzed to determine if they match the paint and headlight of the suspects car.

* Fingerprint Examination: The Fingerprint Examiner can compare fingerprints found on a gun or some other surface to those of the suspect based upon the matching of the characteristics of the fingerprint ridges that are unique to each individual. (The Automated Fingerprint Identification System, funded during the 1982 session of the legislature, is now being developed and installed).

It is the use of carefully gathered evidence, analyzed by the latest methodologies of the physical and natural sciences that builds both a strong case against the guilty, while eliminating other persons as suspects.

Unfortunately, state and local law enforcement agencies in Alaska do not have such a laboratory. In fact, Alaska is the only state without a crime lab. The rudimentary facilities in the Alaska State Troopers building in Anchorage are limited by space, personnel and budget to only narcotics testing, fingerprint comparisons and some crime photography.

Historically Alaska has depended upon the FBI lab to perform criminalistics tests and has done so to a greater degree than any other state. While this dependence upon the FBI has worked reasonably well in the past, the FBI has recently suffered budget cuts as part of the general decrease in federal government services. As a result, some test results may not be received for up to six months. Since the Speedy Trial Rule in Alaska requires trial within 120 days of the arrest, test results may not be available by the time of trial, nor can additional investigation occur as a result of the outcome of the tests. Thus the investigation and prosecution functions are adversely affected.

Federal budgetary restrictions and a 1980 General Accounting Office report charging the Bureau's policy of free laboratory services actually inhibits the growth of statewide crime laboratories creates doubt that the extent of FBI services of the past will continue. Charges for certain services have already been instituted, and requests for laboratory examinations are carefully scrutinized.

Recently the FBI questioned the need for tests in a State Trooper's case that involved a double Homicide. Any further curtailment of service will be even more serious since Alaska is both increasing its population and experiencing a general crime increase while crime is generally decreasing nationwide. (Alaska had the highest incidence in the United States for rape in 1979, was number two in 1980, and first again in 1981 and 1982. Alaska was also second in murder in 1982. According to a recent public opinion survey, among other findings, Alaskans believe a basic cause of crime is the failure of the justice system to punish criminals.

While Alaska has some of its forensic tests performed by private laboratories elsewhere, this is not a good alternative for several reasons. Alaskan law enforcement agencies have no control over the scheduling, priorities, or the methodologies and techniques used by these facilities, nor is there any control over the caliber of personnel performing the tests. Additionally, such tests are usually expensive, since a profit is being made and the state has to pay a fee for all tests performed plus the travel and expenses of the technicians from the "lower 48" states who testify during trial.

Perhaps the most compelling reason for a full services crime lab is the high evidentiary value of the crime scene evidence that has been analyzed and tested, for the test results provide irrefutable information about the suspect to either link him to a crime, or to eliminate him from any further investigation. Laboratory test results can thus provide a high degree of proof of guilt.

The continuing lack of a crime lab to service Alaska's law enforcement efforts is affecting the decisions and perceptions of some police officers. Knowing they cannot obtain test results and analyses in a timely and affordable manner, some officers have had to place a decreasing value upon physical evidence found at the crime scene and therefore tend to rely upon other means to develop their case. Therefore their case will lack the high evidentiary value that often results from crime lab examinations. Any future, long term lack of a statewide lab, in the face of reduced services from the FBI, will probably result in the emergence of several small efforts by local enforcement agencies to provide their own testing facilities. These will likely be of limited scope, overlapping and fragmented efforts of unknown value. The smaller police departments, unable to afford their own limited facilities, and unable to pay the high costs charged by private labs elsewhere will simply do without.

The above reasons argue forcefully for the development of a statewide crime lab to provide services for all law enforcement agencies in Alaska. The next questions are how big a facility is needed, what services need to be provided and what are the costs involved?

Based upon the existing workload and the forecasted workload within the immediate future, the following staff personnel would be hired:

1. An additional Forensic Chemist

2. Serologist

3. Trace Evidence Technician

4. Firearms and Tool Marks Examiner

5. Administrative Assistant

6. Fingerprint I D Specialist

7. Questioned Documents Examiner

Full operating costs above current expenditures for the new facility and the additional personnel will be $391,400. per year after the Lab is completed.

The lab would honor all requests by law enforcement agencies, by either performing the work in house or through contract for the less frequent tests elsewhere. Tests and related services would be provided by the lab at no cost to the requesting agencies.

The proposed lab would be constructed adjacent to the Troopers Headquarters in Anchorage, on state-owned land. Substantial assistance has been obtained from the FBI Laboratory during an intensive on-site visit to obtain their recommendations for construction requirements, space needs for scientific personnel and instrumentation, and the factors that should be used in calculating overall construction costs.

Using data recommended by the FBI to provide a Crime Lab with the staff earlier noted, plus those in the existing facility, necessary instrumentation, and the numerous support requirements, a classroom for training police officers, and space for expansion in the years ahead will require a structure of about 17,000 square feet. FBI data indicates that cost per square foot is about 180% of the cost of commercial construction due to the unique plumbing, heating, ventilation and construction aspects required by a forensic laboratory.

Estimated costs of the new lab are as follows:

Construction	$3.825 million
Indirect Costs $1.147 ($.402) =	.745
Equipment	.962
Supplies and Materials	.071
First Year's Operating Costs	.239
Total	$5.842 million - in 1984

An estimated 12% inflation factor would increase costs by a like amount if construction occurs during FY'85 rather than FY'84.

MEMORANDUM

To: Representative Walt Furnace

From: Leonard Steinberg, Research Staff

Re: Criminalistics Analysis--Additional Information On Costs
Research Request 83-11

Steve Levi of your office requested additional information on the costs of criminalistic analysis performed by both public and private institutions. Also included is an update on the FBI crime lab's involvement in court proceedings in Alaska and the specific analytical techniques used by the FBI.

Criminalistics Analysis Costs--Findings

Many different rate structures are used to establish the prices of criminalistics analysis services. Most prices are based on hourly rates, though some labs charge a flat fee for each individual service. In general, labs are reluctant to charge flat fees because there is considerable variability in the amount of time required to analyze different pieces of evidence. Apparently some tests, such as toxicology, are very routine and their costs are affected by economies of scale. Other examinations, however, such as firearm and toolmark identification, vary greatly in the amount of time required for each examination.

Hourly rates vary from twenty-three to one hundred dollars per hour with the public and non-profit facilities providing the lowest hourly rates. Most private criminalistics analysis organizations provide only limited services, primarily for defense counsel's rebuttal of a prosecutor's evidence. In fact, there are very few private laboratories; most of the private sector activity in criminalistics is from individuals formerly associated with a criminalistics lab who are experts in interpreting the laboratory data. The private laboratories which do exist are small and their costs are high, in part, due to their low volume.

Five public, one private non-profit, and three private for-profit criminalistics laboratories were sampled for the cost of their services. The results are listed below by each organization.

Contra Costa County Sheriff's Crime Lab

Like most counties in California, the Contra Costa County Sheriff's Crime Lab provides criminalistics analysis for all law enforcement agencies, municipal, county, state and federal, located in that county for no charge. The lab ocassionally contracts to provide its services to public agencies outside the county, and charges only the additional costs it incurs in making these services available. In general, its extra costs are only labor; their labor rate has been estimated at $23 per hour.

According to Gerald Mitosinko, the lab's director (415 372-2466), the Contra Costa County Crime Lab has calculated the amount of time it has spent on various criminalistics procedures during the last several years. The average amounts of time required are listed below by different types of examinations. In parentheses is a rough approximation of the costs of these examinations, calculated on the basis of the time shown multiplied by the labor cost of $23 per hour.

Amphetamines	.7 hours ($16)	Heroin	1.36 hours ($31)
Cocaine	.5 hours ($12)	Marijuana	.39 hours ($9)
Explosives	4.83 hours ($111)	Document	2.84 hours ($65)
Shoe/Tire Prints	4.17 hours ($96)	Firearms ID	11.91 hours ($274)
Fiber & Hair	5.18 hours ($119)	Toolmarks ID	7.13 hours ($164)

Dallas County -- Southwestern Institute of Forensic Sciences

The Southwestern Institute of Forensic Sciences is a Dallas County agency. According to Director Irving Stone (214 638-9980), the Institute charges a fixed rate by the type of service performed. The rates have been set on the assumption that labor rates are approximately $50 per hour. In addition, the Institute charges a flat $200 fee for testimony and travel. The Institute's fee schedule and background information is being sent in the mail, but examples of their charges are listed below.

Documents Exam	$50	Fingerprint Exam	$50
Bullet Exam	$35	Typewriter Comparison	$50
Serial Number Restoration	$50	Search for Spermatazoa	$15

Tool Mark Comparison	$50	Search for Blood or Seminal Stains	$15
Hair & Fiber Analysis	$30	Analysis of ABO/RH From Dried Stains	$40

Connecticut State Police Forensic Sciences Laboratory

Dr. Henry Lee,is the Chief of the Forensic Sciences Laboratory in the state of Connecticut (203 238-6324). Dr. Lee explained that in addition to providing criminalistic analysis services for law enforcement authorities throughout Connecticut for no charge, his lab charges law enforcement authorities in surrounding states only for the cost of materials used in criminalistic analysis and for the time required for testimony.

Dr. Lee said that his lab has twenty-six employees and an annual budget of approximately $500,000.

Washington State Police Crime Lab

George Ishi is the Director of the Washington State Police Crime Lab (206 464-7073). According to Mr. Ishi, the Washington State Police Crime Lab does provide ciminalistics analysis services to other public agencies under contract. The lab charges $60 per hour plus any unusual expenses such as for special chemicals, special instruments, or testimony. Mr. Ishi is sending an analysis of the time spent by his lab on different types of criminalistic proceedures.

Kansas City, MO, Regional Criminalistics Laboratory

According to Gary Howell of the Regional Criminalistics Laboratory in Kansas City, MO (816 234-5000), public sector laboratory that charges $30 per hour to all public agencies within a surrounding five county region and $45 per hour to other public agencies outside that five county region. Howell was careful to say that it is impossible to predict how much time any particular examination will require.

Howell said that time spent by his staff testifying is billed at the same rate as laboratory time. Howell calculated that his lab spends about 20,000 hours examining evidence each year. Howell is sending additional information in the mail.

Northern Illinois Police Crime Lab

The Northern Illinois Police Crime Lab is a private non-profit membership agency organized to provide criminalistics services to municipal

police departments throughout Northern Illinois, an area with a population of approximately 500,000. The lab's Director, Andrew Principe (312 432-8160), explained that each member municipality pays an annual assessment based on its population as illustrated in the table below.

Population of City	Annual Fee
1000	$1500
3500	$3100
20,000	$11,500
50,000	$25,800
70,000	$29,800
100,000	$35,800

The Northern Illinois Police Crime Lab also provides criminalistic analysis for non-member public organizations at a cost of $75 per hour, with a one-hour minimum charge. In addition, when the lab's staff is required to testify, the charge for that service is $200 for the first hour and $50 per hour thereafter.

According to Mr. Principe, the lab's annual budget of about $300,000, is primarily from the annual membership fees. The lab employs a staff of ten and the lab has $500-600,000 worth of equipment.

Forensic Science Associates

Forensic Science Associates is a private for-profit criminalistics laboratory located in the San Francisco area that does not provide routine types of analysis; Forensic Science Associates does not do toxicology, blood alchohol analysis, or drug identification. Peter Barnett (415 653-3530) said that his firm's fee is $70 per hour and the amount of time he spends on any one procedure varies considerably. Most of this firm's work is for private defense counsel.

Criminalistic Laboratory

Criminalistic Laboratory is also a private for-profit small volume lab in the San Francisco area. According to the lab's Chuck Morton (415 451-0767), some of their work is performed for public agencies, but most of their work is also for private defense counsel. Criminalistic Laboratory charges $75-100 per hour depending on the analysis being conducted. In addition, Criminalistic Laboratory also has some

fixed fees for standard procedures, such as paternity testing ($70-80 per sample), blood grouping ($75 per sample), saliva analysis ($50 per sample) and others.

Western Laboratories

Western Laboratories, also in the San Francisco area, is primarily a private for-profit medical laboratory. However, Western Labs does perform toxicology, forensic alchohol, and autopsy service under contract to Alameda County. Dr. Paul Herman, head of the lab, said that fixed fees are charged for these services and is sending a fee schedule by mail. Dr. Herman warned, however, that Western's fees are expected to rise by about 20% in the near future.

FBI Crime Lab Update

According to Larry Nelson, the FBI's agent in charge in Alaska, in federal FY 82, FBI examiners made fifty-one trips to Alaska to testify in court. In forty-seven cases, testimony was actually given in court and four cases were resolved prior to the FBI examiner's scheduled court appearance.

The fifty-one trips made by FBI examiners to Alaska in FY 82 were to present testimony about the following analytical proceedures.

Type of Examination	Number of Examinations
Firearm and Toolmark Identification	17
Hair and Fiber Analysis	15
Serology and Blood Type Examinations	13
Neutron Activiation Tests	3
Paint Analysis	1
Metallurgy Analysis	1
Document Examination	1

MEMORANDUM

To: Representative Walt Furnace

From: Leonard Steinberg, Research Staff L. S.

Re: FBI Examination of Legal Evidence
Research Request 83-11

Steve Levi of your office requested the following information:

1) The number of Alaska criminal cases which made use of the FBI crime lab in Washington D.C.;

2) How many legal cases went to court with FBI assistance;

3) How often the FBI's time for analysis exceeded Alaska's 120 day limitation for court appearances; and

4) What specific evidence has been sent to the FBI for analysis.

Our attempts to answer these questions involved contacting: the Federal Bureau of Investigation in Anchorage and in Washington D.C.; the State of Alaska's Chief Prosecuter and the Anchorage District Attorney; the Alaska State Troopers; and the municipal police in Anchorage and Fairbanks.

Number of Alaska Criminal Cases Involving the FBI's Crime Lab

The table below lists the number of Alaska cases and the number of different examinations of Alaska evidence that were performed by the FBI's crime lab in federal fiscal years 1980, 1981, and 1982. (The federal fiscal year runs from October 1 to September 30; FY 80, for example began began October 1, 1979 and ended September 30, 1980.) This information was obtained from Manuel Marquez, of the Federal Bureau of Investigation in Washington D.C.

The number of examinations performed is many times larger than the number of cases because each case often includes many different items and each item may undergo numerous different examinations.

Year	Number of Cases	Number of Examinations
1980	181	10,744
1981	209	13,531
1982	236	19,510

Number of Legal Cases Which Went to Court With FBI Assistance

There are no records of the number of times the FBI's crime lab analysis has actually been used in court. Though FBI crime lab examiners frequently travel to Alaska to testify in criminal proceedings, only rough estimates of the number of visits are avialable.

According to Larry Nelson, the FBI's chief agent in Alaska, not a month goes by without one of the FBI's crime lab examiners traveling to Alaska to make a court appearance. Captain Smith, of the Anchorage Police Department, said he knew of at least 6 FBI crime lab examiners that visited Alaska during the last year.

The FBI in Washington D.C. may maintain records on number of visits examiners make to testify in Alaska courts, but the FBI declined to make that information available to us. The use of FBI examiners or laboratory analysis could be reconstructed by reviewing all the criminal files of the District Attorneys in Alaska, but doing so would require a substantial amount of time.

Excessive Time Required For FBI Analysis

Law enforcement authorities in Alaska are concerned that the FBI's crime lab will not analyze and return the evidence to Alaska in time to meet the requirement, unless waived by the defendent, that criminal trials take place within 120 days of an arrest.

There is little evidence of the FBI's laboratory analysis failing to arrive in time for a trial. The State Troopers have described one case (Alaska vs. Lewis, 1981) in which the trial court suppressed use of the FBI's lab report received the morning of the trial, but that case was complicated by other factors and the suppression was overturned on appeal.[1]

No other specific cases of laboratory analysis too late for use in court have been cited. However, Fairbanks Police Chief Matthew Kiernan estimated that perhaps in one percent of his cases he was unable to use the

---

[1] Department of Public Safety. The Development of a Full Service Forensic Laboratory for Law Enforcement in Alaska. September 1982. Page 11.

FBI's laboratory analysis in court because of delays. Other Alaska law enforcement authorities indicated that, to their knowledge, evidence has always arrived in time, but not without the use of personal contacts between the law enforcement authorities in Alaska and FBI examiners in Washington D.C. Estimates of amount of time normally required for an FBI analysis ranged from two to six months.[2]

Specific Evidence Sent To The FBI For Analysis

It was not possible to obtain a list of the specific legal evidence which has been sent from Alaska to the FBI for analysis in the time available to complete this research request. All law enforcement authorities were contacted but regular records of what has been submitted for analysis have not been maintained.

The FBI crime lab in Washington D.C. may maintain records of what it has analyzed for Alaska, but this information was not made available to us. A list of the specific evidence sent to the FBI for analysis could be reconstructed by going through all the criminal files of the law enforcement authorities in Alaska, but doing so would require a substantial amount of time.

The FBI's crime lab conducts all known types of criminal analysis. Examples of Alaskan criminal evidence currently analyzed by the FBI include: questioned documents, body fluids, firearms, trace metals, voice prints, hair, fibers, and fingerprints.

Additional Information

Currently, all FBI service (analysis and expert witnesses) are available free of charge. The FBI crime lab's work is well respected and the examiners make excellent witnesses. However, many of Alaska's law enforcement officials spoke of the federal government's intention to cease providing lab services for state and local police.

The FBI, while supporting the development of regional criminal analysis laboratories, denies any intention of reducing services to state and local law enforcement authorities.

* * * * *

We hope this information is useful to you. Please let us know if we can be of any further assistance.

---

[2] Captain Smith of the Anchorage Police Department estimated normal FBI turnaround time at two months while Major Korhonen of the Alaska State Troopers estimated normal turnaround times of five to six months.

MEMORANDUM State of Alaska

TO: M. James Messick
Assistant to Commissioner
Director's Office
Anchorage, Alaska

DATE: January 24, 1984

FILE NO:

TELEPHONE NO: 269-5620

FROM: Lieutenant Robert E. Dent
Commander
Criminal Investigation Bureau

SUBJECT: Delays in F.B.I. Lab Exams

Reference our conversation whereby you requested specific examples of investigations we have had, which lab exams by the F.B.I. were requested and delay in obtaining same jeopardized prosecution; resulted in a request for a continuance; or hindered further investigation.

I queried all C.I.B. personnel and Fairbanks G.I.U. concerning this with the following results:

1. E82-6580 (Fairbanks) Brian Ault homicide - a continuance was granted because evidence came back from the F.B.I. Lab too late for the defense to have an examination (State vs Michael Stephens).

2. I83-65819 (Anchorage) A rape which occurred on October 1, 1983 at Anchorage International Airport - the suspect was arrested on October 1, which started the 120 day rule. Evidence processed and sent to Lab October 15 to October 25. First report from the F.B.I. Lab was on oral report on January 3, 1984. Currently, we are still awaiting results of some exams and if the defendant had not waived two months of the four month rule, prosecution would be unlikely due to time running out.

3. I83- (Anchorage) Sexual assault. Defendant arrested and evidence obtained on October 27, 1983. Still awaiting return of evidence by the F.B.I. It is anticipated that the defense will also want to have evidence examined probably resulting in a continuance. Trial has been set for February, 1984.

4. Sergeant Randy Johnston provided the following for consideration:

   Generally, laboratory examination letters communicate opinions which are much more conservative than the true opinion of the examiner, often leading the investigator to believe that the connective evidence is not as strong as he had hoped it would be. For example, a letter might say: "The hair from the victim's blouse has characteristics that are similar to those found in head hairs from the suspect.", or "could be head hairs from the suspect." If the author of the letter was right here in Anchorage where he could show and tell his findings to the investigator, the conversation might go like this: "The probability that the hair found on the victim's blouse if the suspect's head hair, is very high. Look at this. This characteristic is very rare to find. And 15 other characteristics match.", etc.

   From the letter, the investigator may feel he has one of several suspects which cannot be eliminated. From his looking at the results he may feel that more investigation of that particular suspect is in order.

And it is not practical to call the lab every time we receive a lab examination letter.

Also, obviously it would be beneficial to a case to get results of lab analysis quickly. Results of analysis of material found in a car may be all that is needed to reach P.C. for a warrant for another place. Time is always of the essence in search warrant situations.

5. Sergeant Jim McCann provided his comments as follows:

I know of no specific cases that have been continued because of F.B.I. Lab delay because I am extremely careful in getting my evidence in to the lab and I always communicate personally with the assigned examiners to insure their availability. I think all cases are in jeopardy of being lost or continued because of F.B.I. delay, but with the F.B.I. Lab's skill and professionalism and a little extra work and luck, we always seem to slide by.

I think our own full service lab will streamline the entire system. In every major crime trial, there is something that comes up that requires further, (sometimes on the spot) exams, expert testimony, etc. That most times F.B.I. examiners will not be able to perform for one reason or another. Usually the examiners are so booked up they get into town one day, meet with the D.A. and the investigator, testify the next day and leave Alaska on an evening flight. We never have them for rebuttal.

I spoke with D.A. Harry Davis and he cannot recall any recent cases where we have had any of these problems. He attributes this to the lab, and to a somewhat smaller case load. He agrees though that the jeopardy is always there. Mr. Davis concluded with his request for some sort of mobile crime scene team to consistantly process major crime scenes professionally.

In conclusion, I might add that the F.B.I. is rather eager to get us into the lab business, they do not really want us any more.

If I receive anything further that you might use, I will keep you advised.

REJ/sab

MEMORANDUM State of Alaska

TO: Mr. James Messick

March 15, 1983

MEMORANDUM

To: Representative Bob Bettisworth

From: Leonard Steinberg, Research Staff L.S.

Re: Organizational Location of Crime Lab
Research Request 83-101

Ralph Bennett of your office requested information on where within the governmental structure of other states criminalistics laboratories are located. He also asked us how other states protect the independence of the laboratories. Several states, national criminalistics organizations, and academic experts were contacted; our findings are summarized below.

Findings

While most states have criminalistics laboratories, there is considerable diversity in the location of these institutions within the structure of state governments. Many labs are part of state police organizations. In other states, the labs are in a seperate division but still within the same department as the state police. Labs have also commonly been located under the auspices of the Attorney General. Though more unusual, some labs have been incorporated into state health departments, and at least one state has consolidated all state laboratories in one division within their Department of General Services. In addition, at least one state has a crime lab system completely independent from any other state agency.

In our interviews three primary arguments were made for not placing a laboratory under the auspices of a state police organization. First, charges of laboratory bias and insufficient credibility appear to diminish with greater laboratory independence. Some states allow criminal defendants access to state crime labs, in part, to prove the objectivity of the labs. Second, laboratories within police organizations sometimes have failed to effectively compete for limited government funding. Third, laboratories within police organizations may fail to attract and retain high quality personnel because: a) pay and benefits are generally lower than the uniformed officers they work under; b) lab employees lack promotional opportunities as only sworn officers are usually admitted into the leadership ranks of police organizations; and c) lab employees consider themselves scientists and prefer a less structured and more academic environment than is usually found within police organizations.

The primary argument in favor of locating crime labs in a police unit is increased responsiveness to law enforcement needs. Additionally, some experts feel that there are fewer problems with the security and confidentiality of criminal evidence when crime labs are within police organizations. Last, some experts feel that being in a police department will allow better working relationships to be built between scientists and police officers

Alaska

Anchorage District Attorney Victor Krumm did not think that placing the lab within the State Trooper's organization would create a credibility problem. Mr. Krumm pointed out that many states have labs associated with their law enforcement organizations. He added that the nation's most respected lab is part of the Federal Bureau of Investigation (FBI).

American Academy of Forensic Sciences

Ken Field is the Executive Director of the American Academy of Forensic Sciences (303/596-6006), a professional organization of forensic scientists. According to Mr. Field, the credibility of criminalistics labs increases as the labs become more independent of law enforcement organizations. Field said that police labs in general have a poor reputation; too often, according to Field, non-scientists are placed in charge of police labs resulting in inappropriate management decisions and the closing off of promotional opportunities for lab employees.

Mr. Field stated that the ideal structure would be to have labs as part of the court system. At the very least, Field suggested setting up the crime lab as a division seperate from the State Troopers within the Department of Public Safety.

American Society of Crime Laboratory Directors (ASCLD)

Jerry Chisum (209/576-6215), is the current president of ASCLD, acknowledged that police labs are often accused of bias. Acording to Chisum, the desires of a police captain or lieutenant too often take precedence over the judgment of a civilian laboratory director.

In California, where Mr. Chisum is employed, there are many crime labs which are part of local county sherriff's offices. Additionally, there is a state wide system of 15 crime labs that are part of the California Department of Justice. Mr. Chisum has worked in both systems and stated a strong preference for working under the Attorney General.

He also pointed out that some states have crime labs within their health departments. This practice apparently began with the need to perform certain homicide related medical examinations. However, Mr. Chisum noted that health department labs are almost invariably run by medical doctors and are generally poorly equipped and staffed to deal with non-medical procedures.

Southwestern Institute of Forensic Sciences

The Southwestern Institute of Forensic Sciences, a criminalistics laboratory in Dallas Texas, is an independent Dallas County agency. Mr. Irving Stone, Chief of the Physical Evidence Section (214/638-9982), stated that while the Institute performs work for all city and county police in their area, it is not under the supervision of any law enforcement unit. The Institute reports directly to the elected county commissioners.

According to Mr. Stone, the benefits of being an independent agency are less competition for funds and better credibility in court. Stone suggested placing the crime lab under the authority of the Attorney General.

California State Crime Labs

Mr. Al Biasotti, (916/739-5484) a manager of the California Department of Justice's Bureau of Forensic Sciences, stated that labs attached to police organizations always have problems of bias. According to Biasotti, independent labs can attract better personnel because the "forensic scientist" strongly prefers being independent of a law enforcement agency.

The California Department of Justice has had a state crime lab since the 1930s, and in the early 1970s, the system was expanded to 15 facilities. Attached as Appendix A are standards and other information California has used to establish its state crime labs.

Illinois State Crime Labs

Mr. Bruce Van der Kolk, (217/782-4975) is Director of the Bureau of Scientific Services, Illinois Department of Law Enforcement. The Department of Law Enforcement was created through governmental reorganization in 1977. The Law Enforcement Department also includes the bureaus for the state police, state investigators, internal investigators, and administration. The crime labs in Illinois, therefore, are in the same governmental unit as the police, but are not part of the police organization.

Prior to the 1977 reorganization, Illinois' crime labs independently defended their own budget before the Illinois legislature. According to Mr. Van der Kolk, the crime labs were not successful competitors with other state organizations for budget dollars. Since the 1977 reorganization, the Department of Law Enforcement has been more successful in getting state funding for the crime labs.

Mr. Van der Kolk argued that credibility is not the primary reason for maintaining the independence of crime labs. He maintained that the real reason is that scientists and police officers have difficulty understanding each others needs. Illinois has tried to have a sworn liaison police officer attached to every lab, but Mr. Van der Kolk is not convinced that this program has been successful. Mr. Van der Kolk explained that differences between sworn police officers and civilian lab employees in pay structure, benefits, and promotional opportunities exacerbates their differences.

Wisconsin State Crime Lab

According to Crime Laboratory Bureau Director Dan Dowd (608/266-2031), about 15 years ago Wisconsin's crime lab was transferred from the University of Wisconsin to the Law Enforcement Services Division of the Wisconsin's Department of Justice. Other Law Enforcement Services Division sections include a crime information group (records and statistics) and the training and standards section.

Mr. Dowd supports the location of the crime lab within the Attorney General's office; none of the other employees there are sworn officers nor has there been competition for funds. He speculated that the crime lab has fared better as an arm of the Attorney General than it would have on its own.

According to Mr. Dowd, crime labs have more in common with academic than with police institutions. He perceives the lab more as a friend of the court than as an advocate. In fact, Wisconsin statute allows defendants access to the lab and Mr. Dowd feels this helps the lab avoid charges of bias. Dowd says the lab is well respected by defense counsel even though less than 5 percent of its work is for defendants. The Wisconsin crime lab statutes are attached as Appendix B.

Arizona Crime Lab

The state crime lab in Arizona is part of the Criminal Justice Support Bureau of the Department of Public Safety. The Department of Public Safety was created in 1969 by merging many existing agencies including the highway patrol, narcotics and investigations, and operations bureaus. Cliff Van der Ark with the Arizona crime lab(602/262-8395) stated

that his lab has not experienced credibility problems. One advantage of being part of a police organization, according to Mr. Van der Ark, is maintaining security. However, he mentioned that the same respect for the security of criminal evidence is likely to exist in an Attorney General's office.

Alabama Crime Lab

The crime lab system in Alabama (10 labs) is a completely independent state agency. Taylor Noggle (205/887-7001) stated that in 1935 the legislature created a full service crime lab that also handles all autopsy functions traditionally performed by medical examiners. The crime labs in Alabama are not connected to their state police nor their attorney general's office. The Director of the Alabama crime lab is appointed by the Attorney General, but cannot be removed except by impeachment; since 1935, the crime lab has had only three directors.

According to Mr. Noggle, the credibility of Alabama's labs can be traced to the high quality of lab staff. Mr. Noggle said that Alabama has been able to retain qualified personnel due to a relatively high pay scale and promotional opportunities.

Alabama's lab analyzes evidence for both prosecutors and defendants. However, Mr. Noggle estimated that less than 1 percent of the lab's work was performed for defendants.

Virginia Crime Lab

Warren Johnson, Director of Virginia's crime lab, stated that Virginia is the only state that has consolidated all state laboratories into a single government unit. The crime lab, together with the health, environmental, and consumer protection labs, make up the Division of Consolidated Laboratory Services within the Department of General Services. This organizational structure was created in 1972 to reduce costs (shared equipment and space) and increase effectiveness (sharing expertise).

Despite these theoretical gains, Mr. Johnson feels that the consolidation approach has been unsatisfactory. In fact, little equipment or space is shared because of the crime lab's need to insure the security of criminal evidence. Mr. Johnson said that there is only one piece of equipment that is regularly shared with other labs. Additionally, he expressed concern that the crime lab is left out of all planning for the criminal justice system because all other law enforcement agencies are in a different department. However, Mr. Johnson did acknowledge the usefullness of having easy access to the scientific experts associated with the other laboratories. In conclusion, he does not recommend the consolidated laboratory approach, but does recommend crime labs be independent from police organizations.

Academic Experts

Dr. Joe Peterson (312/996-8585), is with the Center for Research in Law and Justice at the Chicago campus of the University of Illinois. Dr. Peterson's professional research interests are in how science is used in the legal system and he is particularly knowledgeable about crime laboratories. According to Dr. Peterson, there is consensus among criminalist professionals that it is undesireable to place a crime lab within a police organization. Dr. Peterson stated that statistically, the labs located in law enforcement agencies often are unable to compete with the police organizations for money and are not as well respected by crime lab professionals as are labs independent of law enforcement agencies.

Though the issue of credibility is often raised when a lab is associated with a police unit, Dr. Peterson stated that there has never been a quantitative study of the problem. Though Dr. Peterson prefers labs that are completely independent of police organizations, at the very least, he suggests giving the lab the same status in government as other law enforcement units such as the Troopers. Dr. Peterson also suggested that the lab's credibility would be aided by allowing defendants equal access to the lab's procedures.

Dr. John Thornton (415/642-1605), University of California, Berkeley, assisted the State of California in developing its state crime lab system in the early 1970s. Dr. Thornton agreed that credibility is a serious issue and noted that charges of bias and perjury do affect the outcomes of criminal cases. For these reasons, Dr. Thornton feels it is essential that labs have an independent reputation. He said that the management of crime labs by the California Attorney General has worked out well.

Dr. Thornton feels that if a lab is placed within a police organization, it is essential that the lab director be a scientist and not a police officer. Dr. Thornton noted that scientists and police officers have different approaches to proof. Police officers generally have very different backgrounds from the lab scientists and often do not fully understand the equipment and procedures used in crime labs.

STANDARD 12.2

THE CRIME LABORATORY

Every State should, by 1982, establish a consolidated criminal laboratory system composed of local, regional, or State facilities capable of providing the most advanced forensic science services to police agencies.

1. Every police agency should immediately ensure that it has access to at least one laboratory facility capable of timely and efficient processing of physical evidence and should consider use of each of the following:

   a. A local laboratory that provides analysis for high volume, routine cases involving substances such as narcotics, alcohol, and urine; routine analysis and processing of most evidence within 24 hours of its delivery; immediate analysis of certain types of evidence, such as narcotics, where the detention or release of a suspect depends upon the analysis; and qualitative field tests and quantative follow-up tests of narcotics or dangerous drugs.

   b. A regional laboratory (serving an area in excess of 500,000 population where at least 5,000 Part I offenses are reported annually) that provides more sophisticated services than the local laboratory, is situated within 50 miles of any agency it routinely serves, can process or analyze evidence within 24 hours of its delivery, and is staffed with trained teams of evidence technicians to assist in complex investigations beyond the scope of local agencies.

   c. A centralized State laboratory that provides highly technical analyses which are beyond the capabilities of local or regional laboratory facilities.

2. Every crime laboratory within a police agency should be a part of the organizational entity which includes other support services, and should be directed by an individual who reports only to the agency's chief executive or to a staff authority who reports directly to the chief executive.

3. In maintaining a staff of formally qualified personnel who can provide efficient and reliable assistance in criminal investigations, every crime laboratory should provide that:

   a. Every employee responsible for the completion of scientific analyses or testing hold at least an earned baccalaureate degree in chemistry, criminalistics, or a closely related field from an accredited institution, and have a thorough working knowledge of laboratory procedures;

   b. Every employee performing supervised basic scientific tests or duties of a nonscientific nature meet the agency's requirements for the employment of regular sworn or civilian personnel;

   c. The laboratory director be familiar with management techniques necessary to satisfactorily perform his administrative functions;

   d. All laboratory personnel be adequately trained and experienced;

ATSS 497-5484

For Notes

e. Civilian personnel be used regularly so that sworn personnel may be more appropriately deployed in other assignments but provide that qualified sworn personnel be used when their abilities or expertise cannot be found elsewhere.

f. The working staff be sufficient to meet the demands of the laboratory caseload;

g. Salaries be commensurate with the specialized duties and qualifications of each position so that well qualified personnel are attracted to and retained in these positions;

h. Promotional and career paths for laboratory personnel result in salaries at least equal to those of persons employed in other equivalent laboratories; and

i. A clerical pool capable of handling all of the clerical needs of the laboratory be maintained.

4. Every laboratory which employs more than 10 nonclerical personnel should also establish at least one research position for solving specific laboratory problems and developing new laboratory techniques.

5. Every police chief executive should ensure that the police laboratory function receives appropriate fiscal support and that the adequacy of its facilities is considered in structuring the agency's annual budget; every laboratory director should be able to assess and control the amount, type, and quality of evidence received by the laboratory.

6. Every police agency laboratory and every regional laboratory should receive from all agencies using its services partial annual support based upon the number of sworn personnel employed by each agency, rather than on case costs.

7. Every crime laboratory director should, by 1974, design and implement a reporting system that provides data relative to its involvement in:

a. Reported crimes;

b. Investigated crimes;

c. Suspects identified or located;

d. Suspects cleared;

e. Suspects charged;

f. Prosecutions;

g. Acquittals; and

h. Convictions.

8. Every crime laboratory should immediately establish close liaison with:

For Notes

a. All other elements of the criminal justice system to ensure that laboratory findings are consistent with law enforcement needs and are being effectively used as investigative tools;

b. The scientific and academic establishments to insure use of the latest techniques and devices available to the criminalist and the investigator.

Commentary

12.2(1) Minimum Police Laboratory Needs. The gathering of physical evidence at a crime scene will do little to improve the investigative process unless such evidence is translated into pertinent data related to the crime. Thus, no matter how sophisticated an agency's evidence collection methods, they are of limited value without a comparable system of evidence analysis. There should be available to every police agency a laboratory facility capable of providing qualitative, quantitative, and interpretive analyses of all physical evidence taken into custody by the agency.

Time is often critical in a criminal investigation, and the solution of a case may hinge upon the rapid return of information to an investigator. Therefore, the laboratory facility should be capable of immediate analysis of evidence. On the other hand, some evidence may not demand immediate handling and may be returned to the agency on a routine or scheduled basis. The important thing is that the laboratory realize the difference and set up priorities to insure the speedy return of evidence when indicated. As a general rule, the return of evidence should be timely and should depend upon the needs of the agency's investigators.

To insure the timely return of physical evidence, it is imperative that all agencies establish procedures to facilitate the movement of evidence through the investigative, analytical, and judicial processes. Too often, an item is delayed at some point in the system until its value is reduced or completely lost. While procedures should provide for the smooth flow of evidence through the system, it is of much greater importance that the continuity of the evidence be maintained during its movement. Agencies should ensure that the evidentiary chain remains intact as evidence passes from the evidence technician, through the property clerk, chemist, and investigator, to the court clerk. In order to maintain its validity in the criminal process, evidence must be accounted for at every stage of its progress. Therefore, each person handling the evidence, for whatever purpose, should be required to sign for its release and its return.

A police agency should also have easy access to a laboratory facility which can provide services consistent with the techniques most often used by that agency. In essence, the laboratory must have the staff and equipment to perform those analyses of most frequent concern to its clients. Most agencies will require laboratory services for document examinations, drug analyses, and the identification of firearms, tool marks, and trace evidence. However, an agency whose primary functions are traffic enforcement and accident investigation may have a fairly exclusive need for blood alcohol tests, urinalyses, or spectrographic examinations of paint chips. Agencies with helicopter fleets may similarly have need of specialized photographic materials and equipment. The laboratory, especially at the local level, should be prepared and equipped to meet these varying analytical needs of the agencies it serves.

12.2(1a) Local Laboratory. The President's Commission on Law Enforcement and the Administration of Justice in its 1967 *Task Force Report: The Police*, stated that a "good laboratory facility is beyond the means of almost all police departments in the United States." The Commission cited a lack of facilities and a shortage of qualified technicians as reasons for its

For Notes

conclusion. However, despite such obstacles, most police agencies were unwilling to give up their laboratories, even when they were not used effectively. The reluctance of some agencies to surrender their facilities might disappear if each were required to provide a minimum level of service at the local level. In view of these conditions, police agencies should be cautioned against attempting to create laboratory facilities when appropriate facilities are already at their disposal.

A local laboratory may be defined as a facility operated by a local police agency to provide laboratory services for that agency or other agencies in the immediate vicinity. The local laboratory should *at least* provide routine analyses of narcotics, blood, breath, and urine. These are usually high volume services, and some laboratory directors are concerned that accepting case work of this nature will totally involve the laboratory in minor analyses. An alternative to the use of local laboratories for such purposes is an expansion of the role of the field policeman. In the Los Angeles Police Department, officers conduct breathalyzer examinations on drunk driving suspects prior to booking. Such fairly simply examinations as the breathalyzer test and the narcoban test for drugs may be administered in the field or the station to ease the burden on the laboratory. Blood alcohol, urinalysis, and Naline examinations must be conducted in the laboratory

It is, of course, acknowledged that the local laboratory should provide accurate and reliable information to investigators, but the "turnaround" time for evidence submitted to the laboratory is often a controversial issue. Most items of evidence presented to the local laboratory should be processed and evaluated within 24 hours of delivery. More time for the delivery of routine services would negate the advantages of the local laboratory's convenience. As a matter of fact, there are certain instances when immediate evidence analysis should be provided.

The detention or release of a narcotics suspect often hinges upon the positive identification of the evidence as a narcotic or dangerous drug. In such cases, when a field narcoban test or similar examination is unavailable to the field officer, the laboratory should immediately analyze the evidence. As another means of preventing a backlog or congestion in the laboratory, laboratory personnel may be deployed to administer qualitative field tests in narcotics cases. Since field tests for narcotics have proved invalid in some instances, such tests should be used only when they have clearly demonstrated their reliability.

The President's Crime Commission in 1967 reported that the Chicago Police Department operates one of the best-equipped and staffed facilities in the country. In 1965, the Chicago laboratory processed materials for 140 jurisdictions, including Federal and State agencies, counties, and other municipalities. Obviously this operation fulfills much more than the minimal requirements for a local facility. The important fact is that its returns are the most advantageous in terms of proximity, timeliness, and quality for those agencies which avail themselves of its services. Thus, with no regional or State facilities readily available many agencies have chosen Chicago's laboratory as one whose scientific capability can meet the full range of their laboratory needs. The opposite situation exists in Los Angeles, where the city and county agencies each operate a local laboratory facility within three blocks of one another. While each provides quality services, the duplication of facilities is a situation which should be avoided. It wastes manpower, equipment, and operating resources.

12.2(1b) The Regional Laboratory. A 1966 study by the Department of Justice revealed that 17 States had no crime laboratory within their boundaries. The scarcity of local laboratories, properly trained laboratory personnel, and adequate space and equipment has fostered growth of the regionalization concept in police laboratory services. To avoid duplication of services and to maintain quality standards, it is generally believed that regional laboratories should be controlled

For Notes

and operated as part of a statewide system. A regional laboratory should be equipped to perform all but the most highly specialized types of analyses connected with criminal investigations. It should certainly provide a more sophisticated level of service than the local laboratory, although it may function as a local facility for agencies in its immediate area.

A 1966 report by John Jay College (New York City) recommended that a regional crime laboratory be established to serve from 500,000 to 1 million persons in an area where at least 5,000 Part I crimes are committed each year. This recommendation was made to insure the existence of a sufficient caseload to justify the operation of a full-service regional facility. The FBI's annual publication *Uniform Crime Reports 1971*, reveals that well in excess of 10,000 index crimes occur annually when the population approximates one-half million persons. Therefore, John Jay's guidelines are quite liberal as indicators of the need for a regional laboratory.

Past experience indicates that police investigators will rarely seek laboratory assistance when the facility is inconveniently located. There are areas where the technician or investigator must travel an unreasonable distance to obtain laboratory services. This situation should be remedied so that laboratory assistance is available wherever and whenever it is needed. Studies have shown that evidence submission decreases sharply as the distance of the crime scene from the laboratory increases. A 1970 report by the Midwest Research Institute projected criminalistics requirements for eight adjoining counties in Missouri and Kansas. This report recommended locating a regional laboratory at a site within a 20 mile radius of 90 percent of the subscribing agencies' sworn personnel and 96 percent of the crimes committed in the region. While probably a valid guideline for this particular region, the 20 mile radius would present problems in larger, less populated western and southern States. A more realistic criterion would dictate that a regional laboratory be normally located within 50 miles of any agency which it routinely serves.

To provide a complete range of services and timely return of results, a laboratory should provide 24-hour-a-day service to its clients when necessary. Although around-the-clock deployment is obviously desirable, it presents some complex problems which must be weighed against the benefits. Qualified laboratory staff members are aware of their scarcity and the demand for their services. Consequently most choose to work regular daytime hours and usually get their way. Those who would agree to a night or morning watch would probably rebel when they were supoenaed to court during their off-duty hours. Although a situation which has faced police officers for years, it is highly unlikely that predominantly civilian laboratory staffs will voluntarily accept such conditions. The only feasible solution to such a problem appears to lie in an increased liaison with the criminal courts to devise operational methods which will decrease wasted man-hours and increase the effectiveness of the system.

In considering the regional laboratory system, police chief executives should examine laboratory facilities already in existence. Some public safety laboratories function as police crime laboratories and process evidence connected with violations of antipollution and other noncriminal laws. The duties of some professions include the operation of full-service laboratories. In many instances, the laboratories run by medical examiners, coroners, and pathologists may be used as regional police laboratories. The laboratory of the coroner in Hamilton County, Ohio, functions as the crime laboratory for local police agencies in the Cincinnati area.

Finally, the regional laboratory may, as the need arises, provide trained evidence technicians to local agencies which lack the expertise to conduct complex crime scene investigations. In Dallas, Texas, evidence technicians, under the direction and control of the medical examiner are assigned to the criminal investigation laboratory to carry out regular crime scene investigations. The laboratory is operated independently of the police agency and the technicians work in a scientific

For Notes

atmosphere of neutrality not always present in a police facility. An expansion or modification of such a program could provide local agencies with the assistance needed.

12.2(1c) The Centralized Laboratory. Police agencies often need laboratory support which cannot be supplied at either a local or a regional level. When a criminal investigation requires a highly technical, time-consuming, or singularly unique analysis, a central laboratory should be available to provide such service. The need for such a facility is emphasized by the volume of scientific examinations performed annually by the FBI laboratory in Washington, D.C. While the FBI laboratory serves a useful purpose in providing free services to a multitude of local, State, and Federal agencies, most agencies outside of the Washington, D.C. area are too far removed to receive timely service.

If each State were to provide services comparable to those of the FBI laboratory, more agencies would be likely to submit evidence for analysis and the return of examination results would be speedier. These centralized State laboratories should be capable of performing all complex scientific evaluations necessary in police work at no charge to participating agencies. They should also train laboratory technicians.

12.2(2) Laboratory Organization. Most local laboratories and some regional facilities function as elements of police agencies. Some police administrators and criminalists feel that this is an unsound administrative arrangement, particularly when services are provided for agencies other than the parent agency. Some feel that under such circumstances the laboratory may be operated by personnel with very little knowledge of criminalistics or laboratory administration. Others cite a danger of vested political interests influencing the local or regional operation of the laboratory and a resultant imbalance in the dissemination of services. All feel that a laboratory serving more than one jurisdiction must be objective in its administrative policies. The President's Commission on Law Enforcement and the Administration of Justice, in its *Task Force Report: The Police, 1967*, suggested that local regional laboratories be placed under the direction of the State laboratory system or some independent entity, such as a university or medical examiner. The Midwest Regional Institute also recommended that regional crime laboratories be kept separate and distinct from any existing law enforcement agency.

The fact remains that many successful laboratory operations are presently under the direction of either local, county, or State police agencies. To dissolve the organizational integrity of such facilities in order to restructure them as Statewide or independent systems would create chaos precisely where the police service can least afford any interruption of service. It would appear much more realistic to adopt measures to insure that these laboratories are operated efficiently without regard to the special interests of the agency or the concerned government.

A laboratory which exists within a police agency should function as a staff element of that agency, and should not be administratively responsible to any operational unit of the agency. The laboratory should not function as a tool of any investigative or patrol unit, although it will certainly act in a supportive capacity to both functions. It should be an element of whatever organizational entity provides similar support services. As the administrator of a staff element, the laboratory director should be accountable to the agency's chief executive. In large agencies which organize their support services under a specific bureau or division, the director should report to the commanding officer of that bureau or division. That commanding officer should, in turn, report to the chief executive. Where such a bureau or division does not exist the laboratory director should report directly to the chief executive.

PHYSICAL EVIDENCE MANUAL

This newly revised edition of the Department of Justice Physical Evidence Manual is now available. The manual describes the recommended procedures for the collection and preservation of all types of physical evidence. Evidence studies conducted by the State Department of Justice Criminalistics Laboratories and other services available to qualified agencies of the State's Criminal Justice System are described and illustrated.

At least one free copy of the manual has been furnished to most criminal justice agencies rely[illegible]Department's laboratory services. If additional copies are desired, t[illegible]ailable and may be purchased for $2.75, tax included from—

BRANCH OBJECTIVE

To Provide Scientific Services for the components
of the
California Criminal Justice System

PHYSICAL EVIDENCE

The term physical evidence embrances any and all physical objects or recorded observations and measurements of events which may aid the investigator or the court in reaching an opinion or conclusion. Such evidence may assist in:

1. Establishing that a crime has been committed (corpus delicti evidence).
2. Identifying, locating and apprehending the perpetrator of a crime (investigative evidence).
3. Connecting a suspect with a crime or crime scene (corroborative evidence).

I. INTRODUCTION

This manual has been prepared by the Investigative Services Branch (ISB) of the Department of Justice of the State of California with the following objectives:

A. To inform California law enforcement concerning the services provided by ISB.

B. To outline proper methods for collecting physical evidence.

C. To indicate suitable methods for the submission of evidence to ISB.

D. To indicate the value of physical evidence and expert testimony concerning evidence studies.

E. To explain other special aid which ISB can furnish in the scientific evaluation of crime, accident, fire and other scenes and the assistance which can be rendered in the investigation and prosecution of legal cases.

So many types of physical evidence are involved in the investigation of crimes that it is not possible to describe in this manual all examinations conducted or the methods for collecting, marking or packaging every conceivable type. The suggested procedures concerning the more common types of physical evidence, however, can be applied to practically all exhibits which may be encountered. It is believed that the investigator who will use common sense and intelligence and follow the basic procedures suggested, should encounter little difficulty in properly collecting and preserving physical evidence so that its greatest value can be realized.

II. INVESTIGATIVE SERVICES BRANCH

The Investigative Services Branch is the branch of the Division of Law Enforcement that provides the scientific and technical examinations required by the Criminal Justice System. It is divided into two Bureaus, the Special Services Bureau and the Technical Services Bureau.

A. Special Services Bureau (SSB)

The SSB provides technical services in the fields of Questioned Documents, Latent Fingerprints, Forensic Photography and Polygraphy. The experts employed in these sections are all highly trained and educated in their special fields. Each is prepared and qualified to present expert testimony in court regarding his examinations.

The Special Services units are equipped with the latest proven equipment and instruments necessary to provide the highest level service attainable. The addresses and phone numbers of the Special Service Sections will be found in Appendix B.

B. Technical Services Bureau (TSB)

The TSB provides the criminalistics services for 44 of the 58 counties in the state, and assists upon request in the remaining counties. The addresses and phone numbers of the several laboratories will be found in Appendix B. The laboratories are divided by function into satellite and regional laboratories.

Satellite laboratories provide limited service, primarily blood alcohol and controlled substance analyses.

Regional laboratories provide complete criminalistics services, examining all types of physical evidence.

All levels of laboratories are staffed by professional criminalists, technical assistants, and stenographic employees. The criminalists are all college graduates holding degrees in criminalistics or related physical sciences. In addition, all have had specialized training and belong to various professional societies. All are prepared and qualified to present expert testimony before the courts in connection with the scientific studies which they undertake.

The laboratories are provided with the instrumentation and equipment necessary to provide the highest level service attainable.

The Central Resources Unit manages a number of branchwide service programs. Sections within this unit include the Applications and Training Office (coordination of method development and education), the Uniform Blood Alcohol Program (maintains professional standards for compliance to Title 17 for blood, breath, and urine), the Driving Under the Influence of Drugs Program (provides blood and urine analyses for drug related traffic violations), the Gas Chromatograph/Mass Spectrometer Program (provides analytical support for drugs in driving, solid dosage drug analyses and criminalistics) and the Instrument Repair Program (provides repair and maintenance for breath testing equipment and laboratory instrumentation within the statewide system)

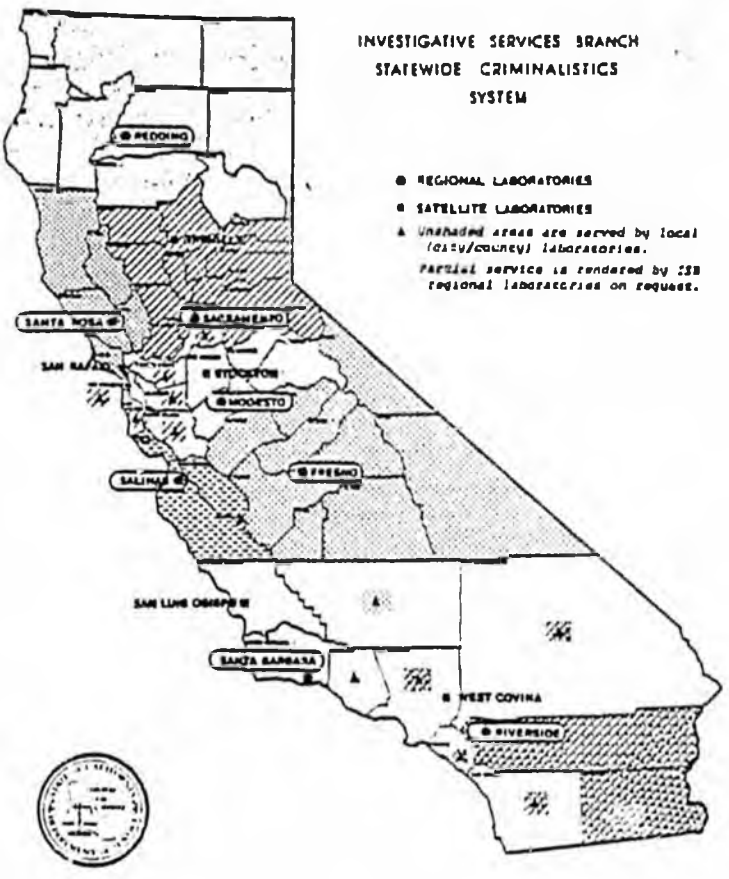

Photo 1A Location of Regional and Satellite Laboratories, Investigative Services Branch, Department of Justice, State of California.

III. BRANCH SERVICES AND FUNCTIONS

A. Availability—The services of the ISB are available to all local and state law enforcement or investigative agencies in California, and, on a contractual basis, to all public defenders offices.

B. Cases Handled—The purpose of the ISB is to render assistance in criminal investigation. While some cases handled may be found to be noncriminal in nature (such as certain accident, death or fire investigations) these must be incidences where the possibility of a criminal act is present. In the latter type of case it is essential that the investigation be part of the regular public duty of the requesting agency. No evidence studies may be conducted for private persons or corporations in either civil or criminal cases.

C. Cost of ISB Services—All forensic services are generally available without charge to public agencies. This includes field or laboratory studies, testimony presented in courts and travel expenses. Exceptions which occur are those where special high cost equipment or supplies must be purchased or where special analyses must be referred to private corporations or individuals. Whenever such special charges will be incurred, prior approval will always be obtained through consultation with the submitting agency or district attorney.

D. Functions of the Investigative Services Branch

1. Examine, identify, compare and interpret most types of physical evidence and interpret the significance of the findings.

2. Furnish expert testimony before the courts concerning examinations conducted on evidence or related matters. When criminalists or other specialists are needed as witnesses in legal actions, official requests for such appearances should be made by the appropriate attorney. This should be done by subpoena, but a letter or teletype may be equally respected. On any official investigation conducted by an ISB employee he may, of course, be called as a witness by either the prosecution or public defender.

3. Furnish field assistance in the investigation of major criminal cases. Such aid can only be furnished in connection with felonies of major importance or where special knowledge is essential to properly investigate the case. Requests for such assistance should be made only by the head of the investigative agency or by a supervising employee responsible for the conduct of the investigation. The official requesting a field investigation must inform the laboratory of the type of crime, the basic circumstances surrounding the case and the specific type of assistance required. This is necessary to permit assigning the most qualified staff member available (see Section XIII for more details).

   The ISB is not able to furnish on-the-scene assistance in routine investigations where trained officers are available to adequately recover evidence for later submission to the laboratory or section.

4. Render aid to prosecutors in connection with preparing scientific and technical phases of certain cases for trial. In some situations the ISB may also be able to furnish advice to prosecutors so that they may better understand the significance of testimony presented by other prosecution or defense experts.

5. Furnish instruction or audio-visual training aids concerning physical evidence for law enforcement training. Basic or specialized instruction will be furnished whenever possible to officers of any law enforcement agency. When such instruction is desired, a formal request should be made well in advance of the time scheduled. Requests for training school instructors should be made to the local regional laboratory or special section by the head of the law enforcement agency involved (see Appendix B for address).

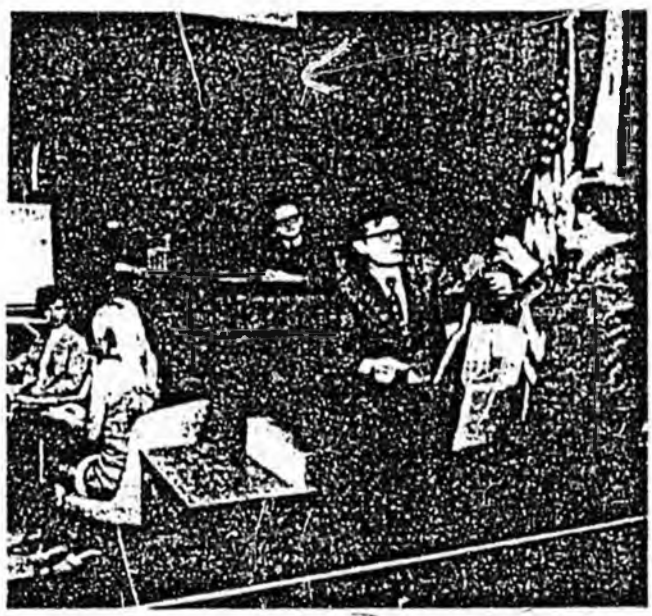

Photo 18 A Criminalist of the Investigative Services Branch presenting expert testimony to the court

IV. SUBMISSION OF PHYSICAL EVIDENCE

A. Method Selection

Various methods can be employed to submit evidentiary material to the laboratory. Generally the method selected will depend upon the type and size of the exhibits involved, the time available for completion of analyses and the complexity of the case. Whatever the method employed, care must be taken to assure that evidence will not be lost, damaged or contaminated and that the chain of possession of the exhibits can be legally established and maintained.

B. Information Required

In every case a completely filled out ISB form (ISB-4) should accompany the exhibits submitted. If this form is not available a letter may be substituted which furnishes the following information:

1. Name of suspect or defendant, if applicable.
2. Name of victim, if applicable.
3. Specific type of crime involved.
4. Agency case number.
5. Agency submitting evidence.
6. Name of officer submitting evidence.
7. Name of officer to whose attention reports should be sent and/or evidence returned.
8. Itemized list of exhibits included.
9. Purpose of examinations or type of studies desired.
10. Copy of crime investigation, accident or autopsy report as appropriate or at least a brief summary of the specific case under investigation.
11. Notations concerning any accidental or intentional changes which the investigator has made in the exhibits.
12. If previously examined by another agency a copy of any reports received concerning such examinations.
13. ISB case number if evidence is being resubmitted or is additional evidence on a case that has already been analyzed by the ISB. Such case numbers appear on all exhibits and at the top of all reports, letters or other correspondence pertaining to evidence studies conducted by the ISB.

C. Personal Delivery

1. Best Method—Personal delivery of evidence is the best method in those cases where the investigation or the evidence involved is complex. It is also best when large or perishable exhibits are involved or there are many separate items.
2. Permits Personal Consultation—Discussion of the case and evidence by the investigator and the analyst is frequently beneficial, particularly in complex cases.
3. Avoid Use of Messengers—Evidence should not be delivered by officers unfamiliar with the case under investigation who are only acting as messengers. Such persons normally do not have information about the investigation needed by the laboratory. In addition, such procedures add one more individual to the chain of possession and they will usually be needed to testify regarding such evidence possession if the case goes to trial.
4. Contact the Laboratory or Special Service Section—Telephone whenever possible prior to personally delivering evidence. This is particularly important if the case is complex. It permits the Supervisor to arrange to have the most qualified personnel available when the officer arrives.
5. Evidence Delivery Address—See Appendix B.
6. Hours—8 a.m. to 5 p.m. The ISB is closed on Saturday, Sunday and holidays.
7. Contacting Analysts During Non-Working Hours—Analysts can be contacted through the Bureau at any time but delays may occur. Therefore, if complex evidence must be delivered during non-working hours or field assistance is required, telephone first. See Appendix B for nights and weekend numbers.

D. Mail Shipment

1. Postage Class—Use registered or certified mail if evidence is of high monetary value or if it is small and of critical value. Otherwise, first or fourth class mail is satisfactory.
2. Prevent Damage—Package contents so that breakage or contamination will not occur during shipment.
3. Restrictions—Follow postal regulations. Do not mail explosives and other prohibited items.
4. Seal Package Completely—Even if fourth class mail is employed do not just tie with string but rather employ paper tape or other sealing tape.
5. Place Letter on *Outside of Package*—Use Form ISB-4 or include all information listed under Item B in letter. Place this in an envelop and attach to the *outside* of the sealed package.

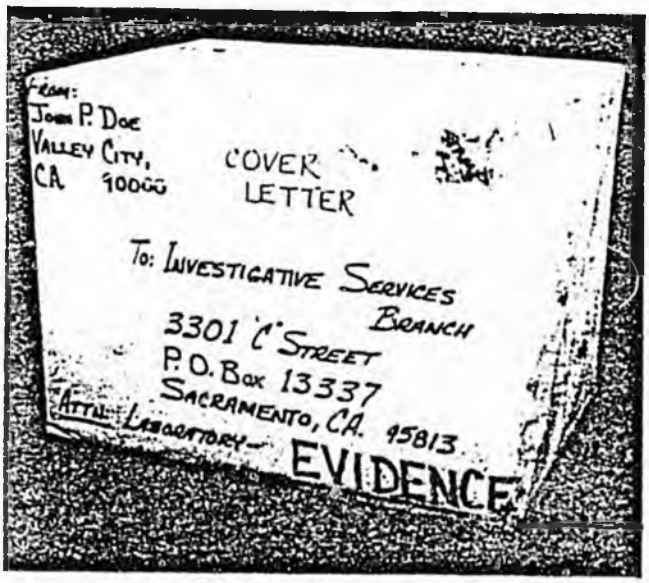

Photo 2 Proper method for packaging evidence for shipment. Always place a cover letter on the outside of the package.

This permits the laboratory to record the case and assign it to the appropriate scientist available for the specific examination necessary. Only the analyst assigned to the case will open the package. It also permits suitable storage of unopened perishable evidence when examinations must be delayed. In instances where there is need for obtaining the results rapidly it permits assigning priority to specific cases or exhibits.

6. Mail Address—See Appendix B.
7. Mark to Attention of Proper Section—In all cases mark package to the attention of the proper section as follows:

Attn: Latent Print—all latent print evidence, fingerprint cards for comparison with latents, skin or fingers of deceased persons.

Attn: Questioned Documents—all handwriting, typewriting, printed material, altered or obliterated writing, paper, ink and related evidence.

Attn: Criminalistics Laboratory—all other physical evidence submitted for processing.

E. Express Shipment

1. Commonly Used Methods—United Parcel Service, Greyhound, Air Express and related methods are equally satisfactory.
2. Package Condition—Follow the same procedures listed under "Mail shipment" under D above, making sure that package is sealed completely and a cover letter is placed on the outside of package.
3. Label Address—Since shipments other than mail will not be received in the Bureau post office box, address with full street address (See Appendix B).
4. Mark to attention of proper section—See D-7 above.

F. Evidence Requiring Special Handling

1. Explosives—do not deliver or ship to the laboratory without contacting a *Criminalist* by telephone. Suitable instructions will be given concerning procedures to be followed.
2. Other Dangerous Materials—due to shipping regulation variations, special methods must occasionally be employed. In addition, for the safety of both transporting officers and the Branch staff, it is urged that telephone contact be made prior to delivering loaded weapons, dangerous chemicals, etc.
3. Perishable Materials—deliver only during working hours. If to be shipped, contact ISB first, except in the case of blood and related specimens sent for alcohol, drug or grouping tests.

G. Physical Evidence Bulletins

A number of Physical Evidence Bulletins describing proper procedures for handling, packaging and submitting various types of evidence to the laboratories and special sections are available (see Appendix A for complete list).

These bulletins are distributed by regional laboratories and special sections in the Investigative Services Branch (See Appendix B for addresses and telephone numbers).

REQUEST FOR PHYSICAL EVIDENCE EXAMINATION

REQUESTING AGENCY: COUNTY OF: (Location)

OFFENSE: DATE OF OFFENSE: AGENCY NO.:

SUSPECT(S): (Include ID No. if any)

VICTIM(S):

BRIEF SUMMARY OF CIRCUMSTANCES:

EVIDENCE SUBMITTED: (Packages, containers, etc.)

PURPOSE OF EXAMINATION:

CHAIN OF CUSTODY			
EVIDENCE RECEIVED FROM	EVIDENCE DELIVERED TO	DATE	TIME

If further information is needed concerning this case, the following official should be contacted:
Phone No.:

ISB Report to be sent to the attention of:

Evidence should be returned to the attention of:

Officer investigating this case:

Date results needed by: For (type of court and location)

IS ABOVE LISTED EVIDENCE PROPERLY MARKED AND PACKAGED?
PLACE THIS FORM IN ENVELOPE ON OUTSIDE OF EVIDENCE PACKAGE

V. EVIDENCE EXAMINATION REPORTS

A. On completion of ISB analysis, reports are submitted to the head of the law enforcement agency requesting the examinations. These reports are normally marked to the attention of the specific officer submitting the evidence. Copies will be furnished to other agencies only at the request of the submitting agency.

B. The reports always include the charge, names of subjects involved and agency case number, if known. The date, time and name of the person from whom the exhibits were received and the method of delivery are also included followed by a complete list of all exhibits. The reports include the results of the examinations and the conclusions of the examiner, if appropriate. The method and date of return of the evidence is included at the end of the report.

C. The person signing the report is the employee responsible for the examinations and who will be able to testify concerning his findings.

D. All reports are numbered and any future reference to a specific case should refer to the case number in the heading of the report. Attempts are made by ISB to assign the same number to all work conducted on the same crime. Reference to the case number in all future communications permits rapid location of all reports and other information in the Branch pertaining to a specific case.

E. When analysis results are urgently needed the ISB will furnish preliminary reports by telephone or teletype, if requested to do so.

Photo 3A A member of a Regional Laboratory secretarial staff discussing the typing of a laboratory report.

Photo 3B The laboratory files are essential business records for the laboratory staff and the Criminal Justice System.

VI. GENERAL INSTRUCTIONS FOR THE COLLECTION AND PRESERVATION OF EVIDENCE

A. Clear Area—Clear all except essential and authorized persons from the crime scene area. This includes all officers who are not needed for specific functions. The more people present, the more chance there is for damage or loss of evidence.

B. Record Scene—By photographing, measuring and sketching. The location of all evidentiary items must be recorded prior to their movement.

C. Use Systematic Approach—Use caution when searching for evidence. Study the whole scene area first since the relationship of different exhibit positions may be important. Systematically cover crime scene area so that nonobvious or hidden evidence is not overlooked. Speed and carelessness may lead to overlooking evidence or to damage or destruction of important exhibits.

D. Limit Number of Evidence Collectors—Designate one or at most a pair of officers to collect all evidence. This places responsibility on specific individuals. It will also tend to avoid confusion at some later date by identifying the person that recovered specific items and the location in which they were found.

E. Photograph Evidence—Take photographs as necessary prior to moving or securing exhibits.

F. Use Common Sense—Use knowledge, experience and intelligence in collecting evidence. Consider what significance the exhibit may have and what examinations the laboratory may conduct. If this is done, the trained investigator will normally be able to correctly secure and preserve the exhibits.

G. Keep Records—Prepare notes or other records as items are collected. Record the item, its condition (if appropriate), its exact location relative to a fixed and permanent position; the date, time, etc.

H. Mark Exhibits—Place permanent and distinctive marks directly on objects collected if this is possible without damaging the evidence.

I. Mark Container—When unable to mark the exhibit itself, such as in the case of stains, hair, paint, etc., place in a vial or small plastic or other envelope, seal and mark the container. Even when the exhibit itself can be marked it is usually advisable to seal it in some type of container and place additional identification marks on the container.

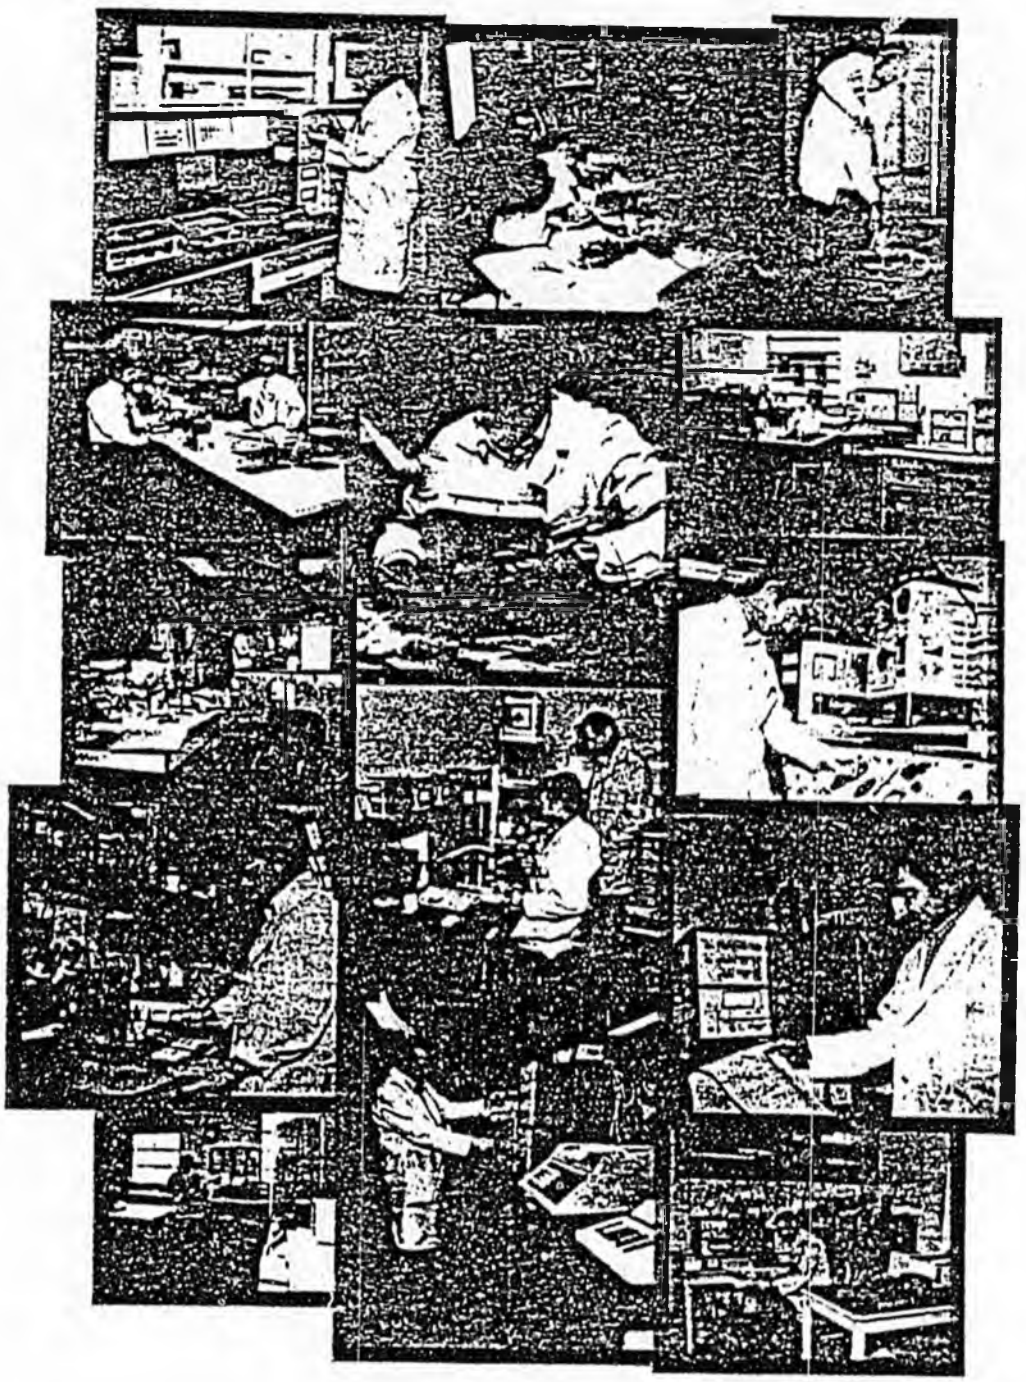
J. Keep Markings Brief—Initials or the name of the officer collecting is essential. In marking containers other pertinent data can be included, such as date, where found, case number and description of exhibit. Do not include extraneous information or conclusions of the investigator since these might make the label inadmissible as evidence in court.

K. Containers—Various types of containers can be used for items of physical evidence. Several different packaging methods are listed here. The investigator should try to suit his containers to the sample. Due to bacterial or fungal actions it is imperative that you DO NOT PUT DAMP OR BIOLOGICAL EVIDENCE IN PLASTIC BAGS.

1. Plastic or cellophane envelopes are suitable for small dry objects.
2. Paper envelopes—are suitable for folded paper bindles containing very small or powdery material if all corners are sealed. Do not use paper envelopes for fiber evidence, a vial or pill box is preferred.
3. Vials, pill boxes, capsules and like containers are fequently suitable, depending upon the exhibit and its condition.
4. Garments and large exhibits can be placed in bags or rolled in paper.
5. Paper or plastic envelopes can be sealed around the ends of large exhibits, such as tools, with plastic tape to prevent loss of adhering evidence.
6. Loss of adhering evidence on large exhibits, such as safes, vehicle bumpers, etc., can be prevented by placing plastic or paper over the evidence and sealing it down with tape.
7. Always use clean and new containers to prevent contamination.
8. Special precautions regarding containers employed for specific types of evidence are discussed in the various other sections of the Manual.

L. Sealing Containers—Preventing loss, contamination, or access by unauthorized persons are of primary importance. Also, do not overseal and complicate opening the container in the laboratory. Avoid or limit the use of staples and never apply to plastic containers if fine particles of material are enclosed since staples rip small holes in plastic.

M. Keep Exhibits Separate—Each different item or similar items secured at different locations should be placed in separate containers. Packaging sepa-



rately prevents damage through contact and cross contamination.

N. Storing Evidence—Always store in a safe, evidence vault, locker or some other location where others do not have access to it. This includes both temporary and long term storage.

O. Keep Chain of Possession Short—Each person having an exhibit in his possession, even if in a sealed container, may be required to testify as to such possession. To save the time of law enforcement personnel as well as the courts and to avoid confusion, keep the chain of possession as short as possible. In any case, each person having the exhibit in his possession should mark it or mark the container, if the exhibit is sealed in one.

VII. PHYSICAL EVIDENCE STUDIES CONDUCTED BY THE CRIMINALISTICS LABORATORY

The following sections furnish instructions, as well as general information, relative to specific types of physical evidence. It is not possible to include every conceivable type of evidence in a manual of this type, but a majority of frequently encountered types is included.

A. BLOOD STAINS

Studies of blood stains are frequently of importance in a wide variety of criminal investigations. In some cases, particularly homicide, crime scene examinations by a Criminalist may be required to establish direction of origin of blood splatters, show movements of individuals, establish sequence of deposit of stains and to develop other necessary information. The more common type of blood studies are laboratory operations involving analyses of recovered stains.

1. Fresh Moist Stains
   a. Do not heat stained material or place it in bright sunlight to dry. Hang clothing and similar articles in a room where there is rapid air movement, such as in front of a fan. Caution, a fan should not be used if foreign material has potential significance.
   b. If not *completely dried* before packaging, decomposition will occur which will prevent complete testing.
   c. When the stain is dry, label the item and roll it in paper or place it in a paper bag or box; seal and label container. DO NOT PUT STAINED OBJECTS INTO PLASTIC BAGS.

Photo 5 Air dried bloody clothing being wrapped for mailing.

2. Dried Stains
   a. On Cloth—Label article, roll in paper or place in a bag or box, seal and label container. Do not attempt to remove stain from the cloth.
   b. On Small Solid Objects—Send entire stained object to laboratory, after labeling and packaging.
   c. On Large Solid Objects—If practical to deliver whole object to the laboratory, any areas containing dry stains may be covered with paper and the edges sealed down with tape to prevent loss or contamination. If impractical to deliver the whole object to the laboratory, scrape stain onto a clean piece of paper which can be folded into a bindle and placed in an envelope. Scrape blood from object using a freshly washed and dried knife or similar instrument. Wash and dry instrument before each stain is scraped off so as not to cross contaminate samples with traces of blood on the instrument used. Seal and mark container.
   d. Do not mix separate dried stains. Place each stain in a separate container.
   e. If the stain cannot be removed in any other manner, use a piece of gauze dampened with distilled water to absorb the stain. Make a similar swab of an unstained area. Dry the gauze pads; place in separate envelopes; mark and seal.

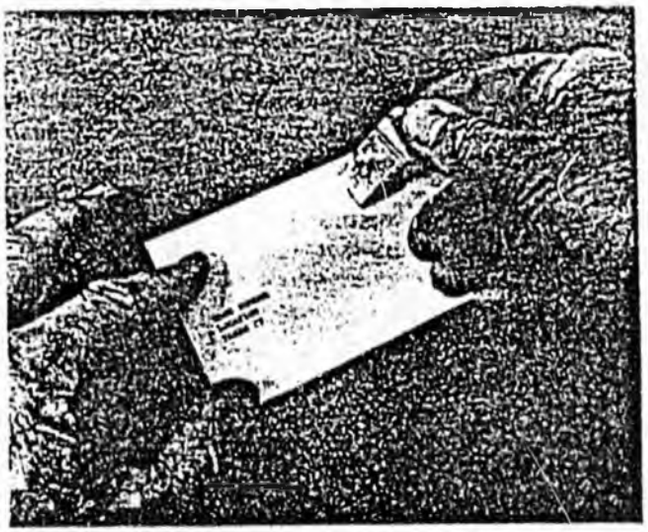


Photo 6 Band-aid pickup of blood. A method of conveniently collecting and forwarding blood from a crime scene.

3. Comparison Specimens
   a. If grouping of stains is desired, always obtain fresh known samples of all subjects involved. Grouping of dried stains seldom has any significance unless the blood groups of the subjects involved in the case are known. Information concerning the blood groups of subjects involved in an investigation may also assist the laboratory in selecting the most suitable test method or methods.
   b. It is usually possible to obtain known blood specimens from defendants if requested soon after the arrest. Often the subject will consent to the withdrawal of a specimen if he is advised

that the results may prove that the stains in question are *not* his blood and that in any event it is *not possible to prove* that such stains are his blood.

c. Submit fresh blood samples from subjects in two separate vials. One sample should be in a sterile vial containing a preservative and an anti-coagulant (gray stopper tube). The other sample should be in a sterile vial without added preservatives (blue, green, or purple stoppered). Label each vial with the name of the subject, date, name of person withdrawing specimen and officer's name or initials. Submit such specimens to the laboratory as soon as possible.

4. Types of Tests Conducted

a. Proof of presence of blood.

b. Detection of human origin of blood.

c. Detection of some types of animal bloods. Suitable *sera* are maintained in the laboratory for the detection of blood of common animals. If appropriate serum is not on hand, however, some delay will occasionally occur before special tests can be made.

d. Determination of basic ABO blood groups.

e. The laboratory is able to type some factors present in dried blood. Some of these factors deteriorate in two weeks. Others retain activity for several months. In cases where the basic blood groups cannot distinguish between individuals, other factors present in the specimens will be examined.

f. It is not presently possible to prove that a bloodstain came from a specific individual. It may be possible, however, to demonstrate that all blood groups present in the stain and in the blood of a subject are alike. When this is the case it must be realized that many other persons will also have blood of these same groups. In other cases it may be possible to demonstrate that a stain could not have come from a specific person.

g. The laboratory will conduct blood grouping whenever necessary for the investigation or prosecution of a criminal case. Such tests, however, are frequently complex, tedious and time consuming and should therefore be requested only when it appears that the results may have significance. A common example of requests for unnecessary examinations involves bloodstains on the victim's clothing. A fresh sample of blood from the victim is usually a better sample. The clothing may, of course, be submitted for stab or bullet hole examinations or other studies but performing blood grouping on evidence of this nature should not be expected.

h. Some blood group factors have been found only in certain racial groups. Occasionally one of these factors will occur among the blood groups of an individual involved in a specific crime. If such a blood group factor is found in a stain left at a crime scene by the perpetrator, information concerning his race may be of material value to the investigator in apprehending the suspect. For these reasons, the laboratory should be informed of the race of all individuals known to be involved in crimes when bloodstain evidence is present.

i. Transfusions of persons seriously injured will alter their blood chemistry and obscure their true blood groups. In these cases it is necessary to wait at least 60 days after the transfusion to obtain a valid blood sample.

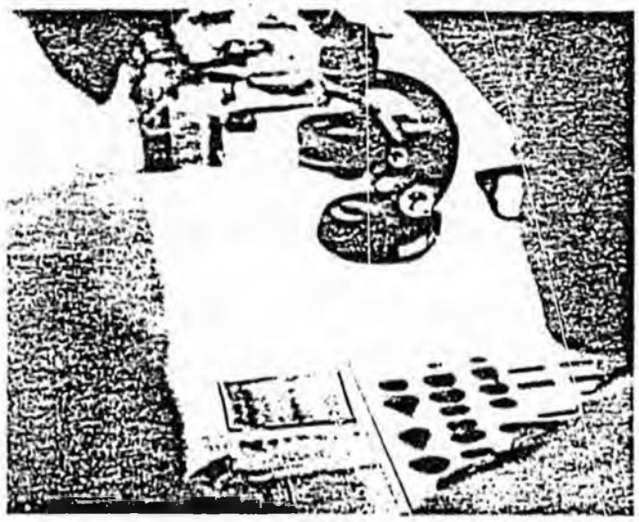

Photo 7A Genetically related enzyme variants in dried blood can now be examined in the California Department of Justice's Criminalistics Laboratories. The illustration shows starch gel and photographic representation of an enzyme system.

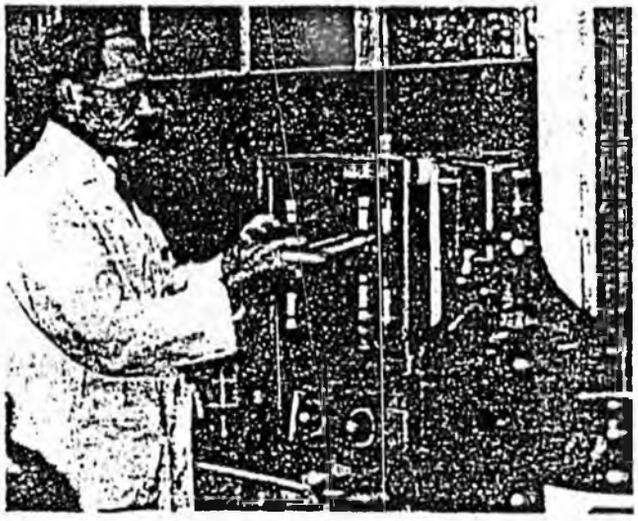

Photo 7B Necessary treatment of an enzyme starch gel electrophoresis to visualize the genetic variants.

B. SEMINAL STAINS

Semen is the male reproductive fluid. It normally contains spermatozoa, which are reproductive cells, as well as other substances. It is possible to identify dried semen by either chemical tests or the microscopic identification of characteristically shaped spermatozoa.

1. Seminal stains are often, but not always, found on clothing, blankets, sheets or other materials in rape and other sex offenses. When dry they may have a stiff, starchy feel and can often be located by the sense of touch.
2. In sex offense cases the victim should always be examined by a physician and a vaginal specimen taken. The laboratory can examine such specimens for sperm cells. Vaginal specimens can be submitted either as smears, swabs, or aspirates, although the collection of a vaginal aspirate in a clean glass vial is the preferred method. Time is of the essence in obtaining vaginal specimens as bacterial action rapidly destroys the sperm cells. The victim should be examined as soon as possible after the incident and the vaginal specimen kept refrigerated until delivery to the laboratory.
3. Submit all suspected stained materials to the laboratory. If possible, always include the panties, other underwear and clothing from the victim. All garments should be placed in separate packages. The packages containing the victim's clothing should be kept separate from those containing the suspect's clothing.
4. Label all garments or other exhibits.
5. If damp, always allow fabric to air dry completely before packaging to prevent decomposition. When stain is dry, roll garments gently in paper, place in paper bags and then seal and label container. Do *not* put such stained objects into plastic bags.
6. Handle fabrics as little as possible.
7. Under special circumstances seminal stains may be analyzed for the ABO or other blood group factors. If this type of testing is requested, contact the laboratory by telephone prior to shipping exhibits. This is essential since other biological samples are required (blood and saliva from victim and suspect).

Photo 8A Human spermatozoa from garment of victim in rape case.

Photo 8B Visualizing seminal stains from clothing.

C. FIBERS AND THREADS

Clothing, rugs, blankets, curtains and other fabrics are such common articles in modern society that their value as evidence may be overlooked. Although very common, a tremendous variety of animal, vegetable and synthetic fibers of numerous colors are used. Thus threads and individual fibers will frequently serve as useful evidence in criminal cases.

1. Fibers and threads will often be found in fabric abrasions, torn metal or in other areas on hit and run vehicles. In burglary cases such evidence may be located on a torn screen, broken glass, or metal on safes or other locations. Fibers may also be important in incidents of personal contact such as homicide, assault and rape cases where cross transfers may occur between the clothing of suspects and victims.
2. Examinations of fibers will usually establish their type and color. Such studies may also indicate the type of garments or fabric from which the recovered fibers or threads originated.
3. Fibers and threads can also be compared with clothing of subjects to determine whether or not they could have originated from such garments.

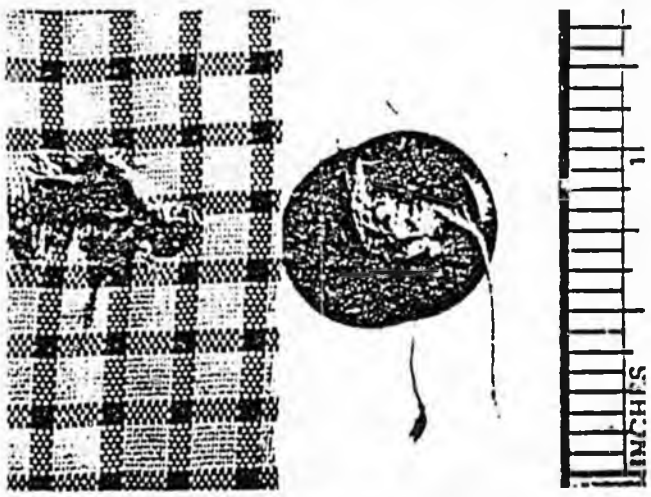

Photo 9 Shirt of murder suspect from which button was forcibly pulled out and a button found in hand of victim. This button matched others on the shirt and fibers adhering to the button threads matched the shirt fibers.

4. Complete threads or long fibers can frequently be picked up with the fingers or tweezers. When recovered they should be placed in plastic envelopes or glass or plastic vials. Never place loose fibers directly into mailing envelopes or other paper containers since they are difficult to locate and remove in the laboratory and the paper itself may contain fibers.
5. If the fibers are short, few in number or firmly adhering to an exhibit, attempt to remove the complete item containing the fibers and place it in a plastic envelope. All fibers present may more readily be located and removed from such exhibits in the laboratory.
6. *Never* attempt to pick up fibers on gummed tape unless no other method for recovery of the evidence is available. Once firmly caught in the gum on the tape it is almost impossible to remove them for study and the adhesive may interfere with laboratory tests.
7. Whenever fiber or thread evidence is recovered, submit to the laboratory for comparison purposes *all* clothing of persons from whom the evidence might have originated.
8. In sex offenses, assaults and some other investigations it may be possible to indicate or demonstrate contact between two individuals or between one individual and some other object by comparing transferred fibers. Such examinations are only of value when it is known that *no contact occurred* between the individuals or objects prior to or subsequent to the offense. Extreme care must be taken to keep all articles of clothing and other objects separated. *Each garment should be separately packaged in paper bags.* If large, garments may be laid on *clean* sheets of paper on a table and separately rolled up in the paper. Always mark each exhibit. If the clothing of either subject touches the clothing of the other or is even laid down on a table or placed on a car seat previously contacted by the clothing of the other subject, the comparisons may have no value.

Photo 10A Criminalists removing fibers alleged to be from the victim's clothing, found embedded in the windshield of the suspect hit-and-run vehicle.

Photo 108 Criminalists removing fibers alleged to be from the victim's clothing, found embedded in the windshield of the suspect hit-and-run vehicle.

9. Fabric impressions which may contain embedded fibers are frequently found in hit-run cases. If the area containing the impression cannot be conveniently submitted to the laboratory, a photograph should be taken of the area. Always mount the camera on a tripod so that the film is parallel with the impression. Include a ruler next to the impression photographed so that the size of the mark can be determined. In such cases submit all outer clothing of all victims for the comparison purposes. When the object containing the fabric impression cannot be removed but is rather photographed, a search should also be made for fibers. Any fibers located should be removed and placed in a vial or coin envelope if possible. In the event that the fibers are difficult to recover and if they are embedded in paint, scrape the paint and fibers into a coin envelope and seal the corners with tape. Usually the fibers can be separated from the paint in the laboratory.

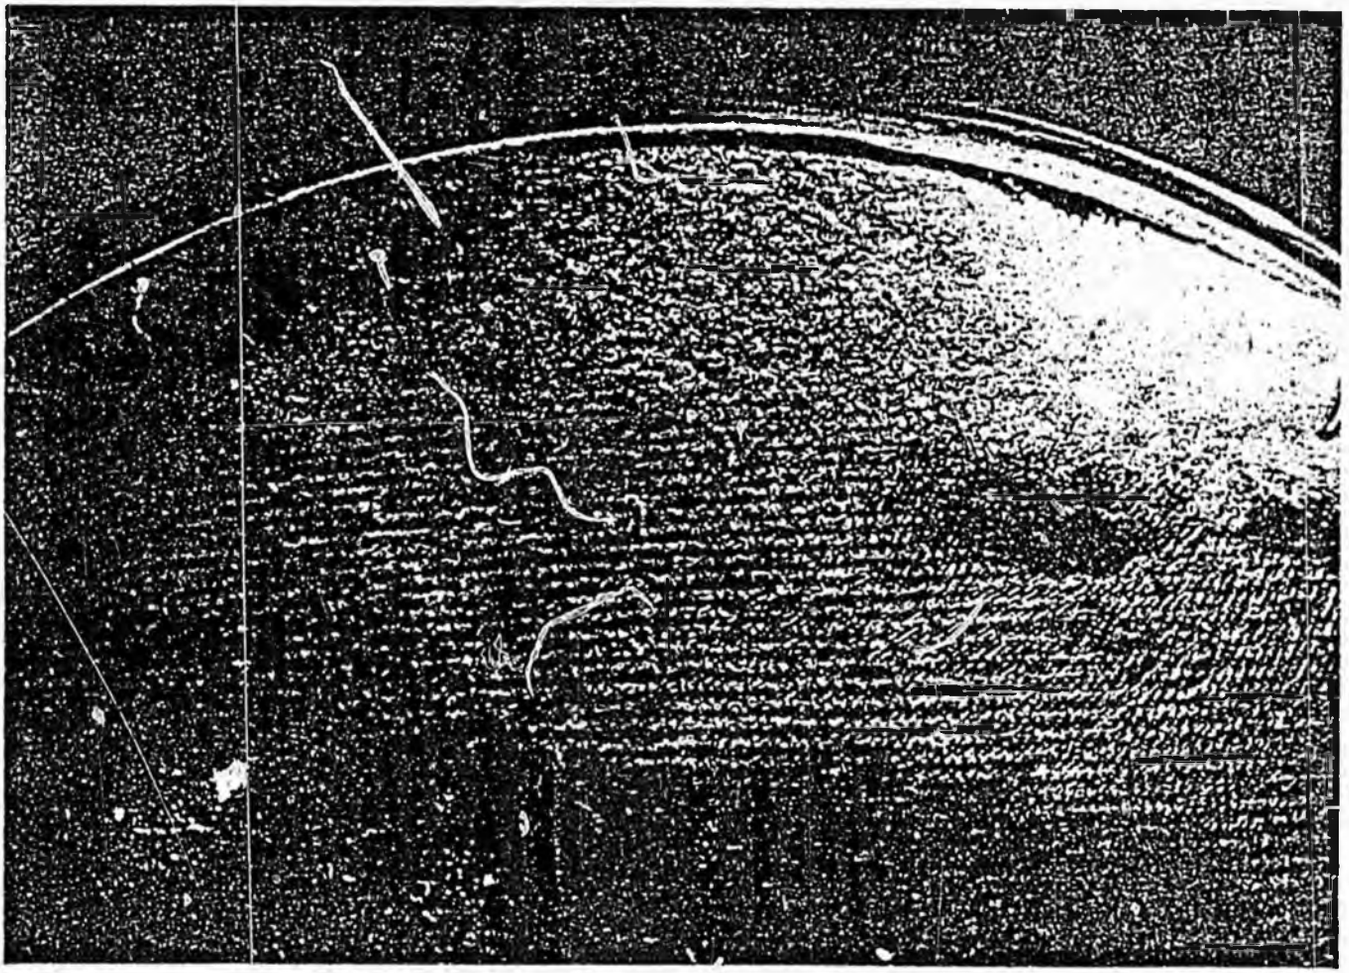

Photo 11 Impression produced in dust on headlight of hit-run car by the coat of the victim.

D. HAIR

Although hair is a frequently encountered type of evidence it has real evidentiary value in only a limited number of cases. Except for determinations as to possible source, such studies also require fairly large samples if the laboratory results are to be of real significance.

1. Human Hair

   a. Hair samples can be identified as human and some indication of the part of the body from which they originated can frequently be established.

   b. Hair color can be determined and some information developed concerning bleaching, dyeing or related treatment.

   c. The racial traits of the individual from whom head hairs originated can be suggested in some instances.

   d. Study of hairs can frequently establish whether or not they fell out naturally, or were pulled out or if they have been cut or crushed.

   e. It is presently not possible to conclusively prove that two specimens of hair came from the same individual. In the case of head hair, however, the laboratory may be able to indicate a possible common origin. The value of such studies will vary greatly depending upon the quantity of hair recovered as well as the characteristics found in the examination.

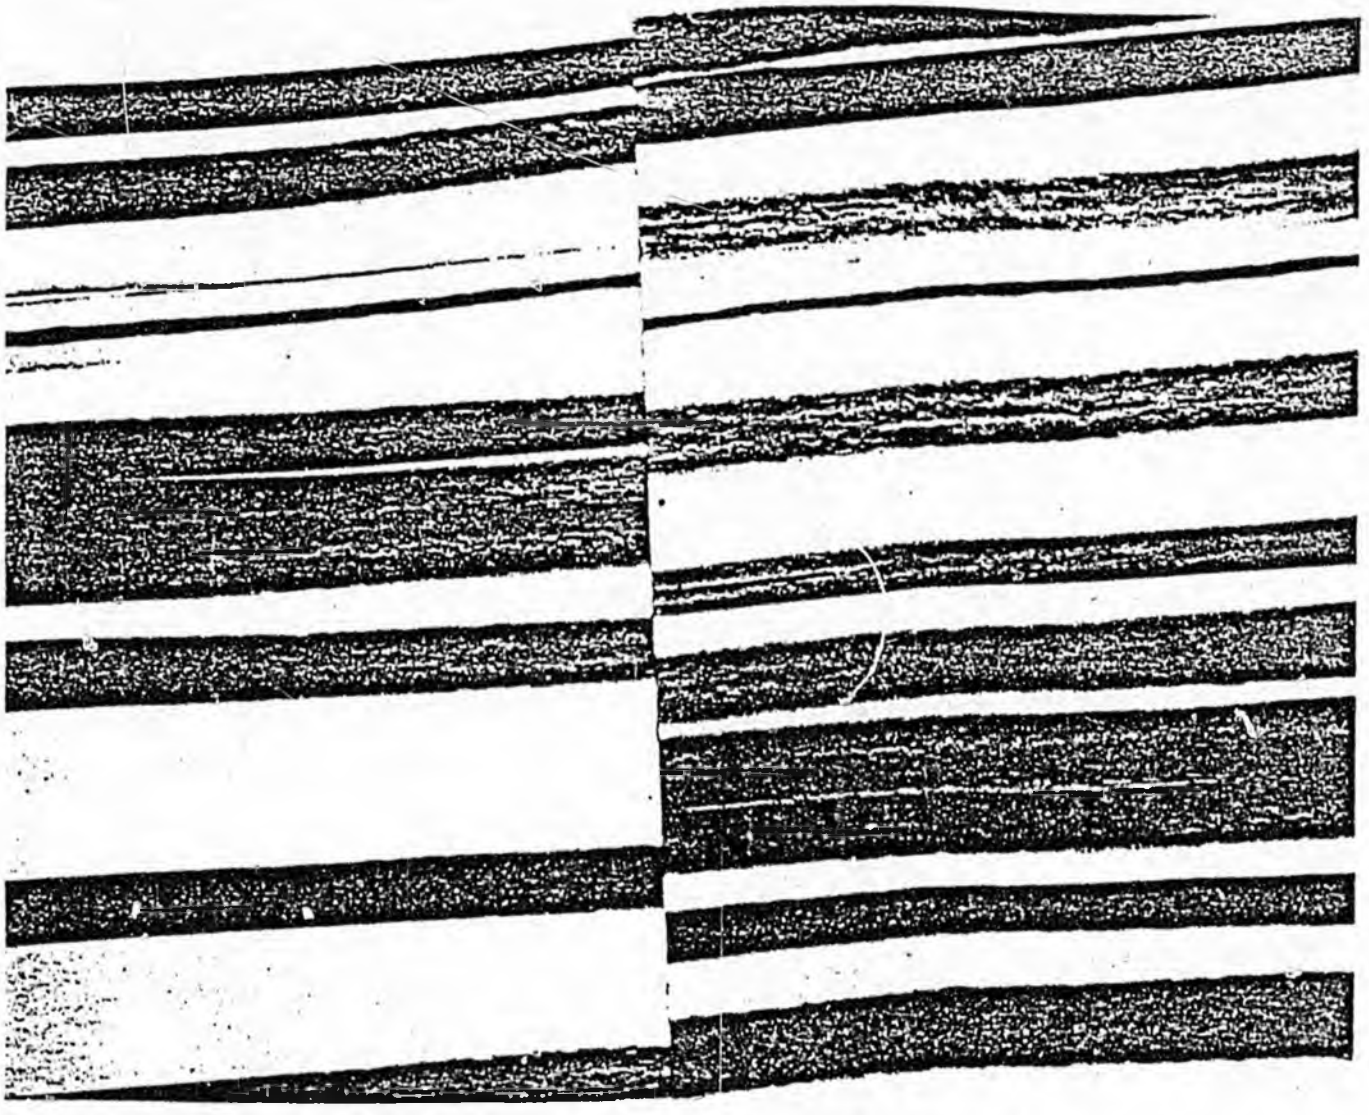

Photo 12 Even though there are similarities in hairs from the same person, there are also considerable variations as illustrated. Thus it is extremely difficult to state that hair is from a specific person.

2. Animal Hair
   a. Animal hair samples can sometimes be identified as to the genus of animal from which they originated.
   b. While animal hair can be compared with specimens from specific animals, this type of examination will only serve to establish similarities in structure and animal type. It is never possible to prove that recovered animal hairs came from a specific animal.

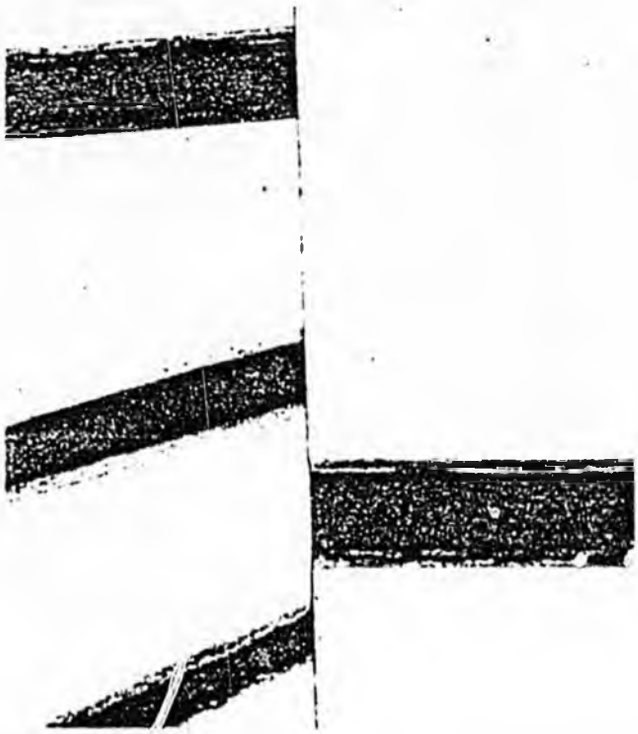

Photo 13 Comparison of hair from horse struck by hit-run vehicle (left) and hair removed from suspect vehicle (right). Horse was being ridden by young girl who was also injured.

3. Recovery of Hair Evidence
   a. If hair is firmly attached, such as in dry blood or caught in metal or a crack in glass, do not attempt to remove it, but rather leave the hair intact on the object. If the object is small, mark and seal it in an envelope with sealed corners. If the object is large, cover the area containing the hair with a protective layer of paper to prevent loss of the hairs during shipment.
   b. Recover *all* hair present. If possible, use the fingers to pick up the hair and place in a vial or paper envelope with sealed corners. Do not mix samples recovered at different locations. Label and seal the container. Never use gummed tape to pick up hairs and do not wash or clean them.

4. Standards for Comparison
   a. If injuries to a victim suggest a point of origin, secure hair specimens from as near this location as possible.
   b. When the point of origin is unknown, secure samples from various locations and keep samples separate. In the case of human head hair it is important to obtain samples from different areas on the head since variations in structure or color of head hair frequently occur on the same individual. Likewise, there is a major difference in human head, pubic, arm, beard and other hair from different parts of the body. Animal hair secured from different areas on the animal body will also vary greatly in structure.
   c. Whenever possible obtain large samples from each area. It is desirable that each of these contain at least several dozen hairs.
   d. Attempt to pull out standard samples which will be used for comparison purposes. If this is not possible, cut the hair as close to the skin as possible. Note whether the hair was cut or pulled.
   e. Always obtain samples from all individuals involved. In many investigations the laboratory is requested to determine if a sample in question originated from a specific individual when there are only a limited number of persons from whom the hair could have come. In the case of hair samples from vehicles in accidents, beds in sex offense cases and similar investigations, it is important to have standard samples from all possible occupants and not just from the individual from whom the hairs are believed to have originated.

E. PAINT

Paint is one of the most common types of physical evidence encountered. Paint evidence will be found in the majority of hit-run and burglary cases where it may prove to have material value. Paint evidence may also be involved in various other types of crimes.

1. Hit-Run Cases
   a. Paint may be transferred to the clothing of pedestrian victims. Examine all garments with particular attention being paid to areas showing pressure glaze, tears, or other contact.
   b. If found, do not remove the paint, but mark the garment and dry it completely if damp. Then carefully wrap each item separately by rolling in paper or place each garment in a separate paper bag for delivery to the laboratory.
   c. Such paint will at least show the color of part of the responsible car. It must be remembered, however, that many modern cars have more than one color and the paint transferred only represents the color of the particular *area* on the car that made contact with the victim.
   d. It is sometimes possible to indicate the manufacturer and year of vehicle from a paint transfer. Such findings may assist officers in the apprehension of the responsible vehicle. When this type of study is desired it is of considerable assistance to the laboratory to receive any information available concerning the responsible vehicle. This includes receipt of any other evidence found at the scene, such as broken plastic lenses or other vehicle parts, which may in themselves indicate the make and year of the vehicle. Statements made by witnesses which suggest one or more possible types of vehicle are also of interest and should be included in any request letter forwarded with the evidence.
   e. Sometimes whole chips of paint will be transferred to the clothing. If these flakes contain several layers and particularly if they came from a repainted car, such evidence may have great value when the responsible car is located.
   f. Chips of paint may also be found on the ground near the point of impact. In some cases it has been possible to physically match several chips found at accident scenes with paint remaining on the fender of the suspect's vehicle.
   g. Obtain samples for comparison from *all areas showing fresh damage* on suspect vehicles. This is very important since the paint may be different in type or composition in different locations even though the color is the same. If the paint can be flaked off by bending the metal slightly, remove it in this manner. If not, scrape paint off using a clean knife blade. In every case make certain that samples of *all layers* down to the metal are collected. Carefully wipe the blade of any knife or scraping tool employed before collecting each sample to prevent cross contamination. Place each sample collected from different areas in separate containers.
   h. Cross transfers of paint commonly occur in hit-run cases involving two or more vehicles. If loose paint chips are located in such cases, attempt to remove and place them in coin envelopes. If, however, the transfers are smeared on the surface, flake off chips or scrape paint from vehicle including the transferred paint as well as the top layer of paint originally on the car. Keep all transfers recovered from different areas in separate containers.
   i. When cross transfers occur, *always collect known, uncontaminated samples from each vehicle from areas immediately adjacent to each transfer collected.* This is of great importance since such specimens permit the laboratory to distinguish between the transferred paint and the paint originally present on the vehicle.

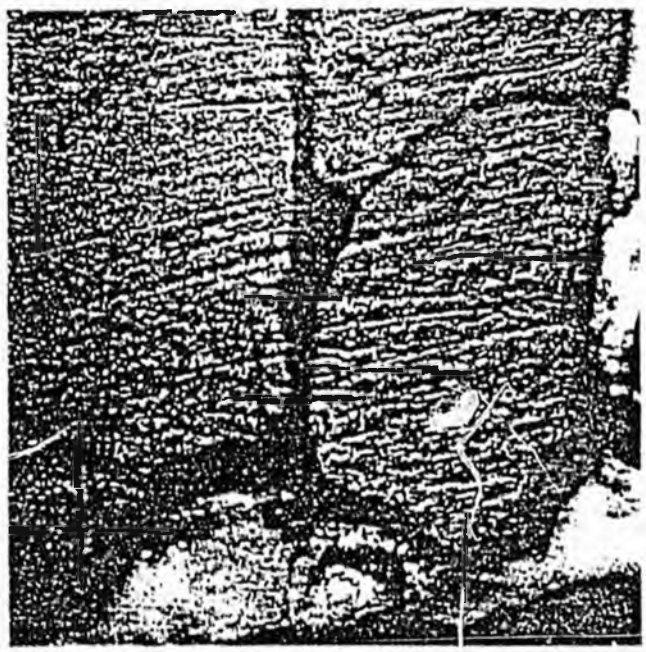

Photo 14 Paint from safe which was hauled away from burglarized store (left) and chips of paint found in vehicle of suspect (right). Corresponding abrasion markings on paint surface established that all came from the same source.

2. Burglary Cases
   a. Tools used to gain entry into buildings or safes often contain traces of paint as well as other substances such as plaster, safe insulation, etc. Care must be taken that this type of trace evidence is not lost. If such transfers may be present, wrap the end of the tool containing the material in a plastic envelope and seal with plastic tape to prevent loss. *In no case* should attempts be made to fit the tool into marks or impressions found. If this is done, transfers of paint or other material might occur and any material later found will have no significance as evidence.
   b. Collect specimens of paint from all areas which the tool may have contacted at the crime scene. These samples should include all layers present.
   c. The tool itself may contain paint or other coatings, traces of which may be left at the crime scene. Careful search should be made of each tool mark for any such evidence.

3. Recovery and Preservation of Paint Specimens
   a. Keep all samples collected in separate containers.
   b. If the sample is very small or difficult to remove and the complete exhibit itself can be sent to the laboratory, this is the best procedure and will make available all of the paint without loss.
   c. Always scrape or otherwise remove samples of all layers of paint or other material present if the complete exhibit containing the paint is not to be submitted to the laboratory.
   d. Small glass or plastic vials are excellent containers for paint.
   e. Paint may also be placed on sheets of white paper which can then be folded and sealed to prevent loss.
   f. Paper envelopes should never be employed for the submission of paint unless the specimen is very large in size. If such envelopes are used, always seal all four corners with plastic tape to prevent loss and follow the procedure as outlined in section e.
   g. A very useful method for securing paint from vehicles, walls and similar locations is to place a short strip of plastic tape on one side of the open end of a small paper envelope with the gummed flap folded back. The tape and envelope are then attached to the object containing the specimen. By holding the envelope open with one hand paint can be scraped loose and into the envelope with a clean knife blade. Once the sample is in the envelope the tape can be removed, the flap folded forward and the open end of the envelope folded several times. Then this folded area is sealed with a paper clip or a short length of tape. Such a container may then be sealed in a standard mailing envelope which may easily be marked for identification.
   h. Markings placed on labels, envelopes or other containers should include the officer's name, date and time of collection, as well as the specific source of the sample (for example: R/F fender 1970 Ford, license #ABC 123).
   i. In no case should conclusions of the officer, requests for examination or other unnecessary writing be included.

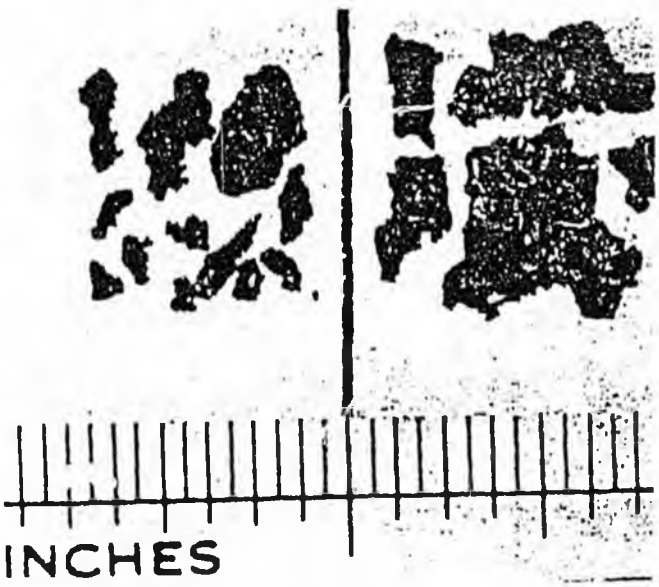

Photo 15 Chips containing three colors of paint from trunk of suspect's car (left) and from safe which was hauled away in a burglary (right).

Photo 16 A method for securing paint samples from vehicles and similar locations. Attach plastic tape to one side of open end of envelope and seal below area to be scraped.

F. GLASS

Windows are frequently broken in burglaries, headlights in hit-run cases and bottles or other objects may break with fragments being left on garments or other property of subjects involved in various types of crimes.

1. Collection and Packaging of Evidence Glass
   a. The shoes and clothing of suspects as well as other objects which may be contaminated with glass should be marked and wrapped separately to avoid cross-contamination. Even though contaminating glass is not usually immediately visible to the investigator, any visible pieces should not be removed or disturbed, but rather the entire article should be carefully wrapped to protect and preserve the contaminant as found on the article.
   b. *All* glass found at hit-run scenes should be recovered. All glass should be collected because more than one type may be present. In addition, if just a few representative samples are saved, individual pieces that could be physically matched with glass remaining in the headlight shell of the suspected vehicle may be overlooked. The search should not be limited to just the point of impact since other headlight glass may drop off at some distance away as the car leaves the crime scene. Glass from different locations should be kept in separate containers.
   c. Place small glass fragments in envelopes or pill boxes. Completely seal and mark the container.
   d. Place large glass fragments in bags or boxes but separate individual pieces with newspaper or tissue to prevent breakage and damage to edges during shipment. Large fragments can be marked with grease pencil, adhesive tape, labels or a scriber, but this is usually not necessary if all are sealed together in a single marked container. When breakage direction determinations will be needed, it will be necessary to mark each glass piece prior to its removal from the window to designate inside and outside surfaces.
   e. The headlight filaments from the broken headlight of a suspect's car may bear significant glass contamination. The absence or presence of fused glass can be determined in the laboratory and may provide evidence as to whether the headlights were illuminated at the time of headlight breakage.

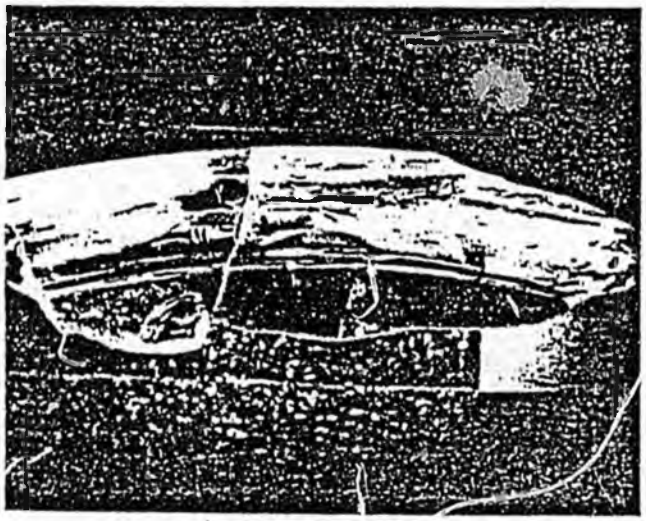

Photo 17 Comparison of headlight lens glass fragments from a hit-run scene and a suspect vehicle.

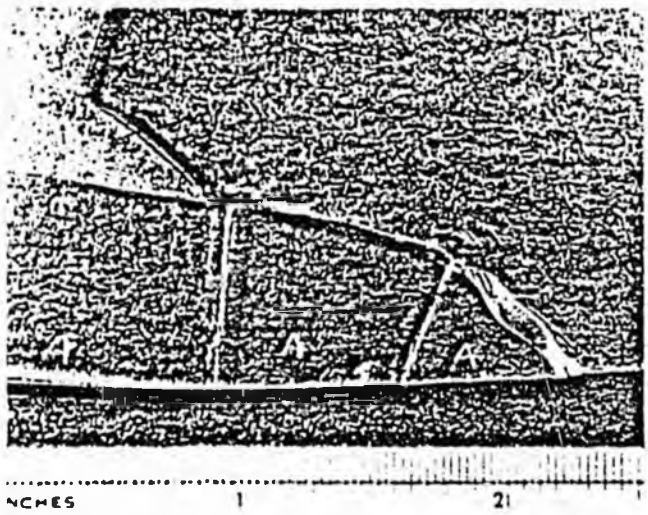

Photo 18 Three pieces of glass found in a suspect's vehicle (marked A) matched with larger pieces from broken window at a burglary scene.

2. Standards for Comparison
   a. Windows—If a broken window at a crime scene is small, submit the whole window or all glass remaining to the laboratory. If the evidence glass is large enough for physical matching of broken edges or comparing the fracture lines, hackle marks, surface abrasions, or contamination, the whole broken window is necessary. When physical matching does not appear possible and a broken window is large, the recovery of *several* samples from different areas on the window is usually satisfactory. Heat-hardened or tempered glass is commonly encountered in glass doors and automobile side and rear windows. The well-known diced breakage of this kind of glass into typically small, rectangular beads makes physical matching impractical in most cases. Several pieces should be collected

for comparison of physical properties with evidence glass.

b. Auto Headlights—*All glass remaining* in the shell must be recovered if physical matching with fragments from the scene is to be conducted. Remember to consider the potential value of glass on the lamp element as an indicator of whether the headlight was on at the time of breakage. These will be microscopic fragments, not normally visible to the unaided eye.

c. Other Glass—When bottles or other glass objects are broken, recover *all* glass remaining. Glass on shoes of suspects can be compared with broken bottles at crime scenes and glass from the skull of a murder victim can be compared with a broken bottle used as a weapon.

3. Value of Glass Comparison

Glass will have greatest value as evidence only when fragments from two sources can be physically matched together. When this is possible, a common origin can be conclusively established even when the fragments are quite small. In the case of powdered glass and minute fragments, it can be established that the material is, in fact, glass and very accurate comparisons can be conducted. However, conclusive identifications as to common origin are usually not possible. Nevertheless, the latter type of comparisons will establish similarities or differences in samples and thus may prove significant.

4. Other Glass Studies

Other studies of glass are periodically of importance. In the case of broken windows or other glass sheets, it is often possible to determine the side to which the force was applied which resulted in breakage. When multiple fractures are present in glass it also may be possible to determine the order in which the breaks occurred. It is also possible, in some instances, to prove the sequence of shots through glass when consecutive bullets penetrate glass from one or both sides. In all such instances it is essential to have available for study *all* glass remaining in a window as well as *all* fragments which break and fall to the ground. A simple diagram should be made to differentiate and identify the origin of glass samples from the window and from the ground. A copy of this diagram should be submitted with the evidence.

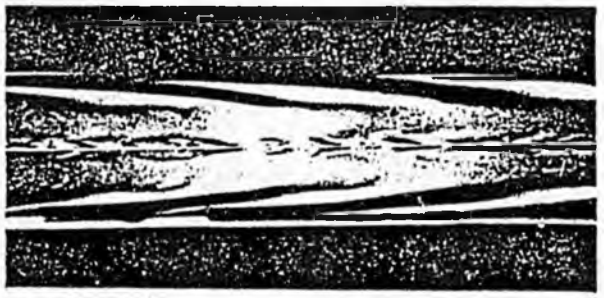

Photo 19A Hackle marks on fractured edges of window glass.

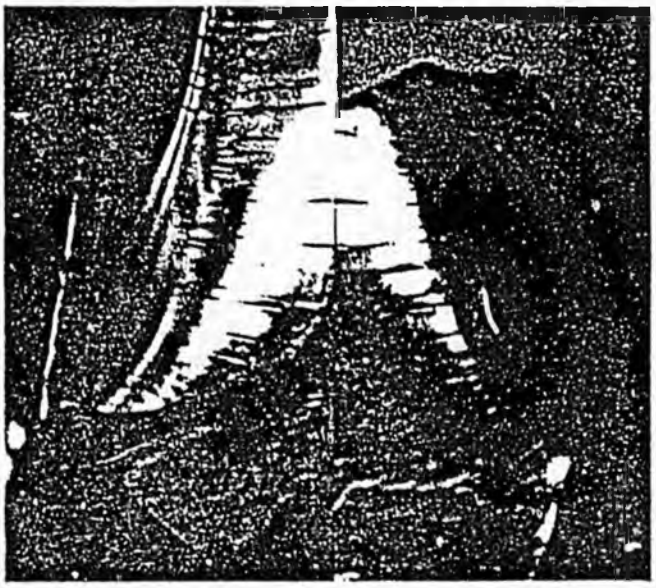

Photo 19B Comparison of hackle marks on fractured edges of small glass fragments from hit-run vehicle and accident scene.

Photo 19C Rib marks on fractured edges of two small glass fragments from hit-run vehicle and accident scene.

G. OPERATING CONDITION OF LIGHTS

As part of the investigation of vehicle accidents it is often of importance to determine whether or not a headlight, taillight, spot light, turn indicator light or other unit was illuminated at the time of the accident. Such determinations can usually be made if the lamp bulb has been cracked or broken at the time of the accident. In some instances such determinations can also be made even if the glass is not broken.

1. Recovery of ALL parts of the broken lamp is of primary importance. Carefully remove the COMPLETE lamp unit if possible. Otherwise remove ALL PARTS of the unit even if it is completely smashed. The parts recovered should include the socket, glass fragments, filament supports and the filaments. A thorough search for any portions of the coiled filaments themselves is of great importance since they are very small and fragile and may be overlooked when broken. The recovery of the filaments is of greatest value since more information can be secured from them than from examination of any other parts of the lamp unit or light bulb.

2. Separated filaments recovered should be protected from further breakage. They may be placed on cotton and sealed in a box or vial or inserted into a plastic envelope reinforced by a piece of cardboard. Always prevent any further breakage.

3. Broken lamp units and parts which have been recovered should be marked and then packaged in a manner to prevent further damage during shipment.

4. Whenever practical, if the broken unit is one of a pair, attempt to remove and submit to the laboratory the other lamp of the pair. Frequently, such unbroken units will aid in determining the age and condition of both lights prior to the time that one was broken.

5. Check the vehicle at the time the lamps are removed to determine the purpose served by each broken light. While this is normally obvious, occasions do arise in which wiring has been altered. This is particularly true in the case of some motorcycles where occasionally it has been found that tail and stop light wires have been reversed.

6. In the investigation of accidents where the operating condition of lights is of importance, always check the position of the light switches. Also question all suspects, victims and witnesses as to their observations concerning the operation condition of lights involved.

7. Advise the Laboratory if any attempt has been or may have been made to turn on a damaged or broken lamp after the accident occurred.

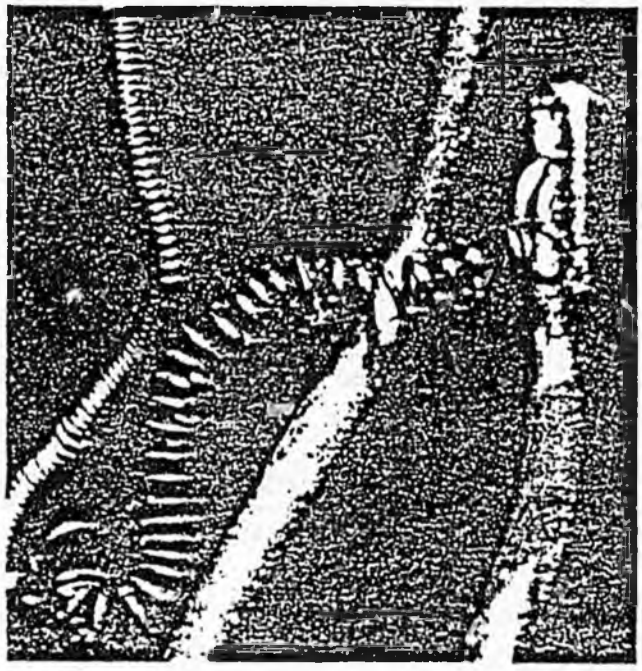

Photo 20 Tail and brake light filaments from broken unit on rear of vehicle involved in accident. Small taillight filament (left) was off. Large brake light filament (center) was on. This is shown by the small glass beads which are fused to the brake light filament.

H. PLASTIC

Different types of plastics are used in a wide variety of modern products. Periodically such articles will be broken or otherwise become involved as evidence in various criminal investigations.

1. Parking, turn indicator, guide and tail light lenses on most motor vehicles are now made of plastic. When these are broken at accident, burglary or other scenes the fragments recovered will frequently serve to indicate a specific make, model or year of vehicle. This is generally possible because different sizes, shapes, designs and color of such lenses are used by the various manufacturers on different year or models of vehicles.

2. When fragments of lens plastic of adequate size are recovered, attempts should be made to have them identified by local auto dismantlers or new vehicle parts department personnel. When such plastic cannot be identified locally, it may be forwarded to the laboratory for additional study.

3. When a suspect vehicle is apprehended, which contains broken plastic, remove all portions of the unit remaining. If physical matching of broken edges on fragments from the two sources is possible, a common origin will be conclusively established. In those cases where physical matching of fragments is not possible (usually due to loss of intervening fragments) analysis to determine the specific type of plastic can be carried out. The latter, however, usually have somewhat limited value since different manufacturers will commonly use the same type of plastic on many different lenses.

4. Various types and widths of plastic tape may be used to bind robbery victims, insulate electrical wire connections, or be employed for other purposes. When such plastic tape is recovered as evidence, it can be readily compared with either rolls or strips of tape in the possession of the suspect. In some cases it has also been possible to physically match together cut or torn ends on tape from two sources.

5. Subjects who commit various types of crimes where they are apt to remain at the scene for an extended period will occasionally open cigarette packages and leave parts of torn plastic, foil or labels at the scene or in a vehicle. When such individuals are apprehended within a short period of time and still have the cigarette package in their possession, it is possible to physically fit together the torn wrapper portions from the two sources. Such findings will establish that the subject was at the crime scene.

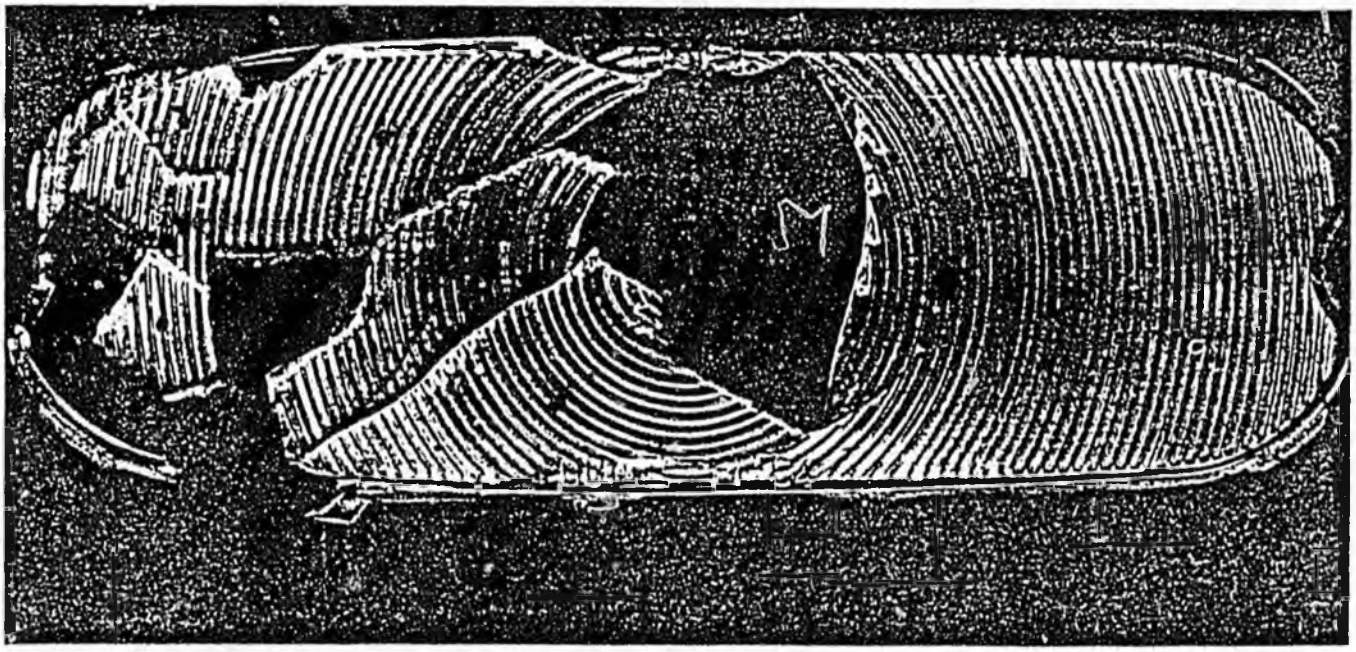

Photo 21A Physical comparison of plastic recovered at fatal hit-run scene (marked with black dots) and broken turn indicator lens on suspect car. Prior to apprehension of car the pieces from the scene indicated make and year of vehicle involved.

6. Many other plastic studies have proven to be of significance in various investigations. Additional examples of the use of such evidence are the following:

   a. A minute deposit of plastic in a scratch mark on the side of an automobile was proven to correspond with a plastic grip on the handlebar of a hit-run victim's motorcycle.

   b. A plastic purse of another accident victim was found to correspond with a trace smear of black plastic on an automobile fender.

   c. Plastic from a bomb which exploded after being shipped by mail was identified as corresponding with wire insulation on electric blasting caps made by a specific manufacturer. The suspect in this case had such blasting caps in his possession.

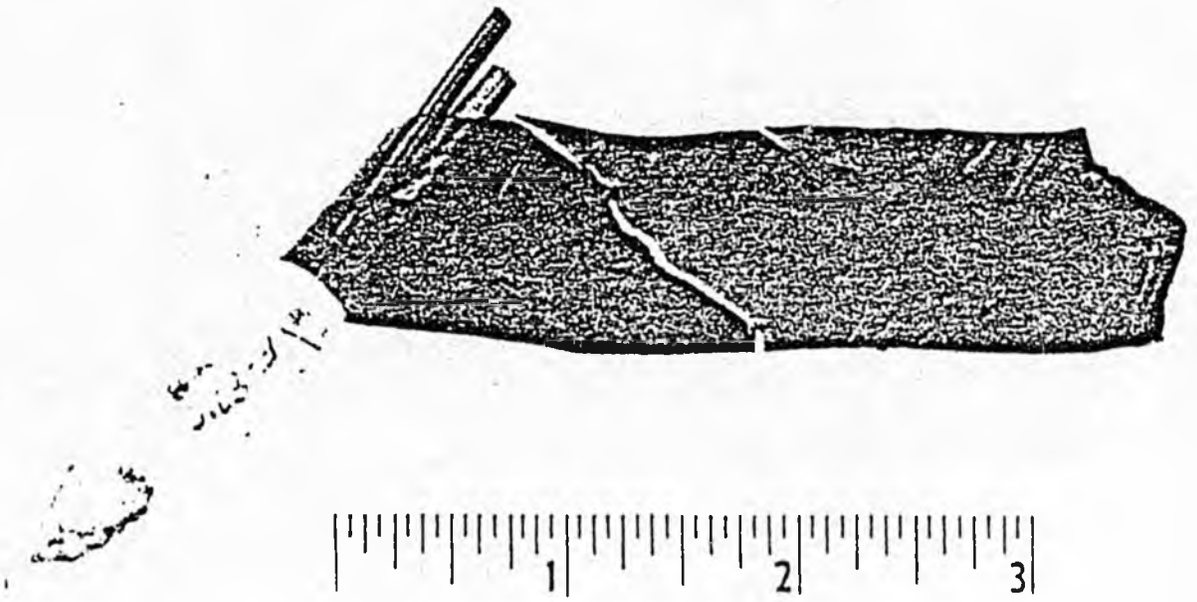

Photo 21B Comparison of plastic tape on wires remaining in victim's car and on cut wires on stolen motor in auto theft case.

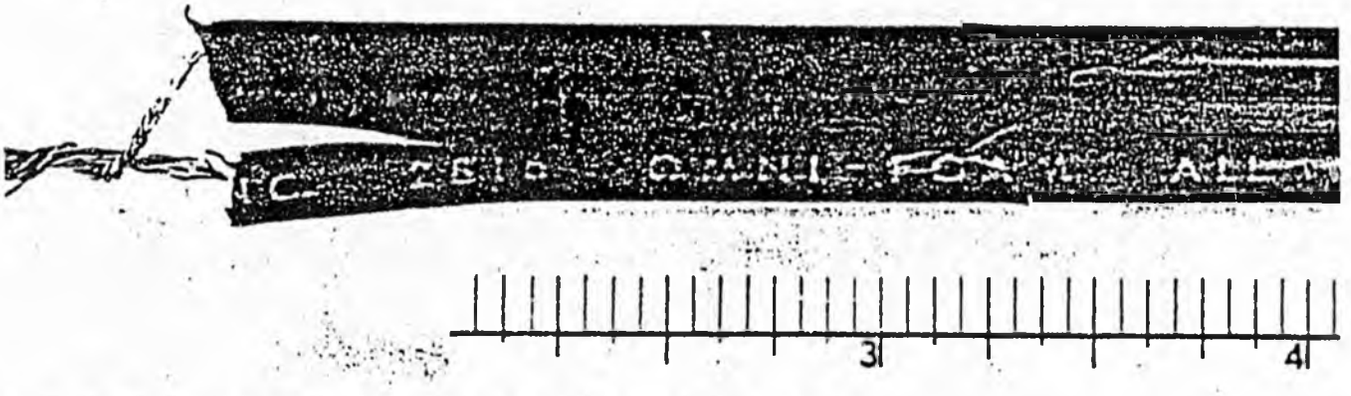

Photo 21C Comparison of cut TV antenna wire on stolen set and wire from house of victim.

I. SOIL

The comparison of soil or dried mud samples on shoes or clothing of suspects with specimens secured in and about crime scenes is frequently of value in burglaries, sex offenses, homicides and other investigations. Periodically, soil samples will also fall from under vehicle fenders at hit-run scenes and comparison with specimens recovered from suspect vehicles may aid in placing the vehicle at the scene. Comparison of samples in such investigations may prove useful but, to have real significance, usually necessitates employment of very careful evidence collection procedures and the securing of numerous samples. Naturally occurring soils consist of rock and mineral fragments, material such as clay, decomposed organic matter, living organisms, chemicals and water. Samples secured from many areas may also contain debris resulting from human habitation or industrial operations. The latter type of debris, if sufficiently varied and unique, will often be of most value in individualizing a specimen. To permit proper evaluation of laboratory findings when only naturally occurring soil is present requires the study of sufficient samples to establish the normal distribution of soil of a particular type in and about the source of the specimen.

1. Firmly Attached Soil Samples

   If the soil is firmly attached to some object, as in the case of dried mud on a shoe, do not remove it. Label the object and place it in a bag or some other appropriate container. Always *completely seal* the container so no loss of the specimen can occur. Be certain the sample is dry before packaging.

2. Loose Soil on Clothing

   If the soil is loose, for example, in a trouser cuff, shake it all out onto a clean piece of paper. Then, fold the paper several times to enclose the dried soil sample and place this in a plastic envelope or other container which can be sealed completely. Label such containers to show the source of the sample.

3. Soil on Other Objects

   In the case of loose soil or mud on the street or in a building, pick up the soil and place the dried sample in a plastic bag, box or jar and seal and mark the container. Attempt to collect the soil without other contaminating material. In the case of hit-run cases, cakes of dried mud may fall to the payment or road shoulder from under a vehicle fender. In such cases, if contamination may have occurred, attempt to pick up the upper part of specimen only, leaving the contaminated underside. Also advise the laboratory concerning the possibility of contamination.

4. Prevent Contamination

   Great care must be taken to prevent contamination or loss of samples during shipment. Always place samples in *sealed* plastic or glass containers, if possible. *Do not* use paper envelopes as they invariably leak. If boxes are used, line them with clean paper and seal the box.

5. Damp Soil

   Always dry out damp soil specimens or moist objects containing soil or mud prior to packaging. When sealed in a container while damp, mold growth will occur and organic matter in the soil may decompose. Always seal a lid on soil containers to prevent loss of sample and place suitable markings on the outside of the container.

6. Reference Specimens for Comparison

   a. Collect two to three ounce reference samples from the suspected source of the specimen in question. Also collect samples from many other locations in the vicinity of the crime scene so that the laboratory can determine how much variation there is in the soil in that area. In the case of a footprint in the ground at a residence burglary, collect reference specimens at several locations in the yard at the scene. Also obtain samples from adjoining property. In cases where comparisons of soil from rural areas are desired, collect specimens from various locations in the fields near the crime scene and also from adjoining farms or fields.

   b. An excellent method for securing useful reference specimens in open areas is to first take one or more samples from the scene, footprint, tire print or other similar location. Then additional samples may be collected at distances of approximately 10, 50, and 100 feet in all four compass directions (where soil is present) from the original location. This gives a good picture of the soil conditions and variations in the crime scene area. (See Figure 1, next page.)

   c. If dried mud is present on a suspect's shoes or clothing, qustion him as to its source. Obtain soil samples from any alibi areas he may mention.

   d. Comparison samples must be representative. If soil on shoes appears to be from the surface where footprints are found, collect surface samples. "Any subsurface-collected specimens may be quite different." If the soil may be from an excavation of some type, collect numerous specimens at different depths and mark the depth at which each was recovered.

FIGURE 1

A = 10 ft.
B = 50 ft.
C = 100 ft.

Start at point number 1 (footprint, tire impression, area of obvious scuffle, etc.) and obtain soil samples at each point, 1 through 13. Each sample should be numbered to correspond with the number on the diagram. Record a description of the physical location from where the soil sample was collected (e.g., ditch) and note any unusual conditions in the vicinity (e.g., close to petroleum tank).

e. If soil recovered at a hit-run scene may have dropped from the fender of the responsible vehicle, collect reference specimens from under each fender of the suspected vehicle. Keep each sample separate and label as to source. Normally, in such cases, only lumps of dried mud have much value. Fine silt from under the fenders of vehicles usually cannot be definitely connected with any specific automobile. In some cases, where a large lump of dried mud is found at an accident scene, it may contain a characteristic shape which can be compared either with mud remaining under a fender or irregularities in the fender of the responsible vehicle.

f. In most soil comparison cases, numerous comparison specimens are necessary. Normally the more samples that are collected, the more value will be the comparisons conducted.

g. Collect comparison samples as soon after the crime is discovered as possible. If delays occur, the soil may be altered by cultivation or contamination and thus no satisfactory comparisons can be made.

7. Value of Soil Comparisons

The laboratory conducts a variety of soil analyses to establish the similiarity or difference between the samples. If the soil is in any way unusual, the comparisons may have great value. In some cases where similar soil is present over a wide area, such as on a river levee or in the case of beach sand, the comparisons may have little value. Definite conclusions cannot be reached unless complete studies of many samples from the crime scene area are possible.

Photo 22 Soil samples being removed from boots in preparation for further examinations.

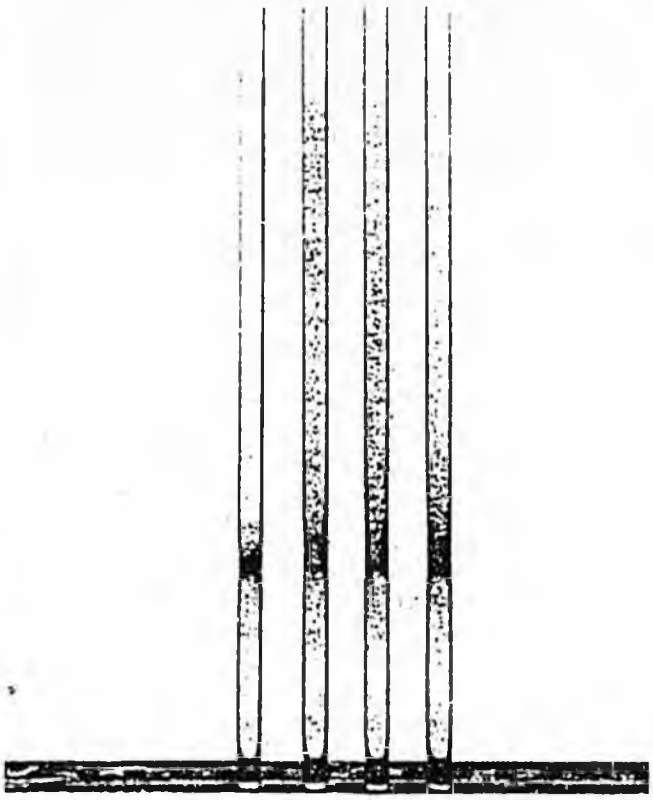

Photo 23 Soil comparison in density gradient columns. The left tubes contain specimens from two locations at a burglary scene. On the right are specimens from the suspect's shoes. Only the samples in the center tubes match.

J. TOOL MARKS

Tool marks are encountered most frequently in burglary cases but may also be found in many other types of crime. The evidence consists of abrasions or impressions left by tools on objects at the crime scene and various types of tools found in the possession of suspects. In many cases it is possible to identify the specific tool which made the questioned marks by means of laboratory comparisons of tools and marked objects. In some instances it is also possible to prove that marks on tools were produced by objects which they contacted at crime scenes. In other cases it is possible to prove, by means of physical or other comparisons, that parts of tools left at crime scenes were broken from damaged tools found in the possession of suspects.

1. Preservation and Packaging of Tools

   All areas on recovered tools which contain transferred paint, building materials or other contamination should be wrapped in plastic so that such substances will not be lost. After marking, tools should be wrapped or packaged to prevent the prying blades or cutting edges from contacting any other surface or object. Care should be taken that no tape is placed on the mark or questioned area of the tool when packaging.

2. Make No Tests With Tools

   Attempts should never be made to fit tools into questioned marks or to make test marks prior to laboratory examination. If done, the questioned mark or the tool may be altered and this may make any laboratory examination valueless. In addition, traces of transferred paint or other substances on the tool may be lost or additional material may be transferred to the tool.

3. Preservation of Tool Marks

   a. Whenever possible send the whole object containing tool marks to the laboratory instead of just removing the area containing the mark. This is important since, to make satisfactory test marks with the tool, it is necessary to determine the direction of motion and the vertical and horizontal angle at which the tool was held when the questioned mark was made. A study of all impressions and abrasions present on an object such as a door jamb or safe, will often indicate the method in which the tool was used much better than an examination of just a small section removed from the safe or other object.

Photo 24 Physical match of metal found in burglarized vending machine and broken end of one of the four tines on an ice breaker tool of a suspect.

   b. If it is impossible to submit the whole object to the laboratory, remove the tool mark itself. In such cases care should be taken to prevent any damage or alteration of the questioned mark. Always cut off sufficient surrounding material so that no damage will occur. A photograph showing the original location of the mark and its relation to its environment should accompany any removed marks.

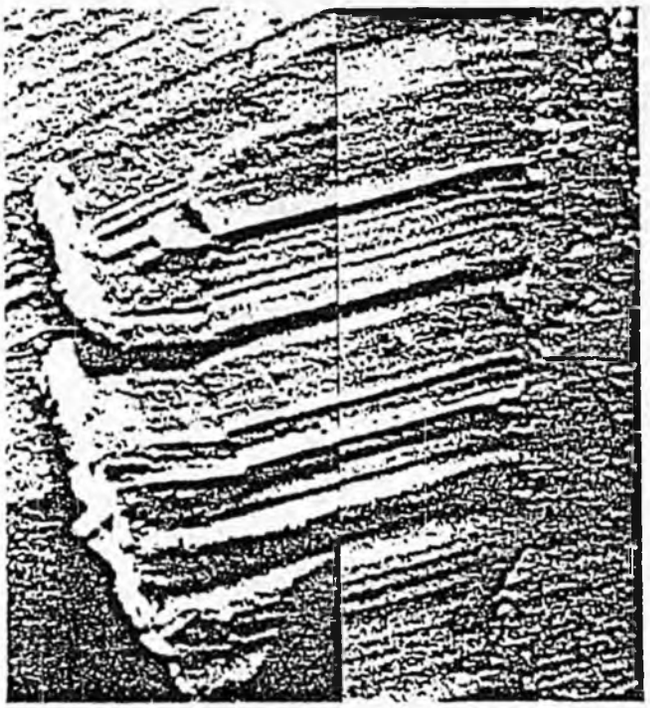

Photo 25 Comparison of tool abrasion mark on door lock (left) and test made on lead with suspect's wrench (right).

   c. While photographs of tool marks at crime scenes may have value in some investigations, they rarely have any value in identifying the particular tool used. The laboratory cannot accurately compare suspected tools with photographs of tool marks, even when the exact magnification of the photographs is known. Photographs which show the whole object as well as the tool mark, however, are of value to indicate methods by which the marks were produced or the orientation of the tool. This information may assist in producing satisfac-

tory test marks in the laboratory, therefore such photographs should be included.

d. Mark the object containing tool marks in some area where the questioned impression or abrasion will not be damaged.

e. Pack the object containing tool marks so that no alteration or damage will occur during shipment. Small objects may be placed in envelopes or boxes while important areas on larger objects can be protected with plastic, paper or cardboard. Large objects may be packed in cartons or crates if not delivered in person.

4. Wire Theft

a. Due to the value of scrap copper, thievery of copper telephone and electric lines, whether in use or abandoned, has become a very frequent occurrence. In numerous cases of this type it is possible to identify bolt cutters, wire cutter pliers, diagonal cutters, pruning shears, and other tools recovered from suspects as being the specific tools employed in cutting wire ends left at the crime scene.

b. Under the best circumstances, tool mark comparisons on small wires are difficult. This is due to the fact that only a very short section of the cutter tool blades makes contact with the wire. It is therefore difficult and seldom possible to prove that two different wires were cut with the same tool unless the tool itself is available for study. In those cases where the responsible tool is obtained test markings can be made in the laboratory which will record the structure of all portions of the blade surfaces. In routine wire theft cases the laboratory cannot compare cut wires recovered at different crime scenes just to establish that the same tool (and therefore the same suspect) was involved. A suspected tool must be recovered first.

5. Examples of Value of Such Evidence

While all applications of tool mark evidence cannot be covered, a few illustrations may indicate its value as evidence.

a. Hammers may often be identified as being the specific tools which made impressions on safes or other objects.

b. Screwdriver scrape marks on lock boxes and other objects are often identifiable as having been made by tools found in the possession of suspects. It has also been possible to identify the tool used to remove metal screws at a crime scene.

c. Pry bars and other similar tools can frequently be identified as having been used to produce marks on doors, window frames, safes and other objects.

d. Knives have been identified as having made cuts on wood.

e. Bolt cutters, pliers, tin snips and similar tools can often be identified as being the specific tools used to cut wires, lock hasps, metal bars, sheet metal, etc.

f. Pipe wrenches can sometimes be identified as having been used to disconnect pipes or twist off other objects such as door knobs.

g. Axes and hatchets can be compared with cut marks on wood. In several cases, tools have been identified as lethal weapons by comparison with marks on the skulls of victims.

K. FIREARMS EVIDENCE

Firearms are involved in an appreciable percentage of both major and minor crimes. The evidence in such cases is frequently very broad and investigations of the weapons themselves, as well as the events which occurred, may be quite varied. The laboratory is able to assist in many phases of such investigations.

1. Ballistics

The word ballistics is frequently used incorrectly when reference is made to studies of weapons and cases involving firearms. Ballistics is the science that deals with the motion and flight of projectiles. Such studies are of importance in only a limited number of criminal investigations. The laboratory is capable of furnishing scientific aid in connection with some problems related to ballistics. Examples are the establishment of the range, trajectory or penetration power of fired bullets, richochet pattern studies and the like.

2. Weapon Functioning Tests

Laboratory studies may be conducted to determine trigger pull, operation of safety devices, alteration or modification of weapons, alteration or damage which might make a weapon fire accidentally or be unsafe, general operating condition and related examinations. Whenever such studies are desired the weapon should not be test fired, disassembled or otherwise used, tested or altered prior to the time that it is submitted to the laboratory.

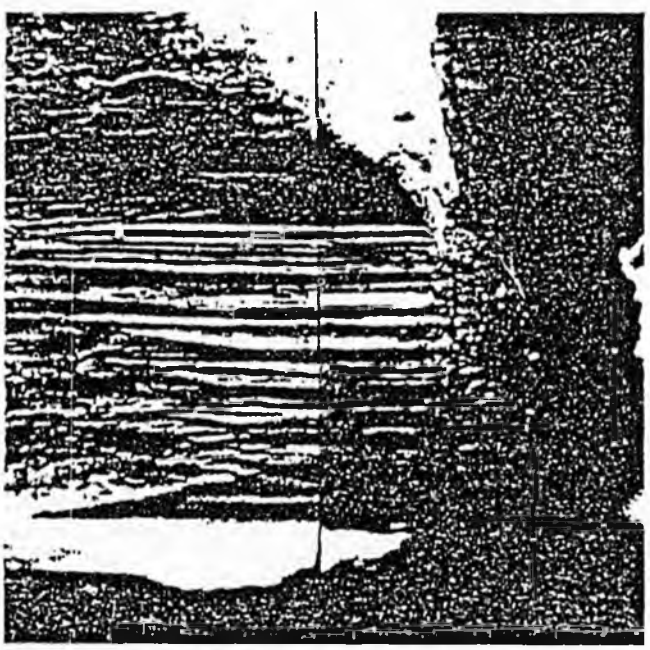

Photo 26 Photograph taken through a comparison microscope showing matching rifling markings on test and question .25 auto bullets.

3. Firearms

a. Never submit a loaded gun to the laboratory unless it is delivered in person. Unfired cartridges may be left in the magazine provided the magazine is removed from the gun. A firearm with a cartridge in the chamber should never be shipped by any method, even if the weapon is not cocked or is on safety.

b. Never clean the bore, chamber or cylinder before submitting a firearm and never attempt to fire the gun before it is examined in the laboratory.

c. Never pick up a weapon by placing a pencil or other object in the end of the barrel.

d. Record serial number, make and model of the weapon and mark it in some inconspicuous manner before sending it to the laboratory. The marking of many firearms is important since duplicate serial numbers are sometimes found on different guns of the same make and general type. Many guns can be marked on the frame by removing handgrips or butt plates.

e. Place the weapon in a strong cardboard or wooden box well packed to prevent shifting of the gun in transit.

f. Rifles or shotguns may be taken apart to make it easier to package and ship, but do not disassemble more than necessary.

g. If blood or other material of interest is present on the muzzle of the gun, place a small paper bag around the muzzle and seal it to the barrel with plastic tape to prevent loss of the sample during shipment.

4. Bullets

a. Never mark a bullet on or near the rifling markings on the bullet sides, even if they are not clearly defined. Certain examinations may not be possible if the base or nose is marked even though these are the preferred marking locations. If there is any question don't mark the bullet but seal it in a marked container.

b. Wrap recovered bullets individually in tissue paper and seal in separate pill boxes or envelopes.

c. Submit all evidence bullets recovered to the laboratory. A conclusive identification may be possible on only one of several bullets recovered, even when they all appear to be in good condition.

d. Do not attempt to clean recovered bullets before sending them to the laboratory, except in the case of bullets removed from a body. The latter may be washed off immediately in running water and dried by blotting on a soft dry towel in those cases where the study of fiber and other evidence adhering to the bullet nose

is not of importance.

e. Handle fired evidence bullets as little as possible to prevent damage to the identification characteristics in the rifling markings or loss of material adhering to the bullets. Never use forceps or other tools to handle bullets.
f. Wrap each bullet separately in tissue paper to prevent damage to the rifling markings by contact with other evidence.
g. Place wrapped bullets in envelopes or pill boxes, label and seal the container.

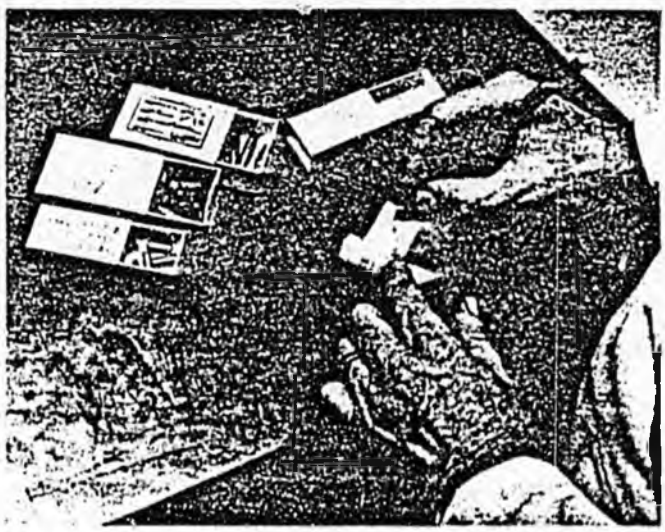

Photo 27 The proper packaging of bullets and cartridge cases includes wrapping of the item in soft tissue.

5. Cartridge Cases

a. Mark cartridge cases on the inside of the open end, if possible. Use initials or other characteristic marks which are kept as small as possible. Cases may be marked on the outside near the open end but care must be taken not to damage clip or other markings which may be present. Never mark on or near the primer end of the case. Again, if there is any question, seal the cartridge in a marked container.
b. Fired shotgun shells may be marked either on the inside or the outside of the paper or plastic portion of the shell.
c. Submit all evidence cartridge cases or shotgun shells recovered to the laboratory. Frequently some cases contain more identifying detail than do others.
d. Do not attempt to clean recovered cartridge cases before submitting them to the laboratory.
e. Wrap each cartridge case separately in tissue paper to prevent damage to breech block, firing pin or other markings by contact with other cartridge cases.
f. Place wrapped cartridge cases in envelopes or pill boxes, label and seal the container.

6. Ammunition

a. Always attempt to recover unused ammunition for comparison purposes when firearms are obtained as evidence. If not in the weapon itself, subjects often have additional ammunition in their car, clothing, house or at other locations. While the laboratory maintains an adequate supply of cartridges of all types for test purposes, some types are not always available. In addition, it may be important for test purposes to duplicate exactly the make, type and age of the ammunition used in the crime. Other ammunition in the possession of the suspect *frequently* is identical to that fired at the time of the crime.
b. Unfired ammunition may be marked on the side of the cartridge case, near the bullet end.
c. Ammunition may be compared to establish similarities in type and manufacture. It is sometimes possible to show that a particular bullet or cartridge came from cartridges manufactured within a specific time period.
d. In some instances it is possible to prove that hand loaded bullets had a common source or that the cartridges were reloaded with the same tools.

7. Powder or Shot Pattern Tests

a. Submit clothing and other material showing evidence of gunpowder residue or shot holes. If more than one item, wrap each one separately so as not to disturb or contaminate any residue. When information as to weapon distance at the time of the shooting is needed, photographs of powder patterns on clothing will not suffice since in most instances microscopic examination, chemical testing and x-ray studies must be conducted on the exhibits themselves. When bullets have passed through garments and then into a human body, it is also desirable to have clear photographs of the bullet holes in the body available for study in addition to the garments. Include a ruler in all photographs.

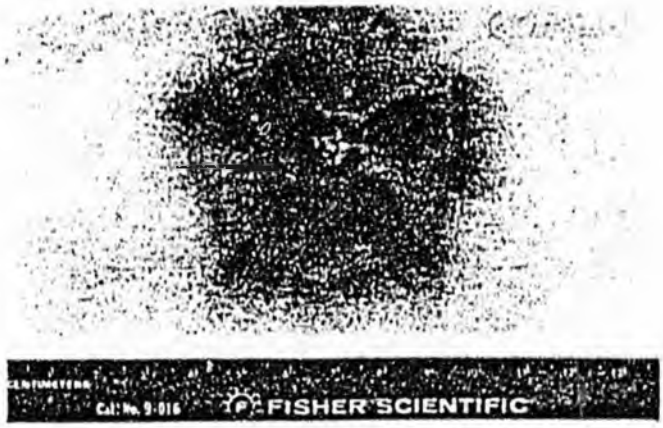

Photo 28 Illustrates the muzzle discharge residue left on a victim's outer garment as a consequence of a close range firearms discharge.

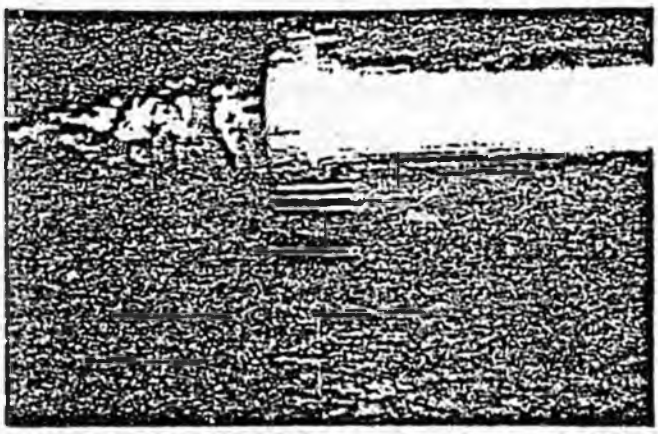

Photo 29 Comparison of reloading equipment die marks on two cartridges. Hold-up victim was shot and killed with his own revolver. Suspect stole the weapon and ammunition. The weapon was never located but cartridges were later found in the suspect's possession. These were compared, as illustrated, with other reloaded cartridges belonging to the victim.

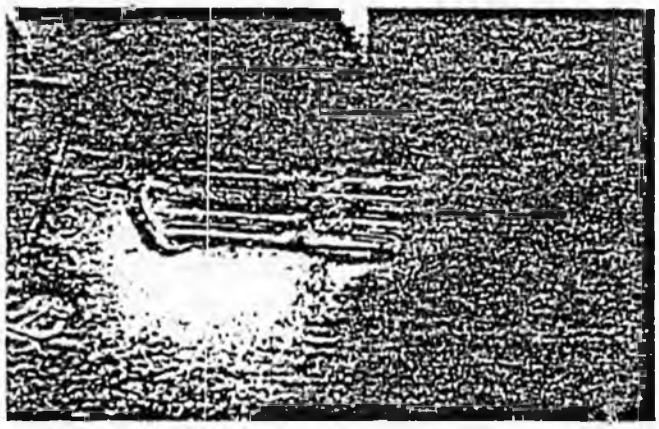

Photo 30 Comparison of firing pin marks on test and questioned .22 calibre cartridge case.

b. For gunpowder or shot pattern tests to have significance, it is essential to obtain ammunition identical in make, type and age to that used in the crime. This duplicate ammunition is necessary for test firing in the weapon in question to determine the distance of the muzzle of the weapon from the victim or other object at the time the questioned bullet was fired.

8. Dermal Nitrate Tests

Many research studies conducted by branch criminalistics laboratories, as well as other laboratories, have established that dermal nitrate and parraffin cast techniques *are worthless* to determine whether or not an individual has fired a weapon. For this reason criminalists of ISB will neither make such casts nor conduct chemical tests on casts made by others for either court or investigative purposes. This does not, however, imply that careful visual examinations or other studies of *unwashed* hands of individuals suspected of having fired weapons should be overlooked.

9. Neutron Activation Analysis (NAA)

a. Extensive NAA studies have been conducted of swabbings made on the hands of individuals who have fired various weapons, as well as on control subjects. At present, however, this analysis will not, in most instances, conclusively establish whether or not an individual has fired a gun.

b. The laboratory is equipped to assist any agency in obtaining the proper samples from the hands of a shooting suspect in cases involving firearm residue.

c. Requests for such assistance should be made directly to the laboratory for evaluation.

d. The requesting agency should exercise every precaution to protect the hands of subjects from contamination. Paper bags taped over the hands of a "suicide" victim prior to movement is one example of a suitable precaution. Rapid processing of the hands of live subjects is another.

e. For proper procedures in collecting and submitting samples for gunshot residue analysis, request Physical Evidence Bulletin 15/77, from the laboratory.

f. The laboratory will not, for scientific reasons, assist in collecting samples from subjects that have washed or if over 4 hours have elapsed from the time of shooting.

10. Trace Metal Detection

a. In some cases it is possible to demonstrate that a person has recently held a gun in his hand. This procedure requires the spraying of the hands with a chemical that reacts with the metals of the weapon. The hand is then examined and photographed in ultraviolet light.

b. The laboratory is equipped to conduct the trace metal detection procedure for an agency upon request.

c. Requests for such assistance should be made to the laboratory for evaluation.

d. The requesting agency should exercise every precaution to protect the subject's hands. The subject should not be allowed to wash or handle metallic objects.

e. For more details, request Physical Evidence Bulletin 14/77 from the laboratory.

11. Firearm Investigations

The laboratory can furnish aid in many firearms investigations other than those mentioned above. Such work may involve studies of wounds, direction of bullet paths in bodies, sequence and direction of shots fired through glass and other materials, identification of homemade cartridge components and many other related examinations.

L. SERIAL NUMBER RESTORATION

The eradication of serial number or other manufacturers' markings is frequently carried out to conceal other crimes such as theft. It is also done to prevent tracing ownership of an article. Obliterated or defaced numbers, letters or other stamped markings on metal can usually be made legible by means of various laboratory procedures.

1. Attempts should *never* be made to restore markings. If restoration attempts have previously been carried out by others, the laboratory will not make further attempts at restoration. The reason for this is that the first surface preparation normally removes metal which contains the latent impressions.

2. Weapons
   a. Attempts will be made to restore obliterated or defaced serial numbers or other manufacturers' markings on all types of firearms.
   b. If restoration procedures are successful on pistols and revolvers, the serial number will be automatically checked against the Bureau of Identification firearm registration file for outstanding want or stolen reports.
   c. If the files show no record concerning a restored number, this same number, preceded by the letters "CII", will be restamped on the weapon if this has been requested by the submitting agency. Whenever restamping of restored numbers is requested the Laboratory must be advised of the name and address of the person or agency to whom the firearm is to be registered.
   d. When number restorations are unsuccessful a new serial number, preceded by the letters "CII", can be assigned if such a request is made by the submitting agency. In such cases the name and address of the person or agency to whom the firearm is to be registered must be furnished.
   e. Serial numbers will *not* be assigned or stamped on rifles and shotguns which did not originally bear a serial number stamped by the manufacturer.

3. Merchandise
   a. Attempts will made to restore or make legible serial number, manufacturer or other distinguishing markings on merchandise having such markings.
   b. Such work is conducted only for the purpose of aiding in identification of the merchandise.
   c. The Laboratory has no authority to assign numbers or restamp numbers on merchandise.
   d. When restorations are necessary on heavy or bulky objects, such as pianos and motorcycles, the laboratory should be contacted by telephone prior to delivery of the exhibit. The submitting agency will be responsible for delivering and retrieving such items. Laboratory facilities *will not* permit storage of such items for more than 15 days. Unless special arrangements have been made, they will be returned and shipping charges collected after that period, unless special arrangements have been made.

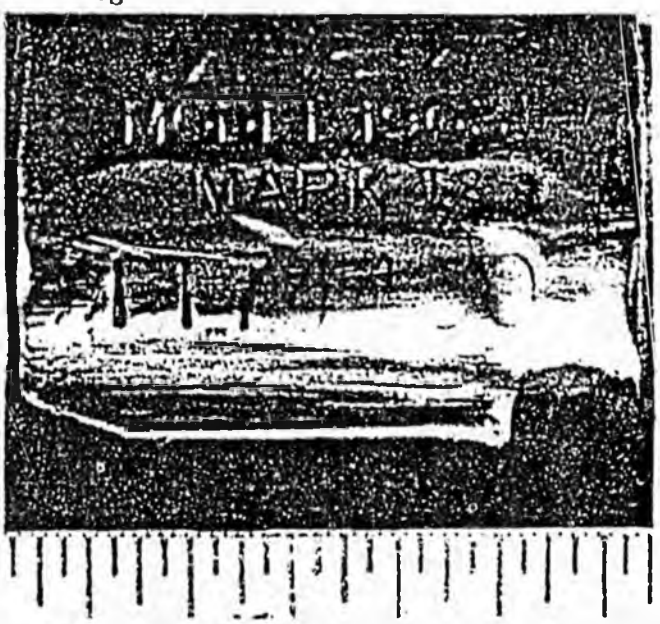

Photo 31 Restoration of the last four serial numbers which had been filed off on a 30.06 rifle. Restoration by means of acid etching.

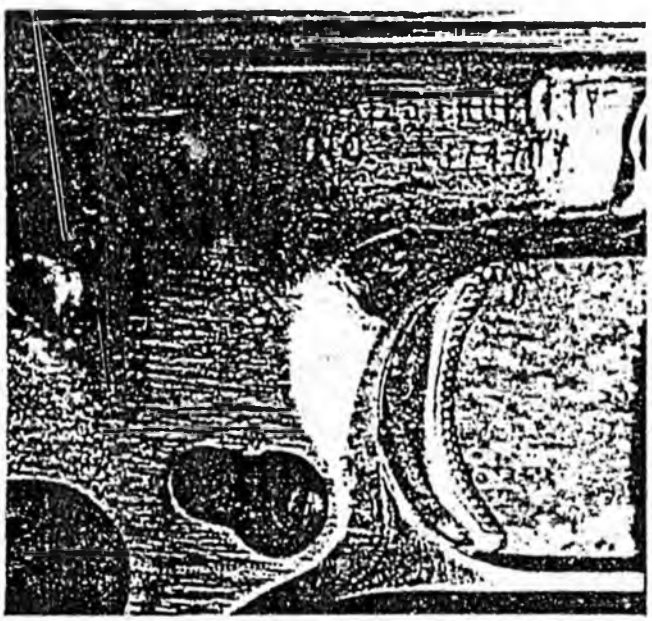

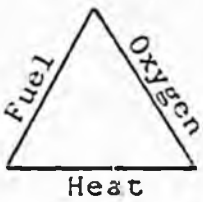

Photo 32 Restoration of an obliterated serial number on a .45 automatic pistol. Restoration by means of Magnaflux technique.

M. FIRE INVESTIGATION AND FLAMMABLE FLUIDS

The types of evidence which may be encountered in a fire investigation are potentially as broad as in any other type of criminal case. The recovery and interpretation of physical evidence in this type of case, however, is frequently complicated due to partial or complete destruction produced by the fire. In the case of large structural fires, exhibits of importance may be covered by debris and therefore be difficult to locate. Firefighting operations, including forcible entry, hose stream damage, ventilation and mop-up, also may cause evidence destruction, affect burn patterns or otherwise alter the scene.

1. Special Procedures Applicable to Fire Investigations
   a. Limit mop-up after the fire is suppressed until a search for all possible physical evidence can be conducted. This is important since normal fire department procedures employed after fire suppression may cause loss of evidence when positions of furniture and other items are altered or material is removed from the scene.
   b. Firefighters observing evidentiary material should be instructed to leave it alone until it can be examined and secured by an experienced fire investigator.
   c. As in all investigations, the search for evidence in fire cases should be conducted systematically and completely. The search should extend throughout the whole area or building involved. Fire sets, which did not ignite or which failed to continue burning, may be present in unburned areas.
   d. Attempts should always be made to reexamine scenes of large fires during daylight hours and after heat and burn odors have been allowed to dissipate. Far more can be observed under natural illumination than at night, even when excellent floodlights are available. Further, smoke and fumes may make the human nose incapable of detecting odors from small quantities of volatile fluids.
   e. As part of any fire investigation, all early arriving firefighters, as well as other persons at the fire scene, should be questioned as to any unusual observations which they might have made. This may assist in locating the point of origin of the fire, establish window and door conditions, indicate unusual flame or smoke colors and quantity, or supply other useful information.

2. The Search for Flammable Fluid at Fire Scenes
   a. Petroleum products and other flammable fluids are one of the most common types of materials employed in arson cases involving structures.
   b. Even though alcohol, gasoline, stove oil, paint thinners, solvents and other similar fluids are highly volatile and flammable, they frequently do not burn completely. Identifiable residues of such fluids can therefore be recovered in many cases even when large fires have occurred.
   c. The fire triangle illustrates the requirements which must be met if any fire is to occur. If one of the three essentials is absent or consumed by the burning, the fire will be extinguished. Thus when the flammable fluids soak into upholstery, rugs and other fabrics; plaster or wallboard; flow through floor cracks into underlying soil; seep under molding and into wood at the base of walls; or collect at other locations, there will often be insufficient oxygen present to support continued combustion. Residue of the volatile fluid employed may therefore, remain, which can be later recovered and identified.

   d. While the establishment of the point of origin of a fire is important, the most complete combustion may occur at this particular location and no flammable fluid residues remain. Once the point of origin is determined, therefore, emphasis should be placed upon a search of this general *area* for materials which are "sponge-like" (such as fabric, wall board or soil) where lack of oxygen may have prevented complete combustion of the flammable fluid.
   e. The search for flammable fluids should be conducted as soon as feasible since many highly volatile fluids will eventually be lost through evaporation. Fortunately, the use of water in fire control assists in slowing the loss of volatile fluids by cooling, covering and insulating materials into which the flammable substances have soaked.
   f. The detection of the most concentrated deposits of many volatile fluids, such as gasoline, by odor may become difficult if much of the fluid is present. This is due to the fact that the human nose loses its sensitivity to many odors if exposed to large quantities over a period of time. Trace amounts of volatile fluid odors may also be masked by other odors at fire scenes. This is particularly true in the case of those produced by burned plastic and rubber.

g. It is important to realize that many flammable fluids have little or no odor. Included are such substances as some alcohols, deodorized kerosene, charcoal lighters, etc.

h. The search for traces of flammable fluid may be facilitated by use of a highly sensitive combustible vapor detector. The laboratory has such a device and, upon request, will furnish aid in locating traces of flammable fluid at fire scenes.

3. Flammable Fluid Evidence Recovery

a. Samples of volatile fluids found in open jars or cans should be poured into clean metal or glass containers. The container employed should then be sealed completely to prevent any loss of fluid.

b. When glass or plastic containers or cans are found at fire scenes which contain just an odor or trace of fluid, seal the container immediately. Where stoppers or jar lids are not available, use aluminum foil and tape. Samples of large amounts of fluid should be removed and placed in some other container as mentioned above but this is difficult or impossible to do when only odors or traces remain. Even when containers appear empty, vapors present may be identifiable if the container has not been burned by the fire. Traces of such fluids may also remain when water from firefighting operations has entered the container.

c. New clean paint cans are the best storage containers for recovered material suspected of containing flammable fluids. They have lids which may be readily sealed, are not liable to breakage and prevent loss of volatile fluids and vapors. Such cans are available from many paint and hardware stores at low cost. Storage of empty paint cans requires only limited space since cans of pint, quart and gallon size can be nested. Paint cans of these sizes should be stored at locations where they will be readily available for use by all fire departments and fire investigators.

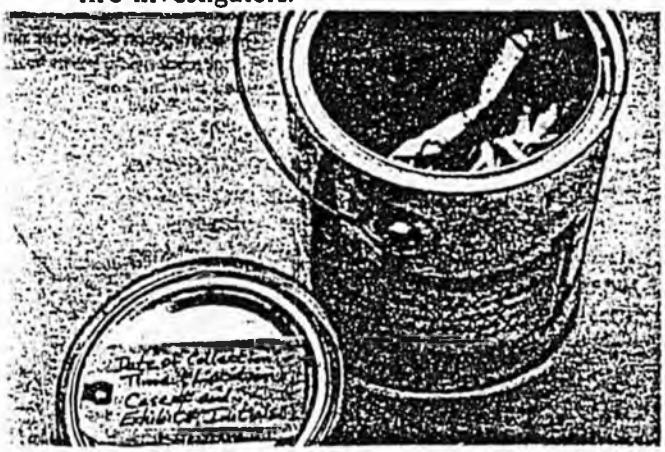

Photo 34 Unused metal paint cans are ideal containers for preserving volatile fire accelerant material.

d. Glass jars can be used for flammable fluids if they contain lids which can be tightly sealed. Such containers, however, are breakable and thus more difficult to ship. Mason or other jars which have rubber seals on the lids should be avoided since many fluids will soften or dissolve such seals and permit leakage and loss of contents.

e. Plastic wrapping when used as jar covers or as a sealant to protect large pieces of wood will not prevent the loss of volatile fluids or vapors. Exhibits suspected of containing such materials should therefore never be stored in plastic containers or plastic wrapping used as a sealant. Likewise, waxed containers are not satisfactory for such exhibits. Aluminum foil can be used in those situations where fluids or debris cannot be sealed in the recommended type paint can.

f. Attempt to match the container size to the sample size. The less air space remaining after the sample is added to the container, the better.

g. When specimens believed to contain small amounts of flammable fluid are not obviously damp with water, it is preferable to add a small amount of water to the container on top of the specimen. This tends to retard evaporation.

h. Identification of trace amounts of fluid in samples recovered frequently requires distillation procedures. This means that specimens must be cut up into relatively small pieces which will fit into glass distillation flasks. For this reason it is normally desirable that the investigator saw or chop large exhibits at the time of evidence recovery and place small pieces in containers. This usually is a superior and easier method than attempting to deliver large sections of wood, carpets and similar exhibits to the laboratory even when the latter can be done rapidly and little loss of fluids is likely to occur.

i. Mark All Containers—Include name of person recovering the exhibit, date, time and location of recovery.

j. Follow postal or other carrier regulations when shipping evidence containing flammable fluids.

k. Telephone the laboratory for instructions prior to personal delivery of large quantities of flammable fluids.

4. Flammable Fluid Analyses

a. Even when present in minute amounts or as residues from which the more volatile fractions have been lost, it is frequently possible to identify the original fluid employed.

b. Advise the laboratory of any odors noted at the fire scene or other evidence available which suggests that specific fluids were employed. This may save considerable time which might

otherwise be required if complete analyses for all types of volatile substances were necessary.

c. Comparisons are sometimes possible between residues recovered at the scene and samples of volatile fluids obtained from suspects. In some instances it is likewise possible to indicate common origin of different flammable fluid specimens recovered in gasoline theft and other investigations as well as in arson cases. This type of study may be very complex and will usually require special sample recovery procedures. For this reason the laboratory should always be contacted by telephone for special instructions when this type of study is necessary. This will insure that all necessary standard and control samples are properly secured.

5. Other Arson Evidence

a. Mechanical, electrical or other fire ignition devices may be identified as to their nature and operation even if burned in a fire. All parts of such devices should be searched for and recovered. It may also be possible to compare the recovered evidence with similar material found in the possession of a suspect.

b. Residues from fusee and other chemical igniters or fuels are usually identifiable.

c. Candle wax can be identified as to type and compared with candles or wax deposits on clothing or other objects found in the possession of suspects.

d. All other types of evidence covered in this manual may also be involved in fire investigation cases.

Photo 35 Comparison of torn end of burned match (lower right) found at arson scene and layer of paper matches from folder in suspect's pocket.

Photo 36 In an arson case sections of 16 consecutive pages of a newspaper were found between two plastic bottles of gasoline in an attic. Holes had been cut in the papers to support a candle. The photograph illustrates one of the papers found in the fire set with another small paper, which was found in a waste basket in the suspect's home, inserted into the hole.

N. EXPLOSIONS AND BOMBS

The use of explosives in criminal activities has increased materially in recent years. This has resulted in evidence such as hand-thrown explosives and fire bombs as well as unexploded bombs and related devices frequently coming to the attention of law enforcement agencies. Investigations of explosions which have already occurred are likewise periodically necessary. The latter may range from minor malicious damage to a locker or personal mail box to major damage in a large building. In all such cases it is possible that individuals may be killed, or at least lives endangered. The evidence involved in such crimes is somewhat different than in most other offenses due to the danger of unexploded devices and the limited amount of evidence remaining after many of them explode. Alcohol, Tax, Tobacco and Firearms offers extensive scene investigation and laboratory services with respect to bombings. Consequently you should consider contacting them in regards to a bombing before contacting the State Department of Justice. The Department of Justice Regional Laboratories will render assistance whenever possible in such cases but certain restrictions on handling of the evidence are necessary. IN NO CASE should unexploded bombs or explosives be either *delivered or shipped to the laboratories* since they are located in public buildings. Likewise, federal and state laws restrict the transportation of such materials. IN ALL INSTANCES telephone the laboratory for instructions prior to attempting to ship or deliver any dangerous materials.

1. Cases Where Explosions Have Occurred
   a. Explosion Scenes
      (1) Limit access to area to as few individuals as possible.
      (2) Photograph exterior and interior of all damaged areas completely.
      (3) Search for all possible bomb parts, fuses, residue deposits; photograph these prior to removal.
      (4) Request assistance of a criminalist from either ISB or a local law enforcement laboratory. While only a few criminalists are explosive experts, they frequently can furnish useful aid in investigations conducted at explosion scenes. Unless much of the explosive device employed remains after the explosion and can be recovered, the greatest information is usually obtained from the crime scene examination rather than study of residues alone.
      (5) Consult with military or civilian explosives experts if available. It must be realized, however, that many such experts have specialized knowledge concerning only specific types of explosives with which they regularly work.
   b. Evidence Recovery
      (1) Make certain that no attempt is made to remove or recover exhibits which may still be dangerous to life until they have been examined by a competent expert.
      (2) Criminalists will NOT conduct crime scene examinations of unexploded bombs and related devices.
      (3) Nondangerous bomb parts, electrical detonator, fuse and residue deposits located should always be photographed as found prior to removal. Each item recovered should also be placed in a separate container and marked as to the exact location where it was found.
      (4) Contact the laboratory by telephone if aid is desired in any phase of the evidence recovery.
   c. Laboratory Examinations
      (1) Ship evidence to the laboratory ONLY if it is KNOWN to be safe. If any doubt exists telephone the laboratory prior to shipping or delivering exhibits.
      (2) ALWAYS include a complete report of all investigative findings which relate to the explosion or residues obtained.
      (3) ALWAYS include copies of all photographs taken at the scene.
      (4) The laboratory will attempt to identify any devices or residue recovered. Many military as well as commercial explosives, however, cannot be specifically identified from the residues remaining after an explosion.

2. Unexploded Bombs and Commercial Explosives
   a. The criminalistics laboratories DO NOT conduct field examinations on unexploded bombs nor do they deactivate bombs.
   b. DO NOT ship or deliver any dangerous chemicals, powders, explosives or bombs to the laboratories.
   c. Aid in deactivation may be available through local military explosives specialists. If none are available contact the laboratories by telephone.
   d. Deactivated bombs or explosives will be examined but always contact the laboratories by telephone for instructions prior to shipping or personally delivering such materials.
   e. Bomb parts, tool marks, or other deposits thereon, chemical residues, fuses and other

materials may be identified as to source or they may be compared with related materials recovered in the possession of suspects.

3. Fire Bombs

a. A variety of fire bombs are available or can be readily made by many students, activists or other individuals. The most common type is the "Molotov cocktail". This usually contains gasoline or gasoline mixed with other materials. They may be ignited with a burning wick or contain chemical or explosive igniters.

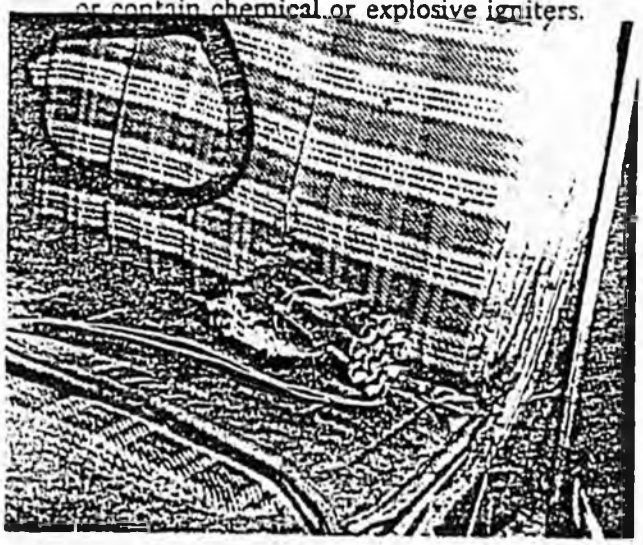

Photo 37 Dynamite charge containing electric fuse wired to light switch in automobile of intended victim. Charge originally placed under seat but was detected and removed by the victim.

b. When unused fire bombs are recovered and laboratory study is desired, contact the laboratories by telephone prior to making delivery of the evidence. In no case may such devices be shipped.

c. Residue remaining after a fire bomb has burned out may be either shipped or delivered personally to the laboratories. When this is done it is important to make certain that all flammable fluids have been removed and sealed in a metal container. When such materials are to be shipped, follow postal or other carrier requirements. Even when personally delivered, safety precautions should be taken to prevent injury to both the individual delivering the material and all other persons.

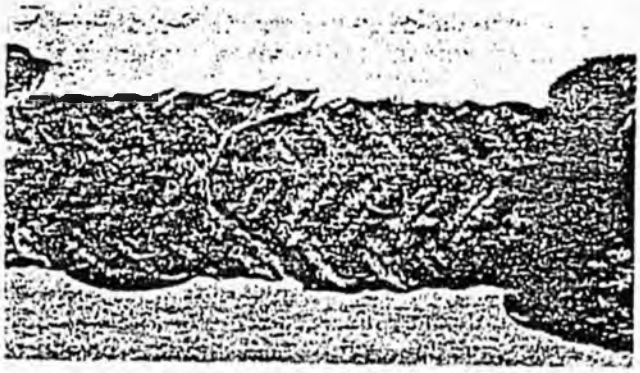

Photo 38 Electric blasting cap inserted in dynamite charge shown in Photo 37 was connected to a light switch wire in the vehicle. This illustrates the comparison of cut insulation on the switch wire from the car with another section of wire found in the possession of a suspect.

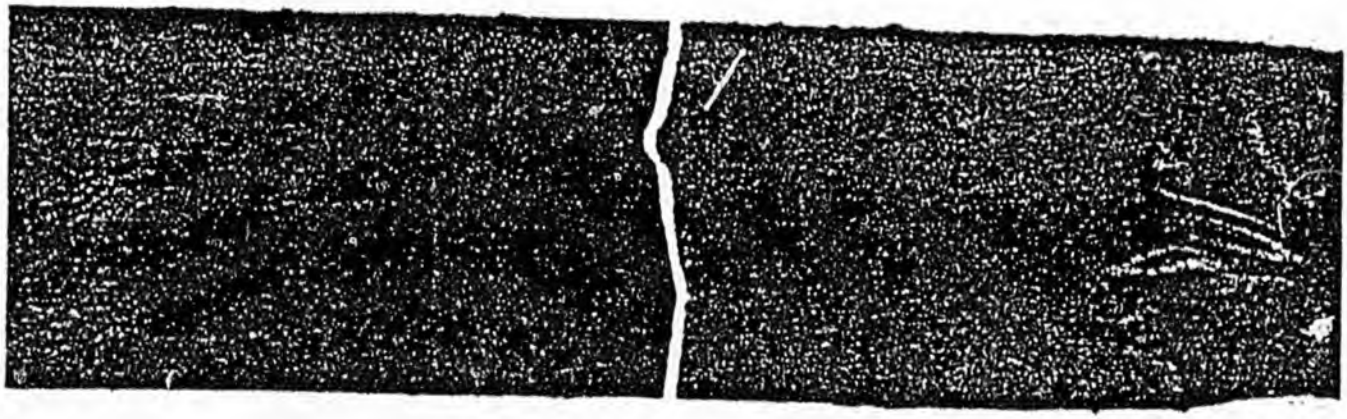

Photo 38A Electrical tape end from roll of suspect and end of tape found wrapped around detonator wires on bomb.

O. CONTROLLED SUBSTANCES

Controlled substances for the purposes of this manual are prohibited drugs and narcotics covered by the Health and Safety Code. Controlled substances analysis is offered by each Department of Justice Laboratory.

1. Sampling
   a. Only items for examination should be included in the evidence package. No money or identification should be included in the package submitted, nor should paraphernalia unless its analysis is essential to the case. Also, weapons should not be included unless an examination is desired.
   b. Drugs for examination should be randomly sampled and only the sample submitted to the laboratory i.e., 5 kilos of suspected marijuana submitted from a total seizure of several hundred. Sampling should never be below the basic packaging unit i.e., samples should not be taken from a kilo, dime bag, piece, etc., the entire basic package should be submitted.

2. Packaging
   a. Items for examination should be independently packaged and marked and the outer container for the group of items should be sealed in order to protect chain of custody.
   b. When paraphernalia is submitted for analysis care should be taken in its packaging i.e., needles should always be capped or guarded to prevent accidental injury to the criminalist.
   c. Fresh plant material should not be packaged in plastic bags in order to prevent molding.

3. Submission Forms—Contact the laboratory for instructions.
   a. The Controlled Substances Evidence Envelope (ISB-17) is available for use by the agencies. All pertinent information should be furnished.
   b. If the case is comprised of five items or less the Controlled Substances Evidence Report (ISB-18) must accompany the evidence. The form is to be attached to the outside of the container and should be completed as to all the information required.
   c. If the case is comprised of over five items the regular evidence submission form (ISB-4) should be used instead of the ISB-18. Physical Evidence Bulletin 25/77 on Controlled Substances is available from the DOJ laboratories.

4. Clandestine Laboratories

If seizure of a clandestine drug laboratory is planned, criminalists from the regional laboratories are available and should be consulted as to hazardous chemical handling, possible nature of the drug being synthesized and particular chemicals which are of evidentiary value. Physical Evidence Bulletin 26/77 on clandestine laboratories is available from the DOJ laboratories.

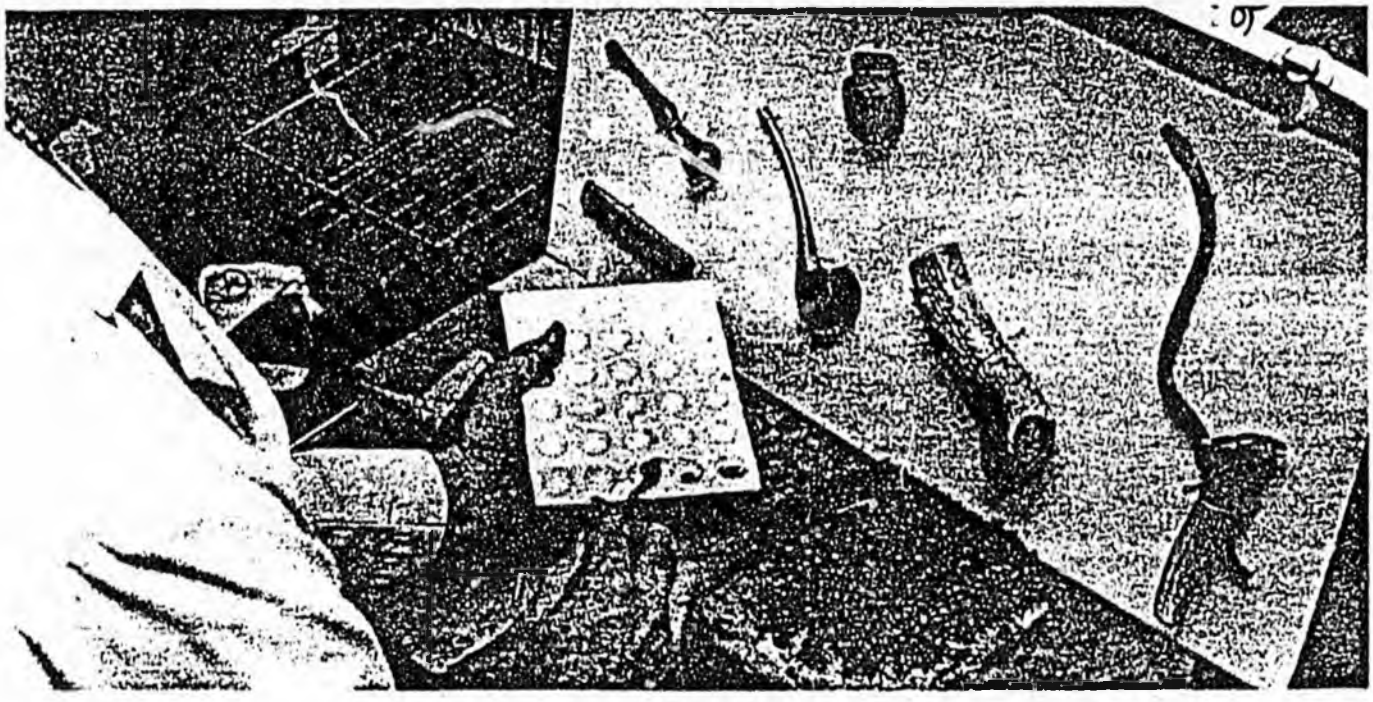

Photo 39 Samples of marijuana being taken for testing purposes

P. BLOOD ALCOHOL

The Blood Alcohol concentration of individuals is of importance to law enforcement officers. It has a direct bearing on the individual's ability to drive an automobile. When the amount of alcohol present is sufficient to impair vision, decrease reaction time and effect muscular coordination it can be concluded that the individual is under the influence of alcohol. Blood, breath, or urine samples can be collected for the determination of an individual's blood alcohol level.

1. *Legal Implications.* The collecting, handling and analysis of samples taken for the purpose of blood alcohol determination is regulated by the California Administrative Code, Title 17, Public Health.
2. *Blood Collection.* Blood samples shall be collected by venipuncture from living individuals as soon as feasible after an alleged offense and only by persons authorized by Section 13354 of the Vehicle Code. Sufficient blood shall be collected to permit duplicate determinations.
   (a) *Disinfectant.* Alcohol or other volatile organic disinfectant shall not be used to clean the skin where a specimen is to be collected. Aqueous benzalkonium chloride (zephiran), aqueous merthiolate, or other suitable aqueous disinfectant shall be used.
   (b) *Equipment for Collection of Blood Samples.*
      (1) Sterile, dry hypodermic needles and syringes shall be used. Reusable equipment, if used, shall not be cleaned or kept in alcohol or other volatile organic solvent.
      (2) The blood sample shall be deposited into a clean, dry container which is closed with an inert stopper. Alcohol or other volatile organic solvent shall not be used to clean the container. The blood shall be mixed with an anticoagulant and a preservative.
   (c) *Post-mortem Collection.* All practical precautions to insure an uncontaminated sample must be employed, such as:
      (1) Samples shall be obtained prior to the start of any embalming procedure. Blood samples shall not be collected from the circulatory system effluent during arterial injection of embalming fluid.
      (2) Care shall be taken to avoid contamination by alcohol from the gastrointestinal tract directly or by diffusion therefrom. The sample shall be taken from a major vein or heart.
3. *Urine Collection.* The only approved urine sample shall be a sample collected no sooner than twenty minutes after first voiding the bladder. The specimen shall be deposited in a clean, dry container which also contains a preservative.
4. *Breath Collection.* A breath sample shall be expired breath which is essentially alveolar in composition. The quantity of the breath sample shall be established by direct volumetric measurement. The breath sample shall be collected only after the subject has been under continuous observation for at least fifteen minutes prior to collection of the breath sample, during which time the subject must not have ingested alcoholic beverages or other fluids, vomited, eaten, or smoked.
5. *Interpretation of Blood Alcohol Levels.* For the past forty years scientists have been formally studying the correlation of blood alcohol levels to driving impairments. Literally thousands of people have been included in these studies on motor vehicle accidents, laboratory findings, driving tests, etc. This has established a firm basis for correlating blood alcohol levels to driving impairment. Criminalists in the State Laboratory System are prepared to testify regarding these correlations.

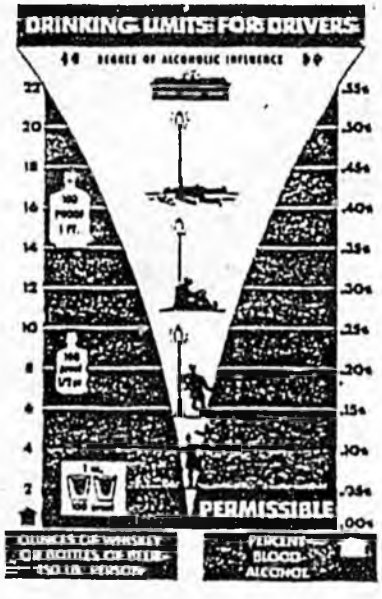

Photo 40 Blood alcohol chart illustrating degrees of impairment and blood alcohol level.

Q. DRIVING WITH DRUGS (DWD)

The California Department of Justice maintains an analytical capability for determining the occurrence of drugs in samples of blood and urine taken from impaired drivers. Samples of blood and urine submitted to this program, and especially those where a blood alcohol content is low or not present, can be analyzed for drug analysis. Samples for analysis should be selected based upon a request originating with the prosecuting agency in cases relating to impaired driving only.

Photo 41 Low levels of drugs in body fluids are isolated by chemical extraction from blood and urine.

1. Submitting Samples

When samples of blood or urine are submitted for drug analysis, any reference made to the discovery of solid dosage drugs in possession of the driver as reported in the arrest record should be cited. This will greatly simplify the analysis time as it focuses the laboratory work on a specific substance and avoids the necessity of searching through an entire class. At least ten milliliters (approximately ½ oz.) of blood and at least 20 milliliters (approximately ⅔ oz.) of urine are required for drug analysis.

2. Drugs Detected

Department of Justice Criminalists will provide drug analysis from submitting agencies statewide. While the DWD program endeavors to identify a number of drugs including common tranquilizers, not every drug in existence will lend itself to analytical procedures.

For a detailed listing of drugs that can be assayed in this program, see Physical Evidence Bulletin 8/77 available from DOJ laboratories.

3. Gas Chromatograph/Mass Spectrometer

Analysis for drugs in the blood or urine of impaired drivers can require complex laboratory procedures culminating in instrumental analysis. In such instances, the gas chromatograph/mass spectrometer can be used either to detect exceedingly low levels of drugs in human fluids or to confirm suspected drugs whose presence is indicated by other techniques.

Photo 42 The gas chromatograph/mass spectrometer system available to the DWD program and selected samples from the crime lab system.

4. Program Function and Courtroom Testimony

The DWD program is centralized in the Sacramento Regional Laboratory for the purpose of providing an efficient response and complete analysis to the variety of samples submitted. Requests for drug analysis will originate through various regional and satellite laboratories normally serving the requesting agency. Department of Justice criminalists will provide analysis for those drugs that can be determined in either blood or urine by procedures currently available. Courtroom testimony is limited to the actual analysis only and may not include an interpretation of how the detected drug, whether alone or in concert with other substances present in blood or urine, impairs the driving ability of the subject. Submitting agencies are advised that this type of testimony is best provided by local doctors or clinicians professionally established in various localities throughout the state. Questions concerning DWD analysis should be directed to the regional laboratory nearest the requesting agency.

VIII. LATENT PRINT SECTION

In many instances, an entire prosecution case will rest on a positive latent print identification. Without print identifications, many criminal cases would never reach the prosecution level. The Latent Print Section is staffed by experienced latent print analysts having substantial backgrounds in the identification field. All are qualified to appear in court and provide expert testimony in matters of latent print examinations. In addition, latent print analysts may provide field assistance in the investigation of major cases or where trained identification officers are not available to the local agency as per the guidelines in Section XIII of the manual.

A. Latent print examinations and comparisons are conducted by latent print analysts, not by criminalists. For this reason all packages containing only such evidence which are shipped to the Branch should be marked Attention: Latent Print Section.

B. Marking of Latent Print Evidence

1. All evidence should be marked in some distinctive manner, as is the case with any other type of physical evidence.
2. Lifted, developed latent imprints should also be marked or sealed in marked envelopes.
3. When photographs are taken of developed latent impressions, some type of identifying mark should be placed near the print and this mark should also be photographed so that it will show on the negative. If a 1:1 fingerprint camera is not used, a ruler or some other item should be included in the photograph to show the amount of magnification.

C. Preservation of Latent Print Evidence

1. In all cases it is of the utmost importance to prevent contamination of physical evidence by subsequent handling which can cause destruction of those prints already present.
2. Most fingerprints submitted will be on paper, glass, metal or other smooth surfaced objects. When articles which may contain latent fingerprints must be picked up, they should always be touched as little as possible, and then only in areas least likely to contain identifiable latent imprints, such as where the surface is very rough.

Photo 43 Latent Print Examiner processing the inside of an automobile for the presence of fingerprints.

Photo 44A Latent prints on paper being sprayed with ninhydrin solution.

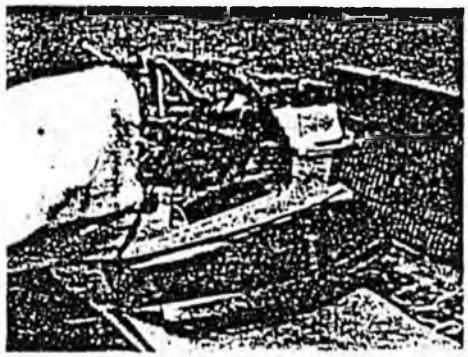

Photo 44B Latent prints being visualized on paper after being sprayed with ninhydrin.

3. While gloves or a handkerchief may be used to pick up items of evidence, any unnecessary contact should be avoided. Although this method of handling exhibits will prevent leaving additional prints on the articles, the gloves or cloth used may destroy prints originally present unless great care is exercised.
4. Large articles containing latent impressions such as glass, metal articles and firearms should be placed on wood or heavy cardboard and fastened down firmly with string or wire to prevent shifting and contact with other objects in transit. Where such evidence is to be submitted frequently, a peg board should be obtained on which wooden pegs can be moved as desired to surround exhibits and keep them from moving. Bottles and glasses can be placed vertically on a board and placed in the bottom of a box. The base of the bottle or glass can be surrounded with nails to hold it in place and the mouth can be either inserted through a hole in a piece of cardboard or held in position with a wooden board nailed to the lid of the container.
5. Papers and documents containing latent prints should be placed individually in manila envelopes or plastic containers. Such containers can be placed between two sheets of stiff cardboard and wrapped or placed in a box for mailing.
6. If the object containing the fingerprints cannot be removed or submitted to the Department, dust the prints with suitable developing powders and lift with latent print lifters. Lifted prints can be placed on black or white cards for contrast or on transparent backing material.

D. Comparison Prints

1. If any suspects are known to the investigator, submit clear rolled fingerprints and palm impressions of such individuals. If these cannot be obtained, advise the Department of the full name CII or booking number if possible and the description of the suspect. Although a file of palm impressions is not maintained in the Department, this information will permit a search of the Department files for a fingerprint record of the suspect. If his fingerprints are on file they can be used for preliminary comparisons with any latent imprints developed.
2. Submit fingerprint cards of any other individuals who may legitimately have handled the objects to be examined, either before or after the crime was committed. Include fingerprint cards of any investigators who may have accidentally touched the exhibits. This will permit the rapid elimination of any latent impressions found which were made by such individuals.
3. Advise the Department of all modus operandi information available and include a copy of the crime report. In some cases, where such data is included, a search of the Department files will reveal the names and fingerprint cards of possible suspects who have previously been involved in similar crimes and who use the same method of operation. When this is possible, the fingerprints of such persons can be immediately compared with the developed latent prints.

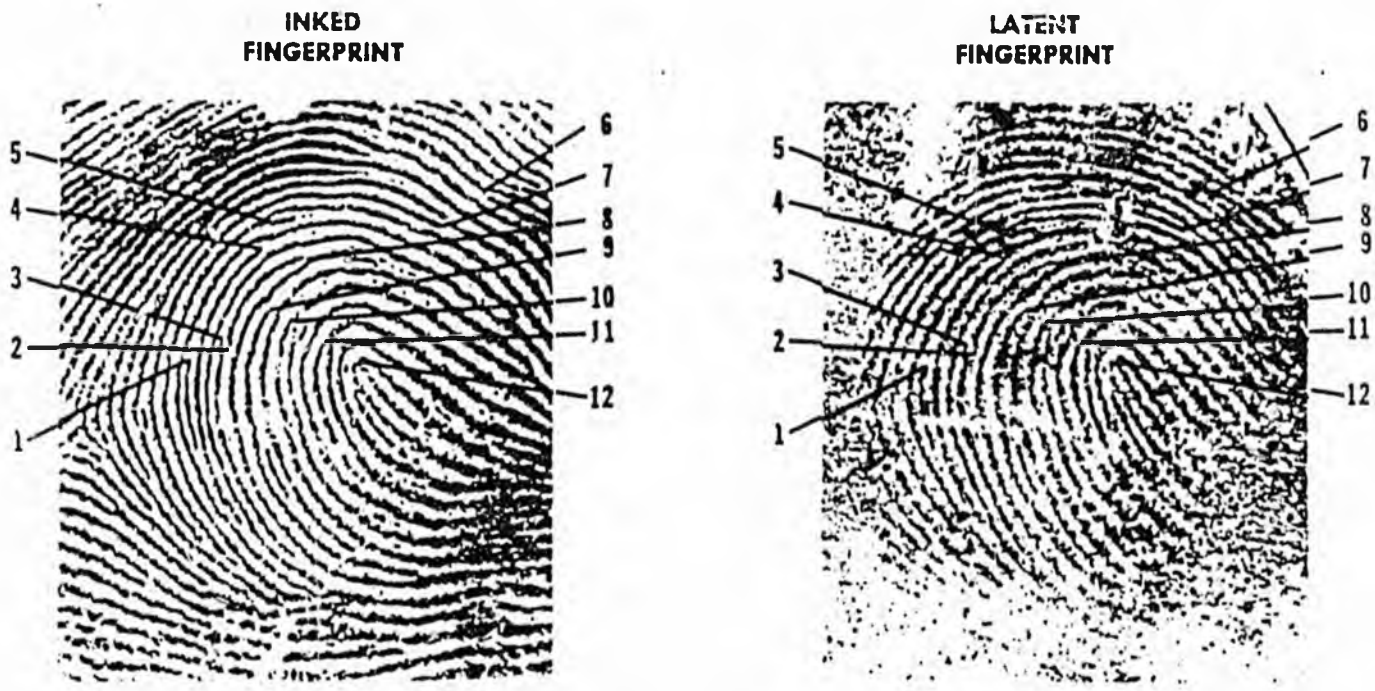

Photo 45 Some common points of comparison between a latent fingerprint and a test print from a suspect.

IX. QUESTIONED DOCUMENTS

A. Services Available

All examinations involving questioned documents submitted to the Branch are conducted by questioned document examiners. These individuals are prepared to conduct examinations concerning any question which may arise in a criminal investigation in regard to the authenticity of a document or the materials used in the preparation thereof. All such experts are fully qualified by training and experience to conduct examinations of such evidence and have qualified and testified as expert witnesses in this field on numerous occasions.

B. Questioned Material to be Submitted

All questioned documents involved in a particular investigation should be submitted for examination. This is important since questioned documents are identified by a combination of identifiable characteristics plus an absence of divergencies or dissimilarities. In order to make an identification, sufficient handwriting, typewriting or other evidence must be available upon which to base an opinion. This means that *all* questioned material is needed as well as sufficient exemplar or known specimens.

C. Originals vs Copies

If at all possible submit the original documents, questioned and known, for examination. Photographs, Xerox, carbon and other copies are usually less than adequate for this type of examination. Under some circumstances documents other than originals may be submitted for examination but usually the results will be less than a conclusive opinion. The examiner should always be given the opportunity to examine all of the originals prior to court testimony.

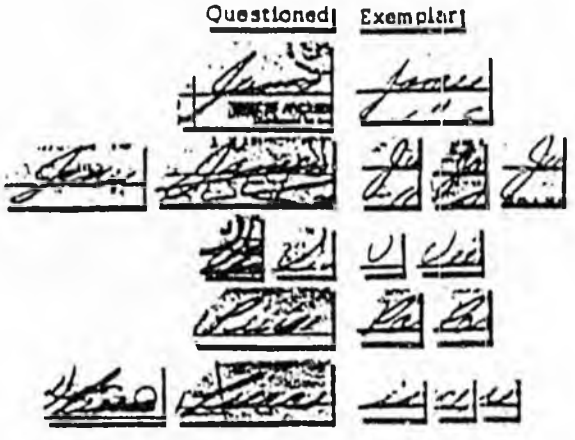

Photo 46 Comparison of signatures on questioned checks and credit card invoices.

D. It is *absolutely essential* that the document examiner have available the required amount of specimen material to afford a proper basis for an identification. The investigating officer should not expect that the document examiner can satisfactorily examine questioned material when driver's licenses, fingerprint cards, or other material containing only signatures of the subject are submitted as exemplars of known writing. An exception to this might be a case in which the only writing in question is a subject's signature. It is the best policy to collect all available writing or other material in order that the scope of natural variation may be determined.

In order that proper exemplars or standards be obtained, the investigator should always follow the suggestions given below:

1. Exercise caution in obtaining exemplars in order that all specimens collected will be admissible in court. The prosecutor or document examiner should be consulted for advice as to proper procedures to follow in this respect. Usually, any business records, such as bank, utility or municipal records and other similar forms can be utilized.
2. Obtain handwriting or handprinting exemplars when the subject is first interviewed. Most subjects will supply enough specimen writing at this time to facilitate comparisons. At a later date, suitable material may be obtained only with great difficulty.
3. Obtain exemplar writing by having the suspect write his name and address several times. After this has been done, *always* include the exact wording of the questioned material written from *dictation.* This should be repeated on *separate* sheets of paper as many times as necessary to reflect the normal writing of the suspect (15 to 20 pages).
4. Duplicate the conditions surrounding the preparation of the questioned document as nearly as possible when obtaining request exemplars. Use the same color and type of paper, supplying blank checks if checks are questioned or voided credit cards if credit card signatures are questioned, etc. If a pen was used to write the questioned material, have the suspect write the exemplars with the same color of ink and type of pen. Normally, it is possible for the investigator to distinguish between ball point, fountain pen, and nib pen writing. If a pencil was used originally, a pencil of approximately the same hardness and color should be used in obtaining the exemplars.
5. To ensure that no distortion or disguise was

made by the suspect when the above dictated samples were secured, a quantity of collected specimens of the suspect's normal writing should also be obtained. These can be almost any type of license, application, signature identification card, personal letters, canceled checks or similar writing which approximate the date of the questioned document. Care must be taken to insure that such collected specimens are genuine so that they are admissible as court exhibits. To make a proper determination in cases of suspected forgery it is suggested that both dictated and collected genuine signatures also be obtained from the person whose name was forged.

6. When securing typewriting exemplars several copies of the questioned document should be made on the suspected machine, using light, medium and heavy touches. At least one copy should be made with the ribbon removed from the machine, or the ribbon control set on "stencil" and the keys allowed to strike directly on a sheet of new carbon paper which should be inserted on top of the paper used for the specimen. This provides clear-cut exemplars of any machine's type face, showing any disfigurements in type characters. Always type the exemplars on the same type and color of paper as that used on the questioned document.
7. Typewriters generally have one of two types of ribbons. The first and most common is cloth made of cotton or nylon impregnated with ink. The less common is a plastic ribbon that is used once and discarded. It gives a clear, sharp impression. In some cases the type marks left on the ribbon can be used to identify a machine or document and can be your most important piece of evidence. This same principle may be applied to cash registers and check protectors. The numerous marking machines, rubber stamps, merchandise markers, both tape or contact should not be overlooked as a possible means of identification.

D. Preservation of Questioned Documents

1. Under no circumstances should either the questioned document or the exemplars be marred, defaced, or altered. No new fold should be made nor should marks or notes be placed on such material.
2. Personal marks for identification purposes should be made as small as possible, on the back or on other areas of the documents where no handwriting or typewriting is present.
3. Whenever possible, all documents should be protected by placing them in cellophane envelopes.

E. Charred Documents

Where the examination and decipherment of writing on charred paper is involved, great care must be taken to prevent any additional crumbling or breaking apart of the burned material. Normally, it should be placed on top of loose cotton in a box and delivered in person to the Department. No matter how it is packaged, most such material will be damaged if attempts are made to ship it by mail.

F. Other Questioned Document Evidence

In addition to handwriting and typewriting comparisons and the decipherment of charred documents, many other related examinations can be conducted by the Department. These include, but are not limited to:

1. Restoration or decipherment of altered, obliterated or erased writing.
2. Comparison of check protectors and rubber stamps with questioned printing.
3. Identification of embossed or indented writing or typing.
4. Comparison of paper and commercially printed material such as checks, coupons, receipts and others.
5. Physical matching of cut or torn paper of various types.
6. Problems relating to inks.

G. Shipment of Evidence

1. When advance arrangements are made to make certain that a questioned document examiner is present, such evidence may be delivered to the Department in person.
2. When such evidence is sent to the Department by mail, it should normally be sent by certified or registered first class mail. If the amount of material is large, it may be also sent by some other method, but in all cases the package should be sealed.

Photo 47 The infrared image converter is used to examine an endorsement which has been obliterated by a bank stamp.

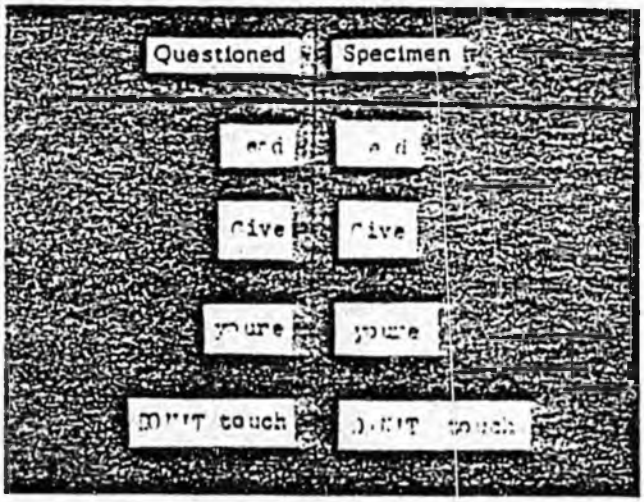

Photo 48 Comparison of a typewritten robbery demand note with the typing of typewriter found at the residence of a suspect. Notes: Light striking capital R and small a, capital G lighter at the bottom than at the top, capital O and small a striking to the left of center and above the base line and the dirty small e. These points of comparison conclusively prove that the same typewriter was used to prepare both the questioned and specimen writing.

H. Court Decisions Regarding Exemplars

There have been several California and United States Supreme Court decisions regarding the taking of handwriting exemplars by court order. Numerous California courts have held that the taking of exemplars by an investigator during the investigation of a crime and prior to obtaining a complaint does not violate the defendant's right against self-incrimination. Here briefly outlined, are a few of these court decisions.

SCHMERBER vs. California, 384 U.S. 757; 86 S. Ct. 1826 (1966) "Handwriting exemplars are merely an identifying physical characteristic outside the protection of the Fifth Amendment, like fingerprints, photographs, or requiring a defendant to speak, gesture or walk in a particular manner."

GILBERT vs. California, 388 U.S. 263; 87 S. Ct. 1951 (1967) "The taking of exemplars did not violate petitioner's Fifth Amendment privilege against self incrimination."

LEWIS vs. United States, (D.C.Cir. 1967) 382 F. 2d 816, 818, cert. den. 389 U.S. 962. Chief Justice Berger wrote, "A defendant could be compelled to furnish handwriting exemplars without violation of the Fifth Amendment since an exemplar is relevant only for the shape and direction of some lines and marks which may identify the writer as fingerprints and photographs do."

BINGER vs. United States, 364 F.2d 1083 (8th Cir. 1972). "Asking the defendant to write the words which were written on a forged instrument did not require *Miranda* warnings; it merely provided more reliable physical evidence."

United States vs. Dow, 457 F.2d 895 (2d Cir. 1972). "Handwriting and voice exemplars of a defendant can be obtained without constituting an invasion of privacy."

State vs. Ostrowski, 282 N.E.2d 359 (Ohio 1972). "A handwriting exemplar, required for comparison purposes, is outside the scope of the Fifth Amendment privilege against self-incrimination. It is not required that Miranda warnings be given prior to obtaining the exemplars. The standards may contain the same words as those contained in a questioned writing."

It is suggested that you contact the prosecuting agency in your area and follow his advice as to the collection of specimens and their admissibility as evidence.

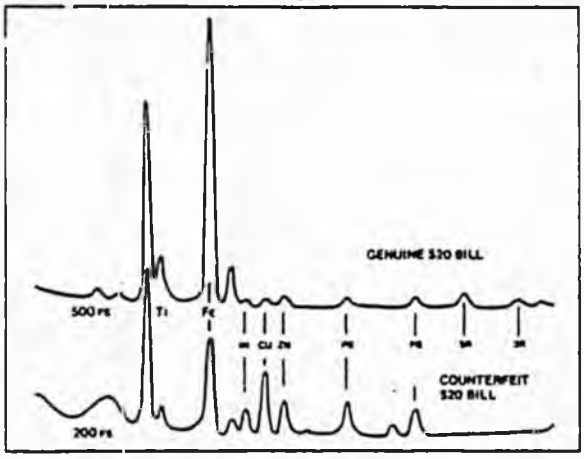
I. Collected Exemplars

Possible sources of handwriting, handprinting or typewriter exemplars are:

Applications for employment
Bail Bond applications
Bank account, cancelled checks, signature cards
Civil Service applications and examinations
Court records
Credit applications, loan applications
Drivers license and applications
Employee records
Family members or neighbors
Insurance applications
Lease or rental agreements
Military records
Registered letter receipts
School papers
Tax exemption applications
Utility service records; gas, water, electricity, etc.
Veterans Administration
Voters registration

Some of these exemplars may not be proper for admission as court evidence but they may assist the investigator as a lead in his case.

REMEMBER: The examination results generally depend on the quality and quantity of the material submitted for examination.



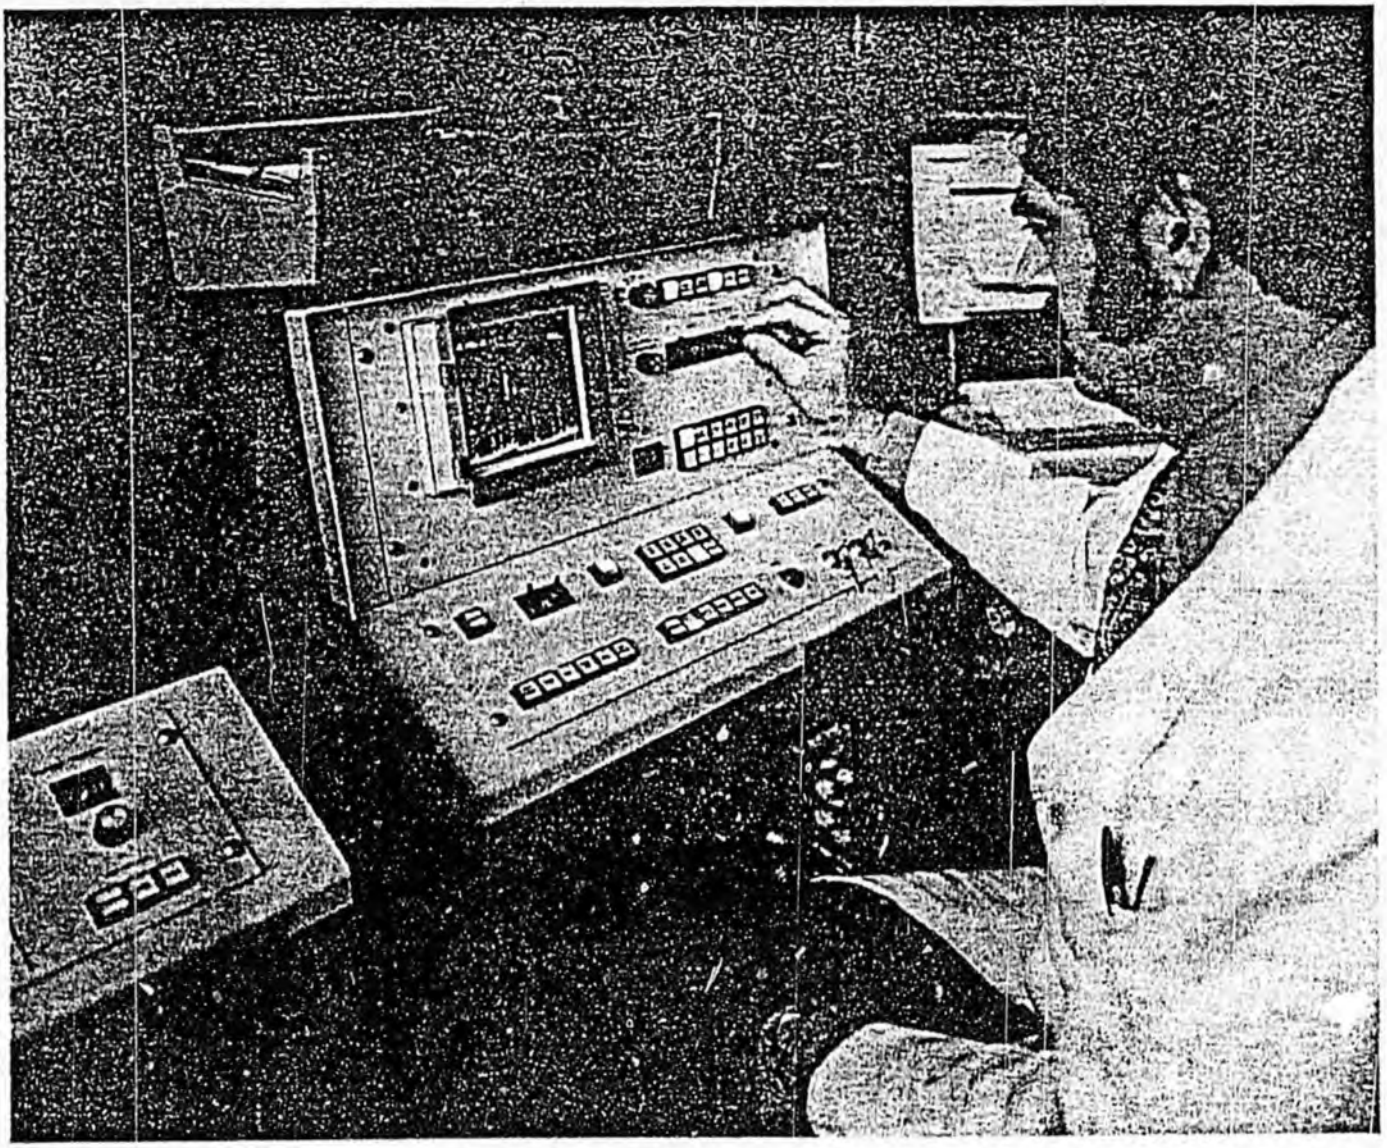


Photo 49 The Energy Dispersive X-ray (EDX) spectrometer is used to analyze inorganic compositions of many substances. While normally used on paint chips, glass, soil, bullets, one of the latest applications is questioned documents studies. Chemical differences in genuine and counterfeit notes are easily seen by nondestructive testing. EDX is located in Fresno, Riverside and Sacramento Regional Laboratories.

X. FORENSIC PHOTOGRAPHY SECTION

Forensic evidence photography, along with crime scene documentation and recording, is recognized today as indispensable to law enforcement.

Through use of forensic photography, vital information is graphically communicated daily in the courts and throughout the Criminal Justice System.

A. Services

The Forensic Photography Section provides the following services to law enforcement agencies in the state.

1. Crime scene documentation and recording.
2. Physical evidence photography.
3. Infrared, ultra-violet and infrared luminescent photographic examination.
4. Trace evidence photography.
5. Aerial photography—crime scene overviews.
6. Image enhancement techniques.
7. Specialized identification and surveillance photography.
8. Court testimony.
9. Training in crime scene photography and other forensic photographic techniques.
10. Consultation regarding forensic photographic problems.

B. Availability

Photographic assistance may be requested during normal weekday work hours by telephoning the Photography Section in Sacramento at 916-445-3526. During off hours, weekends and holidays, requests for service should be placed with the Command Center at 916-445-9240. In addition, requests may be placed through the nearest regional criminalistics laboratory (see appendix).

C. Evidence to be Photographed

When forensic photography of evidence is required in conjunction with analysis by a criminalistics laboratory, Latent Print Section or Questioned Documents Section, the items should be clearly marked for photographic service. Because normal photographic examinations including infrared and ultraviolet techniques are totally non-destructive, this procedure should be conducted prior to any other investigative services being performed.

The photographic request should also be noted on "Physical Examination" request form ISB4 submitted with the evidence.

Evidence requiring photography only, may be personally delivered to the Section at 3301 C Street, Sacramento or mailed to the Forensic Photography Section, Investigative Services Branch, P.O. Box 13337, Sacramento, Calif. 95813. Examples would be:

1. Exposed color or black and white films found in cameras at crime scenes. Exposed films sometimes contain valuable investigative leads.
2. Recovered Polaroid paper negatives from crime scenes with images still visible. By subjecting these negatives to specialized "image enhancement" techniques, the Forensic Photography Section can develop and preserve valuable investigative information.
3. Motion picture film or slides containing intelligence, suspect or investigative information.

D. Restrictions

The Photography Section does not normally develop film or prints for routine requirements of law enforcement agencies. However, if local outside or vendor processing would compromise the evidence or investigation, arrangements can be made for film processing and printing services. Other special requirements should be discussed by telephone with the Forensic Photography Section prior to sending any film to Sacramento.

XI. POLYGRAPH SECTION

POLYGRAPH EXAMINATIONS

Polygraph examinations are conducted by polygraph examiners for various activities throughout the State of California. No shipment of evidence is involved since the graphs produced during the examination are retained in the custody of the polygraph examiner and returned to this headquarters where custody is maintained. Reports containing the opinions rendered are forwarded by this office to the requesting agencies. However, no special mailing is required since no items of physical evidence (polygraphs) are forwarded with the reports.

BASIC INFORMATION REGARDING THE POLYGRAPH

A. Introduction

1. There is no mechanical or electrical device known to man that actually detects lies or truth. The instrument popularly known as "lie detector," "lie box," or, as we refer to it, the "polygraph," is a scientific diagnostic instrument on much the same order as the electrocardiograph, electroencephalograph, or the x-ray. Through the proper use of the polygraph, a competent polygraph examiner can diagnose truth or deception.
2. Stipulated Polygraph Examination
   The results of a polygraph examination are admissable as evidence in court on stipulation only. A stipulation is a written agreement signed by the District Attorney, the defendant, and the defense attorney before the defendant submits to a polygraph examination. The stipulation will state that the defendant will voluntarily submit to a polygraph examination to be administered by a particular polygraph examiner or agency. If the tests results are conclusive, the examiner's opinion as to the truth or deception, and the charts, will be admitted as evidence in court. If the results are inconclusive, no testimony by the examiner will be admitted. Even though the examiner is known as an expert in his field, he must still prove his expertise each time he testifies in court.
3. The polygraph instrument is (basically) composed of four components:
   a. The pneumograph component—records changes in respiration.
   b. The galvanograph component—records changes in the electrical resistance on the surface of the skin.
   c. The cardiosphygmograph component—records changes in blood pressure and pulse rate.
   d. The kymograph components—move the chart paper at a timed rate of speed, under the pens of the other three components.
4. The Theory of the Polygraph Examination
   a. Based on emotion of fear,
   b. Fear of detection by an untruthful subject will cause physiological changes to occur in the subject's body at point of deception,
   c. Physiological changes can be diagnosed by a trained, competent examiner.
   d. The subject must have something to gain or lose by submitting to the examination.

B. Basic Uses of the Polygraph

1. The polygraph is an excellent *aid* and a valuable tool, if properly utilized during the conduct of an investigation.

Photo 51 Subject being tested with the polygraph.

2. The polygraph, however, will *never* be able to take the place of *good, thorough* investigative methods.
3. The final results of a polygraph examination will be based, in great measure, upon the thoroughness of the investigation *prior* to having a subject take the examination.
4. In criminal investigations, examinations will be conducted upon:
   a. Suspects
   b. Victims
   c. Witnesses
   d. Informants

C. Factors That May Prohibit Polygraph Examinations:

1. A polygraph examination should *not* be conducted on *any subject who has been physically abused,* or any person that the examiner feels will be an unfit subject, nor any subject who has been questioned extensively, immediately prior to the time for testing.
2. Only those who voluntarily agree and will *sign a statement of consent* can be examined.
3. Juvenile Subjects.
   a. Juvenile subjects under the age of 14 years are very difficult subjects to examine due to a lack of maturity, both physical and mental. Many times conclusive results cannot be obtained by the use of the polygraph because of these factors.
   b. Consent forms for juveniles *must* be signed by either the parent or guardian prior to the examination.
4. Physical and/or Psychological Factors.
   a. The investigator must keep in mind that there are several other factors, especially of a physical or psychological nature, that sometimes preclude the use of the polygraph on a subject.

   Questionable subjects are:
   (1) Females during menstrual period.
   (2) Females that are more than 90 days in pregnancy.
   (3) Subjects with amputations, affecting the placement of instruments on the subject's person.
   (4) Subjects with paralysis.
   (5) Recent surgery or major injury or illness. The human body usually requires at least six months to fully recover.
   (6) Physical disabilities—skull or spine injuries, high or low blood pressure, and cardiac (heart) trouble.
   (7) Certain types of drugs and medication will preclude the use of the polygraph.
   (8) Emotional instability.
   (9) A subject who has not had sufficient nourishment.
   (10) Subject suffering from a severe cold or respiratory disorder.
   (11) Subjects with low mental ability—idiots, imbeciles, and morons. However, these should not be confused with lack of academic education.
   (12) Mental illness—either pathological or psychological.

INVESTIGATOR'S PROCEDURE FOR PREPARING A SUBJECT FOR EXAMINATION:

A. Preliminary Arrangements

1. Making appointments for polygraph examinations.
   a. A request for a polygraph examination by any law enforcement agency may be made either by phone or written request.
      PHONE: (916) 322-2138
   b. Upon request, the Polygraph Section will advise the requesting party of the first open time, and a definite appointment will be made.
2. Aid to Interrogation.
   a. The investigator should keep in mind from the very inception of the investigation that he may find it necessary to request the aid of the polygraph.
   b. The investigator should withhold *KEY INFORMATION* from the *SUBJECT AND* the *PRESS.*
      (1) Reference to the press does not mean that the press should not be informed of the circumstances of a crime, but that certain "catch phrases" or "peculiar acts," etc., on the part of the suspect could be withheld without materially affecting a press release.
   c. *NEVER USE THE POLYGRAPH EXAMINATION AS A BLUFF.* Do not ask your subject to submit merely to "bluff" him, and then when he agrees, forget it. This does not mean he is innocent at all. Do not ask him to submit unless you mean for him to take the examination.
   d. Polygraph should not be used just as a last resort.
3. Necessary case records.
   a. Records of the case should include:
      (1) Crime reports of suspected offense(s).
      (2) Investigation reports to date.
      (3) Background information of the suspect to be examined.
      (4) Brief resume of the reason for the examination.
      (5) Brief resume of statements or denials made by the subject.
4. Interrogation prior to time of examination.

a. Extensive interrogation of the subject within four hours prior to the examination should be avoided so that an accurate determination of truthfulness or untruthfulness of the subject can be accomplished.

b. The subject may be questioned *briefly* prior to the examination, but only to determine opportunity to commit the crime, and motive or desire.

c. This should *not* be misinterpreted as meaning that the investigator should not interrogate during the investigation, but *only* applies to that period of time *JUST PRIOR* to the examination. Prolonged interrogation of a person produces an exhausted or antagonistic subject who may then not be a fit subject for the examination.

d. The chances of a successful conclusion to an investigation are great when the suspect is made available for a polygraph examination before the final stage of the investigation.

5. Physical condition of subject prior to examination.

a. It is desirable that the subject have a normal amount of food and sleep during the 24-hour period preceding the polygraph appointment.

b. A person suffering from the influence of alcohol, sedatives, opiates, physical pain, severe cold or respiratory disorder is not ordinarily considered to be in a fit condition for a polygraph examination.

B. Suggested information to be withheld from the subject.

1. Method of polygraph examination

a. The subject of a polygraph examination should *NOT* be advised of the method in which the examination is to be conducted.

b. The subject should only be told that he or she will suffer no discomfort, will not be subjected to injections of any type, and that the entire process will be explained to him or her by the examiner prior to being examined.

2. Details of crime to be withheld.

a. The investigating officer, field as well as detective, should avoid disclosure of any details or facts established during the investigation to the subject or suspect.

b. Facts concerning the crime, which could only be known to the perpetrators should *never* be told the suspect, press, or the general public.

(1) If this precaution is disregarded, the probability of a conclusive polygraph examination may be nullified as a subject then has been furnished with a reason for knowing such important information.

(a) He/she could then state they were aware of certain facts because they had been told about same by friends, the detective, or had read same.

3. Examples of details which *should not, whenever possible,* be divulged are as follows:

a. Method of entry
(1) Tools used to effect entry
(2) Point of entry
(3) Extent of damage at point entry
(4) Whether or not entry was made by use of key

b. Property taken
(1) Specific amount taken
(2) Denominations of currency taken
(3) Unusual articles taken
(4) Description of articles taken

c. Weapon or force used to commit crime—specific
(1) Club
(2) Gun
(3) Knife
(4) Poison
(5) Number and location of wounds and bruises

d. Evidence left at the scene of the crime by suspects—tools, weapons, articles of clothing, etc.

e. Unusual acts of suspect before, during, or after the commission of the crime.
(1) Conversation or commands
(2) Peculiar habits, actions or characteristics of the suspects.

f. Means of exit from the scene
(1) If by vehicle, anything unusual about same, such as dents, missing portions, loud muffler, damage, etc.
(2) If on foot, direction taken from scene if noted.

g. Location from which property was taken
(1) Where safe or cash box was located in the building.
(2) Type of container from which money or articles were taken, such as green metal cash box, cigar box, laundry bag, paper sack, etc.

h. Homicide weapons used
(1) Make and type of gun such as .38 caliber, Smith and Wesson, 4" chrome plated with plastic grips, if it is found at crime scene.
(2) Weapon believed to have caused death.
(3) Detailed description of knives and other weapons.

C. Administering the Examination

1. The investigator(s) who actually participated in the investigation should be present at the time of the examination to turn the subject over to the examiner and should remain available to the examiner in order to discuss any pertinent information which may result from the testing sequences.
   a. It is necessary for the investigator(s) to be present as they are most familiar with the facts and case information.
2. The polygraph examination is a time-consuming process and the investigator(s) and subject should expect the examination to take a minimum of two hours to complete.
3. The examiner, at any stage of the examination, will advise the investigator(s) of the desire of a subject who may wish to make admissions of participation in a crime, and will then turn the subject over to the investigator(s) for further investigation.

D. Summary

1. Polygraph examinations are *NOT* a substitute for thorough preliminary investigation.
2. Polygraph examinations should be regarded only as a supplement to a thorough and complete investigation.
3. *NEVER* withhold any pertinent information on either the crime or the subject from the polygraph examiner.
4. THE EFFECTIVENESS OF THE POLYGRAPH EXAMINATION IS DEPENDENT UPON THE INVESTIGATOR(S) AND THE POLYGRAPH EXAMINER WORKING *TOGETHER*

NOTE: IF AT ANY TIME YOU HAVE ANY QUESTIONS RELATIVE TO THE POLYGRAPH, EXAMINATION PROCEDURE, SCHEDULING OF EXAMINATIONS, OR THE ADMINISTERING OF EXAMINATIONS, PLEASE FEEL FREE TO CALL. WE PRESENTLY HAVE AVAILABLE FOUR QUALIFIED EXAMINERS TO ASSIST YOU IN POLYGRAPH MATTERS.

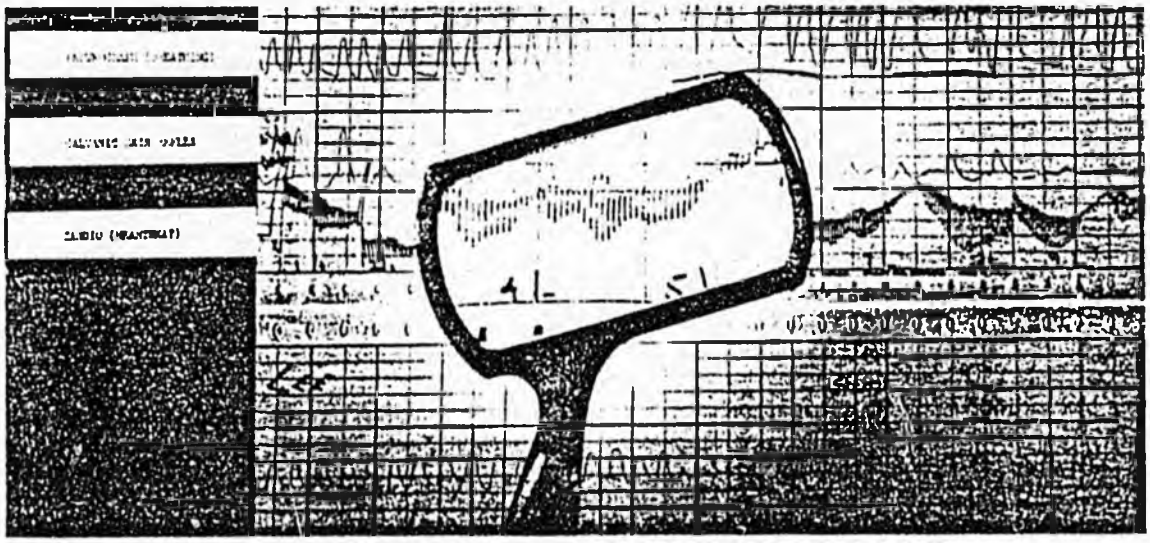

Photo 52 The three tracings of physiological responses of a subject.

XII. CRIME SCENE INVESTIGATION

Personnel of ISB regional laboratories are available to requesting agencies to provide assistance at the scene of a major crime. Generally, homicides or other serious offenses which are beyond the scope of the local agencies' trained evidence technician fall in this category. Participation of ISB personnel in a field investigation is under the general guidelines indicated under Section III, BRANCH SERVICES AND FUNCTIONS, page 7.

Participation by ISB personnel to assist in a field investigation generally encompasses three levels of activity:

1. Advisory capacity only where the investigating officer is unsure of the value of potential evidence and would like ISB personnel present to advise as the usefulness of this evidence. In this case, agency personnel actually process the scene and collects the evidence for submission to the laboratory or special sections.
2. Scene processing where the investigating agency does not have qualified personnel who can process the crime scene, and would like ISB to provide assistance in investigating and proper identification and collection of evidence. In this case, ISB personnel actually process the scene and collect the evidence.
3. Reconstruction, wherein laboratory personnel are available to aid the requesting agency in reconstructing the activities at a crime scene before and after the offense.

Agencies requesting assistance on field investigations should provide ISB personnel with background information before arrival of the processing team (e.g., Has the scene been isolated? Is the suspect in custody? Have any live victims been given hospital transfusions?). Also at the time of the request, the chief investigating officer should provide a general description of the circumstances to ISB personnel and indicate whether or not the agency will require a criminalist, an ISB photographer, latent print examiner, Bureau of Investigation Special Agent, or other services. In some circumstances, the actual crime scene team processing is not warranted and problems can sometimes be answered on the phone through consultation with the criminalist or other technical specialist.

It should be understood that the responsibility of resolving legal proprieties such as search warrants rests with the requesting agencies. Such matters should be resolved before crime scene processing. When the ISB criminalist and other technical specialist arrive at the scene, the chief investigating officer should identify himself and agree with ISB personnel as to which levels of participation (described above) will be required. At this time, the chief investigating officer and the criminalist or other scene processing members should determine how the scene is to be processed, who will do sketching, who will make distance measurements, who will enter the crime scene first (latent print examiner, photographer, etc.)

Photo 53 Criminalist recovering trace evidence from deeply buried homicide victims prior to removal of remains.

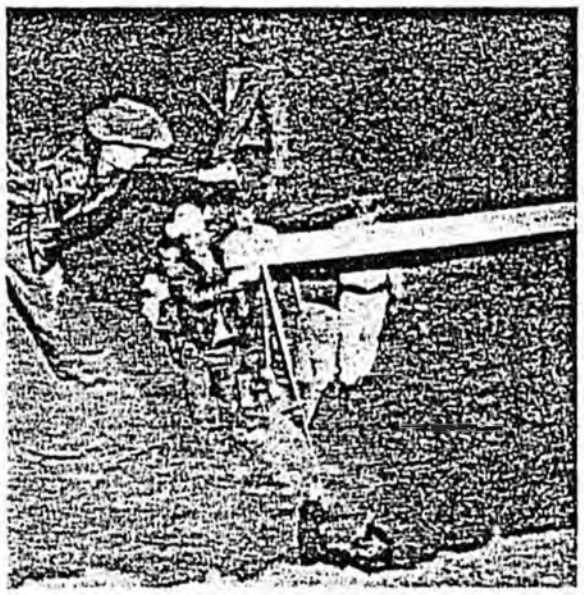

Photo 54 Criminalist and agency personnel decide on methods of measurement and use of available reference points appropriate to each crime scene.

If a post-morten examination is to be performed, the ISB criminalist generally attends for the purpose solely of collecting physical evidence associated with the deceased (blood sample, clothing, bullet extracted from wound).

In shooting cases, with either deceased or live victims, it may become desirable to process the subject's hands for microscopic evidence, gunshot residue, or metal traces from a handgun. If this becomes necessary, refer to the Physical Evidence Bulletins on either Trace Metal Detection Technique or Gunshot Residue Collection, PEB 14/77 and 15/77 respectively.

Other specialized types of evidence associated with a field investigation may require special processing. This could include footprints and tire tracks, see PEB 23/77, documentation and interpretation of blood splatters (confer with criminalist), volatile or flammable substances (see PEB 10/77) and stain or trace evidence on valuable or massive objects (confer with criminalist).

ISB personnel will not make public statements concerning physical evidence. Any statements solicited by non-law enforcement personnel, particularly the press, are to be discouraged. ISB criminalists and technical personnel are instructed not to speak to the press unless the presiding district attorney or chief law enforcement officer in charge of the crime scene asks that the ISB representative give details. At this time, the criminalist or other technicians will only specify details and will refrain from theorizing or reconstructing the events that may or may not have occurred based on the observations he makes.

XIII. INFORMATION FOR DISTRICT ATTORNEY, OTHER PROSECUTORS AND PUBLIC DEFENDERS

A. Expert Testimony

1. In addition to conducting examinations and comparisons of various types of physical evidence, criminalists and other experts of the ISB are available to present expert testimony concerning their findings before the courts. In order that the ISB be of maximum assistance, it is requested that attempts be made to follow the procedures listed below:
   a. Notify the analyst, as much in advance of the trial date as possible, so that time will be available to prepare any necessary photographic or other exhibits.
   b. Due to the number of cases being handled by each employee, conflicts in court appearance dates may frequently occur. When sufficient advance notice is given of scheduled trials many of these conflicts can be satisfactorily resolved. Considerable time is also necessary to travel to and from courts which are not close to the analyst's office. Occasionally, a single trip will permit the analyst to make more than one court appearance when sufficient advance notice is given.
   c. The individual who signs the report submitted is the analyst responsible for the evidence examinations. Notices to appear in court should be sent to this person. Other employees normally have not examined or marked the evidence submitted and therefore cannot serve as effective witnesses.
   d. Employees may be requested to appear as witnesses by having a subpoena served on them, but normally this is not necessary and will delay notification more than other methods. The receipt of a letter, or teletype message will be acknowledged and treated as an official notice to appear in the same manner as a subpoena.
   e. In all cases it is requested that, in addition to the notice to appear in court, information be furnished as to the date and approximate hour when the witness will be needed. While the prosecutor cannot always predict in advance the exact time that a specific witness will be called, it is often possible in lengthy trials to at least roughly predict the time required to obtain a jury and examine witnesses whose testimony is necessary prior to the appearance of the expert witness. The number of court appearances being made each week by the experts of the Branch makes it difficult for them to appear in all cases where they are needed, since a considerable amount of time must be spent in traveling to distant courts. Time used in waiting outside of court rooms while juries are being selected or other witnesses are being examined has sometimes amounted to many days and caused other prosecutors either to ask for continuances in their cases or to forego use of the expert witness' testimony which was of importance in their cases.
   f. The appropriate laboratory or section should also be notified immediately of any change in trial or appearance dates. On many occasions, witnesses have appeared, as requested, to testify on specific cases only to find that the defendant has changed his plea to guilty or the case was continued. While a change of plea may be made at the last minute, there have been many instances where this was known in advance, but the Branch was not advised and employees have needlessly traveled hundreds of miles.
   g. In contacting the Branch concerning a specific case, particularly when done by telephone, advise us of the case number appearing on the report, if possible. This permits the laboratory to locate the filed report or other records without unnecessary delay.
   h. Before testimony is presented, *the attorney should arrange to confer with the criminalist or other expert* concerning his qualifications and the testimony to be presented. This is essential in order to obtain maximum effectiveness from the testimony.
   i. No witness fees, travel expenses, or other charges are made for expert testimony or any other service furnished by this Branch in criminal cases within the State of California.

B. Other Special Aids for Prosecutors and Public Defenders

1. The criminalists, as well as other experts of the Branch, are available to render other special aid to prosecutors and public defenders in criminal cases. This may consist of furnishing assistance in preparing scientific phases of certain cases for trial, evaluating scientific aspects of such cases, or actually examining evidence. Services are provided for public defenders under contract as per conditions of Section 1105.5 of the Penal Code. Inquiries should be directed to the Branch by telephone or at the address cited in Appendix B.

2. Assistance is also rendered in interpreting and evaluating testimony presented by experts called by the defense.
3. Requests for such assistance, when not made in person, should always include information concerning the basic problem involved or testimony which has already been given or is expected. This is usually necessary so that any research or other studies can be made prior to the personal consultation of the expert with the attorney.

APPENDIX A

PHYSICAL EVIDENCE BULLETINS

1/77 Urine as a Sample for Alcohol Determination
2/77 Uniform Standards for Withdrawal, Handling, and Preservation of Blood Samples for Forensic Alcohol Analysis
3/77 Automobile Lights
4/77 Sample Collection of Blood for Blood Typing
5/77 Collection of Paint Fragments
6/77 Collection of Hair Samples
7/77 Guidelines for Physical Evidence in Sexual Assault Investigations
8/77 Drug Analysis in Driving Under the Influence Cases
9/77 Collection of Glass Fragments
10/77 Collection of Volatile Flammables
11/77 Collection of Fiber Evidence
12/77 Firearms Evidence Collection Procedures
13/77 Collection of Soil Samples
14/77 Trace Metal Detection Technique (TMDT)
15/77 Gunshot Residue Collection
LP 16/77 Submission of Inked Fingerprints of Identified Subjects
LP 17/77 Latent Print Section
QD 19/77 Submission of Evidence to the Questioned Documents Section
QD 20/77 Exemplars of Mechanical Reproductions, Serrations and Tears for Questioned Document Examination
QD 21/77 Court Decisions Regarding Exemplar Material for Questioned Documents
23/77 Preservation of Shoe Tracks and Tire Tracks
PL 24/77 Polygraph Examination Procedure
25/77 Controlled Substances
26/77 Clandestine Laboratories
Physical Evidence Chart—Collection and Preservation
Flyer on Purchase of Physical Evidence Manual
Map-Service Zones for Statewide Criminalistics System Laboratories

These may be requested through the laboratories and appropriate special sections of the branch. Proper addresses and telephone numbers appear in Appendix B.

Enclosure

$25 nor more than $200 for each neglect or violation.

(14) The state fire marshal, any deputy fire marshal or fire chief may require an insurer, including the state acting under ch. 619, to furnish any information in its possession relating to a fire loss involving property with respect to which a policy of insurance issued or serviced by the insurer may apply. Any insurer, including the state, may furnish to the state fire marshal, any deputy fire marshal or fire chief information in its possession relating to a fire loss to which insurance issued by it may apply. In the absence of fraud or malice, no insurer furnishing information under this subsection, state fire marshal, deputy fire marshal or fire chief, and no person acting on behalf of the insurer, state fire marshal, deputy fire marshal or fire chief, shall be liable in any civil or criminal action on account of any statement made, material furnished or action taken in regard thereto. Information furnished by an insurer under this subsection shall be held in confidence by the state fire marshal, deputy fire marshal or fire chief and all subordinates until release or publication is required pursuant to a civil or criminal proceeding. Information obtained by the state fire marshal, any deputy fire marshal or fire chief during their investigations of fires determined to be the result of arson may be available to the insurer of the property involved.

History: 1973 c. 333; 1975 c. 224; 1977 c. 260, 341; 1979 c. 133; 1981 c. 318.

State fire marshall must establish proper discretionary reasons for exercising privilege of secrecy under (8). Black v. General Electric Co. 89 W (2d) 195, 278 NW (2d) 224 (Ct. App. 1979).

See note to art. I, sec. 11, citing State v. Monosso, 103 W (2d) 368, 308 NW (2d) 891 (Ct. App. 1981).

Arson investigations under (9) and (10) are subject to search warrant requirements set forth in Michigan v. Tyler, 436 US 499 (1978). Consent to search discussed. 68 Atty. Gen. 225.

165.60 Law enforcement. The division of criminal investigation is authorized to enforce ss. 944.30, 944.31, 944.33, 944.34, 945.02 (2), 945.03 and 945.04 and shall be invested with the powers conferred by law upon sheriffs and municipal police officers in the performance of such duties. Nothing herein shall deprive or relieve sheriffs, constables and other local police officers of the power and duty to enforce said sections, and such officers shall likewise enforce said sections.

History: 1975 c. 39.

165.70 Investigation of state-wide crime. (1) The division of criminal investigation shall:

(a) Investigate crime which is state-wide in nature, importance or influence;

(b) Enforce chs. 161 and 945 and ss. 940.20 (3), 941.25 to 941.27, 943.01 (2) (c), 943.27, 943.28, 943.30, 944.30, 944.31, 944.32, 944.33, 944.34, 946.65 and 947.02 (3) and (4);

(d) Enforce and administer s. 165.55.

(e) Investigate violations of ch. 163 that are statewide in nature, importance or influence.

(2) The attorney general shall appoint, under the classified service, investigative personnel to achieve the purposes set out in sub. (1) who shall have the powers of a peace officer. As many as are deemed necessary of the investigators so appointed shall be trained in drugs and narcotics law enforcement, or shall receive such training within one year of their appointment, and they shall assist, when appropriate, local law enforcement agencies to help them meet their responsibilities in this area.

(3) It is the intention of this section to give the attorney general responsibility for devising programs to control crime state-wide in nature, importance or influence, drugs and narcotics abuse, commercial gambling, prostitution, and arson. Nothing herein shall deprive or relieve local peace officers of the power and duty to enforce those provisions enumerated in sub. (1).

(4) Local district attorneys, sheriffs and chiefs of police shall cooperate and assist the personnel of the division in the performance of their duties.

History: 1971 c. 40, 211, 307; 1973 c. 156; 1975 c. 39; 1977 c. 173 s. 168; 1977 c. 215, 260; 1977 c. 272 s. 98.

SUBCHAPTER III

DIVISION OF LAW ENFORCEMENT SERVICES

165.75 Crime laboratory. (1) Unless the context clearly requires otherwise:

(a) "Laboratory" means the crime laboratory.

(b) "Administrator" means the administrator of the division of law enforcement services.

(c) "Employe" means any person in the service of the laboratory other than the administrator.

(2) The crime laboratory shall be located in the city of Madison. The personnel of the laboratory shall consist of such employes as are authorized under s. 20.922.

(3) (a) The purpose of the laboratory is to establish, maintain and operate a crime laboratory to provide technical assistance to local law enforcement officers in the various fields of scientific investigation in the aid of law enforcement. Without limitation because of enumeration the laboratory shall maintain services and employ the necessary specialists, technical and scientific employes for the recognition and proper preservation, marking and scientific analysis of evidence material in the investigation

and prosecution of crimes in such fields as firearms identification, the comparison and identification of toolmarks, chemistry, identification of questioned documents, metallurgy, comparative microscopy, instrumental detection of deception, the identification of fingerprints, toxicology, serology and forensic photography.

(b) The administrator and employes of the division of law enforcement services are not peace officers and shall have no power of arrest or to serve or execute criminal process. They shall not be appointed as deputy sheriffs and shall not be given police powers by appointment or election to any office. Laboratory employes shall not undertake investigation of criminal conduct except upon the request of a sheriff, coroner, medical examiner, district attorney, chief of police, warden or superintendent of any state prison, attorney general or governor. The head of any state agency may request investigations but in such cases the services shall be limited to the field of health, welfare and law enforcement responsibility which has by statute been vested in the particular state agency.

(c) Upon such request the laboratory shall collaborate fully in the complete investigation of criminal conduct within its competence in the forensic sciences including field investigation at the scene of the crime and for this purpose may equip a mobile unit or units.

(d) The services of the laboratory available to such officer shall include appearances in court as expert witnesses.

(e) The administrator may decline to provide laboratory service in any case not involving a potential charge of felony.

(f) The services of the laboratory may be provided in civil cases in which the state or any department, bureau, agency or officer of the state is a party in an official capacity, when requested to do so by the attorney general.

(4) The operation of the laboratory shall conform to the rules and policies established by the attorney general.

History: 1973 c. 272; 1977 c. 260; 1981 c. 314.

An evaluation of drug testing procedures. Stein, Lacking, Indriksons, 1973 WLR 727.

165.78 Information center; training activities. (1) The division of law enforcement services shall act as a center for the clearance of information between law enforcement officers. In furtherance of this purpose it shall issue bulletins by mail or its telecommunication system. The division shall at all times collaborate and cooperate fully with the F.B.I. in exchange of information.

(2) The division shall cooperate and exchange information with other similar organizations in other states.

(3) The division may prepare and conduct informational and training activities for the benefit of law enforcement officers and professional groups.

History: 1977 c. 260.

165.79 Evidence privileged. (1) Evidence, information and analyses of evidence obtained from law enforcement officers by the laboratory is privileged and not available to persons other than law enforcement officers nor is the defendant entitled to an inspection of information and evidence submitted to the laboratory by the state or of the laboratory's findings, or to examine laboratory personnel as witnesses concerning the same, prior to trial, except to the extent that the same is used by the state at a preliminary hearing. Upon request of a defendant in a felony action, approved by the presiding judge, the laboratory shall conduct analyses of evidence upon behalf of such defendant. No prosecuting officer is entitled to an inspection of information and evidence submitted to the laboratory by the defendant, or of the laboratory's findings, or to examine laboratory personnel as witnesses concerning the same, prior to trial, except to the extent that the same is used by the accused at a preliminary hearing. Employes of the laboratory who made examinations or analyses of evidence shall attend the criminal trial as witnesses, without subpoena, upon reasonable written notice from either party requesting such attendance. Nothing in this section shall limit the right of a court to order the production of evidence or reports pursuant to s. 971.23 prior to trial.

(2) Upon the termination or cessation of the criminal proceedings, the privilege of the findings obtained by the laboratory may be waived in writing by the administrator and the prosecutor involved in the proceedings. The employes of the laboratory may then be subpoenaed in civil actions in regard to any information and analysis of evidence previously obtained in such criminal investigation, but the laboratory shall not engage in any investigation requested solely for the preparation for trial of a civil matter. Upon appearance as a witness or receipt of a subpoena or notice to prepare for trial in a civil action, or appearance either with or without subpoena, the laboratory shall be compensated by the party at whose request the appearance or preparation was made in a reasonable amount to be determined by the trial judge, which fee shall be paid into the state treasury. In fixing such compensation the court may give consideration to the time

spent in obtaining and analyzing the evidence for the purposes of criminal proceedings.

(3) (a) In this paragraph, "local health department" means a city, county, city-county or multicounty health department.

(b) At any preliminary examination, a report of the laboratory's or local health department's findings with reference to all or any part of the evidence submitted, certified as correct by the administrator, the head of the local health department or a person designated by either of them, shall, when offered by the state or the accused, be received as evidence of the facts and findings stated, if relevant. The expert who made the findings need not be called as a witness.

History: 1977 c. 260; 1979 c. 221; 1981 c. 20.

165.80 Cooperation with other state departments. For the purpose of coordinating the work of the laboratory with the research departments located in the university of Wisconsin, the attorney general and the university of Wisconsin may agree for the use of laboratories and physical facilities in the university and the exchange and utilization of personnel between the laboratory and the university. The university and crime laboratory cooperation council shall act in an advisory capacity to the attorney general.

165.81 Disposal of evidence. (1) Whenever the administrator is informed by the submitting officer or agency that physical evidence in the possession of the laboratory is no longer needed the administrator may, unless otherwise provided by law, either destroy the same, retain it in the laboratory or turn it over to the university of Wisconsin upon the request of the head of any department. Whenever the administrator received information from which it appears probable that such evidence is no longer needed, he may give written notice to the submitting agency and the appropriate district attorney, by registered mail, of his intention to dispose of the evidence and if no objection is received within 20 days after such notice was mailed he may dispose of such evidence.

(2) Any electric weapon, as defined in s. 941.295 (4), in the possession of the laboratory shall either be destroyed or turned over to an agency authorized to have electric weapons under s. 941.295 (2).

History: 1981 c. 348.

165.83 Criminal identification, records and statistics. (1) DEFINITIONS. As used in this section and s. 165.84:

(a) "Division" means the division of law enforcement services.

(b) "Law enforcement agency" means a governmental unit of one or more persons employed full time by the state or a political subdivision of the state for the purpose of preventing and detecting crime and enforcing state laws or local ordinances, employes of which unit are authorized to make arrests for crimes while acting within the scope of their authority.

(c) "Offense" means an act which is a felony, a misdemeanor or a violation of a city, county, village or town ordinance.

(2) The division shall:

(a) Obtain and file fingerprints, descriptions, photographs and any other available identifying data on persons who have been arrested or taken into custody in this state:

1. For an offense which is a felony.

2. For an offense which is a misdemeanor or a violation of an ordinance involving burglary tools, commercial gambling, dealing in gambling devices, contributing to the delinquency of a child, dealing in stolen property, controlled substances under ch. 161, firearms, dangerous weapons, explosives, pandering, prostitution, sex offenses where children are victims, or worthless checks.

3. For an offense charged as disorderly conduct but which relates to an act connected with one or more of the offenses under subd. 2.

4. As a fugitive from justice.

5. For any other offense designated by the attorney general.

(b) Accept for filing fingerprints and other identifying data, taken at the discretion of the law enforcement agency involved, on persons arrested or taken into custody for offenses other than those listed in par. (a).

(c) Obtain and file fingerprints and other available identifying data on unidentified human corpses found in this state.

(d) Obtain and file information relating to identifiable stolen or lost property.

(e) Obtain and file a copy or detailed description of each arrest warrant issued in this state for the offenses under par. (a) but not served because the whereabouts of the person named on the warrant is unknown or because that person has left the state. All available identifying data shall be obtained with the copy of the warrant, including any information indicating that the person named on the warrant may be armed, dangerous or possessed of suicidal tendencies.

(f) Collect information concerning the number and nature of offenses known to have been committed in this state, the legal action taken in connection with such offenses from the inception of the complaint to the final discharge of the defendant and such other information as may be useful in the study of crime and the administration of justice. The administrator of

DEPARTMENT OF PUBLIC SAFETY

POSITION PAPER

Support

Passage of this bill will result in an increase in the number and quality of arrests and convictions in felony cases statewide. Construction of this Capital Project will mark a major shift in direction for the State Troopers from a limited service Crime Lab to a full service professional Forensic Laboratory designated to serve all law enforcement agencies statewide. This project will consist of 17,000 square feet of space for testing and analysis, and equipment to establish a full-service Statewide Crime Laboratory.

Within the last decade a series of Supreme Court decisions relative to search and seizure, interrogation and confessions has had the effect of limiting the scope of permissible investigative activities by law enforcement agencies. This situation, in turn, has resulted in the increased attention to the use of physical evidence in criminal investigations, and the subsequent development of crime laboratories to analyze this evidence throughout the nation.

The application of the technologies and techniques of the natural and physical sciences to items of evidence found at a crime scene is an increasing part of modern investigations and courtroom trials. The expectation that these sciences are devoid of prejudice makes the results of crime laboratory tests and analyses an often critical part of judicial proceedings. It also confers upon crime laboratories the responsibility for the highest degree of professionalism in their work. The availability of physical facilities is the essential first step in making these services available to Alaska's state & local law enforcement agencies. All services performed will be at no cost to the Troopers and the 25 or so local departments throughout the state.

Beyond establishing drug identification and fingerprint comparisons within the existing limited Laboratory, Alaska has no crime laboratory with the broad capabilities needed to analyze clothing from a rape, compare shell casings to bullets found at a homicide, analyze carbon residue from a suspected arson fire for traces of accelerants, compare blood characteristics of blood on an assault victim to the blood of a suspect, compare pry marks on a window casing with a tire iron found in possession of a suspect, and the many additional tests required for modern, effective law enforcement investigations. The existing "crime lab" is located in crowded quarters in the basement of the State Troopers headquarters building in Anchorage.

Lack of additional personnel and physical limitations prevent its expansion. Alaska is the only state that does not yet have a full service lab to assist its local, as well as state, law enforcement agencies.

The greatest reason to develop a full service Crime Lab in Alaska is the increasingly longer time required to receive results of tests now routinely being sent to the FBI laboratory in Washington, D.C. The time required for laboratory tests of a routine nature from the FBI now require from four to six months. The reasons for this situation are a general budget tightening among federal agencies and an ever increasing number of requests nationwide for tests by the FBI laboratory. The problem of long turn-around sometimes conflicts with the Alaska Supreme Court Rule, which requires that the trial begin within 120 days following arrest, barring any delays by the judge as may be requested by either side. This problem is expected to increase in the future. Increasing turn-around time is also occurring with the very limited capabilities of the existing Trooper laboratory. Currently the average time required for test results is several weeks for just drug-related tests. No room for expansion within current facilities is available or practical.

During the 1983 Legislative session the legislative appropriated $402.0 to cover the design and engineering costs of this project (Chapter 28, SLA 83). This stage of the project has proceeded on schedule and current cost estimates by the architects have confirmed our original estimate of $5,603.0.

An extensive study was made during FY 82 and FY 83 concerning the needs for a Statewide Crime Laboratory by the Department of Public Safety personnel. This study is too exhaustive to be made part of this bill analysis, however, copies may be obtained by contacting Colonel Michael C. Kolivosky, Division of Alaska State Troopers, P.O. Box 6188 Annex, Anchorage, AK 99502 (269-5646), or through the Commissioner's office in Juneau.

January 20, 1984

The Honorable Charlie Bussell
Chairman
Committee on the Judiciary
Alaska House of Representatives
Juneau, Alaska

Dear Mr. Bussell:

I am writing today concerning House Bill 487, which provides for the construction of a State Crime Laboratory, and for first year funding.

Although I have not read the Bill, and thus cannot state that I unequivocally support each of its provisions, I can surely state that the FBI strongly supports the establishment of effective basic-service crime laboratories at state and local levels.

You might be interested in a recounting of events in what might be the most simple exchange between Alaska law enforcement/prosecutive authorities and the FBI Laboratory, upon whose forensic science services Alaska now depends.

An Alaska law enforcement agency dispatches items of clothing in a sexual assault case to the Laboratory, and requests examination of fluid stains on the items. The Laboratory conducts the requested examinations, and advises the Alaska agency of its results. The District Attorney deems these results to be vital to a successful prosecution of his case, and requests the FBI Laboratory examiner to travel to Alaska to testify in trial in an Alaska Superior Court. (This occurred 50 times in the Fiscal Year ending September 30, 1983; 51 times in Fiscal Year 1982.)

My associates in the FBI Laboratory advise me that a "testimony trip" to Alaska is generally regarded as a five day committment. One day of travel in each direction, and three days in Alaska consumed by pre-trial discussions with the prosecutor, waiting to testify, and actual time on the witness stand.

Here is a tabulation of the direct cost to the FBI attendant upon such a series of events (again in a case of minimum complexity).

Salaries: FBI Laboratory technician for two days consumed in examination, plus FBI Special Agent Examiner, one day on examination and five days on testimony trip - $1,296.

Per diem costs: Special Agent Examiner, five days in Alaska at lowest federal per diem rate in Alaska ($92) totalling $460.

Air fare: Washington, D.C. to Anchorage and return at U. S. Government contract rate of $606.

A total of these three primary cost items is:

	$1,296
	460
+	606
	$2,362.

This figure, of course, does not include incidental expenses nor, more importantly, the substantial personnel and facilities "overhead" costs attendant upon the operation of the FBI Laboratory.

One can readily see that even a relatively uncomplicated matter becomes a most expensive proposition, and that the existence of a state crime laboratory would substantially reduce salary, travel, and per diem costs in most cases. Further, I can assure you that a small percentage of our Laboratory's work results in testimony. In the vast majority of the cases, the investigation and prosecutive action is completed without the necessity of examiner travel. The latter cases still represent a most substantial expenditure of FBI salary and overhead expenses.

Due to the absence of a state crime laboratory, and based on its population, Alaska is the greatest per capita user among the states of the services of the FBI Laboratory. Even without regard to population, Alaska is among the leaders. Thus, from the FBI's standpoint, we are rendering our greatest level of service to the state most distant from our Laboratory.

From time to time an item of information appears which indicates that the FBI intends to, or may be directed to, reduce its level of service to state and local agencies and/or begin charging for Laboratory services. I would be less than candid if I did not say that the FBI has always resisted these concepts in the past, and intends to continue to resist them. I see nothing in the future to indicate that the FBI Laboratory will

not stand ready for years to come to continue to accommodate, on a cost free basis, every legitimate request from state and local agencies for forensic science examinations. We would much prefer, however, that state and local agencies operate basic-service laboratories and use the services of the FBI Laboratory only in those cases in which the examinations involve the most sophisticated, expensive, and unusual equipment needs and/or areas of examiner expertise.

I have been informed that approximately 47 of the 51 testimony trips taken to Alaska by FBI Special Agent Examiners in Fiscal Year 1982 involved basic examinations in such areas as firearms, documents, and serology examinations. I would expect that most, if not all, of those 47 examinations could have been conducted by the basic-service laboratory envisioned by the Department of Public Safety.

The FBI operates a fine, expansive training program for state and local forensic science personnel on a no-cost basis at our training academy at Quantico, Virginia. We stand ready to serve Alaska in this regard. I will personally attempt to insure that whenever possible prospective attendees from Alaska "go to the head of the line" waiting for positions in those training classes. My superiors in Washington would almost certainly regard that preferential treatment as a fair trade, in recognition of Alaska's willingness to assume a greater share of the burden which until now has been equally borne by the taxpayers throughout the nation.

I support House Bill 487, and urge its favorable consideration.

Please do not hesitate to contact my office, directly or through Commissioner Sundberg, if you require further information from the FBI.

Sincerely yours,

Lawrence J. Nelson
Special Agent in Charge

Honorable Mitch Abood
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Abood,

The membership of the Alaska Association of Chiefs of Police has voted unanimously that establishment of a State Crime Lab is a priority for the State of Alaska.

Attached is a copy of the resolution passed in support of this project. We are requesting your assistance in the passage of a bill that would result in construction of a State Lab.

Richard A. Ross
Secretary/Treasurer

RAR/lo

ALASKA ASSOCIATION CHIEFS OF POLICE

RESOLUTION 84-1

WHEREAS, State and Federal Court decisions have required higher standards of evidence over the years, standards that require examination and testing of available physical evidence; and

WHEREAS, Alaska, the only State without its own crime laboratory, relies on the F.B.I. laboratory to process and analyze evidence; and

WHEREAS, increasing delays have been experienced in receiving results from the F.B.I. laboratory resulting in follow-up investigation and case prosecution delays; and

WHEREAS, it would be a waste of tax dollars for each law enforcement entity in the State of Alaska to attempt to provide its own laboratory resources, and would indeed be prohibitive for all but the very largest agencies to do so; and

WHEREAS, the 1983 legislature appropriated funding for the engineering and architectural designing of a State Crime Laboratory, which work is presently underway; and

WHEREAS, Representative Walt Furnace has prefiled an Appropriations Bill that would fund a full service crime laboratory that would provide for testing and analysis of crime scene evidence for all law enforcement agencies in the State of Alaska; NOW THEREFORE BE IT RESOLVED that,

The Alaska Association of Chiefs of Police requests that all legislators give their support to the passage of an appropriations bill that would provide for construction of a full-service crime laboratory to serve all law enforcement agencies in the State of Alaska.

ALASKA PEACE OFFICER'S ASSOCIATION
MAT-SU CHAPTER
P.O. BOX 1079
PALMER, ALASKA 99645

November 25, 1983

Lonnie Kular
President
Alaska Peace Officer's Association

Dear Lonnie:

As you will note from the attached resolution, the Mat-Su Chapter of A.P.O.A. is contacting all legislators representing our area to urge them to support the appropriation measure for the State Crime Lab that has been pre-filed by Representative Walt Furnace of Anchorage, for the 1984 legislative session.

It is our opinion that in view of the declining revenues in the State Treasury, the success of funding the construction of the Crime Lab rests in large measure upon the shoulders of all of us in law enforcement in Alaska who will benefit from the services the lab will provide.

With this thought in mind, our chapter would like you to contact the other A.P.O.A. Chapters, asking that they join with us in a Statewide effort to obtain funding for constructing the lab, by contacting their area legislators before the 1984 session and sending them a similar resolution, urging their support for the lab.

Also attached is a brief paper that outlines the lab project. Your assistance in this project will help all of us to obtain a Crime Lab from which we will all benefit.

Sincerely,

Rollie A. Port
President
Mat-Su Chapter, A.P.O.A.

Senator J. Kerttula
Rep. Ron Larson
Rep. Barbara Lacher

RESOLUTION

WHEREAS Law Enforcement Agencies in the State of Alaska experience the continued pressures of increasing population and consequent increase in numbers of crimes; and

WHEREAS There is an increasing need to present a high degree of proof of guilt concerning the accused that can best be accomplished by the careful testing and analysis of evidence found at the scene of a crime; and

WHEREAS The historical dependence upon the FBI laboratory to provide analyses of evidence is increasingly causing delays in trials and preventing effective followup investigations because of Longer and longer delays in receiving test results; and

WHEREAS Alaska does not now have a Criminalistics Laboratory of the nature required to analyze the items of evidence commonly found at the scene of crimes, which analysis is crucial to effective prosecution of the accused; and

WHEREAS The Alaska Legislature during the 1983 session provided architectural and design funding, which efforts are well underway; and

WHEREAS An appropriations measure has been prefiled by Representative Walter Furnace of Anchorage in the amount of $5.603 million for the first full-service Crime Laboratory for Alaska law enforcement agencies which will analyze their evidence at no cost to them, thereby benefiting them specifically, and provides for increased safety generally for the citizens of Alaska,

NOW THEREFORE BE IT RESOLVED THAT THE Mat-Su Chapter of the Alaska Peace Officers Association duly constituted, hereby urges all area Legislators to extend full support for the passage of the appropriations bill for construction of Alaska's Crime Laboratory.

106TH SESSION

WRANGELL POLICE DEPARTMENT

CITY OF WRANGELL, ALASKA
POST OFFICE BOX 531 • WRANGELL, ALASKA 99929
(907) 874-3304

January 30, 1984

Representative Ron Wendte
Pouch V
Juneau, Alaska 99811

Dear Representative Wendte:

In response to your letter of inquiry dated 01-26-84, regarding the proposed State Crime Lab in Anchorage, I submit the following for your consideration.

Without a doubt the most significant factor in consideration of support of the proposed State Crime Lab is a time factor. Presently this agency, as other agencies within this state, are required to forward all evidence which requires sophisticated analysis to the FBI Crime Lab in Washington, D.C. Through experience I can attest to the fact that results of such analysis by the FBI Crime Lab take eight (8) to eleven (11) weeks from time the evidence is submitted.

I'm sure you can appreciate the frustration experienced when investigating a major case and have to wait eight to eleven weeks for the results. On many cases we have had this time factor proven critical to the investigation as the suspect(s) have left the area and/or state prior to receiving the analysis results. With the realization of a State Crime Lab the important time element time factor can be greatly suppressed with results within a matter of a few days vs weeks.

I fully support this endeavor and hope that you will give this proposal favorable consideration and support.

Sincerely,

William G. Klein
Chief of Police

P.O. Box 6188 ANNEX
Anchorage, Alaska 99502

December 14, 1983

Dear Jim,

Thank you for your recent letter concerning the State Crime Lab and Representative Furnace's Bill. First, let me say that I fully support this measure and am willing to back your efforts. Secondly, I, too, have experienced problems with the current method of having criminalistic tests performed on evidence obtained from a crime scene. At present, all our evidence is packaged & sent directly to the FBI for analysis. Unfortunately, once you send it off, through the mail system, you have to cross your fingers and hope that it (1) reaches the FBI in a timely manner, (2) is not set aside by the FBI due to whatever reason and (3) that it is sent back to you before the trial date.

It is my belief that a great deal of time and effort is waisted by lengthy delays in receiving test results; as it limits the scope of an investigation and decreases the value of evidence itself.

Another factor in support of the State Crime Lab is COST. We are a small department with a limited budget. We do not have the funds to send our evidence off to private laboratories as such tests are usually expensive. At present, our only alternative is to send our evidence to the FBI.

Indeed, Alaska needs its own Crime Lab to assist both State & local agencies in analysing crime scene evidence. With our ever growing population and increasing crime trend, how can we continue without it. The Crime Lab is a tool, indeed an instrument, that Law Enforcement Officers must have inorder to perform their function as a FACT gathering agency. Without carefully analyzed evidence resulting in accurate and irrefutable test results, how can we present the courts with the PROOF necessary to determine GUILT or INNOCENCE!

I intend to contact our area Representative and discuss this matter at length. Would you please forward a copy of the State DPS's September 1982 report entitled "The Development of a Full Service Forensic Laboratory for Law Enforcement in Alaska.

I appreciate your efforts, Jim. One can see that you are truly dedicated to the betterment of Law Enforcement in our State as evidenced by your long relationship with the Justice System.

I don't remember whether I thanked you or not for sending me a copy of your study on the Public Safety functions on the Pribiloff Islands. If not, thank you very much. I used your concept and that of the North Slope Borough to assist me in developing our own Public Safety Operation here in Tanana.

Again, thank you for your recent letter and continued support. If I can be of any further assistance, let me know.

Sincerely,

Ben Maxon, Director
Tanana Dept. of Public Safety

Cordova Department of Public Safety

December 13, 1983

The Honorable Richard I. Eliason
P. O. Box 143
Sitka, Alaska 99835

Dear Senator:

Well, it's just about that time again for the start of another legislative session.

I am writing to remind you that "phase one" of seeing the State-wide crime laboratory become a reality is underway.

As you are aware, the 1983 Session of our Legislature appropriated $402,000 for engineering and architectural pruposes. The contract awarded to GDM Associates of Anchorage.

I understand Representative Walt Furnance prefiled an appropriations bill to fund the lavoratory construction cost.

It is imparative that this bill be passed by both houses and is signed by Governor Bill Sheffield. Also, that the bill's immediate effective date is a very important aspect, as the funds would be available at that time. If not, we are looking at July 1, 1984; the new fiscal year, 1985.

If we get the funding as set out in Mr. Furnance's bill, construction could start in the srping. If the funding is not allocated at the beginning of your new session, it would probably mean another year of delay due to weather.

We at Cordova Police Department appreciated your assistance last year in the "phase one" appropriation, and look forward to your support during this session on this important issue of mutual interest.

Best wishes for the holidays.

Sincerely,

William T. Bagron
Chief

RE: Product Liability Laws for Aviation Gasoline
Research Request 83-249

Merrill Sikorski of your office requested information regarding product liability for aviation gasoline in other states. He expressed a special interest in legislation that would limit the liability of suppliers and distributers of aviation gasoline.

I contacted Chevron USA, the Office of Air Worthiness Standards of the Federal Aviation Administration (FAA), the Aircraft Owners and Pilots Lobbying Association, and the aeronautics and consumer protection agencies in Alaska and five other states. It appears that no states have laws which limit product liability for aviation gasoline. However, several of the agencies I contacted mentioned other issues regarding the quality control of aviation fuel which may be of interest to you.

According to Thomas Horess, manager of the Propulsion Branch of the FAA's Office of Air Worthiness Standards, the FAA has seen no need to federally regulate aviation gasoline in the past. However, since August of 1982, the FAA has authorized the use of high octane automobile fuel in 12 or more models of general aviation engines and airplanes. As a result, concern has increased in several states over liability for auto fuel used in aviation. Automobile fuel normally is not subject to the strict quality controls that assure the purity of aviation gasoline. The FAA stipulates that automobile gas used in aircraft be handled according to the American Society of Testing and Materials (ASTM) standards for aviation gasoline. However, Mr. Horess said that the gasoline industry has difficulty controlling product quality at the gas station distribution level, a problem that has raised concern about product liability for the fuel suppliers.

Pat Chapman, a researcher for the Aircraft Owners and Pilots Lobbying Association, also mentioned the issue of product liability for automobile fuel used in aviation. Mr. Chapman noted that the fuel manufacturers are increasingly concerned over major settlements and awards in product liability lawsuits, but he could find no legislation addressing the issue in other states.

Jim Day of Chevron's public affairs office in Anchorage reported that he was not aware of any efforts to legislate limits to liability for aviation fuel. However, Mr. Day mentioned that Chevron had refused to supply some remote fueling sites in Alaska in instances where facilities were inadequate to assure against fuel contamination. According to Mr. Day, general aviation in Alaska involves unique fuel liability situations which are not likely to have arisen in other states.

Mr. Sikorski indicated that he thought Ohio might have a law limiting the product liability of aviation fuel, but I could find no such law in the Ohio Revised Code or through talking with numerous Ohio state agencies. I contacted aeronautics and consumer protection agencies in four other states with similar negative results.

While no states have limited the liability for fuel products, approximately 15 states have adopted ASTM quality standards for the production and handling of petroleum products, and a few states have developed fuel inspection programs.[1] Otherwise, states have little involvement in regulating fuel quality.

I am still trying to contact the Product Liability Defense Bar, an association of attorneys based in Washington D.C. If they can provide any further information on this issue, I will certainly pass it on to you. However, it appears that no states have passed legislation to limit product liability for aviation gasoline.

If we can assist you further on this or other issues, please feel free to contact us.

NP

---

[1] Brad Parker, investigator for the Alaska Consumer Protection Agency, telephone conversation, December 20, 1983.

MEMORANDUM

RE: HB 509 - Aviation Fuel Liability

The importance of aviation, both commercial and general, to Alaskan communication and commerce cannot be overstated. It is common knowledge that more air miles per resident are flown in Alaska than in any other state; indeed, aviation is the only mechanism by which modern commerce and communication can be undertaken to the vast majority of Alaskan locations.

1. Marketing Aviation Fuels in Alaska.

In order to fuel the ever growing aviation traffic in Alaska, it has become necessary to develop an enormous marketing system to distribute the relatively few gallons of aviation fuel to many geographically diverse locations across the state. However, because of the increasing exposure to liability from the sale of aviation products, many companies have removed themselves from the Alaskan market. Due to the relatively low volume, and geographically diverse, aviation fuel market in Alaska, the increased exposure to liability has resulted in a declining incentive to market aviation fuel in the state.

This is particularly true with aviation gasolines, as opposed to jet fuels. For the most part, jet fuels are used in commercial aviation where the volume sales are high, and the geographical distribution is not as great. Aviation gasoline constitutes a relatively minor portion of the total market for aviation fuels. On the other hand, because of its low volume, the relative multitude of individual sales, and the geographical diversity of the ultimate customers, aviation gasolines account for the greatest exposure to liability in the aviation fuel market.

For example, in 1981, Chevron U.S.A. Inc., the largest marketer of aviation fuels in the state of Alaska, sold a total of 375 million gallons of aviation fuel in the state. Of that total, jet fuel sales accounted for 360 million gallons. Only 15 million gallons of aviation gasoline were sold. As stated before, although aviation gasolines account for only 4% of Chevron's annual aviation fuel sales, these sales provide by far the greatest exposure to liability.

2. Aviation Fuel Refiners - Unprecedented Exposure to Liability.

Aviation fuel refiners are at an unfair disadvantage with respect to the sale of their products as opposed to the sale of other products by other companies. The exposure to liability is much greater than with almost any other product because of the serious consequences of any aviation accident.

The court's development of the strict liability theory for defective products has created a legal situation wherein the refiner is virtually guilty until he proves himself innocent.

Because most refiners are large companies, the Deep Pocket Theory invites plaintiffs' attorneys to join them in actions even were liability is unlikely. Refiners may at times find it more economical to settle a case than spend thousands in defense, even when they believe there is no liability.

Even where the refiner is successful in defending such cases, the court's award of costs and attorneys' fees rarely represents even one-half of the actual expenditures. This, of course, does not even consider the in-house costs of the refiner in investigative and administrative endeavors related to the litigation. In addition, where the court makes a cost award for attorneys' fees and costs incurred in defending such an action, collection of the award is never guaranteed and often is not possible.

Examples of the effect of this increased exposure to liability are not difficult to find in Alaska. In 1980, Texaco quietly withdrew from the aviation fuel market because of the potential liability it faced. This removal prompted a letter from Governor Hammond to Chevron U.S.A. Inc., asking that Chevron do everything possible to remain in the aviation fuel market, and inquiring as to whether there might be any assistance the State of Alaska could render in that regard.

Union Oil Company withdrew from the aviation fuel market in Southeast Alaska sometime ago for the same reason. Others may do the same thing in Southcentral Alaska as a result of the Spernak Airways incident.

In that case, a plane carrying four people crashed on take-off at Merrill Field in Anchorage. It was determined that the cause of the crash was water in the gas lines of the airplane. According to the investigator for the National Transportation Safety Board (NTSB), the source of the water which contaminated the plane's fuel lines was the storage tanks kept by Spernak Airways at Merrill Field. Spernak Airways maintained a $500,000 general liability policy, and has settled the case for the policy limits. However, in spite of the NTSB's findings that the source of the water was the Spernak storage tanks, Union Oil was sued for damages in the amount of $5,000.000.

3. The Use of Barrels in the Distribution of Aviation Fuels.

In an attempt to reduce its exposure to liability, Chevron has declined to place aviation fuel in used barrels for distribution to the popular aviation market. Chevron continues to market aviation fuels in new barrels only in Alaska, and only as an accommodation to the unique reliance this state has on general aviation in remote areas where the most practical means of supply is by barrel. In all other states, Chevron will not sell aviation fuel in a barrel.

In this regard, it should be noted that there is no such thing as a "sealed barrel." All barrels, whether new or used, are susceptible to moisture contamination particularly when they are stored outside in the widely fluctuating temperatures encountered in Alaska. During such fluctuations, when moisture is present on top of the barrel near the bung hole, moisture can be pulled right through the threads on the bung with the expansion and contraction of the barrel. There in thus no guarantee that uncontaminated, clean, dry fuel purchased in a new barrel will remain so when it is stored improperly.

Typical supply routes of aviation fuel in rural Alaska include the following:

A) Direct purchase by the consumer from a Chevron-owned bulk plant - such as the bulk plants located at Kotzebue, Nome and Bethel.

B) Purchase by a Chevron aviation fuel dealer from a Chevron-owned bulk plant and sale by the Chevron aviation fuel dealer to the consumer.

C) Purchase by anyone acting as a "middleman" from a Chevron-owned bulk plant or a Chevron aviation fuel dealer and sale by the middleman to the consumer or to another middleman - such an ultimate sale by the middleman would be of unbranded product.

Chevron has learned that some of its dealers and some "middlemen" who buy aviation fuel from Chevron have (while not be under any obligation to do so) adopted Chevron's policy of declining to deliver aviation fuel in used drums supplied by the customer.

A recent example may help to illustrate the complex supply routes and the impact on rural residents.

Representative Hurlbert lives in Sleetmute which is about 200 miles up the Kuskokwim River from Bethel. The source of petroleum products including aviation gasoline, for this river system is Chevron's bulk plant in Bethel. Avgas can be purchased from Chevron FOB Bethel in new drums or 5 gallon pails or in bulk quantities delivered to a customer's barge or tank truck. There are two barge companies currently serving the river communities.

Sometime last fall Representative Hurlbert apparently had hauled a number of used drums down the river expecting to have the barge operator fill them directly from storage tanks or the barge. The barge operator was not a Chevron aviation fuel dealer but had purchased aviation gas in bulk from Chevron at Bethel. The barge operator, as an independent businessman, apparently adopted Chevron's policy regarding used drums and refused to fill them. Representative Hurlbert had to wait until bulk product was pumped ashore into another customers' tank then move his barrels to that location for filling.

4. Alternate Marketing Options

It should also be noted that Chevron has implemented a new program in the lower 48 states concerning the sale and distribution of aviation fuels. This program could prove deleterious to the flow of Alaska commerce if implemented in this state.

In the lower 48 states, Chevron will deliver aviation fuel only in 10,000-gallon deliveries and only to its own airport dealers that meet its quality specifications. All other wholesale purchasers must take delivery of such fuels in minimum 10,000-gallon allotments at a Chevron bulk plant when Chevron has certified that the carrying vehicle is appropriate for the transport of aviation fuels.

TESTIMONY OF GEORGE DAY
OF CHEVRON U.S.A. INC. BEFORE
THE OUSE LABOR AND COMMERCE COMMITTEE
CONCERNING HOUSE BILL 509
FEBRUARY 2, 1984

Good Morning. My name is George Day, I am the Public Affairs Manager for Chevron U.S.A. Inc. in Anchorage. Chevron markets a complete line of petroleum products throughout Alaska and is the largest marketer of aviation fuels in the state. In 1983, Chevron sold a total of 160 million gallons of aviation fuel in Alaska. Jet fuel sales accounted for 147 million gallons, and only 13 million gallons of aviation gas were sold. For this reason, Chevron is vitally interested in the passage of HB 509.

Chevron has developed an extensive distribution system for supplying aviation fuels throughout the State of Alaska. Chevron recognizes that its primary responsibility is to deliver uncontaminated fuel to the next person in the distribution chain. Quality control is an ongoing process that requires constant supervision and the expenditure of much time and money. Nevertheless, inspection of the fuels for contaminants and for water is relatively easy. In order to demonstrate this, we have brought samples of jet fuel, Avgas 80, and Avgas 100.

[Demonstrate inspection process]

A description of our distribution process to the urban areas and to the bush areas of Alaska should help the committee members of understanding the liability problems faced by an aviation fuel refiner.

[Describe Anchorage process]

[Describe Bethel process]

The development of the theory of strict liability in products liability cases has greatly expanded the liability exposure of an aviation fuel refiner to fuel liability. As you may know, the plaintiff in a strict liability lawsuit need only demonstrate that he was sold a "defective product" by the defendant which caused damage to the plaintiff. The plaintiff is not required to demonstrate that the defendant's conduct in manufacturing or maintaining the product was negligent.

The essential distinction between aviation fuel and other products for which strict liability is imposed is that most other products such as automobiles or furniture or even airplanes are static in their quality once they have been manufactured. Generally speaking, barring unforeseen events, other products remain in the same form as they were immediately after their manufacture. However, the quality of aviation fuel is always subject to incremental change depending on the quality of the handling thereof.

At each stage of the distribution process, contamination is a distinct possibility that must carefully be guarded against. Fuel that is clean and dry going into a storage tank can come out wet, dirty, and/or contaminated depending on the quality of the storage and the method of handling. Once a

refiner has placed aviation fuel in the storage tanks of another person not under the refiner's control, we believe that it is unfair to hold the refiner liable for the continued quality and integrity of that fuel.

Nevertheless, because most refiners are large companies, plaintiffs' attorneys tend to join them in actions even where liability may be unlikely. Refiners may at times find it more economical to settle the case than spend thousands in defense, even when they believe there is no liability. In response to this increased exposure to liability, companies have quietly withdrawn from the aviation fuel market in Alaska. Texaco did so in 1980, and Union Oil Company has pulled out of the aviation fuel market in Southeast Alaska.

Barrels pose a particular dilemma for the refiner. Chevron continues to market aviation fuels in new barrels only in Alaska, and only as an accommodation to the unique reliance the state has on general aviation in remote areas where the most practical means of supply is by barrel. In all other states, Chevron does not sell aviation fuel in a barrel.

It is important to realize that there is no such thing as a "sealed barrel." All barrels, whether new or used, are susceptible to moisture contamination particularly when they are stored outside in the widely fluctuating temperatures encountered in Alaska. During such fluctuations, when moisture is present on

the top of the barrel near the bunghole, moisture can be pulled right through the threads on the bung with the expansion and contraction of the barrel. There is thus no guarantee that uncontaminated, clean, dry fuel purchased in a new barrel will remain so when it is stored improperly.

Obviously, used barrels pose additional problems beyond subsequent contamination. No dealer has the facilities to complete an accurate inspection of barrels prior to refilling them. For these reasons, Chevron declines to refill used barrels with aviation fuel.

These problems combine to create strong incentive to discontinue the present marketing system in the state. For example, in the lower 48 states, Chevron will deliver aviation fuel only in 10,000-gallon deliveries and only to its own airport dealers who meet its quality specifications. All other wholesale purchasers must take delivery of such fuels in minimum 10,000-gallon allotments at a Chevron bulk plant after Chevron has certified that the carrying vehicles are appropriate for the transport of aviation fuels.

It is imperative that the State of Alaska take immediate steps to provide a fair economic climate that would allow the continued distribution of aviation fuels to all areas of the state.

The sole purpose of HB 509 is to create a fair and reasonable business climate for aviation fuel refiners by removing unreasonable exposure to liability. This will go a long way toward assuring adequate supplies to remote geographical locations and to individual customers.

The means selected to achieve this objective are carefully tailored to meet the needs that have been stated. Under HB 509, refiners are still subject to liability when they place fuel directly into aircraft. This is as it should be, since the refiners have total control of the quality of the product up to final delivery.

Except for gross negligence, recklessness or intentional conduct, the refiner is not liable where the fuel is delivered other than directly into an aircraft. The important point to note here is that once title and possession have passed from a refiner, the refiner no longer has control over the integrity of the fuel and should not be held liable therefor.

Aviation fuel refiners will not dismantle quality control programs merely because of the passage of this legislation. It should be again emphasized that refiners are still fully exposed to liability where they fuel airplanes directly. Thus, the dismantling of the quality control program which results in the delivery of contaminated fuel into an aircraft by a refiner would still fully expose the refiner to liability.

Furthermore, even where the deliveries are not made directly into an aircraft, quality control programs will remain. The dismantling of a quality control program, and the use thereafter of little or no care in the manufacture of aviation fuel, may be held to be "gross negligence" under the bill. Thus, the refiners' liability would be maintained in such situations.

HB 509 re-establishes the balance that has often been lost in the development of products liability law. Each entity in the distribution chain must take responsibility for its actions in handling aviation fuel, and must be held responsible for failure to do so properly. Aviation fuel refiners must continue to ensure quality control during the manufacture and distribution of the product. Wholesalers and retailers must also take adequate steps to ensure the continued integrity of the product during their part of the distribution chain. Finally, airlines and private pilots must continue to handle fuel in a safe manner and test for quality before and after each transfer. Only by following such procedures for each fuel transfer can the integrity of the aviation fuel be assured. It is for precisely these reasons that Chevron urges the adoption of HB 509.

Fiscal Note
Analysis
HB 520

February 1, 1984

This bill addresses a limited area of criminal activity where a person uses a computer system or a computer network to commit a crime. Because existing statutes already cover most of the criminal acts set out in the bill, enactment of this legislation will have little, if any, fiscal impact on the Department of Law's operations. This bill's provision making it a crime to use a computer to obtain information with no legal right to do so concerning the credit information of a person clarifies and strengthens existing law.

You have requested a sectional analysis of HB 520, "An Act relating to criminal use of a computer." HB 520 creates the offense of criminal use of a computer (AS 11.46.575), a class C felony. A person commits the offense by knowingly accessing or causing to be accessed a computer for certain purposes listed in the statute. Those purposes include fraud, obtaining property illegally, obtaining or altering credit information, and altering a computer or computer program.

House Bill 520
Fiscal Note Analysis
Prepared by the Division of
Information Resource Planning & Review
Department of Administration

January 23, 1984

The Department of Administration concurs with the intent of this Act. The following modifications are suggested, however, in order to broaden the applicability of the Act:

Sec. 11.46.575(a) (1) be modified to read:

"(1) divising or executing a scheme with the intent to deceive or defraud another person, business, or government entity;"

Sec. 11.46.575(a) (2) be modified to read:

"(2) obtaining money, property, or services with the intent to deceive or defraud another person, business or government entity;"

Sec. 11.46.575(a) (3) be modified to read:

"(3) obtaining information with no legal right to do so concerning another person or business;"

Sec. 11.46.575(a) (4) to be modified to read:

"(4) introducing false information into a computer system or computer network with no legal right to do so and with the intent to damage or enhance the data record of a person or business;"

POSITION PAPER

HB 520

This bill defines certain elements of computer stored data as private and classifies attempts to access, use or modify that data as criminal acts.

The Department of Administration supports this bill as an aid and clarification to administering disciplinary action in the area of data security infringements.

A recent incident pointed out the necessity for clearer statutory instructions in the area of non-authorized data access. This bill represents a step toward clarifying those instructions and lays a base for future statutes if deemed necessary.

January 23, 1984

The Honorable Charlie Bussell
Member, Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Bussell:

We are writing to urge your support of House Bill 520, as introduced by House Speaker Joe L. Hayes.

This legislation would enact a computer crime statute for the State of Alaska and protect consumers from unauthorized access to and manipulation of sensitive computer-based information.

TRW's Information Services Division is one of the country's largest consumer credit reporting operations. We maintain credit information on more than 90 million consumers. We service these consumers through 21 offices and 80 independent credit bureaus, including Credit Data of Alaska, Inc.

We are keenly interested in this issue as it affects consumer credit history information, and we believe that this legislation is in the best interests of the consumer.

I have attached additional information on this issue and a brief description of our consumer credit reporting services.

Once again, we respectfully encourage your support of this measure. Thank you.

Sincerely,

Maureen S. Frisch

November 30, 1983

The Honorable Joe L. Hayes
Member, Alaska State Legislature
Box 1821
Anchorage, Alaska 99510

Dear Representative Hayes:

Tony Phister of the Credit Bureau of Alaska, Inc., suggested I contact you regarding our desire to sponsor legislation in your state dealing with the issue of computer crime. Our hope is that you will agree to author such legislation during your 1984 legislative session.

TRW's Information Services Division is one of the country's largest consumer credit reporting operations. We maintain credit information on more than 90 million consumers and service consumers through 21 offices and 80 independent credit bureaus serviced by TRW.

Computer crime and the unauthorized access to sensitive consumer credit information have become significant concerns to many companies. Unfortunately, existing state statutes are not adequate to deal with this growing problem, and we have successfully sponsored legislation in the states of California and New York to address the issue of computer crime as it relates to consumer credit history information.

To better familiarize you with TRW, our consumer credit reporting services, federal credit reporting laws, and the need for computer crime legislation, I have attached an information packet. I have also included the text of the California Penal Code (subsection 502) on this subject. The code itself deals with the broad subject of computer crime. The law was amended to include the unauthorized access to and manipulation of a consumer's credit history.

I hope you agree that this is an important legislative and consumer issue. We are most anxious to see similar legislation enacted in your state. To further discuss this with you, I will call your office within the next two weeks.

Thank you for your consideration of this matter.

Sincerely,

Maureen S. Frisch, Regional Manager
TRW Inc. Government Relations

A PRESENTATION ON

COMPUTER CRIME LEGISLATION

Prepared for

MEMBERS OF THE LEGISLATURE

THE STATE OF ALASKA

December, 1983

THE NEED FOR COMPUTER CRIME LEGISLATION

INTRODUCTION

Several issues related to the information services industry have led to the need for computer crime legislation.

The computer industry has created a consumer market that has put machines in the hands of hobbyists, and controls in the data processing industry have been reduced thru time-sharing options and other productional facets. While we see individuals invading systems in the news and entertainment mediums, the point is being raised that it will not be long before true criminals are involved in other areas. Unfortunately, this has become a reality. Little publicity is given to these cases of computer crime because they are not always turned over to law enforcement agencies. This is because computer crime statutes, for the most part, are either not in place or insufficient to result in prosecution. With little chance of achieving successful prosectution, or even getting to court, it is not surprising that many companies do not report computer crime.

Because of growing problems and concerns about unauthorized access to and manipulation of computer-based information, it is necessary to enact legislation. After unsuccessful attempts at the national level, it has become necessary to have progressive state legislatures implement legislation on a state-by-state basis.

UNAUTHORIZED ACCESS TO CREDIT INFORMATION

The credit industry has evidenced criminal behavior thru unauthorized access in three basic scenarios:

1. Consumer victimization via stolen access codes.

2. File manipulation.

3. Investigation and collection agency activity using stolen access codes.

Each of these scenarios is elaborated on separately to illustrate the impact of this activity and the need for up-to-date legislation.

Consumer Victimization

Attachment A, "For Sale: Credit Ratings," describes a process of victimization. The act of a consumer obtaining a good credit rating was facilitated by stealing subscriber access codes. The individuals that were selling these packages telephoned legitimate credit grantors subscribing to the credit agency. These individuals represented themselves as calling from the credit agency, usually using the pretext of clearing up a billing problem, or being from the security department. During the conversation the access code is requested and usually provided. This access code enables access to the credit data base to facilitate the process. The buyer of the good credit history uses the good accounts and requests other credit cards. The buyer runs up bills with no intent of paying. The good consumer is left with the issue of clearing up his or her credit history once it has been discovered that someone has used the individual's history.

File Manipulation

Attachment B illustrates the issue of file manipulation. File manipulation is achieved by bribing someone to modify the information contained in files within the bureau or subscriber's premises and the submission of false credit information.

Unfortunately, not all bureaus have controls to prevent this access and many incidents of information modification occur. Once the bad credit history is deleted or modified, the individual applies for new credit accounts. (Controls exist within the TRW system to prevent and/or isolate attempts of this type.)

Even if consumer victimization and file manipulation efforts are successful, most law enforcement agencies will not pursue the case until there has been a loss to a credit grantor.

Investigation and Collection Agency Activity (Attachment C)

Private investigators, lawyers, and repossession agents may, in isolated cases, have a legitimate purpose to access a credit data base; however, most of the major credit agencies do not allow these individuals to subscribe due to the control features required to monitor permissible access. Unfortunately, there have been many cases where individuals wanting this information have either stolen access codes or derived the access code from credit profiles sent to them by other subscribers with the access code on them.

Some collection agencies have acquired access codes in a similar manner. Although collection agencies have legitimate reasons to access a credit bureau, and they are subscribers, some do not use their own access code. The stolen access code is often utilized to reduce costs and increase commissions and agency profits.

A GROWING PROBLEM

According to recent statistics (Modern Office Procedures - March 1983, "Defending Your Computer Room Against Disaster") the average bank robbery is less than $3,000. The average "white collar" embezzlement nets less than $30,000. But the average computer crime is estimated to exceed $600,000, with little chance of detection, prosecution or conviction.

Education has become a key element in the fight against this area of criminal activity, and the United States Department of Justice has opened a specialized four week computer fraud school for F.B.I. agents. The Department of Justice, Sacramento, California, operates a two week course specializing in the same subject. Other municipalities as well as private organizations are currently holding seminars to combat problem areas of detection.

The challenge is to actively prosecute computer crime suspects. A challenge in the sense that the current laws regulating computer access are extremely lacking. Following, are three examples of TRW incidents that illustrate the need for computer crime legislation:

Example #1

An organized ring of credit criminals was established in a large metropolitan area. Although this example was taken from the Western Region, there is an indication that an identical ring is operating in the Eastern Region. One member of the ring provided computer password information to another who used it to gain access to our system. The suspect then retrieved hundreds of credit reports. Through a relocation and file merge system, the suspect was able to alter negative credit information into what appeared to be a positive profile.

The fee charged for this service varied, however, it averaged about $600 per report. This particular case is being actively prosecuted at the writing of this report. The section selected for prosecution was 502 P.C. (California).

Example #2

A collection agency/private investigative firm gained access to computer password information on several Information Services Division subscribers. As such, unauthorized access was made into our system and a total of $65,000 worth of credits were applied for from various east coast subscribers. While working the investigation of this matter, several New York agencies were contacted and each declined investigative jurisdiction. Most felt that it was a civil or federal problem, in that no computer crime bill existed.

Subsequently, the F.B.I. was contacted and consented to continue the investigation. A suspect was identified and prosecution is being actively pursued.

Example #3

A coast-to-coast organized crime ring obtained several thousand blank credit cards. Later, they obtained illegal access into credit systems and retrieved thousands of credit profiles of potential victims. By viewing the reports, account number information was obtained and later embossed on the stolen cards. The total amount stolen from creditors is unknown at this time, but it is believed to exceed $1,000,000. Investigation is continuing.

Crimes by these individuals were made possible through the illegal access to computer files. In each case the criminal simply called a TRW operator and relinquished certain password information which then caused the computer to be accessed.

It is acutely apparent that much has been done in the area of detection, but legislation is now needed for active prosecution.

CALIFORNIA'S COMPUTER CRIME LEGISLATION

SB 648 (California Penal Code 502), of which a copy is attached, was introduced in the California Legislature in March of 1981. This bill modified the penal code to make it a crime to intentionally access or cause to be accessed any computer system or network for the purpose of damaging the credit rating of any person. The bill was sponsored by an individual in the San Diego District Attorney's office, Fraud Division, in response to a situation in San Diego in which an individual's credit file was sold for the purposes of obtaining credit under fraudulent circumstances. (Similar legislation has been enacted in New York.)

Legislative justification for the bill goes on to say:

> "The credit granting sector of private industry is being deluged with false and fraudulent applications for credit. It is not uncommon for individuals and organized groups to systematically apply for multiple credit cards, loans, etc. utilizing fictitious and false names, biographical information, and credit histories. These fraudulent applications are carefully created to fit within the credit grantors' criteria for issuance of credit - such policies which are well known to the applicants. Sophisticated wrinkles are added such as the use of telephone answering services, which have been provided a prepared script to read in case of inquiry by the credit granting agencies. The answering service tells the inquiring party 'that the applicant has been employed at a high salary for five years; that the applicant has successfully paid off a loan on a expensive automobile, etc.'
>
> Under existing law, the credit grantor must suffer a loss before this activity can be filed as a felony. This ridiculous posture does nothing to prevent repeated attempts to obtain credit by fraudulent means. It is likewise discouraging to the credit grantors, who having discovered these activities, bring them to the attention of law enforcement and discover that this conduct is at most a misdemeanor. (Section 532a, California Penal Code)"

ONE STEP TOWARD A SOLUTION

Because of the tremendous growth in computer-based information services and concerns about the unauthorized access to and abuse of this information, it is necessary to adopt legislation. It has become clear that a national computer crime bill has little chance of passage. Some states, though, have passed legislation in this area, and, it is hoped that similar legislation can be passed in other states to facilitate interstate criminal prosecution and standardize penalites.

TRW's Information Services Division is prepared to support your state's activities to enact needed computer crime legislation. We recommend adopting statues similar to those enacted in the States of California and New York (California's statute is attached).

11/1983

CALIFORNIA PENAL CODE - SUBSECTION 502

Definitions; computer system or network; intentional access to defraud or extort, or to obtain money, property or services with false or fraudulent intent, representations or promises; malicious access, alteration, deletion or damage; violations; penalty

(a) For purposes of this section:

(1) "Access" means to instruct, communicate with, store data in, or retrieve data from a computer system or computer network.

(2) "Computer system" means a machine or collection of machines, excluding pocket calculators which are not programmable and capable of being used in conjuction with external files, one or more of which contained computer programs and data, that performs functions, including, but not limited to, logic, arithmetic, data storage and retrieval, communication, and control.

(3) "Computer network" means an interconnection of two or more computer systems.

(4) "Computer program" means an ordered set of instructions or statements, and related data that, when automatically executed in actual or modified form in a computer system, causes it to perform specified functions.

(5) "Data" means a representation of information, knowledge, facts, concepts, or instructions, which are being prepared or have been prepared, in a formalized manner, and are intended for use in a computer system or computer network.

(6) "Financial instrument" includes, but is not limited to, any draft, warrant, money order, note, certificate of deposit, letter of credit, bill of exchange, credit or debit card, transaction authorization mechanism, marketable security, or any computer system representation thereof.

(7) "Property" includes, but is not limited to, financial instruments, data, computer programs, documents associated with computer systems and computer programs, or copies thereof, whether tangible or intangible, including both human and computer system readable data, and data while in transit.

(8) "Service" includes, but is not limited to, the use of the computer system, computer network, computer programs, or data prepared for computer use, or data contained within a computer system, or data contained within a computer network.

(b) Any person who intentionally accesses or causes to be accessed any computer system or computer network for the purpose of (1) devising or executing any scheme or artifice to defraud or extort or (2) obtaining money, property, or services with false or fraudulent intent, representations, or promises shall be guilty of a public offense.

(c) Any person who maliciously accesses or causes to be accessed any computer system or computer network for the purpose of obtaining unauthorized information concerning the credit information of another person or who introduces or causes to be introduced false information into that system or network for the purpose of wrongfully damaging or wrongfully enhancing the credit rating of any person shall be guilty of a public offense.

(d) Any person who maliciously accesses, alters, deletes, damages, or destroys any computer system, computer network, computer program, or data shall be guilty of a public offense.

*** (e) Any person who violates the provisions of subdivision (b) ***, (c), or (d) is guilty of a felony and is punishable by a fine not exceeding five thousand dollars ($5000), or by imprisonment in the state prision for 16 months, or two or three years, or by both such fine and imprisonment, or by a fine not exceeding two thousand five hundred dollars ($2,500), or by imprisonment in the county jail not exceeding one year, or by both such fine and imprisonment.

*** (f) This section shall not be construed to preclude the applicability of any other provision of the criminal law of this state which applies or may apply to any transaction.
